2018.416.002	Golden Wings : A Pictorial History of the United States Navy and Marine Corps in the Air	Caidin, Martin	Here for the first time is a pictorial history of the United States Navy and Marine Corps in the air. It is a saga of men and machines in war and peace, and of the emergence of air-power as the dominant force in the modern Navy. The whole story is here, from the earliest beginnings to Polaris and the supercarriers, with almost half the book devoted to World War II. The book is a companion volume to Mr. Caidin's award-winning "Air Force: A Pictorial History of American Airpower." GOLDEN WINGS is unsurpassed in its field. It is the result of a three-year search for the best possible photographs. Mr. Caidin is the only civilian to explore the complete file of official Navy and Marine photographs in Washington. He also examined thousands of photographs from private and industrial collections. Some of the four hundred photographs included in the book are published here for the first time. Only someone who knows aircraft, pictorial design, and aviation history as well as Martin Caidin could have produced so factual, informative, and handsome a book. Photographs, captions, and the 60,000 words of text are co-ordinated in a superb layout to make GOLDEN WINGS another of Mr. Caidin's major contributions to the literature of the conquest of the air. (from dust jacket flap)
2018.417.001	Classic Fighters : The Inside Story	Bonds, Ray	Spectacular photographs, in-depth development details, specifications and cutaway

Object ID	Title	Author	Summary
			drawings of world's most significant fighter aircraft from World War I to present day. (from back cover)
2018.417.002	America in Vietnam : The Fifteen Year War	Guilmartin, John	Lavishly illustrated with more than 200 dramatic photographs, clearly and vividly recalls the Vietnam conflict. Text written by a noted historian and veteran of the conflict. (condensed from back jacket). Illustrations Selected from the Files of the United Press International
2018.418.001	American Battleship, The	Morison, Samuel Loring	The powerful battleships that have served for over a century with the U.S. Fleet are brought vividly to life in this book. These ultimate naval gun platforms are fully chronicled through exceptional color photographs and archival images. Historical text and photos combine to provide nearly every detail of the 61 ships that sailed under the battleship designation.
2018.418.002	Aircraft : An All Color Story of Modern Flight	Mondey, David	Over 145 full color illustrations of the world's great aircraft trace the staggering developments in the modern history of flight. (from jacket flap)
2018.418.003	Calendar of Significant Events in the Growth and Development of United States Naval Aviation, 1898-1956, A	Bureau of Aeronautics	A brief chronology of significant events in naval aviation has been prepared for the Naval Aviation Meeting of the Institute of the Aeronautical Sciences in San Diego.
2018.418.004	Jutland, 1916	Costello, John	The biggest naval battle in history occurred off the coast of Jutland in the afternoon of May 31, 1916 when the German High Seas Fleet confronted a six-mile line of grey-steel dreadnoughts of the British Grand Fleet. In this momentous 'clash of the Titans' more than 200 warships of the rival navies were involved in a series of bitterly fought actions that lasted throughout the night. For more than a half a century the outcome of the Battle of Jutland has been a subject of controversy. The authors have assembled a new documentary account of the action.
2018.418.005	Jane's Battleships of the 20th Century	Ireland, Bernard	Naval historian Bernard Ireland reveals the fascinating

Object ID	Title	Author	Summary
			background to each class of battleship. Each entry includes comprehensive technical data. Special features investigate what happened when battleships opened fire: why British battlecruisers were so vulnerable to German shellfire, how American radar helped USS Washington sink the Kirishima off Guadalcanal, and when was the Bismarck doomed to die. Acclaimed naval iillustrator Tony Gibbons has painted all classes of twentieth century battleships for this book. Every major battleship is shown in profile, with the 25 greatest battleships illustrated across the full width of the page, with accompanying plan and bow views.
2018.418.006	World Encyclopedia of Battleships, The	Hore, Peter	An illustrated history of battleships and their evolution: pre-dreadnoughts, dreadnoughts, battleships and battlecruisers from 1860 onwards. Over 550 archive photographs of one of the most technologically advanced and complex engineering achievements of mankind.
2018.418.007	Disappearance of Flight 19, The	Kusche, Larry	The harsh light of reality By S. A Troutton, June 30, 2004 - Flight 19 is in someways [sic] the 'Holy Grail' of Bermuda triangle buffs. 5 planes led by a experienced aviator disappear on a 'routine' flight in perfect weather. The first search plane also disappears in broad daylight. Mysterious and garbled radio transmissions that hint at well at anything the writer wants them to hint at. Books have been churned out regurgitating theories from UFOs to Atlantis. Kusche simply does what a 'real' investigator should do. He does not simply recycle others' research, he goes to the source...the military records of the flight, the subsequent investigation and interviews with the surviving families. Like an onion, he peels backs the legends, the half truths, the out and out fabrications to review the knowable facts.

Object ID	Title	Author	Summary
			He makes a strong case for what logically seems to have happened. A lost training flight in bad weather running out of gas in the dark. Ongoing confusion about exactly where they were and freakishly bad radio conditions both played a part. The rescue flight that was seen to explode in midair. A military review that skirted the issue of blame to alleviate the suffering of the victims' surviving families (especially the Taylors, the leader's mother). Clearly this was a personal tragedy but a great 'Mystery' sorry no. Kusche, to me, does not fall into the 'debunker' class, those who automatically reject anything that smacks of the bizarre. He does good research and states the knowable facts. (from Amazon.com) From Don: Avenger (Torpedo bomber). Grumman TBF/TBM Avenger. Mariner bombers. Avenger (Torpedo bomber). Grumman TBF/TBM Avenger. Mariner bombers. Martin PBM Mariner.
2018.421.001	Axis Submarine Successes of World War Two : German, Italian, and Japanese Submarine Successes, 1939-1945	Rohwer, Jürgen	Taken from a wide variety of sources, this is a unique and detailed compilation of German, Italian, Japanese, Romanian, Finnish and Vichy-French submarine successes and claims against Allied and Neutral ships in every theatre of the war at sea. Translation of U-Boot-Erfolge der Achsenma"chte, 1939-1945. The most extensive and reliable data available on Axis submarine victories are presented in this comprehensive reference. First published in 1983 and now revised to reflect information recently uncovered, the book is the product of years of research. Taken from widely dispersed sources, the information offers a detailed compilation of submarine

2018.424.001	USS Midway (CV-41) - A Touch Of Salt - 1976-1978	Begy, C. R. (ed)	Pictorial account of USS Midway, lead ship of its class, activities during the period of 1976 to 1978 including an 89 day South China Sea/Indian Ocean deployment

Object ID	Title	Author	Summary
			commencing in August of 1977. The ship departed from Yokosuka, Japan. There is a 1976 cruise book, and a 1978-79 cruise book. One source on the internet lists 4 deployments in 1976, 3 deployments in 1977, and 2 deployments in 1978. It is difficult to determine which deployments this book covers. Port calls in this book included the Pusan, Hong Kong, Subic Bay, Freemantle (Perth), Karachi, Singapore, Diego Garcia, Bandar Abbas, Misawa, Kadena. Onboard was Carrier Air Wing Five (CVW-5). Squadrons listed in this book but which change with other deployments in 1977 are: VF-161 (F-4N) VF-151 (F-4N) VA-115 (A-6A/B and KA-6D) VAW-115 (E-2B) VQ-1 VMAQ-2 Det. (EA-6A) HC-1 Det.B-1 and B-2 (SH-3G) The following was written by Pete Clayton and Robert L. Broaddus and appears on page 279 of the Midway cruise book for 1978-79: Beginning in May of 1977, VF-151 and VF-161 transitioned to F-4Js and VA-56 and VA-93 started flying A-7Es. VA-115 also exchanged their A-6As and Bs (A-6Bs) for A-6Es. This CVW-5 transition occurred while the ship was in port for its 60 day EISRA (Extended Incremental SRA, a unique modernization concept developed for Midway). The air wing transition was completed in September when USS Coral Sea fighter squadrons VF-191 and VF-194 exchanged their F-4Js with Midway's F-4Ns, prior to Coral Sea returning to Alameda after her 1977 deployment. In late 1977, Midway made an 87 day deployment to the Indian Ocean where she was the principal participant in Midlink 77, an exercise hosted by the Iranian Navy and including representation from Pakistan, Turkey, and the Royal Navy.

2018.424.003	USS Midway (CVA-41) - 1979-1980	Guiam, D. (ed.)	A pictorial account of the general period June 1979 through the end of 1980 for the USS Midway, lead ship of its class. Operations included routine Westpac ops from August 20 - September 14, 1979, an Indian Ocean deployment from 30 September 1979 to 20 February 1980, and a second I.O. deployment from 14 July to 26 November 1980. The first I.O. deployment of the period coincided with the Iranian Hostage crisis and featured 91 consecutive days at sea, the longest continuous at-sea operations by the ship to date. Port visits in the overall period included Hong Kong, Subic Bay, Perth, Mombasa and Korea. Carrier Air Wing Five was embarked with: VF-161 (F-4J); VF-151 (F-4J); VA-93 (A-7E); VA-56 (A-7E); VA-115 (A-6E and KA-6D); VAW-115

2018.431.001	Batfish : The Champion "Submarine-Killer" Submarine of World War II	Lowder, Hughston E.	Author Hughston E. Lowder was a plankowner, radio operator and sonar operator on the USS Batfish (SS-310, a thick-skinned boat of the Balao class) for the full duration of its seven war patrols. He describes the boat and crew members as typical, not great. In under two years she earned a Presidential Unit Citation, nine battle stars, sank fourteen enemy ships and damaged two others. In four days in February 1945 she sank three of the four enemy submarines then in Philippine waters. The book presents the facts in a well written readable style with many excerpts from official logs and reports. As the radio operator young Lowder was ideally placed to monitor official traffic and to know what was happening at most times under the boat's three different skippers. The reader can feel the boredom of uneventful

Object ID	Title	Author	Summary
			patrols, the frustration caused by days and weeks of heavy weather, the nuisance of finding sampans when the boat surfaced, the thrill and disappointment of taking on the Yamato, and the satisfaction of putting down enemy marus and combatants. BATFISH May 30, 2000 By A Customer. This review is based on the 1982 paperback edition comprising 276 pages, ten photographs, no charts and no maps. (from Amazon.com)

2018.431.003	Incredible Attack Aircraft of the USS United States, 1948-1949, The	Zichek, Jared A.	This is the comprehensive story of some of the most radical attack aircraft ever designed to operate from an aircraft carrier. These incredible projects were developed in 1948 to equip the USS United States, an immense 65,000-ton supercarrier that was to have been the core of the Navy's nascent strategic nuclear bombardment capability. Legendary aerospace companies such as Convair, Curtiss-Wright, Douglas, Fairchild, Lockheed, Martin, North American, Northrop, and Republic would each submit proposals to the competitions. Varying widely in appearance, these studies ranged from Douglas's relatively small and modern Model 593 to their unconventional Model 1186 series, which was inspired by the X-3 Stiletto and featured a small parasite aircraft mounted atop a gigantic missile. Recently declassified, details of these fascinating projects are presented here for the first time. (Source: Amazon.com)
2018.431.004	Convair Class VF Convoy Fighter : The Original Proposal for the XFY-1 Pogo	Zichek, Jared A.	The Convair Class VF proposal presented in this book is one of five proposals submitted by various companies to the US Navy Convoy Fighter competition of 1950.

Object ID	Title	Author	Summary
			Convair's submission was successful, resulting in the XFY-1 Pogo. While no great success, it was superior to its chief rival, the Lockheed
2018.431.005	Lockheed Model L-200 Convoy Fighter : The Original Proposal and Early Development of the XFY-1 Salmon, Part 1	Zichek, Jared A.	The Lockheed Model L-200 was one of five proposals submitted to the US Navy Convoy Fighter competition of 1950, which called for a high performance turboprop VTOL fighter to protect convoy vessels from attack by enemy aircraft. this book reproduces part of Lockheed's original proposal for what became the XFY-1 Salmon; the second volume will cover the remainder of the proposal along with the aircraft's early development with NACA.
2018.431.006	Northrop N-63 Convoy Fighter : The Naval VTOL Turboprop Tailsitter Project of 1950	Zichek, Jared A.	The Northrop N-63 was one of five proposals submitted to the US Navy convoy fighter competition of 1950, which ultimately produced the Convair XFY-1 Pogo and Lockheed XFY-1 Salmon. Northrop was one of the three unsuccessful contenders, the others being Goodyear and Martin.

2018.435.001	Over the Horizon	Ridenhour, Luke	A deadly nighttime collision at sea in shark-infested waters; a tense cat-and-mouse encounter with a Soviet aircraft carrier just miles off the Russian coast; aerial engagements across the Korean peninsula against a squadron led by a charismatic South Korean wing commander known as the Scotch General.....For the sailors and aviators serving halfway around the planet on the fabled aircraft carrier Midway as the U.S. Navy's foreign legion in the early 80's, it was just another day in paradise.Over The Horizon is historical fiction based on several significant, but minimally reported, Cold War events in the western Pacific during 1980-1982. Such encounters never made the evening news, but to those in the Navy's foreign legion, they were all too common. In October, 1973, with little fanfare, the United States Navy established its foreign legion on the far side of the planet. Baptized in the deep, cold waters of the Pacific Ocean, it was christened with a harmless, government-issued name: Overseas Family Residency Program. The innocent title allowed sailors' families across fifty states to sleep peacefully as their loved ones served faithfully on the volatile tip of America's sword.The Navy's légion étrangère was based in Yokosuka, Japan, twenty-eight miles south of Tokyo, and its flagship was USS Midway, a World War Two vintage aircraft carrier. Few Americans knew her name, but America's enemies certainly knew who she was, as did America's presidents. Upon initial

Object ID	Title	Author	Summary
			notification of a crisis halfway around the world, the first question the White House asked was always, "Where's Midway?" Based around the USS Midway, a World War Two-era aircraft carrier, high risk adventures were commonplace with the U.S. Navy's unofficial foreign legion in the western Pacific in the early 80's. Fly the A-6 Intruder, an all-weather, low level attack jet so lethal it was never exported to any other country. Befriend Eli, a golf caddy whose lifelong dream was to see over the horizon, and a young Filipino child whose infectious grin was the basis for 'smiling girl village.' From its beginning, the Navy's foreign legion began patrolling the Western Pacific and Indian Ocean on a nearly continuous basis, remaining ever vigilant far from her home of birth. The ship's operating schedule was so grueling, in fact, that her unofficial motto was Semper Separatus — Always Separated. Life in the Navy's foreign legion was never easy, and the price tag was often perilously high, but Midway Magic was always along for the journey.... somewhere over the horizon. About the Author A North Carolina native, Luke Ridenhour is a 1978 graduate of the U.S. Naval Academy. In addition to being designated a Naval Aviator, he earned the U.S. Army's silver parachutist wings and the gold wings of a Naval Parachutist. He was the recipient of the 1989 David S. Ingalls Award, presented annually to the number one flight instructor in the Naval Air Training Command, and was designated a U.S. Navy Proven Subspecialist in Education and Training. During his career, he logged over 6,000 accident-free flight hours, the majority in the A-6 Intruder and A-4 Skyhawk. He logged 455 aircraft carrier landings, including 160 at night, in the Western Pacific, Atlantic, Indian Ocean,

Object ID	Title	Author	Summary
			Mediterranean, and Caribbean theaters of operation. He is a centurion (100+ landings) on the aircraft carrier USS Forrestal (CV-59) and a double centurion on the aircraft carrier USS Midway (CV-41), and was formally recognized for flying a T-2 Buckeye jet with frozen flight controls over 120 miles to a safe landing. 2018.700.001	Power Plant Assembly Engine Mounts Transmission Gearbox Alignment UH-1 Helicopter	Naval Air Systems Command	The UH-1 Iroquois helicopter, manufactured by the Bell Helicopter Company, is a utility type helicopter designed for rescue, personnel transport, equipment and supplies transport, and medical evacuation. This manual provides instructions for organizational level personnel to repair various engine, structural, electrical, and flight control systems on the aircraft. This appears to be a workbook used by the Air Wing. It includes parts of NAVAIR 01-H1AAC-2-1 NAVAIR 01-H1AAC-2-9 NAVAIR 01-H1AAC-2-4 NAVWEPS 01-110HCA-1
2018.700.002	Illustrated Parts Breakdown Main Rotor System Navy Model AH-1W Helicopter	Naval Air Systems Command	This manual provides all essential information and necessary procedures to enable organizational maintenance personnel to accomplish their maintenance functions on the Main Rotor System of the Navy Model AH-1W helicopter manufactured by Bell Helicopter Textron.
2018.700.003	General Information and Conditional Inspections Utility Helicopter HH-1N/UH-1N	Naval Air Systems Command	This manual provides general information and conditional inspections for organizational maintenance of the model HH-1N/UH-1N helicopter manufactured by Bell Helicopter Textron.
2018.700.004	Illustrated Parts Breakdown Structural Repair Navy Model AH-1W Helicopter	Naval Air Systems Command	This manual contains structural repair instructions for model AH-1W helicopter, Bureau Number 162532 and subsequent.
2018.700.005	Maintenance Instructions Instruments Navy Model HH-2D/SH-2F Helicopters	Naval Air Systems Command	This manual provides information required to maintain the instrument systems and components installed in

Object ID	Title	Author	Summary
			HH-2D and SH-2F Seasprite helicopters manufactured by Kaman Aircraft Corporation. There were many variations of the Navy Seasprite: search and rescue, anti-submarine warfare, and Lamps. There were many variations of the Navy Seasprite: search and rescue, anti-submarine warfare, and Lamps.
2018.700.006	Numerical Index and Reference Designation Index Navy Model SH-2F	Naval Air Systems Command	This manual is an Illustrated Parts Breakdown (IPB) intended for the identification and requisition of parts required to maintain the aircraft systems installed in SH-2F Seasprite helicopters manufactured by Kaman Aircraft Corporation. There were many variations of the Navy Seasprite: search and rescue, anti-submarine warfare, and Lamps.
2018.700.007	Maintenance Illustrated Parts Breakdown Flight Control System Navy Model SH-2G	Naval Air Systems Command	This manual is an Illustrated Parts Breakdown (IPB) intended for the identification and requisition of parts required to maintain the flight control system installed in SH-2G Seasprite helicopters manufactured by Kaman Aircraft Corporation. There were many variations of the Navy Seasprite: search and rescue, anti-submarine warfare, and Lamps.
2018.700.008	Maintenance Rotor System Navy Model SH-2G	Naval Air Systems Command	This manual provides organizational level maintenance instructions for the rotor systems installed in SH-2G Seasprite helicopters manufactured by Kaman Aircraft Corporation. There were many variations of the Navy Seasprite: search and rescue, anti-submarine warfare, and Lamps.
2018.700.009	Maintenance Illustrated Parts Breakdown Transmission System Navy Model SH-2G	Naval Air Systems Command	This manual provides organizational level Illustrated Parts Breakdown (IPB) for the transmission system installed in SH-2G Seasprite helicopters manufactured by Kaman Aircraft Corporation. There were many variations of the Navy Seasprite: search and rescue, anti-submarine warfare, and Lamps.
2018.700.010	Maintenance Lighting	Naval Air Systems Command	This manual provides

2019.003.012	USS Midway (CV-41) Wardroom Mess, 1984	USS Midway	Rules for the USS Midway Wardroom Mess. The Executive Officer was Captain W. T. T. Hood.
2019.010.003	USS Midway (CVA-41) - Mediterranean Cruise - 1954	D'Argenio, Raymond M. (ed)	A pictorial account of the deployment of the USS Midway to the Mediterranean Sea in 1954. The ship departed Norfolk on 4 January and returned to Norfolk on 4 August. Port calls included: Gibraltar; Algiers, Algeria; Augusta, Sicily, Italy; Taranto, Italy; Salonika, Greece; Athens, Greece; Cannes, France; Marseilles, France; Barcelona, Spain; Genoa, Italy; Livorno, Italy; Palermo, Sicily, Italy; Naples, Italy; and Tangier, Morocco. CAG-6 was the embarked airwing and consisted of: VF-31 (F2H-2), VF-33 (F9F-6), VF-73 (F9F-6), VA-25 (AD-6/AD-4B), VC-12 Det. 35 (AD-4W) , VC-3 Det. 35 (AD-3Q/4NL), VC-62 Det. 35 (F2H-2P), VC-5 Det. 35 (AJ-1),

Object ID	Title	Author	Summary
			and HU-2 Det. 35 (HUP-2).
2019.301.001	Illustrated Directory of a Century of Flight, The	Bonds, Ray	All of the major historical events in this tremendous history are chronicled in this fact-filled directory that covers both military and civil aircraft, fighters and airliners, helicopters and space shuttles, and the men who flew them. Concise technical details are given for selected key machines marking the most significant advances in aviation history, all superbly illustrated with dramatic action photos.
2019.301.002	Fighter Planes	Brook, Henry	Traces the history of fighter planes from the dogfights of World War I to the missions flown by modern stealth fighters.
2019.301.005	Pacific, The	Mckenna, Bruce C.	"The Pacific tracks the real-life journeys of three U.S. Marines-- Robert Leckie (James Badge Dale), Eugene Sledge (Joe Mazzello), and John Basilone (Jon Seda)--across the vast canvas of the Pacific theater during World War II. The miniseries follows these men and their fellow Marines from their first battle with the Japanese on Guadalcanal, through the rain forests of Cape Gloucester and the strongholds of Peleliu, across the bloody sands of Iwo Jima, through the horror of Okinawa, and finally to their triumphant but uneasy return home after V-J Day"-- Container.
2019.301.006	Sweet Reason	Littell, Robert	Somewhere off the coast of Southeast Asia, the U.S.S. Eugene F. Ebersole—a rusted World War II relic whose best days are far past—patrols the waters on a mission to protect American values in this suddenly-not-so-Cold War. The decrepit destroyer's mission is to apprehend or annihilate anything suspicious, but someone on board is preaching peace and the ship's motley crew is not quite as motivated as its ambitious commander. A darkly comic look at career militarists and other absurdities of war, "Sweet Reason" is a brilliant departure from a

2019.301.007	Black Sheep One : The Life of Gregory "Pappy" Boyington	Gamble, Bruce	Anyone over 50 should recognize the name: leading the WWII Marine Fighting Squadron 214Athe air and ground fighting Black SheepABoyington ("Black Sheep One") racked up the most hits in the Marines, earning the Medal of Honor before being shot down over Japanese territory in 1944. Presumed dead, he spent 20 months in a prisoner-of-war camp, and was released at war's end to the surprise of the nation. Twelve years later, his memoir Baa Baa Black Sheep hit bestseller lists, and six years after that, the book became a hit TV series starring Robert Conrad. Retired naval flight officer Gamble, who has already penned an account of the squad's exploits, here narrows his focus to its most famous exponent. The results are less than heroic. Black Sheep's appeal was in its raciness for its time (in one scene quoted here, Boyington is on his knees "in front of two very gorgeous gams"); one purpose of this book seems to be to fill in the blanks and innuendo, and to detail some years better lost. It's unclear that anyone still cares about these matters, though, and the same is true of the numbing familial detail of the first chapters. But Boyington's military exploits are still of interest to buffs, and here Gamble's expertise comes to the fore. If Boyington, who died in 1988 at 76, had a tendency to fudge or exaggerate, Gamble carefully sets the matter of his actual achievements straight, and they remain impressive. Veterans of the war and fans of the show may want the full story here, but since Gamble assumes Boyington's status rather than rehabilitates it, few others will tune in. (Dec.) (From Publishers Weekly) Copyright 2000 Reed

Object ID	Title	Author	Summary
			Business Information, Inc. --This text refers to the Hardcover edition. From Booklist Gamble's Black Sheep (1998) made it clear that the men of Marine Fighting Squadron 214 were misfits only according to bureaucratic regulations. Their legendary commanding officer, Gregory "Pappy" Boyington, however, was about as unorthodox as one could be and still accomplish anything useful. The product of a catastrophically dysfunctional family, he spent his life fighting a ferocious drinking problem, a string of wives and lovers, and, somewhat more successfully--he won the Medal of Honor for 20-odd air-to-air victories--the Japanese. As World War II loomed, he was about to be thrown out of marine aviation for his drinking and debts. He volunteered for the Flying Tigers and compiled a combat record that made him invaluable. He ended the war a prisoner of the Japanese, and until he died in 1988, he was often a prisoner of alcoholism. Nowadays a reader has to understand Boyington's time and place to tolerate him. Gamble gives us such an understanding, and even so, you may feel slightly hungover at the end of this fine biography. Roland Green Copyright © American Library Association. 2019.301.019	Pearl Harbor : From Infamy to Greatness	Nelson, Craig	The America we live in was not born on July 4, 1776, but on December 7, 1941, when an Armada of Japanese warplanes supported by aircraft carriers, destroyers, and midget submarines suddenly attacked the United States, killing 2,403 men and forcing America's entry into World War II. Author Craig Nelson maps the road to war, beginning in 1914 with the laying of the keel of the USS Arizona at the Brooklyn Navy Yard, following Japan's leaders as they lurched into ultranationalist fascism, and providing a blow-by-blow account from both the Japanese and American perspectives. Backed by 5 years of research, Nelson delivers all the terror, chaos, violence, tragedy, and heroism of the attack in stunning detail and offers surprising conclusions about the tragedy's unforeseen and resonant consequences that linger even today-- Adapted from book jacket.
2019.301.020	Once They Were Eagles : The Men of the Black Sheep Squadron	Walton, Frank E.	About the most famous Marine Corps fighter squadron in history. Tells how and why the squadron was formed, provides breif sketches of every member, and creates a vivid picture of the exciting but deadly aerial sorties over the Pacific.

2019.301.023	Best Little Stories from World War II	Kelly, C. Brian	Best Little Stories of World War II is a journalistic history of World War II in the form of more than 150 vignettes reflecting the war's humor and pathos, triumph and tragedy. Here is the story of the war as it affected soldiers and civilians, leaders and common folk alike - real people who bravely endured the times. While one can never learn or tell all their stories, one can honor their memories by recounting their amazing, inspiring, poignant, ironic, and yes, even pitiful stories in this war to end all wars. Included are such stories as: " Professor William Miller, who collapsed during a 75-mile "death march" in Germany and was saved b the same man who had rescued him from a car wreck in Pennsylvania five years earlier. " Karl Fuchs, a German tank gunner who wrote tender letters to his wife as his Panzer division invaded Russia. " Jim Kilroy, worker at a shipyard in Quincy, Massachusetts, whose say of signing off on his inspections became the morale-boosting slogan for countless GI's: "Kilroy was here." " Kasuo Sakamaki, pilot of a midget submarine who was captured after a failed attempt to infiltrate Pearl Harbor. " "Kitty," the diary of a Jewish teenager in Amsterdam rescued after the war by her father and published in thirty-two languages as Anne Frank: Diary of a Young Girl. These and many more stories

2019.302.001	Douglas TBD Devastator : America's First World War II Torpedo Bomber	Doyle, David	"The Douglas Devastator was the US Navy's first all-metal combat aircraft, the Navy's first airplane with a fully enclosed cockpit, the first aircraft to have hydraulically folding wings, and the first US Navy torpedo bomber to see combat. Although facing staggering losses in the early stages of the war in the Pacific, the brave men flying the Devastator from the decks of such famed ships as Enterprise, Hornet, Yorktown, and Lexington held the line against the enemy. Through carefully researched photos, many of which have never before been published and which are reproduced in remarkable clarity, the history and details of this iconic aircraft are revealed. This clarity, and the large size of many of the photos, coupled with descriptive and informative captions, puts the reader in the skies with this historic aircraft."-Publisher's description. Contents: The XTBD-1 -- The TBD-1 -- VT-3, fleet service begins -- VT-2 service -- VT-3 service -- VT-5 service -- VT-6 service -- VS-42 and VT-4 service -- VT-7 service -- VT-8 service.
2019.302.002	US Navy Aircraft Carriers 1922-45 : Prewar Classes	Stille, Mark	The USS Langley, the first American aircraft carrier, entered service in 1922. Despite being converted into an aircraft tender, it was the first step in a new direction for the US

Object ID	Title	Author	Summary
			Navy and naval warfare. This book covers the design, development and operation of USN aircraft carriers built prior to World War II, including their aircraft and weaponry. It also explains their various successes and losses such as the first carrier vs carrier battle at Midway; the battle of the Coral Sea; the battle of the Philippine Sea; and the Operation Torch landings.
2019.302.003	United States Marine Corps Aircraft Since 1913	Johnson, E. R.	Among the world's various military air arms, United States Marine Corps Aviation occupies a historically unique niche. As the aviation component of a combined-arms expeditionary force, it exists primarily to support Marine combat forces on the ground in the accomplishment of their amphibious assault mission. From the "Banana Wars" of the 1920s up to the present day "War on Terror," Marine aviation has undergone a lengthy fine-tuning process not only in terms of the warfare doctrines and tactics applied to its mission, but also in the types of aircraft needed to accomplish the mission. This work is designed to provide the reader with a comprehensive historical survey, including technical specifications, drawings, and photographs, of every type of fixed and rotary-wing aircraft used by Marine aviation from its humble origins prior to World War I all the way up to its current operations in the second decade of the 21st Century. Contents: Introduction: The emergence of Marine Corps Aviation -- Fixed-wing tactical aircraft -- Fixed-wing transport, trainer and utility aircraft -- Rotary-wing aircraft -- Appendix A: Unmanned air systems -- Appendix B: Aviation-related ships -- Appendix C: Aviation installations -- Appendix D: Aircraft squadrons and aircraft assignments -- Appendix E: Aviation unit organization --

Object ID	Title	Author	Summary
			Appendix F: Organization of expeditionary and amphibious operations -- Appendix G: Aircraft weapons and tactics -- Appendix H: Aviation designations, terms and abbreviations.
2019.302.004	Brewster Buffalo	Braas, Nico	One of the lesser known fighter aircraft of World War 2 was the Brewster Buffalo, or, using the U.S. Navy designation system, the F2A. By some historians the Buffalo is regarded as an outright failure but this is a rating this stubby little fighter definitely did not deserve. In the hands of well-trained pilots of the Finnish air force it was used with great success against invading Russian forces. Also at the Dutch ML-KNIL in the Netherlands East Indies it was the best fighter they used. That the Buffalo lost the battle against Japanese fighters was not to blame on the Brewster fighter, but on the vast area it had to defend in much too small numbers. The same applied to the Buffalo's used in British Commonwealth service in the same area. It suffered also at the U.S. Marines great losses, but here we may conclude the Buffalo version they used was definitely underpowered and no match for the Japanese Zero's. We must realise that the Grumman F4F Wildcat, a design grossly similar to the Brewster fighter, did not score much better during the early stage of the aerial war between the U.S.A. and Japan. This book presents an overview of the development and operational use of the Buffalo with many photo's including a number not published before.
2019.302.005	Brewster F2A Buffalo and Export Variants	Dann, Richard S.	This comprehensive monograph covers the entire history of Brewster's much maligned Buffalo fighter aircraft. The book starts out with the background of the Brewster Aeronautical Corporation and the events that led to the selection of the F2A as the Navy's first monoplane fighter. Following this, each variant of the aircraft is covered in

Object ID	Title	Author	Summary
			detail including all three major variants purchased by the US. Navy as well as the versions purchased by Belgium, Finland, Great Britain, and the Netherlands. Individual squadron histories are also included as they relate to the F2A. Many interviews are included with pilots who flew the Buffalo, some with glowing comments on its performance, while others cast a less than stellar light on the Brewster. It is up to the reader to draw his own conclusions as to where the F2A sits in the history of modern aerial warfare. It is interesting to note that the Brewster 239, as used by the Finnish Air Force during the 1939-1945 period achieved the highest kill ratio of any fighter plane of the war with an impressive 26-1 score. Finland produced many Aces with the Buffalo, including the all-time high scoring Buffalo Ace, Hans Wind with 39 aerial kills, and followed closely by Ilmari Juutilainen with 34. The book is lavishly illustrated with over 300 photos, many of which have never been published. This is the ultimate history of the Brewster Buffalo.
2019.302.006	Vought SB2U Vindicator	Ginter, Steve	The Vought SB2U Vindicator Scout Bomber was the Navy's second production carrier monoplane to fly after the Douglas TBD and for a time was the fastest aircraft in the Navy's inventory. The extremely clean aircraft was a unique blend of the old stick-and-rudder fabric covered construction and that of the new all-metal monoplanes that followed. About half the aircraft was metal skinned and half fabric covered and each fuselage structure was individually hand made from steel tubing. The SB2U was built in three models. The very similar SB2U-1 and SB2U-2 for the US Navy, and the long range

Object ID	Title	Author	Summary
			SB2U-3 for the Marines. Aircraft were also supplied to France and the United Kingdom and are covered in the book. Equipped with folding wings and capable of carrying a 1,000 lb bomb, they were in service from 1938 to 1943. By the time of the Pearl Harbor attack, the Navy Vindicators had all been assigned to the Atlantic fleet, but the Marine SB2U-3 were on the East Coast and at Pearl Harbor and aboard the Lexington for delivery to Midway. The VMSSB-241 Vindicators at Midway saw the planes only combat on 4-to-6 June 1942 during the Battle of Midway and Henderson Field was named after the squadron Commanding Officer who lost his life during the squadron's attack on the Japanese fleet on 4 June. Major Henderson's replacement Major Norris was also lost on 4 June during the squadron's second attack. On 5 June, Captain Fleming was also lost during his attack on the cruiser Mikumo, for which he received the Medal of Honor for his actions. This book has extensive first person narrative from Vought test pilots and USN/USMC pilots as well as the French V-156-F commander gathered by Joe Weathers in 1966 through 1974 when their minds were still sharp and their memories strong. All of which are gone today. A truly interesting read
2019.302.007	Birth of a Legend : McDonnell F4H-1 Phantom II	Thomason, Tommy H.	The F-4 Phantom II is deemed one of the iconic fighter planes from the Vietnam War.
2019.302.008	Martin Mariner Story, The : From XPBM-1 to PBM-5	Braas, Nico	The famous PBY Catalina flying boat has earned a reputation for its durability, reliability and performances that lasted even for years after the end of the Second World War in 1945. It was introduced in 1936 and built in large numbers and saw action on both the Atlantic and Pacific areas in a number of roles. Soon a more modern successor was designed and mass produced, but this type, the Martin PBM Mariner, gained for some obscure

Object ID	Title	Author	Summary
			reasons much less fame than the Catalina. This story will give the mariner a little more credit on its side since it was far from a mediocre aircraft as sometimes stated. Just like the Catalina it was produced in large numbers and saw active service during the Second World War. It performed very well at various tasks like maritime patrol, U-boat hunting, search-and-rescue work and even as a transport plane for military equipment and soldiers. This book will give an insight on the development, the use and the various types and sub-types that were build, illustrated with a lot of photographs; some of these rare and never published.
2019.302.009	Painting Aviation's Legends : The Art of Mike Machat	Machat, Mike	Aviation in the 20th Century changed the world forever, and this book portrays that history through art. In addition to more than 60 original fine art paintings of significant moments in aviation history are the dramatic and compelling personal stories of 30 renowned airmen who blazed new trails and accomplished many significant 'firsts' in American skies. Names like Chuck Yeager, Scott Crossfield, Pete Everest, and Joe Engle grace this list. Add pilots like "Fitz" Fulton, Jack Broughton, and "Tex" Johnston, and you have a veritable "Who's Who" of America's greatest aviation legends. This book gives readers a special "behind-the-scenes" look at the actual process of how aviation art is made. Many projects are shown from the very first "back-of-the-napkin" sketch to the complex developmental steps leading to final engineering drawings and finished paintings. If you've ever wondered how aviation art is created, this book not only explains the process in detail, but shows how the pilots contribute to finished artwork as well. Through his award-winning

Object ID	Title	Author	Summary
			artwork, Mike Machat has documented aviation for the past 40 years in ways never before seen, a process made possible by flying in many of the aircraft he painted, and developing life-long personal friendships with pilots of the aircraft he has preserved for history. 			highest loss rate of any carrier air wing during Vietnam"- (from the publisher) Contents: Rolling Thunder and the numbers game -- The environment -- The naval air war -- Gradual beginnings -- The war heats up -- The bridge campaign -- The POL campaign -- The battle increases -- Fire! -- Long, hot summer -- The Stennis hearings and the climax of Rolling Thunder -- Black October -- In the end -- 1968, the summer of violence -- The POWs -- "Because our fathers lied".
2019.302.020	F-8 & RF-8 Crusader : In Detail & Scale	Kinzey, Bert	(From Amazon) Detail & Scale produced its first book on the F-8 Crusader in 1988, and it was one of the most successful titles in the Detail & Scale Series. This new work, F-8 & RF-8 Crusader in Detail & Scale, brings our original work forward 31 years, enriched with much new content, more photos, mostly in color, and the addition of dozens of illustrations and full color profiles. The photographic collections of some of the very best aviation photographers have been opened to Detail & Scale, and several recognized experts have also contributed to this new book, resulting in a new, more comprehensive, and much larger publication on the Crusader. The book begins with a comprehensive developmental and operational history of the Crusader, a jet fighter that achieved a number of firsts and went a long way towards bringing Naval carrier-based fighters to a level equal to and in some cases surpassing that of land-based fighters. This is followed by a chapter covering every variant of the Crusader produced for the U. S. Navy and Marines, from the prototypes, all of the F-8A/B/C/D/E variants and their upgraded versions after the remanufacture program, the two-seat TF-8A, both the original and remanufactured versions of the RF-8 photo reconnaissance variant, and the XF8U-3

Object ID	Title	Author	Summary
			prototype, often considered the best aircraft ever cancelled. Chapters on the F-8s used by NASA in advanced flight research and the Crusaders used by the French Navy and the Philippine Air Force follow. An area of wholly new content is contained in a chapter on the Crusader in the Vietnam War. A summary of how the Navy and Marines used the F-8 and RF-8 in Vietnam is provided, including a listing of every fighter squadron that flew the Crusader in combat. A comprehensive table lists all of the F-8 carrier deployments carried out by the Navy fighter squadrons as well as the Marine squadrons that flew out of Da Nang Air Base, South Vietnam. The chapter concludes with color photographs and full color profiles of all nineteen F-8s responsible for the confirmed destruction of MiGs in air combat. A comprehensive chapter on Crusader Details, long the hallmark of the Detail & Scale brand, follows. This chapter contains nine sections covering the cockpit, windscreen and canopy, fuselage, landing gear, wings, tail, engine, armament, and ECM equipment details. Complete coverage of almost every square inch of the various variants of the Crusader is provided through 136 high resolution photographs and illustrations (123 in full color). As with all Detail & Scale books, the final chapter covers the scale models of the Crusader, from the early kits that are now only collector's items, to the gamut of kits that have been available for the past half-century. The standard modeling scales of 1/144th, 1/72nd, 1/48th, and 1/32nd are treated as separate sections and the available models in are reviewed. F-8 & RF-8 Crusader in Detail & Scale is an extensively detailed look at the F-8 Crusader, with more color photos of this iconic Navy fighter than any other book ever published. This print edition

			features 105 pages, 259 high resolution photographs (239 in color), 25 full color profiles and 19 Illustrations.
2019.302.021	F-14 Tomcat : Grumman's "Top Gun" from Vietnam to the Persian Gulf	Brown, David F.	(From Amazon) It has been said that "bombers make history; fighters make movies." In the case of the Grumman F-14 Tomcat, both are true. It made history as a fleet defender, reconnaissance platform, and strike fighter. The Tomcat was also featured in such Hollywood classics as Top Gun, The Final Countdown, and Executive Decision, followed by television appearances on JAG. This new illustrated look at the iconic Tomcat features a concise, detailed look at its design and construction, followed by its service in the US Navy from 1975 to 2006. Also covered is a rare look at its use by the Imperial Iranian Air Force, and continued use by the Islamic Republic of Iran Air Force. All USN units that flew the Tomcat are featured, including squadron patches, markings, and nose art. Combat operations are discussed, including aerial combat over Libya, Iraq, and Afghanistan. Part of the Legends of Warfare series.
2019.302.022	Pilot's Flight Operating Instructions Navy Model SBD-6 Airplanes	Chief of the Bureau of Aeronautics	Predecessor of the Navy's NATOPS series of manuals to standardize procedures to improve combat readiness and achieve substantial reduction in the aircraft accident rate. This book was reprinted from original manual with the permission of the U.S. government and details procedures for the Douglas SBD Dauntless aircraft.
2019.302.023	Above Average : Naval Aviation the Hard Way	Smith, D. D. (Donald Dwayne)	Autobiography of U. S. Navy pilot D. D. Smith. His career involved flying 33 different aircraft models, 4826 flight hours, 804 arrested landings and 136 combat missions. A considerable portion of the book deals with combat missions in the Vietnam War. Written in a light-hearted style.
2019.302.024	Admiral John S. McCain and the Triumph of Naval Air	Trimble, William F.	"Admiral John S. McCain and the Triumph of Naval Air

Object ID	Title	Author	Summary
	Power		Power covers the life and professional career of Adm. John S. McCain Sr. (1884-1945) . McCain was among the select few officers who reached the heights of carrier task force command during World War II in the Pacific. Spanning most of the first half of the twentieth century, McCain's life and career highlight the integration of aviation into the Navy, emphasizing the evolution of the aircraft carrier from a tactical element of the fleet stressing sea control to a strategic force capable of long-range power projection."--Provided by publisher.
2019.302.025	Green Ink	Wisely, H. Denny	The biography of a navy fighter pilot who was the first to shoot down two enemy airplanes and flew 350 combat missions during three deployments aboard USS Kitty Hawk. At VX-4 in Pt Mugu, California he tested the F -14 Tomcat and flew the MiG 21 from Area 51. He went on to command a Fighter Squadron from USS Midway home-ported in Japan and then went on to be Flight Leader and Commanding Officer of the Blue Angels. He went on to Command the aircraft carrier USS John F Kennedy. (excerpts from Amazon.com). Former USS Midway crew member.
2019.302.026	Setting the Rising Sun : Halsey's Aviators Strike Japan, Summer 1945	Mahoney, Kevin A.	Covers the air campaign conducted by Admiral Halsey's Third Fleet against the Japanese home islands in preparation for the invasion of Japan.
2019.302.027	Scratch One Flattop : The First Carrier Air Campaign and the Battle of the Coral Sea	Stern, Robert Cecil	"By the beginning of May 1942, five months after the Pearl Harbor attack, the US Navy was ready to challenge the Japanese moves in the South Pacific. When the Japanese sent troops to New Guinea and the Solomon Islands, the Americans sent the carriers Lexington and Yorktown to counter the move, setting the stage for the Battle of the Coral Sea. In Scratch One Flattop: The First Carrier Air Campaign and the Battle of the Coral Sea, historian

Object ID	Title	Author	Summary
			Robert C. Stern analyzes the Battle of the Coral Sea, the first major fleet engagement where the warships were never in sight of each other. Unlike the Battle of Midway, the Battle of the Coral Sea has received remarkably little study. Stern covers not only the action of the ships and their air groups but also describes the impact of this pivotal engagement. His analysis looks at the short-term impact as well as the long-term implications, including the installation of inert gas fuel-system purging on all American aircraft carriers and the push to integrate sensor systems with fighter direction to better protect against enemy aircraft. This essential text on the first carrier air campaign, Scratch One Flattop is a landmark study on an overlooked battle in the first months of the United States' engagement in World War II." -- Provided by publisher. Contents Part 1. Winning the unwinnable war (1936-December 1941) -- Part 2. South to Rabaul (1 January-20 February 1942) -- Beyond Rabaul (21 February-10 March 1942) -- Setting the Board (9 March 1942-23 April 1942) -- Opening moves (23 April-3 May 1942) -- ". . . disappointing" (4 May 1942) -- Chasing shadows (5-6 May 1942) -- Scratch one flattop (7 May 1942) -- Seconds out (8 May 1942) -- Mopping up & dispersal (9-27 May 1942).

Victory at Midway : The Battle That Changed the Course of World War II

D'Angelo, James M.

In the five months after Pearl Harbor, the Imperial Japanese Navy won a string of victories in a campaign to consolidate control of Southeast Asia and the South Pacific. In June of 1942, Japan suffered a devastating defeat at the Battle of Midway and was never again able to take the offensive in the Pacific.

Bringing fresh perspective to the battle and its consequences, the author identifies Japan's operational plan as a major

2019.302.031	Tonkin Gulf Yacht Club : U.S. Carrier Operations off Vietnam	Francillon, René J.	This new revision is in color. Includes a bio of the author who passed away in March of 2018. The crews of the U S carriers and air wings deployed off Vietnam dubbed themselves the "Tonkin Gulf Yacht Club," and this book by a renowned aviation historian fully documents their record in that war in South East Asia. Beginning with an overview

Object ID	Title	Author	Summary
			of carrier operations from 1964 until 1973. the book then details the experience of USS Coral Sea, the carrier that spent the most time in action. This approach permits the reader to understand the wider historical context of the war, while appreciating exactly how the naval air war seemed to those most closely involved. Tabular information includes listings of carriers. their air wings/air groups, combat aircraft inventories, monthly activity levels. monthly sorties. and much additional information that is new to published works. The reference value of the book is further enhanced by extensive appendices detailing the combat roles of every attack and antisubmarine warfare carrier. Dates of deployments, composition of air wings, and air combat victories and losses, with the names of the air crews. ara all listed. Finally, an aircraft appendix covers relevant fixed-wing aircraft and helicopters, including which units operated them, from which carriers, and during which period. (from dust jacket back)
2019.302.032	Racial Incidents Onboard USS Kitty Hawk (CVA-63) and USS Constellation (CVA-64) in 1972 : Report by the Special Subcommittee on Disciplinary Problems in the US Navy	U.S. Congress	The statement that riots, mutinies and acts of sabotage in the Navy are a product of "the time" is not valid. If those in positions of authority who profess such arguments really believe them, they have been negligent in not taking proper precautionary action to prevent to occurrence or to deal with such once they did occur. It is incredible that the Navy was totally unprepared to cope with such incidents as occurred aboard Kitty Hawk and Constellation. In view of the disturbances in recent years in the other military services, the Navy appears to have indulged in wishful thinking, apparently believing that the similar incidents would not happen aboard ship. Also, because of

			a general feeling of permissiveness that we found prevailed among many personnel in the Navy, there is a tendency on the part of many junior officers, chief petty officers, and senior petty officers to take the attitude of "don't make waves." A good example of this was given the members of the subcommittee wherein a chief was preventing some men from going on liberty because of dirty shoes and unkempt appearance. A lieutenant told the chief to let them go on liberty and not rock the boat. This attitude breeds contempt by the seamen for their superiors and sows seeds for the destruction of the system
2019.302.033	USS Enterprise Trial by Fire	Osterbauer, Stan	Something very strange happened on a burning flight deck. Something supernatural. Something unexplainable. This novel is based on a true story. It's a piece of often-forgotten Navy history. An it's a coming-of-age journey set in th environment of the largest warship the world had ever seen. All of the characters in this novel are fictional, but modeled after real persons. Except for scenes on Maui and a few minor events, everything portrayed in this book actually happened. Some events may be composites, or shifted in time or place. This is a memoir of sorts, with a little creative license taken here and there.

2019.302.038	Jet Fighters of the U. S. Navy and Marine Corps -- Part 1: The First Ten Years	Kinzey, Bert	Jet Fighters of the U. S. Navy and Marine Corps is a two-book series that describes the entire history of American Naval jet fighters, from the very beginning when many thought that the onset of military jets would mean the end of naval carrier-based aviation, to today when the fifth-generation stealth jet F-35B/C Lightning II has begun its service with both the Navy and Marine Corps. Both volumes will cover every jet fighter that has ever been produced for the Navy and the Marine Corps, and not only those that were used operationally, but even the aircraft that only made it to the flying prototype stage are included. Also covered by the books is the history of how American aircraft carriers evolved from the ESSEX class ships that won World War II with propeller-driven aircraft to the mighty supercarriers of today. In this first book, Jet Fighters of the U. S. Navy and Marine Corps, Part 1: The

Object ID	Title	Author	Summary
			First Ten Years, author Bert Kinzey describes the first and second generation jet fighters that came on the scene at the end of or shortly after World War II. These jet fighters made their first flights between 1945 and 1954, and the book covers fifteen aircraft arranged according to the chronological order of the date of their first flight. The aircraft covered in Part 1 begin with the McDonnell FH-1 Phantom and go through the other first generation fighters, including the North American FJ-1 Fury, Vought F6U Pirate, McDonnell F2H Banshee, Grumman F9F Panther, Lockheed TO-1 & TV-1 Shooting Star, and the Douglas F3D Skyknight. All seven of these fighters were straight-wing designs that followed the hallmarks of fighter aviation in the propeller age. It was with the second generation of jet fighters that the first steps in improved aeronautical design moved the Navy into an area where significant performance improvements were realized, though problems with engine and weapons development continued provide challenges to establishing naval jet aviation on par with land based fighters. The second generation fighters covered by the book include the Vought F7U Cutlass, Douglas F4D Skyray, McDonnell F3H Demon, Grumman F9F Cougar, American FJ-2/3/4 Fury, Grumman XF-10F Jaguar, Convair XF2Y-1 & YF2Y-1 Sea Dart, and the Grumman F11F Tiger. Jet Fighters of the U. S. Navy and Marine Corps, Part 1: The First Ten Years covers the first ten years of American naval jet fighter aviation in a way that no previous work ever has. The book is profusely illustrated with photographs and artwork. In addition to the general photographs that illustrate the different variants of the aircraft, detail photos that show cockpit interiors and other details are included. Specific attention is paid to providing

Object ID	Title	Author	Summary
			photographs and information on the jet engines used to power the aircraft, and this allows the reader to see how jet engines developed from the small, low-thrust, and often problematic early designs to the more powerful and efficient engines that came later. This new publication is a tremendous follow-on to Detail & Scale's best selling book U. S. Navy and Marine Carrier-Based Aircraft of World War II, which covered the fourteen fighters and eleven dive and torpedo bombers of the United States that were either operational or reached the flying prototype state during the Second World War. Jet Fighters of the U. S. Navy and Marine Corps, Part 1: The First Ten Years features 113 pages, 220 high resolution photographs, 115 of which are in color, and 16 full color profiles.

2019.302.039	Douglas AD/A-1 Skyraider, Part Two	Ginter, Steve	Skyraider Part Two covers the active duty US Navy AD/A-1 squadrons. Because of the extremely prolific usage and sheer numbers of squadrons concerned, the author did not have room to include the Naval and Marine reserve squadrons. Those squadrons will follow in Part Three. From Wikipedia: The Douglas A-1 Skyraider (formerly AD) was an American single-seat attack aircraft that saw service between the late 1940s and early 1980s. The Skyraider had a remarkably long and successful career; it became a piston-powered, propeller-driven anachronism in the jet age, and was nicknamed "Spad", after the French World War I fighter. It was operated by the United States Navy (USN), the United States Marine Corps (USMC) and the United States Air Force (USAF), and also saw service with the Royal Navy, the French Air Force, the Air

			Force of the Republic of Vietnam (VNAF), and others. In U.S. service it was finally replaced by the LTV A-7 Corsair II swept wing subsonic jet in the early 1970s. Covers: Development, Testing, Variants, Test/R&D, CAG, FASRONS, Training Squadrons, Base/Carrier/Air Group/Squadron Hacks & USMC
2019.302.040	USS Abraham Lincoln (CVN-72) - Westpac 1993 - The Legend Continues	Mooney, William (ed.)	Pictorial account of the Westpac and Indian Ocean deployment of the USS Abraham Lincoln (CVN-72) in 1993. The ship departed its homeport of Alameda, CA on 15 June and returned to Alameda on 12 October. The cruise book also covers a dependents cruise and participation in Fleet Week in San Francisco prior to departure. While deployed the ship participated in Operations Southern Watch and Continue Hope. Port visits included Pearl Harbor, Hong Kong, Bahrain, Jebel Ali and Perth. Other highlights included Crossing the Line ceremonies, a Steel Beach Picnic and a Beer Day. CVW-11 was embarked, with: VF-213 (F-14A); VMFA-314 (F/A-18A); VFA-22 (F/A-18C); VFA-94 (F/A-18C); VA-95 (A-6E and KA-6D), VAW-117 (E-2C) VAQ-135 (EA.6B); VS-29 (S-3B); and HS-6 (HH/SH-60H/F).
2019.302.041	History of Marine Fighter Attack Squadron 531	Quilter, Charles J.	This history traces a half century of active service by Marine Fighter Attack Squadron 531. It was a unique squadron because its history demonstrates the complete evolution from night fighter to all-weather fighter to fighter-attack. Its earliest days placed the Marine Corps as the pioneer of all the military Services in night fighting.
2019.302.042	Turning Points in the Pacific, The : The Battle of Midway and the Guadalcanal Campaign	Charles River Editors	Although not as well-remembered as D-Day or even the attack at Pearl Harbor that preceded it, the Battle of Midway was one of the most unique and important battles fought during World War II.

Object ID	Title	Author	Summary
			In fact, the turning point in the Pacific theater took place between June 4-7, 1942 as a Japanese fleet moved a sizable fleet intending to occupy Midway Island and draw the American navy near. Instead, American aircraft flying from three aircraft carriers that had been away from Pearl Harbor in December 1941 got a bearing on the Japanese fleet and sunk four Japanese aircraft carriers, permanently crippling Japan's navy. The Battle of Midway was one of the first major naval battles in history where the enemy fleets never actually saw or came into contact with each other. By the time the Battle of Midway was over, the defeat was so devastating that it was actually kept secret from all but the highest echelons of the Japanese government. Along with the loss of hundreds of aircraft and over 3,000 men killed, the four Japanese aircraft carriers lost, when compared to America's one lost carrier, was critical considering America's huge shipbuilding superiority. However, the Battle of Midway could also have easily turned out differently. Japan began the battle with more carriers, more and better aircraft, and more experienced crews than the Americans, and if the battle of the Coral Sea was any indication, the two sides had irrefutable proof of the dominance of the aircraft carrier in the Pacific. The implications of earlier clashes were now starkly underlined, and the fighting was now clearly about timing. The carrier fleets were incredibly powerful and crucially important, yet at the same time they were hugely vulnerable weapons systems. The protagonists at Midway were putting into practice a newly emerging naval doctrine, one which ultimately meted out a terrible punishment to the side that miscalculated. Carrier versus carrier combat had

Object ID	Title	Author	Summary
			come of age. The Guadalcanal Campaign, which ran from August 1942 to February 1943, was a bitter and protracted struggle that also happened to be a strange and transitional confrontation quite unlike any other in the long Pacific War. In conjunction with the American victory at the Battle of Midway, Guadalcanal represented the crucial moment when the balance of power in the Pacific tipped in favor of the Allies, but the idea that Guadalcanal would be such a significant battle would have come as a surprise to military strategists and planners on both sides. Eventually, nearly 100,000 soldiers fought on the island, and the ferocity with which the Japanese fought was a fitting prelude to campaigns like Iwo Jima and Okinawa. The campaign would include six separate naval battles, three large-scale land clashes, and almost daily skirmishing and shelling. Not surprisingly, the campaign exacted a heavy toll, with more than 60 ships sunk, more than 1200 aircraft destroyed, and more than 38,000 dead. While the Japanese and Americans engaged at sea and in the skies, of the 36,000 Japanese defenders on the ground, over 30,000 of them would be dead by the end of the Guadalcanal campaign, while the Americans lost about 7,000 killed. By the end of the fighting, the Guadalcanal Campaign had unquestionably become a turning point in the Pacific War, representing both the last gasp of the Japanese offensive and the first stirrings of the American onslaught. An important turning point in the Pacific campaign, the victory allowed the United States and its allies to move into an offensive position." The Battle of Midway was called

Object ID	Title	Author	Summary
			the "turning point in the Pacific" during World War II. The Turning Points in the Pacific comprehensively covers the events leading up to the campaign, analyzes the decisions made by the battles' most important leaders, and explains the aftermath of the American victories. Along with a bibliography and pictures of important people and places, you will learn about Guadalcanal like you never have before, in no time at all.
2019.302.043	CVW : US Navy Carrier Air Wing Aircraft, 1975-2015, Vol. 1 : F-4 Phantom II, F-8 Crusader, F-14 Tomcat	Crutch, Mike	COPYRIGHTED EBOOK. Do not copy nor distribute. Permission given to store on our library drive by Mike on 6/30/2018 via email. A brief history of each CVW is given in Chapter One, with emphasis on those fighter squadrons and reconnaissance fighter detachments as assigned to each since 1 January 1975. The CVWs are listed in numerical order, and the narratives for each are headed by a panel detailing MODEX allocation, squadron, aircraft type and dates assigned. The accompanying narratives are biased towards the fighter and 'recce fighter' elements of the CVW, details of major deployments (i.e. cruises) and operations provide context as appropriate to the political, military and regional situations at the time. Mike Crutch's email at publication was a9aviation@gmail.com.
2019.302.044	Great Navy Birds of Lake Michigan, The : The True Story of the Privateers of Lake Michigan and the Aircraft They Rescued	Lyssenko, Taras C.	Over the past thirty-five years, a small team of explorers have surveyed the southern basin of Lake Michigan in search of World War II US Navy aircraft. The aircraft were lost during mishaps that occurred during an almost forgotten naval project which had trained thousands of aircraft carrier pilots between the years of 1942 through 1945. Because the explorers became so proficient at locating and recovering the aircraft, the Director of the National

Object ID	Title	Author	Summary
			Naval Aviation Museum engaged them in an effort to rescue dozens of aircraft for presentation to the American public. Today, these wonderful machines, which had been used by the Greatest Generation to preserve the world's freedom and liberty, are viewed by and touch the lives of millions of people each year. As with all good things in life, it is the end result that is most known. The trials, troubles and effort to get there is almost always forgotten. This book tells the stories of how the exploration team succeeded through an odyssey within a realm no others have dared to enter. This story is told about A and T Recovery, which stands for Allan Olson and Taras Lyssenko Recovery.

2019.302.045	Eternal Zero, The	Yamazaki, Takashi	In Japanese with English subtitles. Labeled Region 3, but is actually NTSC ALL regions. Based on the best-selling novel "The Eternal Zero," the film tells the story of Kyuzo Miyabe, a "Zero" Fighter pilot who died in a last minute Kamikaze mission in the final days of World War II. Kentaro Saeko has failed his bar exam again. Unsure of this way in life, he then learns at his grandmother's funeral that his grandfather the thought of as a blood relative was one of the sort. His real grandfather, Kyuzo Miyabe perished at the end of the World War II in a last minute Kamikaze mission. Kentaro embarks on a search for the identity of his real grandfather. However, his visits to war veteran colleagues of his grandfather yield on the grim report that he was the biggest coward in the whole navy. It appears that despite being a matchless pilot, he was more focused on making it home than taking part in combat. His motivation turns out to have been the singular promise he made to his wife Matsuno to return home to the family at any cost. The big mystery is then why such a man would

			1959 to August 1959. She was homeported in Norfolk, VA? Ports of call and items of interest: family day cruise; Boston; New York; picture of sailors with Bess Myerson, Miss America, 1945; Midshipmen cruise; Nova Scotia; spellout of Hello Halifax; Bermuda; spellout Bermuda 1959; Governor of Bermuda visited the ship; Assistant Secretary of Defense P. McGuire, Admiral Thach and Secretary of the Navy, W. B. Franke; Julie Gibson, Philadelphia, Pa; pictures of USS Cubera, SS-347; Admiral Thach presents "E" to ship; Valley Forge and DD Squadron 28 in formation; 76,000th landing; Task Group Alpha picture; Consul General of Bermuda visits. On board: VS-36 (S2F-1/2) HS-7 (HSS-1/1N) VAW-12 Det. 52 (AD-5W) HU-2 Det. 52 (HUK-1)
2019.302.048	Death Mist, The : Faith Centered Memoir of a Navy Combat Pilot in Vietnam	Fischer, Alan G.	Memoir of a Navy pilot of the Vietnam War era who flew A-6 Intruders off the USS Saratoga in the early 1970s. The author of this self-published book is a USS Midway Museum volunteer.
2019.302.049	USS Antietam (CV-36) - Crossing the Line : The Neptune Party of the United States Ship Antietam - 1947	None Stated	Pictorial account of Essex-class aircraft carrier USS Antietam (CV-36)'s Crossing the Line ceremony held on 7 May 1947 while a unit of Task Force 38 en route to Sydney, Australia; CAPT W.H. Hamilton, USN commanding. Also includes lists of all Enlisted and Officers.
2019.302.050	Battle of Midway : America's Decisive Strike in the Pacific in WWII	Grehan, John	Aware of the sensitivity of the Americans toward Hawaii after the Japanese attack on Pearl Harbor, Admiral Isoroku Yamamoto believed that if he attacked there again, the U.S. commander, Admiral Chester Nimitz, would be certain to commit all his strength to its defense. Yamamoto selected the Naval Air Station on the Midway Atoll for his attack, which was beyond the range of most U.S. land-based aircraft.

Object ID	Title	Author	Summary
			Yamamoto launched his attack on 4 June 1942, but the U.S. had intercepted and deciphered Japanese signals and Nimitz, with three aircraft carriers, knew exactly Yamamoto's plans. Yamamoto had hoped to draw the U.S. carriers into his trap but instead, he sailed into an ambush. The four-day battle resulted in the loss of four Japanese aircraft carriers, the U.S. Navy losing only one. The Japanese were never able to recover from these losses, and it was the Americans who were able to take control of the Pacific. The Battle of Midway, unquestionably, marked the turning point in the war against Japan. From Book Cover.
2019.302.051	USS Oriskany (CV-34) - 1966	Dowling, Jack (ed.)	A pictorial account of the Deployment of the USS Oriskany (CV-34) to the western Pacific in 1966. The ship departed its homeport of San Diego on 26 May and returned home on 14 November. Significant operations included combat air strikes supporting the ongoing Vietnam War and rescue of the crew of a merchant ship aground on Pratus Reef in the South China Sea. A large fire swept the forward part of the ship on 26 October, killing 44 personnel. Port visits included: Pearl Harbor; Yokosuka; Subic Bay; and Hong Kong. CVW-16 was aboard, consisting of: VF-111 (F-8E); VF-162 (F-8E); VA-163 (A-4B); VA-164 (A-4B); VA-152 (A-1H); VAH-4 Det. G (KA-3B); VFP-63 Det. G (RF-8G); VAW-11 Det. G (E-1B); and HC-1 Det. G (UH-2A/B).
2019.302.052	Guadalcanal 1942-43 : Japan's Bid to Knock out Henderson Field and the Cactus Air Force	Stille, Mark	Covers the air campaign associated with the battle to hold Guadalcanal against repeated efforts by the Japanese to dislodge American forces. Contents include a chronology of events, attacker's capabilities, defender's capabilities, campaign objectives, the campaign itself, and a section on analysis and conclusion. Lots of illustrations/photos.

Object ID	Title	Author	Summary
2019.302.053	Battle of Midway Interrogations of Japanese Officials	United States Strategic Bombing Survey	Reprint of interviews with Takahisa Amagi about Hiryu, Taijiro Aoki about Akagi, Susumu Kawaguchi about Hiryu and H. Ohara about Soryu. This could be an extract from Volume one of Interrogations of Japanese Officials. We have volume two.
2019.302.054	CVW : US Navy Carrier Air Wing Aircraft, 1975-2015, Vol. 1 : F-4 Phantom II, F-8 Crusader, F-14 Tomcat	Crutch, Mike	COPYRIGHTED EBOOK. Do not copy nor distribute. Permission given to store on our library drive by Mike on 6/30/2018 via email. A brief history of each CVW is given in Chapter One, with emphasis on those fighter squadrons and reconnaissance fighter detachments as assigned to each since 1 January 1975. The CVWs are listed in numerical order, and the narratives for each are headed by a panel detailing MODEX allocation, squadron, aircraft type and dates assigned. The accompanying narratives are biased towards the fighter and 'recce fighter' elements of the CVW, details of major deployments (i.e. cruises) and operations provide context as appropriate to the political, military and regional situations at the time. Mike Crutch's email at publication was a9aviation@gmail.com.
2019.303.001	Naval Rank : Its Inception and Development : A Short History of the Evolution and Genealogy of the Naval Officer	Fasano, Lawrence	The authors purpose to explain in a condensed manner, the origin of naval officers, how they have been developed and how elevated to constantly higher ranks. its shown how some ranks, grades, and specialties have become obsolete, some superseded by others, some remained stationary, and some finally eliminated.
2019.303.002	Sacred Warriors, The : Japan's Suicide Legions	Warner, Denis Ashton	"Die, die, all of you!" were Vice Admiral Ugaki's chilling words to his own troops! Imperial Japan had become a Shogunate dominated by the ancient samurai code of honor -- that it is better to die than to surrender. And only Japan

Object ID	Title	Author	Summary
			would try to stave off defeat by creating a fanatical suicide squad known as the "Divine Wind." Denis Warner, a war correspondent aboard a ship that suffered two kamikaze onslaughts, and Commander Sadao Seno, assigned to command a midget submarine toward the end of the war bring to life this fascinating, behind-the-scenes account of Japan's "special attack forces." They tell the story of Admiral Onishi, a drinker and gambler who found himself directing young pilots to certain death; Lieutenant Seki, obedient and loyal but filled with torment, who blazed Onishi's suicide trail in the sky; Commander Orita, who launched the first manned torpedo on its path to destruction; and many others who thought death a small price to pay for the glory of Japan. Events are vividly retold through interviews with people from both sides, including those who launched kamikaze attacks and those who survived them. The authors examine the impact these suicide squadrons had on the outcome of the war. Also recounted in detail is a horror even more frightening than the Divine Wind: the development of chemical and biological weapons. The Sacred Warriors is an intriguing story of the death throes of a proud and desperate nation. A VAN NOSTRAND REINHOLD BOOK (from dust jacket flap)
2019.303.003	Classic Airplanes	Boyne, Walter J.	Classic airplanes Hardcover by Walter J Boyne is a wonderful coffee table book full of facts, pictures, and details of classic airplanes! Coverage includes: * The Early Years, 1903-1913 * World War I, 1914-1918

Object ID	Title	Author	Summary
			* The Golden Age of Flight, 1919-1938 * World War II, 1939-1945 * The Jet Age, 1946-Present
2019.303.004	From the Rivers to the Sea : The United States Navy in Vietnam	Schreadley, R. L.	Using interviews and official records, this volume traces the twenty-five year involvement of the United States Navy in Vietnam. A comprehensive one volume history of the U.S. Navy's role in conflict. Based largely on interviews with participants supported by official records, this highly readable account chronicles and analyzes all components of the Navy's twenty-five year involvement.
2019.303.005	Aircraft Flight Instructor, The	Duncan, Richard	A guide to learning how to fly.
2019.303.006	Aerial Warfare : The Story of the Aeroplane as a Weapon	Goodwin, Harold L.	This book deals with the aeroplane only as a weapon. Its a story of the part aircraft play in carrying out the grand strategy of war. Mr. Goodwin gives first a survey of air warfare in the past. Then step by step , and with the aid of dozens of helpful illustrations, he explains each type of plane, how it is used and why, what it can accomplish and where.
2019.303.007	Flag	Friedman, Victor	Collection of photographs, taken by Victor Friedman, of the American flag.
2019.303.008	New Illustrated Guide to Allied Fighters of World War II, The	Gunston, Bill	Describes French, British, Russian, and U.S. fighter planes and recounts their use in combat
2019.303.009	Aviation Art of Frank Wootton, The	Wootton, Frank	This collection encompasses the full range of Wootton's art, from his intense early years as official artist to the RAF during WWII, to the very recent past, including his impressions of Concorde and modern high-tech fighter planes. The book begins with commentary from Wootton on his experiences, illustrated by his line drawings and sketches of the people, vehicles and aircraft that surrounded him. It then goes on to present over 70 exquisite plates splendidly reproduced in full colour.
2019.303.010	Old Ironsides : Eagle of the Sea : The Story of the USS Constitution	Fitz-Enz, David	This book describes the construction of the USS Constitution in 1798, the

Object ID	Title	Author	Summary
			pivotal role it played in the War of 1812, and its years as a training ship for the US Naval Academy. It also describes more recent efforts to restore the ship and put it on display in Boston. This is the story of the oldest warship afloat in the world, the venerable frigate USS Constitution, the cornerstone of the nascent American navy created by act of Congress in 1794. Colonel David Fitz-Enz re-creates the world of sail, when seven knots an hour was considered blinding speed for a warship. In Old Ironsides, Fitz-Enz tells the story of the ship, from its construction to the ongoing restoration efforts that keep it active today
2019.303.011	Autobiography of George Dewey : Admiral of the Navy	Dewey, George	One of America's best known naval heroes whose life straddled two centuries and several stages of naval development, tells his own story George Dewey (December 26, 1837 – January 16, 1917) was Admiral of the Navy, the only person in United States history to have attained the rank. He is best known for his victory at the Battle of Manila Bay during the Spanish–American War, with the loss of only a single crewman on the American side. U.S. naval commander who defeated the Spanish fleet at the Battle of Manila Bay during the Spanish-American War (1898). A graduate of the U.S. Naval Academy at Annapolis, Md., in 1858, Dewey was commissioned a lieutenant three years later. In the U.S. Civil War (1861–65), he served with Union naval forces in the battles of New Orleans (1862) and Port Hudson and Donaldsonville, La. (1863). In 1864–65 he served in the North Atlantic blockading squadron.
2019.303.018	American Combat Planes	Wagner, Ray	Comprehensive study of military aircraft has illustrations and specifications of the significant combat planes developed since World War I

Object ID	Title	Author	Summary
			Comprehensive history of America's military aircraft ever published, with over 900 illustrations. The airplane not only radically altered the whole course of modern warfare, but was itself altered by the very concepts it introduced. American Combat planes describes how, model by model, the various types of aircraft evolved. A Profusely Illustrated History of the Development of Military Aircraft in the United States
2019.303.020	Captain Wears a Cross, The	Maguire, William Augustus	The Captain Wears a Cross by William A Maguire (NY: Macmillan Co; 1943) continues from "Captain Maguire's previous book, 'Rig for Church,' the story of a Navy Padre, ended with the chapter, 'December the Seventh,' a description of the memorable Sunday of the Japanese attack on Pearl Harbor. Now that more can be told, Captain Maguire carries on the account in his new book, 'The Captain Wears a Cross,' giving in greater detail the story of the tragedy at Hawaii. He describes the attack, the many acts of heroism, the grim determination to fight back, together with a confidence on the part of the men which is heart-warming. After that tragic Sunday a large part of Captain Maguire's duty was to trace the lost men, reassure their families and comfort the bereaved. 'The Captain Wears a Cross' carries on the story where 'Rig for Church' left off. Written with the same warm humanity, this autobiography of a Navy Chaplain will be welcomed by the many readers of the previous book."
2019.303.021	American Airplanes : 56 Airplanes Illustrated in Full Color	Walker, John B.	In this book you will find pictures, blueprints, and descriptions of the outstanding American Airplanes-- Commercial, Military and Private. In addition, the progress of flight, from the Wright Brothers" first

			Sakai and Albert Ball.
2019.304.005	Spitfire : Icon of a Nation	Rendall, Ivan	A beautifully designed book with pull-outs in the style of BRUNEL: THE MAN WHO BUILT THE WORLD, telling the inside story of an icon with a special place in the affections of a nation. (from Worldcat). Designed to be the best fighter in the world the creators of the Spitfire married science, technology and art to create both 'a thing of beauty' and a deadly weapon that changed the course of the war. (from Solihull Library).
2019.304.006	United States Navy Airships in World War II	Rosendahl, Charles Emery	As Lighter-Than-Air's most senior officer, and the one who had set the stage for airship operations in the Second World War, Vice Admiral Charles E. Rosendahl became an avid student of the contact and action reports, the war diaries, and the unit histories of the dozen or so Atlantic Fleet blimp squadrons that had come into being. He critically examined this documentation, collecting it in an archive at Lakehurst. This book is partly Rosendahl's synopsis and interpretation of those documents. It is also, in part, his personal recollection of his own role and participation in the wartime airship program. There can be no better-informed, firsthand, and authoritative account of U.S. Navy airships in those wartime years than this one, prepared by the foremost lighter-than-air personality of the times. J. Gordon Vaeth Lieutenant, USNR, (Ret.) (from back cover)
2019.305.001	Sea Power : A Naval History	Potter, E. B. (Elmer Belmont) (ed)	Sea Power contains an extraordinary amount of information about navies and naval warfare, expressed in language that the seaman will appreciate and that the civilian will easily understand. 2019.305.004	Lifting the Fog of War	Owens, William A.	Is the United States an exhausted superpower? Recent military operations in Iraq, Somalia, and Kosovo have resulted in defeat or stalemate. America's key weaponry is fast becoming obsolete, and its men and women in uniform are disenchanted. Yet the U.S. remains committed to a wide variety of conflicts around the world and is increasingly confronted by threats against which traditional military power will be ineffective. As Vice Chairman of the Joint Chiefs of Staff during the first Clinton administration, Admiral Bill Owens saw the challenges facing the U.S. military firsthand. In this trenchant, fascinating, and forward-looking book, Owens explains the full extent of the military crisis and proposes bold new solutions to revolutionize the armed services. Instead of spending trillions of dollars to update obsolete weapons systems, he argues, the Department of Defense should take advantage of recent advances in computing, communications, and satellite technology and bring our military into the Information Age. These changes—collectively known in defense circles as the Revolution in Military Affairs or RMA—would transform the way that America wages war, bringing about a smaller, stronger, and more flexible military better able to monitor enemy forces in real time and thereby counter the "fog of war" that has bedeviled commanders throughout history. Lifting the Fog of War offers both an insider's account of today's armed forces and a vital blueprint for a more effective and affordable military tomorrow. For the paperback

Object ID	Title	Author	Summary
			edition, the author has written a new preface about the Bush administration's attitudes toward military reform.
2019.305.005	Writing of American Military History, The : A Guide	Dept. of the Army	The Writing of American Military History: A Guide should stimulate intelligent probing into the past with an eye to the future. This, in turn, should lead to increased wisdom and, therefore, to wiser decisions and better execution throughout the Army in peace and war. The primary purpose of this text is to bring order out of chaos in the fields of historical study and research in the United States Army. In line with the views of Clausewitz, the principal object of the text is to stimulate a progressive and scientific study of United States military history and leadership with the hope that it will "produce searching rather than inventive minds and cool rather than hot heads," to which the safety of our country can be most advantageously entrusted in time of emergency or war. All officers of the United States Army, but particularly those having historical assignments and undergoing instruction at the service schools and colleges or civilian educational institutions, will find the text helpful. Scholars and others interested in American military affairs may also find it very useful
2019.305.007	Because I Fly : A Collection of Aviation Poetry	Reda, Helmut H.	This book is the most complete, up-to-date collection of aviation poetry ever published. Its sole purpose is to consolidate all of the best in aviation poetry and inspirational verse. Helmut Reda examined over 115 books and magazines in the United States, England, Canada, France, and Australia. He also investigated over 42,500 hits on the Internet. From his exhaustive research, 170 poems were selected covering the period between 1869 and 2001. This collection of poetry

Object ID	Title	Author	Summary
			serves as an exciting introduction to the experience of flight. These poems will fascinate your family and expose them to an expanded world with new dimensions, freedoms, and even the beauty and dangers of flight. For the pilot, the poems will take your spirit aloft to rekindle your bond with other airmen. This collection will help others understand pilots and why they do things in a different way. If you are truly intrigued by flight, this book is for you! (from dust jacket flap)
2019.305.008	Inventing Grand Strategy and Teaching Command : The Classic Works of Alfred Thayer Mahan Reconsidered	Sumida, Jon Tetsuro	Between 1890 and 1913, Captain Alfred Thayer Mahan published a series of books on naval warfare in the age of sail, which won a wide readership in his own day and established his reputation as the founder of modern strategic history. But Mahan's two principal arguments have been gravely misunderstood ever since, according to Jon Tetsuro Sumida. Instead of representing Mahan as an advocate of national naval supremacy, Sumida shows him asserting that only a multinational naval consortium could defend international trade. Instead of presenting Mahan as a man who adhered to strategic principles, Sumida shows that he stressed the importance of an officer's judgment and character formed by the study of history. Inventing Grand Strategy and Teaching Command includes a subject index to all Mahan's published books and an extensive bibliography. This is a book for scholars and students of military and strategic thinking and is a natural for libraries of U.S. service academies and U.S. armed services agencies and organizations. (from Amazon.com)

2019.305.009	Bluejackets' Manual, 2009	Cutler, Thomas J.	From the days of oars and coal-fired engines to the computerized era of the twenty-first century, The Bluejacket's Manual has been an essential part of the American Sailor's sea bag for more than one hundred years, serving as an introduction to the Navy for new recruits and as a reference book for Sailors of all ranks. Written by a Sailor whose decades of naval service included sea duty in patrol craft, destroyers, and aircraft carriers, as both an officer and a white hat, this newest edition has been overhauled to reflect the current state of the ever-evolving U.S. Navy, adding such things as camouflage uniforms, new ratings, and the Navy Professional Reading Program. Primarily intended to serve Bluejackets, the (22nd) edition of this standard guide to the U.S. Navy will also be welcomed by potential recruits, Navy buffs, and a growing number of Bluejacket's Manual collectors. (from Amazon.com)
2019.305.010	Navalism and the Emergence of American Sea Power, 1882-1893	Shulman, Mark Russell	Shulman's study of the emergence of the US Navy ranges from the confused period of sail and steam to that of a full-fledged steel and steam service. Shulman uses most of the most-accepted sources listed in his 20-page bibliography. Missing, however, are two important works--Anthony Preston's Destroyers (CH, Nov'78) and James C. Bradford's Admirals of the New Steel Navy (1990). Still, Shulman's book is an accurate and thoughtful account of the earliest thoughts and development of a growing new navy. There are 15 pages of photographs, but no maps or drawings. The text is supported by 36 pages of very helpful notes. A well-done but not definitive work. Upper-division undergraduates and graduate students. B. H. Groene; Southeastern Louisiana University

Object ID	Title	Author	Summary
2019.305.011	Asian Maritime Strategies : Navigating Troubled Waters	Cole, Bernard D.	Copyright American Library Association. "Asian Maritime Strategies explores one of the world's most complex and dangerous maritime arenas. Asia, stretching from the Aleutian Islands to the Persian Gulf, contains the world's busiest trade routes. It is also the scene of numerous maritime territorial disputes, pirate attacks, and terrorist threats. In response, the nations of the region are engaged in a nascent naval arms race. In this new work, Bernard Cole, author of the acclaimed <i>The Great Wall At Sea</i>, examines the maritime strategies and naval forces of the region's nations, as well as evaluating the threats and opportunities for cooperation at sea. The United States Navy is intimately involved in these disputes and opportunities, which threaten vital American economic, political, and security interests. The most useful geographical designation for maritime Asia is the "Indo-Pacific" and Cole provides both a survey of the maritime strategies of the primary nations of the Indo-Pacific region as well as an evaluation of the domestic and international politics that drive those strategies. The United States, Canada, Russia, Japan, North Korea, South Korea, China, the Philippines, Brunei, Indonesia, Vietnam, Singapore, Malaysia, Myanmar, India, Pakistan, Iran, the smaller Indian Ocean and Persian Gulf states are all surveyed and analyzed. The United States, Japan, China, and India draw the most attention, given their large modern navies and distant strategic reach and the author concludes that the United States remains the dominant maritime power in this huge region, despite its lack of a traditionally strong merchant marine. U.S. maritime power remains paramount, due primarily to its dominant navy. The Chinese

Object ID	Title	Author	Summary
			naval modernization program deservedly receives a good deal of public attention, but Cole argues that on a day-to-day basis the Japanese Maritime Self-Defense Force, as its navy is named, is the most powerful maritime force in Far Eastern waters, while the modernizing Indian Navy potentially dominates the Indian Ocean. Most telling will be whether United States power and focus remain on the region, while adjusting to continued Chinese maritime power in a way acceptable to both nations. No other current or recent work provides such a complete description of the Indo-Pacific region's navies and maritime strategies, while analyzing the current and future impact of those forces. "-- Provided by publisher. "Asian Maritime Strategies explores one of the world's most complex and dangerous maritime arenas. 2019.305.012	Golden Wings : A Pictorial History of the United States Navy and Marine Corps in the Air	Caidin, Martin	Here for the first time is a pictorial history of the United States Navy and Marine Corps in the air. It is a saga of men and machines in war and peace, and of the emergence of air-power as the dominant force in the modern Navy. The whole

Object ID	Title	Author	Summary
			story is here, from the earliest beginnings to Polaris and the supercarriers, with almost half the book devoted to World War II. The book is a companion volume to Mr. Caidin's award-winning "Air Force: A Pictorial History of American Airpower." GOLDEN WINGS is unsurpassed in its field. It is the result of a three-year search for the best possible photographs. Mr. Caidin is the only civilian to explore the complete file of official Navy and Marine photographs in Washington. He also examined thousands of photographs from private and industrial collections. Some of the four hundred photographs included in the book are published here for the first time. Only someone who knows aircraft, pictorial design, and aviation history as well as Martin Caidin could have produced so factual, informative, and handsome a book. Photographs, captions, and the 60,000 words of text are co-ordinated in a superb layout to make GOLDEN WINGS another of Mr. Caidin's major contributions to the literature of the conquest of the air. (from dust jacket flap)
2019.305.013	Victory Through Air Power	De Seversky, Alexander P.	The author of this book shows how air power on land and sea has been the one crucial and deciding factor in all the military events of the war to date, and how air power is bound to determine the final outcome of the war. His analysis of the mistakes that have so far been made in the military aviation- on both sides, and notably by the Germans- make almost fascinating reading about the war to date.
2019.305.014	Bluejackets' Manual, 2002	Cutler, Thomas J.	From the days of oars and coal-fired engines to the computerized era of the twenty-first century, The Bluejacket's Manual has been an essential part of the American Sailor's sea bag for more than one hundred years, serving as

			an introduction to the Navy for new recruits and as a reference book for Sailors of all ranks. Written by a Sailor whose decades of naval service included sea duty in patrol craft, destroyers, and aircraft carriers, as both an officer and a white hat, this newest edition has been overhauled to reflect the current state of the ever-evolving U.S. Navy, adding such things as camouflage uniforms, new ratings, and the Navy Professional Reading Program. Primarily intended to serve Bluejackets, the (22nd) edition of this standard guide to the U.S. Navy will also be welcomed by potential recruits, Navy buffs, and a growing number of Bluejacket's Manual collectors. (from Amazon.com)
2019.305.015	Ethics for the Junior Officer : Selected Cases from Current Military Experience	Montor, Karel (ed)	Case studies designed to help newly appointed officers develop sound ethical judgment for decisions they will make and for the people they will lead. Developed by the USNA Calss of 1964 and presnted to each USNA midshipman since 1994.
2019.305.016	Marine Officer's Guide, The	Estes, Kenneth W.	Designed to serve as a bridge between the individual officer and the great body of regulations, directives, customs, courtesies, traditions and service usages that make up the formal strucutre of the Corps. Although written with newly commissioned officers in mind, its usefulness extends to officers of all grades and seniority.
2019.305.017	Hellcats Over the Pacific : WWII Flight Simulator Pilot's Handbook	Graphics Simulations Corporation	This book was published by Graphic Simulations Corporations to go along with the simulator software that it created. This book includes a copy of The Pilot's Handbook for Navy Model F6F-3, F6F-3N, F6F-5, and F6F-5N airplanes. We also have an ebook of this manual. The second part is Fighter Tactics and Techniques, and part three is Basic Principles of Flight and Performance Characteristics.

2019.305.018	All the Gallant Men : An American Sailor's Firsthand Account of Pearl Harbor	Stratton, Donald	At 8:06 a.m. on December 7, 1941, Seaman First Class Donald Stratton was consumed by an inferno. A million pounds of explosives had detonated beneath his battle station aboard the USS Arizona, barely fifteen minutes into Japan's surprise attack on American forces at Pearl Harbor. Near death and burned across two thirds of his body, Don, a 19-year-old Nebraskan who had been steeled by the Great Depression and Dust Bowl, summoned the will to haul himself hand over hand across a rope tethered to a neighboring vessel. Forty-five feet below, the harbor's flaming, oil-slick water boiled with enemy bullets; all around him the world tore itself apart. In this eyewitness account of the Pearl Harbor attack -- the first memoir by a survivor of the USS Arizona -- 94-year-old Donald Stratton shares his tale of bravery and survival on December 7, 1941, his harrowing recovery, and his determination to return to the fight. Don and four other sailors made it safely across the same line that morning, a small miracle on a day that claimed the lives of 1,177 of their Arizona shipmates -- approximately half the American fatalities at Pearl Harbor. Sent to military hospitals for a year, Don refused doctors' advice to amputate his limbs and battled to relearn how to walk. The U.S. Navy gave him a medical discharge, believing he would never again be fit for service, but Don had unfinished business. In June 1944, he sailed back into the teeth of the Pacific War on a destroyer, destined for combat in the crucial battles of Leyte Gulf, Luzon, and Okinawa, thus earning the distinction of having been present for the opening shots and the final major battle of America's Second World War. As the 75th anniversary of the Pearl Harbor attacks approaches, Don, a great-grandfather of five and

			one of six living survivors of the Arizona, offers an intimate reflection on the tragedy that drew America into the greatest armed conflict in history. (from LOC)
2019.305.019	Encyclopedia of US Military Aircraft, The	Bowman, Martin W.	Detail description of aircraft in four part series: 1941-1945, 1946-1960, 1961-1968, and 1969-1979; with missiles in the Appendix.
2019.305.021	American Fighters of World War II	Anderton, David A.	America came late into World War II, but with her entry the awakened "sleeping giant" brought to bear the most potent industrial and military machine the world had ever seen. Nowhere was this expressed more vividly than in the vast production of superb fighters that poured off the lines and into the ranks of her air force and navy and her allies throughout the world. Mustangs, Thunderbolts, Lightnings, Black Widows, Wildcats and Corsairs: these aircraft winged their way across the continents and oceans of the globe and wrought havoc amongst the dark forces of Hitler's Germany and Imperial Japan. These fighters and their aircrews symbolized the energy, enterprise, skill and spirit of America and played the decisive role in establishing peace in the war-torn world of the 1940s. This volume pays graphic tribute to these men and machines who, after many bloody battles, reigned victorious in the skies of Europe and the Pacific. (from dust jacket flap)
2019.305.022	Consolidated B-24D-M Liberator in USAAF RAF RAAF MLD IAF CzechAF & CNAF Service PB4Y-1/2 Privateer in USN USMC Aeronavale & CNAF, Vol. 1 service	McDowell, Ernest R. 2019.307.004	Chronology of the War at Sea 1939-1945 : The Naval History of World War Two	Rohwer, Jürgen	This complete, indispensable, single-volume reference covers all theaters of the war, the course of events in each, climactic battles, and all the less-well-known actions and skirmishes.
2019.307.005	How to Survive on Land and Sea	Craighead, Frank	A practical guide to the techniques of surviving under primitive or unusual conditions
2019.307.006	Two Souls Indivisible	Hirsch, James S.	An unforgettable true story, this book stirringly recounts the forging of a legendary, heroic bond between two men. Fred Cherry and Porter Halyburton first met in their shared cell in a brutal POW camp in Vietnam. Cherry, an Air Force pilot, was badly injured after his plane crashed; he became the first black officer to be captured by the North Vietnamese. Halyburton, a young Navy flier, was a naive white southerner thrown in as Cherry's cellmate. Their captors hoped close quarters would inflame American-bred racial tensions and break both men. Instead, as Cherry was nursed back to health, a friendship grew strong. The intense connection would sustain both men through the war and throughout their lives. Inspiring, heartbreaking, and remarkable, this story shows how good people can achieve greatness in the most hellish of circumstances.
2019.307.007	Thunder Below! : The USS Barb Revolutionizes Submarine Warfare in World War II	Fluckey, Eugene B.	From Publishers Weekly: The USS Barb was the Navy's most successful submarine in WW II. Operating mainly in the South China Sea, the Formosa Strait and the forever mysterious Sea of Okhotsk, the Barb sank at least 29 Japanese ships and

Object ID	Title	Author	Summary
			climaxed its final patrol with an audacious commando raid on land during which the crew destroyed a 16-car train. This was the sole U.S. military landing on Japanese soil during the war. Drawing on ship's logs, letters, interviews, diaries and his own memory, Fluckey, a retired rear admiral, reconstructs every attack by and against the sub from its eighth through its 12th and last patrol. This was the 15-month period when he served as the Barb's skipper, winning the Medal of Honor and four Navy Crosses for his daring exploits. Fluckey is a fine writer with a lively, colorful style. His book is packed with action and suspense and is rich in details about the day-today operation of a submarine in combat. Photos. Military Book Club main selection. Copyright 1992 Reed Business Information, Inc. --This text refers to the Hardcover edition. From Library Journal: Medal of Honor holder Fluckey relates the story of his wartime command, U.S. submarine Barb , in a well-told and -researched narrative of undersea resourcefulness and courage. Barb set an unparalleled record of exploits in the naval war against Japan, and Fluckey has used both U.S. and Japanese naval records to re-create the vessel's story. The quality of his writing is far above the usual wartime memoir. This title will appeal to readers of both military history and Tom Clancy-style technothrillers. Highly recommended for World War II collections. Military Bk. Club main selection.-- Stanley Planton, Ohio Univ. Chillicothe Lib. Copyright 1992 Reed Business Information, Inc. --This text refers to the Hardcover edition. (from Amazon.com)

2019.307.010	Red Sun Setting : The Battle of the Philippine Sea	Y'Blood, William T.	The author has written the definitive account of what many regard as the most controversial conflict of the war in the Pacific, the Battle of the Philippine Sea. Much of the book deals with the aerial aspects of this great naval conflict, from the dogfights, to the persistent attacks on the Japanese carriers, to the frantic efforts of the returning fliers to land on friendly carriers.. This book satisfies the need for an intensive study of what many believe to be a major turning point in the Pacific War. It tells the story of this great battle from the viewpoint of the fliers and sailors who were there on the firing line.

2019.307.013	Flying Tigers : The Untold Story of the American Pilots Who Waged a Secret War Against Japan	Kleiner, Sam	"The thrilling story behind the American pilots who were secretly recruited to defend the nation's desperate Chinese allies before Pearl Harbor and ended up on the front lines of the war against the Japanese in the Pacific. Sam Kleiner's Flying Tigers tells the story of the group young American men and women who crossed the Pacific before Pearl Harbor to risk their lives defending the embattled forces of Chiang Kai-Shek's China. These 300 individuals were effectively paid mercenaries, secretly recruited by a mysterious shell company that the federal government had created to circumvent its official stance of non-intervention in the war. Drawn from across the armed services by the prospect of seeing the world and earning a good salary, they traveled to Burma under false identities in the late summer and fall of 1941 and began training there under legendary and leathery general Claire Chennault. The pilots first saw action twelve days after the bombing of Pearl Harbor, and for the next seven months performed an invaluable strategic service by keeping the Japanese occupied in China and thus enabling the United States to build up its armaments before fully engaging in the conflict. For their daring exploits and remarkable string of victories, they became known as the Flying Tigers"-- Provided by publisher. Contents: Dancing in the sky -- Meeting the princess -- The Rape of Nanking -- The international squadron -- Exile in the Chinese hinterland -- An air unit for China -- Training in Toungoo -- Wartime -- Legends in their own time -- Christmas in Rangoon -- Burmese days -- Aerial guerrilla warfare --

Object ID	Title	Author	Summary
2019.307.014	Airborne Espionage : International Special Duties Operations in the World Wars	Oliver, David	Last stand -- Black sheep down. At the outbreak of the First World War in 1914, the transport of 'spies' across enemy lines by aircraft was not regarded as a priority. In fact, there was no formal organization for these flights and no communications network between the air forces and their agents - apart from homing pigeons and the occasional telephone call. The situation had not improved to any great extent by the outbreak of the Second World War in 1939. Although dedicated air units had been established to fly the spies - or 'agents' as they were then known - their aircraft were hand-me-downs and their aircrews considered the 'Special Duties' (SD) role as a poor third to the more glamorous worlds of fighter and bomber operations. However, the tasks undertaken by these men and their aircraft were often more hazardous and demanding than any other type of wartime flying. The Second World War saw the rapid development of infrastructures by the Allies to support their SD operations, mirrored in other combatant nations' activities. Operating in all weathers, invariably at night, often at low level and usually without fighter escort, the SD squadrons and units paid a heavy price in aircrew killed and missing. By their very nature, these operations went unreported in wartime and for some considerable time thereafter. The exploits of British and Commonwealth, American, Free European, Soviet, German, Italian and Japanese airmen and units are recorded in this compelling narrative account.
2019.307.015	Heritage of Wings, A : An Illustrated History of Naval Aviation	Knott, Richard C.	After a decade of research, naval aviator, author, and editor Richard Knott traces the difficult integration of a suspect new invention into the hidebound battleship navy, its hard-won acceptance in battle, and its momentous role in world events. His landmark

2019.307.017	John Paul Jones : Commemoration at Annapolis, April 24, 1906	Stewart, Charles West	John Paul Jones (July 6, 1747 – July 18, 1792) was a Scottish sailor and the United States' first well-known naval fighter in the American Revolution. Although he made enemies among America's political elites, his actions in British waters during the Revolution earned him an international reputation which persists to this day. He later served in the Imperial Russian Navy. During his engagement with HMS Serapis, Jones uttered, according to the later recollection of his first lieutenant, the legendary reply to a taunt about surrender from the British captain: "I have not yet begun to fight!" (from Wikipedia)

2019.309.002	American Bomber Plane, The	Williams, Amy E.	(scanned from dust jacket flaps; needs proofreading;) Airplanes are such formidable weapons in modern combat that it seems incredible military experts once believed they would never be suitable for bombing missions. In fact, at the start of World War I, the few planes that saw action were considered neither robust enough to reliably deliver a heavy load of bombs to a target, nor fast enough to escape pursuing enemies. Opinions changed in 1918 when the Glenn L. Martin Aircraft Company contracted with the United States government to build the Martin MB-1, a biplane that could attain a speed of over 100 miles per hour and carry a bombload of more than 1,000 pounds. The American bomber was born, and warfare was never the same again.

Object ID	Title	Author	Summary
			The American Bomber Plane traces the rapid evolution of the bomber plane from flight of fancy to tactical reality. Packed with stunning photographs and illustrations, this book tells the fascinating story of the bomber plane's development as a crucial military weapon virtually since the dawn of aviation history. In 1903, the Wright brothers achieved the millennia-long dream of powered human flight. Within five years they were applying their new technology to manufacturing planes for the U.S. Army. By the time the United States entered World War I in 1917, however, the nations of Europe had become the world leaders in the development of military aircraft. The need for warplanes and trained pilots in the United States was immediately apparent, laying the groundwork for subsequent decades of technological innovation in military aviation. Today, U.S. manufacturers create some of the most sophisticated aircraft in the world. The American Bomber Plane includes in-depth information about the design and development of forty groundbreaking bomber planes A that have made an impact on modern warfare and helped shape history in the process. Featuring the stunning renderings of artist Ted Williams as well as a wealth of full-color and black-and-white archival photos, The American Bomber Plane brings to life some of the most legendary U.S. warbirds, Ted Williams Ted Williams is an award-winning illustrator and noted aviation historian. Celebrated for his distinctive style and historical accuracy, his work can be seen in many magazines, journals, and books. He also creates custom visual communications and private commissions on a wide range of subjects for a diverse

2019.314.004	Honorable Exit : How a Few Brave Americans Risked All to Save Our Vietnamese Allies at the End of the War	Clarke, Thurston	A MAIN SELECTION OF THE MILITARY BOOK CLUB A groundbreaking revisionist history of the last days of the

Object ID	Title	Author	Summary
			Vietnam War that reveals the acts of American heroism that saved more than one hundred thousand South Vietnamese from communist revenge. In 1973 U.S. participation in the Vietnam War ended in a cease-fire and a withdrawal that included promises by President Nixon to assist the South in the event of invasion by the North. But in early 1975, when North Vietnamese forces began a full-scale assault, Congress refused to send arms or aid. By early April that year, the South was on the brink of a defeat that threatened execution or years in a concentration camp for the untold number of South Vietnamese who had supported the government in Saigon or worked with Americans. Thurston Clarke begins Honorable Exit by describing the iconic photograph of the Fall of Saigon: desperate Vietnamese scrambling to board a helicopter evacuating the last American personnel from Vietnam. It is an image of U.S. failure and shame. Or is it? By unpacking the surprising story of heroism that the photograph actually tells, Clarke launches into a narrative that is both a thrilling race against time and an important corrective to the historical record. For what is less known is that during those final days, scores of Americans--diplomats, businessmen, soldiers, missionaries, contractors, and spies--risked their lives to assist their current and former translators, drivers, colleagues, neighbors, friends, and even perfect strangers in escape. By the time the last U.S. helicopter left Vietnam on April 30, 1975, these righteous Americans had helped to spirit 130,000 South Vietnamese to U.S. bases in Guam and the Philippines. From there, the evacuees were resettled in the U.S. and became American citizens, the leading edge of one of America's most successful immigrant groups.

Object ID	Title	Author	Summary
			Into this tale of heroism on the ground Clarke weaves the political machinations of Henry Kissinger advising President Ford in the White House while reinforcing the delusions of the U.S. Ambassador in Saigon, who, at the last minute, refused to depart. Groundbreaking, page-turning, and authoritative, Honorable Exit is a deeply moving history of Americans at a little-known finest hour. Terms of use Descriptive content provided by Syndetics™, a Bowker service. (Nimitz Library) One mention of USS Midway (CVA-41) on page 365.

2019.314.005	Utmost Savagery : The Three Days of Tarawa	Alexander, Joseph H.	"The Bloody Conquest of Tarawa in November 1943 by the newly created Central Pacific Force was the first trial-by-fire of America's fledgling amphibious assault doctrine against a heavily fortified objective. Described by one of the survivors as "a time of utmost savagery," the incredibly violent battle lasted for three days and left 6,000 men dead in an area no bigger than the ground occupied by the Pentagon and its parking lots." "This fresh account of the harrowing clash by Col. Joseph Alexander reflects years of research into primary sources, new translations of Japanese documents, and interviews with survivors. A Marine combat veteran himself, Colonel Alexander presents a masterful overview of the brutal engagement and clarifies its significance." "The book portrays the battle's full flavor: the decisions, miscalculations, extreme risks, lost opportunities, breakthroughs, and breakdowns. As the battle rages, much of the narrative comes from the troops themselves - Japanese and American - often fighting for the same miserable knob of sand and coral." "The Battle

2019.315.003	Anchor, The -- Company 61-471	George, Charlie C. (ed.)	'Yearbook' for Company 61-552 of the Naval Recruit Training Center at San Diego, CA. Contains history and description of activities conducted at the training center with a section at the end on

Object ID	Title	Author	Summary
2019.315.004	USS Dubuque (LPD-8) - Western Pacific Cruise - 1972-73	Winowicz, S. (ed.)	the particular graduating class. A pictorial account of the deployment of the USS Dubuque (LPD-8) to the western pacific Ocean in 1972-73, 10 November 1972-16 August 1973. The ship departed its homeport of San Diego, CA on 10 November and returned to the same port on 16 August the following year. Significant operations included support to MARHUK logistics interdiction off Hon La, DRV from 8 December to 18 January and Operation Endsweep in Haiphong Harbor involving the sweeping of live mines for the first time using USMC CH-53 helicopters from 18 February to 18 July as part of Task Force 78. Port visits included Subic Bay and Kaoshung, possibly Hong Kong and a port in Kyushu.
2019.316.001	USS Michael Monsoor (DDG-1001) - Commissioning	None Stated	Commissioning program for the USS Michael Monsoor (DDG-1001). Includes Congratulatory letters from the Secretary of Defense and high-ranking naval leaders, an illustrated timeline from keel-laying through commissioning, biographies on assembled dignitaries and guests, and color photographs of each commissioning crewmember. Also schedule of events, description of ship's crest, dedication to the ship's namesake, etc.
2019.317.001	Naval Ships' Technical Manual, Chapter 588 : Aircraft elevators	Naval Sea Systems Command	Aircraft elevators are designed primarily to transport aircraft between the hangar deck and the flight deck. They are also used to transport cargo and equipment. Aircraft elevators are found on aircraft carriers and on some amphibious assault ships such as LHAs, LPHs. and LHDs. All aircraft elevators use hydraulic engines, sheaves and wire ropes to lift and lower the platform. Inboard and deck edge are the two major types of aircraft elevators. Contents: Section 1 : Functional Description Structure

2019.317.002	Nomenclature of Decks : Specifications for Numbering Watertight Compartments : Specifications for Labeling for Vessels of the United States Navy	Bureau of Construction and Repair	Describes naming, numbering and labelling of decks on ships.
2019.317.003	History of the U.S. Marine Corps Operations in World War II, Vol. 1 : Pearl Harbor to Guadalcanal	Hough, Frank O.	This book is the first of a projected 5 volume series covering completely, and we hope definitively, the history of Marine operations in WWII. Vol. 1 sketches briefly the development of the Marine Corps' amphibious mission from its inception and then carries the story of WWII through Guadalcanal.
2019.317.004	History of the U.S. Marine Corps Operations in World War II, Vol. 2 : Isolation of Rabaul	Shaw, Henry	This book, the second in a projected five-volume series, continues the comprehensive history of Marine Corps operations in World war II. In the converging drives that made the Japanese fortress Rabaul their goal--one under Navy command and the other under Army leadership--Marines played a significant part well out of proportion to their numbers.
2019.317.005	History of the U.S. Marine Corps Operations in World War II, Vol. 3 : Central Pacific Drive	Shaw, Henry	This book, the third in a five-volume series, continues the comprehensive history of Marine Corps operations in World War II. During the period covered in these pages, we learned a great deal about

Object ID	Title	Author	Summary
			the theory and practice of amphibious warfare. It was in the Central Pacific that the majority of Fleet Marine Force units saw action. Many of the senior officers among the prewar teachers and planners were the commanders who led the forces afloat and ashore in the Gilberts, Marshalls, and Marianas
2019.317.006	History of the U.S. Marine Corps Operations in World War II, Vol. 4 : Western Pacific Operations	Garand, George W.	The period covered by this history, essentially from mid-September 1944 to late March 1945, covers the continuation of the United States drive from the Central Pacific to the Western Carolines and the Volcano-Bonin Islands at the very doorstep of Japan. The military operations describe in detail two of the major amphibious campaigns in the Western Pacific, Peleliu and Iwo Jima. In addition, the little-known exploits of Marine artillery and air in the Philippines and the accomplishments of Marine flying squadrons in the reduction of enemy positions in the Central and Western Pacific are covered.
2019.317.007	History of the U.S. Marine Corps Operations in World War II, Vol. 5 : Victory and Occupation	Frank, Benis M.	These pages cover Marine Corps activities in the Okinawa invasion and the occupations of Japan and North China as well as the little-known story of Marine prisoners of war. The book relates the Corps' postwar demobilization and reorganization programs as well. This book presents an overview of the salient facts concerning Marine Corps campaigns in the Pacific War first discussed in the previously published volumes of this series.
2019.317.008	Marines and Helicopters, 1962-1973	Fails, William R.	FOREWARD: This history traces the development of helicopters in the Marine Corps from 1962 to 1973 and is the second in a series of two volumes which between them cover the story of Marines and helicopters from 1946 to the present. In the period covered by this volume, the Marines at last acquired helicopters fully capable of carrying out an

Object ID	Title	Author	Summary
			amphibious vertical assault, and they further elaborated their helicopter doctrines and tactics. In the Vietnam war, pilots and machines met and surmounted the test of actual combat. The documentary basis for this monograph was primarily the official records of the Marine Corps and Navy Department, but considerable use was made of interviews and correspondence with key individuals involved in all phases of helicopter development. The author, Lieutenant Colonel William R. (Bob) Fails, USMC (Ret), received his Bachelor of Arts degree in English from Hiram College, Hiram, Ohio, and his Master of Business Administration in Financial Management from The George Washington University, Washington, D.C. His Marine Corps aviation experience includes tours with fixed-wing fighter and attack squadrons, as a flight instructor, and as a helicopter pilot and aircraft maintenance officer. He served in Vietnam in 1965-66 with HMM-263 and again in 1970-71 as S-4 of MAG—16 and facility manager for Marble Mountain Airfield. He came to the History and Museums Division in 1973 from the 34th MAU in the Mediterranean, in which he had been Executive Officer. Now retired, Lieutenant Colonel Fails resides and works in Tempe, Arizona. Comment copies of the manuscript for this volume were sent to many individuals involved with both the conceptual and operational aspects of Marine helicopter development. In association with Lieutenant Colonel Fails, Dr. Graham A. Cosmas incorporated these comments and edited the manuscript for printing. Dr. Cosmas received his PhD degree in history from the University of Wisconsin and joined the staff of the History and Museums Division in

			December 1973 after teaching at the University of Texas and the University of Guam. The History and Museums Division welcomes any comments on the narrative and additional information or illustrations which might enhance a future edition.
2019.317.009	End of the Saga : The Maritime Evacuation of South Vietnam and Cambodia	Muir, Malcolm	As the decades-long struggle in Southeast Asia came to a climax in the spring of 1975, the United States Navy and Marine Corps saved thousands of U.S. citizens and pro-American Vietnamese and Cambodians from victorious Communist forces.
2019.317.010	U.S. Marines In Vietnam : The Advisory & Combat Assistance Era, 1954-1964	Whitlow, Robert H.	From the Foreward -- "This is the first of a series of nine chronological histories being prepared by the Marine Corps History Division to cover the entire span of Marine Corps involvement in the Vietnam conflict. This particular volume covers a relatively obscure chapter in U.S. Marine Corps history--the activities of Marines in Vietnam between 1954 and 1964. The narrative traces the evolution of those activities from a one-man advisory operation at the conclusion of the French-Indochina War in 1954 to the advisory and combat support activities of some 700 Marines at the end of 1964. As the introductory volume for the series this account has an important secondary objective: to establish a geographical, political, and military foundation upon which the subsequent histories can be developed. third volume in a planned 10-volume operational and chronological series covering the Marine Corps' participation in the Vietnam War. A separate topical series will complement the operational histories. This particular volume details the buildup in 1966 of the III Marine Amphibious Force in South Vietnam's northernmost corps area, I Corps, and the

Object ID	Title	Author	Summary
			accelerated tempo of fighting during the year. The result was an 'expanding war.' The III Marine Amphibious Force had established three enclaves in I Corps, during 1965. Employing what they believed was a balanced strategy--base defense, offensive operations, and pacification--the Marines planned to consolidate their base areas in 1966. At the beginning of 1966, the 1st Marine Division reinforced the 3rd Marine Division and the 1st Marine Aircraft Wing in Vietnam. By the end of the year, the III Marine Amphibious Force had nearly doubled in size. Two separate events, however, were to dash the high hopes held by the Marines in 1966. An internal political crisis in the spring halted the Marine pacification campaign south of the large Da Nang Airbase. In July, the North Vietnamese Army launched an incursion through the Demilitarized Zone and Marines went north to counter the thrust. By December 1966, Marine units were stretched thin along the 265 mile length of I Corps. As one Marine commander observed, 'too much real estate--do not have enough men.'"
2019.317.011	U.S. Marines In Vietnam : Vietnamization and Redeployment, 1970-1971	Comas, Graham A.	From the Foreward -- "This is the eight volume in a planned 10-volume operational and chronological series covering the Marine Corps' participation in the Vietnam War. A separate topical series will complement the operational histories. This volume details the gradual withdrawal in 1970-1971 of Marine combat forces from South Vietnam's northernmost corps area, I Corps, as part of an overall American strategy of turning the ground war against the North Vietnamese and Viet Cong over to the Armed Forces of the Republic of Vietnam.
2019.317.012	U.S. Marines In Vietnam : The Bitter End, 1973-1975	Dunham, George R.	From the Foreward -- "This is the ninth volume operational and chronological historical series covering the Marine Corps' participation in the Vietnam War. A separate

Object ID	Title	Author	Summary
			functional series complements the operational histories. This volume details the final chapter in the Corps'involvement in Southeast Asia, including chapters on Cambodia, the refugees, and the recovery of the container ship SS Mayaguez.
2019.317.013	Aircraft Carrier CV-41 : Booklet of General Plans 1957 Changes to 22 May 1978	United States Naval Shipyard. Puget Sound	This is a booklet of 18 plates of drawings of the USS Midway. The last change is listed as 22 May 1978
2019.317.014	Dictionary of American Naval Aviation Squadrons, Vol. 1 : The History of VA, VAH, VAK, VAL, VAP, and VFA Squadrons	Grossnick, Roy A.	This first volume covers the attack and strike fighter squadron communities and includes VA (attack), VAH (heavy attack), VAK (tactical aerial refueling), VAL (light attack), VAP (heavy photographic), and VFA (strike fighter). This volume is also available online at: http://www.history.navy.mil/branches/dictvol1.htm . Vol. 2 which covers patrol squadrons is available online at: http://www.history.navy.mil/branches/dictvol2.htm .
2019.317.015	U.S. Marines in Vietnam : The Landing and the Build Up, 1965	Shulimson, Jack	From the Foreword - "This is the second volume in a series of nine chronological histories being prepared by the Marine Corps History and Museum Division to cover the entire span of Marine Corps involvement in the Vietnam War. This volume details that Marine activities during 1965, the year the war escalated and major American combat units were committed to the conflict. The narrative traces the landing of the nearly 5,000 man 9th Marine Expeditionary Brigade and its transformation into the III Marine Amphibious Force, which by the end of the year contained over 38,000 Marines. During this period, the Marines established three enclaves in South Vietnam's northern most corps area, I Corps, and their mission expanded from defense of Da Nang Airbase to a balanced strategy involving base defense, offensive operations, and pacification. This volume continues to treat the activities of Marine

From the Foreword --"This is the sixth volume in a planned nine-volume operational and chronological series covering the Marine Corps' participation in the Vietnam War. A separate topical series will complement the operational histories. This volume details the change in United States policy for the Vietnam War. After a thorough review, President Richard M. Nixon adopted a policy of seeking to end United States military involvement in Vietnam either through negotiations or, failing that, turning the combat role over to the South Vietnamese. It was this decision that began the Vietnamization of the war in the summer of 1969 and which soon greatly reduce and then end the Marine Corps' combat role in the war."
2019.317.018	U.S. Marines in Vietnam : The Defining Year, 1968	Shulimson, Jack.	From the Foreword --"This is the last volume of the nine-volume operational and chronological series covering the Marine Corps' participation in the Vietnam War. It was published out of sequence,

Object ID	Title	Author	Summary
			and is volume 5. The year 1969 was the year of the Tet Offensive including Khe Sanh and Hue City. These were momentous events in the course of the war and they occurred in the first three months of the year. This book, however, documents that 1968 was more than just the Tet Offensive. The bloodiest month of the war for the U.S. forces was not January nor February 1968, but May 1968 when the Communists launched what was called their "Mini-Tet" offensive. This was followed by a second "Mini-Tet" offensive during the late summer which also was repulsed at heavy cost to both sides. By the end of the year, the U.S. forces in South Vietnam's I Corps, under the III Marine Amphibious Force (III MAF), had regained the offensive. By December, enemy-initiated attacks had fallen to their lowest level in two years. Still, there was no talk of victory. The Communist forces remained a formidable foe and a limit had been drawn on the level of American participation in the war. Although largely written from the perspective of III MAF and the ground war in I Corps, the volume also treats the activities of marines with the Seventh Fleet Special Landing Force, activities of marine advisors to South Vietnamese forces, and other Marine involvement in the war. Separate chapters cover Marine aviation and the single manager controversy, artillery, logistics, manpower, and pacification.
2019.317.019	Winning a Future War : War Gaming and Victory in the Pacific War	Friedman, Norman	Between 1919 and 1941, the U.S. Navy transformed itself from a powerful if unsophisticated force into the fleet that would win a two-ocean war, from a fleet in which the battleship dominated to one based on carrier strike groups. The great puzzle of U.S. naval history is how this was accomplished. Well-known naval analyst Norman Friedman trenchantly argues that war

Object ID	Title	Author	Summary
			gaming at the U.S. Naval War College made an enormous, and perhaps decisive, contribution. For much of the inter-war period, the Naval War College was the Navy's primary think tank. War gaming was the means the college used to test alternative strategies, tactics, evolving naval aviation, and warship types in a way that the Navy's full-scale exercises could not. The think tank perspective taken by this book is a new way of looking at the inter-war Naval War College and the war games that formed the core of its curriculum. Although the influence of both the Naval War College's gaming and of the college itself declined after 1933, most of the key decisions shaping the wartime U.S. Navy had already been taken. The two most important ones were on the role of naval aviation and the form the U.S. war plan against Japan ultimately assumed. As shown here, U.S. naval commanders successfully applied the lessons learned from war gaming to victorious operations in World War II.
2019.317.020	Flight Deck Hazardous Duty Incentive Pay	Chief of Naval Operations	The purpose is to revise policy guidance for establishing entitlement to flight deck hazardous duty incentive pay (FDHDIP). This is a complete revision.
2019.317.022	Navy Rank Abbreviations	National Cemetery Administration	Over sixty pages of Navy rank abbreviations.
2019.317.024	Report of USS Midway (CV-41) EISRA-86	USS Midway	The original document is located in Curatorial at 2005.208.019. The full title is: Report of USS Midway (CV-41) Extended Incremental Selected Restricted Availability Major Upkeep Period 31 March 1986 - 28 November 1986 This report describes an eight month overhaul. Subjects covered are: 1) The Blister project -- installation of 92 prefabricated blisters built and mounted on the hull to increase stability and hull strength. Although completed on time, the blister

Object ID	Title	Author	Summary
			design had not been fully model tested for its affect on MIDWAY'S seakeeping capabilities. The end result was a roll period unsuitable for CV flight operations in Moderate and above sea states which have a period of six seconds or greater. MIDWAY is being scheduled for a future dry dock availability to effect a fix. 2) Installation of a new rudder stock, associated larger rudders, and a fixed stabilization fin just aft of the rudder for improved directional stability 3) Overhaul of the firemain system which included an extensive valve and pump overhaul 4) Cleaning of major voids utilizing the citric acid machine and the overhaul of 1400 watertight doors, hatches and scuttles. 5) Modernization of Midway's AIMD to support four squadrons (later changed to three) of F/A-18 aircraft. This included installation of an additional avionics shop (replacing the old EA-6B vans) constructed of navtruss suspended in the forward portion of hangar bay one 6) Installation of the catapult flush deck nose gear launch system, new MK 7 MOD 1 jet blast defectors and complete restack and re-reeve of arresting gear engines 7) Significant combat systems work including major overhaul of air traffic control and NTDS consoles, the installation of CATCC-DAIR and the addition of SAS (Single Audio System)) 8) Installation of an ASW mini-module to include mini-FTAS, BQR-22, NTDS, Acoustic receiver systems and TACNAV. 9) Continuing Shipalt 3800K, weight removal. Removed 300 tons of armor from aftersteering gear box (replaced 6" armor with 3" armor) and continued an ongoing project to identify and removed used cables. The cable removal project through EISRA produced 48 tons of unused cable, approximately 300,000 linear feet which

Object ID	Title	Author	Summary
			yielded a 40% spare cable capacity 10) Space reallocation. The many ship modifications such as, the blister project and JBD's created additional spaces. A Blue Ribbon panel was formed of representatives from all ships departments and the air wing and a shipalt formulated and subsequently approved which made more efficient use of space.
2019.317.025	United States Navy in Desert Shield and Desert Storm, The	Chief of Naval Operations	Summary of the role of the United States Navy in Operations Desert Shield and Desert Storm, compiled from reports of operational commanders in supporting commands and information gathered at headquarters.
2019.317.026	U.S. Naval Carrier Aviation	Boeing Military Airplane Company	Boeing Imaging & Digitizing gave us permission to scan this manual and put on our network. We sent the scan to them, they processed it, then gave us instructions on how to download it. This book was produced by Boeing for a limited distribution, probably for Boeing staff personnel to familiarize those personnel with aircraft carrier organization, administration and operation. A number of copies were probably presented to senior members of the U.S. naval aviation community. This copy was obtained by a Navy Captain who was an admiral's assistant at the time. The donor, a career naval aviator, says this is the most informative and authoritative book on aircraft carriers he has ever seen. Subjects covered are: Carrier Aviation History; Aircraft Carrier Configuration; U. S. Naval Organization; Aircraft Carrier Organization; Aircraft Carrier Operations; Aircraft Carrier Aircraft; Naval Aviation Support; Naval Aviation training; Carrier Aviation Maintenance; Naval Aviation Supply; Naval Aviation Support Equipment; Naval Aviation Publications; Naval Aviation Facilities; Naval Aviation Safety; and a Glossary of Naval Aviation terms.

Object ID	Title	Author	Summary
2019.317.028	Last Flight From Saigon	Tobin, Thomas G.	Small segment on Midway-class carriers starts on page 9. "Last Flight From Saigon" is an exciting and moving account of how all our Services, as well as several civilian agencies, pulled together to pull-off the largest aerial evacuation in history-- what many have referred to as a modern day Dunkirk. The three authors, intimately involved with the evacuation from beginning to end, have carefully pieced together an amazing story of courage, determination and American ingenuity. Above all, it's a story about saving lives; one that is seldom told in times of war. all too often, critics of armed conflict make their targets out to be something less than human, bent on death and destruction. One need only study the enormity of the effort and cost that went into the "evacuation of Saigon," and the resultant thousands of lives that were saved, to realize that the American fighting man is just as capable, and more eager, to save lives than he is in having to wage war. - Foreword Two of the authors, Hilgenber and Laehr, were among the evacuees that landed on the USS Midway.
2019.317.029	Brief History of Naval Cryptanalysis	Greenhut, Jeffrey	This short history (26p) briefly covers the beginning of Naval cryptanalysis beginning as early as 1848. The majority of the book covers World War II and analysis of the Japanese code.
2019.317.030	History of Marine Fighter Attack Squadron 531	Quilter, Charles J.	This history traces a half century of active service by Marine Fighter Attack Squadron 531. It was a unique squadron because its history demonstrates the complete evolution from night fighter to all-weather fighter to fighter-attack. Its earliest days placed the Marine Corps as the pioneer of all the military Services in night fighting.

2019.317.033	U.S. Navy at War : Final Official Report to the Secretary of the Navy	King, Ernest J.	This report covers the period of 1 March 1945 to 1 October 1945. A hard copy is included in the book: U.S. Navy at War, 1941-1945 by King (2013.315.007). Appendix A lists the status of major combatant ships of Japanese Navy at the conclusion of hostilities. Appendix B lists Major combatant ships added to United States Fleet 7 December 1941-1 October 1945 (includes the USS Midway). Appendix C lists losses of United States Naval Vessels from all causes 7 December 1941-1 October 1945.
2019.317.034	Supplemental Preliminary Inquiry and Line of Duty Determination Regarding Injuries and the Deaths of Seven Sailors Aboard USS Fitzgerald (DDG-62) on or about 17 June 2017	Commander Carrier Strike Group Five	Downloaded from this website on 11 December 2019 : https://www.secnav.navy.mil/foia/readingroom/HotTopics/USS%20Fitzgerald/Supplemental%20Inquiry%20USS%20Fitzgerald.pdf . A redacted report concerning the collision of the USS Fitzgerald (DDG-62) and ACX Crystal on 17 June 2017. Includes color photos of before and after, lists names of the deceased, gives a time line of events. Also, the Japanese ships Izanami and Kano and the USS Dewey (DDG-105) came to help rescue.
2019.318.001	Aviation : A History Through Art	Handleman, Philip	A view of the sun rising above the clouds. A brilliantly painted Albatros swirling in combat. The grim faces of World War II bomber crews returning home. The awesome spectacle of an X-plane at full power. A chance to feel the calm of a glider in a perfectly blue sky. Page 196-197 shows an Grumman A-6 Intruder on the USS Midway. Over 30 artists are included.

Object ID	Title	Author	Summary
			Aviation art provides us with the unique opportunity to see moments in history -- fierce air combat, solo flights in an empty sky, and antique aircraft in their spanking-new splendor -- that no camera could have captured, no other living person could have witnessed; scenes that have only existed in the vivid imaginations of aviation lovers until now. AVIATION: A HISTORY THROUGH ART provides an unprecedented union of contemporary aviation art with informative storytelling to give wings to ground-dwellers. The art in these pages, representing the very finest work of the American Society of Aviation Artists, makes the experience of flying -- the roar of the engines, the vibrant hues of the skies, the adrenaline of a pilot at the controls of his craft - - all the more perceptible. These paintings bring to life the military's use of aviation from the first planes in World War I to the most recent employment of aviation technology in Desert Storm. In addition to such great pilots as the Red Baron, this collection tells of less well-known flyers, including the female pilots of the Women's Air Corps Reserve and the only black pilots to fly in World War II, the Tuskegee Airmen. AVIATION: A HISTORY THROUGH ART follows the first attempts to circumnavigate the globe by the Douglas World Cruisers and Charles Lindbergh's historical solo flight across the Atlantic. The artists have captured the era when Pitcairn Mailwings first carried the U.S. mail, when Ford Trimotors first made commercial passenger air travel possible, and when gliders and air shows became recreation and entertainment. The pictures show the airplanes that first reached the "miraculous" speed of 100 MPH, the North American X-15A-2 that

Object ID	Title	Author	Summary
			reached Mach 6.7, and the Space Shuttle Discovery. This remarkable collection brings the experience of flight into reach. AVIATION: A HISTORY THROUGH ART is not only an historical perspective on an era of technology, but also the recognition of art in the magic realm of flight. (from dust jacket flap) USS Midway (CV-41) on page 196 ("Catching Some Rays").
2019.318.002	Jane's All the World's Aircraft - 1942	Bridgman, Leonard (ed)	Jane's All the World's Aircraft Editors Leonard Bridgman - Editor: 1941 - 1959 "Leonard Bridgman, who died on 19th December, 1980, will be remembered with respect by many people for achievement in a range of widely differing interests and skills,"wrote John W R Taylor, his successor as Editor for Jane's All the World's Aircraft. Bridgman's first assignment in aviation was in 1913, aged 18, when one of his drawings was used to illustrate the Hendon Air Race programme. As payment he received a flight in a 70 hp Maurice Farman biplane. During the First World War, Bridgman served as an officer in the Honourable Artillery Company. He is best remembered within the aviation industry as the journalist who joined C G Grey in 1923 on the staff of Jane's All the World's Aircraft after working on the staff at The Aeroplane. Bridgman also edited Esso Air World from 1939 to 1963. In 1956 in recognition of his contribution to technology, principally his work on Jane's All the World's Aircraft, Bridgman was awarded a Paul Tissandier Diploma by the Federation Aeronautique

Object ID	Title	Author	Summary
			Internationale. By that time, he had been associated with flying and publishing for 43 years. Bridgman was also a talented artist and produced many aviation paintings, wash drawings and illustrations. He received commissions for numerous advertisements for British companies and illustrated Oliver Stewart's text for The Clouds Remember, one of the classics of aviation literature. (from http://testwww.janes.com/media/jawa100/editors.html)
2019.318.003	D-Day, June 6, 1944 : The Climactic Battle of World War II	Ambrose, Stephen E.	Stephen E. Ambrose's D-Day is the definitive history of World War II's most pivotal battle, a day that changed the course of history. D-Day is the epic story of men at the most demanding moment of their lives, when the horrors, complexities, and triumphs of life are laid bare. Distinguished historian Stephen E. Ambrose portrays the faces of courage and heroism, fear and determination—what Eisenhower called "the fury of an aroused democracy"—that shaped the victory of the citizen soldiers whom Hitler had disparaged. Drawing on more than 1,400 interviews with American, British, Canadian, French, and German veterans, Ambrose reveals how the original plans for the invasion had to be abandoned, and how enlisted men and junior officers acted on their own initiative when they realized that nothing was as they were told it would be. The action begins at midnight, June 5/6, when the first British and American airborne troops jumped into France. It ends at midnight June 6/7. Focusing on those pivotal twenty-four hours, it moves from the level of Supreme Commander to that of a French child, from General Omar Bradley to an American paratrooper, from Field

2019.318.004	Air & Space/Smithsonian : Collector's Edition, Winter, 2019 : Carrier City at Sea	Smithsonian Enterprises	Marshal Montgomery to a German sergeant. More than 1,000 feet long and crewed by as many as 5,000 sailors, the U.S. aircraft carrier has been called a skyscraper on its side. In time for National U.S. Navy Aircraft Carrier Month this November, the new collector's edition from Air & Space/Smithsonian explains the complex systems at work on this technological wonder, reveals the traditions honored on carrier decks, and narrates the history of carriers, from the USS Langley, commissioned in 1922, to the new USS Gerald R. Ford. Feature articles about an Aircraft Carrier's Cable Guys; Launch; The Meatball; Anatomy of an Aircraft Carrier; Life aboard an Aircraft Carrier; Nighttime Terrors; Landing Rituals; First Carrier War; Jets on Board; MiG Killer; Top Cat; Hornet's Nest; The Greyhound and the Osprey; Jet Meets Carrier; Fleeing Saigon
2019.321.001	Combat Cruise of the U.S.S. Essex (CV-9), The : Personal Diary of Don R. Frazer	Frazor, Don R.	This is a hand written diary of En. Don R. Frazer who was with Fighter Squadron Fifty Four (VF-54) flying the Douglass AD-2,3,4,4Q,4L Dive Bombers, the famed Skyraider, an integral part of Air Group Five (CVG-5), Assisted by Fighter Squadron Fifty One (VF-51) flying F9F Panthers; Fighter Squadron Fifty Three (VF-53) flying F4U-4 Corsairs and Fighter Squadron One Seventy Two (VF-172) flying F2H-2 Banshees. Operating in the Sea of Japan against North Korea and Chinese Communist Forces on the Peninsula of Korea from 29 August 1951 to 4 March 1952. Includes Air Group Five (CVG-5) plane and pilot losses from 23 August 1951 to 22 February 1952.
2019.322.001	St. Lo -- Midway	Brooks, William C. (ed)	This is a compilation of data about the USS St. Lo (CVE-63) which was originally the USS Midway (CVE-63). It includes photocopies and artwork from John M. Downs which illustrates the attack on and the sinking of the USS St. Lo on

This is the second edition of a USS Midway information booklet issued to new sailors when they came aboard. This booklet was issued to Louis S. Goldkrantz and contains complete information on his division, section, bunk number, locker number, compartment, deck, frame, muster station, address, division officer and petty officers.
2019.327.001	Survival Uncertain	Cargill, Lee Bruellman	This book chronicles the riveting true stories of what happened to eight friends from the US Naval Academy, Class of 1963, Sixteenth Company, following their graduation and commissioning on June 5, 1963. All were in the author's wedding party. Several stories could be made into movies. They came from all across America, all serving in the Vietnam War. One was aboard a Navy destroyer in the Gulf of Tonkin, participating in the events that led to the Gulf of Tonkin Resolution in August of 1964. Another flew a combat mission on the day the Paris Peace Accords were signed, January 27, 1973. Between those dates, all would put their lives at risk serving their country. Not all returned. A younger brother's love of his big brother is demonstrated through his valiant efforts to find out what happened to Kelly, his brother. Following Vietnam, the success of each varied, some dramatically. Throughout their lives, they remained true to

			the best ideals represented by the Naval Academy, in service to others. (Contains references to USS Midway.)
2019.328.001	Marine! The Life of Lt. Gen. Lewis B. (Chesty) Puller, USMC (Ret.)	Davis, Burke	Of Lewis B. "Chesty" Puller, a Commandant of the Marine Corps said: "He's about the only man in the Corps who really loves to fight. I'll go further: He's the only man in any of our services who loves fighting." Chesty Puller rose from private to lieutenant general, and in almost forty years of service won five Navy Crosses (more than any other man) and more combat decorations than any Marine in history. In twenty-seven years of foreign duty he became a hero to men in ranks as had no other Marine officer. One young officer in Korea said of Puller: "I'd follow him to hell - and it looks like I'm going to have to." He lived through more than one hundred combats in the Banana Wars of Haiti and Nicaragua, where he earned the grim nickname El Tigre; he commanded the Horse Marines in Peking, a Marine battalion in Shanghai, the Marine garrison at Pearl Harbor; and in World War II -- at Guadalcanal, Cape Gloucester, Peleliu -- and in Korea, his exploits became Marine legends. Recalled from postwar obscurity to resume command of the First Marines in Korea, he led ashore the assault at Inchon, one of history's great amphibious strikes; then marched on Seoul; and finally held secure the escape route from the Chosin Reservoir. Puller has always spoken his mind, and was a storm center in the Corps. He has long distrusted over-schooling of military men. He is critical of our policy on American prisoners-of-war, scathing in his denunciation of U. S. Army training, and has decided

Object ID	Title	Author	Summary
			notions about every phase of American failure in Korea. Puller's forced retirement from the Corps at the age of fifty-seven was a blow to all the Marines who had served under him or knew of his legendary career. What kind of man is Chesty Puller? For this frank and absorbing story of his life, Burke Davis spent a year interviewing not only General Puller himself, but also over one hundred men of the Marine Corps who volunteered to help tell the real story of Chesty Puller. The result is one of the most candid and informative narratives of combat ever to be published. Filled with priceless lessons in courage, proper preparation for war, and the value of realism, it is a singular contribution to adventurous biography. "If you're Marine," General Puller once said, "you're all Marine." Here, against the background of four wars, is Chesty Puller - MARINE! Jacket design by Ira Goldblatt Graphic House, Inc. U. S. Marine Corps Photographs (from dust jacket flaps)

2019.328.004	Face of Battle, The	Keegan, John	The author focuses on what a battle is like for the man in the thick of it--his fears, his wounds, and their treatment, the mechanics of being taken prisoner, the nature of leadership at the most junior level, the role of compulsion in getting men to stand their ground, the intrusions of cruelty and compassion, the very din and blood. Karl Zingheim recommended this book for the library.
2019.328.005	Jane's All the World's Aircraft - 1943-44	Bridgman, Leonard (ed)	Jane's All the World's Aircraft is an aviation annual publication founded by Fred T. Jane in 1909. It is published by Jane's Information Group. Jane's All the World's Aircraft has chronicled a century of ever-accelerating aviation progress and recorded the particulars of an unprecedented number of flying machines, using the widest possible interpretation of that phrase, in the most minute detail. Six editors have had the privilege of commenting upon the significant aircraft and events of manned flight since the first edition appeared in November 1909 as All the World's Airships (which was then a generic term for any machine that flew). This first publication was seen as being ahead of its time but even the skeletal book showed the strength of Fred T Jane's standardised approach to data collection. The first edition even carried a pre-addressed return proforma for aviation pioneers to supply the details of new machines. Besides listing the different types of aircraft by nationality, the first issues covered aerial societies, journals and flying grounds and cost just 21 shillings (£1.05). Jane himself had a desire to fly and he was nearly killed doing so in 1909 whilst attempting a flight on Dartmoor. His aircraft caught

Object ID	Title	Author	Summary
			fire, but he merely commented that it would be one less machine to include in his forthcoming work. As with Jane's Fighting Ships, Jane received extensive help from enthusiasts worldwide, including Louis Blériot, A.V. Roe and Prince Heinrich of Prussia. Jane censored the 1914 issue, which was published just after the outbreak of the First World War, blacking out whole sections describing British equipment and organisation. He noted in it that, for all practical purposes, aircraft have no more to do with peace than submarines. The work's accuracy helped morale by dispelling alarmist rumours about imminent German air raids, showing that the Germans did not possess anything but the smallest fleet of airships. Respect for the accuracy of Jane's All the World's Aircraft transcended political enmities. Cold War notwithstanding, Soviet authorities supplied Jane's with information. Such was the technical reference book's reputation that Argentina even provided details of its aircraft during the Falkland's Conflict in 1982. Altogether, there have been only 97 editions, mainly due to disruptions during the two World Wars. 2009 was the 100th Year of Jane's All the World's Aircraft. From Wikipedia, the free encyclopedia

2019.328.006	Aircraft Treasures of Silver Hill, The : The Behind-the-Scenes Workshop of Our Nation's Air Museums	Boyne, Walter J.	This book is the story of some of the most interesting aircraft of our time, and of the unusual facility where the best aircraft restoration work in the world is done. There are 228 photographs illustrating the famous planes that are discussed. Silver Hill, now known as the Paul E. Garber Restoration, Preservation and Storage Facility of the national Air and Space Museum, has

			pictures; launching on December 7, 1942, and commissioning on May 24, 1943; "The Saga of the Bunker Hill, Air Classics, date unknown. SECTION 9 - Membership Association Sleeve 9.1 Announcement from Lloyd G. Taylor to the USS Bunker Hill Association Members detailing the upcoming 27th reunion scheduled for September 8-16, 1992.
2019.329.018	Carrier History, CV-18 : USS Wasp	Friederich, Rudolf J. (ed)	This is a collection of correspondence, photographs, documents, newspaper clippings, magazine articles, and memorabilia of USS Wasp (CV-18). It was compiled by Rudolf Friedrich of the Aircraft Carrier Study Group. The operational history was compiled by Ole Haslev. The contents include: SLEEVE 1- Haslev History from 1940 to 1973, list of Commanding Officers from 1943 to 1972, and Air Groups from 1944 to 1971. SLEEVE 2-Friedrich's Early Operational History from 1942 to 1972. Updated with material and notes from 1973 to 1999. SLEEVE 3- Friedrich's handwritten notes on CO's 1-28. List contains information on COs numbers 12 through 16. SLEEVE 4- Color postcard of Taos, New Mexico from Lyman Parkhurst to Robert D. White dated April 22, 1991 answering a question about LCDR Joseph G. Burroughs who served aboard the Wasp. • Photocopy of Wasp's commissioning program. • Photocopy of Wasp's Navy Day 27 October 1945 Souvenir Program. • Photocopy of Wasp's recommissioning program. • Original Department of the Navy booklet about CVA-18 Wasp published sometime in 1955 or 1956. Enclosed is a

Object ID	Title	Author	Summary
			photocopy of a message signed by Captain R.W. Denbo. • Original Welcome Aboard pamphlet containing general information for new crewmembers. Also included is a photocopy of a note personally welcoming them signed by Captain R.W. Denbo. • Two typewritten pages titled "Instructions for Participants in Institute Carrier Cruise" dated March 22, 1956 for the members from the Institute of the Aeronautical Sciences for their Carrier "field trip". Page one has general instructions and page two lists the plan of event times. • Original color pamphlet printed on board Wasp titled "USS Wasp CVS-18 Comes of Age" dated 24 November 1964 celebrating what appears to be its 21st anniversary since being commissioned. Contents include Wasp's history and the day's menu. • Color printout of Wasp's patch taken from the NavSource website (http://www.navsource.org/archives/02/021822.jpg) dated 7/11/03. • Original tear out page taken from the November 24, 1944 Warspirit with a picture titled "Scene at Commissioning" showing Wasp's crew lined up on the pier prior to boarding the ship. • Original tear out page taken from USNI Proceedings dated sometime in 1960 from an article titled "Officer Evaluation and Promotion" by Rear Admiral Ray C. Needham. Page 60 shows a picture of USS Wasp in its CVA configuration. • Original tear out page from USNI Proceedings dated sometime in 1959. Page 102 shows a picture of USS Wasp in its CVA configuration. Caption reads "Flagship of Anti-Submarine Task Force Bravo." SLEEVE 5- Typed correspondence from an unknown source and date; one page, incomplete and describing unrelated information about Wasp. • Typed correspondence from John H. Lavin to Rudy dated

Object ID	Title	Author	Summary
			January 11, 1991 responding to questions posted by Rudy in the December 1990 issue of Warspirit about the 1953-1954 Word Cruise from Norfolk to San Diego. • Handwritten correspondence from Elmer G. Huber to Rudy, date unknown, with the following information attached: Four pages of table assignments when Vice Admiral Phillips hosted a dinner for Philippine President Ramon Magsaysay on 12 March 1954 in Subic Bay. Five pages of the best night clubs, hotels, restaurants, hot baths, theaters, and places to shop for "deals" in Tokyo and Yokohama. • Handwritten correspondence from Robert K. De Lozier to Rudy dated 1-23-1991 referring to some items that Mr. De Lozier had sent to Rudy. • Handwritten correspondence from Robert. D. White to Rudy dated 15 February 1991 about the "humorous" events of the hurricane at the end of 1946 while Wasp was in Biscayne, New Jersey preparing to be decommissioned prior to her SCB-27A Modernization. Attached is an operational history of Wasp from 05-19-1944 to 08-25-1945. Sleeve 6- Two typed correspondences from Robert P. Daly to Rudy, the first dated January 21, 1991 detailing the events of the 25 August 1945 Hurricane that damaged Wasp's forward flight deck, and the second dated February 7, 1991, detailing the events surrounding the commissioning ceremony and one of the guests, Eleanor Roosevelt. Mr. Daly also included a typed history titled "CHRONOLOGY - 24 November 1943 to 2 September 1945". Mr. Daly explained that he had lost the last few pages so it only went up to 25 August 1945. SLEEVE 7- E-mail correspondence from Stephen F. Jackson to Dick (NLN) dated 8/20/2001 detailing the fatality of Anthony Licciardello that

Object ID	Title	Author	Summary
			occurred on April 1, 1958. • Handwritten correspondence from Robert P. McCoy Jr. to Rudy dated April 3, 1991, detailing the transit from the coast of Japan to Boston Harbor for repairs after the typhoon. • Handwritten correspondence from Harry G. Burt to Rudy dated 3/14/1991 answering questions Rudy had asked about the typhoon, the 1953-54 world cruise, commanding officers and Mr. Burt's last cruise. • Typed correspondence from Earl C. Vanderwalker to Rudy dated 11 January 1991 responding to questions Rudy had asked about the collision with and sinking of USS Hobson on 28 April [sic] 1952. • Handwritten correspondence from Duane R.(?) Matchett dated 1-14-1991 responding to questions about the 1953-54 world cruise. • Handwritten correspondence from Bill Jones to Rudy dated 1/16/1991 responding to questions about the 1953-54 world cruise. • Handwritten correspondence from Patsy De Louisa dated 16 January 1991 responding to questions about the 1953-1954 world cruise. • Typed correspondence from Dan Crowley to Rudy dated January 8, 1991, responding to questions about the 1953-54 world cruise. • Typed correspondence from Don Harribine to Don (NLN), date unknown, about the fatality of Anthony Licciardello. SLEEVE 8- Typed correspondence from Robert F. Marble to Rudy dated 1/7/2002 detailing the events surrounding the sinking of the USS Hobson. Included were 21 pages of press releases and personal accounts. SLEEVE 9- Photocopy of Wasp's history taken from "The Dictionary of American Naval Fighting Ships," pp 148-155. • Two printout pages of Wasp's history taken from the website "US Navy Cruise Books" (http://navysite.de/cv/cv18.htm) dated 7/8/2006 sent

			by Charles Brown. • Photocopy of 13 pages dated 12/26/90 from an unknown source titled "Listing of CV Deployment History Showing Air Wings & Squadrons-Wasp – CV-18 11/24/43 - 7/01/72." Attached is a two-page NavAir Database References showing source material. SLEEVE 10- Photocopy of five typewritten pages, date and source unknown, titled "Chronology - August 23-November 1, 1943 – Formation and Training Period". • Two typewritten pages, date and source unknown, titled "USS Wasp CV-18 Ship's Log March 1942 to April 1945". • Two handwritten pages, date and source unknown (possibly Lou Parker) titled "Task Force 38" showing the composition of the units, call signs, and screening ships. • Three webpages titled "Important Non-Combat Dates" dated 5/15/99 from American Online: CarrierSG (http://pages.prodigy.com/SC/familyhx/wasp6.html). Material lists 19 dates between August 25, 1945, and July 1, 1972. • Four photocopied pages of an article that appeared in the 15 September 1944 issue of the Warspirit taken from the New York Herald Tribune, date unknown, titled "Crew of Carrier Hornor Comrade" about Wasp's first World War II casualty, Alfred Bridges and a thank you note from his widow. Article was contributed by shipmate Curtis Grant. SLEEVE 11- Twelve photocopied pages taken from an unknown source in 1946 sent by Bob and Pat White of Wasp's history. Headings include "In Memoriam", "Launching and Commissioning the Aircraft Carrier USS Wasp", "The Mighty Stinger", and "The Magic Carpet". • Double sided sheet listing those who died aboard Wasp in the line of duty, date and source unknown. SLEEVE 12- Typewritten

Object ID	Title	Author	Summary
			page titled "Wasp Radar Failure Admitted, First Hint of Carrier Trouble" taken from the United Press, May 13, 1952, detailing the collision with USS Hobson on April 26, 1952. Information included testimony from the naval board of inquiry and quotes from Hobson crew members Seaman Peter A Mahoney and Ensign Donald E. Lane. • Three handwritten photocopy pages of Wasp's movements from 1951 to 1955 from an unknown source. • Photocopy of a double-sided WASPNOTE titled "USS Wasp Notice 5060" dated 27 October 1953 detailing the upcoming crossing the line ceremonies for 30 October 1953. Notice covers the history, initiation procedures, and other miscellaneous items. • Photocopy of a two-page document from the Wasp's Public Information Office titled "Welcome Aboard" dated December 1953. Document covers what to expect during their two-week "R&R" cruise aboard the Wasp. • Two identical verbatim photocopies of the first watch of 1954 as reported by LTJG P.J. Mulloy. Documents were sent by Elmer G. Huber (See sleeve 5). • Photocopy of an article titled "Today's Wasp", source and date unknown but references to 11 June 1960 when Wasp went to sea after her overhaul. • Two photocopies of newspaper articles on Wasp's scrapping. The first was taken from the Jacksonville Journal dated 1 July 1972 titled "USS Wasp to be Scrapped". The second was taken from the Florida Times Union dated 2 July 1972 titled "War-Famed 'Wasp' Ends her Career". • Original typewritten story titled "Wasp High and Almost Dry" by Robert D. White recounting the grounding of Wasp during the hurricane at the end of 1946 while Wasp was in Biscayne, New Jersey preparing to be decommissioned prior to her SCB-27A Modernization (See sleeve 5). • Four double-

Object ID	Title	Author	Summary
			sided pages titled "A History of the USS Wasp CV/CVA/CVS-18" presented by Don Duggar at the 44th anniversary reunion on 18 September 1987. SLEEVE 13- Photocopy of the Stinger titled "The Wasp goes to School", Volume II No. 1, Mid-January, 1954. Contents include the following articles and sections: "Welcome to Our Air Group", "The Honeymoon is Over", "Why Cuba?", "Editorial", "Chaplain's Corner", "Flight Deck Safety", "Frogmen Stung by Wasp", "Wasp goes to Hollywood", "Drills Pay Off", "N.Y Herald Said...", "All Hands", and "Wedding Cake". Issue is missing pages. • Photocopy of Wasp's itinerary of the 1952 Mediterranean Cruise taken from the cruise book sent by James Peeler • Photocopy the Stinger titled "Operation 'Beehive II' a Success", Volume II No. 4, 1 July 1952. Contents include the following articles and sections: "Wasp to Visit Southern France", "New G.I. Bill goes to Senate", "Cruise Book Staff Named", "U.S.A.F. Aboard Wasp", "Flying Ubangiis", and "Training Trails". Issue is missing page five. • Photocopy of the Stinger titled "Wasp Changes Command", Volume II No. 5 dated 20 July 1952, two pages. Contents include the following articles and sections: "ComCarDiv 6 and Staff Aboard Carrier Wasp", "The Captain Speaks", "Captain Clarke New Wasp Skipper", "Boxing Team in First Match", and "In the Spotlight" by Rip Kerber. • Photocopy of the Stinger titled "New Wasp One Year Old", Volume II No. 6, dated 20 September 1952, four pages. Articles include: "Wasp Due Home October 13th After Operations", "Wasp Participated in Mainbrace as Part of Blue Striking Force", "Enters Greenock on Anniversary", "On Crew Views", "Stinger Statistics", "Chaplain's Corner",

Object ID	Title	Author	Summary
			"Stinger Sponsors Photo Contest", "A Year in Retrospect" by J.W. Finnegan, "Spiritualism Supreme A's-26 Receive First Communion" by J.W. Finnegan, and "Captain Mason Honored". •Photocopy of the Stinger titled "Wasp Completes Cruise" Volume II No. 7 dated 18 October 1952, two pages. Articles and sections include: "CDR G.B. Campbell Assumes Post of Executive Officer", "Air Group One Leaves Wasp", "ComCarDiv Four on board Wasp", "Wasp Returns to U.S. for Yard Period". Issue is missing at least one page. •Photocopy the Stinger titled "Japan", Volume III No. 2 dated November 1953, eight pages including cover. Contents include the following articles and sections: "A Letter from Joe", "View the Crew", "A Salute to the United States Marines", "'Killer' Cain and 'His Boys'", "Skipper Speaking", "Stinger Sports", and "Introduction to Japan's Mainland" (Maps, weather, society, religion, economy, taxis, where to send telegrams and make phone calls, nightclubs, restaurants, and shopping). SLEEVE 14- Photocopy of the Stinger titled "Hong Kong", Volume III No. 4, dated January, 1954, 8 pages including cover. Contents include the following articles and sections: "Dad for a Day", "An Ode in Code", "Sneak Preview: Miss and Mrs. Wasp", "Hong Kong" (Maps, taxis, exchange rate, where to send telegrams and make phone calls, nightclubs, restaurants, and shopping), "ComCarDiv5 transfers flag", "The Devil's Diplomats", "Vital Statistics", "A Sailor's Prayer", "Welcome Aboard!", "Sports", and "View the Crew". • Photocopy of the Stinger Anniversary Edition titled "25 Years in the Fleet" dated 1968. Has 14 pages of World War II history, pictures, and highlights. Also mentions Korea, and the 1965 recovery

			mail thread is difficult to follow. • E-mail printout dated 3/28/01 from Rear Admiral Bruce Boland to Rudy responding to an inquiry about any testing in San Diego that was done on Hancock after decommissioning and detailing what he saw on her scrapping in late spring of 1977. Rudy responded that the Aircraft Carrier Study Group was trying to "tie up some loose ends of Hannah's history". Admiral Boland responded again and gave further details about his time in the Navy. • Original handwritten correspondence from Charlie Boyst from the USS Hancock CV/CVA-19 Association to Rudy dated 3/29/90 referring to materials he sent Rudy and offering that he could copy them before sending them back. He also recommended Patriots' Point, the USS Yorktown Museum Library, Doctor Steve Ewing, and Ralph O. Irish Junior as addition sources for the USS Yorktown CV-10. • Original typewritten correspondence from Rudy to Charlie Boyst dated March 30, 1990, confirming that a package that Boyst sent had arrived in good order. Written on the front are the addressed of Courtland (aka Corky) R. Johnson and Charlie's phone number. Written on the back was Boyst's handwritten response (apparently Mr. Boyst did not believe in wasting paper) suggesting Rudy contact Dennis J. Clark who was the Air Intelligence Officer aboard Hancock from 1965 to 1967 for more information. • Original typewritten correspondence from George "Gus" Gulyas who is the Editor of the Hannah News from the USS Hancock CV/CVA-19 Association dated April 25, 1991, responding to a request from Rudy to publish information about the Study Group in Hannah News. • Original typewritten correspondence from C.R. (Corky) Johnson dated April 30, 1990, responding to a letter

Object ID	Title	Author	Summary
			Rudy sent requesting information on Hancock's last cruise. The correspondence was three pages long containing information about Mr. Johnson's service history in the Merchant Marine, Marine Corps, and Navy, and Hancock's last WestPac cruise which included "Frequent Wind", "Eagle Pull", a reference to "Deep Purple", and the names of four men killed in action. • Original handwritten correspondence from Gene Harrison, date unknown, to Rudy referencing the pictures he included (see SLEEVE 4) and information on the 1962 Cruise. • Original two-page typewritten correspondence from Ralph O. Irish Junior to Rudy dated 3 April 1990 responding to four questions Rudy asked in an earlier correspondence. In the first question, Mr. Irish could not remember the sailing date of the August WesPac Cruise. In the second, Mr. Irish supplied the composition of Air Group 11. In the third, Mr. Irish wrote that he would have to "give some thought" to the events during that Cruise. In the fourth, Mr. Irish supplied the composition of Air Group 15. The correspondence ended with Mr. Irish offering to loan Rudy a couple of his cruise books for a short period. • Original handwritten correspondence from Edward Tomczak to Rudy dated 2/24/91 saying that he made two cruises to Vietnam: 68-69 and 69-70. Mr. Tomczak asserts that there is an error in the book "Tonkin Gulf Yacht Club" on page 138 concerning a crash involving Lt Jg P.E. Swigart saying that he was recovered when in fact he was a fatality. • Photocopy of a correspondence from Hancock's Commanding Office, Daneil V. Gallery, to the Chief of Naval Operations dated 12 October 1945 with the subject titled "War History of USS Hancock-Forwarding of". Includes the enclosure of War History of USS Hancock (CV19) from

Object ID	Title	Author	Summary
			15 April 1944 (See sleeves 6 through 8 below). • Photocopy of a from Hancock's Commanding Officer, Henry L. Miller to the Chief of Naval Operations (Director of Naval History) dated January 7, 1960, summarizing Hancock's operations from January 1959 to December 1959. As LPH-4: Captain Edwin Byron Parker Jr., Captain Edgar Erwin Stebbins, Captain James Bruce Wallace, Captain Edward Thorp Deacon, Captain Walter Maurice Sessums, Captain Albert Oakes Morton, Captain Henry Jonathan Hosmer Cooke, Captain Robert Foster Hunt, and Captain Lester Boggess Lampman. (Please note that there is only information on Captain Woods.) SLEEVE 4- Photocopy of an envelope (front only) from Hank Wilson of the Veterans Association of USS Boxer postmarked 21 June 1991 (?) to Charles J. O'Connell. Original 3X5 black and white photograph of a McDonnell F2H Banshee sitting on the Boxer's flight deck with the caption on the back "1955 USS Boxer off Japan". Original 2.5X4 black and white photograph of Boxer firing her 40 MM Bofers. Original 3X4 black and white photograph of a Kamikaze hit or near miss. Original 2.5X4 black and white photograph of a far-off destroyer. Original 2X3 black and white photograph of an unknown location taken from above. Original 2.5X4 black and white photograph of AKA-17 USS Centaurus and an unknown destroyer. Original 3X5 black and white photograph of DD-717 USS Theodore E. Chandler. Original 3X2 black and white photograph of a far-off Iowa Class Battleship.

