			balanced history" Aviation History Few authors cover aviation and war with the authenticity that Thomas McKelvey Cleaver brings to "Fabled Fifteen." The carrier based naval aviators who fought in the Pacific in World War II had a difficult, demanding, exciting job and Cleaver captures their experience, from a well known Medal of Honor ace to an obscure, lowly ensign. This is a fast paced, character driven narrative that will grab you and hold you. -- Robert F. Dorr, author "Mission To Tokyo" Cleaver's book is a splendid effort that is eminently readable, detailed, and action packed. Buttressed by years of research, the book is not just a dry recounting of dates and missions; rather, it examines the men and their lives through interviews with surviving members, diaries and contemporary letters. Cleaver uses it all to transform words on a page into real and empathetic men. -- LCOL Jay A. Stout USMC (Ret), author, "Fighter Group" Cleaver provides a very clear sequence of both naval strategy and tactics of both sides of the two greatest naval battles in history, the Marianas Turkey Shoot and the Battles of Leyte Gulf. -- CDR Jack D. Woodul, USN (Ret) Cleaver does a magnificent job in telling the human side of the story of Carrier Air Group 15, perhaps the most successful of its type. The author gives the human story of the heroism of the fighter, dive bomber and torpedo plane pilots who inflicted tremendous losses on the Japanese. But he also places Air Group 15's exploits in the context of the larger events of the war.

Object ID	Title	Author	Summary
			-- COL Walter J. Boyne, USAF (Ret), retired curator, National Air And Space Museum, author "The Wild Blue." Thomas McKelvey Cleaver's FABLED FIFTEEN, The Pacific War Saga of Carrier Air Group 15 is a great bit of history mixing factual research and the personal touch through letters and interviews. The sagas of USS Enterprise, Air Wing 15 and its CAG, David McCampbell, have each been told before, but, until now, not together in a comprehensible and readable whole. This book is on the top of my reference stack. --CDR Robert R. "Boom" Powell, USN (Ret) Previous accounts of Air Group 15's activities have mostly been a summary of flight records with little other detail, so we have learned little of the men who actually flew and maintained the planes during that time. They all have fascinating stories to tell that the author has captured for our enjoyment. -- CDR David P. McCampbell, USN (Ret) "strives to put a more human face on a topic that is often presented as a simple series of basic chronological facts... presents the history of the CVG-15 from the perspective of those who made the history. This is much more important than just facts and figures...packed with vivid accounts of the men who fought the war...highly recommend it. You cannot distill human history down to a chart." Logbook a truly outstanding book about this famous unit, a unit whose record has never been equaled and probably never will. You

			naval history, and World War II in particular. The battles represent two momentous naval events. Firstly, turning point in the course of Pacific War. These are America's first naval victories against the Imperial Japanese Navy (IJN) and beginning of the long road to victory, following months of U.S. and Allied defeat at the hands of the seemingly unstoppable Japanese "juggernaut". Secondly, the battles become the recognition point by the United States Navy (USN) that the aircraft carrier had become the primary weapons platform at sea, replacing the battleship that had dominated naval warfare for
2015.302.025	USS John F. Kennedy (CV-67) - The Carrier of the New Millennium - 1999-2000	Kirk, Lance E. (ed.)	USS John F. Kennedy returned to Mayport on October 1997 for a brief maintenance period. During 1999, continuing at sea, and preparing for its 16 th deployment on September 22, 1999 to the Mediterranean Sea/Arabian Gulf. The ship made the first carrier port call to Jordon, and hosted the King of Jordon. JFK then participated in Operation Southern Watch, flying combat missions while enforcing the no-fly zone over Iraq. On Jan 1st, JFK became the "Carrier of the New Millennium" by being the only carrier underway as the year 2000 arrived. The ship returned on March 19, 2000. Ports of call included six day port visit to St. Maarten, Antilles; St. Martin, Guadeloupe; Malta; Suez Canal; Jordon, Bahrain; Dubai; Persian Gulf (supporting Operation Southern Watch, support no-fly zone over Iraq); Tarragona, Spain. Items of interest: includes biography of John Fitzgerald Kennedy; pictures of Caroline Kennedy and John Kennedy who are frequent guests to the ship; history of the ship with pictures of Bob Hope, George and Barbara Bush, and Brooke Shields; pictures of the ships in the carrier task force; pictures

2015.302.032	Islands of Destiny : The Solomons Campaign and the Eclipse of the Rising Sun	Prados, John	From the introduction-- "...Several aspects of the Pacific war fascinated or frustrated. One was the 'turning point' of World War II in the Pacific. It seemed almost an entrenched interpretation among participants and historians that the Battle of Midway in June 1942 represented that decisive event. Japan might as well have surrendered right then. But for a young enthusiast this did not sit right. It did not take a great deal of exploration of the sources to realize that after Midway the military balance still favored the Japanese. The real turning point had to lie elsewhere, and my reading and research eventually supplied convincing evidence that the moment of decision occurred during the campaign for the Solomon Islands in the South Pacific. In roughly a year and a half, starting with the Allied invasion of Guadalcanal and ending in the Allies' siege of the Japanese bastion of Rabaul, the war situation was transformed. Islands of Destiny is my exploration of why and how that happened.

2015.302.036	Stay the Rising Sun : The True Story of USS Lexington, Her Valiant Crew, and Changing the Course of World War II	Keith, Philip A.	Her crew called her the "Lady Lex" - see how her fierce battle turned the tide in the Allies' favor. In May 1942, the United States' first naval victory against the

Object ID	Title	Author	Summary
			Japanese in the Coral Sea was marred by the loss of the aircraft carrier USS Lexington. Another carrier was nearly ready for launch when the news arrived, so the navy changed her name to Lexington, confusing the Japanese. The men of the original "Lady Lex" loved their ship and fought hard to protect her. They were also seeking revenge for the losses sustained at Pearl Harbor. Crippling attacks by the Japanese left her on fire and dead in the water. A remarkable 90 percent of the crew made it off the burning decks before Lexington had to be abandoned. In all the annals of the Second World War, there is hardly a battle story more compelling. Lexington's legacy did not end with her demise, however. Although the battle was deemed a tactical success for the Japanese, it turned out to be a strategic loss: For the first time in the war, a Japanese invasion force was forced to retreat. The lessons learned by losing the Lexington at Coral Sea impacted tactics, air wing operations, damage control, and ship construction. Altogether, they forged a critical, positive turning point in the war. The ship that ushered in and gave birth to a new era in naval warfare might be gone, but fate decreed that her important legacy would live on. (from Amazon.com)
2015.302.037	F6F Hellcat vs A6M Zero-Sen, Pacific Theater 1943-44	Young, Edward M.	The Grumman F6F Hellcat and Mitsubishi A6M Zero-sen were the two principal opposing fighters in the brutal aerial clashes of the Pacific War from 1943 onwards. Reminiscent of the preceding F4F Wildcat, the F6F Hellcat was designed specifically to counter the earlier A6M2 Zero-sen, the strengths and weaknesses of which became fully understood by US designers after an undamaged example was

Object ID	Title	Author	Summary
			recovered in the Aleutians. The powerful Hellcat had an impressive top speed, rate of climb and armament, and it retained its predecessor's incredible ruggedness. The A6M5 Zero-sen was also born out of an earlier type, but was intended merely as a stop-gap until more modern Japanese fighters could be produced to restore performance parity with Allied aircraft. The chaotic conditions of the Japanese Aircraft industry and war economy prevented new types from being built. Featuring detailed artwork illustrating the technical specifications of these two types and the dramatic encounters between them, this volume focuses on how these iconic fighters came into being, and how they fared as they faced one another over the Pacific skies of World War II. BIOGRAPHICAL NOTE Edward Young is a retired financial executive with degrees in Political Science from Harvard University and the University of Washington. During his career he held assignments in New York, London, Tokyo and Hong Kong. He has written a number of books and numerous articles on aviation and military history. 2015.302.038	SB2C Helldiver in Action	Doyle, David	The Curtiss SB2C Helldiver served the U.S. Navy as a carrier-based dive bomber during the last two years of World War II. Intended to replace the much smaller Douglas SBD Dauntless and tasked with meeting demanding requirements, the Helldiver suffered from numerous difficulties in its development stage. An initial prototype crashed less than two months after its first flight, and a second prototype crashed two months after it first took to the air. Improvements were made, however and after 880 modifications demanded by the U.S. Navy, the SB2C entered combat with squadron VB-17 aboard the Bunker Hill during the attack on the Japanese-held port of Rabaul north of New Guinea on 11 November 1943. The aircraft was not well liked by air crews, however, due to its large size, heavy weight, and lateral instability. During the Battle of the Philippine Sea in June 1944, 45 Helldivers ran out of fuel and were lost before they could return to their carriers. More modifications ensued and the more powerful SB2C-3 made its appearance, equipped with the R-2600-20 Twin Cyclone engine and a Curtiss four-blade propeller, in 1944. Helldivers helped sink the battleship Musashi in October 1944 and, in April 1945, sent the battleship Yamato to the bottom of the ocean – the two heaviest and most powerfully armed battleships ever built. 194 photos, many in color, 80 pages.
2015.302.039	Vietnam Combat : An Attack Pilot's Diary : The Four Freedoms Betrayed	Leue, David E.	As a very young man, Captain Leue' prayed to be a fighter pilot. He cautions you be careful what you pray for. Instead of the promised peace after WWII, he flew a hundred missions in Corsairs and F9F Panthers from USS Boxer, Valley Forge and Philippine Sea, dodging red balls of fire

Object ID	Title	Author	Summary
			over Korean. These tales are recorded in Volume 1, "Korean Combat." Now, in Vietnam, you are in his A4C Skyhawk cockpit as he dives through flak and missiles, surviving over two hundred more combat missions. In this volume, he leads Navy Light Attack Squadron 153 as Executive Officer and Commanding Officer, flying from the carriers USS Coral Sea and Constellation. His Light Attack Squadron loses many of its aircraft and pilots, all close friends, to massed anti-aircraft fire and missiles. His tales of personal combat are masterfully woven into the political drama and tragedy of Vietnam. Contents: Preparing for Command USS Coral Sea USS Constellation, CVA-64 Patrol Torpedo Boats (PT's) The Blue Tails Last Battles
2015.302.040	Korean Combat : The Four Freedoms Betrayed : A Fighter Pilot's Diary	Leue, David E.	A Fighter Pilot's Diary The Four Freedoms Betrayed Instead of the promised peace and the Four Freedoms, the post WWII generation was sentenced to a lifetime of battles for freedom in foreign lands. Beginning in Korea then later in Vietnam, our adversary was our WWII ally, Soviet Russia. Some called this the "Cold War." These hot battles had a similar origin, President Franklin Delano Roosevelt's embrace of Joe Stalin. Capt. Leue' tells of his journey from a naive teenager through the perils of naval flight training to combat veteran in Korea. He tells of the loss of countless shipmates along the way. He relates his frustrations over the firing of General MacArthur, fighting in battles that the country had determined we would not win, (however, you could die) and the realization that these wars were totally unnecessary. Why hadn't we defeated the Communists with the Nazis in WWII instead of arming them?

2015.302.045	Harnessing the Sky : Frederick "Trap" Trapnell, the U.S. Navy's Aviation Pioneer, 1923-52	Trapnell, Frederick M.	Vice Admiral "Trap" Trapnell has been called 'godfather of naval aviation.' His "leadership in flight testing paved the way for the U.S. Navy air supremacy during World War II and for modern carrier aviation in the second half of the century." Contents Dark storm eastward: Naval Air Station Anacostia, D.C., November 15, 1940 -- The launching, 1902-1925 -- Naval aviation 1911-926, historical interlude -- Fighter pilot, 1926-1929 -- Test pilot: learning the craft, 1930-1932 -- Airship carriers, 1932-1933 -- Scouting and patrolling, 1934-1940 -- Naval aviation 1930-1940, historical interlude -- Chief of Flight Test, 1940-1941 -- The desperate gamble, November 1940 -- Flight test at war, 1941-1943 -- High noon in the Pacific, 1943-1945 -- The challenge, 1946 -- The quest, 1946-1950 -- Harnessing the jets, 1946-1949 - - Turmoil, 1949-1952 -- Legacy - - Epilogue: The new guard.
2015.302.046	USS Valley Forge (CV-45) - Atlantic Fleet - 1953-1956	Packard, Edward B.	A pictorial account of the activities of the USS Valley Forge (CVA/CVS-45) from July 1953 to March 1956. She departed San Diego in July 1953 with crew's automobiles embarked for a change of homeport to Norfolk via the Panama Canal. Shortly after arriving in the Atlantic Fleet she entered Portsmouth Navy Yard for a conversion from CVA to CVS and the associated ASW mission. A post-conversion shakedown cruise took place between February and April 1954. Haiti was a port of call on this cruise. A midshipman cruise occurred in the summer of 1954, with Halifax as a port of call. She deployed to the eastern Atlantic and Mediterranean between 7 September and 11 November 1954. Port visits on this deployment included Belfast and Barcelona. Squadrons

Object ID	Title	Author	Summary
			emabrked were VS-39 (AF-2S/2W) and VC-4 Det. (AD-3Q). The ship was underway again between January and March of 1955 and participated in Operation Springboard in the Caribbean in this period. Port visits included St. Thomas and Kingston. Squadrons emabrked were VS-26 (S2F-1), VS-36 (S2F-1), VC-4 Det. 52 (AD-5), HS-1 Det. 52 (HSS-1), and HU-2 Det. 52 (HUP-2). The summer of 1955 saw the ship on another midshipman cruise, with Halifax again featuring as a port of call. Operation Centerboard took place during an underway period in the eastern Atlantic between September and December 1955. The port of Lisbon was visited. Squadrons embarked were VS-26 (S2F-1) VS-36 (S2F-1), VC-4 Det. (AD-5), HS-1 Det. (HSS-1) , and HU-2 Det. (HUP-2). The ship paid a call on New York City in January 1956 that was followed by exercises in the Carribean. Here port calls included St. Thomas in February and Panama in March.
2015.302.047	USS Yorktown (CVS-10) - Silver Anniversary 25 Years : Once More Southeast Asia Greets The Fighting Lady - 1968	Johnson, Mike (ed)	A 25th (Silver) anniversary pictorial account of the deployment of the USS Yorktown CVS-10 (The Fighting Lady") to the Western Pacific in early 1968. She departed Long Beach, CA on 28 December 1967 and returned to Long Beach on 5 July 1968. Initally was to relieve the Kearsarge (CVS-33), but was ordered to the Sea of Japan off Korea, likely in response to the "Pueblo" incident. Ports of call: Pearl Harbor, HI; Subic Bay, the Philippines; Japan (ports not specified); Hong Kong; Singapore. Embarked: CVSG-55 (Carrier Air Anti Submarine Group 55) consisting of VS-23 "Black Cats" (S-2F Trackers), VS-25 "Golden Eagles" (S-2F Trackers), HS-4 "Black Knights" (SH-3 Sea Kings), VAW-11 Det 10 "Early Elevens" (E-1B Tracers)

Object ID	Title	Author	Summary
2015.302.048	Recollections of a Marine Attack Pilot	Gibson, Larry R.	From the foreword: "This is not a narrative of my military career. Instead, it consists of fifty-eight separate stories, as I call them, presented in order in which they occurred. Each story stand alone as an anecdote or description of some event I consider reasonably interesting or noteworthy. These events occurred between thirty and fifty years ago. I had no written notes and have depended upon my memory for the contents and details of these stories. All events occurred as I describe them or at least as best as I can remember them. At the same time, they are subject to occasional minor inaccuracies due to the passage of time or due to my inability to describe them with the accuracy they deserve."
2015.302.049	Sky is my Witness, The	Moore, Thomas	Captain Thomas More, Jr, USMCR wrote this book in 1943 after he returned to his home in Brooklyn, New York. He was recovering from wounds received while serving as Marine combat pilot in the South Pacific, fighting at Midway and Guadalcanal. He wrote as a way to deal with the stress and trauma of his war time service. "We who have fought do not asked to be hailed or wreathed in our battles. We ask for something more. We ask for something to come back to."
2015.302.050	F4U-1 Corsair, Vol. 1	Bell, Dana	A quick review of early variations of the Birdcage Corsair is covered: the British Fleet Air Arm Mk. I, the photo-Corsair and Night Fighter. A few pages later we learn that final product of the three companies making the Birdcage Corsair, Vought, Brewster and Goodyear (the "VBG" group), were virtually indistinguishable from one another. A detailed painting guide and anatomical examination of the F4U-1 "Birdcage" Corsair: an excellent and invaluable resource . An absolute necessity for anyone interested in the "Birdcage" Corsair, and for

			those modeling the aircraft. Includes information on the following: F4U-1 Corsair --History. 1938--Vought XF4U-1 1942--F4U-1 1941--Brewster F3A-1 1943--Vought Birdcage F4U-1
2015.302.051	F4U-1 Corsair, Vol. 2	Bell, Dana	Author continues history of the Corsair with the development of the raised cockpit Corsair to deal with problems presented in the - 1 "Birdcage". He goes on to note the major changes to the airframe and the issues specific to the other companies that produced the Corsair, Brewster and Goodyear (collectively, the "VBG" group). The specifics of the export Corsairs for both Britain and New Zealand are discussed. Dana proceeds to list serial ranges for Vought, Brewster and Goodyear. Most importantly, Dana gives the serial number and production number for the aircraft from each company at which point a factory change was made. This includes aircraft that went to the British. Now you will know if the particular Corsair you are modeling had the new right side fuselage handgrip! Anatomical examination of the F4U-1A / C / D Corsairs. Discussion of FAA Corsairs and painting guide. Serial numbers and factory changes. An absolute necessity for anyone interested in the "Birdcage" Corsair, and for those modeling the aircraft. contains information on Vought F4U-1 Corsair--History. 2015.302.052	F4F Wildcat and F6F Hellcat Aces of VF-2	Cleaver, Thomas McKelvey	From the Introduction: "The four US Navy fighter squadrons that have carried the designation 'Fighting Two' (VF-2) over the years form a tradition that reaches back to the very beginning of American carrier aviation. The original 'Fighting Two' was the U.S. Navy's first carrier fighter squadron. The second, the famous 'Flying Chiefs' was instrumental in developing the pilots, aircraft, strategy and tactics that would lead to victory in the Pacific War, and participated in the Battle of the Coral Sea, history's first naval battle in which opposing fleets never came within sight of each other. The third 'Fighting Two' became the fourth highest-scoring U.S. Naval fighter squadron of the war, seeing action in the Battle of the Philippine Sea--an engagement that effectively destroyed Japanese carrier-based aviation for the remainder of the war. No fewer than 28 pilots achieved ace status during their tour of combat with VF-2 in 1943-44--an American record that remains unbroken, and likely never be challenged in the future. Chronicling their story has been a privilege. The fourth 'Fighting Two', which is operational today flying F/A-18F Super Hornets as VFA-2, stands at the forefront of naval attack aviation. Indeed, it has participated in almost every American military action since the end of the Korean War."
2015.302.053	F-4B/N Phantom II	Clayton, I. B. (Pete)	Some aircraft are remembered for the large number produced, others for their length of time in service, and others for their performance. When on aircraft is a standout in all three categories, it is extraordinary. The McDonnell F-4 Phantom II is such an aircraft. This pictorial volume depicts fleet Phantoms. Pages 24-31 show Air Wing Two - NE, Pacific Fleet, VF-21 and VF-154 and Pacific Fleet Air Wing Five -

			NF, VF-151 and VF-161 on the USS Midway.
2015.302.054	Japanese Aircraft Carriers Soryu and Hiryu, The	Skwiot, Miroslaw	Translated from Polish. Discusses terms of Washington [Naval] Treaty [of 1922]. The treaty limited the type and number of ships that Japan could build. Discusses development of Japanese aircraft carriers in general, and Soryu and Hiryu in particular. Both carriers were lost at the Battle of Midway in 1942. There are six pages devoted to armament, and the last part of the book is about operational service of the Soryu and Hiryu. Lists naval engagements and has 8 colored plates of planes that flew off the carriers.
2015.302.055	USS Bennington (CVA-20) - 1957-58	Gillette, Donald R. (ed)	Pictorial account of the Essex-class aircraft carrier USS Bennington (CVA-20)'s operations from July 1957 to July 1958. Ports of call: San Diego, CA (home); San Francisco, CA, Honolulu, HI. Embarked aboard was Air Task Group One which consisted of VF-52 (F2H Banshees), VA-151 (FJ-3/4 Furies), VAW-35, VA-196 (AD/A-1 Skyraiders), VFP-61 (F9F-6/7/8P Cougars), and VAW-11.
2015.302.056	USS Independence (CV-62) - Showboat 62 - 1961	Hayward, John T. (ed)	Pictorial account of the deployment of USS Independence to the Mediterranean sea in 1961. The ship arrived March 3 in Norfolk, Virginia , from April 3-11 operated off Virgin Capes, from April 17-30 operated in Western Atlantic and Caribbean Sea, from May 5 - June 17 U.S. Naval Shipyard/Norfolk Virgin. Departed Norfolk Virginia on August 4, en route to Mediterranean. Port call included: Cannes, France(August 24-September 5), Athens, Greece (September 19-22), Istanbul, Turkey (September 25-30), Rhodes, Greece (October 5-9), Cannes, France (October 21 - November1), Genoa, Italy (November 7-13), Naples, Italy (November 20-27), Livorno, Italy (December 2-5), Pass Gibraltar (December 11),

2015.302.061	United States Naval Aviation 1911-2014 : Rare Photographs from Wartime Archives	Green, Michael	"This book traces the US Navy's aircraft from humble beginnings into the future when stealth and unmanned aircraft will form the basis for air power at sea. It is important to keep in mind that naval aviation is not just the aircraft and helicopters on carriers., but also land-based aircraft which

Object ID	Title	Author	Summary
			play a critical role in supporting fleet operations." Contents: Title Page; Copyright Page; Contents; Dedication; Acknowledgements; Foreword; Notes to the Reader; Chapter One: Pre-Second World War Aircraft; Chapter Two: Second World War Aircraft; Chapter Three: Cold War Aircraft; Chapter Four: Post-Cold War Aircraft
2015.302.062	Grumman F6F Hellcat, Vol. 1	Szlagor, Tomasz	From the Introduction: "Grumman F6F Hellcat was one of the best fighter aircraft of the World War II era and the most effective fighter of the US Navy. As stated in "Naval Aviation Combat Statistics--World War II", Hellcats of the US Navy and US Marine Corps fighter squadrons, whilst operating from carrier decks and land bases, flew 66,530 combat sorties. Their pilots claimed 5,163 enemy aircraft against the loss of 2,461 own machines, of which only 270 were lost in actual air combat (victory ratio of over 19:1). Regardless of how many of these claims were later confirmed, there is no doubt that Hellcats won complete air superiority over the vast areas of the Pacific, largely contributing to victory over Japan."
2015.302.063	Smooth : The Development and Formation of a Naval Aviator	Landers, Edward	Have you ever wondered just how those steely-eyed stalwart Naval Aviators got to be like that? Do you think they were all born that way? As a matter of fact most of them were just like the kid who grew up next door. This story is about a typical bumbling kid who had to overcome what would seem to be insurmountable obstacles in order to become one of the Navy's elite aviators. It's a tale of how an overweight, out of shape, naive young man with a definite goal for the first time in his life managed to beat the odds in order to fly the Navy's planes. It's a tale of the evolution of a young man from a carefree, non-thinking kid to one of the Navy's more

Object ID	Title	Author	Summary
			accomplished aviators. The story will take you from the young man's first ideas about flying all the way through to the Navy's School of Preflight where the Marine Gunnery Sergeants who are tasked to do so try to whip young minds and bodies into shape. It will continue on to flight training culminating into the three separate squadrons that Ed Kruger served in. Throughout the story the reader is treated to an irreverent, humorous point of view as it relates to the aspiring young pilot who strives to become the polished aviator of his dreams. It's a novel about real people who make real mistakes and errors of judgment, about people who evolve to something better, about solving problems that seem unsolvable, about laughter, tears and the sweat of real life. It's about the urge to excel, to be better tomorrow than you were today. Ed Kruger is a pilot who reacts to things. He is not proactive. He makes mistakes, gets into trouble, weathers adversity and always comes out swinging. Above all, he is human. He's the kid next door and he's a success story. Although this is a novel and is classified as fiction it is taken from the real life experiences of the author. Everything in this book actually happened within the time period encompassed in the book. The reader will not only be treated to a very realistic view of Navy pilots who flew in the 1960-1970 era but will enjoy the humor that runs throughout the story. The book will not only

Object ID	Title	Author	Summary
			conducted carrier qualifications with Marine Air Group 15. Shortly after on 8 July 1951 she deployed to the western Pacific and conducted operations in support of United Nations forces in Korea. She returned to San Diego from that deployment on 22 DEC 1951. 3 January 1952 saw a change of command. Workups and exercises of various types were conducted off the U.S. west coast for the first half of 1952. She had a shipyard availability in San Francisco during the month of August. Between 16 September and 22 November she transited and returned from the South Pacific where she conducted Top Secret operations. Upon return she entered Long Beach Naval Shipyard for a 4-month overhaul. Onboard: Commander Carrier Division Fifteen (ComCarDiv-15) VS-23, VS-931 VS-871 VMF-235 VS-21
2015.302.066	USS Lexington (CVA-16) - 1965	Browne, R. Franklin, Jr. (ed.)	Pictorial account of the history of the USS Lexington CVA-16 and its activities and crew in 1965. Since late 1962 Lexington had been the designated carrier qualification training ship at Pensacola. Recent activities included a port visit to New Orleans in 1964 and hosting of Miss Pensacola Navy and sister beauty pageant contestants. Loose leaf enclosures include Welcome Aboard folder containing pamphlet and b&w ship photos, and franked letter dedicated to the ship's 152,000th arrested landing.
2015.302.067	United States Naval Aviation 1910-2010, Volume I : Chronology	Evans, Mark L.	Volume 1 documents the people and events that proved crucial to naval aviation's history. We also have a .pdf at 2017.317.009 in Emanuals. It presents the data in

Object ID	Title	Author	Summary
			chronoloical order. Chapter 1 covers 1898 - 1916. Chapter 2 covers 1917-1919. Chapters 3 through 13 cover 1920 to 2010 in ten year increments. Indices provide Aircraft by Designation, Aircraft by Name, Missiles and Rockets, Ships, U.S. Military Units, Individuals, and General. USS Midway has 55 entries in the index for Ships.
2015.302.068	US Navy Carrier Aircraft vs IJN Yamato Class Battleships : Pacific Theater 1944-45	Stille, Mark	The Washington Naval Treaty of 1922 set battleship limits on the 5 major naval powers. Against its will, Japan was limited to an inferior position of being able to have three battleships for every five battleships owned by Great Britain and the United States. At that time, the battleship was seen as the apex weapon for sea battles. Between 1922 and 1939-1941, the aircraft carrier emerged a competitor to the battleship for supremacy at sea. (Both the carriers and the planes they carried improved remarkably during the interwar and war years.) By 1944, the Japanese had lost its aircraft carriers and the two huge Yamato class battleships (built in 1937 in defiance of the Washington Naval Treaty) were its remaining capital assets. Japan committed both of these assets in defense of the Philipines in October 1944. Bombers sank the Musahi in 1944 and the Yamato in April 1945.
2015.302.069	United States Naval Aviation 1910-2010, Volume II : Statistics	Grossnick, Roy A.	Volume 2 of 2 provides many statistics via tables not suitable for a chronological approach. We also have a .pdf at 2017.317.010 in Emanuals. It is divided into seven parts: Aircraft; Personnel; Units; Ships; Deployments; Operations; and Other Actions. Each part is comprised of between two and 13 chapters.
2015.302.070	USS Badoeng Strait (CVE-116) - Operation Hunter Killer - 1955	Harkins, R. E. (ed)	Pictorial account of the Commencement Bay-class escort carrier USS Badoeng Strait (CVE-116)'s fourth Far East cruise from 21 April to 1 October 1955 with Carrier

Monograph describing concept for the proposed Martin Model 262 convoy fighter, a Naval VTOL (tail-sitter) turboprop aircraft that could be launched in the vertical position from almost any (non-carrier) surface ship.
2015.302.073	USS Princeton (CV-37) - Far Eastern Cruise - 1956	Schwartz, H. L. (ed)	Pictorial account of the USS Princeton (CV-37) cruise to the Far East. She departed San Diego on 5 January 1956 and returned in August 1956. Also includes pictures from her time in San Diego in 1955. She was on a Hukster cruise (submarine hunter killer). Items of interest and ports visited: contains about 30 pages with photos of how the HUK works; has history of the 5 ships named Princeton; used in a Hollywood film about the USS Franklin; pictures of party at El Cortez ballroom, San Diego, with Katherine Grant and Charlie Barnett's band; Ladies Day 2 December 1955; Pearl Harbor, Hi; took part in Operation Firmlink; Bangkok, Thailand; Yokosuka, Japan; Manila, Philippines; Subic Bay, Philippines; Buckner Bay, Okinawa; Kure, Japan; Keelung, Formosa; Sasebo, Japan; Hong Kong. Onboard: Commander Carrier Division Seventeen (ComCarDiv -17) VS-20 (S2F-1) VS-21 (S2F-1) HS-2 Det. N (HO4S)
2015.302.074	USS Ticonderoga (CV-14) - Far East Cruise - 1964 - Volume 3 - Ship's Company	None Stated	Pictorial list of the ship's company including names of each crew member of the aircraft carrier USS Ticonderoga (CV/CVA/CVS-14)'s Far East cruise starting 14 April 1964 from San Diego and returning 25 November 1964; This is the third volume in a three volume set; lists each department including the different divisions with in; each department includes a small summary of the at the beginning of the pictures
2015.302.076	Aircraft Carriers of the United States Navy : Rare	Green, Michael	The United States Navy began using aircraft carriers

Object ID	Title	Author	Summary
	Photographs from Wartime		beginning with the USS Langley in 1922. By the 1930s,the Navy had become more comfortable with the use of aircraft carriers, but they were still considered secondary to the battleships. World War II changed that dynamics and the aircraft carrier became the primary source of naval power. "At a time when the US Navy was still trying to figure out how to operate multiple carriers in a single formation and whether it was even desirable under wartime conditions, the Imperial Japanese Navy had created a revolution in naval warfare by combining all its carrier fleets into a single formation. The striking power of this unit was unsurpassed...." The carrier, as the centerpiece of the U.S. Navy, as remained unbroken to the present day. Photo of tugs pushing the USS Midway to its new home in 2004 shortly before the ship opened as a floating museum on page 109.
2015.302.077	Goodyear GA-28A/B Convoy Fighter : The Naval VTOL Turboprop Tailsitter Project of 1950 View Larger Image Goodyear GA-28A/B Convoy Fighter: The Naval VTOL Turboprop Tailsitter Project of 1950	Zichek, Jared A.	In 1950, the U.S. Navy, anticipating that the Soviets, if the Cold War ever turned hot, might attack convoys like the Germans did in WWII, held a competition for a vertical take off and landing plane to protect convoys. The Goodyear GA-28A/B Convoy Fighter was one of the submissions for that competition. The GA-28A was a three-quarter scale prototype of the convoy fighter, while the GA-28B was the full scale design armed with four 20 mm cannon. Both were VTOL tailsitters powered by turboprop engines and featured a semi-delta, semi-midwing configuration with triple vertical tail surfaces. The aircraft also had unusual landing gear which permitted either conventional or vertical landing and takeoff.
2015.302.078	SBD Dauntless in Action	Doyle, David	Though not the U.S. Navy's first, largest, or fastest dive bomber, the SDB Dauntless is certainly the best known. During the early days of World War II, the SBD was the navy

Object ID	Title	Author	Summary
			carrier force's offensive workhorse. The navy torpedo bomber of the time, the TBD, was almost laughably obsolete even before Pearl harbor. The F4F Wildcat, far ahead of its predecessor, the Brewster Buffalo, was not in the same league as the Japanese Zero. Yet the SWOPPED, together with the TBD and F4F, made up the bulk of the fleet's aerial fighting force. The SBD acquitted itself well at the battles of Coral Sea, and Midway, and off North Africa in Operation Torch, and in a host of other engagements--soldiering on until the end of the war, despite the fact that its successor, the Curtiss Helldiver, had already entered service.
2015.302.079	Pinky	Hook, Franklin	An expansion of the diary of a World War II Ace, LTjg Francis "Pinky" Register. He became an Ace at Guadalcanal and died in a crash on Attu Island on 15 May 1943.
2015.302.080	One Man's War	Allison, Robert	A personal narrative of a Navy pilot in the Pacific in World War II. It takes the reader from the author's days as a civilian at the bombing of Peral Harbor through enlistement and flight training and numerous campaigns in the Pacific.
2015.302.081	Douglas F-3D Skyknight	Fernandez, Jose	Describes the design, development and operation of the Douglas F3D Skynight aircraft. Color photos, color schemes and markings.
2015.302.082	Kamikaze Hunters, The : Fighting for the Pacific, 1945	Iredale, Will	In May 1945, with victory in Europe established, the war was all but over. But on the other side of the world, the Allies were still engaged in a bitter struggle to control the Pacific. And it was then that the Japanese unleashed a terrible new form of warfare: the suicide pilots, or Kamikaze. Drawing on meticulous research and unique personal access to the remaining survivors, Will Iredale follows a group of young men from the moment they joined up through their initial training to the terrifying reality of fighting against pilots who, in the cruel last summer of the war, chose

Object ID	Title	Author	Summary
			death rather than risk their country's dishonourable defeat and deliberately flew their planes into Allied aircraft carriers. A story of courage, valour and dogged determination, The Kamikaze Hunters is a gripping account of how a few brave young men helped to ensure lasting peace.
2015.302.083	Inside the Iron Works : How Grumman's Glory Days Faded	Skurla, George M.	George M. Skurla, the former president and chairman of Grumman Aerospace, and William H. Gregory provide an inside view of the triumphs and disappointments of America's one-time top aerospace contractor.

			those in peril on the sea.
2015.302.089	History of U.S. Coast Guard Aviation, A	Pearcy, Arthur	When the Wright brothers launched their first plane on December 17, 1903 at Kitty Hawk, NC, extra muscle was provided for the prelaunch activities by the surfmen from the Kill Devil Hills Life Saving Station. However, the Coast Guard did not actually have planes to fly until 1915 when "Lieutenant Elmer Stone and Normal Hall conceived the idea of using aircraft for Coast Guard missions. With the backing of their commanding officer they approached the Curtis Flying School in Newport News, Virginia, discussed their idea and were taken on experimental flights in the school's aircraft... In April 1916, Elmer Stone and five others were assigned to the Naval Aviation School in Pensacola, Florida for pilot training. Norman Hall was sent to the Curtiss factory to study aeronautical engineering. Later in 1916, Congress authorized the Coast Guard to establish ten air stations but no money was appropriated and the efforts were stillborn." After this abortive start, the Coast Guard aviation has evolved as has the mission of the Coast Guard. From its original peace time role of Search and Rescue, the roles have expanded to include International Ice Patrol (following the sinking of the Titanic), pollution patrols to see that the waterways remain free of oil and other toxic chemicals, and drug interdiction. The venerable amphibious airship has been replaced by helicopters and maybe eventually by tiltwing aircraft.
2015.302.090	F-14 Bombcat : The U.S. Navy's Ultimate Precision Bomber	Holmes, Tony	The iconic Cold War Grumman F-14 Tomcat "attained cult status and adoration among those who flew it, wanted to fly it or kept it flying." By the end of the Cold War, the Tomcat needed to morph from a single purpose fighter, if it wanted to continue to compete with the newer, F/A-18 Hornet. Because of its size (the Tomcat was

Object ID	Title	Author	Summary
			the largest fighter to have been sent to sea), the Tomcat was able to turn into the Bombcat-- "the Navy's ultimate precision bomber." This extended the life of the venerable Tomcat through Operation Iraqi Freedom when the last Tomcat flew its mission in September 2006. Single issue periodical traces the history of the Bombcat from its early development at the end the Cold War, through its testing stages over Bosnia, how it was improved with the addition of the LANTERN targeting pod, and its roles in Operation Southern Watch, the Balkans, Operation Enduring Freedom, and Operation Iraqi Freedom I-III.
2015.302.091	USS George Washington (CVN-73) - Freedom Isn't Free! - 2011	Hecht, Dave (ed)	Pictorial account of the 2011 deployment of the USS George Washington from Yokosuka, Japan in June 2011 and concluded with its return on November 22. Ports of call included Sasebo, Japan; Pattaya, Thailand; Pusan, Korea; Singapore, and Hong Kong. The ship participated in Talisman Sabre, an exercise to train and validate the U.S. and Australian joint task force in crisis planning and their ability to conduct contingency operations. Three months later, George Washington then teamed up with Japan for Annual Exercise 2011 which allowed the two nations to practice and evaluate coordination procedures and interoperability elements required to effectively and mutually respond to the defense of Japan, a regional crisis or contingency situation in the Asia-Pacific region. Items of Interest include Letter from the CO, About the Ship, About Carrier Air Wing FIVE, Chain of Command, USS George Washington's Birthday, General Quarters, Replenishment at Sea, Wog Day, Sasebo, Japan; Pataya, Thailand, Pusan, South Korea, Singapore, Hong Kong, CPO Pinning, Steel Beach Picnic, Friends and Family,

2015.306.001	Tale of Two Carriers, A : USS Midway and USS Hornet	Howser, Huell	A 1-hour look at two amazing ships, USS Midway and USS Hornet, with popular PBS host Huell Howser. (from www.calgold.com:) California's Gold #134 - AIRCRAFT CARRIERS California has a rich maritime history and has been at the forefront of naval warfare since the beginning. In this special one-hour adventure, Huell visits two aircraft carriers that are now museums in the waters of California.First it's off to San Diego to visit the USS Midway, which has steamed through a 47-year career of service. Imagine a carrier that was commissioned in 1945 and served as a flagship in Desert Storm in 1991. No other carrier served as long as the USS Midway. She opened in 2004 as a naval aviation museum and is now the pride of San Diego's waterfront.Next it's off to Alameda to visit the carrier USS Hornet that is a national treasure, having participated in two of the greatest events of the 20th century -- World War II and the Apollo 11 manned space mission. This floating museum even has the Airstream trailer that the Apollo astronauts lived in for three days after returning to earth. USS MIDWAY 619-544-9600 USS HORNET 510-521-8448
2015.306.002	Inside Midway	USS Midway Museum	Description: A look back at the longest-serving carrier in U.S. navy history, and an exploration of the San Diego Aircraft Carrier Museum.

Object ID	Title	Author	Summary
			From Back Cover: Welcome aboard the USS Midway, the longest-serving carrier in the U.S. Navy history. This veteran carrier began her distinguished career in 1945 and was home to over 225,000 sailors over 47 years, she was a city at sea, continually at the tip of the sword in America's defense. Documentary. Bonus features include: English, Spanish and Japanese narration and subtitles; "Crossing the line" documentary; Bringing the USS Midway to San Diego; San Diego Aircraft Carrier Museum information; USS Midway slide show; downloadable screen-savers and photographs.

2015.307.003	Composite Squadron Twenty One : Loose Ends	Patton, John B. (ed)	Pictorial history of Composite Squadron Twenty One (VC-21). The squadron was formed on 30 October 1943 in Seattle, WA. The narrative follows their training, and their deployment on the USS Marcus Island (CVE -77). Some of the training took place at Brown Field in San Diego. They saw action at Leyte, Palau, Mindoro and Sulu Sea, and Luzon. They headed for home on 25 February 1945. The book contains pictures of the squadron, a Memoriam page, candid shots, and many cartoons.
2015.307.004	USS Saint Paul (CA-73) - The Fighting Saints - 1954	Widner, Ralph R.	This book is also available online at: http://www.uss-saint-paul-ca73.com/cruisebook1954.htm. Pictorial account of the deployment of the USS Saint Paul (CA-73) to the Far East. She departed Long Beach on 4 May 1954 and returned in November. Ports of call and items of interest: Hawaii, Yokosuka, Yokohama, Beppu, Toyama, Sasebo, Pusan, Kure11, Okinawa, Hokarate, Keelun (Formosa), Hong Kong (China). From the CA-73 website: http://www.uss-saint-paul-ca73.com/The%20Fighting%20Saint.htm On May 4, 1934, SAINT PAUL returned To the Western Pacific. As flagship for Commander Seventh Fleet, she ranged along the entire eastern coast of Asia, going from one "trouble spot" to the next. When the Chinese Communists threatened the Nationalist Chinese islands of Tachin and Quemoy, SAINT PAUL and other SEVENTH Fleet units patrolled the area to discourage any ideas of invading Taiwan. Combat duty was only a small part of the cruiser's 1934

Object ID	Title	Author	Summary
			deployment, however. The SAINT and her men made goodwill calls on many seldom-visited Japanese ports: Beppu, Toyama, Hadadato, Mure, and Hiroshima. There were Japanese -American baseball games, several concerts and gifts were even exchanged. During the year SAINT PAUL entertained more than 2,000 Japanese school children on board. On November 18, she left Yokosuka to return to Long Beach.
2015.308.001	USS Midway (CV-41) - Movin' West - 1974	Hughes, Ken (ed)	Pictorial account of the change of homeports of USS Midway (CV -41) from Alameda, CA to Yokosuka, Japan in 1973 and other activates the ship engaged in through at least September 1974 when Midway entered the shipyard in Yokosuka. The ship departed the San Francisco Bay area on 11 September and arrived at Yokosuka on 5 October. No significant operations or exercises were noted other than a period of Refresher Training. Port calls in the period included, Hawaii, The Philippines, Hong Kong and Pusan. Four pages of Frank Sinatra visit to the Midway on 5 July 1974.
2015.309.001	Cruise Books of the United States Navy in World War II : A Bibliography	Mawdsley, Dean L.	Cruise books produced by ships and other naval units are of major value for their research. Informal and nonofficial in nature, these publications offer insights into the daily activities and attitudes of naval people from the perspective of a unit's crew. Contents: 1) Ship Books 2) Naval Aviation Unit Books 3) Naval Construction Unit Books 4) Other Naval Command Books (Amphibious Forces, Coast Guard Units, Naval Medical Facilities, Officer Training, Supply Corps, and Other Commands and Facilities)

2015.310.003	Great American Fighter Pilots of World War II	Loomis, Robert D.	During World War II American fighter pilots ranged fiercely and bravely over most of the seas and continents of the world. They escorted our bombers, protected carriers and land bases and -- whether alone or skillfully teamed together -- they fought to win and hold control of the air, without which no final victory was possible. In "Great American Fighter Pilots of World War II," Robert Loomis presents a vivid, sweeping picture of the war fought by our ace fighter pilots from Pearl Harbor to China, from Casablanca to Berlin. As he moves from theater to theater, from service to service, he recounts the thrilling air battles of such famous pilots as Dick Bong, Don Gentile, David McCampbell, "Pappy" Boyington and Bob Scott. Here is an exciting book which pays tribute to the skill and courage of the American fighter pilot, and dramatizes the important part he played in the overall strategy of the world's greatest war.
2015.310.004	Navy Driver's Handbook	Bureau of Yards and Docks	Provides the Navy Driver an easy to follow guide for the safe and efficient operation of a motor vehicle.

2015.310.009	Buz Sawyer : The War in the Pacific	Crane, Roy	Buz Sawyer was a popular comic strip created by Roy Crane and highly regarded by comic strip historians. Distributed by King Features Syndicate, it had a long run from November 1, 1943 to 1989. The last strip signed by Crane was dated 21 April 1979. During World War II, the adventurous John Singer Sawyer, nicknamed Buz Sawyer, flew as an ace Navy fighter pilot in the Pacific Theater where he had numerous adventures with his sidekick Sweeney. As a civilian in the post-WWII years, Buz became an oil company troubleshooter, traveling to far-flung locales. He married Christy Jameson on December 13, 1948, and their son Pepper was born in 1951. Buz rejoined the Navy in the 1950s and flew carrier-based reconnaissance attack jets over Vietnam during the 1960s. Roy Crane was one of the innovators of the adventure comic strip. Wash Tubbs began in 1924 as a humorous story about the romantic adventures of Washington Tubbs, but increasingly Tubbs became involved in exciting adventures in exotic places. With the creation of the popular soldier of fortune Captain Easy in 1929, the strip became, along with Tarzan of the Apes and Buck Rogers, one of the first adventure strips. However, Crane was an employee of the Newspaper Enterprise Association syndicate, which owned the rights to the Tubbs and Easy characters. Crane approached King Features with an idea for a new strip, and when they offered him

			ownership, he abandoned Wash Tubbs and Captain Easy in 1943, giving full concentration to launching Buz Sawyer. (from Wikipedia)
2015.310.010	Naval Funerals at Arlington National Cemetery	Bureau of Naval Personnel	From the Introduction--"Navy military funerals are based on a few simple customs and traditions. Such funerals are open recognition of the Nation's debt for the services and sacrifices of it Navy men and women. The ceremonial customs comprising the elements of a naval funeral are rooted in ancient naval and military usage. Based upon expedients used on the battlefield, these customs have come to assume a deeper significance than that of mere expediency. The flag that covers the casket today symbolizes the service of the deceased in the armed forces of the United States; the Nation regards the burying of its military dead as a solemn and sacred obligation. The three volleys that are fired, according to ancient belief, were to scare away evil spirits."

2015.310.014	Military Yearbook 1995, The	Fowler, Will	CONTENTS CHAPTER 1: INTO BATTLE: Pages 8-37 The UN has enjoyed success in Cambodia and Western Sahara, but its forces are still embroiled in former Yugoslavia. Terrorism continues in Northern Ireland, Kashmir and the Punjab, while civil wars disrupt life in Georgia and Angola. CHAPTER 2: HARDWARE: Pages 38-55 An infantry unit includes small arms and machine guns, engineers to lay or lift mines and signallers to communicate or intercept enemy signals. Guns may provide light artillery back up while mortars are available at battalion level. CHAPTER 3: AIR SUPERIORITY: Pages 56-73 To engage hostile aircraft, aircraft carry AIM-9 Sidewinder, ASRAAM AIM-32 or AMRAAM AIM-120 missiles. For ground attack they may use cluster bombs or runway cratering munitions, while destroying enemy radars. Among the aircraft capable of carrying these munitions are the vertical takeoff BAe Harrier and Hawk, and the Macdonald [sic] Douglas T45 Goshawk trainer and attack aircraft.

Object ID	Title	Author	Summary
			CHAPTER 4: SEA POWER: Pages 74-91 Ships are vulnerable to attack from sea-skimming missiles, aircraft, torpedoes or mines. Some of these are air delivered or submarine launched; others can be used in ship versus ship engagements. CHAPTER 5: FIFTY YEARS AGO: Pages 92-111 The war had swung against Nazi Germany with the Soviet victory at Kursk, Allied landings in Italy and the D-Day landings in Normandy. In the Pacific the US Navy scored major victories in the Philippines and Leyte Gulf against the Japanese. CHAPTER 6: POLITICS OF POWER: Pages 112-25 [sic] Power politics includes the ability of totalitarian leaders to manipulate the media. In the Middle East the media have followed the peace negotiations with the PLO and Israel, and the world has watched Libya with suspicion. Germany and Japan have become involved in international peace-keeping, and Indonesia has become an important force in the Pacific.
2015.310.015	Tears Before the Rain : An Oral History of the Fall of South Vietnam	Engelmann, Larry	CBS cameraman Mike Marriott was on the last plane to escape from Danang before it fell in the spring of 1975. The scene was pure chaos: thousands of panic-stricken Vietnamese storming the airliner, soldiers shooting women and children to get aboard first, refugees being trampled to death. Marriott remembers standing at the door of the aft stairway, which was gaping open as the plane took off. "There were five Vietnamese below me on the steps. As the nose of the aircraft came up. because of the force and speed of the aircraft, the Vietnamese began to fall off. One guy managed to hang on for a while, but at about 600 feet he let go and just floated off -- just like a skydiver... What was going through my

Object ID	Title	Author	Summary
			head was, I've got to survive this, and at the same time, I've got to capture this on film. This is the start of the fall of a country. This country is gone. This is history, right here and now." In "Tears Before the Rain," a stunning oral history of the fall of South Vietnam, Larry Engelmann has gathered together the testimony of seventy eyewitnesses (both American and Vietnamese) who, like Mike Marriott, capture the feel of history "right here and now." We hear the voices of nurses, pilots, television and print media figures, the American Ambassador Graham Martin, the CIA station chief Thomas Polgar, Vietnamese generals, Amerasian children, even Vietcong and North Vietnamese soldiers. Through this extraordinary range of perspectives, we experience first-hand the final weeks before Saigon collapsed, from President Thieu's cataclysmic withdrawal from Pleiku and Kontum, (Colonel Le Khac Ly, put in command of the withdrawal, recalls receiving the order: "I opened my eyes large, large, large. I thought I wasn't hearing clearly") to the last-minute airlift of Americans from the embassy courtyard and roof ("I remember when the bird ascended," says Stuart Herrington, who left on one of the last helicopters, "It banked, and there was the Embassy, the parking lot, the street lights. And the

			silence"). Touching, heroic, harrowing, and utterly unforgettable, these dramatic narratives illuminate one of the central events of modern history. "It was like being at Waterloo," concludes Ed Bradley of "60 Minutes." "It was so important, so historical. And today it is still very obvious that we Americans have not recovered from Vietnam.... Nothing else in my lifetime was as important as that -- as important as Vietnam." About the Author Larry Engelmann is a San Jose, California, writer. He is currently writing a book on the boat people of Vietnam. 2015.310.021	Straight Up	Osborn, Phil	"Wings of the Red Star" was a separately-branded series that focused on Soviet Air Force aircraft from World War II to the modern era. It was narrated by actor Sir Peter Ustinov. While generally highly accurate, the series is marred with repeated factual errors where the narrator uses the term 'Russian' where the term 'Soviet' would be correct. For example, the title of the episode 'Russian Giants' is particularly egregious, as the Antonov aircraft profiled therein could only be described as 'Soviet' or 'Ukrainian', never 'Russian'. "Straight Up" - Soviet Vertical Take-off aircraft, including the Yakovlev Yak-38 'Forger' and

2015.313.001	Naval Leadership	Wolfe, Malcolm E.	From Foreword. "The Naval profession becomes more complex with each passing year. New scientific discoveries lead to the development of new weapons system which in turn give navies new capabilities. These in turn, introduce the need for new tactics at sea, and new strategic concepts in the employment of naval forces." "Thus naval officers must always remain flexible in their thinking, readily adaptable to change, and imaginative in the application of new developments to the strengthening of naval capabilities." "There is one element in the profession of arms, however that transcends all others in importance. This is the human element. No matter what the weapons of the future may be, no matter how they are to be employed in war or international diplomacy, man will still be the most important factor in naval operations." "The need for good

Object ID	Title	Author	Summary
			leadership, therefore is the constant actor and in this lies the officer's greatest opportunity for service to his country and to the cause of freedom throughout the world." Arleigh Burke, Admiral, U.S. Navy, Chief of Naval Operations, 1959 Includes bibliography.
2015.313.002	Forgotten War, The : A Pictorial History of World War II in Alaska and Northwestern Canada, The - 1981	Cohen, Stan	This volume presents in detail the naval actions in the Aleutian campaign, the RCAF fighter and bomber commands in Alaska and wartime activities on Annette, Kodiak, Amchitka and Adak islands; and in Seward, along with many other stories and photographs of the war years. Includes bibliographies and indexes
2015.313.003	Pictorial History of Guam. Liberation-1944, The	Farrell, Don A.	From the introduction: "The Chamorro civilization of the Mariana Islands had flourished without external influence, for over 4,000 years. Then, in the sixteenth century, the isolation of this tropical Pacific paradise was shattered by the expanding Spanish empire. In succeeding generations, the islands' Chamorro culture was infused with Spanish Catholicism, and the rebellious male population was virtually exterminated. In 1898, a growing and confident United States usurped the colonial rule of Spain on Guam, largest and most strategic of the Marianas, Forty-three years later, Japan took Guam from the United States, and two and a half years after that America retrieved it." "The primary purpose of this book is to help record the story of the Chamorros and the events that make up the history of their island. Their story is one of survival--of meeting the onslaught of progress while maintaining their unique cultural identity; and, in the present volume of confronting with courage the hardships of occupation and the horrors of war."
2015.313.004	Fighter Pilot : A History and a Celebration	Kaplan, Philip	From Introduction "The fighter pilot is a figure

Object ID	Title	Author	Summary
			unique in the long history of warfare: a man (or nowadays, a woman) who fights single-handedly against an individual opponent and whose success or failure--life or death--depend almost entirely upon his own skills and wits. His only precursors (and they are probably mythological) are the heroes of Homeric Greece and the medieval kings of the Authurian legend." Covers the story of Fighter Pilots from WWI through the Gulf War. Includes information on pilots for US, Great Britain, British Commonwealth, Russia, Germany, and Japan.

2015.313.016	Command of the Seas	Lehman, John F.	(from usni.org) This infectiously readable memoir by the most colorful and controversial Navy Secretary in memory provides the inside story of the origins and battles at home and abroad in building a 600-ship Navy. Young, bright, and ambitious, John Lehman came to office refusing to be just another figurehead. For the six years he served in the Reagan administration, he helped forge an aggressive strategy for achieving maritime supremacy and for rebuilding the U.S. Navy. In this bestselling personal account of those years between 1981 and 1987, he speaks with candor and authority about the ills of the

Object ID	Title	Author	Summary
			military establishment and the struggles and frustrations he encountered. Lehman reveals instances of political intrigue, including his dramatic Oval Office confrontation with Admiral Rickover at the time of the admiral's firing in 1982 and battles within the Pentagon and Congress. His explanation of the administration's new naval strategy has been called the most comprehensive and lucid ever written, and his descriptions of the Navy in combat over Libya, Lebanon, and Grenada are packed with fascinating details that only an insider could know. The bold insights he presents of a critical turning point in the Cold War will continue to inform and, with the addition of new material to this paperback edition, promise to renewed discussion of the role of the U.S. Navy then and into the future.
2015.313.017	New Illustrated Guide to the Modern US Navy, The	Jordan, John	The geographical situation of the United States, separated from Europe by the Atlantic and from the mainland of Asia by the even broader expanses of the Pacific, makes the possession of a strong navy Imperative. The United States Navy is the primary instrument for the projection of American military power and political influence. This guide reflects the organization, warships, weapons, and aircraft of the world's most advanced naval power. Vessels : Aircraft Carriers, Submarines, Cruisers, Destroyers, Frigates, Patrol Combatants, Amphibious Warfare Vessels, Support Ships, Replenish Ships, Weapons and Sensors
2015.313.018	Striking Back : Midway and Guadalcanal 1942	Johnson, Lee (ed)	Midway was one of the most important naval battles in history. Fought from June 3rd to June 5th, barely six months after Pearl Harbor, the United States dealt a devastating blow to the Imperial Japanese Fleet, sinking four of her most powerful carriers and setting

			the stage for the beginning of the empire's downfall. Then, in August, fighting on land began. On what was a virtually unheard-of Pacific island, the U.S. shattered the myth of Japanese invincibility for good when U.S. Marines and Army halted the Japanese advance in it tracks.
2015.313.021	Zero Fighter	Yoshimura, Akira	Japan's Mitsubishi A6M ""Zero"" dogfighter is among the preeminent aircraft of aviation history. Designed in 1937, the Zero set new standards for air-to-air superiority and wreaked havoc first on Chinese and then on American opponents. In this slim history, Yoshimura (Build the Musashi!, 1992) presents the Japanese view of how the Zero ruled the skies for much of WWII, and how, shortly thereafter, these superb fighter planes became obsolete. Early sections of the narrative are heavy on the technology (the publisher claims that Yoshimura invented the ""technohistory"" genre). There is much here that is poignant, though, such as the description of a skilled test pilot mysteriously slipping out of his parachute harness after safely ejecting from a prototype aircraft that exploded in midair. Yoshimura fascinates when recounting how the U.S. ignored early warnings about the Zero from American pilot Claire Chennault, who encountered the remarkable dogfighter while flying for China. He also manages to impart suspense to the oft-told tale of Japan's surprise attack on Pearl Harbor, which occurred three years to the day before an earthquake ravaged the Nagoya Aircraft Works, where the Zeros were built--an event that, here, presages not only the end of the war but also the close of Yoshimura's knowledgeable history.
2015.316.001	Miracle of Dunkirk, The	Lord, Walter	On May 24, 1940, the British Expeditionary Force was pinned in at the French port of Dunkirk, Over 400,000 Allied troops were surrounded by

			the advancing German armies. By June 4, over 338,00 of them were safely returned to England by a ragtag flotilla of yachts, fishing boats, ships, sailboats and other assorted vessels. Although the soldiers had to leave much of their equipment behind, the volunteer flotilla managed to snatch victory from the jaws of almost certain defeat.
2015.317.001	Marines, The	Simmons, Edwin Howard (ed)	Aims to be the most beautiful and comprehensive word-and-picture book ever about the United States Marine Corps.
2015.317.002	Illustrated Encyclopedia of Helicopters, The	Taylor, Michael J. H.	Looks at every aspect of helicopter flight and explores its latest planned use in air to air combat.. Coffee table-type book.
2015.317.003	Milestones of Manned Flight : The Ages of Flight from the Wright Brothers to Stealth Technology	Spick, Mike	Manned flight is "controlled flight in a powered, heavier-than-air machine. This immediately eliminates glider (bar those of the Wrights early work), balloons, and airships." Within these guidelines, manned flight occurred in a "space of a mere 90 years, nine decades packed with incident. This book spotlights the significant happenings; the events which led ever onwards, the milestones along the way. Man has long passed beyond the boundaries of Earth and entered space, but that part of the story must be told elsewhere."
2015.317.004	Chopper : Firsthand Accounts of Helicopter Warfare, World War II to Iraq	Dorr, Robert F.	From the jacket cover --"This fully illustrated volume, compiled by military historian and aviation expert Robert F. Dorr, presents the history of helicopter warfare with firsthand accounts from the pilots who flew them and the soldiers they transported. Filled with photos and featuring detailed structural and weapon capacities of each profiled bird, Chopper is an indispensable look at how the helicopter changed the face of warfare."
2015.318.001	Flight : A Pictorial History from the Wright Brothers to Supersonic	Taylor, John W. R.	A pictorial history of flight from the age of myth into the 1950's. Originally published under the title of "A Pictorial

2015.318.003	Civil War Naval Chronology, 1861-1865. Part II - 1862	Naval History Division, Navy Department	Part II of a 6 part series on the Naval Chronology of the Civil War. Missing Part III-1863 and Part V-1865. From the Summary -1862, "The year 1862 witnessed some of the most dramatic and significant sea action in the naval history. Although the forces involved were often small, operations afloat, during this year, and particularly the first six months, may well be called deciding factors in the final outcome of the Civil War. On the western water, the Union strategy to reopen the Mississippi to the trade of the Middle West and to knife into the core of the Confederacy along this all important artery reached crescendo. Flag Officer Foote's gunboats captured strategic Fort Henry on the Tennessee River and joined General Grant to reduce Fort Donelson's on the Cumberland, forcing Confederate withdrawal along a broad front. Columbia, Kentucky, the "Gibralter of the West," had to be evacuated and Foote's squadron plunged relentlessly into the Souther's heart of Island No. 10, Fort Pillow and Memphis, sweeping before it the valiant but outgunned confederate naval force under Captain Montgomery. Control of the rivers meant control of operations with decisive and far reaching effects."
2015.318.004	Civil War Naval Chronology, 1861-1865. Part 1 - 1861	Naval History Division, Navy Department	Part 1 of a 6 part series on the Naval Chronology of the Civil War. Missing Part III-1863 and Part V-1865. This section focuses on 1861. The use of Naval forces was important from the beginning of the War in April 1861, "when the Baltimore riots cut off Washington by rail, Captain Du Pont in Philadelphia and other promptly embarked troops on ships at the head of Chesapeake Bay and from Philadelphia and debarked them at Annapolis to proceed to the beleaguered Capital. This timeliness in employing the advantages of

Object ID	Title	Author	Summary
			the sea may have swayed the balance to save Washington and keep Maryland in the Union." A Joint Policy Committee in Washington (Army, Navy, and Coast Survey) headed by Captain Du Pont, U.S. Navy early settled upon the powerful forces of sea power to crush the South. The decisions of this board helped shape the North's overall strategy of victory, which included: blockade, assault on the Southern Coast and strong points on the Inland Waters, and split the South along the Mississippi and tributaries.
2015.318.005	Civil War Naval Chronology, 1861-1865. Part VI - Special Studies and Cumulative Index.	Naval History Division, Navy Department	Part VI of a 6 part series on the Naval Chronology of the Civil War. Missing Part III-1863 and Part V-1865. From the Introduction;"The close of the Civil War Centennial found our naval chronology at the epochal struggle widely and favorably accepted. The events at sea, which continued long after Appomattox, told their powerful story in our 1865 Chronology, published in the spring of 1965. Thus, it seemed, we had reached journey's end. However, demand and need called for another volume; hence, instead of doubling up the mooring lines with the fifth part as we had intended initially, we have found it necessary to produce an additional volume. The most obvious requirement was for a suitable index covering the preceding published chronologies, 1861-1865. Without it, one has hard gong to follow a sequence of events separated in time (such as the continuing build up to the Battle of Mobile Bay). With an index, students today and in the years to come can explore these seas of information readily." Contains Navy sheet music of the Civil War, Civil War Blockade runners, Civil War Ships salvaged or memorialized. selected quotations relating to seapower in the Civil War.

	1861-1865. Part IV - 1864	Navy Department	the Naval Chronology of the Civil War. Missing Part III-1863 and Part V-1865. This section focuses on 1861. From the Summary-1864: "He who rules the sea rules the world" could well have been said of the Civil War. The year 1864 continued to demonstrate that the rewards are great indeed for a nation that is strong at sea and fate certain and bitter for the weak. Behind the massed big guns of the ships that sped swiftly to the points of decision, the North's Navy and Armies continued to lacerate the South wherever water reached. As 1864 opened, they had already cut the South in two along the Mississippi River, the first giant step 'to divide and conquer'. Other joint operations had captured much of the Confederate coastline and elsewhere had affected widespread destruction. These operations deal cruelly with the South like a double-edged sword. they steadily choked off aid from overseas; and at the same time they destroyed resources so that aid was
2015.319.001	Hero of the Pacific : The Life of Marine Legend John Basilone	Brady, James	"Can a single night define a man's life? From the summer of 1943 to early 1945, John Basilone was one of the most famous and admired people in America. As the first enlisted man to be awarded the Medal of Honor in World War II, for extraordinary bravery under fire at Guadalcanal, he toured the nation with movie stars, shared podiums with mayors and governors, shook the hands of thousands of citizens, and was even rumored to have made a romantic connection with a beautiful young actress. Why would a man who had proven his courage beyond any doubt, who had gone above and beyond the call of duty, and was reaping the rewards of his sacrifice beg his commanding officers to break with tradition and send a Medal of Honor winner back into combat? Legendary columnist James Brady explores this and many

			marine landing force by helicopter, attack aircraft or amphibious vehicle. This ship can operate alone or in conjunction with other units.
2015.325.039	USS Bataan (LHD-5) - Mediterranean, Horn of Africa & Arabian Gulf Cruise - 2007	Lamkin, Tommy	A pictorial account of the deployment of the USS Bataan (LHD 5) during the 2007 Mediterranean - Horn of Africa & Arabian Gulf deployment to begin regular scheduled support of Maritime Operations and Theatre Security Cooperation efforts in the U.S. 5th and 6th Fleet Areas of Operations. The ship departed Norfolk, Virginia on Jan. 4th, 2007 and returned to Norfolk on July 3rd, 2007. Port calls included: Jebel Ali, UAE; Qatar; Kuwait; Marmaris, Turkey; Palermo, Sicily; Bahrain; Jordon; Rota, Spain.
2015.325.040	Freedom at Work, Cruise 2014, USS George H.W. Bush	Shaw, Christina (ed.)	Pictorial account of the deployment of the Nimitz-Class aircraft carrier George H.W. Bush to the Mediterranean Sea and Northern Arabian Sea in 2014. The ship departed Norfolk, VA on 15 FEB and returned to Norfolk on 12 NOV. While deployed the ship supported Operations Active Endeavor, Inherent Resolve, and Enduring Freedom. Its planes participated in the first strikes against ISIS in Iraq and Syria. Port visits included: Marseilles, France; Piraeus, Greece; Antalya, Turkey; Manama, Bahrain; Jebel Ali, UAE; and Duqm, Oman. It was the first time Duqm had hosted an aircraft carrier visit. Commander Strike Group TWO led the task group that included DESRON 22 units USS Philippine Sea, USS Truxtun and USS Roosevelt, COMDESRON 22 was embarked in George H.W. Bush. Carrier Air Wing Eight was also embarked with VFA-15, VFA-31, VFA-213, VAW-124, VAQ-134, VRC-40, HSC-9 and HSM-70. 12,524 sortie were flown during the deployment.