Object ID	Title	Author	Summary
			Original 4X2.5 black and white photograph of Boxer firing her 5/38" guns.
			Original 3X5 black and white photograph of Boxer as LPH-41 Original newspaper clipping accredited to A.P. Wirephoto dated December 14, 1944, showing Boxer ready to be launched.
			Photocopy of Boxer's Commissioning Ceremony.
			Photocopy of a pamphlet titled "USS Boxer CV-21 Personal Information Booklet".
			An original tear out from the USNI Proceedings article, date unknown, titled "Three Very Long Minutes", pages 1365 to 1390 describing with eight pictures and captions how training saved the pilot's life after his Corsair crashed while taking off.
			Color line drawing of Boxer in her amphibious assault configuration possible done by Donald C Buresh, undated.
			Photocopy of Boxer's patch.
			SLEEVE 5- Original handwritten correspondence from Noel Ray to Rudy dated 12-12-86 responding to a letter Rudy sent requesting information on Boxer's movements in 1945 and 1946.
			Original handwritten correspondence from Donald C. Buresh (Publisher of BOXER SHORTS-The Official Publication of the USS Boxer Veterans Association) to Rudy, date unknown, about his request for information about Boxer and wrote that he had served on her from 1951 to 1955 and would be willing to help any way he could.
			A second handwritten correspondence from Donald C. Buresh to Rudy, date unknown, offering more help with

Object ID	Title	Author	Summary
			research.
			Original handwritten correspondence from Lloyd E. West to Rudy, dated 4 February 1987. Mr. West was responding to a request by Noel Ray asking West to send any information he had on Boxer to Rudy. Attached were five pages of Boxer history and a two-page poem about Boxer.
			Original handwritten correspondence from G.G. Clark to Rudy responding to a letter sent to him by Noel Ray. Mr. Clark wrote that he was aboard Boxer from 1947 to 1950 and detailing Boxer's movements during that period. He also gave cursory information on Captains S.C. Ring and J.B. Moss.
			Original typewritten correspondence from Robert M. Cieri to Rudy dated April 6, 1993, which included a six-page updated data file on Boxer.
			An original email from Rudy to a "Ron GAERBOX17" dated 11/11/99 thanking him for some information he had sent about Coral Sea's Captain Allen. Rudy included in his email the list of commanding officers he had collected on Boxer.
			Original single-page typewritten correspondence from George W. Lawson to Rudy dated February 11, 1987, giving information about Boxer's activities from the time he came aboard in 1948 to the time he left in 1951. He listed Captains Ring, Teller, Moss and Briggs and said he served as orderly for the last three and went on to list Boxer's movements during that period. Attached was a photocopy of the ship's newsletter THE BUSY-B Vol.1 No. 6 dated March 13, 1949, pages one and six. Articles include "Aloha Hawaii!" by Norried Craig and "Commander Carrier Div. Three Departs.". Also

Object ID	Title	Author	Summary
			attached was a photocopy of the ship's newsletter THE BUSY-B vol.1 No. 7 dated March 27, 1949, pages one and six. Articles include homeward Bound by Norwood L. Craig, and island Tour by Chuck Months. Original handwritten correspondence from Clarence Budger to Rudy, dated 12-28-86, responding to a letter he received from Noel Ray asking him to send information of his time on Boxer from 1948 to 1949. He recalls that Boxer was the first to receive jet planes and they spent most of their time working off the West Coast. SLEEVE 6- Original copy of BOXER SHORTS-The Official Publication of the USS Boxer Veterans Association Vol. 6-15-91 postmarked June 14, 1991, having 24 pages including cover. Sections and articles include from the Treasure Noel Ray, from the President Paul Lane, Ingalls lays keel for new LHD Ship, mini-Reunions, "Trivia", "EXTRA 'Boxer Shorts' Reno, NV Reunion Edition" featuring plans of the day for the upcoming reunion on August 22, 1991 to August 25, 1991. Also included were various Boxer History articles and correspondence on current events and passings. Photocopy of a July 1952 USNI Proceedings article titled "Standby Squadron" by Lieutenant W. H. Vernor, Jr, pp 728-739 detailing the contributions of Reserve Attack Squadron 702 during the Korean War. SLEEVE 7- Screen copy printed from the US Navy Cruise Book website (https://www.navysite.de/cruisebooks/) of USS Boxer (https://navysite.de/cv/cv21.htm) . Dated 11/22/2006. Photocopy of an invitation to Boxer's April 16, 1945

			events of World War II. Original typewritten correspondence from Hudson (see above) to Rudy dated 19 June 1991. Contents of the correspondence include Hudson thanking Rudy for sending a copy of "Aircraft Carrier Study Notes Vol 1, Number 3" and enclosing a reunion envelope with special artwork and cancellation postmark. Photocopy of Cabot's operating cruise record from her recommissioning in 1948 to her decommissioning in 1955. Original tear out article from the July 1990 issue of ALL HANDS titled "The Cabot-Dedalo Museum on the Mississippi" by Lee Bosco, pp 14-17. Attached is a business card from Richard A. Gale Sr., USN (RET) who is featured in the article. Photocopy of a black and white picture of Cabot from an unknown source. Photocopy of Cabot's history taken from "The Dictionary of American Naval Fighting Ships," page unknown. Photocopy of a declassified document from Cabot's Deck Log-Remarks Sheet dated 27 October 1948, having comments about Cabot's recommissioning ceremony. Original copy of the newsletter from the USS Cabot Museum titled "Flight Deck", Volume 1, Issue 1 dated August 2000, four pages. SLEEVE 4- Photocopy of a WASHINGTON TIMES article titled "'Iron Woman' of the Sea has a New Owner-Salvage Company buys USS Cabot" by Jennifer Harper. Photocopy of an article titled "Notes on Ernie Pyle's Visit on USS Cabot April 1945" by Lt. Charles H. Krebs (See Sleeve

Object ID	Title	Author	Summary
			3). Attached to the story was a Zippo Lighter Ad which was mentioned in his story. Photocopy of chapter four from the book "The Last Chapter" by Ernie Pyle, pages 55-93. Sent to Rudy by Michael Drew Sabatelle. Photocopy of 18 pages identified by Rudy as "previously unpublished articles of WWII by Erine Pyle". SLEEVE 5- Photocopy of an article titled "Lady Gallant" by Gary Bell, written in 1989. Mr. Bell was stationed on Cabot and recounted the day, 25 November 1944, that two Kamikazes hit Cabot killing 35 men and wounding many others. Photocopy of a news release from the AMERICAN ACADEMY OF INDUSTRY titled "Historic Ship Searches for New Home," outlining a fundraising campaign to save the ship from being scrapped. An article from the MIAMI HERALD, dated August 31, 1999, titled "Group wants WW II aircraft carrier to be naval museum in Miami" by Shari Rudavsky. Article appears to be printed off the computer and focuses on the efforts to save Cabot from being scrapped. A single page article, source and date unknown, quoting Peter Stoudt, President of the Iron Woman Foundation, who said that time is running out to save Cabot. An article citing information from the MIAMI HERALD and WIRE REPORTS, date unknown, quoting former crewmember Benjamin Viola, ECOSTAT Chairman Stephen O'Neal, and past president of the USS Cabot Association Bill Anderson who all lamented not being able to save Cabot from being scrapped.

Object ID	Title	Author	Summary
			Photocopy of an article from the Fall 1989 issue of THE HOOK titled "Cabot Saved," page 79. C. Denver Mullican, Blaine Kern, and Howard Skidmore are all mentioned in the article. Original newspaper article from the NAVY TIMES, dated March 5, 1990, titled "Ship that served 2 navies comes home," by Kirby J. Harrison. Pages 18-20. Denver Mullican, American Legion Post 377 President Herb Wagner, Blain Kern, veteran Bob Ashby, Spanish naval attaché Manuel Riviera, and Dedalo's former skipper Capt. De Navio Marcelino Garcia Teibel are all quoted in the article. Former WW II crewmembers Robert Hanson, Raymond Foss, Arnie Johnson, Bob Ashby, Frank Hayde, and Tomas O'Grady are shown in a picture on page 18. Original newspaper article from the CORPUS CHRISTI CALLER-TIMES, dated December 29, 2000, titled "Cabot's memory lives on Lex deck" by Deborah Martinez. Ms. Martinez reports that guns removed from Cabot before being scrapped are being installed on Lexington. Picture on A1 and article on pages B1 and B6. SLEEVE 6- The following photocopied material is not part of Rudy Friederich's collection but was donated to the museum at a later date. Newspaper article from the SAN BERNARDINO SUN, date unknown, titled "Light carriers made a difference in WW II," by Phil Orr. Correspondent Ernie Pyle and former crewmember Richard Waggoner are mentioned in the article. Article written by Gilly Chamberlain from an unknown source titled "The Strange Odyssey of the Warship

Object ID	Title	Author	Summary
			Cabot," dated February 19, 1991. Herb Wagner, Denver Mullican, Blaine Kern, Chris Johnson, James Hardy, Tom Walkowiak, William Windover, Richard Gale, Ernie Pyle, Pablo Sanchez-Teran, Harry Lee, Fernando Nardiz, Pete Campagne, Jerry Bowen, Tom Rinard, Jose Canseco, Robert Collins, Bob Livingston, Aaron Broussard, and Bernie Klein are quoted in the article. Article written by Tom Slizewski from SOLDIER OF FORTUNE, page 49 date unknown, titled "USS Cabot Comes Home-New Orleans Scores Carrier Coup". Article is incomplete. Roster of active supporters from the American Academy of Industry, sent via internet from Martin J. Hecker to Robert Hill, dated 1/19/97. Two pages. Single-page history titled "USS Cabot (CVL-28): A Fast Carrier in World War II." Lists Battles Stars, President Unit Citation, and Wartime Statistics. Two-page narrative titled "Catwalk Takeoff from the USS Cabot" by Donald T. Hambidge, dated December 18, 1994. In the story Mr. Hambidge, a tail gunner in a TBM Avenger, recounts the events of April 1, 1945, when his plane veered partly off the flight deck onto the catwalk and somehow managed to not crash into the ocean. Pilot Tom Skidmore and radio man Danny McCarthy are mentioned in the article. Newspaper article from an unknown source dated sometime in May 1990, titled "Sailors visit an old friend-USS Cabot," by Joe Darby. Cabot veterans Joseph Forbes, Jim Thompson, Ray Newman, and Frank Hayde, and Kenner mayor Aaron Broussard are quoted in the article. Pages B1 and B2.

Object ID	Title	Author	Summary
			Single-page article from an unknown source titled "'Dear, There's a Letter for You. It's from the Spanish Navy!'" by Paul Seideman. The article recounts the story of Cabot and one of its former crew members, Bill Walker. Incomplete. Single-page photo set from an unknown source, dated 2 August 1989, titled "SOF HOMECOMING". Larger picture shows Cabot's (Dedalo's) flightdeck and a smaller inset photo shows Spanish sailors raising pennants entering New Orleans. Single-page from the American Academy of Industry listing biographical information on President Martin J. Hecker and Projects Manager William M. Hayden. SLEEVE 7- The following photocopied material is not part of Rudy Friederich's collection but was donated to the museum at a later date. Single-page from the American Academy of Industry listing its Executive Summary, date unknown. Letter from Howard H. Skidmore from the USS Cabot (CVL-28) Association dated 26 February 1992 to new members. Letter from Skidmore dated 21 September 1992 to honorary members. Letter from Skidmore dated 12 September 1994 to an unidentified recipient connected to the Aircraft Carrier Memorial Plaza in San Diego, California. Letter from Skidmore dated 21 September 1994 to Peter Sanford, President of the National Maritime Historical Society. Letter from Skidmore dated 27 January 1995 to Phil Orr

			history was compiled by Ole Haslev. The contents include: SLEEVE 1 -Haslev Operational History from 1942 to 1973, list of Commanding Officers from 1945 to 1970, Battle Stars and Awards from 1948 to 1968, and Air Groups from 1946 to 1958. SLEEVE 2- Friedrich's History from 1943 to 1970. Updated with his notes from 1984 to 2000. -List of Commanding Officers: CAPT John Madison ("Peg Leg") Hoskins, CAPT Francis Massie ("Frank") Hughes, CAPT Murr Edward Arnold, CAPT Albert Noble Perkins, CDR Francis Edward Nuessle, CAPT William Onahan Gallery, CAPT Paul David Stroop, CAPT William Right ("Holly") Hollingsworth, CAPT Otis Cockerill Gregg, Sr., CAPT John Clement Alderman, CAPT Henry Gabriel Sanchez, CAPT Wilmer Earle Gallaher, CAPT John Lester Chittenden, CAPT William Lockhart Dawson, (As LPH-5) CAPT Frank Kidder Upham II, CAPT Charles Merton (Charlie) Brower, CAPT Theodore Henry Davie, CAPT Lavell Meldrum Bigelow, CAPT Parker Cleeve Cooper, CAPT Robert Hayes Smith, CAPT John Hoag Boyum, CAPT Paul Joseph (Snapper) Knapp, CAPT Thomas James Gallagher Jr., CAPT Tazewell Taylor Shepard Jr., CAPT Richard Lull Cochrane, CAPT Frank Hammond O'Brien, CAPT Carl Mann Cruse, and CAPT Franklin Taylor Stephens Jr. -Rudy's handwritten notes on Captain John Madison Hoskins. -Rudy's handwritten notes on John Koelsch with an attached obituary from the Navy Office of Information-Internal Relations Division (CI-430) dated 12 October 1966. One double-sided page with his personal history and his Medal of Honor citation.

Object ID	Title	Author	Summary
			-Photocopy of a newspaper article taken from the Los Angeles Times, date unknown, titled "Two Carriers Will Be Sold". The two carriers were USS Princeton and USS Valley Forge. Written on the page margin was a note from Chuck Pryor (?) relating that he had gone to Long Beach to see Princeton tied up there. -Photocopy of a letter from G.M. Smith, dated 16 September 1972 addressed to "Shipmates" outlining the cost of having a photograph that was taken of Princeton at NAS North Island on June 14, 1947 reproduced. -Original letter from Jan C. Jacobs, Managing Editor of THE HOOK, to Rudy dated April 2, 1990. In the letter Mr. Jacobs answers questions Rudy had asked about CVG-13, the dates of the 1956 Cruise along with the embarked squadrons, and where Rudy might find a list of Princeton's commanding officers. -Original letter from Graham K Brest to Rudy, dated 11-21-1991. In the letter Mr. Brest wrote that the 5th Commanding Officer of Princeton was Captain John C. Alderman and that he was relieved by Captain O.C. Gregg on February 15, 1954. He went on to say that Princeton did not have an official historian, but that the association would probably fill the position. Currently Bob Butler and Bob Newmeir are the "unofficial" historians. Mr. Brest lists the other sources of information he has including cruise books, issues of Slipstream, newspapers and his personal journal. -Original computer printout of an undated interview with Guy Bordelon about his time aboard the Princeton and becoming the only Korean War Ace. -Original computer printout

			Three-page photocopy of a DEPARTMENT OF DEFENSE contract bid for scrapping USS Coral Sea, dated 4 March 1993.

2019.329.045	Carrier History, USS Valley Forge	Friederich, Rudolf J. (ed)	This is a collection of correspondence, photographs, documents, newspaper clippings, magazine articles, and memorabilia of USS Valley Forge (CV-45). It was compiled by Rudolf Friedrich of the Aircraft Carrier Study Group. The operational history was compiled by Ole Haslev. Please note that in 1961 Valley Forge was converted and reclassified as an Amphibious Helicopter Assault Ship (LPH-8). The contents include both: SLEEVE 1 - Haslev Operational History from 1943 to 1971.

Object ID	Title	Author	Summary
			SLEEVE 2 - Haslev's list of Commanding Officers from 1946 to 1970, Battle Stars and Awards from 1946 to 1968, original specifications from 1946, modernization and overhauls from 1947 to 1968, SCB-110A Modernization specifications, radar summaries from 1946 to 1965, fire control fire control summaries from 1946 to 1961, aviation ordnance summaries in 1945, armament summaries from 1946 to 1964, and Air Groups from 1947 to 1960. Haslev includes two pages of the original specifications and the historical importance of the Battle of Valley Forge. SLEEVE 3 - Friedrich's History from 1944 to 1971. Updated with additional notes from 1984 to 2000. List and notes of the following CV-45 Commanding Officers: CAPT. John Watts Harris, CAPT. Richard Waynick ("Bud") Ruble, CAPT. Truman Johnson Hedding, CAPT. Harry Brigham Temple, CAPT. Lester Kimme Rice, CDR. Ward Thornton Shields, CAPT. Joseph Malcolm Carson, CAPT. Oscar Pederson, CAPT. Robert Ellington Dixon, CAPT. Paul Wesley Watson, CAPT. Charles Rudolph Fenton, CAPT. Almon Ellsworth Loomis, CAPT. Lowell Winfield Williams, CAPT. Thomas Benjamin Payne, CAPT. Clifford Morgan Campbell, CAPT. William Morgan McCormick, CAPT. Elbert Miller Steve, CAPT. Hawley ("Monk") Russell, CAPT. Clarence Agee Melvin, CAPT. Melvin, Clarence Agee. LPH-8 Commanding Officers: CAPT. Henry Smith Jackson, CAPT. John Anthony Fidel, CAPT. John Edward Parks, CAPT. Charles Neal Conatser, CAPT. Richard Oscar Madson, CAPT. Charles Harrison Carr, CAPT. Paul Elbert Payne, CAPT. David William, and CDR. Robert Edson Schock.

Object ID	Title	Author	Summary
			SLEEVE 4 – Three-page document from John Trahan, founder of the Happy Valley Reunion Club, summarizing the history of USS Valley Forge listing important events, commanding officers, dates of when USS Valley Forge Reunion (founded by "Andy" Anderson and Happy Valley Reunion Club were formed, the dates of Valley Forge's construction and early operations and locations from March 27, 1944, to June 14, 1948. Two-page document from the 20th Annual HAPPY VALLEY REUNION committee report for fiscal year 1 December 1990 to 30 November 1991, officers elected to serve 1992 to 1997, a list of members who had paid their dues, a list of the 20th reunion attendees, a list of members who donated at the reunion, and general membership information. Photocopy taken from the Dictionary of American Naval Fighting Ships, vol. 7, pages 440 to 444. Original tear out from the August 1959 edition of Proceedings titled "Antisubmarine Defense Group ALFA" by Captain Thomas D. McGrath, pages 49 to 55. Original tear out from the March-April 2002 edition of Naval Aviation News titled "Behind the Bridges at Toko-Ri" by Richard F. Kaufman, Ph.D., pages 18 to 25. SLEEVE 5 – A computer printout of Valley Forge's crest/shield taken from the NavSource website. A photocopy of the commission ceremony invitation dated Sunday, November the Third, nineteen hundred forty-six at three o'clock.

Object ID	Title	Author	Summary
			A twelve-page original copy of the 1991 Happy Valley Reunion Directory mailer titled "Take-Offs", addressed to Rudy. A twelve-page original supplement to the above, addressed to Rudy. Original type written correspondence from John Trahan to Rudy. Original (?) computer printout of an email from Jim Butler to CarrierSG@aol.com sent on 6/7/99 answering Rudy's request for information on the 1955 cruise. Envelope with the following newspaper clippings: Article titled "26,000-Ton Carrier Is Commissioned dated November 3, 1946. Article and picture titled "Commissioning New Flattop Under Wraps" dated November 3, 1946. Article titled "Mrs. Vandegrift Christens Carrier Valley Forge dated November 19, 1946. Article title from the ARMY AND NAVY REGISTER "titled Carrier Valley Forge" dated 5/29/1948. Article and picture titled "Carrier Sails for Formosa" dated June 1950. Article titled "Navy Ship Movements" date 4/18/53. Article and picture titled "Carrier Emerges from Tight Scrape with few Scratches," no date listed. Article with no title, dated 6/23/1956. Article with no title, dated 2/19/1959. Article titled "Valley Forge Mothballing Duo in 1960" dated 5/20/59.

Object ID	Title	Author	Summary
			Article titled "Valley Forge Closes Era" dated 1/25/61.
			Article titled "Navy Making Carrier Shifts" dated 2/22/61.
			Reunion announcement dated July 22-28 being held in Madison, Wisconsin. (As it was a partial announcement section, the year could not be found.)
2019.329.046	Carrier History, USS Iwo Jima	Friederich, Rudolf J. (ed)	There is no Binder From The Naval History and Command: "Iwo Jima (CV-46), an Essex-class aircraft carrier, was laid down on 29 January 1945 at Newport News Shipbuilding & Dry Dock Co., Newport News, Va. The construction was canceled 12 August 1945 and the partially completed hull was scrapped."
2019.329.047	Carrier History, Philippine Sea	Friederich, Rudolf J. (ed)	This is a collection of correspondence, photographs, documents, newspaper clippings, magazine articles, and memorabilia of USS Philippine Sea (CV-47). It was compiled by Rudolf Friedrich of the Aircraft Carrier Study Group. This is a collection of correspondence, photographs, documents, newspaper clippings, magazine articles, and memorabilia of USS Philippine Sea (CV 47). It was compiled by Rudolf Friedrich of the Aircraft Carrier Study Group. The operational history was compiled by Ole Haslev. SLEEVE 1 - Haslev Operational History from 1943 to 1971. SLEEVE 2 - Haslev's list of Commanding Officers from 1946 to 1958, Battle Stars and Awards from 1946 to 1954, original specifications from 1946, radar summaries from 1946 to 1956, fire control fire control summaries from 1946 and 1949, aviation ordnance summaries from 1946 to 1956, and Air Groups from 1946 to 1958. Haslev includes two pages of the original

			V63 .R39 1983)
			SLEEVE 6 - One page photocopy of "The USS Philippine Sea Association Newsletter" dated January-February 1989. Members to date, 360. President, Jim Docherty, Secretary, Treasurer, and Editor Chuck Davis, Directors Bob Buerger, Don Faulknor, and Floyd Sheets. Alternate Director, Joe Dryer. There is a short update on USS Philippine Sea (CG-58) construction status and the number of members who are planning on attending the Commission Day ceremonies. It was stamped on the bottom with the name Elmer G. Hubber. Original 12-page history titled "The Fighting Phil Sea" by Robert Cressman, beginning with CV-47 originally being named Wright, in honor of Wilbur Wright, but being changed after the American victory at the Battle of the Philippine Sea in June of 1944. Historical highlights were her christening on 5 September 1945, her work ups, Operation High-Jump, shakedowns in the Caribbean, two Mediterranean deployments, three Korean deployments, and four Wespac deployments, with a heavy emphasis on the Korean deployments. Philippine Sea was in commission for only 12 years, but as an unmodified Essex-Class carrier, she was deemed too expensive to modify. Decommissioned 28 December 1958 and berthed with the Reserve Fleet at Long Beach, she was redesignated AVT-11, 15 May 1959, and struck from the Navy List 1 December 1969. Sold to Zidell Explorations, Inc., Portland, OR, 23 March 1971. This history appeared in the Fall 1988 edition of "THE HOOK" Journal of Carrier aviation-the formal publication of the TAILHOOK ASSOCIATION. SLEEVE 7 - Computer

2019.329.049	Carrier History, Wright	Friederich, Rudolf J. (ed)	In Process-dsw This is a collection of correspondence, photographs, documents, newspaper clippings, magazine articles, and memorabilia of USS Saipan (CV -48). It was compiled by Rudolf Friedrich of the Aircraft Carrier Study Group. The operational history was compiled by Ole Haslev. The contents include both: SLEEVE 1 - Haslev Operational History from 1943 to 1971. SLEEVE 2 - Haslev's list of Commanding Officers from 1946 to 1958, Battle Stars and Awards from 1946 to 1954, original specifications from 1946, radar summaries from 1946 to 1956, fire control fire control summaries from 1946 and 1949, aviation ordnance summaries from 1946 to 1956, and Air Groups from 1946 to 1958. Haslev includes two pages of the original specifications and the historical importance of the Battle of Saipan. SLEEVE 3 - Friedrich's History from 1944 to 1958. Updated with additional notes from 1959 to 1971. List and notes of the following CV-49 Commanding Officers:
2019.330.001	Military History of World War II, The	Pitt, Barrie (ed)	This volume records the events of World War II in vivid pictorial detail. It features well over 1,000 rare documentary photographs, 500 superb technical weapon drawings and a wealth of military maps showing, stage by stage, the path of war through Europe, the Balkans, North Africa and the Atlantic; through China, Burma and across the Pacific towards Australia; and finally, after great sacrifice and noble courage, back to the bleeding and devastated hearts of Germany and Japan.

Object ID	Title	Author	Summary
2019.331.001	Bridge of No Return : The Ordeal of the U.S.S. Pueblo	Schumacher, Frederick Carl	This is the true story of a brave man and many brave men sent into the Cold War, ill-prepared and ill-equipped, who served their country well and faithfully, suffered monstrous physical and psychological torture, never abandoned belief or defiance, and whose reward from their nation and their service has been notoriety, then apathy, and the disdainful shadow of false guilt. If their ordeal is not understood, if the record is not set right, then an already grim page in history will be further fouled by our own arrogant neglect. On January 23, 1968, the U.S.S. Pueblo, alone and virtually unarmed, was seized in international waters by six combat units of the North Korean Navy. One American was killed by shellfire. The survivors, 80 officers and men and two civilian technicians, were taken into captivity, threatened, beaten, starved, frozen, forced to sign false confessions, used for propaganda, and then, after eleven months, released under extraordinary circumstances. "Skip" Schumacher, the young Operations Officer of the Pueblo, reveals this savage experience. He starts at a gripping moment -- when, after three days of interrogation and beating, he determined to kill himself to prevent "cracking" and revealing the secret information he possessed. He resolved not to violate the Code of Conduct for Members of the Armed Forces. His attempt at suicide failed -- and so did the Code of Conduct. His full narrative covers the period from his joining the Pueblo to his journey across the Bridge of No Return. The epilogue, written by George Wilson, journalist and co-author of this book, who reported the Pueblo story through its conclusion, is a penetrating analysis of the

Object ID	Title	Author	Summary
			outcome of the Court of Inquiry, where the courage, if not the loyalty, of the crew was brought into question. The strange action that followed has left these gallant men to hang forever in bitter silence -- unless some amends are made. This book reads like an adventure yarn, a war thriller with a bitter end. It is exciting, at times comic, often heartbreaking, eventually soul-sickening. But it is not a yarn -- it is truth. It had to be told. The Code of Conduct that failed the men of the Pueblo will fail others we send out to the hazards and horrors of the Cold War. (About the Authors) F. Carl Schumacher, Jr. grew up in St. Louis, was graduated from Trinity College in Connecticut, became a reserve officer in the U.S. Navy, served on active duty in U.S.S. Vega and U.S.S. Pueblo. He has since resigned from the Navy and works for an insurance firm in St. Louis. George C. Wilson, born in Orange, N.J., holds a degree from Bucknell University, began his journalistic career in 1950, and has been Military Correspondent for the Washington Post since 1966. Jacket design by Hal Siegel (from dust jacket flaps) Account of the capturing of the USS Pueblo by North Korea in 1968. (From the Prologue) This book is... the story of what the Pueblo disaster meant to one man (Skip Schumacher), who in certain poignant and critical respects reflects the essential experience of the entire crew and of other United States military men taken prisoner by sophisticatedly savage foes in the impersonal, ruthless, and ruleless Cold War. (from Amazon.com)

Object ID	Title	Author	Summary
2019.335.001	On Wave and Wing : The 100 Year Quest to Perfect the Aircraft Carrier	Tillman, Barrett	Midway Comes Home What defended the U.S. after the attack on Pearl Harbor, defeated the Soviet Union in the Cold War, and is an essential tool in the fight against terror? Aircraft Carriers. For seventy years, these ships remained a little understood cornerstone of American power. In his latest book, On Wave and Wing , Barrett Tillman sheds light on the history of these floating leviathans and offers a nuanced analysis of the largest man-made vessel in the history of the world.
2019.336.001	USS Midway (CV-41) - Fortieth Anniversary 1945-1985 - The Magic Goes On - 1984-85	Williamson, Willie (ed.)	A pictorial account of an approximate 2-year period in Midway's forward deployed life. It covers the 28 December 1983 to 23 May 1984 deployment to the Western Pacific--Indian Ocean and Persian Gulf; the 15 October 1984 to 12 December 1984 deployment to the Western Pacific, and the history of the Midway until she went in to drydock in March of 1985.. Midway was at this time homeported in Yokosuka, Japan. During the 5 month cruise (11984-85), Midway spent 111 continuous days at sea (on Gonzo Station) and steamed over 63,000 miles. Conducting almost 9,800 hours of flight operations, she launched and recovered over 5,300 aircraft, breaking the all-time record for the first quarter in any year of her history. Ports visits included Sasebo, Subic Bay, Manila, Pattaya Beach, and Singapore. A visit to Perth was cancelled to take up a USS Kitty Hawk commitment in the Indian Ocean. Carrier Air Wing Five (CVG-5) was embarked. Onboard for the 1983-84 deployment were: VF-161 (F-4S), VF-151 (F-4S), VA-93 (A-7E), VA-56 (A-7E), VA-115 (A-6E and KA-6D), VAW-115 (E-2B), VMFP-3 Det.B (RF-4B), VAQ-136 (EA-6B), and HC-1 Det.2 (SH-3G). Onboard for the October - December deployment were: VF-161 (F-4S), VF-151 (F-4S), VA-93

2019.336.002	USS Midway (CV-41) - Desert Magic - 1990-1991	Guido, S. (ed.)	A pictorial account of the activities and crew of USS Midway in the period July 1990 through June 1991. It was an eventful period in the life of Midway that saw her as the flagship of the U.S. Naval Presence on the Northern Arabian Sea and Persian Gulf in the leadup to and execution of Operation Desert Storm. Midway was on station from November 1990 to March 1991. This was part of a western pacific/I.O. deployment that took place from 2 October 1990 to 17 April 1991. Port visits during the period the cruise book covers were Subic Bay (2), Singapore, Abu Dhabi, Pattaya Beach and Hong Kong. Midway was visited by Vice-President and Mrs. Dan Quayle on 21 May in recognition of Midway's participation in Desert Storm. Other VIP visits included the Secretary of the Navy, Australia's Maritime Commander and Brooke Shields. Midway escorts for the deployment were USS Oldendorf (DD-972), USS Curts (FFG-38) and USS Fife (DD-971). CVW-5 was embarked for the deployment portion with VFA-195 (F/A-18A); VFA-151 (F/A-18A); VFA-192 (F/A-18A) ; VA-185 (A-6E and KA-6D); VA-115 (A-6E and KA-6D); VAW-115 (E-2C); VAQ-136 (EA-6B); and HS-12 (SH-3H).
2019.337.001	USS Midway (CVA-41) - Mediterranean Cruise - 1954	D'Argenio, Raymond M. (ed.)	A pictorial account of the deployment of the USS Midway to the Mediterranean Sea in 1954. The ship departed Norfolk on 4 January and returned to Norfolk on 4 August. Port calls included: Gibraltar; Algiers, Algeria; Augusta, Sicily, Italy; Taranto, Italy; Salonika, Greece; Athens, Greece; Cannes, France;

2019.338.004	Complete Book of World War II Combat Aircraft, 1933-1945	Angelucci, Enzo	This book presents in full color -- and special, large format -- all the aircraft, both Allied and Axis, that took part in World War II. Fighters, bombers, assault aircraft, torpedo launchers -- from the biplanes of the late thirties to the first jets of 1945, from the most famous to the lesser known -- all are described and presented according to the period in which they were planned and employed, and all are accompanied by original photographs and technical information. Backup to 2012.304.008.
2019.338.005	Days of Infamy	Gingrich, Newt	This is a a What if based upon not what happened but what could have happened. Heavily researched. Days of Infamy is the second book in the Pacific War series. It begins where Pearl Harbor, the first book, concludes. Yamamoto, the man in charge of the Japanese fleet, has just attacked Pearl Harbor. The Japanese fail to get their formal declaration of war to the U.S. before the attacks. which allows the U.S. to deem them as 'sneak attacks'. Yamamoto decides to attack again with the hope of provoking a counter-attack by the U.S, which still has three carriers available.

			enlisted naval aviation pilots including USS Navy, Marine Corps and Coast Guard, 1916-1981.
2019.338.007	Flags of America	Hooper, Van B. (ed)	Color illustrations of flags that have flown over the USA. Includes pamphlet "How to Fly and Respect the Flag Of the United States." Includes rules Governing the National Flag and United States Navy Flags.
2019.338.008	Pearl Harbor Murders	Collins, Max Allan	From Amazon "Edgar Rice Burroughs created the wildly popular Tarzan of the Apes and John Carter of Mars, but the exploits of his heroes cannot rival the writer's own explosive adventure, sparked by the tragic murder of an exotic young beauty on a moon-swept Honolulu beach. The killing is written off as the tragic result of a lovers' quarrel, but Burroughs suspects that the alluring half-Japanese singer was executed by espionage agents. It's December 6, 1941. War with Japan is looming, and Burroughs has reason to suspect an attack on Oahu is imminent. Was the songstress silenced to prevent her from "singing" about certain sinister plans? As Burroughs and his son Hully search for clues and track down suspects, all signs point to the next day—Sunday—as the perfect time for a Japanese invasion. But the thought of such devastation raining down on paradise seems almost unbelievable...."
2019.338.009	Stars and Stripes : The Story of the American Flag	Freeman, Mae Blacker	Fifty stars stand for the states that make up this country. Thirteen stripes remind us of the colonies that fought for their freedom. But the flag has not always looked the way it does today. Its history is as colored and rich as our country's past. Yet despite the ways the flag has changed in the past two hundred years, the pride, unity, and strength it inspires have never faltered.

			aviation that extends the capability of an aircraft to its farthest limits. The limits can be of any sort: speed, altitude, range, maneuverability, safety, or some combination.
2019.339.004	Japanese Destroyer Captain : Pearl Harbor, Guadalcanal, Midway -- The Great Naval Battles as Seen Through Japanese Eyes	Hara, Tameichi	One of Japan's most famous naval heroes, Captain Tameichi Hara —"the unsinkable captain"—led his destroyers into the thick of the fight in practically every naval battle in the Pacific during World War II. JAPANESE DESTROYER CAPTAIN is his account of some of the most famous actions in the history of naval warfare — Pearl Harbor, Coral Sea, Midway, Guadalcanal, Leyte Gulf, Okinawa — a fascinating view of battles with the U.S. Navy, as seen by Japanese eyes. A best-seller in Japan, this book has been edited for the American reader by Associated Press reporter Fred Saito (coauthor of SAMURAI!) and Roger Pineau, former assistant to Rear Admiral Samuel Eliot Morison in the preparation of the 14-volume "History of the United States Naval Operations." (from back cover of 1965 edition)
2019.339.005	Pearl Harbor	Barker, A. J.	Contents: Prelude -- Admiral Yamamoto -- 'Operation Z' the Pearl Harbor Plan War becomes inevitable -- Espionage activity on Oahu -- The sleeping giant The preparatory phase -- The task force sails -- 'To-to-to' -- Oahu under fire Counting the cost -- Epilogue
2019.339.006	Pacific War, The : World War II and the Japanese, 1931-1945	Ienaga, Saburo	The Pacific War is the most important critical Japanese book on WWII to appear in English. Saburo Ienaga, one of Japan's leading intellectuals, brings to this awesome conflict a perspective rarely encountered by Americans. The result is a deeply moving and memorable portrayal of how and why Japan waged war from 1931 to 1945, and what life was like for the Japanese people in a society engaged

2019.339.007	Okinawa : The Last Battle of World War II	Leckie, Robert	From Publishers Weekly Military historian Leckie covers the fierce battle between American and Japanese troops for the island of Okinawa throughout the spring of 1945. Copyright 1996 Reed Business Information, Inc. From Library Journal On this 50th anniversary of the battle of Okinawa (April to June 1945), we can expect an avalanche of titles about this last major battle of World War II. Okinawa was an epic amphibious-air-sea-land battle the likes of which may never be seen again. The conflict raged for 83 days; 13,000 Americans and 100,000 Japanese perished. Kamikazes sank 34 and damaged 361 U.S. vessels. Both Astor and Leckie are experienced military historians who tell their stories in the words of participants. Astor interviewed numerous veterans and compiled a masterful account of the battle as seen through the eyes of both American and Japanese survivors. He explores the history, training, and morale of the army and marine divisions and demonstrates why each was bound to succeed or fail. On the other hand, Leckie has written a "Monarch Notes" version of the battle that tells us nothing new. For the best history of the Okinawa campaign, readers should consider James and William Belote's Typhoon of Steel: The Battle for Okinawa (1970).?Stanley Itkin, Hillside P.L., New Hyde Park, N.Y. 2019.339.008	Yamamoto : The Man Who Menaced America	Potter, John D.	It comes as no surprise that the impassive, implacable man in the photograph facing the title page played an excellent game of poker; it is more startling to learn that he picked it up at Harvard, along with a love of baseball, many years before

Object ID	Title	Author	Summary
			he conceived the idea of Pearl Harbor to destroy the country where he came to study. Pearl Harbor was his plan, his alone, and Yamamoto programmed it for eighteen months. Earlier in this study Potter, a British foreign correspondent, gives a very little about Yamamoto's life prior to his rise as Commander of the Japanese Fleet. But this study really gets under way when Yamamoto fires his first ball at the Americans whose unpreparedness was not justified. Promptly thereafter the jubilant Japanese succumbed to the ""victory disease"" and had difficulty in figuring out what to do next. They decided on the seizure of Midway, but, overconfident and underinformed, proceeded disastrously with Nagumo as Yamamoto's carrier commander. The major part of Potter's book is an explicit and extensive account of World War II at sea through the attrition of smaller actions, heavier losses, until finally Yamamoto's plane was shot down. This is a segment of naval history on which historians will not agree (nor presumably will Samuel Eliot Morison agree with Potter); was it a ""short-range success"" or a ""long-range mistake"" on the part of the Nipponese Napoleon who shared with him a certain arrogance and bad luck? In any case, Potter's version is handled with decisive detail and a firm, retrospective sense of evaluation.

2019.339.010	Fellowship of Valor, A : The Battle History of the U.S. Marines	Alexander, Joseph H.	This book places emphasis on battles and esprit, and minimum coverage of organization charts or grand strategy. Part of the esprit, perhaps the very root, is that Marines are much aware of thir history and traditions. History and traditions form a basic foundation for belief in the Corps. There is a focus on the somewhat larger-than-lifefize heroes of the Corps and the battles from the Revolutionary War (1775) to

2019.343.001	Hunters in the Shallows : A History of the PT boat	Nelson, Curtis L.	The PT boat is one of naval history's most famous vessel types. Small, swift, and heavily armed, it possessed a romantic glamor all its own. Its far-flung operations during World War II made for gripping drama. Yet despite its fame, the PT boat has been neglected by serious naval scholars. "Hunters in the Shallows" is the first book to examine the development and role of the small torpedo boat in U.S. naval history, from William Cushing's heroic attack on the Confederate ram "Albemarle" in 1864, to PT operations in World War II. Moreover, it offers the first critical analysis of the PT's operational value. Culled from primary sources, this myth-buster covers the inside story of the scandalous 1939 Elco deal, offers new insight into the roles of Franklin D. Roosevelt and Douglas MacArthur in PT development, dares a shocking reappraisal of MacArthur's dramatic escape from Corregidor by PT boat in 1942, and reassesses the sinking of John F. Kennedy's PT-109. It also contains numerous photos and illustrations tracing American small torpedo boat development from the Civil War through World War II. Sure to be controversial, "Hunters in the Shallows" is a must read for naval professionals, military historians, and PT boat buffs alike.

2019.343.004	Grumman CATS	O'Leary, Michael	The most famous family of WWII Naval fighters, the Grumman Cats earned an enviable reputation for toughness and fighting ability across the globe. Types that include the Wildcat, Hellcat and Tigercat were used by both the US Navy and Commonwealth Forces.
2019.343.005	Battleship and Cruiser Aircraft of the United States Navy, 1910-1949	Larkins, William T.	This thorough study of the history, development and service of floatplanes carried on battleships and cruisers documents a long neglected subject for the first time in over 400 photographs. From the 1920s through World War II, aircraft operating from catapults were used for spotting gunfire and scouting ahead of the fleet. Flying these planes was unique and the dramatic launching and recovery operations are covered by both photographs and text. Colors and markings are detailed and special attention has been paid to images showing catapult and ship details for both the ship and aircraft modeler. The assignment of all aircraft by type, totals, squadrons and ships is given annually from 1924 to 1949. In addition to rare photos of all of the experimental aircraft that

2019.343.007	Killer Rays : The Story of the Douglas F4D Skyray and F5D Skylancer	Frankel, Mark	Provides an explanation of how and why the Skyraider came to be, examines the technological problems it overcame, analyzes its service history, recreates how it was flown, studies its stillborn successor, the Skylancer, and explores the place of the Skyraider in Naval Aviation history with the advantage of 50 years of hindsight.
2019.343.008	Fighting Flying Boat, The : A History of the Martin PBM Mariner	Hoffman, Richard A.	Detailing a proud chapter in naval aviation history, former PBM pilot Richard Hoffman has written the first comprehensive history of Mariner operations. This versatile seaplane was first deployed in 1941 during the Battle of the Atlantic, when it helped sink ten German U-boats. The following year it became a mainstay of the Naval Air Transport Service as the first aircraft to provide a vital link between Hawaii and the South Pacific. In combat, Mariners participated in every major offensive campaign from the Mariana Islands to Iwo Jima and Okinawa, sinking enemy submarines, ships, and aircraft. They also served as the main rescue aircraft, saving hundreds of airmen and seamen in spectacular open-sea rescue operations. At war's end, they were the first aircraft into Tokyo Bay. Yet the Mariner has long been overshadowed by its famous counterpart, the PBY Catalina. This book corrects the oversight by recognizing the Martin PBM Mariner not only for its contributions to World War II but also the postwar years, when it was involved in the Korean War and with the exploration of the Arctic and

Object ID	Title	Author	Summary
			Antarctic. Hoffman offers dramatic details of PBM fights with Chinese MiGs and patrol and reconnaissance missions. The author also highlights the seaplane's hazardous rescue missions with the Coast Guard and its service with foreign armed forces. Striking photos of Mariners in action accompany the narrative, and a list of all PBM casualties is appended. (from dust jacket flap)
2019.343.009	A-1 Skyraider in Vietnam , The : The Spad's Last War	Mutza, Wayne	Through its remarkable service during the war in Southeast Asia, the Skyraider became legendary. It served with distinction in the hands of U.S. Navy, U.S. Air Force, and South Vietnamese Air Force pilots, who took the war to the enemy, often at low altitude and in the face of devastating antiaircraft fire. And it suffered heavy losses. The Skyraider's versatility and the mettle of its pilots were unmatched. This book takes not only a look at an old airplane, but at the warriors who flew and maintained the machine they called the "Spad." This volume captures the essence of combat in the Spad, and explains the broad range of Spad operations. The text, which is rich with the narratives of Spad pilots and ground crew, is complemented by over 300 original photographs, seventy emblems, and detailed listings of every Skyraider that flew in the war, and the colorful units to which they were assigned. This fascinating volume is a must for aviation enthusiasts, history buffs, and modelers alike. (from schifferbooks.com)
2019.343.010	Catapult Aircraft : The Story of Seaplanes Flown from Battleships, Cruisers and other Warships of the World's Navies, 1912-1950	Marriott, Leo	During World War I, the navies of the opposing forces discovered the value of aerial reconnaissance and many experiments were made to allow larger warships to carry one or sometimes two aircraft aboard. In the early days these were float planes that were lowered by crane into the sea and then lifted back aboard

Object ID	Title	Author	Summary
			upon their return. This was a lengthy affair and when a speedy departure was necessary, time was of the essence. A new system was devised so that a powerful catapult system and a short ramp could, with the added speed of the ship, get an aircraft airborne in a fraction of the time previously required. Thus was born a highly specialised type of aircraft. This book includes all the major designs that went to war in the First and Second World Wars and includes aircraft used by all the combatants. It looks at how the aircraft evolved and how the warships were modified to accommodate the aircraft and the catapult system. The use of these fixed-wing aircraft was abandoned when the invention of the helicopter was made in the early post WW II years. (from dust jacket flap)
2019.343.011	Disaster in the Pacific : New Light on the Battle of Savo Island	Warner, Denis Ashton	From Library Journal The U.S. Navy suffered its worst defeat on August 9, 1942 off Savo Island near Guadalcanal in the Solomon Islands. The U.S. Task Force met the Japanese fleet with disastrous results; one Australian and three American cruisers were sunk while enemy losses were nil. For 50 years, the true story of this humiliating defeat has been kept under wraps. Now this Australian historian/journalist team answers the numerous questions about Savo Island. Why were the Americans taken by surprise? Why were reports of Japanese movements ignored, and why was U.S. intelligence so inept? In fact, the Americans underestimated the Japanese capacity for night fighting as well as their excellent training and equipment. U.S. forces were poorly trained in night fighting, their torpedoes were ineffective, and the American commanders were tired and inexperienced. Until now, very little accurate information on Savo Island has been available. This remarkable book

Technical specifications, development and construction history and involvement in combat included on more than 125 classes of boat. Detailed colored artist profiles.
2019.343.015	Aggressors, Vol. 2 : Carrier Power vs. Fighting Ship	Polmar, Norman	Building for War: During the Second World War two ships emerged as the dominant naval weapons—the aircraft carrier and the submarine. The aircraft carrier developed during the conflict into a highly effective, far-ranging weapon that could engage enemy fleets, attack enemy forces and installations on land, and survive in the face of the most effective defenses possible. The carrier concepts

Object ID	Title	Author	Summary
			that emerged in the war have survived for more than four decades, forming the basis of the modern U.S. aircraft carrier force and, probably, the carrier fleet now being constructed by the Soviet Union. In contrast, the submarine evolved little during the war. Development of the snorkel underwater breathing tube and submarine radar certainly improved submarine capabilities, as did the German development of high-speed hull forms and improved diesel-electric propulsion brought together in the Type XXI U-boat. But the submarine that went to sea in September 1939 and that of May 1945 had the same basic capabilities and limitations, and the countermeasures to defeat them existed. This was not true of aircraft carriers. The carriers and their aircraft as well as their tactics changed significantly during the conflict. They became the most effective ship killers of the war. Perhaps most important, the submarine, armed with deck guns and torpedoes, had a striking range measured in hundreds or, at best, thousands of yards. The aircraft carrier could launch bombers that could strike out against targets hundreds of miles away—targets afloat or on land. The beginnings of the aircraft carrier are shrouded in the romantic beginnings of manned flight. As early as 1898, American scientist Samuel P. Langley experimented—unsuccessfully—with catapulting flying machines from barges. The first successful manned flight is credited to the Americans Orvill and Wilbur Wright, who flew—a distance of 40 yards (37 m)—over the beaches of North Carolina in 1903. Immediately military officers began looking at the

Object ID	Title	Author	Summary
			implications of their flying machine for war. When Orville Wright conducted demonstration flights for the U.S. Army near Washington, D.C., in September of 1908 two U.S. naval officers were present. 7b most Navy personnel the flying machine was viewed as a MOM of extending an observer's sight beyond that possible frau a masthead. Two years later American aviation pioneer Glenn Curtiss flew one of his home-built machines over a lake in Nan York where floats had been arranged in the outline of a 5008 by 90 ft (152 m by 27 m) battleship. Dropping eight-inch (20 cm) lengths of steel pipe on the floats, Curtiss awakened many to the potential of an airplane attacking a ship at sea.

2019.343.021	U.S. Navy Floatplanes of World War II in Action	Adcock, Al	Before the advent of radar and other electronic devices aboard warships, the jobs of seeking out the enemy and spotting naval gunfire fell to the floatplane scouts. These small 1- and 2-seat catapult-launched aircraft served aboard US Navy ships as the eyes of the fleet until mid-1949. Most battleships carried up to 4 floatplanes; cruisers with aircraft hangars could accommodate as many as 8 aircraft; destroyers, when applicable, were limited to only 1 floatplane. Curtiss-Wright was the designer of 3 of the 4 types of scout planes that served aboard US warships in WWII, a tribute to the American aviation pioneer and father of the US floatplane, Glenn Curtiss. Chance-Vought and the Naval Aircraft Factory also produced floatplanes that served the US Navy in WWII. All get detailed coverage in this volume. Illustrated with more than 106 photographs, 13 full

2019.343.022	U.S. Navy Flying Boats and Amphibians in World War II	Adcock, Al	Soon after the early aviation pioneers learned to fly, their attention turned to water. It was more abundant than land and presented a vast landing area. Early American aviation enthusiast and aircraft designer Glenn H. Curtiss redesigned his 'June Bug' airplane by adding floats and made his first flight from water in November 1908. Curtiss' Hydroaeroplane (patented in 1911) opened the door for many types of flying boats and seaplanes. US Navy flying boats, seaplanes, and amphibians provided valuable service in both World Wars, and they continued to serve with the Navy and Coast Guard until the war in Vietnam, when the last P5M Marlin squadron was decommissioned. With nearly 200 photographs, color profiles and detailed line drawings, this special Squadron/Signal book looks at the various flying boats and amphibians and the contribution they made; Adcock. 80 pages. 2019.343.024	Curtiss SC-1/2 Seahawk	Long, Billy Jack	into service without adequate testing and re-engineering. (from ginterbooks.com:) The last of the aircraft designed for use as eyes of the fleet. This was the fastest, highest climbing, heaviest armed, most maneuverable "EYE" the Navy ever had. This aircraft had no tail hook but it still went aboard ships. It was use for many roles like scouting, ASW, directing naval gunfire and other duties. This book is written by CDR Long who flew this type of aircraft from the Battleships and Cruisers, when they were the center of the fleet. This book is a must for anybody who wants to know more about the role of the scout aircraft in the fleet. 129 PAGES, 247 B&W PHOTOS, 51 DRAWING AND 4 PAGES OF MODELS ORDER NUMBER NF38 - \$29.95
2019.343.025	Fantail fighters	Scutts, Jerry	INTRODUCTION: During World War II, the US Navy, Marines and Coast Guard operated two main types of floatplane, the Curtiss SOC Seagull and Vought OS2U Kingfisher plus one amphibian, the Grumman J2F Duck. During the latter half of the war, the single-seat Curtiss SC-1 Seahawk entered service, to become the last aircraft ordered for duty aboard non-carrier classes of ship. In addition, the Navy and Coast Guard operated the ill-fated Curtiss SO3C Seagull which served very briefly aboard cruisers before its relegation to land bases. In terms of wartime service, the Grumman J2F Duck was the oldest, having flown for the first time on 4 May 1933. The J2F was the only US single-engined amphibian to put in front-line sea duty during hostilities, being designed

Object ID	Title	Author	Summary
			primarily to provide the Navy with a "utility" service aboard aircraft carriers. Its dual wheel/float landing gear also enabled it to perform a useful rescue function in combat areas. On 5 March 1934 the portly Curtiss XSOC Seagull biplane made its debut, some three months before early production J2F-1 Ducks joined VS-3 aboard the carrier Lexington. Despite its somewhat anachronistic appearance the SOC was one of the most reliable and well-liked floatplanes the Navy ever ordered, so much so that it was taken out of honorary retirement in 1944 to replace its would-be successor aboard some ships of the fleet. Illustrated by John C. Valo.
2019.343.026	F4U Corsair	Jarski, Adam	An extraordinary comprehensive monograph of one of the most well-known American aircraft. The Chance Vought F4U Corsair was a carrier-capable fighter aircraft that saw service primarily in World War II, with some Japanese pilots declaring it the most formidable fighter of the war. It quickly gained the reputation for being the most capable fighter-bomber in production, and was also used by the Fleet Air Arm and the Royal New Zealand Air Force. It contains the history of its design and development, as well as very detailed and numerous plans for modellers. Successive chapters describe camouflage and markings of the planes on duty in USA, Great Britain, New Zealand and other countries. The book also includes detailed coverage of the service history of this aircraft. The whole book is illustrated with a great number of photos and colour plates showing Corsair camouflages. As usual the technical description is included.
2019.343.027	Grumman Mallard : The Enduring Classic	Hotson, Fred W.	The Grumman Mallard amphibious aircraft was developed just after World

Object ID	Title	Author	Summary
			War II as a small passenger aircraft for airline use but quickly found its niche in the expanding world of business aviation. What better than an aircraft that could fly busy executives to business meetings but also drop down on a remote lake for some salmon fishing? Before jets came along it was a favorite of celebrities such as Christian Dior, Gar Wood and Lord Beaverbrook. In more recent years the Mallard has come to be regarded as one of the most beautiful seaplanes ever produced and it is popular with wealthy collectors, who restore them and use them to tour the world. This book, handsomely illustrated with photos of Mallards past and present, as well as unique fold-out cutaway drawings of the original and the turbine version, is the first book on this classic aircraft and a labor of love on the part of the author. About the Author Fred Hotson began his aviation career in 1935 with de Havilland Canada. His affection for the Grumman Mallard amphibious aircraft came from the many years he spent as pilot of the Grumman Mallard of Colonel Robert McCormick of the Chicago Tribune. He has written several histories of de Havilland Aircraft and other works of aviation history. (from Amazon.com)
2019.343.028	Martin P5M Marlin, The	Barth, Bruce D.	This publication is intended to provide a comprehensive accounting of the U.S. Navy's last production seaplane, from its post-war development in the late 1940s to its untimely demise in the mid-1960s. Also included, is a complete history of the Navy's last seaplane squadron, Patrol Squadron Forty. At head of title: The end of an era in naval seaplane aviation.

2019.343.041	Above an Angry Sea : United States Navy B-24 Liberator and PB4Y-2 Privateer Operations in the Pacific, October 1944-August 1945	Carey, Alan C.	(from schifferbooks.com:) Above an Angry Sea chronicles USN B-24 Liberator (PB4Y-1) and PB4Y-2 Privateer operations in the Pacific. The author's previous book, We Flew Alone, discussed the Navy's use of the B-24 Liberator from February 1943 to September 1944. He now examines in dramatic detail the use of the B-24 and PB4Y-2 during the last eleven months of the war against Japan. The author has collected personal stories, over 200 photographs, a tabulation of all aerial kills credited to PB4Y patrol plane commanders, a roster of all personnel killed in action or in the line of duty, individual squadron records, and a list of all known B-24 Liberators and PB4Y-2 Privateers assigned to the Pacific between 1943 and 1945.
2019.343.042	Convair PB4Y-2/P4Y-2 Privateer	Veronico, Nicholas A.	Comprehensive history of the Consolidated Vultee (Convair) PB4Y-2/P4Y-2 Privateer. Includes numbers photos, cutaways, and diagrams.
2019.343.043	Fletcher DDs in Action	Scutts, Jerry	When USS Nicholas (DD-449) was commissioned on 4 June 1942, the event was a significant one for the USN. It marked the entry into service of the first of 175 Fletcher Class destroyers. These destroyers not only represented a landmark design which would serve with distinction throughout the Second World War, but provided the basis for the later Sumner and Gearing classes.
2019.343.044	Wildcat Aces of World War 2	Tillman, Barrett	(from ospreypublishing.com:) About this book Arguably the most important piston-engined single-seat fighter design ever to see service with the US Navy and Marine Corps, the

			fighter designs were much heavier and more complex than earlier fighters. When planning a replacement for their successful F6F Hellcat carrier fighter, however, Grumman chose to built as lightweight a design as possible around the most reliable large radial engine. The result was the F8F Bearcat, which was often called a "hot rod" by its pilots for its fantastic acceleration and climbing ability. Using the well-proven Pratt & Whitney R-2800 engine, the first Bearcat prototype flew on August 21, 1944. After minor modifications, including the addition of a dorsal fin, early production F8F-1s began armament tests and carrier qualification trials in early 1945. By May of 1945, the Bearcat was cleared for operations, with very few restrictions on its flight operations over its wide speed range. A total of 654 F8F-1s were delivered, all fitted with the 2,100 hp R-2800-34W engine.

2019.343.066	F4F Wildcat in action	Linn, Don	In 1935 the US Navy Bureau of Aeronautics issued a request for proposals to the US aviation industry for a new fighter design to replace the Grumman F3F. A number of designs were submitted and from these the Navy selected two for further development. In the Spring of 1936 the Navy awarded contracts for two prototype fighters, the Brewster XF2A-1 and the Grumman XF4F-1. Brewster's XF2A-1 prototype was a monoplane, while the Grumman design, the XF4F-1, was a biplane, similar to Grumman's earlier F3F-3 already in service. Grumman, realizing that its competitive edge could be lost if they continued with biplane designs while others were building monoplanes, sought the Navy's permission to change the XF4F-1 prototype from a biplane to a monoplane configuration. On 10 July 1936, the Navy agreed to the Grumman proposal. The XF4F-1 contract was cancelled and Grumman received authorization to build a prototype of the monoplane XF4F-2 in its place. The Grumman and Brewster prototypes would be flown in a competitive fly-off which would determine which design

2019.343.069	F4U Corsair vs Ki-84 "Frank," Pacific Theater 1945	Young, Edward M.	The Vought Corsair was the first American single-engined fighter to exceed 400 mph and establish dominance over the legendary Mitsubishi Type Zero-sen. The Ki-84 Hayate was introduced by the Japanese specifically to counter this growing American dominance of the skies over the Pacific. Built in greater numbers than any other late war Japanese fighter, nearly 3000 were completed between 1944 and 1945. This volume examines the clashes between the Corsair and Ki-84 in the closing stages of the war, revealing how Corsair pilots had to adapt their techniques and combat strategies to adapt to these newer types. It also reveals how the kill rate was largely driven by the reduced quality of fighter pilots after the high casualty rates inflicted on the Japanese air force during the air battles over the Solomon Islands. BIOGRAPHICAL NOTE Edward Young is a retired financial executive with degrees in Political Science from Harvard University and the University of Washington. During his career he held assignments in New York, London, Tokyo and Hong Kong. He has written a number of books and numerous articles on aviation and military history. 2019.343.072	US Destroyers in Action, Part 3	Adcock, Al	Provides an in-depth look at the history of the five classes of US destroyers. Includes full color artwork, B&W line art, technical data, and over 100 B&W photos. Adcock; 50 pgs. (from Amazon.com)
2019.343.073	US Destroyers in Action, Part 4	Adcock, Al	Provides an in-depth look at the history of the five classes of US destroyers. Includes full color artwork, B&W line art, technical data, and over 100 B&W photos. Adcock; 50 pgs. (from Amazon.com)
2019.343.074	Consolidated-Vultee PB4Y-2 Privateer : The Operational History of the U.S. Navy's World War II Patrol/Bomber Aircraft	Carey, Alan C.	Summary: "Consolidated-Vultee Aircraft Corporation's (Convair) attempt to make a few design changes to its famous B-24 Liberator for

Object ID	Title	Author	Summary
			the U.S. Navy in 1942 eventually evolved into the PB4Y-2 Privateer, a 70,000-pound patrol bomber equipped with state-of-the-art electronics gear, armed with twelve .50-caliber machine guns, and the capability to deliver bombs, depth charges, and guided missiles. Beginning with the development and production of the aircraft, this book presents an in-depth examination of the patrol bomber's entire operational history from 1942 to the present. Containing over 260 photographs and line art, the book covers the PB4Y-2's service with the U.S. Navy, French Aéronavale, Republic of China Air Force, various countries of Latin America, and finally as a slurry bomber for aerial fire fighting companies"--Cover p. [4].
2019.343.075	US Submarines 1941-45	Christley, Jim	Book includes information about submarines that precedes 1941. Good primer on the Tench, Gato, and Baleo class submarines, a thumbnail sketch of the development and anatomy of these warships. After a chapter on the design and development leading up to the Gato class, the equipment section starts off with a review of weapons. Sections on torpedoes and gun outfitting offer succinct summaries of the offensive and defensive systems of the era. I found the section on guns to be particularly informative, stepping through the different deck gun models and the range & weight of the projectiles fired by each. The various periscope, sonar, and radar installations are covered next. Again, these are brief but well-written descriptions of each installation and the improvements made over the war. The next section introduces the Balao class boat as an illustrative example of the fleet submarine. This leads off with a description of paint schemes or measures, and covers Ms 9, 10, and the two variants of Ms 32. Next, the individual compartments and

Object ID	Title	Author	Summary
			their functions in the boat are explored, followed by a discussion of submarine tactics. This includes informative diagrams of the approach and attack phase. The book ends with a brief operational history summary of submarines during WWII. In the limited space, Christley manages to condense as good deal of the high points of the submarine campaign against Japan.
2019.343.076	Imperial Japanese Navy Submarines, 1941-45	Stille, Mark	The Imperial Japanese Navy in World War II possessed the most technologically advanced and varied submarine fleet in the world. Ranging from the largest pre-nuclear submarines in the world to manned torpedoes, with the fastest combat vessels and midget submarines operating alongside craft capable of carrying floatplane bombers, the fleet should have been an awe-inspiring and highly effective force. Yet, despite playing a crucial scouting role and being equipped with the best torpedoes available, the Japanese submarine fleet was surprisingly ineffective. (From Amazon)
2019.343.077	PT Boat Squadrons : US Navy Torpedo Boats	Konstam, Angus	(From Amazon) This title covers the many types and variants of PT-boats used by the US Navy in a variety of roles; originally conceived as anti-ship weapons, they were also used effectively to lay mines and smoke screens, the rescue downed aviators and to carry out intelligence or raider operations.
2019.343.078	HU-16 Albatross in Action	Migliardi, Robert D.	(From Amazon) Saw combat service in the air-sea rescue role with the USAF, USN and Coast Guard. Service began with the Korean War and extended into Vietnam. The Albatross was widely exported & used all over the world. Over 100 photos, 13 color paintings, numerous line drawings. 50 pages.
2019.343.079	Grumman F4F Wildcat including Grumman Martlet Mk. I-VI	Phillips, Glen	(From Amazon) It was not until October 1941 that the name Wildcat was bestowed upon it. By December 1941

			production of the F4F was well in hand and the F4F was built for export or Lend-Leases, Grumman had been able to supply approximately 242 F4F-3 and -3A fighters to 11 US Navy and Marine Corps squadrons.
2019.343.080	Grumann F8F Bearcat	Koku-Fan - 148	Japanese language book about the Grumann F8F Bearcat. Includes pictures.
2019.343.081	North American RA-5C Vigilante	Stafrace, Charles	(From Amazon) The North American Vigilante was an aircraft of extraordinary performance, and introduced aerodynamic, technological and electronic features that were much ahead of their time, and which were to become standard in combat aircraft that followed it. It started out as a shipboard nuclear attack bomber, but when the Navy's nuclear attack task was given to Polaris submarines, the Vigilante risked extinction. Reluctant to lose such an advanced aircraft, the US Navy came up with the idea that it needed a shipboard Mach 2 long range reconnaissance bomber, and North American, with little effort, converted the Vigilante to carry out this mission. In this new role, the Vigilante provided the US Navy with an unparalleled wide-ranging reconnaissance capability that was to remain unavailable to the Service after the Vigilante's retirement until the TARPS-equipped F-14 Tomcat came around in the 1980s. The recce Vigilante entered the scene just in time for the Vietnam War, during which its crews often risked their lives in order to bring back much needed information on the enemy. The aircraft's two big engines and its aerodynamic shape gave the Vigilante an easy Mach 2.2 performance, enough to outrun its escorting F-4 Phantom, and making it the fastest aircraft ever to operate from an aircraft carrier until the arrival, again, of the F-14 Tomcat. Yet, the Vigilante remained one of those unsung heroes, and its demise from US Navy service went largely

Object ID	Title	Author	Summary
			destroyer force. These ships were generally larger than their Allied counterparts and were better armed in most cases. Armed with a large, long-range torpedo (eventually called Long Lance by the Allies), these ships proved themselves as formidable opponents. In the first part of the war, Japanese destroyers were instrumental in an unbroken string of Japanese victories. However, it was not until the Guadalcanal campaign that these ships fully demonstrated their power. In a series of night actions, these ships devastated Allied task forces with a number of daring night attacks using their deadly torpedoes. This volume will detail the history, weapons and tactics of the Japanese destroyers built before the war. This includes the famous Fubuki class (called "Special Type" by the Japanese, which were, when completed in the late 1920's, the most powerful class of destroyers in the world. This design forced all other major navies to follow suite and provided the basic design for the next many classes of Imperial Navy destroyers. This book will also cover the three classes built before the Special Type which were based on a German World War I design as well as two classes built after the advent of the Special Type. All of these ships had a rich history as they fought from the first battles of the Pacific War up until the very end when several accompanied the superbattleship Yamato on her death sortie. The final part of the book will be an analysis of the destroyer designs covered in the book which will include an examination of their strengths and weaknesses. The success (or lack of success) of these designs will be discussed and they will be compared to comparable Allied destroyer designs

			across the Pacific and liberation of the Philippines with tables showing the rapid introduction of new squadrons; and the radar pickets' climactic stand against kamikaze aircraft at Okinawa. With summaries of losses and decorations and specially commissioned artwork, this is a definitive book on the wartime US destroyer classes.
2019.343.087	US Destroyers 1934-45 : Pre-War Classes	McComb, Dave	The US Navy's most modern destroyers as it entered World War II were 100 ships from eleven classes introduced in the 1930s: 1,500-tonners and 1,850-ton destroyer leaders designed to conform to the 1930 London Naval Treaty, plus the successor 1,570-ton Sims class and the first-commissioned 1,620- and 1,630-tonners of the Benson and Gleaves classes. Collectively, these destroyers carried the Navy through the war's first year when the outcome was in doubt: while most 1,500-tonners and leaders were assigned to front line duty in the Pacific before being relegated to secondary assignments, the later Bensons and Gleaves became the standard destroyers for Atlantic and Mediterranean operations and remained prominent in the Pacific throughout the war. This volume describes the fascinating design story behind these developmental classes – from the constraints of peacetime treaties to advances in propulsion engineering and wartime modifications. With an operational overview of their service and tables listing all 169 ships by class, builder, and initial squadron, this is a definitive guide to the pre-war US destroyer classes.
2019.343.088	US Patrol Torpedo Boats : World War II	Rottman, Gordon L.	Motor torpedo boat development began in the early 1900s and the vessels were first put into active service during World War I. However, it was not until the late 1930s that the US Navy commenced the development of their Patrol Torpedo or PT boat program. The PT boat, or the "mosquito boat" as they were sometimes

Object ID	Title	Author	Summary
			known, was originally envisioned for attacking larger warships with torpedoes using its "stealth" ability, high-speed, and small size to launch and survive these attacks. However, they were actually employed more frequently in a wide variety of other missions, many which were unforeseen by developers and planners, including rescuing General MacArthur and his entourage from the Philippines. Often taking on larger and better armed enemies these craft became famous for punching above their weight and were firmly thrust into the limelight by John F. Kennedy who while serving as a lieutenant on a PT-109 in the Pacific Theater heroically saved his fellow crew members winning him the Navy and Marine Corps Medal. This book examines the design and development of these unique craft, very few of which survive today and goes on to examine their role and combat deployment in both World Wars.

2019.343.090	USN Destroyer vs IJN Destroyer : The Pacific 1943	Stille, Mark	This book covers the fierce night naval battles fought between the US Navy and the Imperial Japanese Navy during late 1943 as the Allies advanced slowly up the Solomons Islands toward the major Japanese naval base at Rabaul. During this period, several vicious actions were fought featuring the most modern destroyers of both navies. Throughout most of 1942, the Imperial Navy had held a marked edge and a key ingredient of these successes was their destroyer force, which combined superior training and tactics with the most capable torpedo in the world. Even into 1943 mixed Allied light cruiser/destroyer forces were roughly handled by Japanese destroyers. After these battles, the Americans decided to stop chasing Japanese destroyers with cruisers so the remainder of the battles in 1943 (with

Object ID	Title	Author	Summary
			one exception) were classic destroyer duels. The Americans still enjoyed the technical edge provided to them by radar, and now added new, more aggressive tactics. The final result was the defeat of the Imperial Navy's finely trained destroyer force and the demonstration that the Japanese were unable to stop the Allies' advance.
2019.343.091	ELCO 80-foot PT Boat	Doyle, David	ELCO 80-Foot PT Boat on Deck Color Series. Say ""PT Boat"" and the image that comes to mind is that of the 80-foot patrol torpedo boat built by the Electric Launch Company (ELCO) in Bayonne, New Jersey. These nimble warships - which by the end of WWII could deliver the same firepower as early-war destroyers had done. A trio of Packard marine engines, delivering 1200 to 1500 horsepower each, gave the PT Boats speeds of 40 knots. Three hundred twenty-six of the 80-foot wooden wonders were built, with 296 of them seeing service in the US Navy; the remainder went to the USSR under Lend-Lease. The PT-565 class boats were the final and hardest hitting ELCO 80 - PT-617, the boat featured in the book, is the sole surviving intact example. Packed with over 200 photographs, plus color art and profiles.
2019.343.092	Higgins PT Boat	Doyle, David	Andrew Jackson Higgins' New Orleans boat-building firm, Higgins Industries, constructed numerous vessels for the US war effort during WWII. Among them were 78-foot Patrol Torpedo (PT) boats. Although not as well publicized as the 80-foot Elco PT boats, the 209 boats built by Higgins fought alongside their New Jersey-constructed counterparts, earning a reputation for ruggedness in the Atlantic, Mediterranean, and Pacific. This volume showcases the details of Higgins PTs preserved in Massachusetts, Texas, and even an operational example in Oregon, the sole

2019.343.093	Eagles of Mitsubishi : The Story of the Zero Fighter	Horikoshi, Jiro	operational WWII PT in its original configuration. (From a review on Goodreads) First used in China against the Soviet-made Polikarpov I-15 and I-16, the Zero was unveiled to the rest of the world at Pearl Harbor. Early in World War II the Zero was the best fighter in the Pacific Theater, making mincemeat of Allied fighters. However, later in the war the Allies introduced fighters that rivaled and bested the Zero, the Chance Vought F4U Corsair and the Grumman F6F Hellcat. The Japanese lacked the engineering resources to design a new fighter that would counter them; for the rest of the war, they just made modifications to the Zero, and by the end used it in kamikaze attacks as suicide pilot-guided cruise missiles. Horikoshi was asked to write an essay on the kamikaze, and he "could not stop tears from running down [his] cheeks"; he was forced to confront the questions, why Japan plunged into a war she couldn't win and why his beautiful airplane was being used in such an ugly way. (l
2019.343.094	Japanese Army Air Force Aces, 1937-45	Sakaida, Henry	(From the publisher) ABOUT THIS PRODUCT Little has been published in English on the Japanese Army Air Force (JAAF), let alone its most successful fighter pilots no less than 150 of them achieved ace status during eight years of near-constant war, and they are all listed in this volume. From the arid plains of the Mongolian border region to the lush jungles of New Guinea, the JAAF was more than a match for the many opponents it fought against for control of the skies. Indeed, even when the mighty Allied war machine proved almost overwhelming from early 1944 onwards, the elite fighter pilots of the various sentais within the JAAF fought on with near-fanatical loyalty in defence of the Home Islands. Aircraft of the Aces 13 and 22 are also available in a single volume as 'Aces of the Rising

2019.343.095	Grumman Albatross : A History of the Legendary Seaplane	Mutza, Wayne	Sun 1937-1945'. (From Amazon) The Albatross was the premier fixed-wing rescue aircraft for the U.S. Air Force and Coast Guard. Its very colorful history begins in 1946 and spans nearly a quarter of a century, including service with twenty-two foreign nations. With a total of 466 built by Grumman, more than eighty examples still thrive on the civil register. The Albatross also saw extensive service in the Korean and Vietnam wars. The fascinating history of this unique aircraft is complemented by over 200 photographs including many in color showing the great variations in color schemes and markings.
2019.343.096	Imperial Japanese Navy Aces 1937-45	Sakaida, Henry	(From the publisher) The outcome of the Pacific War was heavily influenced by the results of naval battles between the Imperial Japanese fleet and the US Navy. One of the key elements was Japan's large fighter component, which had gained experience over Manchuria, China and Mongolia in the late 1930s. Flying A5Ms, at least 21 pilots achieved 'acedom' securing air superiority for the invaders. Manufacturer Mitsubishi derived much from these campaigns, producing one of the best fighters of the War, the A6M Zero-Sen. Navy pilots proved to be highly skilled when engaged by the Allied forces, Pacific. Pilots like Nishizawa, Sagita and Sakai scoring more than 60 kills apiece.
2019.343.097	Concise Guide to Axis Aircraft of World War II, The : The Warplanes of Germany, Italy and Japan during World War II	Mondey, David	A 2002 reprint listed the title as the Hamlyn Concise Guide to Axis Aircraft of World War II. A first class reference source. November 27, 2004 By Ned Middleton This author's list of credits is quite impressive. He is an internationally recognised air historian, has over 20 books published and contributes to "Jane's All the World's Aircraft." In this book he has concentrated on all those aircraft employed by the Axis

Object ID	Title	Author	Summary
			Powers of WW2 and, in short, he has made an excellent job of it too. Laid out in strict alphabetical order by make, each aircraft commences with a text headed "History and Notes" in which all the relevant history is covered and the numerous variations of different aircraft explained. To this is added plans and the occasional photograph. Most interestingly, instead of treating the reader to an artist's impression of a single profile example, we get several different profiles of each aircraft showing their numerous variations and livery. In the case of the Focke-Wulf Fw 190, for example, there are 10 such profiles. In my own work I frequently find myself researching whatever aircraft was involved with the sinking of a particular ship and this book gives me all the historical and technical details I could ever want. An excellent choice for those with a deeper interest in the subject. (from Amazon.com)
2019.343.098	Flying Boats and Seaplanes since 1910	Munson, Kenneth	Drawings are in the beginning; captions and information are on the last pages, so it is a little difficult to find correct info. Ever since the first seaplane flew in 1910 water-borne aircraft have exercised an appeal and fascination all their own. This book has a representative selection of Flying Boats and Seaplanes.
2019.343.099	Gato-Class Submarines in Action	Stern, Robert C.	American submarines were a decisive element in winning WWII in the Pacific accounting for more than half of the nearly 10 million tons of Japanese naval and merchant shipping lost during the war, while also carrying out such other important duties as pilot rescue, reconnaissance and espionage. The burden of the submarine war from 1942 until victory in 1945 was borne by the US

2019.343.113	Flying Boats & Amphibians since 1945	Oliver, David	(From Google) This book describes 12 major multi-engined flying boats and amphibians that have been produced in 7 different countries since 1945.(Frolm Amazon) It may come as a surprise to learn that some 1,700 multi-engined military and commercial flying boats and amphibians have been built since 1945. The development of compact, reliable and economical turbo-prop engines in recent years has given the flying boat and amphibian a new lease of life, not only by extending the lives of some types by replacing existing piston engines, but also by encouraging new designs that are able to compete favourably with landplanes in terms of economy while retaining their unique ability to land on water if and when necessary. There are currently more than 350 multi-engined types operating worldwide in the search and rescue (SAR) and inshore maritime reconnaissance (MR) roles with the military, the commercial transport of people and supplies in remote areas, and fighting fires. This book describes 12 major multi-engined flying boats and amphibians that have been produced, albeit in small numbers in some cases, in 7 different countries since 1945. All have either served with operational military units or have been sold to commercial operators, with which many of them continue to serve to this day.
2019.343.114	Short Sunderland	Delve, Ken	(From the publisher) wo. Designed as an anti-submarine patrol aircraft, its design owed much to the Empire Class flying boats built for Imperial Airways. Its size and range allowed it to roam over vast areas of ocean and its

Object ID	Title	Author	Summary
			considerable armament led to it being nicknamed 'The Flying Porcupine' by respectful German aircrews. It was one of very few Allied aircraft to remain in service throughout WW2 and went on to serve for several more years before being replaced by land-based aircraft. The Sunderland played an important role in the Berlin Airlift and served with several foreign air forces.
2019.343.115	Japanese Fighters, 1921-1945	Military Aircraft Publisher Team	Showcases a wide variety of Japanese Army and Navy fighter planes from 1921 to 1945. Contains original b&w photographs, line drawings, and written analysis of the aircrafts' development, design specifications, and operational history.
2019.343.116	Seaplanes	Halberstadt, Hans	(From Google Books.) For as long as man has been able to fly, he has been interested in taking off and landing from the water. The surfaces of lakes and bays offered smooth, long, and perfectly level areas to serve as liquid runways, and could make for a somewhat softer landing in the event of a crash. This colorful volume tells the story of the seaplane, from the earliest floats to the monsters of World War II, to the brave little bushplanes that rule remote areas of Canada, South America, and Australia. Seaplanes developed right alongside regular aircraft; in fact, the Wright brother's trailblazing efforts at Kitty Hawk were very nearly eclipsed by an almost-airworthy seaplane, Samuel Pierpont Langley's experimental float plane of 1903, which crashed despite its apparent airworthiness. But it was the Wright brothers who prevailed that same year, and it wasn't long after their first successful flight that heavier-than-air travel became an everyday reality, from the sea as well as from land. The development of the seaplane not only reflected innovations of regular aircraft, but spurred key aviation

Object ID	Title	Author	Summary
			innovations for all planes. Seaplanes were key participants in many of the flight competitions of the roaring twenties, and they played a formidable role in both world wars. Today, they continue to give travelers access to seemingly impossible-to-reach locales. This lavishly illustrated volume traces the development of the seaplane over the past century with first-hand accounts from pilots and passengers, and more than one hundred full-color and archival photographs. From Langley's Aerodrome to Curtiss' Flying Boat to the de Havilland Beaver so often used by bush pilots today, Seaplanes is an informative and engaging look at the planes that are as at home in the sea as they are in the sky.
2019.343.117	Sunderland Squadrons of World War 2	Lake, Jon	Derived from the C-Class 'Empire' flying boats of the mid-1930s, the Sunderland was RAF Coastal Command's staple maritime patrol aircraft throughout World War 2. A crucial 'player' in the Battle of the Atlantic, it was instrumental in defeating the U-Boat menace which threatened to starve the UK into submission in 1941-42. Heavily armed (it was nicknamed the 'Flying Porcupine' due to its 14 machine guns), the Mk 1 entered service in June 1938, and proved to be an immediate success. Later versions boasted more powerful engines, turret guns, radar and additional fuel capacity. Aside from its global use by the RAF, it also saw employment with the RAAF, RNZAF, RCAF and Free French air force. Some 749 were eventually built, and by 1945 no fewer than 28 squadrons were flying them. This book details the Sunderland's service in all theatres of World War 2, as well as outlining its postwar service.
2019.343.118	Supermarine Walrus : The Story of a Unique Aircraft	Nicholl, G.W.R.	Designed by R. J. Mitchell, famous for the immortal Spitfire and the Schneider Trophy winners of the early

Object ID	Title	Author	Summary
			1930's, the service life of the Supermarine Walrus must be amongst the longest and it certainly performed a greater variety of military tasks in World War II than any other aircraft. A true amphibian, it was catapulted from ships, lurched aloft off breaking seas or staggered into the air from jungle strips, landed on lagoons, ice-floes and scrubland ; it dive bombed, reconnoitred, fought and achieved an astonishing record of rescue work. This book is a lively tribute to the old "Shagbat" by an accomplished writer who flew them himself for eight years and commanded 700 Squadron.
2019.343.119	Grumman JF Duck	Hosek, Timothy	The Grumman JF "Duck" was an American single-engine amphibious biplane built by Grumman for the United States Navy during the 1930s. The J2F Duck was an improved version of the JF, with its main difference being a longer float.
2019.343.120	Supermarine Walrus & Stranraer	Kightly, James	(From Amazon) The most comprehensive pictorial and technical data on both types ever published. Both were designed by R J Mitchell, who also designed the Spitfire. A summary of the fascinating and peculiar career of the Walrus, air-sea rescue seaplane and maid of all work. The Stranraer had been completely neglected and the details of this maritime patrol bomber's history is illustrated by many previously unpublished photographs and drawings.
2019.343.121	Beyond Courage : Air Sea Rescue by Walrus Squadrons in the Adriatic, Mediterranean and Tyrrhenian Seas 1942-1945	Franks, Norman L. R.	(From Amazon) This new book covers the adventures of 283, 284, 293 and 294 Walrus Squadrons, operating from North Africa, Sicily, Italy and Sardinia. The pilots, like their counterparts in England, knew of the dangers of landing on the sea. It was a daunting task attempting to rescue downed airmen as they had often to operate in bad weather, and near hostile coasts. Airmen who were bobbing about in

Object ID	Title	Author	Summary
			dinghies, or even just in their Mae West life jackets, were difficult to locate. Rescues from the cold sea needed to be speedy affairs, especially of those survivors not in dinghies, and the Walrus aircrew were always aware that time was of the essence. Moreover, rescues near a hostile shore often resulted in gunfire from German or Italian gunners. Missions were always treacherous. Many Walrus pilots have added personal recollections to the narrative and so too have some of those airmen who were rescued. As well as RAF and SAAF airmen, there were numerous USAAF units involved in the air war over the Mediterranean and Italy, and Norman has been in contact with several Americans whose lives were saved by these gallant men who flew the Walrus amphibian single-engined biplane. Men who knew only too well that to pick up more than two or three airmen generally meant a hard sea-borne taxi ride back to base, which conditions never guaranteed. The stories of these rescues gives one a sense of sincere pride in the men who daily risked their lives to save others from a very hostile
2019.343.122	Supermarine Walrus	Hall, Alan W.	(From Amazon) The Supermarine Walrus was a British single-engine amphibious biplane reconnaissance aircraft designed by R. J. Mitchell and first flown in 1933.

2019.343.126	French Destroyer LE TERRIBLE, Japanese Destroyer YUKIKAZE, American Destroyer USS DRAYTON	Wisniewski, Piotr	Exquisitely illustrated depiction of the French Destroyer (Le Terrible), Japanese Destroyer (Yukikaze), and USS Destroyer (Drayton). Foldout plan and view drawings of its three stages modification. Scale drawings of topside guns and equipment by tower and deck in many instances.
2019.343.127	Short Sunderland	Bowyer, Chaz	(From a review on Amazon) Author and historian Chaz Bowyer (1927-2008) was a legend amongst aircraft enthusiasts. After serving 26 years in the RAF, he retired to become a full-time aviation history teacher, author and historian and went on to write over 40 books on the wider subject. One is able, therefore, to confidently state that the information provided in this book may be regarded as accurate. Not only that, it well put together, very well written and an excellent read. In 1933, the Air Ministry published a specification for a certain type of aircraft suitable for use all over the world. With 'runways' being a thing of the future, the only option was an aircraft capable of landing on water and the Sunderland flying boat made by Short Brothers was born. In providing a fully detailed package on the subject, the book is divided into the, mostly, self-explanatory chapters of: Heritage, Into service, Development, Over the Med, Seek and destroy, Constant endeavour, Battle over the Bay, Atlantic triumph, West Africa skies, Kaleidoscope, From the cockpits, Peace and goodwill, Foreign forces, Queens in Mufti and Exports. These are followed by Appendices on; Service use, Squadrons, Sunderland Log, Production batches,

Object ID	Title	Author	Summary
			Technical specifications/GA/Cutaway, U-boats claimed damaged/sunk and Civil use. All of these are preceded by an Introduction and Glossary of Abbreviations and followed by a Bibliography and Index. Without explaining each and every heading, the prospective reader will quickly realise how much of a complete book this really is. In addition, the work comes with (or at least it should!) a fold-out A3 size cutaway plan of the aircraft. Whilst the book does not seek to portray the life of the Sunderland aircraft in strict chronological order, it does trace the history of this very significant aeroplane from beginning to end and it says much for the skill of Bowyer that produced such and exciting and readable document without following that more obvious path - which is often
2019.343.128	Short Sunderland in World War II	Hendrie, Andrew	(From Google Books) In 1933, the Air Ministry issued a specification for a general-purpose four-engine flying boat capable of operating from the outposts of the Empire. The result was the remarkable Sunderland, built by Short Brothers This book covers the development of the Short Sunderland and its operations during and after the Second World War. The Sunderland's ability to engage six or more enemy fighters simultaneously earned it the Luftwaffe's nickname of the 'Flying Porcupine' The aircraft's 'maid of all work' role over the eastern Mediterranean is covered in detail, and includes recce's for the Royal Navy, evacuations from Yugoslavia, Greece and Crete, as well as attacks on enemy submarines The Canadian, Australian and

Object ID	Title	Author	Summary
			Norwegian squadrons' operations within Coastal Command are detailed plus, outside the Command, those of the South Africans and New Zealanders. The author also includes details of post-war operations such as the Berlin Airlift Detailed appendices include lists of Sunderlands with brief histories and all known successful attacks on enemy submarines
2019.343.129	Sunderland at War	Bowyer, Chaz	(From an Amazon customer review)- This book is typical of many of the "photohistories" of the period. While light on technical specification and design history, the book gives photos of crew positions from inside the aircraft, cooking (yes) facilities, bunks for those off watch, etc. Even knowing that the Short Sunderland was a massive aircraft, you cannot help but be impressed by the photographs illustrating the two levels of the interior of the aircraft. Also, there are many photographs of aircraft in service. These include shots taken while moored, taking off and landing, on land (for whatever reason), and in the air. All perspectives of the aircraft are presented, and presented well. The book does lack any great amount of operational history, interviews with crew, descriptions of combat operations, etc, as well as any color photos. While some might find those lacking areas annoying, it more than makes up for that with a section on U-boat kills that were a direct result of action with the Sunderlands of Coastal Command. The section is primarily composed of action shots of the attacks on those U-boats that were sunk.

Object ID	Title	Author	Summary
2019.343.144	Mitsubishi A6M1/2/-2N Zero-sen in Japanese Naval Air Service	Buelschel, Richard M.	Model 11 fuselage, with a modified tail and floats. A total of 327 were built. A pamphlet. Originally published: New York : Arco Pub. Co., c1970, in series: Arco-Aircam aviation series. (From an Amazon review) When this book was published in 1970, it became the standard reference for everyone who wanted to know what a Mitsubishi Zero looked like. Still one of the most densely packed photograph-books about the Zero, it is now no longer available from its publisher, and one has to find it on the second hand market. As with all books in the Osprey/Aircam series -in the US published as Airco/Aircam- it is well worth searching for. One would hope that the publisher would consider a re-issue every 20 years or so, but until now that has not been the case. That is even more to be regretted as one considers that the volume about the Zero was a volume 1, implying that they had more material and that a volume 2 was also considered.
2019.343.145	3/202 Kokutai : The Story of the Japanese Navy Squadron 202	Pajdosz, Waldemar	(From the Modeling Madness website) It covers the 3rd Kokutai, which was in action over the Netherlands East Indies and later Rabaul and the Solomons during 1942. The book starts out with a human interest story, as is typical for Kagero publications. It then goes into the familiar format of covering the unit's actions and interspersing the factual information with the 'I was there' sort of stories that has made this series so popular. As was typical of the Japanese advance, the unit was most successful during the early stages of the war when operating against the Dutch in the NEI and later against the Australians during missions against Darwin and bases in the general area. One thing I didn't realize is that every JNAF unit had at least one or more C5M recce planes to lead the fighter units the long distance to the target. These planes generally

Object ID	Title	Author	Summary
			flew high and away from the fighting once the objective was reached since they were unarmed. During the fighting the unit was renamed from 3 Kokutai to 202 Kokutai and was effectively decimated in the high attrition fighting over Guadalcanal. It did go on to operate in New Guinea, Truk, the Marianas, Yap and Palau, but was really not an effective fighting force, finally being disbanded in mid 1944. Those looking for quality profiles will not be disappointed as there are several of A6M2s as well as a C5M, Ki-46, A6M5 from the final year, and a P-40E. Every Kagero book offers a 'goodie' and this one is a sheet of plain Hinomaru's in both 1/72 and 1/48 scale. I'd have liked to have seen some tail codes added in but that was not to be. Overall, a very good book and not rife with syntax errors as some of these dual language books can be at times. If your interest is in Japanese units or the Pacific war, then you should consider adding this one to your shelf.

2019.343.146	68 Sentai : The Story of the Japanese Army Air Force Fighter Squadron 68	Janowicz, Krzysztof	Book is in Polish and English. Review is machine translated from the Polish from the Super Hobby.com site: 63 photographs, 7 pages of colored boards with 8 aircraft silhouettes. Decals with Hinomaru in scales 1:48 and 1:72 for painting: Kawasaki Ki 61-I Ko, 2 Chutai, 68 Sentai, 1943 about Kawasaki Ki 61-I Kai, 2 Chutai, 68 Sentai, 1943 about Kawasaki Ki 61-I Otsu, 68 Sentai, 1943 about Kawasaki Ki 61-I Ko, 1 Chutai, 68 Sentai, 1944 about Kawasaki Ki 61-I Kai Tei, chor. Ishizuki, 3 Chutai, 78 Sentai, 1944 about Kawasaki Ki 61-I Ko, 3 Chutai, 78 Sentai, 1943 about Kawasaki Ki 61-I Otsu, 3 Chutai, 78 Sentai, 1944 about Kawasaki Ki 61-I Ko, Cpt. Onozaki, Staff, Sentai, 1943.

Object ID	Title	Author	Summary
2019.343.147	64 Sentai : The Story of the Army Air Force Fighter Squadron 64	Janowicz, Krzysztof	(From HobbyLink Japan) This title is dedicated to aircraft and history of the 64th Sentai (Fighter Squadron) in WW2. Text is in English and Polish. Filled with period photos and color profile drawings of the unit's aircraft. Plus, includes a photo-etched brass detail sheet (rudder pedals, instrument panels, seatbelts etc.) for the Ki-43 Hayabusa in 1/72 and 1/48 scales! Very nice!
2019.343.148	Mitsubishi A5M (Claude) : Carrier Borne Fighter	Januszewski, Tadeusz	(From Amazon) The Mitsubishi A5M, the Japanese Imperial Navy's first metal monoplane fighter, was the creation of Jiro Horikoshi, father of the legendary A6M "Zero". Labeled "Claude" in the Allies' code, the A5M was a transitional fighter which marked in significant step in the development of the Japanese Navy's air force during the early 1930s. This book contains a full technical history of the aircraft and all its variants from its prototype development and test flights in 1935 to its production and introduction in the Second Sino-Japanese War from 1937 to 1940. It is illustrated with photographs, color drawings and technical plans. * Rarely documented aspect of World War Two aviation history. * Superb color illustrations of camouflage and markings, walk around color photographs and rare b/w archive photographs. * Essential reading for aviation enthusiasts & scale air modelers.
2019.343.149	Nakajima Ki-27 Nate	Wieliczko, Leszek A.	Parallel text in Polish and English. (From Goodreads) This monograph on the Nakajima Ki-27, WW2 Japanese fighter plane, discusses its origins, development, camouflage and markings, and combat use. It includes technical data, a glossary of some Japanese terms and names and a list of the IJAAF units operating Ki-27s. Each version is specified and described. The use of the

Object ID	Title	Author	Summary
			Ki-27's in air warfare in China, Malaya, the Philippines, Burma together with the defense of Japanese Islands and Battle of Khalkhin Gol is also thoroughly described. The author also uncovers the fates of particular units equipped with Ki-27s. The publication features an English & Polish text, 124 pages, 118 photos, 10 sheets of 1:48 and 1:72 scale drawings, which include specification of external changes in production-run versions of the aircraft, 15 pages of colour charts with 50 examples of camouflage schemes
2019.343.150	Imperial Japanese Navy Seaplanes	Nohara, Shigeru	(Machine translation from Google Books) Protagonist of the naval aviation period-a lineage of a seaplane that developed along with the fleet decision philosophy and carried heavy responsibility as an auxiliary force of the main ship
2019.343.152	German Pocket Battleships 1939-45	Williamson, Gordon	After the end of World War I, the German Navy came up with the concept of the Panzerschiffe, or Pocket Battleship, as a method of circumventing treaty limitations on the size and types of ship Germany was permitted to build. New, more modern production methods, where welded construction prevailed over the older riveting process, were combined with the development of modern engines capable of fast speeds and a very powerful armament, far superior to that on any enemy Cruisers. This book covers these three sister ships, the 'Deutschland', the 'Admiral Graf Spee' and the 'Admiral Scheer', which formed the core of the Kriegsmarine's fighting power at the start of World War II.
2019.343.153	Genda's Blade : Japan's Squadron of Aces, 343 Kokutai	Sakaida, Henry	Formed in December 1944 and commanded by Captain Minoru Genda, the mastermind behind the raid on Pearl harbor, the 343 Kokutai bore the distinction of being an elite unit chosen to fly Japan's newest and most advanced fighter, the Shiden-Kai (George), in the bitter defensive air battles over the Japanese

Object ID	Title	Author	Summary
			homeland during the first half of 1945. The authors spent years tracing and interviewing former pilots from both the 343 Kokutai and the American carrier and bomber groups which they encountered to piece together this story and tell it largely from the personal perspective. The story is accompanied by 300 remarkable photographs, most being published for the first time in an English language book. Accompanied by the color art of renowned aviation artist Tom Tullis, this book will be an essential requirement for any student of the Pacific Air War.
2019.343.154	History of the IJN's Night-Fighter Units, A	Watanabe, Yoji	A history of the Imperial Japanese Navy's night fighter units.
2019.343.161	F4F Wildcat vs A6M Zero-Sen : Pacific Theater, 1942	Young, Edward M.	The combats between the Grumman F4F Wildcat and the Mitsubishi A6M Zero-sen during 1942 saw the world's two best carrier fighters, derived from contrasting design philosophies and naval fighter doctrines, battle for aerial superiority in the skies over the Pacific. The superb A6M Zero-sen was without doubt the world's finest carrier fighter in 1942, and superior to the rugged F4F Wildcat in speed, climb, maneuverability and service ceiling. The Wildcat, in turn, had superior firepower and structural strength. Against a fighter that outclassed them, US Navy pilots quickly learned to avoid dogfights with the Zero-sen. They also developed tactics that enabled the Wildcat to hold its own against its more nimble opponent. This Due volume covers one of the most important confrontations between two classic, rival fighters during the first year of the War in the Pacific.
2019.343.162	Hellcat vs Shiden/Shiden-Kai : Pacific Theater 1944-45	Holmes, Tony	By the early months of 1944 in the Pacific, the US Navy's burgeoning force of carrier-based F6F-3/5 Hellcats had pretty much wiped the skies clear of Japanese fighters during a series of one-sided

Object ID	Title	Author	Summary
			aerial engagements. However, starting in October they faced the superb Kawanishi N1K1/2 Shiden/Shiden-Kai, a formidable fighter with improved armament, a powerful engine and excellent manoeuvrability that in contrast to earlier Japanese fighters had the ability to withstand a greater degree of battle damage. Japanese pilots using this aircraft would claim more than 170 aerial victories over Kyushu and whilst escorting Kamikazes attacking Allied ships off Okinawa. US Navy Hellcat pilots in turn were credited with many of the scores of Shiden-Kais that were downed attempting to defend Japan. This fully illustrated book compares these two fascinating aircraft, using specially commissioned artwork, first-hand accounts and a thorough technical analysis.

2019.343.163	B-29 Superfortress vs KI-44 'Tojo' : Pacific Theatre, 1944-45.	Nijboer, Donald	By the time the Americans began their aerial bombardment of Japan in 1944, both the JAAF and IJNAF were spent forces. What the Japanese did have though was the Ki-44 "Tojo". Armed with two 40 mm cannon, it was the most heavily armed and feared single-seat fighter to see action against the new American bomber, the B-29 Superfortress. For the bomber crews, they had what they believed was their `ace in hole': a fully armed B-29 carried four remotely operated gun turrets and a tail gunner's position, making it the world's most advanced self-defending bomber. In every respect the Ki-44 pilots were fighting a desperate battle. Many who made their mark did so using suicidal ramming attacks or "taiatari". Illustrated with full colour artwork, this volume examines why the Ki-44 was unable to break up bomber formations conventionally during the Pacific War, and how its

Object ID	Title	Author	Summary
			ramming tactics, while terrifying, graphically revealed Japan's inability to stop the B-29.
2019.343.164	P-40 Warhawk vs Ki-43 Oscar : China 1944-45	Nijboer, Donald	Known for the distinctive "sharkmouths" decoration on their noses, P-40 fighters first saw combat in China during World War II. Their most common adversary was the Japanese Nakajima Ki-43, nicknamed "Oscar." Carl Molesworth describes and explains the design and development of these two foes, the products of two vastly different philosophies of fighter design. The P-40 was heavily armed and sturdy with armor protection and self-sealing fuel tanks, but paid for this with the loss of speed and a sluggish performance at altitude. The Ki-43 was a rapier to the battleaxe P-40 and the Ki-43 was immensely nimble, though with less firepower and durability. This book examines these two different fighters, and the pilots who flew them over China, with an action-packed text, rare photographs and digital artwork.
2019.343.165	Seafire vs A6M Zero Pacific Theatre	Nijboer, Donald	The Supermarine Seafire is the naval version of the Supermarine Spitfire. Products of vastly different design philosophies, the Seafire F III and the A6M Zero were never intended to meet in combat, and never should have. Yet the harsh necessities of war intervened and these two planes were pitted against each other in the last dogfight of World War II, high above the Japanese home lands. The Zero, with its clean design, low weight and high lift, was extremely nimble at low speeds and ideally suited to the job it was intended to do. In contrast, the Spitfire was not designed as a shipboard fighter; it was a short-range interceptor, intended for operations from established airfields and supported by a well stocked infrastructure of spares and qualified maintenance personnel. With a different twist on the Duel concept, this book

Object ID	Title	Author	Summary
			examines these two iconic fighters and their two very different histories; one was 'adapted' for a role it was never intended to carry out, the other was purpose built and proved to be one of the finest fighters of World War II. Using fantastic artwork and intimate first-hand accounts, the author discusses the decline of the Japanese Naval Air Force and its principal fighter, the Zero, in contrast to the British Seafire, as it overcame its critics to become the best pure carrier interceptor of the war and emerge victorious in the last aerial duel of World War II.
2019.343.166	B-24 Liberator vs Ki-43 Oscar : China and Burma, 1943	Young, Edward M.	During the late 1930s an armament race developed between bombers and the fighters that were bent on stopping them. The development of multi-engined, multi-gun, all-metal bombers forced a corresponding increase in fighter armament which, in turn, led to further attempts to improve bomber armament to ensure its ability to survive in the face of hostile fighters. The US Army Air Corps (USAAC) requested that powered gun turrets be fitted to its two principal long-range bombers, the B-17 Flying Fortress and the B-24 Liberator. In reviewing reports of air combat from Spain, China and the early stages of the war in Europe, the USAAC assumed that the greatest danger to the bomber would be attacks from the rear quarter, and thus took steps to ensure that both the B-17 and the B-24 had tail turrets. A powered turret above and behind the cockpit could deal, it was felt, with attacks from the frontal quarter so that the nose armament for the B-17 and the B-24 consisted of several hand-held 0.50-cal machine guns, but not a powered turret. German and Japanese fighter pilots would soon discover and exploit this weakness. The JAAF's response to the increase in bomber armament was to develop a so-called heavy

Object ID	Title	Author	Summary
			fighter in parallel to the development of the Army's main fighter, the Ki-43 Hayabusa (known as the 'Oscar'), which sacrificed armament for superior manoeuvrability. Yet the inability of the Japanese aircraft industry to produce these heavier fighters (the Kawasaki Ki-60 and Nakajima Ki-44) in sufficient quantities meant that the JAAF had no alternative but to rely on the Ki-43 to intercept American heavy bombers. Under the ideal conditions that existed in the Burma and China theatres for much of 1943, the absence of escort fighters allowed the Ki-43 pilots to press home their attacks to devastating effect.
2019.343.167	Ki-44 'Tojo' Aces of World War 2	Millman, Nicholas	The 100th title of Osprey's celebrated Aircraft of the Aces series covers a subject sure to be of interest to historians of World War II. The Ki-44 'Tojo' was a fast-climbing, heavily armed point-defence interceptor that was used successfully in slashing hit-and-run tactics that caught Allied pilots by surprise. In the air defense role 'Tojos' pioneered the deployment of a unique 40 mm cannon, the firing system which had no cartridges but instead had the propelling charge contained in the base of the projectile. The Ki-44 was to be used by the JAAF in larger numbers in China than anywhere else. This exciting title from author Nicholas Millman brings the Ki-44's role in the Pacific theatre to vivid life, accompanied by full color plates and archival photographs The Ki-44 'Tojo' epitomises JAAF air power in defence of the homeland, but was also used extensively in the skies over China. The introduction of the Ki-44 was noted with concern because of its departure from the performance and tactics previously associated with the JAAF. It was a fast-climbing, heavily armed point-defence interceptor that was

Object ID	Title	Author	Summary
			used successfully in slashing hit-and-run tactics that caught Allied pilots by surprise. Amongst the numerous aces that flew Ki-44's were Major Akira Watanabe of the 33rd Sentai, Captain Yuki Yoshi Wakamatsu, the 'Red Nose Ace' of the 85th Sentai and Warrant Officer Rikio Shibata also of the 85th Sentai, a leading ace with claims for 27 aircraft. This book tells the complete story of all of Japan's 'Tojo' aces.
2019.343.168	J2M Raiden and N1K1/2 Shiden/Shiden-Kai Aces	Izawa, Yasuho	Although seen as a replacement for the A6M Zero-sen carrier-based fighter, the Mitsubishi J2M Raiden was actually designed as a land-based naval interceptor optimized for speed rather than maneuverability. Engine cooling problems for its Mitsubishi Kasai 23 engine and airflow and flight control issues plagued the Raiden's development, but despite these production delays, aces Sadaaki Akamatsu Yoshihiro Aoki, Susumu Ito and Susumu Ishihara all claimed significant scores in the Raiden. Kawanishi's N1K family of fighters were privately developed by the manufacturer from the N1K Kyofu floatplane fighter. Again plagued by structural and engine maladies, the N1K1-J Shiden eventually entered front line service in time to see considerable action in the doomed defense of the Philippines in October 1944. Despite suffering heavy losses, the units equipped with new fighter proved that the N1K could more than hold its own against P-38s and F6Fs. The improved N1K2-J Shiden-KAI started to reach the front line by late 1944--in time to defend the Home Islands. Here, it proved to be the best IJN fighter of the war.
2019.343.169	Japanese Army Fighter	Kunitaka, Imai	Pictorial guide to seven Japanese Army fighters: Nakajima Ki-27 Type 97 (Nate), Nakajima Ki-43 Type 1 Hayabusa (Oscar), Nakajima Ki-44 Type 2 Shoki (Tojo), Kawasaki Ki-61 Type 3 Hien

2019.343.174	A6M Zero fighter	Nakamura, Masao	The Mitsubishi A6M "Zero" is a long-range fighter aircraft formerly manufactured by Mitsubishi Aircraft Company, a part of Mitsubishi Heavy Industries, and operated by the Imperial Japanese Navy from 1940 to 1945. The A6M was designated as the Mitsubishi Navy Type 0 carrier fighter, or the Mitsubishi A6M Rei-sen. All text and captions in Japanese.
2019.343.175	Local Fighter Shiden Kai : Life of Aircraft Gracing the End of Naval Aviation	Gakken Company	Volume 24 from the very well-regarded Gakken Taiheyo Senshi Shiriizu (Pacific War Series) published in 2000. This one focusing on the superb late-war GEORGE fighter. This aircraft was derived from the Kawanishi N1K1 Kyofu REX floatplane fighter which was originally designed to support forward offensive operations far in the Pacific where no airstrips were available, but by the time the REX became operationally available in 1943, its designed role was already outdated as Japan's war strategy had already shifted to the defensive. However, because the design proved promising, an upgraded, land-based version of the fighter was designed -- the N1K1-J Shiden GEORGE. Without the large float and its corresponding high drag, the performance was significantly improved, but it suffered engine and landing gear problems, both of which were improved in the follow-on N1K2-J which lowered the position of the wing from its mid-fuselage location and simplified the landing gear and lightened the aircraft. In this last configuration (and the main focus of this Gakken book), the N1K2-J Shiden-kai GEORGE was considered by its pilots and Allied opponents as being one of the finest land-based aircraft flown by the Japanese in WWII. Although considered the equal of the F6F Hellcat, F4U Corsair, and P-51 Mustang, the impact of the GEORGE –

The Allied reporting name was "Jack".
2019.343.177	IJN/IJA Experimental Fighters of World War II	Gakken Company	Experimental fighters for the Imperial Japanese Navy and the Imperial Japanese Army. From the world's famous machine "Zero War", to the subsequent development of the ship's fighter "Gale", the innovative front wing type - the high-speed local fighter "shock", the Mitsubishi long-distance fighter "Ki" developed to support the critical strike. 83", the high-altitude fighter "Ki 94" for the attack, etc., this book takes the 3D animation to lead the readers to review the scene of the Taiping War, and reproduce the "Wings of Dreams" of the year!
2019.343.178	Mitsubishi Zero Shipboard Fighter	Watabe, Yoshinori	From Wikipedia " Type 0 Carrier Fighter Mitsubishi A6M, a Japanese fighter aircraft.' Zero, also called Mitsubishi A6M or Navy Type 0, fighter aircraft, a single-seat, low-wing monoplane used with great effect by the Japanese during World War II. ... When it first appeared, the Zero could outmaneuver every airplane it encountered.
2019.343.179	Hidden Genius and Former Target : Imperial Navy Midget Submarine Secret History Unknown	Watabe, Yoshinori	From the WWII database "By definition, a midget submarine is less than 150 tons, has a crew of no more than eight, has no on-board living accommodation, and operates in conjunction with a mother ship to provide the living accommodations and other support. The Japanese Navy built at least 800 midgets in 7

Object ID	Title	Author	Summary
			classes, but only a fraction had any noticeable impact on the war. Their intended purpose initially was to be deployed in front of enemy fleets, but their actual use would be in harbor attacks and coastal defense. The Japanese kept no comprehensive shipbuilding records for their midget submarines. What is known about these crafts was pieced together from a variety of sources, and some authors still do not agree over some details. Midget subs were not named but were numbered with "Ha" numbers (e.g., Ha-19). These numbers were not displayed on the exterior and operationally the midgets were referred to according to the numbers of their mother ships. Thus, when I-24 launched Ha-19, the midget was known as "I-24tou" (designated "M24" in some texts). The "Ha" numbers were not unique either; some Type D's were numbered Ha-101 through Ha-109 and SS-Type medium submarines used the same numbers. Midget Submarine Types Ko-hyoteki Ko Gata Type A Ko-hyoteki Ko Gata Type A midget submarines were 78.5 feet long, displaced 46 tons, were armed with two muzzle-loaded torpedoes, and had a crew of two. Normally, they were transported to and from their target areas on the decks of larger Type C1 submarines. About 60 Type A's were built and were the first midgets to be deployed. Ko-hyoteki Otsu Gata Type B Just one Ko-hyoteki Otsu Gata Type B Midget prototype was built in 1942 to test improvements to the Type A. Some sources suggest that a few Type A's were retrofitted into Type B's, but sources conflict."

2019.343.180	Reppu Fighter A7M1-A7M3-J	Watabe, Yoshinori	From Wikipedia The Mitsubishi A7M Reppu (??, "Strong Gale") was designed as the successor to the Imperial Japanese Navy's A6M Zero, with development beginning in 1942. Performance objectives were to achieve superior speed, climb, diving, and armament over the Zero, as well as better maneuverability. To compensate for the weight increase, its overall proportions were significantly greater than its predecessor. The A7M's allied codename was "Sam".
2019.343.181	IJA Type 4 Fighter Ki-84 Hayate	Gakken Company	From Wikipedia "The Nakajima Ki-84 Hayate (?? Gale) is a single-seat fighter flown by the Imperial Japanese Army Air Service in the last two years of World War II. The Allied reporting name was "Frank"; the Japanese Army designation was Army Type 4 Fighter (???? yon-shiki-sento-ki). The Ki-84 is generally considered the best Japanese fighter to operate in large numbers during the conflict. The aircraft boasted high speeds and excellent maneuverability with an armament (up to two 30 mm and two 20 mm cannon) that gave it formidable firepower.[2][3] The Ki-84's performance matched that of any single-engine Allied fighter it faced, and its operational ceiling enabled it to intercept high-flying B-29 Superfortress bombers.[4] Pilots and crews in the field learned to take care with the plane's high-maintenance Nakajima Homare engine and a landing gear prone to buckling.[4] The difficulties of Japan's situation late in the war took a toll on the aircraft's field performance as manufacturing defects multiplied, quality fuel proved difficult to procure and experienced pilots grew scarce. Nevertheless, a well-maintained Ki-84 was Japan's fastest fighter. A total of 3,514 aircraft were built."
2019.343.182	Set Fighter "Hayabusa" - Specialist On-Fighter Game that Excelled in Dogfight	Watabe, Yoshinori	Specialist in anti-fighter fighting superior in cruising power and combat

Object ID	Title	Author	Summary
	Performance and Kozokuryoku		performance From Wikipedia, "The Nakajima Ki-43 Hayabusa (? , "Peregrine Falcon", "Army Type 1 Fighter" (?????)) was a single-engine land-based tactical fighter used by the Imperial Japanese Army Air Force in World War II. The Allied reporting name was "Oscar", but it was often called the "Army Zero" by American pilots because it bore a certain resemblance to the Mitsubishi A6M Zero,[3] the Imperial Japanese Navy's counterpart to the Ki-43. Both aircraft had generally similar layout and lines, and also used essentially the same Nakajima Sakae radial engine, with similar round cowlings and bubble-type canopies (the Oscar's being distinctly smaller and having much less framing than the A6M). While relatively easy for a trained eye to tell apart with the "finer" lines of the Ki-43's fuselage — especially towards the tail — and more tapered wing planform; in the heat of battle, given the brief glimpses and distraction of combat, Allied aviators frequently made mistakes in enemy aircraft identification in the heat of a dogfight, reportedly having fought "Zeros" in areas where there were no Navy fighters. Like the Mitsubishi-produced A6M Zero, the radial-engined Ki-43 was light and easy to fly and became legendary for its combat performance in East Asia in the early years of the war. It could outmaneuver any opponent, but did not have armor or self-sealing tanks, and its armament was poor until its final version, which was produced as late as 1945.[4][5] Allied pilots often reported that the nimble Ki-43s were difficult targets but burned easily or broke apart with few hits.[6] In spite of its drawbacks, the Ki-43 shot down more Allied aircraft than any other Japanese fighter and almost all the JAAF's aces achieved most of their kills in it.[citation needed] Total production amounted to 5,919 aircraft.[7] Many of

Object ID	Title	Author	Summary
			explained in detail along with photos and drawings. From the translated preface: "The first Japanese naval aircraft was a small Maurice Falman-type seaplane that flew for the first time on November 6, 1922 in Oppama, Kanagawa Prefecture. Since then, until the end of the war on August 15, 1945, the Japanese Navy had used various airplanes. Looking at the individual aircraft, there were masterpieces that were active as the main aircraft of naval aviation, and there were failures that ended only in trial production. In addition, there are some of the same aircraft that have different evaluations depending on how they are seen, but overall, there are many that are superior to other naval aircraft of other countries of the same period or that are at the forefront of the period. This book introduces a variety of naval aircraft selected from the various types of naval aircraft. In selecting the model, those that were not adopted but were mass-produced and put into practical use were also included. However, a name reminiscent of a control aircraft, such as a 10-year water reconnaissance aircraft, is given, but those that were not adopted were omitted. It is ideal to describe in detail the process, structure, performance, etc. from the start of planning to the actual situation for each aircraft, and to publish abundant photographic drawings, but on the other hand, it is too large and obvious. There is also the inconvenience of not going. Taking this into consideration, this book aims at a database-like format in which the explanation, data, used units, loaded ships, photographs, and drawings of each aircraft are recorded in a two-page spread. For this reason, the explanation had to be simple, but we tried to include as many unintroduced items as possible. Although the data may vary depending on the source, the

Object ID	Title	Author	Summary
			official data based on naval material was supplemented and corrected with data from the central city and manufacturer. The list of naval air units, aircraft carriers, surface aircraft carriers, and aircrafts at the end of the book was made as accurate as possible, but it was inevitable that unknown parts would arise due to lack of primary materials. ~

2019.343.202	English Electric/BAC Lightning	Koku-Fan - 80	In Japanese. Pictorial guide to the English Electric/BAC Lightning. Contains colored illustrations and b&w photographs of the fighter aircraft in development and in action. Includes detailed line drawings and text that analyzes its design specifications and operational capabilities. From Wikipedia, " The English Electric Lightning is a fighter aircraft that served as an interceptor during the 1960s, the 1970s and into the late 1980s. It remains the only UK-designed-and-built fighter capable of Mach 2. The Lightning was designed, developed, and manufactured by English Electric, which was later absorbed by the newly-formed British Aircraft Corporation. Later the type was marketed as the BAC Lightning. It was operated by the Royal Air Force (RAF), the Kuwait Air Force (KAF) and the Royal Saudi Air Force (RSAF). A unique feature of the Lightning's design is the vertical, staggered configuration of its two Rolls-Royce Avon turbojet engines within the fuselage. The Lightning was initially designed and developed as an interceptor to defend the V bomber airfields[2] from attack by anticipated future nuclear-armed supersonic Soviet bombers such as what emerged as the Tupolev Tu-22, but it was subsequently also required to intercept other bomber aircraft such as the Tupolev Tu-16 and the Tupolev Tu-95. The Lightning has exceptional rate of climb, ceiling, and speed; pilots have described flying it as "being saddled to a

Object ID	Title	Author	Summary
			skyrocket".[1] This performance and the initially limited fuel supply[3] made the Lightning a "fuel-critical" aircraft, meaning that its missions are dictated to a high degree by its limited range. Later developments provided greater range and speed along with aerial reconnaissance and ground-attack capability. Following retirement by the RAF in the late 1980s, many of the remaining aircraft became museum exhibits. Until 2009, three Lightnings were kept flying at "Thunder City" in Cape Town, South Africa. In September 2008, the Institution of Mechanical Engineers conferred on the Lightning its "Engineering Heritage Award" at a ceremony at BAE Systems' site at Warton Aerodrome."

2019.343.209	Army Type 4 Fighter Hayate	Koku-Fan - 148	In Japanese. Same title as 2019.343.205. Pictorial guide to the Army Type 4 Fighter Hayate, including colored illustrations, b&w photographs, and line drawings. Describes the aircraft's mechanical features, design, and combat capabilities. From Wikipedia "The Nakajima Ki-84 Hayate (Gale) is a single-seat fighter flown by the Imperial Japanese Army Air Service in the last two years of World War II. The Allied reporting name was "Frank"; the Japanese Army designation was Army Type 4 Fighter . The Ki-84 is generally considered the best Japanese fighter to operate in large numbers during the conflict. The aircraft boasted high speeds and excellent maneuverability with an armament (up to two 30 mm and two 20 mm cannon) that gave it formidable firepower.[2][3] The Ki-84's performance

Object ID	Title	Author	Summary
			matched that of any single-engine Allied fighter it faced, and its operational ceiling enabled it to intercept high-flying B-29 Superfortress bombers.[4] Pilots and crews in the field learned to take care with the plane's high-maintenance Nakajima Homare engine and a landing gear prone to buckling.[4] The difficulties of Japan's situation late in the war took a toll on the aircraft's field performance as manufacturing defects multiplied, quality fuel proved difficult to procure and experienced pilots grew scarce. Nevertheless, a well-maintained Ki-84 was Japan's fastest fighter. A total of 3,514 aircraft were built".
2019.343.210	Nakajima Ki43 Hayabusa	Koku-Fan - 113	In Japanese. Pictorial guide to the Nakajima Ki43 Hayabusa. Contains colored illustrations, b&w photographs, and line drawings of the aircraft. Provides a technical analysis of its development, design, and operational capabilities. From Wikipedia. The Nakajima Ki-43 Hayabusa ("Peregrine Falcon", "Army Type 1 Fighter") was a single-engine land-based tactical fighter used by the Imperial Japanese Army Air Force in World War II. The Allied reporting name was "Oscar", but it was often called the "Army Zero" by American pilots because it bore a certain resemblance to the Mitsubishi A6M Zero,[3] the Imperial Japanese Navy's counterpart to the Ki-43. Both aircraft had generally similar layout and lines, and also used essentially the same Nakajima Sakae radial engine, with similar round cowlings and bubble-type canopies (the Oscar's being distinctly smaller and having much less framing than the A6M). While relatively easy for a trained eye to tell apart with the "finer" lines of the Ki-43's fuselage — especially towards the tail — and more tapered

Object ID	Title	Author	Summary
			wing planform; in the heat of battle, given the brief glimpses and distraction of combat, Allied aviators frequently made mistakes in enemy aircraft identification in the heat of a dogfight, reportedly having fought "Zeros" in areas where there were no Navy fighters.
2019.343.211	Kugisho Carrier Dive Bomber Suisei	Koku-Fan - 44	In Japanese. Contains illustrations, line drawings, and text about the Yokosuka D4Y Suisei, covering its development, design specifications, and operational use. From Wikipedia The Yokosuka D4Y Suisei (?? Suisei, "Comet", Allied reporting name "Judy") is a two-seat carrier-based dive bomber developed by the Yokosuka Naval Air Technical Arsenal and operated by the Imperial Japanese Navy from 1942 to 1945 during World War II. Development of the aircraft began in 1938. The first D4Y1 was complete in November 1940 and made its maiden flight at Yokosuka the following month.[1] While the aircraft was originally conceived as a dive bomber, the D4Y was used in other roles including reconnaissance, night fighter and special attack (kamikaze). It made its combat debut as a reconnaissance aircraft when two pre-production D4Y1-Cs embarked aboard the Soryu to take part in the Battle of Midway in 1942. It was not until March 1943 that it was accepted for use as a dive bomber. The early D4Y1 and D4Y2 featured the liquid-cooled Aichi Atsuta engine, a licensed version of the German Daimler-Benz DB 601, while the later D4Y3 and D4Y4 featured the Mitsubishi MK8P Kinsei radial engine. Like many other Japanese aircraft of the time, the D4Y lacked armor and self-sealing fuel tanks and it was not until the final variant, the D4Y4, that the aircraft was given

Object ID	Title	Author	Summary
			bulletproof glass and armor protection for the crew and fuel tanks.[2] Nevertheless, The D4Y was one of the fastest dive bombers of the war, particularly the D4Y4 whom Max Gadney said was the "fastest dive-bomber of World War II" and that it was "faster than the zero" if RATO was equipped.[3] Only the delays in its development hindered its service while its predecessor, the slower fixed-gear Aichi D3A, remained in service much longer than intended. Famously, a D4Y was used in one of the final kamikaze attacks in 1945, hours after the surrender of Japan, with Vice Admiral Matome Ugaki in the rear cockpit. This book has another title online. No.44 - Navy type 93 intermediate trainer (K5Y1 Willow).

2019.343.213	Fast Fighting Boats, 1870-1945	Fock, Harald	Fast coastal craft, originally envisaged as secondary weapons in many navies, grow yearly in importance in modern naval fleets. During World War II fast patrol boats proved conclusively that they could play an important part in a great variety of offensive, tactical, strategic and defensive operations. Motor torpedo boats and motor gun boats attacked enemy supply ships, protected convoys, landed commandos behind enemy positions, and supported army operations in coastal areas, while fast minelayers operated over a surprisingly large area. This well researched and heavily illustrated volume covers the design, construction and use of the small fighting craft of all navies which were capable of more than about eighteen knots. A comprehensive volume, the book was compiled with both the technical and average reader in mind. It contains copious tables and appendices as well as numerous photographs and drawings, most of which run with the text.

Object ID	Title	Author	Summary
			Organized into four main sections, Part one briefly surveys the early attempts to build small offensive boats carrying torpedoes and traces the influence of racing motor boats on hull shape and engine design. Part two covers the development of faster boats during World War I. The Thornycroft CMBs were prominent and were in great demand for offensive uses in coastal waters in very varied roles, much to the surprise of the traditional big-ship strategists. There were also significant developments particularly in the Italian Navy, and also in Germany, Austro-Hungary and Russia. Part three deals with the period between the wars. A considerable amount of rethinking, and also development work where funds allowed, led to major advances in design and construction. This was particularly so in Germany, where the Treaty of Versailles limited the building of major naval units, and led to the design of powerful long-range small boats and the incredibly valuable high-powered diesel engine. Britain led in the field of hull design but with smaller boats of shorter range but she was unable to produce an adequate engine. This gap was first filled by Italian firms, followed later by the motors of the American Packard company. The other major feature of the period just before World War II was the intensive series of trials by the US Navy to find a standard boat, and which led to mass production of great numbers of useful craft during the war. Other navies also contributed in significant ways during this period and all boats designed and built are listed together with notes on their fate.

2019.343.216	War of the Gun Boats, The	Cooper, Bryan	The 'little ships' of the Second World War - the fast and highly maneuverable motor torpedo boats and gunboats which fought in coastal waters all over the world - developed a special kind of naval warfare. With their daring nightly raids against an enemy's coastal shipping - and sometimes much larger warships - they acquired the buccaneering spirit of an earlier age. And never more so than in the close hand-to-hand battles which raged between opposing craft when they met in open waters. Large numbers of these small fighting boats were built by the major naval powers. The

Object ID	Title	Author	Summary
2019.343.217	Cruisers of World War Two	Whitley, M. J.	Germans called them Schnellboote (Fast Boats), referred to by the British as E-boats (E for Enemy). In the Royal Navy they were MTBs and MGBs. The American equivalent were PT boats (for Patrol Torpedo). They fought in the narrow waters of the English Channel and the stormy North Sea, in the Mediterranean off the coasts of North Africa and Italy and among the islands of the Aegean, across the Pacific from Pearl Harbour to Leyte Gulf, in Hong Kong and Singapore, and off Burma's Arakan coast. Bryan Cooper's book traces the history and development of these craft from their first limited use in the First World War and the fast motor boats designed in the 1930s for wealthy private clients and water speed record attempts. With account of the battles which took place during the Second World War, when the vital importance of coastal waters came to be recognized, he captures the drama of this highly individual form of combat
			Illustrated with hundreds of archive photographs and line drawings, Cruisers of World War Two is the large-format, comprehensive reference on the subject. Within one volume, it describes all the cruisers extant, completed or laid down during the period 1939-1945 by the nations of the world. Each class is featured with full coverage of its design, construction and subsequent modifications, together with tabulated details of builder, dates, specification data and notes on the fate of each ship. In format with the author's earlier work Destroyers of World War Two, this book is a major contribution to naval literature, which will enable historians, modellers and veterans to study the subject with an extra thoroughness

2019.343.218	Mediterranean MTBs at War : Short MTB Flotilla Operations, 1939-1945	Reynolds, L. C. (Leonard C.)	and accuracy. From Amazon. This is the authoritative account of operations in the Mediterranean carried out by the Royal Navy's 'short' Motor Torpedo Boats during WWII. Authoritative text and full illustrations are well supported by eyewitness accounts and detailed source notes.
2019.343.219	Fast Attack Craft : The Evolution of Design and Tactics	Phelan, Keiren	From an Amazon customer review: "A title and cover like these could suggest a boring technical photo book with limited text and historical awareness. However Phelan was a top naval photo archivist and Brice a senior IWM man. So this is an excellent account of development of early steam torpedo boats, CMBs, MTBS and German E-Boats, stretching from circa 1880 to circa 1970. Text lucid explanation. Photos tell own stories without book being burdened by usual lists, statistics etc one can find in such books. There is just the very occasional slip, such as reference to the mid-19th century Norwegian Navy. The independent state (and navy) of Norway only date from 1906, so they must mean Swedish Navy."
2019.343.221	Allied Torpedo Boats	Lambert, John	From Amazon: "The 'ShipCraft' series provides in-depth information about building and modifying model kits of famous warship types. Lavishly illustrated, each book takes the modeler through a brief history of the subject class, highlighting differences between sister-ships and changes in their appearance over their careers. This includes paint schemes and camouflage, featuring color profiles and highly-detailed line drawings and scale plans. The modeling section reviews the strengths and weaknesses of available kits, lists commercial accessory sets for super-detailing of the ships, and provides hints on modifying and improving the basic kit. This is followed by an extensive photographic

			gallery of selected high-quality models in a variety of scales, and the book concludes with a section on research references – books, monographs, large-scale plans and relevant websites."
2019.343.222	Super Destroyers : The Big Destroyers Built in the 1930s for Britain, France, Germany, Italy, Japan and the United States	Preston, Antony	From an Amazon customer review: "Excellent book. Covers the Japanese Special Type ("Fubuki") of 1923 and onwards; the Italian "Navigatori" class of 1926; the French "Fantasque" class of 1930; the US 1850 ton destroyer leaders of the "Porter" and "Somers" classes of the late 1930s; the British "Tribal" class of 1938; and the German "Narvik" types of 1936 - 1940."
2019.343.223	Japanese Military Prototype Aircraft	Hosaka, Muneo	Includes many color foldouts and chapters on the following planes: Nakajima Fugaku; Kyushu J7W Shinden; Mitsubishi A7M2 Reppu (Sam); Nakajima Kikka; Mitsubishi J4M Senden (Luke); Kawanishi J6K1 Jinpu; Mitsubishi Ki-200/J8M1 Shusui; Kawasaki Ki-64 (Rob); Mitsubishi Ki-83; Tachikawa Ki-94 II; Nakijima Ki-87; Tachikawa Ki-74; Nakajimi J5N1 Tenrai; Kawasaki Ki-91; Koukukoushou Ki-93; Kawaskai Ki-88
2019.343.224	IJN Interceptor Fighter : Kawanishi Shiden-Kai (George)	None Stated	Overview of different models of the Kawanishi N1K2 Shiden-Kai fighter. Title has mistake: IJN Interceptor Fighter : Kawanishi Shiden-Kai (Gorge) rather than George.
2019.343.225	Zero Fighter	Mikesh, Robert C.	The Zero was the mainstay of the Imperial Japanese Air Force throughout World War II, and during this time more Zeros were built than any other Japanese aircraft. The success of its pilots in early combat over China cloaked the Zero with an aura of invincibility, and confidence in their new fighter may even have contributed to the decision of the Japanese to go to war with the United States. Although it was an excellent fighter at the beginning of the war, long before the war was over it had been badly outclassed by the superior Allied aircraft.

2019.343.227	Hayate Army Type 4 Fighter Ki-84 (Frank)	Nohara, Shigeru	A single seat fighter plane flown by the Japanese in 1944 and 1945. Includes 8 paint chips of IJAAF colors (p. 19).
2019.343.228	Army Type 2 Fighter Shoki	Koku-Fan - 16	In Japanese. Pictorial guide to the Army Type Fighter "Shoki", consisting of various B&W photographs and line drawings. Describes the aircraft's development, design, variants, markings, capabilities, and operational history during WWII. From wikipedia The Nakajima Ki-44 Shoki was a single-engine fighter aircraft used by the Imperial Japanese Army Air Force in World War II. The type first flew in August 1940 and entered service in 1942. The Allied reporting name was "Tojo"; the Japanese Army designation was "Army Type 2 Single-Seat Fighter. It was less maneuverable than its predecessor, the nimble Ki-43, and pilots disliked its poor visibility on the ground, its higher landing speed, and severe restrictions on maneuvering. Nonetheless, as a combat aircraft the Ki-44 was clearly superior overall to the Ki-43.[2] As an interceptor it could match Allied types in climbs and dives, giving pilots more flexibility in combat and greater pilot confidence than the Ki-43.[3] Moreover, the basic armament of four 12.7mm machine guns or two 12.7mm guns and two 20 mm cannons (or, in a few aircraft, two Ho-301 40 mm cannons of limited range) was far superior to the older Ki-43's two 12.7mm machine guns. These characteristics made the fighter, despite performance restrictions at altitude, a useful B-29 Superfortress interceptor and one of the Japanese High Command priorities during the last year of war. However, like most Japanese aircraft flown in the last part of the war, the low availability of properly trained pilots made them easy targets for experienced, aggressive, and well trained Allied pilots flying superior aircraft.

2019.343.229	Army Type 2 Two-Seater Fighter Toryu	Koku-Fan - 21	Pictorial guide to the Army Type 2 Two-Seat Fighter "Toryu", containing B&W photos and line drawings. Analyzes the development, design specifications, and operational history of the aircraft and its variants. The Toryu (Dragonslayer in Japanese) was a two seater fighter plane used by the Japanese iArmy n World War II.
2019.343.230	Type 100 Command Reconnaissance Plane	Koku-Fan -38	In Japanese. Pictorial guide to the Mitsubishi Army Type 100 Command Reconnaissance Plane and its variants. Contains a large collection of photographs, illustrations, and line drawings as well as text to describe the development, design specifications, and operational capabilities of the aircraft. From Wikipedia : The Mitsubishi Ki-46 was a twin-engine reconnaissance aircraft used by the Imperial Japanese Army in World War II. Its Army Shiki designation was Type 100 Command Reconnaissance Aircraft; the Allied nickname was "Dinah"
2019.343.231	Navy Interceptor Raiden	Koku-Fan -61	In Japanese. Close-up analysis of the Mitsubishi Navy Interceptor Raiden (J2M) "Jack". Contains numerous B&W photos, colored illustrations, and line drawings to detail its development, specifications, and other mechanical features. Expands on the aircraft's performance capabilities and operational history in WWII, particularly its success against Allied bombers such as the Boeing B-29. From Wikipedia : The Mitsubishi J2M Raiden is a single-engined land-based fighter aircraft used by the Imperial Japanese Navy Air Service in World War II. The Allied reporting name was "Jack" The J2M was designed by Jiro Horikoshi, creator of the A6M Zero, to meet the 14-Shi (14th year of the Showa reign, or 1939) official specification. It was to be a strictly local-

Object ID	Title	Author	Summary
			defense interceptor, intended to counter the threat of high-altitude bomber raids, and thus relied on speed, climb performance, and armament at the expense of maneuverability. The J2M was a sleek, but stubby craft with its oversized Mitsubishi Kasei engine buried behind a long cowling, cooled by an intake fan and connected to the propeller with an extension shaft. Teething development problems stemming from the Kasei engine cooling system, and the main undercarriage members led to a slowdown in production.[1] A continual set of modifications resulted in new variants being introduced with the ultimate high-altitude variant, the J2M4 Model 34 flying for the first time in August 1944. It had a 1,420 hp Kasei 23c engine equipped with a turbo supercharger (mounted in the side of the fuselage just behind the engine) that allowed the rated power to be maintained up to 9,100 m (29,900 ft). Two upward-aimed, oblique-firing (aimed at seventy degrees) 20 mm cannons, mounted in the German Schräge Musik style, were fitted behind the cockpit with the four wing cannons retained. Unresolved difficulties with the turbo supercharger caused the project to be terminated after only two experimental J2M4s were built.

2019.343.234	Ki46 Type 100 Com. Recon. Plane	Koku-Fan -130	In Japanese. Profiles the Mitsubishi Ki-46 Type 100. Consists of various B&W photographs, colored illustrations, and line drawings. From wikipedia "The Mitsubishi Ki-46 was a twin-engine reconnaissance aircraft used by the Imperial Japanese Army in World War II. Its Army Shiki designation was Type 100 Command Reconnaissance Aircraft (the Allied nickname was "Dinah". On 12 December 1937, the Imperial Japanese Army Air Force issued a specification to Mitsubishi for a long-range strategic reconnaissance aircraft to replace the Mitsubishi Ki-15. The specification demanded an endurance of six hours and sufficient speed to evade interception by any fighter in existence or development, but otherwise did not constrain the design by a team led by Tomio Kubo(a 1931 graduate from the Aeronautical Section of the Faculty of Engineering at Tokyo Imperial University) whose aesthetics are very significantly infused to the aircraft.[1] The resulting design was a twin-engined, low-winged monoplane with a retractable tailwheel undercarriage. It had a small diameter oval fuselage which accommodated a crew of two, with the pilot and observer situated in individual cockpits separated by a large fuel tank. Further fuel tanks were situated in the thin wings both inboard and outboard of the engines, giving a total fuel capacity of 1,490 L (328 imperial gallons). The engines, two Mitsubishi Ha-26s, were housed in close

2019.343.239	Kawanishi Navy Interceptor Shiden/Shiden Kai	Koku-Fan - 2	In Japanese. Features the Kawanishi N1K1-J Shiden and Shiden Kai. Provides an overview of their development history and technical data tables, in addition to the types' operational/service use and a description of the camouflage and markings worn (with tone profile drawings). The text is entirely in Japanese, except for English chapter headings. Most of the content comprises B&W photographs, scale line drawings, cut-away drawings, cockpit diagrams, close-up detail drawings and colored illustrations.
2019.343.240	Nakajima Ki-44-IIb Shoki (Army Type 2 Fighter)	Koku-Fan - 14	In Japanese. Features the Nakajima Ki-44 Shoki, concerning its development, design, and operational use. Contains technical data tables, a description of the camouflage and markings, B&W photographs, scale line drawings, cut-away drawings, cockpit diagrams, close-up detail drawings, and colored illustrations. The Nakajima Ki-44 Shoki was a single-seat fighter-interceptor developed by the Nakajima Aircraft Company and operated by the Imperial Japanese Army from 1942 to 1945 during World War II. Its official designation is Army Type 2 Single-Seat Fighter and its Allied reporting name was Tojo.
2019.343.241	Imperial Japanese Army Air	Nohara, Shigeru	Chapter titles and photo

Object ID	Title	Author	Summary
	Units Battlefield Photograph Collection		captions also in English. Chapters include: 1) Th Good 'ol days - pictures beginning in 1913 2) Baptism of Fire - Hostilities leading up to World War II 3) Asian Storm - War in the Pacific 4) The Skies of the Homeland - Includes training photos and women being trained for maintenance of planes 5) Experimental Wings - Other - 5 pages of Japanese planes in color, Imperial Japanese Army Flight uniforms, Special Attack (Suicide) Pilot's flight Uniform, 7 pages of planes in Air Group markings, several pages of starter trucks, models of planes, advertisements
2019.343.242	Imperial Japanese Navy Air Units Battlefield Photograph Collection	Nohara, Shigeru	Chapter titles and photo captions also in English. Chapters include: 1) Th Good 'ol days - pictures beginning in 1921 includes color illustrations of Japanese Navy uniforms 2) Carriers and Men and Planes and ... 3) Carriers and Waterfowl (seaplanes) 4) During the Victories 5) Rough Seas at the Pacific Front - Other - comparison of bombs carried carrier bomber and carrier attack plane; A6M Zero camouflage & Marking 6) Japanese Mainland (training and maintenance)
2019.343.243	Japanese Naval Air Force in Action	Watanabe, Yoji	Text in Japanese. This book is an exciting release, and contains many amazing, and never before published photos of Japanese Navy aircraft, operations and candid photos. For enthusiasts of WWII Pacific history, we are used to seeing the same photographs of Japanese aircraft over and over again. This book contains hundreds of photographs that will be completely new to the reader. Collected from veterans and sources inside Japan, the book will amaze the reader with images that have never or

Object ID	Title	Author	Summary
			rarely been seen before. The book is organized by airplane, covering nearly every type used by the Japanese Navy. Included are prewar biplanes, Claudes, Zero, and all the bombers, dive bombers, seaplanes and later war designs. Just as impressive are the photos depicting aircrews, casual photos and details of markings, insignias and interiors of aircraft. Also, amazingly rare photos, like the view from inside a Betty bomber looking downwards, as an Ohka falls away, prior to its rocket motors igniting. The only draw back is that the book's captions are all in Japanese, and the book is not available directly in the United States. But, if you can get a copy, this volume will be an exciting addition to your collection. Review by Justin Taylan Requested permission to use the review 7/27/2020 at info@pacificwrecks.com © Pacific Wrecks Review: Japanese Naval Air Force In Action Source: https://pacificwrecks.com/reviews/japanese-naval-air-force-in-action.html

2019.343.244	Japanese Submarine - Perfect Guide	Watanabe, Yoshinori	1400 Class Subs. From Wikipedia The I-400-class submarine (I-yon-hyaku-gata sensuikan) Imperial Japanese Navy (IJN) submarines were the largest submarines of World War II and remained the largest ever built until the construction of nuclear ballistic missile submarines in the 1960s. The IJN called this type of submarine Sentoku type submarine (Sen-Toku-gata sensuikan, Submarine Special). The type name was shortened to Toku-gata Sensuikan Special Type Submarine). They were submarine aircraft carriers able to carry three Aichi M6A

Object ID	Title	Author	Summary
			Seiran aircraft underwater to their destinations. They were designed to surface, launch their planes, then quickly dive again before they were discovered. They also carried torpedoes for close-range combat. The I-400 class was designed with the range to travel anywhere in the world and return. A fleet of 18 boats was planned in 1942, and work started on the first in January 1943 at the Kure, Hiroshima arsenal. Within a year the plan was scaled back to five, of which only three (I-400 at Kure, and I-401 and I-402 at Sasebo) were completed.
2019.343.245	Japanese Army and Navy Fighters 1930-1945	Nohara, Shigeru	Wikipedia lists 18 Japanese fighters used during WWII. Dave's Warbird lists 52 Japanese fighters. Both the Imperial Japanese Navy and Army often had specialized versions of the same fighter. Manufacturers include Kawanishi (Jimpu), Kawasaki (Perry, Bob, Nick, Tony, Rob, Randy), Kyushu (Shinden) Mitsubishi (Claude, Zeke, Hamp, Sam, Jack, Luke, Shushi, Steve), Seversky (Zeke), Nakajima (Gus, Irving, Tenrai, Kikka, Nate, Oscar. Tojo), Nagoya-Sento (Ben). Part of title: Type 91 Battle Type 90 Battle to Fire Dragon Autumn Water
2019.343.246	Japanese Army/Navy Reconnaissance Aircraft, Transport Aircraft, Training Aircraft, Flying Boat Development, 1930-1945	Nohara, Shigeru	Many illustrations and helpful explanations. Japanese fighters are included in a separate volume (2019.343.345). This volume includes information on both Army and Navy versions of reconnaissance, transport, training, and flying boats, Includes: 1) IJA Reconnaissance Aircraft Development 2) IJA Transport Aircraft Development 3) IJA Training Aircraft Development 4) IJN Reconnaissance Aircraft Development 5) IJN Flying Boat Development 6) IJN Reconnaissance and

2019.343.247	Mitsubishi A6M Zero	Nohara, Shigeru	The Mitsubishi A6M "Zero" is a long-range fighter aircraft formerly manufactured by Mitsubishi Aircraft Company, a part of Mitsubishi Heavy Industries, and operated by the Imperial Japanese Navy from 1940 to 1945. The A6M was designated as the Mitsubishi Navy Type 0 carrier fighter (rei-shiki-kanjo-sentoki), or the Mitsubishi A6M Rei-sen. The A6M was usually referred to by its pilots as the Reisen (zero fighter), "0" being the last digit of the imperial year 2600 (1940) when it entered service with the Imperial Navy. The official Allied reporting name was "Zeke", although the use of the name "Zero" (from Type 0) was used colloquially by the Allies as well. The Zero is considered to have been the most capable carrier-based fighter in the world when it was introduced early in World War II, combining excellent maneuverability and very long range.[2] The Imperial Japanese Navy Air Service (IJNAS) also frequently used it as a land-based fighter.
2019.343.248	Japanese Imperial Navy Aircraft	Toda, Mannosuke	In Japanese. The organization was responsible for the operation of naval aircraft and the conduct of aerial warfare in the Pacific War. The Japanese military acquired their first aircraft in 1910 and followed the development of air combat during World War I with great interest. They initially procured European aircraft but quickly built their own and launched themselves onto an ambitious aircraft carrier building program. They launched the world's first purpose-built aircraft carrier, Honsho, in 1922. Afterwards they embarked on a conversion program of several excess battlecruisers and battleships into aircraft carriers. The IJN Air Service had the mission

Object ID	Title	Author	Summary
			of national air defence, deep strike, naval warfare, and so forth. It retained this mission to the end. The Japanese pilot training program was very selective and rigorous, producing a high-quality and long-serving pilot corps, who were very successful in the air during the early part of World War II in the Pacific. However, the long duration of the training program, combined with a shortage of gasoline for training, did not allow the IJN to rapidly provide qualified replacements in sufficient numbers. Moreover, Japan, unlike the U.S. or Britain, never altered its program to speed up the training process of its recruits. The resultant decrease in quantity and quality, among other factors, resulted in increasing casualties toward the end of the war. Japanese navy aviators, like their army counterparts, preferred maneuverable aircraft, leading to lightly built but extraordinarily agile types, most famously the A6M Zero, which achieved its feats by sacrificing armor and self-sealing fuel tanks. Aircraft with armor and self-sealing fuel tanks, such as the Kawanishi N1K-J would not enter service until late 1944-1945, which was too late to have a meaningful impact. The Imperial Japanese Navy Air Service was equal in function to the Royal Navy's Fleet Air Arm (FAA). The series of larger A4-size Koku Fan Illustrated quarterly special editions, from the same publishers as Koku Fan monthly, has not been added to since No.115, covering air racing, appeared back in 2001. Early issues in the series retained the same page size as the regular magazine. It later expanded to A4 format. The title is very apt in that the contents is almost entirely pictorial, with around 30 pages of colour photos, a 16 page modelling manual of detail sketches and the remaining

2019.343.255	Imperial Japanese Army Aircraft	Imai, Kesaharu	In Japanese. IJA War Planes of World War II.

Object ID	Title	Author	Summary
2019.343.256	Nakajima Army Type 4 Fighter "Hayate"	Takashiro, Hajime	Includes line drawings, photographs, and mechanical details of the Ki-84 aircraft.
2019.343.257	Naval Aero-Technical Arsenal Carrier Dive Bomber "Suisei Comet D4Y"	Takashiro, Hajime	Contains drawings, photographs, and description of the D4Y Suisei Dive Bomber. Analyzes its development, design, combat history, markings, and mechanical features.
2019.343.258	Kawanishi H8K Type 2	Takashiro, Hajime	Includes line art, photographs, and technical description of the Kawanishi H8K EMILY Flying Boat, regarding its mechanisms, design specifications, and operational use.
2019.343.259	Army Bombers "Ginga"	Takashiro, Hajime	Contains detail photos, text, and line drawings of the Yokosuka P1Y Ginga bomber, analyzing its design, development, operational capabilities, and other mechanical features.
2019.343.260	Mitsubishi Type 0 Observation Seaplane F1M (Pete)	Takashiro, Hajime	Provides a close-up view of the Mitsubishi F1M seaplane through line drawings, illustrations, and photographs. Analyzes its mechanical features and operational capabilities.
2019.343.261	Nakajima C6N1 Carrier Based Rec. Saiun	Takashiro, Hajime	A detailed technical analysis of the Nakajima C6N1 Saiun reconnaissance plane, using scale drawings, illustrations, and text to describe the aircraft's design, development, and performance.
2019.343.262	Mitsubishi A6M Zero Fighter	Takashiro, Hajime	Contains photos, scale drawings, and text on the mechanisms of the Mitsubishi A6M Zero fighter plane.
2019.343.263	Aichi E13A (Jake)	Takashiro, Hajime	Includes line drawings, pictures, and technical descriptions of the Aichi E13A reconnaissance seaplane.
2019.343.264	Nakajima Ki. 43 Hayabusa	Takashiro, Hajime	Contains photos, line drawings, and colored illustrations of the Nakajima Ki. 43 ("Oscar") along with text in Japanese about the fighter's mechanical design and combat capabilities.
2019.343.265	Mitsubishi A7M Reppu	Takashiro, Hajime	Contains line drawings, colored illustrations, and b&w photos of the Mitsubishi A7M Reppu ("Sam") as well as text in Japanese regarding the fighter's design specifications and operational history.

Object ID	Title	Author	Summary
2019.343.266	Mitsubishi A6M5 Reisen (Zero)	Takashiro, Hajime	Examines the design specifications and combat capabilities of the Mitsubishi A6M5 through line drawings and photographs, supplemented by descriptive text in Japanese.
2019.343.267	Mitsubishi A6M2 (Zero) & A6M2-N (Rufe)	Takashiro, Hajime	Includes detail drawings, colored illustrations, and photographs of the Mitsubishi A6M2 as well as written text for additional context concerning the seaplane's features, development, and deployment.
2019.343.268	Nakajima Ki. 44 Shoki & Ki. 45 Toryu	Takashiro, Hajime	Describes the mechanical features, design specifications, performance capabilities, and historical context of the Nakajima Ki. 44 Shoki and Ki. 45 Toryu via line drawings, original photographs, colored illustrations, and detailed text.
2019.343.269	Mitsubishi J2M3 Raiden (Jack) & Kawanishi N1K1-J and N1K2-J Shiden (George)	Takashiro, Hajime	Contains illustrations and line drawings of the Mitsubishi J2M3 Raiden and Kawanishi N1K1-J/N1K2-J Shiden, in addition to text about the aircrafts' performance capabilities and combat history in the Pacific Theater.
2019.343.270	Mitsubishi Army Type 4 Heavy-Bomber "Hiryu" Ki-67	Takashiro, Hajime	Contains line drawings, illustrations, photographs, design specifications, and written descriptions of the Mitsubishi Ki-67 Hiryu's development and naval operations.
2019.343.271	Kawanishi N1K1-J Shiden & N1K2-J Shiden Kai (George)	Takashiro, Hajime	Pictorial guide to the Kawanishi N1K1-J Shiden and N1K2-J Shiden Kai, including their engines and wings. Contains various illustrations, line drawings, and text that further describe the aircrafts' design and develop
2019.343.272	Mitsubishi Ki. 46 Type 100 (Dinah)	Takashiro, Hajime	Includes photographs, line drawings, and detailed text about the development, design specifications, and performance capabilities of a reconnaissance plane, called the Mitsubishi Ki-46 Type 100, as well as its variations.
2019.343.273	Kawasaki Ki-45 Toryu (Nick)	Takashiro, Hajime	Describes the development, design, and performance of the Kawasaki Ki-45 two-engine long-range fighter via line drawings and illustrations

Object ID	Title	Author	Summary
			that depict various features such as its engines, controls, and propellers.
2019.343.274	Nakajima Ki-44 Shoki (Tojo)	Takashiro, Hajime	Profiles the Nakajima Ki-44 Shoki. Contains photographs, detailed drawings, and textual explanations regarding the interceptor fighter's design specifications, development, and performance history.
2019.343.275	Mitsubishi J2M3 Raiden Model 21	Takashiro, Hajime	Pictorial guide to the J2M3 Model 21 variant of the Mitsubishi J2M Raiden, describing its design specifications, testing, combat capabilities, and other technical features.
2019.343.276	Kawanishi N1K2-J Shiden Kai (George)	Takashiro, Hajime	Contains line drawings and photographs of the Kawanishi N1K2-J Shiden Kai, concerning its design, development, and performance. Also includes text about the fighter's operational history in WWII.
2019.343.277	Nakajima Army Type 4 Fighter "Hayate" Ki-84	Yamashita, Takeo	Contains line drawings and photographs of the Type 4 Fighter "Hayate" regarding its design, variations, and specifications, along with text that describes the aircraft's development and combat experience.
2019.343.278	Japanese Army/Navy Night Fighter	Yamashita, Takeo	Pictorial guide to the Nakajima J1N1 (Irving) and Kawasaki Ki-45 (Nick). Contains detailed drawings and photographs as well as text about the aircrafts' operational performance during WWII.
2019.343.279	Camouflage & Markings of the Imperial Japanese Navy Fighter in W.W.II	Watanabe, Toru	Illustrated guide to major Imperial Japanese Navy fighters. Covers numerous aircrafts such as the Mitsubishi A5M CLAUDE and A6M ZERO, floatplane derivatives of the ZERO, and Kawanishi Kyofu (REX) floatplane fighter.
2019.343.280	Camouflage & Markings of the I.J.N. Fighters	Nohara, Shigeru	Consists of photos and line drawings documenting the marking schemes and design of major aircrafts that flew with the Imperial Japanese Navy during WWII.
2019.343.281	Mitsubishi J2M Raiden	Nohara, Shigeru	Describes technical aspects of the Mitsubishi J2M Raiden with color profiles, operational b&w photographs, line drawings, photographs of the single

Object ID	Title	Author	Summary
			existing RAIDEN, and photographs of superbly built kits.
2019.343.282	Nakajima Ki 44 Shoki	Yamashita, Takeo ed.	Profiles the Nakajima Ki. 44 Type 2 Shoki through detailed text, line drawings, colored illustrations, and black & white photographs. Analyzes the fighter's development, operational history, technical specifications, and unique markings.
2019.343.283	Japanese Army/Navy Night Fighter	Yamashita, Takeo ed.	Describes the development, operational history, design specifications, performance capabilities of Imperial Japan's night fighters, such as the Nakajima J1N1-S Gekko and Kawasaki K-45 Toryu. Includes historical photographs, illustrations, and line drawings.
2019.343.284	Shusui & Japanese Army/Navy Jet, Rocket Aircraft	Nohara, Shigeru	Depicts the mechanical features and performance capabilities of the Japanese Army and Navy's Night Fighters in WWII, including the Nakajima Gekko "Irving", Kawasaki Ki-45 Toryu "Nick", Kugisho Suisei "Judy", and Mitsubishi ZERO Night Fighters.
2019.343.285	Military Aircraft "Reppu" Carrier Fighter Curtiss P-40	Miyazaki, Kazurori	Contains historical photographs and line drawings depicting the development and engineering design of the Japanese Mitsubishi A7M Reppu (Sam). Describes its combat capabilities in addition to an overview of U.S. military aircrafts in the Pacific War, such as the Curtiss P-40 Warhawk and its variants. Briefly discusses the mechanical features and performance capabilities of the German aircraft Junkers Ju 88.
2019.343.286	Military Aircraft Zero Fighter (3) "Gekko" Night Fighter J1N1-S	Military Aircraft Team	Analyzes the Japanese Zero Night Fighter "Gekko" design specifications and its combat capabilities against Allied fighters. Contains a collection of historical photos of Allied military aircrafts in action, including the Northrop P-61 and Douglas P-70/A-20, along with an overview of the Bell P-39 Airacobra's mechanical details and combat history. Also covers the engineering design of Germany's Heinkel

Object ID	Title	Author	Summary
			He111.
2019.343.287	Military Aircraft Zero Fighter (2) Ki 83 Experimental Long-Range Fighter	Military Aircraft Team	Analyzes the design and development of the Zero Fighter Ki 83 and describes its operational performance against U.S. aircrafts, referring to excerpts from U.S. military pilot training about the Lockheed P-38 Lightning's combat capabilities. Contains historical photos and technical descriptions of Allied military aircrafts as well as the German Heinkel He111.
2019.343.288	Military Aircraft P-51 Mustang (1) Secret Japanese Aircraft (4)	Military Aircraft Team	Provides technical analysis of the U.S. fighter P-51 Mustang with original photos and line drawings, in addition to photographs and text describing the "Shark Mouth" designs of the aircrafts' fuselages.
2019.343.289	Military Aircraft Bf109 vs Fw190 Secret Japanese Aircraft	Military Aircraft Team	Compares two German fighter aircrafts, the Messerschmitt Bf 109 and Focke-Wulf Fw 190 Würger. Includes detailed text, line drawings, and photographs to describe each of their mechanical and operational features. Additionally analyzes the design and combat performance of the German Dornier Do 17 and U.S. Grumman F8F Bearcat. Includes a technical overview of the Japanese Aichi M6A Seiran, along with a brief description of its surrender markings.
2019.343.290	Military Aircraft P-51 Mustang (2) Secret Japanese Aircraft (5)	Military Aircraft Team	Profiles different types of American, German, and Japanese aircrafts, in addition to brief references to aircrafts from the U.K. Features the North American P-51 Mustang regarding its design specifications, performance capabilities, and operational history in WWII. Contains text, original photographs, illustrations, and line drawings.
2019.343.292	Military Aircraft Major German Fighters of W.W.II (3) Secret Japanese Aircraft (2)	Military Aircraft Team	Provides a detailed overview of major German fighter planes in WWII, such as the Messerschmitt Bf 109, Dornier Do 17, and Focke-Wulf Fw 189 Uhu, in addition to a short feature of the A6M8 variant of the Japanese A6M Zero. Includes text, original b&w

			photographs, and line drawings regarding the design, test, development, and operational capabilities of the aircrafts and any variants.
2019.343.293	Military Aircraft Major German Fighters of W.W.II (2) Japanese Ki74, Ki46IV	Military Aircraft Team	Pictorial guide to German aircrafts in WWII, including the Bf 109G series, Fw190, Ta 152, and He 112. Also provides a brief overview of the American B-29 as well as the Japanese Tachikawa Ki-74 and Mitsubishi Army Ki-46 IV.
2019.343.294	Military Aircraft Drawing Collection of W.W.II (1)	Totsuka, Tsutsumu	Analyzes a collection of drawings and photographs that cover the engineering features and design of American, British Japanese, and German aircrafts in WWII. Features the Supermarine Spitfire, the Kawanishi interceptor fighter "Shiden/Shiden-Kai" (N1K1-J/N1K2-J), the Curtiss P-36/H75 Hawk, the Messerschmitt Me163B Komet, and the Nakajima Army type1 fighter "Hayabusa" (Ki43).
2019.343.295	Japanese Army Single-engined Fighters	Miyazaki, Kazurori	Provides a detailed overview of the Japanese Army fighters from 1939 to 1945, including the Nakajima Ki-27, Nakajima Ki-43 Hayabusa, Nakajima Ki-44 Shoki, Kawasaki Ki-61 Hien, Nakajima Ki-84 Hayate, and Kawasaki Ki-100. Additionally contains line drawings, photographs, and technical descriptions of German aircrafts.
2019.343.296	Zero and 109 Fighters Shinden Interceptor	Miyazaki, Kazurori	Compares the Japanese Mitsubishi A6M Zero and German Bf 109 fighters in terms of their design specifications and operational capabilities. Includes an in-depth description of the Messerschmitt Bf 109 and its variants as well as the Heinkel He 177 Greif. Contains a short overview of American aircrafts, such as the DouglasA-20A, Boeing B-17C, and Lockheed A29.
2019.343.297	Military Aircraft Focke-Wulf Ta152 Kawasaki Ki48 Bomber	Miyazaki, Kazurori	Features the German aircraft Focke-Wulf Ta152 concerning its development, design changes among variants, engineering specifications, and operational history against

			U.S. forces in WWII. Covers other high-altitude German and Japanese aircrafts, such as the Bf109H and Nakajima Ki-87. The latter half focuses on the Kawasaki Type 99 Twin-engined Light Bomber [Ki48] "Lily" with detailed line drawings and description of its mechanical and operational features.
2019.343.298	Military Aircraft Secret of the Me262 Japanese Ki92 & Shiden	Miyazaki, Kazurori	Analyzes the design, mechanical, and operational components of the Me262, Kawanishi Interceptor Fighter "Shiden", and Tachikawa Ki-92 using detailed text, line drawings, and historical photographs. Also contains a short feature of American aircrafts in WWII, including the P-51 Mustang and Consolidated B-32 Dominator, as well as a photo album of additional German aircrafts with captions in Japanese.
2019.343.299	Military Aircraft German Fighting Jet Forces Tachikawa Ki70	Miyazaki, Kazurori	Profiles various German fighting jet forces, such as the Me262 and Bf109, including their design, development, and operational history. Contains biographies of German pilots as well as historical photographs of the aircrafts in WWII. Latter half covers Imperial Japan's Tachikawa Ki-70 and their mechanical features via detailed line drawings. In addition to German and Japanese aircrafts, briefly discusses the development and design specifications of the U.S.'s Grumman F4F Wildcat.
2019.343.300	Military Aircraft Messerschmitt Me262(1) Ki102 Fighter	Miyazaki, Kazurori	Analyzes the German aircraft Me262 and its variants as well as the Imperial Japanese Army's Kawasaki Ki102 Ko-Hei Fighter/Attack Aircraft, covering their development, design specifications, and operational capabilities. Also includes the operational records of the German B109 and a short overview of the development and variants of the U.S. Northrop P-61 Black Widow fighter.
2019.343.301	German Experimental & Projected Jet Fighters (2) Kawasaki Ki64 Fighter	Miyazaki, Kazurori	Features the development, design, and capabilities of various German jet fighters

Object ID	Title	Author	Summary
			during WWII such as the Me262 and Me163, in addition to Imperial Japan's Kawasaki Ki64 fighter. Contains line drawings, illustrations, photographs, and detailed text to describe their mechanical features and operational use.
2019.343.302	Nakajima Ki.44 Shoki Ia,b,c//IIa,b,c in Japanese Army Air Force Service	Bueschel, Richard M.	Contains historical photos of the Nakajima Ki-44 Shoki and a discussion of its developmental and operational combat history. Includes two tables, one listing the units that operated the type and the other detailing the specifications of its different variants.
2019.343.303	Nakajima Ki. 84a/b Hayate in Japanese Army Air Force Service	Bueschel, Richard M.	Covers operational history of the Nakajima Ki-84 in WWII as well as the development and design specifications of its various models. Contains original b&w photographs and colored illustrations of the aircraft.
2019.343.304	Nakajima Ki.43 Hayabusa I-III in Japanese Army Air Force RTAF CAF IPSF Service	Bueschel, Richard M.	Profiles the Nakajima Ki.43 and its variants regarding their origins, development, production, and operational history in WWII and post-war times. Includes numerous b&w photos and colored illustrations of the aircraft.
2019.343.305	Monogram Close-Up Nakajima Kikka	Mikesh, Robert C.	Provides a historical and technical analysis of the development, production, and combat performance of the Kikka. Contains original b&w photographs, colored illustrations, and design specifications of the aircraft.
2019.343.306	Mitsubishi A6M Reisen Zero	Marchand, Patrick	French series about the developmental history of the Mitsubishi A6M, including its subtypes, technical data, combat capabilities, markings, colors, and well-known pilots that flew this aircraft. Contains photographs, illustrations, line drawings, and full color profiles.
2019.343.307	3D CG Series Japanese Naval Aircraft	Morokado, Yu	Features Imperial Japanese Navy aircrafts including detailed descriptions, computer-generated pictures depicting the aircrafts in combat, and illustrations of the fighter & carrier fighters, carrier attack bombers, carrier dive-

Object ID	Title	Author	Summary
			bombers, attack bombers, reconnaissance planes & seaplanes, flying-boats, special-attackers, and other experimental planes. Analyzes their design specifications, different variants, development, and historical use by operational units.
2019.343.308	3D CG Series Japanese Army/Navy Kikka, Shusui	Ninomiya, Takashi	Depicts Imperial Japanese Navy and Army aircrafts that were under development but not completed and deployed prior to the end of WWII in 1945. Analyzes the mechanical and operational features of aircrafts such as the Nakajima J9Y Kikka, Mitsubishi A6M Zero, Mitsubishi J8M Shusui, and Kawanishi N1K1 Shiden using text, illustrations, and photographs. Also includes a DVD that shows a computer-generated video of Japanese aircrafts intercepting American B-29s.
2019.343.309	Mechanic of World Aircraft: The Army Type 1 Fighter "Hayabusa", The Army Type 2 Fighter, The Army Type 97 Fighter	Kawashima, Yu	Contains detailed text, photographs, and line drawings of the Imperial Japanese Army aircrafts, including the Nakajima Ki-27, Ki-43 Hayabusa, Ki-44 Shoki. Analyzes their design specifications, variants, markings, unique characteristics, operational capabilities, and combat history.
2019.343.310	Imperial Japanese Navy Warplane	Nohara, Shigeru	Starts with an overview of American and European planes from the early 20th century. Primarily features the developmental history and rapid advancements of various Imperial Japanese Navy warplanes as well as a brief discussion of their limitations. Contains line drawings and illustrations to depict their design specifications, mechanics, and performance capabilities.
2019.343.311	Imperial Japanese Army Warplane	Nohara, Shigeru	Covers the developmental history of the Imperial Japanese Army warplanes, beginning with their French influences. Includes many line drawings, illustrations, and technical data concerning the aircrafts' design specifications and combat performance in WWII.

Object ID	Title	Author	Summary
2019.343.312	Gakken Local Fighter	Arai, Kunihiro	Profiles a variety of Japanese fighters and prototypes from WWII, such as the Mitsubishi J2M Raiden, Kawanishi N1K Shiden, Mitsubishi A7M Reppu, Mitsubishi J4M1 Senden, Nakajima J5N1 Tenrai, Kyushu J7W Shinden, and Nakajima J8M1 Shusui. Depicts their design, development, and operational history via line drawings, colored illustrations, and original b&w photographs.
2019.343.313	Japanese Special Attack Plane "Seiran" Messerschmitt Twin-Engined Fighters	Miyazaki, Kazurori	Features the Aichi M6A Seiran and the Messerschmitt Twin-Engined Fighters (Bf 110, Me210 and 410) with regards to their development, design specifications, markings, performance capabilities, combat history, and other mechanical features. Provides technical descriptions, strategic overview, and line drawings of other aircrafts, such as the Mitsubishi Type 0 Observation Seaplane "Pete", in addition to original b&w photos showcasing the features of the German Bf 109 and the American Bell P-59 Airacomet and Vought F4U Corsair.
2019.343.314	Model Art	None Stated	Pictorial guide to various Japanese aircrafts with numerous photographs, illustrations, and text concerning their mechanical features and operational use. There are articles about airplanes flown at the Battle of Midway as they are identified with aircraft type and Japanese Aircraft Carrier: Akagi, Hiryu, Soryu, Also includes info on USS Essex (CV -9). Includes article in English about the TSR-2, BAC Tactical Strike Aircraft.
2019.343.315	Nakajima Ki.84 "Hayate"	Takashiro, Hajime	Profiles the Nakajima Ki.84 "Hayate" with regards to its development, design, and operational history. Contains many illustrations, technical drawings, photographs, and descriptive text.
2019.343.316	Japanese Navy Fighter, Part 2	Imai, Kuni Ko	Illustrated guide to Japanese Navy fighters, including the Kawanishi N1K1-J Shiden, Kawanishi N1K2-J Shiden-

			kai, Kawanishi N1K Kyohu, Nakajima J1N1-S Gekko, Mitsubishi A7M Reppu, Nakajima J5N1 Tenrai, Mitsubishi A6M8 Zero Fighter, Kyushu J7W1 Shinden, and Mitsubishi J8M/Ki-200 Shusui. Includes text describing their design, development, specifications, and operational history.
2019.343.317	Photo Book for Japanese Fighters	Team Maru	Pictorial guide to various fighters, bombers, reconnaissance planes, and other military aircrafts from Imperial Japan, the United States, the United Kingdom, and Germany. Also covers Japanese destroyers, submarines, and smaller warships.
2019.343.318	Japanese Fighters	Nohara, Shigeru	Features a variety of Navy and Army fighters in Imperial Japan, using b&w photographs, line drawings, and text to depict their development, design specifications, and operational history.
2019.343.319	Imperial Japanese Navy Interceptor Fighter Mitsubishi J2M Raiden	Watanabe, Toru	A detailed analysis of the Mitsubishi J2M Raiden, containing photographs, line drawings, and text with regards to its development, design, operational history, and other technical specifications.
2019.343.320	Japanese Military Aircraft Illustrated	Imai, Ichika	Pictorial guide to Army and Navy aircrafts in Imperial Japan, including b&w photographs and line drawings. Includes text and information on their development, design specifications, technical performance, and operational history.
2019.343.321	Camouflage & Markings of Imperial Japanese Army Fighters	Watanabe, Toru Watanabe, Toru Watanabe, Toru	Features a variety of Imperial Japanese Army Fighters, including numerous line drawings, b&w photographs, and illustrations detailing the different aircraft's design, development, and operational significance.
2019.343.322	Shoki Fighter Group 2 : The Brief History of Akeno Army Flying School, the Supreme Flight Training School for I.J.A. Fighter Pilots	Izawa, Yasuho Izawa, Yasuho	Comprehensive guide to various Japanese Imperial aircrafts, containing technical drawings, detailed text, and b&w photographs of the aircrafts in action. In addition to their design and

Object ID	Title	Author	Summary
			operational features, it includes a brief history of the Akeno Army Flying School, which was the most elite flight training school for I.J.A
2019.343.323	Zero Fighter Watching	Nohara, Shigeru Nohara, Shigeru	Technical analysis of the Mitsubishi A6M Zero fighters and their variants. Contains numerous photographs and illustrations depicting the unique design, development, mechanical parts, and markings.
2019.343.324	Japanese Special Attack Aircraft & Flying Bombs	Ishiguro, Ryusuke	In the final stages of WWII, the Japanese Army and Navy made considerable use of suicide operations ("Special Attack" or "Kamikaze"), in a desperate attempt to stem the Allied advances. This book describes the background to these operations, the aircraft and pilots involved, and the effects of the campaign. In addition the many projects for missiles and guided weapons developed in Japan during the war are described and illustrated. Fully illustrated with photos, scale plans and color profiles, this book is a comprehensive guide to Special Attack operations and related weapons development.
2019.343.325	De Havilland Mosquito	N/A	Pictorial guide to the British De Havilland Mosquito and its variants. Includes technical illustrations, scale drawings, operational history, in-action photos, and color, camouflage & markings.
2019.343.326	Japanese Army Experimental Fighters (2)	None Stated	Comprehensive analysis of various Imperial Japanese Army experimental fighters. Contains scale plans, original b&w photographs, and color profiles to describe development, design specifications, operational performance, and other technical details.
2019.343.327	Shoki Fighter Group : A Pictorial History of the 70th Sentai, the Tokyo's Defenders	Izawa, Yasuho Izawa, Yasuho Shibata, Kazuya	Photographic collection of the 70th Sentai equipped with Nakajima Ki-44 Shoki. Contains artwork and colorized photos as well as a section dedicated to the Tokuheitai unit that trained with Akigusa gliders pending the production of Shusui rocket interceptor. Photo captions are translated

			in English.
2019.343.328	Japanese Military Experimental Aircrafts	Yoshioka, Tetsugi	Illusrated guide to Japanese Experimental Aircraft and operational campaigns of WWII. Depicts Navy aircraft such as the Nakajima Super strategic-bomber "FUGAKU," Kyushu J7W interceptor "SHINDEN," Mitsubishi A7M2 Carrier Fighter "REPPU," Mitsubishi J4M Interceptor "Senden," Nakajima Special attack jet aircraft "KIKKA," Mitsubishi J8M1 Rocket Interceptor "SHUSUI," Kawasaki J6K1 High Altitude Fighter "JINPU." Also covers Army aircraft, including the Mitsubishi Ki83 Long range Fighter, Kawasaki Ki64 Fighter "ROB," Nakajima Ki87 High Altitude Fighter, Tachikawa Ki94 High Altitude Fighter, Tachikawa Ki74 Long Distance Reconnaissance/Bomber "PASTY," Kawasaki Ki91 Strategic Bomber, Koukukousho Ki93 Ground Attack Bomber, Kawasaki Ki88 interceptor.
2019.343.331	Nakajima Ki-44 Shoki (Tojo)	Brindley, John F.	History of the Nakajima aircraft, the KI-44 Shoki.
2019.343.332	Mitsubishi Ki-46, The	Francillon, René J.	History of the Mitsubishi Ki-46 Reconnaissance plane called Dinah by the Allies.
2019.343.333	Illustrated Encyclopedia of Aircraft, The	Morse, Stan (ed)	This issue includes articles on the following: History of Aviation : Commercial Aviation : Helicopters World's Greatest Aircraft : Nakajima Ki-84 A-Z of Aircraft : Rockwell, Rogozarski; Rohrbach, Rollason, Romano, Rose Parakeet, Rotorcraft, RotorWay, Royal Aircraft Factory.
2019.343.337	Brewster Buffalo, The	Shores, Christopher	The Brewster F2A-1 "Buffalo" Navy fighter, which was intended for carrier operations, was powered by a 1,100 horsepower Wright Cyclone engine, had a top speed of about 324 miles per hour, a range of 1,680 miles, and a ceiling of approximately 34,000 feet.
2019.343.341	Maru Mechanic Series History	Pederson, David (ed)	We believe this three page list was written by David Pederson, who donated over 300 items

Object ID	Title	Author	Summary
			to us in 2019--many about Japanese airplanes. It lists the different books published in the Maru Mechanic series. There is a copy filed under Media above and one filed in Emanuals on Library 1 Onedrive.
2019.344.001	Benjamin Franklin Tracy : Father of the Modern American Fighting Navy	Cooling, B. Franklin	This study treats primarily Tracy's achievements as Secretary of the Navy from 1889 -1893. Policy revolutionist, shrewd business negotiator with steelmen, reformist administrator, and Presidential confidant--Benjamin Franklin Tracy rose from humble rural beginnings to help move the U.S. Navy from the days of wooden ships and iron men toward the modern world of deterrence and complex weapons systems.
2019.345.001	Mission : Seventy-two - USS Midway (CVA-41) - 1972-73	Doweary, M. M. (ed.)	A pictorial account of the western Pacific deployment of USS Midway in 1972/73. The ship departed Alameda 10 APR 72 and returned to Alameda 3 March 1973, 1 week short of an 11-month deployment. Not only was it a long deployment, Midway was deployed 7 weeks ahead of schedule with less than one week's notice. Significant operations included 9 periods of line operations off Vietnam in support of the Vietnam War. Port calls included Pearl Harbor, Subic Bay (multiple), Hong Kong and Singapore. Bob Hope performed on Midway with his troop on 27 December in Singapore. The show was taped and broadcast on U. S. national television on 17 January 1973 as the Bob Hope Christmas Special. CVW-5 was embarked. The airwing consisted of VF-151 (F-4B), VF-161 (F-4B), VA-56 (A-7B), VA-93 (A-7B), VA-115 (A-6A and KA-6D), VAQ-130 Det 2 (EKA-3B), VFP-63 Det 3 (RF-8G), VAW-115 (E-2B), HC-1 Det 2 (SH-3G), and HC-7 Det 110 (HH-3A).
2019.346.001	Report to the Secretary of the Navy, A : Report Covering Combat Operations up to March 1, 1944	Chief of Naval Operations	Contents include: I. The Peace-Time Navy II. The War-Time Navy III. Combat Operations

Object ID	Title	Author	Summary
			IV. Teamwork Plates and Charts: US Navy Enlisted Personnel, 1923-43 Status of Combatant Vessels, US Navy, 1923-44 Munitions vs Man-Power versus the Eight Fronts, as of April 1942 Shipyard Employees Building and Repairing US Navy Vessels, 1942-43 Months Required for US Navy Construction Before and After Pearl harbor Destroyers : Average Monthly Production, 1941-43 Defensive Phase in the Pacific Offensive-Defensive Phase in the Pacific Tides of War in the pacific Naval Operations in the North African and Mediterranean Theatres
2019.347.001	Around the World Submerged : The Voyage of the Triton	Beach, Edward L.	"When the nuclear-powered submarine USS Triton was commissioned in November 1959, its commanding officer, Capt. Edward L. Beach, planned a lengthy but otherwise routine shakedown cruise in the North Atlantic. Two weeks before the scheduled cruise, however, Beach was summoned to Washington and told of the immediate necessity to prove the reliability of the Rickover-conceived submarine. His new secret orders were to take the Triton around the world, entirely submerged the whole time. When asked if his new ship could do this, he responded simply "Yes, sir!"" "Here is Captain Beach's firsthand account of the thirty-six-thousand-nautical-mile voyage whose records for speed and endurance still stand today. It brings to life the many tense events in the historic journey: the malfunction of the fathometer, an instrument essential to locating undersea mountains and shallow waters; the agonizing illness of a senior petty officer; and the serious problem that suddenly overtook the ship's main hydraulic oil system. But with the stress came frequent moments of

Object ID	Title	Author	Summary
			humor and poignancy, which, as described by Beach, make readers feel as if they had been along on the ride of a lifetime."
2019.347.002	Surface at the Pole : The Story of USS Skate	Calvert, James F.	Account, by its commander, of this submarine's crossing of the Arctic Ocean in August 1958 and March 1959. Also includes some background information on the cruises.
2019.347.003	Japanese Submarine Force and World War II, The	Boyd, Carl	In World War II, Japanese submarines were ineffective compared with those of the Americans and Germans. In this book an American naval historian and a Japanese mariner have recorded and evaluated a diverse amount of material, much of it only recently declassified, and drawn new conclusions. The focus of their examinations is American wartime interceptions of secret Japanese radio messages, and official Japanese sources. (From Google Books)
2019.347.004	Great Wall at Sea, The : China's Navy enters the twenty-first century	Cole, Bernard D.	The main focus of the book is a detailed examination of China's navy, its organization and its submarines, ships, and airplanes that form the heart of the sea-going force. The book also takes into account the officers and sailors who man the growing fleet and Beijing's efforts to train and educate them to be both professionally capable and politically reliable. China's future plans for its navy, including doctrine and operations, are fully discussed. In his conclusion, the author places China's naval developments within the context of national goals and plans as well as in the international arena. He asserts that Beijing will continue as a continental power with a maritime strategy and a navy focused on specific, limited goals, while reminding readers that the reunification of Taiwan is an objective that may well involve the United States. (From Amazon)

Object ID	Title	Author	Summary
2019.347.008	Cruisers for Breakfast : War Patrols of the U.S.S. Darter and U.S.S. Dace	Mansfield, John G.	From Submarine sailors. com "Epitomizes the actions, triumphs, tragedies and personal accounts of two gallant diesel submarines and the members of their crews at the height of the war in the Pacific." Cruisers for Breakfast is about 2 submarines, working together as a Wolf Pack that attacked and sank two Japanese cruisers. The cruisers were monitoring the allied landings in Leyte. While working there way thru Palawan Passage to sink a 3rd cruiser (which they also damaged), the Darter grounded on an uncharted shoal. Unable to work itself free, the other sub, Dace, rescued the crew and the sub makes the journey back to Australia with 2 full sub crews quartered together. That is the book's primary focus however it begins with intros about the captains and some of the officers and crews. The patrols the subs made before the Leyte attack are also described in some detail along with some personal stories from the subs' sailors. Includes a picture section of approximately a dozen b&w pics of the crews and the 2 boats.
2019.347.009	Operation Storm : Japan's Top Secret Submarines and Its Plan to Change the Course of World War II	Geoghegan, John J.	Discusses the top-secret Japanese submarine project in World War II, creating submarines designed to work as underwater aircraft carriers, and the planned attack on U.S. cities that could have changed the outcome of the war. Contents: Prologue. Face-off ; The I-401 - - Preparation. Birth ; Nambu ; Underwater aircraft carriers ; Proof of concept ; Challenges -- Complications. Reduction and revival ; Nambu under fire ; Nambu becomes a mole ; Seiran takes flight ; The Panama Canal ; Ariizumi ; Ariizumi under fire -- The Segundo (SS 398) ; Decline -- Mission. Nambu and the I-401 ; The 631st ; Fulp on patrol ; Kure ; Adversity ; Attacking the Canal ; Green light ; Fulp's last patrol ; Nanao Bay ; The taste of persimmon ; Johnson takes

			command ; Operation Storm -- Race against time. Departure ; Under way ; Crossed wires ; The Emperor's voice ; Anarchy ; Escape ; Interception ; Spoils of war ; Reckoning ; Boarding party ; The tenth war god ; Bittersweet ; Freedom ; The long road home ; Rediscovery.
2019.347.010	Bowfin : The Story of a Fabled Fleet Submarine in World War II	Hoyt, Edwin Palmer	The author draws on Bowfin's records, reports, and interviews with ex-crew members to describe the silence that had to be maintained while Japanese ships circled overhead, and the constant alert for airplane attacks, minefields, and sudden storms. The record of the Bowfin speaks for itself: 176,000 tons of Japanese shipping sunk during nine patrols, including forty merchant ships and four warships.
2019.347.011	U.S. Submarine Attacks During World War II : Including Allied Submarine Attacks in the Pacific Theater	Alden, John Doughty	A chronological listing of all U.S. submarine attacks that claimed to have damaged or sunk their targets in World War II, including those few that occurred in the Atlantic, and all attacks by British and Dutch submarines in the Far Eastern theater. These officially reported attacks are then matched against information compiled from Japanese and other sources, with discrepancies indicated and possible explanations offered.
2019.349.001	Collected Adventures of Nick Danger, Third Eye, The	Reddig, J. R.	Book, "Nick Danger" Third Eye, by J. R. Reddig 1979-1980. Former USS Midway crew member.
2019.350.001	Astrospies	Willis, C. Scott	Millions remember the countdowns, launchings, splashdowns, and parades as the U.S. raced the USSR to the moon in the 1960s. But few know that both countries also ran parallel space programs, whose covert goal was to launch military astronauts on spying missions. With investigative journalist James Bamford, NOVA delves into the untold story of this top-secret space race, which might easily have turned into a shooting war in orbit.

Object ID	Title	Author	Summary
			Original broadcast date: 02/12/2008 Topic: technology/weapons & warfare
2019.350.002	Top Gun Aces	Hutter, Charles B.	Welcome to "FighterTown, USA" This thrill-packed documentary features the fighter weapons school at the Naval Air Station in Miramar, Calif. Professional "fighter jocks" spin, roll, and climb over the top to make the kill with the variable-wing Grumman F-14 Tomcat-the multiple fighter interceptor that can fire six Phoenix missiles simultaneously at six different targets, while tracking up to 24 enemy aircraft.
2019.350.003	Vietnam : Alpha Strike	Heston, Charlton	Focuses on the air war of the Vietnam conflict. Painstakingly researched with previously classified footage from private sources and government archives all over the world, this program exposes the real stories of the Cold War.
2019.350.004	Wings of Gold and Other Flight Frights	Small, Bart	A collection of naval aviation- and offshore oil aviation- related poems.
2019.350.005	Age of Orion, The : Lockheed P-3 : An Illustrated History	Reade, David	Claimed to be the first book devoted solely to the development and operational use of U.S. Navy's P-3 Orion patrol aircraft. Contains comprehensive and informative appendices, charts, graphs and bureau number aircraft location listing of every P-3 Orion in the world as of the publish date. 280 color photographs.
2019.350.006	Wings Over the Pacific	Burns, Steve	The Pacific in World War II was a battlefield like no other before or since, the war a conflict between great navies whose primary weapon was the airplane. In this documentary produced by the Discovery Channel, the planes of the Pacific battles and the critical roles they played are covered in a fast-paced narrative laced with archival footage. The American Avenger dive bomber, P-40 Tomahawk, P-38 Lightning, P-51 Mustang, and, of course, the plane that for many defines the Pacific war,

Object ID	Title	Author	Summary
			the B-29 Superfortress bomber, are profiled. Japanese planes, including the legendary Zero fighter, also get their due. In addition to explanations via maps, narration, and old film footage about how the specific planes were deployed in battle, interviews with veterans from both sides of the conflict are prominently featured. Participants in specific battles and operations, including the men who flew on the famous Doolittle Raid against Japan, and even a Japanese flier who attacked Pearl Harbor, recall their roles in what was then a strange new form of warfare. This video is first and foremost a tribute to the warbirds and their pilots, but while concentrating on the specific planes and their use, the narration also provides a solid overview of how the war in the Pacific was fought, from Pearl Harbor to the Coral Sea, Midway, Guadalcanal, and onward to the ultimate and decisive air attacks on the Japanese home islands. --Robert McNamara (from Amazon.com) Includes the following airplanes: Corsair (Fighter plane). Vought F4U Corsair. Grumman F4F Wildcat Grumman F6F Hellcat Grumman TBF Avenger Mitsubishi A6M Zero Nakajima B5N "Kate"
2019.350.007	Moffett NAS Air Show - 1989	None Stated	Featuring the U.S. Navy's Blue Angels with onboard shots with the best civilian acts at the show. More with F-14, Harrier, Stearman, P-3 Orion and more. Grumman F-14 Tomcat. Lockheed P-3 Orion. McDonnell Douglas F/A-18 Hornet. McDonnell Douglas AV-8 Harrier. Blue Angels. United States. Naval Flight Demonstration Squadron.
2019.350.008	Celebration in the Sky : Planes of Fame Air Museum : 41 Years	Planes of Fame Museum	The Air Museum "Planes Of Fame" was the proud host of Celebration In The Sky '98! Thanks to your ongoing

Object ID	Title	Author	Summary
			support and enthusiasm, The Air Museum has restored, preserved and displayed history-making aircraft for 41 years! We share your dedication to international aircraft and warbirds, so together let's "keep 'em flying"! (from clamshell case insert back)
2019.350.009	Kamikaze : Mission of Death	Round Hill Production	Towards the end of World War II, a desperate Japanese military launched a lethal plan of attack on U.S. naval fleets, dispatching waves of bomb-laden suicide planes piloted by the notorious kamikaze pilots. Rare archival footage captured after the war, reveals the preparation and achievement of the kamikaze's deadly mission, including rare interviews with surviving kamikaze pilots, bearing the disgrace of having outlived their friends.
2019.350.010	America's New War Machines	Thomas, Peter	Inside Today's Smart Weapon Systems. Spectacular Action Sequences F-15s, Stealth Fighters, patriot Missiles. You'll see gripping action sequences of F-14 Tomcats, F/A-18 Hornets, Battleship Missouri, and the Aircraft Carrier Nimitz.
2019.350.011	Blue Sky Metropolis	Jones, Peter (producer, writer, director)	"Blue Sky Metropolis" is the untold story of how aerospace was central to the growth of California and its emergence as an economic power. The documentary mini-series focuses on the people behind the aerospace movement and will feature many of the current major players in the aerospace industry in California, which is the hub of modern day aerospace engineering. The aerospace century will unfold through the lives and words of the men and women who created it: John Northrop, Glenn Martin, Donald Douglas, Amelia Earhart, Howard Hughes, Walt Disney and Wernher Von Braun. "Blue Sky Metropolis" is a part of PBS "Summer of Space," a multiplatform experience that includes new science and history programs, all

Object ID	Title	Author	Summary
			commemorating America's journey into space. Broadcast on Tuesday, August 13, 2019 at 09:00 pm on KPBS. Episode One: Wings Aviation takes flight in early Los Angeles, becoming an industry of dreamers, risk takers and entrepreneurs. The region is America's "arsenal of democracy" during World War II, as two million workers build 300,000 aircraft. Critics see an unhealthy alliance developing between the federal government and aircraft manufacturers. Episode Two: The Big Chill The Cold War and Pentagon dollars fuels the explosive growth of modern Los Angeles and creates the military-industrial-complex. Entire suburbs are built in record time to house defense industry workers, but covenants restrict non-white races from living there. Fear of nuclear annihilation spawns a new genre for Hollywood as 'science fiction' movies become a box office goldmine. USS Midway Museum seen at beginning of Episode Two.
2019.350.012	Russia's Nuclear Warriors/Secrets, Lies and Atomic Spies	Woodhead, Leslie (director, "Russia's Nuclear Warriors")	NOVA - "Russia's Nuclear Warriors," originally broadcast on PBS on November 6, 2001, chronicles the extraordinary lives of Russia's roketchiki, the missileers who stand ready to push the nuclear button at a special command from Moscow. Russia has 6,000 nuclear warheads in readiness, many of them perched atop ballistic missiles ready to launch in silos and on mobile missile launchers across the Russian countryside. The men in charge of these weapons are known as roketchiki, or missileers. Highly trained and deeply loyal to the motherland, these soldiers stand at the ready to push the nuclear button at a special command from Moscow. To film the missileers in action, NOVA

Object ID	Title	Author	Summary
			gained unprecedented access to Russia's largest missile base—"Russia's Nuclear Warriors" is the result. Original broadcast date: 11/6/2001 Topics: technology/weapons & warfare ----- NOVA - "Secrets, Lies, and Atomic Spies," originally broadcast on PBS on February 5, 2002, chronicles the lives and covert activities of the so-called "atom spies" in the 1940's, including the big one that got away, Theodore Alvin Hall. NOVA reveals startling new evidence that Soviet spies penetrated America's deepest secrets, including the Manhattan Project, in the 1940's. By cracking the code of Soviet diplomatic cables, the FBI was able to hunt down "atom spies" such as Klaus Fuchs and Julius Rosenberg. But the true "master spy," a physicist named Ted Hall, got away—and his gripping story is presented for the first time by NOVA. Original broadcast date: 2/5/2002 Topics: biography, mathematics, technology/crime, technology/weapons and warfare Written, Produced and Directed by Tug Yourgrau
2019.350.013	USS Franklin D. Roosevelt CVA -42 in Flight Deck	Wasserman, Al	The DuPont Show of the Week Season 3 Episode 20 This DVD was purchased from the USS FDR (CV-42) Veterans Association. 2019.350.014	K-19 : The Widowmaker	Bigelow, Kathryn	The story of USSR's first nuclear ballistic submarine, which suffered a malfunction in its nuclear reactor on its maiden voyage in the North Atlantic in 1961. The submarine's crew, led by the unyielding Captain Alexi Vostrikov, races against time to prevent a Chernobyl-like nuclear disaster which threatens not only the lives of his crew, but has the potential to ignite a world war between the super powers. (from IMDb.com)
2019.353.001	Experiment in Survival : Across the Pacific with George Sigler	Sigler, George	This is a book describing a survival expedition of two U.S. navy pilots who sailed a rubber raft across the Pacific testing new survival techniques. The story is both a story of adventure, and one giving details of what it takes to survive in the open ocean. The two pilots departed San Francisco with no water and six pounds of food arriving in Hawaii 56 days later. Both had dropped in weight from 186lb to 128lb. It was only at the end of the trip that the Navy acknowledged they were "an official navy project". (from Amazon.com) Title Experiment in survival Author Sigler, George.

2019.355.002	Second Most Powerful Man in the World, The : The Life of Admiral William D. Leahy, Roosevelt's Chief of Staff	O'Brien, Phillips Payson	"The life of Franklin Roosevelt's most trusted and powerful advisor, Admiral William D. Leahy, Chief of Staff to the Commander-in-Chief"-- Provided by publisher. Aside from FDR, no American did more to shape World War II than Admiral William D. Leahy--not Douglas MacArthur, not Dwight Eisenhower, and not even the legendary George Marshall. No man, including Harry Hopkins, was closer to Roosevelt, nor had earned his blind faith, like Leahy. Through the course of the war, constantly at the president's side and advising him on daily decisions, Leahy became the second most powerful man in the world. In a time of titanic personalities, Leahy regularly downplayed his influence, preferring the substance of power to the style. A stern-faced, salty sailor, his U.S. Navy career had begun as a

Object ID	Title	Author	Summary
			cadet aboard a sailing ship. Four decades later, Admiral Leahy was a trusted friend and advisor to the president and his ambassador to Vichy France until the attack on Pearl Harbor. Needing one person who could help him grapple with the enormous strategic consequences of the war both at home and abroad, Roosevelt made Leahy the first presidential chief of staff--though Leahy's role embodied far more power than the position of today. Leahy's profound power was recognized by figures like Stalin and Churchill, yet historians have largely overlooked his role. In this important biography, historian Phillips Payson O'Brien illuminates the admiral's influence on the most crucial and transformative decisions of WWII and the early Cold War. From the invasions of North Africa, Sicily, and France, to the allocation of resources to fight Japan, O'Brien contends that America's war largely unfolded according to Leahy's vision. Among the author's surprising revelations is that while FDR's health failed, Leahy became almost a de facto president, making decisions while FDR was too ill to work, and that much of his influence carried over to Truman's White House. The education of naval officer -- Building a career and family -- Enter Franklin Roosevelt -- The roaring twenties -- Depression -- Nearing the top -- Rising in Roosevelt's court -- Leahy's navy -- The first retirement -- Governor of Puerto Rico -- Ambassador to Vichy France -- Dark days -- Chief of staff to the Commander in Chief -- Chairman of the Joint Chiefs -- The grandest level of strategy -- From Casablanca to Trident -- Difficult friends -- Top dog -- Cairo and Tehran -- Acting president -- Leahy's war -- Atomic bombs and elections

			in the Central Pacific that the majority of Fleet Marine Force units saw action. Many of the senior officers among the prewar teachers and planners were the commanders who led the forces afloat and ashore in the Gilberts, Marshalls, and Marianas
2019.363.002	History of U.S. Marine Corps Operations in World War II, Vol. 5 : Victory and Occupation	Frank, Benis M.	Also available as a .pdf at K:\Emanuals\2019.317.007 These pages cover Marine Corps activities in the Okinawa invasion and the occupations of Japan and North China as well as the little-known story of Marine prisoners of war. The book relates the Corps' postwar demobilization and reorganization programs as well. This book presents an overview of the salient facts concerning Marine Corps campaigns in the Pacific War first discussed in the previously published volumes of this series.
2019.363.003	History of U.S. Marine Corps Operations in World War II, Vol. 4 : Western Pacific Operations	Garand, George W.	Also available as a .pdf at K:\Emanuals\2019.317.006 The period covered by this history, essentially from mid-September 1944 to late March 1945, covers the continuation of the United States drive from the Central Pacific to the Western Carolines and the Volcano-Bonin Islands at the very doorstep of Japan. The military operations describe in detail two of the major amphibious campaigns in the Western Pacific, Peleliu and Iwo Jima. In addition, the little-known exploits of Marine artillery and air in the Philippines and the accomplishments of Marine flying squadrons in the reduction of enemy positions in the Central and Western Pacific are covered.
2019.363.004	History of U.S. Marine Corps Operations in World War II, Vol. 2 : Isolation of Rabaul	Shaw, Henry	Also,available as a .pdf at K:\Emanuals\2019.317.004 This book, the second in a projected five-volume series, continues the comprehensive history of Marine Corps operations in World war II. 2019.363.005	History of U.S. Marine Corps Operations in World War II, Vol. 1 : Pearl Harbor to Guadalcanal	Hough, Frank O.	Also available as a .pdf at K:\Emanuals\2019.317.003 This book is the first of a projected 5 volume series covering completely, and we hope definitively, the history of Marine operations in WWII. Vol. 1 sketches briefly the development of the Marine Corps' amphibious mission from its inception and then carries the story of WWII through Guadalcanal.
2019.363.006	Marines and Helicopters, 1962-1973	Fails, William R.	Also available as a .pdf at K:\Emanuals\2019.317.008 FOREWARD: This history traces the development of helicopters in the Marine Corps from 1962 to 1973 and is the second in a series of two volumes which between them cover the story of Marines and helicopters from 1946 to the present. In the period covered by this volume, the Marines at last acquired helicopters fully capable of carrying out an amphibious vertical assault, and they further elaborated their helicopter doctrines and tactics. In the Vietnam war, pilots and machines met and surmounted the test of actual combat. The documentary basis for this monograph was primarily the official records of the Marine Corps and Navy Department, but considerable use was made of interviews and correspondence with key individuals involved in all phases of helicopter development. The author, Lieutenant Colonel William R. (Bob) Fails, USMC (Ret), received his Bachelor of Arts degree in English from Hiram College, Hiram, Ohio, and his Master of Business Administration in Financial Management from The George Washington University, Washington, D.C. His Marine Corps aviation experience includes tours with fixed-

			wing fighter and attack squadrons, as a flight instructor, and as a helicopter pilot and aircraft maintenance officer. He served in Vietnam in 1965-66 with HMM-263 and again in 1970-71 as S-4 of MAG—16 and facility manager for Marble Mountain Airfield. He came to the History and Museums Division in 1973 from the 34th MAU in the Mediterranean, in which he had been Executive Officer. Now retired, Lieutenant Colonel Fails resides and works in Tempe, Arizona. Comment copies of the manuscript for this volume were sent to many individuals involved with both the conceptual and operational aspects of Marine helicopter development. In association with Lieutenant Colonel Fails, Dr. Graham A. Cosmas incorporated these comments and edited the manuscript for printing. Dr. Cosmas received his PhD degree in history from the University of Wisconsin and joined the staff of the History and Museums Division in December 1973 after teaching at the University of Texas and the University of Guam. The History and Museums Division welcomes any comments on the narrative and additional information or illustrations which might enhance a future edition.
2019.363.007	U.S. Marines In Vietnam : The Advisory & Combat Assistance Era, 1954-1964	Whitlow, Robert H.	Also available as a .pdf at K:\Emanuals\2019.317.010 From the Foreward -- "This is the first of a series of nine chronological histories being prepared by the Marine Corps History Division to cover the entire span of Marine Corps involvement in the Vietnam conflict. This particular volume covers a relatively obscure chapter in U.S. Marine Corps history--the activities of Marines in Vietnam between 1954 and 1964. The narrative traces the evolution of those activities from a one-man advisory operation at the

Object ID	Title	Author	Summary
			conclusion of the French-Indochina War in 1954 to the advisory and combat support activities of some 700 Marines at the end of 1964. As the introductory volume for the series this account has an important secondary objective: to establish a geographical, political, and military foundation upon which the subsequent histories can be developed. third volume in a planned 10-volume operational and chronological series covering the Marine Corps' participation in the Vietnam War. A separate topical series will complement the operational histories. This particular volume details the buildup in 1966 of the III Marine Amphibious Force in South Vietnam's northernmost corps area, I Corps, and the accelerated tempo of fighting during the year. The result was an 'expanding war.' The III Marine Amphibious Force had established three enclaves in I Corps, during 1965. Employing what they believed was a balanced strategy--base defense, offensive operations, and pacification--the Marines planned to consolidate their base areas in 1966. At the beginning of 1966, the 1st Marine Division reinforced the 3rd Marine Division and the 1st Marine Aircraft Wing in Vietnam. By the end of the year, the III Marine Amphibious Force had nearly doubled in size. Two separate events, however, were to dash the high hopes held by the Marines in 1966. An internal political crisis in the spring halted the Marine pacification campaign south of the large Da Nang Airbase. In July, the North Vietnamese Army launched an incursion through the Demilitarized Zone and Marines went north to counter the thrust. By December 1966, Marine units were stretched thin along the 265 mile length of I Corps. As one Marine commander observed, 'too much real

On the morning of March 1, 1942, the WWI-era destroyer USS Edsall--under orders to deliver some forty Army Air Force fighter crews to the beleaguered island of Java--split off from the USS Whipple and the tanker Pecos and was never seen again by Allied forces. Despite the later discovery of bodies identified as Edsall crewmembers near a remote airfield on the coast of Celebes, what happened to the ship remains a matter of mystery and, perhaps, deliberate obfuscation. This book explores the many puzzling facets of the Edsall's disappearance in order to

Object ID	Title	Author	Summary
			finally tell the full story of the fate of the vessel and her crew. Based on exhaustive research of the historical record--including newly deciphered Japanese documents and previously unrevealed material from the crew's family members--Upon a Blue Sea of Blood offers a painstaking reconstruction of the ship's history. The book investigates not only the Edsall's mysterious final action, but also her wide-ranging pre-war career and the curious uses to which her story was put--generally under false pretenses--first by the pre-war U.S. Navy and then by the Japanese wartime propaganda machine. And finally, military historian Donald Kehn considers the circumstances surrounding the curious obscurity of the Edsall's heroic service and final battle in American histories. Redressing six decades of official indifference, Kehn's account recovers a significant chapter missing from the history of World War II--and tells a long-overdue story of courage and tragic loss.
2019.368.002	Intelligence in War : Knowledge of the Enemy from Napoleon to al-Qaeda	Keegan, John	In fiction, the spy is a glamorous figure whose secrets make or break peace, but, historically, has intelligence really been a vital step to military victories? In this breakthrough study, the preeminent war historian John Keegan goes to the heart of a series of important conflicts to develop a powerful argument about military intelligence. In his characteristically wry and perceptive prose, Keegan offers us nothing short of a new history of war through the prism of intelligence. He brings to life the split-second decisions that went into waging war before the benefit of aerial surveillance and electronic communications. The English admiral Horatio Nelson was hot on the heels of Napoleon's fleet in the Mediterranean and never knew it, while Stonewall Jackson was able to

			compensate for the Confederacy's disadvantage in firearms and manpower with detailed maps of the Appalachians. In the past century, espionage and decryption have changed the face of battle: the Japanese surprise attack at the Battle of the Midway was thwarted by an early warning. Timely information, however, is only the beginning of the surprising and disturbing aspects of decisions that are made in war, where brute force is often
2019.368.003	Hitler's Miracle Weapons : Secret Nuclear Weapons of the Third Reich and Their Carrier Systems	Georg, Friedrich	How close did Hitler come to his dream of developing nuclear weapons? What evidence is there for the design, testing and production of such weapons, and their carrier systems? With this first volume in a series of at least three, Friedrich Georg has begun to answer these questions in great detail. The result is a groundbreaking new book on this topic. This first volume describes the efforts of the Luftwaffe and Kriegsmarine to design and produce carrier-systems for the nuclear weapons the scientists of the Third Reich were developing. Following an introductory section in which the author outlines the Nazi atom bomb programme, Georg then investigates the enormous variety of craft the Luftwaffe began to either adapt, or develop anew, that would be used to carry such weapons of mass destruction. These included the search for an intercontinental 'Amerikabomber', including the innovative Horten Ho XVIII. Lighter designs, such as the Arado Ar E 555, Messerschmitt P 1107 & 1108, and Junkers EF 132 & 140 are also described. The various atom bombs themselves are thoroughly investigated, from the 1-ton to the massive 30-ton variety. Information about the variety of carrier systems being developed- and in at least one case, actually built-by the Kriegsmarine is also

Object ID	Title	Author	Summary
			provided. Finally, the author investigates the reasons why Germany ultimately failed to produce the atom bomb. Appendices provide the most up-to-date research on a variety of topics, including the small number of craft Japan was developing to carry atom bombs, and the Soviet capture of German nuclear research centres in the Baltic region at the end of the war. Throughout, the author is keen to only rely on the most reliable sources, and lays many myths to rest in the process. The result is a truly compelling and
2019.368.004	Navy SEALs : A History, Part I - The Early Years	Dockery, Kevin	For the first time with the full cooperation of the UDT/SEAL Museum Association in Florida, author Kevin Dockery has compiled the most in-depth and revealing history of the U.S. Navy SEALs—from their roughshod origins as the daring Underwater Demolition Teams, Scouts, and Raiders of World War II, to the formation of the modern fighting force known as Navy SEALs. Illustrated with archival photos throughout, and supplemented with in-depth interviews with veteran UDT divers and SEAL personnel, this book chronicles the formation of an elite fighting force unsurpassed in combat on land, air, or sea—and captures the spirit of those rare men who make up the finest fighting force in the world. 2 volume boxed set with gold embossed Navy Seal emblem on the side of the box; box has faux leather cover. (from Amazon.com)
2019.368.005	Navy SEALs: A History, Part II - The Vietnam Years	Dockery, Kevin	They are the most dangerous weapon in the United States military arsenal. Trained to endure any hardship, overcome any obstacle, and conquer any adversary to accomplish their objectives, they are the warrior elite. They are the Navy SEALs.

Object ID	Title	Author	Summary
			This is the second volume chronicling the history of the Navy SEALs, with true stories of valor and sacrifice as told by the men who were there. Full of exclusive eyewitness accounts of life as a SEAL in and out of combat, this book continues the story of an elite fighting force- and reveals the nature of those rare men who make up the Navy SEALs. Complemented by an array of archival photographs and in-depth interviews with veteran SEAL personnel, a second volume in the comprehensive history of the U.S. Navy SEALs continues the story of the elite fighting force and their exploits during the Vietnam War. 2019.372.001	Indianapolis : The True Story of the Worst Sea Disaster in U.S. Naval History and the Fifty-year Fight to Exonerate an Innocent Man	Vincent, Lynn	Just after midnight on July 30, 1945, days after delivering the components of the atomic bomb from California to the Pacific Islands in the most highly classified naval mission of the war, the USS Indianapolis is sailing alone in the center of the Philippine Sea when she is struck by two Japanese torpedoes. The ship is instantly transformed into a fiery cauldron and sinks within minutes. Some 300 men go down with the ship. Nearly 900 make it into the water alive. For the next five nights and four days, almost three hundred miles from the nearest land, the men battle injuries, sharks, dehydration, insanity, and eventually each other. Only 316 will survive. For the better part of a century, the story of USS Indianapolis has been understood as a sinking tale. The reality, however, is far more complicated. Following a decade of original research and interviews with 107 survivors and eyewitnesses, Lynn Vincent and Sara Vladic tell the complete story of the ship, her crew, and their final mission to save one of their own. The survivors fight for fifty years on behalf of their skipper, Captain Charles McVay III, who is wrongly court-martialed for the sinking. The courtroom drama weaves through generations

Object ID	Title	Author	Summary
			of American presidents, from Harry Truman to George W. Bush, and forever entwines the lives of three captains: McVay, whose life and career are never the same after the scandal; Mochitsura Hashimoto, the Japanese sub commander who sinks Indianapolis but later joins the battle to exonerate McVay; and William Toti, the captain of the modern-day submarine Indianapolis, who helps the survivors fight to vindicate their captain. Prologue: The ship -- The kamikaze -- The mission -- The deep -- Trial and scandal -- An innocent man -- Final log entry: August 19, 2017.
2019.373.001	From Mothballs to Magic : How the USS Midway Became the World's Favorite Aircraft Carrier	McGaugh, Scott	Chronicle's the life of USS Midway (CV-41) from the 'Second Battle of Midway,' the effort to get an aircraft carrier to San Diego for use as a museum to its current (2019) status as the world's most visited afloat museum and the number Five rated museum in the U.S.
2019.374.001	Battle of the Coral Sea, The	Millot, Bernard	The Battle of the Coral Sea called the first successful halt to the vast military expansion of the Japanese. Its outcome and its results gave an invaluable psychological stimulus to the allies and at the same time delivered a blow to Japanese pride. The former realised that the hour of victory was at hand; the latter that their frenzied hegemony must have its limits. For these reasons alone, this encounter in the Coral Sea would deserve greater study but its interest goes even further in that it was an entirely new type of battle. It took place 'below the horizon', for at no point did the opposing vessels sight one another but acted solely through the agency of the aircraft they carried. This was a technical aspect which was to give the Pacific conflict its unique character since its consequences decisively contributed to the decline of the battleship as a capital ship in favour of the aircraft carrier. Bernard Millot, a

Object ID	Title	Author	Summary
			distinguished French naval historian tells his story in fascinating detail and looks closely into the strategic, psychological and technical aspects of this first evenly balanced encounter between the Japanese and the Allies in the Second World War. His text is enhanced by numerous maps and some excellent photographs taken during the course of the actual battle.
2019.374.002	Carrier Operations	Marolda, Edward J.	"Edward Marolda has provided a readable and concise history of carrier operations in the South China Sea during the Vietnam war. Every page has one or more photographs that brings home the text. There are stunning nuggets of information in there such as the time Navy pilots from Task Force 77 discovered a train near Hanoi loaded with 200 SAMs. They were more than shocked to find out that under the Johnson-McNamara Rules of Engagement (ROE) they were not allowed to destroy the missiles. Seems that under the ludicrous ROE aircrew had to hold off until the missiles were actually shot at them before they could destroy the site." (from Amazon.com)
2019.374.003	No Bended Knee : The Battle for Guadalcanal : The Memoir of Gen. Merrill B. Twining USMC (Ret.)	Twining, Merrill B.	From Foreword: This book focuses in the Marine Corps operations in the battle for Guadalcanal. The written record, the 1st Marine Division's after-action report, was destroyed at the direction of Maj. Gen. Alexander A. Vandegrift, when he believed it was likely his division would have to withdraw to the center of the island for a last-ditch fight. General Bill Twining wrote that report while recovering from malaria in Australia. General Twining sets the historical record straight in this book by telling the Marines' Guadalcanal story in all its painful reality. Twining tells the bitter stories

Object ID	Title	Author	Summary
			without emotion. He paints an eloquent picture of Marines--on half-rations, emaciated and plagued by malaria--taking on the best the emperor had to offer as they defended precious Henderson Field. And he describes with unrestrained admiration the heroism of the Marine, army and navy pilots who, flying patched-up planes, took to the air daily and triumphed against fearful odds. Thanks to Bill Twining's diligence and persistence, nobody will ever again be able to lament that Guadalcanal has not been given its deserved place in the pages of history.
2019.374.004	Death of the Battleship : The Tragic Close of the Era of Sea Power	Hough, Richard	THE SHIPS THAT HAD TO DIE ...lay in Pearl Harbor, their crews unaware of their fate. For in America, as in all the western nations, military strategy decreed that the battleship was unsinkable. Test after test proved the battleship could be destroyed by the torpedo, the submarine, and above all, the airplane. Yet tradition, power politics, inter-service jealousies and sheer stupidity blinded the military leaders to the facts. Only Japan understood the importance of new weapons. She developed the finest torpedo planes the most powerful bombers in the world, destroyING the battleship with ease first in Pearl Harbor and finally, and decisively, in the Gulf of Siam, where the Japanese Air Force sank the "invincible" dreadnaughts Repulse and Prince of Wales in less than two hours. "...the battle is described in magnificent, minute-by-minute detail." National Observer (from the back cover)

2019.374.007	Devotion to Duty : Biography of Admiral Clifton A. F. Sprague	Wukovits, John F.	Sprague held the line., March 24, 2008 By David C. Nilsen (Radcliff, KY United States) When Kurita's battleships and cruisers appeared above the horizon, any sane naval officer knew that he was done.... Except that sane naval officers knew they had to hold off the enemy by any means at their disposal. And Clifton Sprague had the guts to bluff and fight and charge and bludgeon the Japanese..... until they broke and ran. In the face of the biggest battleship in existence and all of her fellow battleships and

Object ID	Title	Author	Summary
			cruisers, Clifton Sprague's baby aircraft carriers and tiny destroyers and destroyer escorts roused themselves and attacked--and won. They had no excuse to win, no excuse except audacity and courage and sheer toughness... But they won. Most of them died, pushing their audacity in the face of the Japanese battleships and cruisers, but they won. This is their story, and the story of the sort of man who could lead them, even if his story receded into the untold recesses of history that you didn't know until you read this book. "Ziggy" Sprague rules. Anyone who doesn't know it can choke. This is the story of "Ziggy" Sprague, and how his little collection of lightweights beat the biggest collection of heavyweights in 20th Century history...no kidding. You want to be proud to be an American? Read this book. Or else just die. These men didn't just die. They won. (from Amazon.com)
2019.374.008	Naval Aviation Guide, The	Cagle, Malcolm W.	This book covers Naval Aviation --Its mission and its future; Naval Aviation Training; History and tradition of Naval Aviation; Leadership; Operational matters; Aviation Safety; Naval aviation squadrons; shipboard life; Naval air organization; Aviation supply; Aerospace medicine; Aviation career information; Naval Flight Officer (NFO); Squadron Duty Officer and the SDO Log; Naval Air Reserve Program; Naval Aviation identification systems; U. S. Naval ships and aircraft; Naval aviation handling signals; Survival data, and Squadron nicknames.
2019.374.010	My Taking Flight : A Life Story of My Love of Flying	Caswell, Dean	This book is the story of Dean Caswell. It starts with a nineteen-year-old young man, fresh out of high school,

Object ID	Title	Author	Summary
			made his way from Texas to California to "seek his fortune" in the aircraft industry; how he work up one morning after a night on the town to find himself recruited for the marine corps; and how that led to a 27 year career in the service. Dean Caswell takes the reader along with him as he learns to fly in biplane trainers, through World War II aerial combat in the mighty F4U Corsair, to jet fighter-bombers in the Korean War, finally finishing with the supersonic F-4B Phantom II. His flight logbooks reflect 51 different military and civilian aircraft types and ten thousand or so hours of flight time. This is the personal story of a dedicated Marine fighter pilot and "ace" -- one of less than three percent of all American fighter pilots to shoot down five or more enemy aircraft--From the Introduction. The Appendix includes a list of the airplanes that Caswell flew.
2019.374.011	Vought A-7 Corsair II	Dorr, Robert F.	Inside the front cover are 32 decals of squadrons who flew the Corsair. This is the first major work to be devoted to Vought's hard-hitting A-7 Corsair II attack jet. Despite an enviable combat record in Vietnam, the ultimate accolade of being selected by the US Navy and the Air Force, the subsonic A-7 has somehow been side-stepped by writers and publishers. Author Robert Dorr has written a penetrating, absorbing, and highly detailed 200 page record of the SLUF's story, a career highlighted by the airplane's involvement in Vietnam, the Iranian hostage crisis, the invasion of Grenada, and yet more combat in Lebanon. The text also includes a revealing account of the genesis and scope of the Corsair programme, a full description of every variant (including rebuilds and conversions), and the Corsair in service with Navy, Air Force, and Air National Guard squadrons. Illustrated with over 160 BW photographs and 12

Object ID	Title	Author	Summary
			photographs in full colour. The text contains approximately 50,000 words; a glossary, comprehensive appendices and an index are included.
2019.374.012	U.S. Naval Aviation at War - 1943	Flying	This is a special issue of Flying magazine that was founded by Ziff Davis in 1943. This issue (February 1943) covers U.S. Naval Aviation at War....1943. The issue tries to describe Naval aviation activities during the past year and a half.
2019.374.013	History of the USS Cabot (CVL-28) : A Fast Carrier in World War II	Hudson, J. Ed	Veterans who served on the Cabot remain proud of their ship which saw action from the Marshall Islands invasion in January 1944 to the battle at Okinawa in April 1945. At that point, the ship received a much-needed overhaul in San Francisco. She was steaming back across the Pacific to help invade Japan when the war ended. Despite the CVL's small size, they more than held their own with the larger Essex type fast carriers on a plane to plane ratio. The USS Cabot was credited with 252 enemy aircraft shot down by Air Groups 29 and 31, eight destroyed by AA batteries, 96 destroyed on the ground and 265 vessels hit by torpedoes or bombs from the air groups.
2019.374.014	Convoy : Merchant Sailors at War, 1939-1945	Kaplan, Philip	The men of the American, British, and Canadian merchant marine are the forgotten heroes of the long and costly Battle of the Atlantic. From their first casualty in September 1939 to the last on VE Day in May 1945, nearly 50,000 men of the Allied merchant service lost their lives to Axis torpedoes, bombs, and guns. This stunning portrait, first published in 1998, pays tribute to their all-important role. In both words and pictures, the book calls attention to the men who won this victory. Rare photographs, paintings, and memorabilia convey an impression of the dangers faced by the seamen in the stormy North Atlantic, the ice-fields of North Cape and the Barents

Object ID	Title	Author	Summary
			Sea, and the vast expanses of the Pacific. The text draws on unpublished memoirs of the men who sailed in the convoys, including those who survived days adrift in lifeboats and faced U-boat torpedoes and Luftwaffe bombs. Convoys were the lifeline of the Allied war effort, and this account is an evocative and moving reminder of just how much we owe the ordinary seaman. Amazon.com Review An often overlooked aspect of World War II was the battle waged night and day by those who served not on warships, but on merchant ships pressed into wartime duty. Convoy: Merchant Sailors at War puts a sharp focus on merchant sailors from the British Merchant Navy, the American Merchant Marine, and the Canadian Merchant Navy, and through copious use of photographs, paintings, wartime posters, and maps, tells the story of the merchantmen who fought the epic Battle of the Atlantic. The survival of the Allies depended on supplies flowing from North America to Europe; the desperation of the early years of the war, and the story of how the tide was slowly turned, is well presented in the book. As the coauthors are both British, the book tends to focus on English sailors, but the personal accounts of veterans of wartime merchant service transcends national boundaries. Life onboard the ships is well documented, and of particular interest is a photographic tour of the Jeremiah O'Brien, an American Liberty Ship which has been restored to its wartime condition. The text is organized thematically, dealing with particular classes of ships as well as with particular aspects (such as the role of air cover) of the Allied campaign to sweep the oceans of the dreaded U-boats. --Robert McNamara --This text refers to the Hardcover edition.

Object ID	Title	Author	Summary
2019.374.016	Some Early Birds : The Memoirs of a Naval Aviation Cadet, 1935-1945	Hill, Joe	These are stories about Navy and Marine pilots who trained as Aviation Cadets before World War II. Their history began in April 1935 when Congress passed Public Bill 37, creating a new rank in the Navy and appropriating funds for their flight training. Applicants for this cadet program were educated during the Great Depression, and most of them worked and saved to help pay for their schooling. They came from every State in the union, and most of them were college graduates. They were the cream of young American manhood and very near physically perfect. They had great visual acuity and precise depth perception. They were hardy, quick-witted, intelligent, and had the spirit to accept most any challenge. They had one common thread, "A burning and intense desire to learn how to fly."
2019.374.017	Technicians' War : Picture Story of Naval Air Technical Training Command	Naval Air Technical Command	The unending tasks of maintaining air power depend on the technicians of war. For every plane in Naval Aviation ten to twenty technicians are needed to perform the many duties commensurate with flight. Planes can be put out of action faster than they can be made and shipped out to the far flung combat areas. They get back into action because of the ingenuity and training of technicians who in this war have contributed immeasurably to putting the punch, the bit, the sting in Naval Aviation. Afloat and ashore, the technicians' war is a never-ending battle for mechanical precision and accuracy. Total victory lies in assuring that the products of American industry function properly at the right time in the right place.
2019.374.018	U.S. Marine Operations in Korea, 1950-1953, Vol. 5 : Operations in West Korea	Meid, Pat	This is the concluding volume of a five-part series dealing with operations of United States Marines in Korea between 2 August 1950 and 27 July 1953. Volume V provides a definitive account of operations of the 1st Marine Division and the 1st

2019.374.029	USS Enterprise, The : In Detail & Scale	Kinzey, Bert	USS Enterprise (CVN-65) nuclear-powered aircraft carrier. Includes : A-4 SKYHAWK; F-14 TOMCAT; F/A-18 HORNET; A-7; A-6E TRAM; CVW-11; S-3A VIKING; E-2C

Object ID	Title	Author	Summary
			HAWKEYE; SH-3H SEA KING;
2019.374.030	U.S.S. Abraham Lincoln	Smith, Barry D.	This is a photographic history of the USS Abraham Lincoln, CVN-72.
2019.374.032	USS John F. Kennedy : In Detail & Scale	Kinzey, Bert	Includes coverage of Carrier Air Wing Three. From bow to stern, and from the top of the mast to the features below the waterline, all of the ship's details are covered with extensive photography. A record of the ship's history is also presented, and changes made during yard periods and overhauls are illustrated.
2019.374.033	My Taking Flight : A Life Story of My Love of Flying	Caswell, Dean	This book is the story of Dean Caswell. It starts with a nineteen-year-old young man, fresh out of high school, made his way from Texas to California to "seek his fortune" in the aircraft industry; how he work up one morning after a night on the town to find himself recruited for the marine corps; and how that led to a 27 year career in the service. Dean Caswell takes the reader along with him as he learns to fly in biplane trainers, through World War II aerial combat in the mighty F4U Corsair, to jet fighter-bombers in the Korean War, finally finishing with the supersonic F-4B Phantom II. His flight logbooks reflect 51 different military and civilian aircraft types and ten thousand or so hours of flight time. This is the personal story of a dedicated Marine fighter pilot and "ace" -- one of less than three percent of all American fighter pilots to shoot down five or more enemy aircraft--From the Introduction. The Appendix includes a list of the airplanes that Caswell flew.
2019.374.034	Aircraft Aircraft	Taylor, John W. R.	From bird-men in chicken-feather wings to spacemen in capsules, this is the story of how man struggled for years and finally managed to get himself off the ground; to take off... and fly. It is the enthralling story of a succession of bizarre machines, and how they took shape.

Object ID	Title	Author	Summary
			Still more, it is the story of strange exiles, the men themselves who for countless generations fought with an invisible enemy--the sky; how they tried to fly, and died trying; how they tried again, got aloft and crashed, and got up again, and stayed up.
2019.376.001	Modern Military Aircraft Anatomy : Technical Drawings of 118 Aircraft, 1945 to the Present Day	Eden, Paul	Technical drawings of 118 aircraft, 1945 to the present day. Full specifications for each aircraft include dimensions, powerplant, weight, performance and armament.
2019.376.002	World's Great Attack Aircraft, The	Wilkinson, Roy (ed)	"The World's Great Attack Aircraft is an in-depth examination of this select collection of aircraft, highlighting their strengths with copious colour and black and white photographs, line drawings, squadron markings and featuring each 'plane in a sumption fold-out spread. From the primitive but brutally effective Sukhoi Su-7 to the state-of-the-art Panavia Tornado IDS the 20 strikers included in Attack Aircraft are accompanied by performance data, cutaway diagrams and warload profiles. The powerful combination of features authoritatively reveals what makes these aircraft great." (from dust jacket flap) Replaces 2015.338.002.
2019.376.004	Punk's War	Carroll, Ward	A novel about a a F-14 aviator--the book reveals the inner workings of the U.S. Navy as only an insider can.
2019.376.005	Best of Broadside, The : A Humorous Look at Life in the Navy	Bacon, Jeff	Cartoons of Navy life reprinted from Navy Times.
2019.376.006	50 Famous Fighter Aircraft	Groh, Richard	A history of fighter plane development.
2019.376.007	Roger Ball! : The Odyssey of John Monroe "Hawk" Smith, Navy Fighter Pilot	Auten, Donald E.	Roger Ball! is a magnificent read about a great and distinguished life well lived. John Monroe Smith is a living legend in Naval aviation: an all-American boy living his dream, a dream of becoming the best fighter pilot and carrier aviator in the Navy. He succeeded in

Object ID	Title	Author	Summary
			being the best in a way that only one with unbridled passion, fierce commitment, boundless energy, unconditional dedication and relentless resolve can experience.-Ed Allen, Rear Admiral, USN (Retired)In the wake of the hard lessons of the Vietnam War, a pantheon of committed naval aviators struggled valiantly to modernize fighter aircraft and overhaul tactics. It was a seemingly titanic task marked by political intrigue, doctrinal apoplexy, and sadly, petty politics.This is the personal story of one of those naval aviators, Captain John Monroe "Hawk" Smith. It chronicles his growth as a naval officer, his seasoning as a fighter pilot, and his hardening as a commanding officer. It tells of the raw courage of naval aviators and captures the visceral loyalty, unswerving commitment, and the unsinkable camaraderie that is the brotherhood of naval aviation.Roger Ball! is a seven-g, heart-in-the-throat story of the very unforgiving profession of naval aviation. From the Publisher "Roger Ball!" straps the reader to a high-G odyssey and catapults him into the life of John Monroe "Hawk" Smith—Navy fighter pilot. It captures the adventures and hardships of deployment, the pressures of command, and the unforgiving and very lethal nature of tactical flying. "Roger Ball! heralds the disciples of fighter doctrine, the inauguration of TOPGUN, and articulates the monumental success it had in resurrecting the Navy's air dominance during the Vietnam War. "Roger Ball!" traces the selfless sacrifices of Hawk and other key fighter crews in developing the world's deadliest fighter—the Grumman F-14 Tomcat. Finally, it captures the spirit, the commitment, and personal sacrifices of the men and women of naval aviation.

Object ID	Title	Author	Summary
			"Roger Ball!" is a highly personal story of an extraordinary fighter pilot set during one of the most tumultuous times in naval fighter aviation. All those who also have been there and all those who have a desire to understand life as a Navy fighter pilot will savor the telling of Hawk's story. --This text refers to the Hardcover edition. (from Amazon.com)
2019.376.008	Ships of the United States Navy and Their Sponsors, 1958-1990	Jackson, Mary-lin Moore	FOREWORD: THROUGHOUT HISTORY new weapons have often been heralded as the ultimate weapon that will sweep surface ships from the seas. This is an old story to sailors. In the 19th Century, it was the rifled gun; then it was the torpedo, the submarine, the airplane and now the H-bomb. Sailors have never underestimated these new weapons. But rather than spelling the doom of navies, these powerful new weapons invariably have added to the strength of seapower. Your Navy has changed a great deal since Volume 3, Ships of the United States Navy and Their Sponsors, appeared in 1950. By the time Volume 5 appears, there will be even more change. While the ships and their design may become radical in today's terms, they will be more effective tools with which to maintain control of the seas. In this nuclear-missile age, mobile forces are becoming more and more important. The fixed military installations are likely targets in the initial stages of a war. Mobility is important now and its importance will increase as better missiles are developed. Nuclear power in our ships of the future will give our forces more mobility. Our forces at sea will be able to stay at sea longer and cruise faster without our

Object ID	Title	Author	Summary
			former concern for fuel. Our forces at sea no longer resemble the tight formations used during the last war. We have spread out, moved the ships far apart; this way we improve our defense against attack. Even if hit, which would be hard for an enemy to do, we still would not lose more than a ship or two. By spreading our ships out we also provide a defense in depth. Should an enemy try to get our attack carriers he would have to fly through many rings of defense. The outer ships would provide warning long before the enemy came within reach of our force. He would be instantly attacked by our fighter aircraft. If he managed to get by them, our missile firing destroyers and cruisers would go to work on him. The missiles we have on these ships are good and we have had excellent results with them. By the time the enemy had arrived at the place he thought the carriers were they would have dispersed even more. The advent of new weapons is not a cause for concern about their adverse effects upon the future of the United States Navy—on the contrary, they are a source of ever-increasing strength to our forces afloat.

2019.376.011	Women Sailors and Sailors' Women : An Untold Maritime History	Cordingly, David	Recent studies have shown that a surprising number of women went to sea. Some traveled as the wives or mistresses of captains. A few were smuggled aboard by officers or by seamen of the lower deck. And increasing number of cases have come to light of young women dressing men's

Object ID	Title	Author	Summary
			clothes and working alongside the sailors for months and sometimes years on end. With a few exceptions the scope of the book has been limited to the seafarers and their women on both sides of the North Atlantic and in particular to those based on the principal ports of Britain and the United States.
2019.379.001	Spectrum, Special, 1975	Harlow, Bill (ed)	Vern Jumper needed a copy of this, and since we have a shelf copy AND a digital copy in newsletters, I gave him this one on March 2, 2020. Vern was the Air Boss during OFW on the Midway. A special issue of "Spectrum", USS Midway's bimonthly publication, covering Midway's participation in Operation "Frequent Wind". (SPECTRUM is an official bimonthly publication of the USS Midway Public Affairs Office.) Includes texts of congratulatory letter/messages from President Ford, Henry Kissinger, et al.
2019.381.001	B-25 Mitchell	Pace, Steve	The North American B-25 "Mitchell" Bomber was one of the most versatile and widely used aircraft and considered the best medium bomber of the Second World War. Over 11,000 were produced with a wide number of variations and armament configurations. The short-field takeoff and landing characteristics of the B-25, its ruggedness, ease of maintenance under primitive combat conditions, and the ease with which field modifications could be made to meet each combat-group's unique needs, resulted in the B-25 eventually replacing the Martin B-26 Marauder as the standard medium bomber in the Pacific. Many U.S. allies around the world ordered the B-25J. With all of these attributes, it is not surprising that the B-25 remained in service for many years after the war, serving both military and civilian needs. During the course of World War II, throughout the Mediterranean Theatre of Operations (which

Object ID	Title	Author	Summary
			encompassed some 7500 square miles of enemy air space), five USAAF medium-class bomb groups and their 20 bomb squadrons used their allotments of B-25 Mitchell aircraft to perfection. From low-altitude strafing to high-altitude bombing runs, the B-25s in the MTO proved themselves to be a most successful brood of combat aircraft. This volume includes first-hand accounts.
2019.381.002	B-25 Mitchell in Action	McDowell, Ernest R.	A good overview of the service of the B-25 medium bomber, full of pictures and illustrations showing the various models used in and after WWII. History of medium bomber, its variants, and combat actions

Object ID	Title	Author	Summary
			August 1944-March 1945 ; Eastern approaches : August 1943-May 1945 ; The land of the setting sun : October 1944-September 1945. ----- The Second World War lasted for 2,174 days, cost \$1.5 trillion, and claimed the lives of more than 50 million people. What were the factors that affected the war's outcome? Why did the Axis lose? And could they, with a different strategy, have won? Andrew Roberts' acclaimed new history has been hailed as the finest single-volume account of this epic conflict. From the western front to North Africa, from the Baltic to the Far East, he tells the story of the war - the grand strategy and the individual experience, the cruelty and the heroism - as never before. In researching this magnificently vivid history, Roberts walked many of the key battlefields and wartimes sites in Russia, France, Italy, Germany, and the Far East, and drew on a number of never-before-published documents, such as a letter from Hitler's director of military operations explaining the reasoning behind the Fuhrer's order to halt the Panzers outside Dunkirk - a delay that enabled British forces to evacuate. Roberts illuminates the principal actors on both sides and analyzes how they reached critical decisions. He also presents the tales of many little-known individuals whose experiences form a panoply of the extraordinary courage and self-sacrifice, as well as the terrible depravity and cruelty, of the Second World War. Meticulously researched and masterfully written, The Storm of War gives a dramatic account of this momentous event and shows in remarkable detail why the war took the course it did.

2019.390.002	Blood, Tears, and Folly : An Objective Look at World War II	Deighton, Len	The author of City of Gold here takes a pragmatic look at the early years of WW II, ``that complex and frightening time in which evil was in the ascendant, goodness diffident, and the British--impetuous, foolish and brave beyond measure--the world's only hope." His absorbing narrative concentrates on six major phases of the period: the Battle of the Atlantic (U-boats versus convoys); Hitler's blitzkrieg victories in Western Europe and the Dunkirk evacuation; the tank battles between the British and the Germans in the Western Desert; the struggle between the Luftwaffe and the Royal Air Force for command of the air; the German invasion of Russia; and the complex combination of events and hardening attitudes that led to the Japanese attack on Pearl Harbor. Deighton pays close attention to Winston Churchill's thorny relations with his generals, and is especially critical of the British failure to prepare for an attack in Malaya, since the peninsula's rubber and tin made it an obvious target. Americans are largely absent from the narrative, but Deighton comments on U.S. isolationism and adds a stirring tribute to Air Corps General Henry Arnold for his foresight in organizing a pilot-training network before Pearl Harbor. 			strategic airfield on the island of Guadalcanal. Their battlefield will earn the nickname Bloody Ridge for both sides . . . Harold Robbins goes back to a time before the war was fought—when a doctor is brought in to diagnose a very special patient, one whose survival could cost the lives of hundreds of thousands of others. Now caught between his ethics and his humanity, he must make a choice with the fate of the world at stake. R. J. Pineiro brings the Eastern Front to light as a young American pilot is ordered to train Russian pilots in the new American made P-39D Aircobras during the final months of the brutal battle of in during the winter of 1942. David Hagberg sends the OSS and MI6 behind enemy lines in Germany to stop the one weapon that can win the war for Hitler and Nazi Germany, an electromechanical guidance system that can launch missiles not only across countries, but across the ocean and hit the United States. Jim DeFelice takes us to the height of the war when information was bought dearly on both sides. When an American pilot parachutes into Germany to gather information, he lands right in the middle of the viper's nest—a place more deadly than anything he could have found in the skies above. James Cobb sends a special detail of PBY Catalina flying boats hunting for a hidden enemy radar station that provides the Japanese Navy with an edge in the war for the Pacific. Barrett Tillman brings us into a gruesome fight as a Marine Corps flamethrower unit fights Japanese defenders on Tarawa Atoll in November 1943.

Object ID	Title	Author	Summary
2019.390.004	Pacific War 1941-1945, The	Costello, John	The Pacific War embraces both the grand strategy of the war and the actions on land, at sea, and in the air. It chronicles the maneuvers in Tokyo and Washington, London and Moscow, Sydney and Singapore (and the fatal miscalculations in Pearl Harbor and the Philippines), as well as the moments of terror and courage of individual soldiers, sailors, and airmen on both sides throughout the war. This account is written for those for whom the war is part of their actual experience and for a whole new generation that has only a partial grasp of this tragic conflict. In the concluding section of the book, an "After-Action Report," the author reveals that the real decision to go to war was made, effectively, by the US and Britain on Nov. 26, 1941, not by the Japanese on Dec. 7. Only in this book will be found a full account of how hitherto secret intelligence failed through misinterpretation at Pearl Harbor and the Philippines and why Douglas MacArthur was instrumental in reversing 20 years of carefully constructed defensive strategy in the months before Pearl Harbor.

Object ID	Title	Author	Summary
			thousands of fighter pilots during World War II. "Heroes on Deck: World War II on Lake Michigan," chronicles the ingenious naval operation launched just off Chicago's shoreline that, through the conversion of two passenger steamers into makeshift aircraft carriers, trained some 15,000 aviators to conduct missions in the Pacific following the Japanese attack on Pearl Harbor in December 1941. In "Heroes," director John Davies and producers Harvey Moshman and Brian Kallies reprise Davies' 1988 short film "Top Guns of '43" with new declassified film and stills, digital recreations and underwater recovery footage of planes that crashed during wartime training exercises. "Just when you think a subject like World War II has been pored over and made stories of so many different ways, there's always something that comes up," said Kallies, a former Mount Greenwood resident. "This is one of those stories." (image caption:) Vought F4U Corsair fighter aircraft A Vought F4U Corsair fighter aircraft is pulled from Lake Michigan. The plane, like dozens of others, crash landed off of Chicago's coast during World War II training exercises. (Heroes on Deck / Handout) The Navy chose Lake Michigan as its unlikely training site during World War II because it was an inland space that provided safety from an Axis attack. "The German U-boats were patrolling the Eastern Seaboard and the Gulf of Mexico, and you had Japanese submarines that were patrolling the Western Seaboard, so you can't really train in the oceans now," Kallies said. "A merchant mariner named John J.

Object ID	Title	Author	Summary
			Manley said, 'Hey guys, we have an inland sea, it's called the Great Lakes. Why don't we train there?' And so they did." Since none of the Navy's seven remaining aircraft carriers could be spared for training, two sidewheeled passenger ships, the SS Seaandbee and the SS Greater Buffalo, were converted into carriers and renamed the USS Wolverine and the USS Sable, respectively. "They were able to chop off the top decks, and they literally just welded on makeshift landing strips," Kallies said. (image caption:) Classic photos: Naval Air Station Glenview The makeshift carriers had both less height and less deck space than actual carriers, which made landing on them, already a challenging task for any pilot, that much more difficult. "Captain Ed Ellis from the (National Aviation Museum) said that in many ways it was harder to land on these training carriers than it would be when they got to the real ones," Kallies said. "So if they could land on these, they could land on anything." Between 1942 and the end of the war, more than 100 fighter planes crashed and sank to the bottom of Lake Michigan, where today they form an aircraft graveyard off Chicago's shore. Despite the dozens of accidents, Kallies said eight pilots and approximately 40 crewmen were killed during Lake Michigan training exercises, a very low number of fatalities, given the circumstances. (image caption:) Grumman F4F Wildcat A Grumman F4F Wildcat that crashed during training exercises in World War II has been recovered from Lake

2019.399.002	American Fighter, The	Angelucci, Enzo	Must have reference... November 27, 2010 By Kevin Ryan This book is an amazing source of information on every fighter the US has ever flown from the beginning to the (then) most modern jet fighters available. The vast amounts of stats, line drawings, and photos makes this a must have for your collection. If I could find a civilian version of this book,

Object ID	Title	Author	Summary
			I would never need to own any other. The tables on Curtiss and Boeing aircraft are worth the price of admission alone! Very in Depth October 24, 2009 By Glenn Sellers "The American Fighter" by Enzo Angelucci is a very in depth study of fighter aircraft of the United States. It starts with the very first fighter used by the United States up to the F-20 Tigershark. It also includes aircraft that never got past the drawing board. Mr. Angeluuci obviously spent a lot of time on researching this subject as he gives the reader as much information as one would need, or want, to know. He, naturally, gives more information about the aircraft that were in the American inventory during WWII, Korea and Vietnam. All in all, if you are interested in knowing about the fighter aircraft of the United States, this is the book for you. (from Amazon.com)
2019.400.001	USS Guam, (CB-2) - Her Story - 1944-1945	Mahler, Walter A. (ed)	Alaska-class battle cruiser USS Guam (CB-2) World War II Cruise Book 1944-'45. Inside the book is a letter stating that the book is donated by the family of Robert E. Grissinger, Jr. who served on the USS Guam from its launch in the fall of 1943 until the conclusion of World War II. Also includes a newspaper photo of the ship. Items of interest and ports of call: historic headlines of the pacific war newspaper clippings; history of naming; foreword dated November 17, 1945 from Walter A. Mahler, editor; letter to USS Guam from Guam; christening; commissioning including commissioning prayer; Christmas in Philadelphia, 1944; Commander Cruiser Division 16; ship's history; cartoons; VIPs : Adm. T. C. Kincaid, Adm Jonas B. Ingraham, Adm. F. S. Low, Roy Howard, newspaper publisher, RADM Carleton F. Bryant,

2019.401.001	Flying American Combat Aircraft of WWII : 1939-45	Higham, Robin (ed)	From bombing raids in the flak-filled skies over Germany and Japan to cargo runs above the snowy Himalayas and wheeling dogfights in nimble fighters, American aircraft contributed to victory in all theaters of World War II. Forcefully displaying the technological might of the United States, the planes of the Army Air Force struck critical blows against the enemy, and captured the hearts and imaginations of the daring young men who flew them. Written by the former aviators themselves, these riveting accounts take the reader into the cockpits of such storied and beloved warplanes as the B-17 Flying Fortress, the P-40 Kittyhawk, the P-51 Mustang, and many more Find out what it was like to fly some of the all-time classic aircraft of World War II, including the P-51 Mustang, B-17 Flying Fortress, P-47 Thunderbolt, P-38 Lightning, P-40 Kittyhawk, and many more! Riveting, first-person accounts that put the reader in the cockpit. Includes dozens of photographs of the planes and the pilots that flew and fought in the skies from Tokyo to Berlin

Object ID	Title	Author	Summary
2019.401.002	Stephen Biesty's Cross-Sections Man-of-War.	Platt, Richard	Text and cutaway illustrations depict life aboard a British warship of the Napoleonic era, covering such topics as work, leisure, discipline, navigating, and fighting. Packed with extraordinary illustrations, this history book for children covers everything from warship design to navigation. Biesty's incredible drawings slice through a man-of-war to explore every corner, from the crow's nest to the stinking hold. Packed with fascinating facts and gory details, the pages teem with sailors going about their duties. Find out how gun crews fired a cannon, examine a surgeon's toolkit, and learn the best way to wriggle the maggots out of the ship's biscuits. Look out, too, for the stowaway on every page. He's the one with spiky hair, and there's a reward for his capture!
2019.401.003	Pictorial History of the World War II Years, A	Jablonski, Edward	Combines a basic history of World War II with more than four hundred captioned photographs, and features charts, maps, and a wealth of specific facts.
2019.401.004	Honor Bound	Griffin, W. E. B.	In late 1942, marine fighter ace Clete Frade, Army demolitions engineer Anthony Pelosi and electronics wizard David Ettinger are sent by the OSS on a top-secret mission to neutral Argentina: destroy a merchant ship that has been supplying Nazi submarines and raiders. But the projected raid is only the tip of the novel's iceberg. The U.S. is hoping that Clete will be able to influence his estranged father, an eminence grise in Argentine politics by the name of "El Coronel" Jorge Guillermo Frade, to throw his influence behind the Allies. Meanwhile, Luftwaffe ace Peter von Wachtstein heads to Buenos Aires to consolidate the Nazi position. The Frades are convincing central characters, whose developing father-son relationship anchors much of

Object ID	Title	Author	Summary
			the novel's plot. Griffin's reconstruction of upper-class Argentine society in the 1940s provides an exotic and credible setting for a tautly written story whose twists and turns will keep readers guessing until the last page.
2019.401.005	Handbook of Fighter Aircraft, A : Featuring Photographs from the Imperial War Museum	Crosby, Francis	Amazon customer review :Imperial War Museum staffer Francis Crosby offers up an illustrated guide to over 170 of history's "most significant fighters" in this 2002 release from England's Hermes House. Along with describing those aircraft and how they evolved, he provides a historical background to the rise of the fighter aircraft and its impact on warfare. Before diving into fighters per se, short chapters cover subjects like the birth of fighters, fighter aircraft technology to 1945, fighter armament 1914-1945, the Battle of Britain, nightfighters, fighters at war 1950s-1970s, and so on. Though the back cover states the book is "An illustrated A-Z catalog," in fact it is divided into two sections: "A-Z of World War Fighter Aircraft, 1914-45" and "A-Z of Modern Fighter Aircraft, 1945 to the Present Day." The first section covers 97 aircraft including Albatros fighters, Avia B.534, P-39, F4B/P-12, P-26, Buffalo, Beaufighter, Blenheim, Bulldog, P-36, Ki.46, Pe-3, Westland Whirlwind, Do 17 nightfighters, Gloster Meteor, He 219, etc. The second section features 81 warbirds like the Sea Hawk, F-15, F-102, Super Etendard, Skyray, HF-24, MiG-15, Saab-21, Tu-28, etc. Depending on the aircraft, it might rate a one- or two-page spread with text and several b&w and/or color pix. Interestingly enough, many of the color shots depict warbirds or museum aircraft."
2019.401.006	Battleground : Book IV : Continuing the SAGA of the Corps	Griffin, W. E. B.	Book IV or the Corps, follow the U.S. Marines from Midway to Guadalcanal. It includes several characters from the

			series such as CAPT Fleming Pickering whose travels around the Pacific provide insights into the higher levels of command, USMC. Charley Galloway who is establishing a new squadron and USMC SGT John Moore, a Japanese Language Specialist who provides peek under the tent on top secret operations. These characters on the fringe of the action offer a different perspective on the War in the Pacific.
2019.401.007	Fire Dream, The : A Novel	Leib, Franklin Allen	Fire Dream captures the depth and essence of the Vietnam War experience as no other novel has. A generation came of age in Vietnam, then returned home to find itself reviled at worst and ignored at best. Between the fighting and the return was a world of living and loving. Franklin Allen Leib has written an epic account of that world. The intriguing cast of characters is headed by Lt. William Stuart, United States Navy. Billy Hunter, a gung-ho marine from Arkansas runs long-range Reconnaissance Patrols near the DMZ. Bobby Cole, an angry young black marine, learns that in the brotherhood of war, racial differences must be transcended. Moser, a gentle giant with a slowness belying his insight, becomes Stuart's devoted shadow. All the men have much to come to terms with - on the ship, on R&R, in combat on the line, meeting death, longing for love, and praying for survival. Bobby Cole's brother, Simon, provides a faith that helps; General "Blackjack" Beaurive shows a true path to glory and the need for men at war to preserve their honor although they return to an indifferent world.
2019.401.008	Air Fighters, The	Brown, Ashley (ed)	The Germans 'denied the French the aerial intelligence so vital in the long— range artillery duels that characterised this - battle. In desperation, the French copied the German lead to form dedicated fighter groups (groupes de chasse),

2019.410.001	Heart of a Man, The	Elkins, Frank Callihan	This is Lieutenant Frank Elkins's personal diary of his experiences as an A-4 pilot in the Vietnam War. When he was shot down in 1966, the diary was sent directly to his wife, Marilyn. It chronicles the early air war and portrays everyday life aboard an aircraft carrier. Today it stands as a powerful commentary on modern aerial warfare and its impact on the men who wage it. Marilyn Elkins explains, "Frank went off to war seeking adventure, glory, and honor, but he soon learned that such abstracts have concrete costs. His diary is an intimate account of his coming to terms with his own foibles, with his beginning sense of agitation about the war, with the horror of friends dying, and with his own fear of death." Lucid and moving, Elkins's conversations with himself make insightful reading and add to our understanding of the psychological effects of war. His diary reveals a man who loves flying, his family, his country, and his life, and yet risks that life daily to prove something to himself. The joys, sorrows, fears, and passions that Frank Elkins recorded so candidly tell us what combat is really like and allow us to experience the heightened consciousness it provides. The diary offers eloquent proof that the language of the heart endures. In 1990 Frank's remains finally were identified and returned to the United States. The recounting of that event, treated in Marilyn's epilogue, and an introduction by Admiral Lawrence bring the diary into focus and up to date for this

2019.410.002	Strategy for Defeat : Vietnam in Retrospect	Sharp, U. S. Grant (Ulysses S. Grant)	It is not enough for this excellent book just to be read. Its lessons should be learned, and learned well. They should earnestly be taken into account by every person who takes any part in the determination of our national policies and national strategy. Those lessons will be ignored at our peril. Admiral Arleigh Burke, USN (Ret.) US Naval Institute, Proceedings STRATEGY FOR DEFEAT is the best book I have ever read on [the Vietnam] conflict... The reason this book is so critically important today is because the errors and traumas from that conflict are being repeated today and are adversely affecting our present foreign policy and national security. Ira C. Eaker Los Angeles Times ...Admiral Sharp draws a grim and frightening picture of what happened--and could happen again. Must reading. Ralph de Toledano Manchester Union Leader This book is must reading for historians and students of the Viet Nam Conflict. Meticulously researched and loaded with details... Very highly recommended. F.C. Brown Military Journal Admiral U.S.G. Sharp graduated from the U.S. Naval Academy, the U.S. Naval Postgraduate School, and the

Object ID	Title	Author	Summary
			Naval War College. His career in the United States Navy included service as Deputy Chief of Naval Operations for Plans and Policy, Commander In Chief Pacific Fleet, and Commander In Chief Pacific. Now retired, Admiral Sharp lives in San Diego where he is active as a member of the Military Affairs Division of the Chamber of Commerce and serves on the Board of Directors of the San Diego Gas and Electric Company. He is a member of the Naval Institute, the United States Strategic Institute, the American Security Council, and the Navy League. (from back cover)
2019.410.003	To Shining Sea : A History of the United States Navy 1775-1991	Howarth, Stephen	"To Shining Sea" is a landmark work of naval history --- the most comprehensive and authoritative narrative account of American sea power written in recent times. From John Paul Jones' defiant cry "I have not yet begun to fight," to the war in the Persian Gulf, this book recounts the epic story of the men and ships of the US Navy.
2019.410.004	Giap : The Victor in Vietnam	MacDonald, Peter	A look at the career of Vo Nguyen Giap, based on interviews with the Vietnamese general, reveals how an army so poor in material resources accomplished so much militarily, discussing Giap's early days as a resistance fighter and more. A retired British brigadier, MacDonald was invited to Hanoi in 1990 by the Vietnamese government to interview Vo Nguyen Giap, the legendary general whose "primitive" army defeated two great Western powers. The result is the first major biography of this great military leader, as well as a new look at his army and its methods of waging war. MacDonald traces Giap's 30-year leadership of the Vietminh and People's Army, describing how he learned to exercise his talents as organizer, logistician, strategist and

Object ID	Title	Author	Summary
			tactician against the French in the 1940s and 1950s and against the Americans in the 1960s and 1970s, employing a unique combination of guerrilla and conventional warfare. An important political and military figure, Giap was involved in decision-making at the highest levels of government. As MacDonald points out, Giap can claim the largest share of credit not only for winning two major wars but also for securing the unification and independence of his nation. There is unfamiliar material here about Giap's brilliant victory over the French at Dien-bienphu and his creation of the Ho Chi Minh Trail and the anti-aircraft defenses of Hanoi. Vo Nguyen Giap, the architect of Communist Vietnam's decisive victories over France and the United States, arguably ranks with the greatest names in the history of warfare. Yet he remains an elusive figure in this work by British author-soldier Macdonald, who interviewed the elderly Giap in Hanoi in 1990. If the man himself remains opaque, his military feats do not

Aircraft Carriers in Peace and War

Skiera, Joseph A.

Few chapters in United States naval history fill more dramatic pages than those devoted to carrier aviation. From yesteryear's weird-looking experimental craft have developed today's supercarriers — pride of our modern nuclear fleet.

Here is the story of the pioneer carriers — the Langley, Lexington, and Saratoga; the evolution of the catapult; the first heroic attack on the Japanese mainland by planes launched from the Hornet; the saga of carrier feats in the battles of Midway, the Coral Sea, and the Atlantic; the ordeal of the Franklin; the tale of the most famous carrier of all - the Big "E"; the story of how Captain Thach's "phantom carrier" harrassed the North

Object ID	Title	Author	Summary
			Koreans; and the dramatic use of carriers in the 1962 Cuban crisis. These and many more — the very "cream" of carrier aviation writing — have been selected by Joseph A. Skiera for this new volume in the Watts Aerospace Library. Jacket photos Official U.S. Navy Photos. Jacket photos: (top) Eugene Ely landing on deck of USS Pennsylvania; (bottom) USS Saratoga catapults two fighters simultaneously, off Guantanamo Bay, Cuba. THE WATTS SEAPOWER LIBRARY The overall purpose and scope of the Seapower Library is to depict to readers both in and out of the naval service the aims, objectives, history, and operating techniques of the United States Navy, as well as the high calibre of the officers and men who man its ships, aircraft, and shore installations. Authors of the volumes comprising the Library are either active duty or reserve naval officers, retired officers, or highly qualified civilians who are experts in their particular subjects. (from dust jacket flaps)
2019.424.002	Arleigh Burke Class Destroyers	Greiner, Kurt	This book covers the United States Navy missile destroyers of the Arleigh Burke class. Good looking, fast, powerful and survivable, the destroyers of the Arleigh Burke class will dominate the US Fleet during the first third of the 21st Century. When the building program is completed, it will be the most numerous class of US surface warships since World War II, and represent a massive investment by the government. They may also be the last classic surface combatants produced for the Navy, as the services struggle with ways

There are the battleships, destroyers, aircraft carriers, submarines and specialized ships that belong in the warship hall of fame. Hero Ships contains 13 documentaries on 4 DVDs
2019.424.005	Down to the Sea in Subs	Lockwood, Charles A.	Admiral Lockwood's memoir recounts his service career, mainly related to submarines,

Object ID	Title	Author	Summary
			and his rise from ensign in a ""pigboat"" (sub) in 1914 to his job as Commander Submarines Pacific during WWII. His sea-duty ended in 1945 but he went on serving as Inspector General and traces the development of the nuclear submarine (including his rides in the Nautilus). Ensign Lockwood's early years in Manila, China and Japan have charm and humor in the recounting, but the subject remains submarines. He ended the First World War without having heard a shot fired in anger but having dug himself into the booming submarine service. The U.S. now realized the value of subs and the East Coast shipyards were in full swing. At times Lockwood was transferred to big ships, to round out his abilities and work his way up the executive ladder. In his late thirties he gave up his prejudice against marriage for sea-going officers and married the boss's daughter (an admiral's). However, the foreground of his story is the continuing new models of subs and their growth as an arm of the Navy. After duty in war torn London as an observer, he was assigned as Commander Submarines Southwest Pacific at Perth, Australia. His greatest problem for nearly a year was malfunctioning torpedoes, a woe that followed him to his top slot on Pearl Harbor. Admiral Lockwood's report on the sub war in the Pacific is far from exhaustive but is continuously readable and daubed here and there with walrus-like cries of triumph and pride.

2019.424.006	Sailor's History of the U.S. Navy, Cutler, Thomas J. A	Today's sailors have too little appreciation of their heritage. To counter this problem, Thomas J. Cutler has compiled a history of our naval heritage in the form of A Sailor's History of the U.S. Navy. The work is unique in two important ways. First, it is written thematically rather than chronologically. This allows recent history to

Object ID	Title	Author	Summary
			be blended with more distant (but important) events in ways that will reinforce the timelessness as well as the timeliness of the U.S. Navy, thereby having a greater appeal to today's sailor. There are a number of themes being used--the most obvious are manifested in chapters with the themes of "honor," "courage," and "commitment," but others serve as useful vehicles as well; for example, there is a chapter called "What's in a Name?" that briefly discusses how ships have been/are named and then uses the many ships that have carried the name "Enterprise" as the theme for presenting significant portions of the Navy's history. The other unique characteristic of this history is that it focuses wherever possible on the roles of ALL sailors rather than just the officers. That is not to say that Jones and Decatur are not there, but that the emphasis is along the lines of "the crew of the Bon Homme Richard fought on into the night..." rather than "Jones fought..." Also, there are plenty of individual sailor heroes who can stand alongside the Perrys and the Farraguts (Boatswain's Mate First Class Williams who won the Medal of Honor in Vietnam, Dorie Miller of Pearl Harbor fame, Gunner's Mate Third Class Paul Henry Carr at the battle off Samar, etc.) . Some emphasis upon what it was like to be a sailor (working and living conditions) at different times is included

2020.301.002	Close Combat	Griffin, W. E. B.	Book VI or the Corps, On an island in the Pacific during World War II, Major Jack Dillon struggles to succeed as a combat correspondent and Sergeant McCoy is shocked by the brutality of battle. CLOSE COMBAT is W.E.B. Griffin's epic novel of World War II--a powerful, dramatic tribute to the brave men and women who lived it...The captain who led his squadron in to the fiercest air battles of the Pacific. The correspondent who learned more about combat than he bargained for. The Marine who embarked on a top secret mission from which there was no certain return...
2020.301.003	Big E : The Story of the USS Enterprise	Stafford, Edward Peary	A lasting tribute to the USS Enterprise, this heavily illustrated, new edition tells the classic tale of the carrier that contributed more than any other warship to the naval victory in the Pacific. The original book, published in 1962, has remained one of the most celebrated World War II stories for more than four decades. The Big E participated in nearly every major engagement of the war against Japan and earned a total of twenty battle stars. The Halsey-Doolittle Raid; the Battles of Midway, Santa

Object ID	Title	Author	Summary
			Cruz, Guadalcanal, the Philippine Sea, and Leyte Gulf; and the invasions of Iwo Jima and Okinawa are all faithfully recorded from the viewpoint of the men who served her so well. This superb study of a great ship, her crew, and the action they saw has been called one of the finest pieces of naval writing to emerge from the war. Author Edward Stafford mined genuine nuggets from the mountain of research and lengthy interviews he conducted to write this book. He answers questions such as: What was it like to be inside the cockpit of a Dauntless dive bomber as it bored in on its target or what kind effort was required to unstick the ship's huge rudder when it was damaged by a bomb? Literate and scholarly as well as highly dramatic, the book will appeal to historians and the general public alike. Foreword to the illustrated edition -- Foreword -- Introduction -- Book One. Peace -- War -- Guarding the islands -- Into the South Seas -- Back to Wake -- Colonel Doolittle goes to Tokyo -- Coral Sea cruise -- Action off Midway -- Book Two. Pearl and a mission to the south -- First visit to an ugly island -- The Eastern Solomons - - Ordeal off Santa Cruz -- The slot -- Espiritu, Noumea, and Chicago -- Book Three. Intermission -- Makin and the Marshalls -- First steps west -- Penetration to Palau -- A month in the Marianas -- Foray to the Philippines -- Leyte in the fall -- Hunters in the dark -- Return to Japan -- Tomi Zai -- Epilogue -- Chronological order of events, USS Enterprise -- Commanding officers of USS Enterprise -- Air groups and their commanders embarked in USS Enterprise during World War II -- Battle stars awarded USS Enterprise.

2020.301.005	F4B/J Ordnance Handbook	McDonnell Douglas Corporation	This document was created by McDonnell Douglass Corporation as a familiarization manual. It is Product Support no. 196. In the early development, the Phantom II was designed as a long-range all-weather attack fighter; however, fleet requirements changed the basic mission to that of a long range high altitude interceptor using missiles as principal armament. As an interceptor, it can carry six Sparrow missiles: one under each wing and four semi-recess in the fuselage or, as an alternative, two heat-seeking Sidewinders under each wing and four Sparrow III's under the fuselage. In addition, as an attack aircraft, the Phantom II is capable of carrying a multi-ton load of conventional bombs, rockets, missiles or napalm while retaining its own self-protective Sparrow II armament.

A 1954 calendar supplemented with photos from the 1953 cruise of the USS Coral Sea (CVA-63) cruise to the Mediterranean Sea in 1953. Also includes a six-page textual summary of the 1953 cruise. Arranged such that one week of dairy type entries is allowed

Object ID	Title	Author	Summary
			per page with each facing page containing a b&w photo. Each calendar/diary page features a cartoon relating to deployment life. A two-page spread is a drawing of the Med and the track of the ship during the deployment. Another page list ports of call and dates visited.
2020.302.004	USS Saratoga (CV-3) - Cruise of the U.S.S. Saratoga - 1936	None Stated	Pictorial account of the deployments of the USS Saratoga (CV-3). She departed Long Beach, CA 23 April 1936 and returned to Long Beach, CA, 6 June 1936 after launching her planes and unloading gear in San Diego. Ports of Call and Items of interest: Commander of the Battle Force was VADM Henry Varnum Butler, Captain of the ship was CAPT William F. Halsey; short description of the ship; visit to Panama; 20 pages devoted to descriptions and photos of Crossing the Line; includes roster of men. Includes certificate of the Sacred Order of the Golden Dragon awarded to A. C. Israel.
2020.302.005	USS Saratoga (CV-60) - The Final Chapter - 1994-1996	Dorey, Joseph (ed.)	A pictorial account of the final deployment of the Saratoga and major events leading up to that deployment. The book provides a brief history of the Saratoga and coverage of its predeployment yard period and post-yard period port calls, Tiger Cruise, and participation in Operation Uphold Democracy at Haiti. The ship departed Norfolk, VA for the deployment on 28 August 1995 and returned on 24 February 1996. Significant operations included participation in NATO exercises Deliberate Force and Bright Star before passing through the Suez Canal en route to duty on Operation Southern Watch. Port visits included Naples, Malta, Trieste, Corfu and Rhodes. Carrier Air Wing One was embarked with VF-102, VMFA 251, VFA-86, VFA-82, VQ-6, VAW-123, VS-32, VMAQ-3, HS-11 and VRC-40.
2020.302.006	Vigilante : A Pilot's Story : 1,200 Hours Flying the Ultimate US Navy	Powell, Robert R.	"This book provides information on North American's Mach-2 A3J/RA-

2020.302.007	Raising the Fleet : The Pearl Harbor Salvage Operation, 1941-1944 : A Pictorial History	Arroyo, Ernest	"One of the greatest maritime salvage operations in US history took place for three years after the devastating attack by the Japanese at Pearl Harbor on December 7 1941. Raising the Fleet follows the operation on each ship sunk or damaged from refloating, to moderate to intensive repairs to putting the ships back into the fleet, with hundreds of period photographs and extensive captions. The three ships not salvaged, the USS Arizona, Oklahoma, and Utah are also covered. Thousands of naval and civilian personnel worked on the ships, including over 20,000 hours of underwater diving. The authors have used Vice Admiral Homer N. Wallin's book, Pearl Harbor, Why, How, Fleet Salvage and Final Appraisal for most of the text. A full-color chapter includes the results of an extensive nationwide search for remaining artifacts of the ships that are on display."--Provided by publisher.
2020.303.001	Spindrift : Stories from the U.S. Sea Services	Gillcrist, Dan	Spindrift is a collection of true seagoing anecdotes about the experiences of three brothers, each of whom served aboard US Navy ships during his service. One of the authors was a Torpedoman Second Class on USS Barbero, a guided missile diesel submarine in the late 1950s. The second author served as a seagoing Marine Corporal aboard the aircraft carrier, USS Wasp during the late 1950s. The third author, a career Naval Aviator, served aboard a number of aircraft carriers over a 33 year career ultimately retiring as a Rear Admiral.

Object ID	Title	Author	Summary
2020.305.001	Famous Sea Battles	Howarth, David Armine	Recounts how and why seventeen historic sea battles were fought, and traces the development of naval equipment and strategies.
2020.305.002	Disasters of the Deep : A Comprehensive Survey of Submarine Accidents and Disasters	Gray, Edwyn	First published in 1986 as Few Survived and back by popular demand in a revised and updated edition, this book presents a comprehensive account of every peacetime submarine disaster from 1774 to the sinking of the Kursk in 2000. Noted naval historian Edwyn Gray examines many of the sinkings in considerable detail, analyzing what went wrong and describing attempts to rescue the crew and the vessel. In tandem he traces the development of the submarine from the earliest experimental submersibles of the late eighteenth century to the nuclear powered giants of today. Gray taps the resources of the United States, French Italian, Danish and Japanese navies, as well as the Royal Navy Submarine Museum and German U-Boat archive for this inclusive listing to provide an invaluable reference that also makes absorbing reading.
2020.305.003	Silent Steel : The Mysterious Death of the Nuclear Attack Sub USS Scorpion	Johnson, Stephen	A close-up look at the untold story of the 1968 tragedy describes the Scorpion's final voyage, the discovery of the submarine's shattered hull, and the U.S. Navy's efforts to unravel the mystery
2020.305.004	Torpedo Junction : U-boat War off America's East Coast, 1942	Hickam, Homer H.	In 1942 German U-boats turned the shipping lanes off Cape Hatteras into a sea of death. Cruising up and down the U.S. eastern seaboard, they sank 259 ships, littering the waters with cargo and bodies. As astonished civilians witnessed explosions from American beaches, fighting men dubbed the area "Torpedo Junction." And while the U.S. Navy failed to react, a handful of Coast Guard sailors scrambled to the front lines. Outgunned and out-maneuvered, they heroically battled the deadliest fleet of submarines ever launched. Never was Germany closer to

Object ID	Title	Author	Summary
			winning the war. In a moving ship-by-ship account of terror and rescue at sea, Homer Hickam chronicles a little-known saga of courage, ingenuity, and triumph in the early years of World War II. From nerve-racking sea duels to the dramatic ordeals of sailors and victims on both sides of the battle, Hickam dramatically captures a war we had to win because this one hit terrifyingly close to home.
2020.306.002	Execute Against Japan : The U.S. Decision to Conduct Unrestricted Submarine Warfare	Holwitt, Joel Ira	Until now how the Navy managed to instantaneously move from the overt legal restrictions of the naval arms treaties that bound submarines to the cruiser rules of the eighteenth century to a declaration of unrestricted submarine warfare against Japan immediately after the attack on Pearl Harbor has never been explained. Lieutenant Holwitt has dissected this process and has created a compelling story of who did what, when, and to whom."—The Submarine Review "Execute against Japan should be required reading for naval officers (especially in submarine wardrooms), as well as for anyone interested in history, policy, or international law."—Adm. James P. Wisecup, President, US Naval War College (for Naval War College Review) "Although the policy of unrestricted air and submarine warfare proved critical to the Pacific war's course, this splendid work is the first comprehensive account of its origins—illustrating that historians have by no means exhausted questions about this conflict."—World War II Magazine "US Navy submarine officer Joel Ira Holwitt has performed an impressive feat with this book. . . . Holwitt is to be

2020.311.001	Wall Chart of World War II, The : A Chronological Presentation of the War that Changed the World	Keegan, John (ed)	World War II has a simple story. It is that of the defeat of Nazi Germany and its allies by their enemies, eventually to be called the United Nations. This wall chart covers every aspect of the war in a detailed but readily comprehensible way. The events of the conflict and world affairs have been divided into the 13 categories {Western Front/Eastern Front/The Balkans/The Mediterranean/The Middle East/The Battle of the Atlantic/Norway/Air War in Europe/World Affairs/Approach to War, Pacific/Central Pacific/Southwest Pacific/China, Burma, India. Following the color codes, one can trace the action in any theater or campaign from month to month. Moving vertically, one can compare simultaneous events in the various aspects of the European and Pacific wars. Particularly important aspects of the conflict are discussed in more detail in the special features that appear at the head of each page. The date panel in each feature is also color coded to the relevant campaign area.

			procedures, chemical agents and their effects with treatment options.
2020.313.001	Wings for America : Fighting Planes of the U. S. A	Penfield, Thomas	Descriptions of Army and Navy airplanes, with pictures: Curtiss S03C-1, Lockheed P-38, Douglas SBD-1, Stinson O-49, Vought-Sikorsky XF4U-1, Consolidated B-24, Curtiss-Wright 21-B, Vought-Sikorsky XPBS-1, Martin PBM-1, Cessna AT-8, North American O-47B, Bell P-38, Republic P-43, North American B-25, Martin B-26, Vultee Vanguard P-48C, Ryan Dragonfly YO-51
2020.314.001	Pacific, The, Vol. 1 : Pearl Harbor to Guadalcanal	Wertz, Jay	This powerful initial volume in the War Stories: World War II Firsthand series includes events that took place before and after the devastating Pearl Harbor attack that brought the United States and Japan face to face in war. Included are eyewitness accounts of survivors of the December 7, 1941 attack on America's major battleships, defenders of Bataan and Corregidor; participants in the pivotal Battle of Midway, the Marines that first waded ashore at Guadalcanal and many, many others. Full color throughout, rich with images and original 3-D maps, the 9" x 12" volume also features solid historical analysis of the war's timeline and quotes from military and political leaders, giving a complete picture of this part of the war.
2020.314.002	Submarines : World War I to the Present	Bishop, Chris	Submarines offers a highly illustrated guide to all the main classes of submarines to be used in naval warfare from the beginning of World War I to the present day. As you will learn throughout the book, the emergence of the submarine in 1914 as a major strategic weapon was swift and unexpected. On September 5th, 1914 a British Light cruiser, HMS Pathfinder, was sunk by a German submarine U-21, becoming the first victim of a free-fired torpedo. The basis of naval warfare had been changed forever.

Object ID	Title	Author	Summary
			Divided by era, campaign, and country, the book includes sections on; submarine forces in 1914, technical developments during the 1930s, the Atlantic convoy war during World War II, Soviet submarine development during the Cold War, the introduction of nuclear-powered submarines, submarines of the Falklands War, and the latest ICBM carriers. Special emphasis is given to the U-Boats of World War II and arranged flotilla. You will gain a vast knowledge of submarines, as all major models are included, from the World War I-era German U-1 and British F-class, through the Type VII U-boats and US Gato class of World War II, and coming up-to-date with the latest missile submarines, such as HMS Astute, USS Virginia, the Russian Borei class, the Chinese Shang class, and the INS Arihant.
2020.314.003	U-Boot im Focus, No. 2	Urbanke, Axel (ed)	Uboot im Focus is a dual language, softcover book that features not only the U-boats in the title, but the people, places and stories that came from these sailor's lives through them, and more recently, their relatives who have passed these onto the author Axel Urbanke. In this issue, information about the following: U-218, U-25, U-34, U-553, U-588, U-103, U125, U-37, U-155, U-861, U-4701, U-2330, U-93, U-128, U-18, U-1192, U-432, U444, U-375, U-2, U-73, U-181, and U-459.
2020.315.001	Steam and Gas Turbines for Marine Propulsion	Saarlal, Maida	This is the first book to introduce the student of marine propulsion plants to the use of shipboard gas turbines. The author fully explains the theoretical as well as the mechanical similarities and differences between gas and steam main propulsion turbines. This book takes an operational approach to the turbine relative to its function as part of an overall power plant. It focuses on principles, essential applications, and performance rather than construction,

			hardware, and design variation. It provides new sections on fuels, combustion, gas properties, and turbines in the gas engine.
2020.316.001	Blue Water Beat : The Two Lives of the Battleship USS California	Gruner, George F.	USS California; was the Boss of the Battlewagons between the world wars during the Golden Era of the surface fleet. Especially designed as the home for three- and four-star admirals, she was considered a prime stepping stone to the office of Chief of Naval Operations. While nicknamed the Prune Barge by the rank-and-file whitehats who remembered her as a happy ship, the Navy hierarchy saw BB44 as a crisply run spic-and-span vessel operated strictly by the book. Flagship of the Pacific Fleet, when her signal flags were hoisted aloft the ships of the Battle Force were quick to obey. This is a story of the time when the U.S. Navy was the nation s first line of defense and the ranking military force; when scenes of America s dreadnoughts plowing through heavy seas around the world were popular newsreel highlights; when fleet visits, parades and shipboard open house displays drew throngs to naval events on both coasts. The attack on Pearl Harbor brought an end to all that, but BB44 still had a significant role to play in helping win the great battles still to come. Sunk at Pearl Harbor, the California was raised and rebuilt to meet the needs of modern warfare. The ship in its original configuration was the only battleship ever built from the ground up on the west coast.
2020.317.001	By George	George, Harris James	This is a memoir of Harris James "Bud" George, an attorney of Greek heritage. He was sent to officers candidate

2020.325.001	Unseen Body Blows : The Fighting LST 479 and Its Seven Pacific Campaigns, 1943-1945.	Gay, William A.	There have not been many books written that are an in-depth look at the brief operational life of a World War Two landing ship tank (LST) in the Pacific Theater and how it fits in into the broader context of the war. Unseen Body Blows takes a close look at one of the earliest of these unique ships, LST 479, and explores its life from launch to scrapping. It also reflects the ship's role in the broader strategy of the Pacific War as the U.S. forces island-hopped towards the Japanese homeland. By extension, it also incorporates the history of other LSTs that fought alongside the 479--especially many of the 15 that were built at Henry Kaiser's shipyards in Richmond, Ca. Between 1942 and 1945, 1,051 amphibious tank-landing ships were rapidly produced. Even with that large inventory, they have been virtually ignored by historians. These were anonymous vessels, slow and unwieldy. They had no names--just numbers. In the words of one crewmember, they looked like bathtubs. LSTs had a reputation of being expendable and of relatively low value, and so were bestowed another, less noble, nickname; "Large Slow Targets." They were put into service to get troops and equipment ashore. Typical of all early LSTs, 479 crew members on commissioning day, April 19, 1943, were raw amateurs. But over the next 1,046 days, the 479 crew became sailors as they coped with collisions, accidental groundings, navigational errors, lots of mechanical breakdowns--and

Object ID	Title	Author	Summary
			the enemy. Displaying heroism and ingenuity, they rescued the crew of a crippled landing craft during an Alaskan storm, battled fires aboard a burning LST hit by kamikazes, and fought off air attacks. Through all this, the 479 landed troops and equipment at Kiska, the Gilbert Islands, the Marshall Islands, New Guinea, the Mariana Islands, the Philippines, and Okinawa. In gripping, meticulously researched, "you are there" fashion, author William A. Gay, recounts the fascinating history of the 479's seven Pacific campaigns; from the day-to-day life of the men aboard her to their terrifying encounters in battle as they delivered "unseen body blows" to the enemy that helped win the war in the Pacific. (from Amazon.com & back cover)

Suribachi, after the battle, strategic importance, Camp Pendleton's Iwo Jima Monument, Commemorative Committee, Recognition & Remembrance; stories of 36 veterans of that battle.
2020.328.001	Aircraft Prototypes : Aerospace Technology, From the Light Fighter to the B2 Stealth Bomber	Chant, Christopher	AIRCRAFT PROTOTYPES will inform the specialist and enthrall the amateur, for in gripping detail it relates the development of some fascinating prototype aircraft from World War II to the present day, and relates how many evolved into mass-

Object ID	Title	Author	Summary
			produced machines. Author Christopher Chant also explains the historical background essential to a full understanding of the subject, for example how the destruction of Hiroshima and Nagasaki changed the concept of bombing. Successes in designing long-range strategic and nuclear bombers spurred the development of a fresh breed of fighter to guard newly threatened air space. This demand coincided with the appearance of new propulsion and aerodynamic technology (such as swept wings), producing a crop of innovative fighters and the breaking of the sound barrier. Covering bombers, fighters and research aircraft from around the world, this books tells an amazing story of technical achievement matching military need. The development of turbojet powered machines, rocket motors, innovative wing shapes, the introduction of vertical take off and landing (VTOL) technology and much more are explained in authoritative detail, supported by more than 100 photographs and illustrations. Famous names such as the Superfortress, the B-52, Lightning and Concorde mix with some less familiar antecedents - including the Flying Bedstead and the Cutlass. This book contains a wealth of accessible detail, offering a superb account of the development of modern aircraft technology and concluding with descriptions of some planes that have not yet reached the skies. 2020.330.001	Emperor's Codes, The : The Breaking of Japan's Secret Ciphers	Smith, Michael	Other Lands. NAVPERS
			Original edition has subtitle: Bletchley Park and the breaking of Japan's secret ciphers. A riveting look at how Allied codebreakers helped win the war in the Pacific Arena in World War II. In this gripping, previously untold story from World War II, Michael Smith examines how a group of eccentric codebreakers cracked Japan's secret codes and turned the tide of the war in the Pacific. Drawing upon recently declassified British files, privileged access to Australian secret official histories, and interviews with many of the men involved, "The Emperor's Codes" takes the reader step-by-step through the code-breaking process, explaining exactly how the codebreakers went about their daunting task, which was made even more difficult by the vast linguistic differences between Japanese and English. It details the grueling work and almost unfathomable dedication demonstrated by these relatively unsung heroes, without whose extraordinary exploits the outcome of World War II might have been very different. "A fascinating story ... and one of importance." -Library Journal "An enthralling tale ... the stuff of John le Carré ... yet true." — Martin Booth, Daily Telegraph (from back cover)

2020.333.008	Naval Aviation 1911-1986 : A Pictorial Study	Russell, Sandy (ed)	This pictorial history traces the evolution of Naval Aviation from its humble beginnings to its current role as an essential element of U.S. naval warfare. This is not intended to be an in-depth treatment. Rather, it is a short visual monograph designed to capture the essence of Naval Aviation and to convey to the reader something of the imagination, energy and commitment of those who have made the dream a reality. Appreciation is extended to the helpful personnel at the Naval Historical Center Photo Section, Naval Audiovisual Center Still Media Division (Production Control) and the Defense Audiovisual Agency for their assistance in the photographic research for this history. Unless otherwise noted, the photographs used in this publication are of Navy Department origin. Individual credits or sources are given when known. Upon request, current information and rates for reproduction services can be obtained from the following sources. For photos with numbers preceded by the letters NH, write the Comptroller, Naval Imaging Command, Bldg. 168, Naval Station, Washington, D.C. 20374. Other numbered Navy photographs since 1958 (e.g., with prefixes USN, AN or KN), and USMC photos since WW II, can be obtained from the

2020.333.009	Naval Aviation Training	Naval Aviation News	In the succeeding feature stories, Naval Aviation News presents a picture of flight training in the U.S. Navy from the early-early days of fabric and wire, during World War II, and on into the present. What follows is a look at the airplanes, the students, the instructors and other ingredients that constitute a classroom for learning of the highest order.
2020.333.010	Pistons to Jets	Rausa, Rosario	Engines are the hearts of airplanes. Before the age of powered flight, variations of balloons and gliders challenged the sky and scored some victories. With the introduction of power plants, aircraft became more obedient to the human beings who manipulated those engines than to the meteorological whims of the wind. "Changes in hearts" — improvements, for the most part — enabled flying machines to go much faster, from 30 or so miles per hour to supersonic levels, in the span of a human lifetime. Unlike mortal hearts, all of which bear the same design, aircraft power plants appeared in a vast assortment of shapes with varying capabilities through the years. Some failed to match expectations. Others exceeded them. Many performed

Object ID	Title	Author	Summary
			yeoman service as advertised. All contributed to the continuously rising chart line of new technology. Common to the success of any engine, though, is the maintenance effort required to ensure that it functions properly. There isn't a Naval Aviator on the planet who doesn't owe a debt of gratitude to the mechanics. The folks with wrench in hand and a formidable combination of determination and knowledge have kept and continue to keep the motors purring in peace and war. This monograph is dedicated to them.
2020.333.011	U.S. Naval Air Reserve	Mersky, Peter B. (ed)	August 29, 1986, marked the 70th anniversary of the U.S. Naval Air Reserve. On that day in 1916, the Naval Appropriations Act for fiscal year 1917 provided funds for the establishment of a naval flying corps and the purchase of 12 planes for the naval militia. Personnel for these units were drawn from various college flying clubs, the most prominent from Yale, organized by F. Trubee Davison. An energetic individual, Davison found 12 classmates, borrowed a Curtiss seaplane from the wealthy Wanamaker family in Philadelphia, and set about teaching himself and his club to fly. From these humble beginnings, the U.S. Naval Air Reserve grew into today's massive organization — a navy within a navy — with bases across the country and 52 squadrons, 357 aircraft and 34,350 full-time active duty and part-time reserve personnel. Traditionally considered a hand-medown collection of planes and equipment, the Naval Air

Object ID	Title	Author	Summary
			Reserve is currently enjoying one of the most dramatic revitalizations in its 70-year history. Factory-fresh McDonnell Douglas F/A-18A Hornets are joining the light attack inventory, in company with Grumman F-14A Tomcats and upgraded Lockheed P-3B Orions. And there are plans for more modern aircraft in the latter part of the decade.
2020.333.012	Kite Balloons to Airships...The Navy's Lighter-Than-Air Experience	Grossnick, Roy A.	This monograph is intended to provide an overview of the Navy's involvement with balloons, airships and their operations, which shows their failures and accomplishments and their contributions to the Navy's mission of guarding the sea lanes of America. It is not an in-depth study of the LTA program, but provides an overall look at the history of LTA in the Navy. Various aspects of the LTA program have had extensive coverage, especially the rigid airship era; however, the entire history of LTA in the Navy has not been told under one cover. The Navy's LTA program technically ended in the 1960s. But the evolutionary trends that can be seen in history could possibly bring back certain functions of LTA and make them viable in today's world of supersonic flight and space travel.
2020.333.013	U.S. Marine Corps Aviation	Condon, John Pomeroy	In any historical appreciation of Marine Corps Aviation, there are two factors which make Marine Aviation unique. The first is the close relationship between Marine and Naval Aviation, and the second is the unchanging objective of Marine Aviation to provide direct support to Marine

Object ID	Title	Author	Summary
			ground forces in combat. One of the reasons for the partnership between Marine and Naval Aviation is the commonality which they have shared since their very beginnings. Both are under the umbrella of the Department of the Navy and there is an interlocked approach to planning, budgeting, procurement and operations, at all levels from Washington to the major fleet, field and base commands. All aviators of the naval establishment, whether Marine or Navy, are trained in the same training commands, in the same equipment, and by the same instructors and technicians, under the same syllabi. This adds up to the closest bond between two major air forces. The second factor — the basic objective of Marine Aviation: to support Marine Corps operations on the ground — speaks for itself. While there have been a few variations in some aspects of Marine Aviation planning, there has never been a departure from this objective.

2020.333.015	Collection of Articles on Naval Aviation in World War II	Van Wyen, Adrian O.	When the call to battle sounded in April 1917, the Navy air arm could muster at its one air

Object ID	Title	Author	Summary
			station only 48 officers and 239 enlisted men with some experience in aviation, and 54 aircraft none of which was fit for patrol service. The problems of building this small force to a effective fighting unit were enormous. Yet, the Armistice was signed 19 months later, there were 43 air stations in operation at home and abroad, an aircraft factory in production, and numerous schools, assembly plants, repair depots and other facilities providing the needed logistic support. Aviation personnel numbered over 39000, a figure nearly equal to the total in the entire Navy at the start of the war. Little has been published on the nature and extent of Naval air operations in the first World War until, in April 1967, Naval Aviation News began a series of monthly articles under the general title, "Naval Aviation in World War I." Using chronologies of significant events and narrative accounts of special phases of the war, this series told the story of how Naval Aviation met the challenge. The series was conceived by and completed under the direction of the Assistant for Aviation History, Mr. A. O. Van Wyen, who also wrote many of the articles and arranged for the writing of others. While not a definitive history, it is the first published word to deal specifically with the accomplishments of Naval Aviation in the first World War. Based on official sources as well as the recollections of participants, it is authoritatively presented through an interesting combination of official and personal accounts. It is also the history of a beginning made under stress of war---a beginning in which the men of Naval Aviation demonstrated the potential of aviation as an arm of sea power and set the course for its future growth. The success with which they carried out their task is in large measure responsible for the position of aviation at the

			forefront of Naval power today. T. F. Connolly Vice Admiral, USN Deputy Chief of Naval Operations (Air)
2020.333.016	Cold War in Asia	Haydock, Michael	The article summarizes that the cold war in Asia was more than just 1958 Formosa Crisis, (This article appeared in VFW magazine in August 1998 on the 40th anniversary of that event). Other incidents include Americans who died in the Korean DMZ firefights and shutdown over the Sea of Japan. It also talks about the Hukbalahap (Huk) rebellion in the Philippines when the Communist lead and inspired armed wing of the Philippine Communist Party began fighting in 1945 and lasted until the US forces were given permission to join the Philippine Army in fighting the rebellion in 1953. During the Korean War, some US planes were shot down off Formosa by the Communist Chinese. They also fired at US ships, resulting in the Formosa Resolution of 1955. In 1958, the Communists began shelling some of the smaller islands near Taiwan. The US 7th Fleet accompanied the Taiwan resupply convoy and were fired upon. The firing was referred to as accidental ordnance. The US maintained a high status presence in the area until 1963. Other incidents included rescuing the Dalai Lama from Tibet and overflights of Communist territories that ended after Gary Francis was shot down, Other incidents include the capture of the Pueblo in 1968 and American airplanes being shot down over the Sea of Japan. 187 Americans were KIA in Asia during the Cold War.