Object ID	Title	Author	Summary
2015.326.001	Neptune's Inferno : The U.S. Navy at Guadalcanal	Hornfischer, James D.	Draws on interviews with veterans and primary sources to present a narrative account of the pivotal World War II campaign, chronicling the three-month effort to gain control of Guadalcanal as a battle that taught the U.S. Navy and Marines new approaches to warfare. Contents: Eighty-two ships -- Sea of troubles -- Fighting fleet rising -- Storm tide -- The thundering.
2015.326.002	Korean Air War, The	Dorr, Robert F.	From the jacket cover "The Korean War has been called the 'Forgotten War'. Actually it was the first open confrontation of the Cold War, and the battles--especially those fought in the air--were as intense and hard-fought as any in World War II. Part narrative history and part oral history, this book presents a serious blow-by-blow accounts of allied air operations from 1950-1953, peppered with dramatic, real-life combat stories told by the American, Australian, British, Canadian, and South African combat pilots who were there. It is also a stunning pictorial record of the pilots and crews, the planes, the nose art and markings, the bases and aircraft carriers. Illustrating, the story are 150 color and 50 black and white photos most of which are personal photo archives of Korean War veterans and are published here for the first time. " Includes bibliographical references (p. 190-191) and index.
2015.326.003	Warships : WWII to the Present Day, Features Seven Views of each Vessel	Dougherty, Martin J.	From the Introduction -- "A naval vessel is more than a fighting platform. It is a symbol of national prestige and a political tool. It can carry out non-military missions such as disaster relief and the rescue of distressed vessels. The existence of a powerful navy can avert war or encourage a diplomatic solution to a conflict. However, the purpose of warships is to fight if necessary, and to this end they need mobility, firepower, and

Object ID	Title	Author	Summary
			the ability to survive at least long enough to engage the enemy." From the book jacket -- "It has wisely been said that the groundwork for victory at sea is laid in procurement and design meetings, when the systems to go into a ship are decided upon and their layouts determined. The creation of an effective warship requires balancing all the relevant factors: armament, defense, sensors, mobility, crew, and support systems. From famous World War II vessels such as the Bismarck and HMS Hood to today's hi-tech naval technology such as the USS Ronald Reagan aircraft carrier and the Chinese Houbei-class missile boat, this book profiles 35 naval vessels from World War II to the present day, including cruisers, amphibious assault ships, aircraft carriers, and destroyers."
2015.326.004	Naval Aviation in the Korean War : Aircraft, Ships and Men	Thompson, Warren E.	The first part of this book covers the role of US aircraft carriers and aircraft in stopping the North Korean initial push to the south and also their role in the famous Inchon Landing and Pusan Perimeter Break out. The last part of the first chapter deals with naval operations during the Marine's Chosin Reservoir march to the sea in December 1950. The book goes on to describe the stabilization of the front lines after the Chinese had entered the war during 1951. At this time, the emphasis for naval air operations was centered on interdiction behind the lines. The focus was on trying to stop road and rail traffic from resupplying the communist troops and allowing them to build up to a major offensive. It also includes the entry of the F2H Banshee into carrier operations which gave the USA four major types of aircraft with which to wage the war. During 1952 most carrier air groups spend their time off the coast of North Korea while hitting targets up along the Yalu River, putting them well within the

Object ID	Title	Author	Summary
			range of the MiG-15s. Navy F9F Panthers were used as top cover while the Corsairs and Skyraiders went after major targets such as the dam complexes up river and marshaling yards north of Pyongyang. During 1953, naval air operations were stepped up in an effort to get the communists back to the truce talks. The number of MiG-15s had grown to a figure many times that of the UN for overhead protection. The deep missions were more dangerous than ever and the Chinese brought in state of the art antiaircraft automatic weapons. The number of sorties flown by the US Naval aircraft increased over the previous year's record numbers. The war ended on July 27, 1953.
2015.327.001	Undersea Warrior : The World War II Story of "Mush" Morton and the USS Wahoo	Keith, Don	No man above or below the waves successfully completed so many critical missions, fostered as much admiration, drew as much criticism, or made such a lasting impact on submarine warfare as one determined commander. The first submarine "ace" of World War II, Dudley "Mush" Morton was arguably the most famous--and notorious--skipper. In ten months at the helm of the USS Wahoo, he completely changed the way the sea war was fought in the Pacific. The life story of a heroic and dynamic submarine commander, from his first days in the Navy to his ultimate end in battle off the north coast of Japan--a thrilling portrait of a man who fought the war on his own terms.
2015.327.003	Fightertown, U.S.A. : A Tribute to NAS Miramar; Naval Air Station Miramar	Naval Air Station (Miramar, Calif.)	"The history of NAS Miramar, as well as its Army and Marine Corps predecessors, is a colorful one that spans eighty years, two world wars, three regional wars, the Cold War, and a constant parade of ever-evolving aircraft, technology and most importantly, personnel. This book offers glimpses into some of the many stories that make up the history of Fightertown, U.S.A., and

Object ID	Title	Author	Summary
			strives to tell those stories through vivid images and well-chosen words." Book was created before Miramar was turned over from the US Navy to the US Marine Corps.
2015.327.004	Submarine Commander : A Story of World War II and Korea	Schratz, Paul R.	This is a personal memoir of underwater combat in World War II. Schratz was a Torpedo Officer of the Scorpion that laid mine fields and sunk to freighters, and as Executive Officer of the Sterlet and the Atule he participated in sinking eight more ships and rescuing seven Air Force and Navy aviators shot down off Okinawa. At war's end he participated in the Japanese surrender, aided the release of American POWs, and had a key role in the disarming of enemy suicide submarines. he took command of the revolutionary new Japanese submarine I-203 and returned it to Pearl harbor. In 1949 he commissioned the USS Pickerel and set a world's record in a 21-day, 5,200 mile submerged passage from Hong Kong to Honolulu. With the outbreak of the Korean War, the Pickerel was sent to Korea to participate in secret intelligence operations. Table of Contents: The USS Wichita: naval war in the North Atlantic -- The USS Mackeral: the Gold Dolphin -- The USS Scorpion: tragedy in the Pacific -- The USS Sterlet: early command? -- The USS Astule: minesweeper? - - The demilitarization and occupation of Japan -- The sorry Sasori -- The USS Burrfish: fast and loose -- The USS Pickerel: dipsydoodling on government time -- War under the United Nations command.
2015.327.005	Hellcats : The Epic Story of World War II's Most Daring Submarine Raid	Sasgen, Peter T.	This is the story of Operation Barney was the brainchild of VADM Charles Lockwood, and was named for William Bernard "Barney" Sieglaff who would

Object ID	Title	Author	Summary
			be responsible for training of the nine submarine crews chosen. Operation Barney was a plot to invade the minefields protecting the Sea of Japan and to decimate the enemy fleet. The mission would hinge on a new, experimental sonar system that would, with luck, guide American submarines safely past the mines and into the open sea. The nine submarines chose were nicknamed Hellcats. Using original documents and the poignant personal letters of one doomed Hellcat commander, Sasgen crafts a classic naval tale of one of World War II's most dangerous missions. Table of Contents: The beginning of the end. A world destroyed ; ComSubPac ; The Wahoo's last dive ; The commander from Georgia ; The "magic" behind the mission ; Wolf pack ; The long road to Tokyo ; The Magic loses its magic -- The Hellcats. An operation called "Barney" ; The minehunters ; Probing the line ; "Hydeman's hellcats" ; Running the gauntlet ; Threading the needle -- Operation Barney. The death of an empire ; A dark silence ; Breakout ; The long search ; The hour of sacrifice ; A shining glory.

2015.327.006	Fatal Dive : Solving the World War II Mystery of the USS Grunion	Stevens, Peter F.	On July 31, 1942, the Naval submarine USS Grunion, along with her seventy-man crew, vanished without a trace in the icy waters off Kiska in the Aleutian Islands. For decades, the U.S. Navy was unable or unwilling to reveal further information about the sub's fate. But Commander Jim Abele's family never gave up their quest to discover the truth. More than six decades after the submarine's loss, Jim Abele's three sons astonished the experts by locating the lost submarine 3,000 feet below the surface of one of the world's most dangerous bodies of water. In this explosive new account of the search, the author

Object ID	Title	Author	Summary
			draws on the experiences and the exhaustive research of Bruce, Brad, John, and Susan Abele and Mary and Richard Bentz to provide a cliff-hanging account of the submarine's loss, of its improbable discovery, and ultimately of the Abele's final quest--to establish how the Grunion was lost. Additionally, the Grunion was carrying the Navy's new top secret MK-14 torpedoes.
2015.327.007	Pearl Harbor : The Way it Was, December 7, 1941	Stone, Scott C. S.	This is the fourth revised edition. It is a summary of the Dec 7 1941 Japanese attack on Pearl Harbor. Extensively illustrated. First published in Japan. This may be first English language edition. Includes loose notebook foldout page on Pearl Harbor attack. Contains a list of casualties.

2015.328.012	NATOPS Flight Manual Navy Model RF-4B Aircraft	Chief of Naval Operations	NATOPS flight manual for McDonnell Douglas F-4B Phantom II. Incomplete without classified supplement, NAVWEPS 01-245FDC-1. Supersedes NAVWEPS 01-245FDC-1 dated 15 April 1965, changed 15 July 1965.
2015.328.013	Preliminary Pilot's Handbook Model FM-2 Airplane Engine R-1820-56	General Motors Corporation. Eastern Aircraft Division	We have a paper copy of this manual, 2009.302.052. It is the pilot's handbook for the FM-2 Wildcat
2015.328.014	Pilots Manual for F4U Corsair	Aviation Publications	We have the 1989 edition, 2011.320.042. This is the pilot's manual for the F4U Corsair. This is part of the World's Famous Aircraft Series
2015.328.015	Pilot's Handbook for Navy Model F6F-3, F6F-3N, F6F-5, F6F-5N Airplanes	Chief of the Bureau of Aeronautics	We have a copy on CD, 2009.302.053 which is filed with 2009.302.052. This is the pilot's handbook for the F6F-3, F6F-3N, F6F-5, and F6F-5N Hellcats. This publication supersedes AN 01-85FB-1 dated 1 June 1944 and revised 15 June 1945.
2015.328.016	Pilot's Handbook for Navy Model F7F-1N, F7F-2N, F7F-3, F7F-3N Airplanes	Chief of the Bureau of Aeronautics	We have a CD, 2009.302.054. This is the pilot's handbook for F7F-1N, F7F-2N, F7F-3, F7F

Object ID	Title	Author	Summary
			-3N Tigercat. This publication supersedes AN 01-85FA-1 dated 15 February 1945 revised 15 March 1945
2015.328.017	Pilot's Handbook for Navy Model F7F-1N, F7F-2N, F7F-3, F7F-3N, F7F-4N Airplanes	Chief of the Bureau of Aeronautics	We have a CD, 2009.302.054, and an online version, 2015.328.016, of the 1945 edition. This is a later edition and includes the F7F-4N version. This is the pilot's handbook for F7F-1N, F7F-2N, F7F-3, F7F-3N, F7F-4N Tigercat. This publication supersedes
2015.328.018	Handbook of Maintenance Instructions Navy Model F7U-3 Aircraft (BuNo. 12845-128466)	Chief of the Bureau of Aeronautics	We have the Pilot's Operating Instructions, AN 01-45HFC-1, 2008.302.080. This is the Handbook for Maintenance Instructions for the F7U-3 Cutlass. This publication supersedes AN 01-45HFC-2 dated 1 August 1953, revised 1 November 1953
2015.328.019	Flight Handbook Navy Model F7U-3, -3M, -3P Aircraft (BuNo. 128467 and Subsequent)	Chief of the Bureau of Aeronautics	This is the flight handbook for Navy Modwl F7U-3, -3M, -3P Cutlass. This publication supersedes AN 01-45HFD-1 dated 1 January 1956 revised 1 April 1956.
2015.328.020	NATOPS Flight Manual Navy Model F-8D, F-8E Aircraft	Chief of Naval Operations	NATOPS manual for F-8D, F-8E Crusader. This may not be the complete manual as it is a Change Notice.
2015.328.021	NATOPS Flight Manual Navy Model F-8D, F-8E Aircraft	Chief of Naval Operations	This is a supplemental manual for the F-8D and F8-E Crusader. This publication supplements NAVAIR 01-45HHD-1, NATOPS flight manual for models F-8D, F-8E aircraft.
2015.328.022	Pilot's Handbook for Navy Model F8F-1, F8F-1B, F8F-1N Airplane	Chief of the Bureau of Aeronautics	We have a copy of this on CD 2009.302.055 and we have a later edition online at 2015.328.023. This is the pilot's handbook for Navy Model F8F-1, F8F-1B, and F8F-1N Bearcat. This publication supersedes AN 01-85FD-1 dated 15 March 1946 revised 1 June 1946
2015.328.023	Pilot's Handbook for Navy Model F8F-1, F8F-1B, F8F-1N, F8F-2, F8F-2N, F8F-2P Aircraft	Chief of the Bureau of Aeronautics	We have an earlier edition on CD 2009.302.055 as well as online 2015.328.022. This is the pilot's handbook for the F8F-1, F8F-1B, F8F-1N, F8F-2, F8F-2N, F8F-2P Bearcat. This publication supersedes AN 01-85FD-1 dated 1 April 1948

2015.328.024	Flight Handbook Navy Model F9F-8 Aircraft	Chief of the Bureau of Aeronautics	This is the Flight Handbook for the F9F-8 Grumman Cougar. We have two later editions: 2015.328.025 and 2015.328.026. We also have a 1955 edition in paper, 2013.335.009 and a copy on CD, 2009.302.056 which is filed with 2009.302.056.
2015.328.025	Flight Handbook Navy Models F9F-8, -8B, -8P Aircraft	Chief of the Bureau of Aeronautics	This is the Flight Handbook for the F9F-8 Grumman Cougar. We have an earlier and a later edition: 2015.328.024 and 2015.328.026. We also have a 1955 edition in paper, 2013.335.009 and a copy on CD, 2009.302.056 which is filed with 2009.302.056.
2015.328.026	Flight Handbook Navy Models F9F-8, -8B, -8P Aircraft	Chief of the Bureau of Naval Weapons	This is the Flight Handbook for the F9F-8 Grumman Cougar. We have two earlier editions: 2015.328.024 and 2015.328.025. We also have a 1955 edition in paper, 2013.335.009 and a copy on CD, 2009.302.056 which is filed with 2009.302.056.
2015.328.027	Flight Handbook Navy Model F11F-1 Aircraft	Chief of the Bureau of Naval Weapons	This is the flight Handbook for the Grumman F11F Tiger. We also have a copy on CD, 2009.302.057. This publication supersedes NAVAER 01-85FGG-501 dated 15 Jul 1957, revised 15 Mar 1959 and NAVAER 01-85FGG-501A dated 15 Oct 1957, revised 15 Mar 1959.
2015.328.028	NATOPS Flight Manual Navy Model F-14D Aircraft	Chief of Naval Operations	This is a copy of the NATOPS Flight manual for the Grumman F-14D Tomcat.
2015.328.029	Preliminary NATOPS Flight Manual Navy Model F-111B Aircraft	Chief of Naval Operations	This is a change notice only to Preliminary NATOPS flight manual for the General Dynamics Grumman F-111B which was cancelled before production. This publication is incomplete without supplemental NATOPS flight Manual NAVAIR 01-10FAB-1A.
2015.328.030	NATOPS Flight Manual Navy Model F/A-18A/B/C/D 161353 and Up Aircraft	Chief of Naval Operations	We have the 1979 ed. 2014.301.003. This is a change notice only to NATOPS Flight Manual for the McDonnell Douglas F/A-18A/B/C/D Hornet 161353 and Up Aircraft. This publication is

Object ID	Title	Author	Summary
			incomplete without A1-F18AC-NFM-200 and A1-F18AC-
2015.328.031	Pilot's Handbook for Navy Model FH-1 Airplanes	Chief of the Bureau of Aeronautics	This is a Pilot's Handbook for the McDonnell FH-1 Phantom. This publication supersedes AN 01-245FA-1 dated 15 June 1948 revised 1 July 1948.
2015.328.032	Handbook Flight Operating Instructions USAF Series H-5A, D and E Navy Model HO2S-1 Helicopters	Chief of the Bureau of Aeronautics	This is a handbook of flight operating instructions for the Sikorsky H-5 A, D and E Air Force versions and the HO2S-1 Navy version helicopters. This publication replaces AN 01-230HB-1 dated 14 May 1948.
2015.328.033	Pilot's Handbook for Navy Model JRM-1 Airplane	Chief of the Bureau of Aeronautics	This is a Revision notice for the Pilot's Hand book for the Martin JRM Mars airplane. This publication supersedes AN 01-35CA-1 dated 15 January 1946.
2015.328.034	Flight Manual PB4Y-2 Bombardment Airplane	Consolidated Vultee Aircraft Corporation	This is a flight manual for the Consolidated Vultee Aircraft PB4Y-2 Privateer Bombardment airplane.
2015.328.035	Handbook of Erection and Maintenance Instructions Navy Model PBY-5, PBY-5A Airplanes	Chief of Naval Operations	This is a handbook of erection and maintenance instructions for the Consolidated PBY Catalina. This publication supersedes NAVAER 01-5SE-19 and AN 01-5MA-2 dated 20 July 1944 revised 10 March 1945.
2015.328.036	NATOPS Flight Manual Navy Model RA-5C Aircraft	Chief of Naval Operations	We have a paper copy of this manual, 2010.301.013. This is the NATOPS flight manual for the North American RA-5C airplane. This publication supersedes NAVWEPS 01-60ABC-1 dated 1 June 1964.
2015.328.037	Flight Handbook Navy Model S2F-1, -2 Aircraft	Chief of the Bureau of Aeronautics	This is a revision notice for the flight handbook for the Grumman S2F-1 and S2F-2 Tracker (S-2 after 1962).
2015.328.038	Pilot and Beast : What Every Young Pilot Should Know about the Helldiver	Curtiss-Wright Corporation	This book is prepared manufacturer, Curtiss-Wright Corporation, as a brief operational information for the instruction of personnel being introduced to the Curtiss SB2C Helldiver airplanes. Cartoons.
2015.328.039	Handbook Erection and Maintenance Instructions T-6, -6A, -6B USAF Model T-6C, T-6D Navy Models SNJ-3, SNJ-4, SNJ-5, SNJ-6 Aircraft	North American Aviation, Inc.	This is the revision notice for handbook for erection and maintenance instructions for the North American SNJ (Navy), T-6, -6A, -6B (AF and Army Air Corps), and known as the Harvard outside the US.

Object ID	Title	Author	Summary
2015.328.040	Pilot's Handbook for Navy Model F6F-3, F6F-3N, F6F-5, F6F-5N Airplanes	Chief of the Bureau of Aeronautics	This appears to be an "enhanced" manual with many more B&W pictures and diagrams than the actual manual. It includes the pilot's handbook for the F6F-3, F6F-3N, F6F-5, and F6F-5N Hellcats. We have a copy of the handbook on CD, 2009.302.053 which is filed with 2009.302.052. And we have another electronic copy of the manual cataloged as 2015.328.015. There is a note written and signed by Leo J. Kahn, 1975.
2015.328.041	Pilot's Handbook for Navy Model F6F-3, F6F-3N, F6F-5, F6F-5N Airplanes	Chief of the Bureau of Aeronautics	We have a copy on CD, 2009.302.053 which is filed with 2009.302.052, and two other electronic copies: 2015.328.015 and 2015.328.040. This appears to be a partial copy as it only has 57 pages.
2015.328.042	Pilot's Handbook for Navy Models F4U-5, -5N, -5NL, -5P Aircraft	Chief of the Bureau of Aeronautics	This publication supersedes AN 01-45HD-1 dated 1 June 1950 Revised 1 April 1951. We have two copies of this manual in hard copy. One in manuals and one in Backup Manuals: NAVAER AN 01-45HD-1.
2015.328.043	CV NATOPS Manual - 1999	Chief of Naval Operations	Provides standardized procedures for the operation of the aircraft carrier during flight operations.
2015.328.044	Pilot's and Flight Engineer's Notes : Sleigh I & II	Great Britain. Air Ministry	This is a funny manual based on the format of Great Britain's Air Ministry Air Publications for aircraft. This manual covers Santa Claus' Sleigh and Reindeer. Mark I is the Eight Reindeers Power Plants and Mark II is the Nine Reindeers Power Plants.
2015.329.001	Golden Wings : A Pictorial History of the United States Navy and Marine Corps in the Air	Caidin, Martin	Here for the first time is a pictorial history of the United States Navy and Marine Corps in the air. It is a saga of men and machines in war and peace, and of the emergence of air-power as the dominant force in the modern Navy. The whole story is here, from the earliest beginnings to Polaris and the supercarriers, with almost half the book devoted to World War II. The book is a companion volume to Mr. Caidin's award-winning "Air Force: A

Object ID	Title	Author	Summary
			Pictorial History of American Airpower." GOLDEN WINGS is unsurpassed in its field. It is the result of a three-year search for the best possible photographs. Mr. Caidin is the only civilian to explore the complete file of official Navy and Marine photographs in Washington. He also examined thousands of photographs from private and industrial collections. Some of the four hundred photographs included in the book are published here for the first time. Only someone who knows aircraft, pictorial design, and aviation history as well as Martin Caidin could have produced so factual, informative, and handsome a book. Photographs, captions, and the 60,000 words of text are co-ordinated in a superb layout to make GOLDEN WINGS another of Mr. Caidin's major contributions to the literature of the conquest of the air.
2015.329.002	Boatswain's Mate 1 & C	Naval Education and Training Command	This book has been written as an aid to men of the Regular Navy and naval Reserve who are preparing for promotion to the rates of Boatswain's Mate First Class and Chief Boatswain's Mate. Besides covering the formal qualifications necessary for advancement, it touches to some extent upon all the other duties and skills likely to be required of a man holding either rate.
2015.329.003	Boatswain's Mate 3 & 2	Naval Education and Training Command	This book has been written as an aid to men of the Regular Navy and naval Reserve who are preparing for promotion to the rates of Boatswain's Mate 3 or 2. Besides covering the formal qualifications necessary for advancement, it touches to some extent upon all the other duties and skills likely to be required of a man holding either rate.
2015.329.004	Weapons of World War II : Infantry Weapons,	Ludeke, Alexander	"This book describes the weapons and vehicles of all

Object ID	Title	Author	Summary
	Unarmored Vehicles, Armored Vehicles, Artillery, Special Weapons, Aircraft, Ships		the countries that fought in World War II ... [and provides an] overview of the diverse weaponry used by both the Axis powers and the Allies. (From Back Cover)
2015.329.005	Knight's Modern Seamanship	Knight, Austin Melvin	A guide for those who follow the sea as a profession, for sport, or for relaxation. In print since 1901 and updated and expanded to meet recent developments. Chapters include Ships and Boats; Shiphandling; Oceanography and the Weather; and Rules of the Road.
2015.329.006	Navigation : For Students or Mariners Preparing to Take Examinations for Officer's Licenses	Hosmer, George	This book is written as an aid for those who wish to study navigation with the intention of taking examination s to obtain officer's licenses.
2015.329.007	Basic Military Requirements	Harrelson, M. L.	Training manual and nonresident training course forming a self-study package covering basic knowledge required of men and women of the U.S. Navy and Navy Reserve.
2015.329.008	Instrumentman 1 & C	None Stated	Training manual when combined with practical experience, will help to become a proficient worker, and enable an individual to accept greater responsibilities. This Rate Training Manual provides information related to the tasks assigned to Instrumentman First Class and Chief Instrumentman.
2015.329.009	Tools and Their Uses	Bureau of Naval Personnel	This book has been written to provide naval personnel with an informative handbook. The book contains data pertinent to a variety of tools and may be used as a supplement to other training manuals. Personnel using this book upon completion, should be able to identify tools and fastening devices by their correct names; cite specific purposes and uses of each tool.
2015.329.010	Seamanship	Bureau of Naval Personnel	This book has been totally rewritten since the 1944 edition to provide definitive text on seamanship for the naval officer. Generally, seamanship is defined in dictionaries as "skill in the seaman's art". Pricipally, a seaman is

Object ID	Title	Author	Summary
			defined as a "mariner" as distinguished from a "landsman". The art or science of seamanship is defined in a wide sense as the phase of the sea going profession which lies wholly within the province of the deck forces: the deck divisions of the seagoing armed services; the deck watches of the merchant services; and the officers of all services who command ships, stand deck watches, or direct the operations of the deck forces.
2015.329.011	Principles of Naval Engineering	Bureau of Naval Personnel	This book provides an introduction to the theory and design of engineering machinery and equipment aboard ship. Primary focus is placed on helping the student acquire an overall view of shipboard engineering plants and an understanding of basic theoretical considerations that underlie the design of machinery and equipment.
2015.329.012	Engineering, Operation and Maintenance	Bureau of Naval Personnel	This text has been prepared primarily as an aid for general line officers and engineering officers to increase their knowledge of shipboard engineering through self-study. In addition, the text serves towards assisting officers in qualifying as engineering watch officers.
2015.329.013	King of Comedy Associates Presents Bob Hope and His Friends	Block, Bernard (prod)	Book insert for a record album called Bob Hope and His Friends. Includes brief biography, numerous family and promotional photographs, Bob's history of entertaining the troops including a history of his USO tours from 1942 - 1972. Includes the play list on the 3 albums that this book accompanies.
2015.329.014	Combat Fleets of the World - 1986/87 : Their Ships, Aircraft, and Armament	Labayle Couhat, Jean (ed)	Internationally acknowledged as the best one-volume reference to the world's naval and paranaul forces, this popular Naval Institute guide is both comprehensive and affordable. Updated biennially since 1976, it has come to be relied on for all -inclusive, accurate, and up-to-date data on the ships, navies, coast guards, and naval aviation arms of

Object ID	Title	Author	Summary
			more than 180 countries and territories. Large fleets and small maritime forces get equally thorough treatment as evidenced in this new edition, which highlights major and even minor developments that could have an impact on the world scene. A thorough indexing of material and a logical ship-typing system make the book easy to use and allow for quick comparisons between fleets. The guide continues to present timely, authoritative information supported by more than four thousand illustrations from correspondents throughout the world. From giant aircraft carriers and ballistic missile submarines to tugboats and launches, the characteristics and capabilities of ships large and small are reliably recorded. Complete descriptions of naval aircraft, weapons, weapon systems, and sensors are also provided along with useful commentary on organization, personnel strengths, and bases.
2015.329.015	Jane's American Fighting Ships of the 20th Century	Moore, John E. (ed)	A compendium of U.S. Navy combatants and tenders and U.S. Coast Guard ships of the 20th century. Extracted from Jane's All the World's Fighting Ships 1898-1990. Similar in format to Jane's Fighting Ships series. USS Midway and Midway-Class carriers addressed on pages 72-77.
2015.330.002	USS Independence (CV-62) - Mediterranean Cruise - 1979	Pedrick, Charles R. (ed.)	Pictorial account of the deployment of USS Independence to the Mediterranean sea in 1979. The ship departed Norfolk Virginia on June 28, 1979 and returned on December 14, 1979. Port call included: Naples, Italy; Haifa, Israel; Palermo, Sicily, Italy; Athens, Greece; Palma de Mallorca, Spain; Genoa, Italy; Toulon, France; Malaga, Spain; Crete, Greece. Carrier airwing Six was embarked with : VF-102 (F-4J) VF-33 (F-4J) VA-15 (A-7E) VA-87 (A-7E) VA-176 (A-6E and KA-6D)

2015.330.003	USS Forrestal (CV-59) - Mediterranean Cruise - 1986	Walker, Mark F.(ed.)	Pictorial account of the deployment of the USS Forrestal to the Mediterranean. The ship departed June 2, 1986 from Mayport, FL and returned there on November 10, 1986. Ship took part in operation Sea Wind with Egyptian forces It lasted from 23-28 August. Ports of Call: Augusta Bay: Naples: Sorrento: Palma: Palermo: Cannes: St. Tropez: Livorno: Florence: Miss USO show aboard. Tiger Cruise conducted enroute to Mayport. Comcargru Six was embarked: CARRIER AIR GROUP SIX (CAG-6) on board, consisting of: VF-11 (F-14A) VF-31 (F-14A) VA-37 (A-7E) VA-105 (A-7E) VA-176 (A-6E and KA-6D) VAW-122 (E-2C) VAQ-132 (EA-6B) VS-28 (S-3A) HS-15 (SH-3H)
2015.331.001	Boatswain's Mate 3 & 2	Naval Education and Training Command	This book has been written as an aid to men of the Regular Navy and naval Reserve who are preparing for promotion to the rates of Boatswain's Mate 3 or 2. Besides covering the formal qualifications necessary for advancement, it touches to some extent upon all the other duties and skills likely to be required of a man holding either rate.
2015.331.002	Boatswain's Mate 1 & C	Naval Education and Training Command	This book has been written as an aid to men of the Regular Navy and naval Reserve who are preparing for promotion to the rates of Boatswain's Mate First Class and Chief Boatswain's Mate. Besides covering the formal qualifications necessary for advancement, it touches to some extent upon all the other duties and skills likely to be required of a man holding either rate.

Object ID	Title	Author	Summary
2015.332.001	World's Great Stealth and Reconnaissance Aircraft, The	Gourlay, Alastair (ed)	CONTENTS- UK: BAe Nimrod, page 7. USA: Lockheed SR-71 Blackbird, page 19. Grumman E-2 Hawkeye, page 31. Lockheed P-3 Orion, page 43 Boeing E-3 Sentry, page 55 Lockheed S-3 Viking, page 67 Boeing RC-135, page 79 Grumman EA-6B Prowler, page 91 Grumman EF-111A Raven, page 103 McDonnell Douglas RF-4 Phantom, page 115 Grumman OV-1 Mohawk, page 127 Lockheed U-2/TR-1, page 139 Northrop B-2, page 151 Lockheed F-117, page 163 Advanced Tactical Fighter - YF-22/23, page 173 USSR: Tupolev Tu-142 'Bear', page 187
2015.333.001	Final Secret of Pearl Harbor, The : The Washington Contribution	Theobald, Robert A.	This book describes the three ways of "Remembering Pearl Harbor". First, as that infamous day, December 7, 1941, when the Japanese sneak-attacked our Pacific fleet w/o provocation. Second, as the day the U.S. suffered its greatest military disaster in history with 3303 dead and 1272 wounded. Third, as the day President Franklin D. Roosevelt succeeded in taking a reluctant Nation into a successful war against the Axis Powers.
2015.333.002	Storm over the Gilberts : War in the Central Pacific, 1943	Hoyt, Edwin P.	First book in a series about the war in the Pacific. The second book is To the Marianas (2004.315.035, D767.00 .M2 H69 1980), and the last one is Closing the Circle (2004.315.010, D767 .H644 1982). This book covers the planning, including the problems with coordination with the other US leaders. This led Hoyt to say that preparations for the Gilberts campaign became as much a battle among Allied commanders as between enemies. Also includes an analysis of the battle. Contents: Prologue: Mistake at Makin -- The coming of Spruance --

Object ID	Title	Author	Summary
			The fleet assembles -- Engagement -- October planning -- Prelude -- Invasion -- The first day -- The second day -- Thrusts and counterthrusts at sea -- The third day -- Banzai -- Tarawa victory -- The Liscome Bay -- The storm over the Gilberts.
2015.333.003	Naval War of 1812, The or, The History of the United States Navy During the Last War with Great Britain : To Which is Appended an Account of the Battle of New Orleans	Roosevelt, Theodore	Readers will find in this books three things: first, they will find an account of its subject that has yet to be surpassed for detail or vigor; second, they will find an example of that rare genre that not only records the past but influences the future; and third, and perhaps most important, they will meet a remarkable young man whose intellect, character, and personality shaped American politics for a generation and American foreign policy for a century. First published in 1882.
2015.333.004	World War II : Battle at Sea	McIntyre, Colin	Using a fine selection of contemporary pictures, looks again at most of the major naval engagements fought between 1939 and 1945 and asks whether everything was as clear cut as earlier accounts suggested. For instance, how many battles might have had a different outcome if one side or the other had better communications, or better intelligence, or just that little bit of extra luck. This book considers whether those involved fully appreciated the role of aerial reconnaissance, of carrier tactics and of the submarine. It also examines whether there was too great an emphasis on destroyers fighting U-boats, and not enough on the 'safe and timely arrival' of convoys. Contents: Introduction -- Battle of the River Plate -- Convoy -- Mediterranean -- Sinking the Bismarck

Object ID	Title	Author	Summary
			-- Radar and special weapons -- Pearl Harbor -- Battle of the Java Sea -- Battle of the Coral Sea -- Battle of Midway -- Convoy PQ17 -- Battle of the Barents Sea -- Submarines -- North Africa and Sicily -- Battle of the Atlantic -- D-Day -- Battles off Guadalcanal -- Battle of the Philippine Sea -- Battles of Leyte Gulf -- The atomic age begins
2015.333.005	Future of Warfare, The	Alexander, Bevin	The Cold War has ended. The United States no longer faces the constant threat of aggression from its previous adversary, the former Soviet Union. What does the end of the Cold War mean for U.S. military policy? In this new global climate, the United States will not cease to fight but will continue to enter into military conflicts; what has changed is the kinds of conflicts that we will enter and the ways in which we will fight them. Key questions: What are the strengths of our armed forces, and how can we best use them? What will future conflicts be like, and who will succeed? When should we intervene in military situations, and when should we remain neutral? Contents - American Strategy for the New era - What kind of Wars Will We Fight? - America Rules the Waves - New Tactics for a New Army - The Boer War: Prologue to the Future - Converting Stalemate to Victory - War against a Vapor - Mao Zedong: Strike Enemy Weakness - Korea: Challenging the Strong Head to Head - Giap: Neutralizing Military Power - Why the Vietnam War Was a Mistake - Defeating the American Colossus

Object ID	Title	Author	Summary
			- Winning or Avoiding Future Wars
2015.333.006	Pocket Battleship "Admiral Graf Spee"	Breyer, Siegfried	A description about the pocket battleship Admiral Graf Spee started service on January 6, 1936. Other contents include: Charles de Gaulle, France's first nuclear aircraft carrier -- China, newest member of SSBN "club" -- New rocket destroyer for the U.S. Navy.
2015.333.007	Aircraft of the National Air and Space Museum, Smithsonian Institution	Van der Linden, F. Robert	The National Aeronautical Collection, probably the best such collection in the world, includes some two hundred seventy-five aircraft, running the gamut from the tiny Crosley Flying Flea to the huge Boeing 707 prototype; from early Lilienthal and Wright brothers gliders to the modern McDonnell Phantom and Lockheed Starfighter; from the one-of-a-kind Hughes H-1 racer to the everyday Cessnas, Beechcraft, and Pipers. Autogiros, balloons, helicopters, gliders, sailplanes, and almost every other variety of aircraft are represented. This catalog contains a brief descriptive article, by staff members, about each of the sixty-four aircraft on display in the National Air and Space Museum at its opening on July 4, 1976. The aircraft are exhibited in fourteen galleries, each with a distinct theme, and the articles conform to this arrangement. A guide to gallery locations is included in this catalog (inside front and back covers). The remainder of the collection is either in storage or on loan to other air museums. A listing of these aircraft and their locations may be found at the end of this catalog. The staff of the Aeronautics Department and I hope you will find this catalog a useful reference during your visits to the National Air and Space Museum and for many years to come.

			(from the Introduction:)
2015.333.008	USS Midway 1963-1964	Romano, Jerry (ed)	A pictorial summary of the USS Midway crew on a deployment from Alameda NAS to the western Pacific with the Seventh Fleet from 8 November 1963 to 26 May 1964 with CAW-2 consisting of VF-21, VF-24, VA-22, VA-23, VA-25, VAH-8, VAW-11, and VFP-63 embarked aboard. Port visits included Hawaii; Subic Bay, The Republic of the Philippines; Hong Kong; and Sasebo, Beppu, Iwakuni, and Yokosuka, Japan. USS Midway (CVB/CVA/CV-41) aircraft carrier; lead ship of the class.
2015.333.009	Dawn Like Thunder; the Barbary Wars and the Birth of the U. S. Navy	Tucker, Glenn	Discusses the success of the small U.S. Mediterranean Squadron in battles against the Barbary Powers.
2015.333.010	Our Call To Arms : The Attack on Pearl Harbor	Sullivan, Robert (ed)	Pearl Harbor is the story of the worst battle defeat ever suffered by the U.S., and of how courage and ingenuity rose from the smoldering wreckage to build the worlds most powerful war machine and, in victory's aftermath, to wage peace with even greater scope and success. In stirring text and dramatic photography, much of it rarely seen, LIFE brings Pearl Harbor alive in all its terror and heroism. Included : Life Magazine dated December 22, 1941, 55 pages with articles: America Goes to War; "The Day of Wrath"; The Defenders of the Philippines; Worldwide War. and many others.
2015.333.011	Naval Officers' Uniform Plan, The	US Navy	Compilation of Naval Officers' Uniform Plan. Developed by Navy Department for benefit of Naval Officers. Covers responsibility for adherence to specifications on quality garments, their production, pricing, and service rendered by retail stores. Uniforms are for Commissioned Officers, Chief Warrant Officers, Warrant Officers, and Chief Petty Officers.
2015.333.012	USS Essex, The : And the Birth of the American Navy	Robotti, Frances Diane	The USS Essex, a thirty-two-gun frigate built in Salem,

Object ID	Title	Author	Summary
			Massachusetts, in 1799, was not the most glorious vessel in the history of the American navy, yet she was unique. Sailors throughout the world remarked on her speed and beauty of line, and the list of men who commanded her—Edward Preble, William Bainbridge, James Barron, and David Porter—reads like a who's who of the early American navy. She was the first U.S. warship to round the Cape of Good Hope into the Indian Ocean. Thirteen years later, she became the first American man-of-war to round the Horn into the Pacific, where her crew fought and lost one of the bloodiest sea battles in U.S. history.
2015.334.010	Wings for the Fleet	Naval Air Training Command	A recruiting tool for aviation candidates for naval flight training at Pensacola, Florida. An orientation for a naval flight career concentrating on initial pilot training. Includes looseleaf letter to AVROC from NARTU, Lakehurst, N.J.
2015.334.011	Wings for the Fleet	Naval Air Training Command	A recruiting tool for aviation candidates for naval flight training at Pensacola, Florida. An orientation for a naval flight career concentrating on initial pilot training.
2015.334.012	VT-28 LSO Gouge	Training Squadron 28	Binder of course of instruction and notes for Landing Signal Officers at Training Squadron 28 (VT-28) and LSO-related Navy instructions.
2015.334.013	LSO Reference Manual	Navy LSO School	Binder of course of instruction and notes for Landing Signals Officers School at Naval Air Station, Cecil Field, Florida. "Intended to categorize and briefly explain LSO-related technical references, establish a training outline for the LSO, and provide a document for self-study. Section 1 of this book (pages 21-139) have been scanned and are available at K:\Emanuals\2016.351.007.
2015.334.014	Gold Book of Naval Aviation 1985, The	Cagle, Malcolm W. (ed)	A collection of articles about Naval aviation written by high ranking navy personnel. Page 187 begins a description of Carrier Forces of the US Navy. All commissioned carriers

Object ID	Title	Author	Summary
			are listed with a short description and a list of their squadrons with squadron patches in color. The USS Midway is on page 194-195.
2015.334.015	Fly Navy West : A Tribute to Naval Aviation in the Pacific, 1911-1983	None Stated	Conference booklet for the first Fly Navy West in 1981, celebrating the 70th Anniversary of Naval Aviation. Includes the history of Naval and Marine Corps Aviation, conference events and locations, carrier group commanders, PACFLEET wing commanders, and air craft carrier commanding officers. Picture of the USS Midway on page 17.
2015.335.001	U.S. Navy and Marine Corps Cruise Books, Vol. 1 : Aircraft carriers, Escort Aircraft Carriers, Amphibious Assault Aircraft Carriers	Hart, William S.	Bill Hart has been collecting aircraft carrier cruise books for over 20 years. This is a compilation of books that he owns (with pictures of the covers) and with detailed information about cruise books that he knows exists. He is updating frequently and sends us the new volumes through dropbox.com.
2015.335.002	U.S. Navy and Marine Corps Cruise Books, Vol. 2 : Carrier-Embarked Units : Carrier Air Groups and Air Task Groups, Aircraft Carrier-Embarked Air Squadrons, Marine Battalions, Marine Amphibious and Expeditionary Units, Type Commands and Task Organizations	Hart, William S.	Bill Hart has been collecting aircraft carrier cruise books for over 20 years. This is a compilation of books that he owns (with pictures of the covers) and with detailed information about cruise books that he knows exists. He is updating frequently and sends us the new volumes through dropbox.com.
2015.337.001	Classic Grumman F-14 Tomcat Films	Northrup Grumman Corporation	A compilation of Grumman films from 1973 to 1990 tracing the history of the F-14 Tomcat and other Grumman airplanes. Contents: No points for second place -- F-14, 1973--The History of fighter Aircraft from WWI to the F-14 F-14 : The total fighter, 1975-- The role of the F-14 played in Naval Aviation Sealegs, 1977--Aircraft performance in the carrier environment ACEVAL-AIMVAL, 1978--The F-14's performance during air combat evaluations at Nellis AFB Air combat maneuvering,

Object ID	Title	Author	Summary
			1979--The techniques used to out-manuever your opponent F-14 : One of a kind, 1980--Characteristics of the F-14 that make it unique F-14D music video, 1990--Views of the F-14D inflight VFX-Design Evolution of the TOMCAT patch.
2015.337.002	War Birds : Diary of an Unknown Aviator	Grider, John MacGavock	Diary opens Sept. 20, 1917 on board R. M. S. Carmania in the harbor of Halifax. Ends August 27th (?) due to the death of its author in aerial combat. He was shot down by a German plane 20 miles behind the German lines. He was given a decent burial by the Germans and his grave was later found by the Red Cross.
2015.337.003	Nimitz Class	Robinson, Patrick	The most powerful warship in the world, the nuclear-powered US Nimitz-Class aircraft carrier is seen as impregnable. But when the USS Thomas Jefferson suddenly disappears at sea, the Pentagon is stunned. There was no warning. No apparent attack. And no survivors. All signs point to a tragic nuclear accident.
2015.337.004	River Patrol Force, TF-116	McGuire, John F. (ed)	Book traces a day in the life of the Brown Water Navy during the Vietnam War. It also includes significant events in the history of the River Patrol Force. It concludes with a colored picture in Memoriam to those who River Patrol sailors who died.
2015.337.005	Finishing School, The : Earning the Navy SEAL Trident	Couch, Dick	From the Acknowledgements--"This is a book about how SEALS train for war. It is a deadly business, and one that calls for the highest measure of dedication and professionalism. For the most part it is a dirty, difficult, dangerous, and unglamorous business--very unlike anything one might see in the movies. The men you will be reading about fought in Afghanistan and in Iraq, and are still engaged in the fight against terrorism worldwide. Many of them are at this moment in harm's way. Others are deployed to distant, seemly nonhostile parts of the world,

Object ID	Title	Author	Summary
			waiting for terrorists to show themselves. They all stand guard for us and allow us to go about our post 9/11 lives in relative peace and security. Thanks, guys. To the extent that al-Qaeda and their ilk have to worry about your suddenly appearing in the middle of the night, they are less likely to bring terror to America."
2015.337.006	Ground Attack Vietnam : The Marines who Controlled the Skies	Moriarity, J. M.	Lt. Col J.M. Moriarty was the commanding officer of Marine Observation Squadron II, VMO-2, during the Vietnam War. This book is his recollections of what the squadron did during his tenure as CO in 1970. It describes how his squadron supported the grunts and recon forces on the ground.
2015.337.007	Epics of the Sea	Hoehling, A. A. (Adolph A.)	Hoehling's book features a series of chapters on various ships and the men that crewed them. Captain Blight, of Mutiny on the Bounty fame, successfully navigated an open longboat several thousand miles over uncharted or poorly charted waters in 1789 in the first chapter. The second chapter deals with the early days of steamship travel across the Atlantic and the race between Britain and the United States to win the Blue Riband for the fastest crossing across the Atlantic. The Confederate raider, CSS Alabama's trials and sinking off the coast of England make up the third chapter. Other chapters deal with the unsuccessful Arctic expedition of the steamer, Jeanette; the emergence and pre-World War I dominance of giant steamships; the question on why the Lusitania was sunk; the raising of the USS Squalus after its nineteenth dive; and the successful evacuation of Dunkirk by the 'little ships'.

Object ID	Title	Author	Summary
2015.337.008	Art of War, The	Sun Tzu	An accurate translation of a military classic. Accompanied by many commentaries in the Chinese language, useful notes, appedicies and bibliogaphy. Translated and with an introd. by Samuel B. Griffith. With a foreword by B. H. Liddell Hart.
2015.337.009	U.S.S. Seawolf	Robinson, Patrick	In 2005, the Chinese has a new ICBM submarine, Xia III, that is a threat to the United States. To find out what the Chinese are up to, the USS Seawolf is dispatched to spy on the Chinese. When the Seawolf becomes immobilized in Chinese territorial waters, the crew is in extreme peril and must be rescued if at all possible. The U.S. Navy sends the SEALs in a desperate rescue attempt.
2015.337.010	Suffer in Silence : A Novel of Navy SEAL Training	Reid, David A.	The novel focuses on Hell Week, one hundred and twenty hours of non-sleep torture that determines whether the participants will become Navy SEALs. One of the students attempts to blackmail an instructor who is determined to see him fail.
2015.337.011	America on Guard : Army, Navy, Marine Corps : Facts, Insignia, and Uniforms	Penfield, Thomas	Includes facts, insignia and uniforms of the U.S. Army, Navy, and Marine Corps. Also includes pictures and brief descriptions of major equipment, including ships and planes.
2015.337.014	Attack Helicopters	International Masters Publishers	The full potential of the helicopter as a deadly attack gunship was not fully realized until 1955. Today, however, the attack helicopter dominates the battlefield with its advanced weaponry. Follow the development of one of the most deadly modern war machines, from the rise of the HueyCobra in Vietnam to the modern, digital warriors such as the Apache and Longbow Apache. Explore helicopter sighting systems and how they are used in combat, learn about the "Hinds" and "hips" and the Hogs and Cobras, and find out about the newest models

2015.337.015	Battleships	International Masters Publishers	No warships has ever matched the sheer destructive power of the battleship. Until World War II, it was the centerpiece of the world's most dominant navies and was armed with some of the most powerful artillery ever devised. Explore the highs and lows of the history of the battleship. From decisive naval victories to historic and costly defeats, including the attack at Pearl Harbor, and the hunt for the German navy's Bismarck. Learn about the race to provide more lethal guns and increasingly strong armor in the run-up to the war in the Pacific, and the return of the modernized Iowa class battleship.
2015.337.016	Submarines	International Masters Publishers	Submarines are the hunters of the deep, the original stealth machines. This DVD traces the fascinating rise of the most menacing warships ever known. Find out how the U-boat threat almost brought Britain to its knees in World War II, and how the US submarine force wiped Japan's merchant fleet from the seas. Experience life aboard a modern nuclear submarine patrolling the oceans for months at a time, and discover the lethal power of its weapons, from torpedoes and cruise missiles to nuclear-tipped underwater-launched ballistic missiles.
2015.337.018	Supercarrier : An Inside Account of Life Aboard the World's Most Powerful Ship, the USS John F. Kennedy	Wilson, George C.	Washington Post correspondent, George C. Wilson was offered carte blanche access to the crew of the USS John F. Kennedy (CV-67) during its seven month deployment to the Indian Ocean in the fall of 1983. What should have been a normal cruise was that "(n)o one in the Navy knew that President Reagan would make the story dramatic by ordering her, with me aboard, to change course and steam to

Object ID	Title	Author	Summary
			Lebanon where her planes would go into combat for the first time. No one could know, either, that three of the Kennedy's airplanes would crash into the sea, a fourth would be lost in a midair collision, and a fifth shot down over Lebanon. Nor could anyone predict that a small group of sailors would demand to be let off the carrier as conscientious objectors while we stood off Lebanon. Or that the ship and its aircraft squadrons would win one award after another for excellence. These and other events would all be part of the life I would experience and chronicle inside the floating city. I was told to report aboard the Kennedy in work khakis and black shoes the morning of 27 September 1983, if I still wanted to go to sea for seven months."
2015.337.019	Classic Military Aircraft : The World's Fighting Aircraft, 1914-1945	Winchester, Jim (ed)	From the Introduction--"Military aircraft began before World War I as trainers and unarmed observation platforms, but before long they evolved into fighting machines and bombers able to take the war well beyond the front lines. The air battles over the Western Front set the template for air combat to follow until the missile age.. Contrary to the chivalrous 'knights of the air' image, success usually meant sneaking up and shooting one's opponent in the back. Biplanes stayed in fashion for many years after the war, only slowly adding refinements such as metal structure, radios, and inline engines. Guns moved from the pilot's reach into the wings. Bombers developed enclosed turrets. Interwar fighter pilots were members of elite flying clubs until the threat of war and modern fast bombers grew and rearmament began in earnest. Theories that the bomber would always get through were prevalent and some 1930s bombers were faster and higher flying than contemporary fighters.

Object ID	Title	Author	Summary
			In the last years of peace, truly modern fighters emerged,including the Spitfire, Bf 109, and A6M 'Zero'. During the war, Germany managed to field no completely new types in large numbers other than the Fw190. The Bf 109 remained in production until the war's end. the 'war-winning' jets such as the Me-262 appeared too late to have any great impact on events. Germany also failed to develop an effective strategic bomber, concentrating on medium and dive-bombers."
2015.337.020	Flyboys : A True Story of Courage	Bradley, James	This copy is inscribed to Scorty (once as Adm. Scorty) by several Navy captains and one Vice Admiral (Bob Coogan). The inside has a label with S. J. Sciortino. In 1945, American flyers, 'flyboys', were ordered to take the communications station on Chichi Jima, an island north of Iwo Jim. "Iwo Jim was coveted for its airstrips, Chichi Jima for its communications stations. Powerful short- and long-wave receivers and transmitters atop Chichi's Mount Yoske and Mount Asahi were the critical communications link between Imperial Headquarters in Tokyo and Japanese troops in the Pacific. The radio stations had to be destroyed the U.S. military decided and the Flyboys had been charged with doing so. Eight American airmen were downed in water in the vicinity of Iwo Jima.... The truth of their demise was kept secret. The U.S. government decided the facts were so horrible that the families were never told. Over the decades, relatives of the airmen wrote letters and even travelled to Washington, DC in search of the truth. Well-meaning bureaucrats turned them away with vague cover stories." This copy is inscribed to Scorty (sometimes Adm. Scorty) by several Navy captains and one Vice Admiral (Bob Coogan). The inside has a label with S. J. Sciortino.
2015.337.021	Combat Aircraft of World	Bavousett, Glenn B.	This book was originally

Object ID	Title	Author	Summary
	War II		published in two volumes: World War II Aircraft in Combat (1976) and More World War II Aircraft in Combat (1981). This omnibus edition brings together the stories of the great fighting aircraft of World War II--along with full-color painting of these same aircraft in raging conflict. A total of seventy-two (72) aircraft are shown here in their various combat roles; the secondary type of plane also frequently illustrated brings the grand total of aircraft depicted to ninety (90). Each scene includes details and landscapes familiar to pilots and crew members. These paintings have been meticulously researched, and all details of markings, numbers, personal decorations, as well as the actions themselves, have been verified from official records, photographs, and, where possible, personal interviews and eyewitness accounts by participants. Volume 1 tells the stories of thirty-six aircraft and their combat actions in a loosely connected chain of events that races the progression of the war. Volume II portrays some of the rarer types of aircraft use in conflict--the 163 Komet, the Fi 156 Storch, and the Boeing P-26A Peashooter--as well as classics such as the Supermarine Spitfire and the P-61B Mustang. These thirty-six additional scenarios and paintings include a variety of aircraft from practically all of the participating forces in the war. Also includes: Wildcat (Fighter plane)--History. Hellcat (Fighter planes)--History. Zero (Fighter plane)--History. Corsair (Fighter plane)--History. Bearcat (Fighter plane). Grumman F8F Bearcat. Dauntless (Dive bomber). Douglas SBD Dauntless. Helldiver (Dive bomber). Curtiss SB2C Helldiver. Val (Dive bomber). Aichi D3A Val.

2015.337.022	U.S. Navy Fighters of WWII	Tillman, Barrett	From Pearl Harbor to Tokyo Bay, the U.S. Navy fighter planes and pilots played a key role in securing an Allied victory in World War II. This book recalls some of the hardest fighting planes from this important time in history. Complete with 85 color photographs, U.S. Navy Fighters of World War II includes information on: Grumman F4F Wildcats Grumman F6F Hellcats Grumman F7F Tiger cats Grumman F8F Bearcats Vought F4U Corsairs Ships, squadrons, and aircraft groups
2015.337.023	Naval Aviation 1943	United States Naval Institute	PREFACE: Aviation is changing constantly and rapidly, and no text book could pretend to keep up to date with its progress. A student of aviation must keep his mind open for the advent of new inventions and tactical applications which constantly are appearing. The importance of naval aviation has been impressed upon all during the current battles of the present war. Its worth has been demonstrated over and over again, and its success has resulted from a practical application which has taken advantage of the striking power inherent in aircraft. Naval Aviation, 1943, has been prepared by the Training Division of the Bureau of Aeronautics, Navy Department, at the request of the Department of Seamanship and Navigation, U. S. Naval Academy, to replace Naval Aviation, 1934 (Warlick and Grant). J. S. McCAIN Rear Admiral, U.S.N. Chief of Bureau of Aeronautics June, 1943

2015.337.025	Anchor, The -- Annual - 1954	Naval Training Center. San Diego	This is an annual produced for the United States Naval Training Center, San Diego, CA.
2015.337.026	Battle History of the Navy : Born Into War	Reda, Lou	America began its wars on the water just ten months after launching its revolution. On October 13, 1775 Congress approved the purchase and fitting out of warships for a Continental Navy. They didn't have proper ships or nearly enough of them, but they had a thousand-mile coast filled with men bred to the sea, scores of shipyards and fine forests. America was a great nursery where seamen were raised and trained and maintained in time of peace to serve their country in time of war. Born Into War is the beginning of a long journey on the sea with the United States Navy. This DVD covers the birth of the Navy through the 19th century. Originally broadcast on the History Channel in 2000. Narrated by: Edward Hermann, a Lou Reda production; written by Norman Stahl with Col. Joe Alexander.
2015.337.027	Battle History of the Navy : Fire and Water	Reda, Lou	Fire and Water continues the rich story of the United States Navy. Realizing that the Japanese had an advantage over U.S. warfare technology, the Navy needed to make some significant changes. After almost being dismantled in WWI, the Navy began introducing aircraft carriers and submarines to their fleet. With the leadership of brilliant and morale-boosting men like Nimitz, Halsey and Doolittle, the Navy reigned supreme at the Battle of Midway, causing the Japanese to surrender and giving the U.S. strategic control over the Pacific. Originally broadcast on the History Channel in 2000. Narrated by: Edward Hermann, a Lou Reda production; written by Norman Stahl with Col. Joe Alexander.

2015.343.001	Skipper : Confessions of a Fighter Squadron Commander	Winters, Hugh	Wartime exploits of VF-19 under the command of the author, Hugh Winters (Theodore Hugh Winters, Jr.) in 1943-44. A first person narrative, it describes the formation, training and combat experience of a fighter squadron as well as a personal account of a combat leader. Winters was cited with two Navy crosses. The first Cross came from his actions on Oct. 24, 1944, when he led his squadron, Air Group 19, on a strike against a Japanese fleet that resulted in damage to two battleships and four cruisers during the Battle of Leyte Gulf in the Philippines. At the same time, he supplied information about the enemy's status by flying at low levels through intense anti-aircraft fire. A day later, Capt. Winters led another strike and served as target coordinator against the Japanese fleet off the coast of Formosa. He directed the attacks that resulted in the sinking of three Japanese aircraft carriers, hanging around until all three sank, earning him his second Cross. (Reprinted from Richmond Times Dispatch, May 10, 2008).
2015.343.002	Main Fleet to Singapore	Grenfell, Russell	Grenfell provides several background chapters on rise of westernized Japan to 1905, Far East power rivalries between 1904 and World War I, the inter-war years, the state of Singapore, 1940-41, arrival of the Eastern fleet and the Japanese invasion of Malaya, the sinking of the Prince of Wales and the Repulse, loss of Malaya and the Dutch East Indies, and ends with the Battle of the Coral Sea and the Battle of Midway. He concludes with this was the end of Britain pre-eminence as a sea power.

2015.344.003	Pearl Harbor Extra : A Newspaper Account of the United States' Entry into World War II	Caren, Eric	"The newspapers in this book allow us to relive the experience of Pearl Harbor in a unique manner. We have pulled together a wide range of original newspapers, including an extremely rare emergency press issue by "Hickham Highlights" that was put out right on one of the airfields that was hit on December 7, 1941! ..."-- Introduction. "Follow the events leading up to the invasion of Pearl Harbor. The nation's newspaper coverage of this surprise attack was full and immediate. Read the news as it was reported ... Includes declarations of war from both governments and official military photos of the bombings from both American and Japanese papers. Most importantly, the nation's outrage is captured by these headlines as we were thrust into the global conflict that would pave the way for peace and democracy."
2015.344.004	Remembering Pearl Harbor : The Story of the USS Arizona Memorial	Slackman, Michael	The story of the USS Arizona Memorial, its dedication on memorial day 1962 and the attack on Pearl Harbor. This study provides specifics of the December 7, 1941 day attack, the prior period before the attack, the period from 1941-1954 Rememberance, the period 1955-1962 Navy Overtures, and from 1963-Present on Congress and the Visitor Center.

Contains photos and short biographies of the graduating class.
2015.346.001	International Maritime Dictionary	Kerchove, Rene de	From the preface to the second edition. In the 15 years that have elapsed since the publication of the first edition, many new terms have come into marine transportation and related fields. Some of them denote new methods and devices which scientific progress has brought to navigation, marine meteorology and naval architecture. Other new terms stem from changes in construction and equipment, navigational aids, as well as in marine insurance practices and many related topics.
2015.346.003	Illustrated History of Ships	Cornwell, E. L. (Edward Lewis)	From the Introduction--"In its broadest sense the history of ships--that is, the use of buoyant craft to provide transport for people and material on the water, to further aggressive or defensive intentions against known or supposed enemies--is almost as old as the history of mankind himself. Moreover, just as water covers the greatest part of the earth's surface, so maritime events have filled more pages of the world's history than land-based activities A study of history reveals a very significant fact. It is that

Object ID	Title	Author	Summary
			peoples who have developed a positive maritime economy or strategy and gained control of the sea or a considerable part of it have always emerged eventual winners of any conflict in which they engaged, and without exception those who have achieved such a capability and then relinquished it for any reason have soon gone into decline. Throughout history, many battles have been won on land, but until recent times, most or all major wars have been lost at sea."
2015.351.001	Great Fighting Jets : AV-8 Harrier	Maffett, Sean	Traces the development of the Harrier aircraft from its earliest concept to the modern aeroplane, with much of the footage depicting the aircraft's capabilities. (worldcat.org) Back of paper case has statistics about the Harrier.
2015.351.002	Great Fighting Jets : F14 Tomcat	Time-Life Video	Traces the development of the F-14 Tomcat aircraft from its earliest concept to the modern aeroplane, with much of the footage depicting the aircraft's capabilities. Back of paper case has statistics about the plane.
2015.351.003	Great Fighting Jets : F18 Hornet	Time-Life Video	Traces the development of the F-18 Hornet aircraft from its earliest concept to the modern aeroplane, with much of the footage depicting the aircraft's capabilities. Back of paper case has statistics about the plane.
2015.351.004	Warbird Checkout Series : Flying the F4U Corsair, WWII Aerial Mines, and Night Vision for Airmen	United States Navy	This VHS has three segments. The first is titled Flying the F4U Corsair : A Film Report on the Flight Characteristics of the F4U (other titles include : Vought F4U Corsair, and The Corsair). The video runs approximately 20 minutes. It gives detailed descriptions with up close video of how to start the engine, spreading the wings, taxiing, different cruising, stalls, dives and landings. The second segment I Navy Department film MN-2633 titled WWII Aerial Mines and also titled Anti Shipping. Runtime is approximately 16 minutes. It discusses the use of laying mines in water and shows mine laying from B-25 Mitchell (?). The third

Object ID	Title	Author	Summary
			segment is titled Night Vision for Airmen and the runtime is approximately 10 min. It stars Eddie Albert in a short on the importance of using the appropriate glasses to adapt eyes to night flying. His friend, Hank, did not adapt his eyes and was shot down. All three are probably US Navy Training films.
2015.351.005	Aviation Week's Air Power Showdown : Attack Planes	Aviation Week & Space Technology	Of all the combat roles airplanes play, the attack aircraft endures perhaps the toughest mission. The pilot and his airplane are "down and dirty"--in the midst of the battle -- charging hard at their targets on the ground and seeking the quickest way out once their job is done. Unlike the fighter or bomber, if they don't hit their targets, they'll simply try again, until they run out of ammunition or weapons. How do the experts judge attack planes? And which rightfully deserve to be called "The Best" within their era? You decide in this video. Through the eyes of a panel of 25 experts, you will discover, first-hand, what made the world's best attack planes superstars from 1910 to the present and which was the best of all time.
2015.351.006	Aviation Week's Air Power Showdown : Bombers	Aviation Week & Space Technology	Since the advent of the airplane, the bomber's ability to lift and deliver bombs has changed the face of warfare more than any other factor. With the unleashing of the first atomic weapon, the world saw a new reality in the massive and immediate devastation one airplane could bring about. How do the experts judge a bomber? And which rightfully deserve to be called "The Best" with their era? You decide in this video. Through the eyes of a panel of 25 experts, you will discover, first-hand, what made the world's best bombers superstars from 1910 to the present and which was the best of all time.
2015.351.007	Aviation Week's Air Power Showdown : Fighters	Aviation Week & Space Technology	Comparatively simple, small and quick aircraft, fighters were designed for one purpose--to

Object ID	Title	Author	Summary
			gain and hold control of the sky over a war zone. What makes a fighter truly great and which is the best of all time? Which fighters rightfully deserve to be called "The Best" with their era? You decide in this video. Through the eyes of a panel of 25 experts, you will discover, first-hand, what made the world's best bombers superstars from 1910 to the present and which was the best of all time.
2015.351.008	Air Power : Paris 1989	Aviation Week & Space Technology	Airshow : Paris 1989 is comprehensive coverage of the biggest and most exciting airshow ever. It may also be the most significant, because for the first time the Soviets put on an astonishingly open display of their latest, most sophisticated military hardware. Includes: - The AN-225, the world's largest aircraft, carrying the Soviet's Buran space shuttle. - Thrilling aerial displays of the MiG-29 including hair-raising footage of test pilot Anatoly Kvotchur's spectacular crash. - And rare views of such craft as the Su-25 and Su-27 fighters, the formidable Mi-28 attack helicopter, and many more. Plus the best from 33 other countries, including France's Rafale and Mirage 2000, the ominous SR-71 Blackbird, and countless other military and business aircraft from all over the world.
2015.351.009	Air Power : Future Flight	Aviation Week & Space Technology	Passengers boarding a commercial flight two decades from now can expect to travel at speeds of Mach 2-Mach 5. For them, the flight will be simple. But for the engineers and designers, it will be one of the great transportation achievements of all time. Go to the world's major research centers to meet the key problem-solvers and get a glimpse at the future of aviation. - What will be the cost of developing tomorrow's airliners? - Will the much-touted "orient Express" airliner prove realistic? - Will hypersonic flight be

Object ID	Title	Author	Summary
			relegated solely to military and space roles? From the tilt rotors to advanced supersonic jets, Future Flight explores the complex challenges of propulsion, aerodynamics and structures--the barriers that will have to be overcome to maximize the efficiency of current aircraft and make hypersonic travel a reality.
2015.351.010	Air Power : Paris 1985	Aviation Week & Space Technology	Airshow : Paris 1985. Aerospace trends, design and technology are all on display in the 1985 Paris Air Show. It's a close analysis of all the exhibits, leading edge products and thrilling flight demonstrations that make Paris one of the most important shows in the industry. Take advantage of exclusive interviews with the pilots, designers and international aerospace leaders including: Sikorsky Brubaker Experton Gardiner From commercial flight to military air power, get full coverage of the events that are continuing to shape the face of modern aviation.
2015.351.011	Air Power : Space Shuttle : The Recovery	Aviation Week & Space Technology	Focusing on the redesign and rebuilding of the Space Shuttle Program, Space Shuttle : The Recovery goes behind the scenes at NASA to pinpoint exactly what went wrong with Challenger and how the problems were investigated and rectified. - Specially commissioned computer animation demonstrates the flaws, fixes and new safety features - Key managers and officials tackle the technical questions that NASA had to answer before Discovery could lift-off. Spectacular footage captures of the most critical periods in U.S. space travel. This is the dramatic countdown to disaster on January 28, 1986 and the triumphant story of America's return to space.