2020.335.001	Investigation of Pressures on Keel Blocks During Drydocking of USS Midway (CVA 41), USS Valley Forge (CVS 45), and USS Intrepid (CVA 11)	Palermo, Peter M.	The David Taylor Model Basin has investigated the pressures developed on the keel blocks under the aircraft carriers USS Midway, USS Valley Forge, and USS Intrepid. The main purpose of these tests was to measure the loads on the keel blocks especially in the area of the stern overhang since these loads are sometimes the controlling factor in determining the configuration of the skeg and the amount of overhang. The Midway was chosen because of its twin skeg aft and its large weight. The Valley Forge and Intrepid were chosen because of their single skeg aft and large lengths of stern overhang. A new type of pressure wafer was developed to measure the pressures on

2020.335.004	Attack Squadron VA-25 History including Operational History Oct 1964 - Oct 1966	VA-25	Attack Squadron VA-25 also known as Light Attack Squadron Twenty-Five (VA-25). Includes Aviation Historical Summary (OPNAV 5750-2) history from 1 Oct 1964 - 1 April 1965, R. F. Smith, CO. The squadron alternated between NAS, Lemoore, CA and USS Midway (CVA-41). During this time, the squadron took part in Operation Silver Lance. They were flying 12 A-1H/J Douglas Skyraiders. Statistics give number of flights and number of hours flown. Includes Aviation Historical Summary (OPNAV 5750-2) history from 1 April 1965 - 1 October 1965, H. E. Ettinger, CO. The squadron was embarked on the USS Midway (CVA-41) on her Vietnam combat cruise. During this period the squadron won a Battle Efficiency "E" and its aircraft were the first from aboard the USS Midway to engage the enemy (10 April 1965). They achieved a record for the most hours flown by an attack squadron during a 30 day period, and were the first Skyraider squadron to get a confirmed enemy MiG-17 kill on 20 June 1965. They were flying 12 A-1H/J Douglas Skyraiders. Statistics give number of flights and number of hours flown. There is a list of individuals and the Medals that they won. Includes Aviation Historical Summary (OPNAV 5750-2) history from 1 October 1965 - 1 October 1966, J. D. Burden, CO. The squadron was assigned to the Midway from 15 October 1965 until 23 November 1965 during her Vietnam cruise. They were then at NAS Lemoore, California, and on 13 June 1966 assigned to the USS Coral Sea (CVA-43). At NAS Lemoore, they had an Administrative and Material inspection, Carrier Quals on the USS

Object ID	Title	Author	Summary
			Constellation and a weapons deployment to Fallon, Nevada. They boarded the Coral Sea on 13 June and participated in WEPTRAEX and Operation Belaying Pin. They also participated in the Operational Readiness Inspection in Hawaii. On 13 September 1966, Coral Sea arrived on Yankee station, and CDR C. W. Stoddard was lost on 14 September. Statistics give number of flights and number of hours flown. There is a list of individuals and the Medals that they won. Includes a 34 page history of Attack Squadron Twenty Five (OPNAV Report 5750-3) from its beginning in World War II until the end of June 1966.
2020.335.005	Carrier Deployments During the Vietnam Conflict	Naval Historical Center	Compiled in August 2003 by the Naval Aviation History Office, Naval Warfare Division, Naval Historical Center. List of deployments of US aircraft carriers during the Vietnam War with sources where information was obtained. Includes the following aircraft carriers: USS AMERICA (CVA-66) USS BENNINGTON (CVS-20) USS BON HOMME RICHARD (CVA-31) USS CONSTELLATION (CVA-64) USS CORAL SEA CVA-43 USS ENTERPRISE (CVAN-65) USS FORRESTAL (CVA-59) USS FRANKLIN D. ROOSEVELT (CVA-42) USS HANCOCK (CVA-19) USS HORNET (CVS-12) USS INDEPENDENCE (CVA-62) USS INTREPID (CVS-11) USS KEARSARGE (CVS-33) USS KITTY HAWK (CVA-63) USS MIDWAY (CVA-41) USS ORISKANY (CVA-34) USS RANGER (CVA-61) USS SARATOGA (CV-60) USS SHANGRA-LA (CVS-38) USS YORKTOWN (CVS-10) USS TICONDEROGA (CVA-14)
2020.335.006	History of Marine Fighter Attack Squadron 312	Sambito, William J.	FOREWORD: Marine Fighter Attack Squadron 312, VMF-

Object ID	Title	Author	Summary
			312, the Checkerboard squadron, enjoys a fine reputation among Marine aviators. This volume, one of a new series of brief histories on famous aviation squadrons, is offered as a tribute to the pilots and crewmen who have contributed so significantly to Marine aviation. The author, Major William J. Sambito, earned his Bachelor of Arts degree in psychology from Colby College, Maine, and is an experienced helicopter pilot who served with HMM-262 and HMM-165 during the Vietnam War. After attending the Armed Forces Staff College, he was assigned in January 1975 to the History and Museums Division. It is hoped that each of the brief accounts in this series will awaken a new interest in unit history and inspire Marines to retain important materials and record events of historical significance. The Command Chronologies prepared semiannually are excellent vehicles for the accomplishment of this. Important source documents and narrative accounts should be included in them to ensure that the entire story is told. E. H. SIMMONS Brigadier General, U. S. Marine Corps (Ret.) Director of Marine Corps History and Museums Reviewed and approved: 15 June 1978 (from http://www.marines.mil/news/publications/Documents/A%20History%20of%20Marine%20Fighter%20Attack%20Squadron%20312%20PCN%2019000307700.pdf)

			VMA-311 matrix letters VL on the vertical stabilizer and the squadron insignia on the fuselage. USMC Photo A422813. Foreword by E. H. Simmons, Brigadier General, U. S. Marine Corps Ret. The History of Squadron 311 (Tomcats) is traced from commissioning in December 1942 through three wars and several evolutions during the unit make the transition from fighting squadron flying propeller driver planes to modern attack squadron equipped high-performance jet aircraft. the unit was conceived as a fighting squadron following the Japanese attack on Pearl Harbor. They also saw combat during the Korean conflict, and Vietnam. Chapters are from 194 --1973 with Appendixes of Chronology, Commanding Officers, Streamer Entitlement, and Squadron Insignia. Photos of F4U-1 Corsair, Yontan Airfield, Okinawa; Major Michael R. Yrunck; pilots, 1945; pilots Yokosuka, Japan 1945; and others. Marine Chief Warrant Officer Thomas C. Van Over pg. 53.

2020.335.008	Helicopter Anti-Submarine Squadron Twelve (HS-12) History, 1984-1986	Araya, Pablo	These are the Command Histories for Helicopter Anti-submarine Squadron Twelve (HS -12). The 1984 report gives a history of the squadron. On 15 July 1984, the squadron became part of Carrier Air Wing Five (CV-5) and the USS Midway. During 1984, HS-12 took part in 11 ASW exercise including FLEETEX 84-1, ANNUALEX 59G and ORE. They also established a joint Helicopter Operations Committee with the Japanese Maritime Self Defense Force (JMSDF). During 1985, the squadron joined the Korean Forces for exercise Team Spirit, then participated in Valiant Usher. The squadron (Wyverns) deck landing qualify (DLQ) aboard the USS Oldendorf (DD-972). They also participated in joint HS/VP real world ASW and two CSARs. After an E-w

Object ID	Title	Author	Summary
			mishap, the squadron was able to rescue one of the crewmen. 1985 includes a request from USNI writer Rosario Rausa and a draft of an article sent to him. 1986 the squadron had six SH-3H helicopters, tailcode NF 611-616. In 1986, the squadron took part in Exercise Cope Thunder During exercise in the Philippine OPAREA Buno 152136 was lost, but all crew were rescued. While Midway was in EISRA 86), the squadron embarked three separate detachments aboard USS Oldendorf (DD-972). During September HS_12 conducted ASW exercise with Japanese diesel submarines, and was commended for obtaining the best inspection of 26 ASWWINGPAC squadrons. The end of the year the squadron embarked on Midway again to go to see for Carrier Qualification. Commanding Officers W. A. Roop, Jan 84 - May 85 J. K. Marshall, May 85 - Nov 86 W. D. Young, Nov 86 - Apr 88 J. H. Winter, Apr 88 - Jan 89 D. Roulstone, Jan 89 - Jan 91 T. A. Meyers , Jan 91 - May 92
2020.335.009	Helicopter Anti-Submarine Squadron Twelve (HS-12) History, 1987-1991	Winne, W. J.	These are the Command Histories for Helicopter Anti-submarine Squadron Twelve (HS -12). The squadron flies six Sikorsky SH-3H Sea King helicopters with tail numbers NF 611-616. 1988 began with ASW training and performing surface search (SSC), plane guard and logistics duties. In February HS-12 took part in BUSY CUSTOMER exercise, and in March EXTENDEX/ASWEX and TEAM SPIRIT. HS-12 hosted the fifth Helicopter Operating committee (HOC) Symposium at Atsugi, Japan. Other exercises were MEKAR '88 and COBRA GOLD '88 aboard USS Oldendorf (DD-972) with Malyasia and Thai navy, and assisted in the rescue of thirty-five Vietnamese refugees.

Object ID	Title	Author	Summary
			Supported the Seoul Summer Olympics and took part in TORPEX. Typhoon Nelson delayed commencement of ANNUALEX 63G until 8 October. Rescue of four downed airmen from HSL-37 DET 10 helo. Typhoon Ruby disrupted flight ops, then operations coordinated with USS Bunker Hill (CG-52). Midway received ACLS certification. Seven pilots and three aircrewman were detached to HS-10 at NAS North Island for tactical training in December. Provided emergency Medevac services twice during the year. HS_12 attended the sixth HOC Symposium at Tateyama, Japan. HS-12 received the Battle E for combat readiness for 1988 and was the runner up for the CINCPACFLT Golden Anchor Award. The squadron was the COMNAVAIRPAC NOMINEE FOR THE Isbell and Thatch Awards for ASW excellence in 1988 and repeated as the winner of the COMASWWINGPAC Top torpedo Award, winning for the third time in four years. Reference OPNAV 5750.12E Call sign Speargun Squadron flies six Sikorsky SH-3H Sea King CILOP helicopters with tail numbers NF 610-615. Began the year conducting ASW operations with USS Rodney M Davis (FFG-60), HSL -47/1, and P-3 assets. Other exercises were READIEX and SAREX. Conducted ASW with the USS Sterett (CG-310), and participated in TEAM SPIRIT in March. Awarded Battle E. Earned Meritorious Unit Commendation and receives Isbell Trophy. Conducted three MEDEVACS between 31 May to 19 June. One was a Vietnamese boat person taken aboard by the USS Fife and USS Sterett. Typhoon Gordon ridden out in Subic Bay. On 22 June rescued a F/A-18 pilot from Midway whose plane had an engine failure. Exercise

Object ID	Title	Author	Summary
			ASWEX 89-2US and ENCOUNTEREX. Tropical Storm Faye caused cancellation of some events. In July Special Weapons Proficiency Inspection with zero/zero inspection achieved for second year in a row. Provided two helos for ASW ACTIVE TRACK. Receives Thach Award. Receives Antisubmarine Warfare Wing, Pacific Fleet Semiannual Retention award, receives the Top Torpedo Award for the third consecutive time. During the Nov-Dec Pilippine coup attempt, HS-12 provided one aircraft in support of Operation Classic Resolve. 4 December Speargun 614 rescued six Filipino fisherman after an all night search. Commanding Officers W. A. Roop, Jan 84 - May 85 J. K. Marshall, May 85 - Nov 86 W. D. Young, Nov 86 - Apr 88 J. H. Winter, Apr 88 - Jan 89 D. Roulstone, Jan 89 - Jan 91 T. A. Meyers , Jan 91 - May 92

2020.335.010	Carrier Deployments for Westpac and Vietnam, 1964-1975	Woodley, James W.	Permission to include this in the Midway Library network was given by USCS President, Richard D. Jones, on March 20, 2020. The Universal Ship Cancellation Society is an organization of people who collect naval ship postmarks. This data sheet was compiled by a member, James (Jim) W. Woodley, Jr. in 2003 and published by USCS in 2004. This data sheet provides a listing of the United States aircraft carriers that participated in either Westpac and/or Vietnam deployments. This listing does not, however, distinguish which individual deployment was Westpac or Vietnam. It is safe to assume that each carrier that made a Westpac deployment did in fact spend time in Vietnam during the time period of 1964-1975. In addition, the squadrons (and air wings) that were deployed with the carriers are also listed. Our first carrier was on station in 1964 and

Object ID	Title	Author	Summary
			the last one left in 1975 according to the source from which I obtained this information. The carriers are listed in an individual ship format in the order as their deployments occurred by date of arrival and departure. This data was obtained from the Department of the Navy--Naval Historical Center, Naval Aviation History Branch.
2020.335.011	Collected Adventures of Nick Danger, Third Eye, The	Reddig, J. R.	Compilation of stories first published in the USS Midway daily Multiplex. Reddig wrote these spoofs (inspired by but with no connection to the Firesign Theatre's character) onboard ship as daily serials in the USS Midway newsletter, Midway Multiplex, in 1979 and 1980. Reddig was an Ensign and served with VA-56 as Air Intelligence Officer at the time. "Written over about 100,000 miles, published in Japan, printed in Korea." The book is dedicated to "my shipmates onboard USS Midway (CV-41) and my airwing buddies (CVW-5), 1978-80." Also included are The Adventures of Nick Danger in the Indian Ocean and The Tattered Casebook of Nick Danger. Former USS Midway crew member.
2020.335.012	Alternatives Available To Fulfill the Navy's Training Carrier Needs	Horan, Donald J.	This analysis was written by Donald J. Horan of the General Accounting Office and was addressed to the Honorable Joseph P. Addabbo, Chairman, Subcommittee on Defense, Committee on Appropriations, House of Representatives. The analysis evaluates replacing the USS Lexington (CV-16) (a dedicated training carrier since 1962) with another Essex class carrier or with a Midway class carrier. Essex class carriers were used for spare parts for the Midway class carriers, and Midway class carriers would require extensive dredging and upgraded electrical to moor at Pensacola.
2020.335.013	USS Midway (CV-41) Wardroom Rules and Regulations, 1974	USS Midway	This booklet was a welcome to new Officers in the Wardroom Mess. It gives the organization of the Mess; the Regulations

Object ID	Title	Author	Summary
			which include mess bills, mess share, rebates, and guests; meal service hours with airwing embarked and without airwing embarked; etiquette, and diagrams of wardroom staterooms. C. W. Roe was the XO, K. L. Prater was the wardroom mess caterer, and H. C. Haynsworth was the Supply Officer.
2020.335.014	U.S. Navy Medicine, December 1973	Bureau of Medicine and Surgery	This periodical includes an article "Crash on the Flight Deck : A Mass Casualty Narrative" written by LCDR Donald A. Vance, USS Midway flight surgeon. It is a description of how the Midway medical department responded to a crash of an Intruder, A-6A, Intruder, on 24 October 1972. Five people died and 23 were seriously injured.
2020.335.016	Optimum Wind-Over Deck for Shipboard Recovery Operations with Carrier Based Airplanes	Naval Air Test Center Patuxent River, Maryland	AD: 281-862. Reproduced by Armed Forces Technical Information Agency, Arlington Hall, Arlington, VA.. Airflow disturbance aft of the ramp and in the landing area is one of the most significant adverse influences on the pilot's ability to make a precise carrier final approach and landing. and is primarily affected by Window-Over-Deck (WOD). Tests conducted on board USS MIDWAY (CVA-41), USS RANGER (CVA-61), USS CORAL SEA (CVA-43), and USS SARATOGA (CVA-61) determined that, from the pilot's viewpoint, a WOD of 25 kt for jet and 15 kt for propeller airplanes is optimum. Conclusions are drawn concerning required glide slope angles and the undesirable demands imposed on pilots by variations in carrier landing conditions.
2020.335.020	U.S. Navy Medicine	Naval Medical Command	Volume 76, Number 1. January-February 1985. One page article, "Three Services Aboard Midway" by JO2 D. Rider, describes how the Midway "may have set a precedent for interservice cooperation in aviation-oriented medicine. CAPT Bruce Siggins, USA and SSGT David Lewis, USAF

2020.335.021	Logistic Support of the Navy	Bureau of Naval Personnel	From the Executive Summary: The purpose of this report is to provide a clear, concise description of Navy logistic support in order to furnish a common understanding, permit identification of problem areas, and form a basis for an overall plan for improvement. To accomplish the foregoing, a Navy Logistic Support Task Force was established under the monitorship of the Assistant Secretary of the Navy (Installations and Logistics). The Materiel Support Steering Committee, co-chaired by the Deputy Chief of Naval Operations (Logistics) and the Chief of Naval Materiel supervised th effort. The charter of the Materiel Support St Steering Committee is set forth in Appendix A.
2020.335.022	History of the Attack Aircraft Carrier USS Midway (CV-41)	USS Midway	The six page summary written by the USS Midway Public Information Office, covers the period from the Midway's launching on March 20, 1945 (17 months following it's keel laying in Newport News Shipyard, Virginia) through its March 25 return to its homeport in Alameda, California. The summary includes its being named for the Battle of

Object ID	Title	Author	Summary
			Midway, early milestones, and first extensive renovation between September 1955 and September 1957 at Bremerton in Washington State.
2020.335.023	Armed Forces Staff College Demonstration Cruise	USS Midway	Includes a schedule for the cruise, a brief history and physical characteristics of the USS Midway (CVB-41). Schedule included an air intercept demonstration, an underway refueling with a destroyer, and some of the Airgroup planes making a mock target run on a smoke target produced by the destroyer. Demonstration cruise took place on 27 April 1949.
2020.335.024	USS Midway (CV-41) - Gonzo Station Coloring Book - Indian Ocean, September 1979-February 1980	USS Midway	This is a collection of comics and cartoons that was produced aboard the USS Midway during their stay in the Indian Ocean in response to the Iranian Hostage Crisis. While on location, the USS Midway Production Staff and Public Affairs Staff put out the Gonzo Coloring Book which was mailed back home to families of the sailors. Gonzo was an acronym for Gulf of Oman Naval Zone of Operations" or "Gulf of Oman Northern Zone." This book is available under Media above and also on Library 1 Onedrive\Emanuals (under the objectid number)
2020.335.025	USS Midway (CVA-41) - Westpac Log - Featuring Snoopy - 1972-73	Girard, W. E.	This book is a collection of Snoopy cartoons and humorous anecdotes about the Midway from 16 April 1972 to 9 February 1973. Forward [sic], Dedication, Thanks, Apologies, Humorous Anecdotes, and like that How did "Snoopy ala Airplan" come about? I'll never forget the feeling when I presented the first airplan to the ship's Ops Officer, CDR "Al" Johnson. After a careful perusal his first question was, "Where's the Snoopy?" Being new to carrier aviation and airplans, my thoughts ran rampant with, "Let's see, we've got the Barcap, Tarcap, Migcap,

Object ID	Title	Author	Summary
			Walleye, Pocket Money, and all that, but what the hell's a "Snoopy"?" Fortunately, before I could utter my smartest, "Err - umn - uhh" he clarified the situation and shot down the first airplan for a rewrite --- complete with Snoopy, and with a sigh of relief the first airplan hit the press. In order to give you a hint of my feelings the next day however, an apropos "humorous anecdote" is in order at this point. "Once upon a time there was a girl in our home town about to enter that stage of puberty which separates the girls from the women. Her mother had carefully explained what to expect and how to handle it. Sure enough the day came but the poor girl (woman) was still quite unhappy and somewhat distressed about the state of affairs anyway. Finally, several days later, things had returned to normal and breathing a sigh of relief the girl said, 'I'm sure glad I don't have to go through that again!'" Needless to say, I was relieved to have gotten "The dog" over and done with on the first airplan, but when the Ops Boss looked at airplan #2 and said, "Hey, ya forgot Snoopy again. Ya know ya gotta have one for every airplan on the cruise!", I knew what that girl felt like about 28 days later. So - thanks to the Ops Boss, here's a collection of "The Dog". Of course, while we're passing out thanks, we have to give Mr. C. Schulz our thanks and apologies - the reason for both being obvious. AIRWING FIVE received the dirty end of the stick on most of the jokes. A lot of things happen each day on the ship that contain a humorous side, but since our Snoopy came from Air Ops, most of the topics are concerned with that area. Since it's always easier to poke fun at someone else than at yourself, AIRWING FIVE got poked. None of the jokes were meant to be malicious and in spite

Object ID	Title	Author	Summary
			of appearances, we think the Wing's Sierra Hotel. Dedicationwise - we've all seen the Kudos and laudits MIDWAY, A1RWING FIVE, and COMCARDIVONE have received. Regardless of what others say there is a feeling that comes when you know you're on the "Number One" team. I personally feel that the night we picked up a sister carrier's load after twelve "plus" hours of our own air ops we had really proven we were the best. The feeling remains, so - here's to ya. Sincerely (signed) W.E. GIRARD LT USN Chopped: (signed) Air Operations Officer Approved: (signed) Snoopy Operations Officer

2020.335.063	Marine Composite Reconnaissance Squadron One (VMCJ-1) - Command Chronology 1 April 1975 - 30 June 1975.pdf	Bloomer, W. A.	Marine Composite Reconnaissance Squadron One, VMCJ-1, is a part of the Marine Aircraft Group 15, 1st Marine Aircraft Wing, Fleet Marine Force, Pacific. This Command Chronology was submitted by LTCOL W. A. Bloomer, Commander of the squadron based at MCAS Iwakuni, Japan, and dated 1 July 1975. Includes list of officers and their department; list number of officers and enlisted for time period; gives summary of activities. VMCJ-1, Detachment 101 embarked on USS Midway for two cruises with average of three (3) RF-4B and three (3) EA-6A aircraft. The squadron provided Operation Frequent Wind by the EA-6A aircraft normally assigned to Midway were cross-decked to the USS Coral Sea (CVA-43). After OFW, these planes/men were returned to Midway. Took part in Exercises Eagle/Lark, Radar Navigation Scoring, Breaklock, Beaver Hound, and Cope

			Jade. This detachment was presented with a Meritorious Unit Citation for operations during the period 13 January 1973-31 July 1973. Includes list of significant events by date; flight time and sortie recap; photo missions completed; type missions flown in support of USS Midway; mission explanation; squadron ground lectures given; copy of Meritorious Unit Commendation.
2020.335.064	USS Midway's Undocumented A-4 Skyhawk Squadron, H&MS-15 DET N	Prince, Troy	Headquarters and Maintenance Squadron 15 DET N (H&MS-15 DET N) was aboard the USS Midway 26 October to 10 November 1965 during the 1965 Vietnam Combat cruise. From the author: I recently acquired a photograph showing a USMC A-4C Skyhawk crash landing into the barrier aboard USS Midway on 29 OCT 1965. A quick look at Midway's deck log entries for that date confirmed that the incident really happened aboard Midway. However, it also prompted me to investigate why a Marine aircraft was aboard when all previously published documentation about USS Midway's 06 MAR 1965 - 23 NOV 1965 Westpac/Vietnam cruise, including the 1965 USS Midway cruise book, shows Carrier Air Group TWO was composed of 12 squadrons - all U.S. Navy. This is the author's researching explaining the presence of the Marine squadron. H&MS-15 DET N was squadroned on the USS Hornet and were also temporarily transferred to USS Ticonderoga (CVS-14), USS Midway (CVA-41), and USS Ranger (CVA-61) for brief periods. Includes photo of plane in barrier, deck log of Midway for 29 October 1965, photos of squadron patches, photo of planes, photos of squadron that were in the USS Hornet cruise book

2020.339.001	Paravane Handbook 1943	Bureau of Ships	3. The paravane is a special type of water kite designed to prevent ships from striking a moored mine, and consists of a streamlined body with plane, rudder, and cutter head. Two para.. vanes are towed, one on each side of the ship, by means of specially constructed wire towropes attached to a fitting which bears on, or is supported at, the forefoot of the vessel and can be raised to the weather deck for rigging the towropes. Contents: SECTION I. General information. II. Description of paravanes. III. Description of ship installations. IV. Towropes. V. Handling paravanes on vessels fitted with sliding shoe device. VI. Handling paravanes on vessels fitted with clump and chain device and also pipe and chain device. VII. Handling paravanes on vessels fitted with boom device. VIII. Disassembly and assembly. IX. Stowage and care of paravanes. X. Inspection and adjustment before use. XI. Issue and replacement of paravanes and paravane equipment.
2020.344.001	Paravanes : Midway's Sea Mine Countermeasures	Hyde, Richard	FOR INTERNAL USE ONLY - DO NOT DISTRIBUTE OUTSIDE THE SHIP. The British developed a design for use against moored mines. They shared this with the US

Object ID	Title	Author	Summary
			and named it paravane also known as water kite. Paravanes were installed on many ships between World War I and World War II. The USS Midway had paravanes from 1945 to about 1950. This paper explains the design, the operation, and the equipment with many illustrations. There is an additional article about mine countermeasures in Operation Desert Storm. One of the reasons that Qurah was liberated first was to gain more knowledge of Iraq's mine fields. The liberation was aided by Midway's HS-12 off the USS Leftwich.
2020.346.001	Survival Training Guide	Chief of Naval Operations, Air Training Division	This manual was written to serve as a sourcebook for Survival Officers and to provide essential information for their survival lectures. It can serve also as a textbook for naval aviators who are being trained for survival or who are interested in personally studying and reviewing survival techniques. Chapters include: The Mental Element in Survival The Why and How of Survival Training Inflight Survival Abandoning Flight Rescue Survival Hazards First Aid and Personal Hygiene Sea Survival Shelters and Beds Drinking water Firemaking and Cooking Fish and Fishing Securing Animal Food Preservation of Meat, Birds, and Fish Plant Foods Primitive Land Travel Ground Navigation and Orientation Rivers and Rafts Back Packing Improvising Survival Clothing and Equipment Regional Survival Situations Survival in the Arctic Desert Survival Survival in the Tropics
2020.347.001	Last Voyage of USS Pueblo, The	Brandt, Ed	An account of the Pueblo Incident based on interviews with 15 members of the crew.

2020.347.002	World War Two Submarine, A	Humble, Richard	Text and cutaway illustrations depict how the crew lived beneath the ocean in a submarine during World War II and how they waged war on the ships above.
2020.347.003	Submarine Diary : The Silent Stalking of Japan	Mendenhall, Corwin	Subtitle on jacket: The silent stalking of Japan. One of the most interesting memoirs of the American submarine campaign in the Pacific during World War II. Mendenhall was an ensign assigned to the fleet submarine USS Sculpin and stationed at Manila in the Philippines when the Japanese attacked Pearl Harbor. This book is a diary of the seven war patrols he made aboard the Sculpin and the four patrols on the newer Pintado . Though armed with defective torpedoes, these boats were for a time the only U.S. naval force carrying an offensive war to the Japanese. Mendenhall provides a vivid and detailed account of life aboard these World War II subs.
2020.347.004	U-boat Commander : A Periscope View of the Battle of the Atlantic	Cremer, Peter Erich	These horrifying statistics on the survival rate of the German wolf packs in World War II are at last given meaning in this true-life thriller by famed U-boat ace Peter "Ali" Cremer. One of just three senior submarine commanders to survive, Cremer conveys the realities of the war as few writers can.
2020.349.001	World's Greatest Military Aircraft, The : An Illustrated History	Newdick, Thomas	"Ever since man first took to the air, combat aircraft have been at the forefront of technology, resulting in some of the most spectacular and complex machines ever built. Compare a biplane and a Stealth fighter and see how the technology has advanced. Spanning a century of flight, The World's Greatest Military Aircraft features 52 of the greatest fighters, bombers, interceptors and transport planes, from World War I's Fokker Dr. 1 to the Boeing B-17 Super Fortress to the MiG-17 to the Lockheed C-130 Hercules to the Stealth capabilities of the Lockheed Martin F-22 Raptor. Contains copies of Impact from the Office of the Assistant Chief of Air Staff, Intelligence: Vol. 2, No. 9, September 1944 Vol. 2, No. 10, October 1944 Vol. 2, No. 11, November 1944 Vol. 2, No. 12, December 1944
2020.357.001	A-3 Skywarrior Units of the Vietnam War	Morgan, Rick	The Douglas A-3 Skywarrior, though something of a cult favourite, remains a largely unremarked classic of Naval Aviation. Built for nuclear weapon delivery, the A-3 made its name in Vietnam as a conventional bomber, tanker and Electronic Warfare platform. It was the largest aircraft ever regularly operated from the decks of aircraft carriers, earning it the fleet-wide nickname 'Whale'. It excelled in every mission area assigned to it and operated in the US Navy for more than four decades, from 1956 through to 1991. Fully illustrated to depict the incredible array of paint schemes and its awesome size, this volume focuses on the type's Vietnam service, which saw the aircraft briefly used as a bomber over both North and South Vietnam from March

Object ID	Title	Author	Summary
			1965, before the Skywarrior proved far more valuable as a multi-role tanker (KA-3B) and tanker/tactical jammer (EKA-3B). The title includes details on all of these operations as well as more clandestine reconnaissance missions, and provides information about the men that flew them.
2020.358.001	Rain of Steel : Mitscher's Task Force 58, Ugaki's Thunder Gods, and the Kamikaze War off Okinawa	Moore, Stephen L.	"Rain of Steel follows Navy and Marine carrier aviators in the desperate air battles to control the kamikazes directed by Vice Admiral Matome Ugaki. Vice Admiral Marc Mitscher's Task Force 58 carriers had conducted air strikes on mainland Japan and supported the Iwo Jima landings, but his aviators were sorely tested once the Okinawa campaign commenced on April 1, 1945. Ugaki would unleash ten different Kikusui aerial suicide operations, one including a naval force built around the world's most powerful battleship, the 71,000-ton Yamato. These battles are related largely through the words and experiences of some of the last living U.S. fighter aces of World War II"-
2020.359.001	Akagi, Vol. 1	Jarski, Adam	This Polish-English book covers the Japanese aircraft carrier, Akagi. Chapters include the beginnings of Japanese naval aviation; 8-8 fleet completion program; picture of USS Saratoga in shipyard; pictures of USS West Virginia, USS Colorado, USS West Virginia; design of Akagi and her conversion into a carrier; technical description; ship's timeline till the outbreak of war.
2020.363.001	Brothers Down : Pearl Harbor and the Fate of the Many Brothers Aboard the USS Arizona	Borneman, Walter R.	The surprise attack at Pearl Harbor on December 7, 1941 crippled America's battleship fleet, thousands of lives were lost, and the United States was propelled into a world war. Few realize that aboard the iconic, ill-fated USS Arizona were an incredible 79 blood relatives. Tragically, in an era when family members serving together was an accepted, even encouraged, practice, sixty-

			three of the Arizona's 1,177 dead turned out to be brothers. Borneman guides readers on an unforgettable journey of sacrifice and heroism, all told through the lives of these brothers and their fateful experience on the Arizona. -- [Adapted from jacket by LOC).
2020.363.002	Sea Stories : My Life in Special Operations	McRaven, William H. (William Harry)	USS Midway is mentioned on page 125 when an A-7 dropped two five-hundred-pound bombs into the hull of the Amuriyah, sinking her off the coast of Bubiyan Island. "Admiral William H. McRaven is a part of American military history, having been involved in some of the most famous missions in recent memory, including the capture of Saddam Hussein, the rescue of Captain Richard Phillips, and the raid to kill Osama bin Laden. Sea Stories begins in 1960 at the American Officers' Club in France, where Allied officers and their wives gathered to have drinks and tell stories about their adventures during World War II -- the place where a young Bill McRaven learned the value of a good story. Sea Stories is an unforgettable look back on one man's incredible life, from childhood days sneaking into high-security military sites to a day job of hunting terrorists and rescuing hostages."--Amazon.
2020.363.003	Twilight of the Gods : War in the Western Pacific, 1944-1945	Toll, Ian W.	The final volume of the magisterial Pacific War Trilogy from acclaimed historian Ian W. Toll, "one of the great storytellers of war" (Evan Thomas). Twilight of the Gods is a riveting account of the harrowing last year of World War II in the Pacific, when the U.S. Navy won the largest naval battle in history; Douglas MacArthur made good his pledge to return to the Philippines; waves of kamikazes attacked the Allied fleets; the Japanese fought to the last man on one island after another; B-29 bombers burned down Japanese cities; and Hiroshima and Nagasaki were vaporized in atomic blasts. Ian W. Toll's narratives of

Object ID	Title	Author	Summary
			combat in the air, at sea, and on the beaches are as gripping as ever, but he also takes the reader into the halls of power in Washington and Tokyo, where the great questions of strategy and diplomacy were decided. Lionel Barber of the Financial Times chose the second volume of the series (The Conquering Tide) as the preeminent book of 2016, calling it "military history at its best." Readers who have been waiting for the conclusion of Toll's masterpiece will be thrilled by this final volume."- From the publisher
2020.365.001	American Women and World War II	Weatherford, Doris	"Of all the nation's wars, perhaps none was more important for the evolution of women's roles in American society than World War II. At no other time in history had the United States been faced with such a clear choice in its wartime strategy: either draw women closer to the mainstream of military and industrial life or lose the war for the sake of outmoded attitudes and beliefs. 'American Women and World War II' tells the story of the whole body of American Women who answered their country's call, both on the home front and on the front lines"-- Inside cover pt. 1. Be a nurse and see the world. Military nurses in battle - - Calling all nightingales -- pt. 2. The military woman. 2020.365.002	Beyond Rosie : A Documentary History of Women in World War II	Brock, Julia (ed)	"More so than any war in history, World War II was a woman's war. Women, motivated by patriotism, the opportunity for new experiences, and the desire to serve, participated widely in the global conflict. Within the Allied countries, women of all ages proved to be invaluable in the fight for victory. Rosie the Riveter became the most enduring image of women's involvement in World War II. What Rosie represented, however, is only a small portion of a complex story. As wartime production workers, enlistees in auxiliary military units, members of voluntary organizations or resistance groups, wives and mothers on the home front, journalists, and USO performers, American women found ways to challenge traditional gender roles and stereotypes. Beyond Rosie offers readers an opportunity to see the numerous contributions women made to the fight against the Axis powers and how American women's roles changed during the war. The primary documents (newspapers, propaganda posters, cartoons, excerpts from oral histories and memoirs, speeches, photographs, and editorials) collected here represent cultural, political, economic, and social perspectives on the diverse roles women played during World War II."--Page 4 of cover. Introduction -- Into the factories - - New opportunities, new challenges -- Women's auxiliary services -- "Make do and mend" : women and the home front -- The secret war -- Appendix 1: Timeline --

2020.365.003	Build 'em by the Mile, Cut 'em Off by the Yard : How Henry J. Kaiser and the Rosies Helped Win World War II	Gilford, Steve	This book is about a time when millions of Americans put their hearts, minds, and bodies into a clearly recognized goal, defeating the forces of Germany and Japan. The stories of the people who accomplished this are a reminder of the potential of this nation to rise up and meet a challenge. The Second World War is long over [but] once again, vital challenges face us. When they seem overwhelming and when the task seems as though it might be too much for us, we can turn to the example of America's World War II home front and in particular to the Kaiser Shipyards in Richmond, California."
2020.365.004	Our Mothers' War : American Women at Home and at the Front during World War II	Yellin, Emily	Emily Yellin's <i>Our Mothers' War</i> provides a broad overview of the experiences of American women during World War II. She began this work after discovering in an attic her mother's letters, photographs, and notes from her time as a Red Cross volunteer in the Pacific. This discovery led Yellin to seek out the experiences of other women like her mother whose stories, Yellin believed, were still in boxes in their own attics. Her study looks at the experiences of women commonly associated with the war, such as women in the Women's Army Corps and women who worked in defense production factories, as well as women whose experiences during the war are less well known, such as female journalists and Jewish women in the military. Although Yellin offers little analysis of the experiences she documents, it does succeed in bringing the voices of these women to the forefront of her work. Yellin begins by looking at women who sent their

Object ID	Title	Author	Summary
			husbands or sweethearts to war and then found themselves in the new position of providing for their children on their own, all the while trying to help the war effort through rationing, Victory Gardens, and community programs. The author also looks at families who lost husbands and fathers to the war, an experience illustrated by the Sullivan family who lost five sons. Yellin argues that these women expanded the conception of a homemaker to include numerous ways that women could contribute to American society. Yellin then looks at the experiences of the more than six million women in the workforce during the war. These women worked in wartime industrial production plants building ships and airplanes, they worked in sales and clerical positions, and they worked in hazardous munitions plants. She points out that the addition of white, middle-class, married women to the workforce required a government-sponsored public relations campaign that assured women would remain feminine and work only for the duration of the war. She also points out the failure of government and industry to provide adequate child care facilities and to provide equal pay for women workers, but implies that these issues, raised during the war, persisted in the years after it. Two chapters illustrate the various ways women participated in the military, both on the homefront and in the overseas theaters. Yellin looks at the congressional struggle to create the women's corps and the limitations placed on their service. Even when the Women's Army Corps (WAC) became a part of the Army and not merely an auxiliary, for example, the women still did not receive equal rank, pay, or benefits. Women in the

Object ID	Title	Author	Summary
			military also faced rumors about their character that included charges of lesbianism and sexual promiscuity. Despite the impediments to their service, Yellin shows that women in the military filled a number of roles, including weather observers and forecasters, radio operators, control tower operators, pilot instructors, aerial photograph analysts, cryptologists, mechanics, scientists in the Manhattan Project, clerical workers, and switchboard operators. Military nurses served both at home and overseas, while the Cadet Nurse Corps provided tuition to student nurses who would serve for the war's duration as civilian or military nurses upon graduation. Women volunteers also served on the homefront and overseas through organizations like the Red Cross, the United Service Organization (USO), the Office of Civilian Defense, the American Women's

2020.366.001	USS Midway (CVA-41) - Cruise - 1959-60	Welles, Chris (ed)	Pictorial account of the USS Midway (CVA-41) deployment to the western Pacific (WestPac) departing Alameda, CA 16 August 1959 and returning in March 1960 with CVG-2 consisting of VF-21 (F-3H Demons), VA-22 (FJ-4B Furys), VA23 (FJ-4B Furys), VF-24 (F8U/F-8 Crusaders), VA-25 (AD/A-1 Skyraiders), and VAH-8 (A3D/A-3 Skywarriors) embarked aboard. Port calls included Pearl Harbor, Guam, Subic Bay, Buckner Bay, Yokosuka, Kobe, Sasebo and Hong Kong. Good pics of heavy seas in Typhoon Charlotte.
2020.368.001	USS Midway (CV-41) - Movin' West - 1974	Hughes, Ken (ed)	Pictorial account of the change of homeports of USS Midway (CV-41) from Alameda, CA to Yokosuka, Japan in 1973 and other activities the ship engaged in through at least September 1974 when Midway entered the shipyard in Yokosuka. The ship departed the San Francisco Bay area on 11 September and arrived at Yokosuka on 5 October. No significant operations or exercises were noted other than a period of Refresher Training. Port calls in the period included, Hawaii, The Philippines, Hong Kong and Pusan. Four pages of Frank Sinatra visit to the Midway on 5 July 1974.
2020.368.002	USS Midway (CV-41) - A Touch Of Salt - 1976-1978	Begy, C. R. (ed)	Pictorial account of USS Midway, lead ship of its class, activities during the period of 1976 to 1978 including an 89 day South China Sea/Indian Ocean deployment commencing in August of 1977. The ship departed from Yokosuka, Japan. There is a 1976 cruise book, and a 1978-79 cruise book. One source on the internet lists 4 deployments in 1976, 3 deployments in 1977, and 2 deployments in 1978. It is difficult to determine which deployments this book covers. Port calls in this book included the Pusan, Hong Kong, Subic Bay, Freemantle (Perth), Karachi, Singapore, Diego Garcia, Bandar Abbas,

Object ID	Title	Author	Summary
			Misawa, Kadena. Onboard was Carrier Air Wing Five (CVW-5) . Squadrons listed in this book but which change with other deployments in 1977 are: VF-161 (F-4N) VF-151 (F-4N) VA-115 (A-6A/B and KA-6D) VAW-115 (E-2B) VQ-1 VMAQ-2 Det. (EA-6A) HC-1 Det.B-1 and B-2 (SH-3G) The following was written by Pete Clayton and Robert L. Broadus and appears on page 279 of the Midway cruise book for 1978-79: Beginning in May of 1977, VF-151 and VF-161 transitioned to F-4Js and VA-56 and VA-93 started flying A-7Es. VA-115 also exchanged their A-6As and Bs (A-6Bs) for A-6Es. This CVW-5 transition occurred while the ship was in port for its 60 day EISRA (Extended Incremental SRA, a unique modernization concept developed for Midway). The air wing transition was completed in September when USS Coral Sea fighter squadrons VF-191 and VF-194 exchanged their F-4Js with Midway's F-4Ns, prior to Coral Sea returning to Alameda after her 1977 deployment. In late 1977, Midway made an 87 day deployment to the Indian Ocean where she was the principal participant in Midlink 77, an exercise hosted by the Iranian Navy and including representation from Pakistan, Turkey, and the Royal Navy.
2020.370.001	Halsey's Typhoon : The True Story of a Fighting Admiral, an Epic Storm, and an Untold Rescue	Drury, Bob	At the height of the Pacific invasion, Halsey's 170 ships are blindsided by a typhoon of unprecedented strength and scope. Battleships are tossed like toys, fighter planes are blown off carriers, destroyers are capsized, and almost nine hundred sailors are swept into the roiling, shark-infested sea. For three days, small bands of survivors fight dehydration, exhaustion, and the elements to await rescue--but ultimately almost eight hundred will perish. This is the story of

Object ID	Title	Author	Summary
			World War II's most unexpected disaster.
2020.370.002	Rendezvous with Destiny : A Sailor's War	Mason, Theodore C.	The author looks back on his career in the Navy over the entire course of the war. Written from the perspective of a young enlisted man, the book begins with his decision to join the service in 1939, continues through his baptism of fire at Pearl Harbor, and ends with V-J Day and some additional thoughts on the changes he has seen in the country and its navy since the war's end. It offers rare insights into the views, reactions, opinions, and philosophies of the World War II sailor.
2020.370.003	Naval Officer's Guide, The	Mack, William P.	A collection of information and advice for officers in the U.S. Navy intended to serve primarily as a resource from their preparation for commissioning through their years as junior officers.
2020.371.002	Dental Corps of the United States Navy, The : A Chronology, 1912-1977	Bureau of Medicine and Surgery	A history of the Navy Dental Corps (1962-1977). 65th anniversary.
2020.371.003	History of the Dental Technician Rating : A Chronology 1921 - 1984	Naval Medical Command	A chronology of significant events regarding the Navy's Dental Technician rating. Included is the date 2 April 1948, which marked the first time enlisted men of the navy wore a dental rating badge.
2020.373.001	Flight : 100 Years of Aviation	Grant, R. G.	From the early pioneers to the latest spaceflight technology, this groundbreaking book charts the inspirational story behind humankind's conquest of the skies. In the 100 years since the Wright brothers' first powered flight, aviation has witnessed many memorable events. From record-breaking flights and aerial warfare, to advances in aircraft design and the race for space, Flight covers the most memorable moments in the history of aviation. Describing the feats of the brave men and women who piloted the early flying machines, to the pioneers of long-distance flight and the test pilots who ushered in the jet age, Flight is a gripping narrative of humankind's quest to conquer the skies and

			explore space. Loaded with spectacular full-color photographs, dramatic first-hand accounts, and fact-filled profiles on a huge range of aircraft, this is an enthralling account of a century of innovation and adventure. Publication Date: September 1, 2002
2020.373.002	Complete Book of World War II Combat Aircraft, 1933-1945	Angelucci, Enzo	This book presents in full color -- and special, large format -- all the aircraft, both Allied and Axis, that took part in World War II. Fighters, bombers, assault aircraft, torpedo launchers -- from the biplanes of the late thirties to the first jets of 1945, from the most famous to the lesser known -- all are described and presented according to the period in which they were planned and employed, and all are accompanied by original photographs and technical information.
2020.375.001	USS Midway (CV-41) - Fortieth Anniversary 1945-1985 - The Magic Goes On - 1984-85	Williamson, Willie (ed.)	A pictorial account of an approximate 2-year period in Midway's forward deployed life. It covers the 28 December 1983 to 23 May 1984 deployment to the Western Pacific--Indian Ocean and Persian Gulf; the 15 October 1984 to 12 December 1984 deployment to the Western Pacific, and the history of the Midway until she went in to drydock in March of 1985.. Midway was at this time homeported in Yokosuka, Japan. During the 5 month cruise (1984 -85), Midway spent 111 continuous days at sea (on Gonzo Station) and steamed over 63,000 miles. Conducting almost 9,800 hours of flight operations, she launched and recovered over 5,300 aircraft, breaking the all-time record for the first quarter in any year of her history. Ports visits included Sasebo, Subic Bay, Manila, Pattaya Beach, and Singapore. A visit to Perth was cancelled to take up a USS Kitty Hawk commitment in the Indian Ocean. Carrier Air

			interviews, correspondence, and diaries, as well as archival material, [the authors] tell the remarkable story of America's 'few good women' who today make up more than 15 percent of the U.S. armed forces and who serve alongside men in almost every capacity."--
2020.379.002	USS Midway : America's Shield	McGaugh, Scott	The USS Midway first set sail in 1945, with thousands of young men aboard. When it made its final return to port nearly fifty years later, more than 200,000 sailors-with an average age of nineteen-had served on the floating aircraft carrier. The crew witnessed such significant events as nuclear threats during the Cold War, confrontations with Mao Tse-Tung, espionage battles with the Russians, a fire that nearly sank the floating aircraft carrier, and the liberation of Kuwait. This collective memoir of the brave Americans who faced these threats while at sea provides a compelling story of empowerment and optimism. Scott McGaugh is the marketing director of the USS Midway Museum and a spokesman for Midway University, the museum's education program. In addition to discussing the subject on documentaries for the History Channel and other media outlets, he has written several books about Midway. McGaugh is a member of the Public Relations Society of America's Counselors Academy and has received the Society's highest national award, the Silver Anvil. He earned a BS in political science from Arizona State University and studied international relations at Uppsala University in Sweden. An avid gardener and fly fisherman, McGaugh lives in San Diego, California.
2020.379.003	Fighter : Technology Facts History	Leinburger, Ralf	Presents an overview of a century of powered flight and the key technological developments while explaining fundamental aerodynamic principles. Setting events in

Object ID	Title	Author	Summary
			proper historical context, the book examines each of the most important fighters in turn and tells of the individuals whose ingenuity and courage gave military aviation its extraordinary momentum. (extracted from jacket flap)
2020.381.001	Kaiten : Japan's Secret Manned Suicide Submarine and the First American Ship it Sank in WWII	Mair, Michael	In November 1944, the U.S. Navy fleet lay at anchor in Ulithi Harbor, deep in the Pacific Ocean, when the oiler USS Mississinewa erupted in a ball of flames. Japan's secret weapon, the Kaiten--a manned suicide submarine--had succeeded in its first mission. The Kaiten was so secret that even Japanese naval commanders didn't know of its existence. And the Americans kept it secret as well. Embarrassed by the shocking surprise attack, the U.S. Navy refused to salvage or inspect the sunken Mighty Miss. Only decades later would the survivors understand what really happened at Ulithi, when a diving team located the wreck in 2001. In Kaiten, Michael Mair and Joy Waldron tell the full story from both sides, from the strategic importance of the USS Mississinewa to newly revealed secrets of the Kaiten development and training schools. U.S. Navy survivors recount their gripping experiences in the wake of the attack, as well as the harrowing recovery efforts that came later. Japanese pilots reveal their terrifying experiences training to die for their country and Emperor, never knowing when their moment of doom would come-- Provided by publisher.
2020.382.001	Many Forks in My Many Roads, The	Bushey, Keith D.	Colonel Keith D. Bushey, USMC (Ret.) donated this book to the Midway Library. It is the story of a high school drop-out who entered the marine Corps as a private and rose to the rank of Colonel, and in law enforcement went from street cop to the top of several agencies.

	Diego, California - 8		place on 8 September 1995. Letters and messages from 17 dignitaries including President Clinton and the Commanding Officer, Executive Officer, and Command Master Chief, and the first Commanding Officer. Lists all former commanding officers; schedule of events; history of the ship; historical highlights; a few colored candid pictures; aircraft complement; Iwo Jima Class ships; record of unit decorations and awards, ship's statistics; and list of decommissioning crew; list of Plank Owners; finishes with the Plan of the Day.
2020.384.002	Operation Thunderhead : The True Story of Vietnam's Final POW Rescue Mission--and the Last Navy SEAL Killed in Country	Dockery, Kevin	The majority of this book describes the experiences of U.S. Air Force Capt. John Dramesi, who was shot down on April 2, 1967, and taken prisoner by the North Vietnamese. He escaped from several North Vietnamese prisons, but was recaptured and tortured each time. The attempted, but ultimately unsuccessful, rescue of POWs by the U.S. Navy (Operation Thunderhead) is also described.
2020.384.003	Fleet to Fleet Encounters : Tsushima, Jutland, Philippine Sea	Grove, Eric J.	It is an excellent overview of the naval battles of Tsushima, Jutland and the Philippine Sea. While the Jutland section may have been overtaken by new analyses published later, the Philippine Sea section is a major account of this battle which is somewhat neglected in comparison with Leyte Gulf, 4 months later. Particularly illuminating is Grove's use of the battle to effectively demolish criticisms of aircraft carriers as "having half their aircraft devoted to self defense" by pointing out that the success of the US fighters in destroying the rebuilt Japanese carrier air force was a decisive victory in and of itself. (From Amazon)
2020.384.004	Naval Machinery, 1946 : Part I : Naval Boilers and Part II : Naval Turbines	United States Naval Academy. Department of Marine Engineering. Object ID	Title	Author	Summary
			details and the operating principles. The general character of the treatment is indicated by the following grouping of the four parts into which the work is divided. (Parts I and II are a different volume.) Part I Naval Boilers, Part II Naval Steam Turbines, Part III Naval Auxiliary Machinery, and Part IV Naval Reciprocating Steam Engines. " This revision of Naval machinery, 1941, was undertaken under the direction of the head of the Department of marine engineering, U.S. Naval Academy [and] ... is the result of the cooperative efforts of the officers attached to the department."
2020.384.005	Naval Law : Justice and Procedure in the Sea Services	Filbert, Brent G.	Two active-duty US Navy judge advocates who have practiced both ashore and at sea provide an up-to-date examination of naval law, a rapidly evolving discipline. This is the first study to encompass all phases of the subject, providing students, officers, lawyers, and others interested in the military's justice system with a thorough overview of law as it relates to the naval services
2020.384.006	Marine Corps Aviation : The Early Years, 1912-1940	Johnson, Edward C.	A history of Marine Corps aviation. Appendices include: A) Directors of Marine Aviation through Pearl Harbor, B) the First 100 Marine Aviators, C) Marine Corps, Aircraft, 1912-1940, and D) Awards and Decorations to Marine Corps Officers and Enlisted Men for Aviation Duty,
2020.384.007	Naval Aviation Vision, 2010	Naval Aviation Enterprise United States. Naval Aviation Enterprise	In the coming year, Naval Aviation will reach its centennial. In those 100 years, Naval Aviation has grown from a marginal force fulfilling a niche role in the nation's military strategy, to the centerpiece combat force that is powerfully and uniquely well-suited to conduct expeditionary operations and lethal sea-based power projection. This transformation resulted when visionary men and women looked beyond the obvious realm of the possible and into

Object ID	Title	Author	Summary
			the promise of the future. That over-the-horizon focal point continues today, ensuring that Naval Aviation's support of our defense and naval strategies is significant, relevant, and uninterrupted. The importance of Naval Aviation is founded on the Navy and Marine Corps partnership. From deployed Marine expeditionary units and aviation combat elements embarked aboard amphibious assault ships conducting expeditionary operations ashore, to Navy and Marine Corps fixed-wing and rotary-wing aircraft embarked aboard aircraft carriers streaming alongside surface combatants as part of carrier strike groups, Naval Aviation is ideally suited to carry out the national security strategy in any maritime conflict. On 8 May 1911, Captain Washington Irving Chambers, the officer in charge of aviation, requisitioned the Navy's first aircraft—an A-1 Triad—from aviator and inventor Glenn H. Curtis. This aircraft first flew on 1 July 1911. The following year, the first Marine Corps aviator reported for duty, launching Marine Corps Aviation. Nearly a century later, the Navy's newest aircraft, the P-8A Poseidon, flew for the first time on 25 April 2009. This book shares the vision of today's Naval Aviation leaders, extending the earliest plans for Naval Aviation from 1911 into the year 2032 and beyond. It underscores our focus on current readiness, the future capabilities and readiness necessary for the fleet of the future, and the people who form the cornerstone of all our successes. Naval Aviation is a warfighting force that is an integral part of the ability of the Navy, Marine Corps, and joint forces to deter or win regional conflicts and major power wars. Our aircraft carriers, amphibious assault ships, carrier air wings, aviation combat elements, and maritime patrol and reconnaissance

Object ID	Title	Author	Summary
			forces maintain a combat-ready posture that is deployed forward as an instrument of our national power. We understand the importance of cooperative multinational relationships because no one nation has the resources required to guarantee the complete safety of the world's oceans and the airspace above them. Although our foremost responsibility is the projection of sea-based combat power, we also embrace the responsibility to provide humanitarian assistance and disaster relief throughout the world. Naval Aviation is a warfighting enterprise that will continue to develop, deliver, and sustain the aircraft, weapons, and systems our Sailors and Marines need to serve America in defense of freedom. We embrace the privilege of this awesome responsibility with pride, determination, and enthusiasm.
2020.384.008	National Geographic : Return to the Battle of Midway (cover story)	National Geographic Society	After crippling the U. S. Pacific Fleet at Pearl Harbor, Japan set out to deal it a death blow at Midway. Fifty- six years later former foes relive those harrowing hours as explorer Robert D. Ballard locates the grave of the U. S. S. Yorktown.
2020.384.009	Ships and Aircraft of the U.S. Fleet - 1984	Polmar, Norman	This latest edition of Norman Polmar's highly regarded guide to the ships and aircraft of the U.S. Fleet describes the Navy as it undergoes an unprecedented peacetime buildup. In his incisive opening analysis of the state of the fleet, Polmar offers high praise for Secretary of the Navy John Lehman's ability to obtain funds to reach the goal of a 600-ship fleet. Polmar concludes, in fact, that the goal will be surpassed by more than 100 ships, at the end of this decade. But, he warns, it remains unclear how long a force of this size can be maintained and how it can be manned. With the same convenient format Polmar developed for

Object ID	Title	Author	Summary
			the previous two editions, this thirteenth edition of Ships and Aircraft provides the most comprehensive description available of the contemporary U.S. Navy. In addition to its careful examination of ships and aircraft, it contains data on personnel, organization, weapons, electronics, and shipyards. The ships and aircraft of the U.S. Coast Guard and National Oceanic and Atmospheric Administration also are covered in detail. New features in this edition include extensive descriptions of the current U.S. Marine Corps and the Rapid Deployment Joint Task Force, as well as expanded treatment of the U.S. shipyards that build and maintain the fleet. Among the long list of new ships described in detail are the Aegis missile cruisers of the TICONDEROGA class, the missile destroyers of the ARLEIGH·BURKE class, the new MSH and MCM minesweeper classes, and the planned "SSN 21" advanced nuclear attack submarine. The Israeli-built Kfir fighter for adversary training and the new F/A-18 Hornet strike fighter also receive in-depth treatment. Approximately 800 photographs and drawings are provided, most not previously published, with general identification views of ships and aircraft, and close-ups of electronic equipment and weapons. Front jacket photos: Clockwise from upper left, CALIFORNIA (CGN 36) and NIMITZ (CVN 68), U.S. Navy; antennas of MISSISSIPPI (CGN 40) and SOUTH CAROLINA (CGN 37) , Giorgio Arra; CITY OF CORPUS CHRISTI (SSN 705), Giorgio Arra; bridge watch of DEWEY (DDG 45), Lt. Cdr. A. Lopez, U.S. Navy; and F/A-18 Hornets of VFA-125, Northrop Corp.

2020.384.010	Hornet	Drendel, Lou	The F/A-18 Hornet is the best all-around fighter ever built. That is a strong statement, but one which can be supported by an examination of the Hornet's capabilities. How did the Hornet get to be the best fighter? And, why don't more people know that it is the best? The Hornet's path to its current operational position was circuitous, and at times tortuous.
2020.384.011	USS Oriskany CVA-34	None Stated	A Welcome Aboard pamphlet for the USS Oriskany published in 1965. Includes Origin of the ship/s name, a brief history of the ship, bio's of the C.O. and X.O., a summary of the ship's 1965 deployment, Photos of aircraft carried by the ship, and a listing of ship's characteristics.
2020.384.012	USS Memphis(CL-13) - Australian Cruise - 3 January-28 April 1938	Bishop, Roy E. (ed.)	A pictorial account of the cruise of the U.S.S. Memphis along with the cruisers Trenton and Milwaukee to Sydney, Australia and return to celebrate the Sesquicentennial (150 years) celebrations of Sydney and Australia . Memphis departed San Diego on 3 January 1938, crossed the equator on 15 January, arriving in Sydney on 25 January. From Sydney Memphis proceeded through the Australian Bight to Singapore and subsequently rejoined the Fleet in Hawaii on 1 April. Other port visits included Pearl Harbor (on the way over), Samoa and Manila, Mariveles, P.I. and Guam. Includes a crew listing divided into rosters of Shellbacks and Pollywogs.
2020.384.013	USS Ranger (CV-4) - Peru - 1937	Rafferty, W. H. (ed.)	A pictorial account of a goodwill visit conducted by the Ranger and escorts USS Worden and USS Hull to Lima Peru in 1937. The ship departed San Diego on 4 September and returned to San Diego on 5

Object ID	Title	Author	Summary
			October. The central focus of the cruisebook is the Crossing the Line ceremony on 12 September and events onboard leading up to that occasion. The ship anchored in the port of Callao, city of Lima, Peru on 12 September and remained until 24 September when getting underway for San Diego. Highlights of the stay in Lima included the visit of the President of Peru on 20 September. The ship got underway briefly on 17 September and conducted flight operations. Another title was The Cruise of the U.S.S. Ranger to Peru
2020.388.001	USS Nimitz (CVN-68) - Deployment - 2017	None Stated	Pictorial account of the deployment of USS Nimitz (CVN-68) to Indo-Asia-Pacific region and the Arabian Gulf. She departed Kitsap Naval Base 1 or 2 June 2017 and returned 10 December 2017. Ports of call and items of interest: biography and pictures of Chester W. Nimitz, the Navy's first 5 star admiral; photos of ships and aircraft of Carrier Strike Group Eleven: USS Hopper (DDG-70); USS Howard (DDG-83); USS Shoup (DDG-86); USS Pinckney (DDG-91); USS Kidd (DDG-100); USS Princeton (CG-59); F/A-18 Hornet; F/A-18E Super Hornet; F/A-18F Super Hornet; MH-60R Seahawk; MH-60S Seahawk; EA-18G Growler; C-2A Greyhound; E-2D Hawkeye; shipyard photos; Operation Malabar with Japan and India; port visit to Chennai, India; Bahrain; Dubai; Jared & the Mill performance; Tiger cruise. 2020.388.003	USS Theodore Roosevelt (CVN-71) - Western Pacific Deployment - 2017-2018	None Stated	Pictorial account of the WestPac Pac and Indian Ocean deployment of the TR in 2017-18. "Approximately 5,000 Sailors and Marines embarked aboard the aircraft carrier USS Theodore Roosevelt (CVN 71) returned to their homeport of Naval Air Station North Island, May 7, after a successful seven-month deployment. Theodore Roosevelt departed San Diego, Oct. 6 and spent the deployment supporting Operations Inherent Resolve and Freedom's Sentinel, as well as maritime security cooperation efforts in 5th and 7th Fleet areas of operations. The ship transited more than 56,000 miles, and made five port calls in four different countries, to include the United Arab Emirates, the Kingdom of Bahrain, the Republic of Singapore, and the Republic of the Philippines, as well as port calls in Hawaii and Guam. Theodore Roosevelt partnered with more than 10 countries including Japan, South Korea, France, India, the Kingdom of Bahrain, and the Republic of Singapore to increase theater security cooperation through various maritime operations. Approximately 70 aircraft from the squadrons of Carrier Air Wing (CVW) 17 flew 8,319 hours and 1,164 combat sorties and performed counterterrorism operations in Syria, Iraq, and Afghanistan. Theodore Roosevelt also earned the 2017 Battle Efficiency "E" award for West Coast aircraft carriers, and became the first aircraft carrier on the West Coast to earn the Jackie G. Brown Fleet Logistics Excellence award. USS Theodore Roosevelt was the flagship of Carrier Strike Group NINE. The TRCSG consisted of the staff of Destroyer Squadron 23 and the squadrons of Carrier Air Wing (CVW) 17, which includes Strike Fighter Squadron (VFA) 113, VFA-94, VFA-22, Marine Fighter Attack Squadron (VMFA) 312, Electronic Attack Squadron (VAQ) 139, Airborne Early

			Warning Squadron (VAW) 116, Helicopter Sea Combat Squadron (HSC) 6, Helicopter Maritime Strike Squadron (HSM) 73 and Fleet Logistics Support Squadron (VRC) 30." (extracted from Lemoore Navy News article by Mass Communication Specialist 3rd Class Alex Corona of May 11, 2018.)
2020.388.004	USS Carl Vinson (CVN-70) - Deployment - 2018	None Stated	A pictorial account of Carl Vinson's brief Westpac deployment and follow-on events in the first half of 2018. "USS Carl Vinson (CVN 70) returned home to Naval Air Station North Island in San Diego, April 12, after completing a scheduled three-month deployment. More than 5,000 Sailors from Carl Vinson and embarked Carrier Air Wing (CVW) 2 deployed Jan. 5 to conduct routine operations in the Indo-Pacific and maintain security and stability in the region. Carl Vinson steamed approximately 40,000 nautical miles and visited Guam, the Philippines and Vietnam. The visit to Vietnam was the first by a U.S. aircraft carrier in more than 40 years and demonstrated America's continued commitment to the region. Carl Vinson hosted more than 1,300 guests for tours, professional exchanges and a formal reception. Sailors also participated in community service events and sports competitions. The strike group conducted a variety of joint and combined exercises designed to strengthen regional partnerships and enhance maritime interoperability. Carl Vinson completed a bilateral exercise with the Japan Maritime Self-Defense Force in March. The exercise included a series of training drills and Sailor-to-Sailor exchanges. Carl Vinson was the flagship for Carrier Strike Group 1. The strike group also included guided-missile cruiser USS Lake Champlain (CG 57) and guided-missile destroyers USS Wayne E. Meyer (DDG 108) and

2020.388.006	USS Ronald Reagan (CVN-76) - 2017	USS Ronald Reagan Media Department	A pictorial account of the major underway periods in 2017 for the U.S.' only forward-deployed aircraft carrier. Ronald Reagan departed Commander, Fleet Activities Yokosuka on 16 May for an Indo-Asia-Pacific patrol. The ship's major exercise during this Summer Patrol was Talisman Saber 2017, which took place in waters off the coast of Australia. Talisman Saber included more than 33,000 U.S. and Australian personnel and featured 21ships, including the Ronald Reagan Carrier Strike Group, the Bonhomme Richard Expeditionary Strike Group, and more than 200 joint aircraft. Ronald Reagan joined the long line of aircraft carriers to conduct dual-carrier operations in the Western Pacific, when it participated in dual-carrier operations with Carl Vinson, June 1. The dual-carrier operations included the Ronald Reagan Strike Group, consisting of Ronald Reagan, Carrier Air Wing (CVW) 5, guided-missile cruiser USS Shiloh (CG 67), guided-missile destroyers USS Barry (DDG52), USS John S. McCain (DDG 56), USS McCampbell (DDG 85) and USS Mustin (DDG 89) from Destroyer Squadron (DESRON) 15; and the Carl Vinson Strike Group consisting of Carl Vinson, Carrier Air Wing (CVW) 2, guided-missile cruiser USS Lake Champlain (CG 57) and guided-missile destroyers USS Wayne E. Meyer (DDG 108) and USS Michael Murphy (DDG 112). "More than 60 midshipmen embarked on Ronald Reagan during the summer patrol. The midshipmen where aboard in two groups, one for 30 days and another for two weeks. Ports visited on this Summer Patrol

Object ID	Title	Author	Summary
			were Singapore and Brisbane, Australia. The ship returned to Yokosuka on 9 August. She got underway for a Fall Patrol on 8 September which featured participation in ANNUALEX 28G with JMSDF units, two bilateral training exercises with JMSDF ships, a Maritime Counter Special Operations exercise (MCSOFEX) with South Korean naval units, and PHOTOEXs with South Korean naval ships on one occasion and two separate PHOTOEXs with U.S. carriers Nimitz and Theodore Roosevelt and Japanese naval ships. Port visits on the Fall Patrol were Hong Kong and Busan, South Korea. Ronald Reagan completed the Fall Patrol and returned to Yokosuka on 4 December. Commander Task Force 70 and Carrier Air Wing Five were embarked. CVW-5 consisted of VAW-125, VAQ-141, VRC-30, HSM-77, HSC-12, VFA-195, VFA-102, VFA-115, and VFA-27.

2020.388.007	USS Ronald Reagan (CVN-76) - 2018	USS Ronald Reagan Media Department	A pictorial account of the major underway periods in 2018 for the U.S.' only forward-deployed aircraft carrier. USS Ronald Reagan departed Yokosuka for a Summer Patrol on 29 May. Significant operational events included a trilateral exercise Malabar 2018 with the Japan Maritime Self-Defense Force (JMSDF) and Indian Navy ships, in the Guam Operating Area, a photo exercise (PHOTOEX), east of Saipan, and an air defense exercise (ADEX) east of Okinawa. A CTF-70 change of command was conducted on 18 July while underway. The only port visit on this Summer Patrol was Manila. Reagan returned to Yokosuka on 24 July. She got underway for a routine Fall Patrol on 14 August. Highlights included exercises ANNUALEX 30G and Valiant Shield 2018, participation in South Korea's annual Fleet Review, a change of command for Reagan's commanding

Object ID	Title	Author	Summary
2020.394.002	For All Who Go Down to the Sea in Ships - Devotional Guide	Chief of Naval Operations	Title based upon the Psalm 107:23-29. Those who go down to the sea in ships, who do business on great waters, they see the works of the Lord, and His wonders in the deep. For He commands and raises the stormy wind, which lifts up the waves of the sea. They mount up to the heavens, they go down again to the depths; their soul melts because of trouble. They reel to and fro, and stagger like a drunken man, and are at their wits' end. Then they cry out to the Lord in their trouble, and He brings them out of their distresses. He calms the storm, so that its waves are still."
2020.394.003	Naval Customs for Naval Officers' Wives	Navy Wifeline Association	Introduction to Naval Customs for new Officers' Wives and a review for other wives.
2020.394.004	Navy Military Funerals	Naval Military Personnel Command	From the Introduction--"Navy military funerals are based on a few simple customs and traditions. Such funerals are open recognition of the Nation's debt for the services and sacrifices of it Navy men and women. The ceremonial customs comprising the elements of a naval funeral are rooted in ancient naval and military usage. Based upon expedients used on the battlefield, these customs have come to assume a deeper significance than that of mere expediency. The flag that covers the casket today symbolizes the service of the deceased in the armed forces of the United States; the Nation regards the burying of its military dead as a solemn and sacred obligation. The three volleys that are fired, according to ancient belief, were to scare away evil spirits."
2020.394.005	Sea Padres : Some Chaplains of the Old Navy	Martin, H. Lawrence	The fourteen naval chaplains whose profiles are depicted here are worthy role models for chaplains in any age who could minister well. They extend

Object ID	Title	Author	Summary
			from William Balch, the first chaplain known to have received a written commission in the U.S. Navy and who received before the beginning of the nineteenth century, to David Howard Tribou, whose service extended beyond World War I. Tribou and Alfred L. Royce excelled in pastoral care. Walter Colton and George Jones are outstanding scholars, having been valedictorians at Yale in 1822 and 1823 respectively. Along with these two, Charles S. Stewart, Charles Rockwell, Chester Newell and Fitch W. Taylor set excellent examples in writing. Chaplains Newell, Joseph Stockbridge, and Harry Jones displayed unusual courage in time of physical danger; but such courage was also demonstrated by Stewart, George Jones, and Rockwell in efforts toward social reform and by Colton, Newell and George A. Crawford as they struggled on behalf of other aspect of naval reform. No chaplain ever used his personal talents any better in promoting the work of chaplaincy than W. H. "Ironsides" Reaney. No chaplain ever sacrificed more than John Lenhart.
2020.394.006	Uniforms of the Chaplain Corps, U.S. Navy	Martin, H. Lawrence (ed.)	Traces the history of Chaplains' uniforms from the Revolutionary through the Civil War, Civil War through World War I, and World I through 1985. Conclusions include significant dates in the evolution of the Chaplains' uniforms. The book ends with a letter from a chaplain who disagrees with the position of the inclined position of the cross on the collar of Christian chaplains. He called it the "lazy cross".

2021.301.004	Pearl Harbor 1941 : The Day of Infamy	Smith, Carl	There are five editions of this book as of March 2021: July 1999, August 1999, April 2000, September 2001, and February 2004. We have one copy of the 1999 and two copies of the 2001. December 7, 1941 was one of the single most decisive days of World War II - the day that brought the USA into the fight. Six Japanese aircraft carriers disgorged their full complements in two waves on the superior US Pacific Fleet as it lay slumbering in Pearl Harbor. Depending on opposing viewpoints, the attack was either a brilliant maneuver of audacious strategy, or a piece of unparalleled villainy and deception by a supposedly friendly power. This revised edition, containing the latest research on the events of December 7, 1941, reveals several previously unknown aspects of the attack and dispels key myths that have been built up around the fateful day - a day, Franklin Delano Roosevelt declared, that would live in infamy. Contents

The squadron departed Naval Air Station Barbers Point for Naval Air Station, Cubi Point, Philippines, on 9 May 1980 - and returned 10 November 1980. Items of interest: In Memory to two sailors; biography of CDR John L. Landon; Change of Command; biography of CDR Thomas K. Morrissey; biography of CDR Charles G. Flint; command history; photos of squadron listed by department.
2021.301.018	Aircraft of World War II	Winchester, Jim (ed)	From Amazon: This comprehensive guide to the aircraft of World War II features more than 120 military aircraft in service between 1939 and 1945. Each aircraft is covered in detail with feature boxes outlining its development, technical specifications, performance data, and variants. Unique graphics allow you to compare specific features like firepower, troop-carrying capacity, and bombload to

Object ID	Title	Author	Summary
			those of other aircraft of the same type. Contains over 2000 photographs and illustrations. Aircraft of World War II is a fascinating and informative guide to many aircraft. Its information-packed pages cover a broad range of aircraft, from outmoded biplanes such as the Gloster Gladiator, pressed into service in the desperate defense against Nazi Germany in 1939 and 1940, through the classic fighter aircraft such as the Supermarine Spitfire, Messerschmitt Bf 109, and North American P-51 Mustang, to early jets such as the Arado Ar 234, Messerschmitt Me 262, and Gloster Meteor.
2021.301.019	Spitfire : Flying Legend	Dibbs, John M.	From Amazon: As much a national hero as Wellington, Nelson or Montgomery, the Supermarine Spitfire has become the most recognisable icon of World War 2 for several generations of Britons. From the throaty growl of its Rolls-Royce Merlin, or Griffon, to its beautifully tapered elliptical wings, the Spitfire is a true aeronautical thoroughbred. Regarded by many as the saviour of the Sceptred Isle 'in its darkest hour', the Spitfire is without a doubt the most famous combat aircraft the world has ever seen. 1996 celebrates the 60th anniversary of the fighter's first flight, and this lavishly illustrated volume serves as a tribute to the airworthy survivors of today.
2021.301.022	Biplanes, Triplanes and Seaplanes	Winchester, Jim (ed)	Similar to 2006.337.001. From the dawn of aviation until the end of World War II--the "golden age" of flight--these 300 influential multi-wing aircraft ruled the skies. Among the classics of the pioneering years and beyond: the Sopwith Camel, the Red Baron's Fokker Triplane, the Fairey Swordfish, and the Consolidated Catalina, as well as popular civil aircraft like the Tiger Moth and Supermarine S.5. Publication Date: August 1, 2001

2021.301.023	Combat Aircraft of World War II	Bavousett, Glenn B.	This book was originally published in two volumes: World War II Aircraft in Combat (1976) and More World War II Aircraft in Combat (1981). This omnibus edition brings together the stories of the great fighting aircraft of World War II --along with full-color painting of these same aircraft in raging conflict. A total of seventy-two (72) aircraft are shown here in their various combat roles; the secondary type of plane also frequently illustrated brings the grand total of aircraft depicted to ninety (90). Each scene includes details and landscapes familiar to pilots and crew members. These paintings have been meticulously researched, and all details of markings, numbers, personal decorations, as well as the actions themselves, have been verified from official records, photographs, and, where possible, personal interviews and eyewitness accounts by participants. Volume 1 tells the stories of thirty-six aircraft and their combat actions in a loosely connected chain of events that races the progression of the war. Volume II portrays some of the rarer types of aircraft use in conflict--the 163 Komet, the Fi 156 Storch, and the Boeing P-26A Peashooter--as well as classics such as the Supermarine Spitfire and the P-61B Mustang. These thirty-six additional scenarios and paintings include a variety of aircraft from practically all of the participating forces in the war. Also includes: Wildcat (Fighter plane)--History. Hellcat (Fighter planes)--History. Zero (Fighter plane)--History. Corsair (Fighter plane)--History. Bearcat (Fighter plane). Grumman F8F Bearcat. Dauntless (Dive bomber). Douglas SBD Dauntless.

2021.302.004	Friendship Across the Seas : The US Navy and the Japan Maritime Self-Defense Force	Agawa, Hiroyuki	"This book describes the history of the relationship between the Japan Maritime Self-Defense Force (JMSDF) (Kaijo Jieitai), the heir to the Imperial Japanese Navy (IJN), and the United States Navy (US Navy). The two navies fought each other fiercely on the seas and in the air during the Pacific War. Each found the other a formidable enemy. They came to respect each other in action. Soon after the war, when the Cold War turned hot, they began to work together as

Object ID	Title	Author	Summary
			allies. With the generous assistance of the US Navy, the JMSDF was established as its counterpart. Doing so was in their respective national interests, but many individual officers and sailors on both sides had mixed feelings about working with their former enemies. Over the years, however, these two navies have gradually built strong ties, with respect for and trust in each other. This was made possible by conducting countless joint operations at sea. Leaders of the US Navy began to realize that this small maritime force, its actions being restrained in so many ways by domestic politics as well as constitutional and legal limitations, does its job well, is reliable, and can be fully trusted. The JMSDF realized that, in the Asia/Pacific region, there was no other navy with which it shares common interests and values to be allied with. Close to seventy years of accumulated shared experiences have transformed an initially timid and unbalanced relationship into one of, if not the, most successful navy-to-navy partnership in the world. The maritime alliance between Japan and the United States today is anchored in this history. Numerous admirals, officers, and sailors of the two navies working together have greatly contributed to the stability and prosperity of the Asia/Pacific region for the past seventy years. They are not Nimitzes or Yamamotos, but are nevertheless heroes who toiled hard to bring about this unique friendship across the seas." -- Publisher's description James E. Auer and the Japan Maritime Self-Defense Force -- Kazutomi Uchida, the JMSDF Chief of Staff -- Teiji Nakamura, the JMSDF Chief of Staff -- Minesweepers crossing the sea - - Arleigh Burke and the foundation of the JMSDF -- Mr. Navy: Ichiro Masuoka -- The US Navy's war generation -- A dogwood in Etajima, a cherry

2021.302.005	USS Bennington (CV-20) - Year of the Dragon - 1964, Vol. 1	Miller, Henry (ed.)	Pictorial account of Essex-class aircraft carrier USS Bennington (CV-20) 1964 Westpac deployment. A predeployment section documents the first ever visit by an aircraft carrier to Alaska. Bennington visited the Mendenhall Glacier and Juneau in August 1963. In the deployment, Bennington departed Long Beach, CA on 20 February 1964 and returned to Long Beach on 11 August. The ship participated in at least one SEATO exercise. Port visits included Pearl Harbor, Hi.; Yokosuka, Japan; Iwakuni, Japan; Sasebo, Japan; Hong Kong; Subic Bay, Philippines; Manila, Philippines; Kobe, Japan; and Hakodate, Japan. VIPs included actress Susan Hart, actor Glenn Ford (both in Hawaii), the German soccer team (Hong Kong) and President Macapagal of the Philippines. Commander Antisubmarine Warfare Group Five was the embarked flag. There is a 4-page looseleaf segment on CASWG-5 inside the front cover of the book. The air component was Carrier Anti-Submarine Air Group Fifty-Nine (CVSG-59) consisting of: VS-33 (S-2E); VS-38 (S-2E); HS-8 (SH-3A); VAW-11 Det. Q (EA-1E); VA-93 Det. Q (A-4B); and HU-1 Det. Q (UH-2A).

	RF-4B of the US Marine Corps		throughout. From a review by Roger Kelly (found online) For those not familiar with AirDOC, they are based in Germany and produce a vast range of high quality publications, decals and resin detail/conversion sets. The subject of this review is No 9 in their Modern Combat Aircraft Special Series (APDS) and it covers the F-4 Phantom II in United States Marine Corps service. The sub-title of the APDS series is "Bildband" or book of pictures and that is exactly what you get with this series, a pictorial history of the featured aircraft in the service of particular country. The text is in both English and German languages. The book is logically laid out in that you are given a brief two-page introduction that covers the F-4 in USMC service including details on active duty in the South East Asian theatre, USMC F-4 active and Reserve squadrons; training, reconnaissance, and bases where the USMC F-4s were based. From there the book pictorially covers each squadron with sharp, clear full colour images. Most squadrons have three to four pages devoted to them but some of the Reserve squadrons only receive two-page coverage.

The books contains in-depth information such as : contracts, launches, commissionings, and more. There is a synopsis of each ship;s history. As built class specification tables are included along with the tables for those ships that went through major overhauls. Includes many photos. CVE-63, USS Midway, is listed on pages 124-125 and includes a photograph taken in April 1944 while underway in San Diego Harbor, San Diego, CA. She is painted with a Measure 32/15A camouflage pattern. Covers CVE-1, the USS Long Island, to the unnamed CVE-139. Includes 30 pages of camouflage design sheets.
2021.302.012	U.S. Aircraft Carriers 1939-45	Bauernfeind, Ingo	From Amazon; "This extensively illustrated volume tells the dramatic yet successful story of US aircraft carriers

Object ID	Title	Author	Summary
			in World War II by class, ranging from early pre-war designs to escort carriers built from destroyer hulls, to the gigantic fleet carriers serving as the predecessors of modern-day super carriers. Besides covering the famous great carrier battles in the Pacific, this book also tells of the equally important actions of US flat tops hunting and destroying German U-boats in the Atlantic, making an enormous contribution to the elimination of the U-boat dangers and the safe arrival of transatlantic supplies, so desperately needed for the launch of D-Day. Including profiles and explanatory text boxes, the concise text gives a clear overview of each ship's career, its fate and its significance in American naval history. Moreover, the reader learns about the technical evolution of US carriers throughout the war, and the various aircraft launched from these magnificent vessels to engage their Japanese or German foes. This volume provides an overview of preserved World War II flat tops serving as floating museums for future generations as well as a dive to the sunken USS Saratoga at Bikini Atoll."

			Vietnam War from 1965 to 1975 p 104-CDR W.A. Franke, CO of VF-21, recalls from his return from the Hanoi Hilton in Feb 1973, that he spent much of the summer of 1965 watching the construction of SAM sites, one of which shot him down in the fall, unable to destroy them by the rules of engagement before they became operational.. p122--Navy's first lost to SAMS , occurred on the night of 11-12 Aug,1965 when LCDR Frances D. Roberge and LTJG Donald H. Brown flying A-4#s from VA 23, aboard Midway were on a road recce 60 miles south of Hanoi. Brown was lost with his plane; Roberge bergs managed to bring his damaged plane back to the carrier. p139 - VF-21 XO CDR Lou Page and RIO Lt John C. Smith in NE-101 and wingman LT Jack E.D. Batson and RIO LCDR Robert Doresmus in NE-102, both flying F-4's armed with two Sidewinders and three Sparrows each shot down two VPAF MiGs on June 17, 1965. p295-In April, the Midway and the Oriskany were ordered to speed their deployment preparations so that they could help swell the Seventh Fleet from 84 to 138 ships. p314-317 - Describes two MiGs shot down during Operation Linebacker by two F-4Bs from Midway's VF-161 flown by LT Henry A. "Bart" Batholomay and RIO LT Oran R. Brown flying lead, and LT Patrick E."Pat" Arwood and LT James M. "Taco" Bell flying wing. p 319- In 1972, the Midway, with CVW-15 embarked, expedited her return to the Tonkin Gulf from Alameda, CA, arriving in mid-May; her 327 day 1972-73 cruise would go into the records books as the second-longest carrier deployment in the Vietnam

Object ID	Title	Author	Summary
			War, only two day short of Coral Sea's 329 day deployment. p349 On April 16, 1975, the Midway was ordered to depart Subic Bay, put her air group ashore and join Task Force 76 for what was to become Operation Frequent Wind. where her primary role was to be an emergency landing field for evacuees after the airport became unsafe to use. p 354, Midway supplied some third wave helicopter: two CH-53s from Marine Heavy Helicopter Squadron 463 (HH-463) and eight CH-53Cs and two HH-53s from the Air Force's 406y Aerospace Rescue and Recovery Squadron. The helicopter quickly picked up waiting evacuees. p355 - Air America had committed 24 of 28 available helicopters and 31 pilots had agreed to remain in Saigon for the evacuation. Evacuation resumed after the shelling subsided but desperate VNAF helicopters were flying out to the fleet which made traffic around the Midway and Hancock impossible. Passengers had to be discharged on amphibious ships. p356-357- The story of MAJ Buang-Ly and his family on the Bird Dog. Book mentions that the plane can be see on the

2021.302.015	SBD Dauntless vs A6M Zero-Sen : Pacific Theater 1941-44	Nijboer, Donald	From Amazon: The SBD Dauntless and Zero-sen are two of the most recognizable and iconic aircraft of World War 2 and this illustrated study describes the fighting capabilities of both aircraft when engaged in aerial combat. The SBD Dauntless dive-bomber was a key cog in the US Navy's aerial arsenal throughout the Pacific War. Although a product of aviation design in the mid to late 1930s, the type soldiered on even as more advanced aircraft were

Object ID	Title	Author	Summary
			appearing from American factories as the war progressed. Despite its classification as a dive-bomber and rather dated appearance, the SBD Dauntless could more than handle its own against the feared A6M Zero-sen -- a regular opponent, especially during the first 18 months of the campaign in the Pacific. The SBD was credited with 138 victories in aerial combat (principally in 1942), 107 of which were fighters and the rest bombers. Seven SBD units claimed five or more aerial victories, with future ace Lt(jg) John Leppla of VS-2 being credited with four victories while flying from the carrier USS Lexington during the Battle of the Coral Sea in May 1942. The Zero-sen came to symbolize Japan's military prowess during the early stages of the war in the Pacific, and it quickly became the world's premier carrier-based fighter -- a title it would hold well into 1943. The psychological impact of the Zero-sen was so great that all Allied fighters were judged by the standards set by it. The aviators flying the A6M in 1941-42 were amongst the most experienced fighter pilots in the world, and they claimed a significant number of the SBDs destroyed while trying to defend their carriers from attack during the Battles of Coral Sea, Midway, and Santa Cruz in 1942. While one was a dive-bomber and the other a nimble fighter, both met in combat many times, with the Dauntless proving an elusive and deadly target thanks to the tenacity and skill of the pilots and gunners manning the Douglas aircraft. While the Zero-sen was credited with shooting down many SBDs, the rugged dive-bomber gave as good as it got and emerged, not surprisingly, victorious on many occasions. This book examines these aircraft in detail, exploring their history and development and contains accurate descriptions of the combats between the

2021.302.016	Eyes of the Fleet over Vietnam : RF-8 Crusader Combat Photo-Reconnaissance Missions	Jack, Kenneth V.	NOTE: XXV of Eyes of the Fleet, there is a picture of a RF-8A of VFP-63 coming in for recovery on USS Midway, circa September 1968. According to Troy, that photo came from the Robert Lawson collection, and Troy is in contact with Lawson's son. They have found many errors in his captions. Troy puts the picture on XXV at the 1963-64 cruise, and not in the Gulf of Tonkin. A comprehensive, illustrated history of photo recon launched by the U.S. Navy over Vietnam, 1964-72. Squadrons listed are VMCI-1, VFP-63, and VFP-62. The Chapter on Rolling Thunder contains statements by Midway Air Wing member, Roger Crim, plus several B&W photos. Additional Midway references: Back Cover Photo - VFP-63 in RF-8G goes to full throttle on cat on USS Midway, 1971 Page XXV - VFP-63 RF-8A comes in for a recovery on the USS Midway, Tonkin Gulf, 1965 Page 5 photo of Midway in drydock, circa 1980 Page 13 Mentions LT W. B. Wilson's plane destroyed - more on that later Page 16 1st Navy aircraft shot down by a Sam was an A-4 Skyhawk from Midway, August 11, 1965 Page 42 LT Roger Crim, VFP-63 Det A, CVW-2, recounts his experiences on Midway, 1963-64 Page 49 Discusses VFP-63 detachments on Midway Class aircraft carriers.

US Super Carrier : All Makes and Models : Operations Manual

McNab, Chris

The Midway Class carriers are discussed on pages, 10-14. Page 13 shows the three

Object ID	Title	Author	Summary
			configurations of Midway: 1945; after SCB-110 refit in 1957, and after SCB-110.66 refit in 1970. The US Navy's fleet of aircraft carriers are at the heart of global American military force. With nuclear-powered oceanic range, complements of nearly 5,000 crew, and typically carrying more than 70 combat aircraft, US carriers can remain on station for months, delivering aerial combat strikes on distant targets around the clock. The Haynes US Super Carrier Operations Manual offers insights into understanding how a modern US super carrier is operated. The US Navy has given Haynes author Chris McNab and photographer Patrick Bunce official clearance to spend time at sea on one of its 'Nimitz' or 'Gerald R. Ford' class super carriers. During the visit Chris conducted interviews with key personnel of all major departments, including flight-deck crew, aviators, ordnance officers, engineers, logisticians, operations crew and the captain; while Patrick photographed life above and below decks, with a special focus on the engineering side of carrier aviation
2021.302.018	Pacific Carrier War : Carrier Combat from Pearl Harbor to Okinawa.	Stille, Mark	From Amazon A detailed and comprehensive study of the carrier formations of the Pacific War, including their origins, development and key battles from the Coral Sea, through Midway and Guadalcanal to the battle of the Philippine Sea. The defining feature of the Pacific Theatre of World War II was the clash of carriers that ultimately decided the fate of nations. The names of these battles have become legendary as some of the most epic encounters in the history of naval warfare. Pre-war assumptions about the impact and effectiveness of carriers were comprehensively tested in early war battles such as

Object ID	Title	Author	Summary
			Coral Sea, while US victories at Midway and in the waters around Guadalcanal established the supremacy of its carriers. The US Navy's ability to adapt and evolve to the changing conditions of war maintained and furthered their advantage, culminating in their comprehensive victory at the battle of the Philippine Sea, history's largest carrier battle, which destroyed almost the entire Japanese carrier force.
2021.303.001	Composite Squadron Ninety-Four [1944-45]	Collier, Richard (ed.)	Pictorial account of the activities of VC-94 from its commissioning at Sand Point, WA on 29 February 1944 through combat operations in the Pacific Ocean while operating off of USS Shamrock Bay (CVE -84) until its return to San Diego on 14 June 1945. Principle operations included Lingayen Gulf, Iwo Jima and Okinawa. Mostly B&W photos with captions. Included are: This pictorial record of their achievement is sincerely dedicated to our Captain, Lt. Comdr. James F. Patterson, who is reported as Missing in action, and to these other officers and men who have given their lives for their country (nine names). 1. Large photos of Lieut. Comdr. Object ID	Title	Author	Summary
			includes pictures of the machine as well as illustrations and diagrams.
2021.304.110	Into the Sunlit Splendor	Cooper, Ann	"In a William S. Phillips painting—a tight formation of F-4 Phantoms screaming over Crater Lake, Oregon; the Blue Angels soaring near the California coast; a violent confrontation between a German Bf-109 and a RAF Spitfire above Sussex's Beachy Head; a line of Bell Hueys passing through a monsoon-soaked valley in Vietnam—a viewer can almost feel the pressure on his body from the groundblurring speed of the plane, his mouth go dry in the desert air, or the chill on his neck when it's so cold it hurts to breathe. Phillips is also a superb landscape and "skyscape" painter who places his subjects in geographic and historical context. A wealth of aviation and military history by Ann and Charlie Cooper accompanies the paintings, as do Phillips's own archival photographs"--Publisher's description.
2021.306.001	George Bush : His World War II Years	Stinnett, Robert B.	This VHS is based on the book by Robert B. Stinnett. September 1944: perched on the wing of his stricken torpedo bomber, 3,000 feet above a Pacific Ocean teeming with hostile ships, Ensign George Bush prepares to leap into destiny. One yank of his rip cord later, he is prey to a Japanese armada, intent on his capture & interrogation. The story is true. A patriotic young man volunteers for hazardous assignment, knocks out enemy war ships, & collects a pile of medals. His inspiration is his fiance, Barbara, for whom he names his plane. Discover for yourself the gallantry, conflict, & drama that molded our former President in a fascinating & insightful recollection. Over 100 photos. (from Amazon.com)

There are sections for the U.S and Canadian observers and some chapters for the observers from both nations. United States. Aircraft Warning Service. Ground Observer Corps.
2021.311.003	Basic Military Requirements	Bureau of Naval Personnel	From the Preface "This book is a self-study training course covering the military requirements for men and women in the pay grades of E-2 and E-3 of the U.S. Navy and Naval Reserve. The military subjects with which the student must be familiar are outlined officially in the Manual of Qualifications for Advancement in Rating, NavPers 18068B. Before beginning to study for advancement, the student should check the Qualls Manual for the latest changes. This text covers the military requirements for the paygrades concerned, but it is only an introductory training course and should be used in conjunction with other manuals and forms of instruction. The subject matter is general in nature and applies to all ratings."
2021.311.006	Instrument Flying	USAF	This Manual on the theory of jet aircraft nstrument flying is published for the use of instructors and students and for the information of all Air Force pilots. The main topics considered are basic aircraft control and instrument interpretation, basic radio, and weather.

2021.313.002	Mess Management and Training	War Department	The purpose of the manual was to provide a clear, practical and concise source of information for officers responsible for operation of troop messes and to implant in them a thorough knowledge of War Department policies and the established principles of mess management. Topics include organization and administration, mess personnel, rations, inspections, operations, nutrition and food planning, food preparation, and sanitation and hygiene.
2021.314.001	USS Stockdale (DDG-106) - Decommissioning - Bath, Maine - May 10, 2008	Bath Iron Works	Program from the christening of the Arleigh Burke-class guided missile destroyer USS Stockdale (DDG-106) built at Bat Iron Works (BIW), Bath, Maine. Named after former Midway Airwing crewmember and former POW Admiral James Bond Stockdale, the ship's sponsor was Sybil Stockdale, wife of James Stockdale. Granddaughter Elizabeth was Matron of Honor. The program contains an extensive biography of ADM Stockdale's service life and characteristics of the ship.
2021.316.001	Alpha Strike Vietnam : The Navy's Air War 1964 to 1973	Levinson, Jeffrey L.	Levinson, a freelance writer, has captured the salty lingo, devil-may-care attitude and special flair for combat characterizing the Vietnam-era naval aviator. The kind of tactical-technical detail that appeals to air-war buffs abounds as 22 former U.S.

Object ID	Title	Author	Summary
			Navy pilots recall missions in the skies over Southeast Asia from the earliest days of the war to the final air evacuation. Several served hard time at the infamous "Hanoi Hilton" prisoner-of-war camp and all express pride over the defiance their downed colleagues displayed toward their captors. Most of these men remain "unreconstructed" in their resentment at Washington-dictated restrictions that kept them from wreaking even greater destruction against the enemy. Pride, fierceness and technical mastery dominate as the pilots describe bombing runs, flak-suppression missions and other tasks (including the shooting-down of a MIG). Levinson provides a solid background to their testimony, summarizing the strategic aims of the air war, month by month. Photos. Copyright 1989 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. (from Amazon.com)

2021.316.002	American Fighter, The	Angelucci, Enzo	Must have reference... November 27, 2010 By Kevin Ryan This book is an amazing source of information on every fighter the US has ever flown from the beginning to the (then) most modern jet fighters available. The vast amounts of stats, line drawings, and photos makes this a must have for your collection. If I could find a civilian version of this book, I would never need to own any other. The tables on Curtiss and Boeing aircraft are worth the price of admission alone! Very in Depth October 24, 2009 By Glenn Sellers "The American Fighter" by Enzo Angelucci is a very in depth study of fighter aircraft of the United States. It starts with the very first fighter used by the United States up to the F-20

Object ID	Title	Author	Summary
			Tigershark. It also includes aircraft that never got past the drawing board. Mr. Angelucci obviously spent a lot of time on researching this subject as he gives the reader as much information as one would need, or want, to know. He, naturally, gives more information about the aircraft that were in the American inventory during WWII, Korea and Vietnam. All in all, if you are interested in knowing about the fighter aircraft of the United States, this is the book for you. (from Amazon.com)
2021.317.001	USS Boston (CA-69) - 1943-1945	None Stated	A Pictorial account of the adventures of USS Boston in the period 1943-1945, her wartime cruise book. This historical account will be what most of the cruise book covers. USS BOSTON (CA 69) was launched 26 August 1942 by Bethlehem Steel Co., Fore River, Mass.; sponsored by Mrs. M. J. Tobin, wife of the Mayor of Boston; and commissioned 30 June 1943, Captain J. H. Carson in command. BOSTON reported to the Pacific Fleet, arriving at Pearl Harbor 6 December 1943. She joined TF 58 in January and took part in the raids on the Marshall Islands in support of the invasions of Kwajalein, Majuro, and Eniwetok (31 January - 28 February 1944); Palau and Western Carolines (30 March - 1 April); Hollandia and Western New Guinea (21 - 24 April); Truk, including Satawan Island, bombardment (29 April - 1 May); invasion of Saipan (11 - 24 June); 1st Bonins raid (15 - 16 June); Battle of the Philippine Sea (19 - 20 June); 2nd Bonins raid (24 - 26 June); 3rd Bonins raid (3 - 4 July); invasion of Guam (12 July - 15 August); Palau-Yap-Ulithi raid (25 - 27 July); Morotai landings (15 September); seizure of the southern Palau (6 September - 14 October); and Philippine Islands raids (9 - 24 September). She served with

Object ID	Title	Author	Summary
			TF 38 during the Okinawa raid (10 October); northern Luzon and Formosa raid (11 - 14 October); Luzon raids (15 and 24 - 26 October, 13 - 14 and 19 - 20 November, and 14 - 16 December); Battle for Leyte Gulf (24 - 26 October); Formosa raids (3 - 4, 9, 15, and 21 January 1945); Luzon raids (6 - 7 January); China coast raids (12 and 16 January); Nansei Shoto raid (22 January); Honshu and Nansei Shoto raids (15 - 16 February and 1 March), in which she bombarded Japan itself. BOSTON then returned to the United States for overhaul, arriving at Long Beach, Calif., 25 March 1945. Returning to the Western Pacific, via Pearl Harbor and Eniwetok, she joined TF 38 for the raids on the Japanese home islands (20 July - 15 August), including the bombardment of Kamaishi, Honshu (9 August). Following the Japanese surrender BOSTON remained in the Far East on occupation duty until 28 February 1946. She then returned to the United States and was placed out of commission in reserve at Puget Sound Naval Shipyard 12 March 1946. The CD includes Hiroshima bomb damage, ship damage, battle action, as well as random ship photos. Extras included in the CD aside from the cruise book images of BOSTON from the National Archives, and audios up to 22-minutes of American Radio Mobilizes the home front, Allied turncoats broadcast for the Axis Powers, 1967 Equator Crossing, and Sounds of Boot Camp in the late 50's, early 50's. Includes loose leave certificate of the history of the ship, a 3-page type written history, and a Christmas Eve poem about the Boston, December 1944.

2021.317.004	25 Years Later...	United States Naval Academy. Class of 1943	An account of the class of 1943 graduated at the United States Naval Academy compiled 25 years after graduation. Contains photos of the Officers and their families. Includes a photo of

2021.317.006	All Hands : The Class Book of the Naval Training School (Indoctrination and Communication)	Brooks, C. M. (ed)	ALL HANDS is published by and for the second class of the Indoctrination and Communication School of the naval Training School at Harvard University, Cambridge, Mass., October 1942.
2021.318.001	American Military Aircraft : History of Innovation, A	Winchester, Jim (ed)	Book is organized by airplane manufacturers from Arco through Vultee and includes include 29 different companies. Although most companies are American that developed aircraft for "military use in the United States of America and a few developed outside that have made significant contribution to the US services." The aircraft included range from the early years through World War II, Vietnam and the Cold War and the postwar mergers. "Of the 20 or so major military aircraft active in 1950s and represented in this book, only four exist today under the same name. The others have either ceased to be, stopped making complete aircraft or have joined to form massive defense and aerospace conglomerates." The following companies are included: Airco, Beech, Bell, Boeing, Cessna, Consolidated, Convair, Curtiss, Douglas, Eurocopter, Fairchild, General Dynamics, Grumman, Hiller, Hughes, Kaman, Lockheed/Lockheed Martin, Martin, McDonnell/McDonnell Douglas, North American, Northrop, Piaseci, Piper, Republic, Rockwell, Seversky, Sikorsky, Vought, Vultee.
2021.318.002	Flying Legends : A	Dibbs, John M.	Features b&w photos of the

Object ID	Title	Author	Summary
	Photographic Study of the Great Piston Combat Aircraft of WW II		World War II era and modern color photos of restored aircraft of the types covers. A brief history of each aircraft type is presented, as well as photograph annotations. 20 piston-driven, international aircraft types of World War II are included. U.S. Navy aircraft are the Grumman F4F Wildcat, Douglas SBD Dauntless, Grumman F6F Hellcat, Vought F4U Corsair and Grumman TBM Avenger
2021.318.003	Allied Aircraft Piston Engines of World War II	White, Graham	This book attempts to illuminate some of the historically significant technical developments that were incorporated into World War II aircraft engines that directly contributed to the execution and tactics of the war. Contents: 1 Introduction; 2 Requirements; 3 British Contribution by manufacturer; 4 U.S. Contribution by manufacturer; 5 Conclusion. History and development of frontline aircraft piston engines produced by Great Britain and the United States during World War II
2021.319.001	Collected Adventures of Nick Danger, Third Eye, The	Reddig, J. R.	Compilation of stories first published in the USS Midway daily Multiplex. Japan Original manuscript. Signed by author. Reddig wrote these spoofs (inspired by but with no connection to the Firesign Theatre"s character) onboard ship as daily serials in the USS Midway newsletter, Midway Multiplex, in 1979 and 1980. Reddig was an Ensign and served with VA-151 as Air Intelligence Officer at the time. "Written over about 100,000 miles, published in Japan, printed in Korea." Former USS Midway crew member.
2021.320.001	A-7 Corsair II Units 1975-91	Mersky, Peter B.	This volume covers the A-7 Corsair II and its service with the light attack communities assigned to both the Atlantic and Pacific fleets from the end of the Vietnam War through to Desert Storm, immediately after which the final two fleet units equipped with the jet

Object ID	Title	Author	Summary
			disestablished. The jet's combat experiences in conflicts during the 1970s (Cambodia), 1980s (Lebanon, Grenada, Libya and Iran) and 1990s (Iraq) are also comprehensively detailed, with numerous first-hand accounts from Naval Aviators who saw action with the A-7 during these campaigns. Finally, 30 full-colour profile artworks and more than 60 photographs illustrate the often colourful schemes worn by the Corsair II during this period.
2021.320.002	Douglas A-4 M/N/AR Skyhawk : Pied, Robert Flying with Air Forces Around the World		This book brings a very close portrait of the A-4 Skyhawk, more specifically the M, N, AR and AF-1 versions. The photos in this book are from Top Aces aircraft, but also from the air forces of Argentina, Israel and Brazil. We even visit the Brazilian aircraft carrier Sao Paulo.
2021.320.003	Carrier Aviation in the 21st Century : Aircraft Carriers and Their Units in Detail	Newdick, Thomas (ed)	"The modern aircraft carrier is without doubt one of the most exciting and hazardous operating environments in the field of warfare. The 'flattop' is a symbol of global military power without parallel, and it remains a capability beyond reach of all but the most well equipped navies. With the detail, precision and accuracy expected of Harpia Publishing, this latest volume provides a force report of the various air components and associated vessels fielded by those select nations that field fixed-wing-capable aircraft carriers. While the United States maintains a carrier fleet the size of which is almost incomparable to that of its rivals, the coverage of this book also extends to the smaller nations that only possess a single carrier: Brazil, France, Russia and Spain. Meanwhile, full coverage is given over to the navies that are in the process of expanding their burgeoning carrier aviation capabilities, through the introduction of new, indigenously designed carriers and aircraft, namely the Asia-Pacific rivals China and India. Within Europe, chapters are

Object ID	Title	Author	Summary
			devoted to Italy, currently with two carriers in commission, and the United Kingdom, which will make a historic return to carrier aviation this year. Since the scope of this volume extends to navies operating any carrier that routinely embarks fixed-wing air power, US Navy amphibious assault ships and US Marine Corps aviation assets are also included. Drawing upon a cadre of authors who are experts in their field, Carrier Aviation in the 21st Century continues Harpia's reputation for providing unprecedented detail and extensive technical specifications, as well as detailing the structure of all the air arms and the individual units that currently embark on board carriers. Illustrations include specially commissioned artworks and diagrams to help illustrate how carrier air power remains an essential element of modern warfare."--Publisher's description. Includes chapters on Brazil, China, France, India, Italy, Russia, Spain, United Kingdom, and the United States. The US chapter was written by Tom Kaminski
2021.320.004	US Navy Jet Fighters : American Aircraft Designs by JP Vieira	Vieira, JP	The aviation art of J. P. Vieira. The United States Navy has a proud history of flying the fastest, best equipped and most powerful jet fighters in the world. This bookazine features more than 150 profiles including all 18 of the Navy's front line jet fighters, depicted by renowned artist JP Vieira. Includes detailed aircraft development histories, service markings from 1947 to the present, and famous aircraft and colour schemes.

2021.323.002	USS South Dakota (BB-57) - 1944-1945	None Stated	This is a small booklet of the USS South Dakota (BB-57). It contains 17p. of photos, blue embossed hardcover with gold decoration, and engagement calendar, photos, ports. There is also a pad of about 25 sheets of note paper inside the opposite cover. The commanding officer is listed as C. B. Momsen who was CO from December 1944 until August of 1945. (Charles "Swede" Momsen)
2021.323.004	Aggressors, Vol. 2 : Carrier Power vs. Fighting Ship	Polmar, Norman	Building for War: During the Second World War two ships

Object ID	Title	Author	Summary
			emerged as the dominant naval weapons—the aircraft carrier and the submarine. The aircraft carrier developed during the conflict into a highly effective, far-ranging weapon that could engage enemy fleets, attack enemy forces and installations on land, and survive in the face of the most effective defenses possible. The carrier concepts that emerged in the war have survived for more than four decades, forming the basis of the modern U.S. aircraft carrier force and, probably, the carrier fleet now being constructed by the Soviet Union. In contrast, the submarine evolved little during the war. Development of the snorkel underwater breathing tube and submarine radar certainly improved submarine capabilities, as did the German development of high-speed hull forms and improved diesel-electric propulsion brought together in the Type XXI U-boat. But the submarine that went to sea in September 1939 and that of May 1945 had the same basic capabilities and limitations, and the countermeasures to defeat them existed. This was not true of aircraft carriers. The carriers and their aircraft as well as their tactics changed significantly during the conflict. They became the most effective ship killers of the war. Perhaps most important, the submarine, armed with deck guns and torpedoes, had a striking range measured in hundreds or, at best, thousands of yards. The aircraft carrier could launch bombers that could strike out against targets hundreds of miles away—targets afloat or on land. The beginnings of the aircraft carrier are shrouded in the romantic beginnings of manned flight. As early as 1898, American scientist Samuel P. Langley experimented—unsuccessfully—with

Object ID	Title	Author	Summary
			catapulting flying machines from barges. The first successful manned flight is credited to the Americans Orvill and Wilbur Wright, who flew—a distance of 40 yards (37 m)—over the beaches of North Carolina in 1903. Immediately military officers began looking at the implications of their flying machine for war. When Orville Wright conducted demonstration flights for the U.S. Army near Washington, D.C., in September of 1908 two U.S. naval officers were present. 7b most Navy personnel the flying machine was viewed as a MOM of extending an observer's sight beyond that possible fraud a masthead. Two years later American aviation pioneer Glenn Curtiss flew one of his home-built machines over a lake in New York where floats had been arranged in the outline of a 5008 by 90 ft (152 m by 27 m) battleship. Dropping eight-inch (20 cm) lengths of steel pipe on the floats, Curtiss awakened many to the potential of an airplane attacking a ship at sea.
2021.323.005	Zero Fighter	Mikesh, Robert C.	The Zero was the mainstay of the Imperial Japanese Air Force throughout World War II, and during this time more Zeros were built than any other Japanese aircraft. The success of its pilots in early combat over China cloaked the Zero with an aura of invincibility, and confidence in their new fighter may even have contributed to the decision of the Japanese to go to war with the United States. Although it was an excellent fighter at the beginning of the war, long before the war was over it had been badly outclassed by the superior Allied aircraft.
2021.323.006	Japanese Naval Air Force Camouflage and Markings, World War II	Thorpe, Donald W.	Comprehensive text covers information markings, from propeller tip to rudder trimtab, unit markings and their histories and application. A complete history of the

Object ID	Title	Author	Summary
			evolution of camouflage, kill markings, and individual markings. This is the companion volume to "Japanese Army Air Force Camouflage and Markings, World War II." After a general introduction to JNAF structure and terminology, Thorpe discusses general JNAF schemes, general markings, unit markings and aircraft. He covers such topics as the four basic schemes, operational markings, victory markings, hinomaru application, fleet identifiers, and command markings. Contains many photos of different aircraft and drawings of different markings.
2021.323.007	Japanese Army Air Force Camouflage and Markings World War II	Thorpe, Donald W.	(From an Amazon review) This book is invaluable when researching a pattern and/or the markings of a particular aircraft. The book is organized so that one can find the specific information(unit, unit markings, camo. patterns, etc.) that you need. Mr. Thorpe includes an organizational chart of the Japanese Army AF from squadron on up. A printed sheet of the paint colors used is included. While the printing process does result in inaccurate colors; it does give you an idea of the relative shade of the paint. Mr. Thorpe has also organized and listed all the patterns used; and in what part of the Pacific theatre they were likely to be used and when they appeared as well. All the wings, squadrons, and other units created by the Imp. Jap. AF are also listed, with the unit markings shown and what colors were used to paint them. Mr. Thorpe also mentions the interior colors and what ordnance(bombs, etc.) paint colors he was able to discover.

Object ID	Title	Author	Summary
	Support Ships of the U.S. Navy		considered as a direct continuation of Aircraft Carriers of the US Navy, which was published in Spring 1980. Although it is complete in itself, for reasons of conciseness we have no repeated much of the information that was presented in detail in the first volume...
2021.323.010	Carrier Fighters, Vol. 2	Mizrahi, J. V.	Carrier Fighters vol II - "wars of the future are fought with the weaponry of the past"...In the opening months of WWII when the United States lacked modern aircraft. Aircraft included are F4F-Grumman Wildcat, Mitsubishi Zero Japanese fighter, F4U wildcat and F4U Corsair.
2021.323.011	Yorktown Class Carriers	Wiper, Steve	For those of you that are wanting to build the USS Yorktown, Enterprise, or Hornet, this "photo album" is for you, it is full of detailed photographs that trace the lives of the three ships through their prewar years to their demise. The photographs are high quality and arranged from prewar images to the last images of each ship. According to the author these books are commonly misconstrued as "being for modelers", when in fact, they are for anyone interested in a visual history of ships, or a particular ship. The book begins with an overview of the Yorktown's and there is a short history of each ship. The photo's are well captioned, with the important features in each photo explained. There is also a little background information provided that helps the reader understand what is being presented. This book is geared towards the modeler, not only pointing out the details but explaining what they are and when they were added or removed. Camouflage measures are described, with the time frame noted.. The pictures range from yard photo's taken while each ship was in for refit, to in action

Object ID	Title	Author	Summary
			shots taken during the battles that all three ships engages in. Most of the photo's, I have not seen published before. the ones I have seen before are of even higher quality in this book. The close up shots of the various fittings are pretty revealing, and you will even find some great hanger deck shots should you be inclined to detail the interior of your ship. The aircraft that served aboard the three ships are covered as well. The years they entered service and were replace is noted, as well as their specifications. The General Statistics of the ships are covered in the back of the book, with Air Group and Squadron info presented for easy reference. This 8-1/4" x 11" soft book has 64 pages and well over 100 photo's. This book is a must have for anyone interested in any of these three carriers, whether you wish to model it, or just are fascinated with the ships, it definitely belongs on your book shelf! Special thanks to Keith Butterley of Warship Books for the review copy. Keith carries a full line of Classic Warships books as well as just about any Warship related book you need. (from modelwarships.com)

2021.323.018	Tale of a Tiger	Smith, R. T. (Robert T.)	Signed by author. From the dust jacket: "Bob Smith was all of 10 when, against parental orders, he got his first airplane ride in a rickety old biplane flown by a barn storming pilot from a cow pasture outside the little Nebraska town where he lived. From that moment on there was no doubt in his mind as to what he would do when he grew up; he would become a pilot, and seek adventure in far-away places that most people find only between the covers of National Geographic. After attending the University of Nebraska, Smith began his flight training as a flying cadet in the U.S. Army Air Corps in 1939, completed the rigorous training program and was commissioned a second Lieutenant in June of 1940. A year later, now a flight instructor at Randolph Field, Texas, he learned that a small number of military pilots were being allowed to resign their commissions in order to volunteer for duty as fighter pilots in the Chinese Air Force. The idea was to put a stop to the indiscriminate bombing attacks of the Japanese invaders, with particular emphasis on keeping open the Burma Road, China's only remaining lifeline for supply from the outside world. Although he had never flown a fighter plane, indeed have never ever seen a P-40 - the type

Object ID	Title	Author	Summary
			with which the little group of volunteers was to be equipped – this sounded like an opportunity much too good to pass up. So it was that in July of 1941, nearly 6 months before Pearl Harbor was attacked, "R.T." as he was now called was on a boat heading for Burma. Those far-away places in the adventure he sought were soon to be found in untold abundance!... Tale Of A Tiger takes the reader along on wild and hazardous flights into the skies over Burma and China, told by one of the leading Aces of the Hell's Angels squadron who was involved from beginning to end. Smith's diary is reproduced in its original form, exactly as written at the time, with a generous helping of interesting and insightful footnotes, plus dozens of photos, many never before published."
2021.323.019	Aircraft of the Royal Air Force : 29 Classic RAF Aircraft from World War I to the Present Day	Rawlings, John D.R. In late 1941 and early 1942 Zero fighters wrought havoc over Pearl Harbour, the Philippines, Singapore and other targets in the Pacific. This text provides an account of the A6M Zero
2021.323.027	Kawasaki Ki.61/Ki.100 Hien in Japanese Army Air Force Service	Buelschel, Richard M.	The Kawasaki Ki-61 Hien ("flying swallow") is a Japanese World War II fighter aircraft used by the Imperial Japanese Army Air Service. The Japanese Army designation was "Army Type 3 Fighter", which led to the Allied reporting name of "Tony", assigned by the United States War Department. It was the only mass-produced Japanese fighter of the war to use a liquid-cooled inline V engine. Over 3,000 Ki-61s were produced. Initial prototypes saw action over Yokohama during the Doolittle Raid on 18 April 1942, and continued to fly combat missions throughout the war. From wikipedia.
2021.323.028	Mitsubishi Ki.67/Ki.109 Hiryu in Japanese Army Air Force Service	Buelschel, Richard M.	The JAAF Mitsubishi Ki-67/Ki-109 HIRYU (Peggy) is presented in this volume. All variations, markings and units are covered in this, the eighth in a multi-volume series.
2021.323.029	Nakajima Ki-43 Hayabusa I-III in Japanese Army Air Force-RTAF-CAF-IPSF Service	Buelschel, Richard M.	From Amazon "Renowned Japanese aircraft historians Richard Bueschel revises and updates his classic series of books on Japanese Naval and Army Air Force aircraft of World War II. The Nakajima Ki-43 Hayabusa is presented in this volume. All variations and markings are covered in this the second in a projected multi-volume series. The first volume in Bueschel's series covers the Mitsubishi A6M-1/2/2-N Zero-Sen(available from Schiffer Publishing Ltd.)."

Object ID	Title	Author	Summary
2021.323.030	Nakajima Ki.44 Shoki in Japanese Army Air Force Service	Buelschel, Richard M.	Third volume in the multi-volume series. From Wikipedia The Nakajima Ki-44 Shoki ("Devil Queller") was a single-seat fighter-interceptor developed by the Nakajima Aircraft Company and operated by the Imperial Japanese Army from 1942 to 1945 during World War II. Its official designation is Army Type 2 Single-Seat Fighter and its Allied reporting name was Tojo. The design and development of the Ki-44 differed greatly from that other Japanese fighters of the time, incorporating speed and rate-of-climb in preference to maneuverability. This was a result of a need for a heavy fighter aircraft that followed a more offensive doctrine and the Ki-44 is often classified as an Air Defence Fighter. Its development ran almost in parallel to its predecessor, the lighter and nimble Nakajima Ki-43, and yet the two aircraft differed. The Ki-44 had a higher landing speed and was less maneuverable. These were concerns for pilots who would compare it to the Ki-43 or Ki-27 which were far more agile and responsive. As a result, the Ki-44 was first restricted to pilots with at least 1000 hours of flying time due to its tricky handling characteristics. However, it was later found that younger pilots who had not been instilled with the extensive aerobatic training of earlier cadres could manage the aircraft perfectly well, so the restriction was removed. Nonetheless, the Ki-44 was the fastest climbing Japanese fighter at the time. It was the Imperial Japanese Army's only interceptor type when the USAAF's B-29 Superfortresses began bombing the Japanese mainland in June 1944.[3][5] While there was performance restrictions at high altitude, it was superior to the Ki-43 in that it was capable of matching Allied aircraft in climbs and dives, giving pilots more flexibility in combat and

Object ID	Title	Author	Summary
			greater pilot confidence than the Ki-43; the basic armament of four 12.7mm machine guns or two 12.7mm guns and two 20 mm cannons (or, in a few aircraft, two Ho-301 40mm cannons of limited range) was far more powerful than the older Ki-43's two 12.7mm machine guns.[6][7] Production of the Ki-44 was terminated in late 1944 in favour of the more advanced Nakajima Ki-84, and when the war ended, only three sentai units were still equipped with them."
2021.323.031	Nakajima Ki.84 a/b Hayate in Japanese Army Air Force Service	Buelschel, Richard M.	Richard Bueschel revises and updates his classic series of books on Japanese Naval and Army Air Force aircraft of World War II. The JAAF Nakajima Ki-84 HAYATE (Frank) is presented in this volume. All variations and markings are covered in this fifth book in a multi-volume series. The Nakajima Ki-84 Hayate ,(lit. "Gale") is a single-seat fighter flown by the Imperial Japanese Army Air Service in the last two years of World War II. The Allied reporting name was "Frank"; the Japanese Army designation was Army Type 4 Fighter
2021.323.032	Battlecruisers	Roberts, John	From Syndetics: Each volume in this groundbreaking series gives readers detailed developmental histories of the world's ship types along with highly detailed folding plans and cutaway drawings of particularly significant vessels. This book traces the development of Fisher's original idea into the first battlecruiser, Invincible of 1908, through the "Splendid Cats" of the Lion class, to HMS Hood in 1918 -- the largest warship in the world for the next twenty years.

2021.325.002	Crommelin's Thunderbirds : Air Group 12 Strikes the Heart of Japan	Bruce, Roy W.	"Crommelin's Thunderbirds," led by the much admired navy fighter pilot Charles Crommelin, were involved in the first carrier air strikes in Japan and the worst of the kamikaze attacks off Iwo Jima and Okinawa. In this book, two pilots from the group, officially known as AirGroup 12, chronicle their operations off the USS Randolph in the last stages of the Pacific war. The authors examine the activities of the entire group: fighters, dive bombers, and torpedo bombers, enlisted men and officers, pilots and aircrewmembers, as well as the shipboard personnel who kept them flying.
2021.326.001	Navigation Work Book : Ground School Edition	Catlett, W. J.	Aviation Ground School Navigation Workbook, early 1940's vintage, with original canvas cover. Used in conjunction with Air Navigation textbook by student to demonstrate fluency with material being taught in class. This one has been completed by the student, an R. E. Snow.

2021.334.001	War in the Air, The : World War II	Gurney, Gene	The War in the Air begins with an account of the years after World War I, and follows the growth and development of the airplane until its emergence as the primary combat weapon of World War II. Combat pictures follow the progress of the war in the air from 1939-1945. There are many photographs never before published of Japanese, Russian and German air activities; also, previously restricted photographs and information from the USAAF wartime publication, IMPACT. In addition, the book contains

Object ID	Title	Author	Summary
			hundreds of photographs of the royal Air Force in all combat theatres.
2021.334.002	US Navy Air Wings : Flamboyant Markings 1965 - 1975	Francillon, René J.	Introduction: With the promulgation on 23 February 1955 of MIL-C-18263(AER), a new era began for Naval Aviation, as for the next 25 years carrier aircraft were to have unspectacular Light Gull Gray upper surfaces and gloss Insignia White under surfaces. Moreover, colourful squadron markings, which had begun to brighten naval aircraft after the Korean War, became the norm rather than the exception and in the process heightened esprit de corps,'brought joy to aircraft enthusiasts, and boosted Kodak's profit. Even sustained combat operations in Southeast Asia did not lead to toning down these markings and the evaluation in 1965-66 of tactical camouflage for carrier aircraft remained inconclusive. In fact, the most colourful schemes were those carried in the early seventies by CAG aircraft. Unfortunately for Kodak and aviation enthusiasts, a new awareness of the ease with which brightly marked aircraft can be spotted and tracked by infrared sensors finally led to the progressive adoption of new TPS (Tactical Paint Schemes) in the early eighties. This title in the growing Osprey Colour Series makes no pretence either to be an historical survey of camouflage and markings as applied to carrier aircraft of the US Navy during the 1965-1975 period or to be exhaustive. Rather, work on this photo book was begun by greying enthusiasts who, remembering with fondness the 'good old days' when photographing naval aircraft was fun, decided to share with younger enthusiasts their Kodachrome memories. You may not find in the midst of these 120 photographs one of your favourite aircraft or squadrons. We hope,

Object ID	Title	Author	Summary
			however, that the splashes of colour on the following pages will help you forget for a moment the dullness of TPS and the drabness of subdued markings. Rene J Francillon & Peter B Lewis
2021.334.003	First Blue : The Story of World War II Ace Butch Voris and the Creation of the Blue Angels	Wilcox, Robert K.	Back-up to 2004.331.004 The Remarkable Story of a True Hero of American Aviation The U.S. Navy's Blue Angels are the most famous flight demonstration team in the world. While millions of aviation enthusiasts see their shows every year, the story of the man who formed the squadron has never been told. He is Roy Marlin "Butch" Voris, a World War II Ace and one of only two aviators ever to command the Blue Angels twice. First Blue details the epic journey of an unassuming man whose strong character and desire to fly launched him into a life of drama, heroism, and accomplishment unique in his field. Because he wanted to serve his country during World War II, a young Butch Voris found himself flying fighter planes as part of the pitifully prepared and outmanned front in the early stages of the Pacific theater. He was nearly killed there but went on to be a leader in one of the most fearsome naval air squadrons in the Pacific. As a pilot, Butch is unquestionably in the same class as more recognized aviator heroes such as Chuck Yeager and Pappy Boyington. While his World War II experience alone could comprise a book, Butch may be best known for his efforts in the creation of the naval air demonstration team, the Blue Angels. After the war, Voris was personally chosen by Admiral Nimitz to start the Blue Angels and to lead them, first in prop planes and later

Object ID	Title	Author	Summary
			in jets. The story of his efforts is as exciting as it is inspirational, and it's told here in meticulous detail and with great humor. Today the Blue Angels still follow traditions established by Butch. Butch's involvement in military flight didn't end with the Blue Angels; he became a major player in the development of the F-14 Tomcat and NASA's Lunar Explorer Module for Grumman. Butch dedicated his life to his work, and here, finally, is the remarkable, untold account of this true American aviation pioneer and hero: a man whose life had unparalleled influence on naval aviation and whose legacy continues to inspire millions of Americans each year. Publication Date: September 23, 2004 (from Amazon.com)

2021.334.004	Reuben Fleet : And the Story of Consolidated Aircraft	Wagner, William	Signed by the author. Explores " the story of the development of such famous aircraft like the PT-1, PT-3 Husky, the Fleetster, the famous Fleet biplane, the Ranger, the Commodore, the PBY Catalina, the Coronado, and above all, the so famous B-24 Liberator, the Privateer, the merge with Vultee to form CONVAIR, the development of the B-36, etc." From Wikipedia The Consolidated Aircraft Corporation was founded in 1923 by Reuben H. Fleet in Buffalo, New York, the result of the Gallaudet Aircraft Company's liquidation and Fleet's purchase of designs from the Dayton-Wright Company as the subsidiary was being closed by its parent corporation, General Motors.[1] Consolidated became famous, during the 1920s and 1930s, for its line of flying boats. The most successful of the Consolidated patrol boats was the PBY Catalina, which was produced throughout World War II and used extensively

Object ID	Title	Author	Summary
			by the Allies. Equally famous was the B-24 Liberator, a heavy bomber which, like the Catalina, saw action in both the Pacific and European theaters.
2021.334.005	Battle for the Skies	Paterson, Michael	From the jacket - "From dogfights above the English Channel during the Battle of Britain and relentless bomber raids in Europe to the conflicts on the Russian front and in the Pacific, this is an incredible insight into the minds of some of the greatest heroes of the age: what they thought about the planes they flew, what they thought of their opponents and what it felt like to be involved in some of the most exciting and terrifying actions of the war. Drawn in large part from a unique collection of pilot accounts assembled by the Military Gallery in Wendover, many of the war's most famous airmen are included."
2021.334.006	Guadalcanal : The First Offensive	Miller, John	References Navy, U.S., Navy patrol bombers, and naval attacks. From the Preface: ""The successes of the South Pacific Force," wrote Admiral Halsey in 1944, "were not the achievements of separate services or individuals but the result of whole-hearted subordination of self-interest by all in order that one successful 'fighting team' could be created." * The history of any South Pacific campaign must deal with this "fighting team," with all United States and Allied services. The victory on Guadalcanal can be understood only by an appreciation of the contribution of each service. No one service won the battle. The most decisive engagement of the campaign was the air and naval Battle of Guadalcanal in mid-November 1942, an engagement in which neither Army nor Marine Corps ground troops took any direct part. This volume attempts to show the contribution of all services to the first victory on the long road to Tokyo. It does not describe all ground, air, and

Object ID	Title	Author	Summary
			naval operations in detail but it does attempt, by summary when necessary, to show the relationship between air, ground, and surface forces in modern warfare. Guadalcanal: The First Offensive rests upon somewhat different sources from most other volumes in the Pacific series of U. S. ARMY IN WORLD WAR II. The War Department's historical program had not yet been established in August 1942 when the Solomon Islands were invaded by the Allies. No historians accompanied the Marine or Army divisions to Guadalcanal with the mission of preparing thorough and detailed histories of the campaign. The interviews of whole companies and critiques of actions that were conducted by Army and Marine historians in later campaigns were never conducted on Guadalcanal. Interviews with individual officers and men were conducted by theater and War Department historians long after the fighting was over, but by that time memory was none too fresh. As a result it has not been possible to analyze the actions of small units on Guadalcanal as completely as in other volumes in the Pacific series."
2021.334.007	World War II : Battle at Sea	McIntyre, Colin	Using a fine selection of contemporary pictures, looks again at most of the major naval engagements fought between 1939 and 1945 and asks whether everything was as clear cut as earlier accounts suggested. For instance, how many battles might have had a different outcome if one side or the other had better communications, or better intelligence, or just that little bit of extra luck. This book considers whether those involved fully appreciated the role of aerial reconnaissance, of carrier tactics and of the submarine. It also examines whether there was too great an emphasis on destroyers

2021.334.008	U.S. Aircraft Carriers in Action, Part 1	Stern, Robert	USS Langley (CV-1) aircraft carrier, Lexington-class aircraft carriers, USS Ranger (CV-4) aircraft carrier, Yorktown-class aircraft carriers, USS Wasp (CV-7) aircraft carrier
2021.334.009	Essex Class Carriers in Action	Smith, Michael C.	Squadron Signal publications has been producing modelers reference books for over 20 years. They have a pretty thorough line of books covering various classes of ships. This one is dedicated to the Essex Class Carriers of the second world war.. The book begins with a history of carrier development and covers the high points of Essex Class Carriers in the many roles they served in. Planes onboard: GRUMMAN F6F HELLCAT; CURTISS SB2C-3 HELLDIVER; GRUMMAN F3F WILDCAT; GRUMMAN TBF AVENGER; DOUGLAS SBD DAUNTLESS; VOUGHT F4U CORSAIR; The book is filled with photo's and drawings that will help the modeler add those finer details that help make your kit stand out. Most kits have instructions that are a little lacking and it is a benefit to the modeler to have a reference to call upon when detailing or painting your kit.

Object ID	Title	Author	Summary
			My favorite feature of the "In Action" books are the great centerfolds, elevation and plan drawings of some of the ship in the class, nicely illustrated in color to give the modeler an idea of the camouflage patterns used. Check out the sample image on the right. Not only do the illustrations give the model and idea of the colors used, but also the weathering used. There are a number of illustrations of weapons, radar's and various fitting used on the carrier. The illustrations will be a big help in doing that final detailing need to spruce up your model. The illustrations also explain the difference between the long and short hull carriers, and show accurate catapult placement in case you want to try to correct one of the flaws in the Hasegawa CV USS Ticonderoga. I especially appreciate the plan and elevation line drawings the show all the carrier classes in their relative sizes at the front of the book. There are also illustrations of the typical aircraft that they carried. From cover to cover you will find many useful illustrations and photo's of Essex Class carriers from their initial deployment to their late war appearances. My only complaint is the lack of 50's and 60's images of the Essex class conversions. At a relatively low cost this book represents a great value for anyone interested in building an Essex or Ticonderoga Class Carrier kit out there such as the Hasegawa CV USS Ticonderoga. (from modelwarships.com)
2021.334.010	Jets at Sea : Naval Aviation in Transition, 1945-1955	Marriott, Leo	From Amazon: As World War Two drew to a close, jet-powered aircraft were beginning to be introduced into service. To take advantage of this major development it was necessary for all the world's

Object ID	Title	Author	Summary
			air powers to rethink combat tactics and develop the means of handling these faster and generally larger aircraft in the air, on land and especially at sea. As this modern breed approached and finally broke the sound barrier, so did landing and takeoff speeds. The decade after the war saw rapid developments in the design of both naval aircraft and their seaborne bases – the aircraft carrier. The first jet to land aboard a carrier was a modified de Havilland Vampire in 1945 on H.M.S. Ocean. Progress was rapid and the application of British inventions such as the angled flight-deck, steam catapult and mirror landing sight soon became adopted by the major navies of the world. Naval aircraft too became more sophisticated by the addition of high-lift flap systems and strengthened undercarriages to allow them to operate more safely at sea.
2021.334.011	Warbird Legends	Holmes, Tony	From Amazon: The Second World War spurred tense focus among industries of the world's powers. In the short span of six years, military aircraft developed from open-cockpit biplanes to fighters that soared to 40,000 feet and toyed with the sound barrier. Represented in this splendid volume are images of the war's 20 greatest aircraft - from the legendary Mustang, Spitfire, Flying Fortress, and Mitsubishi Zero, to lesser-known but equally awe-inspiring warbirds like the Mosquito, Blenheim, and Kingcobra. The award-winning air-to-air photography of John Dibbs captures immaculately restored aircraft and is complemented by a selection of archival, frontline images illustrating the true spirit and humanity of these Flying Legends. John M. Dibbs spent his childhood near old RAF Command Airfields. His natural interest in aviation has led to a diverse portfolio, and

2021.334.012	Naval Customs, Traditions and Usage	Lovette, Leland Pearson	Contains a wealth of information about Navy customs. The Major portion of the contents of the book was presented in a series of lectures to a group of student officers at the Postgraduate School, Annapolis, Maryland. First edition published 1934, second edition published 1936, and this third edition published 1939.
2021.334.013	Brotherhood of Heroes : The Marines at Peleliu, 1944 : The Bloodiest Battle of the Pacific War	Sloan, Bill	"Between September 15 and October 15, 1944, the First Marine Division suffered more than 6,500 casualties fighting on a hellish little coral island in the Pacific. Peleliu was the scene of one of the most savage no-quarter struggles of modern times, one that has been all but forgotten - until now. Drawing on extensive interviews with Marine veterans, Bill Sloan follows a small group of young Americans through this incredibly vicious campaign and rescues their heroism on Peleliu from obscurity." "Misled by faulty intelligence, the 9,000 Marine infantrymen who landed on Peleliu's beaches under withering enemy fire found themselves facing 11,000 Japanese embedded in an intricate network of caves and underground fortifications unrivaled in the history of warfare. At the heart of the Japanese defensive system was a maze of sheer cliffs and deep ravines known collectively as the Umurbrogol plateau. Endless strings of ridges bristled with concealed artillery, mortars, machine guns, and riflemen, making every inch of contested ground a potential death trap for Marines." "Bill Sloan's narrative weaves together the experiences of the men who were there, producing a tableau of the twenty-four-hour-a-day nightmare of Peleliu - a melee of nonstop infantry attacks, ferocious hand-to-hand fighting, night assaults, and exhausting forced marches in temperatures that topped 115

Object ID	Title	Author	Summary
			degrees. With casualties in some infantry units averaging more than sixty percent, Peleliu ranks with the bloodiest battles in the Corps' history. Exemplifying these staggering losses was K Company, Third Battalion, Fifth Marine Regiment (K/3/5), on whose gallant officers and enlisted men the narrative focuses from the initial assault on the beaches to the horrific struggle for the Umurbrogol's crags and crevices." "Surprisingly, Peleliu received little public notice back in the States even as it was being fought and was virtually forgotten after the war, despite elements of controversy that are still debated by military strategists today. The invasion was ordered by Army General Douglas MacArthur to protect his flank as he launched his campaign to recapture the Philippines. But many experts believed then - and still maintain today - that the bloodshed at Peleliu was needless and that the island could have been safely bypassed."--Jacket.
2021.334.014	One Square Mile of Hell : The Battle for Tarawa	Wukovits, John F.	In November 1943, the men of the 2nd Marine Division were instructed to clear out any token Japanese resistance on the Pacific island of Betio and return to their waiting ships. But when the Marines landed, the surviving Japanese poured out of their protective subterranean bunkers and began one of the most brutal and bloody battles of World War II. For three straight days, attackers and defenders fought over every square inch of sand in a battle with no defined front lines, and where there was no possibility of retreat---because there was nowhere to retreat to. It was a clash that would leave both side stunned and exhausted, and prove both the fighting mettle of the Americans and the fanatical devotion of the Japanese.

			involved in flying a small aircraft.
			Beautifully illustrated with over 200 color technical drawings and over 150 black and white drawings, The Lore of Flight also contains an index with more than 1,550 entries supplementing the main text.
2021.346.003	Submarines of World War II	Bagnasco, Erminio	Replaces 2004.314.324.Submarines of World War Two provides, for the first time in one fully-illustrated volume, accurate and comprehensive details of the 2,500 submarines of all nations taut accounted for the sinking of more than 23 million tons of merchant shipping between 1939 and 1945. With over 500 photo-graphs and line drawings, it presents an unrivaled illustrated encyclopedia of one of the great decisive weapons of the twentieth century. Strategically employed on a large scale, submarines contributed decisively to the inter-continental war. The most spectacular and significant area of conflict was the North Atlantic, where a long struggle took place as Germany's U-boats threatened to strangle Great Britain's maritime communications. In the Pacific, the Japanese scored some notable successes against warships - such as the sinking of the United States aircraft carrier Yorktown in June 1942 - but American submarines achieved the decisive results, waging unrestricted warfare on Japan's highly-vulnerable communications, and practically wiping out her mercantile marine. In the Mediterranean, a hard-fought submarine war brought high losses to both sides and saw some exceptional sinkings, such as those of the British aircraft carrier Ark Royal and battleship Barham. Another significant development of undersea

Object ID	Title	Author	Summary
			warfare was the evolution of midget submarines and 'human torpedoes', which entered the war with startling effect: the British battleships Valiant and Queen Elizabeth were both badly damaged by Italian underwater assault craft; in September 1943, the German battleship Tirpitz was crippled in its fjord lair by British X Craft; and, in the Pacific, the Japanese began to operate their own miniature submersibles - including Kaiten craft, a sort of underwater kamikaze weapon. Submarines of World War Two describes all of the classes and types of submarines employed by the combatant nations during the war - from midgets to large U-cruisers - and includes also the projected and experimental designs. For each class of submarine, the principal technical characteristics are presented: construction, displacement, dimensions, speed, range, operational depth, fuel load, armament and complement, together with a brief history of the submarine's wartime career, and the fate of each member of the class. Written by one of Italy's foremost naval authors, Submarines of World War Two enables the reader to compare the performance, appearance and characteristics of all the submarines that took part in the Second World War. Also included is a brief outline of the evolution of the submarine and submarine warfare - including the interplay of wartime experience, design improvement and tactical innovation - placing the subject in its true historical perspective. (from dust jacket flap)
2021.348.001	USS Midway (CVA-41) - Westpac - 1961	Welles, Chris (ed)	Pictorial account of USS Midway (CVA-41) deployment to South East Asia. The aircraft carrier departed Alameda, CA on 15th February to Hawaii, Guam, Subic Bay; Philippines, to Japan (Sasebo, Yokosuka),

2021.357.005	Twelve Turning Points of the Second World War	Bell, P. M. H.	From Amazon: The Battle of Britain. Pearl Harbor. Stalingrad. D-Day. These defining events of the Second World War exemplify both the immense heroism and the grievous costs of global conflict. They are the tense, thrilling moments that had the potential to swing the war in favor of either side and in turn change the course of history. In this gripping new look at the twentieth century's most crucial conflict, historian P. M. H. Bell analyzes twelve unique turning points that determined the character and the ultimate outcome of the Second World War. Be they military campaigns, economic actions, or diplomatic summits, Bell's twelve turning points span the full breadth of the war, from the home front to the front line. Many are familiar—Barbarossa and Hiroshima among them—while sections on war production, the Atlantic convoy system, and the conferences at Tehran and Yalta emphasize the importance of the combatants' actions off

Object ID	Title	Author	Summary
			the battlefield. Through these keenly narrated episodes, Bell reveals how the Allied and Axis powers achieved their greatest successes and stumbled into their strategic failures, inviting us to think about the Second World War in a fresh, stimulating way. Ultimately, his close study of these dozen turning points reminds us, often terrifyingly, how easily things might have turned out differently.
2021.357.007	Petty Officer and a Swabbie, A	Paige, Charles W.	The latest edition is 2022. DO NOT COPY NOR GIVE AWAY. COPYRIGHTED MATERIAL. We have permission from Charles Paige to put it on our network. The time is during the Vietnam War. The Tet Offensive has occurred just before I enlist, and things continue to heat up both in the Western Pacific and on the home front. Taken from http://www.netmeister.net/~cpaige/01POAS-title.htm My story is not one of combat and harrowing experiences against shot and shell. Mine is about life in the Navy circa 1968-72, on bases and onboard ship, and about interactions between the Navy and a civilian population not too happy we are involved in Vietnam. It is also about travels and experiences in exotic countries, as a young man not an officer and a gentleman but a petty officer and a swabbie is introduced to a sometimes belligerent but always fascinating world. Charles was a part of the commissioning crew of the USS Midway in 1970. Former USS Midway crew member.
2021.357.008	Marine Officer's Guide, The	Estes, Kenneth W.	From Amazon, The Guide "describes in detail the Marine Corps as a military institution of the United States and, in so doing, delineates the characteristics of the men and women who constitute the Corps. The Guide supplements, but does not supplant, official regulations and instructions. It can help an officer to acquire quickly a stockpile of

Object ID	Title	Author	Summary
			information, but it does not relieve the officer of his or her obligation to know the published regulations that govern our Corps. I have endeavored to provide sound advice and up-to-date information on professional matters of note to the Marine officer. I have described customs and usages that are current and not at variance with "the book." I have also deleted some practices that have become anachronistic, and persons in search of nostalgic material can refer to preceding editions for them. Many a well-worn copy sits ready at hand on the bookshelves of the officer corps, and officers of all grades have grown accustomed to its reliability and utility. This seventh edition reflects all the changes in the organization of the Corps fostered by the evolving military establishment of the United States. A modern corps, shaped in so many ways by the Great Pacific War of 1941-1945, now reflects the Gulf Conflicts and the passing of the era of superpower rivalry and the century of the world wars. What remain remarkably unchanged, however, are the character of the Marine Corps and the keen pursuit of excellence in the profession of arms that its officer corps reflects."