2015.351.013	Aeronautical Dictionary	Adams, Frank Davis	As an aeronautical dictionary, this lexicon includes in addition to aeronautical terms only certain fundamental terms in related fields, such as navigation and meteorology, for such fields as these require, and indeed have, dictionaries of their own. Certain terms from the basic discipline of physics (such as Bernoulli's law, Coriolis effect) are included for their importance in the aeronautical field, with the emphasis always upon the application in aeronautics of the phenomenon described. Terms in the province of military (including naval) aeronautics are included only if they are of such currency and general interest (e.g., bomber, squadron) as to make their inclusion desirable, such terms always being given general definition herein. The border line between aeronautics and space technology is not always easy to define, and many terms are, or can be, applied in both areas; consequently, the definitions given these terms herein are worded so as to take account of application in either field. See, for example, Angle of Yaw, Fly. Many terms in the fields of rocketry and missilery are included.
2015.351.014	Air Power : X-Planes	Aviation Week & Space Technology	Experience the breakthroughs, the crashes and the thrills of aviation firsts through these remarkable aircraft and the pilots on the cutting edge of

Object ID	Title	Author	Summary
			modern aerospace technology: Includes coverage of the: - X-1 - The airplane that broke the sound barrier - XV-3 - It pioneered the tilt-rotor concept - X-5 - The F-111, B-1B, and F-14 owe it their variable-sweep-wing capabilities - X-15 - The rocket-plane that has flown highest and fastest - X-24B - It played a key role in the Space Shuttle's design - X-29 and X-31 - They'll revolutionize fighter maneuverability - X-30 - Technology demonstrator for the national AeroSpace Plane. Fly with Chuck Yeager, Scott Crossfield, Chuck Sewell, and many others on the historic flights that pushed the envelope to new limits and laid the foundation for today's commercial and military aircraft.
2015.351.015	Air Power : Vertical Flight	Aviation Week & Space Technology	Vertical Flight is the exciting, definitive story of VTOL aircraft. How they conduct rescue missions and haul passengers in and out of places once considered inaccessible. How they've become invaluable for jobs ranging from driving cattle to fighting fires. And most of all, how these incredible flying machines have revolutionized modern warfare. See them all in action: Hueys and Cobras in Vietnam; today's AH-64A Apache; UH-60A Blackhawk; the Chinook Ch-47D; and many others including VTOL aircraft from Germany, Italy, France and England, such as the A129 Mangusta, Panther, Lynx and BK. 117. Fly nap-of-the-earth with the 101st Airborne's Screaming Eagles, firing rockets and Hellfire laser-guided missiles. Meet the pilots and the test pilots, the engineers and the military leaders. Get a rare glimpse at the Soviets' best, and see how the Russian machines stack up against the West's. You'll see the future unfold, with the latest developments in engine, rotor and control technology. See the premier flight of the amazing

2015.356.004	Navy Wings	Bureau of Naval Personnel	This guide prepared naval aviation officers which contains in four parts. 1st part covers the missions of naval aviation and its history through the Korean War. 2nd Part covers development of naval aviation, equipment, and security regulations. 3rd part covers organization chart of naval aviation relating to Navy and DOD. 4th part covers the training.
2015.356.005	Dictionary of Admirals of the U.S. Navy, Vol. 1 - 1862-1900	Cogar, William B.	For years there has been a demand for a single reference that would provide information on all US naval officers of flag rank, and now this specially commissioned work, the first in a series, fills that vital need. This volume presents concise but complete biographical summaries of the 211 men of the US Navy who achieved the rank of admiral from 1862, when the rank of rear admiral was first used, to the end of the nineteenth century. Staff as well as line officers are included, and those who achieved the rank of admiral after retirement are also listed. Each entry contains personal information military ranks and information is also provided on the availability and location of personal papers and published or unpublished articles and other materials written by or about each man. Finally, there is a photograph of nearly every individual listed. Until now information of this sort has been very difficult to obtain and frequently inaccurate, because record keeping in the navy's early years was limited. For the researcher, then, this dictionary eliminates the frustration of collecting bits of information

			leaps from tower tops. He shows the significance of the aeronautical studies of the untutored genius da Vinci, and of the staggeringly original and prescient work of the Yorkshireman Sir Geiorge Cayley.
2015.356.009	World Combat Aircraft Directory	Polmar, Norman (ed)	The World Combat Aircraft Directory seeks to provide an overview of the world's air forces and a brief description of contemporary combat aircraft single, usable volume. This edition appears as a number of significant es are occurring in the major air forces of the world. Selection of the General Dynamics F-16 as the Air Combat Fighter (formerly Light-Weight Fighter) by the US Air Force and a number of NATO air arms will lead to one of the largest fighter production runs of the jet era. The comparatively low cost of the single-seat, single-engine F-16 could again a US fighter in competition with European designs for some of the smaller Asian, African and South American air forces. Ironically, the US Navy has selected the Northrop F-18 – a carrier-capable variant of the YF-17/Cobra designs – for its advanced light-weight fighter. This, in turn, could provide a similar aircraft for those nations desiring the capabilities provided twin-engine aircraft as well as a potential fighter for other navies retaining carriers for fixed-wing aircraft operation. Fighter aircraft continue to emerge at a regular rate from the USSR design bureaux, providing for continued and impressive modernization of and bloc air arms. Of special interest are the relatively large and sophisticated MiG-23 Flogger and MiG-25 Foxbat, with the latter attaining a large number of air records previously held by Western fighters, including some

Object ID	Title	Author	Summary
			recently set by the McDonnell Douglas F-15 Eagle. Beyond the successive Soviet designs, including several with variable-geometry configuration, the Soviet fighter inventory is noteworthy for its large numbers. On balance, however, the multiplicity of types do present some training, maintenance, and logistic problems. Another aspect of the modernization of Soviet air forces is the anticipated large-scale production of the Tupolev Backfire, a variable-geometry wing, supersonic 'medium' bomber. The aircraft may be used in a 'strategic' role against the continental United States, but for a variety of reasons this appears of lesser probability than the Backfire's wide employment as a theatre and anti-shipping aircraft. Armed with stand-off missiles, the Backfire will present a credible threat in those roles. Development of the Backfire has been cited, in part, as rationale for the proposed US production of the Rockwell International B-1 strategic bomber. This aircraft is proposed as a successor for the aging Boeing B-52 Stratofortress. However, the availability of other US strategic weapon systems (operational and proposed), the high quality and large quantity of Soviet air defences, the increasing B-1 costs and the availability of alternative aircraft such as modified FB-111 configurations, make the question of B-1 production difficult and controversial. A decision in favour of B-1 production well be motivated by political factors.

2015.357.001	Aircraft Communications	Bureau of Naval Personnel	This book was written for the enlisted men of Naval aviation--in particular the aviation radioman. The material in this book covers the field of aircraft communications in its entirety. Much of the information

Object ID	Title	Author	Summary
			concerns radiotelegraphy because the wireless system of communication is of primary importance to the aviation radioman. The methods and procedures for radiotelephony and visual signaling are also thoroughly explained. The visual signals discussed are flashing light, semaphore, flag hoise, pyrotechnics, panels, and hand signaling.
2015.357.002	U.S. Navy, The : A History	Miller, Nathan	As readable as fiction, as timely as today's headlines, this authoritative, concise history of the U.S. Navy traces the development of American seapower from the raggle-taggle Continental Navy of 1775 to current efforts to deploy strategic and tactical naval innovations for the twenty-first century. Originally published in 1977 and revised and updated twice, this book has come to be recognized as the standard history of the Navy, treasured by midshipmen at the Naval Academy and valued by general readers looking for a brief but inclusive study. In telling the story of the Navy, author Nathan Miller describes not only its ships and weapons but the role played by its men and women in the creation and protection of the United States. This new third edition includes enhanced coverage of the Marine Corps. (from Google Books)
2015.357.003	US Navy, 1945 to the Present	Silverstone, Paul H.	The book traces the evolution of the U.S. Navy from the end of World War II where many ships were decommissioned and orders for many new ships cancelled through the organizational overhaul created by the creation of the Department of Defense. Other challenges included the beginning of the Nuclear Age; the Cold War; Korea and Vietnam; the development of new naval weapons, ships, electronics, and propulsion; the introduction of guided weapons and ballistic missiles; amphibious warfare; and the emerging importance of the

			Middle East. The first picture is of the USS Midway (CVB 41). Caption includes a brief description as the lead ship in her class, which were the first Navy ships too broad to pass through the Panama Canal. In September 1947, an experimental V-2 rocket was launched from the Midway's deck.
2015.357.004	America's Hundred Thousand : The U.S. Production Fighter Aircraft of World War II	Dean, Francis H.	From the introduction. "There were over 100,000 of them. 100,000 US fighter airplanes. There were eleven distinct fighter types put out by nine US companies. Of these seven were for the Army and four for the Navy. Individual numbers produced varied from just over 500 to over 15,000. But the total was over 100,000 fighter planes, and such production will never happen again. today n o o n e could pay for that number even if they were desired."
2015.357.005	Norden Bombsight, The and the S-1 Bombsight Training Films	Army Air Forces Training Film Production Library	For the Norden Bombsight, Contents nclude: Principles, Operation, Preflight, Conduct of a Mission, and Leveling System. For the Sperry (S-1) Bombsight, Contents nclude: Principles, The Azimuth System, Operation, Preflight, Conduct of a Mission.
2015.357.006	CVN-75 Harry S. Truman, U.S. Navy Aircraft Carrier	Zimmerman, W. Frederick	A unique and valuable keepsake with beautifully printed color images of CVN-67, U.S.S. Harry S. Truman, including ship's specifications. A terrific book for anyone who likes the Navy, aircraft carriers, military history, or World War II. Includes a discussion on whether it is Harry S Truman or Harry S. Truman and how the controversy got started.
2015.357.007	CVN-72 Abraham Lincoln : U.S. Navy Aircraft Carrier	Zimmerman, W. Frederick	This slender nimble book is a unique keepsake with 20 beautifully printed color images of U.S.S. ABRAHAM LINCOLN, CVN-72, plus a Matthew Brady picture of her Presidential namesake, her specifications, and highlights from her service history.
2015.358.001	Bomb and Mine Disposal :	Reese, John W.	From the Introduction-- "At

Object ID	Title	Author	Summary
	WWII Transition		the outset I undertook to write this journal to record for my children, family, and friends, my personal experiences as a young naval officer commissioned during the warning months of World War II. I chose to emphasize my duties involving the disposal of unexploded ordnance that occurred shortly after the cessation of hostilities and embraced that period when the armed forces of the United States were being demobilized. Citizen soldiers and sailors were going home, taking with them the experience and knowledge they gained at great national expense. In every element of the armed services there were voices created by the departure of those called-up for duty during the war."
2015.359.001	Lone Survivor : The Eyewitness Account of Operation Redwing and the Lost Heroes of SEAL Team 10	Luttrell, Marcus	If you're looking for a true story that showcases both American heroism and Afghani humanity, Marcus Luttrell's Lone Survivor: The Eyewitness Account of Operation Redwing and the Lost Heroes of SEAL Team 10 (Little, Brown, \$24.99), written with Patrick Robinson, may be the book for you. In June of 2005, Luttrell led a four-man team of Navy SEALs into the mountains of Afghanistan on a mission to kill a Taliban leader thought to be allied with Osama bin Laden. On foot, the team encountered two adult men and a teenage boy. A debate broke out as to whether the SEALs should summarily execute the trio to keep them from alerting the Taliban. Luttrell himself was called upon to make the decision. He was torn between considerations of morality and his survival instinct, and he points out that "any government that thinks war is somehow fair and subject to rules like a baseball game probably should not get into one. Because nothing's fair in war, and occasionally the wrong people do get killed." Luttrell opted to spare the

Object ID	Title	Author	Summary
			Afghanis' lives. About an hour later, the Taliban launched an attack that claimed nearly a hundred of their own men but also the lives of all the SEALs except Luttrell, who was left wounded. Not long after that, the Taliban shot down an American rescue helicopter, killing all 16 men on board. Luttrell is sure that the three Afghanis he let go turned around and betrayed the SEALs. But if nothing is fair in war, neither is anything foreordained. Luttrell was found by other Afghanis, one of whom claimed to be his village's doctor. Once again, Luttrell had to rely on his instincts. "There was something about him," Luttrell writes. "By now I'd seen a whole lot of Taliban warriors, and he looked nothing like any of them. There was no arrogance, no hatred in his eyes." Luttrell trusted the man and his colleagues, who took him back to their village, where the law of hospitality -- "strictly nonnegotiable" -- took hold. "They were committed to defend me against the Taliban," Luttrell writes, "until there was no one left alive." The law held, and Luttrell survived, returned home and received the Navy Cross for combat heroism from President Bush. Copyright 2007, The Washington Post. All Rights Reserved. -- This text refers to the Hardcover edition. Product Description Four US Navy SEALs departed one clear night in early July 2005 for the mountainous Afghanistan-Pakistan border for a reconnaissance mission. Their task was to document the activity of an al Qaeda leader rumored to be very close to Bin Laden with a small army in a Taliban stronghold. Five days later, only one of those Navy SEALs made it out alive.

Object ID	Title	Author	Summary
			This is the story of the only survivor of Operation Redwing, SEAL fire team leader Marcus Luttrell, and the extraordinary firefight that led to the largest loss of life in American Navy SEAL history. His squadmates fought valiantly beside him until he was the only one left alive, blasted by an RPG into a place where his pursuers could not find him. Over the next four days, terribly injured and presumed dead, Luttrell crawled for miles through the mountains and was taken in by sympathetic villagers who risked their lives to keep him safe from surrounding Taliban warriors. A born and raised Texan, Marcus Luttrell takes us from the rigors of SEAL training, where he and his fellow SEALs discovered what it took to join the most elite of the American special forces, to a fight in the desolate hills of Afghanistan for which they never could have been prepared. His account of his squadmates' heroism and mutual support renders an experience that is both heartrending and life-affirming. In this rich chronicle of courage and sacrifice, honor and patriotism, Marcus Luttrell delivers a powerful narrative of modern war. (Source: Amazon.com)

2015.359.002	Hope : Entertainer of the Century	Zoglin, Richard	With his topical jokes and his all-American, brash-but-cowardly screen character, Bob Hope was the only entertainer to achieve top-rated success in every major mass-entertainment medium of the century, from vaudeville in the 1920s all the way to television in the 1950s, 1960s, and 1970s. He virtually invented modern stand-up comedy. Above all, he helped redefine the very notion of what it means to be a star: a savvy businessman, an enterprising builder of his own brand, and a public-spirited entertainer whose Christmas military

2015.359.003	Consolidated Aircraft Corporation	Pescador, Katrina	Founded by Reuben H. Fleet in 1923, Consolidated Aircraft Corporation (later Convair) became one of the most significant aircraft manufacturers in American history. For roughly 60 years, this prolific company was synonymous with San Diego. In fact, whole sections of the city were designed to provide homes for the Convair workers and their families. These men and women were responsible for building some of the most significant aircraft in aviation history, including the PBY Catalina, B-24 Liberator, F-102 Delta Dagger, as well as the reliable Atlas missile, which was vital in launching America into space. For more than 40 years, the San Diego Air and Space Museum has preserved the nation's aerospace history and technology. In this unique publication, head archivist Katrina Pescador and historian Mark Aldrich selected photographs from the museum's extensive collection to highlight the story of this major aircraft company and the people who contributed to its success.
2015.359.004	Monitor Chronicles, The : One Sailor's Account : Today's Campaign to Recover the Civil War Wreck	Geer, George S.	This book brings shipboard experiences to life through the words of Civil War sailor George S. Geer, whose never-before-published letters home to his beloved wife, Martha, faithfully chronicle the events in the short, fabled life of the USS Monitor. That life began on January 30, 1862, at Green Point, Brooklyn, New York, and ended on December 31 of that same year when the ironclad

			sand in 230 feet of water of Cape Hatteras, North Carolina. Contents: The duel -- The standoff -- The river -- Interlude -- The retreat -- The landing -- Newport News -- Washington -- The Carolina shore -- The campaign to recover the Monitor.
2015.360.001	USS Midway (CV-41) - Decommissioning - San Diego, California - April 11, 1992	USS Midway	Program from the decommissioning of the USS Midway (CV 41) in San Diego, CA on April 11, 1992. Includes the invitation from the Commanding Officer to the Decommissioning. Also includes a 2-page insert of the speaker's bio (Secretary of the Navy H. Lawrence Garrett III) and the Schedule of Events. Includes history with color photos; photos of VIPs; bio of Captain Larry L. Ernst; list of Midway's commanding officers; bios of John F. Schork, XO and Harry V. Samuelson, Jr., Command Master Chief; includes color photo of Midway's Hangar Bay with evacuees during Operation Fiery Vigil; chronology of Midway's Major events; statistics; Midway's Air Wings, Squadrons and Aircraft; list of decommissioning crew by states; color photo of Midway's awards; final plan of the day
2015.361.001	F4U Corsair in Action	Sullivan, Jim	Bringing to mind the exploits of "Pappy" Boyington and his "Blacksheep Squadron" and Tommy Blackburn with the "Jolly Rogers," the Corsair is among the most formidable U.S. fighters of World War II. The F4U maintained a kill ratio of 11:1 according to the United States Navy and went on to serve American forces in Korea, holding its own in the early years of the jet age. The Corsair was first conceived as a high-speed, high-altitude fighter for the Navy in 1938 when Chance Vought's design team drew up plans for a fighter with a 1,800 h.p. engine and a huge 13-foot propeller. The Corsair's

Object ID	Title	Author	Summary
			famous inverted gull wing design was introduced to allow prop clearance. Handling problems delayed the aircraft's deployment aboard carriers, but Marine Corps pilots quickly took to the powerful, rugged fighter and VMF-124, the first Marine squadron to fly the Corsair in combat, also produced the first Corsair air ace, Kenneth A. Walsh, by the summer of 1943. A total of 12,571 Corsairs were built between 1940 and 1952, most of them by Vought, but hundreds by Goodyear and Brewster as those companies' assembly lines had to be pressed into service to meet soaring demand for the remarkable aircraft. Jim Sullivan's exhaustive volume surveys the history of the Corsair from its first prototype to the restored warbirds that have continued to delight air show audiences down to the present day. (from sspbooks.com)
2015.363.001	US Navy Old Battleship Films	Campbell Films	This dvd is a collection of 8 old films. 1st Film; "A Day at Sea on a Battleship". Other titles include "A Day at Sea Battleship," and "A Day on a Battleship." This was a pre-WW2 film about the life and a day aboard a Battleship of the line; about 1938. Quite fascinating. A cameraman was asked to film a day on a ship at sea. It starts with wakeup, coffee, swabbing the decks, spit-polishing the ship, breakfast, Exersize, breakfast, relaxing, Gun practice, General Quarters, Fleet maneuvers, ship crafts and the end of a day. You get the feel why sailors say it is there home, because it really is. Runtime 19:09 Min's 2nd Film; "Blue Jackets 1942". Other titles include "The Blue Jacket's Manual 1942 Film Edition : Ships of the U.S. Navy," produced by the March of Time for the United States

Object ID	Title	Author	Summary
			Navy. This film is about the US Navy Fleet that shows all of the major ships of the Navy from Submarines, Destroyers, Cruisers, Carriers, to Battleships. Each is shown how they function in the Navy and how they are to used to fight the war with Japan. Great footage of all of the fleet in Pearl but it also shows the Battleships going through the Panama Canal. This film shows the navy puts there best foot forward just after Dec. 7th. Runtime 18:06 Min's
			3rd Film; "We Said We'd be Back". This film shows the build up the fleet in the pacific. Starts off with of course, Battleships, and goes through the fleet as America builds up her war arsenal against Japan. This was the very thing Admiral Isoroku Yamamoto was worried about if Japan went to war with America and about, America's industrial strength put into action. It is almost un-comprehensible how big the US Navy got in 1944 and 45 Amazing stuff. Runtime 14:46 Min's
			4th Film; "Home from the Sea". This was produced by the Dept of the Navy and it tells the story of our battleships from the beginning to the Memorial at Pearl with the Arizona. Lots of footage and stories of the ships like the Old Ironsides, USS Olympia, USS Texas, USS N. Carolina, (Showboat) USS Missouri, and the USS Arizona. Really great stuff. Runtime 8:27 Min's
			5th Film; "Battleship Crossroads". Title on cover is "Crossroads to the Pacific." This a combination of pre-ww2 films about the Pacific Fleet Armada. The Pacific fleet in 1938 did a practice run on Pearl and showed that Pearl harbor was venerable to a carrier attack. Although the Navy did the experiment, It is obvious that they did not learn from it. The rest of the film is about

Object ID	Title	Author	Summary
			fleet maneuvers and Hawaii vacation for the sailors. Runtime 12:08 Min's 6th film; "Battleship Newsreels". This a collection of newsreels about battleships. 1st Old Ironsides. 2. Anchors Aweigh. 3. N. Carolina (Showboat) being tested out. 4. Mighty Missouri launched and tested. 5. Japan surrenders on board the USS Missouri. 6. USS Wisconsin fires at Korea. 7. Might Mo fires at Korea. Runtime 22:08 Min's 7th film; "1st Line of Defense". Other titles are "Our First Line of Defense", and USN First Line of Defense. Shows Navy recruiting and Navy training. Considers the Navy to be the first line of Defense for the US. Shows capabilities of several ships and planes. Shows returning sailors greeting families. Runtime 9:20 min. 8th film; "BB62 & BB 39 film clips". "Footage New Jersey and USS Arizona". In 1989, My wife and our children filmed the USS New Jersey at Long Beach were she was stationed at the time. That day she was in the bay so we circled her in our sailboat. We filmed with a old VHS camera. Low quality by today standard. Plus, I was going through our footage and came across a segment of men cutting off the mast of the sunken USS Arizona. Just thought it was worth showing, and of course we wish to honor the all those men who died that day. Runtime 6:30 min. Copied from the Campbellfilms.com website.
2015.363.002	CVAN-65 USS Enterprise Aircraft Carrier	Campbell Films	A collection of films on one of the USS Enterprise (CVN-65). She was the world's first nuclear-powered carrier and the eighth United States naval vessel to bear the name USS Enterprise. Like her predecessor of War II fame, she is nicknamed "Big E". Also, at 1,123 ft she is the longest

Object ID	Title	Author	Summary
			naval vessel in the world. Her 93,284 long tons displacement ranks her as the 11th-heaviest super-carrier and had a crew of some 4,600 people. The only ship of her class, Enterprise and was slated the ship's retirement for 2013, when she would have served for 51 consecutive years, longer than any other U.S. aircraft carrier in American history. We hope you'll enjoy. 1st Film; "CVN-65 The Attack Carrier". This a great USN Carrier story from USS Langley CV-1 to the construction and use of Americas 1st nuclear Carrier CVN-65, USS Enterprise. Runtime 28:40 Min's 2nd Film: "Inside the Big E : The World's First Nuclear Aircraft Carrier." Runtime: 9:0 min. 3rd Film; "The Nuclear Navy". This a great story about the US Navy building an all new Nuclear Navy. From Submarines, to Destroyers, to Cruisers, to Aircraft Carriers. Great footage and history of these ships Runtime 28:25 Min's 4th Film; "US Navy In Vietnam". This film show how the US Navy helped fight the war in Vietnam. From small ships to the amazing carriers, this is a great story. Runtime 28:32 Min's 5th Film; "CVN-65 Newsreels". This a short collection of newsreels on the USS Enterprise CVN-65. 1st, Navy at the Fair. 2nd, Nuclear Fleet sails around the world. 3rd, The Protects our friends. 4th, US Navy on ready for Europe. Runtime 11:01 min's 6th Film; "CV-6 Enterprise Short Stories". Other title is "WWII CV-6 Uss Enterprise." This is a collection of short stories on the CV-6 USS

Object ID	Title	Author	Summary
			Enterprise. 1st, Last Days of CV-6. 2nd, Pre-war Aircraft training on CV-6. 3rd, CV-6 fights off Kamikazes. 4th, Navy Day, 1945. Runtime 9:39 min's From the campbellfilms.com website.
2015.363.003	Grumman F9F Panther & Cougar	Campbell Films	A collection of films and newsreels on the famous Grumman F9F Panther, the 1st operational American carrier based jet. Armed with 20mm cannons and other stores of munitions, the F9F was used extensively and effectively in Korea. The F9F was also the 1st Navy Jet to be used by the Blue Angels. We hope you'll enjoy. 1st Film; "USMC Close Air Support". This is a USMC film on the use of close air support in Korea. This idea was developed at the end of WW2 and was used very effectively in Korea. In this film, the F9F Panther is demonstrated. This film is truly a piece of aviation history. Runtime 13:48 Min's 2nd Film; ; "F9F Blue Angels in Korea". "Blue Angels over Korea". This film was made by the US Navy and a TV show about the early days of the Blue Angels. In this story, the 4 blue Angels are divided up on the carrier to extend there flying skills with the other carrier pilots as they flew missions over Korea. And the drama starts from here!!! Great Naval film footage history. Runtime 23:54 Min's 3rd Film; "Carriers off of Korea". "Carriers of Korea". This is a very rare footage of the US Carriers fighting the North Koreans by Naval armament. The famous AD-1 Skyraider, F4U Corsairs, and the F9F Grumman were the mainstay of the aerial fighting against the enemy. Lots of carrier action and combat footage. Runtime 13:14 Min's 4th Film; "The 7th Fleet". This is a Navy film on a short history of the 7th Fleet. From 1943

Object ID	Title	Author	Summary
			during WW2 and then on to Korea. The 7th Fleet was known as the "FAST Fleet" was a major reason the Communists were stopped. Lots of Carrier action in this film. Plus, the post Korea story of protecting Formosa. Runtime 13:14 Min's 5th Film; "F9F Newsreels". This is a collection F9F and Korea newsreels. 1st, US sends Ships and Planes to Korea. 2nd, Command of the Sea. 3rd, F9F Cougar crashes overboard. 4th, Carrier Mirror landing by a F9F Caugar. 5th, Korea War newsreel B-29 to F9F's. Runtime 12:37 Min's 6th Film; "F9F Weekend Warriors". This is actual 2 films by the Navy to persuade one to join the USN Reserve. 1st shows a young man who joins the Navy, and hopes to fly one day. Great footage of the CVL 28; USS Cabot and aircraft like the F4U and F9F Jets, 2nd reel is of the USS Monterrey; CVL-26, and the aircraft used in this reel are mostly the F9F Panther Jet. Also the TBF Avenger and the SNJ Trainer. Runtime 8:38 min's From Campbellfilms.com website.

2015.363.004	US Navy's Douglas A4 Skyhawk	Campbell Films	This DVD is a collection of very RARE films on the Famous USN Douglas A-4 Skyhawk. This the amazing story of the little Skyhawk Jet aircraft was designed to replace the aging AD-1 Skyraider. Because the Skyhawk was a very efficient design with a Delta wing, it did not need to have folding wings. Thus, it was very light, fast and reliable. 1st Film; "ID the A-4 Skyhawk". This is a great Navy film on the A-4 Skyhawk and it's visual characteristics. We added extra footage of great carrier action for you to enjoy too. Runtime 10:04 Min's 2nd Film; "Skyhawk Blue Angels". This film is by the

Object ID	Title	Author	Summary
			Navy about a day and a life of a the "Blue Angels" and their team as they go to airshow to airshow in America. See the pilots and the crew as they go through there passes. Another great film . Runtime 14:29 Min's 3rd Film; "Ready on Arrival". This is a great US Navy film on the importance of the USN being used around the world. Narrated by Alexander Scourby,Lots of carrier action and A-4 Skyhawks, plus many other Navy aircraft at the time. Runtime 28:19 Min's 4th Film; "Skyhawk Newsreels". Other title is "Navy Newsreels." This is a collection of short newsreels on Spitfires. 1st; Test Flight of the A-4 Skyhawk. 2nd; Skyhawks over Vietnam. 3rd; Hook down, wheels down. Runtime 11:43 Min's 5th Film; "James Stockdale, POW". Other title is "VADM Stockdale." This is a story most folks don't know about. James Stockdale was a Naval A-4 Skyhawk pilot from the carrier USS Oriskany that was shot down over Vietnam. He was there for the next 7 years as a POW and was the guiding light for all of the other downed pilots that were unfortunate to have to be a POW at the famous "Hotel Hilton" in Vietnam. Adm Stockdale was awarded the Medal of Honor for his actions as a POW. Amazing story. Runtime 9:37 Min's 6th Film; "Search and Rescue". This film is about a F-4 Skyhawk pilot that had to ditch his plane after he was hit on a bombing run over Vietnam. As he parachuted at sea, and a Sea Sprite, Sea King and a AD Skyraider went after him to rescue him from the sea. Great footage of all aircraft and methods. Runtime 14:30 Min's From Campbellfilms.com website.

Object ID	Title	Author	Summary
2015.363.005	USN CVE Escort & CVL Light Carriers	Campbell Films	This DVD is a collection on the "all but forgotten" and amazing US Navy CVE Escort Carriers and CVL Light Carriers. These Carriers sometimes called "JEEP Carriers" and were actually 2 very different design types. The CVE Escort Carriers were built on top of Oil tankers and are about 550 ft long with a speed between 14kts to 20 kts. The CVL Light Carriers were about 650 ft long and were much faster and built on top of Cruiser hulls. Up to 30 knots. Also the CVL could keep up with the Fast Carrier Fleet during WWII. Big carriers were very expensive and "Jeep" Carriers were great for Convoy Duty and also to contain the Japanese enemy on islands that were bypassed. We hope you'll enjoy. 1st film; "Land and Respotting Aircraft". Other title "CVE Landing & Respotting : Casablanca Class." In this film by USN, we have a short documentary on how to Land F4F Wildcats and TBF Avengers on a CVE. This is a really great color film but I don't know what ship they filmed the training on. If anyone can ID the ship, We will give you a free DVD for your help. THE carrier looks to me to be a Casablanca-Class. Runtime 25:26 Min's 2nd film; "Battle for Leyte Gulf". Other title "The Battle of Leyte Gulf," In this Army-Navy film; it tell's the story of the USN's Battle of Leyte Gulf and Taffy 3's battle of San Bernardino Straights. In this ferocious conflict, 5 small American ships are sunk by the Mighty Japanese Navy Including the CVE-73 Gambier Bay. What a conflict. Latter that day, the CVE-63, St Lo was sunk by Kamikazes, but the fighting spirit of the small USN Taffy 3 fleet, cause the Japanese to retreat at the end. Amazing!!! Runtime 20:53 Min's 3rd Film; "Now it can be

Object ID	Title	Author	Summary
			Told". Other title "CVE-60 Capture of U-505." In this film, A CVE-60, USS Guadalcanal set it's sites to capture a Nazi Submarine. This is a true story and in the end, they did capture U-505 and with all if its secrets codes. Thus, the story was kept in secret until after the war. U-505 is now a Museum. Runtime 15.46 min's 4th Film; "CVL 26 and 28; Weekend Warriors". This is actual 2 films by the Navy to persuade one to join the USN Reserve. 1st shows a young man who joins the Navy, and hopes to fly one day. Great footage of the CVL 28; USS Cabot and aircraft like the F4U F9F Jets, F6F's too. 2nd reel is of the USS Monterey; CVL-26, and the aircraft used in this reel are mostly the F9F Panther Jet. Also the TBF Avenger and the SNJ Trainer. Again great footage of these CVL ships. Runtime 26:06 Min's 5th Film; "CVE and CVL Newsreels". This is a collection of Newsreels on the amazing CVE's and the CVL carriers. 1st; 1st escort Carrier Launched-- CVE-55. 2nd; IX-64 USS Wolverine Training Carrier on the Great Lakes. 3rd; CVE-73 USS Savo Island, brings P-38's to Guadalcanal. 4th; CVL-23 USS Princeton Hit in action. 5th; CVE's and CVL's in action off of Okinawa. 6th; CVL-28 USS Monterey leaves NY to bring troops home from war. 7th; CVE -118 fighting off Korea with F4U's. 8th; CVE-58, USS Corregidor Brings H-34 Army Helicopters to Germany. and 9th; CVL-AGMR-2 shown in "of Ships and Butter. Runtime; 21:35 Min's
2015.363.006	US Navy's Early Blue Angels	Campbell Films	"Early Navy Blue Angels films F9F Panther AD Skyhawk Airshow Korea DVD" This DVD is a collection of US Navy Films on the Famous "Blue Angels". Starting with the Blue Angels flying the

Object ID	Title	Author	Summary
			famous F9F over Korea, to a later film showing the Blue Angels flying the famous AD Skyhawk. Amazing aircraft and great story!! We also added a 5 min of stock footage of F/A-18 Hornet that we filmed as the flew around our home one day. We hope you will enjoy this DVD. 1st Film: "Blue Angels over Korea". Other title "F9F Blue Angels Korea." This film was made by the US Navy and a TV show about the early days of the Blue Angels. In this story, the 4 blue Angels are divided up on the carrier to extend there flying skills with the other carrier pilots as they flew missions over Korea. And the drama starts from here!!! Great Naval film footage history. Runtime 23:54 Min's 2nd Film: "AD Skyhawk Blue Angels". This film is by the Navy about a day and a life of a the "Blue Angels" and their team as they go to airshows to airshows in America. See the pilots and the crew as they go through there passes. Another great film . Runtime 14:29 Min's 3rd Film: "Navy Newsreels". Other title "USN Newsreels." This is a collection of Naval aviators in the carrier fleet. 1st; F7F Tigercat. 2nd; F9F skids off carrier. 3rd; CV Landing Mirrors. 4th; CV-59 bring aboard Fury Jets. 5th; How Jets work, Banshees. 6th; AD Skyhawk added to the Navy. Runtime 9:39 Min's 4th films: "Fashion in the Air". Other title "Fashions of the Air." This too is a Navy film on the Paris Airshow where the Blue Angels and other Country Aerobatic planes show there skills. Plus lots of unique aircraft on display of that time. Runtime 23:59 Min's 5th Film; "Weekend Warriors". This is a Navy film telling the benefits of being a Weekend

Object ID	Title	Author	Summary
2015.363.007	Vought F8U Crusader & A-7 Corsair II	Campbell Films	Warrior. From the "Blue Angels", to SNJ's landing on carriers. Great opportunities in the Navy for all! Plus, we added footage of F9F Cougars and Furys flying over Miramar in Southern California. Great stuff. Runtime 8:38 min's. 6th Film: "Stock Footage F/A-18". Other title "F/A-18 Blue Angels." This is a film clip we took on some F/A-18's flying over San Dimas where we use to live. We were lucky to get a film footage of them as they were in a holding pattern waiting to fly off for a show. Nothing great overall, but I think it was related and fun to see. . Runtime 5:12 Min's
			"Vought F8U Crusader, plus Vought A-7 Corsair II" This DVD is a collection of old vintage films on the single engine F8U Crusader supersonic gun fighter and the A-7 Corsair II which was a subsonic shorter version of the F8U design. Both were very capable designs. The F8U was called the "last gunfighter" and the A-7 Corsair II was a rugged attack Bomber. We hope you'll enjoy!
			1st Film; "The Life on a Carrier". A Vietnam Carrier in action showing the life on board the carrier and then the trip home. Runtime 28:14 Min's
			2nd Film; "Vought F-8U Crusader". Other title "Familiarization of F8U-1." 1st, The Navy unveils the F8U Crusader to the public and then shows how to familiarize the pilot with the Radar system in the F8U-1 and F8U-2. Runtime 13:47
			3rd Film; "Vought A-7 Corsair II". Other title "A-7 Corsair II." A Navy film on how to fly the A-7 Corsair II with it's high Angle of Attack Characteristics . Runtime 23:39 Min's

Object ID	Title	Author	Summary
			4th Film; "No Place for 2nd Place". Other title "Top Gun." Top Gun training using F-4 Phantom vs F8U Crusader. Ends with showing the F-14 Tomcat in flight and it's future. Runtime 8:12 Min's 5th Film; "USN Test Pilots ". Other title "Navy Test Pilots." Navy pilots learn the how to test new aircraft for the Navy. Aircraft are, F8U Crusader, AD Skyhawk, F9F Cougar, Sky warrior, and FJ-Fury. Runtime 13:30 Min's 6th Film; "USN Aircraft Newsreels". 5 short films. 1st: Navy Safeguards Far East. 2nd: A-7 Corsair II Ejection system. 3rd: F8U as a refueling aircraft. 4th: Aircraft aboard CV-60. 5th: F8U breaks speed record. 6th, CV-65 in Vietnam, Runtime 12:56
2015.363.008	Army & Navy Search and Rescue	Campbell Films	This DVD is a collection of Army and Navy films about SAR, Search and Rescue for downed pilots in WW2, Korea and Vietnam. As time went on, the services developed methods to search, find and extract men mostly lost at sea. This DVD has those stories and equipment used throughout this process. We hop you'll enjoy. 1st Film; Navy "Search and Rescue". Other title "USN Search & Rescue." This film is about a F-4 Skyhawk pilot that had to ditch his plane after he was hit on a bombing run over Vietnam. As he parachuted at sea, and aa Sea Sprite, Sea King and a AD Skyraider went after him to rescue him from the sea. Great footage of all aircraft and methods. Runtime 15 min's 2nd Film; "Helicopter Rescues". Other title "Helicopter SAR." This a collection of Army WW2 helicopters developed for rescue and their stories to US Navy development of the helicopter for the same use. Runtime 14:45 Min's

Object ID	Title	Author	Summary
			3rd Film; "USAAF Radio Operator". Other titles "B-17 SAR" and "B-17 Sea Rescue." This is an AAF film on a B-17 crew that had to Ditch there B-17 at sea and at night. Because of the great training the radio operator received from the Army, He was able to repair the emergency hand cranked radio and radio for help. YYY, All were rescued. I think you can still buy this type of emergency radio today. Runtime 20:56 Min's
			4th Film; "Survival of the Fittest". Other title "Survival of Fittest." This a USAAF film on way fitness is important for survival. Starts off with 4 amazing survival stories from the Jungle, to the arctic, to the ocean, and how training and fitness will save lives. Runtime 16:33 Min's
			5th Film; "7 were Saved". Other title "7 were Saved PBY." This is a "B" movie about a post-WW2 (SAR) crew that searched tirelessly for a group of military personal that went down at sea in a Military transport. Of course there is a Love triangle and our hero eventually saves all and gets the girl. We shortened the film to 17:16 min's Footage mostly of the famous PBY Catalina and some on the B-17 that carries a survival boat.
			6th Film; "SAR Newsreels". This is a collection about SAR newsreels throughout the years and there equipment used during and after WW2. 1st; General Twining Rescued at Sea. 2nd; Steel Lift rafts 3rd; High speed boats for coastal rescues. 4th; Submarine SAR. 5th; PBY SAR. 6th; B-17 Dutchman. 7th; Pyrotechnic Berry Pistol. Runtime 17:14 Min's
2015.363.009	US Marine Corps Aviators	Campbell Films	This DVD is a collection of old vintage films on the Marine Corp Aviator. The Marine aviator's major role is for troop ground support,,very

Object ID	Title	Author	Summary
			different in its purpose from that of a Naval aviator, who protect the seas. We hope you'll enjoy!
			1st Film; "The Marine Aviator". A USMC film "Fly Marine". Other title "Fly Marines." Marine pilots are used as close air support for their fellow Marines on the ground. In this film, aircraft like the F4 Phantom, A4 Skyhawk, A6 Intruder, AV-8 Harrier, C-130, O-10 Bronco, CH-53, AH-1 and the UH-1 helicopters are shown in use. Runtime 12:47 Min's
			2nd Film; "The Milk Run-WW2". This is a very old film on the USMC Aviators flying the SBD Dauntless and the F4U Corsair in the Pacific Island war against the Japanese. Runtime 17:25
			3rd Film; "Close Air Support-Korea". The ground Marines need close air support and the carrier born F9F Panthers are used very effectively for this need in Korea. Great footage. Runtime 9:10 Min's
			4th Film; "On Target-Vietnam". During the Vietnam conflict, the Marines were sent out to do "Search and Destroy" Missions. The Marine Aviator was called in when the enemy was found and used in coordinated attacks. Runtime 13:11 Min's
			5th Film; "Marine Helicopter Pilots." Other title "USMC Helicopter Pilot." A brief story about the use of the Marine helicopter uses during the 1950's. Aircraft like the Sikorsky CH-19, Bell 47 and the Fairchild Hiller FH-1100, for uses such as troop deployment, supplies, Recon, and wire laying and other missions. Runtime 9:16 Min's
			6th Film; "USMC Aviator Newsreels". 5 short films. 1st: USMC Aviators on Guadalcanal. 2nd: F4U's on Carriers. 3rd: Marines get the F7F Tigercat. 4th: H-16's

Object ID	Title	Author	Summary
			used in a USMC Demonstration. 5th: USMC Vertical Envelopment. Runtime 19:38 7th film; "Major Boyington is Alive". Other title "Pappy Boyington found Alive." A short history of the famous Marine Ace aviator, Major Pappy Boyington who was the leader of the famous VMF-214 Black Sheep Squadron in the Pacific. After his 26th confirmed kill, Pappy Boyington was shot down and thought to be lost in action after the war, he was discovered alive and had survived in a Japanese POW camp. Runtime 5:19 min's The cover lists a segment "Airshow Fashions in Air" but it is not on the Root Directory of the DVD nor on the DVD

2015.363.010	US Navy Abandon Ship Training	Campbell Films	US Navy and Army; "Abandon Ship and Swim and Live" This DVD is a US Navy and the US Army Air Forces film on Surviving at sea. This story is about how to survive if your ship goes down in the ocean. This is a great series of training films on how to survive in the cold, hot and wet seas. This film was part of a AAF "LAND and LIVE" series that the Army produced during WW2. Plus the Navy's version of how to abandon ship. The training films by the Navy and the Army are just as valid today as they were then. There is a lot of great information in them. 83 minutes total and we hope you'll enjoy this collection. 1st film; "Abandon Ship pt1". Other title "General Preparedness." (Preparedness) In this USN film, aboard a Battleship, a Navy crew is trained in the basics of general preparedness to the process of abandoning a ship. Runtime 10:01 Min's 2nd film; "Leaving a Ship pt2". Other title "Methods of

Object ID	Title	Author	Summary
			Leaving Ship." In the part, the Navy shows how to prepare and how to climb down a net, or how to properly jump of a sinking ship. Short, but important. Runtime 2:55 Min's 3rd Film; "Escaping from Burning Oil pt3". Other title "Escape through Oil." In this Navy film, one of a sailors greatest fear was to burned alive and the Navy shows how to swim under burning oil and how to splash the fire away so you don't get burned. Runtime 5:06 Min's 4th Film; "Floatation Devices pt4". Other title "Emergency Flotation Tactics." (Emergency Flotation Tactics). In this film, the Navy shows how to survive in the ocean with different kinds of floating devices, rafts boats, life jackets and how to make your own flotation device with your trousers. Runtime 10:31 min's 5th Film; "Surviving Marine Life pt5". Other titles "Defense Against Marine Life" and "Defense Against Sea Life." SHARKS, Barracudas, and other dangerous creatures and how to stay alive. Jaws anyone? Runtime 5:47 Min's 6th Film; "Survival Swimming". Other title "USN Survival Swimming." This a Navy film in 3 parts. 1st; Survival Swimming --How to help yourself and others. 2nd; Approaches--This shows how to approach a fellow sailor that needs help. And, 3rd; Breaks--In this film, sometimes folks panic in the water, this film shows how not to get drowned yourself as you help others. Also shows different techniques on how to rescue swim. Slow, technical, but important information. I added a little "Barnacle Bill" music in the beginning for fun because it was silent at 1st. Did you know that Barnacle Bill could not swim?? Runtime 21:47 Min's

Object ID	Title	Author	Summary
			7th Film; "Army's Swim and Live". Other titles "Army Swim and Live" and Army's Swim and Live Training." This is a great training film by the Army on basic swimming techniques on how to survive if you convoy ship goes down. We also added a few related newsreels of the day such as, GI's Love the girls, Steel rafts, How to Swim in 10 Easy Lessons, and General Twinning's WW2 sea rescue. Runtime 26:52 Min's
2015.363.011	USS Hornet; CV-8 & CV-12	Campbell Films	A collection of seven films about the two aircraft carriers named Hornet. Quoting the catalog from Campbellfilms.com: "1st Film: "371 Days of Glory". This is a short story of the USS Hornet's amazing of 371 days of Glory. From the day she was commissioned to the major battles that changed history, to her end 371 day later at the battle of Santa Cruz where she came to an end. The USS Hornet CV-8 served her country with such amazement in America time of need. Runtime 12 Min's. 2nd Film: "Doolittle Raid." This a great documentary story on the Doolittle raid from the deck of the USS Hornet CV-8. The US was desperate of any good war news and the success of the Doolittle did just that for America. In April of 1942, just 5 months after Pearl Harbor Attack, Doolittle and his 16 B-25's, launched from the deck of the USS Hornet took off and bombed Japan. It did little damage to Japan, but it shocked the Japanese people because the Military said Japan could never be attack!! OOPS. An amazing story and Heroes. Runtime 10:41 Min's 3rd Film: "Midway is East". This is another film from the award winning TV series called "Victory at Sea" This is about the battle of Midway. The battle that turned the tide against

Object ID	Title	Author	Summary
			the mighty Japanese Imperial Navy. Prior to that battle, the Japanese had Victory Fever and should have won this battle because the naval size difference, but a few twists of fate changed the course of history and the USN won a major victory over Japan. The USS Hornet was one of the 3 carriers that fought in that battle. Runtime 26:15 Min's . 4th Film: "Hornet's Lost Squadron 8". This a Memorial film for Torpedo Squadron 8 from the USS Hornet that was lost in the Battle of Midway. Flying the obsolete Douglas TBD Torpedo Bomber, all were shot down without a single torpedo hit and only Ensign George Gay survived that day. Amazing story of very Brave men! Runtime 7:39 Min's. 5th Film: "CV-12 Newsreels". This is a series of newsreels on the CV-12. 1st newsreel: "New 'Shangri-La' Honors Historic Raid on Tokyo; 2nd newsreel: "Air and Sea Battles Mark War In Pacific"; 3rd newsreel "Sea Battle Of The Philippines"; 4th newsreel: "Third Fleet Shells Japan." Great Stuff! Runtime 11:17 Min's. 6th Film: "The Fleet Came To Stay". This is a Navy film about the how the Navy came back to stay against the Japanese Navy. Mostly about Fast carriers and their task forces, they fought the Japanese to the bitter end. Runtime 19:16 Min's. 7th Film: "The Eagle Has Landed". Apollo 11 was the 1st space flight that landed men on the moon. This is that story, and with the USS Hornet retrieving the astronauts from the sea after their return!! Great story!
2015.363.012	WWII US Navy RADAR Secrets	Campbell Films	A collection of six films about radar and its use in World War II. Quoting the catalog from Campbellfilms.com: 1st Film: "Radar; Weapon of War". Other title "Radar as a

Object ID	Title	Author	Summary
			weapon." This film was made by the US Navy and show the fundamentals of how to use RADAR. It shows airborne RADAR and who to find enemy ships and submarines and then on board a ship, how to find enemy ships and how to get the range to fire at them this is a great piece of Naval history. Runtime 21:10 Min's. 2nd Film: "Secrets". Other title "War Secrets; RADAR." This film is Navy film on the Secrets of RADAR!! . From Ship to Ship, Ship to Planes, Planes to ships and Planes to Submarines. Another great film . Runtime 7:21 Min's. 3rd Film: "Planes and Radar". This film is about Navy airborne type of RADAR and the different types. The idea was to have a RADAR scout first to warn the advancing Airborne flights so they can be effective. Very RARE film. Runtime 9:28 Min's. 4th films: "Conquest at Night". Other title "Ships and RADAR." This too is a Navy film and it how a Destroyer finds and attacks its enemy at sea and at night. A miracle at Sea!! As they finally attack, you can see the shells fired on the RADAR screen as they go flying to their target. Amazing. RADAR is what saved the Battle of Empress Augusta Bay. Runtime 9:46 Min's. 5th Film; "USN RADAR Newsreels". Here is a collection of newsreels on US Navy during WW2 and post war. 1st; Allies reveal RADAR after the War. 2nd Newsreel; RADAR Ferry. 3rd; Guided F6Fs. 4th; RC-121 RADAR Planes. 5th Newsreel; USS Triton; RADAR picket. 65th Newsreel; RADAR Ship Cobra. 7th Newsreel; P-3 Orion is added to the fleet. Great stuff. Runtime 12:24 min's 6th Film: "Grandpa's Bailing Out". Other title "Bailing Out

Object ID	Title	Author	Summary
			Cartoon." This is a bonus film that is by the US Navy on the importance of how to bail out if you need to. Great cartoon. Runtime 9:42 Min's."
2015.363.013	US Navy Anti-Submarine Warfare	Campbell Films	A collection of three films and a fourth item consisting of consolidated newsreels about USN Anti-Submarine Warfare. Quoting the catalog from Campbellfilms.com: 1st Film: "To Catch A Shadow". This is a story about ASW against Soviet Navy Submarines. Using the famous P-3 Orion, S2 Tracker, Sea Kings helicopters and P2 Neptune's to hunt an enemy submarine. The USS Yorktown CV-10 patrols the seas with a convoy of Destroyers and subs to find and track Russian submarines. Great story of that action. Interesting is a 15 sec film clip used in this film of the SSN-589 on the surface, A very famous submarine that went down in history. Amazing You might want to look up SSN-589. Runtime 30:31 Min's. 2nd Film: "The ASW Hunter Killers" . This ASW film highlights the USS Wasp CV-18, the Grumman S2 Trackers and Helicopters to track Russian submarines. Great footage of all three USN assets as new sailors join the hunt. Runtime 15:00 Min's 3rd Film: "Goblins At Your Doorstep". This tells the story from the USS Randolph (CV-15), plus DD- 943 and DD-837 about how the planes, and ships hunt the enemy. Aircraft used are the S2 Tracker, CH-34 , AD Skyraiders P-2 Neptune's against our Tench class diesel submarines for training. Runtime 29:12 Min's. 4th Film: "Anti-Submarine Newsreels". This is a collection of 5 ASW films. 1st; Cuban Crisis. 2nd; New High speed Helicopter UH-2a Sea Sprite. 3rd; Sky Jinks-Helicopter torpedo drone. 4th; Speed

Object ID	Title	Author	Summary
			runs, New A4 Phantom and Hs-s2 Sea king. 5th; P3 Orion added to fleet. Runtime 15:00
2015.363.014	US Navy Grumman TBF Avenger	Campbell Films	A collection of four films and two compilations, newsreels and accidents about the Avenger. Quoting the catalog from Campbellfilms.com: 1st film; "ID the TBF Avenger". Other title "ID Grumman Avenger." This is a Navy film on the Grumman TBF Avenger and how to identify the aircraft by its features. Great piece of history. Runtime 10:04 Min's 2nd film; "Land and re-spotting Aircraft" Other title "Landing Avengers." This is a really amazing film in great color about the way a crew lands F4F Wildcats and TBF Avengers on a WW2 aircraft Carrier at sea. Lots of really great team work plus, fantastic footage of these 2 great planes. This may be the only copy of this film left. This is the original phase "Hook Down, Wheels Down, Flaps Down" in great WW2 fashion. Runtime 25:22 Min's. 3rd Film; "TBF Factory". This film was by the War Dept and was called "Mary Smith, American". The story-line is about American Women (Mary Smith) working in factories to aid the war effort. In this version, Mary and other girls, build TBF Grumman Avengers. At the end she sings "Swing High for the Navy" because she lost her man in the war. Runtime 9:05 Min's. 4th Film; "Aerial Torpedo Attack". This a great piece of history of Navy's Grumman TBF Avenger and the SB2C Helldiver dropping torpedoes and there different types of torpedoes and different heights. Runtime 27:44 min's. 5th Film; "WW2 TBF Pacific War Newsreels". This is a short collection of newsreels on the US Navy fighting the Japanese in the Pacific War. We picked

Object ID	Title	Author	Summary
			out 5 that included the TBF Avenger. 1st; Invasion of Palau. 2nd; British Carriers Attack Sumatra. 3rd; Japan Attacks Task Force. 4th; Tokyo Strikes. 5th; 3rd Fleet Strikes Japan. Great story. Runtime 19:29 Min's. 6th Film; "TBF Crashes". Other title "TBF Accidents." This is a collection of the film clips of the hazards and crashes of the TBF Avenger. 1st, we start off with a very RARE Navy cartoon called "Avoidable Carrier Accidents", then onto carrier and land crashes of the TBF Avenger. We ended the footage of a "TBF Crashes" with a film clip that shows a badly damaged TBF that landed and her tail gunner was killed by a 20mm round. The crew pushed the TBF of the fantail of the carrier with the gunner still inside of the plane as a memorial to the Gunner. Runtime 13.01 Min's."
2015.363.015	US Navy Midway Class Aircraft Carriers	Campbell Films	A collection of six films about Midway-class aircraft carriers. Quoting the Campbellfilms.com catalog: 1st Film; "USN Carrier History". Other title " Fighting Ladies." This shows the importance of the USN Carriers, from USS Langley CV-1 to the construction of the Yorktown class, to Essex class to the Midway class and finally, the 1st nuclear Carrier CVN-65, USS Enterprise. Runtime 17:25 Min's. 2nd Film; "The USS Midway, CV-41". Other title "CV-41 Flattop." This a great story about the early days of the USS Midway CV-41 at sea. This rare film shows the USS Midway as a "straight deck" carrier with F8F Bearcats and AD Skyraiders in use, plus a few jets onboard. Runtime 9:39 Min's. 3rd Film; "A Day aboard the USS Franklin D. Roosevelt". Other title "A Day on the CV-

Object ID	Title	Author	Summary
			42." In 1957, a film crew got to go aboard the USS Roosevelt for a day. Great footage of the ship in action too. Runtime 12:26 Min's. 4th Film; "The Battle of the Coral Sea and Midway". This film is from the 1952 series called Victory at Sea, called Midway. This episode tells the story of the how Japan took over almost all of the Asian Pacific and was only stopped at the Battle of the Coral Sea and Midway. Japan never recovered her war with the US, after these battles. These great battles are where the Midway class got their names. This is a great story. Runtime 26:24 Min's. 5th Film; "USS Midway CV-41 Newsreels". This a short collection of newsreels on the USS Midway CV-41. 1st, USS Midway Launched. 2nd, Midway with the 7th Fleet. 3rd, USS Midway carries out Arctic Tests. 4th, Short Carrier Post WW3 story on Naval aircraft. Runtime 9:07 min's. 6th Film; "USS FDR, CV-42". Other title "CV-42 Newsreels." This is a collection of short stories on the CV-42 USS Franklin D. Roosevelt. 1st, CV-42 launched from drydock. 2nd, CV-42 commissioned. 3rd, Ceremonies of CV-42 at Navy Day. 4th, CV-42 Civilian go aboard the CV-42. Runtime 11:02 min's. 7th film; "USS Coral Sea CV-43" This too is a collection of short stories on the CV-43, the USS Coral Sea. 1st, USS Coral Sea sent to Vietnam. 2nd, The AD Skyraider story and the CV-43. Runtime 8:01 Min's."
2015.363.016	US Navy 1942 Blue Jackets	Campbell Films	US Navy Blue Jackets 1942 old Films Ships Airplanes PBV Seaplanes Submarines WW2 DVD This is an collection of old 1942 films the we Digitized in HD called US Navy "Blue Jackets"!! It was a series of

Object ID	Title	Author	Summary
			films on the US Navy's fleet of Ships, Airplanes, PBY's and Submarines. These are very rare films, and, some films I have never seen before. These films show our Navy's fleet in 1942 and before 1942. One of major planes was the TBD Devastator. Thought to be a really great plane, it proved to be a disaster in the battle of Midway. These films are very old films and we hope you'll enjoy this collection. 1st Film; "Men of the Navy". This is the 1st of these films we have and it is about an overall view of men learning to be sailors in the US Navy and of course, many ships an planes included as the learned there craft to serve. Really great film. Runtime about 26:17 Min's 2nd Film; "Ships of the Navy". This film show great footage of the US fleet just before 1941. The film shows a breakdown of the each type of ship and there purpose in the Navy. From submarines, to Cruisers, to Battleships to Aircraft Carriers to Destroyers. This film explains there function. Great footage of the ships going through the Panama Canal too. Amazing stuff. Runtime 17:53 Min's 3rd Film; "Airplanes of the Navy". Other title "Planes of the Navy." This too is about the 1942 Navy and it's planes. Again, The TBD Devastator was viewed as a cutting edge torpedo dive bomber, but history revealed it's flaws. Included in the this film are the Catapult seaplanes of the Cruisers and battleships of the day, plus PBY patrol bombers, and not to forget the famous F4F Wildcat and the SBD Dauntless Dive bombers. Runtime 21:21 Min's. 4th Film; "Submarines of the Navy". When WW2 broke out, the pacific fleet was all but on the bottom of Pearl Harbor. What was left overall was the

Object ID	Title	Author	Summary
			submarines to fight the war. At that time , the US had only 57 submarines and 11 of them were the old "S" type. What is shown in this is film are mostly the newer "Salmon Class" subs that were very close to the "Gato Class" submarine that did so much damage to the Japanese merchant fleet during WW2. Very rare footage of these old submarines. Runtime 10:13 Min's
			5th Film; "US Navy Hands it Back". This one of the 1st films showing the US Navy in action in the Pacific war against the Japanese. Early footage of ships, men, and planes preparing to fight. Really great film archival footage of the this time frame. Runtime 12:40 Min's
			6th Film; "Midway Dive Bombers". This is a film by us from a collection film clips that we have on the Famous Douglas Dauntless DBD and the Devastator TBD. We call it "USN Cadets to Warriors, to Midway". We think you will like it. You can see it on our website on youtube. Runtime 9:31 Min's
2015.363.017	USN Aircraft Carriers Landing Stories	Campbell Films	USN Carrier Landing Stories This DVD is a collection of very RARE films on Carrier Landings and the history of naval aviation. The rarest film on this DVD is called "Landing and Re-spotting Aircraft". We are a small father and son team and we collect old and rare films. This is one them. I have never seen this film anywhere and we hope you'll enjoy this DVD. 1st film; "Landing and Re-spotting Aircraft". This is a really amazing film in great color about the way a crew lands F4F Wildcats and TBF Avengers on a WW2 aircraft Carrier at sea. Lots of really great team work plus, fantastic footage of these 2 great planes. This may be the only copy of

Object ID	Title	Author	Summary
			this film left. This is the original phase "Hook Down, Wheels Down, Flaps Down" in great WW2 fashion. Runtime 25:22 Min's 2nd Film: "Hook Down, Wheels Down". This is a USN 1960's version of "Hook Down, Wheels Down" with an hour of great Carrier stories, plus a great history lessons of the USN Aviation. Runtime 57:10 Min's 3rd Film: "USN Carrier Newsreels". Other title "CV Newsreels." This is a small collection of USN Carrier newsreels, 1st. Launching Shangri-la. 2nd. CV-3 Saratoga fights Kamikazes. 3rd. Carriers attack Tokyo. 4th. Carriers fight Weather. 5th. Post War Carrier launched. Runtime 13:32 Min's 4th Film; "After the Cut". This is a short USN Cartoon film about WW2 F4F landing on a carrier and the importance of paying attention to landings and the aftermath to repairs needed aircraft that landed to hard. Runtime 5:09 min's
2015.364.001	USS Hughes	Evans, Alan S.	This booklet was given to Mac McLaughlin at the Battle of Midway reunion in June of 2015. Rudy Matz was a veteran of that battle--he served on the USS Hughes. There are 20 pages of USS Hughes history covering 1939 to the end of WWII, and then there are about 15 pages of the Hughes participation in Operation Crossroads where the ship was sunk. Operation Crossroads was the atomic bomb tests at Bikini Atoll. This account of the operation is from the Public Affairs Office, Defense Nuclear Agency, dated 5 April 1984.
2015.367.001	Midway Islands	Hadden, Fred C.	"Very near the center of the North Pacific Ocean there is a coral atoll or circular coral reef in which there are two small islands. This reef and the two enclosed islands are called Midway Islands or simply 'Midway'. They were discovered in 1859 by

Object ID	Title	Author	Summary
			Captain N. C. Brooks, who took possession of them for the United States of America. The book describes the two Midway Islands--the bird inhabited Sand Island and Eastern Island, covered by Scaevola, wild grasses, and Boerhavia. It traces the geological formation, early shipwrecks, the Commercial Pacific Cable Company in 1902, the Pan American Airways in 1935, and establishing the need for an entomological inspection for bugs carried by the Pan Am clippers. gardening at Midway (which is neither tropical or a south sea island), and the seabirds on Midway. 2015.367.003	Recapture of Guam, The	Lodge, Orlan Robert	"The Recapture of Guam" is the twelfth in a series of operational monographs prepared by the Historical Branch, G-3 Division, Headquarters U.S. Marine Corps, designed to give the military student and the casual reader an accurate and detailed account of the operations in which Marines participated during World War II.
2015.367.004	Iwo Jima : Amphibious Epic	Bartley, Whitman S.	From the Foreword: "The assault on Iwo Jima came as a smashing climax to the 16 month drive that carried the amphibious forces of the United States across the Central Pacific to within 650 miles of Tokyo. Striking first at Tarawa in November 1943, American forces had swept rapidly westward, seizing only those islands essential for support of future operations. Many powerful enemy strongholds were bypassed and neutralized. By the fall of 1944 the small but heavily fortified island of Iwo Jima, lying midway between the Marianas and the heart of the Japanese Empires, had assumed such strategic importance that its rapid seizure became imperative. Neutralization would not suffice; Iwo must become an operational United States base. "At Iwo Jim the amphibious doctrines, techniques, weapons, and equipment which had proven so effective during

Object ID	Title	Author	Summary
			the three previous years of World War II received the supreme test. On that island more than 20,000 well-disposed and deeply entrenched Japanese troops conducted an intelligent and dogged defense. There, more than anywhere else in the Central Pacific, terrain and enemy defense preparations combined to limit the effectiveness of American supporting arms, placing a premium on the skill and the aggressive fighting spirit of the individual Marine. "There can be no more fitting tribute to the men of all services who engaged in this bitter 36-day assault than the well-known words of Admiral Chester W. Nimitz. "Among the Americans who served on Iwo Island uncommon valor was a common virtue."
2015.368.001	War in the Pacific, Vol. 1 : America at War	Hagen, Jerome T.	War in the Pacific begins with Japan's interest in colonialism, the assassination of Marshall Chang Tso-lien in Manchuria, and Japan's subsequent decision to "Strike South". The attack on Pearl Harbor is examined in light of the difficulties Japan's navy had to overcome to launch such as attack. The atrocities inflicted upon innocent people and prisoners of war, even prior to the rape of Nanking, are covered in detail throughout Japan's conquest and reign of terror.
2015.368.002	War in the Pacific, Vol. 2 : People and Places	Hagen, Jerome T.	Volume II of War of Pacific was written with extention of questions like "Where is the battle for Guadalcanal"? "Where is the battle for Leyte Gulf"?This volume follows the chronology of Japan's invasion of China, and examines the war in China to a greater degree. The Pacific war began in China and not Pearl Harbor. Such battles as the six-month struggle for Guadalcanal, Iwo Jima, the epic Leyte Gulf battle, Truk, and Rabaul.
2015.368.003	War in the Pacific, Vol. 3 : The Road to Tokyo	Hagen, Jerome T.	Volume III of War of Pacific is a continuation of two earlier volumes. It includes chapters

Object ID	Title	Author	Summary
			about Salvage of the Battleships at Pearl Harbor, India's nationalist leader, Subhas Chandra, the war criminal that got away, Masanobu Tsuji, Investment of the Canadian-Japanese and the Aluet people, and the story of a splendid POW, Sir Edward "Weary" Dunlop.
2015.368.004	War in the Pacific, Vol. 4 : The Southwest Area	Hagen, Jerome T.	Volume IV of War of Pacific includes ten chapters about the Southwest Pacific Area, including the fall of the Dutch East Indies, the loss of the Asiatic Fleet, and the Australian advance through New Guinea. This volume includes two chapters about the Chaplains in WWII, a chapter about Navy's paddle wheel aircraft carriers on Lake Michigan during WWII, the Battle of Brisbane, the Battle of Manchuria, and the Port Chicago Mutiny.
2015.368.005	War in the Pacific, Vol. 5 : Return to the Phillipines	Hagen, Jerome T.	Volume V of War of Pacific includes internment of Americans in the Soviet Union during WWII. It includes the story of the Lone B-25 Doolittle raider That flew to Vladivosto rather than crash or bailing out at night somewhere in China. Return to Philipines, acknowledges MacArthur's campaigns from Hollandia leading to the surrender of the Japanese in the Philipines. Other interesting chapters, include The Last Sinking of a Japanese submarine, The Capture of a German Submarine at Sea, The Lisbon Maru, Jack Lucas, and the spies of the SOE and OSS.
2015.368.006	Forgotten Weapon : U.S. Navy Airships and the U-boat War	Althoff, William F.	From the preface: "In an era of computers, missiles, and electronic warfare, the naval nonrigid airship (or blimp) seems an anachronism--a twentieth century platform predestined to obscurity. Indeed, the widespread ignorance of its existence is remarkable. It is easy to dismiss the airship as a military aeration, but this explains

Object ID	Title	Author	Summary
			nothing. What deserves examination are the naval, political, and technological environments in which the platform had to operate in the decade from 1935 to 1945--until, as the 1960s opened, U.S. Navy lighter-than-air was overwhelmed by competing systems that offered more attractive trade-offs. The writer has tried to insist on the blimp's unique inshore capabilities, to call for a measure of understanding of the problems that afflicted the program before and during the urgent antisubmarine campaign in the North and South Atlantic."
2015.368.007	Wings for the Navy : 100 Years of Naval Aviation	Huffman, Mark	On 8 May 1911, the Navy ordered its first airplanes, marking the official birth of naval aviation. Leading up to that was a unique collaboration between a civilian pilot, Eugene Ely; his employer, aircraft manufacturer Glenn Curtis; and the Navy's officer assigned to administer the fledgling aviation program, Captain Washington Chambers, USN. From the first bold experiments that showed the airplane's viability, to the years following World War I, naval aviation quickly evolved from a reconnaissance tool to an extremely powerful weapon that would usher in the aircraft carrier and redefine naval warfare. This is the story of the three men who possessed the vision, courage and know-how to produce wings for the navy. The video was sponsored by the USS Midway Museum on the occasion of the Centennial of Naval Aviation 2011. http://www.navyhistory.org/2011/09/centennial-of-naval-aviation-video-2/
2015.369.001	Jackrabbits to Jets - Prepublication Materials	Sudsbury, Elretta	A collection of prints, proofs, photos, and manuscripts comprising the author's writings and other preparations for the publishing of the book, "Jackrabbits to Jets, The History of North Island Naval Air Station." The material is contained in a single book box with contents labelled as : Three-ring binders with

2015.372.001	Lords of the Sky : Fighter Pilots and Air Combat, from the Red Baron to the F-16	Hampton, Dan	"By the USAF F-16 legend behind the bestselling memoir Viper Pilot, this is the first comprehensive history of fighter pilots and air combat--a unique, riveting look at the aces of the sky, their machines, their most daring missions, and the epic conflicts they shaped, from the trailblazing aviators of World War I to today's supersonic jets. Lords of the Sky is a thrilling history of the fighter pilot, masterfully written by one of the most decorated aviators in American history. A twenty-year USAF veteran who flew more than 150 combat missions and received four Distinguished Flying Crosses, Lt. Colonel Dan Hampton draws on his singular firsthand knowledge, as well as groundbreaking research in aviation archives and rare personal interviews with little-known heroes, including veterans of World War II, Korea, and Vietnam. In a seamless, sweeping narrative, Lords of the Sky tells the extraordinary stories behind the most famous fighter planes and the brave and daring heroes who made them legend. In the Great War, aces such as Manfred von Richthofen ('The Red Baron'), Eddie Rickenbacker, and Roland Garros faced horrific survival rates and became romantic heroes. The Second World War saw the RAF locked in a struggle for the fate of civilization during the Battle of Britain; on the Eastern Front, the German Luftwaffe and Soviet Air Force grappled in some of the fiercest and bloodiest air battles in history. In the Pacific, Japanese pilots

Object ID	Title	Author	Summary
			terrorized Asia, culminating in their attack on Pearl Harbor. American flyboys quickly became instrumental to the Allies' ultimate victory, ravaging the enemy's navy, providing life-saving air support for ground troops, escorting bombers, and dogfighting with Japanese Zeros and Nazi Messerschmitts. During the Cold War, conflicts in Korea and Vietnam featured the dawn of the jet age, in which American pilots battled Soviet-made MiGs and increasingly sophisticated anti-aircraft weaponry. Hampton then draws on his own experience as an F-16 pilot who fought in the 1991 and 2003 wars against Iraq to bring to life the dangers and demands of today's modern fighter pilot. Here are the stories behind history's most iconic aircraft and the aviators who piloted them: from the Sopwith Camel and Fokker Triplane to the Mitsubishi Zero, Supermarine Spitfire, Nazi Bf 109, P-51 Mustang, Grumman Hellcat, F-4 Phantom, F-105 Thunderchief, F-16 Falcon, F/A-18 SuperHornet, and beyond. Here, too, are the Lafayette Escadrille, Flying Tigers, RAF Eagles, Wild Weasels, and other legendary units. Throughout this definitive history, Hampton clarifies the astonishing debt we owe to these daring Lords of the Sky who have ruled the air for more than a century"

2015.372.002	USS New Orleans (LPH-11) - Westpac - The Enforcers - 1995	None Stated	The USS New Orleans departed San Diego for Westpac on 23 June 1995, joined the Amphibious Ready Group off PT Conception on 24 June 1995, and returned to Mole Pier, NAVSTA San Diego on 22 December 1995. Port visits included Hong Kong; Singapore; Aqaba, Jordan; Jebel, UAE; Kuwait City; Bahrain; Perth, Australia; and Pearl Harbor. Highlights included the history of LPH 11 with mention of the ship participating in the filming of the motion picture Apollo 13

2015.374.001	Adrenaline Excitement and Fear : A WWII Naval Aviation Story	Holder, Jack	Jack's story begins at Pearl Harbor, December 7th, 1941. Through the next four years his life will change forever as he feels the adrenaline, excitement and fear of a war that would take him to Midway, Guadalcanal, the English Channel and many other places fighting for what he believes. Jack was a Navy Flight engineer, Pearl Harbor Survivor, received 2 Distinguished Flying Cross Medals, a Presidential Citation, 6 Air Medals, and 6 Commendation Medals.
2015.376.001	We'll All Die As Marines : One Marine's Journey from	Bathurst, Jim	This is the story of Colonel Jim Bathurst, USMC (Ret.) as

Object ID	Title	Author	Summary
	Private to Colonel		edited by Major Dennis Copson, USMC (Ret.). This book is a story of how a young, free-spirited kid from Dundalk, Maryland, joins the Corps and the Corps captured his body, mind and spirit. Bathurst is a former DI who was awarded the Silver Star, Bronze Star Medal with Combat "V", Purple Heart, and a combat commission to second lieutenant.
2015.377.001	Best and the Brightest, The	Halberstam, David	Explores the question of why America became mired in the Vietnam War and why America lost the war using portraits of America's flawed policy makers and accounts of the forces that drove them.
2015.379.001	I Remember : My Journey from Cotton Picking to a Major Construction Conglomerate	Porter, Thomas Hudson	Born in poverty with an alcoholic father, the US Navy afforded him an opportunity to fly and to start his climb to a better life. Today the author has attained the ultimate success as a real estate developer and builder, chairman and CEO of six corporations and many times over a millionaire. Twenty one of the 38 chapters cover his time in the Navy. He and his wife, Peggy, donated the money to make it possible for the resurrection of a TBM Grumman Avenger, aptly numbered for the lost at sea, SK 415. This airplane is on display at the USS Midway Museum in San Diego, California. In the back there are pictures of the Avenger being loaded on the Midway. Also has pictures with Midway Air Wing volunteers and Hal "Nemo" Nemer, John Owens, and Tom Porter. The last page contains an explanation of the sponsorship of the Avenger on the Midway.
2015.379.002	Patriots : The Vietnam War Remembered from All Sides	Appy, Christian G.	The author's monumental oral history of the Vietnam War is the first work to probe the war's path through both the United States and Vietnam. The vivid testimonies of 135 men and women span the entire history of the Vietnam conflict, from its murky origins in the 1940s to the chaotic fall of Saigon in 1975.