2021.360.001	Days of Trial and Triumph : A Pictorial History of Lockheed	Lockheed Aircraft Corp	In 1912, Allan and Malcolm Lockheed were hard at work building a sea plane. Spending nights and weekends in a San Francisco garage where they repaired cars during the day, an aircraft took shape that in many ways resembled the plane that Martin flew to Catalina. The Model G was designed to carry pilot and passengers, and, it was hoped, make money. On December 19, 1912, with investors in place, the brothers incorporated the Alco-Hydro Aeroplane Company. On June 15, 1913, Allan and Malcolm launched the sea plane from a boat ramp into San Francisco Bay. Allan pushed the throttle and soon the plane was airborne. Lockheed's first flight of the Model G was in the books. Malcolm joined Allan for the second flight—a complete cruise over the bay—soaring to an altitude of 300 hundred feet over the Golden Gate, Alcatraz Island, and Sausalito Bay, to the delight

2021.363.005	Liberator : The Need, the Plane, the Crew, the Missions.	General Dynamics. Convair Div.	From Amazon: The B-24, contrary to the highly successful Boeing marketing, was in fact the workhorse of the Army Air Corps in WWII and was built in greater numbers than any U.S. heavy bomber. It served in Europe, Africa, and the Pacific. Could fly farther, faster, with greater payload than the B-17. Until the B-29 (another highly successful Boeing marketing effort), the Liberator was the only effective bomber in the Pacific, as the needed range was critical in the huge open ocean spaces there. While Liberators were produced by General Motors as well as Convair, the USAF Plant 19 facility operated by Convair in San Diego built more than anywhere, and in late 1943 and early 1944 were delivering a B-24 EVERY HOUR! Convair was also delivering Liberators from its new mile-long facility in Ft. Worth, Texas. The restored Liberator in this excellent coffee table book is one of only two or three still flying, and is a national treasure.
2021.363.006	Military Helicopters	Cowin, Hugh W.	While the emergence of the military helicopter as a vital element in both the conduct of a battle and the equally important task of battle support and resupply has only been brought about within the relatively recent past, the helicopter, as a concept at least, has been

Object ID	Title	Author	Summary
			with us for over 500 years. The first recorded helicopter concept to be put on paper flowed from the visionary pen of the multi-talented Italian, Leonardo Da Vinci, who, in 1483, drew up a scheme for a manpowered "Aerial Screw Machine". Others, largely unknown but including Britain's Sir George Cayley in 1843, were to take up the challenge of producing a flying machine supported by rotating wings through most of the next 4 centuries: all to little avail. Contents: Enter the Helicopter Vertical Infantry The Helicopter goes to Sea The Tank Killers Into the Future
2021.363.007	P-38 Lightning at War	Christy, Joe	From Amazon: This classic title traces the history of the Lightning from the earliest Lockheed "Model 22" through the severe compressibility problems of the prototype YP-38, to the P-38L-5, the fighter-bomber-reconnaissance aircraft of the USAAF in Italy and the Pacific. Graphically illustrated with over 200 action photographs and many eyewitness accounts, this book tells the story of a unique and innovative aircraft, revered for its adaptability and ability to limp home on one engine where other aircraft would have been destroyed.
2021.363.008	Warships : From Early Steam to Nuclear Power	Polmar, Norman	Warships tells the story of fighting vessels and naval warfare since sail gave way to steam in the 19th century. It describes the major developments in hull design, guns, and armor; the evolution of the dreadnought, submarine, and aircraft carrier; the great sea battles of two world wars, and the ways in which electronics and nuclear power are shaping today's navies.
2021.363.009	Machines of War : The Definitive Visual History of Military Hardware.	None Stated	Explore the military vehicles, artillery, and industrial weaponry that changed the course of history. Discover vehicles from the Industrial era, World War I, World War II, the Cold War, and the modern

This is the story of men who served in a little known aspect of WWII, USN patrol bombing squadrons which flew the B-24 Liberator and the PB4Y-2 Privateer. The time of the first Navy heavy bombing (VB) squadron's arrival in the South Pacific, during the Solomon and the New Georgia Campaigns, to the final campaigns in the Central Pacific.
2021.367.002	Naval Aviation in World War I	Van Wyen, Adrian O.	Little had been published on the nature and extent of Naval air operations in the first World War until, in April 1967, Naval Aviation News began a series of monthly articles under the general title, "Naval Aviation in World War I." Using chronologies of significant events and narrative accounts of special phases of the war, this series told the story of how Naval Aviation met the challenge. At the beginning of the war in April 1917, the Navy air arm could muster at its one air station only 48 officers and 239 enlisted men, and 54 aircraft none of which was fit for patrol service. When the Armistice was signed 19 months later, there were 43 air stations in operation at home and abroad, and aircraft factory in production, and personnel numbered 39,000. Table of Contents In the Beginning 6 First Naval Aviation Unit in France 10 Aviation Ground Schools at MIT 16 The First Yale Unit 21 Trained by the Royal Flying Corps 26 The Navy Builds an Aircraft Factory 34 The First Lighter-than-Air Class at Akron 38

2021.367.005	Driven Patriot : The Life and Times of James Forrestal	Hoopes, Townsend	This engrossing biography recounts the life of one of twentieth-century America's most celebrated--though ultimately tragic--public figures, a man who mastered both Wall Street and Washington. James Forrestal was a brilliant financier and military organizer, and he was the first United States Secretary of Defense. Townsend Hoopes and Douglas Brinkley follow Forrestal through his Irish upbringing in upstate New York--he was the son of immigrants--through Princeton University to his success on Wall Street during the Roaring Twenties, to his Gatsbyan life of privilege on Long Island, to his pivotal role in rebuilding the obsolescent U.S. navy during World War II, to his career as the architect of the national security state, and, finally, to his collapse and suicide at the age of fifty-seven. The authors portray Forrestal's large and crucial role in American efforts to complete the military victory of World War II, restore a shattered postwar world, and confront the ominous new Soviet challenge. But they also describe the bitter interservice rivalry over the unification of the armed services, and how the savage attacks on Forrestal by columnists Drew Pearson and Walter Winchell, as well as rebellious navy and air force officers, led to his descent into paranoia and self-destruction. In the end he became prey to hallucinations and distressingly erratic conduct, and was relieved by President Truman from a job that had become

Object ID	Title	Author	Summary
			his life support system. A few months later he jumped from a window of Bethesda Naval Hospital. Hoopes and Brinkley probe deeply into Forrestal's contradictory inner life--his unfortunate marriage to Josephine Ogden, an intelligent but troubled and willful alcoholic; his cynical attitude toward society and wealth, yet his eagerness to embrace all their trappings; his inability to deal with adversity; his complex, elusive personality, which made it impossible for him to truly love another human being. Interwoven through the text are vivid portraits of Forrestal's contemporaries: Franklin Roosevelt, Admiral Ernest King, Harry S. Truman, George Kennan, Stuart Symington, the bankers Clarence Dillon and Ferdinand Eberstadt.
2021.367.006	Angel on the Yardarm : The Beginnings of Fleet Radar Defense and the Kamikaze Threat	Monsarrat, John	From Amazon: During World War II, fleet air defense become an increasingly important part of U.S. Navy carrier operations. Radar, the Combat Information Center and the Fighter Director Officer played crucial roles in defending the fleet against conventional and suicide Japanese air attacks. John Monsarrat was an FDO aboard USS Langley and his wonderful book ANGEL ON THE YARDARM provides a valuable, first-person account of the monumental air battles waged over the Pacific as viewed from the CIC. Monsarrat was one of the first FDOs to hit the fleet. Assigned to the light carrier Langley, Monsarrat details the early 'how-do-we-do-this?' efforts to integrate radar and the CIC in carrier ops and create a viable air defense system for the fleet. The whole process was a 'makee-learn' undertaking that, once the basic were established, kept evolving over the years, especially as kamikaze attacks put a whole new spin on fleet air defense. Monsarrat and Langley took part in many of

Object ID	Title	Author	Summary
			the major battles of the Pacific war including the Marianas Turkey Shoot, the Battle of Leyte Gulf and the 1945 raids on Tokyo. His account of those battles and evolution of fleet air defense are utterly fascinating.
2021.367.008	Lockheed : Vega, PV-1 Ventura & PV-2 Harpoon	Ginter, Steve	The Lockheed Ventura PV-1 AND PV-2 Harpoon was a bomber and patrol aircraft of World War II, used by United States and British Commonwealth forces in several guises. It was developed from the Lockheed Model 18 Lodestar transport. It served with many other Nation as a replacement for the Lockheed Hudson bombers then in service with the Royal Air Force. The RAF ordered 675 Venturas in February 1940. They were delivered from mid-1942 onwards. 192 pages, 340 photos, 61 drawings 2 pages of models colored front and back cover with 2 colored photos. 2021.367.009	Grumman F9F Panther Part Three : Navy Panthers : Korea and Beyond	Ginter, Steve	(from ginterbooks.com:) KOREA and BEYOND Volume three of the Panther story focuses on the use of the aircraft by the United States Navy. This was the first Grumman jet aircraft to go to sea. This book covers the History of the squadrons and the men that flew the Navy Panthers. Some photos show the hazards of landing on a straight deck carrier. 145 pages, Colored front and back cover, 313 B&W photos including Squadron History, Patches and ships they served on ORDER NF61 \$29.95
2021.367.010	Admiral William Veazie	Wheeler, Gerald E.	This biography provides

Object ID	Title	Author	Summary
	Pratt, U.S. Navy : A Sailor's		insights of value to an understanding of the modern Navy and its roles in recent American history. The biography also throws light on the policy-level scene in Washington. Pratt graduated from the Naval Academy and became a mid-shipman in 1885 and served until 1933. His last job was as Chief of Naval Operations.
2021.367.011	At Close Quarters : PT Boats in the United States Navy	Bulkley, Robert Johns	From Amazon: "The thorough and competent account herein of over-all PT boat operations in World War II, compiled by Captain Robert Bulkley, Jr. a distinguished PT boat commander, should prove of wide interest. The widest use of the sea, integrated fully into our national strength, is as important to America in the age of nuclear power and space travel as in those stirring days of the birth of the Republic." President John Fitzgerald Kennedy Robert Johns Bulkley (1880 – 1965) was a United States Democratic Party politician from Ohio. He served in the United States House of Representatives, and in the United States Senate from 1930 until 1939. A graduate of Harvard University for undergraduate studies and law school, Bulkley commenced the practice of law in Cleveland, Ohio in 1906. Bulkley served two terms in the House from 1911-1915 from the 21st District on Cleveland's East Side. During World War One he served as chief of the legal section of the War Industries Board. He was later elected to the U.S. Senate in 1930 to fill the vacancy created by the death of Theodore E. Burton. Bulkley was re-elected in 1932, but lost a bid for a second full term in 1938 to Robert A. Taft. After his term in the Senate ended, he resumed his practice of law. Foreword by President John F. Kennedy

Object ID	Title	Author	Summary
2021.367.013	Pearl Harbor Survivors Association Silver Anniversary Commemorative Book	Pearl Harbor Survivor Association	A picture book commemorating the 25th anniversary of the Attack on Pearl Harbor. Includes personal narratives from the survivors as well as historical photographs.
2021.367.014	Douglas AD/A-1 Skyraider, Part Two	Ginter, Steve	Skyraider Part Two covers the active duty US Navy AD/A-1 squadrons. Because of the extremely prolific usage and sheer numbers of squadrons concerned, the author did not have room to include the Naval and Marine reserve squadrons. Those squadrons will follow in Part Three. From Wikipedia: The Douglas A-1 Skyraider (formerly AD) was an American single-seat attack aircraft that saw service between the late 1940s and early 1980s. The Skyraider had a remarkably long and successful career; it became a piston-powered, propeller-driven anachronism in the jet age, and was nicknamed "Spad", after the French World War I fighter. It was operated by the United States Navy (USN), the United States Marine Corps (USMC) and the United States Air Force (USAF), and also saw service with the Royal Navy, the French Air Force, the Air Force of the Republic of Vietnam (VNAF), and others. In U.S. service it was finally replaced by the LTV A-7 Corsair II swept wing subsonic jet in the early 1970s. Covers: Development, Testing, Variants, Test/R&D, CAG, FASRONS, Training Squadrons, Base/Carrier/Air Group/Squadron Hacks & USMC
2021.369.001	Naval and Maritime Chronology : Compiled from Ten Years of Naval Review, 1961-1971	United States Naval Institute	On spine: Naval and maritime chronology, 1961-1971. Book compiled from the pages of naval Review, which has been published annually by the naval Institute since 1962. The purpose of the Chronology is to provide a handy reference to

2021.372.001	U.S. Marine Corps Story, The	Moskin, J. Robert	Previous edition 2004.313.469 The story of the United States Marine Corps spans more than 210 years. J. Robert Moskin has researched this book for over thirty years. In addition to studying thousands of documents in archives and libraries, he interviewed numerous Marines at Headquarters, from coast to coast and overseas. It is the story, he says, "of men in battle - the story of individual courage - of men who risked everything to do what, had to done." Although no Marine ever started a war, the Marines have been ready when called. The author has updated this edition to include the tales of Lebanon and Grenada and bring the Marine Corps story into the late eighties. It is a fascinating story because it mirrors the entire violent sweep of American history. It is also a story that a Marine can read pride and reexperience the esprit of the Corps and the special code of comradeship that drives the Marine Corps whenever this country calls. "The ideal gift for anyone who has served or is serving in the Marines, their relatives and their friends..." - The New York Times Book Review "The best written story of the Corps that I have read..." -General Wallace M. Greene Former Commandant, USMC

			"It is a hell of a piece of work.' - Leon Uris "Marine Corps veterans will love it!' - Newsday J. Robert Moskin is an historian and an award-winning journalist. Formerly the Foreign Editor and member of the Editorial Board of "Look" magazine, he has written extensively about military and foreign affairs. His reporting has received awards from the Overseas Press Club, the National Headliners Club, and the Newspaper Guild of New York. This book received the Distinguished Service Award of the Marine Corps Combat Correspondents Association. Correspondents Association (from back cover)
2021.375.002	Flights of Discovery : 60 Years at the NASA Dryden Flight Research Center	Wallace, Lane E.	This book provides an overview of 60 years of the Center's history from a variety of perspectives. In this book, the author also provides insights into the process of research engineering. She differentiates between flight testing and flight research, and she describes the "technical agility" of the researches at Dryden--a quality that has been an enormously important ingredient in the process of discovery through flight here in the Mojave Desert --From the Introduction.
2021.375.003	F-14 Tomcat	Peacock, Lindsay T.	From Amazon: An early publication on the US NAVY's most important carrier based fighter aircraft. Although long ceased to be on duty, to this day, it has not lost any of its popularity. The booklet is wonderfully described the development, the missions and all the units that have flown this plane. The photos correspond to the time.
2021.375.004	Lockheed Constellation	Stringfellow, Curtis K.	From Amazon; The first volume in an exciting new series about piston-engined civil airliners of the 1940s and '50s, this book uses the best archival material available from Lockheed and several U.S. airlines to illustrate the complexity of building

Object ID	Title	Author	Summary
			what was arguably the most stylish piston-engined airliner ever -- the majestic Constellation. Created in response to a requirement issued by the flamboyant owner of TWA, Howard Hughes, in late 1939, the Constellation was soon ordered by other airlines due to its unmatched ability to fly non-stop from the East Coast to the West Coast at a constant 300 miles per hour. All the major prototype, pre-production, and civil service variants are shown in production at the Lockheed plant in California, and in service with various operators around the globe. Period color photography is also included, featuring Lockheed and airline advertisements. Detailed captions and a concise narrative outline the manufacturing procedures, while appendices includes comprehensive production batch lists, performance data, and a
2021.375.005	Official Guide to the Smithsonian National Air and Space Museum	National Air and Space Museum	From Amazon: Since 1976, over a quarter billion men, women and children have toured NASM. Hundreds of airplanes, space vehicles and artifacts are imaginatively displayed at NASM and the Udvar-Hazy Center, chronicling flight in America. After a brief preface by current director John Dailey, Romanowski traces the history of NASM from its beginnings in the late 1800s to the present. He then takes a look at the Milestones of Flight Gallery and the various aviation and space galleries. The informative text is highlighted by dozens of gorgeous color photographs. The in-your-face close-ups are absolutely superb. Brown also details the Planetarium, IMAX Theater, Udvar-Hazy Center, etc.
2021.375.006	Tomcats Forever	Brown, David F.	From Amazon: The F-14, in production for two decades, was one of the best air-to-air combat machines. Other volumes may address the political, economic and

			corporate issues. We are here not to speak of politics but to show the Tomcat to our audience through the medium of photos. Photos aboard the carrier, photos returning from combat off the Libyan coast, and still more photos. None of the color plates has ever been published before. So enjoy the colour portraits that follow, a new way of looking at the Tomcat.
2021.375.007	Kitty Hawk to NASA : A Guide to U.S. Air & Space Museums and Exhibits	Morlan, Michael	Describes public, private, and military museums with aerospace collections and lists directions, prices, hours, and aircraft on display
2021.375.008	Nation's Hangar, The : Aircraft Treasures of the Smithsonian from the National Air and Space Museum's Steven F. Udvar-Hazy Center	Van der Linden, F. Robert	"The Nation's Hangar: Aircraft Treasures of the Smithsonian offers a fascinating textual and visual history of civilian, military, and commercial aviation from the earliest balloon flights to today's most advanced aircraft. The Nation's Hangar charts the awe-inspiring history of flight around the world. F. Robert Van Der Linden, a Smithsonian curator and leading expert on aviation history, explains the fascinating stories behind aviation's great technological advances and provides historic and social context that highlights the many ways in which these innovations have changed the course of human history. The Nation's Hangar is also a visual delight. The Smithsonian aircraft collection has never looked so compelling and sleek. The Nation's Hangar is a must-have for that fly boy or fly girl in your flight pattern"-- Provided by publisher.
2021.375.009	Art of William S. Phillips, The : The Glory of Flight	Park, Edwards	The common adornment of flight museums and air force bases is the framed print of a classic plane in dramatic action, and Phillips has been supplying such representations for years. Most commonly, he settles on World War II vintage war birds engaging in dogfights or limping home damaged. P-38s, B-17s, Spitfires, and P-51s dominate this album of 80-plus colorplates, followed in

Object ID	Title	Author	Summary
			number by the supersonic fighters currently in service. Phillips often pictures them at flattering angles as they pass over prominent landmarks, such as Crater Lake, the cliffs of Dover, or the Grand Canyon, highlighted by the low-angle ruddiness of sunsets. Drawing on his imagination, his conversations with pilots, and his Vietnam experience as a base guard watching planes return, Phillips wields his brush with the technical accuracy fighter jocks insist upon. The visual experience overcomes the corny captions, and although the book is pricey, a select number of libraries--those near air bases?--should see aviation aficionados crack open this collection. Gilbert Taylor (From Booklist)
2021.375.010	Complete Book of Top Gun, The : America's Flying Aces : The Pilots, the Training, The Aircraft	Lightbody, Andy	Provides profiles and specifications on 36 military aircraft and describes advanced military training courses for pilots

			the Pacific campaign -- from Pearl Harbor to the Philippines to the coast of Japan, and finally the decimated city of Nagasaki - - the crew members adapted to the routines of Navy life, braving kamikazes, ship-to-ship combat, and coping with the deaths of crewmates.
2021.380.006	Warships of the World : Major Classes	Ireland, Bernard	Modern warships are generally divided into seven main categories, which are: aircraft carriers, cruisers, destroyers, frigates, corvettes, submarines and amphibious assault ships. Battleships comprise an eighth category, but are not in current service with any navy in the world.
2021.380.007	Remembering Pearl Harbor : Eyewitness Accounts by U.S. Military Men and Women	La Forte, Robert S.	In the fifty years that have passed since the Japanese navy attacked Pearl Harbor and America suffered its greatest defeat of the war, many studies of the date which will live in infamy have been written. Virtually every detail of the event has been dissected, every perspective explored--except one. Until now, we have not had a full account from the U.S. enlisted men and women who lived through the attack. This book is their story.
2021.380.009	Vought F4U Corsair	Tillman, Barrett	Sleek and clean: the Corsair was loaded with power and potential. On 10-1-40, the prototype made 404 mph in a straight line between Stratford and Hartford. In doing so, the Corsair probably became the first US production aircraft capable of the then-magic 400 mph mark in level flight, possibly excepting Lockheed's twin-engine XP-38 Lightning. The Double Wasp got its name from its configuration: 2 banks of 9 cylinders each, based upon previous Pratt & Whitney designs such as the R-2180 and the dead-end R-2600. The R-2800 entered production in 1940, becoming the firm's first engine to exceed 100 horsepower per cylinder. Includes: The famous "Cranked" wing British and French Versions F2G - The Ultimate Corsair

2021.380.012	Crackup!	Morgan, Len	From Amazon "It is a common misconception that an aircraft is either in one glittering piece or else an unrecognizable scattering of pieces in a cornfield. It is entirely possible to roll a \$100,000 plane into a \$25 ball of scrap without mussing your tie, as this book proves. I have personally known pilots who flew into hillsides, landed in the sea, collide with other planes or had their aircraft explode in flight; all survived, most to fly again. Others perished in similar circumstances. None of the crackups shown here was fatal. So this compilation should be informative as well as entertaining. And for those who fly it can be instructive. Every pilot looking through these pages can find an accident he almost had himself. Here then are some of the things aircraft have done to pilots. And vice versa."
2021.380.013	Eyewitness History of the Vietnam War, 1961-1975	Esper, George	A chronological narrative by award-winning Associated Press reporter George Esper sets the stage. 2021.380.018	Golden Wings 1941-1945 : USN/USMC Aircraft of WWII	Sullivan, Jim	INTRODUCTION: As a result of the massive surprise Japanese bombing attack at Pearl Harbor on the morning of 7 December 1941, the United States of America entered the Second World War. Although the distant rumblings of war had been heard months earlier, the U.S. military was not fully prepared for combat on a worldwide scale. Our military aircraft were relatively few in numbers and consisted of trainers. transports, scouts, fighters and bombers. Many

Object ID	Title	Author	Summary
			of these were obsolete when compared to the performance of the Mitsubishi Zero that formed the backbone of the Japanese Empire's aerial assault. Fortunately for the United States, the few aircraft carriers we had in the Pacific at the time of the Pearl Harbor attack were at sea and sustained no damage as a result of the Japanese aerial assault. The USS ENTERPRISE was enroute back to Pearl and its air group suffered limited losses of SDBs and F4Fs as they arrived in the midst of the enemy air raid. This fact alone allowed the U. S. to preserve enough Naval air power to rebuild and reorganize. Starting the day after Pearl Harbor, a rapidly accelerated buildup of men and material began, which did not let up or level off until near the war's end in September of 1945. This book pictorially depicts this rapid development and the scope of aircraft utilized by the United States Navy and Marine Corps from 1941 thru 1945. The Second World War saw many aircraft types used, including the star performers, the F6F Hellcat and the F4U Corsair. These fighters, however, were just two of the types used by the Navy and Marines. Other aircraft, although lesser known, provided vital service that was essential to the ultimate result of the war effort. Victory was attained by the combined results of all aircraft types such as trainers. flying ambulances, cargo haulers, scouting planes, target tows, fighters and bombers. There were long-range patrol aircraft that flew for countless monotonous hours to keep the sea lanes open and relatively free of enemy subs. The photo reconnaissance aircraft braved danger daily to bring back vital photographic information for upcoming raids as well as post strike photographs to determine the damage done by these

Object ID	Title	Author	Summary
			strikes. Under primitive conditions, many of the land-based pilots lived and flew from airstrips that were not much more than muddy fields. As the war progressed, conditions under which both men and machines were forced to operate improved, thanks to the arrival of the Navy Seabee and Army construction teams. Muddy strips became operational airfields and living conditions were upgraded from tents to Quonset huts. Aircraft maintenance personnel were considerably better housed and equipped to keep the aircraft

2021.380.024	US Navy Carrier Aircraft vs IJN Yamato Class Battleships : Pacific Theater 1944-45	Stille, Mark	The Washington Naval Treaty of 1922 set battleship limits on the 5 major naval powers. Against its will, Japan was limited to an inferior position of being able to have three battleships for every five battleships owned by Great Britain and the United States. At that time, the battleship was seen as the apex weapon for sea battles. Between 1922 and 1939-1941, the aircraft carrier emerged a competitor to the battleship for supremacy at sea. (Both the carriers and the planes they carried improved remarkably during the interwar and war years.) By 1944, the Japanese had lost its aircraft carriers and the two huge Yamato class battleships (built in 1937 in defiance of the Washington Naval Treaty) were its remaining capital assets. Japan committed both of these assets in defense of the Philippines in October 1944. Bombers sank the Musahi in 1944 and the Yamato in April 1945.

2021.380.027	USS Yorktown : (CV10)	Sumrall, Robert F.	Later edition to 2008.302.121. The Aircraft Carrier Yorktown CV10 was the 4th US naval vessel carrying that name.

Object ID	Title	Author	Summary
			The first Yorktown was a 16-gun sloop. 117 feet overall; she could have been parked crossways on the flight deck of the last Yorktown. Commissioned on Feb. 15, 1840. The Second Yorktown, Gunboat Number 1, steam-powered, speed of 16 knots. 244 feet long, carried a crew of approx. 200, armed with six 6-inch breech loading rifles, two 6-pounders, two 3-pounders, two 37 mm guns, and two Gatling machine guns. Commission April 23, 1889. The third Yorktown CV5 was an aircraft carrier, the 5th US carrier to be commissioned. Her design formed the basis of the Essex-class carriers. Commissioned Sept. 30, 1937. The USS Yorktown CV10 was the 2nd ship of the Essex-class fleet carriers. She was laid down on Dec. 1, 1941 as the Bon Homme Richard, but renamed Yorktown on Sept. 26, 1942, in memory of the previous Yorktown CV5 lost in the Battle of Midway.
2021.380.029	F6F Hellcat vs A6M Zero-Sen : Pacific Theater 1943-44	Young, Edward M.	The Grumman F6F Hellcat and Mitsubishi A6M Zero-sen were the two principal opposing fighters in the brutal aerial clashes of the Pacific War from 1943 onwards. Reminiscent of the preceding F4F Wildcat, the F6F Hellcat was designed specifically to counter the earlier A6M2 Zero-sen, the strengths and weaknesses of which became fully understood by US designers after an undamaged example was recovered in the Aleutians. The powerful Hellcat had an impressive top speed, rate of climb and armament, and it retained its predecessor's incredible ruggedness. The A6M5 Zero-sen was also born out of an earlier type, but was intended merely as a stop-gap until more modern Japanese fighters could be produced to restore performance parity with Allied aircraft. The chaotic conditions of the Japanese Aircraft industry and war

			American and Japanese, military and civilian. The author's use of contemporary documents and interviews with survivors has enabled him to present a vivid and evocative picture of that day.--From
2021.380.031	Saga of the Bent-Wing Birds : Corsair Aces in the Solomons	Musciano, Walter A.	In the history of aerial warfare few aircraft have earned such an honored place as the Vought F4U Corsair -- the "bent-wing bird." Entering action in early 1943 in the South Pacific, the Corsair was the first Allied plane to meet the Japanese on even terms. It far exceeded even its designers' fondest hopes, while compiling a combat loss ratio of better than 11 to 1. Here are the stories of some of the men who flew the Corsair to fame: Pappy Boyington, Knobby Walsh, Ike Kepford, Bob Hanson and others. The key to the Allied offensive in the South Pacific during 1943 and 1944 was the island fortress of Rabaul, cornerstone of the Japanese defense system. Appendix containing the histories of Marine and Navy Corsair squadrons, medals, decorations and awards, a production chronology of the Corsair and its specifications, and a complete account of the combat record of the Corsair. Includes: Extensive collection of 86 photographs of the Corsair and its pilots, as well as detailed maps of the South Pacific action areas indicating airfield locations and objectives of both sides. 8 scale drawings provide specifics of the Corsair and the markings of some of the top aces.
2021.380.032	This is No Drill! : Living Memories of the Attack on Pearl Harbor	Berry, Henry	From Amazon; "This fascinating and powerful collection of first-hand accounts—prepared with the assistance of the Pearl Harbor Survivors Association—brings to vivid life one of the most fateful days in American history. Here, in their own words, survivors of the attack—from all branches of the service—recall what it was like to

Object ID	Title	Author	Summary
			witness this momentous event as it happened. Dramatic and compelling, these living memories offer a rare look inside the hearts and minds of American heroes—and an invaluable record of American history." Title on cover "This is No Drill!"
2021.380.033	SB2C Helldiver : In Detail & Scale	Kinzey, Bert	(from squadronsignalpublications.com:) The SB2C Helldiver originated with a 1938 request by the USN for a dive bomber that could carry a heavier payload further than a SBD Dauntless. The first production Helldiver was rolled out in June of 1942, but because of many needed modifications the first aircraft did not see combat until November, 1943. It went on to become a very important part of later US carrier operations in the Pacific. This title gives an in-depth coverage of the SB2C that explodes old myths and provides extensive photography of all variants of the Helldiver both inside and out. Includes the XSB2C-1, SB2C-1, A-25A Shrike, SB2C-1C, XSB2C-2, SB2C-3, SB2C-3E, SB2C-4, SB2C-4E, SB2C-5, and XSB2C-6 variants. Also provides a 7-page modeling summary. Illustrated with 193 b/w and 33 color photos, 22 b/w drawings; 72 pages. SS8252 \$14.95

2021.391.001	Accidental Admiral, The : A Sailor Take Command at NATO	Stavridis, James	Admiral Stavridis was the 16th Supreme Allied Commander. NY Times called him a "Renaissance admiral" Because the previous Commanders were generals, Stavridis considered his appointment as accidental. As the NATO Commander in Europe, he was responsible for 120,000 coalition troops serving in fifty-one nations on three continents and at sea. In this book, Stavridis shares his thoughts on leadership. strategic communications, planning, and convergence of threats that will confront the United States and its allies in the near future.
2021.393.001	NATOPS Flight Manual Navy Model P-3A and P-3B Aircraft	Naval Air Systems Command	From Biblio.com: There is a Table of Contents, which includes a notes that the List of Illustrations--Titles Included in Alphabetical Index. Section XI is Performance Data --T56-A-10W Engine and Section XII Performance Data--T56-A-14 Engine. USN P-3A and P-3B series had an NFO Navigator (TACNAV) and an enlisted Airborne Radio Operator (RO). The Lockheed P-3 Orion is a four-engine turboprop anti-submarine and maritime

Object ID	Title	Author	Summary
			surveillance aircraft developed for the United States Navy and introduced in the 1960s. Lockheed based it on the L-188 Electra commercial airliner. The aircraft is easily distinguished from the Electra by its distinctive tail stinger or "MAD Boom", used for the magnetic detection of submarines. Over the years, the aircraft has seen numerous design developments, most notably in its electronics packages. Numerous navies and air forces around the world continue to use the P-3 Orion, primarily for maritime patrol, reconnaissance, anti-surface warfare and anti-submarine warfare. A total of 757 P-3s have been built and, in 2012, it joined the handful of military aircraft including the Boeing B-52 Stratofortress, Boeing KC-135 Stratotanker, Lockheed C-130 Hercules and the Lockheed U-2 that the United States military has been using for more than 50 years. In October 1962, P-3A aircraft flew several blockade patrols in the vicinity of Cuba. Having just recently joined the operational Fleet earlier that year, this was the first employment of the P-3 in a real world "near conflict" situation. The only confirmed combat loss of a P-3 also occurred during Operation Market Time. In April 1968, a U.S. Navy P-3B of VP-26 was downed by anti-aircraft fire in the Gulf of Thailand with the loss of the entire crew. Two months earlier, in February 1968, another one of VP-26's P-3B aircraft was operating in the same vicinity when it crashed with the loss of the entire crew. Originally attributed to an aircraft mishap at low altitude, later conjecture is that this aircraft may have also fallen victim to anti-aircraft artillery (AAA) fire from the same source as the April incident.
2021.393.002	NATOPS Flight Manual Navy Model S-2E, S-2G Aircraft,	Naval Air Systems Command	From Wikipedia: The Grumman S-2 Tracker (S2F prior to 1962) was the first purpose-built, single airframe anti-submarine warfare

Object ID	Title	Author	Summary
			(ASW) aircraft to enter service with the United States Navy. Designed and initially built by Grumman, the Tracker was of conventional design — propeller-driven with twin radial engines, a high wing that could be folded for storage on aircraft carriers, and tricycle undercarriage. The type was exported to a number of navies around the world. Introduced in 1952, the Tracker and its E-1 Tracer derivative saw service in the U.S. Navy until the mid-1970s, and its C-1 Trader derivative until the mid-1980s, with a few aircraft remaining in service with other air arms into the 21st century. Argentina and Brazil are the last countries
2021.393.003	NATOPS Flight Manual Navy Model TF-91 Aircraft	Naval Air Systems Command	The F9F Cougar was delivered to the Navy and Marines in mid-1952 but did not see action in the Korea War. Developed as a replacement for the F9F Panther, the Cougar proved to be a superior carrier based fighter jet because of its modern swept wing design
2021.393.004	NATOPS Flight Manual Navy Model UC-12B Aircraft	Naval Air Systems Command	The C-12 was based on the Beech Super King Air/Beech 1900. It's primary purpose is for passenger/light cargo transport. It is utilized by other branches of the armed forces in various roles. The Beechcraft C-12 Huron is the military designation for a series of twin-engine turboprop aircraft based on the Beechcraft Super King Air and Beechcraft 1900. C-12 variants are used by the United States Air Force, United States Army, United States Navy and United States Marine Corps.
2021.395.001	Alert Aircraft Packages	Wrightson, Tom	FOR INTERNAL USE ONLY - DO NOT DISTRIBUTE OUTSIDE THE SHIP - CONTACT MARK PUGH FOR ACCESS. On an aircraft carrier, the Alert system indicates when a fighter plane must be ready to launch to intercept hostile aircraft. Alerts come in a wide range of packages and response times and may include all the different aircraft types in the Air Wing. And then there's

Object ID	Title	Author	Summary
			the interesting story of why Alert 5s were changed to Alert 7s - then back again. Includes excerpts from Midway's Command histories. Also, has sections on setting alert conditions, alert aircraft requirements; CV NATOPS Manual Alert Conditions; standard alert packages; Midway alert packages during ODS, why alert 5 changed to alert 7 and back again; aligning the F-14's inertial navigation system; spotting alert aircraft; OOD Launching the Alert 5 - 1980 Midway Instruction. Includes photos of intercepting Russian aircraft.
2021.395.002	Ship Control During Underway Replenishment	Hyde, Todd	FOR INTERNAL USE ONLY - DO NOT DISTRIBUTE OUTSIDE THE SHIP - CONTACT MARK PUGH FOR ACCESS. The following article is primarily derived from USS Midway Instruction 3180.2H, titled "Ship Control During Replenishment at Sea" issued by Midway's Commanding Officer just prior to Operational Desert Shield/Storm (which is the baseline timeframe for our Docent discussions about USS Midway). Procedures discussed are based on a specific Commanding Officer's preferences and experiences at that particular time and probably changed, to some degree, with the change of Skippers. Also included in this article are comments from Docents intimately involved with the controlling an aircraft carrier during UNREPs. Note: Flag/light signals are not discussed in this article. Includes a diagram and photos.
2021.395.003	Operation Pinwheel	Wrightson, Tom	FOR INTERNAL USE ONLY - DO NOT DISTRIBUTE OUTSIDE THE SHIP - CONTACT MARK PUGH FOR ACCESS. Describes the method of maneuvering aircraft carriers by the use of aircraft secured to the flight decks. The first occurrence was in 1945

Object ID	Title	Author	Summary
			but the procedure was used up until the mid 1970s. Includes photos and includes a photo of the USS Midway performing a Pinwheel exercise.
2021.395.004	Midway's Hull Blisters	Hyde, Todd	FOR INTERNAL USE ONLY - DO NOT DISTRIBUTE OUTSIDE THE SHIP - CONTACT MARK PUGH FOR ACCESS. This article endeavors to take a highly technical 40-page engineering paper, written in 1989 by The Society of Naval Architects and Marine Engineers (SNAME), and turn it into an easy-to-understand explanation of how the installation of hull blisters affected Midway's seakeeping, directional stability, wetness, draft, hull strength, and damage stability. The Midway Blister Story," is available online. Some of the sections in this article are lifted verbatim from the SNAME paper, while others have been paraphrased or simplified to make them easier to understand. Comments from a variety of Subject Matter Experts are also included to provide context to the impact of blisters on Midway's operational capabilities. Includes photos - most are colored.
2021.395.005	Aircraft Engine Testing Procedures	Jensen, Derek	FOR INTERNAL USE ONLY - DO NOT DISTRIBUTE OUTSIDE THE SHIP - CONTACT MARK PUGH FOR ACCESS. Maintenance facilities and personnel on aircraft carriers have the ability to complete both organizational (squadron) level and intermediate (AIMD) level inspections, maintenance, and repairs on jet, turboprop, and turboshaft engines while at sea. Much of the day-to-day engine maintenance work can be accomplished with the engine still installed in the aircraft (photo at right), while engine removal, replacement, and testing is required when an engine reaches its regularly scheduled operating ("high-time") limit or is triggered by unplanned events such as damage from foreign object

Object ID	Title	Author	Summary
			ingestion, unacceptable flight performance parameters, failing oil samples, or characteristics of an internal leak. Engine turn-ups may also be required for performing tests on other aircraft systems related to engine operation or systems working directly off of the engine's power or bleed air. Depending on the aircraft these may include the auxiliary equipment cooling system, boundary layer control system, the central air data computer system, the cockpit air conditioning and pressurization system, the engine de-icing system, and the fuel tank pressurization system. Each squadron has a designated number of Enlisted Turn-Up Qualified maintenance personnel who have gone through a training and qualification process. The majority are Aviation Machinist's Mates (ADs) but you could also have qualified Aviation Electrician's Mates (AEs) or Aviation Structural Mechanics (AMHs) perform the turn-ups, depending on the problem. Aircrew are also qualified for turn-ups. Included are discussions of the Jet Shop; the Maintenance Engine Turn-up Categories; Coordinating Engine Turn-ups; Engine Turn-up Safety Precautions; and Engine Turn-Up Locations and Equipment
2021.395.006	CIC and CATCC Location Changes, 1957-1991	Pugh, Mark	FOR INTERNAL USE ONLY - DO NOT DISTRIBUTE OUTSIDE THE SHIP - CONTACT MARK PUGH FOR ACCESS. Compares Midway's 1957 CIC and CATCC spaces in relation to 1991 Flag Complex spaces.
2021.398.001	Moby-Dick and Melville's Anti-Slavery Allegory	Pellar, Brian R.	Brian is a Former USS Midway crew member, 1979-81. In his preface he states that he spent two years aboard the aircraft carrier the USS Midway (CV-41), where he was awarded a high school diploma at sea in the ship's fo'c's'le, and took his first college class, "Oceanography," as he crossed over the Equator. In the

Object ID	Title	Author	Summary
			acknowledgements, Brian states "I would first like to thank Chief Hunt, my former chief from the USS Midway, CV-41, for letting me know, in that distinctive naval vernacular, that when tackling any kind of writing assignment, it's more noble to plow your own sea-lane. I am also grateful to the crew's library onboard the USS Midway -- a small secluded island unto itself, that nourished the mind and soul amidst the hustle and bustle of swarming men and machines in the middle of the Indian Ocean."
2021.399.002	USS Arizona (BB 39)	Friedman, Norman	From Amazon - "The USS Arizona, an over age battleship, was destroyed in the opening moments of the Japanese air attack on Pearl Harbor on 7 December 1941. Although her big guns never fired once in combat, she will be remembered along with the Navy's most famous fighting ships, long after most World War II ships have been scrapped or rusted away, for here sudden demise marked the end of the battleship era of naval history, and the advent of the aircraft carrier as the main strength of the Navy."
2021.400.001	Aircraft Gas Turbine and Its Operation, The	Pratt & Whitney Aircraft	A Pratt & Whitney instruction book on the aircraft gas turbine and it's operation. Also subtitled Installation Operation. Also a NAVAER hand book. Personal copy of LT E. R. Fousht.
2021.400.002	Hellcats Over the Pacific : WWII Flight Simulator Pilot's Handbook	Graphic Simulations Corporation	Pilot's Handbooks for the Grumman F6F-3, -3N, -5, -5N, Was also used by the Army Aircorps. Title on front of books is Pilot's Handbook for Navy Model F6F Airplane, and title inside is Hellcats Over the Pacific : WWII Flight Simulator Pilot's Handbook. Chapter 1 is the manual : Pilot's Handbook for Navy Model F6F-3, F6F-3N, F6F-5, F6F-5N Airplanes. Chapter 2 is Fighter Tactics and Technicques, and Chapter 3 is Basic Principles of Flight and Performance Characteristics.
2021.400.003	Hellcat Aces of World War 2	Tillman, Barrett	(from ospreypublishing.com:) About this book

Object ID	Title	Author	Summary
			Grumman's successor to the pugnacious Wildcat, the Hellcat embodied many of the lessons learnt by F4F pilots in the opening months of the Pacific war. Introduced to the fleet in January 1943, and blooded in combat against the Japanese by VF-5 seven months later, the F6F served as the principal US Navy fighter on board carrier decks until VJ-Day. Despite its lethality in the air when ranged against the best Japanese fighters, it still retained docile handling qualities around the carrier deck. Pilots flying the Hellcat claimed nearly 5000 kills in the Pacific, and over 350 pilots achieved ace status on the type. Contents * Ace Maker * The Year of Decision * To the Philippines * Tokyo Bound * Fleet Air Arm and Anvil-Dragoon * End Game * Wartime History of VF-19 * Appendices Paperback; July 1996; 96 pages; ISBN: 9781855325968

2021.403.001	USS Oriskany (CV-34) - South American Cruise - 1952	None Stated	Pictorial account of the Essex-class aircraft carrier USS Oriskany (CV-34)'s South American cruise departing from New York on 16 May 1952 with stops at Norfolk, VA (5/17), Guantanamo Bay, Cuba (5/30), Rio de Janeiro, Brazil (5/19), rounding Cape Horn (6/29), Valparaiso, Chile (7/3), Callao, Peru (7/9), and finally arriving in San Diego, CA on 21 July 1952. VF-11 (F2H Banshees) is mentioned, TBM Avengers and HO3S choppers are shown, but the embarked air wing is not outlined as is usually done in cruise books; this is more a photo album of the cruise; only commanding officers are named. There are 21 pages of photos of Crossing the Line ceremonies. Includes Oriskany Charities. End papers show map of trip with dates.

			correspondence, and secret and official documents, it is -- as the New Yorker said -- a "brilliant" book. ===== Review "Candid! fascinating! amusing! and thorough."--Capt. Roger Pineau -- Capt. Roger Pineau "One of the most comprehensive and enlightening biographies available of a wartime leader."-- New York Times -- New York Times "The most penetrating study of Yamamoto that has ever appeared."--David Kahn, author of The Codebreakers -- David Kahn "Yamamoto was, in my view, the greatest admiral since Lord Nelson."--William Manchester, author of American Caesar -- William Manchester ===== 25 of 27 people found the following review helpful Subarashii June 12, 2001 By Karin Paris This was a wonderful book which went into a lot of detail about the life of Admiral Isoroku Yamamoto. He was a much more complex person than most people think. He was no ranting imperialistic flunky. In fact, he held most of those types in contempt. So much so, that he had to maintain constant vigilance because of death threats. However, he did his duty, as he was ordered to do, even though he knew the futility of it. He was also totally against the building of the Yamato and Musashi battleships. Utter "folly" he called them and a waste of time and money. He truly believed that the future of war would be aviation. He was proved right. Its really too bad that he was killed, he would have been of great benefit to the restructuring of the new Japanese government. Anyone interested in a more "personal" look of

Object ID	Title	Author	Summary
			one of the greatest Admirals in the world, will love this book, like I did. 15 of 16 people found the following review helpful Excellent study of a complex character December 27, 2002 By Harry Pandolfino This is an excellent study of a complex and contradictory man. Understandably vilified in the heat of war, a more interesting image has appeared over time. One cannot help but admire the daring and gambler quality of a man ordered to start a war he did not agree with and risked his life to prevent. Yamamoto certainly deserves to be remembered as a grand naval commander. It's unlikely any more authoritative work will ever emerge as the author when directly to people who knew Yamamoto in life 22 of 28 people found the following review helpful Yamamoto, the Admiral, the womanizer. July 31, 2001 By C. H Mitchum Admiral Yamamoto did not want to go to war with the United States; a naval war he felt could be sustained for at most 18 months. But go to war he did and it cost him his life. This is an easy to read history of Yamamoto's life, rich in personal details. He turns out to have been an avid womanizer, with one and perhaps two mistresses throughout most of his career. A man who lost interest in his marriage fairly early and was merely a financial contributor for most of his married life. Most of the personal correspondence quoted and many of his poems were written to his number one mistress, with nothing of substance regarding his wife and children. Yamamoto seems to have come up with the strategy for the attack on Pearl Harbor, but the detailed tactical planning was

Object ID	Title	Author	Summary
			the work of his staff. Somehow the debacle of Midway, which occurred under his command and which was planned by his staff, did not result in his immediate replacement. This apparently was due to the Imperial Japanese Forces being in full denial mode and not wanting to high light the disaster by removing the hero of Pearl Harbor. Yamamoto seems to have been something of a figurehead for most of his career after Pearl harbor and until his death. This could be misleading since the author focuses so much of his attention on Yamamoto's personal life and not so much on his naval leadership. It is particularly interesting to learn that with the many signs pointing to the fact that the Japanese codes had been broken, they denied this possibility and continued to send the "coded" messages which resulted in Yamamoto's plane being shot down by United States P-38s. There is an excellent book on that subject, "Get Yamamoto" but it seems to be out of print ... (from Amazon.com)
2021.409.001	Aviators Log Book, Vern Jumper LSO for VF-21, December 1963 - May 1964	Jumper, Vern	Vern Jumper (Vernon Lee Jumper) served three tours on the Midway. He was LSO of VF-21 and this is his logbook from December 1963-May 1964. The book was scanned and then Hal Simons and Nancy Smith, library volunteers, worked on the acronyms and the transcription which are included the .pdf file. 2018.321.023. Vern's second tour was as LSO with CVW-2, and his third tour was as mini boss (Assistant Air Boss), and Air Boss, 1974-75.
2022.003.009	Naval Air Power	Taylor, Michael John Haddrick	Beginning with a history of naval air power, the author continues with the attack role of carrier battle groups, the contribution of naval air power in fending off the submarine threat, and the tactics of

			book were formalized in the Convention on the International Regulations for Preventing Collisions at Sea, 1972, and became effective on July 15, 1977. The Rule (commonly called 72 COLREGS) are part of the Convention, and vessels must adhere to these Rules where applicable. The Inland Rules: Replace the old Inland Rules, Western Rivers Rules, Great Lakes Rules, Their Respective pilot rules and interpretive rules, and parts of the Motorboat Act of 1940. The Effective date for the Inland Navigation Rules was December 24,1961, except for the Great Lakes where the effective date was March 1, 1983..
2022.014.019	Boat Officer's Handbook, The	Winters, David D.	From the USS Midway Navigation Office Library, Book #7 A convenient reference for all seagoing officers, this valuable little book is absolutely essential to those managing and operating small craft. An astounding amount of material is presented in a concise format that's both easy to use and understand. In addition to explaining the authority, duties, and responsibilities of small-boat personnel, the book provides a wealth of information on seamanship, piloting, lifeboat survival, first aid, weather, rescue, boat etiquette, international law, and much more. It also lists hard-to-find data on boat capacities, weights, and dimensions. This new edition offers updated coverage of the buoyage system and the Rules of the Road, which have changed substantially since the first edition was published in 1981. (from back cover)
2022.019.001	Bee-Hive, The, Vol. 21, No. 2, Spring 1946	United Aircraft Corporation	The Bee Hive is the publication of the United Aircraft Corporation for its employees. On the cover are the USS

2022.301.015	World's Greatest Aircraft	Chant, Christopher	Which are the finest aircraft ever to have flown? The finest military aircraft, the finest airliners, the finest planes of today, and yesterday? This book answers these questions comprehensively, and with photographs and illustrations which help convey just what is so special about each aircraft. Over 250 of the world's most important, influential aircraft, from the first powered aircraft, the Wright Brother's 'Flyer' to Northrop's highly advanced B-2 stealth bomber. Commercial aircraft such as the Douglas DC-3 Dakota and the new A380 double decker Airbus, are detailed as are many of the classic fighters and bombers from World War II, such as the Supermarine Spitfire, North American P-51 Mustang and Boeing B-17 Fortress. All the essential detail is here. Fascinating histories of the design, development, manufacture, and service life of each aircraft are accompanied by a technical specification highlighting on its most important variants. Each is illustrated by a large and detailed color side view artwork, a three-view general arrangement line drawing, and supported with additional photographs.
2022.301.016	Pacific Hell: The War in the Far East 1941-1943	None Stated	Pacific Hell is a 116-page special magazine which looks in detail at the attack by Japanese carrier-borne aircraft on the U.S. Pacific Fleet base at Pearl Harbor on 7 December 1941, an attack which stunned the world. It then moves on to look at how Japanese forces seized Wake Island, Guam

Object ID	Title	Author	Summary
			and the British colony of Hong Kong before the end of 1941 and in the early months of the following year the Philippines, the Dutch East Indies (Indonesia), Malaya, Singapore, and Burma also fell to the Japanese. Rather than seeking a peace deal the allies fought back with relentless determination after heavy and embarrassing defeats. Though the war in the Pacific would grind remorselessly on for another two terrible years, it was clear that there could only be one outcome – the utter defeat of Imperial Japan.
2022.301.017	Pacific Harbor, December 7, 1941	None Stated	Just before 08.00 hours on the morning of December 7, 1941, Japanese forces launched a surprise, pre-emptive military strike against the United States naval base at Pearl Harbor. The main focus of the Japanese attack was the eight huge battleships, six of which, at the time of the raid, were moored along what was known as Battleship Row. Four battleships were sunk; 15 other vessels were sunk or damaged. Almost 350 aircraft were also destroyed or damaged. This special publication looks back at the devastating attack that propelled America into World War Two, ensuring that the events that fateful day were some of the most pivotal in world history.
2022.301.018	US Navy & Marine Corps : Air Power Yearbook 2021	None Stated	US Navy and Marine Corps Yearbook 2021 Lockheed Martin's F-35 Lightning II is at the centre of this year's big stories. The F-35C will embark on its first deployment as part of a carrier air wing and the F-35B continues to form part of Marine Expeditionary Units embarked on US Navy amphibious assault ships. Similarly, the US Navy's test community is now putting the Boeing Block III Super Hornet through its paces, the CMV-22B Osprey is proving itself ahead of first deployment, and the first TH-73 training helicopter entered service in June. The latest edition of

			western Pacific in 1952-53. When the ship deployed it departed Bremerton on 11 August 1952. It proceeded to San Diego to load the air group, then headed west. It's primary operations were as part of Task Force 77 in the prosecution of the Korean War. 50 pages of the book are devoted to strike operations. Port visits included Pearl Harbor, Yokosuka, Subic Bay and Hong Kong. The ship returned to her new homeport of San Diego on 17 March 1953. Air Group 101 was embarked for the deployment, consisting of: VF-11 (F2H-2); VF-721 (F9F-2); VF-884 (F4U-4); VA-702 (AD-4/4L); VC-3 Det. F (F4U-5N); VC-61 Det. F (F2H-2P); VC-35 Det. F (AD-4N); VC-11 Det. F (AD-4W); and HU-1 Det. 15 (HO3S-1).
2022.302.001	Modern Hornet Guide, The : The Boeing F/A-18 A/B/C/D Exposed	Melampy, Jake	From Amazon: 1024 full-color images, spread over 208 pages, illustrate the most recent title in the famous Modern Guide series. The Modern Hornet Guide represents the definitive resource material on all versions of the "Legacy" Hornets, from the earliest F/A-18A, up to and including the 'Night Attack' F/A-18D in use with the US Marines and Royal Malaysian Air Force. Heavy emphasis is placed on export versions of the jet which feature unique items, such as those in use with the Canadian and Australian air forces. However, the other nations that operate the Hornet are not forgotten. Of course, full coverage of the US Navy's Hornets is included, as is the often-overlooked United States Marine Corp Hornets.
2022.302.002	US Naval Aviation 1898-1945 : The Pioneering Years to the Second World War	Marriott, Leo	Graphic, detailed history of US naval aviation from the early twentieth century to the end of the Second World War. Includes rare photographs from Naval Archives. The Japanese attack on Pearl Harbor on 7 December 1941 sank or crippled almost all of the battleships belonging to the US Navy's Pacific Fleet, but the fleet's aircraft carriers survived to demonstrate that naval

Object ID	Title	Author	Summary
			aviation was now the dominant factor in the struggle at sea, turning the tide of the Pacific War. That the US Navy had the necessary ships, aircraft and crews was the result of pioneering, far-sighted decisions made in the pre-war years. Before the First World War the navy had recognised the potential of aircraft at sea, and it went on to develop the techniques and equipment that contributed so much to the defeat of the Japanese. This is the fascinating story Leo Marriott tells in this photographic history. In a selection of over 200 rare photographs he traces the growth of US naval aviation from the flimsy seaplanes of the first years of the twentieth century to the mighty armadas that challenged those of the Japanese and, after the carrier battles at Coral Sea and Midway, led the advance across the Pacific. Key aspects of the history are the Navy's first aircraft carriers of the 1920s and the tremendous progress made in the decades between the wars in tactics and strategy as well as in the design of ships and aircraft.
2022.302.003	Grumann F-14 Tomcat in US Navy Service	Mafe Huertas, Salvado	An extensive kit build of the Grumman F-14 TOMCAT featuring 186 photos, 10 color profiles, and decals in 1/48 and 1/72 scales. The F-14 Tomcat is more than just a naval plane, it has marked an era in the same way that aircraft like the F-4 Phantom II, the different models of the mythical Mirage, the F-86 Sabre, the P-51 Mustang, and the Spitfire did. The uniqueness of its mission and having a single user (in addition to Iran) were not an obstacle for this exceptional fighter to gain respect and a reputation that few fighter planes have had throughout the twentieth century.
2022.302.004	Topgun : The Legacy : The Complete History of Topgun and Its Impact on Tactical Aviation	Elward, Brad A.	From the publisher website: Fighter Weapons School, was established in 1968 to teach Navy aircrews the core air

Object ID	Title	Author	Summary
			combat tactics, to train others in those tactics, and to ensure that naval aviation "never again" forgot its lessons learned. TOPGUN: The Legacy provides a unique, detailed, and never-before-told history of the Navy Fighter Weapons School. Based on over 450 interviews with graduates, instructors, and commanding officers, and thousands of pages of archival documents, this definitive study covers the early history of air combat tactical development, the school founding in 1968, and its progression throughout the decades to the present day. TOPGUN programs, significant events that shaped the school, and its unique culture have made it a center of excellence and the leading fighter weapons school worldwide.
2022.302.005	Essex Class Aircraft Carriers, 1943-1991 : Rare Photographs from Naval Archives	Marriott, Leo	From Amazon: Essex-class aircraft carriers played an essential role in the victory of the United States over Japan in the Second World War, and Leo Marriott's photographic history is a fascinating introduction to them. Without these remarkable ships, the island-hopping campaign of American forces across the Pacific towards Japan would not have been possible. They also took part in the Korean and Vietnam wars that followed. During the Second World War they were at the center of the powerful task groups that could put up hundreds of aircraft to support forces on the ground. They were also prime targets for Japanese air attacks, in particular the kamikaze suicide missions. A total of twenty-four were eventually commissioned including several after the end of the war. The selection of rare photographs and the expert text cover the evolution of US aircraft carrier design prior to the Second World War and look at the factors which shaped the design and construction of

Object ID	Title	Author	Summary
			the Essex class. Included are dramatic action shots of the new breed of naval aircraft that was launched from their flight decks, including Hellcat and Corsair fighters that took on the Japanese and the carrier-borne jets that flew over Korea and Vietnam.
2022.302.007	Japanese Carriers and Victory in the Pacific : The Yamamoto Option	Stansfeld, Martin	Japanese Carriers and Victory in the Pacific focuses on the pre-war debate between building a new generation of super-battleships or adopting aircraft carriers as the capital ships' of the future. An Asian power in particular sees carriers as a way of challenging the USA and the colonial empires initially losing the contest yet coming out all right in the Cold War aftermath. Martin Stansfeld examines the much overlooked genesis of Japan's so-called shadow fleet that was a secret attempt to bring about parity with the US in carriers -- albeit only with slower speed conversions of liners and auxiliaries but along with the super-battleships cluttered launch facilities when these could have been devoted to keel-up fast fleet carrier production. This first analytical look at what major launch facilities were available in Japan shows that the Imperial Japanese Navy could have doubled its fast carrier fleet thereby able to give sufficient air cover for an invasion of Hawaii rather than just the raid on Pearl Harbor, but only providing nobody noticed they were building all these carriers. This is shown to have been entirely possible given the IJN's extraordinary success at covering up their super-battleship and shadow fleet production. This secret fast carrier fleet programme is given the name 'phantom fleet' by Stansfeld who proceeds to demonstrate how the strategy of the Pacific War would have been transformed. Weaving through the chapters is an exotic cast of characters led most notably by Admiral Isoroku Yamamoto, the

			conceiver of Pearl Harbor and a figure of mythic status to Japanese today and famous around the world thanks to the movies.
2022.302.010	Task Force 58 : The US Navy's Fast Carrier Strike Force that Won the War in the Pacific	MacDonald, Rod	The new breed of American fast aircraft carriers could make thirty-three knots, and each carried almost 100 strike aircraft. Brought together as Task Force 58, also known as the Fast Carrier Task Force, this awesome armada at times comprised more than 100 ships carrying more than 100,000 men afloat. By 1945, more than 1,000 -combat aircraft, fighters, dive- and torpedo-bombers could be launched in under an hour. The fast carriers were a revolution in naval warfare - it was a time when naval power moved away from the big guns of the battleship to air power projected at sea. Battleships were eventually subordinated to supporting and protecting the fast carriers, of which, at its peak, Task Force 58 had a total of seventeen. This book covers the birth of naval aviation, the appearance of the first modern carriers in the 1920s, through to the famous surprise six-carrier _Kido Butai_ Japanese raid against Pearl Harbor on 8 December 1941 and then the early US successes of 1942 at the Battles of the Coral Sea and Midway. The fast carriers allowed America, in late 1942 and early 1943, to finally move from bitter defense against the Japanese expansionist onslaught, to mounting her own offensive to retake the Pacific. Task Force 58 swept west and north from the Solomon Islands to the Gilbert and Marshall Islands, neutralizing Truk in Micronesia, and Palau in the Caroline islands, before the vital Mariana Islands operations, the Battle of Saipan, the first battle of the Philippine Sea and the Great Marianas Turkey Shoot. The strikes by Task Force 58 took Allied forces across the Pacific, to the controversial Battle of Leyte

Object ID	Title	Author	Summary
			Gulf and to Iwo Jima and Okinawa. Task Force 58 had opened the door to the Japanese home islands themselves - allowing US bombers to finally get close enough to launch the devastating nuclear bombing raids on Hiroshima and Nagasaki. Task Force 58 participated in virtually all the US Navy's major battles in the Pacific theater during the last two years of the war. Having spent many years investigating naval shipwrecks across the Pacific, many the result of the devastating effectiveness of Task Force 58, diver and shipwreck author Rod Macdonald has created the most detailed account to date of the fast carrier strike force, the force that brought Japan to its knees and brought the Second World War to its crashing conclusion.-- - Provided by publisher.
2022.302.011	Midway Bravery : The Story of the U.S. Army Pilot Whose Famed Flight Helped Win a Decisive World War II Battle	Gaub, Dennis	Army Air Force pilot Jim Muri flew his torpedo-equipped B-26 bomber on a daring mission of survival that helped win the Battle of Midway in June 1942. He and his crew were awarded the Distinguished Service Cross for bravery, a distinction second only to the Medal of Honor. Lieutenant Colonel Muri, his rank upon retirement, became a household name to a nation yearning for heroes in the dark early months of World War II. Muri grew up during the Great Depression as the second oldest child of a family of nine on a ranch in drought-stricken Eastern Montana. He decided he wanted a better life than he probably could have had had he followed in the footsteps of his father, a first-generation Norwegian immigrant. Jim caught the flying bug in high school, pursued his dream of becoming a pilot and survived an iconic mission in the Pacific that helped turn the tide of battle in World War II. His story serves as an example of dream, purpose and passion fulfilled. It resonates today and can provide an inspiration to readers in all

Object ID	Title	Author	Summary
2022.302.012	Documentary History of the Battle of Midway, A : The Official US Combat Reports From the Naval Action Against Japan in June 1942	Dept. of Defense	walks of life. From Amazon; At Midway in 1942, the entire course of the Pacific War was altered in just five minutes. American bombers destroyed three Japanese carriers, and shortly later destroyed the fourth. The devastated Japanese Navy never recovered. This book is a collection of official US Navy combat reports from the Battle of Midway, including a Combat Narrative from the Office of Naval Intelligence, Action Reports from the American Admirals Nimitz and Spruance, combat reports from the USS Hornet, USS Enterprise, USS Yorktown and USS Hammann, a summary of the interrogation of a Japanese sailor captured at Midway, and a Pentagon translation of the captured combat report submitted by the Japanese Admiral Nagumo.
2022.302.013	Midway Sailor : A Memoir of the Vietnam War, 1971-73	Sebring, William	From Amazon Three weeks after college graduation, I was called to active duty by the Naval Reserve. The dream of becoming a history teacher and enjoying my third year of married life was suddenly put on hold. I was headed for the combat zone aboard the USS Midway and into the climax of the Vietnam War. I joined the Naval Reserve to keep out of the War, assured by my recruiter it would be over before I was called to serve. It was pure fantasy and I was totally unprepared for active duty. Former USS Midway crew member.
2022.302.014	Nimitz at War : Command Leadership from Pearl Harbor to Tokyo Bay	Symonds, Craig L.	From the publisher- ""NEARLY FIFTY YEARS AGO, as a new assistant professor in the History Department at the U.S. Naval Academy, I shared an office suite with Elmer B. "Ned" Potter. Ned had taught at the Naval Academy since before the Japanese attacked Pearl Harbor. He was also the co-editor with Chester Nimitz of the book Sea Power (1961), which we all used as a text in the required naval history

Object ID	Title	Author	Summary
			course that I subsequently taught at the Academy for thirty years. Ned knew Nimitz well having worked closely with him on Sea Power. Ned's biography of the admiral (entitled, simply, Nimitz) appeared in 1976, and he kindly gave me an inscribed copy. I still have it. Since we shared a telephone line, I often took calls intended for him. My favorites were from his wife Grace, a Virginia lady in every sense of that term. She never identified herself, as in "Hello Craig, this is Grace Potter." She never had to. When I heard, "Wheyal, halloh thayah"-each word two distinct syllables-it could be no one else. I never got a call from Nimitz since he had died in 1966, but Nimitz was very much a part of the many conversations Ned and I had about naval history until Ned retired in 1977. We remained friends until he died twenty years later in 1997. I hope he would have approved of the wartime portrait of the admiral that I offer here"-
2022.302.015	Silver Waterfall, The : How America Won the War in the Pacific at Midway	Simms, Brendan	"The stunning and decisive battle of Midway was perhaps the most crucial naval battle in the Pacific theater during World War II. Walter Lord explained away the US victory at Midway against a numerically superior and apparently more skilled Japanese fleet due to 'Lady Luck.' In The Silver Waterfall acclaimed historian Brendan Simms and historian and military veteran Steve McGregor show it was no such thing. Luck had little to do with it. Instead the authors show how the forces of industrial dynamism and innovation were central to the US being able to win the war in the Pacific. Engineers, machinists, test pilots, and a willingness to experiment at scale were vital to the creation of the decisive element that would sink the hopes of Japan along with the pride of their aircraft carrier fleet: the Douglas Dauntless Dive Bomber dive bomber, whose vicious near vertical

Object ID	Title	Author	Summary
			plummet from the sky to deliver a brutally accurate attack was the "silver waterfall" that the Japanese quickly came to dread. In a few deadly minutes they changed the course of the war in the Pacific. Equally important, the Navy drew on the skills of a wide variety of immigrants or descendants of immigrants--especially those from Germany, the principal hostile power. The engineer who designed the plane which decided the Battle of Midway was Ed Heinemann, the strategist who decided America would defend Midway Island was Chester Nimitz; and the pilot who symbolized American performance on the day was Dusty Kleiss. Without these men, America could not have designed, planned, or done what was needed to win. The Silver Waterfall offers a revelatory new history of Midway, showing that if the Americans were lucky, they made their own luck"
2022.302.016	Cats in the Navy	Christenson, Scot	"Cats were seen as omens in ancient times but eventually became trusted animal companions to those who sailed the seas. From catching rats at docks and on ships at sea, cats often became mascots to the navies around the globe. Filled with informative text and more than eighty photos, Cats in the Navy provides a fun history of our feline friends who rode the waves with us"
2022.302.017	Man Who Won World War II, The	James, Henry Johnson	From Amazon: he Battle of Midway is arguably the most influential naval battle of World War II. Japan intended that the invasion of Midway would draw out what remained of the US Navy after Pearl Harbor and force it to counterattack. If the US Navy had blindly counterattacked, they would have run into the entire Japanese Combined Fleet which was waiting for them just over the horizon. In one decisive battle, Japan intended to win the war in the Pacific. And they very nearly did. But an obscure codebreaker

Object ID	Title	Author	Summary
			in a windowless basement in Hawaii was able to decipher the Japanese battle plans in time to allow the US Navy to prepare a surprise of its own. His breakthrough allowed Admiral Nimitz to ambush Japan's carrier force and destroy it. The resulting Battle of Midway was a catastrophe for Japan and a huge victory for America.
2022.302.018	F-8 Crusader	Marie, Gaëtan	From Amazon, "Digital artist Gaëtan Marie presents an illustrated history of the F-8 Crusader, the "Last of the Gunfighters", containing over a 110 highly detailed F-8 and RF-8 Crusader profile drawings, including aircraft from the US Navy, US Marine Corps, France's Aéronavale, the Philippine Air Force and civilian operators. All profile drawings are based on thorough research and great attention to detail, making the book an excellent reference source for modelers and enthusiasts alike."
2022.302.019	F2H Banshee Units	Burgess, Richard R.	McDonnell's F2H Banshee was a more successful early-generation jet that outlasted both contemporary and more modern fighter types on the flightdeck of US Navy aircraft carriers in the 1950s. Fighting alongside the Grumman F9f Panther during the Korean War, the F2H served with fewer units during the conflict, despite the jet being considered superior to the F9f in many respects thanks to its high-altitude capabilities, radar, and, eventually, nuclear weapons employment. The Banshee also proved to be a better photo-reconnaissance platform than the panther. It served as a frontline aircraft for more than a decade in an era when jet fighters came and went with relatively short service careers. the Banshee served with 27 US Navy and US Marine Corps squadrons and three Royal Canadian Navy Unites. No Midway mentions in Index.
2022.302.020	Truk 1944-45 : Destruction of Japan's Central Pacific Bastion ,The	Lardas, Mark	A fully illustrated history of how the US Navy destroyed Truk, the greatest Japanese

Object ID	Title	Author	Summary
			naval and air base in the Pacific, with Operation Hailstone, and how B-29 units and the carriers of the British Pacific Fleet kept the base suppressed until VJ-Day. In early 1944, the island base of Truk was a Japanese Pearl Harbor; a powerful naval and air base that needed to be neutralized before the Allies could fight their way any further towards Tokyo. But Truk was also the most heavily defended naval base outside the Japanese Home Islands and an Allied invasion would be costly. Long-range bombing against Truk intact would be a massacre so a plan was conceived to neutralize it through a series of massive naval raids led by the growing US carrier fleet. Operation Hailstone was one of the most famous operations ever undertaken by American carriers in the Pacific. This book examines the rise and fall of Truk as a Japanese bastion and explains how in two huge raids, American carrier-based aircraft reduced it to irrelevance. Also covered is the little-known story of how the USAAF used the ravaged base as a live-fire training ground for its new B-29s -- whose bombing raids ensured Truk could not be reactivated by the Japanese. The pressure on Truk was kept up right through 1945 when it was also used as a target for the 509th Composite Squadron to practice dropping atomic bombs and by the British Pacific Fleet to hone its pilots' combat skills prior to the invasion of Japan.
2022.302.021	Essex-Class aircraft carriers 1945 -91	Stille, Mark	A history of the enduring Essex-class ships, the US Navy's finest and most numerous fleet carrier during World War II, which were modernized repeatedly and served with distinction. The Essex class was the USN's war-winning ship class of the Pacific War. Of the 24 ships

Object ID	Title	Author	Summary
			completed, 14 saw action, making the Essex class the largest class of fleet aircraft carriers ever built. These ships had a fine balance of striking power, protection, and speed and were modernized during and after the war. There were five distinct programs carried out, adding not only angled flight decks for jet operations, but repeated upgrades to sensors, weapons, and equipment. Essex-class carriers were used in a number of roles and provided the vast majority of US Navy air power in the Korean War, and a sizeable proportion of air power in the Vietnam conflict. However, as the "super carriers" began to enter service in the early 1960s, the Essex class was relegated to secondary roles— a single Essex carrier served until 1991 as the US Navy's training carrier. Using detailed artwork and photos, this book provides an in-depth portrait of this important and enduring class of ship, and looks at its development and modifications while considering the many and varied actions it took part in.

2022.302.022	Leyte Gulf 1944. 2, Surigao Strait and Cape Engano	Still, William N.	This is the second volume in a two-part illustrated study of the October 23-26 Battle of Leyte Gulf, which resulted in a decisive defeat for the Japanese. The Battle of Leyte Gulf-the largest naval battle in history-comprised four major actions conducted over the course of two days, plus several associated minor clashes. The size and complexity of this epic battle remains unmatched, with two United States Navy (USN) fleets (Third and Seventh) facing a much-reduced Imperial Japanese Navy (IJN), severely outnumbered and fatally lacking in airpower. Complementing the first volume's coverage of the IJN's First Diversion Attack Force at the battles of the Sibuyan Sea and off Samar, this superbly illustrated second volume focuses on the forces

Object ID	Title	Author	Summary
			supporting the main Japanese thrust. Naval expert Mark Stille reveals how the Japanese Main Body succeeded in its mission of luring the US Third Fleet to the north, but at a tremendous cost in the ensuing Battle off Cape Engano. Also explored in full visual detail is the fate of the small detachment of seven IJN ships ordered to attack into Leyte Gulf through Surigao Strait in the south. The resulting Battle of Surigao Strait on October 25, 1944 would prove to be the last battleship duel in history
2022.302.023	Air War Pacific Chronology Part 1: America's Air War Against Japan in East Asia and the Pacific 1941-1945	Hammel, Eric	From Amazon - here was never a military campaign like it, and there never will be another. Here is an opportunity to follow the great crusade as it unfolded in the air over the Japan's ill-gotten empire in East Asia and the Pacific. This exhaustive chronology sheds a fascinating light on the course of America's air war against Japan in all the active theaters.* The Air War Pacific Chronology is a day-by-day accounting of all the major combat aviation missions undertaken by United States Army Air Forces, United States Navy, United States Marine Corps, and American Volunteer Group units and commands in China, Burma, India, and throughout the Pacific during World War II.* All Army Air Forces, Navy, Marine, and Flying Tiger theater fighter aces are covered including unit affiliation, date and time ace status was attained, and date and time of highest victory tally (over ten). * Information pertaining to the arrival, activation, transfer, departure, and decommissioning of air commands, combat units, and special units. Comings and goings of the commanders of major aviation units are also covered.* Provides a rich contextual framework pertaining to related ground campaigns; international and high-command conferences and decisions influencing air strategies and campaigns;

2022.302.025	Aces Against Japan II : The American Aces Speak, Volume III	Hammel, Eric	An engrossing new collection of thirty-eight first-person accounts by American World War II fighter aces. Coupled

Object ID	Title	Author	Summary
			with a clear overview of America's far-flung air war against Japan and a clear appreciation of the burgeoning industrial might backing the American war effort, the author's detailed interviews bring forth the most thrilling in-the-cockpit experiences that World War II's fabled Army, Navy, Marine, and Flying Tiger aces have chosen to tell. Signed by the Author.
2022.302.026	Wings of Gold	Weintraub, Beverly	From Amazon - On Feb. 2, 2019, the skies over Maynardville, Tennessee, filled with the roar of four F/A-18F Super Hornets streaking overhead in close formation. In each aircraft were two young female flyers, executing the first all-woman Missing Man Formation flyover in Navy history in memory of Captain Rosemary Mariner — groundbreaking Navy jet pilot, inspiring commander, determined and dedicated leader — whose drive to ensure the United States military had its choice of the best America had to offer, both men and women, broke down barriers and opened doors for female aviators wanting to serve their country.
2022.302.027	US Attack Aviation : Air Force and Navy Light Attack, 1916-to the Present	Head, R.G.	From Amazon- Attack aviation is intense and dangerous. It necessitates the direct engagement of ground targets at low altitude. Attack aircraft are usually fighters or fighter-sized aircraft, with one or two engines, and one or two crew. This work provides an overview history of American attack aviation from its inception to present, including both the US Navy and Air Force. The pillars of the narrative are several case studies that characterize the evolution of technology and tactics over time: SBD Dauntless, AD Skyraider, A-4 Skyhawk, A-7 Corsair II, A-10 Thunderbolt II, and F/A-18 Hornet. Each of the cases contains first-person accounts that include a description of the aircraft's origin, competitive

Object ID	Title	Author	Summary
			procurement, major attack features, and combat employment. Author R. G. Head (Brig. Gen., Ret.) has extensive experience in combat (325 missions, DFC, Silver Star) and an in-depth understanding of doctrine (taught future pilots at the Air Force Academy) and gained first-person exposure to the policy and engineering aspects of the aircraft procurement process while serving at the Pentagon and later as a private consultant working in collaboration with the US Navy. This is a story about flying. It is told by naval aviators, Air Force fighter pilots, and the men who built the airplanes the pilots flew.

2022.302.028	Cactus Air Force (The) : Air War Over Guadalcanal	Hammel, Eric	From Amazon - "For 40 years from 1961, the late Eric Hammel interviewed more than 150 American participants in the air campaign at Guadalcanal, none of whom are still alive. These interviews are the most comprehensive first-person accounts of the battle assembled by any historian. More importantly, they involved the junior officers and enlisted men whose stories and memories were not part of the official history, thus providing a unique insight. The battle of Guadalcanal was the first offensive operation undertaken by the US and its allies in the Pacific War. "Cactus," the code name for the island, became a sinkhole for Japanese air and naval power, experienced forces whose losses could never be made good. The three months of air battles between August 20, 1942, when the first Marine air unit arrived on the island, and November 15, when the last enemy attempt to retake the island was defeated, were perhaps the most important of the Pacific War. After November 15, 1942, the US never looked back as its forces moved across the Pacific to the war's inevitable conclusion. The Cactus Air Force is a joint project between the late Eric

2022.302.029	U.S. Aircraft Carriers : An Illustrated Design History	Friedman, Norman	From the Publisher U.S. Aircraft Carriers Revised Edition is one of the most comprehensive references available on the entire development of U.S. Aircraft Carriers, starting in 1920, with USS Langley CV-1, continuing to Enterprise, the mass-produced Essex-class, and the large Midway-class of post-World War II. Friedman authoritatively analyzes the design and performance histories of this popular type. The long careers of the Nimitz-class and the new Ford-class are also included. Like Friedman's other design history books, U.S. Aircraft Carriers is based largely on formerly classified internal U.S. Navy records"- From Publisher. Ship plans by A.D. Baker III
2022.302.030	U.S. Navy Attack Aircraft, 1920-2020	Friedman, Norman	"This book examines previously classified documents to explain and discuss how technology and operation requirements for aircraft changed over the course of a century from the Navy's point of view"-- Provided by publisher.
2022.302.031	Aircraft Carrier Intrepid	Faltum, Andrew	"The story of the Intrepid (CV-11) began when she was ordered in May 1940 as a member of the Essex class. She would be among one of the most advanced class of warships of her day, with speed, armament, newer and more capable aircraft, and modern radars that spelled victory in the Pacific. Although the third ship of her class, her sisters the Essex (CV-9), Yorktown (CV-10), Lexington (CV-16), and Bunker Hill (CV-17) all were commissioned before her. The Intrepid's first significant milestone was when her keel was laid at the Newport News Shipbuilding and Drydock Company on 1 December 1941"

Object ID	Title	Author	Summary
2022.302.032	Colors & Markings of the A-6 Intruder in U. S. Navy Attack Squadron Service, Volume Six	Heiderman, Mike	From Amazon - It "provides a rich, visual history of one of the most iconic warplanes to every fly with the United States Navy. From its introduction into combat in Vietnam to the First Gulf War, the Grumman A-6 Intruder was a Navy work horse that provided the deep strike capability that the nation needed from its seaborne forces. Grumman's A-6 Intruder was certainly not one of the most beautiful aircraft designs ever to come off the drawing boards, but in terms of being able to perform the job for which it was intended, it may well be one of the best designs in military aviation history. During its 34 years of service, the Intruder displayed a variety of aircraft paint schemes and markings, ranging from some of the most colorful ever applied to a combat aircraft to some that were so subdued that the various squadron and informational markings could barely be seen. This book covers the official paint schemes applied to the A-6 Intruder over its operational life and then surveys the squadron heraldry used by all of the operational attack squadrons that flew the aircraft in Navy service. It begins with several sections on the basic paint schemes that were applied to the aircraft. The initial gray over white scheme eventually gave way to one that was overall gray, and finally the Navy went to the subdued tactical paint schemes (TPS) still in use today on newer aircraft. Paint scheme drawings based on official United States Navy documents are included in the gray over white and the TPS sections of the chapter."
2022.302.033	U.S. Navy Auxiliary Vessels : a History and Directory from World War I to Today	Sayers, Ken W.	"For more than a century, the U.S. Navy's battleships, cruisers, destroyers, submarines and amphibious warfare vessels have depended on a small group of specialized auxiliary ships

2022.306.006	USGAO LCD-79-432 Naval Aircraft Accidents During Launch & Recovery Operations	General Accounting Office	Over the past 5-1/2 years, the Navy has had 730 aircraft accidents resulting in substantial aircraft damage, aircraft losses, and some crew fatalities. Not all these accidents occurred during carrier operations, and only 29 were associated with launch or recovery phases of carrier air operations. Those associated with carrier air operations have been attributed to one or more of the following: --Defects in equipment including catapult and arresting-gear equipment. -- Human error by aircraft crewmembers or equipment operators aboard the carriers. This report provides Navy aircraft accident statistics and information on some of the actions the Navy has taken to improve safety in carrier air operations. Some of the problems, and the Navy's initiatives aimed at correcting them, are discussed in the report.
2022.306.008	Naval Accidents 1945-1988	Arkin, Wiliam M.	"The purpose of this study is to establish a database of information about naval accidents, and then to investigate that record in order to assess the risks of naval activity during peacetime and crisis periods. This assessment will help answer questions about public safety surrounding the controversial nuclear visits to foreign (and domestic) ports. Finally while naval arms control focuses on the large issues of the types and numbers of nuclear weapons, the day-to-day coss and potential dangers are little recognized or understood, the long-term implications of naval nuclear propulsion is hardly even raised."-- From Introduction.

2022.310.001	Tarawa : The Story of a Battle	Sherrod, Robert Lee	10th Anniversary edition. The author takes the reader with him from the South Pacific staging island where the marines embarked on the long hot trip to "H-Hour" of "D-Day" off Tarawa beach, into the bouncing assault boat, to the reef and then ashore. Six days of as desperate fighting and brutal slaughter as this war probably will see.
2022.311.001	I Will Run Wild : The Pacific War from Pearl Harbor to Midway	Cleaver, Thomas McKelvey	This history of the War in the Pacific tells the story of the Americans, Britons, Australians, and New Zealanders who fought back against a better-prepared and stronger enemy, and in so doing, changed the course of World War II.
2022.311.002	Black Shoe Carrier Admiral :	Lundstrom, John B.	An abundance of new

Object ID	Title	Author	Summary
	Frank Jack Fletcher at Coral Sea, Midway, and Guadalcanal		evidence demanded this reevaluation of Frank Jack Fletcher, the "black shoe" admiral who won his battles at sea but lost the war of public opinion. A surface warrior -- in contrast to a "brown shoe" naval aviator -- Fletcher led the carrier forces that won against all odds at Coral Sea, Midway, and the Eastern Solomons. These and other early carrier victories decided the Pacific War not only because they inflicted crippling losses but also because they denied Japan key strategic positions in the region. Despite these successes, by 1950 Fletcher had become one of the most controversial figures in U.S. naval history and was portrayed as a timid bungler who failed to relieve Wake Island in December 1941 and who deliberately abandoned the Marines at

2022.313.001	Dilbert : Just an Accident Looking for a Place to Happen!	Osborn, Robert Chesley	From World Cat: "An illustrated list of some of the most common mistakes navy student pilots make, as of WW2. I found the illustrations very entertaining as well as memorable and easy to understand, even just plain entertaining. There are few people in this world who could draw like Osborn, his style is so unique that I immediately recognized his work 20 years later, even though it wasn't signed and the characters were different. Osborn's prose is equally memorable, adding to the drawing just the right words to convey the message as well as making it memorable. Short and to the point, It worked far better than any long, boring lecture or wordy text could hope to do!"
2022.314.001	F6F Hellcat : In Detail & Scale	Kinzey, Bert	Grumman F6F Hellcat fighter plane
2022.314.002	Sun Downers : VF-11 in World War II	Tillman, Barrett	The Sun Downers are one of the Navy's most famous fighter squadrons, having seen action - and scored kills. Tillman chronicles VF-11's World War II exploits during World War II. A new fighter squadron that was being formed at San Diego's North Island Naval Air Station in the first week of August 1942. The squadron was designated VF-11. It was the recipient of several displaced pilots. They were deployed to Hawaii. They had a comprehensive training program emphasizing aerial gunnery, strafing and later "group gropes."
2022.314.004	TBM/TBF Avenger in Action	Doyle, David	The Avenger was the foremost Torpedo Bomber in the US Navy's arsenal during WWII. Designed by Grumman as a replacement for the Douglas TBD Devastator, Avenger production began prior to the Japanese attack on Pearl Harbor and it remained in US Navy

Object ID	Title	Author	Summary
			service until October 1954. Demand for the large torpedo bomber was so strong that General Motor's newly-formed Eastern Aircraft Division was contracted as a second source for the Avenger, ultimately accounting for more than half of the total production. In addition to its obvious use as a torpedo bomber, the Avenger also served as a horizontal bomber, dropping conventional bombs, as well as mines and notably, depth charges, while operating in an antisubmarine role. This all-new edition is filled with 212 vintage photos, 29 of them in color, these are augmented by five color profiles and a like number of detailed line drawings; 80 pages. (from squadronsignalpublications.com)
2022.314.005	U.S. Navy Carrier Bombers of World War II : TBD Devastator, SBD Dauntless, SB2C Helldiver, TBF/TBM Avenger	None Stated	U.S. Navy Carrier Bombers of World War II; 1991; by Squadron/Signal Publications.
2022.314.006	U.S. Navy Carrier Fighters of World War II	None Stated	Brewster F2A Buffalo; Grumman F4F Wildcat; Grumman F6F Hellcat; Vought F4U Corsair; Grumman F8F Bearcat
2022.314.007	Wildcats Over Casablanca	Lambert, John W.	An account of the early stages of the battle for North Africa as it appeared to a squadron of American airmen, whose Grumman Wildcats were on one of the carriers. The air action described in WILDCATS OVER CASABLANCA took place between 8-11 November 1942 with the bulk of air action coming in the first two days. Navy F4F squadrons flew CAP and strike missions against French airfields, fortifications, shipping and other targets. They were opposed by French Hawk 75s and Dewoitine 520 fighters. By the time the "Cease Fire" order came on 11 November, the French units had been decimated though a number of USN aircraft had been lost in return. Navy fighters claimed 26 victories; the French, 10.

2022.318.002	Wright Brothers and the Invention of the Aerial Age, The	Crouch, Tom D.	From Amazon: With the hundredth anniversary of the Wright Brothers' history-making flight at Kitty Hawk, world attention is once again turning to these intrepid American inventors. Written by two of the world's leading experts on the Wrights, <i>The Wright Brothers and the Invention of the Aerial Age</i> will provide a definitive, richly illustrated look at the lives of the brothers and their world-changing invention. Wilbur and Orville were two eccentric owners of a bicycle shop in the heartland. But it was invention, engineering, and the new possibilities of manned flight that obsessed them. In just three years, they went from designing and flying a glider and creating a test wind tunnel to Wilbur's history-making moments in December 1903 above the dunes at Kitty Hawk, North Carolina. In moving prose, Crouch and Jakab explain the Wrights' achievements and the moments of their great successes, and they paint a masterful

Object ID	Title	Author	Summary
			personal portrait of the two sometimes erratic, genius personalities (never married, the brothers lived together all their lives), and, most important, the world of pioneering aviation in which they operated. Poignant archival photographs throughout the book capture that world, where ox carts and airplanes co-existed and where two determined brothers from Dayton were celebrated by presidents and kings. But the most poignant of all the images remains that of an airplane, almost kite-like in its simplicity, struggling skyward from the
2022.318.003	Seabirds : An Unofficial Illustrated Encyclopedia of Naval Aviation	Caruso, Hank	Caruso uses his knowledge of naval jargon, aircraft design, and mission responsibilities to create hilarious images that capture the personalities of U.S. Navy aviators, crews, and planes. These unique aviation caricatures, known as Aerocatures(tm), provide new meaning to familiar military terms. 42 color photos, 40 b&w illustrations. About the Author Hank Caruso has been drawing and painting aircraft nearly all his life. An aerospace test engineer by trade, he has flown as a backseater with Navy and Air Force tactical, test, and training squadrons, including the Navy's Blue Angels, Top Gun, and the US Naval Test Pilot School. 2022.334.001	Dogfight : Military Aircraft Compared and Contrasted	Jackson, Robert	Coined in the pioneer years of military aviation during World War I, the term "dogfight" refers to an aerial battle between two opposing aircraft, with each pilot making the most of his machine's speed and agility to shoot down his opponent. A skilled pilot could exploit the particular merits of his aircraft to ensure victory over his enemy. Dogfight is a fascinating exploration of the world's finest military aircraft, compared and contrasted--from the German Fokker D.III of World War I, ranged against the Allied SPAD XIII, through famous World War II adversaries such as the Hurricane and the Bf109, to modern aircraft which have met in combat such as the MiG-29 and the F-16. Aircraft that served in similar roles, such as the Lockheed Hudson and the Focke-Wulf Fw 200, are also compared, as are types such as trainers and transport aircraft which served on opposing sides. This book also evaluates rival aircraft which saw service on the same side, analyzing which fared best in combat against a common adversary. Each aircraft is illustrated with a spectacular three-quarter-view artwork, accompanied by detailed specifications and development history. The squadron history of the illustrated aircraft is also provided, while the main text features first-hand accounts of main text features first-hand accounts of flying the aircraft -- and, where relevant, tales if

Text follows President Franklin Roosevelt, Secretary of War Henry Stimson, Admiral Ernest J. King, and General George C. Marshall, four men who led the nation through history's most devastating conflict and ushered in a new era of unprecedented American influence, all while forced to overcome the profound personal and political differences which divided them.
2022.343.001	Three Blue Crosses	Sterrie, Norman	From Goodreads: Norm Sterrie was the last surviving pilot of the Douglas TBM Devastator, flying a "100 mile-an-hour airplane in a 300 mile-an-hour war." He was aboard the carrier USS Lexington, CV-2, when it was sunk at the Battle of the Coral Sea, and returned to World War II in the new USS Lexington, CV-16, when it was launched in 1943. In his second cruise to the Pacific war zone, he flew the Navy's new torpedo bomber, the TBM Avenger. Sterrie logged 275 carrier landings and participated in campaigns at Salamau and Lae, Coral Sea, Tarawa, Wake Kwajalein, Atoll, Palau, Hollandia, Truk, and the Philippine Sea where he lead his squadron on the famous "Mission After Dark." In civilian life after the war, he became a pediatrician, served as president of the Park-Nicollet Clinic, and began the first asthma clinic for children in Minnesota. Sterrie tells his story with characteristic wit and charm.

Dave – callsign "Bio" – pulled his readers into the exciting world of the F-14 and the Navy's TOPGUN program "
2022.344.002	Jet Fighters of the US Navy and Marine Corps : Part 2 : Mach 1 and Beyond	Kinzey, Bert	Includes the message: In memory of Troy's wife. Hope this book brings joy and knowledge to all who read it. From Adam Shenton. From Amazon Jet Fighters of the US Navy and Marine Corps is a two-book series that describes the entire history of American Naval jet fighters, from the very beginning when many thought that the onset of military jets would mean the end of naval carrier-based aviation, to today when the fifth-generation stealth jet F-35B/C Lightning II has begun its service with both the Navy and Marine Corps. Also covered by the books is the history of how American aircraft carriers evolved from the ESSEX class ships that won World War II with propeller-driven aircraft to the mighty supercarriers of today. In the first book, Jet Fighters of the US Navy and Marine Corps , Part 1: The First Ten Years, author Bert Kinzey described the first and second generation jet fighters that came on the scene at the end of or shortly after World War II.

Object ID	Title	Author	Summary
			These jet fighters made their first flights between 1945 and 1954, and the book covers fifteen aircraft arranged according to the chronological order of the date of their first flight. This concluding volume, Jet Fighters of the US Navy and Marine Corps, Part 2: Mach 1 and Beyond, summarizes where Part 1 left off and continues to the present day. The evolution of the United States Navy's aircraft carriers is again picked up and covers continued modifications to the ESSEX and MIDWAY class carriers and to the initial super carriers of the FORRESTAL CLASS. The follow-on super carriers of the KITTY HAWK, NIMITZ, and FORD classes are discussed to highlight the continued evolution required to handle the ever increasingly sophisticated jet aircraft that have achieved operational status. The thirteen aircraft covered in Part 2 begin with the Chance Vought F-8 Crusader, the first Navy and Marine jet fighter able to routinely exceed supersonic speeds, and which brought US Navy jet fighters on par in performance to their land-based counterparts. As with Part 1, the scope of this publication includes all Navy jet fighter designs that reached at least the flying prototype stage, so the F11F-1F Super Tiger, F5D Skylancer, and XF8U-3 Crusader III, each of which was developed from an existing aircraft design, are all covered. Also included is the F-111B, Secretary of Defense Robert McNamara's vision of a be all, do all aircraft for both the Navy and the Air Force. It was a concept which, at that time, was simply not possible to achieve. All of the fighters covered here in Part 2 that became operational with fleet squadrons saw, and continue to see plenty of combat around the world. The Navy and Marines have also operated three different types of jet fighters, as well as other types of aircraft, strictly in a training role, that of

Object ID	Title	Author	Summary
			serving as adversary aircraft in dissimilar air combat training (DACT). These include the American built F-5E/F/N Tiger II and F-16 Fighting Falcon, and the Israeli F-21A Kfir. These fighters are also included in this publication. As this book is published in 2020, the primary jet fighter for the US Navy is the F/A-18E/F Super Hornet, and the F-35C is just beginning to enter the inventory with the Navy's first fleet squadron being declared operational in 2019. Meanwhile F-35Bs are already serving in considerable numbers with the Marines as they replace both the AV-8B Harrier II and eventually some F/A-18 Hornets. Together, Jet Fighters of the US Navy and Marine Corps, Part 1 and Part 2, cover every jet fighter that has been designed, built, and at least reached the flying prototype stage since the FH-1 Phantom first took to the air in 1945. remarkable history of these aircraft, the problems faced, the solutions developed, and the successes achieved provide incredibly interesting reading for the aviation enthusiast. The print edition of Jet Fighters of the US Navy and Marine Corps, Part 2: Mach 1 and Beyond features 113 pages, 208 high resolution photographs, 188 of which are in color, and 10 full color profiles. the problems faced, the solutions developed, and the successes achieved provide incredibly interesting reading for the aviation enthusiast. In honor and memory of Virginia Swanson. From Nancy E. Smith This third volume chronicles aerial warfare in the South Pacific during the critical months of May and June 1942. It can be read alone or as part of a trilogy which spans the first six months of the Pacific War and culminates in the Battle of the Coral Sea. In early May 1942 the Japanese launched Operation MO, a complex plan which involved the seizure of Tulagi and Port Moresby. Within the context of an ongoing regional war waged by land-based air forces, opposing fleet carriers were drawn into conflict for the first time in history. The result was the Battle of the Coral Sea, resulting in the loss of the USS Lexington and the withdrawal of the remaining American carrier, the USS Yorktown. The orthodox view of Coral Sea is of an Allied victory whereby the Japanese were forced to abandon their plan to capture Port Moresby. However, the authors make a compelling argument that the Japanese capacity to mount the invasion was largely intact and it was a serious error of higher command to postpone the invasion at this critical time. Following the Coral Sea battle, the bloody aerial campaign continued in earnest between the land-based air forces. This resembled something of a slugfest between the opposing bases of Lae and Port Moresby which were just an hours' flying time from one another. The Allied offense was waged by American B-17 Flying Fortress, B-25 Mitchell and B-26 Marauder bombers shuttling up from Australia. Protecting their critical Allied base at Port Moresby were hard-battling squadrons of P-39 Airacobra fighters which suffered an astounding loss rate during

Object ID	Title	Author	Summary
			this period. On the Japanese side, their formations of Betty and Nell bombers regularly pounded Moresby, and by June had begun targeting its vulnerable harbour. These were protected by the wide-ranging Zero fighters of the famed Tainan Kokutai, whose fighter pilots were amongst the best and most experienced to be found on any front during the Second World War. Never before has this campaign been chronicled in such detail, with Allied accounts matched with Japanese records. Both authors are uniquely qualified to tell this story. Raised in Port Moresby, Michael Claringbould is a globally acknowledged expert on the New Guinea conflict and Japanese aviation.
2022.344.004	Pacific Adversaries, Vol. 4 : Imperial Japanese Navy vs the Allies : The Solomons 1943-1944	Claringbould, Michael John	In honor and memory of Virginia Swanson. From David Hanson Conveys detailed stories of aerial warfare in the Solomons theatre, chosen because both Japanese and Allied records can be matched for an accurate accounting.
2022.344.005	Grumman EA-6B Prowler : Flying with the US Navy and Marine Corps	Pied, Robert	In memory of Virginia Swanson-Bonnie From the publisher- DH-021 is a 140 page book on the EA-6B Prowler, showing every part of the aircraft, but also some fantastic action in the air and on board several aircraft carriers.
2022.344.006	Brooklyn Navy Yard, The	Bartelstone, John	Donated in memory of Virginia Swanson- Donated by John Bing From Amazon: New York City's largest and oldest industrial facility, the historic Brooklyn Navy Yard occupies 250-acres on the East River between the Williamsburg and Manhattan Bridges, and is presently one of New York City's major industrial sites. One of the last remnants of Brooklyn's industrial supremacy, the Yard has experienced tremendous change: functioning from the age of wind to that of diesel. As a cradle of naval evolution,the Yard has had to reinvent itself constantly, and this is made

Object ID	Title	Author	Summary
			evident by the presence of buildings and structures spanning from the 1830s to the 1950s. The Navy Yard was shut down in 1966 and reopened again in 1971 when the City of New York bought it with the intention of redevelopment. Great ships are still repaired there, and the Yard, now an industrial park with a variety of manufacturers and light industries, functions as a refuge from a city that has mostly forgotten that a mixed economy is a key to its survival. The Brooklyn Navy Yard, the first monograph by John Bartelstone, offers a quiet and striking look at the Yard as a time capsule of industrial New York. The Yard today is a fusion of the sublime and the practical, with eerie abandoned elements existing side by side with vibrant businesses. Bartelstone's camera is partial to the former. The images show a place out of time, where World War II New York is still palpable. Bartelstone has been photographing the buildings and structures of the Yard since 1994. His photographs are neither a history of the Navy Yard nor a depiction of its role as a modern industrial park; the book instead offers a structured impression of a dreamscape.

2022.344.007	Finding the Fallen : Outstanding Aircraft Mysteries of the First World War to Desert Storm Investigated and Solved	Saunders, Andy	In memory of Virginia Swanson - Donated by Phil Eakin From Amazon: The logical successor to the highly acclaimed Finding the Few and Finding the Foe, this new work covers a selection of similar mysteries involving missing aircrew and spanning almost the entire twentieth century. Starting with a reappraisal of the Mannock affair, the author highlights the fates variously of RAF, USAF, Luftwaffe personnel from bomber, reconnaissance and fighter crews. Each case is examined with a microscopic and forensic approach worthy of Silent Witness, and evaluates the

			detective work involved in unraveling these long-unsolved disappearances of lost airmen. In many cases there is a satisfactory conclusion with 'closure' achieved – although some question marks are left hanging unanswered over other equally fascinating cases.
2022.344.008	Modern USMC Air Power : Aircraft and Units of the 'Flying Leathernecks'	Copalman, Joe	Donated in Memory of Virginia Swanson by Pat Alderman. As America's expeditionary force-in-readiness, the US Marine Corps operates an eclectic mix of fixed-wing, rotary-wing, tiltrotor and unmanned aircraft to support the Marine rifleman on the ground. The first two decades of the 21st century have seen an almost complete transformation of the Marine Air Wings, as Cold War-era legacy aircraft yield to digital age replacements. In Harpia's first book dedicated to a North American air arm, Joe Copalman explains the significance of each aircraft transition in the Marine Corps over the previous twenty years, community by community, on the Marine Air-Ground Task Force and its ability to conduct amphibious and expeditionary warfare.
2022.344.009	Naval Aviation in the Second World War : Rare Photographs from Wartime Archives	Kaplan, Philip	From Amazon: At Taranto, Pearl Harbor, and in the North Atlantic, the carrier, the ugly duckling of the world's navies, proved itself to be the dreadnought nemesis. As the tide of war turned, the fast attack carriers of the U.S. Navy spearheaded the counter-attack in the Pacific while the makeshift escort carriers helped to seal the fate of the German U-boats in the Atlantic. The carrier, and naval aviation, thus emerged into the post-war world as the primary symbol and instrument of sea power; it would play a crucial role in the strategic encirclement of the Soviet Union and enabled western airpower to be rapidly and effectively deployed in areas of conflict as remote as Korea, Vietnam, the Falklands and the Gulf.

Object ID	Title	Author	Summary
			Kaplan describes the adventure of the young American, British, and Japanese naval aviators in the Second World War. It is an account of their experiences based on archives, diaries, published and unpublished memoirs, and personal interviews with veteran naval airmen of WWII, providing a vivid and often hair-raising picture of the dangers they encountered in combat and of everyday life aboard an aircraft carrier. It considers some of the key aspects of the WWII naval aviators combat career, such as why it was that only a tiny minority of these pilots – those in whom the desire for aerial combat overrode everything – accounted for such a large proportion of the victories. In the major carrier actions of that conflict, from the Royal Navy's attack on Taranto which crippled the Italian fleet in 1940, to the Japanese carrier-launched surprise attack on U.S. Navy battleships and facilities at Pearl Harbor in 1941, to the carrier battle of Midway in 1942, and the Great Marianas Turkey Shoot of 1944, through the Japanese Kamikaze campaign against the U.S. Carriers in the final stages of the Pacific war, this book takes the reader back to one of the most exciting and significant times in modern history.

2022.352.001	USS Blue Ridge (LCC-19) - Westpac II - 1973	Legare, PHL (AC) L.	Includes 2 8x10 photos of the ship: one sepia and one color. Also, includes a list of ships company chief petty officers. Gil's dad is listed as YNC T. Balaoing. Blue Ridge's second WESTPAC cruise began in late February or 1973. She was not needed in Vietnamese waters this time, However, as a peace treaty had been signed in that worn-torn area and American forces were no longer used there.. Blue Ridge's job remained the same in WESTPAC as she continued to serve as flagship for PHIBFORSEVENTHFLT. This time her mission dealt with training joint amphibious operations with the Navy of the Republic of the Philippines. She also served as flagship during Operation Golden Dragon, the first large-scale exercise with Korean forces in many years. In addition, Blue Ridge made several interesting and relaxing port visits while deployed. Among the ports were Hong Kong, Singapore, the Philipines, Taiwan and Japan. She again operated out of White Beach, Okinawa while

2022.353.004	Who Can Hold the Sea : The U.S. Navy in the Cold War, 1945-1960	Hornfischer, James D.	A close-up, action-filled narrative about the crucial role the U.S. Navy played in the early years of the Cold War, from the New York Times bestselling author of <i>The Fleet at Flood Tide</i> This landmark account of the U.S. Navy in the Cold War, <i>Who Can Hold the Sea</i>, combines narrative history with scenes of stirring adventure on--and under--the high seas. In 1945, at the end of World War II, the victorious Navy sends its sailors home and decommissions most of its warships. But this peaceful interlude is short-lived, as Stalin, America's former ally, makes aggressive moves in Europe and the Far East. Winston Churchill crystallizes the growing Communist threat by declaring the existence of "the Iron Curtain," and the Truman Doctrine is set up to contain Communism by establishing U.S. military bases throughout the world. Set against this background of increasing Cold War hostility, <i>Who Can Hold the Sea</i> paints the dramatic rise of the Navy's crucial postwar role in a series of exciting episodes: the tests of A-bombs dropped on warships at Bikini Island the growing science of undersea warfare and invention of sonar the Korean War as a deadly test of naval superiority the growth of the modern Navy with its dramatic game-changers: cruisers fitted with surface-to-air missiles, and the invention of the nuclear submarine lessons learned from the dramatic sinking of the submarine <i>USS Cochino</i> in the Norwegian Sea the <i>USS Nautilus</i>'s dangerous, first-ever cruise underneath the North Pole As in all of Hornfischer's work, the events unfold in

2022.365.001	Combat Fleets of the World - 1976/77 : Their Ships, Aircraft, and Armament	Labayle Couhat, Jean (ed)	Internationally acknowledged as the best one-volume reference to the world's naval and paranaul forces, this popular Naval Institute guide is both comprehensive and affordable. Updated biennially since 1976, it has come to be relied on for all-inclusive, accurate, and up-to-date data on the ships, navies, coast guards, and naval aviation arms of more than 180 countries and territories. Large fleets and small maritime forces get equally thorough treatment as evidenced in this new edition, which highlights major and even minor developments that could have an impact on the world scene. A thorough indexing of material and a logical ship-typing system make the book easy to use and allow for quick comparisons between fleets. The guide continues to present timely, authoritative information supported by more than four thousand illustrations from correspondents throughout the world. From giant aircraft carriers and ballistic missile submarines to tugboats and launches, the characteristics and capabilities of ships large and small are reliably recorded. Complete descriptions of naval aircraft, weapons, weapon systems, and sensors are also provided along with useful commentary on organization, personnel strengths, and bases.

2022.370.001	Return to Midway	Ballard, Robert D.	A biographical account of the authors quest to find the wrecks of ships sunk in the Battle of Midway; Principally the USS Yorktown, and four Japanese carriers. The search area was enormous and his targets lay over three miles down. Equipment failures and time constraints kept working against him; but finally on May 19, 1998 Robert Ballard and his team located the remains of the U.S.S. Yorktown. The book also tells the a synopsis of the Battle of Midway.

Object ID	Title	Author	Summary
			greater challenge: rolling back the vast Japanese Pacific empire, island by island. This masterful history encompasses the heart of the Pacific War—the period between mid-1942 and mid-1944—when parallel Allied counteroffensives north and south of the equator washed over Japan's far-flung island empire like a "conquering tide," concluding with Japan's irreversible strategic defeat in the Marianas. It was the largest, bloodiest, most costly, most technically innovative and logistically complicated amphibious war in history, and it fostered bitter interservice rivalries, leaving wounds that even victory could not heal. Often overlooked, these are the years and fights that decided the Pacific War. Ian W. Toll's battle scenes—in the air, at sea, and in the jungles—are simply riveting. He also takes the reader into the wartime councils in Washington and Tokyo where politics and strategy often collided, and into the struggle to mobilize wartime production, which was the secret of Allied victory. Brilliantly researched, the narrative is propelled and colored by firsthand accounts—letters, diaries, debriefings, and memoirs—that are the raw material of the telling details, shrewd judgment, and penetrating insight of this magisterial history.

2022.373.001	Sikorsky Legacy, The	Sikorsky, Sergei I.	From Amazon - Over 200 photographs help paint the picture of the career of Igor I. Sikorsky, one of the most talented and versatile aeronautical pioneers in history. This book traces the history of Sikorsky aviation and its founder, Igor I. Sikorsky, whose career spanned over 60 years and was highlighted by three major achievements: the creation of the world's first four-engine airliner, the record-breaking Clipper Ships, with which Pan American Airways

Object ID	Title	Author	Summary
			explored transpacific and transatlantic airline service, and the development of the helicopter. Sikorsky then led his engineers out of the piston-engine era and into the jet age with the design and development of some of the most widely used turbine-powered helicopters in aviation history. Hundreds of photographs, many from the Sikorsky family archives, document the genius of Sikorsky's intuitive engineering, including his lifelong interest in the challenge of the helicopter, which many historians consider to be his crowning achievement.
2022.375.001	USS Consolation (AH-15) - 1953 -54	USS Consolation	A pictorial account of the deployments of the USS Consolation (AH-15), a hospital ship able to provide medical and surgical care to 768 bed patients. She departed from her homeport of San Francisco. Commissioned in May 1945. She acquired the nicknames, "The Galloping Ghost of the Korean Coast", "The Fighting Band-Aid" and "The Albino." At the end of WWII she was in Japanese waters evacuating and caring for ex-prisoners of War. Later she took part in operation "Magic Carpet" which repatriated thousands of men from overseas. In July 1950 she departed San Francisco to arrive in Korea where she participated in the Inchon Invasion and operations at Wonsan and Hungnam where she provided for the sick and wounded. She returned to Long Beach Naval Shipyard where on 16 August a helicopter pad was installed. Twice more she returned to the Korean Theater and continued to provide care throughout the entire Korean war. Includes a map of the 1953-54 cruise. The ship's roster is in the back of the book. Ports of call include: Korea; Japan; Hong Kong; Pearl Harbor; San Francisco; Long Beach and Miss Consolation. In Photos of various activities are included. Among her firsts are:

2022.376.001	Dead in the Water : The USS Yorktown at Midway	Linzey, Stanford E.	Originally published as "God Was at Midway" in 1999 and republished in 2004 as "The USS Yorktown at Midway." From Amazon This is a reprint of a book originally published with the title, "God Was at Midway." It has a new introduction by S. Eugene Linzey III and a new afterword by Paul E. Linzey. USS Yorktown, with a ship's crew of just over 2,200 sailors and about 300 aviators, received three bomb hits and two torpedoes when Captain Elliott Buckmaster ordered, "Abandon ship." 400 men were dead. 2,000 sailors went down the lines into the murky, oily waters of the Pacific. This book tells the story in light of faith, prayer, and the God who was personally involved in the men's lives. The author conducted Bible studies in the ship. In answer to the prayers of those men and their loved ones, many of the sailors accepted Christ as Lord and Savior. There were miraculous rescues from bomb bursts and fragmented steel, as Navy destroyers pulled blue jackets from the sea. Barefoot men clad only in their underwear knelt on the deck of a destroyer and offered thanks to Almighty God for his mercy and salvation. A true life story of God's presence in a battle at sea.

Object ID	Title	Author	Summary
			Dead in the Water is the story about a man who was faithful to God during the toughest days of his life, and the God who was faithful to that man. It provides a glimpse of divine intervention in the lives of men who were far from home, providing hope and comfort in an otherwise bleak situation. At the same time, it tells of some fantastic answers to prayer, as well as some devastating tragedy.
2022.378.001	USS Paul Hamilton (DDG-60) - Commissioning : May 27 1995, Charleston, South Carolina	None Stated	The Paul Hamilton (DDG 60) is the 10th ship of the Arleigh Burke-class guided-missile destroyers and is named after Paul Hamilton, the third United States Secretary of the Navy. The keel was laid on August 24, 1992, at Bath Iron Works shipyard in Bath, Maine. Christened and launched on July 24, 1993. The Honorable Barbara Spyridon Pope, U.S. SECNAV, served as sponsor of the ship. Cmdr. John Joseph Hammerer, Jr., is the prospective commanding officer. This is a pictorial and written account of the commissioning of the USS Paul Hamilton (DDG 60), an Arleigh Burke Class Destroyer, which took place at Charleston, South Carolina on May 27, 1995. Included are statements addressed to the ship's first commanding officer Cdr. John J. Hammerer from President Bill Clinton, the Secretary of Defense, Secretary of the Navy, the Chief of Naval Operations, the Commander in Chief of the U.S. Pacific Fleet, the Commander of Naval Surface Force of the Pacific Fleet, the Director of the Surface Warfare Division, the AEGIS Program Manager, the Commander of the Naval Surface Group of the Middle Pacific, the Supervisor of Shipbuilding, Conversion, and Repair of Bath, Maine, and the President of the Bath Iron Works Corporation. The book provides a brief overview of the destroyer's characteristics, capabilities, and the role she

Object ID	Title	Author	Summary
			will fulfill in her career in the U.S. Navy. The book also provides pictures of the ship's new crew by department as well as brief descriptions of the various ratings within each department. Furthermore, the book provides pictures and brief descriptions of the destroyer's officers including her Commanding Officer, Executive Officer, Command Master Chief, Chief Engineer, Combat System's Officer, Weapons Officer, Operations Officer, Supply Officer, and the Navigation Officer. Other details provided are a schedule of events, a crew photo, candid photos of the ship's sea trials and construction, a brief history of Paul Hamilton (the ship's namesake), past destroyers that also carried the same name, a brief description of Barbara Spyridon Pope, the ship's sponsor, and details regarding the ship's construction milestones and her christening at the Bath Iron Works Corporation. The book also briefly mentions various traditions associated with the construction, christening, and commissioning of a U.S. Navy ship. Summary also by Adam Shenton.
2022.378.002	USS Arkansas (CGN-41) - World Cruise -1986	None Stated	This cruise book provides a pictorial and written account of the 1986 world cruise of USS Arkansas (CGN-41). The book includes photos of the enlisted crew and officers, life onboard the cruiser, and photos of the places they visited during their globetrotting deployment. The most prominent feature of the cruise book are the photo collages of the ports of call the USS Arkansas visited, which include Pearl Harbor, Hawaii, Subic Bay, Republic of the Philippines, Singapore, Karachi, Pakistan, Gaeta, Italy, Monte Carlo, Monaco, Perth, Australia, and their homecoming at NAS Alameda, California. Additionally, the book also provides photos of life onboard the cruiser during her deployment, including

			special events such as the Crossing the Line ceremony, the Steel Beach Picnics, vertical replenishment operations, operations with Battle Group Foxtrot (the USS Enterprise's battle group), and other photos of crew working and relaxing aboard the ship during the deployment. Summary by Adam Shenton
2022.378.003	USS Fife (DD-991) - 1989	USS Fife	This cruise book provides a pictorial and written account of the USS Fife and her activities and WESTPAC deployments between 1988 and 1989, among which included the destroyer's homeport shift from San Diego, California to Yokosuka, Japan which took place between August 8 to August 31, 1988. The book features photos and brief descriptions of the ship, her history, the ship's crest, photos of the crew, supporting staff, and photos from their deployments between 1988 and 1989. Additionally, the book also provides a brief description of each department's role aboard the ship as well as the various rates within each department. The cruise book also includes a section of photos detailing their ports of call such as Pearl Harbor, Hawaii and other well-known ports across the Western Pacific. Other photos document the crew's activities onboard the ship, on shore leave, and at home with their families. Other notable mentions within the cruise book are a Refugee Rescue Operation in the South China Sea on June 26, 1989, RECONEX - 88, and a memorandum dedicated to Albert Francis Darisse III, a gas turbine systems technician aboard USS Fife during her 1985 to 1986 WESTPAC.

2022.384.001	Petty Officer and a Swabbie, A	Paige, Charles W.	The latest edition is 2022. DO NOT COPY NOR GIVE AWAY. COPYRIGHTED MATERIAL. We have permission from Charles Paige to put it on our network. The time is during the Vietnam War. The Tet Offensive has occurred just before I enlist, and things continue to heat up both in the Western Pacific and on the home front. Taken from http://www.netmeister.net/~cpaige/01POAS-title.htm My story is not one of combat and harrowing experiences against shot and shell. Mine is about life in the Navy circa 1968-72, on bases and onboard ship, and about interactions between the Navy and a civilian population not too happy we are involved in Vietnam. It is also about travels and experiences in exotic countries, as a young man not an officer and a gentleman but a petty officer and a swabbie is introduced to a sometimes belligerent but always fascinating world. Charles was a part of the commissioning crew of the USS Midway in 1970. Former USS Midway crew member.

2022.385.001	Cocktails with the Admiral : Drinks, Espionage and the History of the American Century	Socotra, Vic	From Poetry and Prose- Mac Showers lived the American Century with a front-row seat. An Iowa Depression-era kid, Mac's desk in a Pearl Harbor basement enabled the Secrets to be used victory at the greatest naval battle of modern times was hatched near his desk. He headed the Estimates Section on Admiral Nimitz's forward headquarters, and briefed the breathtaking casualties involved in the coming invasion of the Home Islands. He stayed in the Navy after the war, and entered the New One in style, dining with Marshall Tito, and helping to sweep up the wreckage in the Intelligence Community after Watergate. He became friends with a younger crowd at the bar across the street from his retirement community, and listened to the follies of Washington from the people still doing it, and telling us exactly why some of the strange things happened in DC, and how they came to be when he helped implement the provisions of the Foreign Intelligence Surveillance Act for the Director of Central Intelligence. It was the scope of a life lived in full, and right in front of the electric panorama of the American Century. You will find some rage-age America in there, too! Vic Socotra is the pseudonym of J. R. Reddig.

2022.390.001	Top Gun Days - San Diego 2022 - Wrap Book	Sherriff, Michael (ed)	This is a book of photos of the May 14-15, Top Gun Days - San Diego 2022. It was billed as Top Gun Fans San Diego Meet Up Weekend - May 2022. Location: Naval Reserve Officers Building San Diego, CA. A unique, once in a lifetime experience for fans of the movie Top Gun to get to meet, in person, those who were involved in making the movie. Paul "Chappie" Ward represented the Midway Museum on the Committee. Chapters include: Top Gun Behind the Scenes; Chapter 1- Bus Tour; Chapter 2 - N.T. C.

			and V.I.P. Speakers & Raffle; Chapter 3 - Midway; Chapter 4 - K.C. BBQ; Chapter 5 - -After Hours Taken from the website: https://happeningnext.com/event/top-gun-fans-san-diego-meet-up-weekend-may-2022-eid4snuf04da41 About this Event Event Overview: Title: Top Gun Days - San Diego - 2022 Dates: 2pm on Saturday 14th May 2022 Location: Naval Reserve Officers Building at 2820 Roosevelt Road San Diego, CA 92106 We have use of a large room inside the same part of the NTC building where the Navy court room/accident inquiry scene was filmed for Top Gun. This part of the event begins with each of our special guests being introduced on stage. Once the introductions are finished each guest will have their own desk and area from where they can share their stories about Top Gun, TOPGUN and their Navy career. You'll be able to ask them questions, have memorabilia signed and a photo opportunity with them. This will be in the style of comicon where you're free to move around the room and spend as much time as you want at the table area of each guest. There is an outside area where vendors selling military paraphernalia, goods, merchandise etc. can be found. The confirmed guests (so far) are: Mr Bill Badalato - Executive Producer of Top Gun

Object ID	Title	Author	Summary
			Frank Whiteley - Personal protection and assistant to Tom Cruise
			Billy Badalato - Assistant to Don Simpson
			Lloyd Bozo Abel - Lead F-14 arial coordinator for Top Gun
			John Smegs Semcken - Navy liason officer
			Jim Jambo Ray - TOPGUN Instructor and F-4 pilot.
			Pete Viper Pettigrew - The real Viper, Charlies date and Technical Advisor
			Cindy and Martin Blair - Owners of The Kansas City BBQ
			We will have a professional photography company capturing all of the moments throughout the day. After the event you'll receive details of where you can access the digital versions of the photos. You will also be able to order any of the photos as prints directly from the company which can be printed on a wide range of products including canvases, wall art prints, mugs, large framed prints etc.
			This entire weekend will be a once in a lifetime Top Gun Fans opportunity due to the guests who will be there and may be your only chance to meet with some of the guests.

Object ID	Title	Author	Summary
			nears -- Ceasefire -- Operation End Sweep -- Operation Homecoming -- Back to the real world. Perhaps more vexing than any part of the Vietnam War--Americas longest--was getting out. This book offers a chronicle of those last difficult years, 1972 and 1973, that is at once a detailed and thorough overview and at the same time a vividly personal account. The year 1972 found Marine Corps pilot Robert E. Stoffey beginning his third combat tour in Vietnam. After flying 440 combat missions out of Da Nang and Marble Mountain Airfields in South Vietnam (and being shot down twice) between 1965 and 1970, Stoffey was in a unique position to judge the United States changed strategy. From the vantage point of the USS Oklahoma City, he fought--and observed--the critical and complex last two years of the war as Marine Air Officer and Assistant Amphibious Warfare Officer on the staff of the Commander, Seventh Fleet. As the South Vietnamese battled for survival against the onslaught from the Communist North Vietnamese Army, the U.S. Seventh Fleet, afloat in the Gulf of Tonkin and the South China Sea, was a significant supporting force. With the U.S. Navy's mining of North Vietnam's waterways, concentrated shore bombardments, and air attacks, this sea power was instrumental in leading to the negotiated end of the war and return of our POWs. This is the story that Robert Stoffey tells in his firsthand account of how the Vietnam War finally ended and what it took to get our POWs home.

(ed)	Pictorial account of the several deployments of the USS Midway (CV-41) and history covering seven hundred twenty nine (729) days. Major deployments were: (1) 23 April - 13 July 1987 - She departed Yokosuka, visited Hong Kong, Subic Bay, Sydney, Subic Bay again, and returned to Yokosuka. Onboard: VFA-195 (F/A-18A) VFA-151 (F/A-18A) VFA-192 (F/A-18A) VA-115 (A-6E and KA-6D) VAW-115 (E-2C) VAQ-136 (EA-6B) HS-12 (SH-3H) (2) 15 October 1988 - 11 April 1988 - She departed Yokosuka, visited Subic Bay; on station in the Indian Ocean; Mombasa, Kenya; turnover with the USS Enterprise (CVN-65); Pattaya Beach, Thailand; Subic Bay again; Pusan, Korea; Sasebo, Japan; and returned to Yokosuka. Onboard: VFA-195 (F/A-18A) VFA-151 (F/A-18A) VFA-192 (F/A-18A) VA-185 (A-6E and KA-6D) VA-115 (A-6E and KA-6D) VAW-115 (E-2C) VAQ-136 (EA-6B)

Object ID	Title	Author	Summary
			HS-12 (SH-3H) (3) 8 September 1988 - 9 November 1988 - Departed Yokosuka; Sasebo; Pusan; returned to Yokosuka; Subic Bay twice; and returned to Yokosuka. Onboard: VFA-195 (F/A-18A) VFA-151 (F/A-18A) VFA-192 (F/A-18A) VA-185 (A-6E and KA-6D) VA-115 (A-6E and KA-6D) VAW-115 (E-2C) VAQ-136 (EA-6B) HS-12 (SH-3H) Carrier Air Wing Five (CVW-5) was onboard for all deployments. Items of interest: Picture of the USS Midway and USS Iowa (BB-61) on station in the Indian Ocean (pages 22-23). First US carrier visit to Sydney since 1972. Poem by SN Robert E. Parks on page 24. VIPs: Wayne Newton, Senator Edward Kennedy, Kingdom of Thailand visitors, Rear Admiral Buckley; Senator Ted Stevens, Alex Trebek, Yokosuka VIPs; Bob Hope, Connie Stevens, Tricia and Joely Fisher, Barbara Eden, Lee Greenwood, Miss USA Michelle Royer performed Christmas Eve 1987; four pages of pictures of Soviet ships in the area when Midway was on Alert Alpha; pages 48-49 map of the three deployments; pages 71/72 and 73/74 damaged at the printers; there is a lot of description about the functions of each department with the department pictures; page 147 has a picture of the flight deck crew in their colored shirts. great picture of Operations Department on pages 202-203; Mobile Unit Five Explosive Ordnance Disposal page 241; Naval Reserve Unit 0171 onboard; pictures of Midway's rock and roll pages 310-311, 10 deaths are listed on the In Memoriam page 318. Index is on page 320.
2022.399.001	USS Hornet (CV-12) - First War Cruise - 1943-1945	Unknown	Pictorial account of the World War II Pacific Theatre combat deployment of the Essex-class aircraft carrier USS Hornet

Object ID	Title	Author	Summary
			(CV-12) through 19 June 1945. "Reprinted from original that was lithographed on board the U.S.S. Hornet." Pictures of commissioning 29 November 1943, joining Task Force 58, flight deck operations, Truk, Neptunus Rex (crossing the line), Battle of Philippine Sea, R&R, strikes on Japanese mainland, Yamato, UNREPs, various departments at work, and general life aboard the ship. Map of Pacific operations centerspread, scoreboard (ships struck and planes shot down), and statistical summary.
2022.401.001	USS Midway (CVA-41) - Westpac - 1961	Welles, Chris (ed)	Pictorial account of USS Midway (CVA-41) deployment to South East Asia. The aircraft carrier departed Alameda, CA on 15th February to Hawaii, Guam, Subic Bay; Philippines, to Japan (Sasebo, Yokosuka), Hongkong and arrived back in Alameda, CA on 28th September. Midway was one of three carriers ordered to the South China Sea in support of U.S. diplomatic efforts to broker a ceasefire between the Pathet Loa and the Loation Government between March and May of 1961. Carrier Air Group 2 was aboard for the deployment and consisted of: VF-21 (F3H-2); VA-22 (A4D-2); VA-23 (A4D-2); VF-24 (F8U-2) ; VA-25 (AD-7); VMA-311 (A4D-2); VAH-8 (A3D-2); VCP -63 Det.A (F8U-1P); VAW-11 Det.A (WF-2); and HU-1 Det.1 (HUP-3).
2022.401.002	USS Midway - Far East Cruise 1962	Langkammerer, G. W. (ed.)	Pictorial account of the deployment of the USS Midway CV-41 the Western Pacific Ocean 1962. She departed Alameda 6 April 1962 and returned 20 October 1962. Ports of call and items of interest : Pearl Harbor, Yokosuka, Sasebo, Hong Kong, Subic Bay, Buckner Bay, Iwakuni and Beppu. In Memoriam page. Brief summary detailing the tensions between North and South Vietnam and the role the USS Midway played, on standby, as a friend of Freedom.

2022.404.002	Midway Class, The : Official Commemorative Guide	McGaugh, Scott	In 1945, the US Navy commissioned the USS Midway, the largest carrier that the world had ever seen and the namesake for the Midway class which included USS Franklin D. Roosevelt (CV-42).the USS and the USS Coral Sea (CV-43). The Midway Class became a pioneering generation of aircraft carriers--the only one that served during the entire Cold War and beyond. This official commemorative guide chronicles the achievements and deployments of these "floating cities at sea" and their influence on world affairs. With archival photographs and fascinating facts, it provides a rare look at the service life of an unforgettable class that forged a legacy in US Navy history.
2022.406.001	Afterburner : Naval Aviators and the Vietnam War	Sherwood, John Darrell	Despite spending over 200 billion dollars and dropping almost 8 million tons of bombs on Southeast Asia, the United States was unable to score a definitive victory in the air war in Vietnam. Afterburner takes us inside the day-to-day operations of the air war, particularly during 1972, the most intense year of the campaign. During that year, North Vietnam launched the first large-scale conventional attacks on strongholds in South Vietnam. John Darrell Sherwood shows how the United States fought back with some of the most innovative air campaigns in its history, including President Nixon's Linebacker bombings and the Navy's mining operation in Haiphong Harbor. From duels with enemy MiGs to the experiences of Commander C

2022.406.002	Doolittle Raid, The : America's Daring First Strike Against Japan	Glines, Carroll V.	The stories of Jimmy Doolittle's Tokyo raiders: their bombing mission against Japan and their struggle to survive and escape their pursuers in China.
2022.406.003	Rising Sun, Falling Skies : Disastrous Java Sea Campaign of World War II, The	Cox, Jeferey R.	In the immediate aftermath of Pearl Harbor, the Japanese juggernaut quickly racked up victory after victory. Desperate to secure resource-rich regions in the Pacific and ensure their continued dominance of South East Asia, Japanese forces were determined in their efforts to conquer Malaya, Singapore and the oil-rich islands around Java Sea - Borneo, Sumatra and Java itself. In the face of this seemingly unstoppable tide stood a small Allied force - American, Australian, British and Dutch. Thrown together by circumstance; cut off from reinforcements or in many cases retreat; operating with old, obsolete equipment and dwindling supplies, there was little hope of victory. Indeed, the month-long Java Sea Campaign, as it subsequently became known, quickly evolved from a traditional test of arms into a test of character. In the face of a relentless enemy and outnumbered, outgunned and alone, they defiantly held on, attempting to buy weeks, days, even hours until a better line of defense - and offense - could be established. These were the men of the US Asiatic Fleet, the British Far Eastern Fleet, the Royal Netherlands Navy's East Indies Squadron and the Royal Australian Navy. And their supporting units like Patrol Wing Ten, the Royal Netherlands Naval Air Service, the US Army Air Force's 17th Pursuit Squadron and submarines of all these fine nations. A campaign that has been too often either ignored by historians or criticised for poor command decisions, this is the story of the sailors and the airmen at the sharp end, and how they fought and endured the first months of the War in the Pacific.

Object ID	Title	Author	Summary
2022.406.004	MiG-21 Units of the Vietnam War	Toperczer, Istvan	Osprey's study of the use of MiG-21 Units in the Vietnam War (1955-1975). Having honed their piloting skills on the subsonic MiG-17 and transonic MiG-19, the Vietnamese Peoples' Air Force (VPAF) received their first examples of the legendary MiG-21 supersonic fighter in 1966. Soon thrown into combat over North Vietnam, the guided-missile equipped MiG-21 proved a deadly opponent for the USAF, Navy and Marine Corps crews striking at targets deep into communist territory. Most of the VPAF's 12+ aces scored their bulk of their kills in the MiG-21, which was then the best fighter produced by Russia's premier fast jet manufacturer, Mikoyan Gurevich. Well over 200 MiG-21s were supplied to the VPAF, and the numerous models and the schemes they wore are chronicled in great detail in this unique volume.
2022.406.005	F-104 Starfighter Units in Combat	Davies, Peter E.	The F-104 Starfighter was lightning-fast, but despite its high performance, the diminutive Cold War fighter was not given much of a chance in the event of a 'Shooting war' due to its limited range and armament. Yet during the conflict in Vietnam, in 1965-67, USAF Starfighters performed admirably in battles such as Operation Bolo, where seven North Vietnamese MiGs were destroyed without the loss of a single US fighter. The capabilities of the Starfighter were so impressive that no fewer than six NATO countries adopted it, followed by Japan, Taiwan, Turkey, Jordan and Pakistan. This book details the design and development history of this small, tough and fast fighter, and journeys through its operational history to offer the complete, definitive combat guide to the 'Missile with a Man in it'
2022.406.006	F-105 Thunderchief Mig Killers of the Vietnam War	Davies, Peter E.	"Despite its 'F-for-fighter' designation, the F-105 was designed and purchased to give the USAF an aircraft capable

Object ID	Title	Author	Summary
			of the delivery of nuclear weapons at very high speed, long range and below-the-radar altitudes. However, when the Vietnam War began it also emerged as USAF's best available tactical bomber for a 'limited conventional' war as well. Extensively targeted by MiG-17s and MiG-21s the F-105 pilots developed innovative tactics that allowed them to compete in air-to-air duels with their smaller, more maneuverable enemies. Illustrated throughout with extensive photographs detailing weapon loads, internal features and action shots of actual engagements, this volume examines the conduct of the Rolling Thunder strike missions and the tactics used for attack and defence by the attack, escort fighter and radar monitoring elements within strike formations."--Publisher description
2022.406.007	F4U Corsair : Combat, Development, and Racing History of the Corsair	Veronico, Nicholas A.	F4U Corsair is a superb new history of the design, development, combat record, and air-racing career of the F4U Corsair and all its variants. Through first-person interviews with dozens of Corsair test pilots, combat pilots, ground-crew members, and air-race pilots, the authors take you along on hair-raising combat missions over Japan and Korea and onto the race courses at Cleveland and Reno. These veterans opened their personal photo archives for this book, contributing dozens of never-before-published color and black-and-white photos of their Corsairs, their fellow crews, and themselves. This combination of first-person anecdotes and history on the Corsair is unequalled in any other book. (from back cover)
2022.406.008	Mantle of Command, The : FDR at War, 1941-1942	Hamilton, Nigel	Based on years of archival research and interviews with the last surviving Roosevelt aides and family members, The Mantle of Command offers a radical new perspective on

Object ID	Title	Author	Summary
			Franklin Delano Roosevelt's masterful—and underappreciated—leadership of the Allied war effort. After the disaster of Pearl Harbor, we see Roosevelt devising a global strategy that will defeat Hitler and the Japanese, rescue Churchill and the British people, and quell a near insurrection of his own American generals and War Department. All the while, Hamilton's account drives toward Operation Torch—the invasion of French Northwest Africa—and the outcome of the war hangs in the balance. The Mantle of Command is an intimate, sweeping look at a great president in history's greatest conflict.
2022.406.009	US Navy Aircraft Carriers 1942-45 : WWII-built Ships	Stille, Mark	Aircraft carriers were the US Navy's principal weapon against Japan during the Pacific War. Development of the Essex class began in 1939, becoming the largest class of carrier ever to be built. Early in the Pacific War it became renowned for its 'Sunday Punch' of 36 fighter planes, 36 dive bombers, and 18 torpedo planes. Alongside the lighter Independence class, these carriers formed the formidable Fast Carrier Force in the Pacific. Featuring artwork detailing the interior and exterior features of the ships, this book explores their design, development, and the action they saw in the Pacific, including the climactic battles of Philippine Sea, Leyte Gulf, and Okinawa. Contents Origins · Development · Chronology · The Essex Class · The Independence Class · Bibliography · Color Plate Commentary · Index Paperback; February 2007; 48 pages; ISBN: 9781846030376 (from ospreypublishing.com)

2022.406.012	Midway Campaign, The, December 7, 1971- June 6, 1942	Greene, Jack	A history of WWII in the Pacific beginning with the Japanese, American, and Commonwealth situations prior to Pearl Harbor. Includes chapters on the major battles up to and including The Battle of Midway. Chapter X describes "The Early Carrier Raids". Jack Greene's gripping narrative begins with detailed maps of American dispositions at Pearl Harbor and the Japanese plan of attack. Similar maps and charts bring exceptional clarity to the campaigns in the Philippines and Malaya, the early carrier raids, the battle of the Coral Sea, and the battle of Midway itself. Detailed charts graphically illustrate the composition of air, land, and naval units of both sides at each stage of the conflict. Readers will find detailed descriptions of weapons, tactics, and the units involved, including previously unavailable Japanese material. Greene never loses sight of the grand strategic picture, offering an insightful examination of Japan's aims, assumptions, strengths, and weaknesses, as well as a thought-provoking analysis of the Pacific Ocean as a single grand battlefield.
2022.406.013	Hunters in the Sky : Fighter Aces of WWII	Whelan, James R.	Hunters in the Sky: Fighter Aces of WWII is all about the chase, the hunt, and the kill told through personal interviews with the men who flew the machines and created the legends. The aces tell their tales of fighter pilots, killed, wounded, and missing in action. And they reveal how only the best-and luckiest-survive. Introduction by

2022.406.014	Supersonic Cowboys	Knott, Ron	Supersonic Cowboys is a book of heroes; in fact, more than forty heroes are listed here. And there are many, many more. The heroes in Supersonic Cowboys were not just a hero for a day, or a one-time event hero, but they were heroes almost every day, day-in and day-out, for months at a time for our country. Supersonic Cowboys is not a Hollywood story made up to appease the masses, but it is full of true life courageous stories, conveyed by the heroic pilot about his life and near-death daring experiences. His script was literally written in his own blood, sweat, and tears, no matter if he was on active duty or in one of the Reserve Squadrons. Injury and death made no distinction between the two groups. You will read in Supersonic Cowboys reports of pilots ejecting from their crippled aircraft, crashing on land, boat, and sea, being shot down by the enemy, taken captive as POWs, saving airplanes that have experienced many major malfunctions, and yet they were usually flying again within a few hours if they have not sustained long term injuries. That takes real guts as the old saying goes. Herein are true tales of real people who overcame fear with courage and valor. These are a very special group of Fighter Pilots.
2022.406.015	Blue Angels : View from the Cockpit	Herbert, Frank	From the jacket: "For 48 years the U.S. Navy's BLUE ANGELS have thrilled millions with their legendary precision and incomparable aerial artistry. 2022.416.001	War Planes of the Second World War, Volume 3: Fighters	Green, William	War Planes of the Second World War, Volume 3: Fighters by William Greene with drawings by Dennis I. Punnett. A comprehensive illustrated history of the WW II war planes of Japan, The Netherlands, Poland, Rumania, and the Soviet Union.
2022.416.002	War Planes of the Second World War, Volume 4: Fighters	Green, William	War Planes of the Second World War, Volume 4: Fighters by William Greene with drawings by Dennis I. Punnett. A comprehensive illustrated history of the WW II war planes of Yugoslavia and the United States.
2022.416.003	British Battleships and Aircraft Carriers	Lenton, H. Trevor	From Amazon - This compact handbook presents a unique and very comprehensive description of all British capital ships

Object ID	Title	Author	Summary
			and aircraft carriers which took part in the Second World War. Special attention has been given to wartime alterations, and the information compiled is the result of many years of research of official records and other sources. The text contains considerable notes on design background for each class of vessel, and the scope has been widened to embrace seaplane carriers and merchant aircraft carriers as well, of which the latter merit inclusion on the originality of concept alone.
2022.416.004	British Cruisers	Lenton, H. Trevor	From Amazon - A reference on the design and World War II modifications for British Cruisers that were employed or projected in the war. It contains nothing on the service history of these ships,
2022.416.005	British Submarines	Lenton, H. Trevor	From Amazon - The volume describes each class of British sub that fought in the Second World War, lists each ship built in each class, and the fate of each ship. In other words, this book gives the hardware of British subs in World War II.
2022.416.006	Wolf Pack : The American Submarine Strategy that Helped Defeat Japan	Smith, Steven Trent	From Amazon - Wolf Pack traces the development of one of the most effective naval strategies employed by the American fleet in World War II. Steven Trent Smith recounts the behind-the-scenes struggles of the visionary U.S. naval commanders who sought to adapt the highly effective strategy of using coordinated submarine attack groups, or "wolf-packs," first pioneered by the German Navy to devastating effect. Smith provides vivid profiles of the major players involved and clearly explains the important technology involved. Working from survivor accounts and government documents, he recounts, in scenes packed with nail-biting undersea action, some of the most hair-raising wolf pack operations in both the European and Asian theatres of war.
2022.416.007	Gunboat! Small Ships at War	Perrett, Bryan	The thirteen remarkable episodes of gunboat action

Object ID	Title	Author	Summary
			recalled here by Bryan Perrett echo the great days of Imperial rule. Gunboats saw service across the world, and the events described include conflicts in China, the Crimea, the Mississippi, the Persian Gulf, East Africa and more, stretching from 1824 to the dramatic escape or the Amethyst down the Yangtze in 1949.
2022.416.008	United States Navy, The	Carrison, Daniel J.	THE UNITED STATES NAVY by Captain Daniel J. Carrison, USN(Ret.) with Acknowledgments, Preface and Contents of XII Chapters from the Tradition to Missions, Organization, the Navy's Functional Forces, Aviation, Nuclear Propulsion, Space, the Navy and Congress, the Viet-Nam War and continuing problems and issues and tomorrow's Navy with Appendix 1: U. S. Naval Districts, Appendix II Navy Career Opportunities , Bibliography and Index with black & white photographs. This is the story of the history, organization and operations of the Navy and its role in national defense and support of foreign policy. The New Navy describes astronauts in outer space, deep-sea divers exploring the Continental Shelf and the Navy's exploration and research of inner space as well as costs and strategies on how best to use ship, submarines, aircraft missiles and conventional weapons.
2022.416.009	Lonely Ships, The : The Life and Death of the US Asiatic Fleet	Hoyt, Edwin P.	This sweeping history is more than a story of resounding naval victories and devastating defeats. It is a story of men --- their courage and frailties, their heroism and bull-headed stubbornness. It is the story of individuals who gave their lives for their country and those others who used their command of service to further their own personal ends. Set against the exotic tapestry of Oriental life and custom, it is a rousing adventure of lonely ships encountering hostile forces, and young American sailors and officers exploring the dark

			including rare Italian photographs, selection of specially commissioned cutaway drawings, and a separate set of large scale plans for modelmakers of the British X-Craft and the German Seebund midget submarines.
2022.417.001	Top Gun : An American Story	Pedersen, Dan	On the 50th anniversary of the creation of Topgun, the Navy Fighter Weapons School, its founder shares the remarkable inside story of how he and eight other risk-takers revolutionized the art of aerial combat.
2022.417.002	Honoring Freedom in America	USS Midway Museum	From the inside cover: This DVD highlights the activities that took place on April 30th, 2010, onboard the USS Midway Museum to commemorate the 35th Anniversary of the Fall of the Republic of Vietnam and to honor the same anniversary of Operation Frequent Wind. On this day the Museum embodied vision-to be America's Living Symbol of Freedom-becoming a rallying point for thousands of former Vietnamese refugees who have found security, peace and opportunity in their new homeland, the United States of America. The Museum set a new attendance record,-a testament to the strong ties between the Midway Museum and the Vietnamese community. The new Operation Frequent Wind Exhibit displays a replica of the Cessna "Bird Dog" piloted by Lt. Colonel Bung Ly who along with his wife and five children successfully landed on the USS Midway on April 30, 1975.
2022.417.003	Twenty-three Minutes to Eternity : The Final Voyage of the Escort Carrier U.S.S. Liscome Bay	Noles, James L., Jr.	The loss of the USS Liscome Bay came on her first combat operation: the American invasion of the Gilbert Islands. Despite her short career, she touched a number of remarkable and famous lives. Doris Miller, the first black American sailor to win the Navy Cross, lost his life, as did Rear Admiral Henry Mullinax, one of the Navy's first "air admirals". The authors account of the Liscome Bay and those

			who served aboard her is based on interviews with the ship's survivors and an unpublished memoir that the ship's pay officer made available.
2022.417.004	Death Mist, The : Faith Centered Memoir of a Navy Combat Pilot in Vietnam	Fischer, Alan G.	Memoir of a Navy pilot of the Vietnam War era who flew A-6 Intruders off the USS Saratoga in the early 1970s. The author of this self-published book is a USS Midway Museum volunteer.
2022.417.005	Aircraft Carrier Command	Booth, Peter B.	Commanding any warship takes the finest sense of knowledge, experience and leadership. A carrier, even more so given that only about eight are ready for sea out of our eleven nuclear powered carries; each represents an irreplaceable national asset. In some 300 pages, this book lays out the basics of command in a brief first section, followed by a host of bold-faced pragmatics in running an incredibly complex operation. This is followed by a detailed analysis of two-dozen case histories of groundings, fires and collisions with no holds barred. Finally, are some 100 pages of command commentary by 24 seasoned carrier and combatant former commanding officers-- how about 150 years of sea-command? This latter section is the meat of the book and one that any ship captain, flag officer or future OOD is invited to study, dissect, agree, disagree or modify, for absolutes in command are few and far between. Great reader comments. The second edition was published in 2013 featuring a sixty-page appendix with a great foreword by the head of Naval Aviation, VADM David Buss. Included are five more case studies of maritime miscues that ought not to have happened, led by the infamous hot-dogging master of the Costa Concordia. And finally, are additional inputs from more recent carrier COs and three former super CAGs. Several pages of unbelievable reader comments are tacked on to the final pages of the new

Object ID	Title	Author	Summary
			edition. The book has found its way into the inner sanctums of all of our carriers, including use at the Surface Warfare School in Newport. The most repetitive comment by former carrier commanding officers is along the lines of "I wish I had had something like this back
2022.417.006	Not on My Watch : The Odyssey of David Kelly From College Student to Naval Aviator and His Exploits as an Attack Pilot flying the A-6 Intruder from the USS Midway During the Vietnam War	Kelly, David	This is a memoir of David "Snako" Kelly's personal experiences in Naval Aviation (carrier aviation), and his short but intense involvement in the Air War over Vietnam. He was deployed with VA-115 A-rabs on the USS Midway from 1971 to 1973. Former USS Midway crew member.
2022.417.007	Choppers : Thunder in the Sky	Genat, Robert	"'Choppers' recounts the development of helicopter technology and the people who made it possible. Also included are descriptions of how the helicopter flied, explorations of the many different fields in which helicopters are indispensable today and detailed technical descriptions of many of the most famous helicopters." From inside the front cover jacket.
2022.417.008	Just Call Me Frank! : Memories of a Navy Jet Pilot	Hamrick, Frank	Captain Frank Hamrick rose through the ranks, testing and flying 19 different types of transition aircraft for the Navy, names like Panther, Cougar, Fury, Crusader, Marauder, and Vigilante. Flying in the 50's, 60's, and 70's, he caught the leading edge of military jet aviation, and pioneered new ways of approaching aviation safety. Often going head to head with senior officers, and with lessons learned the "hard way." he survived 135 combat missions over North Vietnam as a reconnaissance pilot, flying the almighty RA-5C Vigilante.
2022.417.009	Helicopter, The : History, Piloting, & How it Flies	Fay, John	From the inside front cover: "The book covers the subject in four main sections: first, the various type of rotor-craft are defined, and the behaviour of the aircraft and its rotors under different conditions are explained; second, the techniques of piloting and the problems that face the

			trainee; the third section traces the helicopter's history from the ancient Chinese to the present day, including the X Wing Project, and the final section outlines avionic systems as they affect the helicopter, from automatic pilots, control systems, instruments and navigation system to flight management and deicing systems."
2022.417.010	True Faith and Allegiance	Booth, Peter B.	Journals of a Naval Officer ? Three decades of the Cold War. Destroyers, Navy fighter pilot, aircraft carrier command, nuclear black book, Pentagon flashbacks and thousands of real sailors and naval aviators doing the tough job at sea 24/7 during the most perilous years in the history of our country.
2022.417.011	Wonderful Flying Machines : A History of U.S. Coast Guard Helicopters	Beard, Barrett Thomas	The story of the helicopter and its creator, Igor Sikorsky, and chief promoter, a young Coast Guard lieutenant named Frank Erickson, closely parallels that of Wilbur and Orville Wright and their first flying machine. Like that famous brother team, these courageous visionaries risked their lives and careers on a dream. Dubbed "Igor's Nightmare" in the early days of its development, the helicopter brought derision and ridicule on its supporters. Few who saw the contraption, with it flailing rotors and staccato motion, could be convinced that it was the momentous achievement it would one day be considered. This book clearly demonstrates the problems encountered by the personalities involved and their strengths in developing the helicopter for Coast Guard use. It shows how Erickson and his friend and mentor, Coast Guard captain William Kossler, undaunted by their lack of support, fought with single-minded intensity to establish the helicopter as a vital rescue tool in the service. Kossler died while the project was still in its infancy. Erickson left the service in disgrace but lived to see his efforts succeed when the helicopter revolutionized search-and-rescue operations.

Object ID	Title	Author	Summary
2022.417.012	San Diego : Air Capital of the West	Scott, Mary L.	This book is lavishly illustrated with over 300 vintage and modern photographs from the archival collection of the San Diego Aerospace Museum. San Diego, "Air Capital of the West" is rich with historical aviation milestones: from earliest flight of seaplaners, to parachute jumps by an American woman, Tiny Broadwick; to regular first scheduled year round passenger service in the country; and home port of the first aircraft carrier to the USS Langley, etc.
2022.417.013	Once a Jock...Always a Jock!! : Three Hundred Stories by the First Postwar Generation of Naval Aviators 1945 to 1975.	Rogers, Earl and Mantz, Roy (eds.)	From Amazon: "Once a Jock . . . Always a Jock!!" is a compilation of three hundred stories written by the first postwar generation of Naval Aviators who began their training in late 1945 as teenagers fresh out of high school. A 16-week Pre-Flight school started the clock running on a two-year contract where each future Navy pilot held the rank of Aviation Midshipman, USN. The clock was still running when they earned their gold wings and were assigned to fleet squadrons. These Flying Midshipmen flew every aircraft in the Navy's arsenal. Eventually they were sworn in as commissioned officers and went on to participate in every major aviation event from the Berlin Airlift, the Korean War, and the Cold War, to the conflict in Vietnam. A reader of these stories will discover what motivated 3,000 high school kids to fly for the Navy. They will learn what it was like to be a Flying Midshipman at the bottom of the pecking order aboard ship or as a pilot in an aircraft squadron. Today's young pilots will gain some useful knowledge about training mishaps and accidents that could have been avoided. They will be thrilled by accounts of My First Corsair Flight or My First Jet Flight or My First Cat Shot. They might reflect on the sobering story of Jesse Brown, the African-American who broke the

Object ID	Title	Author	Summary
			color barrier in Naval Aviation the same year that Jackie Robinson broke the color barrier in major league baseball. Those who have flown as civilian or military pilots will discover themselves in the narrow escapes and the humor in the aftermath of bad judgment, and above all, in their great love of flying. They will learn what it is like landing a battle damaged fighter on an aircraft carrier in bad weather or guiding a blinded pilot to successful wheels-up landing. Reading these stories, veteran flyers may remember the long monotonous anti-submarine and maritime patrols that ended in moments of stark terror. Anyone who has ever sat in the left seat of a flying boat may be surprised to know that seaplane pilots had to supplement their flying skills with a firm knowledge of seamanship. They can read about it in Recollections of an Old PBM Pilot. Of course the book has stories for helicopter jocks and transport pilots and instrument pilots flying in all kinds of weather from the arctic to the tropics. For the poetry minded, there are some of those too. These stories should appeal to anyone who has ever dreamed about flying. And most important, 100% of the profits are directed to the Flying Midshipmen Endowment Fund to support the Youth Aviation Training Program aboard the USS Midway Museum in San Diego.

2022.417.015	Forgotten Fleet : The Mothball Navy	Madsen, Daniel	A pictorial history of the U.S. Navy's mothball fleet, this handsome book takes a rare look at the so-called fleet behind the fleet, from the end of World War II to the present. Through photographs of the ships and shipyards where they were laid up and brief ship histories, it tells the story of how these ships were paid off and preserved, how some were reactivated, and how most left the reserve fleet to be broken up. Additional photos of the ships in action remind readers that forgotten though they were while in mothballs, many made their marks on history. Year after year the warships lay quiet and lifeless, like boarded up old houses once full of activity that had outlived their usefulness. The row upon row of mostly now-anonymous vessels, hatches sealed shut, offer a bleak contrast to the drama of their wartime operations. You can almost hear the wind whistling through the masts and superstructures stripped of radars. Below decks there is only the sound of the dehumidifiers, removing moisture from the air, retarding the buildup of rust and deterioration. Berthing areas, repair shops and radio rooms have been frozen in time, looking exactly as they did when sealed decades before. Among them are such well-known ships as the Enterprise and the Midway, as well as little-known ones like the Fall River, and some that were laid up almost as soon as they were completed, like the Oregon City. Here too are the frigates and nuclear submarines of a

Object ID	Title	Author	Summary
			descriptions of visual landing aids, command relationships, a compendium of LSO-related policies and responsibilities, pilot and LSO training requirements and qualifications, descriptions of visual landing aids, and LSO procedures for recovering fixed-wing aircraft aboard CV and CVN-class ships.
2023.301.013	Wings of Gold	Weintraub, Beverly	This is the story of the first women naval aviators and their struggles and triumphs as they earned their Wings of Gold, learned to fly increasingly sophisticated jet fighters and helicopters, mastered aircraft carrier landings, served at sea, and reached heights of command that would have been unthinkable less than a generation before. It is also the story of the legacy they left behind (From: Library of Congress) From Amazon - On Feb. 2, 2019, the skies over Maynardville, Tennessee, filled with the roar of four F/A-18F Super Hornets streaking overhead in close formation. In each aircraft were two young female flyers, executing the first all-woman Missing Man Formation flyover in Navy history in memory of Captain Rosemary Mariner — groundbreaking Navy jet pilot, inspiring commander, determined and dedicated leader — whose drive to ensure the United States military had its choice of the best America had to offer, both men and women, broke down barriers and opened doors for female aviators wanting to serve their country.
2023.301.014	Anchor, The -- Company 61-357	George, Charlie C. (ed.)	'Yearbook' for Company 61-357 of the Naval Recruit Training Center at San Diego, CA. Contains history and description of activities conducted at the training center with a section on the particular graduating class.