2015.382.001	Aerographer's Mate : Module 1-- Surface Weather Observations	Naval Education and Training Professional Development and Technology Center	We also have a hard copy of this manual: 208.326.001. This module covers the basic procedures that are involved with conducting surface weather observations. It begins with a discussion of surface observation elements, followed by a description of primary and backup observation equipment that is used aboard ships and at shore stations. Module 1 also includes a complete explanation of how to record and encode surface METAR observations using WMO and NAVMETOCCOM guidelines. The Module concludes with a description of WMO plotting models and procedures.
2015.382.002	Aerographer's Mate : Module 2-- Miscellaneous Observations and Codes	Naval Education and Training Professional Development and Technology Center	We also have an hard copy of this manual: 2018.326.002. This module concentrates on the observation procedures, equipment, and codes associated with upper-air observations and bathythermograph observations. Module 2 also discusses aviation weather codes, such as TAFs and PIREPs, and includes a chapter on surf observation procedures. Radiological fallout and chemical contamination plotting procedures area also explained.
2015.382.003	Aerographer's Mate : Module 3—Environmental Satellites and Weather Radar	Naval Education and Training Professional Development and Technology Center	This module describes the various type of environmental satellites, satellite imagery, and associated terminology. It also discusses satellite receiving equipment. In addition, Module 3 contains information on the Weather Surveillance Radar-1988 Doppler
2015.382.004	Aerographer's Mate Module 4—Environmental Communications and Administration	Naval Education and Training Professional Development and Technology Center	This module covers several of the most widely used environmental communications systems within the METOC community. It also describes the software programs and products associated with these

2015.382.049	Department of the Navy Correspondence Manual Course	Naval Education and Training Professional Development and Technology Center	- Standards and procedures for preparing and managing naval correspondence. - Procedures for using electronic mail (E-Mail) and facsimile (fax) transmission services. - U.S. Postal Service (USPS) standards and Navy policies pertaining to official mail.
2015.382.050	Ear Training Manual For Musicians	Naval Education and Training Professional Development and Technology Center	Table of contents includes: CHAPTER 1 Section I: The Divided Beat in Simple Time.Section II: The Major Triad in Numeral Notation.; CHAPTER 9Non Diatonic Melodies in Simple and compound times with divided beat
2015.382.051	Electrician's Mate	None Stated	Table of contents includes: Rating Information, General Safety Practices, and Administration;Electrical Installations; AC Power Distribution Systems; Shipboard Lighting; Engineering Plant Operations, Maintenance, and Inspections
2015.382.052	Electronics Technician Supervisor (ET1)	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Organization and Administration; Supervision and Training; Combat Systems; Casualty Control and Reporting; Quality Assurance; Test Equipment; Maintenance/COSAL
2015.382.053	Electronics Technician Supervisor (ETC)	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Organization and Administration; Supervision and Training; Combat Systems; Casualty Control and Reporting; Quality Assurance; Test Equipment; Maintenance/COSAL
2015.382.054	Electronics Technician	Naval Education and	Table of contents: Naval

Object ID	Title	Author	Summary
	Volume 1—Safety	Training Professional Development and	Safety; Hazardous Materials; Electronics Safety
2015.382.055	Electronics Technician Volume 2—Administration	Naval Education and Training Professional Development and Technology Center	Table of contents: 1. General Administration; Technical Administration; Logistics
2015.382.056	Electronics Technician Volume 3—Communications Systems	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Fundamentals; Systems Equipment Configurations; Satellite Communications; The Link-11 System; New Technology in Data Communications; Local-Area Networks
2015.382.057	Electronics Technician Volume 4—Radar Systems	Naval Education and Training Professional Development and Technology Center	Table of contents: 1. Introduction to Basic Radar Systems; Radar Systems Equipment Conjunctions; Radar System Interfacing; Safety
2015.382.058	Electronics Technician Volume 5—Navigation Systems	Naval Education and Training Professional Development and Technology Center	Table of contents: Surface Navigation Systems; Tactical Air Navigation
2015.382.059	Electronics Technician Volume 6—Digital Data Systems	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Fundamentals and Operations of Computers; Computer Configurations and Hardware; Computer Operator Controls and Controlling Units; Central Processing Units and Buses; Computer Memories; Computer Instructions
2015.382.060	Electronics Technician Volume 7—Antennas and Wave Propagation	Naval Education and Training Professional Development and Technology Center	Table of contents: Wave Propagation: Antennas; Introduction to Transmission and Waveguides
2015.382.061	Electronics Technician Volume 8—Support Systems	Naval Education and Training Program Management Support Activity	Table of contents: Liquid Cooling, Dry Air Systems; AC Power Distribution Systems; Ship's Input Systems; Information Transfer Systems
2015.382.062	Engineering Aid 1	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Part I: EA2 Intermediate: Construction Methods and Materials: Heavy Construction; Construction Methods and Materials: Electrical and Mechanical Systems; Part II: EA1 Advanced: Field Astronomy and Triangulation
2015.382.063	Engineering Aid 2	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Part I: EA2 Intermediate: Construction Methods and Materials: Heavy Construction; Construction Methods and Materials: Electrical and Mechanical Systems; Part II: EA1 Advanced: Field Astronomy and Triangulation

Object ID	Title	Author	Summary
2015.382.064	Engineering Aid 3	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Mathematics and Units of Measurement; Drafting Equipment; Drafting: Fundamentals and Techniques; Reproduction Process; Drafting: Geometric Construction; Drafting: Projections and Sketching
2015.382.065	Engineman 1 & C	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Administration, Supervision, and Training; Engine Maintenance; Reduction Gears and Related Equipment; Refrigeration and Air Conditioning; Auxiliary Machinery; Engineering Casualty Control; Environmental Pollution
2015.382.066	Engineman 2	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Administration and Training; Measuring and Repair Instruments; Internal Combustion Engines; Speed Controlling Devices; Compressed Air Systems; Laundry, Mess Decks, Galley, and Scullery Equipment .
2015.382.067	Engineman 3rd Class	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Introduction to the Enginemen Rating; Reciprocating Internal-Combustion Engine; Principal Stationary Parts of an Engine; Engine Drive Mechanisms; Intake and Exhaust Systems; Distilling Plants; Refrigeration; Air Conditioning
2015.382.068	Equipment Operator, Advanced	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Transportation Supervisor; Air Detachment Equipment Supervisor; Crane Crew Supervisor; Projects Supervisor; Quarry Supervisor Crusher Supervisor; Concrete Batch Plant Supervisor; Asphalt Plant Supervisor
2015.382.069	Equipment Operator, Basic	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Engine Systems; Power Train; Chassis Systems; Electrical and Hydraulic Systems; Rules of the Road; Transportation Operations; Tractor-Trailers and Dump Trucks; Forklifts; Front-end Loaders, Excavators, and Ditchers;
2015.382.070	Fire Controlman Supervisor	Naval Education and Training Professional Development	Tale of contents: Fire Controlman Supervisor

Object ID	Title	Author	Summary
		and Technology Center	Responsibilities; Organization, Administration, Inspections, and Maintenance; Supervision and Training; Combat Systems, Subsystems, and Maintenance; Weapons Exercises
2015.382.071	Fire Controlman, Volume 2—Fire-Control Radar Fundamentals	Naval Education and Training Professional Development and Technology Center	Table of contents: Introduction to Basic Radar Systems; Fire Control Radar Systems; Radar Safety
2015.382.072	Fire Controlman Volume 3—Digital Data Systems	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Fundamentals and Operations of Computers; Computer Configurations and Hardware; Computer Operator Controls and Controlling; Computer Components and Circuits; Central Processing Units and Buses; Computer Memories; CD-ROM Storage
2015.382.073	Fire Controlman Volume 4—Fire-Control Maintenance Concepts	Naval Education and Training Professional Development and Technology Center	Table of contents: Planned Maintenance System and Fault Isolation; Liquid-Cooling Systems; Combat Systems Alignment (Gun/Battery); Collimation . .
2015.382.074	Fire Controlman Volume 5—Display Systems and Devices	Naval Education and Training Professional Development and Technology Center	Table of contents: Basic Display Devices and Systems; Personal Computer Video Displays and; Input Devices; The Data Display Group AN/UYA-4(V); The Computer Display Set AN/UYQ-21(V)
2015.382.075	Fire Controlman Volume 6—Digital Communications	Naval Education and Training Professional Development and Technology Center	Table of contents: Fundamentals of Data Communications; The LINK-11 System; LINK-11 Fault Isolation; LINK-4A; New Technology in Data Communications; Local-Area Networks
2015.382.076	Fire Controlman, Volume 1—Administration and Safety	Naval Education and Training Professional Development and Technology Center	Table of contents: General Administration; Technical Administration; Electronics Safety; Hazardous Materials; Ammunition Safety, Handling, Shipping, And Stowing
2015.382.077	Fireman	Naval Education and Training Professional Development and Technology Center	Table of contents includes; Engineering Administration; Engineering Fundamentals; Basic Steam Cycle; Boilers; Steam Turbines; Internal-Combustion Engines; Ship Propulsion; Pumps, Valves, and Piping; Instruments; Environmental Controls
2015.382.078	Fluid Power	Naval Education and	Table of contents includes:

Object ID	Title	Author	Summary
		Training Professional Development and	Introduction to Fluid Power; Forces in Liquids; Hydraulic Fluids;Pumps; Fluid Lines and Fittings; Valves; Sealing Devices and Materials;Measurement and Pressure Control Devices; Actuators; Pneumatics;
2015.382.079	Gas Turbine Systems Supervisor	Naval Education and Training Professional Development and Technology Center	Table of contents: Programs, Reports, and Records; Gas Turbine Maintenance; Power Train and Propulsion
2015.382.080	Gas Turbine Systems Technician (Electrical) 2	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Engineering Administration; Uninterrupted Power Supply Systems; Engineering Control Systems; Engineering Support Systems Maintenance; Electrical and Electronic Systems Maintenance; Control Devices
2015.382.081	Gas Turbine Systems Technician (Mechanical) 2	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Engineering Administration; Oil Laboratory procedures and Administration; Engineering Control System Operation; Engineering Support and Auxiliary Equipment and Systems; Propulsion Plant Systems and Drive Train Equipment;
2015.382.082	Gas Turbine Systems Technician (Electrical) 3/Gas Turbine Systems Technician (Mechanical) 3, Volume 1	Naval Education and Training Professional Development and Technology Center	Information on the ratings, administration and programs, tools and test equipment, electrical theory and mechanical theory, piping systems and their components, support and auxiliary equipment, the power train, the controllable pitch system,
2015.382.083	Gas Turbine Systems Technician (Electrical) 3/Gas Turbine Systems Technician (Mechanical) 3, Volume 2	Naval Education and Training Professional Development and Technology Center	information on the basic fundamentals of gas turbines, the LM2500 gas turbine, the Allison 501-K17 gas turbine generator, engineering systems, electric plant operation, and the control consoles for the CG-, DD-, and FFG-class ships.
2015.382.084	Gunner's Mate 1 & C	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Explosives and Pyrotechnics;Ammunition, Magazines, and Missile Handling; Small Arms; Electrical and Electronic Circuit Analysis; Gun Mounts;SMS Guided Missiles, Aerodynamics, and Flight Principles;

Object ID	Title	Author	Summary
2015.382.085	Gunner's Mate 3 & 2	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Explosives and Pyrotechnics;Ammunition, Magazines, and Missile Handling; Small Arms; Electrical and Electronic Circuit Analysis; Gun Mounts;SMS Guided Missiles, Aerodynamics, and Flight Principles;
2015.382.086	Gunner's Mate	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Explosives and Pyrotechnics;Ammunition, Magazines, and Missile Handling; Small Arms; Electrical and Electronic Circuit Analysis; Gun Mounts;SMS Guided Missiles, Aerodynamics, and Flight Principles;
2015.382.087	Harmony	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Melody Writing; Voice Motion; Root Position Primary Triads; NOn-Harmonic Tones; Diatonic Seventh; Secondary Chords; Chromatic Alterations; Augmented Sixth Chords; Advanced Modulation
2015.382.088	Hospital Corpsman	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Anatomy and Physiology; Fundamentals of Patient Care; First Aid Equipment, Supplies, Rescue, and Transportation; Emergency Medical Care Procedures; Poisoning, Drug Abuse, and Hazardous Material Exposure
2015.382.089	Hull Maintenance Technician	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Safety; Ship Repair; Small Boat Repair and Deck Coverings; Metallurgy; Introduction to Welding and Cutting;Oxyacetylene Cutting and Welding; Brazing and Braze Welding; Metal-Arc Welding and Cutting
2015.382.090	Illustrator Draftsman Volume 1—Equipment	Naval Education and Training Professional Development and Technology Center	Table of contents: Shop Organization and Administration; Basic Equipment; Computer Equipment; Reproduction Equipment; Audiovisual Equipment
2015.382.091	Illustrator Draftsman Volume 3—Executionable Practices	Naval Education and Training Professional Development and Technology Center	Table of contents: Mediums; Color; Drawing; Cartooning and Animation; Lettering; Airbrush; Photography; Computer Generation

Object ID	Title	Author	Summary
2015.382.092	Illustrator Draftsman Volume 4—Presentations Graphics	Naval Education and Training Professional Development and Technology Center	Table of contents: Copy Preparation; Audiovisual Presentations; Television Graphics; Displays and Exhibits
2015.382.093	Illustrator Draftsman 3 & 2 Volume 2—Standard Drafting Practices and Theory	Naval Education and Training Professional Development and Technology Center	Table of contents: Composition; Geometric Construction; General Drafting Practices; Technical Drawings; Perspective Projections; Parallel Projections
2015.382.094	Information Systems Technician Training Series Module-- Administration and Security	Naval Education and Training Professional Development and Technology Center	Table of contents: AIS Administration; Communications Administration; Communications Security; AIS Security; General Security
2015.382.095	Information Systems Technician Training Series Module 2—Computer Systems	Naval Education and Training Professional Development and Technology Center	Table of contents: Computer Hardware Startup; Computer Center Operations; Data Management
2015.382.096	Information Systems Technician Training Series Module 3—Network Communications	Naval Education and Training Professional Development and Technology Center	Table of contents: Network Administration; LAN Hardware; Network Troubleshooting
2015.382.097	Information Systems Technician Training Series Module 4—Communications Hardware	Naval Education and Training Professional Development and Technology Center	Table of contents: Communications Hardware; Satellites and Antennas
2015.382.098	Information Systems Technician Training Series Module 5—Communications Center Operations	Naval Education and Training Professional Development and Technology Center	Table of contents: Center Operations; Voice Communications; Emission Control; Cryptosecurity
2015.382.099	Intelligence Specialist 3 & 2, Volume 1	Naval Education and Training Professional Development and Technology Center	Table of contents includes: The Intelligence Specialist; Intelligence Fundamentals; Security; Mapping, Charting, and Geodesy; Imagery Interpretation; Mensuration Techniques; Automated Information Systems (AIS) Fundamentals
2015.382.100	Interior Communications Electrician, Volume 1	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Electrical and General Safety Precautions; Switches, Protective Devices, and Cables; Power Distribution, IC Switchboards, and Controllers; Gyrocompass Systems; Sound-Powered Telephone Systems; Amplified Voice Systems
2015.382.101	Interior Communications Electrician, Volume 2	Naval Education and Training Professional Development and Technology Center	Table of contents; Manual Bus Transfers, Motor Controllers, and Frequency Regulators; Anemometer Systems; Stabilized Glide Slope Indicator System; Technical Administration

Object ID	Title	Author	Summary
2015.382.102	Interior Communications Electrician, Volume 3	Naval Education and Training Professional Development and Technology Center	Table of contents: Technical Administration; Quality Assurance; Ship's Drawings and Diagrams; Maintenance
2015.382.103	Journalist 1 & C	Naval Education and Training Professional Development and Technology Center	Table of contents includes: 1. Public Affairs Office Management; Public Affairs In Adverse News Situations; The Command Information Bureau; Media Relations; Community Relations and Special Events; Broadcast Management; Audience Surveys. LTJG Rich Chao, the PAO of the USS Midway (CV 41), chronicles the public affairs aspects of the ship's 1990 fire. (Pages 2-5 to 2-7).
2015.382.104	Journalist 3 & 2	Naval Education and Training Professional Development and Technology Center	Table of contents includes: The Navy Journalist; Basic Newswriting; Writing for Magazines; Advance Stories, Follow-ups and Rewrites; Gathering and Disseminating Navy News; Printing, Layout and Makeup; Libel, Right of Privacy; Radio; Television
2015.382.105	Journalist Advanced	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Public Affairs Office Management; Public Affairs in Adverse News Situations; Media Relations; Community Relation; Speeches; Newspaper Staff Supervision; Broadcast Management
2015.382.106	Journalist Basic	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Writing Headlines and Cutlines; Legal Concerns; Basic Photography; Basic Photojournalism; Broadcast Writing and Radio Operations; Television; Radio and Television Interviewing
2015.382.107	Legalman 1 & C	Naval Education and Training Professional Development and Technology Center	Table of contents includes: General Administration and Security; The Law Library and Legal Research; Court Reporting; Constitutional Considerations; Pretrial Matters; Court-Martial Trials; Posttrial Duties and the Review Process; Legal Assistance
2015.382.108	Legalman	Naval Education and Training Professional Development and Technology Center	Table of contents includes: General Administration and Security; Legal Research; Court Reporting; Court-Martial Trials; Posttrial Duties and the Review Process; Administrative Separations; Delivery of

Object ID	Title	Author	Summary
			Personnel; Legal Assistance
2015.382.109	Lookout Training Handbook	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Introduction to Lookout Training; The Lookout; Lookout Equipment; Visual Search Procedures; Contact Reporting Procedures; Man Overboard; Signaling; Special Sea Detail; Navigational Rules; Special Sea Detail;
2015.382.110	Lookout Training Handbook	Naval Education and Training Professional Development and Technology Center	Visual search and contact reporting procedures; ship/aircraft recognition; Rules of the Road; buoy systems; special sea detail; restricted visibility steaming; and man-overboard procedures (NO table of contents)
2015.382.111	Machinists Mate 1 & C (Surface)	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Propulsion Turbines; Reduction Gears; Steam-Driven Generators; Distilling Plants; Refrigeration and Air Conditioning; Propulsion Plant Efficiency; Quality Assurance; Record Systems
2015.382.112	Machinist's Mate 3 & 2 (Surface)	Naval Education and Training Professional Development and Technology Center	Table of contents includes: 1. Introduction to the Machinist's Mate (Surface) Rating; Steam Turbines; Reduction Gears and Related Equipment; Lubrication and Associated Equipment; Pumps; Refrigeration; Air Conditioning; Compressed Air Systems
2015.382.113	Master-at-Arms	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Rules and Regulations; Legal Aspects of Military Law; Search and Seizure; Military Law of Evidence; Courts-Martial Procedures; Crowd Control; Military Working Dogs; Shipboard Duties; Investigations; Forensics; Evidence Custody
2015.382.114	Mathematics, Basic Math and Algebra	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Number systems and sets; Positive integers; Exponents and radicals; Factoring polynomials; Linear equations in two variables; Complex numbers; Plane figures; Geometric constructions and solid figures; numerical trigonometry
2015.382.115	Mathematics, Trigonometry	Naval Education and Training Professional Development and Technology Center	Table of contents: Logarithms; Computations with Logarithms; Trigonometric

Object ID	Title	Author	Summary
			measurements; Trigonometric Analysis; Oblique Triangles; Trigonometric Identities and Equations; Vectors and Forces
2015.382.116	Mathematics, Pre-Calculus and Introduction to Probability	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Striaight Lines; Conic Sections; Limits, Normals, and Slopes of Curves; Limits and differentiation; Derivatives; Integrarion; Integration Formulas; Combinations and Permutations; Probability
2015.382.117	Mathematics, Introduction to Statistics, Number Systems and Boolean Algebra	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Sequence and Series; Mathematical induction and the binomial theorem; Statistical Inference; Number systems; Sets and subsets; Boolean Algebra; Boolean simplification; Matrices and determinants
2015.382.118	Mess Management Specialist 1 & C	Naval Education and Training Professional Development and Technology Center	Table of contents includes:Sanitation; Receipt, Inspection, Expenditure, and Storage of Food Items; Accounting; Foodservice Equipment; Food Preparation; Meat, Poultry, and Seafood; Nutrition and Menu Planning; Breads and Desserts; Foodservice
2015.382.119	Military Requirements for Chief Petty Officer	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Naval Tradition; Military Conduct and Justice; Leadership; Management Information; Career Information and Training; Programs and Policies; Military Requirements; Safety and Damage Control; Security
2015.382.120	Military Requirements for Petty Officer First Class	Naval Education and Training Professional Development and Technology Center	Table of contents: U. S. Naval Tradition; Leadership and Administrative Responsibilities; Programs and Policies; Professional Responsibilities; Military Requirements; Safety and Survival; Damage Control
2015.382.121	Military Requirements for Petty Officers Third and Second Class	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Leadership, Supervision, and Training; Military Justice and Bearing; Quality of Life; Career Information;Safety and Hazardous Materials for the Petty Officer; Supply Procedures;Military Responsibilities and Duties
2015.382.122	Mineman, Volume 1	Naval Education and Training Professional Development	Table of contents: Introduction to Mine Warfare; Mine

Object ID	Title	Author	Summary
		and Technology Center	Warfare-Related Programs; Operations and
2015.382.123	Mineman, Volume 2 (MN 1 & C)	Naval Education and Training Professional Development and Technology Center	Table of contents: Administrative Functions; Supply Procedures
2015.382.124	Mineman, Volume 2 (MN 3 & 2)	Naval Education and Training Professional Development and Technology Center	Table of contents: Administrative Functions; Supply Procedures
2015.382.125	Mineman, Volume 3	Naval Education and Training Professional Development and Technology Center	Table of contents: Underwater Mine Maintenance System; Mine Handling and Storage
2015.382.126	Mineman, Volume 3 (MN 1 & C)	Naval Education and Training Professional Development and Technology Center	Table of contents: Underwater Mine Maintenance System; Mine Handling and Storage
2015.382.127	Mineman, Volume 3 (MN 3 & 2)	Naval Education and Training Professional Development and Technology Center	Table of contents: Underwater Mine Maintenance System; Mine Handling and Storage
2015.382.128	Mineman, Volume 5 (MN 3 & 2)	Naval Education and Training Professional Development and Technology Center	Table of contents: Introduction to Exercise and Training (ET) Mines; Actuation Mines; Laying, Handling, Shop, Hunting, and Mechanical Sweep Mines
2015.382.129	Mineman, Volume 7	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Magazine and Fire Suppression Systems; Small Arms; Pyrotechnics; Marlinspike Seamanship; Anchoring, Mooring, and Towing; Mechanical Minesweeping; Combination Minesweeping; Minesweeping Safety
2015.382.130	Naval Construction, Force/Seabee 1 & C	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Administration; Project Planning and Management; Construction Management; Advanced Base Planning and Embarkation; Naval Construction Force Camp Maintenance; Environmental Pollution Control; Contract Quality Assurance
2015.382.131	Naval Space	Naval Education and Training Professional Development and Technology Center	Table of contents includes: The Navy in Space; U.S. Space Organizations; The Space Environment; Orbital Mechanics; Launch and Recovery Systems; Space Systems Architecture; Naval Tactical Use of Space
2015.382.132	Navy Customer Service Manual	Naval Education and Training Professional Development and Technology Center	Table of contents: Face-to-Face Contact; Navy Customers and their Needs; Manning the Contact Point; The Team Approach
2015.382.133	Navy Instructional Theory	Naval Education and	Tale of contents: General

Object ID	Title	Author	Summary
		Training Professional Development and	Administration; Technical Administration; Electronics Safety; Hazardous Materials; Ammunition Safety, Handling, Shipping, And Stowing, Navy training, the Navy instructor, motivation, principles of learning, effective communications, instructional methods, learning objectives, testing, course materials, and instructor evaluation.
2015.382.134	Operations Specialist, Volume 1	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Missions and Functions of CIC (Combat Information Center); CIC Displays; Logs, Records, and Publications; Radar Fundamentals; Radar Display Equipment; Scope Interpretation; Identification Equipment; Charts, Grids, and Radar Navigation; Search and Rescue
2015.382.135	Personnelman 3 & 2	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Dynamics of the Personnelman Rating; Navy Enlisted Occupations; Personnel Support; Correspondence and Files; Enlisted Service Records; Officer Service Records; Counseling Service Members; Overseas Travel and Orders
2015.382.136	Photography (Advanced)	Naval Education and Training Professional Development and Technology Center	Table of contents: Basic Photojournalism; Photographic Quality Assurance; Electronic Imaging; Aerial Photography; Supply and Logistics
2015.382.137	Photography (Basic)	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Theory of Light and Optical Principles; Light-Sensitive Materials; Photographic Filters; Basic Photographic Techniques; Portraiture; Image Processing and Control; Black-and-White Printing; Color Printing; Motion Media
2015.382.138	Postal Clerk	Naval Education and Training Professional Development and Technology Center	Table of contents includes: the military postal service; designations and terminations; mail packaging and acceptance; domestic mail; special services; international mail; registered mail; postal finance; mail handling and transportation;
2015.382.139	Quartermaster 1 & C	Naval Education and Training Professional Development	Table of contents includes: Introduction to Navigation;

Object ID	Title	Author	Summary
		and Technology Center	Compasses; Basics of Time; Introduction to Celestial Navigation; Tides and Currents; Celestial Observations and Sight Reduction Methods; Weather Observation
2015.382.140	Quartermaster 3 & 2	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Origins and Primary Areas of Navigation; Problems Associated with Navigation; Earth and the Terrestrial Coordinate System; Reference Lines on Earth; Nautical Chart Interpretation; Chart Scale; Latitude and Longitude. Designed to help men of the Navy and naval reserve meet the qualifications for advancement to the rate of Quartermaster 3 or Quartermaster 2.
2015.382.141	Seabee Combat Handbook, Volume 1	Naval Education and Training Professional Development and Technology Center	Table of Contents includes: History and Organization of the Seabees and Laws of War; Special Clothing and Equipment; Service Rifle and Pistol Marksmanship; Combat Maneuvers; Land Navigation; Evasion, Survival, and Escape; First Aid and Field Sanitation
2015.382.142	Seabee Combat Handbook, Volume 2	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Organization and Operation of the Combat Operations Center; Organization and Operation of the Company Command Post; Setup and Control of Medical Evacuation (MEDEVAC); Planning and Development of Defense Tactics
2015.382.143	Seaman	Naval Education and Training Professional Development and Technology Center	Table of contents: Watches; Watchstanders' Equipment; Marlinespike Seamanship; Deck Seamanship; Boat Seamanship; Ammunition and Gunnery.
2015.382.144	Signalman 1 & C	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Introduction to Visual Communications; Signal Equipment; Messages; Allied Communications Procedures; Convoy Communications; Watchstanding Duties; Navigational Duties; Security; Amphibious Duties
2015.382.145	Signalman 3 & 2	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Introduction to Visual Communications; Signal Equipment; Messages; Allied Communications Procedures;

Object ID	Title	Author	Summary
			Convoy Communications; Watchstanding Duties; Navigational Duties; Security; Amphibious Duties
2015.382.146	Steelworker, Volume 1	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Properties and Uses of Metal; Basic Heat Treatment; Introduction to Welding; Gas Cutting; Soldering, Brazing, Braze Welding, and Wearfacing; Shielded Metal-Arc Welding and Wearfacing; Gas Shielded-Arc Welding
2015.382.147	Steelworker, Volume 2	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Layout and Fabrication of Sheet Metal and Fiber-glass Duct; Structural Steel Terms/Layout and Fabrication of Structural Steel and Pipe; Reinforcing Steel; Pre-engineered Structures: Buildings, K-Spans, Towers, and Antennas
2015.382.148	Time Conversion	Naval Education and Training Professional Development and Technology Center	Table of contents: Time theory; Time-Conversion Computation; Geography and Plotting.
2015.382.149	Tools and Their Uses	Naval Education and Training Professional Development and Technology Center	Table of contents: Extremely extensive, covering a wide range of hand and power tools
2015.382.150	Torpedoman's Mate Second Class	Naval Education and Training Program; Management Support Activity	Table of contents includes: Safety, Shipping, Handling, Loading, and Recovery; Torpedo Maintenance Program (General) and Mk 46 Mod 5 Torpedo Maintenance 3. Heavyweight Torpedo Maintenance; Maintenance of Missiles and Mobile Submarine Simulators Systems
2015.382.151	Useful Information for Newly Commissioned Officers	Naval Education and Training Program; Management Support Activity	Table of contents includes: Your Career in the Navy; First Duty Advice; Customs of the Service; Programs and Policies; Social Etiquette; Professional Reading; Opportunity for Education
2015.382.152	Utilitiesman (Advanced)	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Facilities Maintenance Management; Planning Estimating, and Scheduling; Compressed Air Systems; Boilers; Air Conditioning and Refrigeration; Solar Energy; Pollution Control
2015.382.153	Utilitiesman Basic, Volume 2	Naval Education and Training Professional Development and Technology Center	Table of contents: Boilers; Boiler Maintenance; Steam Distribution Systems; Heating Systems; Galley and Laundry Equipment; Refrigeration;

Object ID	Title	Author	Summary
2015.382.154	Utilitiesman Basic, Volume 1	Naval Education and Training Professional Development and Technology Center	Air Conditioning Table of contents includes: Plans, Specifications, and Color Coding; Plumbing; Plumbing Valves and Accessories; Plumbing Fixtures and Plumbing Repairs; Prime Movers, Pumps, and Compressors; Water Treatment; Equipment Maintenance
2015.382.155	Yeoman Basic	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Official Publications and Directives; Correspondence/Message System; Processing Correspondence/Messages; Correspondence/Message Files and Disposal; Directives Issuance System; Reports and Forms; Security; Legal; Awards
2015.382.156	Unit Course in Marine Electricity	National Defense Training Program. Bureau of Trade and Industrial Education of	Table of contents includes: Cable Hangers: Handling Cable; Elementary Electric Circuits; Elementary Lighting circuits; Fixtures and Fittings; Simple Sketches; Cable testing for Continuity and Identification; Ship Locations and nomenclature;
2015.382.157	Navy Instructional Theory	Naval Education and Training Professional Development and Technology Center	Table of contents: General Administration; Technical Administration; Electronics Safety; Hazardous Materials; Ammunition Safety, Handling, Shipping, And Stowing..
2015.382.158	Yeoman 1 & C	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Education, Advancement, and Career Opportunities; Assignments and Retention; Administrative Procedures; Forms; Personnel; Manpower Authorization; Travel; Security; Legal; Separations
2015.382.159	Machinery Repairman	Naval Education and Training Program Management Support Activity	Table of contents includes: Toolrooms and Tools; Metals and plastics; Power Saws and Drilling Machines; Milling Machines and Milling Operations; Vertical Turret Lathe and Horizontal Boring Mill; Precision Grinding Machines; Gears and Gear Cutting;
2015.382.160	Main Propulsion Plant, DD445 and 692 Classes and Converted Types; Operational Manual	Bureau of Ships	Table of contents includes: Steam Cycle; Condensate System; Feed Water System; Boilers; Expansion System; Misc. Systems; Auxiliary

Object ID	Title	Author	Summary
			Plant; Auxiliary Machinery; Operating Procedure; Electrical Plant
2015.382.161	Navy Driver's Handbook	Naval Facilities Engineering Command Washington Navy Yard	Table of contents includes: Driver Requirements; Operating Instructions for Normal and Hazardous Conditions; Truck-Tractor and Semitrailer; Emergency Roas Service; Instruction in Case of Accidents
2015.382.162	Operating Instructions for ECM Mark 2 (CSP 888/889) and CCM Mark 1 (CSP 1600)	Office of the Chief of Naval Operations	Table of contents includes: General Instructions; Description; Operation; Maintenance; Repair; CCM Mark I
2015.382.163	Electronic Installation Practices Manual, Chapter 9, Cabling,	Bureau of Ships	Table of Contents includes; General Description; Installing Cable Straps and Hangers; Installing in Wire Ways; Numbering Cables and Conductors; Preparing for Installation; Lacing and Binding
2015.382.164	Guidelines for Installation Mapping and Geospatial Data	None Stated	Table of contents includes: Base Map Definition; Description of Base Map Products; Base Map Development; Mapping Statement of Work Model; Map Inventory Spreadsheet Template and Sample Patuxent River Map Inventory Spreadsheet
2015.382.165	Introduction to Radio Equipment	Bureau of Naval Personnel	Table of contents includes: What is electricity?; Batteries; Circuits; Ohm's Law; Magnetism; Electromagnetism; Generators; Motors; The condenser; The vacuum tube; Amplifier tubes; Background to modern radio; Introduction to transmitters; Receivers
2015.382.166	Aviation Storekeeper 1 & C	Naval Education and Training Professional Development and Technology Center	Topics covered: Administration and Customer Service; Storage and Material Handling; Material Receipts and Expenditures; Aviation Material Management; Inventory Management; Financial Management; and Automated Supply Support.
2015.382.167	Harmony	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Melody writing; Verticle structures; voice motion; Root position primary triads; Non-harmonic tones; Secondary triads; Simple modulation; Secondary chords; Chromatic alterations

Object ID	Title	Author	Summary
2015.382.168	Quartermaster	Naval Education and Training Professional Development and Technology Center	Table of contents includes: Introduction to Navigation; Compasses; Navigational Publications; Basics of Time; Introduction to Celestial Navigation; Tides and Currents; Dead Reckoning, Piloting, and Electronic Navigation; Weather Observation
2015.382.169	Motor Torpedo Boats, Tactical Orders and Doctrine,	Headquarters of the Commander in Chief. United States Fleet	The manual provides insight into how PT Boats were used. Table of contents includes: General Doctrine; Tactical formations and orders; attack plans; Armament doctrine and standard procedures; Engineering and communications doctrines
2015.382.170	Radar Operator's Manual, Radar Bulletin No. 3, (RADTHREE),	Headquarters of the Commander in Chief. United States Fleet	Table of contents: General radar principles, IFF principles; General operational techniques; Specific equipment; Relative motion-combat information center; Telephone talking procedure
2015.382.171	Navy Rail Operating Handbook	Naval Facilities Engineering Command Washington Navy Yard	This publication provides mandatory and recommended practices for the operation and maintenance of Navy Railway equipment.
2015.382.172	Navy Seal Physical Fitness Guide, The	Department of Military and Emergency Medicine	Table of contents includes; Overview of physical fitness; SEAL Mission-Related physical activities; Cardiorespiratory conditioning; Running and swimming for fitness; Strength training; Flexibility; Calisthenics; Plyometrics
2015.382.173	Naval Sonar	Bureau of Naval Personnel	Table of contents includes: Basic Principles of Underwater Sound; Sound Reception and Detection by Listening; Essentials of Echo-Ranging Equipment; Surface-Ship Echo-Ranging Equipment; Sonar Receivers
2015.382.174	Torpedo Fire Control Equipment (Destroyer Type)	Bureau of Ordnance	This Ordnance Pamphlet contains information on the description, operation, installation, maintenance, and overhaul of destroyer type fire control equipment. The equipment includes the Torpedo Director Mark 27 Mods 1 to 9 with Telescope Mark 50
2015.382.175	Mechanical Design, Heating, Ventilating, and Air-Conditioning	Headquarters. Department of the Army	Table of contents: General; Fundamentals; Systems; Applications; Equipment

Object ID	Title	Author	Summary
2015.382.176	Aviation Storekeeper 2	Naval Education and Training Professional Development and Technology Center	Topics covered: administration, plant accounts, and publications; financial management of resources; material receipt, custody, and surveys; purchasing; and aviation material management.
2015.382.177	Aviation Storekeeper 3	Naval Education and Training Professional Development and Technology Center	Topics covered: Aviation supply organization; administration and customer service; material identification; material procurement; material receipt; material custody, material stowage, material handling, and safety; material expenditure and movement; material control; supply support; and stock control.
2015.382.178	Aviation Structural Mechanic (H & S) 3 & 2	Naval Education and Training Professional Development and Technology Center	Topics covered: Aircraft construction and materials; aircraft hardware and seals; general aircraft maintenance; hydraulic contamination and related servicing/test equipment; hose fabrication and maintenance; tubing fabrication and maintenance; basic power systems; basic actuating systems; fixed-wing flight control systems; rotary-wing flight control systems; aircraft wheels, tires, and tubes; landing gear, brakes, and hydraulic utility systems; aircraft metallic repair; aircraft nonmetallic repair; and nondestructive inspections welding, and heat treatment.
2015.382.179	Aviation Maintenance Administrationman Basic	Naval Education and Training Professional Development and Technology Center	Topics covered: the Naval Aviation Maintenance Program (NAMP); maintenance administration; technical publication library; maintenance control and production control; the Maintenance Data System; aircraft logbooks; the Aircraft Inventory Reporting System; the Aeronautical Equipment Service Record (AESR); and the Aircraft Engine Management System.
2015.382.180	Captivity : The Extreme Circumstance	Naval Education and Training Professional Development and Technology Center	This is a training manual for Navy personnel who might be captured. Topics covered: Historical Perspectives; The Long Look Back; The Lessons of Wartime Imprisonment; Moral and Ethical

Object ID	Title	Author	Summary
			Implications of Surviving Captivity; for further reading; bibliography (Reference Used to Develop this Manual). Covers the history of prisoners of war, gives stories of POWs from Vietnam including James B. Stockdale, covers lessons learned, discusses the role of Chaplains in ministering to prisoners, covers some chaplains taken prisoners. From the introduction: Lessons learned following the Korean conflict indicate a person can acquire survival skills that empower him/her to face captivity. This nonresident training course is designed to help gain knowledge of the history and policy pertaining to prisoners of war, provide capability survival skills, and suggest avenues of support for POWs/MIAs and their families.
2015.382.181	Disbursing Clerk 1 & C	Naval Education and Training Professional Development and Technology Center	Topics covered: Financial Accountability; Appropriation Accounting; Travel Allowances; U.S. Treasury Checks; Foreign Currency; Public Vouchers; Financial Returns; Pay Entitlements; and Separations, Discharges, and Retirements.
2015.382.182	Illustrator Draftsman 1 & C, Volume 1 - Equipment	Naval Education and Training Professional Development and Technology Center	Topics covered: This is an overview of general shop administration, available equipment, required operator adjustments, and equipment maintenance. Knowing the capabilities and limitations of the equipment before creating artwork is essential.
2015.382.183	Illustrator Draftsman 3 & 2, Volume 1 - Equipment	Naval Education and Training Professional Development and Technology Center	Topics covered: This is an overview of general shop administration, available equipment, required operator adjustments, and equipment maintenance. Knowing the capabilities and limitations of the equipment before creating artwork is essential.
2015.382.184	Illustrator Draftsman 1 & C, Volume 3 - Executionable Practices	Naval Education and Training Professional Development and Technology Center	Topics covered: These chapters cover the theory of color, photography, computer-generated art, figure drawing, cartooning, animation, mediums, lettering, and

2015.386.002	USS Midway (CV-41) - Desert Magic - 1990-1991	Guido, S. (ed.)	Greyhounds) A pictorial account of the activities and crew of USS Midway in the period July 1990 through June 1991. It was an eventful period in the life of Midway that saw her as the flagship of the U.S. Naval Presence on the Northern Arabian Sea and Persian Gulf in the leadup to and execution of Operation Desert Storm. Midway was on station from November 1990 to March 1991. This was part of a western pacific/I.O. deployment that took place from 2 October 1990 to 17 April 1991. Port visits during the period the cruise book covers were Subic Bay (2), Singapore, Abu Dhabi, Pattaya Beach and Hong Kong. Midway was visited by Vice-President and Mrs. Dan Quayle on 21 May in recognition of Midway's participation in Desert Storm. Other VIP visits included the Secretary of the Navy, Australia's Maritime Commander and Brooke Shields. Midway escorts for the deployment were USS Oldendorf (DD-972), USS Curts (FFG-38) and USS Fife (DD-971). CVW-5 was embarked for the deployment portion with VFA-195 (F/A-18A); VFA-151 (F/A-18A); VFA-192 (F/A-18A); VA-185 (A-6E and KA-6D); VA-115 (A-6E and KA-6D); VAW-115 (E-2C); VAQ-136 (EA-6B); and HS-12 (SH-3H).
2015.386.009	USS Midway (CV-41) - Magic Moments - 1987-89	Tate, D. E. (ed)	Pictorial account of the several deployments of the USS Midway (CV-41) and history covering seven hundred twenty nine (729) days. Major deployments were: (1) 23 April - 13 July 1987 - She departed Yokosuka, visited Hong Kong, Subic Bay, Sydney, Subic Bay again, and returned to Yokosuka. Onboard: VFA-195 (F/A-18A) VFA-151 (F/A-18A) VFA-192 (F/A-18A) VA-115 (A-6E and KA-6D) VAW-115 (E-2C) VAQ-136 (EA-6B)

Object ID	Title	Author	Summary
			HS-12 (SH-3H) (2) 15 October 1988 - 11 April 1988 - She departed Yokosuka, visited Subic Bay; on station in the Indian Ocean; Mombasa, Kenya; turnover with the USS Enterprise (CVN-65); Pattaya Beach, Thailand; Subic Bay again; Pusan, Korea; Sasebo, Japan; and returned to Yokosuka. Onboard: VFA-195 (F/A-18A) VFA-151 (F/A-18A) VFA-192 (F/A-18A) VA-185 (A-6E and KA-6D) VA-115 (A-6E and KA-6D) VAW-115 (E-2C) VAQ-136 (EA-6B) HS-12 (SH-3H) (3) 8 September 1988 - 9 November 1988 - Departed Yokosuka; Sasebo; Pusan; returned to Yokosuka; Subic Bay twice; and returned to Yokosuka. Onboard: VFA-195 (F/A-18A) VFA-151 (F/A-18A) VFA-192 (F/A-18A) VA-185 (A-6E and KA-6D) VA-115 (A-6E and KA-6D) VAW-115 (E-2C) VAQ-136 (EA-6B) HS-12 (SH-3H) Carrier Air Wing Five (CVW-5) was onboard for all deployments. Items of interest: Picture of the USS Midway and USS Iowa (BB-61) on station in the Indian Ocean (pages 22-23). First US carrier visit to Sydney since 1972. Poem by SN Robert E. Parks on page 24. VIPs: Wayne Newton, Senator Edward Kennedy, Kingdom of Thailand visitors, Rear Admiral Buckley; Senator Ted Stevens, Alex Trebek, Yokosuka VIPs; Bob Hope, Connie Stevens, Tricia and Joely Fisher, Barbara Eden, Lee Greenwood, Miss USA Michelle Royer performed Christmas Eve 1987; four pages of pictures of Soviet ships in the area when Midway was on Alert Alpha; pages 48-49 map of the three deployments; pages 71/72 and 73/74 damaged at the printers; there is a lot of description about the functions of each department with the

2015.387.007	Physics, Course 3, Electricity, Textbook : A Self-Teaching Course	Dull, Charles E.	curriculum of the United States Armed Forces Institute. A self-teaching guide to physics written for the War Department and intended for use by members of the Army, Navy, Marine Corps and Coast Guard participating in the curriculum of the United States Armed Forces Institute. This module is on Electricity and is in textbook form. A companion form is the Workbook.
2015.387.008	Decommissioning of the USS Midway (CV 41) San Diego, California April 11, 1992	USS Midway	Program from the decommissioning of the USS Midway (CV 41) in San Diego, CA on April 11, 1992. Includes the invitation from the Commanding Officer to the Decommissioning. Also includes a 2-page insert of the speaker's bio (Secretary of the Navy H. Lawrence Garrett III) and the Schedule of Events.
2015.387.009	Gunner's Mate 2c - Vol. 2	Bureau of Naval Personnel	This book is the second of 2 volumes written for the purpose of aiding in promotion of men to the rating of Gunner's Mate, second class. It is realized that nothing can take the place of actual practice in Gunner's Mate duties.
2015.387.010	Fundamentals of Electricity	Bureau of Naval Personnel	A primer on electricity written for the enlisted men of naval aviation. Topics covered include electrical current, electrical circuits, Ohm's law, electrical measurements, characteristics of circuits, circuit resistance, circuit faults, calls and batteries, magnetism, electromagnetism, generators, direct current motors, electromagnetic induction, inductance and capacitance, and sound.
2015.387.011	Gunner's Mate 2c - Vol. 1	Bureau of Naval Personnel	This book is the first of 2 volumes written for the purpose of aiding in promotion of men to the rating of Gunner's Mate, second class. It is realized that nothing can take the place of actual practice in Gunner's Mate duties.
2015.387.012	Physics, Course 2, Heat, Sound, and Light	Dull, Charles E.	Second of three books that cover the fundamentals of physics presented as a self-learning course for personnel of the U.S. military.

Object ID	Title	Author	Summary
2015.387.013	Use of Tools : Basic Navy Training Courses	Bureau of Naval Personnel	One of several Navy Basic Training Courses, this was prepared as a basic reference for enlisted men of the Navy whose duties require them to use tools to keep navy equipment shipshape.
2015.387.014	Mathematics for Pilots	Bureau of Naval Personnel	A primer on mathematics written especially for men training to be pilots. It was to provide them what they needed to do navigation and have a basic idea of the mathematical principles on which aircraft flight is based.
2015.387.015	Extracts from the Uniform Code of Military Justice Annotated	Bureau of Naval Personnel	From the Preface: "By approving a conference report on 25 and 26 April 1950, Congress gave the Armed Forces of the United States a Uniform Code of Military Justice. The President affixed his signature to the bill on 5 May 1950, making the Uniform Code law. The effective date of the Uniform Code is 31 May 1950, on and after which Articles for the Government of the Navy are abolished and the Uniform Code substituted thereafter. To ensure that personnel of the Navy were cognizant of their responsibilities, duties and rights, and the retribution exacted of them for their failures, the Articles for the Government of the Navy, required that each commanding officer 'cause the articles for the government of the Navy to be hung in some public part of the ship and read once a month to his ship's company.' The new Uniform Code similarly requires that certain articles be carefully explained to every enlisted person at the time of his entrance on active duty or within six day thereafter, and again after he has completed six months of active duty, and at the time he re-enlists. This explanation must be given to enlisted reservists within six days after they report for active duty (and six months later and at the time of re-enlistment if still on active duty) as well as to newly enlisted personnel of the regular Navy."

Object ID	Title	Author	Summary
2015.387.016	Advanced Mathematics, Vol. 1	Bureau of Naval Personnel	Covers advanced mathematics from quadratic equations through the first principles of differential calculus. The principles of algebra, trigonometry and analytical geometry are presumed previously mastered.
2015.387.017	Physics, Course 3, Electricity, Workbook : A Self-Teaching Course	Dull, Charles E.	A self-teaching guide to physics written for the War Department and intended for use by members of the Army, Navy, Marine Corps and Coast Guard participating in the curriculum of the United States Armed Forces Institute. This module is on Electricity and is in workbook form. A companion form is the Textbook.
2015.387.018	Electricity for Beginners : A Self-Teaching Course; A Special Edition of Basic Electricity	Beauchamp, Wilbur L.	A self-teaching guide to basic electricity written for the War Department and intended for use by members of the Army, Navy, Marine Corps and Coast Guard participating in the curriculum of the United States Armed Forces Institute.
2015.387.019	College Physics, Volume 2	Hausmann, Erich	Volume 2 of self-teaching guide to college physics written for the War Department and intended for use by members of the Army, Navy, Marine Corps and Coast Guard participating in the curriculum of the United States Armed Forces Institute. This book starts at Chapter XX, Electrical Charge under the heading Electricity and Magnetism and proceeds through Chapter XL also covering Sound and Light.
2015.387.020	Refresher Course in Fundamental Mathematics for Basic Technical Training	Bureau of Naval Personnel	From the Foreword: "This one month refresher course in primary mathematics has been designed to furnish a review in fundamental arithmetic and primary mathematics upon which more advance instruction in technical fields may be given. It can be used either as a guide for classroom instruction or as a self-taught review. Based on the assumption that the students preparing for the technical training schools of the Navy have already had the equivalent of a high school education, we have purposely omitted detailed explanation of the mathematical processes

Object ID	Title	Author	Summary
			involved in the problems. In lieu of this, we have endeavored to present the complete solution of every problem as an aid to those students who wish to use the review as a home study course."
2015.387.021	Course in the Slide Rule and Logarithms, A	Hills, Elijah Justin	A self-teaching guide to slide rules and logarithms written for the War Department and intended for use by members of the Army, Navy, Marine Corps and Coast Guard participating in the curriculum of the United States Armed Forces Institute. A comprehensive guide that includes calculations involving powers and roots, inverted scales, and graphical solution of triangles.
2015.387.022	Pass the Word : Facts and Figures of the Naval Service	Bureau of Naval Personnel	From the introduction: "Ever since the day the Navy was established it has had, among others, one continuing problem. Stated simply, it is--How can the Navy get, and keep, the enlisted personnel required? Depending upon our internal economic conditions--and the then current international situation--the intensity of that problem has varied from one extreme to the other. The problem has two separate, but closely related parts. They are recruiting and reenlistment...."
2015.388.001	Great Aircraft of the World : An Illustrated History of the Most Famous Civil and Military Planes	Caultt, Len	From the Introduction "Deciding on a choice of the world's most famous aircraft is no easy matter. There is no objective yardstick that can be used to decide on how famous an aircraft is. But there are some criteria which help make the choice easier. Manfred von Richthofen with his triplane was a legend even in his own time. The Messerschmitt Bf 109 worked its way in the history books through the sheer numbers in which it was built, and in Britain, the Spitfire became a symbol of an entire nation's war effort. The indestructible DC-3 survived not only the war, but is still being used all over the world today, more than half a century after its maiden flight. In contrast, there are virtually

Object ID	Title	Author	Summary
			no more working Junker Ju52s left, but they were known to a generation of Germans as the 'Tante Ju'. Nor is being famous necessarily the same as being successful. The tragic series of crashes involving Comets and Starfighters has made more headlines than the technical innovations they embodied, and Concorde's record-breaking performances rapidly eclipsed the financial disaster this ambitious project represented. But more successful from an economic point of view have been two stars of the undisputed stars of the world of modern aviation, the Airbus and the Tornado, both of which reflect the upturn experienced by the European aircraft industry during the past few decades. All the aircraft described here represent an epoch, a country, a design team, and outstanding technical performance. All of them have become celebrities of the air."
2015.388.002	Aircraft Carrier, The : An Illustrated History	Ireland, Bernard	This book traces the evolution of the aircraft carrier from the early days to the present. Midway is mentioned on pages 126-7, 130 and 157
2015.389.001	USS Okinawa (LPH-3) - World Cruise - 1987-88	Nelson (ed)	A pictorial account of the 1987 - 1988 Around the World Tour cruise of the USS Okinawa. Departed San Diego on January 15, 1987. Ports of call included: Philipines, Persian Gulf, Bahrain, Saudi Arabia, Suez Canal, Palma Spain, Norfolk VA, Panama Canal. Returned to San Diego May 17, 1988.
2015.390.001	Report of Operation Sandy	Chief of Naval Operations	This is a report on the launching of a V-2 captured German rocket from World War II from the flight deck of the USS Midway. Originally Confidential, it was declassified 16 September 1974. The preface was RADM D. V. Gallery, Assistant Chief Naval Operations (Missiles). He may have been the artist of the cartoon on page 1. Gallery was known for capturing U-505 during World War II. This report was taken from a CD in Curatorial: 2006.175.001.

Object ID	Title	Author	Summary
2015.390.002	Navy Ship Names : Background for Congress	O'Rourke, Ronald	Names for Navy ships traditionally have been chosen and announced by the Secretary of the Navy, under the direction of the President and in accordance with rules prescribed by Congress. Rules for giving certain types of names to certain types of navy ships have evolved over time. On 13 July 2012, the navy submitted to Congress a 73-page report on the navy's policies and practices for naming ships. The report summarizes ship naming for Aircraft carriers, Virginia class attack submarines, Destroyers, Littoral Combat Ships, Amphibious Assault Ships, San Antonio class amphibious ships, TAO(X) oilers, Lewis and Clark (TAKE-1) class cargo and ammunition ships, Mobile Landing Platform (MLP) ships/Afloat Forward Staging Base (AFSBs).
2015.390.003	Glide Bombing, How to Do It	Chief of Naval Operations	There is a CD copy: 2009.302.009. Describes the tactic of dive bombing, differentiating it from Dive, low-level or masthead bombing. Formerly Restricted handling. Document is contained in an Adobe Acrobat file (.pdf).
2015.390.004	U.S. Navy Diving Manual	Commander, Naval Sea Systems Command	This manual supersedes NAVSEA 0994-LP-001-9010, Revision 3, dated 15 February 1992. Contents: Vol. 1 - Diving Principles and Policies Vol. 2 - Air Diving Operations Vol. 3 - Nuxed-Gas Surface-Supplied Diving Operations Vol. 4 - Closed-Circuit and Semiclosed-Circuit Diving Operations Vol. 5 - Diving Medicine and Recompression Chamber Operations
2015.391.001	USS Midway (CVA-41) - Westpac - 1961	Welles, Chris (ed)	Pictorial account of USS Midway (CVA-41) deployment to South East Asia. The aircraft carrier departed Alameda, CA on 15 February and returned 28 September 1961. Ports of call and items of interest: 14 pages of pictures of San Francisco

2015.394.001	USS Midway (CV-41) - A Touch Of Salt - 1976-1978	Begy, C. R. (ed)	lists ships by name. Pictorial account of USS Midway activities during the period of 1976 to 1978 including an 89 day South China Sea/Indian Ocean deployment commencing in August of 1977. The ship departed from Yokosuka, Japan. There is a 1976 cruise book, and a 1978-79 cruise book. One source on the internet lists 4 deployments in 1976, 3 deployments in 1977, and 2 deployments in 1978. It is difficult to determine which deployments this book covers. Port calls in this book included the Pusan, Hong Kong, Subic Bay, Freemantle (Perth), Karachi, Singapore, Diego Garcia, Bandar Abbas, Misawa, Kadena. Onboard was: Carrier Air Wing Five (CVW-5) Squadrons listed in this book but which change with other deployments in 1977 are: VF-161 (F-4N) VF-151 (F-4N) VA-115 (A-6A/B and KA-6D) VAW-115 (E-2B) VQ-1 VMAQ-2 Det. (EA-6A) HC-1 Det.B-1 and B-2 (SH-3G) The following was written by Pete Clayton and Robert L. Broadus and appears on page 279 of the Midway cruise book for 1978-79: Beginning in May of 1977, VF-151 and VF-161 transitioned to F-4Js and VA-56 and VA-93 started flying A-7Es. VA-115 also exchanged their A-6As and Bs (A-6Bs) for A-6Es. This CVW-5 transition occurred while the ship was in port for its 60 day EISRA (Extended Incremental SRA, a unique modernization concept developed for Midway). The air wing transition was completed in September when USS Coral Sea fighter squadrons VF-191 and VF-194 exchanged their F-4Js with Midway's F-4Ns, prior to Coral Sea returning to Alameda after her 1977 deployment. In late 1977, Midway made

			an 87 day deployment to the Indian Ocean where she was the principal participant in Midlink 77, an exercise hosted by the Iranian Navy and including representation from Pakistan, Turkey, and the Royal Navy.
2015.397.002	Education and Training	Bureau of Naval Personnel	Handbook for naval personnel about the Navy's policies and facilities for providing instruction. Contents: Fundamentals of navy education and training -- Responsibility for education and training -- Advancement of enlisted personnel -- Enlisted classification and service schools -- Officer procurement and initial training -- Officer classification and education -- Staff corps education and training -- Functional, fleet, aviation, and in-service training -- Naval Reserve training -- Supporting programs.
2015.397.003	Military Requirements for Senior & Master Chief Petty Officer	Naval Education and Training Command	Training manual designed for use by enlisted personnel of the Navy and Naval Reserve in preparing for advancement to senior chief petty officer and master chief petty officer.
2015.397.004	Shipboard Electrical Systems	Naval Education and Training Command	Training manual designed for use by junior officers of the U.S. Navy and Naval Reserve as an aid in gaining more knowledge of the electrical equipment and electrical systems installed aboard Navy ships.
2015.397.005	Basic Electronics	Bureau of Naval Personnel	Written for men of the U.S. Navy and Naval Reserve whose duties require them to have a fundamental knowledge of electronics.
2015.397.006	Damage Controlman 1 & C	Bureau of Naval Personnel	An instructional manual written for men of the Navy or Naval Reserve who are preparing for advancement to the rates of Damage Controlman Petty Officer 1st Class or Damage Controlman Chief Petty Officer.
2015.397.007	Shipfitter 1 & C	Bureau of Naval Personnel	Rate training and advancement Manual for Shipfitter 1 & C.

Object ID	Title	Author	Summary
2015.397.008	Disaster Control (Ashore and Afloat)	Bureau of Naval Personnel	Training manual designed for use by men and women of the U.S. Navy and Naval Reserve as an aid in gaining more knowledge of the appropriate responses to man-made disasters brought about by nuclear, biological or chemical warfare.
2015.397.009	Builder 1 & Chief	Bureau of Naval Personnel	Training manual designed for use by enlisted personnel of the Navy and Naval Reserve in preparing for advancement to Builder Petty Officer First Class and Chief Petty Officer.
2015.397.010	Aircraft Welding	Naval Air Technical Training Command	A self-study package to enable ambitious Aviation Structural Mechanics to help themselves fulfill the requirements of the rating.
2015.397.011	Introduction to Shipboard Weapons	Corse, Carl D.	The book was written to teach prospective naval officers about naval weapons and as a valuable reference for the junior officer at sea. Surface ship weapons are described because they are representative of all types of weapons used at sea and are typical of the weapons systems most junior officers are likely to encounter in their first duty assignment. Description of submarine and air weapons is beyond the scope of the book.
2015.397.012	Logarithmic and Mathematical Tables	War Department	Provides artillery units with tables of data for survey and other mathematical computations.
2015.397.013	Fundamentals of Carpentry	Durbahn, Walter E.	Designed to unfold the fundamentals of carpentry in simple terms providing clear-cut instructions in one-two-three order. Combines a diversity of coverage with detailed accuracy to provide a valuable reference work. For use as a self-study guide by USAFI. Known when published by short title MC 756.