Object ID	Title	Author	Summary
			necessarily incomplete. Only a fraction of the United States Navy's tremendous expansion can be detailed. Items of common knowledge have been treated briefly or omitted; information not readily available to our enemies has been excluded. All data beyond that given in older editions of the booklet is based on officially released documents and matter appearing in the public prints. Prior to publication the entire contents were submitted to and examined by the proper naval authorities. The standard naval nomenclature is used throughout these pages. In addition to their type symbols each vessel and all aircraft on the Navy List have distinctive serial numbers. Serial numbers assigned since late 1941 are classed as restricted information; few have been released. Many older vessels have been reclassified. Some designations and numbers given here no longer apply. Through the body of the booklet war losses are indicated by crosses, including those announced in Navy Communique No. 515 dated March 31, 1944. A list of losses appears on page 79. (From Foreword page.)

2023.302.002	Rolling Thunder 1965-1968 : Johnson's Air War over Vietnam	Hallion, Richard P.	From the publisher Operation Rolling Thunder was the campaign that was meant to keep South Vietnam secure, and dissuade the North from arming and supplying the Viet Cong. It pitted the world's strongest air forces against the MiGs and missiles of a small Soviet client state. But the US airmen who flew Rolling Thunder missions were crippled by a badly thought-out strategy, rampant political interference in operational matters, and aircraft optimised for Cold War nuclear strikes rather than conventional warfare. Ironically, Rolling Thunder was one of the most influential episodes of the Cold War - its failure spurring the 1970s US renaissance in professionalism, fighter design, and combat pilot training. Dr Richard P. Hallion, one of America's most eminent air power experts, explains how Rolling Thunder was conceived and fought, and why it became shorthand for how not to fight an air campaign.
2023.302.003	F4U Corsair VS A6M Zero-	Claringbould, Michael John	Whilst the F4U Corsair

Object ID	Title	Author	Summary
	Sen: Rabaul and the Solomons, 1943-44		eventually proved to be a superior fighter in Pacific operations, its introduction into combat in this theatre initially demonstrated its weaknesses. Indeed, the 'Saint Valentine's Day Massacre' debacle showcased exemplary Zero-sen fighter tactics, and American losses were of sufficient magnitude that further daylight missions toward Bougainville were discontinued until Allied fighter tactics could be improved. As a result, for the next two months the Corsair's combat results were much subdued. Indeed, the F4U only became a superb fighter when both its pilots and their commanders worked out how to deploy the gull-wing design effectively. Optimum circumstances for effective engagement did not always occur, and the Zero-sen remained effective against the Corsair until February 1944 in the South Pacific, after which all IJNAF fighter units vacated Rabaul. This book closely examines these two different fighters in the Solomons/Rabaul theatre, and the unique geographic conditions which shaped their deployment and effectiveness. It contains rare photographs and digital artwork that accurately showcases and aligns combats of both types in-theatre with unprecedented accuracy. Both sides vastly over-claimed. With full access to IJNAF and US Navy/US Marine Corps records, these numbers will be presented accurately

2023.302.004	US Navy Ships VS US Japanese Attack Aircraft, 1941-1942	Stille, Mark	The striking power of the Imperial Japanese Navy's carrier --based attack aircraft was established at Pearl Harbor, and the IJN's carrier--based torpedo- and dive--bombers showed their prowess again at the Battle of Coral Sea when they sank the US Navy carrier USS Lexington and damaged the carrier USS Yorktown. Even at the disastrous Battle of Midway, the relatively small number of IJNAF attack- and

Object ID	Title	Author	Summary
			torpedo-bombers that were launched against the US fleet proved that they remained a potent force by heavily damaging Yorktown again, which allowed an IJN submarine to sink the carrier. At Guadalcanal, IJNAF carrier-based aircraft sank the carrier USS Hornet and badly damaged USS Enterprise twice. However, throughout 1942, US Navy ship defences brought down an increasing number of attacking IJNAF aircraft. The final major battle of the year, the Battle of Santa Cruz, exacted crippling losses on the IJN, setting the stage for the eclipse of the IJNAF's highly trained and effective aviation attack forces. Packed with illustrations and contemporary photographs, this engrossing volume details the design, tactics, and operational records of both the US Navy ships and the IJNAF aircraft which attacked them over the year following Pearl Harbor.
2023.302.005	Intruders (The)	Coonts, Stephen	In the sequel to The Flight of the Intruder, ace Navy pilot Jake Grafton faces a tough new challenge as a peacetime warrior in 1973 when he is assigned the task of teaching a group of inexperienced Marine pilots the art of carrier aviation.
2023.302.006	F6F Hellcat, Phillipines 1944	Young, Edward M.	From Amazon Joining combat in the Pacific in late 1943, the Hellcat squadrons soon demonstrated their ascendancy over their Japanese opponents, culminating in the great "Marianas Turkey Shoot" during the Battle of the Philippine Sea in June 1944. The fighter proved to be a dream for pilots to fly, allowing both novice and veteran Naval Aviators alike to prevail in largescale aerial combats. From October 1944 to January 1945, the Fast Carriers supported General MacArthur's invasion of the Philippines. Featuring specially commissioned armament views and battlescenes, this book covers the key role played by

Object ID	Title	Author	Summary
			Naval Aviators flying the Hellcat into action during the Fast Carrier Task Force's strikes against the Philippines in September and October 1944. Using maps, contemporary photographs, and technical diagrams, the volume examines the highly effective tactics used to prevail against large enemy formations, and reveals the training that underpinned the success enjoyed by the Naval Aviators and their Hellcats. The key combat actions are vividly described through 3D ribbon diagrams providing a step-by-step depiction of the main dogfights featured in the book, as well as action reports, both from previously unknown pilots and from more famous Hellcat aces.
2023.302.007	A-6 Intruder Units 1974-96	Morgan, Rick	In the three decades following Vietnam, the veteran A-6 Intruder remained the most powerful strike aircraft available to the U.S. Navy and Marine Corps. Engaged in operations over Cambodia, Lebanon and Libya during the 1970s and 80s, the A-6 maintained its reputation as the "main battery" of carrier aviation, remaining in service through the First Gulf War up until 1996 when its duties were taken over by the F-14 Tomcat. Filled with first-hand accounts from pilots and navigators, as well as profile artwork and photographs, this is the complete story of the U.S. Navy's main medium attack aircraft in the latter part of the Cold War
2023.302.008	Black Lion One : TOPGUN Trailblazer	Auten, Donald E.	From Amazon: This historical biography of John Monroe "Hawk" Smith, Navy fighter pilot, is a gripping account of valor, sacrifice, and adventure during one of the most tumultuous periods in carrier aviation. It was no surprise when Hawk, having completed a stunning tour as commanding officer of TOPGUN, received orders to a frontline F-14 Tomcat squadron—VF-213, the "Black Lions." Hawk joined the

Object ID	Title	Author	Summary
			Black Lions prior to their March 1979 deployment. Several critical factors portended to a most arduous workup period and deployment—there were issues lurking. But Hawk was a man who did not shy away from a challenge. Soon, the Lions would have opportunities to show their colors. These included the first-ever Fighter Derby at NAS Miramar, California—the "World Cup" for naval fighter squadrons, and Constant Peg, a highly classified "Black Program" that exposed aircrews to the capabilities of Soviet fighters. Aviation enthusiasts and historians will be captivated by the historical fidelity and descriptive air combat engagements, amused by the perpetual mirth of TACAIR aviators, and inspired by lessons of leadership that
2023.302.009	Batmen : Night Air Group 90 in World War II	MacGlashing, John W.	Until late 1942, the Japanese owned the night skies of the Pacific. In October 1942 a USN Lt. Cdr. named Bill Martin planted the seed that would see the development of American night carrier operations. In August 1944, the first USN nocturnal Air Group - NAG 90 under the command of now-Cdr. Bill Martin - was established to pioneer this new form on aerial warfare. BATMEN, written by NAG 90 vet John MacGlashing, documents the history of that legendary unit. Assigned to USS Enterprise, NAG 90 went to war equipped with radar-equipped Grumman Avengers and Hellcats. NAG 90 would fly both offensive and defensive ops during the war, eventually being credited with 42 e/a destroyed in the air and numerous targets destroyed or damaged on the ground or at sea. The cost of pioneering this new form of warfare was high, some 40-odd pilots and aircrew being KIA from NAG 90's assigned units, VF(N)-90 and VT(N)-90.

Object ID	Title	Author	Summary
			BATMEN is a marvelous, insightful and well-illustrated account of NAG 90 in action. Along with utilizing various official records and reminiscences from NAG 90 vets, MacGlashing offers his own, personal memories of wartime life on board Enterprise.
2023.302.010	USS Enterprise (CV-6) : The "Big E" from the Doolittle Raid, Midway, and Santa Cruz to Guadalcanal and Leyte	Doyle, David	From Google: Though it barely missed being caught and destroyed at Pearl Harbor on December 7, 1941, the US Navy's USS Enterprise (CV-6) aircraft carrier took part in every major action of the Pacific War, from the Doolittle Raid to the battles of Midway, Santa Cruz, and Guadalcanal to the Philippine Sea and Leyte. Affectionately known as the "Big E," as well as the "fightingest ship in the Navy," the Enterprise racked up one of the most impressive tallies of damage to the enemy of any Allied warship during WWII. This book explores Enterprise's design and construction, wartime activities, and ultimate postwar decommissioning and scrapping through carefully researched photos, many of which have never before been published. The clarity and large size of many of the photos, coupled with descriptive and informative captions, put the reader on the deck of this historic warship throughout its famed history.
2023.302.011	From the Prarie to the Pacific : A Blue Angel's Journey	Rud, Gil	From Amazon: From the Prairie to the Pacific is the story of one man's journey from rural North Dakota to the cockpits of U.S. Navy jet fighters and ultimately Captain of a flagship aircraft carrier. Gil Rud flew combat missions over Vietnam in A-7 Corsair II aircraft before taking command of his own squadron. His success as a Naval aviator led to the ultimate reward - "Boss" of the world-famous Blue Angels aerobatic display team, overseeing their successful transition to the F/A-18 Hornet. Gil Rud reflects

Object ID	Title	Author	Summary
			on his experiences and emotions as a husband and father as well as a pilot and an "officer and a gentleman." His stories of triumph and tragedy, from nights on the flight deck to nights on the town and the loss of close friends, reveal deep feelings, great insight and a wonderful sense of humor, as well as meticulous attention to detail.
2023.302.012	Sea Pay	Dorgan, Bob	From Amazon: Educated at Valley Forge Military Academy, Dorgan is well prepared for life in the US Navy when he is forward deployed halfway around the world to the USS Midway. But he soon learns life aboard an aircraft carrier can be full of danger and chaos as the ship nicknamed the "USS Never Dock" undertakes an emergency Indian Ocean deployment to relieve the crippled aircraft carrier USS Ranger in 1979 and becomes activated as the first carrier battle group "on station" in the Arabian Sea following the fall of the US embassy in Iran later that same year.
2023.302.013	F3D/EF-10 Skyknight Units of the Korean and Vietnam Wars	Copalman, Joe	From Amazon: The Douglas F3D Skyknight was an early but effective attempt at combining new technologies together in a lethal package capable of shipboard operation. Whereas most fighters relied on speed and maneuverability, the portly, straight-winged F3D relied on three radars, four 20mm cannon, and -- most importantly -- darkness. Having first flown in March 1948, the Skyknight's first taste of war came in September 1952, when Marine Night Fighter Squadron 513 [VMF(N)-513] deployed to Korea. The most important job assigned to VMF(N)-513 was the escorting of USAF B-29 bombers over northern Korea. Whereas Chinese and North Korean MiG-15s relied on ground-controlled intercept radar for steering guidance into firing positions, the F3D, with its own onboard radars, was

Object ID	Title	Author	Summary
			autonomously lethal – it could detect, track, and target MiGs all on its own. Skyknight crews ended the Korean War with six nocturnal kills in exchange for one combat loss. After the war, 35 Skyknights were converted into electronic warfare (EW) aircraft. As US air operations over North Vietnam intensified in early 1965, the need for a tactical EW jet to provide electronic countermeasures (ECM) protection to accompany strike packages north became apparent. For all of its early effectiveness over North Vietnam, the proliferation of radar-guided guns and missiles began to erode the advantage created by EF-10 escort support, which flew its last combat mission in October 1969. This highly illustrated volume explores the F3D Skyknights and their deployment during the Korean and Vietnam wars, using first-hand accounts from aircrew, original photographs, and 30 profile artworks to explore their key roles as an escort aircraft and electronic warfare aircraft.
2023.302.014	Marine Mitchells in World War II	Scitts. Jerry	Chapter One-Training and Initial Combat Chapter Two-More Squandrons Chapter Three-VMB-612 in the Central Pacific Chapter Four-Diary
2023.302.015	USS Hornet (CV-8) : From the Doolittle Raid and Midway to Santa Cruz	Doyle, David	From Amazon: USS Hornet (CV-8), made famous through its launching of the 16 US Army B-25 Mitchell bombers flown by Jimmy Doolittle's raiders in the first US strike on Japan in May 1942, was the third and last Yorktown-class aircraft carrier completed. Serving the US Navy for just over one year, the warship had a brief yet heroic life. This volume explores Hornet's construction, wartime activities (including the Battle of Midway), and ultimate sinking during the Battle of Santa Cruz in October 1942,

Object ID	Title	Author	Summary
			through carefully researched photos, many of which have never before been published, which are reproduced in remarkable clarity. This clarity and the large size of many of the photos, coupled with descriptive and informative captions, put the reader on the deck of this historic warship throughout its short history. Part of the Legends of Warfare series.
2023.302.016	AD and A-1 Skyraider	Doyle, David	From Amazon: Design work on the Skyraider began at the behest of the US Navy late in WWII. Production began in 1946, and the type made its combat debut in the hands of naval aviators during the Korean War. In the following years, the rugged airframe and powerful engine meant that the type could be adapted into ever-expanding roles of attack, reconnaissance, weather, and electronic-countermeasure types. Though regarded by many as obsolete, in Vietnam the Skyraider again saw combat, now in the hands of not only US Navy and Marine pilots, but also USAF and Republic of Vietnam airmen. Capable of flying low and slow while armed with a massive array of ordnance, the Skyraider not only took on the role of attack aircraft but was also used as air cover for troops on the ground. Its impressive payload earned it the nickname of the "flying dump truck," while its reliance on a massive radial engine in an otherwise jet age caused others to refer to the Skyraider as the "Spad," in homage to the WWI fighter.
2023.302.017	A-6 Intruder : Grumann's All-Weather Indictor from Vietnam to the Persian Gulf	Brown, David F.	The Grumman A-6 Intruder was the US Navy and Marine Corps' primary carrier-based, all-weather attack aircraft from 1963 to 1997. Famous for its combat missions in Vietnam and the 1991–92 Gulf War—as well as the novel and movie Flight of the Intruder—the A-6 was capable of carrying both conventional and nuclear weapons. This book covers the A-6 from concept, design,

Object ID	Title	Author	Summary
			and construction in the late 1950s, through its fleet service beginning in 1963, up to its retirement and display status in museums around the country. Every A-6 USN and USMC squadron is covered through superb photography, including aircraft markings and unit insignias.
2023.302.018	Vought A-7 Corsair II	Garretson, Mat	Library of Congress: Born of necessity during the Vietnam War, the Vought A-7 Corsair II ushered in a level of lethality, target accuracy, and economy not realized in any plane before it, and, arguably, any that followed. Originally designed as a "bomb truck," the A-7 would, with the assistance (and insistence) of the US Air Force, realise its full potential. It was the first combat aircraft to feature a heads-up display (HUD) - an incredibly accurate, integrated navigation/weapons computer - and a host of other innovations like fly-by-wire and forward-looking infrared (FLIR) cameras; abilities today's combat pilot takes for granted. This book tells the story of the A-7 from design and development to combat deployment from Vietnam to its last use in Operation Desert Storm. Its multiple variants are discussed along with its use by the US Navy and Air Force, as well as overseas with the air forces of Greece and Portugal
2023.302.019	Wildcats Over Casablanca	Wordell, M. T.	From Amazon: This sixtieth-anniversary edition of the 1943 classic returns to print the exciting story of a U.S. Navy fighter squadron during the invasion of French North Africa in World War II. Lieutenants Wordell and Seiler, with the help of journalist Keith Ayling, vividly recount the exploits of their fellow aviators, who flew the sturdy Grumman F4F "Wildcat" from the deck of the USS Ranger (censors would not allow the authors to use the ship's name in the original edition), as well as the carrier's bomber and scouting squadrons. They cover not

Object ID	Title	Author	Summary
			only the aerial operations but also the myriad problems that confronted the Navy during its first wartime use of carriers to support an amphibious landing. Among these was the need to protect civilians and cultural sites, particularly mosques."Mac" Wordell, who commanded the squadron-the "Red Rippers"- was shot down and taken prisoner by the Vichy French. His explanation of what went on in the minds of the amiable French officers and men who held him captive is still intriguing and at the time was revealing to Americans confused by the political-military events in North Africa after the surrender of France to Germany in 1940. Ed Seiler, one of Wordell's top fliers, narrates the story from the attackers' side. Together they provide a spectacular account of cooperation and aerial daring. Brassey's reprint edition includes photographs of the main characters, their aircraft, their enemies, the American and French ships involved, and scenes from the North African theater of war.
2023.302.020	Soryu, Hiryu, & Unryu-Class Aircraft Carriers	Ahlberg, Lars,	From Amazon; This book covers the design and construction of the two well-known Soryu and Hiryu carriers, and the lesser-known ships of the Unryu class, and relies on original Japanese source material, including numerous photos, drawings, and specifications. How and why the Japanese designed and constructed the WWII-era, medium-sized Soryu, Hiryu, and Unryu-class aircraft carriers, and how they were operated, is covered in detail. The Imperial Japanese Navy planned the construction of 45 aircraft carriers from 1918 to 1943 and commissioned 25 of them between 1922 and 1944. These types were large, medium, and small aircraft carriers, with some converted from other warship classes, and escort aircraft carriers remodeled from passenger

Object ID	Title	Author	Summary
			ships. The medium type presented here formed the majority, with a total of 18 planned: five were completed, three remained in various completion stages at the end of the Pacific War, and ten were eventually canceled.
2023.302.021	USS Saratoga (CV-3)	Doyle, David	From Amazon: USS Saratoga and her sister ship USS Lexington were the two largest aircraft carriers in the world until 1944. The keel of the battle cruiser USS Saratoga (CC-3) was laid by New York Shipbuilding in Camden, New Jersey, on September 25, 1920. Work on the fast, formidably armed battle cruiser was suspended in February 1922, when the Washington Naval Conference negotiated limits on warship sizes and numbers. Once the accord was signed, the decision was made to covert the 28 percent complete Saratoga into an aircraft carrier (the same fate befell her sister ship, Lexington). Launched as an aircraft carrier on April 7, 1925, she became the largest ship of that type afloat. Saratoga's revolutionary turboelectric drive and hull design allowed her to operate at 33 knots (either forward or backward), a trait believed to be useful in the event of combat damage to either end of her flight deck. And damaged she was. Though in port at San Diego, California, when the Japanese attacked Pearl Harbor, during the ensuing war the ship was damaged repeatedly, and sometimes severely. Despite this, she fought throughout the war, earning eight battle stars. Following the war, in view of her age, past damage, and the limitations of her design, Saratoga was deemed surplus and was expended as a target during the Bikini Atoll nuclear tests. She survived the first "Able" bomb test but was sunk by the "Baker" test on July 25, 1946. This 144-page volume, an expansion of the author's earlier work, immerses the reader in

Object ID	Title	Author	Summary
			the construction and operation of the ship at peace and war, as well as detailing the many refits and repairs she underwent, through over 350 photos and illustrations.
2023.302.022	Valor and Courage : The Story of the USS Block Island Escort Carriers in World War II	Hruska, Benjamin J.	From Amazon: "In Valor and Courage, Dr. Benjamin Hruska tackles a daunting task—the full story of two WWII escort aircraft carriers bearing the same name. Thus, 'Fighting Block Island' became a byword for the 'baby flattops' that fought Germany in the Atlantic and Japan in the Pacific. But far more than ships and aircraft, Valor and Courage properly focuses on the men of both vessels who remain an inspiration for their current heirs operating nuclear-powered descendants and supersonic jets." —Barrett Tillman, author of On Wave and Wing: The 100-Year Quest to Perfect the Aircraft Carrier
2023.302.023	Sustaining the Carrier War : The Development of Naval Aviation in the Pacific.	Fisher, Stan	"The ability of the United States Navy to fight and win a protracted war in the Pacific was not solely the result of technology, tactics, or leadership. Naval aviation maintenance played a major role in the U.S. victory over Japan in the second World War. The naval war against Japan did not achieve sustained success until enough aircraft technicians were available to support the high tempo of aviation operations that fast carrier task force doctrine demanded. When the United States realized war was imminent and ordered a drastic increase in the size of its aviation fleet, the Navy was forced to reconsider its earlier practices and develop new policies in maintenance, supply, and technical training. Not only did a shortage of technicians plague the Navy, but the scarcity of aviation supply and repair facilities in the Pacific soon caused panic in Washington. While the surface navy's modernization of at-sea replenishment was beneficial, it did not solve the problems of

Object ID	Title	Author	Summary
			sustaining war-time aircraft readiness levels sufficient to a winning a naval air war. Fisher outlines the drastic institutional changes that accompanied an increase in aviation maintenance personnel from fewer than 10,000 to nearly 250,000 bluejackets, the complete restructuring of the naval aviation technical educational system, and the development of a highly skilled labor force. The first comprehensive study on the importance of aircraft maintenance and the aircraft technician in the age of the aircraft carrier, Sustaining the Carrier War, provides the missing link to our understanding of Great Power conflict at sea."-- Provided by publisher.
2023.302.024	Air War in Vietnam, The	Weaver, Michael E.	"An examination of the effectiveness of American air power--air superiority, aerial refueling, airlift, close air support, reconnaissance, and coercion & interdiction--during the Vietnam War"-- Provided by publisher. 2023.302.025	Midway Submerged : An Analysis of American and Japanese Submarine Operations at the Battle of Midway, June 1942.	Allen, Mark W	An Analysis of American and Japanese Submarine Operations at the Battle of Midway, June 1942. This book presents detailed arguments regarding the tactics employed in the US strategy for the Battle of Midway and effectively argues that submarine warfare played a greater role in the battle's outcome than previously thought.
2023.302.026	H6K "Mavis"/H8K "Emily" VS PB4Y-1/2 Liberator/Privateer Pacific Theater 1943-45	Young, Edward M.	From the Publisher: An illustrated exploration of the dramatic aerial combats between the US Navy's long-range bomber and Japanese flying boats in the Pacific War. Edward M. Young explores these rarely written about combats, examining the aggressive and strategic tactics deployed by both US Navy and Imperial Japanese Navy Air Force and analyzing the technical improvements installed throughout the war. The PB4Y-1/2 Liberator/Privateer was the US Navy's first four-engined, land- based bomber, adapted and allocated to fight the U-boat menace in the Atlantic and protect the vast reaches of the Pacific Ocean. The long range, speed, armament and bomb load of the PB4Y-1 enabled the US Navy's Pacific squadrons to adopt more aggressive tactics. The PB4Y-1, and its follow-on PB4Y-2, engaged in dangerous bombing missions against Japanese installations, shipping strikes, and air combat. On the other side, with its doctrine of making the first strike against an enemy fleet, the Imperial Japanese Navy recognized the vital importance of maritime reconnaissance, relying on carrier-based

Object ID	Title	Author	Summary
			reconnaissance aircraft, ship-borne floatplanes and, for long-range maritime patrol, flying boats. The Japanese would continue to develop their aircraft throughout the war, resulting, among others, in the H6K 'Mavis' and the H8K2 'Emily', which despite never achieving a victory, was regarded by the Allied pilots as the most difficult Japanese aircraft to destroy. Enriched with specially commissioned artwork, including armament and cockpit views, battlescenes, and technical diagrams, this title analyzes technical specifications in detail. By including first-hand accounts, aviation expert Edward M. Young provides a detailed account of these one-sided yet dramatic and aggressive combats. Table of Contents (Subject to Confirmation) Introduction Chronology Design and Development Technical Specifications The Strategic Situation The Combatants Combat Statistics and Analysis Aftermath Further Reading Index
2023.302.027	Shokaku-Class Aircraft Carriers in the Imperial Japanese Navy during World War II	Lengerer, Hans	From Amazon: The aircraft carriers of the Shokaku class are generally regarded as being the most-successful carriers designed by the Imperial Japanese Navy. They became operational just prior to the Pearl Harbor attack in December 1941, and their combat records are impressive. Compared with the preceding aircraft carrier designs, they represented a great design leap, combining excellent striking power with good protection. Even by the US Navy these ships were rated highly. During the Pacific War the two ships of the class participated in all carrier battles with the

			firing anti-radiation missiles (ARM), Baldwin takes the reader from the heaving flight deck of the USS Midway to the flak filled skies over Iraq. He uses call signs when referring to his fellow pilots to maintain a sense of the reader is there too-- in the night sky, in the ready room receiving the next mission assignment, and on the deck ready to launch or recover. The tension of combat is counterbalanced by the camaraderie of his squadron mates. Ironclaw refers to the Squadron's call sign. Former USS Midway crew member.
2023.302.032	Dirty Eddie's War	Cook, Lee	"Dirty Eddie's War is the true account of the war-time experiences of Harry Andrew March, Jr., captured by way of diary entries addressed to his beloved wife, Elsa. Nicknamed "Dirty Eddie" by his comrades, he served as a member of four squadrons operating in the South Pacific, frequently under difficult and perilous conditions. Flying initially from aircraft carriers covering the landings at Guadalcanal in August 1942, he was one of the first pilots in the air over the island and then later based at Henderson Field with the "Cactus Air Force." When he returned to combat at Bougainville and the "Hot Box" of Rabaul, the exploits of the new Corsair squadron "Fighting Seventeen" became legendary. Disregarding official regulations, March kept an unauthorized diary recording life onboard aircraft carriers, the brutal campaign and primitive living conditions on Guadalcanal, and the shattering loss of close friends and comrades. He captures the intensity of combat operations over Rabaul and the stresses of overwhelming enemy aerial opposition. Lee Cook presents Dirty Eddie's story through genuine extracts from his diary supplemented with contextual narrative on the war effort. It reveals the personal account of a pilot's innermost thoughts,

2023.302.037	World War II Battle of Midway : A History from Beginning to End	Hourly History	The Japanese attack on Pearl Harbor on December 7, 1941 had dealt a catastrophic blow to the United States Navy, but it had not knocked out all of the U.S. carriers. That was an omission that Admiral Isoroku Yamamoto, Japan's fleet commander, intended to rectify by invading a site close to Pearl Harbor. The surprise attack on Pearl Harbor had worked out well for the Japanese—why not try another one on Midway Island? The plan was to

Object ID	Title	Author	Summary
			destroy the Americans when they launched a counterattack. Japan, then, would rule the Pacific and continue the expansion of its empire. What Yamamoto didn't know was that Japanese fleet codes had been broken and Pacific Fleet Commander Admiral Chester Nimitz, privy to what the Japanese planned to do, was able to place the American carriers where they would catch the Japanese off guard as they prepared to launch air strikes on Midway Island. (From publisher website)
2023.302.038	4-Day Battle of Midway, The	Professor, Baby	The 4-Day Battle of Midway was not as popular as the attack on Pearl Harbor, although the two events were just six months apart. This history book will detail the events of the battle that began on June 4 and last on June 7, 1942. Who were the personalities who greatly influenced the battle 'what are the stories gathered from those four days' Read and learn today! (From WorldCat)
2023.302.039	F-8 Crusader : Vietnam 1963-73	Davies, Peter E.	When the Vietnam War began, the F-8 was already firmly established as a fighter and reconnaissance aircraft. It entered combat as an escort for Alpha strike packages, braving the anti-aircraft artillery and surface-to-air missiles alongside the A-4 Skyhawk bombers and meeting MiGs for the first time on 3 April 1965. Although the Crusader was nicknamed 'last of the gunfighters', its pilots employed 'secondary' AIM-9D Sidewinder missiles in all but one of their MiG kills, with guns also used as back-up in three. Its 20 mm guns were unreliable as they often jammed during strenuous manoeuvres, although they were responsible for damaging a number of MiGs. However, in combat the F-8 had the highest 'exchange ratio' (kills divided by losses) at six-to-one of any US combat aircraft involved in the Vietnam War. Through the copious use of first-hand accounts, highly detailed battlescene artwork, combat

2023.302.048	F4F & FM Wildcat in Detail & Scale	Kinzey, Bert	From Amazon Detail & Scale published volumes on the Grumman Wildcat in 1988 and again in 2000. This new work combines all of the content of those early works into the most detailed book ever published on Grumman's only aircraft to serve on the front lines from the first to the last day of World War II. But F4F & FM Wildcat in Detail & Scale goes far beyond the coverage of those two earlier publications. This new book also includes scores of additional photographs, many of which have never been published, along with over three dozen line drawings and full color aircraft profiles. The text has also been rewritten and greatly expanded.The book begins with a comprehensive developmental and operational history of the Wildcat, and follows that with an all-inclusive chapter on the various U. S. Wildcat variants. Every

Object ID	Title	Author	Summary
			variant of the Wildcat is covered, including the XF4F-2/-3/-4/-5/-6 and -8 prototypes, the single example of the F4F-3S Wildcatfish floatplane, and the F4F-3/-3A/-4/-7 and FM-1/-2 operational variants. Both the French G-36A and the British Martlets & Wildcats each have their own chapters which provide wide-ranging coverage of these two programs. A comprehensive chapter on Wildcat Details, long the hallmark of the Detail & Scale Series of aviation publications, follows. This chapter contains nine sections covering the cockpit, windscreen and canopy, engine and cowling, fuselage, landing gear, wings, armament, external stores, and tail details. Complete coverage of almost every square inch of the various variants of the Wildcat is provided through more than 110 high resolution photographs (69 in full color). These detail photographs are a combination of original Grumman and Navy pictures taken during Wildcat production and photographs of eight different restored Wildcats in various museums across America. The comprehensive details chapter is followed by a new chapter that provides a colorful look at the paint schemes and markings used on Wildcats during their operational service. Changing Navy directives for camouflage treatments and markings are provided that chronicle the history of one of the longest operational periods of any WWII combat aircraft. As with all books in the Detail & Scale Series, the final chapter covers the scale models of the Wildcat, from the early kits that are now only collector's items, to the gamut of kits that have been available for the past half century. The most popular standard modeling scales of 1/144th, 1/72nd, 1/48th, and 1/32nd are treated as separate sections and the available models in each are reviewed. F4F & FM Wildcat

Object ID	Title	Author	Summary
			in Detail & Scale is the most detailed look at the Grumman Wildcat ever produced, and the print edition features 108 pages, more than 245 high resolution photographs, 22 full color profiles and 22 drawings.
2023.302.049	Fighting in the Electromagnetic Spectrum: U.S. Navy and Marine Corps Electronic Warfare Aircraft, Operations, and Equipment	Wildenberg, Thomas	From Amazon: Naval warfare was confined for centuries to surface combat, or undersea clashes. In the twentieth century aerial warfare became the third domain and shortly thereafter, the electromagnetic spectrum also appeared. Until now, little has been written about this important aspect of military conflict on the high seas. In Fighting in the Electromagnetic Spectrum author Thomas Wildenberg provides the first book covering these aircraft, their missions, and the methodology of conducting combat in all its forms along this fourth domain, the electromagnetic spectrum.
2023.302.050	Naval Air: Celebrating a Century of Naval Flying	Kaplan, Philip	From Amazon: Naval aviation arrived early in the last century in the form of balloons and airships employed by the British Royal Navy for reconnaissance, and interest was stirring in naval circles in a greater aeronautical capacity for the service. Britain's tradition of projecting a global reach through her sea power would, in the view of many, be greatly enhanced by such a capability. Among the first advocates of military aircraft development was British naval minister, Winston Churchill.
2023.302.051	TOPGUN: The US Navy Fighter Weapons School: Fifty Years of Excellence	Elward, Brad	From Amazon: This book provides a unique, illustrated history of the US Navy Fighter Weapons School's 50-year history. Currently located at Naval Air Station Fallon, Nevada, TOPGUN was formed in late 1968 at Naval Air Station Miramar, California, to create a graduate-level course in fighter tactics for Navy pilots deploying to Vietnam. Before TOPGUN, Navy F-4 Phantom II fighter crews in Vietnam managed

Object ID	Title	Author	Summary
			only a 2.5:1 kill ratio versus Soviet-built MiG-17 and MiG-21 fighters: after TOPGUN formed, the community tallied a 12.5:1 kill ratio. Since then, TOPGUN has become the standard-bearer of Navy fighter and strike fighter tactics and training and is recognized worldwide as a center of excellence.
2023.302.052	US Naval Aviation1945–2003: Rare Photographs from Naval Archives	Marriott, Leo	From Amazon: A sequel to US Naval Aviation 1989-1945 and covers events from the end of the Second World War to Operation Iraqi Freedom. In this the highly illustrated second volume of his history of US naval aviation, Leo Marriott takes the reader through the extraordinary developments in design and capability that transformed American aircraft and aircraft carriers after the Second World War, and he describes the succession of conflicts in which they were deployed. Increasingly, advanced jets replaced propeller-driven aircraft and nuclearpowered carriers allowed the US Navy to project American military power across the world. As the many remarkable photographs in this book show, wherever naval aviation was involved, it played a crucial role, especially in the wars in Korea and Vietnam.
2023.302.053	U.S. Naval Power in the 21st Century: A New Strategy for Facing the Chinese and Russian Threat	Sadler, Brent Droste	From Amazon: This nation's Cold War and Global War on Terror defense structures need an update. U.S. Naval Power in the 21st Century provides such a framework for the changed world we live in, offering a detailed roadmap that shows how the United States can field a war-winning fleet that can also compete aggressively in peacetime against dangerous competitors unlike any the nation has faced before. Brent Sadler presents a compelling new strategy and organizing approach that he calls naval statecraft, which acknowledges the centrality and importance of the maritime domain. While

Object ID	Title	Author	Summary
			similar in scale and scope to Cold War containment strategies against the Soviets, naval statecraft is much more. It must be to challenge China's involvement in global supply chains, which gives that country significant financial heft and influence around the world. Unlike what existed during of the Cold War, however, Sadler provides a unique vision for competing with China and Russia. Rather than simply calling for better coordinated U.S. diplomacy, military operations, and economic statecraft, Sadler argues for integrating the levers of national power coherently and in a sustainable way. This is no small feat, and his approach is informed by a long career rich in working with various agencies of government, foreign militaries (including hostile ones), and our allies. It is an approach imminently appropriate to our times but comes with a realization that the nation is not ready for the competition it faces from China and Russia. The book is a valuable contribution to the national debate over how best to respond to China's rise and Russia's antagonisms.
2023.302.054	US Naval Aviation in the 1980s	Symonds, Adrian	The final decade of the Cold War saw unprecedented peacetime expansion of the US Navy, including Naval Aviation. President Reagan's plan for a 600-ship Navy resulted in stepped-up construction of Nimitz class supercarriers and the aircraft to operate from them, including new types like the F/A-18 Hornet. Naval aviation was highly diverse, from carrier-borne F-14 Tomcats to P-3 Orions keeping vigil over the world's oceans, SH-2 Seasprites operating from tiny landing pads on warships in heaving seas, and land-based adversaries playing the opposing force 'bad guys' during training. 2023.302.055	Japanese Combined Fleet 1941–42: The IJN at its zenith, Pearl Harbor to Midway	Stille, Mark	battle groups prepared for confrontation with the Soviets, should the Cold War turn 'hot', they also engaged in combat operations in the Mediterranean and Persian Gulf. Take a step inside the day-to-day operations of Naval Aviation in the 1980s. (From publisher)
			From Amazon: The Imperial Japanese Navy (IJN) entered the Pacific War as one of the most formidable navies in the world, and its combat power was concentrated into one force, the Combined Fleet. In the months that followed Pearl Harbor it enjoyed an unrivaled string of victories, shattering American, British, Australian, and Dutch naval forces. This period of expansion and constant victories ended at the Battle of Midway, after which the Combined Fleet was forced onto the defensive. In this book, Mark Stille draws on his decades of IJN research to explain what made the Combined Fleet the fighting force that it was. Packed with superb original artwork, explanatory 3D diagrams and maps, it examines the fleet's doctrine, innovative tactics and powerful warships. It also details the qualities and importance of IJN leadership, logistics, naval infrastructure, and Japan's shipbuilding capability, and gives an account and analysis of the IJN's combat performance during these crucial months – not just in the famous carrier battles, but also exploring lesser-known elements such as IJN amphibious forces and land-based aviation.
2023.302.056	Documentary History of the Battle of Midway, A : The Official US Combat Reports From the Naval Action Against Japan in June 1942	United States Defense Department	At Midway in 1942, the entire course of the Pacific War was altered in just five minutes. American bombers destroyed three Japanese carriers, and shortly later destroyed the fourth. The devastated Japanese Navy never recovered. This

Object ID	Title	Author	Summary
			book is a collection of official US Navy combat reports from the Battle of Midway, including a Combat Narrative from the Office of Naval Intelligence, Action Reports from the American Admirals Nimitz and Spruance, combat reports from the USS Hornet, USS Enterprise, USS Yorktown and USS Hammann, a summary of the interrogation of a Japanese sailor captured at Midway, and a Pentagon translation of the captured combat report submitted by the Japanese Admiral Nagumo. (From Amazon)
2023.302.057	F4F Wildcat: South Pacific 1942–43	Young, Edward M.	From Amazon: This book examines the role of the Grumman F4F Wildcat, the US Navy's standard carrier fighter at the start of the Pacific War, and its clashes against the Imperial Japanese Naval Air Force's Mitsubishi A6M Zero-sen. The US Navy went to war in December 1941 with the tubby Wildcat, the first of Grumman's famed 'cats', as its principal carrier fighter. Ruggedly built and well armed, the F4F's performance was inferior to the Japanese Zero-sen, yet in the carrier battles of 1942 between the US Navy and the IJN the Wildcat pilots more than held their own against some of the finest naval aviators in the world. Many of the Wildcat pilots that saw action in the South Pacific comprised what respected naval historian John Lundstrom has called the 'First Team' – the small group of highly trained prewar pilots who manned the bulk of the US Navy's carrier fighter squadrons.
2023.302.058	South China Sea 1945: Task Force 38's bold carrier rampage in Formosa, Luzon, and Indochina	Lardas, Mark	From Amazon: A history of the US Navy's remarkable 1945 South China Sea raid against the Japanese, the first time in history that a carrier fleet dared to rampage through coastal waters. As 1945 opened, Japan was fighting defensively everywhere. As the Allies

Object ID	Title	Author	Summary
			drew closer to the Home Islands, risks of Japanese air and sea attack on the US Navy carrier force increased. US forces wanted to take the island of Luzon which provided a base for Japanese aircraft from Formosa (Taiwan) and Indochina, and from where attacks could easily be devastating for the invasion fleet. US Naval Intelligence also believed Japanese battleships Ise and Hyuga were operating out of Cam Ranh Bay. A fast carrier sweep through the South China Sea was a potential answer with the bonus that it would strike the main nautical highway for cargo from Japan's conquests in Southeast Asia.
2023.302.059	Grumman F4F (FM-2) Wildcat Pilot's Flight Operating Instructions	United States Navy	From Amazon: The Grumman F4F Wildcat was the primary Marine Corps and U.S. Navy fighter aircraft during the opening year of WWII. Although the Japanese Zero outperformed it, Wildcat pilots more than held their own during the crucial battles at Coral Sea and Midway. Almost 8,000 Wildcats were built during the war, many of them by General Motors. The G.M. versions, designated FM-1 and later the improved FM-2, entered service after the faster Corsairs and Hellcats were deployed. As a result most FMs flew from escort carriers, most notably during the Battle off Samar where Wildcats helped turn back the Japanese fleet. Originally printed by Grumman and the U.S. Navy, this FM-2 flight operating handbook taught pilots everything they needed to know before entering the cockpit. Once classified "Restricted", the manual was declassified long ago and is here reprinted in book form. This affordable facsimile has been slightly reformatted. Care has been taken to preserve the integrity of the text.
2023.302.060	Douglas SBD Dauntless Pilot's Flight Operating Instructions	United States Navy	From Amazon: The Douglas SBD Dauntless served as the U.S. Navy's front line dive bomber from the

Object ID	Title	Author	Summary
			outbreak of WWII thru 1943.The aircraft proved its mettle at the battles of Coral Sea and Midway, where its crews accounted for four Japanese carriers. The plane also saw action in support of the Marines at Guadalcanal. Their last combat stint was at the Battle of the Philippine Sea in 1944.Originally printed by Douglas and the U.S. Navy during WWII, this SBD-6 flight operating handbook taught pilotseverything they needed to know before entering the cockpit. Originally classified "Restricted", the manual wasdeclassified long ago and is here reprinted in book form. This affordable facsimile has been slightly reformatted and some color images appear in black and white. Care has been taken however to preserve the integrity of the text.
2023.302.061	PT-13/N2S-5 Pilot's Flight Operating Instructions	United States Navy	From Amazon: Stearman's Kaydet biplane first flew in 1934, and in 1935 the U.S. Navy acquired the aircraft for use as trainers. Within a year the U.S. Army Air Corps followed suit, buying 26 of the airplanes from Boeing (which had acquired Stearman in 1934). Designated the "Model 75", the Army dubbed the two-seat plane the PT-13 and the Navy the NS. With war looming on the horizon, the need for trainers became pronounced; orders in 1940 topped 3500 airframes. By conflict's end in 1945, over 10,000 were built. The Kaydets were simple, rugged aircraft equipped with a radial engine,fabric-covered wooden wings, and single-leg landing gear. The fuselage, which was also fabric-covered, was built of steel. Most models were equipped with either the Lycoming R-680 (PT-13) or Continental R-670 (PT-17) engine, producing a top speed of 124 mph with a 505-mile range. A 255-hp model received the designation PT-18.The Kaydet continued to fly in the post-WWII era as a trainer

			and cropduster. Approximately 1,000 "Stearmans" are still in service in the present day. Originally created during WWII by the U.S. Navy and Army Air Forces, this pilot manual was standard issue to all cadets. It is reproduced herein its entirety.
2023.302.062	Grumman TBF / TBM-3 Avenger Pilot's Flight Operating Instructions	United State Navy	From Amazon: One of the most legendary naval aircraft of WWII, the Grumman TBF Avenger (and the General Motors-produced TBM) saw action in most of the major battles in the Pacific including Midway and Leyte Gulf. Armed with a forward machine gun and a second in a dorsal turret, the plane could carry a 21-inch torpedo or four 500-lb. bombs, or a combination thereof. Avengers are credited with sinking the Japanese superbattleships Musashi and Yamato. A young aviator who would later become President, George H.W. Bush flew a TBF off the carrier USS San Jacinto in 1943-44. Originally printed by Grumman, G.M. and the U.S. Navy late in the war, this TBM-3 Flight Operating Handbook taught pilots everything they needed to know before entering the cockpit. Classified "Restricted", the manual was declassified long ago and is here reprinted in book form. This affordable facsimile has been reformatted and color images appear in black and white. Care has been taken however to preserve the integrity of the text.
2023.302.063	Flight Training at the United States Naval Academy	Swygert, Andre J.	The United States Naval Academy was founded in 1845 in Annapolis, Maryland, after experience showed that the policy of training naval officers solely through shipboard experience was ineffective. The development of aircraft in the early 20th century was a technological change that impacted the academy. The efforts of naval aviation advocates, led by Capt. Washington I. Chambers, resulted in the Navy acquiring its first aircraft in 1911 and

Object ID	Title	Author	Summary
			basing them near the US Naval Academy where sufficient land and material resources were available to support flight operations. Later, under Supt. Adm. Louis W. Nulton, aviation entered the curriculum as an element of fundamental naval education, taking a place among major subjects such as seamanship and gunnery. Classroom instruction and indoctrination flights provided all midshipmen with a familiarization in aviation as an important element in their development as naval officers before circumstances forced a shift of training to other facilities by 1962. (From publisher).
2023.302.064	Knife's Edge : South Pacific Carrier Battles from the Eastern Solomons to Santa Cruz	Stern, Robert C.	While the resounding American victory at Midway in June 1942 blunted Japanese momentum to a great extent, it left the opposing forces precariously balanced, particularly in the South Pacific. In Knife's Edge Robert C. Stern provides an account of the Battles of the Eastern Solomons and the Santa Cruz Islands, the two pivotal carrier air battles that followed the initial engagements at the Coral Sea and Midway between the U.S. Navy and the Imperial Japanese Navy. Three U.S. aircraft carriers were sunk or badly damaged over the two months following Midway, including USS Enterprise at the Battle of the Eastern Solomons. Had it not been for the fortuitous arrival of USS Hornet at the end of August, the Americans would have been without an aircraft carrier in the South Pacific until Enterprise returned from repairs on 24 October. At that moment, another major Japanese offensive was afoot, again led by two large carriers, this time supported by another light carrier and a mid-sized merchant-hull conversion. The resulting Battle of the Santa Cruz Islands on 26 October 1942 was a solid tactical victory for the Japanese, who managed to sink Hornet and once

Object ID	Title	Author	Summary
			again damage Enterprise. Stern has written a history of the two final early carrier battles fought between the U.S. Navy and Imperial Japan. These pivotal battles, coming after the triumph of the U.S. at Midway, illustrate lessons learned from these earlier battles of the Pacific War. Readers already familiar with the history of World War II at sea should find this account a riveting new look at a chapter of the Pacific War rarely covered until now. (From Worldcat).
2023.302.065	F3H Demon Pilot's Flight Operating Manual	Chief of the Bureau of Naval Weapons	Designed as a replacement for the U.S. Navy's F2H Banshee, the McDonnell F3H Demon fighter served with the fleet for nearly a decade, including during the Cuban Missile Crisis. Although it could not fly at supersonic speeds, the Demon served admirably as an all-weather interceptor and flew alongside the F8U Crusader and F11F Tiger. Armed with up to four 20mm cannons, the aircraft could also fire Sidewinder and Sparrow missiles. Over 500 Demons were built. The planes were dubbed "The Chair" by pilots due to its high-visibility cockpit, but it was also called the "lead sled" due to its poor power to weight ratio. The Demon was replaced by the F-4 Phantom in 1964. Originally printed by McDonnell and the U.S. Navy, this F3H Demon Pilot's Flight Operating Instruction manual taught pilots everything they needed to know before entering the cockpit. Originally classified "Restricted", the manual was declassified long ago and is here reprinted in book form. 8x10", softbound, full color covers and black and white interior. 155 pages. (Source: periscopefilm.com)
2023.302.067	Douglas TBD-1 Devastator Pilot's Flight Operating Instructions	Douglas Aircraft Company	The first all-metal aircraft in the history of the U.S. Navy, and one of the first

Object ID	Title	Author	Summary
			widely-deployed monoplanes, the Douglas TBD-1 represented a radical advance when it debuted in 1937. Yet by the time the Japanese bombed Pearl Harbor in 1941, the Devastator was considered obsolete. Despite this TBD-1s performed well at the Battle of the Coral Sea, helping sink the Japanese carrier Shoho. Just three months later at Midway however, Devastator pilots were forced to make their attack runs without fighter escort. Only four planes out of 41 survived. Yet, it was not a sacrifice made in vain. The TBD-1s left Japanese fighter patrols in disarray, paving the way for a nearly unopposed attack by Dauntless dive bombers, that resulted in the loss of three Japanese aircraft carriers and a great American victory. Originally printed by Douglas and the U.S. Navy, this manual taught pilots everything they needed to know before entering the cockpit. Classified "Restricted", the manual was declassified and is here reprinted in book form. This affordable facsimile has been reformatted. Care has been taken however to preserve the integrity of the text. Originally published 1937 by the Douglas Aircraft Company, Inc (From back cover.)
2023.302.068	Douglas F4D Skyray Pilot's Flight Operating Instructions	Douglas Aircraft Company	Designed by Ed Heinemann in the late1940s, the Douglas F4D Skyray was a single-engine, delta-wing fighter aircraft. The first prototype, with the underpowered J35 turbojet, flew in 1951. It failed to impress. However, when J40 afterburning turbojets became available, the Skyray was transformed into the world's hottest plane. On

Object ID	Title	Author	Summary
			October 15, 1953, pilot Bob Rahn set a speed record of 728 mph on a 100 km course - a mark that would not be eclipsed for five years. The plane failed to set an altitude record however, due to the J40's erratic operation. Eventually, production models would be equipped with J57 afterburning engines. The troubles with the powerplants resulted in delays with the F4D entering service. When it finally came on line in 1956, it was generally met with enthusiasm. It had wonderful rates of roll and climb, the latter being of some import for its planned missions high-altitude interception. Yet the plane's short range, awkward handling characteristics, and inherent instability made it somewhat ill-suited for carrier use. Although 420 "Fords" were built by 1958, they were withdrawn in 1964. Originally printed by Douglas and the U.S. Navy, this handbook provides a fascinating glimpse inside the cockpit of this incredible plane. The manual was recently declassified and is here reprinted in book form. (From back cover.)

2023.302.069	North American FJ-3 Fury Pilot's Flight Operating Instructions	Chief of the Bureau of Aeronautics	On March 10, 1948, an FJ-1 Fury jet fighter landed aboard the aircraft carrier USS Boxer. The U.S. Navy had officially entered the jet age. Built 180 by North American, the Fury shared a prototype and many characteristics with the Air Force's F-86 Sabre. When the FJ-1's straight wing design -originally indicated to ensure slow speeds for carrier landings- proved unsatisfactory, North American provided the Navy with enhanced F-86Es. Redesignated the FJ-2, the plane flew primarily with the U.S. Marine Corps. An enhanced version,

Object ID	Title	Author	Summary
			the EJ-3 debuted in 1953 and was deployed in late 1954. The plane served in a variety of duties, including as control aircraft for the Navy's Regulus nuclear cruise missile. A version that could carry the new Sidewinder air-to-air missile, dubbed N-3M, appeared in 1956. A new aircraft, known as the H-4, came online beginning in 1955. This final version of the Fury included a redesigned fuselage and wings that enhanced its range, ease of control and speed. The M-4B, a fighter bomber variant, could also carry a nuclear weapon. The Fury remained with the fleet into the early 1960's, and served with the Naval Reserve into the latter part of the decade. Over 1,100 were produced. This FJ-3 Fury pilot's flight operating handbook was originally produced by the U.S. Navy. It has been slightly reformatted but is reproduced here in its entirety. It provides a fascinating view inside the cockpit of one of history's great planes. Part of the Navy's NATOPS series of manuals to standardize procedures to improve combat readiness and achieve substantial reduction in the aircraft accident rate. This book was reprinted from original NATOPS manual with the permission of the U.S. government and details procedures for the FJ-3 Fury aircraft.
2023.302.070	Vought SB2U-3 Vindicator Pilot's Flight Operating Instructions	Bureau of Aeronautics	PeriscopeFilms.com reprint of formerly Restricted, Bureau of Aeronautics publication. WW II forerunner of today's NATOPS manuals, in this case for the SB2U-3 Vindicator. Covers ground only for the concern of the pilot flying the SB2U-3 for the first time. Contains no emergency procedures or in-depth technical data.
2023.302.071	Douglas F3D Skyknight	Chief of the Bureau of	Designed by famed Douglas

Object ID	Title	Author	Summary
	Pilot's Flight Operating	Aeronautics	engineer Ed Heinemann, the F3D Skyknight was a twin-engine night fighter. A product of the early jet era, the F3D was equipped with the J34 turbojet, and boasted a powerful radar system to locate targets in the shadow of midnight. The XF3D-1 test bed first flew in 1948. In total, 265 Skyknights would be in service before production ceased in 1952. The Skyknight had an illustrious combat career for both the Navy and Marine Corps. During the Korean War F3Ds flew as escorts during nighttime raids, and as interdiction aircraft. They downed more enemy planes than any other aircraft in that conflict. Some Skynights continued to fly as test aircraft into the 80s. Originally printed by Douglas and the U.S. Navy, this handbook provides a fascinating glimpse inside the cockpit. The manual was recently declassified. 79 pages, 8.5x11, softbound, b&w interior, color covers. (Source: periscopefilm.com)
2023.302.072	Kaigun: Strategy, Tactics, and Technology in the Imperial Japanese Navy, 1887-1941	Evans, David C. and Peattie, Mark R.	From Amazon: One of the great spectacles of modern naval history is the Imperial Japanese Navy's instrumental role in Japan's rise from an isolationist feudal kingdom to a potent military empire stridently confronting, in 1941, the world's most powerful nation. Years of painstaking research and analysis of previously untapped Japanese-language resources have produced this remarkable study of the navy's dizzying development, tactical triumphs, and humiliating defeat. Unrivalled in its breadth of coverage and attention to detail, this important new history explores the foreign and indigenous influences on the navy's thinking about naval

Object ID	Title	Author	Summary
			warfare and how to plan for it. Focusing primarily on the much-neglected period between the world wars, two widely esteemed historians persuasively explain how the Japanese failed to prepare properly for the war in the Pacific despite an arguable advantage in capability. Maintaining the highest literary standards and supplemented by a dazzling array of charts, diagrams, drawings, and photographs, this landmark work provides much important information not available in any other English-language source. Consciously avoiding the Eurocentric bias of conventional military scholarship, David Evans and Mark Peattie make a unique contribution to naval historiography that will be prized by serious historians and casual readers alike and that promises to spark debate within the academic community Includes bibliographical references (pages 611-634) and index Introduction -- Creating a modern navy : 1868-1894 -- First success : the evolution of Japanese naval tactics and the Sino-Japanese War, 1894-1895 - - Preparing for battle : Japanese naval technology and doctrine, 1895-1904 -- Travail and triumph : the Japanese navy and the Russo-Japanese War, 1904-1905 -- Stato Tetsutaro : the contradictions of Japanese naval strategy, 1908-1911 -- Toward an eight-eight fleet : the Japanese navy's plans for expansion, 1905-1922 -- "Using a few to conquer many" : the Japanese navy from the beginning of the treaty era to the first London Naval Conference, 1923-1930 -- "Outranging" the enemy : the Japanese navy from the first London Naval Conference to the end of the treaty era, 1930-1936 -- To strike from the sky : Japanese naval aviation, 1920-1941 -- The battle of the

2023.302.073	P-3 Orion Pilot's Flight Operating Instructions V.1	United State Navy	From Amazon: The U.S. Navy's front line, land-based maritime patrol aircraft, the Lockheed P-3 Orion is a highly capable anti-submarine warfare platform. Conceived as a replacement for the P-2 Neptune and P-5 Marlin, the P-3 first flew in 1961. It was loosely based on the design of the Lockheed L-188 Electra passenger aircraft. Equipped with four Allison T56 turboprop engines, the P-3 has the speed of a fast propeller-powered fighter and a range of nearly 2,400 nautical miles. It can remain on station at 1500 feet for three hours with a range of 1,300 nm. The aircraft typically carries a crew of three pilots, two naval flight officers, two flight engineers, three sensor operators and a technician. Armament typically includes up to 20,000 pounds of missiles including the AGM-84 Harpoon, AGM-84E SLAM, AGM-84H/K and AGM-65F Maverick. The P-3 has provided reliable service to the U.S. and other navies including Germany, Japan, Canada, and South Korea. In addition to Cold War submarine tracking, its missions have included enforcing the blockade of Cuba during the 1962 crisis, coastal patrols in the Vietnam War, and targeting of Iraqi naval elements during the Gulf War. Over several decades of service, the P-3 has received several major updates, and more than forty variants have been developed. It is expected to

Object ID	Title	Author	Summary
			remain in service for the U.S. Navy until at least 2013 when the P-8 Poseidon begins deployment. This P-3 Orion pilot's manual was originally "restricted". It has been declassified and has now been reprinted in books form.
2023.302.074	P-3 Orion Pilot's Flight Operating Instructions V.2	United State Navy	From Amazon: Please note: this is volume two of a two volume set. You must review both books to have a complete manual. The U.S. Navy's front line, land-based maritime patrol aircraft, the Lockheed P-3 Orion is a highly capable anti-submarine warfare platform. Conceived as a replacement for the P-2 Neptune and P-5 Marlin, the P-3 first flew in 1961. It was loosely based on the design of the L-188 Electra passenger aircraft. Equipped with four Allison T56 turbo-prop engines, the P-3 has the speed of a fast propeller-powered fighter and a range of nearly 2,400 nautical miles. It can remain on station at 1500 feet for three hours with a range of 1,300 nm. The aircraft typically carries three pilots and a crew of eight. Armament capacity is up to 20,000 pounds and can include the AGM-84 Harpoon, AGM-84E SLAM, AGM-84H/K and AGM-65F Maverick. The P-3 has provided reliable service to the U.S. and its allies. In addition to Cold War submarine tracking, its missions have included enforcing the blockade of Cuba during the 1962 crisis, coastal patrols in the Vietnam War, and targeting of Iraqi naval elements during the Gulf War. Over the decades the P-3 has received several major up-dates, and more than forty variants have been developed. It is expected to remain in service for the U.S. Navy until at least 2013 when the P-8 Poseidon begins deployment. This pilot's manual was originally created by Lockheed and the U.S. Navy. It has been declassified and is here made available in book form.

Object ID	Title	Author	Summary
			exciting places to work. Carrier aviation is the most demanding of all human endeavors. Naval Aviation Excellence provides a global journey into the world of pilots, engineers, mechanics and experimental flight testing. It is full of humor , adventure and honors the lives of tragically lost comrades. The odyssey starts at NASA but quickly spreads globally after flight school. Aircraft featured include the F/A-18 Super Hornet, the F-14 Tomcat and the A-6E Intruder along with the aircraft carriers USS Midway and USS Kitty Hawk. Naval Aviation Excellence is a memoir that provides unforgettable glimpses into the world of military aviation that sustains global peace, 24/7. (From Amazon.com) Chapter 5, devoted to the USS Midway, can be found starting on page 64.
2023.303.001	Dogfight Over Tokyo	Wukovits, John F.	"From an expert in the Pacific theater of World War II comes the tragic story of the pilots who fought the last fight of the war during the first hour of peace. When Billy Hobbs and his fellow Hellcat aviators from Air Group 88 lifted off from the venerable Navy carrier USS Yorktown early on the morning of August 15, 1945, they had no idea they were about to carry out the final air mission of World War II. Two hours later, Yorktown received word from Admiral Nimitz that the war had ended and that all offensive operations should cease. As they were turning back, twenty Japanese planes suddenly dove from the sky above them and began a ferocious attack. Four American pilots never returned--men who had lifted off from the carrier in wartime but were shot down during peacetime. Drawing on participant letters, diaries, and interviews, newspaper and radio accounts, and previously untapped archival records, historian and prolific author of acclaimed Pacific theater books, including Tin Can Titans and Hell from

Object ID	Title	Author	Summary
			the Heavens, John Wukovits tells the story of Air Group 88's pilots and crew through their eyes. Dogfight over Tokyo is written in the same riveting, edge-of-your-seat style that has made Wukovits's previous books so successful. This is a stirring, one-of-a-kind tale of naval encounters and the last dogfight of the war--a story that is both inspirational and tragic."--Jacket flap (Library of Congress).
2023.303.002	Holding the Line : The Naval Air Campaign in Korea	Cleaver, Thomas McKelvey	This book tells the full story of the US Navy and Marine Corps' war in Korea from the first day of the war to the last, not only chronicling the front-line action, but also describing the technical development of aircraft and shiboard operations, and how these all affected the broader strategic situation on the Korean Peninsula. Chapter 1: Climb Angels Two-Five - Buster!Chapter 2: The Revolt of the AdmiralsChapter 3: Forging a New SwordChapter 4: Naval Aviation Saves ItselfChapter 5: Defeat LoomsChapter 6: InchonChapter 7: A Whole New WarChapter 8: DisasterChapter 9: Holding the LineChapter 10: The Battle of Carlson' s Canyon and the Hwachon DamChapter 11: Weekend WarriorsChapter 12: Operation StrangleChapter 13: "Death Valley"Chapter 14: Who Owns the Night?Chapter 15: The CherokeeChapter 16: The West CoastChapter 17: The Marine WarChapter 18: The End in SightChapter 19: The War
2023.303.003	John Paul Jones : Sailor, Hero, Father of the American Navy	Thomas, Evan	The New York Times bestseller from master biographer Evan Thomas brings to life the tumultuous story of the father of the American Navy. John Paul Jones, at sea and in the heat of the battle, was the great American hero of the Age of Sail. He was to history what Patrick O'Brian's Jack Aubrey and C.S. Forester's Horatio Hornblower are to fiction. Ruthless, indomitable, clever;

Object ID	Title	Author	Summary
			he vowed to sail, as he put it, "in harm's way." Evan Thomas's minute-by-minute re-creation of the bloodbath between Jones's Bonhomme Richard and the British man-of-war Serapis off the coast of England on an autumn night in 1779 is as gripping a sea battle as can be found in any novel. Drawing on Jones's correspondence with some of the most significant figures of the American Revolution—John Adams, Benjamin Franklin, Thomas Jefferson—Thomas's biography teaches us that it took fighters as well as thinkers, men driven by dreams of personal glory as well as high-minded principle, to break free of the past and start a new world. Jones's spirit was classically American. (from Amazon.com)
2023.303.004	American Sniper : The Autobiography of the Most Lethal Sniper in U.S. Military History	Kyle, Chris	A member of Navy SEAL Team 3 describes his life as a father and husband, and as the serviceman with the most confirmed sniper kills in the U.S. military's history, in a memorial edition filled with remembrances from family and friends. (From: Library of Congress)
2023.303.005	Military in San Diego, The	McGaugh, Scott	No city is as proud of its military heritage as San Diego, known as "Navy Town, USA." Congress also has designated San Diego as "the Birthplace of Naval Aviation." However, its community fabric reflects a more diverse and tightly woven relationship with our nation's defense. Over the past century, the city has invented and then reinvented itself in response to shifting world affairs and national priorities. It began with a successful campaign to become a West Coast Navy base in the early 1900s. By the 1930s, military aircraft manufacturing drove economic development. After explosive growth in World War II, San Diego emerged as an established military metropolis. At the dawn of the Cold War,

Object ID	Title	Author	Summary
			San Diego recast itself as a home for Cold War research and development and defense contractors. Today, San Diego is an internationally renowned defense science and technology development center, a city in which one in four jobs and fully 50 percent of regional domestic product are defense related. Like no other city in America, San Diego has grown from a remote military presidio outpost to become a preeminent Pacific powerhouse. (From publisher)
2023.304.001	Neptune's Inferno : The U.S. Navy at Guadalcanal	Hornfischer, James D.	Draws on interviews with veterans and primary sources to present a narrative account of the pivotal World War II campaign, chronicling the three-month effort to gain control of Guadalcanal as a battle that taught the U.S. Navy and Marines new approaches to warfare. (from LOC Catalog)
2023.306.001	Searching for the Truth: The Battle of Midway	Walsh, George	How elements of the United States Navy withheld the truth about the Battle of Midway long after it mattered.
2023.307.001	Heritage of Wings, A : An Illustrated History of Naval Aviation	Knott, Richard C.	After a decade of research, naval aviator, author, and editor Richard Knott traces the difficult integration of a suspect new invention into the hidebound battleship navy, its hard-won acceptance in battle, and its momentous role in world events. His landmark study is filled with the latest scholarship on everything from flying boats and airships to the deciding role of carriers in the Pacific during World War II, from the conversion to jets and limited conflicts during the Cold War to debates about naval aviation's current and future roles in close air support, joint operations, and in space. The USS Midway is listed in the index on 10 pages, and Midway-class has 6 listings.
2023.307.002	Blue Angels : 50 Years of Precision Flight	Veronico, Nicholas A.	Blue Angels: 50 years of Precision Flight, takes you along in the cockpit as you follow the team through 50 years of airshow history. 2023.307.003	War in the Air 1914-45	Murray, Williamson	photographs and numerous interviews with members past and present. Almost as soon as airplanes were invented, military strategists realized their potential. As early as the First World War planes served as scouts, fighters, and bombers--and by World War II all the advanced states had large military air forces dedicated to bombardment. Starting with the less-than-perfect aircraft that flew over Europe in 1915, which caused countless deaths, see how technology developed between the wars; the early campaigns of WWII; air battles on the Eastern front; the defeat of the Luftwaffe; and sky combat in the Pacific.
2023.307.004	San Diego and Honolulu: A PhotoJournal through a Sailor's Eye, 1920-1943	McHenry, Petei	From Amazon: This hardcover coffee table book contains a collection of black and white photographs of San Diego, California and Honolulu, Hawaii, taken from 1920 to 1943. The photos have been faithfully reproduced without alteration to preserve their unique historic value. Included are magnificent shots of the cities and their attractions as well as behind-the-scenes shots of military life and personnel, land, air and sea vessels.
2023.307.005	Landing Ship, Tank (LST) 1942-2002	Rottman, Gordon L.	The Landing Ship Tank (LST) is one of the most famous of the many World War II amphibious warfare ships. Capable of discharging its cargo directly on to shore and extracting itself, the LST provided the backbone of all Allied landings between 1943 and 1945, notably during the D-Day invasion. Through its history, the LST saw service from late 1942 until late 2002, when the US Navy decommissioned the USS Frederick (LST-1184), the last ship of its type. This book reveals the development and use of the LST, including its excellence beyond its initial design expectations.
2023.307.006	U.S.S. Seawolf: Submarine Raider of the Pacific	Frank, Gerold; Horan, James D.; and Eckberg, Joseph	From Amazon: The USS Seawolf was one of

Object ID	Title	Author	Summary
			the greatest submarine raiders of all time. Having narrowly avoided the attack on Pearl Harbor the Seawolf set out for the seas of the Pacific to wreak havoc on Japanese shipping. Joseph Melvin Eckberg was on the Seawolf from her maiden voyage and remained with her until January 1943. As chief radioman he was instrumental in assisting Captain Frederick Warder to find and destroy enemy targets. From the claustrophobia of being trapped under water and the overwhelming fear of depth charges to the joys of aiding the war-effort and the camaraderie on the ship, Eckberg's account, told to the authors Gerold Frank and James Horan, gives remarkable insight into submarine warfare of the Second World War. "It is a narrative straight as a sword, from which emerges the story of how that happy marriage of courage and skill was achieved which made our submarines more than any other group the fleet that won the war." The Saturday Review, Fletcher Pratt. "The successes of the Seawolf bear testimony to the effectiveness of single-purposeness and teamwork." Jonas H. Ingram, U. S. Navy Commander-in-Chief. Gerold Frank and James Horan were professional authors who wrote down Eckberg's story after meeting him on a slow train between New York City and New London, Connecticut, in August 1943. U.S.S. Seawolf: Submarine Raider of the Pacific was first published in 1945. Frank went on to become a prominent ghostwriter and passed away in 1998. Horan, author of more than forty books, died in 1981. Eckberg died four years

Object ID	Title	Author	Summary
2023.309.001	Rising Sun, Falling Skies : Disastrous Java Sea Campaign of World War II, The	Cox, Jeferey R.	before him in 1977. In the immediate aftermath of Pearl Harbor, the Japanese juggernaut quickly racked up victory after victory. Desperate to secure resource-rich regions in the Pacific and ensure their continued dominance of South East Asia, Japanese forces were determined in their efforts to conquer Malaya, Singapore and the oil-rich islands around Java Sea - Borneo, Sumatra and Java itself. In the face of this seemingly unstoppable tide stood a small Allied force - American, Australian, British and Dutch. Thrown together by circumstance; cut off from reinforcements or in many cases retreat; operating with old, obsolete equipment and dwindling supplies, there was little hope of victory. Indeed, the month-long Java Sea Campaign, as it subsequently became known, quickly evolved from a traditional test of arms into a test of character. In the face of a relentless enemy and outnumbered, outgunned and alone, they defiantly held on, attempting to buy weeks, days, even hours until a better line of defense - and offense - could be established. These were the men of the US Asiatic Fleet, the British Far Eastern Fleet, the Royal Netherlands Navy's East Indies Squadron and the Royal Australian Navy. And their supporting units like Patrol Wing Ten, the Royal Netherlands Naval Air Service, the US Army Air Force's 17th Pursuit Squadron and submarines of all these fine nations. A campaign that has been too often either ignored by historians or criticised for poor command decisions, this is the story of the sailors and the airmen at the sharp end, and how they fought and endured the first months of the War in the Pacific.
2023.309.002	Reluctant Raiders, The : The Story of United States Navy Bombing Squadron VB/VPB- 109 in World War II	Carey, Alan C.	The Reluctant Raiders is perhaps the most documented and researched book on a United States Navy land-

			based squadron flying the PB4Y-1 Liberator and PB4Y-2 Privateer. The final result of five years of research, the book traces the squadron's history from its commissioning in August 1943, to the final days of World War II, including: never before published combat and nose art photography; the squadron's tactical organization; a chronology of each combat aircrew's mission record; personnel killed in action; and an appendix containing Japanese shipping and aircraft destroyed or damaged by the squadron. (from Inside front cover)
2023.309.003	Just How It Was	Blagg, Jim	From the back cover: Built in 1939, the SS Donald McKay was acquired by the Navy and commissioned in April 1941. Renamed the Polaris, it made five round trips to Reykjavik, Iceland, and then she moved to the Caribbean Sea. In 1944, Polaris made three trips to Algeria. As WWII ended, Polaris moved to the Pacific Islands. Polaris was decommissioned 18 January 1946, and reacquired by the Navy on 6 October 1948. The ship was re-commissioned in 1949 to serve in the Korean Conflict from 1951 to 1954. This record-setting provision stores ship transferred 116.10 tons per hour while on underway replenishment. She was decommissioned 12 January 1957.
2023.309.004	USS David R. Ray (DD-971) - WESTPAC -1979-1980	Kentner, Curtis (ed)	A pictorial account of the USS David R. Ray (DD-971) Sprucance-class destroyer's 1979 to 1980 WESTPAC cruise. Ports of call included Pearl Harbor, Guam, Japan, South Korea, The Phillapeans, Diego Garcia, Sri Lanka, and Hong Kong,
2023.309.005	Carrier Clash : The Invasion of Guadalcanal and the Battle of the Eastern Solomons, August 1942	Hammel, Eric	Beginning with a detailed historical description of the aircraft carrier, the development of carrier-air tactics, the training of carrier pilots, and the numerous operational considerations that impacted carrier-based aerial combat,

Object ID	Title	Author	Summary
			this book takes the reader into the air with intrepid U.S. Navy fighter pilots as they defend their ships and the Guadalcanal invasion fleet against determined Japanese attacks of August 7 and 8, 1942. After the stage has been set for the August 24 battle, the reader takes off again, this time in the cockpits of the U.S. Navy Dauntless dive-bombers as they attack the Japanese light aircraft carrier Ryujo, which is hit with their 500-pound bombs. Meanwhile, Wildcat fighter pilots valorously defend the American aircraft carriers against a determined onslaught of Japanese Val dive-bombers. Hammel's account of bomb hits on the USS Enterprise and the heroic firefighting and rescue efforts of her crew is especially compelling.
2023.309.006	Aircraft Treasures of Silver Hill, The : The Behind-the-Scenes Workshop of Our Nation's Air Museums	Boyne, Walter J.	This book is the story of some of the most interesting aircraft of our time, and of the unusual facility where the best aircraft restoration work in the world is done. There are 228 photographs illustrating the famous planes that are discussed. Silver Hill, now known as the Paul E. Garber Restoration, Preservation and Storage Facility of the national Air and Space Museum, has long been a magnet for the true aircraft buff. A crew of twenty-eight master craftsmen guards and painstakingly restores the treasures.
2023.309.007	At Close Quarters : PT Boats in the United States Navy	Bulkley, Robert Johns	From Amazon: "The thorough and competent account herein of over-all PT boat operations in World War II, compiled by Captain Robert Bulkley, Jr. a distinguished PT boat commander, should prove of wide interest. The widest use of the sea, integrated fully into our national strength, is as important to America in the age of nuclear power and space travel as in those stirring days of the birth of the Republic." President John Fitzgerald Kennedy Robert Johns Bulkley (1880 – 1965) was a United

Object ID	Title	Author	Summary
			States Democratic Party politician from Ohio. He served in the United States House of Representatives, and in the United States Senate from 1930 until 1939. A graduate of Harvard University for undergraduate studies and law school, Bulkley commenced the practice of law in Cleveland, Ohio in 1906. Bulkley served two terms in the House from 1911-1915 from the 21st District on Cleveland's East Side. During World War One he served as chief of the legal section of the War Industries Board. He was later elected to the U.S. Senate in 1930 to fill the vacancy created by the death of Theodore E. Burton. Bulkley was re-elected in 1932, but lost a bid for a second full term in 1938 to Robert A. Taft. After his term in the Senate ended, he resumed his practice of law. Foreword by President John F. Kennedy
2023.309.008	All the Factors of Victory : Admiral Joseph Mason Reeves and the Origins of Carrier Airpower	Wildenberg, Thomas	From the back cover: Adm. Joseph Mason Reeves (1872–1948) took command of the U.S. Navy's nascent carrier arm during a critical period, transforming it from a small auxiliary command in support of the battle line into a powerful strike force. Until the carrier commanders of World War II proved their mettle, Reeves's expertise in the use of the aircraft carrier in naval tactics was unequaled. All the Factors of Victory is the first full-length biography of this eminent naval officer. About the Author Thomas Wildenberg held consecutive appointments to the Ramsey Fellowship in Naval Aviation History at the National Air and Space Museum in Washington, D.C. He is the author of Destined for Glory: Dive Bombing, Midway, and the Evolution of Carrier Airpower. He lives in the Washington, D.C., area.
2023.309.009	No Easy Days : The Incredible Drama of Naval Aviation	Keeney, Douglas	This book is a pictorial presentation of mishaps in carrier flight operations. The

Object ID	Title	Author	Summary
			picture history includes carrier types such as the straight-deck designs of World War II vintage, and several of the modern angled-deck versions. Aircraft types include the TBM Avenger, the AD Skyraider, the F9F Panther, the F-14 Tomcat, the F4U Corsair, F6F hellcat, and many more. Pages 36-37 show photos of the USS Midway damage after the collision with the Panamanian freighter, the Cactus. Pages 98-99 show a 1984 ramp strike by an A-7E Corsair attempting to recover on USS Midway. There is also a video in our collection with the same title "No Easy Days."
2023.309.010	USS Midway (CV-41) - The Magic Touch - 1985-87	Thornton, Jon (ed.)	A pictorial account of the life of the USS Midway that covers a period from mid-1985 to about April 87. Operations included a deployment to Indian Ocean as Battle Group Alfa JUL to SEP 85. Exercises included Team Spirit 85-86, Inferno Creek, Annualex w/JMSDF, Multiplex and ASWEX. A significant maintenance period, EISRA '86, took place April to November 86 and included preps for the F/A-18 Hornet. The last A-4's and A-7's departed Midway in March 86. Port visits included Fremantle, Subic Bay, Hong Kong, Pattaya Beach, and Sasebo. Carrier Air Wing Five was embarked for the I.O. deployment and underway portions of the period when aircraft were aboard.
2023.309.012	USS Columbus (CG-12) - 1964-65	None Stated	A pictorial account of the guided missile cruiser USS Columbus (CG-12) yearbook for its 1964-65 cruise to Hawaii and ten other ports of call in the far east.
2023.309.013	Wings Over the Sea : A History of Naval Aviation	Wragg, David	This book includes the story of the formation of naval air arms, the development of the float plane and the flying boat, and the battles and innovations of World War I, which saw the birth of the aircraft carrier.
2023.309.014	Sweetwater Gunslinger 201: A Saga of Carrier Pilots Who Live by Chance, Love by Choice	LaBarge, William H.	Few books have touched the subject of what happens on the Flight Decks of aircraft carriers. It has been documented that

Object ID	Title	Author	Summary
			these surfaces are the most dangerous places in the world to work. Thousands of carrier pilots and other Flight Deck personnel will attest to this. They have lost friends on these decks---men who were in the prime of their lives.

2023.309.019	Gulf Air War Debrief : Described by the Pilots That Fought	Morse, Stan (ed)	This book reveals the whole air story from first alert to final victory. With numerous interviews, tables, kill lists, ordnance analyses, maps, diagrams, contemporary Gulf color photographs and personal snapshots, this unique air war is captured.
2023.309.020	One Hundred Years of Sea Power : The U.S. Navy, 1890-1990	Baer, George W.	Winner of the Theodore Roosevelt and Franklin D. Roosevelt Naval History Prize and the Bonnot Award for Naval History, this powerfully argued and objective history of the modern US Navy explains how the Navy defined its purpose in the century after 1890. It relates in detail how, over the years, the Navy formed and reformed its doctrine of

Object ID	Title	Author	Summary
			naval force and operations around a concept of offensive sea control by a battleship fleet, and, new to America, the need to build and maintain an offensive battle fleet in peacetime. The author shows how this war-fighting organization responded to radical changes in political circumstance, technological innovation, and national needs and expectations. (Library of Congress)
2023.309.021	Museum and Display Aircraft of the United States	Orriss, Bruce W.	In the relatively short span of time since the beginning of this century, swift advances in technology have taken us from the sand dunes of Kitty Hawk to the surface of the moon. The story of man's conquest of air and space is one filled with the hopes, the dreams, and the sacrifices of those who were willing to challenge the heavens. Pioneers like the Wrights, Charles Lindbergh, and Wiley Post are gone now, yet the legacies they left behind continue to touch each and every one of us. To pause and look back, renewing our acquaintance with the past, can only serve to regenerate our strength to continue our quests in the future. To this end, the task falls to the museums, the keepers of America's past. Nearly 6,000 museums exist in the United States today. Annual attendance now totals a staggering 725,000,000. They have served to provide millions of Americans with a deeper understanding of the forces that shaped this great country. In the future these valued aerospace collections will form our only link with the past, a past that is rich with great men and the feats they accomplished. It was decided from the outset to limit the scope of this volume to include only those museums situated in the United States. The National Air and Space Museum and the American Association of Museums aided in locating the many organizations with air

Object ID	Title	Author	Summary
			and space vehicles in their collections. In an effort to create an accurate record of all preserved specimens, even those museums with single displays were included. Even now, rare examples of aircraft continue to be discarded and destroyed. It is hoped that this guide will serve to stimulate cooperation between museums and historical societies to ensure the continued acquisition and preservation of the many vintage machines that exist in the United States. (Introduction)
2023.309.022	Japanese Aircraft : Code Names & Designations	Mikesh, Robert C.	From ABDUL to ZEKE, this handbook covers all Allied designations for Japanese Navy/Army aircraft of WWII. Each aircraft is presented alphabetically according to its code name, and is also cross-referenced to its official (long) designations and project (short) designations. (United States Airforce Academy: McDermott Library) (from schifferbooks.com)
2023.309.023	U.S.S. Cassin Young (DD-793): A Fletcher Class Destroyer	Harmon, J. Scott	Cassin Young, under the command of Cmdr. Earl T. Schrieber, got underway on her first operational assignment on 14 April 1944. Along with Prichett she screened the battleship Indiana en route to Seeadler Harbor, arriving there on 26 April. Three days later the three ships rendezvoused with Task Force 58. Carrier aircraft again pounded Truk. Then, while cruisers bombarded Woleai in the eastern Carolinas, Cassin Young helped screen Vice Adm. Willis A. Lee's battleships as they shelled Ponape. On 11 May the destroyer was back in Pearl Harbor to train for a new mission, the seizure of the Mariana Islands of Saipan, Tinian, and Guam. (Excerpt from book).

2023.310.001	Against All Tides : The untold story of the USS Kitty Hawk Race Riot	Truhe, Marvin D.	"In cramped quarters and at the brink of exhaustion due to the stress of the Vietnam War, simmering racial tensions aboard the USS Kitty Hawk came to a violent confrontation one night in October 1972. Often called a race riot, clashes between sailors both Black and white spanned a six-hour period. Yet, once dawn broke the next day, only Black sailors were court-martialed and brought up on charges. The lingering question in the aftermath was: how? How could the charges be so one-sided? Seeking to set the record straight, former JAG lawyer Marv Truhe completes the story of what happened in this gripping first-person account, and seeks continued justice for the nineteen accused Black sailors. Referencing one of the most complete collections of original source documents of the Kitty Hawk incident-from trial transcripts to medical reports-Against All Tides reveals the injustices of the US Naval system at the time, and shows that racial inequity can be overcome with determined efforts by Black and white people joining together in the fight for justice"-- Provided by publisher.
2023.310.002	Disappearance of Flight 19, The	Kusche, Larry	The harsh light of reality By S. A Troutton, June 30, 2004 - Flight 19 is in someways [sic] the 'Holy Grail' of Bermuda triangle buffs. 5 planes led by a experienced aviator disappear on a 'routine' flight in perfect weather. The first search plane also disappears in broad daylight. Mysterious and garbled radio transmissions that hint at well at anything the writer wants them to hint at. Books have been churned out regurgitating theories from UFOs to Atlantis. Kusche simply does what a 'real' investigator should do. He does not simply recycle others' research, he goes to the source...the military records of the flight, the subsequent

Object ID	Title	Author	Summary
			investigation and interviews with the surviving families. Like an onion, he peels backs the legends, the half truths, the out and out fabrications to review the knowable facts. He makes a strong case for what logically seems to have happened. A lost training flight in bad weather running out of gas in the dark. Ongoing confusion about exactly where they were and freakishly bad radio conditions both played a part. The rescue flight that was seen to explode in midair. A military review that skirted the issue of blame to alleviate the suffering of the victims' surviving families (especially the Taylors, the leader's mother). Clearly this was a personal tragedy but a great 'Mystery' sorry no. Kusche, to me, does not fall into the 'debunker' class, those who automatically reject anything that smacks of the bizarre. He does good research and states the knowable facts. (from Amazon.com) From Don: Avenger (Torpedo bomber). Grumman TBF/TBM Avenger. Mariner bombers. Avenger (Torpedo bomber). Grumman TBF/TBM Avenger. Mariner bombers. Martin PBM Mariner.

2023.310.003	Air War Korea 1950-1953	Jackson, Robert	From Amazon: This fascinating book tells the story of the planes and pilots who fought for air supremacy over Korea from June 1950 through July 1953. The experiences of early jet-to-jet combat as well as close air support and strategic bombing are told in chronological order and illustrated with dozens of B&W as well as color photographs, including many two page spreads. Some of battle recaps are amazing. Many times 20, 40, 60 or more North Korean/Chinese/Soviet Mig-

Object ID	Title	Author	Summary
			15s came up to battle F-86s and other "UN" fighters in extended battles over hundreds of square miles. B-29s were attacked by Migs despite jet escorts and there was lots of danger, day and night, from AAA and other ground fire. The USAF was never able to take air supremacy for granted. There are appendixes listing all the "aces" (the only US Navy ace flew a WWII left over F4U Corsair to shoot down North Korean biplanes!), other notable pilots (future astronauts, etc.) and order of battle listing all USAF, US Navy and British Commonwealth units and the planes they flew. The emphasis is fully on the "UN" side of the war (mostly USAF, but some sections on US Navy and land and carrier based British and Australian units), with virtually no photographs (except gun camera shots) of Communist aircraft and very little about their pilots. Highly recommended to Korean War and aerial combat buffs, veterans and military historians.
2023.312.001	God Was at Midway : The Sinking of the USS Yorktown (CV-5) and the Battles of the Coral Sea and Midway	Linzey, Stanford E.	An excellent inspirational book! August 28, 1999 By A Customer God Was At Midway by Stan--my husband for nearly 60 years--tells our story of trusting God in the early years of our marriage during World War II. Filled with adventure, excitement, and romance, Stan tells the factual and personal aspects of the events leading up to the Battle of Midway. He also reveals how God changed the course of history in personal lives and in our nation through the most significant battle of this Second Great War. God Was At Midway is must reading for those searching for a deeper understanding of not only how the Holy Spirit operates in human affairs but also how the Holy Spirit impacts personal lives through these events.

Object ID	Title	Author	Summary
			In short, God Was At Midway is scholarly, concise and a valuable contribution. Stan successfully appeals to an eclectic audience! "Chilling, Motivating, Outstanding!!!" August 21, 1999 By A Customer Chaplain Stanford E. Linzey's book-God Was At Midway-has incorporated the author's love of God, wife, and call to duty. This is the ultimate war story of love and sacrifice, the Godly wife who prayed for her husband and stood with him no matter what, while he faced possible death while many of his shipmates suffer horribly. God Was At Midway is the story of God's divine intervention in people's lives at war, the author's personal life, and in the affairs of the nation as a whole. The Battle of Midway was the turning point of World War II. The complete historical accuracy of Linzey's book places this author on par with the best writers of the subject. - Vera Waisanen, Educator & Mother - This book would make a great movie; TV special; mini-series. July 28, 1999 By janice_schreuder@ci.pomona.ca.us This book, God Was At Midway, impacts many from the perspective that it is about the life of a very young enlisted man who had the courage to believe he was to make a differenct in other young men's lives on the seas, at war and far from home. He had the stamina to believe he would survive and physically rescue another life from drowning as the Yorktown went down. He had the faith and the hope that he would return to his family. And he had the strength to carry out his

Object ID	Title	Author	Summary
			duties on the job, his spiritual duties with the men, while mentally remaining focused, sane, and strategically thoughtful in every aspect of his being. Not only that, he kept his sense of humor during and after the ordeal. While reading his story, one can feel the uplifting, the positiveness of what life should be about and how we should approach life. I am a mother of (3) sons who are too young to realistically know what war is. This is another world they do not understand. This book would make a great movie, a TV special; or an excellent mini-series. (from Amazon.com)

2023.316.001	Wings of Fury : From Vietnam to the Gulf War	Wilcox, Robert K.	From Amazon: A behind-the-scenes history of American fighter pilots, from Vietnam to Desert Storm. Wilcox, a former air force information officer, believes that Vietnam was the forge that shaped the great air victory in the Gulf War. Profiting from the mistakes of Vietnam (due, in part, to the ineffective training of pilots in the 1960s), many veterans of that conflict became highly critical and innovative teachers. They challenged their young students to the utmost in long, brutal sessions of combat-simulated training; they developed new techniques of aerial warfare; they stressed a new level of professionalism in the service--and in the process they developed undoubtedly

Object ID	Title	Author	Summary
			the best fighter pilots in the world. Wilcox interviewed many of the highest achievers, past and present, including the navy's ``Top Guns" (he warns that the reality of being a Top Gun is far different from the image presented in the melodramatic movie of that name). To be successful, Wilcox asserts, a fighter pilot must learn to control fear, to live with it and fly with it, knowing that no margin of error is allowed in combat. The pilots he interviews are cool and self-assured, proud of being able to keep their emotions in check, loyal to each other, somewhat isolated from the outer world. They find unwinding difficult. They are, he says, a highly macho group: They face the possibility of sudden death every time they fly, and their ethos stresses courage, dedication, and performance above everything. Such dedication exacts a price: disrupted family lives, divorces, and a cramped lifestyle (military pilots earn far less than their commercial counterparts). A revealing study of the lives of an isolated, elite American warrior class. The book often reads like an oral history, and that is both a strength and a drawback: The narrative is frank and lively, but it lacks the objectivity and research notes one expects in a serious work of history.

2023.316.002

Clashes : Air Combat Over North Vietnam 1965-1972 Michel, Marshal L. III

Exhaustive coverage describes and analyzes both Air Force and Navy engagements with North Vietnamese MiGs but also includes discussions of the SAM threat and U.S. countermeasures, laser-guided bombs, and U.S. attempts to counter the MiG threat with a variety of technological equipment. Accessible yet professional, the book is filled with valuable lessons learned that are as valid today as they were in the 1960s and 1970s. Some 15 photos and 45 drawings and maps, including diagrams of both American

2023.316.003	Douglas SBD Dauntless : SBD-1 -6, A-24 Banshee, A-24A Banshee, A-24B Banshee	Lukasik, Mariusz	Douglas SBD Dauntless is one of the most popular American naval bombers of World War II era. The name Dauntless fits well to the aircraft's "personality". SBD was built with the aim of dive bombing, quickly nicknamed "helldiving". Interestingly, one of the successors of Dauntless – Curtiss SB2C – was officially named "Helldiver" SBD. During the next year many improvements were added, such as: self-sealing fuel tanks, stronger armament, and better electric installation. The most characteristic element was the airbrakes. They were mounted through almost the full length of the bottom wing and halves of the upper wings. Therefore the braking system was very effective at stabilizing the dive. The plane became a fully capable war machine. The most popular version was the SBD-5 with a 1200 HP Wright R-1820-60 radial engine. Almost 3,000 SBD-5 were produced. The plane took part in many important battles over the Pacific, but definitely the most significant were the Battle for Midway and the battle over the Guadalcanal. Dauntless' were solid and reliable planes and crews really liked them. They quickly gave it a special nickname made from the letters SBD – "Slow but Deadly". Today there are four air-worthy SBD's (all in the USA). 11 more are museum exhibits or

2023.316.005	Why the USS Thresher (SSN-593) Was Lost : A Technical Assessment Based on Analyses of Acoustic Detections of the Event	Rule, Bruce	"The US nuclear submarine THRESHER (SSN-593) was lost because standard compensation procedures to adjust for hull compression during the deep-dive on 10 April 1963 were not followed. Consequently, THRESHER was heavy (negatively buoyant) at test-depth (1300 feet) and unable to deballast because adiabatic cooling froze moisture in the air-lines to the ballast tanks, blocking those lines. Operation of the Reactor (Main) Coolant Pumps in FAST (2-pole mode) may have contributed to a reactor scram (shut-down) and loss of propulsion at 0909.0R (local time). THRESHER sank at an average rate of 120ft/min from test-depth (1300-feet) at 0909.0R to collapse at 09:18:24R at a depth of 2400-feet (1070 psi) in 1/20th of a second, too fast to be cognitively recognized by those aboard who - although they knew collapse was imminent - never knew it was occurring. The Navy Court of Inquiry (COI) dismissed the results of their own test which established conclusively that flooding at test-depth - the COI's assessed cause of the disaster - would have been a catastrophic event and would not have been reported by THRESHER to her escort ship, the USS SKYLARK (ASR 20), at 0913R as "experiencing minor difficulties." Multiple lines of evidence - discussed in detail by Chapter 1 of this

2023.318.001	USS Boxer (LHD-4), Freedom by Strength, 2003	None Stated	Pictorial account of the 2003 deployment of the Boxer to the western Pacific and Indian Ocean. Boxer departed San Diego on 17 Janaury and returned to that port on 26 July. Primary operation in which engaged was Operation Iraqi Freedom in the vicinity of the Arabian Gulf. Port visits included Jebel Ali, Sydney, Townsville, and Pearl Harbor. Units embarked were the 11th Marine Regiment and Marine Aircraft Group 16. Includes looseleaf End of Cruise Report for HELSUPPRON 11 DET 6.
2023.319.001	Aces Against Japan : The American Aces Speak, Volume I	Hammel, Eric M.	The author brings us first-person accounts from forty of the American fighter aces who blasted their way across the skies of the Pacific and East Asia from December 7, 1941, until the final air battles over Japan itself in August 1945.
2023.319.002	Dirty Eddie's War	Cook, Lee	"Dirty Eddie's War is the true account of the war-time experiences of Harry Andrew March, Jr., captured by way of diary entries addressed to his beloved wife, Elsa. Nicknamed "Dirty Eddie" by his comrades, he served as a member of four squadrons operating in the South Pacific, frequently under difficult and perilous conditions. Flying initially from aircraft carriers covering the landings at Guadalcanal in August 1942, he was one of the first pilots in the air over the island and then later based at Henderson Field with the "Cactus Air Force." When he returned to combat at Bougainville and the "Hot Box" of Rabaul, the exploits of the new Corsair squadron

Object ID	Title	Author	Summary
			"Fighting Seventeen" became legendary. Disregarding official regulations, March kept an unauthorized diary recording life onboard aircraft carriers, the brutal campaign and primitive living conditions on Guadalcanal, and the shattering loss of close friends and comrades. He captures the intensity of combat operations over Rabaul and the stresses of overwhelming enemy aerial opposition. Lee Cook presents Dirty Eddie's story through genuine extracts from his diary supplemented with contextual narrative on the war effort. It reveals the personal account of a pilot's innermost thoughts, both of the action he saw, the effects of his harrowing experiences, and his longing to be reunited with the love of his life back home"-- Provided by publisher.
2023.320.002	Ships & Aircraft of the U.S. Fleet - 1975	Morison, Samuel L.	It has now been some three years since the ninth edition of The Ships and Aircraft of the U.S. Fleet appeared. During that time, the Navy has changed just as much as it did in the six years between the eighth and a ninth editions. Regrettably, in three years, the Navy has lost over 250 ships to the scrappers, with more scheduled. Others have been sold to foreign countries or sunk as targets. The basic format of this edition has not essentially changed since the last one. However, one will note several improvements, especially in the appendices, primarily the result of comments received from readers of the ninth edition. The main text in this edition carries the Navy to early 1975, while the addenda update the main text to mid-1975. All data are from-n official unclassified Navy publications, the editors' own records, and other naval sources. The editors are grateful to all the people who helped with this edition. It is almost impossible to list the names of everyone,

Object ID	Title	Author	Summary
			but some individuals, we feel, should be cited. The first is Rear Admiral Samuel E. Morison, USNR (Retired), whose continued guidance and advice has proven to be invaluable. Then there is Vice Admiral Edwin B. Hooper, USN (Retired), Director of Naval History; Commander Richard T. Speer, USN. Head, Ships Histories Section, Naval Historical Center; Mr. Henry Vadnais, Assistant Head of the Curator Branch, Naval Historical Center: Rear Admiral Bobby Ray Inman, USN, Director, Naval Intelligence Command; Captain Joseph Dick, USN, Head, Ship Systems, Naval Intelligence Support Center; Lieutenant Commander Michael Tansey and Commander Robert Templeton, USN, Security Assistance Division, Office of Chief of Naval Operations; Commanders Roth, Morse, Test, Captain Magee, and Mr. W. Dailey, of the Ships Maintenance and Logistics Division, Office of Chief of Naval Operations; Mr. John Maffett and Mr. Stanley Krol, Navy Shipbuilding and Scheduling Office, Naval Sea Systems Command; Mr. Truman Strobridge and Captain B.- L. Meaux, USCG, of the Coast Guard Public Affairs Office; Mr. William McEachern, Naval Air Systems Command; Mr. Robert L. Lawson, Mr. Christian Bielstein, Mr. William Davis, and Miss Darla Rowe; offices and organizations of the Department of the Navy and private businesses; and last, but certainly not least, Mr. Robert Carlisle, Head, Still Photo Branch, Office of Information, Department of the Navy. Many others who have been helpful prefer to remain anonymous. All photographs, unless otherwise noted, are official Navy, Marine Corps, or Coast Guard photographs. Finally, we wish to thank the

2023.323.001	Dictionary of Nautical	Lenfestey, Thompson	The sailor's lexicon takes on

Object ID	Title	Author	Summary
	Terms, The		new words faster than it can bail out the old. While containers have replaced break bulk cargoes in the world's largest ports, and a solo circumnavigator can be tracked around the globe via sophisticated communications systems, modern contrivances merely supplement older ones - they rarely replace them altogether. Thus the language of the sea today reflects generations of the sailor's enterprise. Thompson Lenfestey's Facts On File Dictionary of Nautical Terms is the most modern, comprehensive and accurate reference of its kind to appear in 30 years. With more than 9,000 main entries, it covers the whole scope of contemporary seafaring, from supertankers to dinghies, from naval warfare to pleasure yachting, and from sail to oar. Rich in lore but written with a practical eye trained by years at sea, this dictionary gives parts of speech, unusual pronunciations, and, when needed, examples of appropriate use, as well as illustrations showing subjects as wide ranging as knots, navigation lights, profiles of sail and power vessels, and useful piloting concepts. No other single reference source offers the degree of coverage of so many topics, which include piloting and navigation; winds, weather, tides, and ice; the business of shipping, including chartering and insurance terms; deck equipment and rigging; knots and marlinespike seamanship; small-boat handling; U.S. Navy and Coast Guard ranks; and flags and signaling. Written in clear, accessible language, The Facts On File Dictionary of Nautical Terms is equally useful for the merchant shipper, the cruising or racing yachter, the merchant mariner or Navy sailor, not to mention historians, writers and anyone who loves the sea.

Object ID	Title	Author	Summary
			"The iconic Consolidated PBV Catalina flying boat was not only the work horse of the US Navy's patrol bomber units during WWII, but also served admirably with the Royal Air Force, Royal Canadian Air Force, and others. Airmen aboard British PBVs were the first to spot the German battleship Bismarck when it entered the North Atlantic in May 1941, and US Navy PBV crewmen were the first to observe the Japanese fleet as it stole toward Midway Islands in June 1942. In addition to keeping a watchful eye for enemy activities, Catalina crews also rescued countless downed airmen as well as sailors from stricken ships. Through daring bomb and depth-charge attacks on enemy vessels, Catalina airmen also contributed directly to the defeat of the Axis powers in combat."
2023.324.001	USS Inchon (LPH-12) - Mediterranean - 1974	Smith, Bedford (ed.)	Pictorial account of Inchon activities beginning with refresher training at Guantanamo Bay, Cuba and a subsequent deployment to the Mediterranean. The ship got underway for the deployment from Norfolk, VA on 29 April and stopped in Moorehead City, NC on 30 April to load Marine Corps air and infantry units. Major evolutions during the deployment included participation in Operation Nimbus Star, the clearing of mines in the Suez Canal left over from the Arab-Israeli conflict of 1973 and the evacuation of Cyprus on 22 July. Ports visited included, Port Said and Alexandria, Egypt; Naples, Italy; and Valencia, Spain. The ship returned to Norfolk sometime after the originally scheduled arrival date of 22 October. Units embarked were HMM-162 and 3rd Platoon, "C" Company, BLT 1/8.
2023.326.001	Brotherhood of the Flying Coffin : The Glider Pilots of WW II	McGaugh, Scott	From Amazon: This book distills war down to individual young men climbing into defenseless gliders made

Object ID	Title	Author	Summary
			of plywood, ready to trust the towing aircraft that would pull them into enemy territory by a single cable wrapped with a telephone wire. Based on their after-action reports, journals, oral histories, photos and letters home, The Brotherhood of the Flying Coffin reveals every terrifying minute of their missions. They were all volunteers, for a specialized duty that their own government projected would have a 50 percent casualty rate. None faltered. In every major European invasion of the war they led the way. They landed their gliders ahead of the troops who stormed Omaha Beach, and sometimes miles ahead of the paratroopers bound for the far side of the Rhine River in Germany itself. From there, they had to hold their positions. They delivered medical teams, supplies and gasoline to troops surrounded in the Battle of the Bulge, ahead even of Patton's famous supply truck convoy. These all-volunteer glider pilots played a pivotal role in liberating the West from tyranny, from the day the Allies invaded Occupied Europe to the day Germany finally surrendered. Yet the story of these anonymous heroes is virtually unknown. Here their story is told in full – a story which epitomizes courage, dedication and sacrifice.
2023.327.001	Vietnam War 1st Marine Corps Aircraft Wing Command Activity Reports	United States, Marine Corps. Aircraft Wing Command, 1st	The 1st Marine Aircraft Wing (1st MAW) saw service in the Vietnam War, beginning with providing helicopter air support to the Army of the Republic of Vietnam (ARVN) in April 1962, through Operation Frequent Wind, the largest helicopter evacuation in history and the evacuation of the American Embassy in Saigon in April 1975. In May 1965, 1St MAW's headquarters were moved to South Vietnam. The 1st MAW's mission was to provide close support for operational

Object ID	Title	Author	Summary
			forces, originally mostly Marine, later Marine and Army operations and to interdict and harass Communist forces. The Wing provided close air support, helicopter lift, and fixed wing supply operations that allowed Marine units to operate at greater distances away from their home bases. They also took part in tactical bombing of targets in North Vietnam. Much of the Wing's activities were dictated by the Air-Ground Team concept. The 1st MAW participated in the largest heliborne assault in Marine history during Operation Meade River and the subsequent Dewey Canyon Operation in November 1968 and in Ashau Valley during January 1969. The last major operation for the Wing was providing logistical and transport support of RVNAF forces during Operation LAM SON 719, the South Vietnamese incursion into Laos to cut the Ho Chi Minh Trail. The 1st Marine Aircraft Wing (MAW) Command Histories (called Command Diaries) for May and June 1965 cover the deployment and buildup of the Wing in South Vietnam. The reports have three main parts, Organizational Data Sheet; Narrative Summary of Highlights; and a third part entitled Informational Messages. The Organizational Data Sheet covers primary headquarters, staff, and subordinate commanders and provides strength statistics. The Narrative Summary highlights activities of the 1st MAW's deployment to South Vietnam. These highlights include disposition of forces, establishment of airbases, operational activities, and VIP visits. The third section contains unit situation reports, movements, deployments, and problems. The report format changed in

Object ID	Title	Author	Summary
			July 1965. The first of four parts contain the sections Organizational Data. Added was an outline of the activity of the primary headquarters, staff, and subordinate commanders and strength statistics. Part I also included a listing of the VIP visits. Part II titled Narrative Summary, contains a chronological summary and analysis of the primary activities and operations of the 1st MAW during the reporting period. The summary also contains notations referring to the supporting documents in Part IV. Part III titled Significant Events, contains summaries referring to specific topics and also highlights ground operations supported by 1st MAW. These topics include the activities of G -1, G-2, G-3, G-4, and G-5 staff offices and subordinate command offices; descriptions of programs and plans, including the morale and welfare program; establishment and operation of various other offices, including civil affairs, informational services, and communications-electronics; and discussion of various special topics, including awards, casualties, and major operations. Part IV titled Supporting Documents, contains a variety of materials, including staff office and subordinate unit command histories, situation reports, operational and wing command orders, command directories, and special topics. Each command history includes a table of contents. Beginning in 1970 the sections were paired down. The Supporting Documents began almost exclusively consisting of subordinate unit command histories. The Career Planning Newsletter, from the G-1 Command History, is the only supporting document

Object ID	Title	Author	Summary
			highlighted. The coverage contained in the reports expanded in February 1971, the 1st MAW Command History's Part IV Supporting Documents returned to highlighting some of the staff offices' command histories. These include G-1, G-2, G-4, the Wing Medical Officer, and the Wing Chaplain. The G-3 Command History is not highlighted, but the supporting documents of the G-3 Command History are attached. https://downloads.paperlessarchives.com/aSKS/
2023.327.002	Vietnam War : Search and Rescue Documents	Center for Air Force History	Composed of mission reports, monographs, and research reports covering Search and Rescue (SAR) operations in Southeast Asia. 2023.327.003	World War II : Naval Damage Reports & Photos	United States, Navy Department	During World War II, when a ship sustained battle damage, or any other type of mishap occurred (e.g., collision, running aground, explosion, fire, heavy weather damage), a War Damage Report was required. At the first opportunity, a follow up, detailed, preliminary shipboard inspection/damage assessment at sea of the affected space(s) was conducted for a required, descriptive War Damage Report. This report was to be signed by those officers performing the inspection assessment and the commanding officer. The requirement was to report date, time, and location or area of operations; personnel casualties (name, rate/rank, branch, and service number); a brief description of damage; and mission impact. If the complete damage analysis assessment could not be conducted and completed at sea while underway, a more detailed inspection would had to be conducted at anchor in a safe harbor or in port https://downloads.paperlessarchives.com/aSKS/

2023.327.005	A-6 Intruder : Grumann's All-Weather Indictor from Vietnam to the Persian Gulf	Brown, David F.	In Memory of Virginia Swanson. Signed by the author. The Grumman A-6 Intruder was the US Navy and Marine Corps' primary carrier-based, all-weather attack aircraft from 1963 to 1997. Famous for its combat missions in Vietnam and the 1991–92 Gulf War—as well as the novel and movie Flight of the Intruder—the A-6 was capable of carrying both conventional and nuclear weapons. This book covers the A-6 from concept, design, and construction in the late 1950s, through its fleet service beginning in 1963, up to its retirement and display status in museums around the country. Every A-6 USN and USMC squadron is covered through superb photography, including aircraft markings and unit insignias.
2023.327.006	Key West : "Top Guns" of the East Coast	Hall, George	In memory of Virginia Swanson. Coverage of the Hornet and Tomcat fighting planes which travel from the East Coast to Naval Air Station Key West in Florida, pitting their skills against adversary units flying overpowered A-4F Skyhawks and F-16N Fighting Falcons. Key West is a main centre of US Navy fighter training.
2023.327.007	Lucky Bag of 1967	U.S. Naval Academy	College yearbook for the U.S. Naval Academy, class of 1967. The name of Thomas William Perkins is stamped on the front cover.
2023.327.012	Mathematics for Electricians and Radiomen	Cooke, Nelson M.	From Amazon -- Electrical and radio engineering students have need for a course in mathematics that is directly concerned with application to electrical and radio circuits.

Object ID	Title	Author	Summary
			This book is intended to provide those students with a sound mathematical background and to further their understanding of the basic principles of electricity. A classic that is still relevant in the electrical engineering field, especially as it relates to Electrical Power Engineering. The author brilliantly "dovetails" the world of mathematics into the field of power engineering, thereby making two very technical subjects much more coherent.
2023.328.001	Allied Fighter Aces of World War II	Spick, Mike	(From Preface) 'In 1939, world democracy was in a pitiable state. The Geneva-based League of Nations had signally failed to impose any restraint on the emergent Fascist states.... A world war was inevitable; the charge was set, the powder train laid. All that was needed was a spark. This was duly provided on 1 September 1939 when Germany, having first signed a non-aggression pact with the Soviet Union, invaded Poland.' In 2 1/2 years, the dictators grabbed for land and treasure belonging to free nations. Here is a salute to the fighter pilots who blunted and then reversed the Axis invasions.

2023.328.003	Hellcat	Anderton, David A.	Back in the 1980s, Crown Publishers put out a series of coffee-table books on WW II warbirds (P-51, Me 109, Spit, FW 190, etc.) written by various authors and featuring the exquisite artwork of Rikyu Watanabe. This 1981 release, a salute to Grumman's brutish war-winning Hellcat, combined the talents of Watanabe and David Anderton. In 56 pages, Anderton charts the development and combat history of the F6F. The Hellcat destroyed over 5,100 Japanese aircraft, compiling a never-to-be topped kill-loss ratio of 19-to-1. Anderton's text is clear, concise and entertaining. The major draw in this and the other Crown books, however, was Watanabe's artwork...and it's magnificent as always. HELLCAT features several gatefolds, one of which - a triple-gatefold, color side profile of a VF-27 F6F - folds out to over three feet in length! Double-gatefolds of the F4F and F8F are also included as is a four-page gatefold showing the major USN and IJN aircraft of World War II, a triple-gatefold of the USS Yorktown, a six-view of an F6F-3, F4F three-view, F6F-5 cutaway, etc. And all for \$15.95 circa 1981! Despite the preeminent role the F6F played in World War II, it never received the historic coverage it deserved. While not definitive, the Anderton/Watanabe volume presents a comprehensive and wonderfully vivid portrait of this legendary fighter. By Michael OConnor "Wordsmith" (Wausau, WI USA) (TOP 500 REVIEWER)

			(from Amazon.com)
2023.328.004	F4U Corsair	Johnson, Frederick A.	From Amazon: For anyone with a love for this airplane, this is the book for you. It shows detailed plans of the air frame, the engine, and the cockpit. Hard to imagine someone flying this complicated aircraft, having to do all the things necessary to keep it in the air PLUS defend oneself from Jap Zeros, who were trying to shoot you down. I have a 92 year old friend who was an 18 year old Lieutenant JG who flew this airplane from a carrier. He saw two of his squadron mates shot down by Jap Zeros, he flew 17 missions, and his only fear was trying to land this 2500 horse powered difficult to fly aircraft on a totally black Navy carrier in the dead of night.....that is a terror he retains and often talks about. He enjoyed seeing the cockpit again, which brought back many memories, both good and bad.
2023.328.005	Aircraft Carriers	Preston, Antony	The aircraft carrier is the archetypal weapon of the twentieth century. Born in World War I it became the most significant weapon during the Pacific campaign in World War II. Today it is still a powerful tool in the hands of both the American and Soviet navies. The history of the "Aircraft Carriers" describes not only their use throughout many conflicts. Technical descriptions of the development of the planes and the ships themselves are illustrated through cut-away diagrams and line drawings. The aircraft carriers, the men who fought on them, the planes that flew from them and the battles in which they fought are brilliantly described by Britain's foremost naval historian, Antony Preston, author of numerous works such as "Destroyers," "U-Boats," "Navies of World War II" and "Navies of the American Revolution." With over 300 photographs in colour and black and white, together with drawings, charts and maps,

Object ID	Title	Author	Summary
			the history of the "Aircraft Carriers" should prove to be a collector's item for all naval buffs and students of war at sea in the twentieth century for many years to come. USS Midway on front jacket cover. Antony Preston was born in England in 1938. Educated at King Edward VII School and the University of Witwatersrand, Johannesburg, South Africa he returned to England to become a Research Assistant in charge of Admiralty records at the National Maritime Museum, Greenwich. He has written "Send a Gunboat," "V and W Destroyers," "Battleships of World War I," "Submarines," "Navies of the American Revolution," "An Illustrated History of the Navies of World War II," "Destroyers" and "U-Boats" and was co—translator of the "Warships of the Japanese Navy 1868-1945." He is a regular contributor to leading naval historical journals, and for years was an editor of the "Warship Profile" series. A consultant to a number of publishing groups in naval and historical affairs, he is the editor of the naval history quarterly "Warship" and was deputy editor of "Navy International" until his recent appointment as naval editor of "Defence" magazine. He is regarded as one of the world's leading authorities on navies, ships and war at sea. (from dust jacket flaps) (Cover photo: USS Midway (CV -41) and Knox-class frigate.)

2023.328.013	Zero A6M	Willmott, H.P.	From the inside front cover flap: The Zero fighter, built by Mitsubishi, was Japan's most famous combat aircraft of World War II. The aircraft was developed in the late 1930s and was first used with devastating success in the China War, but its characteristics still came as a shock to the Allies as the Japanese overran Southeast Asia.
2023.328.014	Samurai!	Sakai, Saburo	The personal story of Japan's greatest living fighter pilot. This appears to be a revised and specially illustrated edition of our other copy..
2023.328.015	Sinking the Rising Sun : Dog Fighting & Dive Bombing in World War II : A Navy Fighter Pilot's Story	Davis, William E.	Gives an ace fighter pilot's view of World War II--including the sinking of the last Japanese carrier afloat from the Pearl Harbor attack. Also included: Naval Aircraft Factory N3N North American T-6 Texan / SNJ Grumman F6F Hellcat
2023.328.016	WWII : US Navy & Japanese combat planes	Christy, Joe (ed)	WWII in the Pacific revolutionized all the rules of sea warfare. The old sea dogs that had dominated US Navy planning for 150 years were forced to admit that the day of the battleship had ended...the aircraft carrier became new queens of the oceans. From the morning of Pearl Harbor, it was clear that control of the sea belonged to whomever dominated the air above it. If you are interested in aviation or military history, this exciting volume gives you an authentic, hard-hitting account of WWII Pacific Theater aircraft, the tactics they employed, and all about the men who flew the combat missions --- in the words of the aces themselves!
2023.328.017	Action in the Pacific : As Seen by US Navy photographers During World War 2	Sowinski, Larry	While numerous books have talked extensively, and motion pictures have glamorized unrealistically, few attempts have been made to reproduce the immense pictorial record made by the United States navy's Combat Photographers. They took hundreds of thousands of pictures during

Object ID	Title	Author	Summary
			World War II. Almost all of them were candid. A total of nearly 500 of these photographs--including 16 pages in full color--have been selected for this book, with the emphasis on rarely seen or never previously published shots. Each of the US Navy's major campaigns is covered in turn, with an introduction outlining the background and a detailed caption for each picture. From Dust Jacket. Pages 42-43 have pictures of the Battle of Midway.
2023.328.018	Above the Pacific	Horvat, William J.	From the inside dust jacket: This is the first complete story of the flights "Above the Pacific"-from the first Hawaiian balloon ascent in 1889 and the first Curtiss flights in 1910 up to the present time.... Included are stories of the military interest, in addition to the civilian interest, in Hawaiian aviation.... An illustrated story of Pearl Harbor and World War II is also included.
2023.328.019	Hamlyn Concise Guide to American Aircraft of World War II, The	Mondey, David	This book provides a useful guide to some 120 aircraft that served with the US Air Force from 1939-1945. Both combat and non-combat aircraft are covered by text detailing each type's origin, history, and variants, followed by a full technical specification. This illustrated guide looks at major American aircraft of World War II, showing the design of fighter bombers used in the war. It describes how the aircraft were deployed in bombing missions, their pilots, the firepower they were capable of, and how they survived the conflict.
2023.328.020	Aircraft Versus Submarine : The Evolution of the Anti-submarine Aircraft, 1912 to 1980	Price, Alfred	The first aircraft to sink a submarine was a small flying boat of the Austro-Hungarian Naval Air Arm. The year was 1916 and by that time in World War I, the airplane had come to be appreciated as an important antisubmarine weapon by all combatants. With the arrival of World War II the survival of Great Britain was put in doubt by the massive destruction inflicted on the North

Object ID	Title	Author	Summary
			Atlantic lifeline by German submarines. The development of anti-submarine warfare from the air was a major factor in decreasing the number of casualties to Allied merchant shipping. This book tells the story of the cat-and-mouse tactics employed by aviators and submariners to outwit each other. It also covers the development of electronic warfare and purpose-built weapons and the role they played in the lethal duel fought over World War II waters.
2023.328.021	American Bomber Plane, The	Williams, Amy E.	(scanned from dust jacket flaps; needs proofreading:) Airplanes are such formidable weapons in modern combat that it seems incredible military experts once believed they would never be suitable for bombing missions. In fact, at the start of World War I, the few planes that saw action were considered neither robust enough to reliably deliver a heavy load of bombs to a target, nor fast enough to escape pursuing enemies. Opinions changed in 1918 when the Glenn L. Martin Aircraft Company contracted with the United States government to build the Martin MB-1, a biplane that could attain a speed of over 100 miles per hour and carry a bombload of more than 1,000 pounds. The American bomber was born, and warfare was never the same again. The American Bomber Plane traces the rapid evolution of the bomber plane from flight of fancy to tactical reality. Packed with stunning photographs and illustrations, this book tells the fascinating story of the bomber plane's development as a crucial military weapon virtually since the dawn of aviation history. In 1903, the Wright brothers achieved the millennia-long dream of powered human flight. Within five years they were applying their new technology to manufacturing planes for the U.S. Army. By the time the United States entered World War I in 1917, however, the nations of Europe had

Object ID	Title	Author	Summary
			become the world leaders in the development of military aircraft. The need for warplanes and trained pilots in the United States was immediately apparent, laying the groundwork for subsequent decades of technological innovation in military aviation. Today, U.S. manufacturers create some of the most sophisticated aircraft in the world. The American Bomber Plane includes in-depth information about the design and development of forty groundbreaking bomber planes A that have made an impact on modern warfare and helped shape history in the process. Featuring the stunning renderings of artist Ted Williams as well as a wealth of full-color and black-and-white archival photos, The American Bomber Plane brings to life some of the most legendary U.S. warbirds, Ted Williams Ted Williams is an award-winning illustrator and noted aviation historian. Celebrated for his distinctive style and historical accuracy, his work can be seen in many magazines, journals, and books. He also creates custom visual communications and private commissions on a wide range of subjects for a diverse clientele. He resides in the Finger Lakes region of upstate New York with his wife, Gail. For more information, visit his website at www.tedwilliamsaviationart.com. Amy E. Williams Amy E. Williams has written about science and technology for everything from children's books to museums. She is a marketing communications professional with degrees from St. John Fisher College in Rochester, New York, and Bowling Green State University in Bowling Green, Ohio. She lives in northeast Ohio with her husband. This is her second aviation collaboration with

2023.328.023	Flying Leathernecks in World War II	Doll, Thomas E.	museums..." (Foreword:) Midway, Guadalcanal, Vella Lavella; names of places that before World War II few people knew existed. But in the years from 1941 to 1945 these remote islands became well known to almost every American old enough to comprehend the world around him. To those of us who served on these and the many others of islands in the Pacific, their names will not be forgotten nor the events that took place on these small but important landmarks. This pictorial review of World War II United States Marine Corps aircraft will remind those of us that flew some of these aircraft in combat of events which not only affected our personal lives but may also have influenced the course of the war. The photographs of the aircraft on Guadalcanal's Henderson Field will bring to mind special memories for we who served there; the primitive living_ and working conditions; the dust; the mud and the almost constant harassment by the enemy in the early days of our presence on the island. This was Guadalcanal. Munda, Tarawa, Bougainville, Espiritu Santo, Peleliu, Iwo Jima, Okinawa; each a name, each a different place, each a poignant recollection. The photographs within this book will give us all a nostalgic glimpse of an important time in our lives through the aircraft we flew and depended upon for our very existence. Although directed primarily toward the World War II naval aviation enthusiast, all who are interested in aviation will find this book both interesting and informative. This collection of photographs depicts a critical era in the history of United States Marine Corps aviation

			and that of our country. Major General Marion E Carl, USMC June 1970
2023.328.024	Robert Taylor : Air Combat Paintings, Vol. 4	Taylor, Robert	This the fourth volume in a series of paintings by Robert Taylor. Taylor is widely regarded as the premier painter of aviation subjects--a reputation established over the last four decades.
2023.328.025	Bogeys and Bandits : The Making of a Fighter Pilot	Gandt, Robert L.	The author, Bob Gandt, is a veteran Navy pilot and former Delta pilot. This book takes the reader through the elite training program where a class of eight men and women are learning to fly the F/A-18 Hornet at Cecil Field Master Jet Base near Jacksonville, Florida.
2023.328.026	American Fighter Plane, The	Williams, Ted (ill.)	Traces the evolution of the U.S. warbird by showcasing forty of the most groundbreaking designs in the history of the of American military aviation.
2023.328.027	Divine Thunder : The Life and Death of the Kamikazes	Millot, Bernard	"In the autumn of 1944, as American forces grew stronger in the Pacific, the Japanese were realizing they were outnumbered and resolved to do something drastic. Drawing from a legend 700 years old, about the gods providing a typhoon (or as they called it a ""divine wind"" for their protection, the Japanese organized ""special attack forces"" to provide their own man-made divine thunder..This is an absorbing account of the Japanese Naval Special Attack Suicide Fliers, the ""Kamikazes"" - squadrons of airplanes that would purposely crash dive into Allied ships, often with devastating results. Illustrated with photographs, drawings, and a bibliography. -- This text refers to an out of print or unavailable edition of this title. (from Amazon.com)
2023.328.028	I Was a Kamikaze Pilot	Nagatsuka, Ryuji	"Ryuji Nagatsuka did not know, when he made an application to become a pilot in October 1943, that by the following autumn Japans situation in the war

Object ID	Title	Author	Summary
			would be so critical that the role for which he was destined would be part of the most incomprehensible phenomenon of the hostilities, that of a suicide pilot, known to the world as a kamikaze. He and his fellow kamikaze pilots had to be highly trained to crash exactly on target and to evade dense anti-aircraft fire. In this way, thirteen US warships were sunk, and 174 damaged, in the Battle of Okinawa. Here, in this extraordinary document, Nagatsuka gives us a unique insight into what it was that enabled these young men to die for their country in such a way, and to do so willingly." -- back of book.
2023.328.029	From the Flight Deck : An Anthology of the Best Writing on Carrier Warfare	Mersky, Peter B. (ed)	This is a collection of chapters that were written by other authors such as Norman Polmar; Eric Brown; Jack Sauter; James Michener; Rosario Rausa; and Sherman Baldwin who wrote about his experiences on the USS Midway during Desert Storm. From the book jacket: Barrett Tillman says "Peter Mersky has compiled an exceptional variety of anecdotes spanning the history of carrier aviation. The American, British, French, and Japanese memoirs, from before World War I up to recent operations, afford a balanced look at a subject of enduring fascination." Chapter 1 -- The Early Years, 1910 - 1938 Chapter 2 -- Carrier Aviation Comes of Age, 1939 - 1945 Chapter 3 -- The Early Cold War, 1946 - 1953 Chapter 4 -- Times of Development and Transition, 1954 - 1963 Chapter 5 -- The Vietnam Crucible, 1964 - 1975 Chapter 6 -- A New Age, 1976 - Present
2023.328.030	Dive Bomber : Learning to Fly the Navy's Fighting Planes	Winston, Robert A. (Robert Alexander)	This lively memoir focuses on the author's flight school experiences in Pensacola during the golden days of the late 1930s, when training was a leisurely affair and young aviators were enveloped in an

Object ID	Title	Author	Summary
			aura of glamour and distinction. During the time period of this book he flew aboard the carriers the USS Lexington and the USS Enterprise.
2023.328.031	World War II U.S. Navy Air Combat	Lawson, Robert L.	Vintage Color Photographs with commentary by the author. First Person accounts of life aboard the ships and the experiences of flying in combat.
2023.328.032	Hunters in the Sky : Fighter Aces of WWII	Whelan, James R.	Hunters in the Sky: Fighter Aces of WWII is all about the chase, the hunt, and the kill told through personal interviews with the men who flew the machines and created the legends. The aces tell their tales of fighter pilots, killed, wounded, and missing in action. And they reveal how only the best-and luckiest-survive. Introduction by Raymond F. Toliver.
2023.328.033	Fire in the Sky : The Air War in the South Pacific	Bergerud, Eric M.	Utilizing primary sources and scores of interviews with surviving veterans of all ranks and duties, the author recreates the fabric of the air war as it was fought in the South Pacific. He explores the technology and tactics, the three-dimensional battlefield , and the leadership, living conditions, medical challenges, and morale of the combatants. The reader will have a thorough understanding of how air power functioned in World War II from the level of command to the point of fire in air-to-air combat. Despite operating under primitive conditions in a largely unknown and malignant physical environment, both sides employed the most sophisticated technology available at the time in a strategically crucial war of aerial attrition.
2023.328.034	Fly Navy : The History of Naval Aviation	Johnson, Brian	Brian Johnson's definitive history of the aircraft carrier's rise to importance tells in rich and dramatic detail the stories of the men, the battles, and the ships themselves--from the first take-off near Hampton Roads, Virginia, through the sinking of the Bismarck and the war in the Pacific, up to the technological marvels of the present day.

Object ID	Title	Author	Summary
2023.328.035	Doolittle Raid 1942, The : America's First Strike back at Japan	Chun, Clayton K. S.	In early 1942, the strategic situation was bleak for the United States. She had been in continual retreat since Pearl Harbor, surrendering major areas such as the Philippines, and was preparing for the worst in Hawaii and on the West Coast. The Japanese, on the other hand, had secured a well-defended perimeter, and was set for further expansion. Something needed to happen quickly and be of considerable impact—and the combined-arms, April 1942 Doolittle Raid on Japan was a way to achieve this. This book examines the planning, execution, and aftermath of this innovative, daring and risky attack, which would show that the Japanese navy and air forces were anything but invincible. (from ospreypublishing.com:)
2023.328.036	Faces of War : The Untold Story of Edward Steichen's WWII Photographers	Faram, Mark D.	Documents the work of the World War II Aviation Photographic Unit, responsible for taking some 14,000 photographs now housed in the National Archives.

			published as three separate volumes: Flying Aces (vol. 1), Bomber Missions (vol. 2), and Carrier War (vol. 3). We currently have backup copies of Flying Aces and Carrier War. This book presents more than 200 paintings that capture the aerial encounters of WWII in vivid detail, featuring contributions from today's most noted aviation artists, including Robert Bailey, Stan Stokes, Robert Taylor, Jim Dietz, Keith Ferris, and Roy Grinnell.
2023.328.056	First Blue : The Story of World War II Ace Butch Voris and the Creation of the Blue Angels	Wilcox, Robert K.	The Remarkable Story of a True Hero of American Aviation. The U.S. Navy's Blue Angels are the most famous flight demonstration team in the world. While millions of aviation enthusiasts see their shows every year, the story of the man who formed the squadron has never been told. He is Roy Marlin "Butch" Voris, a World War II Ace and one of only two aviators ever to command the Blue Angels twice. First Blue details the epic journey of an unassuming man whose strong character and desire to fly launched him into a life of drama, heroism, and accomplishment unique in his field. Because he wanted to serve his country during World War II, a young Butch Voris found himself flying fighter planes as part of the pitifully prepared and outmanned front in the early stages of the Pacific theater. He was nearly killed there but went on to be a leader in one of the most fearsome naval air squadrons in the Pacific. As a pilot, Butch is unquestionably in the same class as more recognized aviator heroes such as Chuck Yeager and Pappy Boyington. While his World War II experience alone could comprise a book, Butch may be best known for his efforts in the creation of the naval air demonstration team, the Blue Angels. After the war, Voris

Object ID	Title	Author	Summary
			was personally chosen by Admiral Nimitz to start the Blue Angels and to lead them, first in prop planes and later in jets. The story of his efforts is as exciting as it is inspirational, and it's told here in meticulous detail and with great humor. Today the Blue Angels still follow traditions established by Butch. Butch's involvement in military flight didn't end with the Blue Angels; he became a major player in the development of the F-14 Tomcat and NASA's Lunar Explorer Module for Grumman. Butch dedicated his life to his work, and here, finally, is the remarkable, untold account of this true American aviation pioneer and hero: a man whose life had unparalleled influence on naval aviation and whose legacy continues to inspire millions of Americans each year. Publication Date: September 23, 2004 (from Amazon.com)
2023.328.057	Jolly Rogers, The : The Story of Tom Blackburn and Navy Fighting Squadron VF-17	Blackburn, Tom	This is the true story of one of the Navy's foremost fighter squadrons, VF-17 and its charismatic commander, fighter ace Tom "Tommy" Blackburn, in action against the Japanese in the Solomon and Bismarck islands during World War II.
2023.328.058	Learning to Fly for the Navy	Studley, Barrett	A description of manoeuvres taught at the Naval air station, Pensacola, Fla. cf. Author's note
2023.328.059	Marine Air : The History of the Flying Leathernecks in Words and Photos	Dorr, Robert F.	Military historian, Robert F. Dorr, presents the first fully illustrated, oral history of the Marine Air Wing--and give the Flying Leathernecks the recognition they deserve. From World War I through World War II, the Korean Conflict, Vietnam, from Grenada to Panama to Desert Storm, from Operation Enduring Freedom to Operation Iraqi Freedom, Marine Air's world-class pilots continue to rule the skies.
2023.328.060	Aces in Combat	Hammel, Eric	Adding to the acclaimed first four volumes of his exciting,

Object ID	Title	Author	Summary
			in-the-cockpit series, The American Aces Speak, leading combat historian Eric Hammel comes through with yet another engrossing collection of first-person accounts by American fighter aces serving in World War II and the Korean War. As are the four earlier volumes, Aces In Combat is a highly charged excursion into life and death in the air, told by men who excelled at piston-engine and jet -engine aerial combat and lived to tell about it. It is an emotional rendering of what brave airmen felt and how they fought in the now-dim days of America's living national history. View the Battle of Midway through Lieutenant Jim Gray's eyes as he must balance the needs of fellow pilots against the needs of his nation. Share the fear with Captain Charlie Sullivan as would-be rescuers deep in the New Guinea jungle attempt to turn him into a blood sacrifice. Crew a Canadian Mosquito night fighter as Lieutenant Lou Luma stalks the wily Hun-and bags an ace-over an airfield deep in Germany. Share Lieutenant Bud Fortier's and Major George Loving's grief when, on missions nearly eight years apart, they look on helplessly as trusted wingmen dive to their deaths in treacherous ground-attack runs. And watch anxiously as Captain Tom Maloney hovers between life and death for ten lonely days after stepping on a mine on an enemy-held beach. ... These are America's eagles, and the stories they tell are their own, in their very own words. Eric Hammel is an acclaimed military historian and author of more than thirty other combat histories, including Pacifica Military History's Guadalcanal: Starvation Island, Guadalcanal: Decision at Sea, Six Days in

2023.328.061	Lightning Strike : The Secret Mission to Kill Admiral Yamamoto and Avenge Pearl Harbor	Davis, Donald A.	From Amazon: This is the story of the fighter mission that changed World War II. It is the true story of the man behind Pearl Harbor---Admiral Isoroku Yamamoto---and the courageous young American fliers who flew the million-to-one suicide mission that shot him down. Yamamoto was a cigar-smoking, poker-playing, English-speaking, Harvard-educated expert on America, and that intimate knowledge served him well as architect of the Japanese attack on Pearl Harbor. For the next sixteen months, this military genius, beloved by the Japanese people, lived up to his prediction that he would run wild in the Pacific Ocean. He was unable, however, to deal the fatal blow needed to knock America out of the war, and the shaken United States began its march to victory on the bloody island of Guadalcanal. Donald A. Davis meticulously tracks Yamamoto's eventual rendezvous with death. After American code-breakers learned that the admiral would be vulnerable for a few hours, a desperate attempt was launched to bring him down. What was essentially a suicide mission fell to a handful of colorful and expendable U.S. Army pilots from Guadalcanal's battered "Cactus Air Force":
2023.328.062	Flying the Edge : The Making of Navy Test Pilots	Wilson, George C.	Flying the Edge is Washington Post correspondent George C. Wilson's dramatic firsthand account of a year spent "inching into the unknown" with the 100th test-pilot class at the Naval Air Test Center in Patuxent River, Maryland. Based on hours of test flights

Object ID	Title	Author	Summary
			in a variety of aircraft and interviews with scores of naval and civilian test pilots and engineers at Pax River, it provides a very personal inside look at the challenges and dangers facing naval test pilots in the 1990s. The book is inscribed to Riley Mixson from the author. On page 199 there is a description of a Grumman F9F-5 Panther crash on the Midway by test pilot George C. Duncan.
2023.328.063	Aces Against Germany--The American Aces Speak. Volume II	Hammel, Eric	From Amazon: ACES AGAINST GERMANY The American Aces Speak by Eric Hammel. In the second volume of his critically acclaimed series, The American Aces Speak, noted military historian Eric Hammel brings fresh first-person accounts from thirty-nine U.S. Army Air Corps fighter aces who blasted their way across the skies of North Africa, the Mediterranean, and northern and southern Europe in the great crusade against Hitler's vaunted Luftwaffe and the other Axis air forces. Coupled with a clear, concise historical overview of America's brilliant air war against the Axis in Europe and North Africa, Hammel's detailed interviews bring out the most thrilling in-the-cockpit experiences of some of our country's best pilots.Climb aboard a P-38 Lightning as Maj. Bill Leverette fights America's highest-scoring single personal air battle against the Luftwaffe.
2023.328.064	Introduction to Airplanes	Bureau of Naval Personnel. Standards and Curriculum Division	Written for the enlisted men of Naval Aviation in order to give them the background information necessary to perform their naval aviation duties. Discusses aviation history, aerodynamics, nomenclature of airplane structures, and power plants.
2023.328.066	What the Citizen Should Know about the Air Forces	Hartney, Harold Evans, 1888-1945.	What the citizen in the middle of WW II should know about the Army, Navy Coast Guard, etc., all treated in separate books. Less than a third of the book is devoted to the sea

Object ID	Title	Author	Summary
			services, but 14 different sea service aircraft are covered/illustrated. The book is a survey of our defenses as they exist now (1942) in the newly created Army Air Forces, in the Naval Air Forces, in the Marine Corps, and the Coast Guard (now incorporated in the Navy.).
2023.328.067	Pearl Harbor Story, The	Rice, William T.	Souvenir booklet sold by company operating boat tours of Pearl Harbor. History and photos of local area landmarks and the December 7, 1941 attack. The True Account of the "December 7" Attack in full color with authentic information and pictures of the attack on December 7, 1941 by Captain William t. Rice, USNR (Ret) Photographs include the Japanese carrier crew as wave of planes are launched for the attack, location of the Japanese Attack Force, USS Condor, USS Ward, Midget Japanese Submarines, B-17 Bombers from California, Hickham Army Airfield, Pearl Harbor and the Naval Hospital, USS Nevada, Ford Island Naval Air Station, USS Curtiss, USS Arizona and numerous other US ships in the harbor, civilian casualties, the Punchbowl Garden of the Missing, the Honolulu International Airport and the USS Arizona Memorial.
2023.328.068	Admiral Kimmel's Story	Kimmel, Husband Edward	This book by Admiral Kimmel is the final word that sets the story in the perspective of history. Kimmel tells us what it was like to be left holding the bag in a most vulnerable position. Kimmel sticks to his own end of the story. He tells us about the material he was denied, the warning messages he didn't get. He impugns no motives, he makes no deductions from unproved hypotheses. But the book is sufficient to nail down the inescapable point: the blame for the loss of the Pacific fleet battleships rests squarely on Washington, not on the men at Pearl.

2023.329.001	Ghost Soldiers : The Epic Account of World War II's Greatest Rescue Mission	Sides, Hampton	From Amazon: On January 28, 1945, 121 hand-selected U.S. troops slipped behind enemy lines in the Philippines. Their mission: March thirty rugged miles to rescue 513 POWs languishing in a hellish camp, among them the last survivors of the infamous Bataan Death March. A recent prison massacre by Japanese soldiers elsewhere in the Philippines made the stakes impossibly high and left little time to plan the complex operation. In Ghost Soldiers Hampton Sides vividly re-creates this daring raid, offering a minute-by-minute narration that unfolds alongside intimate portraits of the prisoners and their lives in the camp. Sides shows how the POWs banded together to survive, defying the Japanese authorities even as they endured starvation, tropical diseases, and torture. Harrowing, poignant, and inspiring, Ghost Soldiers is the mesmerizing story of a remarkable mission. It is also a testament to the human spirit, an account of enormous bravery and self-sacrifice amid the most trying conditions.
2023.329.002	Grand Fleet: Warship Design and Development 1906-1922	Brown, D.K.	From Amazon: In this book, the sequel to the highly acclaimed Warrior to Dreadnought, renowned warship author D. K. Brown brings his knowledge and experience as a warship designer to the story of the Royal Navy's development of World War I warships and the

Object ID	Title	Author	Summary
			influence of that conflict on future warship design. The launch of HMS Dreadnought in 1906 ushered in one of the most rapid periods of warship development in history, and only ten years after this all-big-gun, turbine-powered battleship was completed, two entire fleets of Dreadnoughts would meet at Jutland and put the work of the prewar designers to the ultimate test.
2023.330.001	USS MIDWAY (CV-41) Actions During Operation Desert Storm (ODS) (17 January - 27 February 1991)	Kelly, Frank B.	FOR INTERNAL USE ONLY - DO NOT DISTRIBUTE OUTSIDE THE SHIP - CONTACT MARK PUGH OR TODD HYDE FOR ACCESS : USS MIDWAY (CV-41) Actions During OPERATION DESERT STORM (ODS) (17 January - 27 February 1991) by Frank B. Kelly, CAPT USN Ret. Includes editing by Todd Hyde and Mark Pugh. This is a detailed analysis of the USS Midway's participation in Operation Desert Storm. Chapters include 1) Early History and Maneuvers, 2) Mission and Forces, 3) CWC Concept, 4) The Air Campaign, 5) The Great Scud Hunt, 6) Anti-Surface Warfare Operations in the Northern Gulf, 7) Mine-Countermeasures (MCM) Operations, 8) CTF 154/Midway Accomplishments, 9) Significant Observations, 10) End-of-Combat, 11) References, 12) List of Figures, and 13) List of Appendices
2023.331.001	Vought F7U Cutlass: A Developmental History	Gardner, Tom	From Google: The Vought F7U Cutlass would be host to the following first time achievements for any naval aircraft: the first swept wing jet propelled fighter to operate from a carrier deck; the first to use an all-hydraulic irreversible flight control system; first tailless U.S. Naval jet fighter; first to incorporate a fully steerable nose wheel; first to use ailavators (elevons) as primary control surfaces; first near sonic fighter. The Cutlass would eventually evolve into the F7U-3,3M, and 3P. Touted as highly versatile in

Object ID	Title	Author	Summary
			functionality for tactical use, it would have certainly achieved "Super Star Status" if not for the nefarious unreliability of its Westinghouse J34 and J46 turbojets. This "Star Crossed" fighter didn't deserve the unrelenting and damning criticism it received throughout its career. The "Gutless Cutlass", "Widow Maker" and "Ensign Eliminator" as it was eventually known provided necessary contributions in the evolutionary process responsible at least in part for the superb carrier fighters in use today. Its complete story is presented here, including many photographs and line schemes.

Port calls included Pearl Harbor, Guam, Subic Bay, Buckner Bay, Yokosuka, Kobe, Sasebo and Hong Kong. Good pics of heavy seas in Typhoon Charlotte.
2023.334.002	USS Midway (CVA-41) - Westpac - 1961	Welles, Chris (ed)	Pictorial account of USS Midway (CVA-41) deployment to South East Asia. The aircraft carrier departed Alameda, CA on 15th February to Hawaii, Guam, Subic Bay; Philippines, to Japan (Sasebo, Yokosuka), Hongkong and arrived back in Alameda, CA on 28th September. Midway was one of three carriers ordered to the South China Sea in support of U.S. diplomatic efforts to broker a ceasefire between the Pathet Loa and the Loation Government between March and May of 1961. Carrier

Object ID	Title	Author	Summary
			Air Group 2 was aboard for the deployment and consisted of: VF-21 (F3H-2); VA-22 (A4D-2); VA-23 (A4D-2); VF-24 (F8U-2) ; VA-25 (AD-7); VMA-311 (A4D-2); VAH-8 (A3D-2); VCP -63 Det.A (F8U-1P); VAW-11 Det.A (WF-2); and HU-1 Det.1 (HUP-3).
2023.335.001	U.S. Aircraft Carriers : An Illustrated Design History	Friedman, Norman	From the Publisher U.S. Aircraft Carriers Revised Edition is one of the most comprehensive references available on the entire development of U.S. Aircraft Carriers, starting in 1920, with USS Langley CV-1, continuing to Enterprise, the mass-produced Essex-class, and the large Midway-class of post-World War II. Friedman authoritatively analyzes the design and performance histories of this popular type. The long careers of the Nimitz-class and the new Ford-class are also included. Like Friedman's other design history books, U.S. Aircraft Carriers is based largely on formerly classified internal U.S. Navy records"- From Publisher. Ship plans by A.D. Baker III
2023.336.001	USS America (CVA-66) Volume I 1981-82: A Year in the Life of an Aircraft Carrier	Spruill, W. D. (ed.)	A pictorial account of the activities of the USS America from December 1981 through November 1982 as the first of a two-book set, with 1982-83 as second book in set. A 20-page pictorial history of the America kicks off the book. Modern coverage starts with the entry of America into a maintenance availability at Norfolk Naval Shipyard in Newport News, VA. This included a period in drydock. The shipyard period was followed by workups that included Refresher Training and two periods of type training prior to a North Atlantic deployment. Atlantic operations from 23 August to 23 October 1982 saw America participate in exercises United Effort and Northern Wedding. As 1982 came to a close, America was preparing for another overseas deployment. This cruise book is a bit unusual in that a large section

Object ID	Title	Author	Summary
			is devoted to locations and entertainment venues in the Norfolk area enjoyed by the crew when in homeport. The book is also unusual because it contains no captioned crew photos, but the 1982-83 book does have crew photos. Port visits covered include St. Thomas, Virgin Islands, Edinburgh and Portsmouth, UK and Mayport, FL. Carrier Airwing One was embarked for workups and the North Atlantic deployment and was comprised of: VF-102 (F-14A); VF-33 (F-14A); VA-46 (A-7E); VA-72 (A-7E); VA-34 (A-6E and KA-6D); VAW-123 (E-2C); VAQ-135/6 (EA-6B); VS-32 (S-3A); and HS-11 (SH-3H). Contains A welcome aboard-type booklet normally handed out to visiting dignitaries upon boarding
2023.336.002	USS America (CVA-66) Volume II 1982-83	Spruill, W. D. (ed.)	A pictorial account of the activities of USS America in 1982-83 as the second of a two-book set, with 1981-82 as first book in set. This book covers the ship's Mediterranean/Indian Ocean deployment. The ship departed Norfolk on 8 December 1982 and returned to Norfolk on 2 June 1982. Notable operations were on the Lebanon Station and in the northern Arabian Sea. Port visits included: Palma, Spain; Athens; Colombo, Sri Lanka; Mombasa, Kenya; and Malaga, Spain. CVW-1 was embarked consisting of HA-11, VA-34, VA-46, VA-72, VAQ-136, VAW-123, VF-33, VF-102, VQ-2, VRC-50 and VS-32.
2023.337.001	US Attack Aviation : Air Force and Navy Light Attack, 1916-to the Present	Head, R.G.	From Amazon- Attack aviation is intense and dangerous. It necessitates the direct engagement of ground targets at low altitude. Attack aircraft are usually fighters or fighter-sized aircraft, with one or two engines, and one or two crew. This work provides an overview history of American attack aviation from its inception to present, including both the US Navy and Air Force. The pillars of the narrative are several case

Object ID	Title	Author	Summary
			studies that characterize the evolution of technology and tactics over time: SBD Dauntless, AD Skyraider, A-4 Skyhawk, A-7 Corsair II, A-10 Thunderbolt II, and F/A-18 Hornet. Each of the cases contains first-person accounts that include a description of the aircraft's origin, competitive procurement, major attack features, and combat employment. Author R. G. Head (Brig. Gen., Ret.) has extensive experience in combat (325 missions, DFC, Silver Star) and an in-depth understanding of doctrine (taught future pilots at the Air Force Academy) and gained first-person exposure to the policy and engineering aspects of the aircraft procurement process while serving at the Pentagon and later as a private consultant working in collaboration with the US Navy. This is a story about flying. It is told by naval aviators, Air Force fighter pilots, and the men who built the airplanes the pilots flew.
2023.338.001	Decommissioning of the USS Forrestal (AVT-59) - Philadelphia, Pennsylvania, September 11, 1993. 2023.340.001	Man Who Won World War II, The	James, Henry Johnson	From Amazon: he Battle of Midway is arguably the most influential naval battle of World War II. Japan intended that the invasion of Midway would draw out what remained of the US Navy after Pearl Harbor and force it to counterattack. If the US Navy had blindly counterattacked, they would have run into the entire Japanese Combined Fleet which was waiting for them just over the horizon. In one decisive battle, Japan intended to win the war in the Pacific. And they very nearly did. But an obscure codebreaker in a windowless basement in Hawaii was able to decipher the Japanese battle plans in time to allow the US Navy to prepare a surprise of its own. His breakthrough allowed Admiral Nimitz to ambush Japan's carrier force and destroy it. The resulting Battle of Midway was a catastrophe for Japan and a huge victory for America.
2023.340.002	American Military Aircraft : History of Innovation, A	Winchester, Jim (ed)	Book is organized by airplane manufacturers from Arco through Vultee and includes include 29 different companies. Although most companies are American that developed aircraft for "military use in the United States of America and a few developed outside that have made significant contribution to the US services." The aircraft included range from the early years through World War II, Vietnam and the Cold War and the postwar mergers. "Of the 20 or so major military aircraft active in 1950s and represented in this book, only four exist today under the same name. The others have either ceased to be, stopped making complete aircraft or have joined to form massive defense and

2023.341.003	D-Day, June 6, 1944 : The Climactic Battle of World War II	Ambrose, Stephen E.	Chronicles the events, politics, and personalities of that pivotal day in World War II, shedding light on the strategies of commanders on both sides as well as the ramifications of the battle. (From: WorldCat)
2023.341.004	80 Years of Air to Air Combat	Laming, Tim	It was obvious even before man could fly that aircraft would be an awesome weapon of war: de Lana, a monk of the 17th century talked of ships of the air dropping bombs in cities. But it was a reconnaissance platform, getting above the fog of war, that first balloons then powered aircraft were used. To chase away these unarmed renaissance aircraft the fighter was born. It has been said that technology needs a war to advance itself dramatically: the history of 20th century and this history of aviation have been the cauldron for significant advances.