2015.410.001	USS Midway : America's Shield	McGaugh, Scott	The USS Midway first set sail in 1945, with thousands of young men aboard. When it made its final return to port nearly fifty years later, more than 200,000 sailors-with an average age of nineteen-had served on the floating aircraft carrier. The crew witnessed such significant events as nuclear threats during the Cold War, confrontations with Mao Tse-Tung, espionage battles with the Russians, a fire that nearly sank the floating aircraft carrier, and the liberation of Kuwait. This collective memoir of the brave Americans who faced these threats while at sea provides a compelling story of empowerment and optimism. Scott McGaugh is the marketing director of the USS Midway Museum and a spokesman for Midway University, the museum's education program. In addition to discussing the subject on documentaries for the History Channel and other media outlets, he has written several books about Midway. McGaugh is a member of the Public Relations Society of America's Counselors Academy and has received the Society's highest national award, the Silver Anvil. He earned a BS in political science from Arizona State University and studied international relations at Uppsala University in Sweden. An avid gardener and fly fisherman, McGaugh lives in San Diego, California.
2015.411.001	1812 : The Navy's War	Daughan, George C.	When war broke out between Britain and the United States in 1812, America's prospects looked dismal. British naval aggression made it clear that the ocean would be the war's primary battlefield--but America's navy, only twenty ships strong, faced a practiced British fleet of more than a thousand men-of-war. Still, through a combination of

Object ID	Title	Author	Summary
			nautical deftness and sheer bravado, a handful of heroic captains and their stalwart crews managed to turn the tide of the war, besting the haughty skippers of the mighty Royal Navy and cementing America's newly won independence. In 1812: The Navy's War, award-winning naval historian George C. Daughan draws on a wealth of archival research to tell the amazing story of this tiny, battletested team of Americans and their improbable yet pivotal victories. Daughan thrillingly details the pitched naval battles that shaped the war, and shows how these clashes proved the Navy's vital role in preserving the nation's interests and independence. A stunning contribution to military and national history, 1812: The Navy's War is the first complete account in more than a century of how the U.S. Navy rescued the fledgling nation and secured America's future. 2015.411.002	Stephen Decatur : A Life Most Bold and Daring	Tucker, Spencer	Brave, energetic, intensely patriotic, Stephen Decatur is America's first great naval hero after John Paul Jones. His short and dramatic life is a story of triumph and tragedy told by the noted historian and author of some twenty books, Spencer Tucker. Decatur's raid into Tripoli Harbor in 1804 to burn the Philadelphia, a prized U.S. warship captured when it ran aground during the Barbary Wars, earned him international fame. An admiring Horatio Nelson described the feat as "the most bold and daring act of the age." Explaining the tremendous impact Decatur's action had on the early U.S. Navy, the author notes that it set a standard of audacity and courage for generations of future naval officers. At the age of twenty-five, Decatur was promoted to captain, becoming the youngest naval officer ever to attain that rank in the U.S. Navy. The book fully examines Decatur's astonishing achievements as it chronicles his rapid rise in the Navy, including his command of the Constitution and the United States, during the War of 1812, when he captured the British frigate Macedonian off the Azores. The book also recounts the cruise that many call his greatest triumph: Decatur sailed into the Mediterranean with a nine-ship American squadron to punish the dey of Algiers for taking American merchant shipping, securing peace with Algiers and keeping other Barbary states quiescent. Lionized by a grateful American public upon his return, Decatur offered a toast at a reception in his honor that is now legendary, "Our country! In her intercourse with foreign nations, may she always be in the right; but our country, right or wrong!" In describing Decatur's life, the author also

2015.417.001	Saving Big Ben : The USS Franklin and Father Joseph T. O'Callahan	Satterfield, John R.	Contents: Prologue -- Introit -- Iudicium -- In hoc signo vinces - - Pensacola : the Annapolis of the air -- Ranger : chaplain of "The ghost ship" -- Interlude : a tale of two sisters -- Franklin : "Big Ben" -- Murderers' row -- March 19, 1945 : crucible -- Operating independently -- Accolades : "Chaplain Courageous" -- The room in Fenwick Hall : "the hidden hermit of pain" -- Requiem aeternam dona ei. ----- Father Joe O'Callahan, S.J. was the unlikeliest war hero. A bespectacled math professor from Holy Cross, he became the U.S. Navy's first Jesuit chaplain in World War II and served in combat operations in the Atlantic and Pacific theaters. Father O'Callahan was on the aircraft carrier Franklin, known as "Big Ben", in the Okinawa campaign in early 1945 when massive explosions and fire from a kamikaze bomb attack nearly destroyed his ship. Hundreds of sailors died within moments of the attack, and the Franklin, lay dead in the water, drifting toward Japan just 60 miles distant. As flames consumed the carrier, the chaplain organized and led fire-fighting crews and prevented a potentially fatal explosion while ministering to injured, dying and terrified sailors. Father O'Callahan's deeds were instrumental in saving the Franklin,, and he stayed with the ship on its

Object ID	Title	Author	Summary
			voyage under power to New York Harbor. The carrier's captain called him "the bravest man I ever saw," and Father Joe became the first American military chaplain to receive the Medal of Honor, the nation's highest decoration for valor. But the price of glory was high for Father O'Callahan. He suffered a stroke after returning to Holy Cross and spent the rest of his life enduring incapacitating pain. Through it all, the priest displayed the same leadership and strength derived from unwavering faith that enabled him to help save his ship and comrades. The book incorporates primary sources, interviews with Franklin survivors and O'Callahan family members and other materials never before published, including documentation of the Navy's review of Father O'Callahan's recommendation of the Medal of Honor and the process leading to the priest's receipt of the decoration. (from Amazon.com)

2015.418.001	USS Princeton (CVS-37) - The Huksters - The Far West Then the Far East - 1954-55	Lochner, Robert W. (ed)	Hukster is a word formed by a contraction of the first two letters of "hunter" and the initial letter of "Killer" and used to describe any operation in which the combined efforts of air and surface craft are directed at hunting down and killing submarines. This is the Princeton's specialty. This is a pictorial account of the Essex-class aircraft carrier USS Princeton (CVS-37) on her Far West and Far East cruise. She

2015.601.001	Technical Manual for Disconnect Switch and Load Monitor, Catalog # 281B13CDP, Voltage 120/208 AC, Phase 3, Frequency 400 Hz, Disconnect Switch Rating 200 AMPS	Commander, Naval Sea Systems Command	Technical manual for a naval shipboard alternating current sensing device designed for bulkhead mounting.
2015.601.002	Technical Manual for Disconnect Switch and load monitor, Catalog No. 281B3CDP, Voltage 120/209	Commander, Naval Air Systems Command	Technical Manual for AC Sensing Device designed for bulkhead mounting.

Object ID	Title	Author	Summary
	AC, Phase 3, Frequency 400 HZ, Disconnect Switch Rating 200 AMPS		
2015.601.003	Technical Manual for Valve, AFFF Sprinkling Control Model 100PM-4CEP	Commander, Naval Sea Systems Command	This Manual provides description, operation and maintenance instructions for 9 types of Valves
2015.601.004	Instructions for the operation and maintenance fresh water booster pump installed on CVB-41, 42, 43	Commander, Naval Sea Systems Command	This manual has instructions to assist the installation and operation of the Gardner-Denver Pump.
2015.601.005	Repair parts catalog for Electro cut standard vegetable cutter and slicer	Commander, Naval Sea Systems Command	Proper installation & operation of Electro-cut vegetable cutter and slicer - Series 100
2015.601.006	400hz, 300kw motor-generator and associated control equipment	Commander, Naval Sea Systems Command	This Technical Manual contains description, principles or operation, installation, operation, maintenance, parts identification, test data and master drawing plans
2015.601.008	Instructions for the Operations and Maintenance of Motor Driven Fresh Water Booster Pump Installed on CVB-41, 42, 43	Commander, Naval Sea Systems Command	This manual has instructions to assist the installation and operation of the Gardner-Denver pump.
2015.601.009	Type 1 Technical Manual Rotary pump AFFF liquid service [U].	Commander, Naval Sea Systems Command	The function of the equipment is to pump light water from storage tanks into water mains for firefighting purposes. The pumps are driven at various speeds to deliver the light water at the correct capacity to produce a ration of light water and salt water in the best proportion to extinguish fires
2015.601.010	Ninety ton chilled water air conditioning plant	Commander, Naval Sea Systems Command	This manual includes equipment description and installation, operation and maintenance instructions. The function of this plant is to chill water which is circulated to various spaces aboard ship for air conditioning. Theory and basic principles of refrigeration are included.
2015.601.011	Manual for Installation, Operation, Maintenance and Repair Instructions with Parts List Model 18nc-2, Air Conditioning Chilled Water Pump	Commander, Naval Sea Systems Command	The pumping unit is used to pump fresh water. The pumping unit consists of a horizontal, single stage, double suction, volute t type, centrifugal split-case pump flexible coupled to a constant speed motor.
2015.601.012	Instruction Book for Salinity indicator equipment I. C. No. 54B1	Commander, Naval Sea Systems Command	This book contains a description and the necessary instructions for the installation, operation and maintenance of the equipment. Parts list

			Alameda on 8 March 1959. CVG -2 embarked,consisting of Midway cruise book, Western Pacific cruise 1958-1959 VF-211 (F8U-1) VF-64 (F3H-2) VA-63 (FJ-4B) VAH-8 (A3D-2) VA-65 (AD-6) Z CV41 VFP-61 Det.A (F8U-1P) VAW-11 Det.A (AD-5W) HU-1 Det.1 (HUP-2)
2016.053.006	NATOPS Pilot's Pocket Checklist H-46A/D/F Helicopter	Naval Air Systems Command	Helicopter pilot's checklist for the H-46A/D/F helicopter called the Sea Knight.
2016.059.002	Mission : Seventy-two - USS Midway (CVA-41) - 1972-73	Dowearry, M. M. (ed.)	A pictorial account of the western Pacific deployment of USS Midway in 1972/73. The ship departed Alameda 10 APR 72 and returned to Alameda 3 March 1973, 1 week short of an 11-month deployment. Not only was it a long deployment, Midway was deployed 7 weeks ahead of schedule with less than one week's notice. Significant operations included 9 periods of line operations off Vietnam in support of the Vietnam War. Port calls included Pearl Harbor, Subic Bay (multiple), Hong Kong and Singapore. Bob Hope performed on Midway with his troop on 27 December in Singapore. The show was taped and broadcast on U. S. national television on 17 January 1973 as the Bob Hope Christmas Special. CVW-5 was embarked. The airwing consisted of VF-151 (F-4B), VF-161 (F-4B), VA-56 (A-7B), VA-93 (A-7B), VA-115 (A-6A and KA-6D), VAQ-130 Det 2 (EKA-3B), VFP-63 Det 3 (RF-8G), VAW-115 (E-2B), HC-1 Det 2 (SH-3G), and HC-7 Det 110 (HH-3A).
2016.062.006	Historical Booklet of the United States Navy at San Diego, California, 11th Naval District	Navy Relief Society. San Diego Auxiliary	"Published in the interests of the Navy Relief Society." Booklet gives an overview of the Navy in San Diego, including the Naval Training Base and Naval Hospital. Also provides information regarding the Marine Corp base. Gives a description of some the 1935

			American Exposition as well a Mercy Hospital. It contains ads for various companies in San Diego at the time.
2016.301.001	Commander in Chief : Franklin Delano Roosevelt, His Lieutenants, and Their War	Larrabee, Eric	This book is a study of Franklin Roosevelt's wartime leadership...his principal lieutenants, the major campaigns of the war, and the formulation of grand strategy...Throughout, Larrabee shows that the generals and admirals, without exception, were direct or indirect instruments of Roosevelt's will. A "Touchstone Book." Contents: Roosevelt -- Marshall -- King -- Arnold -- Vandegrift -- MacArthur -- Nimitz -- Eisenhower -- Stilwell -- LeMay.
2016.301.002	Harnessing the Sky : Frederick "Trap" Trapnell, the U.S. Navy's Aviation Pioneer, 1923-52	Trapnell, Frederick M.	Harnessing the Sky is one of the last untold stories in 100 years of naval aviation. Th is biography of Vice Adm. Frederick M. Trapnell explores the legacy of the man who has been called "the godfather of current naval aviation." A pilot of calculated courage, "Trap" entered the Navy when test pilots were more like stuntmen than engineers. Airplanes had not yet come into their own as weapons of war, and they had an undeveloped role in the fleet. His vision and leadership shaped the evolution of naval aviation through its formative years and beyond. When the threat of war in 1940 raised an alarm over the Navy's deficiency in aircraft--especially fighters--Trap was appointed to lead the Flight Test Section to direct the development of all new Navy airplanes. He played a key role in expediting the evolution of the two superb fighters that came to dominate the air war against Japan--the Corsair and Hellcat. After World War II, Trap returned as commander of the

Object ID	Title	Author	Summary
			Naval Air Test Center to lead the Navy through the challenges of transitioning to jets. Trap was not only the first U.S. Navy pilot to fly a jet, but is also recognized for defining the operating requirements for carrier-based jet propelled aircraft. Over the course of two decades, Trap tested virtually every naval aircraft prototype and pioneered the philosophy and the methods of the engineering test pilot. He demanded comprehensive testing of each airplane in conditions and maneuvers it would face in wartime fleet operations. These innovations kept the Navy at the forefront of modern aviation, and stand as an enduring legacy to the man who is regarded as the foremost test pilot in a century of naval aviation.
2016.301.003	Sweet Pea at War : A History of USS Portland (CA-33)	Robotti, Frances Diane	Few ships in American history have had as illustrious a history as the heavy cruiser USS Portland (CA-33), affectionately known by her crew as Sweet Pea. With the destruction of most of the US battleship fleet at Pearl Harbor, cruisers such as Sweet Pea carried the biggest guns the Navy possessed for nearly a year after the start of World War II. This volume describes in harrowing detail how Portland and her sisters protected the precious carriers and held the line against overwhelming Japanese naval strength. the Coral Sea, the Battle of Midway, and the naval battle of Guadalcanal - conflicts that historians regard as turning points in the Pacific war. Portland was the only cruiser ever to fight twice in night battles against enemy battleships, winning both times, and her skilled crew kept her from being hit during innumerable attacks by kamikazes. She rescued nearly 3000 sailors from sunken ships, some of them while she herself was badly damaged. Only a colossal hurricane ended her

Object ID	Title	Author	Summary
			career, but she sailed home from that too. of the ship's crew, Sweet Pea at War recounts the history of US Portland, from launching to scrapping, arguing that she deserves to be remembered as one of the most important ships in US naval history.
2016.301.004	Explosion Aboard the Iowa	Schwoebel, Richard	The explosion aboard the battleship "Iowa" in 1989 that killed 47 crewmen during a routine gunnery exercise was a tragedy not only for the family & friends of those who died but for the U.S. Navy, whose awkward attempts to determine a cause failed miserably. When Navy investigators concluded that the explosion (in one of the warship's huge 16-inch guns) was not an accident but a deliberate act by a member of the crew who died in the blast, there was a public outcry. Schwobel tells how investigators could find no conclusive evidence to support the Navy's claim. But Schwobel's team did find critical safety deficiencies in the "Iowa's" gun systems, & he clearly defines them in layman's terms.
2016.301.005	U.S.S. North Carolina, WWII Battleship Memorial : Technical Reference I	Shoker, Randall S.	A complete technical reference to one of America's greatest battleships, the USS North Carolina. Over 65 present-day and historical photographs (22 full page photos) and 13 drawings cover the ship from stem to stern. A complete camouflage guide as well as a guide to the ship's anti-aircraft gun changes. The book covers the ship's history, her statistics, and campaign history.
2016.301.006	U.S.S. North Carolina, WWII Battleship Memorial : Technical Reference I	Shoker, Randall S.	A complete technical reference to one of America's greatest battleships, the USS North Carolina. Over 75 present-day and historical photographs (23 full page photos) and 32 drawings cover the ship from stem to stern. A complete camouflage guide as well as a guide to the ship's anti-aircraft gun changes. The book covers the ship's history, her statistics, and campaign history.

2016.301.007	USS Massachusetts, WWII Battleship Memorial : Technical Reference 2	Shoker, Randall S.	A complete technical reference to one of America's greatest battleships, the USS Massachusetts. Over 85 present-day and historical photographs (22 full page photos) and 20 drawings cover the ship from stem to stern. The book covers the ship's history and her statistics. Includes detailed cut away drawings of her main and secondary battery.
2016.301.008	Iowa Class Battleships On Deck	Doyle, David	Covers the Iowa-class battleships : Iowa (BB-61), New Jersey (BB-62), Missouri (BB-63), and Wisconsin (BB-64). The Illinois (BB-65) and the Kentucky (BB-66) were authorized but never completed.
2016.301.009	USS Iowa at War	Bonner, Kit	History of the USS Iowa (BB-61) with many illustrations. Contents: History -- Battleships : icons of the sea -- Building the Iowa class -- USS Iowa in World War II -- Korea : 1952 -- Iowa class : 1956-1969 -- The Kirov class : a Soviet menace -- The Iowa class of the 1980s -- Tragedy strikes the Iowa -- The battle for a USS Iowa museum.
2016.301.010	When Dad's At Sea	Pelton, Mindy L.	Emily, whose father is a navy pilot, has to deal with the separation of her family while her dad is deployed aboard an aircraft carrier.
2016.301.011	Basic Electricity	Bureau of Naval Personnel	Basic Electricity is written for men of the U. S. Navy and Naval Reserve whose duties require them to have a knowledge of the fundamentals of electricity. A study guide chart is included to provide readily available information on chapters applicable to the various ratings.
2016.301.012	USS Midway Museum Docent Reference Manual	Pugh, Mark E. (ed)	This is the searchable .pdf version of the 2013 Edition of the Docent Reference Manual (DRM) that was produced under the auspices of the Docent Program Director and the Docent Council. There is a hard copy available in the

Object ID	Title	Author	Summary
			library also. Contributors include Docent Council and Education Committee members, Docent Training Instructors and the Docent Corps at large. Includes Glossary of Terms & Slang, Acronyms & Abbreviations, US Aircraft Carriers, and Midway Commanding Officers.
2016.301.013	USS Hornet Museum : Honoring the Past - Serving the Present - Inspiring the Future	Fish, Bob	This handsome paperback traces the history of the USS Hornet CV-8/CVA-12 in vintage photographs as it served from WWII, Cold War, Vietnam, and to assisting in Apollo 11 and 12 missions, and its condition upon entering the reserve fleet, museum operations, public events, and private events. (from http://www.uss-hornet.org)
2016.301.014	Writing Guide for Naval Officers	Bureau of Naval Personnel	How to write, how to write Navy papers, formulating research papers and staff studies, tips on technique, etc.
2016.301.017	Pearl Harbor Ghosts : A Journey to Hawaii, Then and Now	Clarke, Thurston	Though bloodier battles have been long forgotten, Pearl Harbor, 50 years after the fact, is remembered with a vengeance. Clarke (Equator) undertakes to explain why. Examining the physical and emotional legacies of the Japanese strike on December 7, 1941, he contrasts the arrogant boastfulness of U.S. military authorities before the attack with the search for scapegoats that began immediately after. His emphasis is on the profound shock of that day: it was inconceivable to seemingly everyone on the islands but the Japanese that Asians could attack Caucasians; some witnesses swore the planes were piloted by Germans. Clarke comments bluntly on the insensitive behavior of present-day Japanese tourists on Oahu, especially those who visit the Arizona Memorial where the bones of 1102 U.S. sailors rest, and describes many failed reconciliations between former enemies (sabotaged by thick-skinned Japanese or thin-

Object ID	Title	Author	Summary
			skinned Americans). The Japanese as a whole, observes Clarke, are becoming increasingly the object of ill-will on the islands "as Hawaii becomes an economic colony of Japan." This is a strangely disturbing book about "A unique act of treachery, difficult to forgive," and wounds that have yet to heal. Photos. (Sept.)
2016.301.018	Escape from the Deep : The Epic Story of a Legendary Submarine and her Courageous Crew	Kershaw, Alex	By October, 1944, the U.S. Navy submarine Tang was legendary--she had sunk more enemy ships, rescued more downed airmen, and pulled off more daring surface attacks than any other Allied submarine in the Pacific. And then, on her fifth patrol, tragedy struck-the Tang was hit by one of her own faulty torpedoes. The survivors of the explosion struggled to stay alive in their submerged "iron coffin" one hundred-eighty feet beneath the surface. While the Japanese dropped deadly depth charges, just nine of the original eighty-man crew survived a harrowing ascent through the escape hatch. But a far greater ordeal was coming. After being picked up by a Japanese patrol vessel, they were sent to a secret Japanese interrogation camp known as the "Torture Farm." They were close to death when finally liberated in August, 1945, but they had revealed nothing to the Japanese -not even the greatest secret of World War II.
2016.301.021	History of the U.S. Navy	Morris, James Matthew	Provides an enthralling account of the vital part naval power has played in making America what it is today. ...Complimented with numerous carefully selected illustrations and photographs. (from jacket flap) Contains 2-page color photo of launching of USS Midway in 1945 (pgs 164-65) and b&w Midway photo on page 167.
2016.301.022	Manual of Naval Architecture : The Fundamental Principles of Naval Architecture, Ship-Design and Construction for Masters and Mates	Manning, George Charles	The primary reason for this work is to present the basic and advanced information on ship construction.Great selection of formulas, graphics and advice that help in the understanding of structuring and assembling

Object ID	Title	Author	Summary
			in such a way as to be of maximum usefulness to officers of the Merchant Marine. Most works on the subject of naval architecture and ship construction are prepared for those engaged in the design and construction of ships, not for the operating officer. The author has therefore endeavored to make this work cover all the features of a hull. This book will cover : Buoyancy; Stability; Propulsion; Steering-Weight-Strength; Class and Tonnage; Ship Design and Construction; Hull Proper; Hull Fittings; Hull Systems; Fuel Handling and Stowage; and Preservation
2016.301.024	Halsey	Frank, Benis M.	In the Second World War there was probably no naval commander as well known, liked, and respected as Bill or 'Bull' Halsey. He was one of those rare individuals who could create in his subordinates a fierce driving loyalty that was totally and fully reciprocated. He was a popular hero in every sense of the term. (from back cover)
2016.301.025	USS Constellation (CV-64) Decommissioning, August 7, 2003	USS Constellation	Paper copy of the decommissioning booklet (2008.010.030) . After 41 years of service, the USS Constellation (CV-64) was decommissioned at Naval Air Station North Island (NASNI), San Diego, California, on 7 August 2003. Includes a copy of the Schedule of Events. From the cover: "America's Flagship"
2016.302.001	Jet Age Flight Helmets : Aviation Headgear in the Modern Age	Wise, Alan R.	This new photo documentation is the first book ever to cover in detail the history and development of military flight helmets from the post-World War II era to the present, and includes over 120 different helmets and their associated equipment such as oxygen masks, boom microphones, inner helmets etc. U.S. Air Force, Army, Navy, Marine Corps, and Coast Guard flight helmets discussed range from

Object ID	Title	Author	Summary
	Western Pacific Deployment Chronicled - 2001		predeployment port visits and the deployment of USS Constellation (CV-64) to Westpac and the Indian Ocean in 2001. This is the 40th Anniversary Edition. She departed San Diego on 16 March and returned to San Diego on 14 September. Predeployment activities included visits to Seattle, San Francisco and Mazatlan. Ports of Call on the deployment included Pearl Harbor, Sydney, Perth, Jebel Ali, Singapore and Hong Kong. While in the Northern Arabian Sea she participated in Operation Southern Watch. CCDG-1 was Officer in Tactical Command. Destroyer Squadron 7 was deployed with Constellation. Carrier Air Wing Two was aboard with: VF-2 (F-14D); VMFA-323 (F/A-18C); VFA-151 (F/A-18C); VFA-137 (F/A-18C); VAW-116 (E-2C); VAQ-131 (EA-6B); VS-38 (S-3B); and HS-2 (SH-60F/HH-60H).
2016.302.008	USS Carl Vinson (CVN-70) - Carl Vinson Chronicles, Vol. 1 - 1883 - 1982	Haynes, J. D. (ed.)	Pictorial account of the construction, launching, commissioning, and shakedown cruise of USS Carl Vinson. Included is a dedication to Carl Vinson for whom the ship was named, and a tracing of the ship's heritage back to the first Constellation. The keel was laid on 8 March 1980 at Newport News Shipbuilding Company. There are photos of the launching, but no date indicated. She was commissioned on 13 March 1982. This was followed by a family cruise on 15 March. She got underway for initial flight operations on 18 March. Following a Command Inspection on 9 April she was underway for a shakedown cruise on 12 April. This period included Refresher Training at Guantanamo Bay and port calls at Fort Lauderdale, St. Thomas and Barbados. She returned to Newport News on 11 June. She conducted further at-sea workups in July and then entered a post-shakedown availability that lasted

			through 10 December. The last documented event is underway from Newport News on 11 December, 1982.
2016.302.010	IHS Jane's Fighting Ships - 2013 -2014	Saunders, Stephen (ed)	Jane's Fighting Ships is an annual reference book (also published online, on CD and microfiche) of information on all the world's warships arranged by nation, including information on ship's names, dimensions, armaments, silhouettes and photographs, etc. Its annual editions cover the warships used by the different national naval and paramilitary forces, and provide data on their characteristics. It was originally published by John F. T. Jane (usually known as "Fred T.") in 1898 as Jane's All the World's Fighting Ships. Its success launched a number of military publications carrying the name "Jane's". It is a unit of Jane's Information Group, which is now owned by IHS. From Wikipedia, the free encyclopedia
2016.302.011	USS Kearsarge (CV-33) - Midshipmen's Practice Cruise - 1947	Normyle, John G. (ed)	Pictorial account of the USS Kearsarge (CV 33) on a Midshipmen Training Cruise. She cleared Norfolk 7 June 1947 on a midshipmen training cruise to the United Kingdom. She returned to the United States in August, Ports included Scotland, Sweden, England and Guantanamo Bay, Cuba. No mention of the air wing components. Many pictures focus on the Midshipmen aboard the carrier. Fourteen loose photos in the back of the book, some of the photos had a 1947 date on the back. An order form to purchase copies of the cruise book for \$3.50 per copy also found in the back.
2016.302.012	USS Leyte (CV-32) - 1946-1959	None Stated	Summary cruise book of the USS Leyte (CV-32). Includes the ship's history, beginning with the Battle of Leyte in the fall of 1944, her commissioning on 11 April 1946 at Newport News Shipyard, her days as the "Leading Leyte", through her

Object ID	Title	Author	Summary
			decommissioning in New York on 11 May 1959. Her initial period (1946-1950) was as a floating foreign diplomat sailing to South America and the Med. After the Korean War broke out, she sat the record "including the most continuous days of at sea operations in the Korean war and serving as the home of the plane credited with destroying the first Russian MIG aircraft of the war." After Korea, she became the first Essex class aircraft carrier redesignated as a CVS--anti-submarine aircraft carrier. She patrolled from the North Atlantic to Cape Canaveral. Her primary airplane was the Grumman S2F Tracker and the HSS-1 helicopter also played a vital ASW role. Other info includes the dates, photos, and names of all of her commanding officers; the story of her origins (she was originally going to be named the Crown Point); her early days at sea when she went through the Panama Canal as the biggest ship to transit the Canal at that point in 1946; the visit by the Peruvian President and accompanying port visit, her four Mediterranean port visits between 1947-1950; the call to action in Korea where she sailed 18,500 miles from Beirut to Japan and was in operation from October 1950 to January 1951 with Air Group Three; her transformation in 1953 from a CVA to a CVS; another overhaul in 1956; life aboard ship including a visit by NBC in 1948; and her final cruise including a visit by Secretary of Defense Neil H. McElroy on 16 September 1958. The section on Her Men includes V-1, V-2, V-3, V-4, V-5, V-6 Divisions; VS-30 Anti-Submarine Squadron; VS-39 Anti-Submarine Squadron; HS-1 Helicopter Anti-Submarine Squadron; HS-9 Helicopter Anti-Submarine Squadron; HU-2 Helicopter Utility Squadron; Engineering Department; Executive Department; Flag group; Gunnery Department;

2016.302.013	USS Boston (CA-69) - 1943-1945	None Stated	A Pictorial account of the adventures of USS Boston in the period 1943-1945, her wartime cruise book. This historical account will be what most of the cruise book covers. USS BOSTON (CA 69) was launched 26 August 1942 by Bethlehem Steel Co., Fore River, Mass.; sponsored by Mrs. M. J. Tobin, wife of the Mayor of Boston; and commissioned 30 June 1943, Captain J. H. Carson in command. BOSTON reported to the Pacific Fleet, arriving at Pearl Harbor 6 December 1943. She joined TF 58 in January and took part in the raids on the Marshall Islands in support of the invasions of Kwajalein, Majuro, and Eniwetok (31 January - 28 February 1944); Palaus and Western Carolines (30 March - 1 April); Hollandia and Western New Guinea (21 - 24 April); Truk, including Satawan Island, bombardment (29 April - 1 May); invasion of Saipan (11 - 24 June); 1st Bonins raid (15 - 16 June); Battle of the Philippine Sea (19 - 20 June); 2nd Bonins raid (24 - 26 June); 3rd Bonins raid (3 - 4 July); invasion of Guam (12 July - 15 August); Palau-Yap-Ulithi raid (25 - 27 July); Morotai landings (15 September); seizure of the southern Palaus (6 September - 14 October); and Philippine Islands raids (9 - 24 September). She served with TF 38 during the Okinawa raid (10 October); northern Luzon and Formosa raid (11 - 14 October); Luzon raids (15 and 24 - 26 October, 13 - 14 and 19 - 20 November, and 14 - 16 December); Battle for Leyte Gulf (24 - 26 October); Formosa raids (3 - 4, 9, 15, and 21 January 1945); Luzon raids (6 - 7 January); China coast raids (12 and 16 January);

Object ID	Title	Author	Summary
			Nansei Shoto raid (22 January); Honshu and Nansei Shoto raids (15 - 16 February and 1 March), in which she bombarded Japan itself. BOSTON then returned to the United States for overhaul, arriving at Long Beach, Calif., 25 March 1945. Returning to the Western Pacific, via Pearl Harbor and Eniwetok, she joined TF 38 for the raids on the Japanese home islands (20 July - 15 August), including the bombardment of Kamaishi, Honshu (9 August). Following the Japanese surrender BOSTON remained in the Far East on occupation duty until 28 February 1946. She then returned to the United States and was placed out of commission in reserve at Puget Sound Naval Shipyard 12 March 1946. The CD includes Hiroshima bomb damage, ship damage, battle action, as well as random ship photos. Extras included in the CD aside from the cruise book images of BOSTON from the National Archives, and audios up to 22-minutes of American Radio Mobilizes the home front, Allied turncoats broadcast for the Axis Powers, 1967 Equator Crossing, and Sounds of Boot Camp in the late 50's, early 50's..

2016.302.014	War, The	Botstein, Sarah	Tells the story of ordinary people in four quintessentially American towns - Waterbury, Connecticut; Mobile, Alabama; Sacramento, California; and Luverne, Minnesota - and examines the ways in which the Second World War touched the lives of every family on every street in every town in America. 2016.302.017	Devotion : An Epic Story of Heroism, Friendship, and Sacrifice	Makos, Adam	"For readers of Unbroken comes an unforgettable tale of courage from America's 'forgotten war' in Korea, by the New York Times bestselling author of A Higher Call. Devotion tells the inspirational story of the U.S. Navy's most famous aviator duo, Lieutenant Tom Hudner and Ensign Jesse Brown, and the Marines they fought to defend. A white New Englander from the country-club scene, Tom passed up Harvard to fly fighters for his country. An African American sharecropper's son from Mississippi, Jesse became the Navy's first black carrier pilot, defending a nation that wouldn't even serve him in a bar. While much of America remained divided by segregation, Jesse and Tom joined forces as wingmen in Fighter Squadron 32. Adam Makos takes us into the cockpit as these bold young aviators cut their teeth at the world's most dangerous job--landing on the deck of an aircraft carrier--a line of

Object ID	Title	Author	Summary

work that Jesse's young wife, Daisy, struggles to accept. Deployed to the Mediterranean, Tom and Jesse meet the Fleet Marines, boys like PFC 'Red' Parkinson, a farm kid from the Catskills. In between war games in the sun, the young men revel on the Riviera, partying with millionaires and even befriending the Hollywood starlet Elizabeth Taylor. Then comes the war no one expected, in faraway Korea. Devotion takes us soaring overhead with Tom and Jesse, and into the foxholes with Red and the Marines as they battle a North Korean invasion. As the fury of the fighting escalates and the Marines are cornered at the Chosin Reservoir, Tom and Jesse fly, guns blazing, to try and save them. When one of the duo is shot down behind enemy lines and pinned in his burning plane, the other faces an unthinkable choice: watch his friend die or attempt history's most audacious one-man rescue mission. A tug-at-the-heartstrings tale of bravery and selflessness, Devotion asks: How far would you go to save a friend?"--Provided by publisher.

2016.302.022	AD Skyraider Units of the Korean War	Burgess, Richard R.	The Douglas AD Skyraider is considered the most effective naval aircraft of the Korean War, overshadowed in fame by the new jet fighters that captured the public imagination. Too late for combat in World War II, the AD had replaced Dauntless, Helldiver, and Avenger dive- and torpedo-bombers from that conflict on carrier decks during the late 1940s and was on hand to react to the surprise North Korean invasion of South Korea in June 1950. Combat Aircraft Douglas AD Skyraider Korean War Stemming the Communist Tide Enter the Chinese Close Air Support-Protecting the Troops Interdicting the Roads and Railways in North Korea Memorable Mission Accounts of the Pilots This book tells the story of the carrier-based U.S. Navy squadrons and the three land-based U.S. Marine Corps AD units that flew combat missions against the North Koreans and Chinese. Drawing from

Object ID	Title	Author	Summary
			personal interviews with AD pilots, the authors paint a harrowing picture of the deadly combat of this often forgotten air war. Included in this volume are the AD night attack and electronic countermeasures crews who harassed the enemy lines of communications after dark. Supporting the text are a number of previously unpublished private photographs that bring the stories of these pilots to life. Finally, the book contains extensive appendices that detail every unit deployment by carrier, air group, Skyraider model, and tail code, as well as detailed lists noting every Skyraider lost in the war.
2016.302.023	Empire Falls, The : Battle of Midway	White, Steve	"Relive the story of the desperate struggle for Midway and the defeat of the Imperial Japanese Navy. Join the heroic pilots and sailors as they fought in planes, ships and submarines, to strike a decisive blow in the Pacific Ocean and to bring peace one step closer."--Back cover. Contents: Who's who -- World War 2 1939-1945 -- The feared U.S. carriers -- The Japanese plan of attack -- The Battle of Midway -- The road to ruin.
2016.302.024	Aircraft Carriers : The Illustrated History of the World's Most Important Warships	Haskew, Michael E.	The index shows several references to the Battle of Midway, the USS Midway, and Midway class carriers. Since the first successful launch of an airplane from the deck of a naval ship in 1910, "fighting flattops" have evolved into immense, nuclear-powered vessels--floating cities capable of launching dozens of aircraft performing a variety of missions, including attack, escort, antisubmarine patrol, and deterrence. This sprawling illustrated history covers that entire evolution, from the first tentative steps taken by naval aviators before World War I to the roles these massive ships have played more recently in the War on Terror. In addition

Object ID	Title	Author	Summary
			to explaining the technologies behind past and present carriers, the author reexamines major engagements and operations involving carriers, personalities who were central to carrier development, and naval doctrine relating to carriers. Filled with marvelous period photography and modern images, this book is a fitting celebration of naval warfare's most important innovation.
2016.302.025	USN McDonnell Douglas F-4 Phantom II	Davies, Peter E.	The F-4 was first designed as a long-range fleet defender for the US Navy, but went on to become one of the greatest multi-role aircraft of all time. This book goes back to the Phantom's roots to examine the naval F-4s and the changing role they played in decades of air combat. it also looks at the US Marine Corps' Phantoms, and the heavily modified, Spey-engined F-4s of the Royal Navy and RAF, the only export variants to be based on the US Navy's. The US Navy's F-4s regained supremacy over the MiGs in Vietnam, after the "TOPGUN" course brought dogfighting back into naval aviation. The RAF Phantoms were the frontline of Britain's quick-reaction air defenses, constantly scrambling to intercept Russian intruders over the North Sea. Here, US combat aircraft expert Peter Davies examines the qualities and specifications of all these naval F-4s, and brings their distinguished career to life with spectacular new artwork. from back cover
2016.302.026	Flight, Camera, Action! : The History of U.S. Naval Aviation Photography and Photo-Reconnaissance	Campbell, Douglas E.	The lines of history for the camera, the airplane and the U.S. Navy all intersected when the first United States Navy aerial photographs were taken in 1912 in support of fleet exercises off the coast of Guantanamo, Cuba. The following year, a ship's cook, W. L. Richardson began shooting photographs of what would become naval Air Station, Pensacola, Florida, the cradle of naval Aviation and

			home to the Naval Schools of Photography. Following World War One, a navy Photographic expedition went north, making the first aerial mapping photos of the Alaska frontier. World War Two found navy shuttermen leapfrogging around the Pacific theatre, performing pre- and post-attack reconnaissance, along with "hitting the beach" to record the war as it unfolded. shortly after, Navy photographic units were at pacific atolls to record early atomic bomb tests. The navy's sabalo aerial photo reconnaissance mission, with its unarmed aircrews and the output of thousands of maps, and photo interpretation, continued to develop technologies through the mid-20th century. Their role during the Cuban Missile Crisis was second to none. the last aerial photo plane in the navy's inventory was retired in 1987, with the decommissioning of the Navy's last aerial photography squadron, naval Reserve's Light Photographic Squadron 206 (VFP-206). The RF-8G Crusader flew cross town from the naval Air Facility, Washington, DC to the Smithsonian's Air and Space Museum Annex at Dulles International Airport where it is now on display. From the back cover.
2016.302.027	Before Topgun Days : The Making of a Jet Fighter Instructor	Baranek, Dave	Dave "Bio" Baranek received his Wings of Gold in 1980. Upon graduating from college, he joined the Navy with the goal of becoming a fighter pilot. But with his eyesight waning, he knew that he would never be able to reach that goal. Undaunted, he plowed ahead and found his niche as a radar intercept operator in the backseat of the sleek new Grumman F-14 Tomcat. In this book, the author takes you into high-speed, high-stakes arena of Navy jet fighters: day and night carrier operations, dogfighting in the F-14 Tomcat, and teaching the

2016.302.031	Float Planes & Flying Boats : The U.S. Coast Guard and Early Naval Aviation	Workman, Robert B.	With nearly 300 vintage photographs and close to 300 pages of text, retired U.S. Coast Guard aviator Capt. Robert Workman presents a complete picture of naval aviation's rapid development between 1911 and 1938. Frustrated by the lack of information specifically about the Coast Guard's aviation heritage, the author undertook research of his own. The result is a balanced look at early naval aviation that, for the first time, gives full credit to the important contributions made by Coast Guardsmen. He shows that it was thanks to their creativity, skill, and determination, along with efforts by the other sea services, that such great strides were possible. Several chapters are devoted to the inventions of the float plane and flying boat

2016.302.032	Not on My Watch : The Odyssey of David Kelly From College Student to Naval Aviator and His Exploits as an Attack Pilot flying the A-6 Intruder from the USS Midway During the Vietnam War	Kelly, David	This is a memoir of David "Snako" Kelly's personal experiences in Naval Aviation (carrier aviation), and his short but intense involvement in the Air War over Vietnam. He was deployed with VA-115 A-rabs on the USS Midway from 1971 to 1973. Former USS Midway crew member.
2016.302.033	USS Boxer (CV-21) - Logge Far East Cruise - 1956-1957	Tracy, W. B. (ed)	Pictorial account of Essex-class aircraft carrier USS Boxer (CVS-21)'s 1956-'57 Far East Cruise. Ports of call in Hawaii, Japan, and Hong Kong. Embarked - Helicopter Anti-Submarine Squadron FOUR (HS-4) (Sikorsky HSS-1 Seabats), VC-23 (Grumman S2F Trackers).
2016.302.035	United States Navy & Marine Corps : Aviation Squadron Lineage, Insignia & History,	Crowder, Michael J.	This is the only work covering the history and lineage of Marine Attack squadrons,

Object ID	Title	Author	Summary
	Vol. 2 : Marine Scout-Bomber, Torpedo-Bomber, Bombing & Attack Squadrons		from the date of their activation forward, until their deactivation, or the present. Thoroughly researched, it has a complete, extensive bibliography, and the illustrations of the insignia are almost entirely from originals. Many of the photographs have never been published, and many are from the extensive photo archives of Northrup-Grumman. Historically accurate, yet lacking the dry recitation of names, dates, and facts found in other historical works, this very readable book is written to be enjoyed from cover to cover.
2016.302.036	U.S.S. Takanis Bay, A Short History	None Stated	A pictorial account of the activities of escort carrier Takanis Bay from commissioning through end of her last operation. TAKANIS BAY was laid down under Maritime Commission contract (MC hull 1126) on 16 December 1943 at Vancouver, Wash., by the Kaiser Shipbuilding Co.; launched on 10 March 1944; sponsored by Mrs. Alden R. Sanborn; and commissioned on 15 April 1944, Capt. A. R. Brady in command. After shakedown, TAKANIS BAY operated out of San Diego with Fleet Air, West Coast, through the end of hostilities with Japan in mid-August 1945. She tested pilots for carrier operations, and, between 24 May 1944 and 28 August 1945, she qualified 2,509 pilots. On the latter day, she sailed for Hawaii and was assigned to Carrier Transport Squadron, Pacific. In two trips, she returned 1,300 servicemen to San Diego. Late in September, the carrier was assigned to the "Magic-Carpet" fleet which had been established for the sole purpose of bringing veterans home. At San Diego, bunks for 800 passengers were installed in the carrier, and she made two more round trip voyages to Hawaii and one to the Tokyo Bay area to repatriate servicemen. TAKANIS BAY arrived at

2016.302.040	U.S. Navy, U.S. Marine Corps and MATS Aircraft Lost During the Korean War	Campbell, Douglas E	The Korean War was the first war in which jet aircraft played a central role. Once-formidable fighters such as the F4U Corsair relinquished their air superiority roles to a new generation of faster jet fighters. Within these pages are listed more than 1,140 U.S. Navy, U.S. Marine Corps and Military Air Transport Service (Mats) aircraft lost during the Korean War. These aircraft were spread across 19 different ships, 126 different squadrons, by 12 aircraft manufacturers building nearly 60 different types and variants to fly into war. The information on dates lost, aircraft type and manufacturer, Bureau Numbers, ship or base assigned, squadron attached, and fate of the pilot and crew, are here. Chapter 1 is a subset of all the information organized by ship attached; Chapter 2 is a subset organized by squadron attached; Chapter 3 is the entire set organized by manufacturer and variant with stories attached to some of the specific aircraft lost.

			Station in the Tonkin Gulf during the Vietnam War. This day-by-day account of flight operations, and the heroic actions of men penetrating the hostile skies of well-defended North Vietnam, spans a two-week period during the angry autumn of 1967. Feel the tension of flying a combat attack mission from the cockpit of an A-6 Intruder as, low and alone in the dark, you home in on a target. Understand the stomach-tightening dread as a surface-to-air missile tracks its target—you. Live the fear of being shot down, hunted, and held prisoner by the North Vietnamese. Experience the shivering adrenaline release that comes hours after a harrowing mission. Meanwhile, the aviator's wives and children back home live through fears and problems of their own, during a war that few people understand, and many despise. He commanded VA-35 onboard the USS Nimitz.
2016.302.048	Boys on Cherry Street, The	Boehm, Ron	In this book, it is not the writer's intention to make light of the war, or the terrible results of war, the tragic deaths and the awful wounds, both external and internal result that those who participated in it carry for the rest of their lives. mainly about the many comic occurrences and sense of humor that men in combat were able to show in some of the most difficult of situations,. It was that very sense of humor that was a coping mechanism used by many of us to deal with those stressful times. Contents: College USMC Training, OCS, TBS Flight School Vietnam Coming Home Captain Ron Boehm, Marine A6 pilot, served in Vietnam 1969/1970, with VMA (AW) 242 and 1st Batt 7th Marines,

Object ID	Title	Author	Summary
			Guadalcanal and won the war. November 1942: Japanese and American forces have been fighting for control of Guadalcanal, a small but pivotal island in Japan's expansion through the South Pacific. Both sides have endured months of grueling battle under the worst circumstances: hellish jungles, meager rations, and tropical diseases, which have taken a severe mental and physical toll on the combatants. The Japanese call Guadalcanal Jigoku no Jima --Hell's Island. Amid a seeming stalemate, a small group of U.S. Navy dive bombers are called upon to help determine the island's fate. The men have until recently been serving in their respective squadrons aboard the USS Lexington and the USS Yorktown, fighting in the thick of the Pacific War's aerial battles. Their skills have been honed to a fine edge, even as injury and death inexorably have depleted their ranks. When their carriers are lost, many of the men end up on the USS Enterprise. Battle damage to that carrier then forces them from their home at sea to operating from Henderson Field, a small dirt-and-gravel airstrip on Guadalcanal. With some Marine and Army Air Force planes, they help form the Cactus Air Force, a motley assemblage of fliers tasked with holding the line while making dangerous flights from their jungle airfield. Pounded by daily Japanese air assaults, nightly warship bombardments, and sniper attacks from the jungle, pilots and gunners rarely last more than a few weeks before succumbing to tropical ailments, injury, exhaustion, and death. But when the Japanese launch a final offensive to take the island once and for all, these dive-bomber jocks answer the call of duty--and try to perform miracles in turning back an enemy warship armada, a host of fighter planes, and a convoy of troop transports. A remarkable

2016.302.050	Desert Storm at Sea : What the Navy Really Did	Pokrant, Marvin	This book relates to the challenges the naval forces faced and met during Desert Storm and tells of the constant vigilance required to defend the coalition's flanks against the air threat and the initiative and heroism of the surface combatants in the northern Persian Gulf. it also relates how the naval forces carried out their most challenging operation-the amphibious deception.The mission was accomplished without a single American dying. Superior technology played an important part in victory, but the really decisive difference was in the people. The men and women in the coalition forces understood the cause for which they were fighting, believed in that cause and fought with great courage, tenacity and skill. Midway mention in the book "Additionally, after the USS America's arrival in the Gulf and before the ground war started Midway was able to resurface her flight deck while anchored off Bahrain starting Feb 16 till Feb 22 when Midway resumed Combat Operations" (Pokrant page 142). The Carrier Battle Forces in the Persian Gulf and Red Sea were the principle Naval Forces striking arm. The six Carriers including USS Midway supported a coordinated joint Air Campaign orchestrated by the US Central Command in Saudi Arabia. Tomahawk strikes from USN Battleships, Cruisers, Destroyers and Submarines as well as Naval Gunfire Support in the final stages also contributed to the overall campaign. Allied

Object ID	Title	Author	Summary
			Naval Forces were also critical in carrying out an effective economic blockade. USS Midway was the flagship for the Persian Gulf Battle Force led by Rear Admiral March. Shortly after the commencement of hostilities there were three Carrier Battle Groups in the Gulf with a fourth from the Red Sea joining for the ground war phase. The Red Sea Carrier Battle Force was lead by Rear Admiral Mixson, a former USS Midway Commanding Officer. USS Midway was the only Aircraft Carrier not to loose an aircraft due to combat or operational accident. Midway's helicopters also transported USN Seals which liberated the first Kuwait soil, an island in the northern gulf.
2016.302.051	F4U Corsair vs Ki-84 "Frank," Pacific Theater 1945	Young, Edward M.	The Vought Corsair was the first American single-engined fighter to exceed 400 mph and establish dominance over the legendary Mitsubishi Type Zero-sen. The Ki-84 Hayate was introduced by the Japanese specifically to counter this growing American dominance of the skies over the Pacific. Built in greater numbers than any other late war Japanese fighter, nearly 3000 were completed between 1944 and 1945. This volume examines the clashes between the Corsair and Ki-84 in the closing stages of the war, revealing how Corsair pilots had to adapt their techniques and combat strategies to adapt to these newer types. It also reveals how the kill rate was largely driven by the reduced quality of fighter pilots after the high casualty rates inflicted on the Japanese air force during the air battles over the Solomon Islands. BIOGRAPHICAL NOTE Edward Young is a retired financial executive with degrees in Political Science from Harvard University and the University of Washington. During his career he held assignments in New York,

			Corsair pilot in Korea, flew over 350 combat mission in Vietnam, and commanded at the squadron, group, brigade, and Marine Aircraft Wing levels.
2016.302.060	American Aircraft Development of WWII : Special Types 1939-1945	Norton, Bill	Focusing on the U.S. military's development of special aircraft types during World War II, including many experimental aircraft and one-off secret projects, this book shows how U.S. aviation designs and weapons progressed under the pressure of global warfare. From the state-of-the-art aircraft at the beginning of the war, to the advances during the conflict, each special type is covered in detail: armed photo reconnaissance, catapult launched seaplanes, naval floatplanes, autogyros, and special-operations armed drones. Often described as less glamorous than fighters and bombers, these special types of WW2 combat aircraft offer a unique contribution to military aviation and aeronautical advancement. From the Back Cover The years of World War II saw the greatest single leap in US military aircraft technology and design, from the relatively fragile pre-war designs to the very edge of the supersonic era. Many remarkable aircraft came and went in quick succession with some missions and types disappearing altogether. Indeed, there were scores of little known or minimally documented aircraft projects that significantly advanced technology of aeronautics, propulsion, aircraft systems, avionics and weapons, while never achieving full-rate production and deployment. Focusing almost exclusively on official programs, experimental, prototype, limited production models and aircraft that actually entered development, American Aircraft Development of WWII, Special Types 1939-1945 opens with the "state of the art"

Object ID	Title	Author	Summary
			designs at the beginning of the war, continuing on to the advances during the conflict itself. These so-called "special types" are far less widely known than fighter and bomber designs, but no less important, and include armed photo reconnaissance aircraft, catapult-launched seaplanes, autogyros, tactical haulers and armed drones. Other designs covered include "one-off" experimental aircraft, rocket boost, floats and skis added to landplanes, fighters with second seats added for training, engine testbeds, "oddballs" experiments and more. Illustrated throughout with 3-view drawings and rare photographs, many little-known and unusual aircraft and missiles, American Aircraft Development of WWII, Specialty Types 1939-1945 tells the stories of engineering teams and test pilots struggling against short schedules and tight resources to develop new aircraft that pushed the bounds of technology. This book is a fitting testament to the epic and sometimes life-threatening accomplishments which were every bit as vital to the war effort as actual combat operations themselves.
2016.302.061	Hunters and Killers, Volume 1 : Anti-Submarine Warfare from 1776-1943	Polmar, Norman	The history of submarine warfare can be traced back to the American Revolution when the Turtle unsuccessfully tried to sink a British warship in Boston Harbor. Through World War I and II, tactics, weapons, and the platforms (boats and ships) evolved. The Battle for the Atlantic was the longest "battle" of World War II. This book examines all aspects of ASW (Anti-submarine Warfare) from its beginning in the 18th century through the middle of World War II.
2016.302.062	Hunters and Killers, Volume 2 : Anti-Submarine Warfare from 1943	Polmar, Norman	Hunters and Killers is a comprehensive two-volume history of all aspects of Anti-Submarine Warfare (ASW), covering its beginnings in the

Object ID	Title	Author	Summary
			late 18th Century through the important role of present anti-submarine systems and operations. The first volume discusses ASW operations up to World War II, ending in early 1943, and this second volume continues from 1943 to the present. In addition to tactical and strategic narratives of major ASW campaigns, this work covers the evolution of ASW sensors, weapons, platforms, and tactics. The second volume of Hunters and Killers begins at the turning point of the Battle of the Atlantic, when Allied efforts forced the U-boats to withdraw from the North Atlantic. With cryptologic breakthroughs, growing numbers of escort and long-range patrol aircraft, and new weapons, the Allied anti-submarine advantage mounted quickly. In the Pacific theater, Polmar and Whitman consider the often-overlooked ASW advances that the Japanese made during World War II. Turning to the Cold War, the authors examine the ASW developments this confrontation inspired in both the West and the Soviet Union. Both the West and the Soviet Union developed submarines armed with nuclear weapons, and each created techniques to counter the intensified submarine threats. Polmar and Whitman discuss the extensive anti-submarine aspects of the Cuban Missile Crisis and the Falklands Conflict, and consider ASW developments into the early 21st Century. The second volume of Hunters and Killers completes the most in-depth history of ASW ever published. Written by two of the most knowledgeable scholars on the subject, it is a must own for anyone interested in naval history.
2016.302.063	Complete History of U.S. Combat Aircraft Fly-Off Competitions, A : Winners,	Simonsen, Erik	Since the first days of rivalry between the Wright Brothers and Glenn Curtiss, aircraft

Object ID	Title	Author	Summary
	Losers, and What Might Have Been		manufacturers have been vying for lucrative military aircraft contracts and competing for prized long-term production runs. As a result, many advanced and now legendary aircraft have been designed, built, and flown in every generation of aviation development. Focusing on the Cold War era, this book shows readers how crucial fly-off competitions have been to the development of America's military air arsenal. This book not only explains in detail how fly-off competitions are conducted, it shows the reader what both competing aircraft designs looked like during their trials, and then what the losing aircraft would have looked like in operational markings had it actually won. Described in vivid detail are the specific aircraft and how they fared, as well as the inside political maneuvering and subterfuge involved in often-controversial aircraft contract awards. Beginning with the Boeing B-47 Stratojet's decisive victory over rival Convair and Martin designs and ending with today's advanced unmanned aerial marvels, this book covers every era of Post-World War II aviation. Author Erik Simonsen uses 120,000 words of text and over 550 photos, some uniquely created for this work, to provide the reader with many of aviation's most tantalizing 'might have beens'.

			decorated as Santa's workshop. They left Norfolk for the Med on January 10, 1967. USS America relieved the USS Independence in Pollensa Bay, Mallorca on January 22, 1967. Pictures of flight operations, the biography of CO, CAPT DD Engen, pictures of the bridge fill the next few pages. America's first liberty at Pirraeus, Greece took place on February 4, 1967, several pictures of the liberty are included next. A thumbnail bio of the XO's, CAPT Wiley A. Scott (7 May 1966-28 February 1967) and CDR Max E. Malan (28 February 1967-) followed. Pictures of X division came next. USS America's next liberty port was Naples, Italy. Operations Department pictures were next, followed by the pictures of liberty in Valencia Spain. The Communications Department was next. The Fleet Commander's Conference at Aranci Bay took place on March 16, 1967. Following that were picture of the Navigation Department and the next liberty port of Taranto, Italy, where they celebrated Easter Sunday. Pictures of the Air Department, were followed by the next liberty port in Valletta, Malta. The Carrier Air Wing Six Change of Command took place on April 8, 1967. On April 20, 1967, Commander, Naval Air Force presented the "E" award on April 20,1967. Weapons Department and the Marine Detachment pictures were next. A Boxing Smoker was held on April 22, 1967. The ship returned to Taranto, Italy, May 1 -May 8. This was followed by pictures of the Engineering Department, and the next liberty port of Livorno, Italy. Several Med candid pictures filled the next pages. Supply Department pictures were next up. A crisis in the Middle East meant the cancellation of Cannes as the next liberty port and an influx of journalists. During the crisis, the America was shadowed by at least one Russian Naval

			vessel. Medical and Dental department pictures were up next. The USS Liberty was attacked on June 8, 1967 and the USS America responded. Jets had already departed, when Israel apologized for the attack. Wounded Liberty crewmembers were transferred to the America. One June 9, 1967, RADM L. Gris held a news conference to disprove the Arab claim that the Sixth fleet was aiding Israel. On June 10, 1967, a memorial service was held for the dead of the USS Liberty. A second Boxing Smoker was held to reduce tension. Following that were pictures of Carrier Air Wing Six, the CAG staff, and VF 33, flying McDonnell F-4B Phantom II, VF 102 also flying the F-4B Phantom II, VA335, flying the A4C Skyhawk, VA61 and VA 66 also flying the A4C Skyhawk, RVAH5 flying the RA-5C Vigilantes, VAW-33, DET 66 flying EA-1F Spads. On 1 April 1967, the VAW-33, Det 66 became VAW-122. The ship then cruised up the Dardanelles to Istanbul, Turkey. Next stop was Thessaloniki, Greece July 1 -10, 1967, Valletta, Malta on July 31, 1967, Genoa, Italy August 6-21, Valencia, Spain September 2-7 and home to Norfolk on September 20.
2016.302.069	US Navy F-4 Phantom II Units of the Vietnam War 1964-68	Davies, Peter E.	The F-4 Phantom II is perhaps the United States' most famous post-war fighter. It was primarily used as a land-based fighter-bomber and reconnaissance platform, but its origins lay in the US Navy in the Vietnam War. First utilised to deliver heavy ordinance against the unexpectedly intensive North Vietnamese air defences during Operation Rolling Thunder, it later reverted to air-to-air combat using its eight-missile armament. This book examines the unique aspects of the Phantom II that made it so crucial to US Navy pilots: its massive engine power, long range, speed and the most powerful airborne search and

			fire-control radar installed in a fighter at the time. Includes comprehensive histories of fighting aircraft and their crews; concise, authoritative text is supported by at least 30 original colour artworks, specially commissioned scale drawings, and the best archival photography from around the world. The USS Midway is mentioned several times with 2 color plates of Midway planes.
2016.302.070	US Navy Ships vs Kamikazes 1944-45	Stille, Mark	The ineffectiveness of conventional air attacks on US Navy surface ships, particularly heavily defended targets like carrier task groups, forced the Japanese to re-evaluate their tactics in June 1944. The solution they arrived at was simple -crash their aircraft into American ships. This notion of self-sacrifice fitted well within the Japanese warrior psyche and proved terrifying to the American sailors subjected to it. These tactics brought immediate results, and proved effective until the end of the war. The US Navy was forced to adapt its tactics and operations and deploy new weapons to counter the threat. While American defenses destroyed most kamikazes before they had a chance to strike a ship, the cost was very high. With stunning artwork, this book analysis the actual military benefits of kamikaze missions, assessing whether the damage done to American naval strength was worth the 1055 of pilots and aircraft to the Japanese and had a real material impact on the War in the Pacific. Contents: Introduction /Chronology /Design and Development /Technical Specifications /The Strategic Situation /The Combatants /Combat /Statistics and Analysis /Aftermath /Bibliography /Index

2016.302.072	Those Navy Guys and Their PBV's : The Aleutian Solution : Experience of a Typical Aleutian Aircrewman	Freeman, Elmer A.	The large, ungainly, twin- engined flying boats used by the U.S. Navy as patrol aircraft played a significant if unheralded role in the Pacific and Atlantic during World War II; far more has been written about the Mustangs, Liberators, and Wildcats in the American air campaigns than of patrol planes like the PBV. Freeman does a solid job telling the story of this forgotten plane and the crews that flew it during a little- remembered 1942-43 campaign against the Japanese in the Aleutians. Useful for its depiction of service life on World War II's secondary fronts and suitable for comprehensive military and aircraft collections. -John R. Vallely, Siena Coll. Lib., Loudonville, N.Y. Editorial Review from Library Journal Copyright 1992 Reed Business Information, Inc. (from Amazon.com)
2016.302.073	Wings for the Fleet : A Narrative of Naval Aviation's Early Development, 1910-1916	Van Deurs, George	This is a copy of 2004.313.502 which is a hardback edition, and the photos in the hardback are better than the ones in this paperback edition. The men who ventured into the air in the Navy's first aircraft were not only daring they had vision, persistence, and a nearly unlimited determination to convince the skeptics that their frail kite-like structures could someday possess military value. Wings for the Fleet is the story of their trials, tragedies, and triumphs. These men patched cooling systems with chewing gum, lived by "crash, repair, and fly again," but succeeded in developing this new service into an effective arm of the

			fleet. Wings for the Fleet, first published in 1966, covers the fascinating details of those pioneering days from 1910 to the entry of the United States into World War I. All of the heroic "early birds" are here with full accounts of their exploits. Admiral van Deurs, himself a naval aviator since the early 1920s, rendered a significant service by his careful preparation of this well-balanced, thoroughly illustrated historical account, which comes complete with appendixes listing early naval aviators and the planes they flew. Over one hundred photographs were selected from official and private sources to illustrate this book. (from Amazon.com)
2016.302.074	Fighters Over the Fleet	Friedman, Norman	An account of the evolution of naval fighters for fleet air defense and the parallel evolution of ships operating and controlling them. Concentrates on three main exponents of carrier warfare, the Royal Navy, the U.S. Navy, and the Imperial Japanese Navy.
2016.302.075	U.S. Naval Institute on Marine Corps Aviation, The .	United States Naval Institute	From the Editor's Note: "Because this book is an anthology, containing documents from different time periods, the selections included here are subject to varying styles and conventions. Other variables are introduced by the evolving nature of the Naval Institute's publication practices. For those reasons, certain editorial decisions were required in order to avoid introducing confusion or inconsistencies and to expedite the process of assembling these sometimes disparate pieces." Contents: 1-"Smedley Butler's Air Corps: The First Marine Aviators in China" ; 2-"The Genesis of Air Support in Guerrilla Operations"; 3-"Ace in a Day"; 4-"Marine Corps Aviation--An Infantryman's Opinion"; 5-"Right on the Button: Marine Close Air

2016.302.076	Gear Up, Mishaps Down : The Evolution of Naval Aviation Safety, 1950-2000	Dunn, Robert F.	"Less than five years after naval aviation had been in the forefront of the forces that defeated Imperial Japan, it found itself in serious trouble. One of the first steps to re-order priorities and save naval aviation was to solve the problem of increasing numbers of accidents. Over the next fifty years that problem was indeed solved to the extent that today, despite hot wars, cold wars, contingencies and peacetime operations in support of friends and allies the Navy/Marine accident rate is at least as good as that of the Air Force and approached that of commercial aviation. The keys to how this was achieved lies with dedicated and professional leadership, a focus on lessons learned from mishaps and near-mishaps, a willingness to learn and adopt new leadership, training, management, maintenance and supply styles and procedures. All this and more is described in this book."- -Provided by publisher.
2016.303.001	Goodbye, Indy Maru : A Navy Wife Remembers	Moore, Katherine D.	This book is written for the continuing public interest in the tragic story of the U.S.S. Indianapolis, sunk in the Pacific on July 30, 1945, and the on-going controversy about the events which followed that prompted the author to re-examine memories dating four decades back. Its a story of the service of her husband , Lt. Commander Kyle Campbell Moore, USNR, who was a board the USS Indianapolis from August 1942, until th end. She articulates her remembrance to tell the story of the United States war against Japan in the Central Pacific 1941-1945. The heavy cruiser USS INDIANAPOLIS (CA35) was laid down at the New York

2016.303.002	Admiral of the Pacific : The Life of Yamamoto	Potter, John D.	Admiral Isoroku Yamamoto was the man behind Pearl Harbor, the man who conceived, planned and carried through the surprise attack on the U.S. Fleet which brought American into the war and led to the greatest and last carrier battles of naval -- in the Coral Sea and at Midway. The attack followed years of preparation. As a young naval officer, Isoroku went to Harvard on a two-year course. He toured the Mexican oil fields and became such an expert on oil that several American companies offered him a job. But he was convinced that the key to the future war must lie in power in the air and in 1923 he became executive officer of his country's new naval air training center in Kasumigaura. He later represented Japan at the London parity conference of 1934, and was blamed for the failure of this last attempt to limit naval forces by agreement. In this book, the author tells exactly how: conferences, arguments, espionage and counter espionage, code breaking, planning and endless preparations. Nothing was left to chance, and nothing is overlooked in this meticulous account.
2016.303.003	Cruel April : The Fall of Saigon	Todd, Olivier	Documents a small country's collapse through interviews, first-hand experience and a wealth of research. The author was a leftist journalist who became disabused of the communist rule in Hanoi through his on-the-ground experiences. References to Operation Frequent Wind and to USS Midway. Translated from the original French version.

2016.303.005	Old Nameless : The Epic of a U.S. Battlewagon,	Shalett, Sidney	When this book was published in 1943, because of national security, the name of the Battleship could not be revealed. Today, we know that Captain Thomas Leigh Gatch commanded the USS South Dakota (BB-57) which was commissioned in 1942. According to Wikipedia, "In major sea engagements before South Dakota was less than a year old, its actions were reported to the American people as the exploits of Battleship "X" or Old Nameless." This book is written by the author to serve as a humble mirror to reflect a bit of the glory that a great ship, a fighting crew, and a purposeful Captain contributed to the immoral history of their country's Navy.
2016.303.006	Cartwheel : The Reduction of Rabaul	Miller, John	Operation Cartwheel was the name given to a series of interlocked invasions in New Guinea, New Britain and the Solomon islands originally designed as preparation for the conquest of the Japanese base at Rabaul, but that eventually led to the isolation of that base. The conquest of Rabaul was originally part of the overall Allied plan. By July 1943 the Joint Chiefs of Staff were looking at bypassing that strong Japanese base instead of conquering it. The idea was approved by President Roosevelt in August and the new plan officially reached MacArthur's HQ on 17 September. This didn't have much impact on the Cartwheel operations, but it did help move the Admiralty Islands operation forwards. The campaign described in this volume was important to the Army as an experience in amphibious warfare and combined operations against a formidable and still resourceful enemy. Contains references to Naval

2016.303.007	Deadly Craft : Fireships to PT Boats	Hoyt, Edwin P.	A history of small warships from ancient Egyptian ramming boats and Greek fireships to modern PT boats, including many accounts of their use in specific battles. Illustrated by Charles Geer.
2016.303.008	On a Destroyer's Bridge	Frost, Holloway Halstead	Developed over four years of destroyer command, in this volume on ship-handling Holloway H. Frost hoped to contribute towards improving the efficiency of a destroyer squadron. From leaving a dock to towing a large ship, maneuvering in narrow waters to dealing with field ice, this classic of naval warfare describes the key challenges that a destroyer might face. In an expert fashion Frost sets out methods that a captain may employ to overcome these, noting the difference between doing so in perfect and imperfect conditions, and the need for individual judgment. Widely read by experienced mariners and landsmen alike when it first appeared in 1930, 'On a Destroyer's Bridge has remained an important piece of maritime literature for historians and enthusiasts to this day. This is the art of maneuvering a destroyer, or the "Systematic application of knowledge and skill — acquired by study, observation, and experience — in effecting a desired object."

Object ID	Title	Author	Summary
			specifications are given for each aircraft, with all weights and measures in imperial and metric. This book is an excellent guide to nearly every aircraft ever produced. Essentially a table top encyclopedia of civilian and military aviation with a brief history and photos of most aircraft and includes some line art and specifications for more historically significant airframes. This is the type of book one would expect to find at a museum or a library and it is a top notch publication. While being comprehensive in nature, it of course, is not exhaustive of every last single aircraft ever made- but it is one of the only books published that has a very large number of aircraft, an accurate description, specs and pictures. This is a MONSTER of a book and it includes aircraft from around the world.

2016.303.016	Service : A Navy SEAL at War	Luttrell, Marcus	The author, a Navy SEAL, returned from his star-crossed mission in Afghanistan with his bones shattered and his heart broken. So many had given their lives to save him, and he would have readily done the same for them. As he recuperated, he wondered why he and others, from America's founding to today, had been willing to sacrifice everything, including themselves, for the sake of family, nation, and freedom. In this book, we follow the author to Iraq, where he returns to the battlefield as a member of SEAL Team 5 to help take on the most dangerous city in the world, Ramadi, the capital of war-torn Al Anbar Province. There, in six months of high-intensity urban combat, he would be part of what has been called the greatest victory in the history of U.S. Special Operations forces. We also return to Afghanistan and Operation Redwing, where he offers powerful new details about his miraculous rescue. Throughout, he reflects on

Object ID	Title	Author	Summary
			operation. The War in the Pacific begins with an examination of events leading up to World War II and compares the Japanese and American economies and societies, as well as the chief combatants' military doctrine, training, war plans, and equipment. The book then chronicles all significant actions - from the early Allied defeats in the Philippines, the East Indies, and New Guinea; through the gradual improvement of the Allied position in the Central and Southwest Pacific regions; to the final agonies of the Japanese people, whose leaders refused to admit defeat until the very end. Gailey gives detailed treatment to much that has been neglected or given only cursory mention in previous surveys. The reader thus gains an unparalleled overview of operations, as well as many fresh insights into the behind-the-scenes bickering between the Allies and the interservice squabbles that dogged MacArthur and Nimitz throughout the war.

2016.303.021	Voices of My Comrades : America's Reserve Officers Remember World War II	Kelly, Carol Adele	Over the course of five years, the Reserve Officers Association of the United States-the nation's oldest such professional military organization-invited its members to write about their experiences in World War II. The response was an impressive outpouring of memories, now compiled here in an extraordinary record of courage, sacrifice, and commitment.Stories from 240 veterans-representing all theaters, ranks, and services-track the years of World War II month by month. From the young ensign's letter to his fiance, describing his escape from the USS Cassin minutes before it explodes at Pearl Harbor, to the battle-seasoned colonel's account of his flyover at the peace-treaty signing aboard the USS Missouri, the stories give a human face to

Object ID	Title	Author	Summary
			the moments of war, written by men and women who intimately lived those history-making days, on bombing missions and invasion duty, on front lines and the home front. Readers will meet a survivor of the USS Reuben James, sunk by a German U-boat before December 7, 1941, and eight D-Day invaders of Normandy, including Lieutenant Colonel J. Strom Thurmond, paratrooper. They will also meet a bodyguard to General Douglas MacArthur and the nurses who healed the fallen in huts on Bataan, the hospital ship Shamrock in the Mediterranean, and field hospitals in France. Here, too, are personal accounts by Women Airforce Service Pilots (WASPs) and the battlehardened engineers of the Seabees in the Pacific. Other veterans tell of surviving the sinking of the troopship Leopoldville, when 750 Americans died in the English Channel on Christmas Eve, 1944; the horrific discovery of the Nazi extermination camps; and the tragic bombings near war's end of unmarked Japanese ships transporting U.S. POWs from the Philippines. Featuring photographs, a chronology, and historical introductions, this book—thanks to these stories by ordinary soldiers, sailors, airmen, marines, and nurses—is destined to become an enduring testimony to the American experience in World War II.
2016.303.023	Rising Sun, The : The Decline and Fall of the Japanese Empire, 1936-1945.	Toland, John	Told primarily from the Japanese viewpoint, traces the dramatic fortunes of modern Japan from the invasion of Manchuria and China to the atom bomb. John Toland calls it "a factual saga of people caught up in the flood of the most overwhelming war of mankind, told as it happened --- muddled, ennobling, disgraceful, frustrating, full of contradiction and paradox."

			powerful force that would serve as a deterrent to a nuclear attack upon the United States. Because these ships would be so important to our defense, it was decided to name them after well-known figures in American history who had won and defended our freedom. The men for whom these submarines were named are the subject of this book.
2016.303.028	Observer's Book of Aircraft, The	Green, William	Describes 153 airplane models -- and the aeronautics science behind their design -- in detail and has 279 illustrations. Explains how and why the newer airplane model differs from last year's model.
2016.303.029	Tales From a Tin Can : The USS Dale from Pearl Harbor to Tokyo Bay	Olson, Michael Keith	In the words of those who manned her, the destroyer USS Dale's war comes vividly to life in this first oral history of a combat ship from World War II's start to finish. From carrier raids on Midway, Guadalcanal, and the Solomons to the bombing of Saipan and Guam in the capture of the Marianas, from the Aleutians in the far north to strikes on Tokyo and Kobe, Tales from a Tin Can re-creates the action aboard the Dale and conveys as never before the true grit of wartime on a destroyer. The destroyer Dale was one of the few U.S. warships present at both the attack on Pearl Harbor and the Japanese surrender in Tokyo Bay. In the interim, she compiled a distinguished combat record, from fleet actions and fighting off kamikazes to more mundane tasks of escorting every sort of ship, rescuing the pilots of crashed planes (and dividing up the complimentary ice cream received from the carriers), and spending long months in dock for repairs and refits. Olson's father served aboard the Dale and introduced him to a cross section of former shipmates, whose interviews provide an eloquent portrait of an American warship in the Pacific War and offer different viewpoints on everything from fleet actions to captains

Commemorative/yearbook associated with the fourth class of officer trainees at the United States Naval Officer Candidate School, Newport, Rhode Island. Candidates graduating as officers are pictured by the company they were assigned to in training.
2016.303.031	Navies and the American Revolution 1775-1783	Gardiner, Robert (ed)	The work draws on published photos, prints, maps and illustrated journals of the time to document the crucial contribution of seapower to the struggle for American independence. The book also illustrates many of the significant background aspects of the war.
2016.303.032	Wings at the Ready : 75 Years of the Naval Air Reserve	Shipman, Richard	A tribute to the men and women of the U.S. Naval Air Reserve, this handsome volume commemorates the organization's proud 75-year history of dedicated service to the nation. Written by a naval reserve aviator and filled with 300 top-quality photographs--60 in color--it is the only book to focus solely on the critical air component of the reserves.
2016.303.033	Caine Mutiny, The : A Novel of World War II	Wouk, Herman	The Novel that Inspired the Now -Classic Film The Caine Mutiny and the Hit Broadway Play The Caine Mutiny Court-Martial Herman Wouk's boldly dramatic, brilliantly entertaining novel of life-and mutiny-on a Navy warship in the Pacific theater was immediately embraced, upon its original publication in 1951, as one of the first serious works of American fiction to grapple with the moral complexities and the human consequences of World War II. In the intervening half century, The Caine Mutiny has become a perennial favorite of readers young and old, has sold millions of copies throughout the world, and has achieved the status of a

Object ID	Title	Author	Summary
			modern classic. Review Novel by Herman Wouk, published in 1951. The novel was awarded the 1952 Pulitzer Prize for fiction. The Caine Mutiny grew out of Wouk's experiences aboard a destroyer-minesweeper in the Pacific in World War II. The novel focuses on Willie Keith, a rich New Yorker assigned to the USS Caine, who gradually matures during the course of the book. But the work is best known for its portrayal of the neurotic Captain Queeg, who becomes obsessed with petty infractions at the expense of the safety of ship and crew. Cynical, intellectual Lieutenant Tom Keefer persuades loyal Lieutenant Steve Maryk that Queeg's bizarre behavior is endangering the ship; Maryk reluctantly relieves Queeg of command. Much of the book describes Maryk's court-martial and its aftermath. The unstable Queeg eventually breaks down completely. -- The Merriam-Webster Encyclopedia of Literature --This text refers to an out of print or unavailable edition of this title. (from Amazon.com)
2016.303.034	Tales of the South Pacific	Michener, James A.	A story of wartime romance on an island in the South Pacific upon which the classic musical motion picture South Pacific was based. This is a Reader's Digest edition with an afterword written by Orville Prescott of the New York Times in February 1947.
2016.303.035	Battleships and Battlecruisers	Humble, Richard	Written and illustrated to the same high standards as his much-acclaimed "Submarines" and "Aircraft Carriers," "Battleships and Battlecruisers" is the third of Richard Humble's new studies of leading modern warship types. It tells the story of the armour-plated giants in which sea power was measured in the 'big-gun' era, before the rise to dominance of the aircraft-carrier in the Second World War.

Object ID	Title	Author	Summary
			Richard Humble traces the battleship's painful evolution from the multi-decked 'wooden walls' of the age of sail to the oilfired super-Dreadnoughts of the 20th Century. Part and parcel of the story is the strange parallel history of the battle-cruiser, in its heyday the fastest and most powerful heavy warship in the world. By the time of the battle-cruiser's murderous losses in the turmoil of Jutland in 1916 the battle-cruiser had, in barely eight years, already been rendered obsolescent by the superior armour and hitting-power of the faster battleship. For all that the battle-cruiser stayed in service, again to demonstrate its weaknesses under German shells and Japanese bombs and torpedoes in the Second World War. In the same conflict the battleship's capabilities were transformed by modern radio communications and the 'magic eye' of radar — only to be wholly outclassed by the range and hitting-power of the aircraft-carrier. And yet, as this fascinating account reveals, the wholesale scrapping of 'redundant' battleships after 1945 was premature. Revived in the Korean and Vietnamese conflicts, and yet again in the US Navy of the 1980s, the battleship story is still far from over. (from dust jacket flap)
2016.303.036	Aircraft Carriers : The Illustrated History	Humble, Richard	This is a reprint of 2016.367.007 and the pictures aren't as sharp as the original. 2016.303.037	Submarines : The Illustrated History	Humble, Richard	Describes the history of submarines, how they work, the weapons they carry, and their uses in war and peace time. Includes a glossary and a list of submarines in service today and the countries they represent. "Submarines" is a sobering yet compelling account of the evolution of the modern fighting submarine, from its debut in 1914 to the 1980s and what could yet turn out to be the eve of World War III. Assisted by 200 photographs, maps and charts, Richard Humble traces the development not only of the submarine but also of its weapons, revolutionary new power plants and its strategic role in war and peace, drawing revealing balance sheets of the leading naval powers at significant dates in modern history.
2016.303.038	Mister Roberts	Heggen, Thomas	The novel, Mister Roberts, was an instant hit after being published in 1946 and was quickly adapted for the stage and screen. The title character, a Lieutenant Junior Grade naval officer, defends his crew against the petty tyranny of the ship's commanding officer during World War II. Nearly all action takes place on a backwater cargo ship, the USS Reluctant, that sails, as written in the play, "from apathy to tedium with occasional side trips to monotony and ennui." This irreverent, often hilarious story about the crew of the Reluctant has enjoyed wide and enduring popularity. Heggen based his novel on his experiences aboard the USS Virgo in the South Pacific during World War II, and began as a collection of short stories. It was subsequently adapted as a play, a feature film, a television series, and a television movie. The film version with Henry Fonda, James Cagney and Jack Lemmon is one of the most

2016.303.039	Luftwaffe Fighter Aces : The Jagdflieger and Their Combat Tactics and Techniques	Spick, Mike	well-known movies of WWII. HOW THE LUFTWAFFE FIGHTER ACES ACHIEVED THEIR SUCCESS The Luftwaffe's leading fighter aces outscored their Allied counterparts astonishingly during World War II--so much so that when the records of these pilots (the Jagdflieger) first became available after the war they were greeted with disbelief. A single ace with a hundred victories might have been credible, but one hundred six aces each recorded one hundred victories or more, and the top scorer claimed three hundred fifty-two. However, postwar research proved that German shoot-down confirmations were given only after rigorous checking. To discover the secret of the Luftwaffe pilots' success, aviation historian Mike Spick examines the exploits of Nazi Germany's most famous pilots, focusing on the methods and tactics of individual aces, examining the importance of machinery, training, climate, numbers, and theater of war, and using firsthand accounts to put the reader in the pilot's seat. This book is easily the best possible guide to how the German aces achieved such amazing results in battle.
2016.304.001	Crommelin's Thunderbirds : Air Group 12 Strikes the Heart of Japan	Bruce, Roy W.	"Crommelin's Thunderbirds," led by the much admired navy fighter pilot Charles Crommelin, were involved in the first carrier air strikes in Japan and the worst of the kamikaze attacks off Iwo Jima and Okinawa. In this book, two pilots from the group, officially known as AirGroup 12, chronicle their operations off the USS Randolph in the last stages of the Pacific war. The authors examine the activities of the entire group: fighters, dive bombers, and torpedo bombers, enlisted men and officers, pilots and aircrewmembers, as well as the shipboard personnel who kept them

2016.304.006	Sharks Over China : The 23rd Fighter Group in World War II	Molesworth, Carl	The shark-faced P-40 fighter planes that patrolled the deadly skies over China during World War II hold a special fascination for aviation and military history enthusiasts. Yet even now, more than fifty years later, little is known about the employment of those extraordinary machines, the courageous men who flew them, and the very different kind of war they fought. And much of what people think they know is wrong. Sharks Over China sets the record straight. It is the first history of the U.S. Army Air Corps unit that incorporated Gen. Claire Chennault's famous Flying Tigers - the 23rd Fighter Group. During the dark days immediately after Pearl Harbor, most news from the Asian front was bad - with the exception of reports about the Flying Tigers and their successor, the 23rd. Day after day, the P-40s of this legendary unit outfought the powerful Japanese air forces despite acute shortages of men and material. No single American fighter group in World War II performed more varied missions, was more successful, or was more central to the war effort in its theater

Object ID	Title	Author	Summary
			of operations. By the end of the war, the 23rd had tallied nearly six hundred aerial victories and destroyed nearly four hundred more Japanese aircraft on the ground. Based on eyewitness interviews with the group's survivors and containing numerous rare photographs, Sharks Over China belongs in every World War II and aviation library, right next to another classic about the 23rd Fighter Group, God Is My Co-Pilot.
2016.304.007	Clear the Bridge! : The War Patrols of the U.S.S. Tang	O'Kane, Richard H.	O'Kane's writing puts the reader inside the sub taking part in every detail of the Tang's patrols during WWII. I found myself referring to the maps every time he gave a description of the Tang's approach to enemy shipping and being able to see his detailed descriptions of the area thru the periscope. O'Kane's memories of details of shooting setups and the details of men at their stations in time of war is uncanny. This is truly a book that takes the reader to the dark days of WWII and the frustration of fighting with defective torpedoes and equipment and the "jury-rigging" the crews had to do to make things work and in most cases make equipment better than what was issued. O'Kane was not only a great leader of men he is one of the great heroes of WWII. It would be an honor to shake his hand. 26 of 26 people found the review helpful 20 of 20 people found the following review helpful A Legend With Great Writing Skills 7 Stars March 4, 2007 By Steve Dietrich VINE™ VOICE O'Kane's the real deal, sailor, warrior, leader, survivor and writer. This is his story and that of the USS Tang, one of the most successful submarines operating in the Pacific. O'Kane was one of a new breed of

Object ID	Title	Author	Summary
			submarine skippers who traded caution for results with great success, but at huge risks. One of the most effective tactics was to take the surfaced submarine into the middle of Japanese convoys at night, attacking multiple ships and then escaping to the depths. The action is heart stopping and explains why the Navy pulled some of the more conservative older skippers out of their boats and replaced them with men like this. But the story is much more than simply tactics and bravery above all expectations, it is a story about true leadership. Young MBA's would do better asking themselves what characteristics of leadership did O'Kane and his officers utilize to achieve so much with so very little in tangible rewards to offer their crews? There were few rewards for the truly outstanding sub crews, congratulations, awards, a sense of team and the dubious honor of being sent back out on patrol as soon as possible. One of the secrets was that O'Kane and other sub commanders under the leadership of senior officers at Pearl Harbor were given huge patrol areas and largely left to their own devices to take advantage of what they found. To prevent detection the subs seldom transmitted messages on the high power needed to reach thousands of miles across the ocean, the subs received intelligence information from headquarters, but no tactical instructions. On occasion they had schedules to keep, often lifeguard duty just offshore of enemy facilities which were being attacked from the air. Many young pilots, including George Bush Sr were plucked from waters off the Japanese held islands. The book is also a reminder of a can-do nation at work.

Object ID	Title	Author	Summary
			Battered and worn out subs returning from patrol were overhauled, updated and ready to depart on the next patrol in only a few weeks. The description of various engagements may seem a little dry and technical to someone who has not been out on the sea on a dark night trying to make sense of faint shadows and movement. For fans of surface warfare who think subs are like hunting with poison gas, the descriptions of night surface attacks in the middle of escorted convoys will fully dispel that image. The book is a great reminder of the incredible courage of those who have gone to sea to defend our country for more than 220 years and those who continue to do so today. 18 of 19 people found the following review helpful Excellent history of submarine Tang by her only CO. November 20, 1999 By A Customer By the time of Tang's launch in 1944 most of the early war torpedo problems had been solved and better radar and tactics were in place. Submarine technology was state of the art. Bright, aggressive officers like Dick O'Kane were the remaining element to gain ultimate success. "Clear The Bridge" provides a well written and concise chronology of the operations of Tang. O'Kane personalizes Tang's history by including some of the stories of the men who served on her. We first met O'Kane in the pages of "Wahoo" commanded by "Mush Morton". O'Kane credits much of his success to the training he received serving under Morton as Executive Officer. The book is a microcosm of

2016.304.008	Hunters and Shooters : An Oral History of the U.S. Navy Seals in Vietnam	Fawcett, Bill	The U.S. Navy SEALs have long been considered among the finest, most courageous, and professional soldiers in American military history-an elite fighting force trained as parachutists, frogmen, demolition experts, and guerrilla warriors ready for sea, air, and land combat. Born out of a proud naval tradition dating back to World War II, the first SEAL teams were commissioned in the early 1960s. Vietnam was their proving ground. In this remarkable volume, fifteen former SEALs-most of them original founding team members, or "plankowners"-share their vivid first-person remembrances of action in Vietnam. Here are honest, brutal, and relentlessly thrilling stories of covert missions, ferocious firefights, and red-hot chopper insertions and extractions, revealing astonishing little-known truths that will only add strength to the enduring SEAL legend.

2016.305.001	Illustrated History of Seaplanes and Flying Boats, The	Casey, Louis S.	The first seaplane flew successfully off the coast of France in 1910. Since that date, the development of waterborne aircraft has been one of the most adventurous themes in the history of aviation. A short time after that first flight, World War I provided an opportunity for these versatile aircraft to prove their operational usefulness by originating such naval missions as reconnaissance and patrol, aerial torpedo attacks and minelaying and air-sea rescue. By the 1930s, seaplanes were the largest and fastest aircraft in the world and they again proved their inestimable military value during World War II. Fulfilling an important civil role as well, floatplanes and flying boats have had continuing development in the postwar decades. THE ILLUSTRATED HISTORY OF SEAPLANES AND FLYING BOATS is a comprehensive and compelling survey of the development of aircraft that have captured the imagination since their earliest beginnings. Louis S Casey of the Smithsonian Institution provides an expert analysis of this vital story of air power at sea in a text accompanied by photographs and the colorful work of John Batchelor. 120 illustrations. 60 in color Cover Top: A British Short Seaplane, Type 184 Left center: A British Supermarine S6B Right center: A CRDA Cant Z501 Gabbiano

2016.305.005	Famous Fighters of the Second World War, Volume 1	Green, William	Recent years have seen a great revival of interest in the warplanes used by the combatant powers during the Second World War, and this is particularly true of the fighter aircraft which played such an historic role at that time. Until now the full story of the development of many of these machines has remained untold, but in this book William Green provides detailed histories of the most famous as used by the air forces of Britain, the United States, Germany and Japan. Illustrated with a wealth of detailed drawings and a unique collection of photographs, Famous Fighters tells for the first time the story of the first operational jet fighter -- Professor Willi Messerschmitt's famed Me 262; of that fascinating little rocket fighter -- the Me 163; of Mitsubishi's A6M Zero-Sen, which was the material symbol of final victory to the Japanese people. There is that truly legendary fighter, the Supermarine Spitfire; the immortal North American P-51 Mustang; these and many others are described and discussed. A feature that will be particularly popular with solid scale model builders is the series of full-page general arrangement drawings by G. W. Heumann, which depict with photographic accuracy the full insignia, camouflage squadron and individual markings of these historic machines. (from dust jacket flap)
2016.305.006	NATO Aircraft in Colour	Shaw, Robbie	Introduction: In a book of this size it is not possible to cover every type operated by the air arms of NATO. I have therefore tried to represent the most common and well known aircraft, in particular those flown by more than one

			service. I have been an avid aircraft enthusiast ever since I was taken to my first air display at RNAS Abbotsinch at the age of twelve. Now serving as an air traffic controller in the Royal Air Force, and with my camera always at my side, I am in the fortunate position of being able to photograph aircraft every working day -- and on a large number of rest days besides. I have always enjoyed flying, and to date have logged over 500 passenger hours in 69 different types, including two of my three favourites, the F-4 Phantom and F-101 Voodoo. (A flight in a Lightning still eludes me.) Indeed, I have managed to get into the air so readily that it was only a matter of time before I tried my hand at air-to-air photography. This I now regard as the ultimate test of ability for an aviation photographer, particularly when one is encased in a helmet, oxygen mask, g-suit and immersion suit and strapped tightly to an ejection seat in the narrow confines of a fast-jet cockpit. All of the photographs in this book were taken with Pentax cameras. I have two ME Super bodies and use Pentax 50mm, 40-80mm zoom, 135mm and 200mm lenses plus a Hoya 400mm lens, all fitted with UV filter. Shutter speeds vary from about 10sec for night shots to 1/500sec for fast-moving jets. Air-to-air shots are generally taken at 1/250sec. Except for the picture on page 9, which was taken on Fuji, I used Kodachrome 64 film. I am indebted to many people for their assistance. In particular I wish to thank 233 OCU, 74 Sqn, 79 Sqn and 360 Sqn RAF, Strategic Air Command USAF, Air Command of the Canadian Armed Forces, and the Spanish and Turkish air forces.

2016.305.007	Phantoms Forever	Dorr, Robert F.	For a generation, Phantoms have risen from land and sea to take command of the air. The McDonnell F-4 Phantom II is, simply, the most important and best-known fighter aircraft of the second half of the twentieth century. Phantoms will still be flying long after the century is finished, and will probably serve in more countries than the thirteen which have employed the airplane already. In its day, the Phantom was the standard against which all other fighters were measured, and it is surprising how true this remains, even now. On the pages which follow are Phantoms in full afterburner, Phantoms wearing the rising sun of Japan, Phantoms marked with MiG kills, Phantoms, Phantoms, Phantoms. None of these colour pictures have ever been published before. Together, the pictures in this volume form a celebration of a widely-appreciated airplane which is still making history and will continue to be celebrated for years to come. Enjoy. Phantoms no longer roll off anyone's production line, but they will be flying for a long time to come. They are always a sight to behold, and on the pages which follow an attempt has been made to capture some of that sight, to put it on paper, and to keep it for those who will be asking about the F-4 Phantom II years in the future. For assembling this archive of colour views, no better reason need be enunciated. Enjoy them. Robert F Dorr London, September 1986
2016.305.008	World War II in the Air : The Pacific	Sunderman, James F. (ed)	THE PACIFIC air war was one of vast distances, of men who planned and fought big, of airplanes that were decisive beyond the dreams of their designers. War in the Pacific was tailor-

Object ID	Title	Author	Summary
			made for airpower, which could strike out and suddenly destroy the enemy far beyond his forward bases. Moreover, it was airpower carrier- and land-based, that drove the Japanese from the skies all over the Far East. It was indeed a weapon of annihilation that no aggressor nation could long withstand. Major James F. Sunderman brings the Pacific air war into sharp focus with a selection of dramatic, significant writings and photographs covering the years from 1941 to 1945 - from Pearl Harbor to Hiroshima. This is an account of the men, the aircraft, and the epic combat that swept across the heavens from Arctic Alaska to the steaming Pacific tropics, then back up into the interior of China. Further, this volume by Major Sunderman is a proud chronicle of courageous and ingenious young airmen pitted against a ruthless, virtory-or-deathbent foe. Many times outnumbered in men and planes, these young Americans, many barely out of high school, out-fought and out-foxed their cagy enemy and hammered the Japanese Empire to its knees through destruction from the sky. Fully indexed; illustrated with many photos and maps. See the inside of this jacket for a descriptive Table of Contents of this book. Jacket photos official U.S. Air Force photos PRINTED IN U.S.A. 2016.305.010	World Military Aircraft Since 1945	Jackson, Robert	In the early days of World War II, military aviation was dominated by two distinct and uncomplicated types of aircraft, the fighter and the bomber, whose roles were uncomplicated too: the fighter's primary task was to destroy the bomber, whose task was, largely, to supply tactical support to ground forces. The evolution of combat aircraft during five years of war brought about profound changes in these concepts: the conversion of fighters to fighter-bombers to provide battlefield support and the forging of the strategic bomber into a devastating weapon. Since World War II, the role of military aircraft has changed considerably to meet modern needs: we have seen the rebirth of the pure interceptor to counter the threat of the strategic bomber, the evolution of the weapons system to undertake this function in all conditions, the rise of the multipurpose combat aircraft

Object ID	Title	Author	Summary
			to counter wildly escalating costs of developing new aircraft. This comprehensive reference work charts the ever-changing story of military aircraft development, detailing the combat record of every type of military aircraft to see service. The competitive element of the Cold War and the rapid advance in aviation and armament technology have given good cause for the frenetic advance in military aviation. This highly illustrated reference volume provides photographs, specifications, armament details, and operational history on more than 400 aircraft divided into groups such as combat aircraft, transports and trainers. Follow the evolution of World War II's fighter and bomber planes into the sophisticated aircraft of today.
2016.305.011	Flying the A-6 Attack Jet in Vietnam	Mullisen, Ronald S.	These are the untold stories kept imbedded for roughly 40 years kept internalized and in silent hibernation from family and friends. These stories now have been told as the authors nephew, Tim Glick went to Afghanistan with his Marine Corps Battalion in 2010. These are excerpted letters told in ten flying stories along with photos of the three air crew from squadron lost in combat from VMA(AW) 533 - Marine All Weather Attack Squadron 533. Includes: Flight training at the Naval Air Training Command in Pensacola, Florida. Aircrafts (T-34 Mentor, T-2A, TF-9J Cougar) . Deployment to NAS Fallon, Nevada for two weeks of weapon delivery practice. Stories on Aircraft Carrier Landings. Stationed in MCAS El Toro with VMA(AW)-242 an A-6 Squadron working up to get nuclear qualification. When the author was a 25 year old pilot flying an attack jet into North Vietnam.

2016.305.012	Ship That Wouldn't Die, The	Kelly, Gene (narr.)	The WW II battle history of the USS Franklin (CV-13). It was the most decorated ship and crew in U.S. naval history. It was also the most damaged ship to make it home for repairs under its own power in WW II. Narrated by Gene Kelly. Actors: John B. Kennedy, Joseph O'Callahan, Leslie Gehres, M. Frisbee, T.J. Frasure. Runtime: 60 minutes.
2016.305.013	First Voyage, The : The USS Chincoteague AVP-24	Armstrong, Bill	Personal account of events aboard the seaplane tender USS Chincoteague (AVP-24) during and just after World War II. Mostly about the Tragedy at Vanikoro.
2016.305.014	Basic Military Requirements	Bureau of Naval Personnel	This is a later edition/printing of NAVEDTRA 10054-E. Rate Training Manual for Basic Military Requirements
2016.305.015	Destroyer	Seiter, William A. (director)	Steve Boleslavski (Edward G. Robinson) is a re-enlisted veteran sailor whose seniority displaces the younger Mickey Donohue (Glenn Ford) as Chief Boatswain's Mate onboard a World War II Naval vessel. The hard-driving, perfectionist old sailor wins few friends among the younger crew, but he has the support of his Commander. Steve and Mickey have additional reasons to be suspicious of each other when Mickey falls for Steve's daughter.
2016.305.016	War in Korea and the Complete History of World War II	Miller, Francis Trevelyan	A to-date history of the Korean War and complete history of World War II. War photographs, official records, and maps. Includes chronology and blank Service Records for the owner. Co authors : "a board of historical and military authorities"
2016.305.017	Heroes on Deck : World War II on Lake Michigan	Davies, John (director)	Heroes on Deck: World War II On Lake Michigan reveals the amazing story of how more than one hundred World War II aircraft ended up on the bottom of Lake Michigan, one of America's Great Lakes. (from IMDB.com) =====

Object ID	Title	Author	Summary
			Documentary explains how Lake Michigan became an aircraft graveyard during World War II World War II fighter plane pulled from Lake Michigan (image caption:) An FM-2 Wildcat that had been used during World War II to train pilots for landing on aircraft carriers was pulled from Waukegan Harbor Dec. 7, 2012. (Jonathan Bullington/Chicago Tribune) Zak Koeske Daily Southtown A 60-minute documentary that premieres on Chicago public television this week explores the critical, but little-known role that Lake Michigan played as a training ground for thousands of fighter pilots during World War II. "Heroes on Deck: World War II on Lake Michigan," chronicles the ingenious naval operation launched just off Chicago's shoreline that, through the conversion of two passenger steamers into makeshift aircraft carriers, trained some 15,000 aviators to conduct missions in the Pacific following the Japanese attack on Pearl Harbor in December 1941. In "Heroes," director John Davies and producers Harvey Moshman and Brian Kallies reprise Davies' 1988 short film "Top Guns of '43" with new declassified film and stills, digital recreations and underwater recovery footage of planes that crashed during wartime training exercises. "Just when you think a subject like World War II has been pored over and made stories of so many different ways, there's always something that comes up," said Kallies, a former Mount Greenwood resident. "This is one of those stories." (image caption:) Vought F4U

Object ID	Title	Author	Summary
			Corsair fighter aircraft A Vought F4U Corsair fighter aircraft is pulled from Lake Michigan. The plane, like dozens of others, crash landed off of Chicago's coast during World War II training exercises. (Heroes on Deck / Handout) The Navy chose Lake Michigan as its unlikely training site during World War II because it was an inland space that provided safety from an Axis attack. "The German U-boats were patrolling the Eastern Seaboard and the Gulf of Mexico, and you had Japanese submarines that were patrolling the Western Seaboard, so you can't really train in the oceans now," Kallies said. "A merchant mariner named John J. Manley said, 'Hey guys, we have an inland sea, it's called the Great Lakes. Why don't we train there?' And so they did." Since none of the Navy's seven remaining aircraft carriers could be spared for training, two sidewheeled passenger ships, the SS Seaandbee and the SS Greater Buffalo, were converted into carriers and renamed the USS Wolverine and the USS Sable, respectively. "They were able to chop off the top decks, and they literally just welded on makeshift landing strips," Kallies said. (image caption:) Classic photos: Naval Air Station Glenview The makeshift carriers had both less height and less deck space than actual carriers, which made landing on them, already a challenging task for any pilot, that much more difficult. "Captain Ed Ellis from the (National Aviation Museum) said that in many ways it was harder to land on these training carriers than it would be when they got to the real ones," Kallies said. "So if they

Object ID	Title	Author	Summary
			could land on these, they could land on anything." Between 1942 and the end of the war, more than 100 fighter planes crashed and sank to the bottom of Lake Michigan, where today they form an aircraft graveyard off Chicago's shore. Despite the dozens of accidents, Kallies said eight pilots and approximately 40 crewmen were killed during Lake Michigan training exercises, a very low number of fatalities, given the circumstances. (image caption:) Grumman F4F Wildcat A Grumman F4F Wildcat that crashed during training exercises in World War II has been recovered from Lake Michigan. (Heroes on Deck / Handout) He said for him the documentary demonstrates what amazing feats we as Americans can accomplish if we put our minds to something. "There was a really big problem — how do we train these guys to go do this terrible and great thing? And they came up with a solution," Kallies said. "If we can do that for something like war, just imagine what we can do if we put it toward things other than war, peaceful efforts." The film, which is narrated by veteran newsman and "Wait, Wait ... Don't Tell Me!" announcer Bill Kurtis, airs at 9 p.m. Thursday and at 6 p.m. Sunday as part of WTTW's Memorial Day programming. zkoeske@tribpub.com Copyright © 2016, Daily Southtown World War II (1939-1945) (http://www.chicagotribune.com/suburbs/daily-southtown/news/ct-sta-wwii-

2016.305.024	Vietnam : The Secret War	Generous, Kevin M.	Although the Vietnam War was one of the most reported in history, much of the long-running conflict was fought under cover and in remote areas far from the media searchlight. In the war's early days, when the colonial French were struggling to maintain their sovereignty against the Vietminh, terrorist attacks became commonplace; the French Deuxieme Bureau retaliated with brutal interrogation methods and increasingly repressive policies. CIA operations on this volatile Cold-War front began soon after World War II and expanded steadily for decades. After the 1954 withdrawal of the French, Vietnam was polarized by its division into a communist North and a 'non-communist' South, ruled by a series of despots whose tenuous grasp on power was maintained only by massive US assistance, first financial, then military as well. Vietcong guerrilla cadres infiltrated the countryside and suborned a large proportion of the peasant population. Anti-communist forces fought back with large-scale counterinsurgency operations that involved US Army Special Forces (the Green Berets), CIA-recruited indigenous mercenaries and secret US Air Force bombing raids over

			Cambodia. Combatants on both sides lived off the land, planted and avoided booby traps, engaged in acts of sabotage, terrorism and assassination, and gleaned vital intelligence via dangerous missions into enemy strongholds. It was, indeed, a covert war, some of whose operations are only now coming to light. "Vietnam: The Secret War" is illustrated with over 230 color and black-and-white photographs, some of them never published before in the West. It adds a revealing new chapter to the growing history of a conflict critical to our times. (from dust jacket flap)
2016.305.025	Battle of Chosin, The	MacLowry, Randall	American-led United Nations troops were outnumbered and at risk of annihilation at the Chosin Reservoir by the sudden entrance of the People's Republic of China, led by Mao Zedong, into the five-month-old Korean War. The two-week battle that followed, fought in brutally cold temperatures, is one of the most celebrated in Marine Corps annals.
2016.305.026	Astronauts, The : The First 25 years of Manned Space Travel	Yenne, Bill	Mankind's dreams of space flight predate history. Over the ages, while dreamers dreamed of reaching into and exploring the heavens, practical man was concerned with more practical matters. As late as the mid-nineteenth century the conventional wisdom held that human flight, let alone human flight into space, was impossible. Yet the dream persisted, kept alive by those who dared to dream. The world's first manned space flight was launched on 12 April 1961 by the Soviet Union, carrying Cosmonaut Yuri Gagarin. In the short time since then mankind has broken down many of the barriers to his last frontier and made enormous achievements in his fascinating venture into space. He has landed on the moon, worked

Object ID	Title	Author	Summary
			in space aboard the Salyut and Skylab space stations, recovered and repaired vehicles in space, completed international space missions and taken non-astronaut individuals into space as scientists or observers. It is easy to forget that mankind has come so far in such a relatively short time, and that placing a human being into space is still an event of awesome complexity and of monumental importance. "The Astronauts" presents a detailed account of manned space programs of the US and the USSR as well as an account of the non-American and non-Soviet astronauts and cosmonauts who have flown in space as guests aboard the spacecraft of the US and the USSR. This book is a tribute to the individuals who designed and built the systems and hardware and to the dedicated men and women who are astronauts and cosmonauts. All those individuals from the world over who are the pioneers and participants in these bold and glorious expeditions are included here -- Yuri Gagarin, Alan Shepard, John Glenn, Gherman Titov, Neil Armstrong, Valentina Tereshkova, Edward White, Sally Ride, Charies Walker, John Young, Valeri Ryumin, Senator Jake Garn and Christa McAuliffe among many others. More than a history, "The Astronauts" provides an absorbing insight into the human elements of mankind's most exciting undertaking yet, those who became the heroes and heroines to walk among the stars. (from dust jacket flap)
2016.305.027	Gulf War, The : A Day-by-Day Chronicle	Stanwood, Frederick	On August 2 1990 the western world awoke to the news that Iraq had invaded Kuwait. It was less than 48 hours since Saddam Hussein, the President of Iraq, had reassured the world's leaders that he would not occupy by military might

Object ID	Title	Author	Summary
			the tiny sheikdom and neighbour on his south eastern border. This book tells the story of that invasion and the events which unfolded during the next seven months ending in the rout of the Iraqi army on a road in northern Kuwait. This is not a book about military hardware and might though this is an important part of the story -- it is a book about people, many of them innocent victims of circumstance, and how all of them together liberated Kuwait only months later. The "Gulf War" is split into four main sections, each written by authors who have an intimate knowledge of their subject. Part One - Shifting Sands - covers the history of the region and also looks at the reasons why Saddam Hussein ordered his army to occupy Kuwait. Part Two - Gathering Storm - tells the tale of the military build-up on a scale more rapid than the world had ever before witnessed. Part Three - Desert Storm - chronicles the events of the war on a day-by-day basis, weaving in stories and features together to form a complete chronology of events from Invasion to Liberation. The final section - Aftermath - discusses the events that followed from the cease-fire and the way that the political map will be shaped after Iraq's ejection from Kuwaiti territory. Illustrated with well over 150 photographs - many exclusive to the book - and specially commissioned illustrations - each section is self-contained. Information boxes and panels explain such facets as oil and ecology, weapons, strategy on land, sea and in the air. Together they form a book which is unique in scope and character, making this the book on the "Gulf War." (from dust jacket flap)

2016.305.028	Just Plane Delicious : Cooking with the San Diego Air & Space Museum	San Diego Air & Space Museum	Enjoy first class fare from the San Diego Air & Space Museum while supporting the Museum's world class Library & Archives. Soar to new heights with hundreds of delectably delicious dishes [recipes] contributed by the Museum's staff, volunteers, and friends. From the pioneering days of Glenn Curtis and naval aviation at North Island, the building of Charles Lindbergh's Spirit of Saint Louis by Ryan Airways, the journey to space with Convair's Atlas rocket, to the present-day Predator and Global Hawk unmanned aerial vehicles, San Diego has become known as the "Air Capital of the West." The San Diego Air & Space Museum has been the keeper of this rich heritage for nearly 50 years. Through preservation of significant artifacts, presentation of dynamic exhibits, and extensive resources of its Library & Archives, the Museum commemorates the men and women who forged aerospace history. This cookbook will help us continue those daring and important achievements. (http://sandiegoairandspace.org/support/publications/P10) Good for use by the Fantail Cafe or anytime we need to have an aviation-themed recipe.

2016.305.029	Operation ANADYR : U.S. and Soviet Generals Recount the Cuban Missile Crisis	Gribkov, Anatoli I.	From Library Journal Thirty years ago the United States and the Soviet Union stood at the brink of nuclear war over Cuba. Since that time a great deal has been written about the crisis, almost all from our side. Gribkov, who oversaw the shipment of the Soviet weaponry across thousands of miles of ocean, recounts in detail how the Russians were able to move 40,000 Soviet troops and countless tons of nuclear missiles and equipment to Cuba, all without detection from American military surveillance. Smith, an assistant to Maxwell Taylor, attended many of the crisis meetings

Object ID	Title	Author	Summary
			Kennedy held during those tense days in October 1962. Gribkov argues that the Soviet Union feared an American invasion of Cuba and installed the weapons as a deterrence. Smith relates how Kennedy and his advisers saw Khrushchev's Cuban gambit as a strategic counterpart to the boiling situation in Berlin. The authors, especially Gribkov, provide a unique perspective from which to view our nation's most fearsome crisis. Recommended for general collections. See also James Blight and others Cuba on the Brink , LJ 11/1/93.--Ed. - Ed Goedecken, Iowa State Univ. Lib., Ames Copyright 1994 Reed Business Information, Inc. From Booklist Gribkov attended the conference transcribed in Cuba on the Brink, edited by James G. Blight , because he had organized the logistics of shipping 50,000 Soviet soldiers and their nuclear weapons to Cuba in 1962. That same year, Smith was an aide to the Pentagon's top officer, Maxwell Taylor. Here, each veteran of the missile crisis presents his personal recollections of the event--Gribkov's narration being more personal than Smith's, who, by contrast, seems detached. The difference arises because Gribkov was sweating on the ground in Cuba, pushing forward the secret missile deployment, while Smith was an intelligence traffic cop, trying to make sense of all the frantic activity. Smith also tends not to dramatize Kennedy's Cold War policies, making them seem almost routine--except for his interesting passages about the military's vehement opposition to JFK's no-invasion pledge. The military demanded an invasion forthwith, which many think would have started World War III. But would it have? Gribkov startlingly reveals that at the moment the Russian presence was discovered,

Object ID	Title	Author	Summary
			Moscow withdrew authority to use atomic weapons if an invasion occurred. Such a significant fact punches this specialty book's meal ticket; however, collections ought first to have Michael Beschloss' Crisis Years (1992) or Dino A. Brugioni's Eyeball to Eyeball (1991). 2016.305.040	Vietnam : Chronicle of a War	CBS News	This video traces the history of the devastating conflict that was fought in a far-off land--and then re-run nightly on our television screens. Drawing upon the resources of the CBS News Archives, and narrated by Walter Cronkite, here are little known stories we could never forget--as reported by the on-the-scene, award-winning news correspondents and camera crews.
2016.305.041	Headline Stories of the Century : A Newsreel Library of World War II	Hearst Entertainment	Covering the most documented war in history, this video presents 84 carefully edited, black-and-white Hearst newsreels from dramatic combat footage, most filmed by the Signal Corps, Coast Guard, Air Force, and Navy photographers.
2016.305.042	When Hell Was in Session	Denton, Jeremiah A.	An account of the seven years the author spent in North Vietnamese captivity, having been shot down in a Navy aircraft on a mission over North Vietnam in July, 1965.
2016.305.043	Short History of the Korean War, A	Stokesbury, James L.	Title is self-explanatory. Some references to naval air actions.
2016.305.044	Insignia of World War II	McDonnell, Leslie	Over 1000 of the most important badges worn on uniforms between 1939 and 1945.
2016.306.001	Ghosts of the Air : True Stories of Aerial Hauntings	Caidin, Martin	Bizarre accounts of the supernatural from the pilots who lived to tell about them! There are events witnessed in that half-way region between heaven and earth that defy all rational explanation. For years, author and pilot Martin Caidin, collected these strange but true stories of aerial hauntings from experienced pilots and astronauts. His startling conclusion: Something is out there! Introduction / John Keel -- ch. 1. 10 October 1967 -- ch. 2. Black Thursday -- ch. 3. The Hangover Mining Company -- 4. The phantoms of Montrose -- ch. 5. Moments out of time

2016.306.002	Eyewitness Pacific Theater : First Hand Accounts of the War in the Pacific from Pearl Harbor to the Atomic Bombs	Kuehn, John T.	Eyewitness Pacific Theater tells the remarkable story of U.S. operations in the Pacific during World War II by documenting the experiences of the men and women who were stationed there. Written by award-winning author D.M. Giangreco and venerable Commander John T. Kuehn, this volume is illustrated with hundreds of contemporary photos, including wartime pictures of the veterans themselves. Bringing the full force of personal recollections home to the reader, Eyewitness Pacific Theater is accompanied by a full-length compact disc of interviews produced by Emmy Award-winning historical documentarians Rob Lihani and Rob Kirk in collaboration with First Person Productions. Listen to dramatic tales in the voices of the Allied soldiers, sailors, airmen, and medical personnel as they recount the tragedies and triumphs of life during wartime in the Pacific Theater. Tells the harrowing story of Japan's attack on Pearl Harbor and America's entry into the South Pacific front during World War II. Stories told by members of each of the armed forces, the history herein documents the experiences of the men and women who were dispatched to defend the United States.

2016.306.003	Black Cats with Wings of Gold	United States. Navy. Patrol Bombing Squadron VP/VPB-33.	The genesis for this book was a squadron reunion held in Pensacola, FL in conjunction with the 75th anniversary of Naval Aviation. "The squadron flew Catalina PBVs (amphibious aircraft) from Panama to Australia, then back to the Philipines along a chain of islands occupied by the Japanese forces." Between 1 September and 4 October 1944, the squadron set records for sinking more Japanese shipping than was done "by any other squadron in this war." "A remarkable total of 116,500 tons of shipping was sunk or destroyed and 80,500 tons severely damaged for a grand total of 197,000 tons. "
2016.306.005	Aviation Quarterly, Vol. 2, no. 1, Airtrails, Inc. 1976		This is a bicentennial edition of Aviation Quarterly. Contents include : 1) History of American Aviation, 1822-1905 (part 1); 2) College Park Airport (the first military airport in the US); 3) Trapping on the High Seas (history of aircraft on ships from 1911 to present); 4) Flight of ye Good U.S. Ship NC-4 (part 1); 5) Bite of the Cobra (Bell P-39 Airacobra). Also includes rare 1919 aviation art, and copies of other aviation paintings.
2016.306.006	Aviation Quarterly, Vol. 2, no. 2, Airtrails, Inc. 1976		This is a bicentennial edition of Aviation Quarterly. Contents include : 1) History of American Aviation, 1822-1905 (part 2); 2) Last of the Lafayette (interview with Carl Dolan, last surviving member of the Lafayette Escadrille); 3) The Cubs Grow Up (history of Cubs and planes that resembled Cubs); 4) Gone with the Windecker (history of the Eagle airplane); 5) Flight of ye Good U.S. Ship NC-4 (part 2) ; Also includes rare 1919 aviation art, and copies of other aviation paintings.

2016.307.005	Air Campaign, The : Planning for Combat	Warden, John A.	An attempt to come to grips with the very complex philosophy and theory associated with air war at the operational level. Devoted to how and why air power can be used to obtain the military objectives needed to win a war.
2016.307.006	Every War Must End	Ikle, Fred Charles	From the Preface of the Revised Edition--"Regarding the beginning of wars, they can call on historic data, rich concepts, and extensive prior planning; how to deter aggression, how diplomacy might avert the outbreak of war, how to mobilize forces, and how to design the initial military campaigns. Much less is known about how to bring a war, once stated, to a satisfactory end."
2016.307.007	Signals of War : The Falkland Conflicts of 1982	Freedman, Lawrence	From the Introduction: "At the start of 1982 the Argentine Government had made the recovery of the Malvinas, by the magic month of January 1983, a high priority. In London there was an awareness of this deadline, but largely among the academic specialists, those few officials with responsibility for the Falklands and relations with Argentina, and members of the slightly larger group, encouraged by the Falklands lobby, who feared transfer of sovereignty of the Falklands to Argentina. This reflected the basic asymmetry in the conflict up to April 1982. Britain was holding doggedly on to islands about which very few people cared, but those who did cared strongly. In Argentina everybody cared."
2016.307.008	NATOPS Flight Manual Navy Model A-6E TRAM/KA-6D Aircraft	Chief of Naval Operations	Provides standardized ground and flight procedures for the Navy Model A-6E TRAM/KA-6D Aircraft. Does not include tactical doctrine. This publication supersedes NAVAIR01-85ADF-1 Dated 1 February 1986 and changed 1 November 1989.

Object ID	Title	Author	Summary
2016.307.009	NATOPS Flight Manual Navy Model E-2C Aircraft	Chief of Naval Operations	Provides standardized procedures for the operation of the E-2C early warning aircraft. This publication supercedes NAVAIR 01-E2AAA-1, dated 1 September 1982, changed 1 June 1985.
2016.310.001	Logging Flight Time : And Other Aviation Truths, Near Truths, and More Than a Few Rumors That Could Never Be Traced to Their Sources	Kershner, William K.	The author flew his first plane at the age or 15 in 1945. From that early beginning, he went on to become a naval aviator flying both prop planes and jets. After four years in the Navy, he went to work for corporate airlines, as a flight instructor, and other aviation industry jobs. Many of the stories in this book were originally published as articles. (Some were not). They are some of Kershner's favorite anecdotes, with some additional anecdotes from other pilots. Some of the incidents, may be slightly exaggerated. The book is divided into three sections: Outlaw Field, 1945-1951, The Navy 1951-1955, and the Later Years, 1960-.
2016.311.001	USS Midway 1963-1964	Romano, Jerry (ed)	A pictorial summary of the USS Midway crew on a deployment from Alameda NAS to the western Pacific with the Seventh Fleet from 8 November 1963 to 26 May 1964 with CAW-2 consisting of VF-21, VF-24, VA-22, VA-23, VA-25, VAH-8, VAW-11, and VFP-63 embarked aboard. Port visits included Hawaii; Subic Bay, The Republic of the Philippines; Hong Kong; and Sasebo, Beppu, Iwakuni, and Yokosuka, Japan. USS Midway (CVB/CVA/CV-41) aircraft carrier; lead ship of the class.
2016.312.001	Voices of Midway : Six Minutes that Changed the World	USS Midway Museum	Produced to be shown in the Battle of Midway Theater on the USS Midway Museum, the 14-minute multi-media original film production focuses on the young men that were going to fight. The night before the battle, the crew was told to write letters home, just in case. The film quotes from some of the letters of both the sailors who prepped the planes and the pilots who flew them. Six minutes of battle changed the course of history. The DVD

2016.313.018	Aviation Boatswain's Mate E 1 & C	Naval Education and Training Professional Development and Technology Center	A Navy Training course prepared especially for men of the navy studying for advancement to Aviation Boatswain's Mate E (ABE). ERIC publication ED 109 344. The rate training manual has been prepared for enlisted personnel of the Navy and Naval Reserve who are studying for advancement in the Aviation Boatswain's Mate E rating. It is primarily based on the professional requirements or qualifications for ABE 1 and ABE C, as contained in the Manual of Qualifications for, Advancement NavPers 18068: (series). Chapter 1 discusses the various requirements for advancement in the boatswain's Mate E rating. Chapters 2 through 8 consist of information on : leading petty officers, shop supervision and administration, steam catapults, catapult deck gear and accessories, shipboard arresting and barricade gear, visual landing aids, and special tests and test procedures. Numerous illustrations and diagrams are interspersed throughout the document. A subject index is appended.
2016.313.019	Aviation Boatswain's Mate E	Naval Education and Training Professional Development and Technology Center	When you complete this course you will be familiar with common maintenance tools and their uses, measuring tools and techniques, aircraft recovery Equipment, steam catapults, and associated launching equipment. You will also

Object ID	Title	Author	Summary
			learn about the aircraft launch and recovery equipment maintenance program (ALREMP) and maintenance planning and administration.
2016.313.020	Aviation Boatswain's Mate H	Naval Education and Training Professional Development and Technology Center	Provides information on tools and equipment, aircraft handling equipment, aircraft handling, aircraft firefighting, and crash and salvage.
2016.313.021	Operation Magic Carpet	Milstein, Stewart B.	Operation Magic Carpet was the name given to the sealift of US military and civilian personnel from Europe, the Pacific, Asia, Alaska, the Caribbean and South America to the US. The operation began on September 6, 1945 and ended on September 1, 1946. This document includes list of ships with statistics about this operation.
2016.313.022	Navy Training System Plan for the CV/CVN Aircraft Launch and Recovery Equipment	None Stated	This Navy Training System Plan (NTSP) has been developed to identify the life cycle manpower, personnel, and training requirements associated with Aircraft Carrier (CV) and Nuclear Aircraft Carrier (CVN) Aircraft Launch and Recovery Equipment (ALRE). The ALRE address in this NTSP include the C 13 Catapult, mark 7 Jet Blast Deflector (JBD), and the Mark 7 Arresting System. All three systems are in the Operations and Support Phase of the Defense Acquisition System.
2016.313.023	Bibliography for Advancement Study	Naval Education and Training Command	This document provides a list of training manuals and other publications in support of the Naval Standards (NAVSTDs) and Occupational Standards (OCCSTDs) prescribed in Section 1, Manual of Navy Enlisted Manpower and Personnel Classifications and Occupational Standards, NAVPERS 18068E.
2016.315.001	Spitfire : A Complete Fighting History	Price, Alfred	This book is a reprint that combines two earlier books by the author: Spitfire at War published in 1974 and Spitfire at War 2 published in 1985. The Spitfire was the most famous aircraft ever to serve in the Royal Air Force. In this

Object ID	Title	Author	Summary
			book, the author has made an objective analysis of the Spitfire legend. The result is a unique account which casts new light not only on the spitfire, but also on the nature of air combat during the Second World War.
2016.317.001	Steam Catapult, The : Its History and Operation	Chief of Naval Operations	This publication traces the history of the catapult from David's use of it in the Bible to the modern aircraft carrier catapults.
2016.317.002	USS Midway Museum - Tenth Anniversary - Volunteer Cruisebook	USS Midway Museum	This book tells the stories of active volunteers as of 2014. Inclusion was voluntary, so not everyone is listed. There is an alphabetical list of volunteers with pictures, a list of volunteers without pictures; a list of veterans with pictures; a list of Midway veterans with pictures; special tributes to Stan Abele, Allen Beddoe, Gaylord Bedell, Allen Bodenlos, Charles Bollinger, David C. Burwell, Clem Clemons, Jack Durham, Len Gray, Al Hansen, John Harris, W. F. "Bill" Hay, Bob Jackson, Ken Ledgerwood, Joe Neves, Art O'Brien, Lloyd Parthemer, Gailand Polk, James D. Reily, Sr., Jack Scott, Ray Snider, King Splitt, Bob Thomas, Glenn Tierney, Tom Tompkins, Ed Vasely, Elroy Voet, Bob Watson, Robert "Bob" Wilson; there are candid photos by department; list of volunteer of the year, list of volunteer of the month, memorial list, and some candid photos of highlights from the Museum's history. At the end is an alphabetical list of names arranged by first name. Includes an additional page of library volunteers that was left out in the book.
2016.317.003	San Diego Milestones : A Coming of Age Celebration	San Diego Air and Space Museum	The Library & Archives of the San Diego Air & Space Museum selected 100 milestones intended to provide the most fun, factual and historically interesting information about San Diego's history. Includes references to several navy milestones including Navy on Point Loma, Great White Fleet, San Diego

Object ID	Title	Author	Summary
			Air Meet, Glenn Curtiss, Rockwell Field, Navy's Pacific Fleet Home Based in San Diego, Marine Corps Recruit Depot, San Diego naval Training Center, North Island, America's First Aircraft Carrier, Coast Guard Air Station, Camp Pendleton, Top Gun at Miramar, and the USS Midway Museum.
2016.317.004	Navy Ship Names : Background for Congress	O'Rourke, Ronald	Names for Navy ships traditionally have been chosen and announced by the Secretary of the Navy, under the direction of the President and in accordance with rules prescribed by Congress. Rules for giving certain types of names to certain types of navy ships have evolved over time. On 13 July 2012, the navy submitted to Congress a 73-page report on the navy's policies and practices for naming ships. The report summarizes ship naming for Aircraft carriers, Virginia class attack submarines, Destroyers, Littoral Combat Ships, Amphibious Assault Ships, San Antonio class amphibious ships, TAO(X) oilers, Lewis and Clark (TAKE-1) class cargo and ammunition ships, Mobile Landing Platform (MLP) ships/Afloat Forward Staging Base (AFSBs).
2016.317.005	Rhymes of the Midway Mariners	USS Midway Museum. Library Volunteers	A collection of January 1st deck log verse from 1946-1978. Also includes other verses about the Midway.
2016.317.008	I Christen Thee, Nebraska : History of the USS Nebraska and Nebraska Related Naval Ships	McCord, Monty	An account of ships named Nebraska. Includes three ships before the Civil War, the USS Nebraska BB-14, the USS Nebraska SSBN-739, plus other ships named after Nebraska people and places.
2016.317.009	Silver Service of the U.S.S. Pennsylvania, The	Trussell, John B. B.	The objects listed in the book formed a major part of the exhibition entitled "The USS Pennsylvania and Her Silver" which was on display at the William Penn Memorial Museum in 1981-82.
2016.317.010	State Museum of Pennsylvania : Pennsylvania	Silverman, Sharon Hermes	Includes a two page article, p.12-13 on the USS

2016.318.001	United States Aircraft, Missiles and Spacecraft - 1963	Haggerty, James J. (ed)	The book covers aerospace progress during the calendar year 1962. First section is Records, including those set by the X-15, the B-58 Hustler and various World Records. New aircraft is the next section including the Boeing 727, Douglas Model 2086, Beechcraft 120, new helicopter models, and mockups of V/STOL prototypes. The third section included new missiles such as the Shillelagh, Davy Crockett, Shrike, Lance, Tow and Spring. New systems such as the SNAP 50/SPUR, portable power source, Apollo Control Systems, Space Pack and Nuclear Gyroscope were in the fourth section. This was followed by Space Highlights of 1962 including the three Mercury flights of Glenn, Carpenter and Schirra; new spacecraft such as the Mariner, Ranger and Explorer; the Apollo Command Module and Lunar Excursion Model mockups. The next section covered awards such as the Wright Brothers Trophy, Rober M. Losey and Lawrence Sperry Awards. The Aerospace Industry section covered from sales, commercial aircraft, exports, general aviation, sales of helicopters, engines and parts, earnings, employment and forecast. The aircraft section was large. covering civilian and military planes and helicopters. The Missiles includes both surface to surface (eg Titan, Atlas, and Minuteman) surface to air (eg Zeus, Talos, Tartar), air to surface (eg Bormarc, Typhoon, Shrike), air to air (Bullpup, Hound Dog, Falcon). The last section is Spacecraft that "at the end of 1962 were either in launch or advanced development status. Included is a section on launch vehicles, the rocket system which boost spacecraft into orbit or escape trajectory."
2016.318.002	United States Aircraft,	Haggerty, James J. (ed)	The book covers aerospace

Object ID	Title	Author	Summary
	Missiles and Spacecraft - 1964		progress during the calendar year 1963. Includes a Table of Contents: Aerospace Events, p2; Aerospace Industry, p30; Aircraft, p36; Missiles, p122; and Space Craft, p146. The end of Project Mercury lead off the Aerospace Events. Other notes were the second Telstar launch, Tiros meteorological satellites, series of Explorer satellites, rockets that will be part of the Apollo missions, and military space flight. The new aircraft is the next section including the Boeing 727, Douglas DC-9, supersonic and short haul transports, the Lear Jet, new helicopters, and new military planes. The third section included new missiles such as the Polaris A3, Pershing, Subroc and Sprint. New systems such as the space simulator, rotor system, nuclear generator, astronaut tool, and parachute system. A section on new engines and records, and awards finish out the section. The Aerospace Industry section covered from sales, backlog, commercial aircraft, exports, general aviation, sales of helicopters, engines and parts, earnings, employment and forecast. The aircraft section was large. covering civilian and military planes and helicopters. The Missiles includes both surface to surface (eg Titan, Atlas, and Minuteman) surface to air (eg Zeus, Talos, Tartar), underwater to underwater (eg Subroc, Astor, surface to underwater (eg Alpha, Asroc), surface to air (eg Nike Zeus, Redeye, Mauler, Hercules) air to surface (eg Quail, Zuni, Shrike), air to air (Sparrow III, Falcon, Sidewinder). The last section is Spacecraft included Project Apollo, Project Gemini, the Manned Orbiting Laboratory, Telstar, Relay, etc.
2016.318.003	United States Aircraft, Missiles and Spacecraft - 1965	Haggerty, James J. (ed)	The book covers aerospace progress during the calendar year 19634 Includes a Table of Contents: Aerospace Events, p2; Aerospace Industry, p30; Aircraft, p36; Missiles, p120; and Space Craft, p144. The

(ed)	1969 Aerospace Events: The highlights of the aerospace year, including major developments involving aerospace people and equipment and the aircraft, missiles, launch vehicles, spacecraft, engines and systems which passed notable milestones in 1969.
2016.319.001	Destroyer	Seiter, William A. (director)	Steve Boleslavski (Edward G. Robinson) is a re-enlisted veteran sailor whose seniority displaces the younger Mickey Donohue (Glenn Ford) as Chief Boatswain's Mate onboard a World War II Naval vessel. The hard-driving, perfectionist old sailor wins few friends among the younger crew, but he has the support of his Commander. Steve and Mickey have additional reasons to be suspicious of each other when Mickey falls for Steve's daughter.
2016.320.001	Jane's Pocket Book of Airships	Ventry, Arthur Frederick (ed)	From the introduction: "The era of lighter-than-air craft began in 1783 with the flight over Paris with the

Object ID	Title	Author	Summary
			Montgolfier brothers' hot-air balloon. However if the Montgolfier's monopoly was short-lived for the first flight of a hydrogen-filled balloon made of rubberized fabric was to take place a few months later at the Tuileries on 1 December 1783. Not long afterwards, the more practical nature of the hydrogen balloon came to the attention of the military authorities, and by 1784, a French balloon, the Entreprenant, was used for reconnaissance work. At that time Coutelle and Conte formed two companies of aerostiers and used them with some considerable success in military operations. Napoleon disbanded these companies in 1799, mainly because they were not mobile enough. Although many practical designs were promulgated and a few successful airship models flown, it was not until 1884 that the first real dirigible craft was flown. This ship was La France of Captain Charles Renard and Aurthur Krebs, which was a round trip, returning to the point of ship's departure."
2016.320.002	Jane's Pocket Book of Research and Experimental Aircraft	Taylor, Michael J. H. (ed)	From the foreword: "The 125 research and experimental aircraft described and illustrated in the Pocket Book are the most exciting of all the types flown in more than 30 years of aviation since the end of the Second World War. They reflect a determination that the tremendous impetus in the development of aircraft that had come about through strife should not be allowed to dry up (as had happened in 1919) once the immediate necessity for weapons to feed a fighting force had gone. Furthermore, the way in which America had forced Japan to surrender, and the new division of countries, had made it clear that no major force could ever again sit back on its laurels and watch the world go by."
2016.320.003	Story of the Airship, The	Allen, Hugh	Published annually since 1924 as a convenient reference book for students, writers, and others interested. CONTENTS:

Object ID	Title	Author	Summary
			Chapter I--The Airship and the Airplane. Chapter II--The Beginnings of Flight. Chapter III --Classes of Airships. Chapter IV --The Story of the Zeppelins. Chapter V--Goodyear in Aeronautics. Chapter VI--The Free Balloon. Chapter VII--Blimps or Air Yachts. Chapter VIII--Planning for the Naval Ships. Chapter IX--Building the Airship Dock. Chapter X--Improvements in Airship Design. Chapter XI--The New Navy Airship. Chapter XII--How the Akron Was Built. Chapter XIII--Safety of Rigid Airships. Chapter XIV--Helium and Duralumin. Chapter XV--Military Uses of the Airship. Chapter XVI--Airship Handling. Chapter XVII--Training Operations. Chapter XVIII--Commercial Air Liners. Chapter--XIX--Notable Airship Flights. Chapter XX--Akron and Its Airport. After Word. Appendix. Bibliography.
2016.320.004	Blimps and U-boats : U.S. Navy Airships in the Battle of the Atlantic	Vaeth, J. Gordon	"The British coined the term "blimp," an airship that has not internal framework and keeps its hull form by the pressure of its lifting gas. In 1915, LT A.D. Cunningham was inspecting Sea Scout #12 when he playfully flicked its gas bag, also known as its envelope with, his thumb. The airship replied with something that sounded like "BLIMP." From the Preface, "When in January 1942, German submarines began their attacks on shipping in American waters, the U.S. Navy had one squadron of four blimps based at Lakehurst, New Jersey. Before the war ended, there would be eleven antisubmarine blimps squadrons deployed along the east coasts of North and Souther American, throughout the Caribbean, at the Straight of Gibralter, and in the Mediterranean."
2016.320.005	When Monsters Roamed the Skies : The Saga of the Dirigible Airship.	Hood, Joseph F.	Surveys the period in aviation history when gas floated airships were thought to offer the real future in air transportation. "Manned flight did not begin with the Wright

Object ID	Title	Author	Summary
			brothers. For many years before that historic adventure at Kitty Hawk, men had been going aloft in balloons filled with some type of lighter-than-air gas. In time the balloon evolved into powered maneuverable flying machines that led eventually to the construction of enormous airships--some of the size of ocean liners. For decades, these majestic giants roamed the skies, writing glorious chapters in aviation history. Their career spanned almost forty years."
2016.320.006	Airships for the Future	White, William Joseph	Includes the latest developments in the expanding field of lighter-than-air transportation. Also tells the history of blimps, balloons and dirigibles. Has sections on the U.S. Navy airships Shenandoah, Akron and Macon.
2016.320.007	Sky Ship : The Akron Era	Hook, Thom	An entire book dedicated to one lighter-than-air ship U.S.S. Akron. Includes early history of flight, especially of light-than-air craft. Follows the life of one Hammond James Duggan who eventually became the pilot of the Akron. Takes the airship from its birth to its demise.
2016.320.008	Airships for National Defense and Commerce	Goodyear Tire and Rubber Company, The	A commercial brochure produced by the Goodyear Tire and Rubber Company advertising the usefulness and potential of the airship. Includes photos of U.S. Navy blimps, barrage balloons and dirigibles of the 1920's and 1930's. Features designs of airplane-carrying dirigibles.
2016.320.009	U.S. Navy Pressure Airships, 1915-1962	Shock, James R.	A history of U.S. Navy airships (non-rigid, semi-rigid, and metal-clad) by individual airship. Includes British and French airships of World War I. Does not include dirigibles.
2016.320.010	Spirit of Naval Aviation, The	Goodspeed, M. Hill	Hardcover book highlights the Pensacola, FL Naval Aviation Museum's most noteworthy aircraft through spectacular photography.
2016.320.011	Flying Hookers for the Macon : The Last Great Rigid Airship Adventure	Hook, Thom	A history of the USS Macon airship. A number of viewpoints as to why the Macon was lost are given.