Object ID	Title	Author	Summary
			From early World war 1 rifle-firing duels in biplanes to the Mach 2 interceptors of the Gulf War, air-to-air combat has evolved around technology. As the enemy gets a faster aircraft or a more manoeuvrable one or one that can fly higher or anything that your side's aircraft can't do, so you are at a disadvantage until you can bridge the technology gap. 80 Years of Air Combat charts the progress of aerial warfare, the great battles and machines that took part and development of weaponry that so often forced the pace. Over 350 photographs -most in colour- illustrate aircraft types- the Camels, Pups, Fokkers, SPADs and Albatros of World War 1; the Spitfires, Hurricanes, Messerschmitts, Mustangs, Thunderbolts, Corsairs, Zeros and Yaks of World War 2; the early jets - Sabres, Meteors, MiGs, Hunters, Starfighters and Phantoms; and today's multi-purpose fighters - F-15 Eagle, F-16 Fighting Falcon, F3 Tornado, F1 Mirage, Su27 'Flanker', MiG-29 'Fulcrum'. (From dustjacket)
2023.341.005	Matter of Honor - Pearl Harbor, A : Betrayal, Blame, and a Family's Quest for Justice	Summers, Anthony	An account of the Japanese attack on Pearl Harbor in 1941, the 'scapegoat' Admiral Husband Edward Kimmel, the failure of the top brass in Washington to provide Kimmel with vital intelligence prior to the attack, and the continuing efforts of the family to have Kimmel formally exonerated. (From: WorldCat)

2023.343.002	USS Midway 1963-1964	Romano, Jerry (ed)	A pictorial summary of the USS Midway crew on a deployment from Alameda NAS to the western Pacific with the Seventh Fleet from 8 November 1963 to 26 May 1964 with CAW-2 consisting of VF-21, VF-24, VA-22, VA-23, VA-25, VAH-8, VAW-11, and VFP-63 embarked aboard. Port visits included Hawaii; Subic Bay, The Republic of the Philippines; Hong Kong; and Sasebo, Beppu, Iwakuni, and Yokosuka, Japan. USS Midway (CVB/CVA/CV-41) aircraft carrier; lead ship of the class.
2023.344.001	Sea war, 1939-1945	Piekalkiewicz, Janusz	From the inside front jacket: The dominance of the seas was as important in the Second World War as it had been in any previous conflict. Winston Churchill wrote that nothing had caused him more concern during 1939-45 than the U-boat threat in the Atlantic, while the nature of the Pacific war was determined by that vast ocean. SEA WAR is an exhaustive chronological account of every theatre and every major event in which one of the combatant navies took part. As in Janusz Piekalkiewicz's previous books, AIR WAR and TANK WAR, a complete picture of strategy and tactics is built up. Factual, objective and absorbing, SEA WAR draws on sources as diverse as official reports, propaganda documents and press accounts; with 307 illustrations, it will quickly become an indispensable reference source for historians of the Second World War and for all those interested in naval history.
2023.344.002	Eagle Against the Sun : The American War with Japan	Spector, Ronald H.	Spector vividly recreates the major battles, little-known campaigns, and unfamiliar events of this brutal 44 month struggle. He reveals that the

Object ID	Title	Author	Summary
			US had secret plans to wage unrestricted submarine warfare against Japan months before Pearl Harbor and demonstrates that MacArthur and his commanders ignored important intercepts of Japanese messages that would have saved thousands of lives in Papua and Leyte. He skillfully takes the reader from top-secret strategy meetings in Washington, London, and Tokyo to distant beaches and remote Asian jungles with battle-weary GIs.
2023.344.003	Prelude to Pearl Harbor; the United States Navy and the Far East, 1921-1931.	Wheeler, Gerald E.	From the preface: During the years 1921 to 1931 American naval leaders faced a problem in some ways similar to the situation after 1947. They were convinced that the United States had a national enemy in Japan. But the United States Congress, like the public that elected it during the 1920's, was less than impressed; in fact it was positively hostile to any suggestion that America might again go to war. The President and his executive departments-save perhaps the War Department-were also reluctant to accept the Navy's conclusions or premises. How the United States Navy solved its problem of preparing for war in an unsympathetic climate of opinion is the story here presented.
2023.344.004	Short cut to Tokyo; the battle for the Aleutians	Ford, Corey	From Chapter One History can turn on a very small hinge. The history of Alaska, and perhaps the history of the American continent, swung last June on a little handful of landbased fighter-planes and bombers, appearing out of nowhere in the swirling Aleutian fog. . . .For the Japs were planning more than the capture of Dutch Harbor, on that fateful third of June. There is little doubt now that their grandiose scheme envisioned an actual assault, by way of Alaska, on our Pacific northwest. The Japs wanted-and, make no mistake about it, they still want-to set foot on United States soil some day. It is more than a matter

Object ID	Title	Author	Summary
			of military strategy; it is an emotional desire, a deep-seated and fanatic ambition that colors all their national thinking. And our apparently undefended Aleutians, which had served in prehistoric times as a land-bridge for invading hordes from Asia, offered once again a logical avenue of invasion for these modern barbarians striking at our shores.
2023.344.006	America Encounters Japan; From Perry to MacArthur.	Neumann, William Louis	From Amazon: This book is a general overview of the relations between the United States and Japan starting from the opening of Japan with the Matthew Perry expedition in the 1850s and ending with the period just after World War II. The book is written from mainly the American perspective. Prior to the opening of Japan, the country was mostly closed off to outside trade with only a few strict exceptions. This changed when the United States sent an expedition to Japan under Commodore Matthew Perry in the 1850s to force Japan to open up for trade. This action was successful. Relations between the United States and Japan remained mostly cordial during the remainder of the nineteenth century, but relations starting becoming strained as Japan adopted a more militaristic attitude. This included expansionism by annexing Korea and Formosa (now Taiwan). Of course, this eventually culminated in direct, total war between the United States and Japan in the middle of the twentieth century.
2023.344.007	Pacific Victory 1945	Driscoll, Joseph	From the Preface: THE AUTHOR regards this book as his own small contribution to victory. Within the limitations of space and censorship, he has tried to tell what our fighting men and our fighting ships have been doing in the Pacific to whip the enemy; how soon we may expect a complete victory; and the main paths to Tokyo that

Object ID	Title	Author	Summary
			we must follow. He believes our success is even greater than most Americans realize. He contends that it is a grand, inspiring story and should be told in the fullest detail. Now and then the author has pointed out a few things which stand in the way of speedy victory. His only apology for this is that he has not done it more often; for constructive criticism is something our armed forces and our home front can't have too much of. Generally speaking, war correspondents have found it easy to praise and hard to criticize-that is, if they wished to get their copy past the censors. Fortunately, this one-sided state of affairs is being corrected now that ultimate. triumph is assured, and from here on in it should be possible to present a realistic, balanced account of the war for adult readers to the end that the whole nation may unite to win the war without further delays, bickerings or blunders. And so, with this restrained display of optimism, your correspondent shoves off once again to cover a war which he is convinced will not last forever. JOSEPH DRISCOLL

2023.344.008	Fall of Japan, The : The Final Weeks of World War II in the Pacific	Craig, William	The Japanese were losing the war by the summer of 1945. The Emperor did not know this, nor did the Japanese people. The few Admirals and Generals who were aware of this kept the information close hold. Craig traces these last few weeks from both the American and Japanese points of view. His scope ranges from the fighting on Okinawa, to the home islands of Japan,and all the way back to the White House in Washington, DC. America has the capability to drop an atomic bomb, but Harry Truman, the new President, had to be let in on that secret.
2023.347.001	Midwatch in Verse New Year's Day Deck Log Poems on US Navy Ships	Johnson, David E. and Guinn, Gary (eds)	From Amazon: Naval deck logs require young officers to record mundane details of a ship's condition every few hours. According

Object ID	Title	Author	Summary
			to a U.S. Navy tradition, the New Year's midwatch log--covering midnight to early morning of January 1--can be entered as poetry. Each chapter of this first book-length examination of midwatch poems presents verses written 1941-1946 aboard a ship engaged in combat during World War II, including celebrated warships like the USS Enterprise and nameless vessels like PC 1264. Historical overviews of the ships' operations, along with biographical sketches of the author(s), relate each poem to its moment in history.Dedication

2023.349.002	Tales of a War Pilot	Kirkland, Richard C.	From Amazon: Richard Kirkland would never have imagined that anything could compare to tangling with Zeros in life-and-death dogfights over the South Pacific—but that was before he traded his fighter-pilot wings for rotors. It was a move he never regretted, and the riveting experiences he chronicles in War Pilot provide ample reason why. From the first primitive Sikorsky and the sophisticated choppers of Vietnam to flying medevac choppers and saving countless soldiers from certain death in Korea, Kirkland's firsthand accounts of pilots under fire provide a gripping portrait of not just one American hero, but the many courageous others with whom he flew. . . .

2023.355.001	USS Midway (CV-41) - Mediterranean Cruise - 1953	Hague, R. B. (ed.)	Pictorial account of USS Midway 170-day Mediterranean cruise From December 1952 to May 1953, of which 65 days were spent in various ports. The ship departed from and returned to Norfolk, VA. Post calls included Gibraltar, The French Riviera, Marseilles, Barcelona, Algiers, Augusta, Taranto, Naples, Genoa, LaSpezia, Rhodes, Salamonia, Palma and Oran. Significant operations included participation in NATO exercise Rendezvous in March.

Object ID	Title	Author	Summary
2023.355.002	USS Midway (CVA-41) - Mediterranean Cruise - 1954	D'Argenio, Raymond M. (ed.)	A pictorial account of the deployment of the USS Midway to the Mediterranean Sea in 1954. The ship departed Norfolk on 4 January and returned to Norfolk on 4 August. Port calls included: Gibraltar; Algiers, Algeria; Augusta, Sicily, Italy; Taranto, Italy; Salonika, Greece; Athens, Greece; Cannes, France; Marseilles, France; Barcelona, Spain; Genoa, Italy; Livorno, Italy; Palermo, Sicily, Italy; Naples, Italy; and Tangier, Morocco. CAG-6 was the embarked airwing and consisted of: VF-31 (F2H-2), VF-33 (F9F-6), VF-73 (F9F-6), VA-25 (AD-6/AD-4B), VC-12 Det. 35 (AD-4W) , VC-3 Det. 35 (AD-3Q/4NL), VC-62 Det. 35 (F2H-2P), VC-5 Det. 35 (AJ-1), and HU-2 Det. 35 (HUP-2).
2023.359.001	Shield and the Storm, The : Naval and Marine Corps Aviation in the Gulf War	Association of Naval Aviation, The	This publication is a pictorial and narrative account of the role Naval Aviation played in Desert Shield and Desert Storm. Its participation as a Coalition partner is described from the onset of the Gulf War, when Aircraft Carrier Battlegroups were the first on the scene, through the end of the fighting. The following are summaries of Navy and Marine Corps operational activities by aircraft; selected "first hand" accounts; a glossary (p. 44); and other highlights. The intent of the Association of Naval Aviation is to convey, insofar as possible in a book of this dimension, the achievements in the conflict of the courageous aircrews and supporting forces in Naval Aviation-the first in and the last out. (from Preface) 4-carrier shot with USS Midway included on page 2.
2023.359.002	Walk Around F6F Hellcat	Dann, Richard S.	The F6F Hellcat was the US Navy's primary fighter during late WW II. It shot down more Japanese aircraft than any other fighter. This volume gives a pilot's eye view of the Hellcat covering details seldom seen in other publications. 80 pages, 40 in color, over 200 photos.

2023.361.001	To Shining Sea : A History of the United States Navy 1775 - 1991	Howarth, Stephen	"To Shining Sea" is a landmark work of naval history --- the most comprehensive and authoritative narrative account of American sea power written in recent times. From John Paul Jones' defiant cry "I have not yet begun to fight," to the war in the Persian Gulf, this book recounts the epic story of the men and ships of the US Navy.
2023.362.001	USS Midway (CVA-41) - Westpac - 1961	Welles, Chris (ed)	Pictorial account of USS Midway (CVA-41) deployment to South East Asia. The aircraft carrier departed Alameda, CA on 15th February to Hawaii, Guam, Subic Bay; Philippines, to Japan (Sasebo, Yokosuka), Hongkong and arrived back in Alameda, CA on 28th September. Midway was one of three carriers ordered to the South China Sea in support of U.S. diplomatic efforts to broker a ceasefire between the Pathet Loa and the Loation Government between March and May of 1961.
2023.363.001	Siren Sea, The - A Novel	Pellar, Brian R.	Through the release of Freedom of Information documents, including a sailor's journal, details of the "Fuji Jiken" nuclear weapon incident are unveiled within The Siren Sea: In 1977, while playing chess, two sailors aboard the aircraft carrier USS Midway entertain the idea of how to get a nuclear weapon past security -- as the system is set up to keep someone from getting in, not out. However, their game turns serious after several traumatizing mishaps, and they commit to taking a W57 nuclear warhead off the ship in Yokosuka, Japan for humanitarian reasons. They plan to take the warhead to Mt. Fuji, notify the press, and become heroes. The Siren Sea is work of fiction that will keep readers captivated to the very end. (From author's website.) Former USS Midway crew

2023.364.001	United States Navy from the Revolution to Date, The	Reynolds, Francis J.	member. A largely pictorial account of U.S. Navy history through 1915 in large format. Many wonderful drawings of sailing ships and black and white photographs of later ships, submarines, early aircraft and shore installations such as the Naval Postgraduate School. Large format illustrated history of the U.S. Navy from the Revolution to 1917. Photographs arranged by Taylor, C.W.; Introduction by Knight, Austin M.
2023.364.003	Naval Leadership : With Some Hints to Junior Officers and Others	United States Naval Institute	Naval Leadership was first used by the class of 1924, the 3rd revision was in 1929, and this 4th edition is 1939. It is used as a textbook for the midshipmen at the United States Naval Academy.
2023.365.001	Compact History of the United States Navy, The	Pratt, Fletcher	All the drama and excitement of a wide ranging military adventure are packed into this famous one-volume history of the United States Navy. It is an all-time naval review, from the struggling young Navy of the American Revolution to the highly trained sailors of the war in Vietnam. Set against the backdrop of an emerging America, this story explores in depth the high spirited young men who joined the Navy and saw the world; their officers and leaders, often brilliant , sometimes eccentric; and of course the ships, from the graceful schooner to the high-powered atomic sub. Originally written by military expert and historian Fletcher Pratt and adopted as a textbook by the U.S. Naval Academy at Annapolis, this new edition has been revised and updated by Commander Hartley E. Howe to include an entirely new section on the U.S. naval activities in the Korean conflict, the Navy's major technological advances-in weapons and ships-and naval participation in the Vietnam war.

Object ID	Title	Author	Summary
			1984 to 12 December 1984 deployment to the Western Pacific, and the history of the Midway until she went in to drydock in March of 1985.. Midway was at this time homeported in Yokosuka, Japan. During the 5 month cruise (11984-85), Midway spent 111 continuous days at sea (on Gonzo Station) and steamed over 63,000 miles. Conducting almost 9,800 hours of flight operations, she launched and recovered over 5,300 aircraft, breaking the all-time record for the first quarter in any year of her history. Ports visits included Sasebo, Subic Bay, Manila, Pattaya Beach, and Singapore. A visit to Perth was cancelled to take up a USS Kitty Hawk commitment in the Indian Ocean. Carrier Air Wing Five (CVG-5) was embarked. Onboard for the 1983-84 deployment were: VF-161 (F-4S), VF-151 (F-4S), VA-93 (A-7E), VA-56 (A-7E), VA-115 (A-6E and KA-6D), VAW-115 (E-2B), VMFP-3 Det.B (RF-4B), VAQ-136 (EA-6B), and HC-1 Det.2 (SH-3G). Onboard for the October - December deployment were: VF-161 (F-4S), VF-151 (F-4S), VA-93 (A-7E), VA-56 (A-7E), VA-115 (A-6E and KA-6D) , VAW-115 (E-2B), VAQ-136 (EA-6B), and HS-12 (SH-3H). Page 457 lists deaths which includes personnel from VF-161, VA-115, VA-56, VA-93, Eng and Wep.

2023.369.002	Henry and other Heros: An Informal Memoir of High Dreams and Vanished Seasons	Bowen, Ezra	Ezra Bowen was a journalist, a senior editor for Sports Illustrated, a Editor at Time-Life Books, and a former USS Midway Crew Member. 2023.373.001	Hank Caruso's 37th Anniversiary AEROCATURES™ Calendar for 2018	Caruso, Hank	Hank Caruso's Aerocatures™ Calendar is a three-time award winner in the Calendar Marketing Association's annual National Calendar Awards competition. The Aerocatures™ Calendar was recognized in the categories of Most Original and Best Cartoon Art. Features 17 colour illustrations.

Object ID	Title	Author	Summary
			Hank Caruso's Aerocatures™ are among the most novel and distinctive images in aviation art today. Trained as both an artist and engineer, Hank Caruso's familiarity with aviation technology and aircraft operations enable him to convincingly show how flight crews feel about their aircraft and how the aircraft feel about themselves. His careful draftsmanship and attention to detail add a strong sense of realism to his dynamic portrayals of each aircraft's unique personality. The credibility of Hank's aviation art is enhanced by his first-hand flying experiences as a backseater with Navy and Air Force tactical, test, and training organizations, including the Blue Angels, Topgun, and the US Naval Test Pilot School. An Artist Fellow in the American Society of Aviation Artists (ASAA) and a contributor to the Air Force Art Program, Hank's creations appear regularly in Naval Aviation News. His art has been displayed in juried shows in art museums and galleries throughout the country. Many military aviation squadrons and civilian aerospace organizations have commissioned original Aerocatures™ for use as logos, special presentations, and limited-edition commemorative prints. He currently resides in southern Maryland. (Source: artist's website)

2023.374.001	USS Paul Revere (APA-248) Cruise Book 1958-59: By Sea to Land	None Stated	A pictorial summary of the Paul Revere's christening, commissioning and initial year of active service. The ship was built and commissioned in Long Beach and then homported in San Diego. The ship participated in amphibious exercises Rocky Shoals, Twin Peaks and Clear Ridge. Port visits included, Acapulco, Hawaii, Seattle and San Francisco.

2023.388.001	Rosie the Riveter in Long Beach	Schipske, Gerrie	During World War II, an unprecedented number of women took jobs at aircraft plants, shipyards, munitions factories, and other concerns across the nation to produce material essential to winning the war. Affectionately and collectively called Rosie the Riveter after a popular 1943 song, thousands of these women came to the U.S. Army-financed Douglas Aircraft Plant in Long Beach, the largest wartime plane manufacturer, to help produce an astonishing number of the aircraft used in the war. They riveted, welded, assembled, and installed, doing man-sized jobs, making attack bombers, other war birds, and cargo transports. They trained at Long Beach City Schools and worked 8- and 10-hour shifts in a windowless, bomb-proof plant. Their children attended Long Beach Day Nursery, and their households ran on rations and victory gardens. When the men came home after the war ended, most of these resilient women lost their jobs. (From: Library of Congress)

Flying Aces : Aviation Art of
World War II

Kitchens, James H.

This is volume one of a three
volume set. We have a book
with all three volumes under this
call number on the shelf. The
other two volumes are:

Object ID	Title	Author	Summary
			volume 2 : Bomber Missions and volume 3 : Carrier War. This book presents more than seventy dramatic war scenes painted by some of the most respected masters of aviation art, including Stan Stokes, Robert Taylor, and Roy Grinnell, each beautifully reproduced in full color. The paintings are enhanced with archival photographs of legendary Aces and historical descriptions of their planes and their greatest battles. This book was later incorporated with two other books in to Aviation Art of World War II which we also own.
2023.395.001	San Diego: An Illustrated History	Brandes, Ray	"The sons of Iberia carried the cross and the sword in their search for wealth, mythical regions, and legendary people at the farthest reaches of the globe." After centuries of search, they arrived at the rim of the Pacific to claim "a terrestrial paradise" they named San Diego. Ray Brandes, in this illustrated history of San Diego, illuminates the emergence of what many feel is America's finest city. With over 375 illustrations and photographs, carefully chosen from private and historical collections, he traces San Diego's development from 1542, when Juan Rodriguez Cabrillo sailed into sparkling San Diego Bay. Using archaeological evidence, he reconstructs the site as it was before European settlement and follows the identity-building of this lovely city through time, to the present. Concentrating on the colorful personalities of early settlers, Brandes tells the stories of the adventurers who exerted their wills and made their marks on the city as it developed. What impression did the native Americans make upon the first Spanish conquistadors? Who were the pioneering Americans who dared to homestead an isolated land and put San Diego on the map? What changes

Object ID	Title	Author	Summary
			were wrought by the contact made by traders from France, Holland, and England? After the Mexican-American War, what compromises were reached and between whom? What were the visions for the city of the new Anglo landowners? Men such as Bandini, Pico, Kimball, Horton, and Spreckels emerge as actors in a great drama of war and peace, prosperity and decline, and new growth. Brandes shows the response of the people to the disparate forces which tore at the fabric of the country, forces which were felt no less in this seemingly isolated southwestern paradise. He recreates the fiery time of the Mexican-American War and restages the flourishing Victorian era: the coming of electricity, streetcars, and the rapid influx of people and trade. He brings to life the drama of the architectural and industrial growth of San Diego, the days of the Great Depression, the challenge of being a military base during two world wars, and the sometimes awkward maturation into a metropolis that is today hailed as a prime example of urban planning. Of the major cities in California, San Diego has emerged as one of the most aloof and the most saluted. Tourists flock to the same beaches and bays where Spanish missionaries cautiously approached Indians on shore. Residents still enjoy the blue skies and clear waters that charmed their ancestors. Sixteen pages of color illustrations show off the breathtaking beauty of this historic city. The civic progress and pride of this unique city are enhanced by the personality of its past. A vivid portrayal awaits the reader in this delightful illustrated chronicle. (From dust jacket)

Object ID	Title	Author	Summary
	The: The Glory of Flight		threat in the aviation art world. Not only is he a painter who can portray aircraft with exemplary precision, but he can also place that aircraft in a panorama that rivals the work of the finest landscape artist. To top it all off, he is a master of in-flight action; his detailed, soaring work communicates the glory of flight. "When I look at the sky, I get the same thrill a sailor gets when he looks at the sea," Phillips says. In The Art of William S. Phillips: The Glory of Flight, you join this experienced artist and aviator on the flights of his life. Phillips' paintings of the great aircraft depicted in this book give you the experiences of an eyewitness in ways that photography never could. From the thrill of lift-off, the speed of low-level flying, the power of high-level bombing, and the danger of the dogfight, to the extraordinary exhilaration of just flying, William Phillips is your copilot. Through the text of Smithsonian and National Geographic writer Ted Park and rare archival photographs, you'll meet some of the top pilots and war aces. And through the paintings and accompanying sketches by Bill Phillips, you can experience air travel like never before. The finest reproduction possible is supervised by the artist to fill these pages with more than eighty full-color pieces of art, plus sketches and drawings direct from Phillips' personal sketchbooks. In addition, there are two three-page fold-outs, to communicate the sensation of flying as no other book can. "In my work, I hope to convey the beauty and exhilaration of flight," says Phillips. "The historical subjects, I research. The contemporary subjects, I live." Take off with The Art of William S. Phillips: The Glory of Flight.

Object ID	Title	Author	Summary
2023.397.001	Sole Survivor : The Battle of Midway and its Effects on His Life	Gay, George H.	The author states that in spite of the all the studies that have been done on the Battle of Midway, there are omissions and misunderstandings - even some downright false statements - about the events involving his unit, Torpedo Squadron Eight. This is the story of the author's military career, before, during and after the battle of Midway.
2023.397.002	Flight into Conquest	Kawato, Mike	From Amazon: Non-fiction book by former WWII Zero pilot and POW Masajiro "Mike" Kawato, detailing his exploits during and after the war. Signed and personalized by the author, including photos taken at signing.
2023.398.001	Aeronautics Aircraft Spotters' Handbook	Guthman, L.C. (ed.)	A concise aircraft identification guide from 1943 Reviewed in the United States on April 15, 2021 My grandparents gave me this identification guide and it contains and it divides aircraft into different categories based on number of engines, number of wings, and wing placement. It should be noted that the six-engine plane referred to as "Tupolev L-760" was the second Tupolev ANT-20 to be built, the first having been built with eight engines and used to spread communist propaganda to remote areas of the USSR, and that the four-engine bomber referred to as "Tupolev TB-6B (ANT-41)" is the Bolkhovitinov DB-A (the true TB-6 was a 1930s Tupolev project for a gigantic twelve-engine heavy bomber with a wingspan of 311 feet).
2023.399.001	USS Manley (DD-940) - Vietnamese Cruise 1967-1968	Gebeaux, R. J. (ed.)	USS MANLEY (DD-940), the fifth destroyer of the Forrest Sherman Class to be commissioned, is named in honor of Commodore John MANLEY of the Continental Navy. She is the third ship to bear his name. Her keel was laid on 10 February 1956, and MANLEY was christened by Mrs. Arleigh BURKE, wife of the then Chief of Naval Operations, on 12 April 1956.

Object ID	Title	Author	Summary
			She was built by the Bath Iron Works, Bath, Maine, and was delivered to the Boston Naval Shipyard where she was commissioned on 1 February 1957. In the ten years following her commissioning, MANLEY has sailed to all corners of the globe continually facing each uncharted challenge with professional pride and vigor. A perusal of her deck logs will produce accounts of deployments to the Mediterranean, Caribbean, Arctic Sea, Red Sea, Scandinavia, Persian Gulf, Indian Ocean, and culminating in an around the world cruise in 1966-67. She has participated in recovery operations for Projects Mercury and Gemini, evacuated American citizens and foreign nationals from the revolution-torn island of Zanzibar, and served as flagship for Commander, U.S. SIXTH FLEET. In 1961 she steamed to the Caribbean during the crisis in the Dominican Republic. She patrolled the waters off of Cuba during the quarantine of 1962. The winter and spring of 1966-67 found MANLEY facing the most significant challenge of her commissioned service when she was called into combat for the first time to support American and allied forces in Vietnam. Operating primarily as a gunfire support unit, she pounded enemy positions night and day for nearly four months inflicting heavy damage on the enemy. In April, she departed the South China Sea heading for her home port of Charleston only to learn her respite would be a short one in November she would return to Vietnam and the gunline.

Commenced 14 march 1966. Completed Training 13 May 1966.
2023.401.001	Lockheed C-121 Constellation	Ginter, Steve	From Amazon: The photos in this edition are black and white. In 1943 the Lockheed Model 49 Constellation was the fastest and most modern airliner in the world. They were purchased by the USAAC as C-69s and in 1948 the larger more capable Model 749 was purchased as the C-121A. This early Naval Fighters Series volume first published in 1983 covers the USAAC/USAF C-121A, the Navy PO-1W/WV-1 AEW version of the Model 749 from 1949, the stretched Model 1049 Navy transport R7O-1/R7V-1 from 1952, the Air Force Model 1049 versions C-121C/EC-121S/C-121G/AC-121/EC-121R, Navy WV-2/EC-121K AEW and Air Force EC-121C/EC-121D AEW platforms, and the experimental WV-2E/EC-121L AEW aircraft and the turbo-prop R7V-2/YC-121F transport. Book includes brief Navy squadron histories, detail drawings, and essays on flying the Connie, Vietnam, College Eye/Big Eye, 552nd AEW, Bat Cat and AEWBARRONPAC.
2023.401.002	Colors & Markings of the Recon Phantoms	Kinzey, Bert and Leader, Ray	From the Introduction: For over a quarter of a century, the F-4 Phantom served as a front line fighter for the U.S. Navy, Marines, and Air Force. Other Phantoms were exported to foreign nations or built under license in Asia and Europe. As a result, the F-4 became one of the most widely used and

Object ID	Title	Author	Summary
			popular combat aircraft in aviation history. It was considered by many to be the premier fighter of its day, and it served admirable in combat. From Vietnam to Desert Storm, Phantoms flew almost every conceivable mission a fighter could perform. But ironically it was the RF-4B and RF-4C reconnaissance variants which remained operational with the Marines and Air Force longer than any of the eight major fighter variants used by these services. This book is the most extensive reference ever published which covers the paint schemes and markings used on these reconnaissance Phantoms.
2023.401.003	Air War Over Southeast Asia-A Pictorial Record 1962-1975	Drendel, Lou	Foreword: It is now some years since South Vietnam ceased to exist as a political entity. As those final, agonizing days of April, 1975 recede from memory, it has become fashionable to refer to the Vietnam War as the war that we lost. That is a bitter choice of words, and one which is much too simplistic in view of the complex nature of our involvement in Indochina. Complex as the Vietnam War may have been, it was not unique in history, and the chronicles of war are filled with admonitions from some of the most famous warriors of the past which might have been written to fit our Vietnam experience. The Vietnam War is often referred to as a "political war", with the inclination that the motives for involvement were unusual, or that the rules for fighting it were different. Karl von Clausewitz, in his famous treatise "On War" said; "War is nothing more than the continuation of politics by other means." The leadership on both sides of the Vietnam War understood this well. In the final analysis, it was their success....and failure....in rallying their respective constituencies to their policies that determined the outcome.

Object ID	Title	Author	Summary
			While Lyndon Johnson was promising the American people that he would never send American boys to fight the battles of Asian boys, (during the Presidential Election campaign of 1964) plans were being made to do just that. When American boys did begin to fight and die in Vietnam, it didn't take long for cynicism about the war to spread. An oft-repeated joke of 1965 went; "They told me if I voted for Goldwater, we would get into a war. They were right. I did, and we are!" But American lawmakers effectively ended the Vietnam War by cutting the feet out from under the South Vietnamese when they were facing their greatest challenge. By refusing aid during the final cataclysmic communist assault in the spring of 1975, the United States Congress made evident their willingness to abandon South Vietnam. In these pictorial histories of the air war over Southeast Asia during the sixties and seventies, the people, the tactics, and the technology of that war will be emphasized. It will become evident that the fact that we lost the Vietnam War had little to do with our capacity to fight that war. Nor did we lose because of a lack of commitment by the troops, particularly in the early stages of the war, when President Kennedy's pledge to bear any burden, meet any hardship, support any friend and oppose any foe to assure the survival and success of liberty was still inspiration enough for those who would pay the ultimate price. It is my profound hope that these volumes will honor those who served honorably, for so little acclaim. But perhaps more importantly, they will help us to heed the words of George Santayana, who said; Those who cannot remember the past are condemned to repeat it.
2023.404.001	Vietnam: Phantoms of the Sky	Ball, Robert E. Jr.	In air-to-air dogfights, F-4 Phantom Interceptors

Object ID	Title	Author	Summary
			enjoyed a 5 to 1 kill ratio over the North Vietnamese MiG fighters which filled the skies over Hanoi. And during close-air support missions along the perimeter of the Khe Sanh Marine Base, F-4 Phantoms strafed, fired rockets and dropped napalm on advancing Viet Cong and NVA Positions until B-52 Arc Light bombers arrived to help lift the 66 Days Siege" -- description from box.

2023.404.026	USN Aircraft Carrier Air Units, Vol. 2, 1957-1963	Kasulka, Duane A.	By mid 1950 the United States Navy was faced with an increasingly uneasy international cold war and the possibility of a nuclear war. The Korean War had demonstrated the importance of conventional weapons, but US military policy was centered around the thesis that there would be no major conflict without the use of nuclear weapons. The US

Object ID	Title	Author	Summary
			Navy achieved true strategic capability with the arrival of the first of the new super carriers, USS FORRESTAL (CVA-59) in 1955. This was the first post war built carrier and had the capability of operating nuclear armed jet aircraft. Four sister ships were authorized at the rate of approximately one per year. Navy plans were to eventually have twelve of these new FORRESTAL class carriers with the possibility of nuclear propulsion on later versions. Along with the three MIDWAY class carriers, the Fleet would have fifteen attack carriers. In 1956 the French and British and Israelis carried out a military intervention in Egypt in order to keep the Suez Canal open. The Cold War had been heated up by the Soviet-bloc with near flood level arms shipments into the Middle East to further their repeatedly stated objective of global conquest. There had been an aborted military coup in Jordan that was inspired by the newly formed United Arab Republic (UAR) made up of Egypt and Syria. The Sixth Fleet was called in for a show of force during April to discourage the UAR from armed intervention in Jordan. Armed rebellion followed in Lebanon in May. In July a bloody coup in Iraq killed the pro-western king. Lebanon, fearing a communist inspired revolution requested US help on the 15th of May. The only available force was portions of the Sixth Fleet which sent Marines ashore the next day with eleven aircraft as air cover! In just over a week 350 aircraft aboard five US carriers were available and by October the situation had stabilized and US forces were withdrawn. On 25 August 1958 the Nationalist Chinese off shore Islands of Quemoy came under an artillery attack from Communist China. This time the Seventh Fleet was placed on alert and ordered to prepare

Object ID	Title	Author	Summary

Additional carriers were called in to patrol the Formosa Straits and escort Nationalist Chinese supply ships to and from the islands being shelled. The Fleet buildup plus that of USAF and USMC convinced the Communists that the US commitment was real and the shelling was quickly reduced. August of 1960 saw the missile rattling of Russia's Premier Khrushchev in response to the United States and United Nations intervention in the Congo strife. Again the Fleet was called on to move forces into both the Mediterranean and the Pacific. Three CVAs were provided in both locations. To maintain six aircraft carriers continually on station required eighteen, but the Navy was able to briefly scrape together only sixteen carriers with the arrival of the KITTYHAWK (CVA-63) in April 1961, the CONSTELLATION (CVA-64) in October, the nuclear powered ENTERPRISE (CVAN-65) in November, and by retaining older ESSEX carriers.
			The Vietnam War saw a heavy commitment of US Navy carrier aviation, both in the South and in the bombing campaigns against North Vietnam. American combat involvement in Southeast Asia began on 2 August 1964 when North Vietnamese torpedo boats attacked US surface ships operating within international waters in the Gulf of Tonkin. As in the Korean War, carrier aviation was quickly called on to support our allies in South Vietnam. The lack of international support for the French at Dien Bien Phu in May of 1954, and their own populist clamoring for withdrawal, gave North Vietnam to the Communists. Twenty years later public clamor in the United States, coupled with a war that was

Object ID	Title	Author	Summary
			run by politicians and the press, would give up South Vietnam to Communist rule. South Vietnam had enjoyed a short lived peace during the early 1950s. During this time the communists regrouped and began organizing their guerrilla forces in the South. During the late 50s South Vietnam, Laos, and Cambodia all began seeing increasing insurgent activity. Throughout this period carriers of the US 7th Fleet maintained a presence in the South China Sea. After the attack on the destroyers USS MADDOX and USS TURNER JOY in August of 1964, the US began supplying South Vietnam with limited numbers of advisors, equipment, and provided aerial reconnaissance to monitor communist activities. Gradually carrier strength in the Gulf rose to three attack and one anti-submarine carrier on station. On 7 February 1965 the guerrillas (now known as the Viet Cong) attacked US advisors at Pleiku, South Vietnam, killing nine and wounding one hundred. The US retaliated against North Vietnam and this was followed by another attack by the Viet Cong. Again US carrier aircraft were directed to retaliate and ninety-nine aircraft headed towards North Vietnam. This cycle of attack and retaliation continued and by June of 1965 the Navy was supporting five CVAs off the coast of Vietnam. While the war escalated in Vietnam, the communists in North Korea became bold and seized the intelligence ship, USS PUEBLO on 22 January 1968, while it was operating in international waters off Korea. A carrier Task Force was ordered into the area and in the US, Naval Air Reserve carrier squadrons were activated. Finally the crew was released but by then the long expected communist offensive in South Vietnam had begun.
2023.404.028	ARCO NAVY PILOT Naval	Dyke, David W. Captain,	Navy Pilots and Naval Flight

Object ID	Title	Author	Summary
	Flight Officer	USNR (Ret.)	Officers hold some of the most challenging, action-packed jobs in today's armed forces. And if you join their elite ranks, you could qualify for top assignments in aviation-including TopGun and astronaut! Arco's Navy Pilot is the only in-depth guide to the training required for these exciting positions-and to the aviation assignments and careers available in the Navy, Coast Guard, and Marine Corps. Written by a veteran Navy Pilot, it features: Complete coverage of the major aviation training programs-from flight student to fleet-qualified pilot - Concise introduction to the major academic subjects that pilot and NFO candidates must master - What to expect during first tour assignments PLUS: Select follow-on assignments: test pilot, Blue Angel, Strike U, TopGun, and astronaut! (From: back cover).
2023.404.029	Topgun: Miramar	Brackeen, Donna	US Naval Air Station Miramar lives up to its nickname of "fightertown USA". Being home to F-14 Fighting Falcons, Miramar enjoys legendary status among aviators across the world since the formation of the Naval Fighter Weapons School, better known as Topgun. This book looks at Topgun. (From Worldcat).
2023.404.030	Pictorial History of the Blue Angels, A : U.S. Navy Flight Demonstration Teams 1928-1981	McGuire, Jim	A history of Navy and Marine Corps flight demonstration teams. Precision formation flying was a routine even before the Three Sea hawks of 1928. In 1946 the Blue Angels became the Navy and Marine Corps' first official flight demonstration squadron.
2023.404.031	U.S. Navy's Strike Warfare Center	Smith, Barry D.	One of a series of books designed to be of interest to the military vehicle, aviation, uniform and equipment modeller and enthusiast. This particular book looks at the air combat training facility where navy and aggressor planes train together. (From Worldcat).

			26 December 1963. Ports of call: Pearl Harbor, Subic Bay, Hong Kong, Sasebo, Moji, and Yokosuka. Ship roster included.
2023.409.009	Curriculum for Petty Officer Leadership Training (30 Hours)	Bureau of Naval Personnel	Curriculum prepared in the Service Schools Command, San Diego in cooperation with the Service Schools Command, Great lakes, IL, the Service Schools Command, Norfolk and representatives of the Bureau of Naval personnel. The purpose of the course is to provide a framework for a basic course of instruction in leadership knowledge, skills and attitudes for all petty officers attending Class "B" schools.
2023.409.010	USS Sperry (AS-12) - The Sixth Anniversay May 1, 1942 - May 1,, 1948 - 1948	Brink, N. V. (ed.)	Pictorial booklet commemorating the sixth anniversary of USS Sperry (AS-12) celebrated on 1 May 1949. Text describes war history, presents short biography of namesake, Elmer A. Sperry, and outlines department news, division news, and ship sporting events.
2024.000.012	Voices of Midway	USS Midway Museum	This is the storyboard that was written by Michael Bayouth for the video for the Battle of Midway Theater on the USS Midway Museum, The DVD is available in the Library and can also be purchased in the bookstore. The movie is directed by Scott Levitta, written by Richard Christian Matheson, and the storyboard was written by Michael Bayouth
2024.004.004	U.S. Aircraft Carriers : An Illustrated Design History	Friedman, Norman	This book treats the reader to detailed information on every U.S. carrier class, from the Nimitz class to the "side-wheeler" training carriers that operated in the Great Lakes during World War II. Book includes comprehensive history of flight deck plans, outboard profiles, sketches of major design studies, and descriptions of several unique carrier proposals that never got beyond the designer's table but still had a major influence upon contemporary design thinking.

Object ID	Title	Author	Summary
2024.004.005	Walk Around EA-6B Prowler	Michaels, Joe	The need for Electronic Warfare aircraft developed after WWII with the rapid development and proliferation of sophisticated guided weapons. The EA-6A was put into service in the 1960s, and served in Vietnam, but, it was clear the EA-6A was only a stopgap, and that a greatly expanded version was needed. This resulted in the EA-6B, which entered service in 1971. This title gives inside and out coverage of fuselage, wings, tail, cockpits, engines, landing gear, and more. Illustrated with over 83 b/w and 118 color photos, 12 color drawings, 5 b/w drawings. Michaels; 80 pages. SS5535 \$16.95 (from squadronsignalpublications.com)
2024.004.006	F-14 Tomcat-	Spick, Mike	Grumman F-14 Tomcat: the West's biggest, costliest, and most complex fighter aircraft. In-depth analysis of the devastatingly armed defender of the US Navy's carriers. Glossary, abbreviations, aircraft specifications, and production information is included.
2024.004.007	F-4	Richardson, Doug	McDonnell Douglas F-4 Phantom II: the greatest fighter in the world for more than 20 years, serving a dozen air forces. Detailed account of the West's most versatile front-line warplane, from carrier-based fighter to electronic warfare aircraft. Glossary, abbreviations, and aircraft specifications are included.
2024.004.008	Harrier	Gunston, Bill	British Aerospace Harrier and Sea Harrier: the world's only combat-proven vertical take-off strike fighter A most effective but controversial aircraft, from shipborne fighter to land-based attack aircraft. List of abbreviations, Harrier variants, and specifications are included.
2024.004.009	F/A-18 Hornet	Spick, Mike	McDonnell Douglas F/A-18 Hornet: fighter replacement for the F-4 Phantom, attack

Object ID	Title	Author	Summary
			successor to the A-7 Corsair. A detailed account of the US Navy's uniquely versatile strike fighter that has set new standards in warplane design. A glossary with abbreviations and the aircraft specifications are included in tables.
2024.004.010	Doolittle Raid, The	Schultz, Duane P.	The story of the first U.S. attack on Japan of World War II and of the 80 young men who beat incredible odds to complete a daring and important mission.
2024.024.002	TBD Devastator Units of the US Navy	Tillman, Barrett	The first monoplane aircraft ordered by the US Navy for carrier operations, the Douglas TBD Devastator was designed to fulfil a requirement for a new torpedo bomber. Just 129 were built, and when it entered service it was the most modern aircraft of its type anywhere in the world. Its only real taste of action came on 4 June 1942 in the pivotal Battle of Midway, when 35 were shot down in a clash with Japanese A6M Zero fighters. The aircraft was replaced by the Grumman Avenger weeks later. Paperback; August 2000; 98 pages; ISBN: 9781841760254 (from ospreypublishing.com)
2024.048.001	Flight Crew Checklists	None Stated	A personal compilation of assorted kneeboard-sized checklist cards for a Kaman Seasprite helicopters covering a myriad of situations for flight in San Diego. Includes excerpts from NAVAIR 01-260HCD-1. Also includes Launch and Recovery information, Standard Instrument Departures, Functional Check Flight Procedures.
2024.048.002	NATOPS FUNCTIONAL CHECKFLIGHT CHECKLIST	Chief of Naval Operations	A compilation of kneeboard-sized checklist cards for a Kaman Seasprite helicopters SH-2F/HH-2D. Supersedes NAVAIR 01-260HCD-1F dated 1 December 1980.
2024.053.003	Vertigo Sense	Aviation Training Branch, Office of the Chief of Naval Operations	Explains what vertigo is and provides tips on how to avoid it (trust your instruments).
2024.053.004	Navy Aircraft Accident, Incident, Flight Hazard and Ground Accident Reporting	Office of the Deputy Chief of Naval Operations (Air)	This instruction sets forth requirements for the investigation of aircraft

Object ID	Title	Author	Summary
	Procedures		accidents, incidents, flight hazards, and ground accidents, and reporting procedures therefor; establishes control over accident data; and establishes responsibilities for the foregoing.
2024.053.005	Aviation Medical Safety Training Manual	Chief of Naval Operations, Air Training Division	Lays out the duties and responsibilities of the flight surgeon, and expounds upon accident investigation procedures, the accident prevention program, and physiological, psychological and physical factors involved with flying high performance aircraft.
2024.053.006	Helicopter Training Manual	Chief of Naval Operations, Air Training Division	Designed to help helicopter pilots and crewmen trainees better understand the background, theory of flight, and presently developed operating procedures for this comparatively new airborne vehicle. The book is in three parts: History; Theory; and Operations.
2024.053.007	Physiology of Flight	Air Force Medical Service	Meant to acquaint the flight surgeon and other concerned personnel with the physiological stresses to which the Air Force aircrew member is subject in present day aviation, and especially those problems created by current developments in high speed and stratospheric flight. 18 Chapters.
2024.053.008	Flight Handbook Navy Models HSS-1, HUS-1, HUS-1A Helicopters	Secretary of the Air Force, Chief of the Bureau of Aeronautics	The purpose of the book is to describe the helicopter, its equipment, and its operation so that a flight crew will have sufficient information to efficiently accomplish a safe flight. Sections headings are: Description; Normal Procedures; Emergency Procedures; Description and Operation of Auxiliary Equipment; Operating Limitations; Flight Characteristics; Systems Operation; Crew Duties; and All-Weather Operations.
2024.070.005	USS Midway (CVA-41) - World Cruise - 1954-55	Patureau, Alan C.	Pictorial account of the world cruise of USS Midway in 1954-55, conducted as Midway was changing homeports from Norfolk, VA to the west coast

Object ID	Title	Author	Summary
			of the U. S. The ship departed Norfolk 27 December 1954 and transited to the Pacific via the Cape of Good Hope. She operated in the western Pacific with the U.S. Seventh Fleet, conducting the Formosa Straits patrol and other fleet exercises and maneuvers in the South China Sea. She arrived at her new homeport of Alameda, CA on 14 July 1955. She remained there for only a week before proceeding north for a major overhaul at Bremerton, WA which commenced on 3 August 1955. Port calls during her deployment included Mayport, Capetown, Colombo, Manila, Hong Kong, Yokosuka and Pearl Harbor.
2024.070.006	USS Midway (CV-41) / Carrier Air Wing Five "Winners" 1978-1979	Begy, C. R. (ed.)	A pictorial account of the activities of USS Midway in the general period February 1978 through May 1979. Operations included deployments through the South China Sea to the Indian Ocean and exercises Multiplex 79, Team Spirit 79 and a joint exercise with the Iranian Navy. Also documented are many visits by VIPs to the Midway. Countries visited included Japan, Korea, Thailand, Republic of the Philippines, and Kenya. Pages 186-191 show the Russian (Soviet Union) ships and planes in the area. Onboard: Commander Carrier Group Seven (COMCARGRU-7) Commander Carrier Group One (COMCARGRU-1) Commander Carrier Group Three (COMCARGRU-3) Carrier Air Wing Five (CVW-5) VF-161 (F-4J) VF-151 (F-4J) VA-93 (A-7E) VA-56 (A-7E) VA-115 (A-6E and KA-6D) VAW-115 (E-2B) VMFP-3 Det.2 (RF-4B) VMAQ-2 Det. 2024.071.001	USS Midway (CVA-41) Voyage 71	Rehr, W. E. (ed)	Pictorial summary of the western Pacific deployment of USS Midway in 1971 including strike operations off Yankee

Object ID	Title	Author	Summary
			Station in the Tonkin Gulf during the Vietnam War. Departed San Francisco Bay 16 April 1971 with Attack Carrier Air Wing Five consisting of VA-56 (A-7 Corsair IIs), VA-93 (A-7 Corsair IIs), VA-115 (A-6 Intruders), VAW-115 (E-2 Hawkeyes), VF-151 (F-4 Phantom IIs), VF-161 (F-4 Phantom IIs), VAQ-130 Det 2 (EKA-3 Skywarriors), VFP-63 Det 3 (RF-8 Crusaders), and HC-1 (SH-3 Sea Kings) Det 8 deployed aboard. Ports of call included Yokosuka & Sasebo, Japan; Subic Bay, The Philippines; Hong Kong; Hawaii. Includes encounters with Russian naval vessels and Tu-16 "Badger" and Tu-95 "Bear" aircraft.
2024.075.013	Boot Camp! U.S. Navy Recruit Training In Sound	Casey, George	LP Album of recording from 1959 of a recruit going through the nine week boot camp training in sound. Introduction, impressions of incoming recruits -- Welcome speeches to the Navy, formal and informal -- Receiving and outfitting processing through physical examination, shots, haircut, clothes fittings and stencilling -- Basic battery test -- Physical training -- Physical drill -- Calling the bag and bag layout inspection -- Company formation -- In the classroom -- Fire fighting -- Barracks study period -- Bull sessions and song -- Introduction, side two -- Interviews with recruits half way through training -- Rifle indoctrination on the .22 range -- On the M-1 range -- In the butts -- General drills practice aboard a training ship -- Seamanship in the whaleboat -- Whaleboat races -- Recruit boxing matches -- Religious services -- Through the chow line -- Galley duty - Drill on the grinder including review practice -- Graduation review -- Some graduating recruits look back -- The official goodbye -- Taps and narration close.
2024.301.001	Naval Battle of Guadalcanal, The : Night Action, 13 November 1942	Grace, James W.	One of the most ferocious naval battles of World War II, the night action off the coast of Guadalcanal on 13

Object ID	Title	Author	Summary
			November 1942-between U.S. cruisers and Japanese battleships fighting at point-blank range-claimed the lives of two American admirals. Though famous for tipping the scales in favor of the U.S. Navy in this critical area of the Pacific, this action has never before received the treatment provided in this book. Here, James Grace describes events from deck level and from both sides. He draws on a wealth of previously untapped primary sources, including the vivid personal recollections of some two hundred Japanese and American survivors of the fight. These eyewitness accounts lend immediacy to a work that will appeal to the general reader as well as to serious World War II buffs and historians. While the focus is on the details of the actual battle, the book also covers the planning on both sides that led to the action and the missions of the American and Japanese task forces. Grace defines the roles played by intelligence, the weather, and the air forces. He presents information about how the Americans knew of Japanese plans to bombard the island yet managed only to throw a force together out of desperation. He points to the confusion caused by the deaths early on of the American commanders, the miserable performance of U.S. torpedoes, and the limitations of radar. Because naval leaders on both sides have been criticized in the past for how they conducted the fight, the author also explains why events occurred as they did and why the battle was so crucial to the overall Guadalcanal campaign. Fourteen maps help the reader follow the action, and photographs bring events alive. The fruit of many years of research, this study adds an important dimension to the battle.

Object ID	Title	Author	Summary
2024.301.002	US Naval Air Power: West Coast 2010-2020	Roegies, Patrick	The United States Naval Aviation service celebrated its 100th anniversary in 2011 and since then it has continued to be at the forefront of military aviation developments. The past ten years have been significant for continuous improvement, development, and efficiency. In that time, the service has dealt with highlights and various challenges, such as a sequestration in 2013, the resulting reduction in combat readiness, and aircraft manufacturing delays. Focusing on the squadrons of the US Navy and Marine Corps, and illustrated with over 150 images, this book delves into the various carrier air wings, the aircraft, such as the F/A-18 and E2 variants, and the training that together make US Naval Aviation the force it is today. It describes the developments of the West Coast bases over the past decade, the successes the United States Navy has achieved, and the methods used to further standardize and optimize the fleet. (Source = Ebook Central)
2024.301.003	NATOPS Pilot's Pocket Checklist A-7E Aircraft	Chief of Naval Operations	Provides pocket-size standardized ground and flight procedures for the Navy Model A-7E aircraft Does not include tactical doctrine. This manual supersedes NAVAIR 01-01-45AAE-1B dated 15 March 1975 including Changes 1 through 6.
2024.301.004	NATOPS Flight Manual Navy Model TA-4F/TA-4J Aircraft	Chief of Naval Operations	Reference data, normal procedures and special procedures for inflight malfunctions and emergencies in a kneeboard-sized booklet for use by pilots in flight. Provides standardized ground and flight procedures for the Navy Model TA-4F/TA-4J Aircraft. Does not include tactical doctrine.
2024.301.005	St. Lo -- Midway	Brooks, William C. (ed)	This is a compilation of data about the USS St. Lo (CVE-63) which was originally the USS Midway (CVE-63). It includes photocopies and artwork from John M. Downs which illustrates the attack on and

Object ID	Title	Author	Summary
			the sinking of the USS St. Lo on October 25, 1944. Also includes transcribed letters from William C. Brooks, Jr., father of the editor of this book, pictures, and a citation citing Brooks for his torpedo bombing against the Japanese on October 25, 1944 from the St. Lo,

Randy Goguen delineates the cultural, economic, and political conditions as well as the technological changes that shaped this movement over the course of a century. Starting

Object ID	Title	Author	Summary
			with the establishment of the Yeomen (F) in World War I and continuing through today to address the current arguments over the registration of women for Selective Service and the reform of the military justice system, Goguen describes how changes in civilian society affected the U. S. Navy and the role of Navy women. She highlights the contributions of key women and men in the military and civilian spheres who were willing to challenge convention and prejudice to advance the integration of women and make the U.S. Navy a stronger institution. Today women in the U.S. Navy have proven themselves essential to the mission success of the service. They are forward deployed around the world, sharing the same risks as their male counterparts. Some have commanded logistics and combatant ships, including aircraft carriers. They fly and maintain combat and patrol aircraft and serve as crew members on ships and submarines. Some hold major commands ashore and have risen to the highest echelons of navy leadership. Integrating women into the U.S. Navy has been a long and often contentious process, as women strived to overcome resistance imposed by prevailing cultural and institutional norms and patriarchal prejudices. Goguen, a retired naval reserve officer who holds a PhD in military history from Temple University, has written a comprehensive and up-to-date history of women's integration into the Navy. She argues that throughout the process, the decisive force driving progress was exigency. That exigency took various forms: two world wars, communist expansionism in the Cold War, the ending of the draft and the establishment of the All-Volunteer Force, as well as the political pressures posed by social change,

Object ID	Title	Author	Summary
			especially the mid twentieth-century feminist and contemporary "Me Too" movements. Despite a deeply ingrained institutional resistance cultivated within an insular, often misogynist, sea-going subculture, today's U.S. Navy could not meet its mission requirements without women. Goguen asserts, "Exigency is the mother of integration."
2024.302.005	America's First Aircraft Carrier: USS Langley and the Dawn of U.S. Naval Aviation	Winkler, David F.	USS Langley (CV-1/AV-3) was the United States Navy's first aircraft carrier, converted in 1920 from the collier USS Jupiter (AC-3), and also the U.S. Navy's first electrically propelled ship. Conversion of another collier was planned but canceled when the Washington Naval Treaty required the cancellation of the partially built battlecruisers Lexington and Saratoga, freeing up their hulls for conversion to the aircraft carriers CV-2 and CV-3. Langley was named after Samuel Pierpont Langley, an American aviation pioneer. Following another conversion, to a seaplane tender, Langley fought in World War II. On 27 February 1942, she was attacked by dive bombers[10]of the Japanese 21st and 23rd Naval Air Flotillas and so badly damaged that she had to be scuttled by her escorts. (from Wikipedia)
2024.302.008	My Dearest Bea	Roberts, Peyton H.	In May 1951, a lovestruck sailor said a tearful goodbye to his sweetheart before boarding the USS Midway. Longing for home, he picked up a pencil and poured out his heart. My Dearest Bea is a rare collection of intimate love letters written by U.S. Navy Band trumpet player Bill Holston to his new bride in Norfolk, Virginia, during the long months of sea duty following their wedding day. When the letters are discovered generations later, a blossoming romance leaps off the page transporting readers into the heart of a timeless love story. (Amazon.com)

Object ID	Title	Author	Summary
2024.302.009	Mighty MOO, The	Canestaro, Nathan	The USS Cowpens and her crew weren't your typical heroes. She was a flattop that the US Navy initially didn't want, with a captain nearly scapegoated for the loss of his last command, pilots who self-trained on the planes they would fly into combat, and sailors that had been in uniform barely longer than the ship had been afloat. Despite their humble origins, Cowpens and her band of second-string reservists and citizen sailors served with distinction, fighting in nearly every major carrier operation from 1943 to 1945, including the Battles of the Philippine Sea and Leyte Gulf. Together they faced a deadly typhoon that brought the ship to the verge of capsizing, and at war's end there was only one US aircraft carrier in Tokyo Bay to witness the Japanese surrender—The Mighty Moo. In the years to follow, Cowpens' service has become the wellspring for a remarkable modern tradition, both within the US Navy and the small Southern town that still celebrates her legacy with a festival every year. The Mighty Moo is a biography of a World War II aircraft carrier as told through the voices of its heroic crew—a "Band of Brothers at sea." - Amazon
2024.302.010	Solomons Air War Volume 1	Claringbould, Michael John	"This first volume of Solomons Air War chronicles aerial warfare in the opening phase of the war in the Solomons Islands theatre, being the critical period of August-September 1942. After occupying the Solomon Islands capital of Tulagi with ease in May 1942, the Imperial Japanese Navy commenced building an airfield on the adjacent island of Guadalcanal. The indispensable airfield was over 600 miles distant from their main base of Rabaul and promised to extend the reach of their aircraft into the Allied occupied island chains of Fiji, the New Hebrides and New

Object ID	Title	Author	Summary
			Caledonia. Much was at stake and the airfield would be held at all costs. Then, in early August 1942 a bold American invasion of both Tulagi and Guadalcanal caught the IJN completely off guard. Nevertheless, Japanese air power responded swiftly and in some cases desperately. So began the knife-edge struggle for Guadalcanal. An ever-increasing variety and number of IJN units was poured into the struggle, met initially with USN carrier-based Wildcats backed up by SBD Dauntless dive-bombers and the new TBF torpedo bomber. These were soon joined by USAAF fighters operating from the newly operational Henderson Field. From late August, Japanese carriers entered the fight, adding more complexity to the intense and frenzied air battles. For the first time belligerents are closely matched and the rationale of the IJN's sometimes erratic response is explained. The full extent of both Japanese and US involvement is outlined to a level of detail never before presented."-- Provided by publisher

2024.302.011	Solomons Air War Volume 2	Claringbould, Michael John	This second volume of Solomons Air War chronicles aerial warfare in the Solomon Islands theater during the critical month of October 1942. It can be read alone or as part of the ongoing Solomons Air War series. October 1942 saw an explosion of air activity in the Solomons. During the first three weeks of the month busy Tokyo Express runs landed thousands of IJA troops on Guadalcanal in advance of a new offensive to be launched against the Marine garrison. This was presaged by a battleship bombardment of Henderson Field and daily air raids against the same target. Against this background Cactus Air Force was fighting for its life, and very nearly reached the level of exhaustion. Somehow just enough replacement

Object ID	Title	Author	Summary
			F4Fs and SBDs were scraped together from the New Hebrides to keep it in business. Important support was provided by COMAIRSOPAC B-17s and PBVs operating from Espiritu Santo.
			In the middle of the month an enormously powerful IJN force arrived in the theater, based around five aircraft carriers. This force threatened to overwhelm the USN which at the time had only one carrier in the South Pacific, the USS Hornet. However, the timely arrival of the USS Enterprise evened the ledger and the fourth carrier battle of the Pacific War, the Battle of the Santa Cruz Islands, was fought over 25-27 October.
			This chronicle has been written using both Allied and Japanese sources, to give a fresh, factual and highly detailed account of all aspects of the Solomons air campaign - from Thrift Books
2024.302.012	US Navy Pacific Fleet 1941 America's Mighty Last Battleship Fleet	Lardas, Mark	The first book to examine the battleship-led 1941 Pacific Fleet as it was intended to fight. Packed with illustrations, this study explains how the US Navy saw the approaching war unfolding. When the Japanese attacked Pearl Harbor, the Pacific Fleet was the most powerful in the US Navy. It was still dominated by battleships, but since the late 1930s had been developing naval aviation and integrating them with its battleship-led doctrine. This book is the first to examine the Pacific Fleet as it was intended to fight, and how it had been training and preparing in the months leading up to December 7, 1941. Naval historian Mark Lardas explains how, contrary to modern assumptions, it was not wedded to the battleship, but was hedging its bets, building up both its carrier and battleship strength. Most crucially, it had also been building and honing a massive fleet train, enabling the Pacific Fleet to operate easily

Object ID	Title	Author	Summary
			thousands of miles from home. It was this foundation that enabled the Pacific Fleet to adapt so rapidly to the new world of carrier-led naval warfare, and first check and then defeat the IJN. With artwork, photos and diagrams, this is a portrait of 1941 in the Pacific Fleet, the last time and place when battleship doctrine held sway. Pearl Harbor would shatter this, and herald the start of the carrier era. The blow fell heavily on the US Pacific Fleet, but it and its successors would emerge more powerful than ever - from worldcat.org

2024.302.016	Midway The Pacific War's Most Famous Battle	Stille, Mark	From Publisher: A detailed re-examination of Midway, one of the most significant battles in the Pacific Theater of World War II. In April 1942, the Combined Fleet of the Imperial Japanese Navy was at the zenith of its power. It had struck a severe blow against the US Navy at Pearl Harbor in December 1941, before spearheading the Japanese advance through Southeast Asia and rampaging across the South Pacific. Only a few months later, in June 1942, the US Navy managed to inflict a decisive defeat on this mighty force off Midway Atoll and the strategic initiative in the Pacific Theater passed to the US Navy. Midway is the most famous naval battle of the Pacific War, and one of the most mythologized. The traditional view of the battle, popularized in its immediate aftermath and surviving through to the present day, is of a heavily outnumbered American force snatching victory in the face of overwhelming odds. This view is simplistic and, in many respects, wrong. Pacific War expert Mark Stille provides a detailed analysis of this pivotal battle, and argues that Midway was neither a miraculous American victory, nor a product of good fortune, but that the plans, personalities, doctrines, ships and weapons of the two sides meant that a Japanese defeat was the more likely outcome. This new study provides an unparalleled level of insight and thorough analysis into one of the decisive moments of the Pacific War.

			British resistance. The Japanese, led by Admirals Yamamoto and Nagumo, seemed invincible. Until Midway. If the Japanese could take the tiny atoll of Midway, the Pacific would be theirs. So, on the 4th of June, began the most decisive sea and air battle of the second World War.
2024.302.018	USS Princeton	Leick, David R.	An in-depth history of the US Navy's light aircraft carrier the USS Princeton and its operational exploits in the Pacific Theater of World War II. This new history of the life and loss of USS Princeton tells the story of the new class of aircraft carrier that proved essential to the US Navy's victory over the Imperial Japanese Navy in the Pacific War. (from publisher)
2024.302.019	The Battle of Midway: A Compelling Look at the Battle of Midway - The Turning Point of World War II in the Pacific	Radford, Micheal	From Amazon: On June 4th, 1942, the United States Navy achieved a decisive victory over the Imperial Japanese Navy at the Battle of Midway. This stunning upset reversed the tide of the Pacific War, dooming Japan's imperial ambitions and paving the way for eventual Allied victory. We'll take a comprehensive look at how exactly this battle unfolded, and the tactics that paved the way for a decisive American victory, changing the course of the second World War in the Pacific theatre. This book brings this pivotal naval battle vividly to life through a gripping narrative that will transport you back to the heat of battle and the critical moments that sealed Japan's fate.
2024.304.001	Walk Around A-4 Skyhawk	Drendel, Lou	Introduction: "Scooter," "Ford," "Tinker Toy," "Bantam Bomber," "Heinemann's Hot Rod." All were nicknames for the Douglas A-4 Skyhawk. But an even more appropriate appellation, bestowed by Skyhawk pilots, is "The Ferrari Of Airplanes."

Object ID	Title	Author	Summary
			The A-4 Skyhawk is one of the most successful modern combat aircraft ever built. The Skyhawk It's production run spanned 25 years, during which 2,960 were built and operated by the U.S. Navy and Marines as well as the Air Forces of Australia, New Zealand, Israel, Malaysia, Argentina, Singapore, Brazil, Indonesia, and Kuwait. The Skyhawk was conceived during a time of burgeoning carrier jet operations. Unlike many of its contemporaries, it was designed from the outset as a lightweight attack aircraft. (The Skyhawk was developed in tandem with the A-3 Skywarrior, a twin-engine bomber with a maximum take-off weight of 82,500 pounds compared to the A-4B's maximum of 22,500 pounds.) In the early 1950s, most of the Navy's carriers were of World War II vintage, and smaller, lighter, more maneuverable aircraft were an absolute operational necessity. In January 1952, Ed Heinemann, chief engineer of the Douglas El Segundo Division, met with Rear Admiral Apollo Soucek, representing the Chief of the Naval Bureau of Aeronautics (BuAer). Heinemann proposed a new, lightweight, jet-powered attack airplane. On 12 June 1952, BuAer issued a contract for the prototype, specifying a maximum speed of 500 mph, a 460-mile operating radius, a 2,000-pound bomb capacity, and a maximum cost of \$1 million per aircraft. The XA-4D-1 beat the speed requirement by a wide margin, and the first 500 production aircraft were produced at a cost of \$860,000 each. Review of the basic design resulted in a further order for 19 A-4s in October 1952. Naval aircraft designations prior to 1962 included references to the mission and

Object ID	Title	Author	Summary
			manufacturer. Thus the Skyhawk was designated A4D-1: A (attack) 4 (fourth aircraft from this manufacturer under the new designator) D (Douglas) -1 (first example of the type.) After 1962, the designators were simplified, and the A4D-1 became the A-4A, the A4D-2 became the A-4B, and the A4D-2N became the A-4C. The latter was designed with minimal all-weather equipment, including an autopilot, all-attitude gyro system, low altitude bombing system, terrain clearance radar, and angle of attack indexer. From 1969 to 1972, 100 A-4Cs were upgraded to A-4L configuration for Naval Air Reserve squadrons. The A4D-5, later designated A-4E, was equipped with the lighter, more powerful Pratt & Whitney J52-P6A engine. It had a redesigned fuselage center section and inlet ducting, two additional wing hard points, and upgrades to the navigation and weapons systems. The A-4F added nose wheel steering, wing lift spoilers, and the Escapac 1-C3 ejection seat. The humpback avionics pod of the A-4F was eventually retrofitted to all A-4Es, and 100 of the A-4Fs were retrofitted with the more powerful J52-P408 engine, becoming "Super Foxes," and 18 of these became the eventual mount of the Blue Angels. Two-seat Skyhawks were built beginning in 1964. Designed as trainers, they were ultimately used in a wide variety of missions, including forward air controller (FAC), utility, and aggressor missions. TA-4E, F, and J versions were built. Front Cover: VA-46 pilot Lt. Cmdr. John S. McCain III stands in front of his assigned A-4E Skyhawk, BuNo 149996/AA-416, aboard USS Forrestal in July 1967. 			officers, Lt. Cmdr. McCain was shot down over North Vietnam and spent six years as a prisoner of war. He was later elected to the United States Senate from Arizona. The Skyhawk was destroyed in the Forrestal fire of July 29, 1967.
2024.304.002	Trial by Fire A Novel	Deuterman, P.T. (Peter T.)	From Amazon: Based on a true story-P. T. Deutermann's Trial by Fire is a dramatic WWII novel of attack, survival, and triumph on board an aircraft carrier in the Pacific. It's March 1945 and the war in the Pacific is approaching its apocalyptic climax. The largest wartime armada ever assembled, Task Force 58, is closing in on Okinawa; once taken, it will finally put American B-29 bombers in comfortable range of the home islands of Japan-and victory. At the heart of the fleet are 14 Essex-class aircraft carriers, including the USS Franklin, known as "Big Ben"-a 27,000-ton behemoth, home to 3,600 crewmen and 100 aircraft. Just after dawn, while crewmen prepare for battle, a single Japanese Yokosuka D4Y bomber breaks through the clouds and drops a 500-pound semi-armor piercing bomb on Big Ben. The bomb rips through the wooden flight deck before exploding on the hangar deck, amidst two dozen fully fueled and armed fighter-bombers. The resulting explosion engulfs both the hangar deck and all the planes spotted on the flight deck. Bombs cook off and rockets howl in all directions, both on the flight deck and down in the hangar bays. Hundreds of men are forced to leap into the sea to escape the rivers of burning aviation gasoline, leaving the captain with only one third of his crew, of whom there are more dead, wounded and trapped men left onboard than able-bodied sailors. Trial By Fire is the gripping

Object ID	Title	Author	Summary
			novelization of how, against all odds, the sailors of the Franklin were able to save their ship, after 3 agonizing days of battling the flames that ultimately claimed the lives of 832 men and injured 300 more. Readers will be astounded and humbled by the heroic actions of a few extraordinarily brave sailors in the face of unending catastrophe.
2024.305.001	Ghosts of the Skies : Aviation in the Second World War	Makanna, Philip	A compendium of selected U.S., Japanese and German aircraft types from World War II with quote from assorted combatants with each model. About 40 full page color plates depicting restored or replica aircraft with b&w photos from WW II. Also a section providing characteristics and three-view silhouettes of each type aircraft. Owned by Lt. Commander Leif Ingeman Larson, a Pearl Harbor Survivor.
2024.306.001	VRC-30 Providers	Burkhardt, Boerries	Great first with this superb collection of photos listing the 39 second batch C-2A Greyhounds delivered between 1985 and 1990. This landscape book on the C-2 puts photos at their best and presents each aircraft with a selection of one to three never-seen-before photos by the author or his large network. Each unit has a short chapter, and a 'walk-around' type photo album concludes the aircraft presentation. And because Boerries is an avid enthusiast, he has a hawk's eye, a sense for detail that model makers will love, with stunning colourful liveries and a plethora of interior and exterior photos. Suffice to say that this first try is largely converted on this lesser known aircraft, even if it is so familiar after all these years hitting American flight decks (and occasionally French ones). The R in the designation means Reprocured (for new order) but these planes have also undergone an engine and avionics modernization, particularly with NP2000 eight-bladed propellers, still under the same designation though.

			monoplane, dive bomber built by the Northrop Corporation for the United States Navy. At the time Northrop was a subsidiary of the Douglas Aircraft Company.
			The design of the initial version began in 1935. A 700 hp (522 kW) Pratt and Whitney XR-1535-66 Twin Wasp Jr. double row, radial air-cooled engine powered the aircraft. The aircraft had slotted flaps and a landing gear that partially retracted.
			The next iteration of the BT, designated the XBT-1 was equipped with a 750 hp (559 kW) R-1535 engine. This aircraft was followed in 1936 by the BT-1 that was powered by an 825 hp Pratt and Whitney R-1535-94 engine. One of the BT-1 aircraft was modified with a fixed tricycle landing gear and was the first such aircraft to land on an aircraft carrier.
			One of the first aircraft Edward Heinemann designed
			90 pages of history, drawings and photos.
2024.311.005	In Harm's Way	Stanton, Doug	On the night of July 30, 1945, the Navy cruiser USS Indianapolis was torpedoed by a Japanese sub, sending 900 men into the black, churning waters of the Pacific. What happened next was a nightmarish battle for survival. Injured, adrift, clinging to each other and their waterlogged life rafts, the men watched in horror as their crewmates fell victim to catastrophic injuries, exposure, hallucinations, and relentless shark attacks. Worst of all, their last radio S.O.S. had been disregarded as a possible prank. When help finally arrived an astonishing five days later, only 317 of the ship's crew were still alive.
2024.311.006	Skyward. Man's Mastery of the Air	Byrd, Richard E.	Skyward is as much the memoir of great American explorer Admiral Richard E. Byrd, Jr. as it is a fascinating narrative of

Object ID	Title	Author	Summary
			America's early aviation history, much of which Byrd shaped with his explorations as a naval pilot and pioneering scientist. Through the life of Admiral Byrd, we see the seeds of America's aerial military force, commercial airline travel, and our understanding of the planet's most remote geographical locations planted. Byrd's outsized ambition has inspired generations to dare to push technological limits in order to achieve things greater than themselves. Reissued for today's readers, Admiral Byrd's classic explorations by land, air, and sea transport us to the farthest reaches of the globe. As companions on Byrd's journeys, modern audiences experience the polar landscape through Byrd's own struggles, doubts, revelations, and triumphs and share the excitement of these timeless adventures.
2024.311.007	Battle of Midway, The	McGowen, Tom	A short photographic tale of the Battle of Midway. Admiral Nimitz said, "Midway was the most crucial battle of the Pacific War, the engagement that made everything else possible".
2024.312.003	Division Officer's Guide - 1959	Noel, John V.	Just as Watch Officer's Guide tells the young officer what to do and how to do it while he is on watch on the bridge or on the quarterdeck, Division Officer's Guide tells him how to handle his duties the rest of the time when he is not on watch. This is the 4th edition.
2024.313.001	Firepower	Quarrie, Bruce	Modern weapons delivery system of land, sea, and air. Contents: Introduction, The nuclear arena, Firepower at sea, Firepower in the air, Firepower on land, Firepower in space, Additional statistical data A Quintet Book
2024.313.002	Top Guns : Attack Aircraft	Madacy Entertainment Group	Top attack aircraft includes Sopwith Salamander, A-20 Havoc, P-47 thunderbolt, F9F Panther, F-105 Thunderchief and A-10 Thunderbolt II.

Object ID	Title	Author	Summary
2024.313.003	Top Guns : Bombers	Madacy Entertainment Group	Includes Zeppelin, Heinkel He-111, Boeing B-29, Convair B-36, Boeing B-52, and Rockwell B-1.
2024.313.004	Top Guns : Fighters	Madacy Entertainment Group	Includes Sopwith Camel, Messerschmitt BF 109, P-51, F-86 Sabre, F-4 Phantom, F-14 Tomcat, and F-16 Falcon.
2024.317.001	Lesson Plans: SNJ Engineering, Primary Phase	None Stated	Publication prepared for information, standardization of instruction and guidance of ground training instructors and students on the engineering configuration of the SNJ trainer aircraft.
2024.317.002	Chance Vought F4U-4 to F4U-7 Corsair, The	Dial, Jay Frank	Chance Vought F4U Corsair fighter plane.
2024.317.003	T-6 : A Pictorial Record of the Harvard, Texan and Wirraway	Smith, Peter C.	This book is a pictorial tribute to the T-6 training plane. To the American it was the Texan, to the British the Harvard, to the Australians the Wirraway. The author considers this the most widespread and versatile training aircraft ever built. Note: The US navy uses the term SNJ.
2024.317.004	Airships Akron & Macon, The; Flying Aircraft Carriers of the United States Navy	Smith, Richard K.	History of United States Navy airships Akron and Macon. Examines the airship's place in naval operations, focusing specifically on the flying aircraft carrier's development and performance in 1931-1935.
2024.317.005	Pilot Maker, The : The Incredible T-6	Ohlrich, Walt	Discusses important aircraft that emerged from the 1930's. Including the Harvard, Texan, J-Bird, and T-6 aircraft.
2024.317.006	Ryan FR-1 Fireball and XF2R1 Darkshark	Ginter, Steve	It was no secret to the U.S. Navy that jet and rocket aircraft were being developed in Europe, and that once fully developed, would be of superior performance than piston engine aircraft. Because of these facts, the Navy initiated investigations into alternative solutions to counter these new jets. By late 1942, the Navy decided upon a composite-powered fighter. In December, ADM John S. McCain released the proposal to nine manufacturers, including Ryan. The Ryan proposal was accepted and a contract for three prototypes and one static test article was placed on 11

2024.320.001	Introduction to Navigation	Naval Air Reserve Training Command	Provides a brief introduction to air navigation. Compiled from materials used by the Chief of Naval Air Advanced Training for instructing naval aviators and flight officers.
2024.323.001	Learning War: The Evolution of Fighting Doctrine in the U.S. Navy, 1898-1945.	Hone, Trent	From the publisher: "Learning War examines the U.S. Navy's doctrinal development from 1898-1945 and explains why the Navy in that era was so successful as an organization at fostering innovation. Trent Hone argues that the Navy created a sophisticated learning system in the early years of the twentieth century that led to repeated innovations in the development of surface warfare tactics and doctrine. This book draws profoundly important conclusions that give new insight, not only into how the Navy succeeded in becoming the best naval force in the world, but also into how modern organizations can exploit today's rapid technological and social changes in their pursuit of success." Contents Prologue: Complex adaptive systems and military doctrine -- A professional officer corps -- The gunnery system -- Plans and doctrine before World War I -- The interwar learning system -- Heuristics at Guadalcanal -- The CIC -- Victory in the Pacific -- Epilogue: The cost of war.
2024.323.002	Climate and Weather for Flight in Naval Operational Zones	Naval Air Training Command, Pensacola, Florida	PREFACE: This book is intended as a text to serve aviation cadets who have completed previous courses in aerology and flight planning. It presupposes an understanding of weather in its relationships to flying. It is designed to broaden the cadet's horizon and give him a background of the climate and weather over the several oceans where a naval aviator might fly during the present conflict. The broad concept of causes and

Object ID	Title	Author	Summary
			effects presented in this volume will give the cadet a basis upon which to add more detailed information gained from experience. It is hoped that the principles set forth will guide him in utilizing weather as an ally — using weather to his advantage in conflict and avoiding the weather hazards. Acknowledgment is made to the numerous organizations and individuals who have so generously contributed both time and material used in preparing this text.
2024.325.001	USS Midway (CV-41) - Magic Moments - 1987-89	Tate, D. E. (ed)	Pictorial account of the several deployments of the USS Midway (CV-41) and history covering seven hundred twenty nine (729) days. Major deployments were: (1) 23 April - 13 July 1987 - She departed Yokosuka, visited Hong Kong, Subic Bay, Sydney, Subic Bay again, and returned to Yokosuka. Onboard: VFA-195 (F/A-18A) VFA-151 (F/A-18A) VFA-192 (F/A-18A) VA-115 (A-6E and KA-6D) VAW-115 (E-2C) VAQ-136 (EA-6B) HS-12 (SH-3H) (2) 15 October 1988 - 11 April 1988 - She departed Yokosuka, visited Subic Bay; on station in the Indian Ocean; Mombasa, Kenya; turnover with the USS Enterprise (CVN-65); Pattaya Beach, Thailand; Subic Bay again; Pusan, Korea; Sasebo, Japan; and returned to Yokosuka. Onboard: VFA-195 (F/A-18A) VFA-151 (F/A-18A) VFA-192 (F/A-18A) VA-185 (A-6E and KA-6D) VA-115 (A-6E and KA-6D) VAW-115 (E-2C) VAQ-136 (EA-6B) HS-12 (SH-3H) (3) 8 September 1988 - 9 November 1988 - Departed Yokosuka; Sasebo; Pusan; returned to Yokosuka; Subic Bay twice; and returned to Yokosuka. Onboard: VFA-195 (F/A-18A) VFA-151 (F/A-18A)

2024.325.002	Naval Training Center, Great Lakes, Illinois: 75 Years of Greatness, 1911-1986	None Stated	A commemorative booklet published on the occasion of the 75th anniversary of the opening of the naval Training Center, Great Lakes. Individual sections dedicated to Naval Training Center, Recruit Training Center, Service School Command, Naval Training Station, Personnel Support Activity, Other Training areas, Medical/Dental Facilities, and Facilities Support

Object ID	Title	Author	Summary
2024.326.001	Carrier Victory : The Air War in the Pacific	Lindley, John M.	When Japan bombed Pearl Harbor, it was history's biggest surprise attack, and it began an entirely new kind of war--one on which naval battles would be fought from the air instead of the surface of the sea. The Japanese had struck the first blow, and for a time they seemed unstoppable. But the Americans learned quickly. Aircraft Carriers were the backbone of the Navy now, and in May 1942 , in the Battle of the Coral Sea, American flyers operating from flattops halted Japan's march of conquest. It was the first naval battle ever in which the opposing ships never sighted each other. Meanwhile there had been a daring and morale-boosting air raid on Tokyo, carried out by ordinarily land-based bombers operating from a carrier. U.S. Carrier forces sank more than 3 million tons of Japanese merchant shipping. Carrier forces hit the Japanese Navy the knockout blows. They made the great island invasions possible.
2024.326.002	Division Officer's Guide - 2000	Stavridis, James	Just as Watch Officer's Guide tells the young officer what to do and how to do it while he is on watch on the bridge or on the quarterdeck, Division Officer's Guide tells him how to handle his duties the rest of the time when he is not on watch.
2024.326.003	USS Texas (BB35)	Egan, Robert S.	The USS Texas (BB35) was the second ship of the United States Navy to bear that name. Her career spanned more than thirty years, during which she fought in two wars. Texas, one of the most active ships in the U.S. Navy, began her war service in 1918 with the U.S. Sixth Battle Squadron reinforcing the British Grand Fleet. Her war service concluded with the surrender of Japan and the conclusion of World War II in 1945.
2024.326.004	USS Yorktown: (CV10)	Friedman, Norman	The Aircraft Carrier Yorktown CV10 was the 4th US naval vessel carrying that name. The first Yorktown was a 16-gun sloop. 117 feet overall; she could have been parked

Object ID	Title	Author	Summary
			crossways on the flight deck of the last Yorktown. Commissioned on Feb. 15, 1840. The Second Yorktown, Gunboat Number 1, steam-powered, speed of 16 knots. 244 feet long, carried a crew of approx. 200, armed with six 6-inch breech loading rifles, two 6-pounders, two 3-pounders, two 37 mm guns, and two Gatling machine guns. Commission April 23, 1889. The third Yorktown CV5 was an aircraft carrier, the 5th US carrier to be commissioned. Her design formed the basis of the Essex-class carriers. Commissioned Sept. 30, 1937. The USS Yorktown CV10 was the 2nd ship of the Essex-class fleet carriers. She was laid down on Dec. 1, 1941 as the Bon Homme Richard, but renamed Yorktown on Sept. 26, 1942, in memory of the previous Yorktown CV5 lost in the Battle of Midway.
2024.326.005	United States Naval Air Station, Miramar Air Show September 12, 1959	U.S. Naval Air Station, Miramar	The souvenir program includes schedule of events; acknowledgements from Marine Corps dignitaries, history of the Blue Angels, photos and biographies of the Blue Angel pilots, illustration and descriptions of the maneuvers being performed, letters and numbers used by pilots explained, history of U.S. Naval Air Station, Miramar, and Squadrons of Miramar.
2024.326.006	Naval Aviation. Forward Air Power from the Sea.	None stated	The objectives of this publication are to describe the Naval Aviation Vision and it supporting elements, process, and programs and to tell the story of a dynamic and dedicated warfighting team The book is divided into three major parts: The Introduction includes an overview of the enduring realities face by Naval Aviation, a review of Naval Aviation's components and their role, the Naval Aviation Vision statement and its structure, and a

Object ID	Title	Author	Summary
			description of the process used in its development. Section 1 presents the basic elements, and their supporting goals and objectives, that comprise the Naval Aviation Strategic Vision. Section 2 describes specific programs and roadmaps that from the Strategic Plan.
2024.326.007	U.S. Submarines in World War II: An Illustrated History	Kimmett, Larry	Unique maps, photos, and drawings bring to life the extraordinary American submarine campaign of World War II. From Pearl Harbor to the surrender at Tokyo Bay, a persicope's view of the patrols, the losses, and the battles that broke the japanese Empire and gave the Unitend States the greatest naval victory in history. (from back cover)
2024.326.008	History of the USS KIDD (DD661) and the Fletcher Class Destroyers	Wolfe, Larry W.	About half of this book covers histories of individual Fletcher-class destroyers, which read like encyclopedia entries with no personal stories. Although the destroyer USS Kidd (DD-661) gets top billing in the title, only about ten pages, including photographs, deal with the ship's wartime history. Another six pages, probably the book's most interesting part, tell the story of the destroyer's becoming a museum ship in Baton Rouge, Louisiana. The last section of about 50 pages gives brief biographical sketches of several hundred Fletcher-class destroyer veterans with wartime and current photos of many of them. (from kamakazi images)
2024.326.009	Aircraft Carriers of the United States Navy : Rare Photographs from Wartime Archives	Green, Michael	The United States Navy began using aircraft carriers beginning with the USS Langley in 1922. By the 1930s,the Navy had become more comfortable with the use of aircraft carriers, but they were still considered secondary to the battleships. World War II changed that dynamics and the aircraft carrier became the primary source of naval power. "At a time when the US Navy was still trying to figure out how

Object ID	Title	Author	Summary
			to operate multiple carriers in a single formation and whether it was even desirable under wartime conditions, the Imperial Japanese Navy had created a revolution in naval warfare by combining all its carrier fleets into a single formation. The striking power of this unit was unsurpassed...." The carrier, as the centerpiece of the U.S. Navy, as remained unbroken to the present day. Photo of tugs pushing the USS Midway to its new home in 2004 shortly before the ship opened as a floating museum on page 109.
2024.326.010	Kamikaze: Japan's Last Bid for Victory	Stewart, Adrian	This WWII history examines Japan's Kamikaze Corps of special forces pilots who engaged in terrifying suicide attacks. By late 1944, the Japanese had already proved themselves fanatical in their quest for victory. But the actions of the Kamikaze Corps took matters to a new level. Western military forces were dumfounded by an enemy strategy of deliberate self-sacrifice. Beginning with the Leyte Gulf battle, Kamikaze attacks continued during the invasion of the Philippines in early 1945 and reached a climax during the months-long Battle of Okinawa. In total, more than a thousand kamikaze airmen perished. The author examines the historic and cultural roots of the unique and unsettling phenomenon. He also provides graphic descriptions of these suicide attacks and their devastating impact on Allied forces.
2024.326.011	Pearl Harbor Air Raid: The Japanese Attack on the U.S. Pacific Fleet, December 7, 1941	Veronico, Nicholas A.	Just in time for 75th anniversary commemorations of the Japanese attack on Pearl Harbor, this latest addition offers a complete visual history of the attack, its aftermath, and the salvage efforts that followed. Over 300 photos - including many never before seen images of the salvage operation - with detailed captions document aircraft, ships, submarines, and key locations. Text sidebars

Object ID	Title	Author	Summary
			highlight President Roosevelt's famous speech, details of the B-17s that arrived during the attack, and more. Appendices include information about the brave men awarded the Medal of Honor for their actions in the attack, and - for the first time in print - appendices by serial number of the U.S. Army Air Forces, Navy, and Marine Corps aircraft destroyed during the air raid. Copied from Amazon
2024.327.001	No Right to Win	Russell, Ronald W.	This book is a unique approach to the study of a major historical event. It virtually places the reader in attendance at a major gathering of Battle of Midway veterans. The experience is almost like engaging in conversations with the men of the Midway themselves, resulting in fresh, interesting information about the most important sea battle of the twentieth century, and especially those who fought and won it
2024.327.002	Brown Shoes, The	Francis, Patricia B	Category: Veteran's Books US Navy History Description: The Brown Shoes History Project is proud to announce this limited edition coffee-table book featuring the history of a very select group of Naval Aviators who earned their Gold Wings between 1946 and 1953. The Naval Aviators featured in this volume came from many different backgrounds with many different dreams. The one thing they had in common was the desire to fly. They earned their wings in spite of tough training and government cutbacks and became heroes in the air by providing support for those brave young men on the battlefield. Many went to Korea and some, like Midshipman Jesse L. Brown, the first African-American Naval Aviator, never came home. Others, including one who became an astronaut, went on to fly even higher.

			216 pages, 9" x 12" Hardbound (from http://www.turnerpublishing.com)
2024.327.003	Korean Combat : The Four Freedoms Betrayed : A Fighter Pilot's Diary	Leue, David E.	A Fighter Pilot's Diary The Four Freedoms Betrayed Instead of the promised peace and the Four Freedoms, the post WWII generation was sentenced to a lifetime of battles for freedom in foreign lands. Beginning in Korea then later in Vietnam, our adversary was our WWII ally, Soviet Russia. Some called this the "Cold War." These hot battles had a similar origin, President Franklin Delano Roosevelt's embrace of Joe Stalin. Capt. Leue' tells of his journey from a naive teenager through the perils of naval flight training to combat veteran in Korea. He tells of the loss of countless shipmates along the way. He relates his frustrations over the firing of General MacArthur, fighting in battles that the country had determined we would not win, (however, you could die) and the realization that these wars were totally unnecessary. Why hadn't we defeated the Communists with the Nazis in WWII instead of arming them?
2024.327.004	Road to Korea	Greenkorn, Bob	From Amazon: A sometimes serious, sometimes irreverent chronical of a pilgrim during 1945 - 1951. From Navy flight training to combat flying in Korea.
2024.327.005	Dilbert; Just an Accident Looking for a Place to Happen!	Osborn, Robert Chesley, 1904-1994.	Illustrated story of a pilot learning to fly and mishaps along the way.
2024.327.006	Wings of Gold: The Story of United States Naval Aviation	Caras, Roger A.	Tells the story of naval aviation from the beginnings up through the aircraft and nuclear-powered aircraft carrier of today.
2024.327.007	Best of Gramps, The	Osborn, Robert Chesley	Letters to Grampaw Pettibone and his responses.
2024.327.008	75th Anniversary of Naval Aviation Commemorative Edition	Russell, Sandy (ed)	Naval Aviation 1911-1986

Object ID	Title	Author	Summary
2024.327.009	Flying Special Naval Aviation: The Dramatic Story of Naval and Marine Aviation	Davis, Ziff	Articles and photos of Naval and Marine aviation in Action
2024.328.001	Blue Skies and Blood : The Battle of the Coral Sea	Hoyt, Edwin P.	The Battle of the Coral Sea occupies a unique niche in history. In these warm and distant waters for the first time the airplane afloat and not the big gun delivered the offensive blows on each side. Mighty fleets bitterly contested control of the sea far out of sight of their commanders. The wings in the sky brought new powers. It was an new era in naval warfare. The author skilfully unfolds the struggle in the Coral Sea through the lives and words of participants.
2024.328.002	Stand By-Y-Y to Start Engines	Gallery, Daniel V.	Twelve stories of giant practical jokes or tricky maneuvers played by various officers of the Navy--a Blue Angel pilot, a bright young Ensign, and various competitive Admirals--on other members of their service, the Army, and gentlemen of the press
2024.328.003	Clear the Decks	Gallery, Daniel V.	Although the author was involved in the serious business of fighting a war, he was able to appreciate the humor involved in the people and circumstances that took place. He does a very good job of giving a humorous account of his naval career.
2024.328.004	Supercarrier : An Inside Account of Life Aboard the World's Most Powerful Ship, the USS John F. Kennedy	Wilson, George C.	In September 1983 Wilson, a Washington Post reporter, boarded the USS Kennedy for a seven-month deployment in the Mediterranean. Over that time he would share the loneliness, incredible workload, camaraderie, and discomfort of the crew, and would get a close look at the complicated business of high-tech warfare. He would see how military force can work well, and how it can go wrong. Wilson interviewed hundreds of knowledgeable people, from the Secretary of the Navy down. He was aboard for the air strikes against Syrian and Lebanese targets in which some of the Kennedy's planes and crew were lost, and he discusses how the chain of command, from the White House to the squadron,

2024.332.001	Ghosts of Honolulu: A Japanese Spy, A Japanese American Spy Hunter, and the Untold Story of Pearl Harbor	Harmon, Mark and Carroll, Leon Jr.	From Amazon: A U.S. naval counterintelligence officer working to safeguard Pearl Harbor; a Japanese spy ordered to Hawaii to gather information on the American fleet. On December 7, 1941, their hidden stories are exposed by a morning of bloodshed that would change the world forever. Scrutinizing long-buried historical documents, NCIS star Mark Harmon and co-author Leon Carroll, a former NCIS Special Agent, have brought forth a true-life NCIS story of deception, discovery, and danger. Hawaii, 1941. War clouds with Japan are gathering and the islands of Hawaii have become battlegrounds of spies, intelligence agents, and military officials - with the island's residents caught between them. Toiling in the shadows are Douglas Wada, the only Japanese American agent in naval intelligence, and Takeo Yoshikawa, a Japanese spy sent to Pearl Harbor to gather information on the U.S. fleet. Douglas Wada's experiences in his native Honolulu include posing undercover as a newspaper reporter,

Object ID	Title	Author	Summary
			translating wiretaps on the Japanese Consulate, and interrogating America's first captured POW of World War II, a submarine officer found on the beach. Takeo Yoshikawa is a Japanese spy operating as a junior diplomat with the consulate who is collecting vital information that goes straight to Admiral Yamamoto. Their dueling stories anchor Ghosts of Honolulu's gripping depiction of the world-changing cat and mouse games played between Japanese and US military intelligence agents (and a mercenary Nazi) in Hawaii before the outbreak of the second world war. Also caught in the upheaval are Honolulu's innocent residents - including Douglas Wada's father - who endure the war's anti-Japanese fervor and a cadre of intelligence professionals who must prevent Hawaii from adopting the same destructive mass internments as California. Ghosts of Honolulu depicts the incredible high stakes game of naval intelligence and the need to define what is real and what only appears to be real.
2024.333.001	Japanese Aircraft of the Pacific War	Francillon, René J.	This work presents a comprehensive analysis of the Japanese aircraft industry and its products between the late thirties and the dawn of the nuclear age. A series of introductory chapters covers the history of the Japanese aircraft industry and of the air arms of the Imperial Japanese Army and Navy, and their designation, camouflage, and marking systems.
2024.333.002	Lockheed T2V-1/T-1A Seastar	Ginter, Steve	From the author's website: Lockheed had an early lock on military jet trainer production in the United States with its very successful two-seat derivative of the P-80/F-80 Shooting Star, the T-33A/TV-2. As good as the T-Bird was, Lockheed believed a much more capable trainer could be developed from the basic T-33 design. As a private venture, under the guidance

Object ID	Title	Author	Summary
			of Kelly Johnson, Lockheed sought to improve the instructor's visibility and the aircraft's low speed handling characteristics. These changes, along with redesigned and strengthened landing gear, would allow the aircraft to be considered for a carrier trainer. --Steve Ginter 72 PAGES, 201-B&W PHOTOS, 19-PAGES DRAWINGS ORDER NUMBER - NF42 - \$15.95
2024.333.003	Japanese Army Air Force Fighters, Part 1	Green, William and Swanborough, Gordon	From the back cover: In the years immediately prior to Pearl Harbor, the Japanese aircraft industry was popularly regarded in the West as copyist and incapable of original designs; moreover, Japanese combat aircraft were widely believed to be outdated by international standards and derivative of obsolescent American and European designs. However, the opening phases of the Pacific War revealed forcefully the measure of Western miscalculation and the speed with which Western technologies been absorbed and adapted by the Japanese aircraft industry. The fighters created by the Kawasaki concern for the Imperial Army provide, together with the few fighters evolved for the army by the Mitsubishi Jukaggo KK or from Mitsubishi-designed types, the content of this first part of a two-part Fact File devoted to all types of fighters operated by or developed to experimental status for the Imperial Army Air Service during the Pacific War.
2024.333.004	Japanese Army Air Force Fighters, Part 2	Green, William and Swanborough, Gordon	From the back cover: In the years immediately prior to Pearl Harbor, the Japanese aircraft industry was popularly regarded in the West as copyist and incapable of original designs; moreover, Japanese combat aircraft were widely believed to be outdated by international standards and derivative of obsolescent

2024.333.005	Nakajima Carrier Reconnaissance Plane "Saiun" (Myrt)	None Stated	This is a Japanese-language book or magazine about aircraft and/or aircraft modeling. Some Japanese aircraft books, such as the Aero Detail series contain complete English text as well. See the product description below for details. This edition is devoted to the Saiun, with several pages of color photos of the only remaining example in the world (at the National Air and Space Museums restoration/storage facility) as well as page after page of period photos and detailed drawings. A must-have for those contemplating the Hasegawa kit. Summary from: https://www.hlj.com/famous-airplanes-108-carrier-recon-plane-saiun-bunfa108
2024.333.006	IJN Type Zero Observation Seaplane	None Stated	This is a Japanese-language book or magazine about aircraft and/or aircraft Volume 136 of Bunrindo's Famous Airplanes of the World covers the Type Zero Observation Seaplane, Allied code name "Pete". Lots of pictures and drawings detail the construction and operation of the type. An excellent reference for anyone planning to build either the Fujimi 1/72 kit or the Hasegawa 1/48 kit. All text is in Japanese. Softcover with dust

2024.333.007	Army Type 3 Fighter Hien (Tony) (Encore Ver.)	None Stated	The Kawasaki Ki-61 was the only fighter with a liquid-cooled engine that the Japanese Army Air Force put into the field during World War II. It was this that made the Ki-61 Hien ("Swallow") so unlike the other Japanese planes that the Allies initially thought that it was German or Italian-made. While the engine was a license-built version of a German Daimler Benz engine, the rest of the aircraft was an all-Japanese design. The Ki-61, known as "Tony" in the Allied code, proved to be a match for Allied fighters, due chiefly to its particularly heavy armament, good protective armor, and high speed in dives. The Ki-61 was one of the few interceptors that could reach the same altitude as the the American B-29 Superfortresses. Because it was so successful a total of 3078 aircraft were built between August 1942 and August 1945. However, problems with production and with its engine kept it from being even more widely used during the war. The plane's engine problems included being difficult to tune and being subject to constant breakdowns. A solution to the engine problem was to substitute a more reliable radial engine for the liquid-cooled one. This caused a slight redesign of the fuselage, with the resulting aircraft type being designated the Ki-100, which turned out to be an even more outstanding fighter. Summary from daveswarbirds.com
2024.333.008	Nakajima Carrier Recon. Plane Saiun	None Stated	The prototype of the Nakajima C6N Saiun ("Painted Cloud"), a fast carrier-based reconnaissance plane, appeared on May 15, 1943. Difficulties with the engine prevented the

Object ID	Title	Author	Summary
			aircraft from going into service until the summer of 1944. A total of 463 planes were built. The aircraft, known as "Myrt" in the Allied code, was used intensively in the last year of the war. Its fine performance at high altitude, particularly its high speed, led navy technicians to study two derivative aircraft, one for night fighter duty and the other one for torpedo duty. A few examples of the night fighter version (designated C6N1-S) were actually built. It was a C6N1 that was the last Japanese aircraft to be shot down in the war, on August 15, 1945, only a few minutes before the surrender. Summary from daveswarbirds.com

2024.337.004	USS Midway (CV-41) - A Touch Of Salt - 1976-1978	Begy, C. R. (ed)	Pictorial account of USS Midway, lead ship of its class, activities during the period of 1976 to 1978 including an 89

Object ID	Title	Author	Summary
			day South China Sea/Indian Ocean deployment commencing in August of 1977. The ship departed from Yokosuka, Japan. There is a 1976 cruise book, and a 1978-79 cruise book. One source on the internet lists 4 deployments in 1976, 3 deployments in 1977, and 2 deployments in 1978. It is difficult to determine which deployments this book covers. Port calls in this book included the Pusan, Hong Kong, Subic Bay, Freemantle (Perth), Karachi, Singapore, Diego Garcia, Bandar Abbas, Misawa, Kadena. Onboard was Carrier Air Wing Five (CVW-5). Squadrons listed in this book but which change with other deployments in 1977 are: VF-161 (F-4N) VF-151 (F-4N) VA-115 (A-6A/B and KA-6D) VAW-115 (E-2B) VQ-1 VMAQ-2 Det. (EA-6A) HC-1 Det.B-1 and B-2 (SH-3G) The following was written by Pete Clayton and Robert L. Broaddus and appears on page 279 of the Midway cruise book for 1978-79: Beginning in May of 1977, VF-151 and VF-161 transitioned to F-4Js and VA-56 and VA-93 started flying A-7Es. VA-115 also exchanged their A-6As and Bs (A-6Bs) for A-6Es. This CVW-5 transition occurred while the ship was in port for its 60 day EISRA (Extended Incremental SRA, a unique modernization concept developed for Midway). The air wing transition was completed in September when USS Coral Sea fighter squadrons VF-191 and VF-194 exchanged their F-4Js with Midway's F-4Ns, prior to Coral Sea returning to Alameda after her 1977 deployment. In late 1977, Midway made an 87 day deployment to the Indian Ocean where she was the principal participant in Midlink 77, an exercise hosted by the Iranian Navy and including representation from Pakistan, Turkey, and the Royal Navy.

Object ID	Title	Author	Summary
2024.337.006	Rand McNally Encyclopedia of World War II	Keegan, John (ed)	A detailed study of the battles, weapons, personalities and political events which comprised the most complex war in modern history. Every major plane, tank, artillery piece, hand gun and ship is described -- from the B-17 to the aircraft carrier, from the M-1 rifle to the V-2 rocket. Biographical sketches of leading and less important figures in the war from warlords like Hitler and Stalin to generals like Patton, Rommel, Guderian, Yamashita, Eisenhower and Montgomery have been covered. Every battle is described with every major campaign, and dozens of relevant maps have been juxtaposed near them to give them greater clarity. Important tanks, planes and other weapons are illustrated by photographs and line drawings.
2024.337.007	Vietnam War : The Illustrated History of the Conflict in Southeast Asia, The	Bonds, Ray (ed)	An objective, highly illustrated analysis of the Vietnam war focuses on the facts of the conflict, from the sites of troop gatherings through the paths the results of American and Viet Cong confrontations. There is no mention of Operation Frequent Wind. According to the index, the USS Midway is mentioned on pages 90 (first MiG kill of the war), 132 (aircraft from Midway struck Viet Cong positions in April 1965 and on 17 June, Phantoms of Midway's VF-21 shot down two MiG-17s; on 20 June, A-1 Skyraiders of VA-125 shot down another MiG), 134 (A-4 was shot down), and picture of General Nguyen Cao Ky crossing the deck of the Midway on page 234. 2024.343.001	CVW : US Navy Carrier Air Wing Aircraft, 1975-2015, Vol. 1 : F-4 Phantom II, F-8 Crusader, F-14 Tomcat	Crutch, Mike	COPYRIGHTED EBOOK. Do not copy nor distribute. Permission given to store on our library drive by Mike via email. Carrier Air Wings came into being on 20 December 1963, replacing Carrier Air Groups in the US Navy. It is from the latter that the term 'CAG' - for Commander, Air Group - is still used colloquially in place of the modern title Commander, Carrier Air Wing officially abbreviated to a less pronounceable 'COMCVW'. A brief history of each CVW is given in Chapter One, with

Object ID	Title	Author	Summary
			emphasis on those fighter squadrons and reconnaissance fighter detachments as assigned to each since 1 January 1975. The CVWs are listed in numerical order, and the narratives for each are headed by a panel detailing MODEX allocation, squadron, aircraft type and dates assigned. The accompanying narratives are biased towards the fighter and 'recce fighter' elements of the CVW, details of major deployments (i.e. cruises) and operations provide context as appropriate to the political, military and regional situations at the time. Mike Crutch's email at publication was a9aviation@gmail.com.
2024.344.001	USS Midway (CVA-41) - Mediterranean Cruise - 1954	D'Argenio, Raymond M. (ed.)	A pictorial account of the deployment of the USS Midway to the Mediterranean Sea in 1954. The ship departed Norfolk on 4 January and returned to Norfolk on 4 August. Port calls included: Gibraltar; Algiers, Algeria; Augusta, Sicily, Italy; Taranto, Italy; Salonika, Greece; Athens, Greece; Cannes, France; Marseilles, France; Barcelona, Spain; Genoa, Italy; Livorno, Italy; Palermo, Sicily, Italy; Naples, Italy; and Tangier, Morocco. CAG-6 was the embarked airwing and consisted of: VF-31 (F2H-2), VF-33 (F9F-6), VF-73 (F9F-6), VA-25 (AD-6/AD-4B), VC-12 Det. 35 (AD-4W) , VC-3 Det. 35 (AD-3Q/4NL), VC-62 Det. 35 (F2H-2P), VC-5 Det. 35 (AJ-1), and HU-2 Det. 35 (HUP-2).

Includes a Litton Precise Low Altitude Navigation Key
2024.348.001	Collier's Photographic History of the European War: Including Sketches and Drawings Made on the Battle Fields	Reynolds, Francis J. & Taylor, C. W.	Note this was published in 1917 before the U.S. entered the war. From the Foreword--"The War of the nations, the most stupendous struggles the world has ever witnessed, now involves every continent and all the Greatest Powers on the Globe. .. The great historic value of 'Collier's Photographic History of the European War' arises from the fact that every army and warring nation is depicted. Here are shown the German, Austrian, British, French, Belgian, Russian, Serbian, Italian, Turkish, Bulgarian, Japanese, in fact, all armies in the field, seen as they are in their daily life and strife. Here, too, are the pathetic dramas of the ruined cities, villages, cathedrals, and palaces of Belgium and northern France, and the flight of the refugees in all the lands ravaged by war. War on land is portrayed as never before, since never in the history of the world, has been such vast and

Object ID	Title	Author	Summary
			varied material to draw upon. Equally complex are here shown the instruments of the twentieth century's new phases of war--war waged in the air--war waged not only at sea, but beneath the waves."
2024.349.001	Triple Sticks : Tales of a Few Young Men in the 1960s	Fipp, Bernard	The true story of four young men who would become the pointy end of the stick in aerial battles over North Vietnam, the most heavily defended patch of real estate in the history of aerial warfare. They were to do this in 1967, the year in which Naval Aviation experienced its greatest losses. These four young men, now Lieutenants Junior Grade, United States Navy, were ordered to Attack Squadron 34 to fly A4 Skyhawks into combat. They were assigned Junior Officer's stateroom 0111 aboard USS Intrepid, a venerable aircraft carrier with a distinguished history. This "bunkroom" better known to them as Triple Sticks was the repository for a log (in navy terms) or journal written by these four young aviators. Forty years later this log was the genesis of this memoir. In the lethal environment over the northern reaches of North Vietnam or ashore in the Officer's clubs and bars of Asia, the writing brings to life wonderful humor, bizarre behavior, vivid aerial battles, uncommon loyalty, anger, frustration and respect. One survived or did not according to his skill and luck. (from Amazon.com)
2024.349.002	Inside Hanoi's Secret Archives	McConnell, Malcolm	The story of "Operation Swamp Ranger" a covert mission to Vietnam that uncovered thousands of documents, photographs and artifacts from the archives of the People's Army of Vietnam (PAVN) in 1992. Object ID	Title	Author	Summary
			provided in the first few pages. The ship initially deployed to the southwest Pacific from San Diego on 1 May 1944 with Composite Squadron 14 embarked. The ship and its screen of destroyers provided protection of fleet units from submarines and harassing surface combatants. The ship supported a number of invasion forces, nearly continually under threat from suicide plane attacks. In early 1945 the ship returned to San Diego for refitting as a flagship. In April, with COMCARDIV 23 embarked, the ship got underway for Pearl Harbor and Saipan. At Saipan she embarked Composite Squadron 99 and proceeded to support of the Okinawa invasion. After Okinawa and a rest at Leyte the ship was order to Adak. While en route to Adak the Japanese surrender was effected, and the ship became part of the occupation force for Hokkaido. On completion of that mission the ship called at Tokyo Bay for liberty.
2024.350.005	USS Rochester (CA-124) - 1959 Cruise	Robinson, William A. 			graduating class. This book belonged to CDR Ben Hallowell, husband of Library Volunteer Avery Hallowell.
2024.358.004	US Navy PBY Catalina Units of the Atlantic War	Ragnarsson, Ragnar J.	Several books have been written about US naval patrol aviation in World War 2, but none do full justice to the role played by patrol squadrons of the US Navy in the longest, most bitterly fought campaign of the war - the Battle of the Atlantic. From the Arctic to the Equator, anti-submarine aircraft of the US Navy patrolled both sides of the stormy Atlantic alongside their allied counterparts, escorting merchant shipping through submarine-infested waters - the crucial lifeline from the United States to Great Britain and the Mediterranean, and staging troops and supplies for the ultimate liberation of North Africa and Europe. This book details the PBY Catalina, without contest the most successful flying boat ever designed, and a key element in the success of the Atlantic War. Contents Introduction · Development of the PBY Catalina · Prelude to War · The PBY goes to War · Anti-submarine Warrior · Battle of the Atlantic · Warmer Waters · Northwest Africa · Rescue & Medevac Missions · Appendices (Source: ospreypublishing.com)

			covers, and kids' books. They provide a fascinating caricature of America's spirit and focus during the war years. One of the illustrations is titled "Midway Misguided Missile Magic" on page 91, regarding Operation Sandy V-2 rocket launch on 6 September 1947
2024.365.004	USS Constellation (CVA-64) - Connie Stays at Sea - Cruise Bravo - 1971-72	Jones, Dave (ed)	Pictorial account of the second part of the deployment of the USS Constellation, CVA-64 in 1971-72. After six months in Vietnam, the ship was scheduled to return to the US. While in Japan, their return was cancelled and they were ordered back to Vietnam for another 2 1/2 months. The first part of the cruise is in a cruise book titled "USS Constellation - CVA-64 - Connie at Sea - 1971-72" and its objectid is 2012.376.001. Ports of call and items of interest in this book: Yokosuka, Japan; pictures of Tom Blonski, Matt Connely, William Driscoll and Randy "Duke" Cunningham (pages 22-23); copies of newspaper clippings about the downed Migs, the first aces of Vietnam, and return of the dogfight; CAG, VAW-116, RVAH-11 had changes of command; new department heads on page 29; Subic Bay, Philippines; Adm. B. A. Clarey, Commander in Chief U.S. Pacific Fleet visits; Singapore; congratulations from VADM W. P. Mack, ADM B. A. Clarey, and ADM E. R. Zumwalt, Jr., VADM J. L. Holloway, III. The last page lists 17,289 arrested landings and 150 combat flying days for the cruise. Two aviators were listed as missing in action: Cdr. H. L. Blackburn and Lt. S. A. Rudloff both from VF-92. Someone has attached a 2-page printout in the back of the book with more information about these two men.

2024.368.001	Jane's US Military Aircraft Recognition Guide	Holmes, Tony	More than 400 color photographs Key recognition features Includes aircraft from 1909 to the early twenty-first century Technical specifications and history Helicopters and unmanned aerial vehicles (UAVs) The latest developments on the aircrafts in service
2024.368.002	Historic Aircraft Wrecks of San Diego County	Matcha, Gary Patric	Clear weather and a natural harbor made San Diego an early aviation hub, but success in flight came with devastating tragedies. The remains of more than four hundred aircrafts lie scattered across the county's deserts and mountains. Experts estimate that dozens more are on the ocean floor off the coast. In 1922, army pilot Charles F. Webber's DeHavilland biplane went missing over Cuyamaca Rancho State Park. In 1978, Pacific Southwest Airlines Flight 178 collided midair over San Diego and crashed in the residential North Park neighborhood, claiming the lives of 144 people in what was the worst airline disaster of the era. Author and aircraft accident research specialist G. Pat Macha recounts these and other stories of astonishing survival, heroism and heartbreaking fatality.
2024.368.003	Flying Dragons : The South Vietnamese Air Force	Mikesh, Robert C.	This book contains the most complete history of the South Vietnamese Air Force that surviving records and accounts can convey. In many ways, this is an American story; since VNAF was organized, trained, equipped, and attained its maximum strength under the tutelage of the US military. In view of numbers of aircraft, the South Vietnamese Air Force emerged as the fourth largest Air Force in the world-behind Communist China, the United States, and the Soviet Union. This is not a political history of the Vietnam War; rather it is the story of the transition of the VNAF from an under-trained and ill-equipped French Air Force auxiliary unit to a size

			during its 20-year life span, so large that it was almost incapable of sustaining itself with sufficient numbers of trained personnel and support materials. This is an up-dated version of the book by this same name and author published in 1988, which now features an abundance of color photographs and new insights of the air force's role in that war that have settled with time. (From Amazon)
2024.369.001	Jane's Fighting Ships - 1999-2000	Sharpe, Richard (ed)	Jane's Fighting Ships is an annual reference book (also published online, on CD and microfiche) of information on all the world's warships arranged by nation, including information on ship's names, dimensions, armaments, silhouettes and photographs, etc. Its annual editions cover the warships used by the different national naval and paramilitary forces, and provide data on their characteristics. It was originally published by John F. T. Jane (usually known as "Fred T.") in 1898 as Jane's All the World's Fighting Ships. Its success launched a number of military publications carrying the name "Jane's". It is a unit of Jane's Information Group, which is now owned by IHS. From Wikipedia, the free encyclopedia
2024.370.001	USS Lexington (CVA-16) 1958	Andrew, R. D. M. (ed)	Pictorial account of the deployment of the USS Lexington CVA-16 to the Far East in 1958. She departed Bremerton on 26 March 1958 headed to San Francisco then San Diego, the Lexington's home port. She was alerted to make preparations for immediate deployment forty-eight hours after the king of Iraq was assassinated. She was underway on 17 July 1958 from San Diego. Ports of Call included Hawaii, Guam, Subic Bay and Yokosuka before returning to San Francisco on 18 December 1958.

Object ID	Title	Author	Summary
			Naval Aviation Excellence provides a global journey into the world of pilots, engineers, mechanics and experimental flight testing. It is full of humor , adventure and honors the lives of tragically lost comrades. The odyssey starts at NASA but quickly spreads globally after flight school. Aircraft featured include the F/A-18 Super Hornet, the F-14 Tomcat and the A-6E Intruder along with the aircraft carriers USS Midway and USS Kitty Hawk. Naval Aviation Excellence is a memoir that provides unforgettable glimpses into the world of military aviation that sustains global peace, 24/7
2024.384.001	USS Hollandia (CVE-97)	Lewis, William H. (ed.)	A textual and pictorial account of the life and times of the Hollandia from Launch in 1942 through September 1945 when she was being prepared at Terminal Island, California to embark on a return to the Far East to transport personnel back to the states. A very well-prepared and entertaining book, Travels covered during the war in the Pacific are displayed on the end pages of the book.
2024.387.004	Sidewinder: Creative Missile Development at China Lake	Westrum, Ron	In the mid-1950s a small group of overworked, underpaid scientists and engineers on a remote base in the Mojave Desert developed a weapon no one had asked for but everyone in the weapons industry desired. This is the story of how that unorthodox team, led by visionary Bill McLean, overcame U.S. Navy bureaucracy and other more heavily funded projects to develop the world's best air-to-air missile. Author Ron Westrum examines that special time and place-when the old American work ethic and "can do" spirit were a vital part of U.S. weapons development-to discover how this dedicated team was able to create a simple and inexpensive missile. Today, many decades after its invention, the Sidewinder missile is still considered one of the best that America has to

			offer. In a time of billion-dollar weapons development contracts, astronomical cost overruns, and defense acquisitions scandals, this revealing, highly readable tale about one of the most successful weapons in history should be of interest to anyone concerned with national security (source = Amazon.com).
2024.389.001	USS Midway (CV-41) - Desert Magic - 1990-1991	Guido, S. (ed.)	A pictorial account of the activities and crew of USS Midway in the period July 1990 through June 1991. It was an eventful period in the life of Midway that saw her as the flagship of the U.S. Naval Presence on the Northern Arabian Sea and Persian Gulf in the leadup to and execution of Operation Desert Storm. Midway was on station from November 1990 to March 1991. This was part of a western Pacific/I.O. deployment that took place from 2 October 1990 to 17 April 1991. Port visits during the period the cruise book covers were Subic Bay (2), Singapore, Abu Dhabi, Pattaya Beach and Hong Kong. Midway was visited by Vice-President and Mrs. Dan Quayle on 21 May in recognition of Midway's participation in Desert Storm. Other VIP visits included the Secretary of the Navy, Australia's Maritime Commander and Brooke Shields. Midway escorts for the deployment were USS Oldendorf (DD-972), USS Curts (FFG-38) and USS Fife (DD-971). CVW-5 was embarked for the deployment portion with VFA-195 (F/A-18A); VFA-151 (F/A-18A); VFA-192 (F/A-18A); VA-185 (A-6E and KA-6D); VA-115 (A-6E and KA-6D); VAW-115 (E-2C); VAQ-136 (EA-6B); and HS-12 (SH-3H).

2024.391.001	Mission : Seventy-two - USS Midway (CVA-41) - 1972-73	Doweary, M. M. (ed)	A pictorial account of the western Pacific deployment of USS Midway in 1972/73. The ship departed Alameda 10 APR 72 and returned to Alameda 3 March 1973, 1 week short of an 11-month deployment. Not only was it a long deployment, Midway was deployed 7 weeks ahead of schedule with less than one week's notice. Significant operations included 9 periods of line operations off Vietnam in support of the Vietnam War. Port calls included Pearl Harbor, Subic Bay (multiple), Hong Kong and Singapore. Bob Hope performed on Midway with his troop on 27 December in Singapore. The show was taped and broadcast on U. S. national television on 17 January 1973 as the Bob Hope Christmas Special. CVW-5 was embarked. The airwing consisted of VF-151 (F-4B), VF-161 (F-4B), VA-56 (A-7B), VA-93 (A-7B), VA-115 (A-6A and KA-6D), VAQ-130 Det 2 (EKA-3B), VFP-63 Det 3 (RF-8G), VAW-115 (E-2B), HC-1 Det 2 (SH-3G), and HC-7 Det 110 (HH-3A).

			carriers, was built to withstand combat damage anticipated in the invasion of Japan. While none of the three Midway class carriers saw combat in World War II, they nonetheless were the largest and most capable warships in the world for 10-15 years and remained very formidable warships for decades to come. In this book, the author, a former crew member of FDR, recounts the history of the ship along with a recap of the lives of each of the men who commanded her during her 32 years of service. Together, the ship and her skippers formed "A Commanding Presence." Additional chapters include memories of her commissioning, the "straight deck" ship, the "angle deck" ship, her decommissioning, and the FDR Reunion, an organization dedicated to keeping the memories alive. Also included are chapters on "What's It Like To Command An Aircraft Carrier?"; "What's It Like To Land On An Aircraft Carrier?"; and "What's It Like To Work On The Flight Deck?" all written by subject matter experts."
2024.401.001	Top Guns : America's Fighter Aces Tell Their Story	Foss, Joe	In this unique volume the authors, two prominent, highly decorated war veterans, present the extraordinary stories of 27 of the greatest fighter aces of the 20th century. Brought together for the first time, here are the war experiences of a few great men who helped to make history. Photographs throughout. (from books.google.com)

Object ID	Title	Author	Summary
			the Communist bloc almost continuously during the Cold War in a desperate effort to collect intelligence and find targets for all-out nuclear war. The only hint of the relentless, clandestine operations came when one of the planes was shot down. Many of the air force and navy flyers were killed on the top secret missions. But now, for the first time, award-winning historian William E. Burrows shows that others were captured by the Russians, Chinese, and North Koreans, and were tortured, imprisoned, and killed, while their loved ones grieved and their government looked the other way. In an effort to improve relations with Russia, Washington is still looking the other way, though it pretends otherwise. Burrows has interviewed scores of men who flew these "black" missions, as well as the widows and children of those who never returned, all of whom want the full story finally told. He has done so with an eye to this story's immensely human dimension. By Any Means Necessary is not about airplanes, but about the people who've sacrificed their lives in the interests of national security.
2024.404.001	Doolittle Raid, The : America's Daring First Strike Against Japan	Glines, Carroll V.	The stories of Jimmy Doolittle's Tokyo raiders: their bombing mission against Japan and their struggle to survive and escape their pursuers in China
2024.404.002	Aircraft Carriers : The Illustrated History of the World's Most Important Warships	Haskew, Michael E.	The index shows several references to the Battle of Midway, the USS Midway, and Midway class carriers. Since the first successful launch of an airplane from the deck of a naval ship in 1910, "fighting flattops" have evolved into immense, nuclear-powered vessels--floating cities capable of launching dozens of aircraft performing a variety of missions, including attack, escort, antisubmarine patrol, and deterrence. This sprawling illustrated history covers that entire evolution, from the

Object ID	Title	Author	Summary
			first tentative steps taken by naval aviators before World War I to the roles these massive ships have played more recently in the War on Terror. In addition to explaining the technologies behind past and present carriers, the author reexamines major engagements and operations involving carriers, personalities who were central to carrier development, and naval doctrine relating to carriers. Filled with marvelous period photography and modern images, this book is a fitting celebration of naval warfare's most important innovation.
2024.404.003	I-400 : Japan's Secret Aircraft-Carrying Strike Submarine : Objective Panama Canal	Sakaida, Henry	This is a coffee-table book in which the photographs and illustrations deserve at least equal billing with the text. There are several artist's illustrations of the submarine and line drawings of the aircraft. Most of the Japanese photos are of the people involved in the operation with very few of the boats and aircraft since the entire project was highly classified. After the surrender there were many USN photographs taken of the submarine and they are displayed in the book to excellent advantage. There is also reproduced the letter reporting the Navy's technical examination of the boat in drydock at Pearl Harbor and a number of pictures taken with that survey. The story of Imperial Japan's largest submarines is a fascinating one from both technical and strategic aspects. They were conceived in early 1942 for air strikes against American East Coast cities. The submarines had to be long enough to support the 50 meter catapult rails needed for the heavier offensive aircraft and big enough to support the weight of three planes and all the necessary equipment. The initial plan was for a class of 18 but due to material shortages only five were started and only three ever got to sea. The

Object ID	Title	Author	Summary
			aircraft were also designed especially for the submarine strike mission. Each of the Seiran M6A planes weighed over 7 ,000 pounds and carried either an 800kg bomb or torpedo. This was truly an ambitious project to build, and it was undertaken for a very ambitious mission. During construction of the submarines and the building of their aircraft, the mission was changed to an attack on the Panama Canal to deny its use to the US Navy and American merchant shipping supporting the Pacific War. The book gives ample attention to the command and planning for the operation and discusses the senior officers in detail. There is also a fair amount of information given about the formation and training of the flight units. Technical details about the submarines are rather general with very little said about the submerged ship handling of the 5200 ton (submerged). 400 foot submarine. The aircraft characteristics and performance are treated rather more fully. By June of 1945 the Japanese Naval General Staff realized the Panama Canal mission was no longer of prime importance and focused its submarine strike force aim on the fleet anchorage at Ulithi. By the 14th of August I-400 and 1-401 were in position southeast of Ulithi ready for an early morning launch of a six plane kamikaze attack on the fleet anchorage on the I Th of August On the 15th they heard their Emperor announce Japan's surrender. That was backed up by a formal cease-fire order from the Naval General Staff later that day. Their ordered return to Japan, of course, had to be carried out through the US Fleet then steaming toward Tokyo Bay. The high seas interactions provided a certain amount of drama to both the American and Japanese sailors. That ends the Japanese part of the I-400

Object ID	Title	Author	Summary
			story. The American side of the I-400 story is covered by the book and starts just prior to the formal surrender on the deck of MISSOURI when a prize crew boarded the 1-400 at sea. Actually it was two prize crews which took charge of the big boat, but that's a tale left to the book itself. It then continues with a final chapter devoted to the USN crew's trip from Japan to Pearl Harbor. There are several other sides to that whole end-of-war period in the life of the Imperial Japanese Submarine Service. It will be remembered that the April '06 issue of THE SUBMARINE REVIEW carried Dr. Thomas O. Paine's 1984 account of his experiences ashore in Sasebo right after the cease-fire in '45. His mission was to help disarm and neutralize the Japanese Submarine Force, and also to collect samples of armament, particularly torpedoes. He recounted boarding the I-402 as it entered the harbor and his first experiences with the (then) huge aircraft-carrying submarines. If you haven't already read that account, which was in the form of a letter from Tom Paine to Richard Compton-Hall at the Royal Navy Submarine Museum, you should do so. It is a really hilarious story about getting the 1-400 ready for it's cross-Pacific trip to Pearl and the trip itself. Paine was the Exec of the prize crew for that endeavor. Another aspect of that end-of-war adventure into Japan by USN submariners is told in this issue of THE SUBMARINE REVIEW by RADM Joe Vasey in Submariners Ashore in Yokosuka Before VJ Day. As an aside, it was Admiral Vasey who provided me with the copy of Paine's 1984 letter to Compton-Hall. They were friends who stayed in touch after the war and often

Object ID	Title	Author	Summary
			discussed all the new panPacific issues which had to be addressed in the 60s,70s and 80s. There is at least one other part of that 1945 submariner-pre VJ Day-expedition-to-Japan story which was completely unrelated to those in the Admiral Vasey story. It was touched upon much earlier in these pages in a Book Review of V ADM Jim Calvert's book Silent Running. He was Exec of HADDO, and while moored alongside PROTEUS in Tokyo Bay awaiting the formal surrender aboard MISSOURI, submarine officers were afforded the opportunity to tour the Japanese Submarine Base at Yokosuka "on the southernmost curve of Tokyo Bay". They were warned specifically not to leave the base and to return to their ships when finished with the tour. When a large hole in the fence provided an opportunity to explore a bit further afield Calvert and several other HADDO officers walked through the hole and took a train to Tokyo- in a very unauthorized, and unescorted, tour of the enemy capital. That also is a tale worth hearing more than once, particularly the part of how they got out of their arrest on return to Yokosuka. (source = Naval Submarine

2024.404.004	Walk Around F4U Corsair	Doyle, David	The F4U Corsair was arguably the best piston-engine carrier-borne fighter ever produced. Designed in 1938 and first flown in 1940, the Corsair remained in production until 1953, long after many of its contemporaries had been rendered obsolete. Three firms - Vought, Goodyear, and Brewster - manufactured the numerous versions and sub-variants of the Corsair. This book closely examines three of the most notable variants, the F4U-1D, -4, and -5, as well as selected sub-variants, through detailed color photographs of the most painstakingly restored examples existent. In

2024.404.007	F9F Cougar	Neubeck, Ken	The first swept-wing carrier-based fighter aircraft built for the US Navy, the F9F Cougar, marked a major leap forward in naval aircraft design from its predecessor, the straight-wing Grumman F9F Panther. The prototype of the first version of the Cougar, the F9F-6, first took to the air in September 1951, just six months after contract award. There were several different models of the Cougar, reflecting its varied uses as well as the general development of the aircraft. The F9F-6 was followed by the F9F-7 and F9F-8. In addition, there were also two reconnaissance models, F9F-6P and F9F-8P, as well as a two-seater trainer version, F9F-8T. The contemporary photographs in this volume illustrate in detail the differences between the various Cougar models, making use of more than a dozen display aircraft located in museums across the US as well as one Cougar on display in Argentina. Grounded in solid historical research, the book also features historical images from the photo archives of both the US Navy and Grumman, and also includes rare photos of F9F Cougar in its final days, serving as a target drone for later generations of fighters. (Source = Amazon.com)
2024.404.008	F4U Corsair in Action	Sullivan, Jim	Now updated and expanded, Squadron s just released new

Object ID	Title	Author	Summary
			edition of the F4U Corsair in Action includes 53 exciting new photographs in 16 all new, additional pages. Bringing to mind the exploits of Pappy Boyington and his Blacksheep Squadron and Tommy Blackburn with the Jolly Rogers, the Corsair is among the most formidable U.S. fighters of World War II. The F4U maintained a kill ratio of 11:1 according to the United States Navy and went on to serve American forces in Korea, holding its own in the early years of the jet age. The Corsair was first conceived as a high-speed, high-altitude fighter for the Navy in 1938 when Chance Vought's design team drew up plans for a fighter with a 1,800 h.p. engine and a huge 13-foot propeller. The Corsair's famous inverted gull wing design was introduced to allow prop clearance. Handling problems delayed the aircraft's deployment aboard carriers, but Marine Corps pilots quickly took to the powerful, rugged fighter and VMF-124, the first Marine squadron to fly the Corsair in combat, also produced the first Corsair air ace, Kenneth A. Walsh, by the summer of 1943. A total of 12,571 Corsairs were built between 1940 and 1952, most of them by Vought, but hundreds by Goodyear and Brewster as those companies assembly lines had to be pressed into service to meet soaring demand for the remarkable aircraft. Jim Sullivan's exhaustive volume surveys the history of the Corsair from its first prototype to the restored warbirds that have continued to delight air show audiences down to the present day. Illustrated with 229 photographs, plus color profiles and detailed line drawings. (Source = Amazon.com)

2024.404.010	F4F Wildcat in Action	Dann, Richard S.	Richard Dann's latest contribution to the history of Grumman aircraft takes the form of an "in action" on the F4F. Rich covered the Wildcat previously in a Walk-Around, but this new book is by no means a rehash of his older work. The Wildcat's ancestry stems from the Grumman G-16/XF4F-1, a never-built biplane that was to have replaced the F3F carrier fighter. The introduction provides a photo of the FF-1 fighter, another of an F3F-3, and a side drawing of the G-16/XF4F-1. In response to Brewster's F2A Buffalo, Grumman used the G-16 as the basis for a monoplane fighter, the G-18/XF4F-2. Rich provides us with three images of the prototype, two side views, and overhead drawings of the wings. The XF4F-2 lost out to the Buffalo, but Grumman continued to refine the Wildcat, and produced the XF4F-3 from the remains of the crashed -2 prototype. There are two images of this aircraft and three sideview drawings shadowing the aircraft's various configurations. The F4F-3 was the first production Wildcat, and Rich includes a dozen -3 images. There were some differences between the -3 subtypes, and these are illustrated by a series of drawings, helpfully labeled with the appropriate BuNos. There is also a large 3-view. Three of the photos are detail shots, showing the wheel bay, gun bay, and the Fairchild F-56 camera. The XF4F-6 had single-stage supercharged engine, and this model is represented by a photo and frontal drawings showing

Object ID	Title	Author	Summary
			the deletion of the intercoolers. The -6 led to the F4F-3A, three images of which are included. One of these is a detail shot showing the supercharger installation. The first of the photo-recon Wildcats was the F4F-3P, and this is represented by one image. There are two photos of the later long-range F4F-7, as well as a side-view drawings and an overhead drawing of the wings. An interesting subject for a kitbash would be the F4F-3S "Wildcatfish" floatplane fighter, a single prototype of which was built. There are three -3S photos, one showing the aircraft with the vertical fin under the rear fuselage, which was found to be necessary to maintain directional stability. There is a single photo of the XF4F-5 prototype, and three side-view drawings. The next major production version was the F4F-4, and there are 23 photos of this mark. Notable are four cockpit shots, an aircraft with duplex flaps, another making a JATO takeoff, a Wildcat with extended wingtips, and another with breakaway wingtips as on the F8F. Wildcat production at Grumman was finished out by the XF4F-8 lightweight version - Rich includes two overall shots of this model, a closeup of the powerplant installation, and an overhead drawing of the wing. Production of the Wildcat shifted to the Eastern Aircraft Division of GM, as Grumman prepared to embark on the F6F program. The FM-1 was the Eastern equivalent to the F4F-4 - there are five photos of this model and one drawing of the wing. The most produced Wildcat

Object ID	Title	Author	Summary
			was the FM-2, which stemmed from the XF4F-8. There are thirteen images, a side-view drawing, a large 3-view drawing, an overhead drawing of the wing, and a drawing of a 5" HVAR rocket. There are two images of the first G-36A, an export version intended for France before that country fell to the Germans. There is a side-view drawing and a drawing of the wing as well. The Royal Navy's Fleet Air Arm would be the major export user of the F4F, and there are five photos of the Martlet Mk. I, a side view drawing, and a wing drawing. The Martlet II is covered by two side drawings, a wing drawing, and five photos. The history of the Martlet III variant is certainly convoluted, and Rich notes that he may not be 100% right on all the particulars. This does not degrade from the coverage of this model, as there are five photos, a side drawing, and two drawings showing the different windshields seen on this model. The Mk.V was an F4F-3B equivalent, and is represented by a side drawing and two photos. The Martlet/Wildcat V was an FM-1 for the FAA; there are two photographs, an overhead drawing of the wing, and a drawing of the 58-gallon drop tank. And finally, the Wildcat Mk. VI was a UK version of the FM-2; there are two photos and a side-view drawing. In the center of the book are ten color side views, including: *BuNo 1844 1st production Wildcat, with cowl-mounted guns *F4F-3 VF-72 prewar colors *Martlet II No.805 squadron *F4F-4 of John Thach *Martlet Mk.V from HMS Searcher *F4F-3P of VMO-251

Object ID	Title	Author	Summary
			*Martlet Mk.IV from HMS Biter (Ju290 killer) *FM-2 from VC-36 *FM-2 from VC-79 *FM-2 in silver lacquer advanced training scheme Recommended. A very detailed rundown on all Wildcat subtypes, with some excellent detail references. Add in the coverage of the oddball models, and you've got a must-have. (Source = cs.finescale.com)
2024.404.011	USS Lexington CV-2	Doyle, David	A pictorial history of the USS Lexington CV-2 from design, to construction, to battle, to appearances on the silver screen and finally to the sinking of the Lexington on 8 May 1942. Twenty-six officers and 190 crewmen were lost, the balance, 2,735, were saved and would go on to staff the carriers that soon would follow.
2024.404.012	Blue Angels : The U.S. Navy's Ambassadors in Blue	Kinzey, Bert	Contents: Introduction: F6F Hellcats, F8F Bearcats, SNJs; The Transition to Jets: F9F Panthers, TO-2 &TV-2 Seastars, F9F Cougars, F7U Cutlasses; Going Supersonic: F11F (F-11A) Tigers, F-4J Phantoms; Economic Considerations: A-4 Skyhawk IIs; Back to the Mainstream: F/A-18 Hornets; Fat Albert.
2024.404.013	Blue Angels : A Fly By History, Sixty Years of Aerial Excellence	Veronico, Nicholas A.	The Blue Angels first took wing in 1946--a team of four pilots flying the Grumman F6F hellcat in daring air shows conceived by Admiral Chester W. Nimitz, chief of naval operations. In the 60 years since then, the "V" and "echelon" formations have given way to the awe-inspiring "diamond" maneuvers and solo tricks like the "dirty loop" and the "tuck-under break." The six-man teams moved into the jet age with the McDonnell Douglas F/A-18 Hornet. The 60-year story is told with more than 100 photographs and numerous interviews with members past and present.
2024.404.014	United States Navy and Marine Corps Fighters 1918-1962	Matt, Paul R.	This book is the culmination of over ten years ardent study of the United States Navy and Marine Corps aircraft, their

			history, purpose and development. This work describes fighter types but is also the story of the ingenuity and courage of the men and women who flew and maintained them.
2024.404.015	Blue Angels : The US Navy's Flight Demonstration Team, 1946 to the Present	Neubeck, Ken	Since 1946, the world-famous US Navy Blue Angels flying-demonstration team has performed in airshows in the United States and around the world. This book details the origins of the team when created by the US Navy, as well as describing the different models of aircraft that the team has flown during its seventy-year history. Propeller-driven F6F-5 Hellcat and F8F Bearcat Jet-powered F9F-8 Cougar, F11F-1 Tiger, F-4 Phantom, and A-4 Skyhawk Present-day F/A-18 Hornet Graphic and photographic descriptions of some of the team's signature maneuvers that are performed during a Blue Angels airshow, in stunning imagery. (Source = Amazon.com)
2024.404.016	F4U Corsair Units of the Korean War	Thompson, Warren	This is the story of the Navy and Marine Corps F-4U squadrons that flew the venerable Corsair in combat against the North Koreans. Although outclassed by the new generation of jet fighters and chiefly used in the close air support role, a number of Corsairs were sent up against the night raiders that North Korea sortied over UN lines after dark, and it was in an F4U-5N nightfighter that Lt. Guy Bordelon became the US Navy's sole ace of the conflict. Including dozens of Corsair pilots' unpublished accounts of the hard-fought air war over Korea, this book also features extensive appendices that list every unit deployment and details of Corsairs lost in the war.
2024.404.017	VF-11/111 'Sundowners' 1942-95	Tillman, Barrett	Fighting Squadron 11 was established at San Diego in August 1942, beginning a

Object ID	Title	Author	Summary
			half-century record that spanned aerial combat in three wars from the piston to the jet age. Earning its battle spurs at Guadalcanal in Wildcats, the 'Sundowners' transitioned to Hellcats in 1944 and saw further action from USS Hornet (CV-12). Redesignated VF-111 in 1948, the unit converted to F9F Panthers and scored history's first jet-versus-jet victory over Korea in 1950. FJ-3 Furies and F11F Tigers followed, before VF-111 received the world-class F8U Crusader in 1961. During the Vietnam War, the "Sundowners" logged six deployments, scoring MiG kills in F-8s and F-4 Phantom IIs. From 1978 to disestablishment in 1995, VF-111 flew F-14 Tomcats from USS Kitty Hawk (CV-63) and Carl Vinson (CVN-70), completing 37 deployments from 17 'flattops' in its 52-year career. VF-111 had one deployment on the Midway in 1965 described on pages 80-83.

2024.404.018	AD Skyraider Units of the Korean War	Burgess, Richard R.	The Douglas AD Skyraider is considered the most effective naval aircraft of the Korean War, overshadowed in fame by the new jet fighters that captured the public imagination. Too late for combat in World War II, the AD had replaced Dauntless, Helldiver, and Avenger dive- and torpedo-bombers from that conflict on carrier decks during the late 1940s and was on hand to react to the surprise North Korean invasion of South Korea in June 1950. Combat Aircraft Douglas AD Skyraider Korean War Stemming the Communist Tide Enter the Chinese Close Air Support-Protecting the Troops Interdicting the Roads and Railways in North Korea Memorable Mission Accounts of the Pilots This book tells the story of the carrier-based U.S. Navy squadrons and the three land-

Object ID	Title	Author	Summary
			based U.S. Marine Corps AD units that flew combat missions against the North Koreans and Chinese. Drawing from personal interviews with AD pilots, the authors paint a harrowing picture of the deadly combat of this often forgotten air war. Included in this volume are the AD night attack and electronic countermeasures crews who harassed the enemy lines of communications after dark. Supporting the text are a number of previously unpublished private photographs that bring the stories of these pilots to life. Finally, the book contains extensive appendices that detail every unit deployment by carrier, air group, Skyraider model, and tail code, as well as detailed lists noting every Skyraider lost in the war.
2024.404.019	USN Carriers vs IJN Carriers : The Pacific 1942	Stille, Mark	This book provides an analysis of the variety of weaponry available to the rival carriers, in particular the embarked aircraft as well as the powerful ship-borne guns. Study the design and development of these revolutionary ships and 'live' the experiences of the rival airmen and gun crews as they battled for victory in a duel of skill, tenacity and guts.
2024.404.020	Corsair Aces of WWII	Styling, Mark	The speed with which the Corsair was rushed into service as a land-based fighter obliged the pilots to learn on the job. The aircraft soon proved to be superior to the Japanese Zero and played a major part in the destruction of Japan's elite air forces in the South Pacific. Later, in an effort to counter the Kamikaze threat, the Corsair was once again hurriedly pressed into service; this time in its originally intended role as a shipboard fighter. This versatile aircraft saw service with the US Navy and Marines, the British Fleet Air Arm and the RNZAF. Most of the 4FU pilots who recount their experiences within these pages considered it to be the best all-round fighter in the Pacific theatre. (from ospreypublishing.com:)

2024.404.027	Mitsubishi Type 1 Rikko "Betty" Units of World War 2	Tagaya, Osamu	Publisher description: The most produced Japanese bomber of the war the G4M saw action on every front from the first day of the Pacific conflict through to VJ-Day. The 'Betty's' very long range made it a key weapon during the opening year of the war. However, to achieve this, the aircraft was built with very little protective armour for its crew or fuel tanks, and Allied pilots soon exposed its extreme vulnerability. In the first in a series of volumes examining the key Japanese aircraft of WW2, Dr Osamu Tagaya details the G4M's extensive combat history, and lists all the units which operated the bomber.

	Erection and Maintenance Instructions to cover all modifications on Navy Model R5D Series Airplanes		of radio equipment for the Navy R5D series of aircraft. Sections: Operating Instructions; Maintnace Instructions.
2024.405.022	Pilot's Handbook Model PBX-5A Airplane	Bureau of Aeronautics	The purpose of this book is to describe briefly the principal operating features of the PBX-5 airplanes with which the flight personnel are concerned. As in many of the advanced type large airplanes, the duties of operating the PBX-5 are divided between the pilot and the flight engineer. With this division of duties, it becomes essential for the pilot and flight engineer to co-ordinate their respective duties at all times for the safe and economical operation of the craft. This books is brief, but covers all the features of the plane necessary for its efficient operation. Details of the equipment and mechanisms of the airplane are covered by other manuals placed aboard the airplane or at the operations base. Specific reference should be made to the Erection and Maintenance Manual as well as to the other manuals and handbooks for airplane equipment. Manufactured by Consolidated Aircraft Corp. San Diego, CA . Library has a 1940 eBook version for the PBX-5.
2024.405.023	Pilot's Handbook for Navy Model F6F-3, F6F-3N, F6F-5, F6F-5N Airplanes	Chief of the Bureau of Aeronautics	Provides standardized operating instructions and emergency procedures for the Navy Models F6F-3, F6F-3N, F6F-5 aircraft. Sections: Description; Pilot's Operating Instructions; Flight Operating Data; Emergency Operating Instructions; Operational Equipment; and Appendix I containing operating charts. The Midway has four other later revisions either as eManual, CD or recent hard copy of original version. Also included is Preliminary Supplementary operating Instructions for the Navy Model F6F-5 Airplane, NAVAER 01-85FB-515, dtd 15 May 1945 (8 pages).
2024.405.024	Pilot's Handbook of Flight Operating Instructions for Navy Models F4U-4, FG-4	Chief of the Bureau of Aeronautics	Provides standardized operating instructions and emergency procedures for the Navy

Object ID	Title	Author	Summary
	Airplane		Models F6F-3, F6F-3N, F6F-5 aircraft. Contents. Description -- section II. Normal operating instructions -- section III. Operating data -- section IV. Emergency operating instructions -- section V. Operational equipment -- Appendix I. Operating charts, tables, curves and diagrams.