Object ID	Title	Author	Summary
			Included as appendices are accounts of the last flight by Lt. H. B. Miller, RADM Calvin M. Bolster, and RADM Alfred B. Metsger. There is a list of the battle crew of the Macon, a bibliography and an index.
2016.320.012	Shenandoah Saga : A Narrative of the U.S. Navy's Pioneering Large Rigid Airships	Hook, Thom	USS Shenandoah was the first of four United States Navy rigid airships. It was built in 1922-1923 at Lakehurst Naval Air Station, and first flew in September 1923. It developed the Navy's experience with rigid airships, even making the first crossing of North America by airship. On the 57th flight, Shenandoah was torn apart in a squall line over Ohio in 1925. (from Wikipedia)
2016.320.013	Our Flying Navy	Office of the Deputy Chief of Naval Operations (Air)	A gorgeously illustrated short history of all phases of Naval Aviation in the present war. The Navy Department, through the Council on Books in Wartime, has made this material available and has checked the accuracy of text and illustrations, the latter being the work of seven patriotic American artists who lived at Naval Air Stations in every part of the country, were quartered with the men, studied the training program, and made numerous flights in all types of naval planes. Thus their paintings and drawings cover every side of Naval Aviation, from pre-flight school to combat, and the hundred-odd paintings reproduced here form a permanent tribute to the Service. The text and captions for the illustrations have been prepared with the assistance of the Office of the Deputy Chief of Naval Operations (Air), and are therefore entirely authoritative. There are as well an Introduction by James Forrestal, Secretary of the Navy, a Preface by Arthur W. Radford, Rear Admiral, U.s.N., Acting Deputy Chief of Naval Operations (Air), and a Foreword about the pictures by Thomas Craven. The result is a spirited chronicle of the Navy in the air, a

Object ID	Title	Author	Summary
			chronicle which has caught the essence of Naval Aviation and the men in that branch of the Service. The striking illustrations are reproductions of paintings by Howard Baer, Adolf Dehn, Robert Benney, Don Freeman, Joseph Hirsch, Lawrence Beall Smith, and Georges Schreiber. (from dust jacket flap)
2016.320.014	Skyward : Man's Mastery of the Air as Shown by the Brilliant Flights of America's Leading Air Explorer.	Byrd, Richard E.	Man's mastery of the air as shown by the brilliant flights of America's leading air explorer, destined to be Rear Admiral, Richard Evelyn Byrd. It is a story of his life, his thrilling adventures, his North Pole and trans-atlantic flights, together with his plans for conquering the Antarctic by air. (paraphrased from books subtitle). Forward by RADM, William A. Moffett, USN, Chief of the Bureau of Aeronautics.
2016.321.001	Damn Few : Making the Modern SEAL Warrior	Denver, Rorke	This book accounts for how we create special warriors and how they change the modern battlefield. The story features a cast of lethal and aggressive warriors, who turn out to be amazingly dedicated and patriotic men. For the past four years, there are now 2,500 SEALs. They are the resourceful problem solvers on the modern battlefield, ideal warriors for the kinds of wars America is fighting now and into the future. This book talks about the learnings, and training of a SEAL.
2016.321.002	On Seas of Glory : Heroic Men, Great Ships, and Epic Battles of the American Navy	Lehman, John F.	A former secretary of the navy, Lehman (Command of the Seas and Making War) presents the epic story of the American navy from its origins during the American Revolution to the present. Purists looking for new details and a fresh approach will be disappointed, but Lehman did not intend to craft a definitive history of the navy. Rather, he has gleaned a variety of interesting stories of men, ships and battles and has woven a once over lightly approach to this massive subject. This is, simply put, old-fashioned

Object ID	Title	Author	Summary
			drums and trumpets military writing. Lehman knows his subject, and his folksy writing style is easy to read and comprehend. There aren't any footnotes to his no-nonsense criticism of mistakes by admirals and the strategic and tactical problems resulting from political shortsightedness in times of peace. Lehman provides concise and penetrating biographies of naval officers from well-known men like Ernest King and John Paul Jones to relative unknowns like the mid-19th century's Uriah Levy (the first Jewish naval officer to achieve prominence). In addition to brief descriptions of naval battles, Lehman includes the role of technology in the rise of American naval power. Novice readers especially will find this an appealing introduction to a rich subject. (Oct.)Forecast: Lehman's background in addition to his service, he is the founding partner of an eponymous New York banking firm, and the chairman of the Princess Grace and OpSail foundations should lend a hook for magazine coverage and even further credibility to this effort. Also look for short, respectful reviews in major newspapers. - Publishers Weekly Copyright 2001 Cahners Business Information, Inc. --This text refers to the Hardcover edition. From Booklist As a national security professional, naval aviator, Reagan's secretary of the navy, and descendant of Revolutionary War privateers, Lehman is well qualified for this chatty, popular overview of highlights of the U. S. Navy's first 200 years. Jumping from subject to subject like a grasshopper, and quite unlike a systematic historian, he emphasizes sometimes overlooked persons and weapons, such as Captain Nicholas Biddle of the

Object ID	Title	Author	Summary
			continental navy, lost with his frigate Randolph; Uriah Phillips Levy, the first Jewish flag officer and an adamant opponent of flogging; improvised ships of the Civil War and World War II, including the converted landing craft-gunboats in which Lehman's father served; as well as much of the spadework involved in creating the 600-ship Reagan-era navy. Those who dislike Lehman's ongoing historiography may give the book a pass, but many others will enjoy it, even if slightly better editing would have made it even more enjoyable. Roland Green Copyright © American Library Association. All rights reserved --This text refers to the Hardcover edition. (Source: Amazon.com)
2016.321.003	United States Navy Aircraft Since 1911	Swanborough, Gordon	Library also has 3rd ed. The core of the book describes more than 140 significant aircraft types, and each is illustrated with at least one photograph and a three-view line drawing. Also, included in the description are the squadrons that flew the plane. A section is devoted to those aircraft procured for service but of less significance, while appendices cover foreign aircraft, gliders, balloons, and airships. There is a comprehensive index. Several pages are devoted to aircraft designations, aircraft colouring (coloring) , and markings of US Naval Aircraft. Library also has 1st and 2nd editions.
2016.321.004	Sailor's Word-Book, The	Smyth, W. H.	The sailor's word-book : an alphabetical digest of nautical terms, including some more especially military and scientific, but useful to seamen, as well as archaisms of early voyagers, etc. / by the late W.H. Smyth ; revised for the press by Sir E. Belcher.
2016.321.005	Nightingale's Song, The	Timberg, Robert	This sprawling but often engrossing book takes a close look at the intersecting careers of five politically powerful

Object ID	Title	Author	Summary
			Americans haunted by the legacy of the Vietnam War. Robert McFarlane and John Poindexter served as national security advisers, with Oliver North as their aide; John McCain, having survived five years in a Vietnamese POW camp, was elected to the U.S. Senate; James Webb, acclaimed novelist (Fields of Fire), became secretary of the navy. All five rose to prominence during the Reagan administration; all five were graduates of the Naval Academy; all five were significantly affected by the war in Vietnam. Timberg presents a rounded portrait of each: McFarlane's moral rigidity in the face of Washington's situation ethics; Poindexter's colorless persona and reaction to the dynamics of Iran-Contra; North's dazzling charisma ("Holly Golightly in Marine green"); McCain's stoic courage throughout his captivity; Webb's combat heroics, his struggle to become a writer, his controversial stint in the Pentagon. Timberg is scathing in his remarks about President Reagan's competency but dilates eloquently on the significance of Reagan's public admiration of Vietnam veterans. An Annapolis graduate who served in Vietnam, Timberg is deputy bureau chief of the Baltimore Sun. Reader's Digest Condensed Books selection
2016.321.006	Illustrated History of the United States Navy, An	Hearn, Chester G.	The fascinating history of the United States Navy, written by one of the most foremost authors of the genre, is structured within three distinct sections: the Continental Period from 1775 until the 1890's, reflecting the Navy's preoccupation with the new nation's internal affairs; the Oceanic Period from the 1890's until 1945, during which America's maritime forces spearheaded the nation's international commercial and political involvement and the Transoceanic Period from the end of World War II, through

Object ID	Title	Author	Summary
			the Cold War and up to the present day, during which the Navy has effectively become the United States' first line of defense, far from its own shores.
2016.321.007	Great Ships, The : Aircraft Carriers	Markham, Monte	Take a tour of one of the sea's mightiest forces--The Aircraft Carrier. Roaming majestically through the world's oceans, the modern Aircraft Carrier is the largest warship ever to sail the seas. It's more than 1000 feet long, and 200 feet wide, and 4 acres of armored steel flight deck towering above the water. This floating city can be home, workplace, and battle station to its crews for months at a time--projecting overwhelming military force to the far corners of the earth. With nearly 90 aircraft acting as her striking force, the modern Aircraft Carrier is the most powerful and complex surface ship in nautical history.
2016.321.008	SEAL Team Six : Memoirs of an Elite Navy Seal Sniper	Wasdin, Howard E.	SEAL Team Six is a secret unit tasked with counterterrorism, hostage rescue, and counterinsurgency. In this dramatic, behind-the-scenes chronicle, Howard E. Wasdin takes readers deep inside the world of Navy SEALs and Special Forces snipers, beginning with the grueling selection process of Basic Underwater Demolition/SEAL (BUD/S)--the toughest and longest military training in the world.
2016.321.009	Cradle, The : Naval Air Station Pensacola	Delaney, Michelle M. (ed.)	A commemorative history of the Naval Air Station at Pensacola, FL upon the 75th anniversary of the air station in 1989.
2016.321.011	Vietnam Air War	International Masters Publishers	Find out how the US entered the conflict in Southeast Asia and how US tacticians planned to bring the war to a swift end through sustained bombing campaigns. follow the large-scale use of helicopters for the first time in combat, functioning as troop transports, flying gunships and rescue aircrafat. Understand the role of the "Huey," the workhorse of the war in Vietnam. On this

Object ID	Title	Author	Summary
			DVD, discover the wide variety of aircraft employed in Vietnam, ranging from MiG-killing Phantom fighters to "Jolly Green Giant" helicopters, used for rescuing aircrew in hostile territory while under enemy fire.
2016.321.012	War Planes of World War II	Land, Stephen	World War II spurred the production of over 300,000 war planes--more than the previous 40 years combined--and transformed the American aviation industry into a high-tech giant. The History Channel presents a rare glimpse into some of the greatest fighters ever produced, touring such planes as the C-47 Transport (the "Goony Bird"), the rugged B-17 Flying Fortress, and the B-24 Liberator, mass-produced by Ford on the world's longest assembly line. Take a rare glimpse inside the P-51 Mustang --the largest prop-driven fighter--and witness the scrappy Grumman Iron Works' Wildcats and Hellcats leap from U.S. aircraft carriers to attack the Japanese air force. Modern shots of restored aircrafts, historic footage ranging from factory floors to mile-high battles, and extensive interviews with pilots and designers capture the aviation industry's finest hour.
2016.321.013	Vengeance at Midway and Guadalcanal	Shanle, Leland C.	Vengeance at Midway and Guadalcanal is a novel of World War II. It explodes in the face of the reader, from the cockpits of fighter aircraft. Written by a retired Naval Aviator, Vengeance puts the reader in the F-4F Wildcat, as warriors engage in a titanic struggle around the globe.
2016.321.014	Strike Force : Test Pilot	Madacy Entertainment Group	This is part 1 of a five part series: 1) Flight Deck, 2) SR-71 Blackbird, 3) Air battle, 4) Hot flying, 5) Test pilot. We currently have Flight Deck and Test Pilot. Test Pilot is a thrilling, comprehensive view of one of the most demanding jobs in all of aviation. Meet and fly with the world's top aircraft-men

Object ID	Title	Author	Summary
			like Scott Crossfield, Kurt Schroeder, Guy Mitaux-Maurouard, Steve Ishmael, and Heinz Frick. They've all accepted the calculated risks in answering the ultimate question...."Will It Fly?" Covers test pilots for military jets, rotary wing aircraft, and commercial transports. See the development of flight-testing from the Wright Flyer to the Spirit of St. Louis to the Rafale and ATK. Stop in for gut-wrenching "spin tests" at the USAF Test Pilot School. Spend "a day in the life of a test pilot" and experience envelope expansion tests from the cockpit of the F-14 Tomcat. Plus an exclusive on-camera interview with one of the Soviet Union's best test pilots. See his spectacular flight of the MiG-29 Fulcrum at the 1988 Farnborough Air Show--including breathtaking maneuvers not often attempted in a jet aircraft.
2016.321.015	Picture History of the U.S. Navy : From Old Navy to New, 1776-1897	Roscoe, Theodore	From sailing ships of colonial days to steel ships of the "new Navy" in the 1890's; sailors, living conditions, weapons, ammunition, tactics, strategy, leadership; this pictorial account tells the story of the United States Navy with minimal text.
2016.321.017	Hellcats : A Novel of War in the Pacific	Tillman, Barrett	This book is the sequel to Tillman's Dauntless novel. It is set in 1944-45 when the war has been carried to Japan's doorstep. The book follows LCDR Phil Rogers, a naval aviator whose previous battle experiences included Midway and Guadalcanal. Hellcats examines both American and Japanese pilots in this novel.
2016.321.018	Modern Military Aircraft : The World's Fighting Aircraft : 1945 to the Present Day	Winchester, Jim (ed)	Features more than 220 military aircraft, each covered in detail with feature boxes outlining development, technical specifications, performance data, and variants. Contents: Introduction-- Aermacchi-- Aero-- Ae'rospatiale (Westland) -- Aerospatiale (SOCATA)-- Agusta (SIAI-Marchetti)

			possible, the Phantom in its most recent service during the present decade, with most having been taken during the past two or three years."
2016.321.024	Big E : The Story of the USS Enterprise	Stafford, Edward Peary	The Big E is the heroic sage of the greatest and best loved, fighting ship in History, the USS Enterprise (CV 6).
2016.321.025	United States Military Aviation Directory, The	Kaminski, Tom	The most complete and up-to-date work of its kind, profiling the aviation assets and organization all five US air arms: US Air Force, US Navy, US Marine Corps, US Army and US Coast Guard. For each service there are extensive and detailed sections covering: Every warplane in current military service, complete with specifications, missions and weapon loads; Every command, wing and serving unit ; Every active-duty and reserve air base; Every aircraft carrier and amphibious vessel. Superbly illustrated throughout with magnificent full-page color artworks, highly accurate 3-view drawings, patches, insignia, and hundreds of color photos. (from Amazon.com)
2016.321.027	Corsairs and Flattops : Marine Carrier Air Warfare, 1944-1945	Condon, John Pomeroy	When Marine aviation squadrons were assigned carrier duty in 1944, they lacked the opportunity be properly trained and equipped for carrier operations. "Essentially no deck time was allotted to Marine aviators going through flight training, and little after they reached the operational forces. This lack of basic carrier training coupled with the urgency of the situation and, in some part, due to the Corsairs carrier suitability, resulted in tragic loss of life and equipment. Most of those losses were operational, not combat.. Not only were the Marines lacking in carrier experience, they were also weak in navigation and instrument flying skills. Throw in some bad weather, and you have all the ingredients for a disaster." From the Foreward. The

Object ID	Title	Author	Summary
			Marines were pressed into service because at this stage in the Pacific War, there were fewer closeby islands to serve as bases for the Marine aviators to provide close in air support for Marine land based units and the increased use of kamikaze pilots required an increased need for pilots and planes to fly Combat Air Patrols (CAPs) over the carrier groups. The USMC pilots participated in Iwo Jima, Okinawa, Indochina, the Philipines and Tokyo. The book includes never-before-published photographs and recollections of the pilots involved.
2016.321.028	Forged in Steel : U.S. Marine Corps Aviation	Heatley, C. J.	Forged in Steel: U.S. Marine Corps Aviation by pilot, photographer and author C. J. Heatley III who photographed a modern inventory of Marine aircraft. Color, Black & White photographs of the F-18 fighter, the A-4 Skyhawk to the AV-88 Harrier archiving the proud 75-year Marine aviation heritage. Introduction by Senator John Glenn, Marine Corps pilot in WWII, Korea as well as the first American to orbit the earth.
2016.321.030	Second-luckiest Pilot, The : Adventures in Military Aviation	Tooker, D. K.	Each of the book's chapters tells a different adventure where the military pilot was fortunate enough to live to tell the tale. Tooker knew all of the pilots in these tales, except for the pilot where he was part of the search team looking for the downed aviator. He admits that some of the dialogue is contrived to express the emotions at the time. Some of the pilots star in more than one chapter. Many of the stories take place during World War II and Korea. The title chapter features Tooker's bailout after his Crusader catches on fire during a mid-flight refueling. He lands in the ocean and is saved the next day by a destroyer captain who was not even looking for him.
2016.321.031	Bent Wings : F4U Corsair Action and Accidents	Blechman, Fred	You are in an F4U Corsair, turning toward the carrier and preparing all the controls for a night carrier landing. You are dive-bombing the Japanese

Object ID	Title	Author	Summary
			battleship Yamato. You are in combat and watch your best friend get shot down...43 "tales of trial and terror" by 10 pilots who lived to tell about them!
2016.321.032	John Paul Jones : Sailor, Hero, Father of the American Navy	Thomas, Evan	The New York Times bestseller from master biographer Evan Thomas brings to life the tumultuous story of the father of the American Navy. John Paul Jones, at sea and in the heat of the battle, was the great American hero of the Age of Sail. He was to history what Patrick O'Brian's Jack Aubrey and C.S. Forester's Horatio Hornblower are to fiction. Ruthless, indomitable, clever; he vowed to sail, as he put it, "in harm's way." Evan Thomas's minute-by-minute re-creation of the bloodbath between Jones's Bonhomme Richard and the British man-of-war Serapis off the coast of England on an autumn night in 1779 is as gripping a sea battle as can be found in any novel. Drawing on Jones's correspondence with some of the most significant figures of the American Revolution—John Adams, Benjamin Franklin, Thomas Jefferson—Thomas's biography teaches us that it took fighters as well as thinkers, men driven by dreams of personal glory as well as high-minded principle, to break free of the past and start a new world. Jones's spirit was classically American. (from Amazon.com)
2016.321.033	Joint Strike Fighter Boeing X-32 vs Lockheed Martin X-35	Sweetman, Bill	Covers the history leading up to the JSF program, gives detailed descriptions of all versions of each design, and explains the problems and challenges encountered by the competing companies. Color photography and artistic renditions include: JSF tests and evaluations, inside the factory and on the assembly line, cockpit and weapon details, full design coverage of each variant.
2016.321.034	Pilot's Handbook of Flight	Chief of the Bureau of	Predecessor of the Navy's

Object ID	Title	Author	Summary
	Operating Instructions Navy Model F4U-4 Airplane	Aeronautics	NATOPS series of manuals to standardize procedures to improve combat readiness and achieve substantial reduction in the aircraft accident rate. This book was reprinted from original manual with the permission of the U.S. government and details procedures for the Vought F4U4 Corsair aircraft.
2016.321.035	Gulf Air War 1991	Chant, Christopher	This is an abridged edition of Air War in the Gulf, 1991, by Christopher Chant, 2001, Osprey Combat Aircraft, no. 27. In August 1990 Saddam Hussein's Iraqi forces invaded and occupied the small Arab state of Kuwait. This book analyses the ensuing Gulf War (16 January - 28 February 1991) - a war fought to expel Iraq and restore Kuwaiti independence if not, as one British MP tartly observed, to defend democracy. The allies under General Schwarzkopf launched five weeks of air attacks, deploying 1,800 technologically highly advanced aircraft from the US, British, French and Saudi air forces. Many of these machines, including the British Tornados and US F-117A Stealth fighters, had never before engaged in combat, and their combined assault, watched by millions on TV, combined impressive accuracy with firepower to which the Iraqi forces had no answer. Contents * Iraq's invasion of Kuwait * UN Coalition and pre-war developments * High-tech Air War * Analysis * Aftermath Paperback; September 2001; 96 pages; ISBN: 9781841762951 (from ospreypublishing.com)
2016.321.036	Carrier War : Task Force 58 and the Pacific Sea Battles	Jensen, Oliver	The story of Task Force 58 in the carrier war in the Pacific during World War II.
2016.321.037	Fighting Corsairs	O'Leary, Michael	Big, fast and well armed, the Corsair was to retain its basic

2016.321.039	United States Naval Academy	Dry, Dan	The glorious story of the United States Naval Academy can be read in countless books of history and many works of fiction -- but not until now can one see in such colorful detail the life of the Academy... the classroom work, the physical and mental demands of a midshipman's year, the sailing training, athletic competitions, the beauty of Annapolis, the traditions, the history, the sheer beauty of the Academy grounds. The challenge to nationally acclaimed photographer Dan Dry was to capture on film the particulars of Academy life and also the moods, the essences, the timelessness of the Academy experience. The pictures in this book will tell you just such a story, and will tell it better than words can express. (from dust jacket flap) Dry, Dan (photographer)
2016.321.040	United States Naval Aviation Patches : Aircraft, Attack Squadrons, Helicopter Squadrons	Roberts, Michael L.	A new multi-volume series covering United States Naval patches from World War II to the present - each volume contains over 1000 patches in full color. 2016.321.043	Testing Top Guns : United States Air Force and Navy Test and Evaluation Squadrons	Hunter, Jamie	From the Intro: "The test teams today are following in the footsteps of yesterday's pioneers of aviation. Every mission is valued and every test point need to be achieved safely and efficiently to meet operational requirements. The way this is achieved is constantly evolving to best meet requirements. It makes for an exciting and exhilarating ride with America's "Testing Top Guns." "The USAF test bases at Edwards and Eglin fly a host of interesting aircraft types and test them to the limit. At Nellis, the unique attributes of the ranges here are pivotal to evaluating and developing new operational doctrines. The US Navy test bases at Patuxent River, China Lake, and Point Magu do very much the same. Testing new weapons, introducing new capabilities, and honing current and future systems."
2016.321.044	McDonnell F-4 Phantom, The	Dorr, Robert F.	(from back cover:) The definitive work on the design, development, and combat use of the famous McDonnell F-4 Phantom. The F-4 Phantom was the biggest, fastest, most expensive and - some say - ugliest fighter of its time. During the 1960s, when still in its youth, the Phantom set more speed and altitude records than any other aircraft-it was the standard against which every other jet fighter was measured. Now, Robert Dorr has assembled the whole story of the F-4, complete with dozens of detailed photographs of actual jets and many personal interviews with Phantom pilots. The author follows the F-4 through three decades of service, tracing the origins, development, and use of this remarkable airplane. He covers the jet's early designs and flight tests and recounts its distinguished service with the

Object ID	Title	Author	Summary
			U.S. Marine Corps, Air Force, Navy, and Air National Guard. You'll read of the fighter's multiple roles in the Vietnam War-originally conceived strictly as a ground-attack plane, the F-4 evolved into an excellent fleet defense interceptor and tactical reconnaissance craft. Dorr even interviews Brigadier General Robin Olds, the man who planned and led the wildly successful Operation Bolo in 1967. The Phantom remains in service with the U.S. Air Force Reserve, Air National Guard, and the air forces of twelve other nations. Dorr takes an indepth [sic] look at these modern Phantoms-including the super-secret F-4ES "Peace Jack"-with first-hand accounts from Iran, Korea, and Japan. In the appendices you'll find a comprehensive list of every unit to operate the F-4. The F-4 Phantom was an important aircraft-far ahead of its time and essential to its era. This definitive book is a must for serious aviation enthusiasts, and for every Phantom crewmember-past and present-around the world. Robert Dorr is a career diplomat currently working as an intelligence analyst in Washington D.C. He has written twelve books and numerous magazine articles, primarily on USAF aircraft (the F-4 being his favorite).

2016.321.045	Vietnam : The War in the Air	Francillon, René J.	Contains the history of the Vietnam air war from 1945 to 1975 with a focus on the 1960s-1975. Has information on the air forces of countries such as North Vietnam, South Vietnam, France, United States, Australia, and others. Also has sections on abbreviations, project and operation code names, aircraft losses by various causes, and aircraft

2016.325.002	If by Sea : The Forging of the American Navy-- From the American Revolution to the War of 1812	Daughan, George C.	When the American colonies took up arms against Great Britain, they were confronting the greatest sea power of the age. The American navy was born during this cataclysmic encounter, although the fledgling Continental fleet was too weak to significantly contribute to the war effort. But the navy's successes and failures during the Revolution were fundamental to its development, and the Founding Fathers fought strenuously in the decades that followed over the opportunities and dangers of a deep-water fleet. The debate ended only when the Federal navy proved indispensable during the War of 1812, establishing America as a major naval power. In this book, historian George C. Daughan draws on decades of research to brilliantly chronicle the embattled origins of the united States Navy, charting the course by which the Navy became an essential and celebrated American institution. Contents: Whaleboats and Men-of-War -- Launching the Continental Navy -- -- Battles in Charleston, New York, and New Jersey -- Saratoga and Philadelphia -- The French Alliance -- Denouement -- A New Republic -- Washington and the Federal Navy -- John Adams builds a navy -- The quasi-war with France -- The navy under Jefferson -- Peaceful coercion -- War clouds -- The navy surprises -- The navy established.

2016.325.004	Reincarnation of John Paul Jones, The : The Navy Discovers Its Professional Roots.	Bradford, James C.	From the Preface: "This study is an outgrowth of a project undertaken in 1979 to collect and edit copies of all extant John Paul Jones papers. Since Jones is one of America's great heroes, his letters have been avidly sought by collectors and many are no longer accessible to researchers. One way to trace the existence of such documents is to consult early biographies whose authors made use of Jones's letters before they dropped from sight. In doing so, I was impressed by the variation in the views of Jones presented by different authors. These inconsistencies do not simply reflect the passage of time, the availability of new source materials, or the development of new perspectives as the discipline of history matured--though these factors are certainly involved. Equally, if not more important, was the motivation of many authors who, writing with a purpose, sought lessons from Jones's life or sought to use him to support various programs or instill certain qualities in their readers. These shifts in characterizing Jones and the uses made of him are the focus of this study."
2016.326.002	Yellow Admiral, The	O'Brian, Patrick	This is a sequel to O'Brian's book "The Commodore." The novel is set in 1814; with the coming of peace and for several other reasons Aubrey's future at the admiralty dim, Aubrey fears being "yellowed"==nominally promoted to the rank of admiral without a squadron to command. But no sooner has his fellow adventure Dr. Stephen Maturin turned up

Object ID	Title	Author	Summary
			with a prospective mission than Aubrey receives an urgent dispatch ordering him to Gibraltar: Napoleon has escaped from Elba.
2016.326.003	Ships of the Civil War, 1861-1865 : An Illustrated Guide to the Fighting Vessels of the Union and the Confederacy	Dougherty, Kevin	Provides concise coverage of some of the most famous ships of the Civil War era. Includes 120 artworks. Also background information and specifications.
2016.327.001	Celestial for the Cruising Navigator	Turner, Merle B.	Book was written to provide more information than a navigation primer and less information than the traditional references such as Dutton and Bowditch. The author wanted to give the student an understanding of the relation of celestial to terrestrial position. This book acknowledges that the use of the hand calculator today makes it possible to "compute altitude and azimuths as readily as they can be obtained from the volumes of sight reduction tables. Furthermore, once the basic operations are mastered, the calculator offers convenience, precision, and generality not to be found in any of the rituals of tabular solutions."
2016.328.001	Pacific Crucible : War at Sea in the Pacific, 1941-1942	Toll, Ian W.	The planning, the strategy, the sacrifices and heroics—on both sides - illuminating the greatest naval war in history. On the first Sunday in December 1941, an armada of Japanese warplanes appeared suddenly over Pearl Harbor, Hawaii, and devastated the U.S. Pacific Fleet. Six months later, in a sea fight north of the tiny atoll of Midway, four Japanese aircraft carriers were sent into the abyss. Pacific Crucible tells the epic tale of these first searing months of the Pacific war, when the U.S. Navy shook off the worst defeat in American military history and seized the strategic initiative. Ian W. Toll's dramatic narrative encompasses both the high command and the "sailor's-eye" view from the lower deck. Relying predominantly on eyewitness accounts and primary sources, Pacific Crucible also spotlights

Object ID	Title	Author	Summary
			recent scholarship that has revised our understanding of the conflict, including the Japanese decision to provoke a war that few in the country's highest circles thought they could win. The result is a page-turning history that does justice to the breadth and depth of a tremendous subject. 24 pages of black-and-white illustrations and 12 maps Publication Date: November 14, 2011. 2016.329.001	Jane's All the World's Aircraft - 1955-56	Bridgman, Leonard (ed)	Jane's All the World's Aircraft is an aviation annual publication founded by Fred T. Jane in 1909. It is published by Jane's Information Group. Jane's All the World's Aircraft has chronicled a century of ever-accelerating aviation progress and recorded the particulars of an unprecedented number of flying machines, using the widest possible interpretation of that phrase, in the most minute detail. Six editors have had the privilege of commenting upon the significant aircraft and events of manned flight since the first edition appeared in November 1909 as All the World's Airships (which was then a generic term for any machine that flew). This first publication was seen as being

Object ID	Title	Author	Summary
			ahead of its time but even the skeletal book showed the strength of Fred T Jane's standardised approach to data collection. The first edition even carried a pre-addressed return proforma for aviation pioneers to supply the details of new machines. Besides listing the different types of aircraft by nationality, the first issues covered aerial societies, journals and flying grounds and cost just 21 shillings (£1.05). Jane himself had a desire to fly and he was nearly killed doing so in 1909 whilst attempting a flight on Dartmoor. His aircraft caught fire, but he merely commented that it would be one less machine to include in his forthcoming work. As with Jane's Fighting Ships, Jane received extensive help from enthusiasts worldwide, including Louis Blériot, A.V. Roe and Prince Heinrich of Prussia. Jane censored the 1914 issue, which was published just after the outbreak of the First World War, blacking out whole sections describing British equipment and organisation. He noted in it that, for all practical purposes, aircraft have no more to do with peace than submarines. The work's accuracy helped morale by dispelling alarmist rumours about imminent German air raids, showing that the Germans did not possess anything but the smallest fleet of airships. Respect for the accuracy of Jane's All the World's Aircraft transcended political enmities. Cold War notwithstanding, Soviet authorities supplied Jane's with information. Such was the technical reference book's reputation that Argentina even provided details of its aircraft during the Falkland's Conflict in 1982. Altogether, there have been only 97 editions, mainly due to disruptions during the two World Wars.

2016.329.002	Triple Sticks : Tales of a Few Young Men in the 1960s	Fipp, Bernard	The true story of four young men who would become the pointy end of the stick in aerial battles over North Vietnam, the most heavily defended patch of real estate in the history of aerial warfare. They were to do this in 1967, the year in which Naval Aviation experienced its greatest losses. These four young men, now Lieutenants Junior Grade, United States Navy, were ordered to Attack Squadron 34 to fly A4 Skyhawks into combat. They were assigned Junior Officer's stateroom 0111 aboard USS Intrepid, a venerable aircraft carrier with a distinguished history. This "bunkroom" better known to them as Triple Sticks was the repository for a log (in navy terms) or journal written by these four young aviators. Forty years later this log was the genesis of this memoir. In the lethal environment over the northern reaches of North Vietnam or ashore in the Officer's clubs and bars of Asia, the writing brings to life wonderful humor, bizarre behavior, vivid aerial battles, uncommon loyalty, anger, frustration and respect. One survived or did not according to his skill and luck. (from Amazon.com)
2016.329.003	Tailhooker : Pre-Flight to Vietnam	Dellicker, Willard G.	Tailhooker refers to a military pilot who has landed on an aircraft carrier using a tail hook to catch the arresting wire on the flight deck. Tailhookers who wear the US Navy Wings of Gold are renowned as the most skilled pilots in the Aviation community. This book tells the story of a twenty year-old drafted into military service during the Vietnam War, then applying to enter US Navy pilot training. His historically accurate story begins with highlights of his Navy flight training to his assignment as

Object ID	Title	Author	Summary
			an A-4 Skyhawk pilot in VA-22 The Fighting Redcocks. The book chronicles facts about the frustrating air war in Vietnam from 1968 to 1970 through Lt. Dellicker's three tours as an Attack pilot and LSO. Intertwined with the war stories and close calls is a love story of two young people who met, became engaged in two weeks, and endured 18 months of war-time separation. Now, after 45 years of marriage this story was written for their kids and grandkids as an accurate historical account of the Vietnam War. Dellicker served on the USS Ranger and the USS Bon Homme Richard. Copy from Amazon.
2016.329.004	Come Fly With Me : Recollections of a Marine Fighter Pilot	Kane, Tom	The author recounts his experiences as a Marine Fighter pilot who flew combat missions in Vietnam with VMA-225.

2016.332.001	Aftermath, The : Europe	Botting, Douglas	Description of what happened in Europe after World War II ended.
2016.332.002	Aftermath, The : Asia	Osborne, Charles	Description of what happened in Asia after World War II ended.
2016.333.001	Brief Chronology of the Chaplain Corps United States Navy, A	Gilroy, William F. R.	From Foreward: This book strives to achieve the study of history with the principal movements, events, and personalities placed in chronological sequence. Chaplains Gilroy and Demy begun with the Continental Navy and it his hopes this brief work will enable Navy chaplains and others to view in miniscule form the general course of Chaplain Corps history and encourage them to read further in special areas of interest or to do expansive study in the general history of the Corps. As Navy chaplains there is great heritage, this increased knowledge of that heritage should make them better chaplains.
2016.334.001	Attack on Pearl Harbor, The : An Interactive History Adventure	Lassieur, Allison	Describes the attack on Pearl Harbor on December 7, 1941, as Japanese forces surprised Americans at the U.S. military base, and explains the significance of the attack today. The reader's choices reveal the historical details from the perspective of a Japanese pilot, a U.S. sailor, and an American nurse.
2016.334.002	Poems from Da Nang : Recollections of a Combat Chaplain	Carroll, Vincent W.	From the foreword: "This preface reads like the opening chapter of the Gospel of Matthew. While there is no similarity intended, the history and context of my association

Object ID	Title	Author	Summary
			as Command Chaplain/FLC (Force Logistics Command, Fleet Marine Force, Pacific) has been established. The following poems and pictures reflect this extremely important period in my life and the miraculous contributions and foreword sacrifices that thousands of Marines made during their service while attached to Force Logistics Command. I never kept a diary during my tour at FLC. I did however, take many pictures as a record and memory of what happened on an almost daily basis while serving as a chaplain to those units. These pictures served as an instant reminder of what occurred, who was involved and what happened, as I have attempted to portray in the following poems."
2016.334.003	Thirteen Desperate Hours : A Liberty Ship's Crew and Their Navy Armed Guard Fight for Survival While Grounded on a Japanese-Held Island	Johnson, Marill	Thirteen Desperate Hours tells about story of a Liberty ship crewed by Merchant Marines, with a Navy Armed Guard, that runs aground while participating in the Philipines Campaign in 1945. Although a work of fiction, it is based upon incidents that happened to other Liberty Ships during the campaign. It is one of the few World War II books to intimately portray how the crew of a Liberty Ship interacted with it's Navy Armed Guard, as well as show what it was like to transport volatile materials in a combat zone. As the author tells us in the foreword, "Of the 2,710 slow, plodding Liberty ships built during the war, 174 were sunk by enemy action. An additional 72 were hit by Japanese Kamikaze plane, torpedoed, or other wise battled damaged, but were able to say afloat and deliver their cargoes--as was the ship in this story, the Albert A. Robinson."
2016.335..043	Instructions for the Operation and Maintenance of Main Propelling Machinery, Section II - Diesel Engines	United States Navy Department Bureau of Ships	Diesel Engines, General, Operation, Operating Limitations, Submarine Propelling Plants, Maintenance, Rust Prevention, Diesel Fuel Oil, Diesel Engine Lubricating Oils, Filters and Strainers, Cooling Water Systems,

Object ID	Title	Author	Summary
			Spare Parts and Allowance Lists, Records, Safety
2016.335.001	Motor Machinist's Mate 3c and 2c, Vol. 2	Bureau of Naval Personnel	For use by enlisted men preparing for advancement to the ratings of Motor Machinist's Mate third class and second class. Information on distilling plants and refrigeration plants concluding with piping and valves, firefighting and damage control.
2016.335.002	Motor Machinist's Mate 3c and 2c, Vol. 1	Bureau of Naval Personnel	For use by enlisted men preparing for advancement to the ratings of Motor Machinist's Mate third class and second class. Beginning with an explanation of the general principles which are basic in the operation of internal combustion engines, this course describes the carburetion and ignition systems of gasoline engines and the general construction of Diesel engines. It continues with separate chapters on the different engine systems--lubrication, cooling, intake and exhaust, fuel and governing.
2016.335.003	Basic Electricity	Bureau of Naval Personnel	This book is intended as a basic reference for all enlisted men in the Navy whose duties require them to have a knowledge of the fundamentals of electricity. Beginning with a broad picture of the electrical constituents of matter, the book proceeds with a discussion of static electricity, electricity in motion, and electrical circuits. It explains the uses of Ohm's Law, and the Power Equation, and makes applications of formulas involving Kirchoff's Laws (also spelled Kirchhoff's).
2016.335.004	Watch Officer's Manual - 1917	Hovey, C. E.	1917 edition of old standard. "This volume is the result of an endeavor to collect and put in a compact form those details appertaining to deck duty which will be found necessary or convenient to an officer carrying on a watch. While every line officer in the service is cognizant of most of the details, it is because they are so nearly infinite in number as to be easily forgotten that an attempt to compile them was begun."

Object ID	Title	Author	Summary
2016.335.005	Basic Electricity	Bureau of Naval Personnel	This book is intended as a basic reference for all enlisted men in the Navy whose duties require them to have a knowledge of the fundamentals of electricity. Beginning with a broad picture of the electrical constituents of matter, the book proceeds with a discussion of static electricity, electricity in motion, and electrical circuits. It explains the uses of Ohm's Law, and the Power Equation, and makes applications of formulas involving Kirchoff's Laws (also spelled Kirchhoff's).
2016.335.006	Confidential Instruction for Installation and Initial Operation of Griscom-Russell Navy Type Low Pressure Distilling Plants	Griscom-Russell Company	From the introduction: The purpose of these instructions is to assist shipyard men in properly installing, testing and initially operating the GRISCOM-RUSSELL NAVY TYPE LOW PRESSURE DISTILLING PLANT. It is essential that the installing engineer study carefully the applicable Griscom-Russell External and Diagrammatic Arrangement Plans for the specific plant being installed. Other detailed operating instructions are furnished the vessel for use by the ship's personnel.
2016.335.007	Boatswain's Mate 2/C	Bureau of Naval Personnel	This book is written as an aid in preparation for promotion from Coxswain to Boatswain Mate 2c. It is one of the series of NAVY TRAINING COURSES designed to give enlisted men the background information necessary to perform their duties...Beginning with an explanation of your duties as Boatswain's Mate of the watch, this course gives you helpful information on handling landing craft and whaleboats in surf and on the equipping and provisioning of, as well as hoisting and lowering of, the ship's boats. It continues with advanced information on deck seamanship and the use of the boatswain's call and concludes with pertinent information on the duties of a gun crew.
2016.335.009	Bureau of Ships Manual, Chapter 48 : Piping	Bureau of Ships	Description and instructions for piping maintenance, Piping Systems, general care of

			systems, leaks, salt water systems, materials.
2016.335.010	Bureau of Ships Manual, Chapter 55 : Fuel Oil Stowage and Equipment	Bureau of Ships	Description and instructions for Fuel Oil Stowage and Equipment. Covers petroleum, petroleum properties, safety precautions for handling, fuel oil stowage (tank characteristics, inspection / cleaning, operation, care and repair.
2016.335.011	Bureau of Ships Manual, Chapter 51 : Boilers	Bureau of Ships	Contents: 1) Combustion as applied to a naval boiler 2) Boiler definitions 3) Water tube boilers--Maintenance 4) Fire tube boilers 5) Oil burners and boiler accessories 6) Operation and Safety precautions 7) Auxiliary steam boilers
2016.335.012	Bureau of Ships Manual, Chapter 56 : Boiler Feed Water and Feed Water Apparatus	Bureau of Ships	Contents: Section 1 - Treatment of Boiler Feed Water and Boiler Water Section 2 - Feed Water Systems and Apparatus
2016.335.013	Ship Activation Training Course : Boilers	San Diego Group Pacific Reserve Fleet	The purpose of this manual is to provide instruction in ship Activation techniques and procedures applicable to vessels of the Reserve Fleet.
2016.335.014	Electrician's Mate 3c	Bureau of Navigation	Progress Tests and Examination Questions with Answers to be used with Instructions for use in Preparation for advancement in the Rating of Electrician's Mate 3c.
2016.335.015	Moorings and Appliances	Bureau of Ships	Descriptions and operating instructings for ship anchors, windlasses and associated ground tackle.
2016.335.016	Fireman 1c, Assignments 1-2 : Coal-fired Boilers	Bureau of Navigation	Part of a course of instructions and exercises in 25 assignments for Fireman 2c personnel in preparation for advancement to the rating of Fireman 1c. These lessons concern coal-fired boilers.
2016.335.017	Fireman 1c, Assignments 3-7 : Oil-fired Boilers	Bureau of Navigation	Part of a course of instructions and exercises in 25 assignments for Fireman 2c personnel in preparation for advancement to the rating of Fireman 1c. These lessons concern oil-fired boilers.
2016.335.018	Fireman 1c, Assignments 8-	Bureau of Navigation	Part of a course of

Object ID	Title	Author	Summary
	10 : Feeding Boilers, Boiler Safety Precautions, Fuels and Fuel Safety Precautions		instructions and exercises in 25 assignments for Fireman 2c personnel in preparation for advancement to the rating of Fireman 1c. These lessons concern feeding boilers, boiler safety precautions, and fuels and fuel safety precautions.
2016.335.019	Fireman 1c, Assignments 17-19 : Bureau of Navigation Lubrication		Part of a course of instructions and exercises in 25 assignments for Fireman 2c personnel in preparation for advancement to the rating of Fireman 1c. These lessons concern Lubrication.
2016.335.020	Fireman 1c, Assignments 20-24 : Bureau of Navigation Organization		Part of a course of instructions and exercises in 25 assignments for Fireman 2c personnel in preparation for advancement to the rating of Fireman 1c. These lessons concern Organization.
2016.335.021	Fireman 2c, Assignments 1-10 : Bureau of Navigation Boilers, Reciprocating Steam Engines, Pumps, Turbines, Blowers, Auxiliaries, Valves, and Piping		Any sailor seeking advancement in the Navy must be a good man -of-war's-man. He must also have technical knowledge. "This course for firemen, second class, deals only with technical subjects, the construction and operating principles and precautions of the various machinery, etc, found in the engineering department on board ship. A thorough knowledge of these subjects must be had by anyone who desire to hold a position of responsibility in this department."
2016.335.022	Fireman 2c, Assignments 11-12 : Bureau of Navigation Gasoline Engines - Diesel Engines		Any sailor seeking advancement in the Navy must be a good man -of-war's-man. He must also have technical knowledge. This volume focuses on the gasoline and diesel engines.
2016.335.023	Fireman 2c, Assignments 13-20 : Bureau of Navigation Operation of Coal-Burning and Oil-Burning Boilers-- Precautions and Casualties-- Characteristics of Fuel Oil-- Feeding Boilers		Any sailor seeking advancement in the Navy must be a good man -of-war's-man. He must also have technical knowledge. This volume focuses on the gasoline and diesel engines.
2016.335.024	Navy Training Courses : A to N : Bureau of Navigation Assignments 1-4 A to D		These subjects provide information that will be required for advancement in ratings in these subjects. Subject A is Duty in the Navy. Subject B is What the Navy Offers. The importance of being first, a man-of-war's man,

Object ID	Title	Author	Summary
			and second, a specialist; the various service schools ashore and the qualifications necessary to gain admittance.... Subject C is Enlistment in General; Apprentice Seaman, various types of discharge; liberty.... Subject D are the Paytables and Allowances. Each section includes questions at the end of the section.
2016.335.025	Navy Training Courses : A to N : Bureau of Navigation Assignments 5-7 E to G		These subjects provide information that will be required for advancement in ratings in these subjects. Section E Naval Customs and the Navy's relation to the government. Section F covers general characteristics of ships of the Navy. Section G covers general features of ship of the Navy of different classes. Each section includes questions at the end of the section.
2016.335.026	Navy Training Courses : A to N : Bureau of Navigation Assignments 8-10 H to J		These subjects provide information that will be required for advancement in ratings in these subjects. Section H covers routine in port and at sea, bright work; sick call; setting up; musters and inspections; messes, etc. Section I includes aim and object of all drills, etc. Section J covers marking clothes; uniform and regulations relating thereto; lashing hammocks; stowing bags and laying them out for inspection; airing bedding; stopping on wash clothes; bags, hammocks; requisitions for clothing; care of clothing; issue of fresh water. Each section includes questions at the end of the section.
2016.335.027	Navy Training Courses : A to N : Bureau of Navigation Gas Data		These subjects provide information that will be required for advancement in ratings in these subjects. Assignment 15 covers Gas Warfare; Gas Masks; Breathing Apparatus (rescue and protective). Each section includes questions at the end of the section.
2016.335.028	Navy Training Courses : A to N : Bureau of Navigation Assignments 13-14 M to N		These subjects provide information that will be required for advancement in ratings in these subjects. Subject M covers swimming;

Object ID	Title	Author	Summary
			restoring the apparently drowned; life buoys; how the buoys should be dropped where and when. Subject N covers athletics. Each section includes questions at the end of the section.

Object ID	Title	Author	Summary
			technical characteristics of American warplanes and their weapons, and he also looks at strategy and tactics, organization and deployment of the US Air Force and the air arms of the navy, marine corps, and Army. This books is illustrated with numerous outstanding photographs, many of them in full color, plus detailed cutaway artworks. The pictures are complemented by an informative and lively text.
2016.336.002	Kamikaze Nightmare, The : Terror of the Lambs	Sholin, Bill	The first edition of this book was published in 1994 under the title: The Sacrificial Lambs. This edition is almost double the size of the first. We have both. The first edition is 2007.324.001. This is a true story. The USS Wren, DD568, was a survivor. This book tells about destroyer life as it was -- told by the people who lived it. Their individual duties, the guns, munitions, handling rooms, torpedoes, depth charges, fire and engine rooms, the bridge, how they worked, and who performed each job. The author's full name is William (Bill) C. Sholin. The full title of the book is The Kamikaze Nightmare : Terror of the Lambs : Okinawa Picket Destroyers -- The Most Exciting Story Ever Told! at Okinawa Alone--80%--122--Fell Victim to Kamikazes.
2016.336.003	Flight Jacket, The : Classes, Cadets Pensacola 144-165 and 4A-41-P - 5C-41-P and Cadets Jacksonville 12A-40-J and 1A-41-J - 5C-41-J, 1941	Phillips, Gail G. (ed)	Commemorative annual featuring the NAS Pensacola and NAS Jacksonville flight training of Pensacola Cadet Classes: 144-165, and classes 4A-41-P (C), thru 5C-41-P (C), and Jacksonville Cadet Classes: 12A-40-J, and 1A-41-J, thru 5C-41-J. In addition to pictures of the cadets, there are descriptions of the various phases of flight training including numerous photographs. Includes photos of cadet activities in Miami where they went for advanced carrier training.
2016.337.001	North SAR : A ovel of Navy CombatPilots in Vietnam	Carroll, Gerry	In the air war over North Vietnam, U.S. Navy pilots Mike Santy and Tim Boyle fly on

Object ID	Title	Author	Summary
			two fronts--the former piloting an A-7 Corsair over enemy territory and the latter rescuing downed pilots. From Publishers Weekly Carroll's auspicious debut, a detailed, suspenseful technothriller, follows U.S. Navy rescue pilots flying missions over North Vietnam in 1972. Copyright 1992 Reed Business Information, Inc. From Library Journal June 1972. Life among pilots on the aircraft carrier Concord in the South China Sea. Tim Boyle is a search and rescue (SAR) helicopter pilot who retrieves air crews when they crash in North Vietnam. His best friend is Mike Santy, an attack pilot. There is a plot, of sorts, involving a mission that goes badly wrong, but the meat of the book is the complex, dangerous, expensive, ineffably exhilarating machinery of war, and the highly trained men who operate it. Dripping with sentimentality and false modesty, predictable, adulatory but realistic, exciting, and extremely readable, this will be grabbed up by the same people who read David Poyer's The Gulf (LJ 8/90) and Tom Clancy's books. Recommended for most public libraries. - Edwin B. Burgess, U.S. Army TRALINET Ctr., Fort Monroe, Va. Copyright 1991 Reed Business Information, Inc. (from Amazon.com)

2016.337.002	Bright Shining Lie, A : John Paul Sheehan, Neil Vann and America in Vietnam		When he came to Vietnam in 1962, Lieutenant Colonel John Paul Vann was the one clear-sighted participant in an enterprise riddled with arrogance and self-deception, a charismatic soldier who put his life and career on the line in an attempt to convince his superiors that the war should be fought another way. By the time he died in 1972, Vann had embraced the follies he once

Object ID	Title	Author	Summary
			decried. He died believing that the war had been won. In this magisterial book, a monument of history and biography that was awarded the National Book Award and the Pulitzer Prize for Nonfiction, a renowned journalist tells the story of John Vann--"the one irreplaceable American in Vietnam"--and of the tragedy that destroyed a country and squandered so much of America's young manhood and resources. (from back cover)
2016.337.003	Arnheiter Affair, The	Sheehan, Neil	The stunning true story of Captain Marcus Aurelius Arnheiter, commander of the U.S.S. Vance, who for 99 days on duty off the coast of Vietnam methodically drove his men to the brink of madness.
2016.337.006	Instruction for the Installation, Operation and Maintenance of the Motor Driven High Pressure Air Compressors, For Aircraft Carrier CV-41, CV-42, CV-43	None Stated	General Description, Lubrication (Pressure System), Lubrication-Air Cylinders, Water Circulation, Intercoolers and Aftercooler, Valves, Compressor Frame, Air Cylinders, Bushings and Heads, Crank Shaft Bearings, Connecting Rods, Pistons, Automatic Start and Stop, General Instructions for Care and Operation, Motors and Control
2016.337.008	Men in Green Faces	Wentz, Gene	In this novel, the author describes in great details the tactics and tricks used by the Navy's SEALs in Vietnam as well as the treachery some of them encountered. The perfect Seal in Vietnam and how improvisation out of hopeless situations, jackknife through enemy territory, and most importantly, return to base alive, ready to do it all over the next night.
2016.338.001	Pearl Harbor Story : Authentic Information and Pictures of the Attack on Pearl Harbor, December 7, 1941	Rice, William T.	Souvenir booklet sold by company operating boat tours of Pearl Harbor. History and photos of local area landmarks and the December 7, 1941 attack. The True Account of the "December 7" Attack in full color with authentic information and pictures of

2016.339.002	Farwell's Rules of the Nautical Road	Farwell, Raymond F.	A handbook for the mariner, Naval Academy, naval ROTC colleges and naval officers at sea in the practice of navigation in conformance with admiralty and marine collision law. Combines International rules of the road with case law study. Also includes U.S. inland rules of the road. Includes : Seaborne navigation Marine Collision Law Seamanship
2016.341.001	Bush Pilots, The	Time Life Editors	One day in 1932, pilot Bob Reeve, ferrying supplies to a remote Alaskan mining town, landed at his destination to find a grizzled miner eagerly awaiting his arrival. "Got my moose?" asked the oldtimer. It took Reeve a moment to recall that on his last trip he had promised to bring some snuff, a seemingly trivial request he had promptly forgotten. To his chagrin, the miner ignored his apologies and stalked off to proclaim that Reeve was "no good"--teaching the pilot a humiliating lesson in bush-flying etiquette: Always honor a promise. In sparsely populated areas around the globe, where a packet of needles or a pouch of tobacco was regarded as a luxury beyond compare, bush pilots like Reeve were a life line to the outside. And the farther they flew from civilization, the more they were appreciated. Mexican mine operators hired them to wing silver and gold past the bandits who lurked along the mountain trails traversed by slow mule train. Eskimos scrawled messages to friends in distant villages on the flimsy fuselages of bush planes. And in the barren Australian Outback, the citizens of one tiny town gathered to sweep the pebbles off an improvised landing strip so that a flier could make a smooth landing. Trappers and prospectors, missionaries and mountainmen, sportsmen and entrepreneurs in the most remote corners of the world

2016.341.003	Soviet Air Force at War, The	Miller, Russell	The Soviet Air Force at War in 5 Chapters beginning with The Red Falcons of Bolshevism and photo of Red Army airmen beside a British de Havilland captured from czarist units during the Russian Civil War. Russian forces in eastern Ukraine battled against the German troops and tanks. The Soviet counterattack led by the Red Air Force with a mission to clear the skies of German interceptors. For five days the Soviets pummelled the Germans mercilessly. This display of Soviet air and land power stunned the Germans with tanks, trucks and artillery destroyed running into the thousands. Air power played an important role and by 1943 turned the tide for the Russians in the Great Patriotic War. Waging peace, struggle for survival and armies of the air to Pobyeda! Victory! complete the descriptive chapters and photos of aircraft and pilots.
2016.341.004	Soldiers of Fortune	Seagrave, Sterling	The first aerial mercenaries got into it by accident. "...John Moissant's aerial circus were barnstorming across the southwestern United States in February 1911 [where] they intended only to perform their usual repertoire of daredevil aerobic stunts. Instead, they became the world's first flying soldiers of fortune, unwitting founders of a long-lived trade that would attract pilots as colorful and flamboyant as they themselves." "The Mexican government hired the pilots to scout [the rebels'] position from the air." They were across the border from El Paso. The book includes the mercenaries who flew for Spain during the Spanish Civil War, Chenault's Flying Tigers, Swede Count Carl Gustav labelled as an 'airborne knight errant' who was 'driven by his love of danger'

			and the 'chance to give help where it was badly needed', and the pilots who flew during the long years of the Indo-China wars, which ended with the fall of Saigon.
2016.341.005	Architects of Air Power	Nevin, David	From a foretaste of airwars to come, "Indeed by the late 1930s air power had dramatically altered the strategic balance in Europe. But the seeds of the new order had been soon in World War I, when fledgling military air forces first emerged as adjuncts of the traditional armed services. Military leaders, doubtful at first of the airplane's utility, soon recognized its value as an aerial scout. And before long, fast fighter planes armed with machine guns were ordered into battle to support to the armies of both the Allies and the Central Powers." Contents include: Prophets of the new power--An explosive American's battle for bombers-- The Rising Sun takes wing--"We bombed it and bombed it and bombed it"

2016.343.003	Blandford Book of War Planes	Munson, Kenneth	The Blandford Book of War Planes is compilation of the "best military material from the fourteen volume Pocket Encyclopaedia of World Aircraft in Color published by Blandford Press between 1966 and 1977...The selection in this book covers the principal military aircraft from the primitive reconnaissance, bomber and fighter aircraft of World War I to the sophisticated missile-armed, radar-guided nuclear weapon-carrying aircraft of today."
2016.343.004	World's Worst Aircraft, The : From Pioneering Failures to Multimillion Dollar Disasters - 2007	Winchester, Jim	From the Introduction: 'The choice of the 150 'worst' aircraft contained in this volume is the author's own, although friends offered many suggestions. As such it should not be regarded as definitive in any way. Strictly speaking, a number of these entries could be considered as 'flops' rather than 'worst' in the sense of having many inherent faults. Most of the aircraft here have some redeeming features. Many were arguably not bad at all. Some were commercially unsuccessful, other no longer met military requirements or followed them too rigidly. Some should never have left the drawing board. One or two barely did--making it as far as a mock-up or partly completed prototype.'
2016.343.005	Encyclopedia of Modern Military Aircraft	Eden, Paul (ed)	Although most people think that military aircraft include fighters, bombers, and helicopters such as the Chinook or the Apache, most nations also include other specialty planes such as Airborne

Object ID	Title	Author	Summary
			Warning and Control Systems (AWACS) planes that detect enemy aircraft and direct friendly forces. Other planes are used for reconnaissance and surveillance, or to jam enemy radar or enemy air defenses. Other aircraft are used for Search and Rescue (SAR), Carrier on Board delivery (COD), and airlift capability.
2016.343.006	US Navy Today, The	York, Thomas	From the Introduction: "The United States Navy today is the largest and most powerful armed force on the high seas. Established more than 200 years ago to protect the maritime interests of the 13 American colonies, it remains a critical component of the nation's defense strategy....The only challenger on the high seas is the Soviet blue-water navy, a growing menace to US naval supremacy around the globe."

"The material in this book previously appeared in Osprey Aerospace Publications Seventh Fleet super carriers (Tony Holmes), Super carriers (Jean-Pierre Montbazer) and World super carriers (Tony Holmes & Jean-Pierre Montbazer)"--T.p. verso.
2016.343.008	History of the Naval Weapons Center, China Lake, California, Vol. 2 : Grand Experiment at Inyokern, The	Gerrard-Gough, J. D.	In this volume the authors record the history of China Lake from its commissioning in 1943 through the spring of 1948. They recount how, in the last two years of World War II, the rocket program reached its full development as the weapons tested at the Naval Ordnance Test Station were used by American combat forces throughout the world.

Object ID	Title	Author	Summary
			In 1945 the Navy oversaw the building of the Salt Wells Pilot Plant where skills developed by the California Institute of Technology in producing rocket propellants were applied to the manufacture of the nonnuclear explosive charges used in atomic bombs. v. 1. Sailors, scientists, and rockets; origins of the Navy rocket program and of the Naval Ordnance Test Station, Inyokern, by A. B. Christman.-- v. 2. The grand experiment at Inyokern, by J. D. Gerrard-Gough and A. B. Christman
2016.343.009	Mobility, Support, Endurance : A Story of Naval Operational Logistics in the Vietnam War, 1965-1968	Hooper, Edwin Bickford	Vietnam War, Naval History Division, Department of the Navy, Washington, D.C., 1972 with a dedication "Dedicated to the logisticians of all Services and in all wars, and in particular, to the dedicated, and often heroic, officers and men of the Service Force, U. S. Pacific Fleet." Foreword, and a Preface by the Author, XIX Chapters, Appendix 1, Index and Illustrations and black and white photographs. Chapters deal with A "Logistic War", earlier stages of the conflict, service force, 1965, the Seventh fleet, Bases, Construction, Salvage, Special Ops, Bases, to name a few.
2016.343.010	History of the Naval Weapons Center, China Lake, California, Vol. 1 : Sailors, Scientists, and Rockets	Christman, Albert B.	This history of the Naval Weapons Center (until 1967 known as the Naval Ordnance Test Station, or NOTS) presents the conditions under which the Navy rocket program and NOTS were established. This is volume 1 of a planned series on the history of the Naval Weapons Center. It relates the changing character of weaponry that brought the navy's rocket program and NOTS into being. v. 1. Sailors, scientists, and rockets; origins of the Navy rocket program and of the Naval Ordnance Test Station, Inyokern, by A. B. Christman.-- v. 2. The grand experiment at Inyokern, by J. D. Gerrard-Gough and A. B. Christman
2016.345.001	USS Midway (CV-41) - Mediterranean Cruise - 1947-	Mahler, W. A. (ed)	A pictorial account of the USS Midway (CVB-41)

Object ID	Title	Author	Summary
	1948		Mediterranean Cruise, 1947-48. The ship departed Norfolk, VA on 29 OCT 1947 and returned to Norfolk on 11 MAR 1948. Port visits included Gibraltar, Malta, Tangier, Cannes, Bone, Genoa, Naples, Syracuse, and Taranto. Total miles travelled - approx 19,000.
2016.347.001	Navy Maneuver Warfare	Chief of Naval Operations. Strategic Studies Group XXXIII	FOR OFFICIAL USE ONLY : In 1995, the Strategic Studies Group (SSG) was directed to generate revolutionary concepts for future naval warfighting. SSG XXXIII completed the nineteenth year of work under this tasking. The Chief of Naval Operations theme for SSG XXXIII was to generate innovative concepts for the Navy to conduct operations outside of Phases 2 or 3 of major combat operations into the 2030s, focusing on how the navy can conduct the anticipated range of day-to-day and crisis response operations--expected and unexpected into the 2030s. The CNO tasked the Group to provide recommended steps necessary for the navy to take, starting in 2015. This report provides SSG XXXIII's approach to address its tasking. The CNO has approved release of SSG XXXIII's Final Report to naval leadership and contributing organizations. While the material is unclassified, it is pre-decisional and sensitive, intended for and provided to a limited distribution of organizations and individuals.
2016.348.001	USS Midway Operational Guide - 1982	USS Midway (CV-41)	Guide/Reference for prospective Midway (CV-41) c. March 1982 for Midway's operational purpose. This book gives a general description of the History of the Midway including commissioning, its first major operational shakedown in the North Atlantic called Operation Frostbite. After 3 training courses, in the Caribbean, Midway sailed from Norfolk, Virginia on an experimental mission accompanied by scientific observers as she fired a German V-2 rocket from

2016.351.006	USS Frank Knox (DDR-742)	Navy Department.	The salvaging of the USS

Object ID	Title	Author	Summary
	Stranding Salvage	Supervisor of Salvage	Frank Knox (off Pratas Reef) will be remembered as a significant event in the annals of Ship Salvage for at least two reasons: First--and no doubt, foremost--the successful completion of this very difficult job can only be attributed to the great skill and greater tenacity of the sailors on the scene. The weather they suffered through was fierce, and lesser men would have found the job too much at any of several junctures. These salvors came back to work after each of three typhoons had disrupted them. They employed just about every "standard salvage technique"--pulling tackle, pumping, dewatering by air, jettisoning, ballasting, trenching and explosive reaction. The only major salvage technique not used to any extent was the application of external lift forces, and even this was prepared for use as a last resort. But even greater skill was required to effectively develop and use a completely new salvage technique--that of Foam-in-Salvage. All this was done on the most inhospitable reef imaginable, in the remoteness of the South China Sea. Logistic support was ever a problem. The other significant factor in the salving of FRANK KNOX is, of course, the milestone use of a cast-in-place foam for the application of internal buoyancy. This new technique, called Foam-in-Salvage, did not in itself salvage the destroyer. What it did, however, was save her, for had she been pulled free with her forward two engineering spaces flooded and her seriously weakened hull sagging, the hull girder would have broken in two. The bow would surely have sunk. And since FRANK KNOX is a DDR--a Radar Picket, her great value was forward, in the CIC. She was at the time a newly converted ship, and the value of her electronic suit--undamaged by the stranding--was well over \$15 million.

Object ID	Title	Author	Summary
			Many ships helped in the salvage. Helicopter support was provided by the USS Midway CV-41, the USS Iwo Jima LPH-2 and the USS Mars AFS-1. During the early evening, while the ship was suffering its greatest buffeting, and with boat operations impossible, there were serious doubts that the ship or its crew would survive. At this report, Commander SEVENTH Fleet, thinking it likely that FRANK KNOX would have to be abandoned, ordered USS MIDWAY (CVA 41) and an amphibious task group with USS IWO Jima (LPH 2) to proceed to the scene, since each ship had several helicopters. By midnight, however, it was apparent that the worst of the storm had passed and FRANK KNOX would survive to see another day. MIDWAY arrived at 0700, 21 July, and immediately commenced removing 155 nonessential personnel by helicopter. The carrier task group commander RADM Marshall W. White, USN, assumed duties as on-scene commander.
2016.351.007	LSO Reference Manual, Section 1 : Equipment	Navy LSO School	This is a digital file of Section 1 (pages 21-139) of the LSO Reference Manual. Object ID	Title	Author	Summary
			magnetic compass adjustment in one text. As such, it treats of the basic principles of compass deviations and their correction, and not of the details of particular compass equipment. Although this text is presented as a systematic treatise on compass adjustment, ship's personnel who are inexperienced with compass correction will find sufficient information. In this handbook, the term compass adjustment refers to any changes of permanent magnet of soft iron correctors whereby normal compass errors are reduced.