2024.408.001	Hank Caruso's 44th Anniversary AEROCATURES™ Calendar for 2025	Caruso, Hank	Hank Caruso's Aerocatures™ Calendar is a three-time award winner in the Calendar Marketing Association's annual National Calendar Awards competition. The Aerocatures™ Calendar was recognized in the categories of Most Original and Best Cartoon Art. Features 17 colour illustrations. Hank Caruso's Aerocatures™ are among the most novel and distinctive images in aviation art today. Trained as both an artist and engineer, Hank Caruso's familiarity with aviation technology and aircraft operations enable him to convincingly show how flight crews feel about their aircraft and how the aircraft feel about themselves. His careful draftsmanship and attention to detail add a strong sense of

Object ID	Title	Author	Summary
			realism to his dynamic portrayals of each aircraft's unique personality. The credibility of Hank's aviation art is enhanced by his first-hand flying experiences as a backseater with Navy and Air Force tactical, test, and training organizations, including the Blue Angels, Topgun, and the US Naval Test Pilot School. An Artist Fellow in the American Society of Aviation Artists (ASAA) and a contributor to the Air Force Art Program, Hank's creations appear regularly in Naval Aviation News. His art has been displayed in juried shows in art museums and galleries throughout the country. Many military aviation squadrons and civilian aerospace organizations have commissioned original Aerocatures™ for use as logos, special presentations, and limited-edition commemorative prints. He currently resides in southern Maryland. (Source: artist's website)
2024.408.002	Naval Aviation in the Third Dimension! : Seventy Years of Naval Flight Test Aircraft in 3D	Caruso, Hank	"Featuring aircraft of the Patuxent River Naval Air Museum" The 35 aircraft types and more than 175 stereo images in this book are organized according to their mission type and usage. Within each type category, the aircraft are presented in roughly chronological order. This listing also provides a quick overview of the wide range of missions and capabilities that are an integral part of Naval Aviation.
2024.408.003	American Society of Aviation Artists Exhibit 2024 : thirty-sixth Annual International Aerospace Art Exhibition June 18 through October 18, 2024 Patuxent River Naval Air Museum, Lexington Park, Maryland exhibition catalogue	American Society of Aviation Artists	The Patuxent River Naval Air Museum (PRNAM) hosted the International Aviation Art Exhibition and Forum, an event presented by The American Society of Aviation Artists (ASAA). This exhibition showcased over 50 pieces of original aviation art created by some of the most esteemed aviation artists in the United States. Each artwork displayed was

Object ID	Title	Author	Summary
			carefully selected by a panel of expert judges based on artistic merit and historical significance. "There is no other exhibition like this in the United States," a spokesperson from PRNAM stated, highlighting the unique nature of the event.
2024.409.001	Insignia and Decorations of the U. S. Armed Forces	National Geographic Society	2,476 color reproductions of color insignia of the US Armed Forces. Also includes some B&W photos.

2024.411.002	USS Providence (CLG-6) - Flagship Cruise - 1962-1964	LeClercq, Paul Jr. (ed.)	Pictorial account of the deployment of guided missile light cruiser, USS Providence (CLG-6). She departed San Diego 11 November 1966 to relieve USS Oklahoma to become flagship of the Seventh Fleet. The relieving ceremony took place at her homeport of Yokosuka, Japan, on 1 December 1966. On 5 December she sailed for her first tour of war duty. She arrived back at her homeport of Yokosuka on for the Christmas holidays of 1966. She departed 7 January 1967 for her second tour of Vietnam Operations. She returned to Yokosuka on 25 February 1967. On 8 May 1967 she left for her fourth tour in Vietnam. She returned to Yokosuka on 10 June 1967. Her fifth tour to Vietnam began on 19 June and returned to Yokosuka on the 21 or 24 July 1967. In early 1968 she was again in Vietnam. She arrived back in Yokosuka on 23 February 1968, was relieved, and soon departed for the US (San Diego?).. Ports of call and items of interest: Hong Kong, Subic Bay, Yokosuka; Tokyo; Operation Stone, Operation Deckhouse VI, Port

Object ID	Title	Author	Summary
			Swettenham in Malaysia, Singapore; Philippines; Thailand; Bangkok; crossed the equator on 23 May 1957; Operation Beau Charger; Operation Buffalo, Operation Canyon, Operation Cimarron, Operation High Rise; Iwakuni, Japan; Beppu, Japan; Hong Kong; VADM William F. Bringle relieved VADM John J. Hyland as Commander of the Seventh Fleet; she supported the fleet in the Pueblo incident then returned to Vietnam; visit to Korea; Taiwan; Keelung; Taipai; Kuala Lumpur; Okinawa; The Big Gun Award; Tahiti; New Zealand; Tasmania, Australia; Navy Unit Commendation . She supported the relief of Hue. Gives history of ships named Providence. Pictures of San Diego and Hawaii. Includes list of names of officers and enlisted. Beautiful artwork by Harry K. Whitver.

2024.411.003	USS Saint Paul CA-73, 1956 - 1957	Dunlap, J. B. (ed.)	A pictorial account of the 1956 WESPAC cruise of the USS Saint Paul (CA-73), a Baltimore -class cruiser. Saint Paul returned to Long Beach, California, in February 1956 and subsequently moved to Bremerton, Washington, for upkeep and overhaul. This overhaul period included removing the forward 5" gun turret and adding a large deck house between the funnels to accommodate enhanced flagship facilities. This work was completed by late summer, and in September, she became flagship for the 1st Fleet and entertained the Secretary of the Navy during a fleet review at Long Beach. She departed that port on 6 November; and, after refresher training at San Diego, California, arrived at Yokosuka, Japan, on 29 September to relieve Rochester as 7th Fleet flagship. She spent most of her time in Keelung or Kaohsiung, Taiwan, with periods of training in the Philippines and port calls at Buckner Bay, Hong Kong, Manila, and Sasebo. On 26 April 1957, she headed home.

Object ID	Title	Author	Summary
2024.411.004	USS Saint Paul CA-73, 1960	Lacy, Robert G. (ed)	A pictorial account of the 1960 WestPac cruise of the USS Saint Paul (CA-73). USS SAINT PAUL was the sixth BALTIMORE - class heavy cruiser and the second ship in the Navy to bear the name. USS SAINT PAUL decommissioned in April 1971, following 26 years of continuous active service including combat in three wars. She was sold for scrapping in January 1980. Includes Presidential Cruise 16-18 June 1960.
2024.412.001	USS Midway - Far East Cruise 1962	Langkammerer, G. W. (ed.)	Pictorial account of the deployment of the USS Midway CV-41 the Western Pacific Ocean 1962. She departed Alameda 6 April 1962 and returned 20 October 1962. Ports of call and items of interest : Pearl Harbor, Yokosuka, Sasebo, Hong Kong, Subic Bay, Buckner Bay, Iwakuni and Beppu. In Memoriam page. Brief summary detailing the tensions between North and South Vietnam and the role the USS Midway played, on standby, as a friend of Freedom. CCG-3 VF-21 (F3H-2) VA-22 (A4D-2N) VA-23 (A4D-2) VF-24 (F8U-2) VA-25 (AD-6/7) VAH-8 (A3D-2) VFP-63 Det.A (F8U-1P) VAW-11 Det.A (WF-2) VAW-13 Det.A (AD-5Q) HU-1 Det.1 (HUP-3) On the inside front cover is taped a photo of the 24 September 1962 VAH-8 A3D-2 Skywarrior that crashed.
2024.412.002	USS Midway (CVA-41) - Westpac - 1961	Welles, Chris (ed)	Pictorial account of USS Midway (CVA-41) deployment to South East Asia. The aircraft carrier departed Alameda, CA on 15th February to Hawaii, Guam, Subic Bay; Philippines, to Japan (Sasebo, Yokosuka), Hongkong and arrived back in Alameda, CA on 28th September. Midway was one of three carriers ordered to the South China Sea in support of U.S. diplomatic efforts to

2025.001.002	USS Midway (CV-41) - Desert Magic - 1990-1991	Guido, S. (ed.)	A pictorial account of the activities and crew of USS Midway in the period July 1990 through June 1991. It was an eventful period in the life of Midway that saw her as the flagship of the U.S. Naval Presence on the Northern Arabian Sea and Persian Gulf in the leadup to and execution of Operation Desert Storm. Midway was on station from November 1990 to March 1991. This was part of a western Pacific/I.O. deployment that took place from 2 October 1990 to 17 April 1991. Port visits during the period the cruise book covers were Subic Bay (2), Singapore, Abu Dhabi, Pattaya Beach and Hong Kong. Midway was visited by Vice-

Object ID	Title	Author	Summary
			President and Mrs. Dan Quayle on 21 May in recognition of Midway's participation in Desert Storm. Other VIP visits included the Secretary of the Navy, Australia's Maritime Commander and Brooke Shields. Midway escorts for the deployment were USS Oldendorf (DD-972), USS Curts (FFG-38) and USS Fife (DD-971). CVW-5 was embarked for the deployment portion with VFA-195 (F/A-18A); VFA-151 (F/A-18A); VFA-192 (F/A-18A) ; VA-185 (A-6E and KA-6D); VA-115 (A-6E and KA-6D); VAW-115 (E-2C); VAQ-136 (EA-6B); and HS-12 (SH-3H).
2025.005.002	Personnel Qualification Standard for Ships' Maintenance and Material Management 3-M System	Chief of Naval Education and Training	The ship's 3-M Systems are the nucleus for managing maintenance aboard all ships of the Navy. Its purpose is to provide all maintenance and material managers with the means to plan, acquire, organize, direct, control, and evaluate manpower and material resources expended or planned for expenditure in support of maintenance.
2025.005.016	Management Objectives and Policy Memorandums	Commander Naval Air Forces Pacific	Manual includes division mission statements and objectives, key codes and individual charters, and policy memoranda, Includes force supply organizational chart. USS Midway mentioned (p.2) for sweeping awards at the 1984 Quality of Life Symposium. USS Midway shared the Habitability Award with the USS Enterprise, and was also awarded the AIRPAC Food Service Excellence Award, Dorrie Miller Wardroom Excellence Award, Captain Maury Notch Laundry and Dry Cleaning Award, and the Captain Edward Ney Food Service Award.
2025.013.017	USS Midway (CVB-41) - Mediterranean Cruise - 1950	None Stated	A pictorial account of the deployment of the USS Midway (CVB-41) from Norfolk, VA to the Mediterranean Sea from 6 January to 23 May 1950. Port calls included Gibraltar; Augusta, Sicily; Naples;

Object ID	Title	Author	Summary
			Sfax, Tunisia; Famagusta, Cyprus; Istanbul; Athens; Crete; Leghorn, Italy; Cannes; Oran, Algeria; and Lisbon. CARDIV Four was embarked with VF-41 (F4U-5), VF-42 (F4U-5), VF-43 (F4U-4), VA-44 (AD-1), VA-45 (AD-1), VC-4 Det. 5 (F4U-5N), VC-62 Det. 5 (F4U-5P), VC-12 Det. 5 (TBM-3E), and HU-2 Det. 5 (HO3S-1).
2025.013.018	USS Midway CVA-41 - Twentieth Anniversary - 1945-65	Hanish, Lance G. (ed)	A pictorial account of the cruise of the USS MIDWAY during it's 1965 western Pacific (WestPac) deployment with Carrier Air Wing Two consisting of VF-21 (F-4 Phantom IIs), VF-111 (F-8 Crusaders), VA-22 (A-4 Skyhawks), VA-23 (A-4 Skyhawks), VA-25 (A-1 Skyraiders), VAW-11 (E-1B Tracers), VFP-63 (RF-8 Crusaders), and VAH-8 (A-3 Skywarriors) deployed aboard. Departed Alameda, CA, 6 March 1965. Returned 23 November 1965. Ports of call include Honolulu, Hawaii; Subic Bay, Philippines; Yokosuka, Japan; Hong Kong, China. USS Midway (CV-41) aircraft carrier; lead ship of the class.
2025.016.003	US Naval Forces in Operation Desert Shield (7 Aug 1990-16 January 1991) and Desert Storm (17 January 1991-11April 1991)	Milstein, Stewart B.	The Universal Ship Cancellation Society is an organization of people who collect naval ship postmarks called postal covers. This data sheet was sent to Troy from Glen Whitt. It was available for download from this site: https://uscs.org/data-sheets/ This data sheet was compiled by a member, Stewart B. Milstein (7205), and it provides a listing of the US Naval Forces in Operation Desert Shield (7 Aug 1990-16 January 1991) and Desert Storm (17 January 1991-11April 1991) United States aircraft carriers that participated in either Westpac and/or Vietnam deployments. This listing does not, however, distinguish which individual deployment was Westpac or Vietnam. It is safe to assume that each carrier

Object ID	Title	Author	Summary
			that made a Westpac deployment did in fact spend time in Vietnam during the time period of 1964-1975. In addition, the squadrons (and air wings) that were deployed with the carriers are also listed. Our first carrier was on station in 1964 and the last one left in 1975 according to the source from which I obtained this information. The carriers are listed in an individual ship format in the order as their deployments occurred by date of arrival and departure. This data was obtained from the Department of the Navy--Naval Historical Center, Naval Aviation History Branch.
2025.016.005	Song and Service Book for Ship and Field. The ship departed from homeport of Gaeta, Italy and port visits included Malaga, Naples, Izmir, Athens, Cannes, Mallorca, and many ports in Italy. Helo detachment onboard was HS-1 Detachment Three based in Jacksonville, FL.
2025.031.003	USS Haleakala (AE-25) - Westpac Cruise - 1979-1980	None Stated	Pictorial account of the deployment of USS Haleakala (AE-25) on Westpac cruise from 1979-1980. Book includes photo of underway replenishment with USS Midway on p. 8 and photos from Haleakala's 20th birthday.
2025.041.001	USS Midway (CV-41) - Fortieth Anniversary 1945-1985 - The Magic Goes On - 1984-85	Williamson, Willie (ed.)	A pictorial account of an approximate 2-year period in Midway's forward deployed life. It covers the 28 December 1983 to 23 May 1984 deployment to the Western Pacific--Indian Ocean and Persian Gulf; the 15 October 1984 to 12 December 1984 deployment to the Western Pacific, and the history of the Midway until she went in to drydock in March of 1985.. Midway was at this time homeported in Yokosuka, Japan. During the 5 month

Object ID	Title	Author	Summary
			cruise (11984-85), Midway spent 111 continuous days at sea (on Gonzo Station) and steamed over 63,000 miles. Conducting almost 9,800 hours of flight operations, she launched and recovered over 5,300 aircraft, breaking the all-time record for the first quarter in any year of her history. Ports visits included Sasebo, Subic Bay, Manila, Pattaya Beach, and Singapore. A visit to Perth was cancelled to take up a USS Kitty Hawk commitment in the Indian Ocean. Carrier Air Wing Five (CVG-5) was embarked. Onboard for the 1983-84 deployment were: VF-161 (F-4S), VF-151 (F-4S), VA-93 (A-7E), VA-56 (A-7E), VA-115 (A-6E and KA-6D), VAW-115 (E-2B), VMFP-3 Det.B (RF-4B), VAQ-136 (EA-6B), and HC-1 Det.2 (SH-3G). Onboard for the October - December deployment were: VF-161 (F-4S), VF-151 (F-4S), VA-93 (A-7E), VA-56 (A-7E), VA-115 (A-6E and KA-6D), VAW-115 (E-2B), VAQ-136 (EA-6B), and HS-12 (SH-3H). Page 457 lists deaths which includes personnel from VF-161, VA-115, VA-56, VA-93, Eng and Wep.
2025.041.002	USS Midway (CV-41) - The Magic Touch - 1985-87	Thornton, Jon (ed.)	A pictorial account of the life of the USS Midway that covers a period from mid-1985 to about April 87. Operations included a deployment to Indian Ocean as Battle Group Alfa JUL to SEP 85. Exercises included Team Spirit 85-86, Inferno Creek, Annualex w/JMSDF, Multiplex and ASWEX. A significant maintenance period, EISRA '86, took place April to November 86 and included preps for the F/A-18 Hornet. The last A-4's and A-7's departed Midway in March 86. Port visits included Fremantle, Subic Bay, Hong Kong, Pattaya Beach, and Sasebo. Carrier Air Wing Five was embarked for the I.O. deployment and underway portions of the period when aircraft were aboard.

2025.301.009	Ready for Sea : The History of the U.S. Navy Supply Corps	Rodengen, Jeffrey L.	For more than 200 years, the United States Navy Supply Corps has provided crucial support to Navy sailors serving all over the world. Sailors are fed, paid, clothed, and armed by this group of men and women who keep the Navy running. The Navy Supply Corps history dates back to the early days of the United States when George Washington appointed Tench Francis to the position of purveyor of supplies on February 23, 1795. In this encompassing history, read firsthand stories of Supply Officers as they invented new ways to get supplies to ships, pushed for innovation in food preparation and uniform design, and fought alongside other sailors in battle.
2025.301.010	Midway Submerged : An Analysis of American and Japanese Submarine Operations at the Battle of Midway, June 1942.	Allen, Mark W	An Analysis of American and Japanese Submarine Operations at the Battle of Midway, June 1942. This book presents detailed arguments regarding the tactics employed in the US strategy for the Battle of Midway and effectively argues that submarine warfare played a greater role in the battle's outcome than previously thought. (A fully revised edition from the one first published in 2011)
2025.301.011	USS Midway (CV-41) - Desert Magic - 1990-1991	Guido, S. (ed.)	A pictorial account of the activities and crew of USS Midway in the period July 1990 through June 1991. It was an eventful period in the life of Midway that saw her as the flagship of the U.S. Naval Presence on the Northern Arabian Sea and Persian Gulf in the leadup to and execution of Operation Desert Storm. Midway was on station from November 1990 to March 1991. This was part of a western

Object ID	Title	Author	Summary
			Pacific/I.O. deployment that took place from 2 October 1990 to 17 April 1991. Port visits during the period the cruise book covers were Subic Bay (2), Singapore, Abu Dhabi, Pattaya Beach and Hong Kong. Midway was visited by Vice-President and Mrs. Dan Quayle on 21 May in recognition of Midway's participation in Desert Storm. Other VIP visits included the Secretary of the Navy, Australia's Maritime Commander and Brooke Shields. Midway escorts for the deployment were USS Oldendorf (DD-972), USS Curts (FFG-38) and USS Fife (DD-971). CVW-5 was embarked for the deployment portion with VFA-195 (F/A-18A); VFA-151 (F/A-18A); VFA-192 (F/A-18A); VA-185 (A-6E and KA-6D); VA-115 (A-6E and KA-6D); VAW-115 (E-2C); VAQ-136 (EA-6B); and HS-12 (SH-3H).

Rickenbacker and "The Flight of Enola Gay" by Gordon Thomas and Max Morgan Witts - Amazon.com
2025.301.014	Sailing of the Intrepid, The: The Incredible Wartime Voyage of the Navy's Iconic Aircraft Carrier	Williams, Montel	1944. The USS Intrepid set sail on its first combat voyage, only to be struck by a Japanese torpedo plane, jamming its rudder at a forty-five-degree angle. It could only sail in circles amid treacherous waters. The task force abandoned ship as it tried to make the 3,300-mile voyage to Pearl Harbor. For a day, the captain was able to slalom, alternating use of the ship's engines, but the seas became too perilous. Until

Object ID	Title	Author	Summary
			one resilient crewman came up with the ingenious idea of rigging a 3,000-square-foot high sail on the second deck to steer the ship home safe. Incredibly, the makeshift sail proved to be their ticket to the shorelines. With grit and determination, this spellbinding story details a remarkable survival story against all odds. - from bookjacket.
2025.301.015	Sundowners, Pegasus, and Little Butch, The	Laslie, Brian D.	Account of Carrier Air Group 11 and their role in the Pacific theatre during World War II beginning in 1943. Information covers three aircraft squadrons assigned to the USS Hornet (CV -12): VF-11, fighter group, the "Sundowners"; VB-11, bomber group, "Pegasus"; and VT-11, torpedo group, "Little Butch". Work based on interviews, diaries, archival reports, and battle reports. Notes, bibliography, and index are included.
2025.301.016	Fast Boats and Fast Times	Levy, David M.	Author describes personal experiences as a skipper of PT 59 which was among the first ships to engage Japanese warships at the beginning of World War II. Author sheds light on how his wartime journey shaped the remainder of his life.
2025.301.017	US Navy F-4 Phantom II Units of the Vietnam War 1969-73	Davies, Peter E.	Text examines the F-4 Phantom II which was primarily used as a land-based fighter-bomber and reconnaissance platform. Author presents information about the F -4 Phantom II during the Vietnam War from 1969-1973. Information is presented in five chapters that focus on the time after Operation Rolling Thunder, training at Topgun, and the Phantom II as a fighter. Includes comprehensive histories of fighting aircraft and their crews. A subsection of chapter four is titled, "Midway's MiGs". Appendices include unit deployment dates and descriptions of the color plates.
2025.301.018	Midway Class, The : Official Commemorative Guide	McGaugh, Scott	In 1945, the US Navy commissioned the USS Midway, the largest aircraft carrier that the world had ever seen and the namesake of the

Object ID	Title	Author	Summary
			Midway class, which included USS Franklin D. Roosevelt (CV-42), the USS and the USS Coral Sea (CV-43). The Midway class became a pioneering generation of aircraft carriers--the only one that served during the entire Cold War and beyond. This official commemorative guide chronicles the achievements and deployments of these "floating cities at sea" and their influence on world affairs. With archival photographs and fascinating facts, it provides a rare look at the service life of an unforgettable class that forged a legacy in US Navy history.
2025.301.019	LZ 129, "Hindenburg", The	Robinson, Douglas Hill	Author compiles historical sources and aviation design information fueled by his own experience witnessing airships in 1930s Germany. Black and white photographs are included as well as diagrams, schematics, and a bibliography. Sections include: "There were Giants in Those Days", "You Don't Fly in an Airship, You Go Voyaging", "Life in the Belly of Leviathan", "The Tragedy at Lakehurst", and "Airship Diesels". Scale drawings are attributed to Richard Groh.

Object ID	Title	Author	Summary
	Pacific : A Blue Angel's Journey		From the Prairie to the Pacific is the story of one man's journey from rural North Dakota to the cockpits of U.S. Navy jet fighters and ultimately Captain of a flagship aircraft carrier. Gil Rud flew combat missions over Vietnam in A-7 Corsair II aircraft before taking command of his own squadron. His success as a Naval aviator led to the ultimate reward - "Boss" of the world-famous Blue Angels aerobatic display team, overseeing their successful transition to the F/A-18 Hornet. Gil Rud reflects on his experiences and emotions as a husband and father as well as a pilot and an "officer and a gentleman." His stories of triumph and tragedy, from nights on the flight deck to nights on the town and the loss of close friends, reveal deep feelings, great insight and a wonderful sense of humor, as well as meticulous attention to detail.
2025.301.025	Vietnam: Light ATKRON Four, Binh Thuy 1971-1972	None Stated	Yearbook for Light Attack Squadron Four (VAL-4), the "Black Ponies" which flew OV-10A Broncos. Squadron was awarded the Vietnamese Presidential Unit Citation, Gallantry Cross for distinguished superior combat effectiveness while contributing to the successful efforts from 19 April 1969 to 16 March 1971.
2025.301.026	Helmet for My Pillow: From Parris Island to the Pacific	Leckie, Robert	Personal account of a young Marine experiences serving with 1st Marine Division during World War II including the attacks on Guadalcanal, New Britain, and Peleliu.

2025.302.001	Men of God, Men of War : Military Chaplains as Ministers, Warriors, and Prisoners	Doyle, Robert C.	"American soldiers, sailors, airmen, and marines love their chaplains. Sometimes they serve as vital links to home, family, and faith; other times, the chaplain buries them after death in battle, at sea, or in a prison camp. Chaplains serve as sounding boards when life goes sour and join celebrations when life goes well. The chaplain is present for them at all times, in all places, in all circumstances. This is the story of the chaplains' mission and tradition in the American armed services, stories of individual chaplains who did their duty to God and to their country"-- Provided by publisher.
2025.302.002	At the Dawn of Airpower : The U.S Army, Navy, and Marine Corps' Approach to the Airplane, 1907-1917	Burke, Laurence M. II	"At the Dawn of Airpower: The U.S. Army, Navy, and Marine Corps' Approach to the Airplane, 1907-1917 examines the development of aviation in the U.S. Army, Navy, and Marine Corps from their first official steps into aviation up to the United States' declaration of war against Germany in April, 1917. Burke explains why each of the services wanted airplanes and show how they developed their respective air arms and the doctrine that guided them. His narrative follows aviation developments closely, delving deep into the official and personal papers of those involved and teasing out the ideas and intents of the early pioneers who drove military aviation Burke also closely examines the consequences of both accidental and conscious decisions on the development of the nascent aviation arms. Certainly, the slow advancement of the technology of the airplane itself in the United States (compared to Europe) in this period affected the creation of doctrine in this period. Likewise, notions that the war that broke out in 1914 was strictly a European concern, reinforced by

Object ID	Title	Author	Summary
			President Woodrow Wilson's intentions to keep the United States out of that war, meant that the U.S. military had no incentive to "keep up" with European military aviation. Ultimately, however, he concludes that it was the respective services' inability to create a strong, durable network connecting those flying the airplanes regularly (technology advocates) with the senior officers exercising control over their budget and organization (technology patrons) that hindered military aviation during this period"-- Provided by publisher.
2025.302.003	Dogs in the Navy	Christenson, Scot	"Filled with informative text and photos, Dogs in the Navy provides a fun history of our canine friends who rode the waves with us. Dogs have been loyal companions to human since ancient times, long before these wolf descendants were domesticated as our pets. Loyal and trainable, dogs served many purposes on ships, ranging from guarding the deck, to keeping watch over sailors on shore in dangerous warzones. The adventurous exploits of dogs at sea in the service of navies are explored here by author Scot Christenson. Filled with informative text and more than one hundred photos, Dogs in the Navy provides a fun history of our canine friends who rode the waves with us. "-- Provided by publisher.
2025.302.004	Seawolves : First Choice	Kelly, Daniel E.	They called themselves Seawolves . . . The men of SEALs, PBRs, and SF called them saviors . . . Created in 1967, the HAL-3 helicopter squadron--aka Seawolves--provided quick-reaction close air support to SEALs, PBR River Rats, and Special Forces advisers and their troops. During the five years of the unit's existence, the seven detachments of Seawolves amassed stunning statistics: 78,000 missions, 8,200 enemy kills, 8,700 sampans sunk, and 9,500 structures destroyed. These

Object ID	Title	Author	Summary
			200 men collected a total of 17,339 medals. This is the story of one of those men. . . . Taking enemy fire while braced against the rocket pod of a Huey gunship and shooting an M-60 freehand in 110 mph winds was just part of Dan Kelly's job in Vietnam. As a gunner in the all-volunteer Seawolves, he served with distinction until three bullets bought him a trip home. Here is his amazing story of the Seawolves--a harrowing tale of unsung heroism and undaunted courage in combat. (From Amazon)
2025.302.005	U.S.Navy Seawolves: The Elite HAL-3 Helicopter Squadron in Vietnam	Kelly, Daniel E.	There were no dry runs for Seawolves in Vietnam. They put their lives on the line—every time. In the Viet Cong-infested Mekong Delta, where small SEAL teams were always outgunned and outnumbered, discovery brought swift, deadly consequences— and a radio call for backup from the United States Navy's very best: the Seawolves. The whirl of approaching rotor blades signaled their arrival as they tore through the jungle at treetop level, gunners hanging off the skids, shooting M-60s, raining down their lethal mix of high explosives and incendiary death. Seawolf Dan Kelly describes the origins of this extraordinary outfit. Put through a training program unlike any other, these men emerged to perform unparalleled feats of courage. The stories of these elite warriors capture America's real heroes in all their guts and glory, and demonstrate why the Seawolves are known as the most successful and most decorated unit in the Vietnam War. (From Amazon)
2025.302.006	USN Submarine vs IJN Aircraft Carrier: The Pacific 1942–44	Lardas, Mark	Fully illustrated, this book pits US Navy submarines against the aircraft carriers of the Imperial Japanese Navy at

Object ID	Title	Author	Summary
			the height of World War II. Before World War II the world's navies envisioned the submarine as a tool to hunt and kill cruisers and capital ships (aircraft carriers and battleships). Instead, they became best known for their abilities as commerce raiders. Yet hunting capital ships remained an important auxiliary role for the US submarine force in World War II. Featuring specially commissioned artwork and mapping alongside carefully chosen archive illustrations, this absorbing study focuses on five revealing battles between US submarines and Japanese aircraft carriers during 1942–44. At first, a combination of factors – bad torpedoes, poor US tactics, and plain bad luck – foiled every US submarine attack on a Japanese capital ship in 1942 and 1943. But over the space of six months in 1944 – from June through November of that year – US submarines sank three of Japan's largest aircraft carriers as well as a battleship. Thereafter, Japanese capital ships clung to port or sheltered waters beyond the reach of submarines. In this book, Mark Lardas explains how the technologies and procedures employed by both sides helped to determine the victor in five revealing clashes, from the battle of Midway in June 1942 to the sinking of Shinano, the largest warship sunk by a submarine, in November 1944. (From Amazon)
2025.302.007	F3H Demon	Kinzey, Bert	For more than thirty-five years, the Detail & Scale Series of aviation publications was considered one of the best references on military aircraft available. Focusing on the physical details of the aircraft, such as cockpits, engines, avionics and electronics, armament, landing gear, and more, each of the sixty-nine titles in the series provided

Object ID	Title	Author	Summary
			the most detailed look at a wide variety of aircraft dating from World War II to the present. The "F3H Demon in Detail & Scale" continues the well-established and respected Detail & Scale format as the first digital title in this series. It covers McDonnell's Demon, a jet fighter flown by the U. S. Navy in the 1950s and 1960s, in extensive detail. There are 298 photographs, and of these, more than 140 are photographs of details covering the Demon inside and out. 95% of the detail photos are in color, and almost all were taken specifically for this publication. The almost 300 photographs are supplemented with 24 art profiles and over a dozen detail illustrations, all of which were created just for this new title in the Detail & Scale Series. Every operational and test squadron that flew the Demon is covered in a special Demon Gallery chapter which provides information on the colors and markings used by each of these units. As with all books in the Detail & Scale Series, a special section is provided for scale modelers that reviews the model kits available of the Demon. (From Amazon)

2025.302.008	Vought F7U-3 Cutlass	Thomason, Tommy H.	The Chance Vought F7U Cutlass was ahead of its time. In 1948, when it first flew, it could hardly have been more exotic or state-of-the-art: a tail-less fighter to be powered by two afterburning jet engines. It was not only to be carrier-based but also climb quicker and be faster than the Air Force's new swept-wing North American F-86 Sabre. Developmental problems resulted in it taking too long to reach operational squadrons, which partly accounts for its relatively unsuccessful career. The Cutlass was designed too soon to benefit from the discovery of the area rule, which doomed it to transonic performance in level flight. Similarly, its lack of a

Object ID	Title	Author	Summary
			horizontal tail was intended in part to address the transonic pitch-control difficulties being encountered at the time but they proved to be avoidable with one. Unfortunately, no horizontal tail resulted in it not only being radical in appearance but also having challenging handling qualities at approach speed. The F7U-3's service introduction was also accomplished before the Navy perfected a rigorous process for transitioning pilots to new airplanes, particularly important in the case of the Cutlass and its unusual handling qualities, one of which resulted in a rare aeronautical phenomenon, the post-stall gyration. It was also first deployed before the introduction of the angled-deck concept that greatly reduced the degree of difficulty in landing high-performance jet fighters back aboard a carrier. The F7U Cutlass did eventually join the fleet and deploy, albeit to mixed reviews. It is often unfairly included on shortlists of the world's worst jet fighters. It was actually innovative in many respects. This new, detailed history of the development and operation of the type provides a more balanced perspective on what was a fascinating aircraft. (Summary from Amazon.com) --Steve Ginter 104 PAGES, 231-B&W PHOTOS, 16-PROFILES, 16-PAGES DRAWINGS ORDER NUMBER - NF06 - \$17.95
2025.302.009	Mighty Mars Martin, The: From 1945 US Navy Transport to 21st -Century Initial Attack Firefighting	Coulson, Wayne	An historical journey through 65 years of operations. Learn how the Hawaii Mars, equipped with new technology, is forging a new path for initial attack firefighting. The Hawaii Mars and

Object ID	Title	Author	Summary
			Philippine Mars are U.S. national treasures, serving the US Navy from 1945 to 1958. Starting their careers operating between the California coast and Hawaiian Islands during the Second World War, these aircraft are the only two that still operate today in commercial air service. Of the five Martin Mars originally built, only these two remain. They were converted to water bombers in 1960 by a consortium of five British Columbian timber companies. Since 1960, these aircraft have operated out of beautiful Sproat Lake, Port Alberni, B.C., fighting over 4,000 wildfires and dropping an impressive 7,200 gallons per load. The Coulson Group purchased these aviation giants in 2007 and received its first U.S. mission in the 2007 firestorm in San Diego County, California. In 2008 the Sproat Lake, Port Alberni, B.C., fighting over 4,000 wildfires and dropping an impressive 7,200 gallons per load. (Aviatorsbookshelf.ca) pretty disjointed summary.

2025.302.010	F-8 & RF-8 Crusader : In Detail & Scale	Kinzey, Bert	Detail & Scale produced its first book on the F-8 Crusader in 1988, and it was one of the most successful titles in the Detail & Scale Series. This new work, F-8 & RF-8 Crusader in Detail & Scale, brings our original work forward 31 years, enriched with much new content, more photos, mostly in color, and the addition of dozens of illustrations and full color profiles. The photographic collections of some of the very best aviation photographers have been opened to Detail & Scale, and several recognized experts have also contributed to this new book, resulting in a new, more comprehensive, and much larger publication on the Crusader.The book begins with a comprehensive developmental and operational history of the Crusader, a jet fighter that achieved a number of firsts and went a long way towards

Object ID	Title	Author	Summary
			bringing Naval carrier-based fighters to a level equal to and in some cases surpassing that of land-based fighters. This is followed by a chapter covering every variant of the Crusader produced for the U. S. Navy and Marines, from the prototypes, all of the F-8A/B/C/D/E variants and their upgraded versions after the remanufacture program, the two-seat TF-8A, both the original and remanufactured versions of the RF-8 photo reconnaissance variant, and the XF8U-3 prototype, often considered the best aircraft ever cancelled. Chapters on the F-8s used by NASA in advanced flight research and the Crusaders used by the French Navy and the Philippine Air Force follow. An area of wholly new content is contained in a chapter on the Crusader in the Vietnam War. A summary of how the Navy and Marines used the F-8 and RF-8 in Vietnam is provided, including a listing of every fighter squadron that flew the Crusader in combat. A comprehensive table lists all of the F-8 carrier deployments carried out by the Navy fighter squadrons as well as the Marine squadrons that flew out of Da Nang Air Base, South Vietnam. The chapter concludes with color photographs and full color profiles of all nineteen F-8s responsible for the confirmed destruction of MiGs in air combat. A comprehensive chapter on Crusader Details, long the hallmark of the Detail & Scale brand, follows. This chapter contains nine sections covering the cockpit, windscreen and canopy, fuselage, landing gear, wings, tail, engine, armament, and ECM equipment details. Complete coverage of almost every square inch of the various variants of the Crusader is provided through 136 high resolution photographs and illustrations (123 in full color). As with all Detail & Scale books, the final chapter covers the scale models of

Object ID	Title	Author	Summary
			the Crusader, from the early kits that are now only collector's items, to the gamut of kits that have been available for the past half-century. The standard modeling scales of 1/144th, 1/72nd, 1/48th, and 1/32nd are treated as separate sections and the available models in are reviewed.F-8 & RF-8 Crusader in Detail & Scale is an extensively detailed look at the F-8 Crusader, with more color photos of this iconic Navy fighter than any other book ever published. This print edition features 105 pages, 259 high resolution photographs (239 in color), 25 full color profiles and 19 Illustrations. (from Amazon.com)
2025.302.011	F8 Crusader Illustrated	Drendel, Lou	The Vought F-8 and RF-8 Crusaders were the US Navy's first supersonic fighters/reconnaissance airplanes. They set speed records and became iconic symbols of a generation of American fighters. The F-8 Crusader Illustrated tells the story of their development and operational life in over 100 pages of color photos, artwork, and detail drawings. Many of the color photos have not been previously published. (From Amazon)
2025.302.012	S-3 Viking Illustrated	Drendel, Lou	The Lockheed S-3 Viking was the first of the high-tech submarine hunters assigned to fleet aircraft carriers. It replaced the piston-engined Grumman S-2 Tracker as the first turbofan-powered carrier airplane. Those GE TF-34 high-bypass turbofan engines produced the nickname which operators used for the Viking. Unofficially, it became the "Hoover" or the more menacing "War Hoover". The name may not mean much to post-millennial readers, but to an older generation who first heard the sound of those engines, it resonated as the sound of a vacuum cleaner, and since Hoover was the dominant manufacturer of that instrument, the name stuck. Though only 186 S-3s were built, it was a dominant

Object ID	Title	Author	Summary
			airplane on the decks of carriers for the last quarter of the 20th century. As such, it performed a vital role in anti-submarine warfare when the emerging threat of the nuclear submarine had to be countered if the aircraft carrier was to remain a powerful instrument of foreign policy. It performed admirably in that role and later earned the "War Hoover" appellation in several theaters when it was assigned the surface warfare mission. That mission meant giving the S-3 attack capability with conventional and "smart" weapons. This is the history of the Hoover, told in over 200 color photos and illustrations. (From Amazon)
2025.302.013	S-2 Tracker Tracer Trader Illustrated	Drendel, Lou	"Stoof" is not an especially desirable name for your aircraft, since it seems to denote something less than stellar performance. But it did become the declared alliteration of a very capable sub hunter for a generation of Naval Aviators. Officially, the "S-2F Tracker", the "Stoof" manned the anti-submarine ramparts through 22 years of the Cold War while the Soviet Union continued to improve and build their submarine fleet. The S-2 was the tip of the spear for a new generation of anti-submarine carriers. Though conceived in an age of rapid technological advances, its straightforward design resulted in reliability that made it the last piston-powered aircraft on American carrier decks. The basic design was adapted for a pair of additional missions. As a utilitarian, it became the C-1 "Trader" carrier onboard delivery (COD) vehicle. As a fleet early warning platform, it became the S-2 "Tracer", and thereby becoming the "Stoof With A Roof", so-named because of the huge radar dish it carried. It served in the military of thirteen different nations, and when it's military career was over, it continued in civil missions for four different nations. That long

Object ID	Title	Author	Summary
			military/civilian career resulted in a variety of configurations and markings. The design of the Tracker/Trader and its robust airframe led to a career as an aerial firefighter, and included an engine upgrade to turboprop engines. It was one of the great product to come out of the Grumman "Ironworks". All versions of the basic desingn are included herein, following the "Illustrated" format of color photos, line drawings, and descriptive illustrations from the flight manual. (From Amazon)
2025.302.014	E-2 Hawkeye C-2 Greyhound Illustrated	Drendel, Lou	The Grumman E-2 Hawkeye was the first aircraft developed specifically to provide commanders a "God's Eye" view of the battlespace. The phrase "The Fog of War" was coined by Carl von Clausewitz (1780-1831), the Prussian strategic theorist who died before completing his masterpiece "On War". He was referring to the loss of situational awareness that develops when armies clash. That enduring dilemma has confounded commanders since the beginning of organized conflict. The Hawkeye gives the U.S. Navy the ability to defend the fleet and provide that critical situational awareness when enemy forces are engaged. The basic airframe has proven so adaptable that the Hawkeye has been able to accommodate technological advances over the more than a half a century of its operational life. It has been in continuous prodcution since 1960, which makes it the carrier aircraft with longest production run. The militaries of several other nations recognized the tactical advantages of the Hawkeye and E-2s have been sold to the armed forces of Egypt, France, Israel, Japan, Mexico, Singapore and Taiwan. The Hawkeyes predecessor, the E-1 Tracer had the unimpressive nickname of "Stoof With A Roof". The Hawkeye was more fortuate. It's popular name

Object ID	Title	Author	Summary
			was derived from the sound of it's turboprop engines, becoming the "Hummer". (It had to overcome the less impressive "Super Fudd" name.) As they did with their successful S-2 Tracker, Grumman used the basic E-2 design to produce a cargo/passenger version of the Hawkeye. The C-2 Greyhound became the carrier onboard delivery vehicle depended upon to provide logistical support to the fleet. Both the Hawkeye and the Greyhound continue to provide effective support to the wide-ranging American naval forces. Includes hundreds of color photos of all versions of the Hawkeye and Greyhound.
2025.302.015	F-9F Cougar in Detail and Scale	Kinzey, Bert	The renowned Detail & Scale Series continues with the newest title, F9F Cougar in Detail & Scale – Revised Edition, covering the development, history, and details of one of the United States Navy's first operational swept wing jet fighters. Between 1978 and 2004, Detail & Scale published more than 120 books on military aircraft and U. S. Navy aircraft carriers. After nearly a ten-year break, Detail & Scale returned to the publishing scene in late 2013 and since that time has published a dozen new or updated books in the Detail & Scale Series, the Colors & Markings Series, as well as several stand-alone volumes. While our digital books proved to be very popular, many customers longed for the traditional print book format, and in late 2017 we began to convert our digital books to a print-on-demand format. The only book in our new Detail & Scale Series that could not be converted was our original Volume 2, F9F Cougar in Detail & Scale. That book was just too large because it was basically a combination of the content we usually published in both our Detail & Scale and Colors & Markings Series. So, in 2018 we pulled that book from our

Object ID	Title	Author	Summary
			bookshelf and began the process of republishing it as two books, one in each series. This book, F9F Cougar in Detail & Scale – Revised Edition, is the first result of this process, and it offers expanded coverage over the previous edition. It will eventually be followed by a second book, Colors & Markings of the F9F Cougar, which will cover all of the paint schemes used on the Cougar and will look at all of the Navy and Marine fighter, attack, photo reconnaissance, utility, test & evaluation, fleet air service, Reserve, miscellaneous squadrons, and the Blue Angels precision flight demonstration team, that flew the Cougar. In combination, these two books will be the most comprehensive and detailed look ever published on this iconic aircraft from the Grumman Ironworks.F9F Cougar in Detail & Scale – Revised Edition continues the Detail & Scale Series focus on specific aircraft details, including cockpit, fuselage, wings, landing gear, engine and armament, but it includes so much more. It features a detailed look at the developmental history of the F9F Cougar, that begins with the prototypes, and continues with the F9F-6 in both fighter and F9F-6P photo-reconnaissance versions, and the F9F-7 Allison-engined variant. It then covers the ultimate F9F-8 variant in its fighter, attack, and F9F-8P photo-reconnaissance versions, as well as the two-seat F9F-8T. This aircraft, subsequently designated as the TF-9J, filled a training role with the Navy until the mid-1970s, and was the only version of the Cougar to see combat when the Marines used the aircraft in the Fast FAC role in Vietnam.A comprehensive pilots' report is included, featuring reminiscences from five Naval aviators who flew every Cougar variant. The aircraft details chapter, long the hallmark of

Object ID	Title	Author	Summary
			the Detail & Scale Series, covers the cockpit, windscreen and canopy, internal armament, fuselage, wings, pylons & external stores, landing gear, tail and engine assemblies. This chapter alone contains more than 180 photos, 144 of which are in color, that illustrate every aspect of this important aircraft. Finally, as with all books in the Detail & Scale Series, a detailed look at all of the scale model kits that have been released of the Cougar is presented, including the two F9F kits released by the Kitty Hawk Modeling Company in 2014 in 1/48th scale and the recent Sword 1/72nd scale kits. F9F Cougar in Detail & Scale – Revised Edition features over 100 pages, more than 270 photos, 192 in color, and 23 drawings. (From Amazon)

2025.302.016	F2H Banshee in Detail & Scale Part 1: Prototypes Through F2H-2 Variants	Kinzey, Bert	The Digital Detail & Scale Series continues with the newest title, F2H Banshee in Detail & Scale, Part 1: Prototypes Through F2H-2 Variants, covering the development, history, color schemes, combat and operational use, and details of one of the most historically significant fighters to serve with the U. S. Navy and Marine Corps. Over the past 35 years, Detail & Scale has published six monographs, 69 full sized volumes, and now a total of four digital publication titles in the well-respected Detail & Scale Series and one in the Colors & Markings Series. F2H Banshee in Detail & Scale, Part 1 continues the series focus on specific details of every aspect of this historic aircraft, but it includes so much more. It begins with a look at the developmental history of the Banshee, which started as an outgrowth of the McDonnell FH-1 Phantom, the first all-jet fighter to enter squadron use in the Navy. The Banshee advanced the design concept and would distinguish itself as only the second Navy jet

Object ID	Title	Author	Summary
			aircraft to enter combat in Korea following the Grumman F9F Panther.Each variant of the early Banshee is covered in its own section, including the XF2H-1 prototypes, the interim F2H-1 fighter, the definitive early variant in the F2H-2, and its derivatives, the nuclear-capable F2H-2B, the F2H-2N night fighter, and the F2H-2P photo-recon version. This detailed look at the aircraft is followed by a chapter covering the operational use of the Banshee in the Korean War. The aircraft details chapter, long the hallmark of the Detail & Scale Series, provides detailed coverage of the cockpit, windscreen & canopy, fuselage, internal armament, wings, pylons & external stores, engine, landing gear, and tail of the aircraft and contains more than 120 photos, mostly in color, that illustrate every aspect of the F2H.Another chapter covers the three official paint schemes worn by the early Banshees, from the Gloss Sea Blue standard, to the Light Gull Gray over white, to the overall white scheme worn by some aircraft near the end of their service. The Banshee Squadrons chapter contains photographs or profiles of Banshees in every Navy and Marine fighter, photo-recon, Reserve, and utility squadron that flew the aircraft, as well as test & evaluation facilities. Finally, as with all books in the Detail & Scale Series, a detailed look at all of the scale model kits that have been released of the early Banshee variants is presented. This print version contains the majority of the content first published in our digital publication, with only part of the chapter dealing with Banshee squadrons being condensed into the Banshee Gallery chapter.F2H Banshee in Detail & Scale, Part 1: Prototypes Through F2H-2 Variants features 103 pages, 282 photos (more than 170 in color), color detail drawings, and 15 full color aircraft

			profiles which accurately depict the Banshee in a variety of schemes as it was flown by Navy and Marine squadrons early in the jet fighter era. (From Amazon)
2025.302.017	F2H Banshee in Detail & Scale, Part 2: F2H-3 and F2H-4 Variants	Kinzey, Bert	The McDonnell F2H Banshee holds a unique place in the annals of United States naval aviation. Like its contemporaries in the North American FJ Fury and the Grumman F9F Panther, the original design evolved into a significantly different aircraft. In 2016, Detail & Scale published F2H Banshee in Detail & Scale, Part 1: Prototypes Through F2H-2 Variants. That book covered the early Banshee variants that, alongside Grumman F9F Panthers, were among the first jet fighters to serve in large numbers and to see combat with the U. S. Navy and Marines. F2H-2 fighters and F2H-2P photo-reconnaissance Banshees were used extensively by both services during the Korean War. This new title in the Detail & Scale Series picks up where that book left off and covers the larger F2H-3 and F2H-4 Banshees that were developed from the earlier Banshee variants, primarily to be all-weather interceptors. Because they were larger in size than the previous variants, the F2H-3 and F2H-4 became known as "Big Banshees," or more commonly "Big Banjos." Although the F2H-3 and F2H-4 were based on the original design and shared many commonalities with their predecessors on the McDonnell production lines, there were noticeable and important differences, both physical and operational. This new title discusses these differences in considerable detail. We begin with a Developmental History that traces how the all-weather Banshees were designed, developed, and produced to fill a pressing need for a jet fighter that could perform the fleet defense mission in any kind of weather, day or night.

Object ID	Title	Author	Summary
			Changes made to the airframe and features that were added are discussed and illustrated. The second chapter focuses specifically on the F2H-3 and F2H-4 in separate sections, explaining the major difference between the two variants and covering the squadrons to which they were assigned. A third section in the chapter is devoted to the Canadian F2H-3s flown by the Royal Canadian Navy, the only non-U. S. operator of any Banshee variant. Numerous photographs and art profiles illustrate the markings used by many of the squadrons that flew the "Big Banshees." The use of several different paint schemes on the F2H-3 and F2H-4 is a very interesting story itself, and it involves the Navy's experiment with carrier-based jet fighters in a natural metal finish. This is covered in the third chapter, and the reasons why the multiple schemes were developed, tried, and used operationally are explained and illustrated with both photographs and artwork. The Canadian paint scheme is also covered in this chapter. As is the case with all titles in the Detail & Scale Series of publications, the details of the aircraft are the primary focus. The Banshee Details chapter includes more than 120 photographs and illustrations covering the aircraft extensively inside and out. Among the nine different sections of this chapter is one on the weapons certified for use on the F2H-3 and F2H-4 as well as the under-wing stations on which they were carried. A large majority of the photographs in the Banshee Details chapter were taken specifically for this publication. The book concludes with a Modelers Section that reviews and illustrates the model kits of the "Big Banshee" that are available to the scale modeler. The print edition of F2H Banshee in Detail & Scale, Part 2: F2H-3 and F2H-4 Variants has 102 pages with 189 photos, 142 in color, and over three

Object ID	Title	Author	Summary
2025.302.018	F/A-18E & F/A-18F Super Hornet in Detail & Scale: Also Includes the EA-18G Growler	Kinzey, Bert	dozen color profiles and illustrations. (From Amazon) Detail & Scale produced its first book on the F/A-18E/F Super Hornet in 2004 when what is today's principle combat aircraft of the U. S. Navy was just entering operational fleet service. Since then, the history of the Super Hornet has expanded remarkably, and in 2010, the EA-18G Growler was introduced. This new work, F/A-18E & F/A-18F Super in Detail & Scale: Also Includes the EA-18G Growler, brings our original work forward sixteen years, with nearly all-new content, more photographs (all in color), and the addition of new artwork. The photographic content includes work by some of the best aviation photographers along with material from U. S. Navy and Boeing archives. These are complemented by 180 photographs taken specifically for this book which are available nowhere else. This new book is an up-to-date, far more comprehensive, and much larger publication on the U.S. Navy's Super Hornet and Growler. The book begins with an overview of the developmental history of the F/A-18E/F Super Hornet, which emerged from a response to key shortcomings of the otherwise successful F/A-18 "Legacy" Hornets. The next chapter provides a comprehensive synopsis of the aircraft's structure and systems including avionics, radars and sensors, powerplant, armament, and other stores. This is followed by an all-new chapter on the EA-18G Growler electronic warfare (EW) variant, covering its development and the key features of its unique EW systems. The next chapter provides an up-to-date operational history of the Super Hornet and Growler from the flight test program to the aircraft's contributions in Operations ENDURING FREEDOM, IRAQI

Object ID	Title	Author	Summary
			FREEDOM, and INHERENT RESOLVE. This section also features an account of the Super Hornet's first air-to-air kill in 2017 with several photographs of the aircraft that scored the kill. Australian F/A-18Fs and EA-18Gs are also covered in this chapter. The F/A-18E/F and EA-18G still have at least another two decades of service ahead. The next chapter of the book outlines future Super Hornet and Growler developments from the forthcoming Block III upgrade to the Next Generation Jammers for the EA-18G. Photo galleries of some of the more notable Super Hornet and Growler paint schemes over the last two decades follow. A comprehensive chapter on Super Hornet and Growler details, long the hallmark of the Detail & Scale Series, comes next. This chapter contains twelve sections covering the cockpit, including ejection seats and aircrew flight gear, windscreen and canopy, fuselage, landing gear, wings, tails, engines, ordnance, sensors, fuel tanks, refueling pods, the EA-18G's electronic warfare equipment, and more. Complete coverage of almost every square inch of the Super Hornet and Growler is provided in this section through more than 200 high resolution photographs and illustrations, most of which were taken by the two authors. As with all Detail & Scale books, the final chapter covers scale models of the Super Hornet and Growler. When the first edition was released in 2004, there were very few kits available of what was then a new aircraft. Today, there exists a far more diverse field of F/A-18E/F and EA-18G kits. The standard modeling scales of 1/144th, 1/72nd, 1/48th, and 1/32nd are treated as separate sections and the available kits are reviewed. This section also features photos of built Super Hornet and Growler kits from a number of accomplished model

Object ID	Title	Author	Summary
			builders. F/A-18E & F/A-18F Super Hornet in Detail & Scale: Also Includes the EA-18G Growler, is an extensively detailed look at the U. S. Navy's premier combat aircraft with the most up-to-date and information on the Super Hornet and Growler available. This print version features 104 pages, 292 color photographs, and seven illustrations. (From Amazon)
2025.302.019	F6F Hellcat in Detail & Scale	Kinzey, Bert	F6F Hellcat in Detail & Scale is the tenth volume of the expanded Detail & Scale Series of military aviation and modeling books. The Grumman Hellcat is one of the most famous fighters in the history of military aviation. This new book covers every aspect of this significant aircraft, from its developmental history through its use as the first type flown by the iconic U. S. Navy aerial demonstration team, the Blue Angels. Hellcats utilized as drones and drone controllers are covered, as is its service with foreign nations.Detail & Scale previously published volumes on the Hellcat in 1987 and 1996. The original work in 1987 was improved nine years later with greater coverage of aircraft details than was previously possible. Now, in this expanded volume, even more detailed coverage is provided. F6F Hellcat in Detail & Scale is a detailed study of one of the most successful fighter aircraft designs to see combat during the Second World War. Historical text has been written for each variant of the Hellcat. The Hellcat Details chapter has been greatly expanded using new color photos almost exclusively. Additionally, many new vintage color and black and white photos have been added to better tell the Hellcat's story. But one feature, the fascinating and informative interview with Captain David McCampbell, remains in this new edition. Finally, the Modelers Section has been updated to include

Object ID	Title	Author	Summary
			reviews of all of the kits that are available as of this writing (March 2020).The book begins with a comprehensive developmental and operational history of the Hellcat and follows that with an all-inclusive chapter on the various Hellcat variants. Every variant of the Hellcat is covered, including the XF6F-1/-2/-4/-6 prototypes and the F6F-3/-3E/-3N and F6F-5/-5E/-5N operational variants. These are followed up with sections on the use of the Hellcat as the aircraft of choice used in the very first and early exhibitions put on by what would become the U. S. Navy Blue Angels precision flight demonstration team. The use of the Hellcat in the drone and drone controller roles, both in combat and in peace time is covered next, as is a survey of its use in foreign service by the United Kingdom, France, and Uruguay. Next, is a reprise of a favorite element of the earlier versions of this book, the interview with David McCampbell, the Navy's all-time leading ace, where he discussed the Hellcat, his own experiences, and the markings of his personal aircraft.A comprehensive chapter on Hellcat details, long the hallmark of the Detail & Scale brand, follows. This chapter contains eight sections covering the cockpit, windscreen and canopy, fuselage, wing, landing gear, tail, engine, and armament and external stores details. Complete coverage of almost every square inch of the Hellcat is provided through 129 high resolution photographs, 119 of which are in full color.The comprehensive details chapter is followed by a colorful look at the paint schemes and markings used by the Hellcat during its operation life. The well known wartime paint schemes are all covered, as are the colorful post-war utility schemes seen on Hellcat drones and drone controllers.As with all Detail & Scale Series books, the final chapter covers the scale

Object ID	Title	Author	Summary
			modeling history of the Hellcat, from the early kits that are now only collector's items, to the wide range of kits that have been available for half a century, including the recent Airfix 1/24th kit, which is the most detailed and accurate Hellcat ever released. The most popular scales of 1/144th, 1/ 72nd, 1/48th, 1/32nd, and 1/24th are treated as separate sections, and the available models in each are reviewed.F6F Hellcat in Detail & Scale is the most comprehensive book on the Grumman Hellcat ever produced. The print version features 104 pages, more than 245 high resolution photographs (more than 155 in color), ten line drawings and other artwork, and 14 full color aircraft profiles. (From Amazon)

2025.302.020	FJ Fury in Detail & Scale, Part 1: Kinzey, Bert Prototypes Through FJ-3 Variants		FJ Fury in Detail & Scale, Part 1: Prototypes Through FJ-3 Variants is the first of two books that cover North American Aviation's iconic early jet fighter that was flown by the U. S. Navy and Marine Corps. The FJ Fury was a major milestone as the Navy developed its early jet fighters for carrier operations. Moving from the original straight-wing design of the FJ-1, the FJ-2 would become operational with the Marines, and the FJ-3 would become one of the first swept-wing jet fighters to operate from aircraft carriers of the U. S. Navy in large numbers, along with Grumman's F9F Cougar. It was a small but essential step along the way that has led to the state-of-the-art supersonic fighters that followed. In 2003, Detail & Scale originally published FJ Fury in Detail & Scale. That title covered all versions of the Fury, including the FJ-4 and FJ-4B. This new publication is the first of two parts that significantly expand the coverage of that original book, and it covers

Object ID	Title	Author	Summary
			the prototypes through the FJ-3 and FJ-3M. The FJ-4 and FJ-4B will be the subjects of FJ Fury in Detail & Scale, Part 2: FJ-4 & FJ-4B Variants. The book begins with a chapter on the developmental history of the aircraft, covering its design and the production commitment by the Navy while World War II was still ongoing, through the evolution of the Fury up to the major redesign that resulted in the FJ-4 variant which will be covered in Part 2. This is followed by a chapter which takes a closer look at each early variant of the Fury, from the straight-winged FJ-1, to the swept-wing FJ-2 which was basically a navalized version of the Air Force's F-86E Sabre, to the improved FJ-3 and FJ-3M variants with a more powerful engine. Also included is a section on the XFJ-2 and XFJ-2B prototypes. The hallmark of the Detail & Scale Series, the details chapter, follows. The Fury Details chapter in this Part 1 is divided into two sections, one covering the original FJ-1, and the second covering the FJ-2 and FJ-3/FJ-3M. Each section is as large as a typical details chapter in most Detail & Scale Series publications. Between the two sections, there are more than 180 detailed photographs and illustrations in the Fury Details chapter. As with all titles in the Detail & Scale Series of books, the last few pages are dedicated to scale modelers. In the years since our first book on the Fury was published, several new kits of these early variants of the Fury have been released, and these are all covered with reviews and photographs along with the older kits. The print version of FJ Fury in Detail & Scale, Part 1: Prototypes Through FJ-3 Variants has 102 pages, 264 photographs (211 in color),

Object ID	Title	Author	Summary
			and 10 full color profiles. (From Amazon)
2025.302.021	FJ Fury in Detail & Scale, Part 2: Kinzey, Bert FJ-4 and FJ-4B Variants		FJ Fury in Detail & Scale, Part 2: FJ-4 and FJ-4B Variants completes Detail & Scale's two-book treatment of North American's iconic early jet fighter flown by the U. S. Navy and Marine Corps. These were the ultimate variants of the Fury resulting from a second extensive redesign of the aircraft that first bore the name. In 2003, Detail & Scale originally published FJ Fury in Detail & Scale. That title covered all versions of the Fury, including the FJ-4 and FJ-4B. In mid-2021, we published FJ Fury in Detail & Scale, Part 1: Prototypes Through FJ-3 Variants. The FJ Fury was a major milestone as the Navy developed its early jet fighters for carrier operations. Moving from the original straight-wing design of the FJ-1, the FJ-2 would become operational with the Marines, and the FJ-3 would become one of the first swept-wing jet fighters to operate successfully from aircraft carriers of the U. S. Navy in large numbers, along with Grumman's F9F Cougar. It was an essential step along the way that led to the state-of-the-art supersonic fighters that followed. This publication, FJ Fury in Detail & Scale, Part 2: FJ-4 and FJ-4B Variants, continues our coverage with a detailed look at the last two Fury variants which incorporated major design changes over the previous versions. The FJ-4 served primarily with the Marines as a day fighter, while the FJ-4B was modified to become an effective ground attack aircraft that was assigned to attack squadrons with both the Navy and the Marines. Together, these two books provide the most extensive and detailed look at the Fury series of jet fighters ever published.

Object ID	Title	Author	Summary
			The first chapter begins with a brief summary of the development of the early Fury variants covered in Part 1, then moves on to outlining the major redesign that resulted in the FJ-4 and FJ-4B. This is followed by the Fury Variants chapter which takes a closer look at the FJ-4 and FJ-4B in separate sections, each discussing their features, capabilities, and their service with both the Navy and Marines. Special emphasis is placed on explaining how the FJ-4 was modified to become the FJ-4B and serve as an effective fighter-bomber with far greater capabilities than the FJ-4 in employing ground attack ordnance including both conventional and nuclear weapons as well as the Sidewinder air-to-air and Bullpup air-to-surface guided missiles. This allowed the FJ-4B to serve as a carrier-based jet attack aircraft as the Navy waited for the development and introduction into service of its first purpose designed jet powered light attack aircraft in the form of the Douglas A4D Skyhawk. Photographs and art profiles illustrate the markings used by many of the squadrons that operated each variant. The experimental FJ-4F is also covered in a separate section. The Fury Details chapter is next, and this hallmark of the Detail & Scale Series of publications covers the physical details and features of the FJ-4 and FJ-4B extensively with more than 120 photographs and illustrations that are divided into eight different sections. More than ninety percent of the photographs in the chapter were taken specifically for this publication and the overwhelming majority are in color. Concluding the book is our usual Modelers Section that includes extensive and objective reviews of the scale model kits of FJ-4s and FJ-4Bs ranging from 1/144th scale to 1/32nd scale. General and

Object ID	Title	Author	Summary
			detail photographs and a comprehensive text provide the scale modeler with valuable information about building and correcting the existing kits to produce the most accurate scale models of these two Fury variants. The print version of FJ Fury in Detail & Scale, Part 2: FJ-4 and FJ-4B Variants has 102 pages, 209 photographs (142 in color), 11 full color profiles and a dozen other illustrations. (From Amazon)
2025.302.022	F-14 Tomcat in Detail & Scale	Klaus, Haagen	The Grumman F-14 Tomcat is an iconic aircraft. Its historical significance, celebrity, distinctive appearance, and combat record set the Tomcat apart from many of its contemporaries. The U. S. Navy operated the F-14 for thirty-six years, and when it was retired in 2006, the Tomcat had never been more capable, relevant, or effective. F-14 Tomcat in Detail & Scale is an all-new book about one of the most well known and popular military aircraft of all time. This profusely illustrated book is written by Haagen Klaus, who previously co-authored F/A-18E/F Super Hornet in Detail & Scale. The author put together a team of expert contributors who worked with him to make this the most accurate and in-depth book possible on the Tomcat. Among these are people who flew and maintained the F-14 and others who worked at Grumman during the time when the Tomcat was designed and built. In addition to these experts, many aviation photographers have contributed scores of general and detail photographs that provide extensive coverage. Detail & Scale published two earlier books on the F-14 in 1979 and 1982. It has since published three comprehensive works on the colors and markings of the Tomcat, and

Object ID	Title	Author	Summary
			this new book completes the coverage of the F-14 with all the hallmarks of the Detail & Scale Series of books. The book begins with two chapters that look at the Tomcat's history. The first covers the developmental history, while the second looks at the operational history, including the Tomcat's extensive use in combat. The third chapter provides an in-depth coverage of the specific variants of the F-14 that were produced, as well as a detailed look at the various systems and how they evolved during the operational life of the Tomcat. Numerous photographs supplement an informative text in each of these chapters. The focus of the books in the Detail & Scale Series is on the details of the aircraft. Almost all of the 295+ photographs are in color, and 234 detail photographs show every detail of the Tomcat, inside and out. For example, there are 34 cockpit photos showing all of the details and differences in the F-14A, F-14B, and F-14D cockpits, and they are accompanied by detailed captions that explain and point out the features and how the cockpit displays and controls changed from one variant to the next. Details of the fuselage, wings, landing gear, tail, engines, air-to-air and air-to-surface weapons, and even the flight gear worn by pilots and RIOs are illustrated with photographs, many of which were taken specifically for this publication. A comprehensive text explains all of the many upgrades made to the Tomcat over the years it was in service in amazing detail, and all of the physical changes are illustrated with photographs which are supplemented with artwork that points out exactly what the changes were and when they

Object ID	Title	Author	Summary
			were made. For scale modelers, the Modelers Section at the back of the book, one of the hallmarks of the Detail & Scale Series, covers the Tomcat kits that are available from the major manufacturers, and a text reviews the kits, pointing out the plusses and minuses of each. (From Amazon)
2025.302.023	Intrepid's Fighting Squadron 18 : Fink, MIchael Flying High with Harris' Hellcats		From the publisher - "This book provides the first in-depth look at one of the most successful yet least-recognized fighting squadrons of World War II"-- Provided by publisher. " USS Intrepid's Fighting Squadron 18 (VF-18) was one of the U.S. Navy's highest-scoring carrier units of World War II. Despite having only one combat veteran in its roster, its aviators-including Cecil "Speedball" Harris, the Navy's second-ranking ace-were credited with shooting down more than 170 planes during their 81-day tour of duty, earning the squadron the nickname "Two-a-Day 18" in newspapers nationwide. How did a novice unit with a comparatively short time in theater accomplish such a feat? To answer this question, Intrepid's Fighting Squadron 18 follows squadron members through training, into combat, and finally to the end of their harrowing stories-whether they took the return trip home or made the ultimate sacrifice. Drawing extensively on archival and family collections, author Mike Fink reveals the personalities of these men and the binding friendships they built. "Moe" Mollenhauer, Fighting 18's youngest pilot, had a score to settle with the Japanese. Outspoken "Punchy" Mallory incredibly was reprimanded for shooting down enemy planes. And the squadron's best-known figure, Cecil "Speedball" Harris, took the lead in preparing his peers for war before they took their place at the tip of the Navy's

Object ID	Title	Author	Summary
			spear. Intrepid's Fighting Squadron 18 is as much about the bonds these young men formed as it is about Pacific War history. The men of Fighting 18 joined the Navy's massive fast-carrier force in August 1943-just in time to participate in the last great air and sea battles in the Pacific. They were one of the first squadrons to engage Japan's massive battleship force during the Battle of Leyte Gulf, racked up incredible scores and suffered devastating losses during the Formosa Air Battle, and bore witness to an unthinkable new weapon-the kamikaze suicide attack-as the war entered its desperate endgame. Ultimately, Intrepid's Fighting Squadron 18 showcases the powerful impact of war on those who fight it and sheds light on the impact of those men on the war itself. "
2025.302.024	Leyte Gulf : A New History of the World's Largest Sea Battle	Stille, Mark	A fascinating re-examination of the battle of Leyte Gulf, the largest naval encounter in history and probably the most decisive naval battle of the entire Pacific War, and one that saw the Imperial Japanese Navy eliminated as an effective fighting force and forced to resort to suicide tactics.
2025.302.025	WHALE A-3 Skywarrior Illustrated	Drendel, Lou	It was the largest airplane to be launched from a carrier on a regular basis until the Vigilante came along. That size caused the operators to name it "The Whale" and no one in the fleet ever called it "Skywarrior". Though fewer than 300 were built, and the mission for which it was designed disappeared, its adaptable airframe created several new missions and it served the fleet for 30 years. It was an easy airplane to fly, but not so easy to bring aboard, as evidenced by a pair of stories that appear herein. I was made aware of that during a visit to USS Kitty Hawk in December, 1968. I was observing the air group work up for their forthcoming combat cruise, and was given access to the deck to observe the launch cycles,

Object ID	Title	Author	Summary
			but when I asked to visit the LSO platform for recoveries, the LSO denied the request, saying: "I'll be waving the Whales and Vigis, and I'll likely be in the basket as much as I'm on the platform!" (The deck edge net or basket was his escape from those big airplanes making less than stellar approaches). "Whale..A-3 Skywarrior Illustrated" contains 94 pages of color photos, illustrations, and history of this iconic Naval Aviation bomber. (From Amazon)
2025.302.026	Vought F-8 Crusader : Development of the Navy's First Supersonic Jet Fighter	Spidle, Wiliam D.	From the cover: This book provides detailed coverage of the F-8 Crusader's development and production, world record flights, the XF8U-3 Super Crusader, significant NASA variants, and foreign operators that augment the story of the F-8 and its outstanding career. It provides the vital 'missing link' in the story of this legendary airplane: the U.S. Navy's first supersonic jet fighter, and the last aircraft in naval history to score an aerial kill with a gun.
2025.302.027	P-3 Orion Illustrated	Drendel, Lou	The Lockheed P-3 Orion is one of the longest-serving front-line military aircraft in the world. Its basic design has proven compatible with a wide variety of missions, both civil and military. That longevity and adaptability have resulted in a long and eclectic list of operators and missions, far more than it is possible to cover in detail in this book. "P-3 Orion Illustrated" is, as the title suggests, a picture book, filled with over 200 stunning color photos and illustrations, many of which have never been seen in print. The P-3s military career has spanned the analog age to the digital age, so most of the changes in the basic military airplane are electronic or weapons related. Civil missions range from fire-fighting to drug interdiction, where mission changes also resulted in very obvious external changes. All are covered within and they offer a visual record of the Orion's

Object ID	Title	Author	Summary
			versatility. From Amazon
2025.302.028	F-35 Lightning II Illustrated	Drendel, Lou	A detailed look at the F-35 Lightning II Joint Strike Fighter, including the ground-breaking technologies of the JSF. Covers all versions of the F-35 and details international participation in the program. Includes over 180 photos, paintings, and diagrams of the F-35. 110 pages in full color. From Amazon
2025.302.029	F9F Panther/Cougar Illustrated	Drendel, Lou	The Grumman F-9F Panther was the first US Navy jet fighter, and it was fitting that Grumman Aircraft Engineering was the designer/builder. Grumman had established a reputation as a reliable and effective manufacturer of Naval Aircraft with the World War II series of "cat" fighters, the Wildcat, Hellcat, Tigercat, and Bearcat. All of those fighters were powered by increasingly powerful radial piston engines, which defined their blunt lines. In the Panther, Grumman came up with sleek, curvaceous design. That sleek design belied the inherent strength of the Panther, which took its place in the "Grumman Ironworks" firmament of tough airplanes. When jets first went to combat, the Panther scored the first jet versus jet victory, downing a MiG-15. And when the Navy's aerial demonstration team, the Blue Angels, went from propellers to jets, they did so in the Panther. Two of the most famous astronauts, Neil Armstrong and John Glenn, both flew the Panther in combat. As a first, the Panther did not offer a great deal of potential for additional development, but adding swept wings produced the next cat, the F9F Cougar. Both the Panther and the Cougar are covered in detail in this latest "Illustrated" title, with as much color as I could find. From Amazon
2025.302.030	Skyraider Illustrated	Drendel, Lou	Designed during World War II, but never used in that conflict, the Douglas A-1 Skyraider

Object ID	Title	Author	Summary
			came into its own in the following wars. It was the most effective Naval interdiction and close air support aircraft in the Korean War, and was still performing those missions at the beginning of the Vietnam War. It became even more famous for its use by USAF Special Operations Squadrons, flying interdiction, close air support, and search and rescue missions. It was the principal attack airplane of the South Vietnamese Air Force (VNAF). This is a visual history of the Skyraider, with over 200 color photos and illustrations, augmented with combat stories from the pilots who flew some of the most hazardous missions of the Vietnam War. Two of those pilots won the nations highest decoration, the Medal of Honor. The book is 183 pages and includes a section on the survivors and Warbirds. From Amazon
2025.302.031	Dauntless Illustrated	Drendel, Lou	The Douglas SBD Dauntless could be considered the most important aircraft of the Pacific War due to its performance in a single Naval battle....the Battle of Midway. In that single battle, the Dauntless was largely responsible for the sinking of four Japanese aircraft carriers and one battleship, rendering the Japanese incapable of meaningful offensive operations. The IJN would be reduced to fighting a delaying action as American Naval power was built into the unstoppable juggernaut that eventually overpowered and decimated the Naval forces that had swept across the vast reaches of the Pacific at the beginning of the 1940s. The Dauntless was not just an effective ship killer, it was also an extremely effective ground support airplane, proving its worth over and over in the early campaigns to take and hold islands in the Pacific War. The Marines operated several squadrons of SBDs in support of their grunts, refining the

Object ID	Title	Author	Summary
			close air support mission so vital to infantry success in defeating the well-entrenched Japanese forces. The Scout Bomber Douglas (SBD), aka; "Slow But Deadly" would serve throughout most of the war and reinforce its reputation as a very accurate dive bomber, though it would ultimately be replaced by the heavier SB2C Helldiver. Just shy of 6,000 SBDs were built during the war and their operational career was relatively short. Short may that career have been, but nevertheless so effective that the Dauntless remains among the most storied WWII airplanes. From Amazon

2025.302.032	Vigilante Illustrated	Drendel, Lou	By any measure, the North American A-5 Vigilante is one of the best-looking jets ever designed. Its long, elegant nose extends from broad swept wings and tail surfaces. Viewed from the side, the Vigilante screams "speed", while the plan view screams "power". Visual esthetics aside, the Vigilante was a pioneering airplane. Designed in the era of vacuum tubes and slide rules, it was the first airplane with a digital computer. It was designed as a replacement for the big sub-sonic Douglas Skywarrior carrier-based attack bomber. The Vigilante's double Mach speed led to several world records in both long-distance speed and altitude categories. When the DOD established a nuclear triad of deterrence in the early 1960s, manned carrier-based bombers were not included. The Vigilante had lost the mission it was designed for, and though it had incomparable speed and size, it was not as conventional or versatile as the Skywarrior, which was repurposed as tanker and electronic warrior. The Vigilante acquired a new mission, that of high-speed reconnaissance, a mission it would perform without peer

Object ID	Title	Author	Summary
			throughout its relatively short career. There were only 167 Vigilantes built, but as with most Navy aircraft and squadrons of that day, the Vigilante carried a wide variety of markings, amply illustrated herein. From Amazon
2025.302.033	Sea King Illustrated	Drendel, Lou	The Sikorsky Sea King was the first jet-powered helicopter in U.S. service, but as the title of this book suggests, it was not limited to American service. All military aircraft have alphanumeric identifiers that usually precede their popular names. (F-15 "Eagle", etc.) The Sea Kings popularity resulted in several of these, since it was built under license in Canada, Great Britain, Italy, and Japan. The company designation was S-61 and there were at least 11 different versions built for unique missions. The primary mission of the Sea King, the mission for which it was designed, was that of submarine hunter/killer, a dual mission which had previously been performed by a pair of helicopters. That mission had risen to primacy in order to counter the threat of a growing fleet of Russian submarines during the cold war that raged throughout the last half of the 20th century. The Sea King was an unqualified success in that mission, and the basic design was so good that several additional missions were assigned, including Rescue, basic transport, and carrier plane guard duties. The H-3 also became the first "Jolly Green Giant" in USAF ARRS, pioneering a critical combat mission in the Vietnam War. This is a visual history of the Sea King in U.S. and foreign service, civil and military. The many missions of the Sea King make for a very colorful history, documented herein by over 200 color photos and illustrations. From Amazon
2025.302.034	V-22 Osprey Illustrated	Drendel, Lou	The Bell Boeing V-22 Osprey is the most successful VTOL aircraft ever designed. After a

Object ID	Title	Author	Summary
			controversy-plagued developmental period, when the Osprey finally became operational, it proved its critics woefully wrong. The V-22 has a recorded an outstanding safety record, serving both the Marines and the Air Force. It has become the safest vertical takeoff aircraft in history and its success has spawned plans for follow-on aircraft to replace many of the helicopters in service today. This book is a developmental history of the V-22, illustrated with 100 pages of color photos and detail drawings. From Amazon
2025.302.035	F-14 Tomcat Illustrated	Drendel, Lou	The all-color history of the best fleet defense interceptor ever built. Over 100 pages of color photos and paintings by the author augment several drawings and diagrams from the flight manual which describe systems. The text contains the developmental and operational history of the most iconic of fourth generation fighters which starred in the movie "Top Gun". The print version of this book contains interviews with the test pilots who first flew the Tomcat and with the high-time Tomcat pilot who developed the precision strike capabilities of the F-14. From Amazon
2025.302.036	F/A-18 Hornet-Super Hornet/Growler Illustrated	Drendel, Lou	A fully illustrated history of the McDonnell Douglas/Boeing F/A-18 Hornet series of attack aircraft, including the EA-18G Growler and export Hornets. Updated in print format to include many more photos and illustrations. This history contains over 200 photos and several of the paintings of the author. From Amazon
2025.302.037	HELLCAT Illustrated	Drendel, Lou	The Grumman F6F Hellcat is remarkable for many reasons. Foremost among these is its effectiveness for the mission it was designed to performance.....that of a "Zero Killer". It excelled in that mission, racking up a kill to loss ratio of 19 to 1 in the

Object ID	Title	Author	Summary
			Pacific. Right from the outset of its operational life, the Hellcat was so good that it did not need major alterations during its combat career. There were just two major production versions of the Hellcat and that meant that production could proceed at an amazing pace. 12,275 were built in just over two years. At the outset of the Pacific war, the Japanese Zero was the dominant air superiority fighter. The Hellcat was designed specifically to counter the Zero. The F6F made its combat debut in September 1943, and it quickly outperformed the A6M Zero and established air superiority over the Pacific theater. Hellcats were credited with destroying a total of 5,223 enemy aircraft while serving with the U.S. Navy, U.S. Marine Corps, and Royal Navy Fleet Air Arm. This total was more than any other Allied naval aircraft. After the war, Hellcats were phased out of front-line service in the US, but radar-equipped F6F-5Ns remained in service as late as 1954 as night fighters. They served with the French Navy at the beginning of the Vietnam War from 1950-1952. Hellcat drones were used to attack targets in Korea, guided by Skyraider control aircraft. From Amazon

2025.302.038	CORSAIR ILLUSTRATED	Drendel, Lou	Corsair! The very name seems to conjure images of speed, and for good reason. The dictionary defines Corsair as a "government-sanctioned freebooter of the seas," (1540s, from French corsaire), from Provençal cursar, Italian corsaro, from Medieval Latin cursarius "pirate," from Latin cursus "course, a running," from currere "to run" (from PIE root *kers- "to run").Those Corsairs, given their mission, had to be fast enough to outrun the naval opposition, so the name was entirely appropriate for the Vought F4U, the "bent-wing bird" that terrorized

Object ID	Title	Author	Summary
			Japanese forces in WWII, who christened the F4U "Whistling Death" for the sound its distinctive aerodynamics produced as it dove on them. That may have been a name used by those on the receiving end of the Corsair attacks, but I doubt that any Japanese commander would have briefed his pilots by telling them to expect to encounter the "Whistling Death". To them, it was simply the "Sikorsky". On the other hand, the grunts who counted on the Corsair for aerial support had other names, including; "Angel of Okinawa", and the "Sweetheart of The Marianas". Neutral nick names included "U Bird" or "Bent Wing Bird". Not so complimentary names, which referred to the difficulty to master the Corsair were "Ensign Eliminator" and "Bent Wing Eliminator". It did have a high accident rate, but the qualities that led to mishaps also, flown by well-trained and aggressive pilots, made the Corsair one of the best fighters of World War II. The prototype XF4U Corsair made its first flight in 1940 and became the first single engine fighter to achieve 400 mph in level flight. The F4U was not the first Corsair, but it quickly eclipsed the original Vought O2/3U Corsairs. Though it was designed as a carrier fighter, its most effective early mission was as a land-based fighter in the Southwest Pacific early in the war. It quickly demonstrated its superiority, and by war's end it had posted an 11 to 1 kill ratio over the enemy. The prototype was delivered to the U.S. Navy in 1940. It was the first of 12,571 F4U Corsairs, spanning 16 separate models. The 1942–1953 production run was the longest of any U.S. piston-engined fighter. The last of that run went to the French, who used the Corsair extensively in the first Indochina War and in other

Object ID	Title	Author	Summary
			post-colonial hotspots. The operational career of the Corsair was relatively long and colorful. From Amazon
2025.302.039	Avenger TBF/TBM Illustrated	Drendel, Lou	The Grumman TBF Avenger is one of the most recognizable of World War Two aircraft. It was introduced early in the war and continued to provide effective service throughout the war. It was the largest single-engine carrier airplane when it entered service and the large bomb bay could accommodate a torpedo or a variety of gravity bombs, making the Avenger more than just a torpedo bomber. It became known as one of the most accurate glide bombers, with an average CEP of just 40 feet, which made it an important close air support asset for the Marines and infantry in the Pacific War. That huge fuselage made it possible to adapt the Avenger to a variety of missions as military technology advanced throughout the 1940s and into the 1950s. It also made the Avenger adaptable to a variety of civil missions, and that has contributed to the survival and continued career of the Avenger. The Avenger has the distinction of being the only aircraft flown in combat by a future president of the United States. President George H.W. Bush, who was also the youngest Naval Aviator when he was winged. He was eventually shot down and rescued on a bombing mission in 1944. Though most of the Avengers were flown from carriers in the Pacific, those that were assigned to the smaller carriers that contributed to the ultimate defeat of the German U Boat threat made a major impact on that mission. The Avenger was a very straightforward design, and its gestation period was not long. That conventional design made it one of the most reliable WWII combat airplanes which served in the Atlantic and Pacific.

Object ID	Title	Author	Summary
2025.302.040	A-4 Skyhawk Illustrated	Drendel, Lou	From Amazon The Douglas A-4 Skyhawk is one of the most successful military aircraft programs in history. Skyhawks are still flying in military service in 2019, over 60 years after the first flight of the A-4. This latest entry in the Illustrated series contains over 250 photos and diagrams, most of them in color, many of them published here for the first time. The Skyhawk story is told by the men who flew it in testing and in combat and in peacetime. These first-person accounts are the highlight of the book, putting the reader in that tiny cockpit that has seen so much action in the Skyhawk's long and illustrious career. From Amazon
2025.302.041	F-4B/J Phantom II Illustrated	Drendel, Lou	The F-4 Phantom is the most heavily produced jet fighter in the free world. This is not a technical description of the Phantom. Rather, it is a compilation of stories written by Navy and Marine Corps Phantom pilots. Many are combat narratives, and many more are stories about flying qualities and difficult, dangerous or fun experiences flying the Phantom. From Amazon
2025.302.042	A-6 Intruder Illustrated	Drendel, Lou	An illustrated history of the Grumman A-6 Intruder/Prowler, includes over 250 photos and illustrations tracing the career of the first truly all-weather Navy attack bomber. Most of the history is recounted in mission narratives by the pilots who flew the Intruder in combat, from Vietnam to the Persian Gulf. From Amazon
2025.302.043	Turn into the Wind, Volume I	Bruhn, David D.	In the Pacific in World War II, the dearth of US Navy fleet aviation capabilities became acute following the loss, in 1942, of four aircraft carriers to combat action. New Essex-class fleet aircraft carriers were being built, but would not be ready soon enough. Time was of the essence. President Franklin D. Roosevelt intervened to solve

Object ID	Title	Author	Summary
			the problem - directing reluctant Navy "top brass" to turn cruiser hulls, already laid down, into light aircraft carriers. This created nine Independence-class ships, which would earn more battle stars, on average, than their bigger, better-known sisters (the twelve finally-completed Essex carriers that saw combat action). Aboard two of the light carriers were future presidents, George H. W. Bush, and Gerald R. Ford. Pilots and aircrews flying from the 622-foot "flat-tops" earned scores of decorations for heroism. These included two Medals of Honor, Navy Crosses, Silver and Bronze Stars, and dozens of Distinguished Flying Crosses. Some of the recipients, such as Edward "Butch" O'Hare, are familiar to aviation buffs. Others, including Hollis H. Hills, who flew in the two greatest air battles of the war: Dieppe in 1942 and the "Great [Marianas] Turkey Shoot" in the Pacific in 1944, less so. Britain similarly began construction on ten 698-foot Colossus-class light fleet carriers. Four entered service before the end of the war, and were allocated to the British Pacific Fleet, but arrived too late for frontline action. Aboard the BPF's larger carriers, which fought in the Battle of Okinawa and other actions, were members of many Commonwealth countries. Among them was Robert Hampton Gray, who (posthumously) was Canada's last Victoria Cross winner of the war. One hundred sixty-five photographs, maps, and diagrams; appendices; and an index to full-names, places, and subjects add value to this work. From Amazon

2025.302.044	Turn into the Wind, Volume II	Bruhn, David D.	American and British light fleet aircraft carriers, an expedient of war at a time of dire need in World War II, answered their nations' call a second time during the Korean War. While larger US Navy fleet carriers

Object ID	Title	Author	Summary
			plied their trade in the deeper Sea of Japan off Korea's east coast, their svelte sisters - USS Bataan, HMS Glory, HMS Ocean, HMS Theseus, HMS Triumph, and HMAS Sydney - were consigned to the Yellow Sea. Operating off the west coast, ragged and heavily indented with numerous small islands, aircraft aboard the carriers repeatedly struck the enemy. Winters were cold, with occasional gales and blinding snow squalls; summers were hot and humid, with heavy rains and fog. While the piston-engine aircraft attacked enemy supply lines, fortifications, and troop positions, enemy MiG jet aircraft were a constant threat, some flown by Russians. Carrier air also provided protection to friendly islands, from which guerillas mounted operations behind enemy lines. Following the Korean War, Australia acquired two additional former Royal Navy light fleet carriers, and Canada three in succession, as centerpieces for naval fixed air programs. Former CVLs served in new roles during the Cold War/Vietnam War: USS Wright as a "doomsday" afloat White House, HMAS Sydney as a troop transport, and USS Arlington as a communications link between the Pentagon and commanders in the field. One hundred fifty-five photographs, maps, and diagrams; appendices; and an index to full-names, places, and subjects add value to this work. From Amazon
2025.302.045	Battle of Midway	Charles River Editors	This text comprehensively covers the entire military situation the led up to the Battle of Midway and analyzes the decisions made by the battle's most important leaders. Text presented in nine chapters that include: strategic background, Japanese planning, battle movements, and an analysis of the aftermath of the battle. Bibliography included.
2025.302.046	Coral Sea and Midway: The History of the World War II	Charles River Editors	This text covers the military situation the led up to the

	Battles that Turned the Tide in the Pacific Theater		battles of both the Coral Sea and Midway, and analyzes the decisions made by the battle's most important leaders. Information includes strategic background, battle movements, and an analysis of the aftermath of the battle. Bibliography and online resources are included.
2025.302.047	Taking Midway: Naval Warfare, Secret Codes, and the Battle that Turned the Tide of World War II	Dugard, Martin	Account of the famous yet little-understood battle that turned the tide of World War II. Presented in seven sections, text presents information on the 19th century history of Midway Island and events from July 1941 through the Battle of Midway in June 1942. Section five focuses on Lieutenant Commander Joseph Rochefort, a young naval officer stationed in Honolulu who is working to break Japan's secret codes. Notes on sources and an index are included.
2025.302.048	Cease Buzzer: Life as a U.S. Navy EA-6B Pilot in the Era of Top Gun	Springett, J. P., II	Author covers his 30 year journey in U. S. Naval aviation from flight training, life in EA-6B squadron, and his time as Commander, Electronic Attack Wing, U.S. Pacific Fleet.
2025.302.049	US Seventh Fleet, Korea 1950-53; The First Cold War Naval Campaign	Williamson, Corbin	This illustrated study explains how the US Navy brought its war-winning fleet to bear in the complex campaign of Korea during 1950-1953.
2025.302.050	Battle of Midway Including the Aleutian Phase, The, June 3 to June 14, 1942	Bates, Richard W.	Text comprises analysis of the Battle of Midway, including the Aleutian campaign and was prepared for use by the Naval War College. Analysis attempts to present information from both American and Japanese sources. Contents include: narrative of the Battle of Midway and preliminary operations; Japanese and American arrangements comprising naval forces, aircrafts, positions, and plans; and post-battle operations and effects.
2025.302.051	Action Reports: Attack from Midway - The Battle of Midway	USS Hornet Sea, Air, & Space Museum	Second book of two-part series on the Battle of Midway that presents after action reports from participants of the battle based from Midway or Hawaii. This book includes a supplemental report of

Object ID	Title	Author	Summary
			submarine activity from Admiral Nimitz. Other topics include: battle summary, commanding officer report of engagement, report on USMC 6th defense battalion, air operations of Midway defense, squadron reports, and submarines. Appendix included.
2025.302.052	At Sea Against the Soviet Fleet: The Evolution of U.S. Navy Operational Intelligence in the Cold War	Leese, Bryan H.	Text examines the critical transformation of naval intelligence during a pivotal era marked by the Cold War and the Vietnam conflict. Presented in four main sections focused on shipboard operation intelligence: institutionalizing, adapting, decentralizing, and formalizing while emphasizing the importance of OPINTEL to the US Navy. Notes, bibliography, and index are included.
2025.302.053	Flight Commander	Borzage, Frank (Director)	Film revolves around Navy Hell Cat squadron and their exploits while training together and their attempts to develop an antifog device. The tightly knit squadron suffers deaths and injuries from mishaps and the suspected infidelity of the unite commander's wife. This pre-war film with scenes of aerial training and Navy readiness demonstrate America's growing awareness that it may soon be involved in WWII. Originally issued in 1940 by Metro-Goldwyn-Mayer.
2025.302.054	Pearl Harbor: Japan's Greatest Disaster	Stille, Mark	Text traces the road to war and the attack on Pearl Harbor. Information includes chapters on Admiral Yamamoto, analysis of the attack, the role of Japanese submarine attacks, and American reactions. Bibliography, notes, and index are included. Appendices list forces for both nations, fates of navy vessels, and alternative attack plans.
2025.302.055	Gamble in the Coral Sea: Japan's Offensive, the Carrier Battle, and the Road to Midway	Piezik, Michal A.	"Driven by extensive Japanese primary sources, Gamble in the Coral Sea offers an operational analysis of the first clash of aircraft carriers at the pivotal Battle of the Coral Sea from the Japanese perspective, including leadership, tactics, and errors

Object ID	Title	Author	Summary
			that brought a numeric victory but a strategic loss for Japan that halted their bold advance into the South Pacific and ultimately set the stage for Midway. Revealed here are the circumstances and actual reasons for the Japanese failure and the revised impact of the Battle of the Coral Sea on the Battle of Midway. Beyond tactical details, Piegzik offers insight into the broader consequences of the battle. He engages with sources previously under explored and integrates them with Allied perspectives to ensure a well-rounded understanding of the events"-- Provided by publisher
2025.302.056	Supremacy at Sea: Task Force 58 and the Central Pacific Victory	Mawdsley, Evan	Text is an account of Task Force 58's 3500 mile journey across the central Pacific in 1944 and its eventual role in the Battle of the Philippine Sea. Task Force 58 was a large American battle fleet composed of 16 aircraft carriers, thousands of combat aircraft, and escort vessels. Two appendices outline additional information on US carriers and discuss Japanese Forces and Strategy. End notes included.
2025.302.057	Target Hong Kong: A True Story of U.S. Navy Pilots at War	Bailey, Steven K.	Text recounts the experiences of U.S. Navy pilots and one POW during Operation Gratitude, the airstrikes over Japanese-occupied Hong Kong in January 1945. Author uses oral histories, diaries, and U.S. Navy documents to narrate the experiences. A glossary of acronyms, endnotes, and a bibliography are included.
2025.302.058	Aircraft Carrier Hiryu, The	Draminski, Stefan	Translated from Polish. Discusses terms of Washington [Naval] Treaty [of 1922]. The treaty limited the type and number of ships that Japan could build. Discusses development of Japanese aircraft carriers in general, and Soryu and Hiryu in particular. Both carriers were lost at the Battle of Midway in 1942. There are six pages devoted to armament, and the last part of the book is about operational service of the Soryu and

Object ID	Title	Author	Summary
			Hiryu. Lists naval engagements and has 8 colored plates of planes that flew off the carriers.
2025.302.059	Midway Sailor : A Memoir of the Vietnam War, 1971-73	Sebring, William	From Amazon Three weeks after college graduation, I was called to active duty by the Naval Reserve. The dream of becoming a history teacher and enjoying my third year of married life was suddenly put on hold. I was headed for the combat zone aboard the USS Midway and into the climax of the Vietnam War. I joined the Naval Reserve to keep out of the War, assured by my recruiter it would be over before I was called to serve. It was pure fantasy and I was totally unprepared for active duty. Former USS Midway crew member.
2025.303.001	Kaga and Akagi: Aircraft Carriers in the Imperial Japanese Navy	Lengerer, Hans,	This book is a brief history of two Japanese Imperial Navy aircraft carriers, Kaga and Akagi. Topics include: the inter-war period of 1922-1930, outline descriptions of each ship, defects of each design, their modernization, and shipbuilding considerations for their conversions into aircraft carriers. An operational history of each ship is included.
2025.304.001	Launch the Intruders : A Naval Attack Squadron in the Vietnam War, 1972	Reardon, Carol	Contents: F troop -- Temporary additional duty -- Would you believe? -- A piece of cake -- Into the badlands -- A very real life indeed -- On a treadmill -- Got an ace hit -- Peace is at hand -- Lord, guard and guide the men who fly -- Oh, Christmas tree, oh, Christmas tree.

2025.309.001	Combat Pair	Lambeth, Benjamin S.	From Amazon: This report documents the exceptional cross-service harmony that the U.S. Air Force and U.S. Navy have steadily developed in their conduct of integrated strike operations since the first Persian Gulf War in 1991. That close harmony contrasts sharply with the situation that prevailed throughout most of the Cold War, when the two services maintained separate and unique operating mindsets and lacked any significant interoperability features.
2025.309.002	Typhoon: The Other Enemy : the Third Fleet and the Pacific Storm of December 1944	Calhoun, C. Raymond	The author was commanding officer of one of the ships involved and provides a first-hand account of the tragic ordeal that claimed the lives of 778 men and of his examination of the court of inquiry's findings. Chapter 9 is dedicated to small aircraft carriers in the storm.
2025.309.003	Navy in the Sky	Elton, Wallace W.	Text is a largely pictorial account of aircraft of the United States Navy. Introduction describes the origins of the aircraft carrier, the development of plan types, and the nomenclature of the conventional airplane. Nine additional chapters contain brief information text on the following topics with captioned photographs: landplanes, the aircraft carrier, seaplanes, flying boats, blimps, armament, Naval air transport service, Marine Corps aviation, and the WAVES.
2025.309.004	From Mothballs to Magic : How the USS Midway Became the World's Favorite Aircraft Carrier	McGaugh, Scott	Chronicle's the life of USS Midway (CV-41) from the 'Second Battle of Midway,' the effort to get an aircraft carrier to San Diego for use as a museum to its current (2019) status as the world's most visited afloat museum and the number five rated museum in the U.S.
2025.309.005	From Frigates to Flat-tops : The Story of the Life and Achievements of Rear Admiral William Adger Moffett, U.S.N., "The Father of Naval Aviation"	Arpee, Edward	William Adger Moffett (October 31, 1869 – April 4, 1933) was an American admiral and Medal of Honor recipient known as the architect of naval aviation in the United States

2025.314.001	America's First Aircraft Carrier: USS Langley and the Dawn of U.S. Naval Aviation	Winkler, David F.	USS Langley (CV-1/AV-3) was the United States Navy's first aircraft carrier, converted in 1920 from the collier USS Jupiter (AC-3), and also the U.S. Navy's first electrically propelled ship. Conversion of another collier was planned but canceled when the Washington Naval Treaty required the cancellation of the partially built battlecruisers Lexington and Saratoga, freeing up their hulls for conversion to the aircraft carriers CV-2 and CV-3. Langley was named after Samuel Pierpont Langley, an American aviation pioneer. Following another conversion, to a seaplane tender, Langley fought in World War II. On 27 February 1942, she was attacked by dive bombers[10]of the Japanese 21st and 23rd Naval Air Flotillas and so badly damaged that she had to be scuttled by her escorts. (from Wikipedia)
2025.315.001	Stewardsman	Training Support Service, Washington, D.C.	Book's purpose is to help beginners in this career specialty to improve their performance through study. The first chapter points up the long history of the steward profession and introduces men to the varied duties of their specialty and discusses opportunities for advancement and training. Other chapters discuss specific duties and discusses the opportunities for advancement and training.

2025.316.004	Tactical Manual Pocket Guide F-14 Aircraft	Chief of Naval Operations	Provides pocket-size standardized weapons characteristics and procedures for the F-14 aircraft.
2025.317.001	Japan's World War II Balloon Bomb Attacks on North America	Mikesh, Robert C.	Between 1944 and 1945, the Japanese military launched almost ten thousand bomb-bearing balloons across the Pacific Ocean. Intended to spark forest fires and shake American morale, the balloons were beset by technical problems and never achieved their destructive potential, but were nonetheless responsible for the only six war deaths on the United States mainland. Japan's World War II Balloon Bomb Attacks on North America provides a comprehensive account of this obscure chapter in modern warfare. Filled with photographs and diagrams, it traces both the technological and political development of the program and documents its effects on America. (From Amazon.com)
2025.318.001	Knight's Modern Seamanship	Knight, Austin Melvin	A guide for those who follow the sea as a profession, for sport, or for relaxation. In print since 1901 and updated and expanded to meet recent developments. Chapters include Ships and Boats; Shiphandling; Oceanography and the Weather; and Rules of the Road.
2025.318.002	Command at Sea: A Guide for the Naval Officer	Cope, Harley F.	Long considered the bible of commanding officers at sea, this classic guide covers virtually every subject of relevance to the command of

Object ID	Title	Author	Summary
2025.318.003	Naval Officer's Guide, The	Ageton, Arthur Ainsley	a U.S. Navy ship. A collection of information and advice for officers in the U.S. Navy intended to serve primarily as a resource from their preparation for commissioning through their years as junior officers.
2025.319.001	Final Patrol : True Stories of World War II Submarines	Keith, Don	During World War II, the U.S. Navy's submarine service suffered the highest casualty percentage of all the American armed forces, losing one in five submariners. But despite the odds, these underwater warriors accounted for almost 60 percent of Japanese shipping losses, and were a major factor in winning the war. 16 U.S. submarines-and one German U-Boat-that saw action during WWII are now open to the public. Most have been restored and authentically equipped. This book takes a fascinating look at these subs and the personal stories of the brave sailors who lived, fought, and often died in them. Now, visitors can climb into these cramped steel cylinders, peer through their torpedo tubes, and imagine diving under the sea-perhaps for the last time-to stalk a fanatical enemy who threatened our nation's freedom. (Source = DonKeith.com)
2025.319.002	Mighty MOO, The	Canestaro, Nathan	The USS Cowpens and her crew weren't your typical heroes. She was a flattop that the US Navy initially didn't want, with a captain nearly scapegoated for the loss of his last command, pilots who self-trained on the planes they would fly into combat, and sailors that had been in uniform barely longer than the ship had been afloat. Despite their humble origins, Cowpens and her band of second-string reservists and citizen sailors served with distinction, fighting in nearly every major carrier operation from 1943 to 1945, including the Battles of the Philippine Sea and Leyte Gulf. Together they faced a deadly typhoon that brought the ship to the verge of capsizing, and at

Object ID	Title	Author	Summary
			war's end there was only one US aircraft carrier in Tokyo Bay to witness the Japanese surrender—The Mighty Moo. In the years to follow, Cowpens' service has become the wellspring for a remarkable modern tradition, both within the US Navy and the small Southern town that still celebrates her legacy with a festival every year. The Mighty Moo is a biography of a World War II aircraft carrier as told through the voices of its heroic crew—a "Band of Brothers at sea." - amazon

			(A-7 Corsair IIs), VA-115 (A-6 Intruders), VAW-115 (E-2 Hawkeyes), VF-151 (F-4 Phantom IIs), VF-161 (F-4 Phantom IIs), VAQ-130 Det 2 (EKA-3 Skywarriors), VFP-63 Det 3 (RF-8 Crusaders), and HC-1 (SH-3 Sea Kings) Det 8 deployed aboard. Ports of call included Yokosuka & Sasebo, Japan; Subic Bay, The Philippines; Hong Kong; Hawaii. Includes encounters with Russian naval vessels and Tu-16 "Badger" and Tu-95 "Bear" aircraft.
2025.324.001	Investigation of the Pearl Harbor Attack	Joint Committee on the Investigation of the Pearl Harbor Attack	Four years after the Pearl Harbor attack, a Congressional Joint Committee conducted an exhaustive investigation into the facts relating to the events and circumstances leading up to and following the Japanese attack. This Congressional Serial, S. Doc. 79-244, dated July 16, 1946, provides the results of the Joint Committee's investigation. The Report records the facts of the Pearl Harbor disaster and seeks to find lessons to avoid similar disasters in the future, to evolve constructive suggestions for the protection of U.S. national security, and to determine whether there were failures in the U.S. military and naval establishments which in any measure may have contributed to the extent and intensity of the disaster.
2025.324.002	Battleship : The Sinking of the Prince of Wales and the Repulse	Middlebrook, Martin	Battleship tells for the first time the full story of the Prince of Wales and Repulse disaster.. Disposing convincingly of several accepted myths, the authors take full advantage of recently released secret World War II documents from British government archives and of the Japanese Official History, which gives a fascinating side of this devastating battle.
2025.324.003	Thunder Out of China	White, Theodore H.	Text follows China through a decade of upheaval from 1937-1945. Chronicling events from the first outbreak of hostilities in northern China to the Japanese surrender in 1945.

Object ID	Title	Author	Summary
			The authors report their own firsthand experiences as Time-Life correspondents during the war years.
2025.324.004	How Japan Plans to Win	Matsuo, Kinoaki	English translation of a book published in 1940 in Tokyo by the Foreign Office Press with the aim of arousing pro-war enthusiasm among the Japanese people. Includes Translator's Note, Forward by Senator Guy M. Gillette, and Author's Note.
2025.324.005	Pacific War : Middle Phase	Karig, Walter	This volume returns to the Pacific to tell how our fleet, holding the Japanese at the Coral Sea, defeating them at Midway and in the "Defensive-Offensive Phase", laid the groundwork for the offensive that was to carry our forces to overwhelming victory
2025.324.006	The Case Against Japan: A Concise Survey of the Historical Antecedents of the Present Far Eastern Imbroglio	Shepherd, Charles R.	Text is a work of geo-political analysis written before the attack on Pearl Harbor, arguing for a forceful approach to counter Japan's growing power in the Pacific. Presented in eight chapters, topics include: Korea, Manchuria A and B, Shantung, Shanghai, the League of Nations, North China, and Japan's point of view. Bibliography, appendices, and index are included.
2025.324.007	Setting Sun of Japan, The	Randau, Carl	Text is a first-person description of people and events in the Pacific area during the months before Pearl Harbor. A sample of chapters includes: War Capital, Japan's American Problem, Europe in Kobe, The Puppets, The British Leave, and Seven Hundred Flyers in the South Seas.
2025.324.008	Journey to the Missouri	Kase, Toshikazu	Author was former member of the Japanese Foreign Office and career diplomat who was part of the Japanese delegation onboard the USS Missouri during the signing of the Japanese surrender to end World War II. This text covers the history of this period from the Japanese perspective.
2025.324.009	United States and Japan, the	Reischauer, Edwin O.	Text is a discussion of Japan's relationship with the West, her history, geography, economy, and culture. Information is presented in five parts; the

2025.360.001	Pilot's Manual for P-47 Thunderbolt	Commanding General, Army Air Forces	This publication contains operating instructions for the P-47-B, -C, -D and -G Thunderbolt single-engine fighter aircraft. Presented in six sections, information includes: Description; Pilot Operating Instructions; Flight Operation Data; Communication Equipment; Armament; and Operation of Oxygen Equipment. Appendix contains glossary, and emergency operating instructions. Diagrams, tables, illustrations, and photographs included. This is a reissue of original technical order printed 20 January 1943.
2025.360.002	MiG Dynasty	Oliver, David	This is a pictorial account of the Soviet Mikoyan-Gurevich design bureau jet fighters. Covering aircraft from the MiG-15 through the MiG-29, colorful photographs with detailed captions are included. An introduction section gives a brief history of the design bureau.
2025.360.003	On Glorious Wings: The Best Flying Stories of the Century	Coonts, Stephen (ed)	during the final months of the brutal battle of in during the winter of 1942. This compilation features short stories and excerpts from writers of the twentieth century inspired by aviation. With an introduction written by Coonts, twenty-three authors are featured including Edgar Allan Poe, Sir Arthur Conan Doyle, Louis L'Amour, Joseph Heller, Dale Brown, and Stephen Coonts himself.
2025.360.004	Few, the: Summer 1940, the Battle of Britain	Kaplan, Philip	This pictorial account of wartime England shares photographs, excerpts from scrapbooks and diaries to highlight the Battle of Britain from the point of view from those involved. Accounts from those both Luftwaffe and Allied pilots, ground crew, and civilians are included.
2025.361.001	From Pearl Harbor to Okinawa	Bliven, Bruce	This juvenile text focuses on US involvement in the war in the Pacific during World War II from 1941-1946. Presented in

Object ID	Title	Author	Summary
			10 chapters, topics include the Japanese attack on Pearl Harbor, the fall of the Philippines, Burma, the battle of Guadalcanal and Iwo Jima, and action in Okinawa. Maps, photographs and an index are included.
2025.361.002	Last Ring Home, The	Dial, Minter II	Author explores the true story of his grandfather, Lt. Minter Dial, a prisoner of war after the fall of Bataan and Corregidor who died aboard the Enoura Maru. Lt. Dial left his Naval Academy ring to a fellow prisoner of war to return to his wife. When the ring was eventually returned to the family, the author researched his grandfather's legacy.
2025.361.003	History of the Second World War	Liddell Hart, B. H.	Renowned teacher and historian, Liddell Hart presents a military history of World War II on a broad scale. Many sources come from Hart's personal correspondence with Lloyd George and Churchill, post-war interviews with captured German generals and Allied commanders. Considered a pivotal work of military historiography.
2025.362.002	U.S. Navy Task Binder	Division of Naval Intelligence	This bound three-ring binder contains both ONI 41-42 and ONI 204. ONI 204 presents information to aid in the identification of German naval vessels. Thirty-eight ships are presented, and each listing includes armaments, dimensions, propulsion information, aerial views, and miscellaneous photographs. A range table is included. ONI 41-42 presents information to aid in the identification of Japanese naval vessels. Ninety-five ships are presented, and each listing includes armaments, dimensions, propulsion information, aerial views, and miscellaneous photographs. A history of the Japanese Navy is included.
2025.362.003	U.S. Navy Task Binder	Division of Naval Intelligence	ONI 54 presents information to aid in the identification of U.S. naval vessels. Nine types of

Object ID	Title	Author	Summary
			vessels are presented, including battleships, carriers, cruisers, destroyers, submarines, minor combatant vessels, auxiliaries, landing craft, and Coast Guard vessels. Each listing includes lists of ships in class, dimensions, general notes, aerial views, and miscellaneous photographs. An index is included. ONI 41-42 presents information to aid in the identification of Japanese naval vessels. Ninety-five ships are presented, and each listing includes armaments, dimensions, propulsion information, aerial views, and miscellaneous photographs. A history of the Japanese Navy is included.
2025.362.004	Manual of Merchant Ships, A	Division of Naval Intelligence	ONI 54 was issued as a comprehensive manual to aid in the identification of Allied, Neutral, and Enemy merchant vessels. Using a "Type Index", all ships are classified into appearance groups which are subdivided. Each listing includes profile drawings and corresponding tables include ship name, flag, tonnage, and length. An introductory section included a set of instructions for using the "type Index" and includes some sample photographs. An index is included.
2025.364.001	Wave-off! A History of LSOs and Ship-Board Landings	Powell, Robert R. "Boom"	This text presents a full history of the Landing Signal Officer in the US Navy from 1922 through publication. The work details modern changes brought about by angled flight decks and visual landing aids. Diagrams that detail the evolutions of US aircraft carrier deck design from WWI to present are included. A glossary, index, and bibliography are included.
2025.365.001	USS Midway (CV-41) - 1981-1982 - Carrier Air Wing FIVE	Cribbs, John B. (ed)	A pictorial account of the life of the USS Midway between the beginning of 1981 to the middle of 1982. Extended underway periods included a deployment to the western Pacific (WESTPAC) and Indian

Object ID	Title	Author	Summary
			Ocean from 24 FEB to 5 JUN 81, 26 JUN to 16 JUL 81 (WESTPAC), 3 SEP - 6 OCT 81 (WESTPAC) and 26 APR to 18 JUN 82 (WESTPAC). Significant operations/exercises included MERLION, BEACON SOUTH, BEACON COMPASS, MISSLEX, MINEX, GONZO, SOAFEX, MULTIPLEX (2), TEAM SPIRIT 82-1 and READEX 82. Midway underwent an Extended Incremental Ships Restricted Availability (EISRA) from late December 81 to 7 MAR 82 in Yokosuka. Port calls during the period covered by the cruise book included Singapore, Pattaya Beach, Hong Kong, Pusan, Sasebo and Subic Bay. CVW-5 was embarked for all extended underway operations. It's composition varied slightly but general consisted of: VF-161 (F-4S); VF-151 (F-4S); VA-93 (A-7E); VA-56 (A-7E); VA-115 (A-6E and KA-6D); VAW-115 (E-2B); VMFP-3 Det.B (RF-4B); VAQ-136 (EA-6B); and HC-1 Det.2 (SH-3G).
2025.365.002	USS Midway (CVA-41) - 1979-1980	Guiam, D. (ed.)	A pictorial account of the general period June 1979 through the end of 1980 for the USS Midway, lead ship of its class. Operations included routine Westpac ops from August 20 - September 14, 1979, an Indian Ocean deployment from 30 September 1979 to 20 February 1980, and a second I.O. deployment from 14 July to 26 November 1980. The first I.O. deployment of the period coincided with the Iranian Hostage crisis and featured 91 consecutive days at sea, the longest continuous at-sea operations by the ship to date. Port visits in the overall period included Hong Kong, Subic Bay, Perth, Mombasa and Korea. Carrier Air Wing Five was embarked with: VF-161 (F-4J); VF-151 (F-4J); VA-93 (A-7E); VA-56 (A-7E); VA-115 (A-6E and KA-6D); VAW-115 (E-2B); VMFP-3 Det.1 (RF-4B); VAQ-136 (EA-6B); and HC-1 Det.2 (SH-3G).

Object ID	Title	Author	Summary
2025.370.001	Military in San Diego, The	McGaugh, Scott	No city is as proud of its military heritage as San Diego, known as "Navy Town, USA." Congress also has designated San Diego as "the Birthplace of Naval Aviation." However, its community fabric reflects a more diverse and tightly woven relationship with our nation's defense. Over the past century, the city has invented and then reinvented itself in response to shifting world affairs and national priorities. It began with a successful campaign to become a West Coast Navy base in the early 1900s. By the 1930s, military aircraft manufacturing drove economic development. After explosive growth in World War II, San Diego emerged as an established military metropolis. At the dawn of the Cold War, San Diego recast itself as a home for Cold War research and development and defense contractors. Today, San Diego is an internationally renowned defense science and technology development center, a city in which one in four jobs and fully 50 percent of regional domestic product are defense related. Like no other city in America, San Diego has grown from a remote military presidio outpost to become a preeminent Pacific powerhouse. (From publisher)
2025.370.002	China Clipper	Jackson, Ronald W.	This is the true story of Pan American's flying boats and their role in the war in the Pacific - based on over 6,900 previously undisclosed government and corporate documents. Test presents a gripping and revealing story that sheds new light on the events leading up to World War II. Book also follows the day-by-day flight of American citizen and Chinese patriot, Wah Sun Choy, in July 1938 on the Hawaii Clipper bound for China. Wah Sun Choy had raised over \$3 million to help bolster China's war with Japan, and he was on the flight to deliver the money to the Chinese Nationalists. Between Guam and Manila, the

2025.376.001	Decisive Battles of the Pacific War	Preston, Antony (ed)	The nine most important naval battles of the Pacific War --- Pearl Harbor drew the US into the war with a surprise attack. -- - Coral Sea checked the Japanese advance. --- Midway turned the tide of war in favor of the Allies. --- Guadalcanal, Philippine Sea, Leyte Gulf, the air war against Japan, Iwo Jima and Okinawa broke the back of Imperial Japan and brought victory to the Allies. The hand-to-hand fighting, the atomic holocaust and the epic naval battles are told brilliantly by an international team of historians and illustrated with hundreds of photographs, technical illustrations and maps, some of them in color.
2025.376.002	US Navy in World War II	Heiferman, Ronald	At the end of World War I the American Navy was the second largest Navy in the world, second only to the Royal Navy which had just defeated the Kriegsmarine at Jutland. A combination of disarmament conferences and public

Object ID	Title	Author	Summary
			indifference kept the US Navy static until the 1930s when President Roosevelt, an old Navy man himself, recognized the growing danger of the rise of both Germany and Japan and started a surreptitious rearmament. By 1941 America's nascent fleet was preparing for war. When war struck at Pearl Harbor on 7 December 1941, much of America's naval strength which was concentrated in the Pacific was wiped out in a matter of minutes. Fortunately the aircraft carriers were at sea and were able to conduct holding operations at the Battles of the Coral Sea and Midway until American industry could swing into motion. By 1943 America had the largest fleet in the world fighting the U-Boats in the Atlantic and the Imperial Japanese Navy in the Pacific. By the end of World War II the US Navy dominated most of the oceans of the world. The rise of the fighting strength of the naval arm, the ships, the men who fought on them, the great naval Commanders, the battles in which they fought and the weapons of the US Navy from the submarine and torpedo to the Naval Air Force and the giant aircraft carriers are told by Professor Ronald Heiferman, a noted authority on World War II and its battles. THE US NAVY IN WORLD WAR II, a companion volume to THE US AIR FORCE IN WORLD WAR II, is likely to become a collector's item for all those interested in the maritime aspects of World War II. (from dust jacket flap)

Squadron Code DJ, Aircraft Identity Letter B." Donated by Don T. Senda (2025.384). SLEEVE 6 - 7.875x11.375" page cut from unknown publication with color photo of twin-engined, twin-tailed

Object ID	Title	Author	Summary
			"Langley Plastic Plywood Trainer," s/n "NX-29099." Comment on a different photo of the same aircraft: "In 1941, Langley Aircraft of Port Washington, Long Island, named for aviation pioneer Samuel Langley, built this twin-engined four-seater of a mahogany plywood composite material. This was known as a plastic and so this was called a 'plastic plane'. Photo date and fate of this prototype unknown, but by 1942 the attention would have shifted to the 2-4-90 second aircraft with 90-hp engines, bought by the US Navy as the XNL-1 trainer. Ironically, the 'non-strategic' plywood plastic turned out to be scarcer than aluminium. Port Washington had no runways and we found the photo was taken ten miles away at Roosevelt Field. The large hangar was just one in a row of seven. Photo by: Rudy Arnold / Smithsonian Institution" (Source: https://www.airhistory.net/photo/422850/NX29099). Reverse side: color photo of mostly bare metal "Republic P-47 Fighter" with razorback canopy in flight. Donated by Don T. Senda (2025.384). SLEEVE 7 - 7.75x10.5" color photo clipped from a wall calendar of a left-banking Stearman N2S-2 [Baugher] Kaydet Navy biplane trainer with s/n N1350M on fuselage. Object ID	Title	Author	Summary
			From the David Pederson collection (2019.343). SLEEVE 27 - 8.25x10.75" artist's illustration cut from a 1992 wall calendar depicting an F4U Corsair pursuing a Japanese A6M Zero fighter in clouded skies above an island somewhere in the Pacific. From the Petrofsky donation (2024.407). SLEEVE 28 - a) 8X10" gloss b&w photo of F4U Corsair in flight with 3 (presumably) others in the distance. Squadron code "RF," aircraft number 75 (BuNo difficult to make out). Penciled inscription on back: "F4U Corsair World War II fighter;" national insignia suggest photo taken after January 1947 (red stripes in white bars on roundels' sides). From the Petrofsky donation (2024.407). b) 8X10" gloss b&w photo of four naval officers, two wearing aviator badges ("wings"), posing on starboard side of F4U Corsair (presumably the same one in the previous photo); no inscription on the back. From the Petrofsky donation (2024.407). SLEEVE 29 - a) 8X10" gloss b&w photo of two naval officers, one with visible aviator badge ("wings"), posing at back of F4U Corsair with wings folded (presumably the same one in Sleeve 28); another parked Corsair on the left, hangar on right. No inscription on the back. From the Petrofsky donation (2024.407). b) 8X10" gloss b&w landscape photo of F4U Corsair with wings folded and wheels chocked; squadron code "R" and number "118." Adjacent Corsair with squadron code "R" and number "120" (assumed; with "1" obscured by 118's prop). Other parked aircraft visible in background and fire extinguisher lying on its side in lower right corner. No inscription on back. From the Petrofsky donation

			pp.8-10 Mar 12-25 1982. From the David Pederson collection (2019.343).
2025.377.036	U.S. Navy Land-Based Aircraft	USS Midway Research Library	A collection of photocopies, newsletters, newspaper clippings, photos on land-based United States Navy aircraft. Initial inclusions are for the Martin P4M Mercator and Lockheed PV-1 Ventura/PV-2 Harpoon. Included are: SLEEVE 1 - Lockheed PV-1 Ventura/PV-2 Harpoon; Photo Card Number 19, Group 11; American Aircraft of World War II; 1996, 1997; International Masters Publishers AB; GB P 87 00 20 046. From the David Pederson collection (2019.343). SLEEVE 2 - 8x10" b&w glossy photograph of Lockheed P2V Neptune "The Truculent Turtle" in flight; file number 703094-A. From the Petrofsky donation (2024.407). SLEEVE 3 - 7.75x10" undated color newsprint clipping of Lockheed P2V Neptune with "TT-14" marking on starboard engine cowling. Caption: "The largest plane ever to take off from a carrier, Lockheed's P2V-2 is the production version of the famed Truculent Turtle, which flew 11,236 miles non-stop without refueling. The heavy search-patrol Neptune is Navy-rated at more than 300 mph, has a cruising range of 5,000 miles, and carries a crew of seven. In a pinch it could handle atom bombs. (These colorfotos by NEWS photographers Robert Cranston and Bill Klein are Nos. 21 and 22 in a series on planes of the U.S. Armed Forces.)" From the Petrofsky donation (2024.407). SLEEVE 4 - "Forgotten Warrior" by Robert L. Trimble; AIR CLASSICS v<volume> no<number> pp.56-61. From the David Pederson collection (2019.343). SLEEVE 5 - "T-44A Navy

2025.378.001	Reflections: Service to our Country	Doerr, Bob (ed)	The 2025 Military Writers Society of America anthology contains the writing of members presented in 31 chapters. Each submission relates to the theme, "Reflections: Service to our Country". Chapter 17, "Spiritual Unrep" was written by Midway Library volunteer, Pat Alderman
2025.381.001.	Watch Officer's Guide - 1955 : A Handbook for All Deck Watch Officers	Noel, John V.	This text provides a study of the efficient deck watch through a foundation of facts and shared professional knowledge. Topics include: the watch in general, notes for the officer of the deck, the deck log, communications, duties while underway, ship handling, navigation, standard commands, the watch in port, and miscellaneous information about boat equipment and capacities, honors and ceremonies, flags and pennants, and the rules of the nautical road.
2025.382.001	Grumman F6F Hellcat	Boiko, Oleksandr	This pictorial work shows detailed scale drawings of the Grumman F6F Hellcat constructed in the early 1940s by Grumman Aircraft Engineering Corp. in Bethpage.
2025.382.002	Checklist Complete: Stories from My Life in Aviation	Carter, Gary	Text is a memoir of former naval officer, Captain Gary Carter (USN, Ret) who began his over 40-year aviation journey by enlisting in the Navy after high school and graduating from the U.S. Naval Academy.

Object ID	Title	Author	Summary
			He followed nearly 25 years on active duty with a 21-month stint at a regional airline and then joined Delta Air Lines. He flew Boeing aircraft for over 16 years, first as a 727 flight engineer and then as a copilot on the 737-200 and -300, and the 757 and 767. Highlighted here are some of the many incidences and experiences that stood out during Carter's remarkable career.
2025.382.003	Admiral's Bookshelf, The	Stavridis, James	Admiral James Stavridis, a leader in international business, national security, and global philanthropy, shares the books that facilitated his success. A guide to living and leading through reading, The Admiral's Bookshelf links twenty-five essential life lessons and leadership principles to the books that best illustrate them"-- Provided by publisher
2025.387.001	Fading Victory : The Diary of Admiral Matome Ugaki, 1941-1945	Ugaki, Matome	This book is a candid and personal account of World War II by a major Japanese military leader. Revealing of the Japanese military mind and analytical about Japan's conduct of the war, Ugaki's diary begins in October 1941 and includes detailed entries covering virtually every day of the war in the Pacific.
2025.390.001	Corrosion Handbook for Shipowners and Operators	Van Rompay, Boud	This text discusses the use of special coating to protect from three types of corrosion: cavitation erosion, chemical erosion, and impact abrasion. This promotional text written by the publisher, Subsea Industries, uses natural language and bold illustrations to showcase their coatings.
2025.392.001	USS Midway - Far East Cruise 1962	Langkammerer, G. W. (ed.)	Pictorial account of the deployment of the USS Midway CV-41 the Western Pacific Ocean 1962. She departed Alameda 6 April 1962 and returned 20 October 1962. Ports of call and items of interest : Pearl Harbor, Yokosuka, Sasebo, Hong Kong, Subic Bay, Buckner Bay, Iwakuni and Beppu. In Memoriam page. Brief

			fundamentals.
2025.398.002	Battle For Leyte Gulf, The	Woodward, C. Vann	The author paints a full portrait of the Battle--the greatest naval battle of World War II and the largest engagement ever to take place on the high seas. Fought at the end of 1944, the battle represented a supreme effort by the Japanese to maintain control of the Philippines. It ended in their greatest defeat--and a decisive victory for the United States Navy.
2025.398.003	Trail Blazing in the Skies	Dene, Shafto	Text gives an account of the history of the Goodyear Tire and Rubber Company's rise as the American prime manufacturer of heavier- and lighter-than-air craft at time of publication. Topics include the first airplane tires, airships and balloons, the airwheel , self-sealing gasoline tanks, aviation life savers, static and vibration, and the future of their business.
2025.398.004	Air News Yearbook, V. 2	Andrews, Phillip (ed)	Air News Yearbook, vol 2. with black & white photographs, Notes and Revisions on First Edition, Contents of different world air forces with text and illustrations, Data Section, Notes and Revisions.
2025.398.005	Slow but Deadly : WWII Memoirs of an SBD Dive Bomber Pilot	Anderson, Robert E.	Anderson's written memoirs of his time as a World War II, USMC Dauntless Dive Bomber pilot began as something to give to his children who had enjoyed hearing about his World War II adventures. It was published a few years later because the interest in personal anecdotes from World War II survivors had grown. Because Anderson had completed 2 years of college, he was eligible for flight school. "Stage D, the last barrier to advanced flight training using military type aircraft proved to be the most fun of all. Right-side-up gave way to inverted flight. One was given to understand that, not only was it a thrill to level the wings with the horizon at the top of the loop while hanging from a seatbelt, it was a requirement. Occasionally a student would forget to fasten the seatbelt and fall out of the plane at the top of a loop or

Object ID	Title	Author	Summary
2026.302.004	Solomons Air War V. 3	Claringbould, Michael John	Third volume of Solomons Air War chronicles aerial warfare in the Solomon Islands theater from November - December 1942. It can be read alone or as part of the ongoing Solomons Air War series.
2026.302.005	Solomons Air War V. 4	Claringbould, Michael John	Fourth volume of Solomons Air War chronicles aerial warfare in the Solomon Islands theater during Operation Ke, the evacuation of Guadalcanal. Text covers the ongoing air war in the area and includes aircraft new to this air campaign-the USMC F4U Corsair and the USN PB4Y -1. It can be read alone or as part of the ongoing Solomons Air War series.
2026.302.006	USS Yorktown	Faltum, Andrew	The USS Yorktown (CV-5) was a highly successful design for a US navy aircraft carrier. Her keel was laid down in 1934, and she was commissioned in 1937. USS Yorktown proved large enough to be useful in carrier operations, yet had more speed than previous designs. This accounts celebrates the USS Yorktown (CV-10) the namesake of her predecessor CV -5 which was sunk in the Pacific in World War II. CV-10 would eventually be preserved as a museum ship in 1975 in Charleston, South Carolina.
2026.302.007	Defeating the Japanese Zeros:	Gorman, R.J.	Text is account of the role played by U.S. Navy aviator, then Lieutenant Commander 'Jimmie' Thach and a small handful of aviators from his squadron played in winning the victory at the Battle of Midway. Thach is recognized as a leading innovator in naval aviation and the creator of a maneuver known as the 'Thach Weave'. Text cites Thach's personal reminiscences about his career as published by the Naval Institute Press, and the official squadron report written by Thach a few days after the Battle of Midway.
2026.302.008	Battle Stations: How the USS Yorktown Helped Turn the Tide at Coral Sea and Midway	Moore, Stephen L.	Text is a narrative account of the final thirty days of the USS Yorktown (CV-5) as she

2026.312.001	Eagle's Claw, the: A Novel of the Battle of Midway	Shaara, Jeff	Military historical fiction account of the Battle of Midway starting in the spring of 1942. From the American side, the shocking conflict is seen through the eyes of Rochefort and Admiral Nimitz, as well as fighter pilot Lieutenant Percy "Perk" Baker and Marine Gunnery Sergeant Doug Ackroyd. On the Japanese side, Admiral Isoroku Yamamoto is the mastermind. His key subordinates are Admiral Chuichi Nagumo, aging and infirm, and Admiral Tamon Yamaguchi, a firebrand who has no patience for Nagumo's hesitation. Together, these two men must play out the chess game designed by Yamamoto, without any idea that the Americans are anticipating their every move on the sea and in the air. Author recounts the battle that changed not only the outcome of a war but the course of our entire global history.

2026.326.001	Case Studies in Damage Control	Middaugh, Jon S.	Text examines the damage control efforts of the US Navy over the past century. Presents personal accounts of Navy sailors. Topics include: the loss of USS Panay (PR-5), saving USS Oriskany (CVA-34) and USS Forrestal (CVA-59), the USS Samuel B. Roberts (FFG-58), and the attack on the USS Cole (DDG-67).
2026.328.001	Wings for the Navy : 100 Years of Naval Aviation	Huffman, Mark	On 8 May 1911, the Navy ordered its first airplanes, marking the official birth of naval aviation. Leading up to that was a unique collaboration between a civilian pilot, Eugene Ely; his employer, aircraft manufacturer Glenn Curtis; and the Navy's officer assigned to administer the fledgling aviation program, Captain Washington Chambers, USN. From the first bold experiments that showed the airplane's viability, to the years following World War I, naval aviation quickly evolved from a reconnaissance tool to an extremely powerful weapon that would usher in the aircraft carrier and redefine naval warfare. This is the story of the three men who possessed the vision, courage and know-how to produce wings for the navy. The video was sponsored by the USS Midway Museum on the occasion of the Centennial of Naval Aviation 2011. http://www.navyhistory.org/2011/09/centennial-of-naval-aviation-video-2/

Volume 6, Triumph and Tragedy, the concluding volume in the set, covers D-Day, the bombing of Hiroshima and Nagasaki, and the meeting at Yalta. Bibliographical references and index are included.
2026.336.011	Twilight of the Gods: War in the Western Pacific, 1944-1945	Toll, Ian W.	The final volume of the magisterial Pacific War Trilogy from acclaimed historian Ian W. Toll, "one of the great storytellers of war" (Evan Thomas). Twilight of the Gods is a riveting account of the harrowing last year of World War II in the Pacific, when the U.S. Navy won the largest naval battle in history; Douglas MacArthur made good his pledge to return to the

Object ID	Title	Author	Summary
			Philippines; waves of kamikazes attacked the Allied fleets; the Japanese fought to the last man on one island after another; B-29 bombers burned down Japanese cities; and Hiroshima and Nagasaki were vaporized in atomic blasts. Ian W. Toll's narratives of combat in the air, at sea, and on the beaches are as gripping as ever, but he also takes the reader into the halls of power in Washington and Tokyo, where the great questions of strategy and diplomacy were decided. Lionel Barber of the Financial Times chose the second volume of the series (The Conquering Tide) as the preeminent book of 2016, calling it "military history at its best." Readers who have been waiting for the conclusion of Toll's masterpiece will be thrilled by this final volume."- From the publisher
2026.336.012	Conquering Tide, The: War in the Pacific Islands, 1942-1944	Toll, Ian W.	The devastation of Pearl Harbor and the American victory at Midway were prelude to a greater challenge: rolling back the vast Japanese Pacific empire, island by island. This masterful history encompasses the heart of the Pacific War—the period between mid-1942 and mid-1944—when parallel Allied counteroffensives north and south of the equator washed over Japan's far-flung island empire like a "conquering tide," concluding with Japan's irreversible strategic defeat in the Marianas. It was the largest, bloodiest, most costly, most technically innovative and logistically complicated amphibious war in history, and it fostered bitter interservice rivalries, leaving wounds that even victory could not heal. Often overlooked, these are the years and fights that decided the Pacific War. Ian W. Toll's battle scenes—in the air, at sea, and in the jungles—are simply riveting. He also takes the reader into the wartime councils in Washington and Tokyo

Object ID	Title	Author	Summary
			where politics and strategy often collided, and into the struggle to mobilize wartime production, which was the secret of Allied victory. Brilliantly researched, the narrative is propelled and colored by firsthand accounts—letters, diaries, debriefings, and memoirs—that are the raw material of the telling details, shrewd judgment, and penetrating insight of this
2026.336.013	Fleet at Flood Tide, The : America at total war in the Pacific, 1944-1945	Hornfischer, James D.	From the award-winning historian who has been acclaimed as "doing for the Navy what popular historian Stephen Ambrose did for the Army," here is an unprecedented account of the extraordinary World War II air, land, and sea campaign that brought the U.S. Navy to the apex of its strength and marked the rise of the United States as a global superpower. Drawing on new primary sources and personal accounts by Americans and Japanese alike, The Fleet at Flood Tide is a thrilling narrative of the climactic end stage of the Pacific War, focusing on the U.S. invasion of the Mariana Islands in June 1944 and the momentous events that it produced. With its thunderous assault into Japan's inner defensive perimeter, America crossed the threshold of total war. From the seaborne invasion of Saipan to the stunning aerial battles of the Great Marianas Turkey Shoot, from the largest banzai attack of the war to the first mass suicides of Japanese civilians to the strategic bombing effort that culminated at Hiroshima and Nagasaki, the Marianas became the fulcrum of the drive to compel Tokyo to surrender--with consequences that forever changed modern war. These unprecedented operations saw the first large-scale use of Navy underwater demolition teams; a revolution in the

Object ID	Title	Author	Summary
			fleet's ability to sustain cross-hemispheric expeditionary warfare; the struggle of American troops facing not only a suicidal enemy garrison, but desperate Japanese civilians; and the rise of the U.S. Navy as the greatest of grand fleets. From the Marianas, B-29 Superfortresses would finally unleash nuclear fire on an enemy resolved to fight to the end. Hornfischer casts this clash of nations and cultures with cinematic scope and penetrating insight. Focusing closely on people who rose to challenging events, he shows us Raymond Spruance, the brilliant, coolly calculating commander of the Fifth Fleet; Kelly Turner, whose amphibious forces delivered Marine General "Howlin' Mad" Smith's troops to the beaches of Saipan and Tinian; Draper Kauffman, founder of the Navy unit that predated today's SEALs; Paul Tibbets, the creator of history's first atomic striking force, who flew the Enola Gay to Hiroshima; and Japanese warriors and civilians who saw the specter of defeat as the ultimate test of the spirit. From the seas of the Central Pacific to the shores of Japan itself, <i>The Fleet at Flood Tide</i> is a stirring and deeply humane account of World War II's world-changing finale. (from Amazon.com)
2026.336.014	Admiral Bill Halsey : A Naval Life	Hughes, Thomas Alexander	Biography of famous naval officer of World War II known for his resolve at Guadalcanal and actions at the Battle of Leyte Gulf. 20263.334.001	Admirals, The : Nimitz, Halsey, Leahy, and King--The Five-star Admirals Who Won the War at Sea	Borneman, Walter R.	Only four men in American history have been promoted to the five-star rank of Admiral of the Fleet: William Leahy, Ernest King, Chester Nimitz, and William Halsey. In THE ADMIRALS, award-winning historian Walter R. Borneman tells their story in full detail for the first time. Drawing upon journals, ship logs, and other primary sources, he brings an incredible historical moment to life, showing us how the four admirals revolutionized naval warfare forever with submarines and aircraft carriers, and how these men-who were both friends and rivals-worked together to ensure that the Axis fleets lay destroyed on the ocean floor at the end of World War II.\ Contents: List of Maps -- Prologue: The Banks of the Severn -- Saturday, December 6, 1941 -- pt. 1. L2008.301.011	Air Wars and Aircraft - A Detailed Record of Air Combat, 1945 to Present	Flintham, Victor	Almost every day since 1945 has seen aircraft engaged in warfare somewhere in the world Algeria, Indonesia, Angola, Palestine, Cyprus, Rhodesia, the Philippines, Afghanistan, Grenada and Vietnam to name just a few This outstanding single-source reference will surprise the most devoted student by the wealth of facts and figures it provides. The author has described every operational use of aircraft, however insignificant, since 1945: only in this way is it possible to understand why they were used and what the limitations on their operation were. The wars themselves are grouped on a geographical basis, which helps to relate events, and it is hoped that the information herein will assist the reader in placing future events in their true

Object ID	Title	Author	Summary
			perspective. Air Wars and Aircraft is intended to meet a wide range of needs without compromising the objective of being comprehensive. Extensive use has been made of tables, and complete orders of battle are given for over ninety wars, including Korea and Vietnam. The data includes units, equipment, roles, bases and dates. Great care has been taken to ensure this is accurate, and much of it has never been published before. Each section also contains notes on representative aircraft marking, making the book of great practical value to modellers. Over 100 specially commissioned maps provide the most accurate reference yet to airfields and targets in the war zones - for example, the locations of Arab and Israeli airfields are published for the first time. An extensive international bibliography and invaluable appendices containing designations, serial and code systems and reporting names provide a wealth of useful information as well as sources for those who wish to pursue further research. Complementing this detailed narrative it some 200 carefully selected photographs which reflect the wide range of aircraft used over the decades, from Spitfire to Harrier, from Mustang to Phantom. Many of these are from private sources and have never been published. A unique and invaluable volume for layman and expert alike, Air Wars and Aircraft B strong on fact and analysis and light on opinion. It is destined to become a book that graces every aviation enthusiast's balm.

Admiral John H. Towers : The Struggle for Naval Air Supremacy

Reynolds, Clark G.

Reynolds provides a thorough and complete biography of a man who made major contributions to the Allied

Object ID	Title	Author	Summary
			success in the Second World War. Towers, an early advocate of air power, struggled for recognition and promotion between the wars. His administrative ability during the war was largely responsible for the fact that the right aircraft were produced and delivered. This book is not about tactics. The market is flooded with books about the battles. This is a book which describes the nuts and bolts of putting airpower to work. Well researched, thoroughly documented, entirely typical of Dr. Reynolds. (from Amazon.com)
L2008.301.014	Marine Officer's Guide, The	Estes, Kenneth W.	Designed to serve as a bridge between the individual officer and the great body of regulations, directives, customs, courtesies, traditions and service usages that make up the formal structure of the Corps. Although written with newly commissioned officers in mind, its usefulness extends to officers of all grades and seniority.
L2008.301.022	Corsair : The F4U in World War II and Korea	Tillman, Barrett	This is the remarkable story of a plane which became a legend---a sleek aircraft with bent wings which was a day fighter and a night fighter, a dive bomber and a reconnaissance plane, and which flew both land-based and carrier-based missions. This fast-paced history of the Corsair begins with the nerve-wracking test flights of the prototype in 1940 and concludes with the Honduras F4Us which were still active 38 years later.
L2008.301.032	Bluejacket Admiral : The Navy Career of Chick Hayward	Hayward, John T.	Vice Adm. John T. "Chick" Hayward's long and colorful career spanned the decades from naval aviation's infancy to the dawn of the jet age. He was one of those rare people who was eminently successful yet humanly colorful, a high school dropout who became a nuclear physicist. The story of his role in the development of the atomic bomb and his interaction with the other Los Alamos scientists is justification

Object ID	Title	Author	Summary
			enough for a biography, but Hayward's contributions to the twentieth-century U.S. Navy go significantly beyond that period. Hayward saw combat in World War II and participated in the Korean War and Cuban missile crisis, and helped make many of the decisions that shaped the present-day navy. From his service as an enlisted man to his rise to a flag officer, Hayward experienced life as a "powder monkey" on a battleship, a president of the Naval War College, a founder of the Lawrence Livermore Laboratory, a key player in getting nuclear weapons to sea, and an early developer of cruise missiles. An avid supporter of naval aviation, he amassed more pilot hours than any other flag officer and was one of the navy's first jet-qualified pilots. Hayward's longtime friend C.W. Borklund developed this autobiography from the admiral's 300-page diary. It captures the spirit as well as the facts of Hayward's history-making career, focusing on his involvement in events that had a major impact on politics, military policies, and plans. Highly personalized and sometimes opinionated, the memoir provides a great deal of insight and food for thought about today's navy. (from usni.org)
L2008.301.041	Handbook for Marine NCOs	Estes, Kenneth W.	A compendium of self-help guidance and information for non-commissioned officers of the U.S. Marine Corps to help them achieve goals on the battlefield and to benefit the personnel in their charge.
L2008.301.046	Complete Guide to The New Manners for the '90s	Baldrige, Letitia	Ms. Baldrige's book provides authoritative answers to questions about manners no one has had to ask before. Among them, the protocol involved in all the new family relationships - stepfamilies, adult children returning home, and elderly parents moving in; child visitation problems and other complications of divorce; the

Object ID	Title	Author	Summary
			new codes concerning sex and dating and women taking the initiative romantically; and men and women traveling together on business. She provides unique counsel on rearing children to say "no" to drugs, alcohol, and other destructive temptations and to have the exemplary manners that lead to success. The book is also a complete updated guide to everything you need to know to handle the traditional rites and passages of life in line with current thinking (much of which is different from that of the past). This includes detailed information on weddings, funerals, and religious ceremonies; entertaining any number of people -- from one to one thousand; today's table manners, table setting, and table service; etiquette at work; proper forms of address for these times; and everything you need to know to converse easily in person or on the telephone, to write appropriate letters and notes for every occasion, and much more.

L2008.301.051	Mr. Midshipman Easy	Marryat, Frederick	A timelesss tale of a midshipman's rise in Nelson's navy. Widely regarded as Marryat's best work, Mr. Midshipman Easy is based on the author's adventures sailing with Lord Thomas Cochrane. This classic seafaring tale is a fascinating account of naval life and warfare, of French prisons and love affairs, and of the midshipman's berth. Marryat's ready wit, unforgettable characters, and true-to-life details have earned him praise from Conrad, Hemingway, and Ford Madox Ford, who called him "the greatest of English novelists."

L2008.301.070	Give Us This Day - The Story of Prayer	Goodwin, Rufus	From Library Journal Most Americans believe in the existence of a personal God and pray regularly. At organized religious services; such

Object ID	Title	Author	Summary
			prayer is formal, liturgical, and full of ritual, but Americans also pray privately, informally, and without ceremony. Here Goodwin, former UP correspondent to the Vatican, gives us a good, basic introduction to the history and current practice of private prayer. Neither theologian nor theoretician, Goodwin nevertheless raises most of the difficult questions people ask about prayer: How do I know God hears and responds to me? If everything is foreordained, why do prayers matter? What should I say, or should I be silent? What is the best kind of prayer? His answers are based primarily on his own experience. Accordingly, this book will appeal to interested lay readers rather than scholars or religious professionals. Recommended for public libraries. AJames F. DeRoche, Alexandria, VA Copyright 1999 Reed Business Information, Inc. Product Description What is prayer, really? Where does it come from? Gandhi called prayer the "key of the morning and the bolt of the evening." But what is prayer? Do you need to believe in God in order to pray? Why are the words important? What is the difference between prayer and meditation? Should you ask for things when you pray? Do prayers change the world around us? Rufus Goodwin-writer, linguist, and former United Press correspondent to the Vatican-addresses these and other questions about prayer in this thoughtful book. He examines numerous traditions of prayer through the ages. He discusses practices ranging from the ancient Indian yoga of sound to the Christian monastic rules of prayer, and he offers examples of the various religious litanies that ritualize and celebrate the sense of a higher life. Goodwin's intention is not to

Object ID	Title	Author	Summary
			compare traditions but to get at the essential technique and the attitude of prayer-its cognitive workings. Prayer is seen as a key to an active inner life and to an experience of the higher self. He shows us how prayer can restructure our cognition in a way that provides greater access to renewal, imagination, inspiration, and intuition, and provides an anchor for meaning in daily life. L2008.301.143	Naval Institute Guide to World Naval Weapons Systems, The - 1997-1998	Friedman, Norman	Long recognized as the most comprehensive reference work available on the subject, this guide remains the only complete reference to the weapons currently in service in ships, submarines, and naval aircraft around the world. It is the only book of its type to explain the transformation of the U.S. Navy into a network-centric force, a transformation that has had immense consequences for choices of tactics, weapons, services, and the systems coordinating them. This guide also offers unparalleled coverage of the weapons, sensors, and command systems of the world's navies, both those the U.S. Navy works with and those it may have to fight. Written by one of the world's leading naval analysts, the book describes the weapons and systems in detail and examines the crucial relationship between them. Completely rewritten and newly illustrated, this edition makes a special effort to provide a clear and precise account of how weapon technology has changed to meet the new tactical and strategic challenges facing international naval forces today. Cutting-edge information is found throughout, enhanced by many new and rarely seen photographs and drawings. For example, this volume offers an unusually full account of the ""system of systems"" under development by the U.S. Navy and the other services to fight future limited regional wars. That initiative includes the changing role of space resources as they affect war on, over, and under the sea. This edition also benefits from the flood of material from

Object ID	Title	Author	Summary
			Russia, whose weapons and systems are now owned and operated by numerous countries and are likely to be sold to many more. The guide provides uniquely detailed coverage of weapons developed and deployed in the Far East, an area that promises to be the liveliest scene of naval action in the future. Extensive sections are devoted to explaining the intricate workings of sensors and command systems. No other book, or even set of books, offers this sort of material in such accessible form. Its detail and completeness are backed by the authority of a long-established professional expert. For the most complete and up-to-date information about weapons in every navy in the world, this is the essential resource—a work that, in effect, can serve as a textbook of modern naval technology. Norman Friedman is the author of dozens of books, including Terrorism, Afghanistan, and America's New Way of War and Seapower as Strategy: Navies and National Interest. A resident of New York, he lectures around the world on naval and related military topics and contributes a monthly column analyzing world naval developments for Proceedings magazine. L2008.301.153	Holy Bible, The - New International Version	None Stated	The Bible is any one of the collections of the primary religious texts of Judaism and Christianity. There is no common version of the Bible, as the contents and the order of the individual books (Biblical canon) vary among denominations. The 24 texts of the Hebrew Bible are divided into 39 books in Christian Old Testaments, and complete Christian Bibles range from the 66 books of the Protestant canon to the 81 books of the Ethiopian Orthodox Church Bible. The Hebrew and Christian Bibles are also important to other Abrahamic religions, including Islam and the Bahá'í Faith, but those religions do not regard them as central religious texts.