2016.359.001	History of Seafaring : Based on Underwater Archaeology	Bass, George F. (ed)	History of Seafaring from its earliest beginnings to the advent of steam power.A project made possible by the remarkable advances in underwater archaeology.Each of the twelve Chapters is accompanied by its own section of color and black & white illustrations ranging from divers in action, wrecks and cargoes in situ, and salvaged treasure, to reconstructed vessels such as the ships in the Viking Ship Museum in Oslo.
2016.360.001	Victory by Air : A History of the Aerial Assault Vehicle	Delgado, Jose	Almost as soon as Orville and Wilbur Wright achieved the first successful, powered,

Object ID	Title	Author	Summary
			piloted flight, aeroplanes were drafted for military use, and the rules of war were forever changed. This compelling documentary series follows the history of the aerial assault vehicle from the creation of the aeroplane to its militarization during World War I and the Russian Revolution. Viewers learn that it was the Spanish Civil War that served as the testing ground for the German airplanes of the Third Reich in the lead-up to the Second World War. A complete historical overview from 1900-1945. Contents: The pioneers -- Monoplanes -- WWII : the struggle for airspace -- WWII : technological improvements -- New aircraft, new weapons, new frontiers.
2016.360.002	Only 317 Survived! : USS Indianapolis (CA-35) : Navy's Worst Tragedy at Sea--880 Men Died	USS Indianapolis (CA-35) Survivors Memorial Organization	This book is a collection of personal stories of the survivors of the USS Indianapolis that sank in 1945 during World War II. Included at the back of the book is an 11 page pamphlet with pictures of survivors and pictures from the ship.
2016.361.001	Operation Sandstone : The Story of Joint Task Force Seven.	White, Clarence H. (ed)	This is a pictorial account of Joint Task Force Seven, under the command of Lt. Gen. John E. Hull, USA, which was established October 18, 1947 by the Joint Chiefs of Staff. Its mission was to construct an atomic energy proving ground for the Atomic Energy Commission at Eniwetok Atoll in the Marshall Islands and to assist the AEC in conducting the first series of tests--known as Operation Sandstone--during the months of April and May, 1948.
2016.362.002	In Love and War : The Story of a Family's Ordeal and Sacrifice During the Vietnam years	Stockdale, James B.	This update to the initial 1984 edition continues the story of Jim and Sybil Stockdale to let the readers know what has happened in the eventful years since Jim's release from a Hanoi prison in 1973.
2016.362.004	Navigation Rules : International-Inland	United States Coast Guard	The international rules: in this book were formalized in the

Object ID	Title	Author	Summary
			Convention on the International Regulations for Preventing Collisions at Sea, 1972, and became effective on July 15, 1977. The Rule (commonly called 72 COLREGS) are part of the Convention, and vessels must adhere to these Rules where applicable. The Inland Rules: Replace the old Inland Rules, Western Rivers Rules, Great Lakes Rules, Their Respective pilot rules and interpretive rules, and parts of the Motorboat Act of 1940. The Effective date for the Inland Navigation Rules was December 24,1961, except for the Great Lakes where the effective date was March 1, 1983..
2016.362.005	Influence Of Law On Sea Power, The	O'Connell, D. P.	In an age of limited wars and constant disputes over territory or natural resources naval power has proved a conveniently flexible means of dealing with conflict situations. The need for legality in the eyes of world opinion, coupled with the uncertainties of international law, have made legal considerations a central factor in naval strategy and tactics. As an ideological battleground, moreover, international law provides opportunities both for conflict and for the adroit manipulation of conflicts so that, properly exploited, it becomes itself a weapon in the naval armoury.
2016.362.006	Naval Military Personnel Manual	Naval Military Personnel Command	Provides direction and guidance, and contains policy, rules and practices for the administration of military personnel within the Navy. The Navy personnel Bible.
2016.362.007	Law of the Sea, The	United Nations Conference on the Law of the Sea	This is the official text of the United Nations Convention on the Law of the Sea with annexes and index : final act of the Third United Nations Conference on the Law of the Sea ; introductory material on the convention and the conferences.

2016.363.002	USS Midway (CVA-41) - Westpac - 1961	Welles, Chris (ed)	Pictorial account of USS Midway (CVA-41) deployment to South East Asia. The aircraft carrier departed Alameda, CA on 15 February and returned 28 September 1961. Ports of call and items of interest: 14 pages of pictures of San Francisco and Hunter's Point; Long Beach; back to Alameda; Dodie Stevens on board; Hawaii; Guam; Subic Bay; Philippines; Japan (Sasebo, Yokosuka); Hongkong. Midway was one of three carriers ordered to the South China Sea in support of U.S. diplomatic efforts to broker a ceasefire between the Pathet Loa and the Loation Government between March and May of 1961. Onboard: Carrier Division Five (CarDiv-5) Carrier Air Wing Two (CVG-2) VF-21 (F3H-2) VA-22 (A4D-2) VA-23 (A4D-2) VF-24 (F8U-2) VA-25 (AD-7) VMA-311 (A4D-2) VAH-8 (A3D-2) VCP-63 Det.A (F8U-1P) VAW-11 Det.A (WF-2) HU-1 Det.1 (HUP-3)
2016.364.001	Armored Ships : The ships, Their Settings, and the Ascendancy that They Sustained for 80 Years	Marshall, Ian	Illustrated history of armed warships. Includes plan drawings and characteristics
2016.366.001	Turning The Tide : How A Small Band Of Allied Sailors Defeated The U-boats and Won the Battle Of The Atlantic	Offley, Ed	The WWII struggle against Nazi Germany was decided not on the battlefields of Europe, but along the trade routes of the North Atlantic. Allied merchant vessels carrying millions of tons of precious supplies from North America to Great Britain found themselves preyed upon by "wolf packs" of German U-boats, in a protracted clash of arms known as the Battle of the Atlantic. It was the deadliest naval conflict in history.If the U-boats managed to sever the lifeline between the U.S. &

Object ID	Title	Author	Summary
			Great Britain - as they seemed poised to do by late 1942 - Germany could have denied the Allies their springboard into the European continent, effectively costing them the war. Former USS Midway crew member.
2016.367.001	Marine Cargo Operations	Sauerbier, Charles L.	Systematically presents the basic principles and techniques of cargo operations. Acquaints the Merchant Officer with the principles of stowage and their application to carriers. This Second Edition includes new chapters on the carriage of goods at sea and cargo responsibility plus 270 useful halftones and drawings. Includes to leaflet pull-outs
2016.367.002	Prepare to Dive!	Coggins, Jack	Here is the entire fascinating story from the earliest diving bells and tiny one man underwater craft to the sophisticated nuclear submarines of today from the helmeted diving suit to the aqualung which allows freedom of movement and sealabs for living the surface for extended period of time
2016.367.003	Aircraft Carrier Intrepid, The	Roberts, John	The Essex-class aircraft carriers are famous for their effectiveness and reliability as warships and the mammoth construction programs they initiated. Built in 1941, the Intrepid (CV11) was one of the class of twenty-four vessels constructed during and immediately after World War II. Carrying ninety aircraft each, they formed the main air strength and striking power of the U.S. Pacific Fleet against the Japanese from 1943 to 1945. Written by well-known warship historian John Roberts, this classic reference on this classic ship features the extensive diagrams and photographs that this series has become Justify famous for it also offers an authoritative description of the concepts, design, modifications, and operational history of the Intrepid.

2016.367.012	History of United States Naval Operations : Korea	Field, James A.	History of United States Naval Operations: Korea by James A. Field, Jr. with Foreword by Rear Admiral Ernest McNeill Eller, USN (Retired) Director of Naval History, Washington 1972. Preface by the author and XII Chapters beginning with: To Korea By Sea, and on to Policy, War, Troops, supplies, the Perimeter, Holding the Line, back to the Parallel, the border, retreat, the second six months problems, and end. A Note on Source Materials, Glossary of Naval Abbreviations, and Index and List of Photographs. List of Maps. List of Tables.
2016.367.013	U-Boat Commander's Handbook, The	Coates, E. J. (ed)	Originally written in German and translated by the US Navy in 1942, and 1943. During WWII 1,244 German naval officers served as U-Boat commanders, Of this number, more than 25 percent lost their lives as a direct result of enemy action. Skilled, determined, and resourceful, these men and the crews they commanded made the U-boat arm of the German Navy a fighting force to be reckoned with right up to the very day of the Third Reich's collapse in May 1945.
2016.367.014	Diving Stations	Gray, Edwyn	Story of a British submarine captain and his adventures at sea and ashore. commanding the only British submarine in the Far east at the start of the Pacific phase of World War II he deals the japanese a savage blow inhis unorthodox style.

			experiences of new recruits both in recruit training and once reporting to ships. Profusely illustrated. Has photos of carriers Lexington, Saratoga and Enterprise.
2016.367.016	Fleet Type Submarine, The	Bureau of Naval Personnel, Training Division, Standards and Curriculum Branch	An instruction book designed to provide a text for use in the Basic Enlisted Course at the Submarine School, to assist with the instruction of the Officer's basic Course at the Submarine School, to provide reservists with an up-to-date text for use with correspondence courses and manuals, and to provide a general reference book for shipboard personnel. From the Preface: "The manual on the fleet type submarine includes descriptive information covering: a. Submarine history and development; b. Submarine construction; c. Submarine systems; d. Submarine operations; e. Submarine training."
2016.367.017	No Man's Land : 1918 - The Last Year of the Great War	Toland, John	This is a story of the climactic final year of WWI, a conflict whose battles were so colossal that a hundred thousand men might die in a single day. As 1918 began the German General Staff was confident that their next big push would finish the Allies once and for all before American armies could enter the field and shift the balance of power. But the end of the year saw the arrogant Prussians suing for peace as the humbled Kaiser went into saberless exile in Holland and the rest of the survivors began the long process of recovering from a war that had forever ended the old order for victors and vanquished alike.
2016.367.018	Warships of the US Navy	Morison, Samuel L.	A compendium of ships and submarines of the U.S. Navy as of 1 July 1983. ordered by type and by class. Photos of each class are provided along with characteristics. A segment of descriptive text is included for each type and class. Fleet assignments also provided.
2016.367.019	Newport Newstory, Winter	Hasty, Wayne (ed.)	Contains a 4-decade history

	1969		of the Newport News Shipyard. Includes one photo of USS Midway (Pg. 9), a paragraph of the Midway class carriers, and an article on Setting the Course for Nuclear Carriers.
2016.367.020	When Hollywood Ruled the Skies	Orriss, Bruce W.	From the author's note: "The combat films of World War II, whether factual or fictional, have proven themselves to be one of the most enduring and prodigious genres in the history of American motion pictures. Aside from the Western, no subject has been given as much attention by American filmmakers or been so well received by American filmgoers. The scope and purpose of this volume will limit itself to one specific segment of this genre: the aviation films of World War II, from the pre-war recruitment vehicles, the wartime "flag-wavers", the postwar studies in realism and finally to the more thought-provoking films of the post-1950 ear. It will study the radical changes in aim and purpose that these films have undergone in the past forty-two years, and will give special emphasis no only to the stories behind their making and the people that made them."
2016.367.021	Underway Replenishment 1899-1914	Miller, Spencer	Five articles on underway replenishment are excerpted from the publication of the Society of Naval Architects and Marine Engineers and published in paperback form with a simple two-staple binding. The period covered is 1899 - 1914. All are concerned with coal. Nearly 170 figures from the original articles are reproduced. Publishing date is not given. Contents: Coaling Vessels at Sea, 1899 Coaling of the U.S.S. Massachusetts at Sea, 1900 Coaling Warships at Sea--Recent Developments, 1904 New Sea-Anchor For Coaling at Sea, 1906 Refueling Warships at Sea, 1914
2016.367.022	United States Ship Supply	Akerson, Andrew (ed.)	Commissioning book for

	(AOE 6), Commissioning, February 26 1994, San Diego, California		USS Supply, the ceremony for which took place at North Island Naval Station on 26 February 1994. Included looseleaf are a pamphlet listing commissioning contributors and a cutout newspaper article of the commissioning. Contains photos of crewmembers and associated dignitaries.
2016.367.023	Observer's Book of Ships, The	Dodman, Frank E.	A pocket reference book on the characteristics of military and civilian ships from nations around the world. Volume includes Introduction, Glossary of Nautical Terms, Tonnage, Propulsion and Buoyancy. There is an extensive section on flags include International Code, British Flags and Ensigns, Colours of Shipping Companies including passenger liners, tankers, British ocean going freighters, British short seas services, coastal and short seas cargo ships, fishing vessel port of registry letters. Other sections include warships, sail, fishing craft, history, and index for types of ships, boats and craft, and ships' names.
2016.367.024	Campaign for Guadalcanal, The	Coggins, Jack	An in-depth account of the crucial struggle that marked the turning point of WWII in the Pacific. Fought over a six-month period on and around an island few had ever heard of, and certainly one which neither the Japanese nor American high commands would have chosen for a battle ground, it included see-sawing encounters on land, vicious fighting in the air, and a series of the most deadly naval actions of modern times.
2016.367.025	Underway Replenishment Hardware and Equipment Manual	Naval Ships Systems Command	Provides a catalog of equipment used in the transfer of solid cargo and bulk fluids, and a description of the methods used in UNREP. The manual will permit the user to identify equipment, establish intended use, and to locate additional detailed technical information related to the configuration, operation, maintenance. safety features, installation and procurement of UNREP equipment.

Object ID	Title	Author	Summary
2016.367.026	German Submarines, vol. 1	Lenton, H. T.	In two World Wars the German Navy showed its undoubted skill in submarine warfare; they introduced it during the first war, and it brought them close to victory on both occasions. This book -- and its companion volume -- deal with the material as opposed to the historical aspect of German submarine during the Second World War. It lists in detail the evolution, development, and technical data on the greatest submarine fleet the world has ever seen, together with building details and the fate of each individual submarine. This volume covers the designs studied and put into production up to the outbreak, and during the early stages, of the war. These were conventional submarines, with dual diesel-electric propulsion, intended to spend a quarter of their time on the surface, submerging only to attack or escape detection. Consequently surface performance was superior to that under water. This resulted in such characteristic features as the fitting of a low-angle gun, an extensive deck casing and externally stowed torpedoes. Effective Allied counter-measures eventually drove this type of submarine from the sea, but not until it had exacted its grim toll from warships and merchantmen alike. The scale drawings showing the general internal arrangements of both the types put into production as well as those projected, are of special interest. (from dust jacket flaps)
2016.367.027	Royal Netherlands Navy	Lenton, H. T.	The outbreak of the Second World War found the royal Netherlands Navy apparently in decline. though the Netherlands was the third largest colonial power, and through hers was an empire founded essentially upon maritime strength, yet

Object ID	Title	Author	Summary
			by the beginning of the twentieth century she had slipped from the first rank of naval powers. In the worsening situation which preceded 1940, new ships of all kinds had been authorised, but the effort came too late. In any case, what followed was a land campaign in which a navy could do little. The majority of the Dutch fleet, withdrew undamaged, and proved a most welcome ally to the hard-pressed British forces. The bulk of the Royal Netherlands navy was stationed in the East, where the Dutch colonial interest lay. While Dutch naval power had declined, that of Imperial Japan had dramatically increased, and after the Japanese war effort was unleashed in 1941, what survived of the Dutch East Indies Fleet could, again, do nothing by withdraw. But in the long process of Allied recovery the Dutch navy won the highest praise in all quarters. It emerged from the Second World War poor in numbers but rich in reputation and experience.
2016.367.028	Fleet Today, The	Banning, Kendall	This book tells the layman about Uncle Sam's Navy. Beginning with the moment the young applicant for enlistment enters the recruiting office, this book follows his career step by step. Last chapter is a list of all the commissioned ships as of date of publication. The appendix lists U.S. Men-of-War disposed of in Accordance with the Washington Treaty signed in 1922 which came in to force in 1923
2016.367.029	U.S. Warships of World War I	Silverstone, Paul H.	The purpose of this book is to give details and information of all the ships of the United States navy during World War I.
2016.367.030	U.S. Warships of World War II : Part One : Battleships, Battlecruisers and Aircraft Carriers	Silverstone, Paul H.	All ships on the United States Navy list in 1941 are included, as well as those ordered during the war even though some of these were cancelled.
2016.367.031	U.S. Warships of World War II	Silverstone, Paul H.	This book is in poorer condition than our backup copy; however, it is a first edition and the backup is a reprint. The illustrations are better in this

Object ID	Title	Author	Summary
			one. It is a most comprehensive handbook on the US naval forces in WWII. It is not a history -- although naturally, it contains much of interest to the historian -- it is, rather a complete and detailed survey of all the major ships and most support vessels of both the US Navy and Coast Guard. The American fleet during WWII was large and varied ranging from heavy battleships and aircraft carriers to auxiliary craft such as submarine tenders and attack cargo ships. All types and classes have been included in this profusely illustrated reference book.
2016.367.032	Japanese Aircraft, Landing Barges, Minor Assault Craft : Recognition Characteristics and Capabilities	Amphibious Group Three, Pacific. Intelligence Section	This is a recognition guide for Japanese military planes, landing craft, and minor assault craft. There is a B&W photo from several different angles plus a description of size, operation characteristics, and armament carried.
2016.367.033	History of NAS Tillamook and Its Role in World War II, The : A Tribute to Engineering, Patriotism and Courage	M & A Tour Books (Firm)	Throughout World War II, nonrigid airships (sometimes called blimps and sometimes called Lighter-Than-Air ships) played a vital role in protecting thousands of lives and ships from the threat of enemy submarines. Included are a short history of Navy airships, and a history of Naval Air Station, Tillamook, Oregon.
2016.367.034	This is the Navy : The Navy in Action--On Sea, On Land and in the Air	Rimington, Critchell	This Is The Navy: The Navy in Action - On Sea, On Land and in the Air with Introduction by T. L. Gatch, Rear Admiral, USN and Author's Note with A-Z topics of Aircraft Carriers to Waves to Zero with black and white photographs. Covers a wide range of subjects from aircraft carriers to yards.
2016.367.035	U-Boat : The Secret Menace	Mason, David	This book gives a history of the build up of the German U-Boats (submarines), their action in World War II, and the scuttling of their u-boats and their u-boat pens.
2016.367.036	On Course to Desert Storm : The United States Navy and the Persian Gulf	Palmer, Michael A.	EXECUTIVE SUMMARY: THE ROLE OF THE NAVY - This report highlights the role of the U.S. Navy in conjunction with the nation's other

Object ID	Title	Author	Summary
			maritime forces--the Marine Corps and Coast Guard--in DESERT SHIELD/STORM. But neither of those operations could have been accomplished without the full participation of all services. Each service brought its strengths and special operational capabilities to bear as the situation required. The result was the most complex, fast-moving, successful, major joint power projection operation in history. The six ships of the Middle East Force were on station in the Persian Gulf when the President decided to deploy additional forces to Southwest Asia beginning 7 August. The Independence battle group had steamed into strike range in the North Arabian Sea, and the Eisenhower battle group was transiting the Suez Canal to the Red Sea within strike range of Iraq. When United Nations sanctions were imposed, the U.S. Navy immediately commenced interception operations against ships headed to and from Iraq and Kuwait. We may never learn the extent to which on-scene naval forces influenced Saddam Hussein to stop short of invading Saudi Arabia. We do know that the sustainable combat capability and control of the sea provided by those naval forces afforded protection for the introduction of ground and air forces arriving in theater in response to deployment orders. The Navy's ability to control the seas was taken for granted, as it has been since 1945. That control makes it possible for us to deliver our troops and supplies safely to any area of conflict. The maritime superiority which enabled our victory was made possible by earlier sound investments in people, ships, aircraft and weapons systems. DESERT SHIELD/ STORM demonstrated again that sea control is fundamental to

Object ID	Title	Author	Summary
			successful power projection. Because naval forces were on station and ready, we were never seriously challenged, and sea control was assured from the outset. Maritime superiority and forward deployment gave us another edge in DESERT SHIELD/STORM. Only a nation possessing both unquestioned control of the seas and significant experience operating in forward areas in close cooperation with the naval forces of our coalition partners could have provided the leadership for 23 nations whose naval forces participated. The ability of the U.S. Navy to operate effectively with so many other navies did not come quickly or easily. It was built over forty years of close cooperation with the navies of NATO and other allies. Familiarity with the geography and local navies was gained through a continuous presence in the Gulf since 1949. During the Persian Gulf "Tanker War" of 1987-88, the U.S. vividly demonstrated its military and political staying power to even the most skeptical critics within the Arab world. Operation EARNEST WILL laid the foundation for DESERT SHIELD/STORM. Multinational naval cooperation was demonstrated in many warfare areas but was most evident in the maritime interception campaign. Maritime interception was an important military and political tool from the outset. Enforcement of the U.N. sanctions weakened Iraqi forces prior to the conflict and imposed a heavy burden on Iraq's economy. Through April 1991, over 9200 merchant ships had been challenged, more than 1200 boarded for inspection, and at least 67 diverted for carrying prohibited cargo. Countless ships were deterred from on-loading Iraqi oil and other products for export.

Object ID	Title	Author	Summary
			Iraq's GNP was reduced by half. The impact of the embargo was clearly felt by Iraqi soldiers in the trenches. The eroding effect on their morale and will to fight undoubtedly saved many coalition lives. The maritime interception effort continued even after cessation of offensive operations as a guarantee of Iraq's compliance with U.N. resolutions. The contribution of strategic sealift was one of the major success stories of DESERT SHIELD/ STORM. Sealift investments of the 1980s paid great dividends. The early force arrival dates achieved by maritime prepositioning and fast sealift ships met or exceeded our most optimistic projections. Military Sealift Command (MSC) controlled ships delivered 3.4 million tons of cargo and 6.8 million tons of fuels--much of it moved half-way around the world. Over 90% of all cargo was transported into theater via sealift; more than 95% will return the same way. The five month build-up period during DESERT SHIELD allowed the Navy to overcome obstacles and build teamwork with the other services and our coalition partners required to meet the challenges which arose during combat. Once unleashed, a massive joint and combined force acted in unison to quickly eject Iraqi forces from Kuwait. Naval forces played an essential role. For example, about one third of all strike sorties were flown by Navy and Marine Corps aircraft. Six aircraft carrier battle groups and two battleships were simultaneously engaged. Cruisers, destroyers,battleships and submarines launched a combined total of 288 Tomahawk cruise missiles from the Red Sea and Persian Gulf against heavily defended key Iraqi facilities. About 85% of those missiles hit their targets

Object ID	Title	Author	Summary
			with pin point accuracy, contributing to the early neutralization of Iraqi air defenses and reducing the risks for American aircrews. Naval forces literally eliminated the Iraqi Navy and projected power ashore. Surface combatants, helicopters, carrier-based aircraft, land-based P-3s, and our multinational naval partners all contributed to the destruction of more than 100 Iraqi vessels. Amphibious forces conducted an impressive series of raids, feints and rehearsals which highlighted their exceptional responsiveness and flexibility and paved the way for a most successful deception operation. DESERT STORM once again illustrated the challenge of mine countermeasures, especially in a confined area like the Northern Persian Gulf. Finding and neutralizing mines is difficult under any circumstances. We cannot always afford to allow minelaying in international waters to go unopposed as we did in this case. There is no capability, either existing or projected, which could quickly neutralize over 1000 mines once laid. The U. S. Navy must possess the best mine countermeasures capability available. (from http://www.history.navy.mil/war/s/dstorm/dsexec.htm)

2016.367.054	History of the USS Batfish : America's Killer Sub.	Naval History Division. Ship's Histories Section.	From the USS Batfish War Memorial in Muskogee Oklahoma: "USS Batfish (SS310) set the record for U.S. submarine sinking enemy submarines during World War II. She also had the unique experience of being the first U.S. Submarine to hold divine services while submerged in a War Zone. This aggressive submarine compiled her record during the years 1944-1945 when Japanese shipping was hard to find. Batfish ended the war wit a record of 14 vessels sunk and three damaged, for a total of 37,080 tons of enemy shipping sunk."
2016.368.001	History of the Confederate States Navy from Its Organization to the Surrender of Its Last Vessel	Scharf, J. Thomas	The history of the Confederate States Navy, from it's beginnings to the surrender of it's last ship. Its stupendous struggle with the great navy of the United States; the engagements fought in the rivers and harbors of the South, and upon the high seas; blockade-running, first use of iron-clads and torpedoes, and privateer history Includes a chapter on the many times forgotten Confederate States Marine Corps.

2016.369.002	Dogfight : The Greatest Air Duels of World War II	Holmes, Tony	Fighter pilots are the elite of the elite. It can take years of training to produce a fighter pilot and even longer to produce a plane that is worthy of their skills. Yet a dogfight can last only minutes. Drawing inspiration from The History Channel's popular show, "Dogfight" and the new Osprey DUEL series, Dogfight offers readers a chance to discover what it felt like to be a fighter pilot during World War II, flying some of the most iconic planes to have ever graced the skies during operations when man and machine were tested to the limit. Meticulously researched digital artwork recreates the cockpit of each of these iconic fighter planes and accompanies a step-by-step explanation of the design and development of these warbirds, from prototype to combat. First-hand

			accounts and interviews with surviving pilots detail pilot training differences among the combatants as well as the equipment used in their preparations for war. Maps and diagrams reveal the wider strategic setting in which each dogfight took place. From Spitfires battling Messerschmitts over the skies of southern England to Fw 190s desperately attempting to turn the tide against the advancing Mustangs of the 8th Air Force during the dying days of the war, discover the history of these amazing pilots and their aircraft in the awesome dogfights of World War
2016.369.003	American Aircraft Factory in World War II, The	Yenne, Bill	Few industrial phenomena have been as dramatic as the United States' mid-20th-century shift from peacetime to wartime production. The American Aircraft Factory in World War II documents the production of legendary warbirds by companies like Boeing, North American, Curtiss, Consolidated, Douglas, Grumman, and Lockheed. It was a production unmatched by any other country and a crucial part of why the allies won the war. Author Bill Yenne considers the prewar governmental acts that got the plants rolling, as well as the gender shift that occurred as women entered the work force like never before. He also describes the construction of megafactories like Willow Run, factory design considerations, and the postwar conversion back to peacetime production. Illustrated with 175 period photographs—including 50 rare color photos never before seen in print.

2016.372.001	USS Midway (CV-41) - The Magic Touch - 1985-87	Thornton, Jon (ed.)	A pictorial account of the life of the USS Midway that covers a period from mid-1985 to about April 87. Operations included a deployment to Indian Ocean as Battle Group Alfa JUL to SEP 85. Exercises included Team Spirit 85-86, Inferno Creek, Annuaalex w/JMSDF, Multiplex and ASWEX. A significant maintenance period, EISRA '86, took place April to November 86 and included preps for the F/A-18 Hornet. The last A-4's and A-7's departed Midway in March 86. Port visits included Fremantle, Subic Bay, Hong Kong, Pattaya Beach, and Sasebo. Carrier Air Wing Five was embarked for the I.O. deployment and underway portions of the period when aircraft were aboard.

2016.378.001	Combat Command : The American Aircraft Carriers in the Pacific War	Sherman, Frederick C.	Signed by the author. This book is essentially an account of the Navy's efforts in the Pacific during World War II. Starting with Pearl Harbor, in chronological order, chapter by chapter, it unfolds the principal naval campaigns in the Pacific. (from Preface by W.F. Halsey). Whereas this work features the story of our aircraft carriers in the Pacific, it is not only a personal memoir, but a study of the Pacific war as a whole. The author has sought to present facts accurately, to interpret them, to analyse the record, to give proper emphasis, and to fit them together so as to provide the reader with a clear and comprehensive picture of the

2016.380.001	USS Midway (CV-41) - Fortieth Anniversary 1945-1985 - The Magic Goes On - 1984-85	Williamson, Willie (ed.)	war. A pictorial account of an approximate 2-year period in Midway's forward deployed life. It covers the 28 December 1983 to 23 May 1984 deployment to the Western Pacific--Indian Ocean and Persian Gulf; the 15 October 1984 to 12 December 1984 deployment to the Western Pacific, and the history of the Midway until she went in to drydock in March of 1985.. Midway was at this time homeported in Yokosuka, Japan. During the 5 month cruise (11984-85), Midway spent 111 continuous days at sea (on Gonzo Station) and steamed over 63,000 miles. Conducting almost 9,800 hours of flight operations, she launched and recovered over 5,300 aircraft, breaking the all-time record for the first quarter in any year of her history. Ports visits included Sasebo, Subic Bay, Manila, Pattaya Beach, and Singapore. A visit to Perth was cancelled to take up a USS Kitty Hawk commitment in the Indian Ocean. Carrier Air Wing Five (CVG-5) was embarked. Onboard for the 1983-84 deployment were: VF-161 (F-4S), VF-151 (F-4S), VA-93 (A-7E), VA-56 (A-7E), VA-115 (A-6E and KA-6D), VAW-115 (E-2B), VMFP-3 Det.B (RF-4B), VAQ-136 (EA-6B), and HC-1 Det.2 (SH-3G). Onboard for the October - December deployment were: VF-161 (F-4S), VF-151 (F-4S), VA-93 (A-7E), VA-56 (A-7E), VA-115 (A-6E and KA-6D), VAW-115 (E-2B), VAQ-136 (EA-6B), and HS-12 (SH-3H). Page 457 lists deaths which includes personnel from VF-161, VA-115, VA-56, VA-93, Eng and Wep.

			Beach and San Francisco prior to deployment from her new homeport of Alameda on 16 August 1958.. Deployment port visits included Pearl Harbor, Subic Bay, Buckner Bay, Yokosuka, Hong Kong and Manila. Midway returned to Alameda on 8 March 1959. CVG-2 embarked, consisting of: VF-211 (F8U-1) VF-64 (F3H-2) VA-63 (FJ-4B) VAH-8 (A3D-2) VA-65 (AD-6) VFP-61 Det.A (F8U-1P) VA(AW)-35 Det.A (AD-5N) VAW-11 Det.A (AD-5W) HU-1 Det.1 (HUP-2)
2016.382.001	U.S.S. Midway CVB-41 : From the Beginning to the End	Husebo, Joel R.	The author was a plank owner on the Midway and served in her until June of 1946. This book is a personal collection of his plank owner certificate, various cards, candid photos and history of the Midway from various sources.
2016.383.001	Lion in the Bay : The British Invasion of the Chesapeake, 1813-14	Quick, Stanley L.	Contents Irreconcilable differences -- A very exposed coast -- The gathering storm -- Lighting the fuse -- By land and by sea -- Target: Norfolk -- The Battle of Norfolk -- Off the beaten path -- The long, hot summer -- Bay blues -- Sloops, frigates, and galleys -- Old tricks -- Up a creek -- Fire on the Patuxent -- The Battle of St. Leonard Creek -- Retribution and recrimination - - Prelude to disaster -- The Bladensburg races -- Fire and ruin -- Baltimore. The story of Fort McHenry's defense during the War of 1812 is well known, but Lion in the Bay is an intimate look at the events leading up to the battle that inspired our national anthem. As the War of 1812 raged on the high seas and along the Canadian border, the British decided to strike at the heart of the United States, the relatively undefended area of the Chesapeake Bay. The Chesapeake was a fertile farm region, a place of renowned shipbuilding, and an area

Object ID	Title	Author	Summary
			politically divided over the war. Plus, if the British succeeded in taking the bay, the nation's capital was not far away. Admiral George Cockburn led the British into the bay following a failed attempt to take Norfolk, Virginia. Originally intended to relieve pressure on other fronts, the Chesapeake theater became a British campaign of retribution for the burning of York (present day Toronto) by the Americans in 1812. As a result, the Chesapeake region, once an economic engine for America, was transformed into a region of terrorized citizens, destroyed farms, and fears of slave insurrection. In August 1814, President James Madison refused to bolster the defenses on the waterway that led to Washington, and the British took advantage. Cockburn again led a naval force into the bay, this time running into opposition from Commodore. Joshua Barney and his Chesapeake Bay Flotilla. Barney put up a heroic, though doomed fight before the British sailed up the Patuxent River and landed at Benedict, Maryland, where over 4,000 troops disembarked to begin their advance toward Washington, D.C. After defeating the Americans at the Battle of Bladensburg, the British moved into Washington, burning the city, before returning to their boats and setting out for Baltimore. There, the British Armada encountered a stalwart group of American defenders at Fort McHenry. Despite a massive bombardment, Baltimore's defenses held, forcing the British to abandon their campaign to close the Chesapeake. More than just an in-depth look at one front of the War of 1812, <i>Lion in the Bay</i> is a story of resilience and triumph in the wake of

Object ID	Title	Author	Summary
2016.383.002	Commanding Lincoln's Navy : Union Naval Leadership During the Civil War	Taaffe, Stephen R.	catastrophe. The Union Navy played a vital role in winning the Civil War by blockading Confederate ports, cooperating with the Union Army in amphibious assaults, and controlling the Mississippi River and its tributaries. President Lincoln understood, however, that the Navy was not as important, militarily and politically, to the war effort as the Army, so he delegated authority to his Secretary of the Navy, Gideon Welles, who divided the Navy into six squadrons and hand-picked their commanders. This book examines Welles' selections and why he appointed them. While noting that the officers' records, character, and abilities were of primary importance, Taaffe acknowledges that political connections, seniority, and availability were also factored into the selections. He demonstrates that Welles' appointments improved markedly as the war continued and as he gained a better understanding of the Navy and its officer corps. Taaffe contends that Welles' eventual success in picking effective squadron commanders contributed greatly to Union victory.
2016.383.003	Sea of Thunder : Four Commanders and the Last Great Naval Campaign, 1941-1945	Thomas, Evan	Journalist and historian Thomas writes with a knowing feel for the clash of cultures as he follows four men through the naval war of 1941-1945 in the South Pacific: Admiral William ("Bull") Halsey, the macho, gallant, racist American fleet commander; Admiral Takeo Kurita, the Japanese battleship commander charged with making what was, in essence, a suicidal fleet attack against the American invasion of the Philippines; Admiral Matome Ugaki, a self-styled samurai who was the commander of all kamikazes and himself the last kamikaze of the war; and Commander Ernest Evans, a

2016.384.001	Beyond the Medal : A Journey from Their Hearts to Yours	Lemon, Peter C.	The Congressional Medal of Honor is the highest military decoration awarded to members of the Armed Forces. This book focuses on the living Medal of Honor recipients, going back to World War II. Each hero shares thoughts on how being awarded the medal impacted his life. There is a picture of each individual and a partial citation from the award. Rather than read it from beginning to end, it is a good book to read randomly. Table of Contents includes the name, rank and branch of service for each individual included in the book. There is also a list of all Medal of Honor winners from 1863-1997, a bibliography, and information about the Congressional Medal of Honor Society and the author.
2016.385.001	USS Independence CVL-22 : A War Diary of the Nation's First Dedicated Night Carrier	Lambert, John G.	This is a comprehensive history of a fast WWII aircraft carrier, and her air groups. The book details the ship from concept through construction, launching, outfitting, shakedown and entry into the great Pacific war, where the CVL-22 would earn Eight Battle Stars. CVL-22 participated in strikes against Japanese held Marcus and Wake Islands, then Rabaul on its way to the Gilbert Islands. After healing from extensive torpedo damage off Tarawa, USS Independence reemerged as our nation's first dedicated night carrier. Follow the story of the ship and her aviators in action against the Japanese Empire in the Philippines, Okinawa, Indochina, and

			onward to the waters off Japan. Squadrons that flew off the USS Independence included: VF-6, VF-21, VT-21, VC-22, VF-22, VT-22, VF-27, VT-27, VFN-41, VTN-41, VF-46, VT-46 (and VF -33 for one day at Rabaul). First released at the ship's reunion in September 2011 the book has been extremely well received by the crew members and their families. This is a revised "Enhanced Edition II" with 89 additional pages (from the First Edition). The glossy hardcover 8.5" X 11" book has roughly 350 photos, and 40 maps, charts and diagrams and an extensive index.
2016.386.001	American Fighter Aces Album, The	Hess, William N. (ed)	Biographies and portraits of all American fighter aces from WWI to 1978.
2016.387.001	Attack on Taranto, The	Schofield, B. B. (Brian Betham)	In this book, the author traces briefly the development of British naval aviation from its early beginnings in 1912, through its part in World War I, the frustrations of the inter-war years, to the conception and execution of the attack which added lustre to its name. In a final chapter the author describes the heavy price subsequently exacted by the German Luftwaffe and the Italian Regia Aeronautica in a combined all-out but unsuccessful attempt to sink the aircraft carrier, HMS Illustrious, from which the attack on Taranto had been launched two months previously. The British Fairey Swordfish torpedo bomber was used in the attack.
2016.387.002	Jane's Naval History of World War II	Ireland, Bernard	Naval warfare played a decisive role in deciding World War II. In this new study, naval historian Bernard Ireland reveals the critical elements that determined the war at sea. he investigates how German U-boats came perilously close to snapping Britain's Atlantic lifeline, and why the submarines were eventually defeated. By contrast,

Object ID	Title	Author	Summary
			American submarines inflicted such devastating losses on Japanese merchant shipping that the Japanese war economy collapsed. In Europe and the Pacific, the Allies had to develop new techniques of amphibious warfare if they were to defeat their opponents. Airpower came to dominate the naval war: growing from a useful adjunct to fleet operations, it became a decisive weapon in itself, relegating the great battleships to subordinate roles. Airpower, convoys, amphibious assaults and submarine operations: these were the vital areas of the naval war. Failure in any one element would mean losing the war.
2016.387.003	Great Warplanes of the 1980s, The	Yenne, Bill	The aircraft introduced during 1975-1985 are designed to carry a wider variety of weapons for a wider variety of missions. The cockpits are designed for maximum visibility and ease of operation. The increased use of non-metallic materials such as carbon-epoxy in the structure of the airframe itself has resulted in a much lighter aircraft which are much harder to detect on radar. the large cumbersome avionics systems of earlier jets has been replaced with more compact systems, thanks to the microchip. This book covers the world's top 10 combat aircraft: British Aerospace/McDonnell Douglas Harrier Grumman F-14 Tomcat Mikoyan-Gurevich MiG-23 and MiG-27 McDonnell Douglas F-15 Eagle Panavia Tornado General Dynamics F-16 Falcon Saab Viggen McDonnell Douglas F/A-18 Hornet Dassault Breguet Mirage 2000 Rockwell B-1

			of their captors. The author reveals the survivors' haunting experiences, from the atrocities perpetrated during the Bataan Death March and the building of the Burma-Siam railroad to descriptions of disease, torture, and execution.
2016.387.010	Incredible Victory	Lord, Walter	By any standards they were hopelessly outclassing. No battleships, only eight cruisers, three carriers and shore defenses including guns from the turn of the century. They knew little of war. None of the Navy pilots on one of the carriers had ever been in combat; nor had any of the Army fliers. Of the Marines, 17 of 21 new pilots were just out of flight school. Their enemy was brilliant, experienced and all-conquers. They had equipment problems. They took crushing losses. They had no right to win. Yet they did, and in doing so, they changed the course of the war. More than that, they added a new name-Midway- to that small list that inspires men by shining example.
2016.387.011	American Naval History : An Illustrated Chronology of the U.S. Navy and Marine Corps, 1775-present	Sweetman, Jack	This new edition of Jack Sweetman's popular chronology of American naval history brings his original 1984 publication up to date with the addition of events through March 1991. Nearly encyclopedic in its coverage and supported with more than two hundred illustrations, the book presents a concise year-by-year summary of significant U.S. Navy and Marine Corps activities from the Revolution through Desert Storm. Along with the expected listings of battles, important operations, the capture of enemy warships, and the loss of American vessels, readers will find entries on major explorations, naval appointments, the introduction of new ship types, and even events external to the sea services that have influenced naval affairs. But this book does much more than simply catalog facts. In

Object ID	Title	Author	Summary
			his introduction Professor Sweetman explains that after teaching American naval history for nearly two decades, he has learned that the facts do not necessarily speak for themselves. With this in mind, he has often included both descriptions of events and explanations of their consequences. When dealing with episodes of particular significance, he has provided a series of entries to show stages of development and give a sense of continuity. New to this edition are entries on the apprehension of the Achille Lauro hijackers, the Walker spy case, the USS Iowa turret disaster, as well as timely coverage of the war against Iraq, from the buildup of forces during Operation Desert Shield to the homecoming of the first American troops. This book is an ideal reference tool — four separate indexes allow immediate access to material — to keep nearby while writing. It also can provide hours of enjoyment to those who like to peruse naval history. Jacket illustrations: Top: "The Constitution and the Guerriere," by Michel Corne (Courtesy U.S. Naval Academy Museum) Bottom: "Those Last Critical Moments," by William Phillips 1987 The Greenwich Workshop, Inc., 30 Lindeman Dr., Trumbull, CT 06611 Jacket design: Karen L. 			against him; but finally on May 19, 1998 Robert Ballard and his team located the remains of the U.S.S. Yorktown. The book also tells the a synopsis of the Battle of Midway.
2016.387.013	Divine Wind, The : Japan's Kamikaze Force in World War II	Inoguchi, Rikihei	The whole true story of the Jananese suicide pilots of WWII. Told by Captain Rikehi Inoguchi, Commander Tadashi Nakajima, and Roger Pineau.
2016.387.014	Navy in San Diego, The	Linder, Bruce	Traces the 150-year history of the U.S. Navy's association with the city of San Diego beginning with the capture of the city by the Navy on the first day of the Mexican War. Includes a collection of vintage phtography, many never previously published.
2016.387.015	Aircraft Carriers	Preston, Antony	The aircraft carrier is the archetypal weapon of the twentieth century. Born in World War I it became the most significant weapon during the Pacific campaign in World War II. Today it is still a powerful tool in the hands of both the American and Soviet navies. The history of the "Aircraft Carriers" describes not only their use throughout many conflicts. Technical descriptions of the development of the planes and the ships themselves are illustrated through cut-away diagrams and line drawings. The aircraft carriers, the men who fought on them, the planes that flew from them and the battles in which they fought are brilliantly described by Britain's foremost naval historian, Antony Preston, author of numerous works such as "Destroyers," "U-Boats," "Navies of World War II" and "Navies ofthe American Revolution." With over 300 photographs in colour and black and white, together with drawings, charts and maps, the history of the "Aircraft Carriers" should prove to be a collector's item for all naval buffs and students of war at sea in the twentieth century for many years to come. USS Midway on front jacket cover.

Object ID	Title	Author	Summary
			Antony Preston was born in England in 1938. Educated at King Edward VII School and the University of Witwatersrand, Johannesburg, South Africa he returned to England to become a Research Assistant in charge of Admiralty records at the National Maritime Museum, Greenwich. He has written "Send a Gunboat," "V and W Destroyers," "Battleships of World War I," "Submarines," "Navies of the American Revolution," "An Illustrated History of the Navies of World War II," "Destroyers" and "U-Boats" and was co—translator of the "Warships of the Japanese Navy 1868-1945." He is a regular contributor to leading naval historical journals, and for years was an editor of the "Warship Profile" series. A consultant to a number of publishing groups in naval and historical affairs, he is the editor of the naval history quarterly "Warship" and was deputy editor of "Navy International" until his recent appointment as naval editor of "Defence" magazine. He is regarded as one of the world's leading authorities on navies, ships and war at sea. (from dust jacket flaps) (Cover photo: USS Midway (CV -41) and Knox-class frigate.)

2016.387.016	Air War in Vietnam	Chinnery, Philip	For 30 years the United States was involved in the affairs of Vietnam, from the end of World War II until the final collapse of the South in 1975. At first America simply provided advisors, then in 1961 limited air support and in 1965 committed combat troops and a vast amount of air power. The United States committed airplanes and helicopters of the US Air Force, US Navy, Marine Corps and Army units. Their

Object ID	Title	Author	Summary
			losses amounted to over 8000 aircraft by the end of the war. The wars proved an essential proving ground for previously untried aircraft and technologies like the F-4 Phantom, 'smart' guided bombs, Wild Weasel defence suppression aircraft and many others. Perhaps the greatest innovation was the extensive use of the helicopter by the American forces. Helicopters lifted troops into action, removed them when plans went wrong, scouted for enemy positions, and acted as gunships and air ambulances. Air War in Vietnam is a fascinating account of the whole of this most controversial struggle. Phil Chinnery's lively and authoritative text is complemented by 230 carefully-chosen illustrations in color and black and white. No aviation enthusiast will want to be without Air War in Vietnam. Front cover: Huey transports and gunships return to a field site at Tay Vinh. Back cover: F-4 Phantoms of the 432nd TRW en route to a target from Udorn in Thailand. (from dust jacket flap) (USS Midway mentioned on p. 168, 182-183)
2016.387.018	Battleships : United States Battleships in World War II	Dulin, Robert O.	This book is a definitive technical history of all battleships and battlecruisers of the U. S. Navy designed or even conceived since the early 1930s. It covers not only the design and construction of such ships, but also the operational careers of all the active ships to their very end. Although there is extensive literature about battleships and battlecruisers, data published so far on their technical characteristics have been extremely limited and often contradictory. Virtually no effort has been made to describe the ships'

Object ID	Title	Author	Summary
			development and construction. Here, for the first time, is a study that presents complete plans as well as extensive technical data covering the characteristics and performance of these noteworthy ships. A chapter is devoted to each class of U. S. battleship and battlecruiser. In discussing each class, the authors explain in great detail the design concept under which they were built. They describe the structural features, armor, armament, engineering plant, stability and damage control, underwater protection, electronics installations, and habitability of each ship. This book also offers a plan view and outboard profile, armor profile, inboard profile, and the hull lines of each class. There are many photos depicting ships of all the various classes. This, then, is the story of the ships once regarded by the powers of the world as the ultimate naval weapon, vessels so extraordinary that they were termed "capital ships." Until World War II a nation's relative naval power was judged on the number and condition of its capital ships. The number, characteristics, and availability of capital ships fundamentally influenced foreign policy and naval strategy. Today, these ships are merely symbols of a bygone age of sea power. Although there are no longer any battleships in commission in the U. S. Navy, an air of fascination still surrounds these giants, and some of them have been accorded near-legendary places in naval history. The Iowa-class ships and the South Dakota (the famed "Battleship X" of World War II communiques) fall into this category. The authors have provided an indispensable source of information for all who have an interest in naval history and

Object ID	Title	Author	Summary
			sea power. Their research over a period of more than a decade has made extensive use of authoritative (and frequently official) source material, much of has never before been published. "Battleships" is a fascinating study and analysis of a kind of warship that once ruled supreme upon the seas, but will probably never be sailed again. (from dust jacket flap:)
2016.387.020	War on the Waters : The Union and Confederate Navies, 1861-1865	McPherson, James M.	When people think about the Civil War, they normally think about the military achievements, not the naval achievements. Yet the Union Navy won some notable victories, including the victories in Mobile Bay, New Orleans and the taking of the Mississippi River, and the effectiveness of the blockade. Although the Confederate navy could not match the Union navy in size, it did develop "ironclad technology, torpedoes (naval mines), and a submarine that was able to sink a Union warship." Contents Mobilizing for war -- Establishing the blockade -- We've got New Orleans -- The river war in 1861-1862 -- The Confederacy strikes back -- Nothing but disaster -- A most signal defeat -- Unvexed to the sea -- Ironclads, torpedoes, and salt, 1863-1864 -- From the Red River to Cherbourg -- Damn the torpedoes.

2016.400.001	Q-ships Versus U-boats : America's Secret Project	Beyer, Kenneth M.	In a desperate attempt to counteract the deadly onslaught of U-boats in the Atlantic, President Franklin D. Roosevelt initiated a secret project in 1942 that called for the use of decoys disguised as merchant ships. These heavily armed warships were referred to as Q-ships, and very little information about them has been recorded over the past fifty years. Now a U.S. naval officer who served in one of the mystery ships, a decoy configured freighter named the USS Asterion, lifts the shroud of secrecy that has surrounded the mission for so long. His book examines for the first time the origins and operations of Project LQ, as the secret plan was known. Described as the most self-destructive operation undertaken by the U.S. Navy in World War II, the project had very limited success. The only surviving officer of a Q-ship to chronicle details of the project, Kenneth Beyer draws on his personal experiences as well as information uncovered during years of research in U.S., British, and German records and interviews with participants on both sides. When readers come to his vivid account of the Asterion's first war patrol and its dramatic meeting with U-123 off the Florida coast, they will quickly understand why Samuel Eliot Morison referred to service in these mystery ships as more hazardous than in any other branch of the Navy.

Object ID	Title	Author	Summary
			And the author's frank analysis of the U.S. Navy's lack of knowledge and skill in anti-submarine tactics early in the war helps explain the U-boats' initial success against merchantmen along America's Atlantic coast. In addition to his own ship's operations, Beyer has reconstructed events aboard the other decoy freighter, USS Atik, which sank with all hands during the bitter engagement with U-123. The author's analysis of U-boat logs has led him to suspect the involvement of a second German submarine, U-105, in the ultimate destruction of the decoy ship. Though all the facts are not known, this plausible account of the loss pays tribute for the first time to the valor of those who sacrificed all. The book also takes the reader aboard the U-boats as they hunt and attack their prey, paying particular attention to the legendary U-123 and the incredible skill and luck of its commander, Reinhard Hardegen. Several never before-published charts of U-boat maneuvers are provided along with an evaluation of specific U-boat attacks.

2016.403.001	Titans of the Seas : The Development and Operations of Japanese and American Carrier Task Forces During World War II	Belote, James H.	Titans of the Seas describes the development and operations of the greatest innovation in naval warfare since WWI --- the aircraft carrier task force that extended the range and effectiveness of naval power beyond anything known before. The authors trace the development of the carrier and carrier aircraft and naval strategy between the two world wars. They describe the ultimate example of carrier warfare --- the surprise attack on Pearl Harbor --- and the subsequent Japanese sweep of the southwest Pacific and Indian Ocean. Follows the course of the carrier war in the Pacific through the battles of the Coral Sea, Santa Cruz, Eastern Solomons, Midway, and the climactic Battle of the Philippine Sea in June 1944 --- the battle that virtually destroyed Japanese carrier power and sealed the fate of the war.
2016.403.002	Red Sun Setting : The Battle of the Philippine Sea	Y'Blood, William T.	The author has written the definitive account of what many regard as the most controversial conflict of the war in the Pacific, the Battle of the Philippine Sea. Much of the book deals with the aerial aspects of this great naval conflict, from the dogfights, to the persistent attacks on the Japanese carriers, to the frantic efforts of the returning fliers to land on friendly carriers.. This book satisfies the need for an intensive study of what many believe to be a major turning point in the Pacific War. It tells the story of this great battle

Object ID	Title	Author	Summary
			from the viewpoint of the fliers and sailors who were there on the firing line.
2016.403.003	Battle of Leyte Gulf, The : The Death Knell of the Japanese Fleet	Hoyt, Edwin P.	How a would-be American defeat turned slowly but inexorably into a full-fledged Japanese disaster is the substance of this engrossing book. Using Japanese as well as American eye-witness accounts, quoting admirals, commanders, and enlisted men, the author has woven together the many threads of an immense naval confrontation, a 3 day series of bloody and devastating encounters that has since been described in the history books as "the last great sea battle of WWII."
2016.403.004	Carrier War, The	Reynolds, Clark G.	Contents: 1) Wings for the world's navies, 2) Blunting the Japanese onslaught, 3) Turning point at Midway, 4) Collisions on the road to Tokyo, 5) "We wish for the best place after death," Acknowledgments, Picture credits, Bibliography, Index
2016.403.005	Son of a Preacher : A Hellcat Ace's Memoirs	Hargreaves, Everett C.	A World War II pilot's story of his experiences in fighting the Japanese in the Pacific. He was a multi-ace, one of the few ace-in-a-day pilots. He flew with squadrons VF-2, VF-18 and VF-27.
2016.403.006	Climax at Midway	Tuleja, Thaddeus V.	The Battle of Midway, fought on 4-6 June, 1942 remains the most dramatic and decisive engagement of the entire Pacific struggle. It is the event which marked the turning point in the fortunes of both antagonists in the war--the end of Japan's offensive action at sea and the beginning of America's steadily accelerating march to victory. This is the story of that battle.
2016.403.007	Fighter Squadron at Guadalcanal	Brand, Max	An account of the 212th Marine Fighter Squadron's operations at Guadalcanal in 1942. A treasure trove of personal and historical detail of the pilots and ground crews of the 212th, as well as with Marine infantrymen and Navy Personnel. Stories of thrilling, yet deadly, air-to-air combat

2016.403.008	Marine Dive-Bomber Pilot at Guadalcanal, A	McEniry, John Howard	This book chronicles the wartime experiences of the author, who served as a Marine Corps pilot in the South Pacific during World War II. Colonel McEniry describes in this book the organization and deployment of a Marine dive-bombing squadron in th early days of the war and follows the squadrons into actions in November and December of 1942, including the battle of Guadalcanal.
2016.403.009	No Higher Honor : The U. S. S. Yorktown at the Battle of Midway	Nesmith, Jeff	On June 4, 1942, the U.S. aircraft carrier Yorktown, fought one of the great naval battles of all time -a battle that historians say turned the momentum to the war in the Pacific away from Japan in favor of the United States. The Yorktown, already battle damaged, endured waves of assaults and tons of explosives from attacking Japanese airplanes that day. Despite the heroic efforts of her crew, 84 of whom died, the assault proved to be too much for the patched-up ship.
2016.403.010	Fighting Squadron : A Sequel to Dive Bomber	Winston, Robert Alexander	There is a later reprint at 2005.309.074 Subtitled: A veteran squadron leader's first-hand account of carrier combat with task Force 58 by Commander, U. S Navy Robert A. Winston with black & white photographs.
2016.403.011	Little Giants : U.S. Escort Carriers Against Japan	Y'Blood, William T.	These ships, envisioned as hardly more than convoy escorts in the beginning, evolved into remarkably versatile vessels. Yes, they were used to escort convoys, but they also hunted submarines, provided air support for invasion forces, ferried men and planes to far-flung bases, delivered replacement aircraft and pilots to the fast carriers of Task Forces 58 and 38, and worked as troop transports. Despite the great activity of the eighty-six vessels built (some

Object ID	Title	Author	Summary
			finished after the war) to serve all around the world for the United States Navy, their accomplishments, except for one glorious action in October 1944, have never received the publicity and credit that they deserve. Contents: Learning the ropes -- The quickening pace -- Moving west -- Approach to the Philippines -- The return -- "They're shooting us in Technicolor" -- Death from the sky -- Finale at Leyte Gulf -- Divine Wind - two versions -- A covey of Kamikazes -- Visit to a vile island -- The longest battle -- Epilogue.
2016.403.012	Dauntless Marine : Joseph Sailer Jr., Dive-Bombing Ace of Guadalcanal	White, Alexander S.	Joseph Sailer was the author's uncle. White based much of his research on his uncle's letters, diaries, flying logs and other records and left his uncle's unique spellings intact while writing the book. Sailer's love of aviation begin in the 1920s, when he saw a Waco biplane fly overhead. He was in the Marine Corps reserves in the 1930s and had more flying experience than many of the Marine Corps aviators. In 1940 before the US entered WWII, he worked for Sperry and went to England to share the Sperry bombsight with them. After America entered the war, he was given command of VMSB-142, a Dauntless Dive Bomber squadron. During the brief time he commanded the squadron, it became the first squadron to sink a Japanese battleship. Author signed the book on the blank first page.
2016.403.013	Carrier Wars : Naval Aviation from World War II to the Persian Gulf	Hoyt, Edwin P.	Here is the story of the dramatic role played by aircraft carriers in historic battles and maneuvers from the start of World War II to current encounters in the Persian Gulf. Spanning fifty years, this colorful chronicle is drawn from a wealth of previously untapped sources -- including accounts from American,

Object ID	Title	Author	Summary
			European, and Japanese archives. Fast-paced battle stories -- recreating behind-the-scenes actions as well as gripping combat sequences -- are highlighted by sharp eyewitness accounts. Noted military historian Edwin P. Hoyt describes the naval preparations that set the stage for World War II; how Japan's early lead in carrier strategy was undermined as early as Pearl Harbor, subsequently at Midway, and finally by inferior pilot training and manufacturing capacity; how the undervalued escort carrier sealed the fate of the German U-boat, how the powerful American fleet was nearly undone by the desperately heroic kamikazes; and how carrier warfare has evolved in recent decades, contributing to engagements in Korea, Indochina, the Falklands, and the Middle East. Here, brought vividly to life, are the triumphs and tragedies of important battles, the strategies of admirals both great and weak, the politics that so often charted battle plans, and the valiant efforts of sailors and pilots aboard these historic vessels. Once again, Edwin Hoyt achieves a vital and perceptive work of popular history. Edwin P. Hoyt has had a long and varied career as a journalist and historian. In the 1940s, he was a news editor for the United States Office of War Information, a member of their psychological warfare team, and a foreign correspondent for the Denver Post. The author has also been a reporter for the San Francisco Chronicle, a producer-editor-writer for CBS-TV News, and assistant publisher of American Heritage. He currently divides his time between London and Asia, writing and developing films. Among Hoyt's previous books are The Rise of the Chinese

2016.403.014	Carrier Battles : Command Decision in Harm's Way	Smith, Douglas V.	In Carrier Battles, Douglas Smith studies the fateful decisions made by commanders in analyzing the largest naval campaign the world has ever known. It looks at the 5 carrier battles of WWII -- Coral Sea, Midway, the Eastern Solomons, Santa Cruz, and the Philippine Sea -- and evaluates the primary commanders to determine the extent to which their inter-war education at the US Naval Academy and Naval War College translated into their decision processes.
2016.403.015	Tall Dogs and Hellcats : A Navy Photographer's Pacific War.	Swope, Robert	From the introduction: "Tall Dogs and Hellcats, A Navy Photographer's War" is a book based on the photographs of U.S. Navy photographer John Marshall Riddle. Riddle was in the Navy from 1942 through 1945 and spent two tours of duty in the Pacific War. On both tours he was a member of Air Group Two, one of the most famous and successful air combat units of the war. His first tour was on the Essex class USS Hornet (CV-12) and his second tour was on the USS Shangri-La (CV-38). Riddle saw much combat action while serving on the Hornet and very little while serving on the Shangri-La. By the time the Shangri-La was in the war, much of the Navy air combat was done by ground based units. During both cruises, Riddle accumulated scores of photographs. The first cruise included many aerial photographs as well as

Object ID	Title	Author	Summary
			informal snapshots. The second cruise included many photographs of occupied islands. This book is based on Riddle's photographs, which represent a personalized navy photographer's view of the war.
2016.403.016	Carrier Down : The Sinking of the U.S.S. Princeton (CVL-23)	Bradshaw, Thomas I.	After a bomb was dropped on the Princeton, fires and explosions raged aboard. Its fire-fighting systems were immediately destroyed, and other ships had to come alongside to provide water hoses. Finally, a tremendous explosion rocked the Princeton, ripping off her stern and moving the Cruiser U.S.S. Birmingham more than fifteen feet sideways through the water, raking her with chunks of steel, shrapnel and other debris. Carrier Down is the story of the Princeton and the valiant efforts to save her and her crew.
2016.403.017	Lexington Goes Down, The : The Last Seven Hours of A Fighting Lady	Hoehling, Adolph A.	This book is more than the tragedy of a fallen behemoth. Rather it is the story of man's indomitable spirit pitted against overwhelming odds. To effect such a canvas, the actions and thoughts of individual crew members during the crisis have been recorded. Survivors have been interviewed and naval authorities consulted.
2016.403.018	Ace! : A Marine Night-Fighter Pilot in World War II	Porter, R. Bruce	Bruce Porter's life as a Marine combat fighter pilot, including aerial combat over the Solomons and Okinawa during WW II.
2016.403.019	Phantom : A Legend in Its Own Time	Mason, Francis K.	From the Introduction: "In service with America's armed service, accustomed to enjoying the fruits of world technological leadership, the McDonnell Phantom II fighter represented--for all its extraordinary angularity--an astonishing masterpiece of design integrity and commercial persistence. It moreover reversed the time-honored, but hitherto apparently irreversible convention whereby naval air forces had to rest content with deck-landing adaptations of aircraft primarily evolved for shore-based operation."

Object ID	Title	Author	Summary
2016.403.020	Danger's Hour : The Story of the USS Bunker Hill and the Kamikaze Pilot who Crippled Her	Kennedy, Maxwell Taylor	From the Introduction: "Two cultures, American and Japanese, collided aboard the Bunker Hill that day. It was and is almost impossible for Americans to comprehend cultural forces that would obliterate the will to live. How could so many young men train for months for a mission whose success necessarily meant their own death? Particularly when the suiciders knew Japan was going to lose the war. As America struggles to come to terms with a global war on terror, and the reality of suicide bombings around the world, it is vital to understand the cultural forces that can overcome the basic desire to survive."
2016.403.021	Hell in the Heavens	Foster, John M.	An account of the author's experiences as a combat fighter pilot in the South Pacific in 1943 and 1944.
2016.403.023	Japanese Naval Aces and Fighter Units in WWII	Hata, Ikuhiko	This book provides information on Japan's naval fighter pilots, their aircraft, and their war that is simply not available elsewhere in English.
2016.403.024	Proud American, A : The Autobiography of Joe Foss	Foss, Joe	Joe Foss was a man of action. He had been a WWII Marine Corps fighter pilot, two-term governor of South Dakota, first (and only) commissioner of the American Football League, and President of the National Rifle Association. His significant memories ranged from getting the Congressional Medal of Honor from President Roosevelt in 1945 to being interviewed by Lawrence Welk at a fund-raiser at the Ambassador Hotel in Los Angeles during his second term as governor. His wife co-wrote the book.
2016.403.025	Devilbirds : The Story of United States Marine Corps Aviation in World War II	De Chant, John A.	This is the fast-moving story of Marine Corps aviation in World War II. During the War, the air arm of the Marine Corps supported 55 amphibious landings, shot down nearly 2400 Japanese planes and sank some 900 ships. Marine aviation in World

Object ID	Title	Author	Summary
			War II had more than its share of unsung heroes. There was the young lieutenant who earned his Medal of Honor and title of "One Man Air Force" by shooting down 20 Japanese fighters in a 17 day period, only to die in a strafing run after his 25th victory. And there was the pilot who bailed out after his plane became disabled in a dog fight, but whose parachute failed to open. Amazingly, he survived a 3000 foot fall into the water, but spent a year recovering from his injuries. And there were many more, as the pages of this book make clear. Since the author's narrative is based largely on first hand accounts by the actual participants in the air war, the action is fast-paced and vivid.
			The book also includes a history of the genesis and development of Marine Corps aviation prior to World War II.
			Illus. with 32 Pages of Photographs

2016.403.027	Warriors of the Sea : The Way of Life in the U. S. Navy	Stirling, Yates	the home islands -- Setting sun: the fall of the Imperial Japan Instructional book regarding life of a Navy sailor. It is geared towards juveniles and told as a story narrative. It gives information regarding life at sea, uniforms, ship information.
2016.403.028	Clash of Titans : World War II at Sea	Boyne, Walter J.	From Germany's initial clashes with Great Britain in the Pacific to Japan's surrender on the battleship Missouri in Tokyo Bay, World War II was waged largely at sea. Boyne recounts all the famous sea battles of the war, weaving them together into a gripping narrative that illuminates the strengths and weaknesses of each navy. Thoroughly researches and vividly written, Clash of Titans is a comprehensive and insightful history of the strategies, technological advances, and heroism of naval warfare in World War II.
2016.403.029	Winged Samurai : Saburo Sakai and the Zero Fighter Pilots	Sakaida, Henry	Biography about the trials and tribulations of Saburo Sakai, one of Japan's greatest fighter pilots, and other Japanese pilots during World War II. It also gives a photo history of the Japanese & American pilots who flew against each other in the Pacific. There are accounts of pilots and who shot down who, by painstaking research on the part of the author of Japanese and Allied victory/loss records.
2016.403.031	Sun Downers : VF-11 in World War II	Tillman, Barrett	The Sun Downers are one of the Navy's most famous fighter squadrons, having seen action - and scored kills. Tillman chronicles VF-11's World War II exploits during World War II. A new fighter squadron that was being formed at San Diego's North Island Naval Air Station in the first week of August 1942. The squadron was designated VF-11. It was the recipient of several displaced pilots. They were deployed to Hawaii. They had a comprehensive training program emphasizing aerial gunnery, strafing and later

2016.403.032	Carrier Air Group 86 - 1944-1945	Camp, Robert Jr. (ed)	"group gropes." This is a reprint of the 1946 edition. Pictorial and textual account of Air Group 86 from its formation of the U.S. east coast in 1944 through combat operations in the Pacific Ocean in 1945. Pilot biographies included. Great photos of the USS Wasp CV-18. Great photos of the bombing of Japanese Carriers Hand typed note with all the crew's names and addresses, separate insert
2016.403.033	Admiral Halsey's Story	Halsey, William	Adm Halsey's own story of the Pacific War. Takes reader from Adm Halsey's childhood, through his midshipman days at Annapolis, to the dramatic moment he made good his brag in Tokyo Bay.
2016.403.034	Carrier Clash : The Invasion of Guadalcanal and the Battle of the Eastern Solomons, August 1942	Hammel, Eric	Beginning with a detailed historical description of the aircraft carrier, the development of carrier-air tactics, the training of carrier pilots, and the numerous operational considerations that impacted carrier-based aerial combat, this book takes the reader into the air with intrepid U.S. Navy fighter pilots as they defend their ships and the Guadalcanal invasion fleet against determined Japanese attacks of August 7 and 8, 1942. After the stage has been set for the August 24 battle, the reader takes off again, this time in the cockpits of the U.S. Navy Dauntless dive-bombers as they attack the Japanese light aircraft carrier Ryujo, which is hit with their 500-pound bombs. Meanwhile, Wildcat fighter pilots valorously defend the American aircraft carriers against a determined onslaught of Japanese Val dive-bombers. Hammel's account of bomb hits on the USS Enterprise and the heroic firefighting and rescue efforts of her crew is especially compelling.
2016.403.035	Carrier Strike : The Battle of the Santa Cruz Islands, October 1942	Hammel, Eric	The Battle of the Santa Cruz Islands, a strategic naval action in the bitter Guadalcanal Campaign, was history's

Object ID	Title	Author	Summary
			fourth carrier-versus-carrier naval battle. Though technically a Japanese victory, this battle proved to be the Empire of Japan's last serious attempt to win the Pacific War by means of an all-out carrier-based, naval aviation confrontation. Of the four Japanese aircraft carriers that fought the Battle of the Santa Cruz islands, only one survived the war. See the companion book, Carrier Clash: The Invasion of Guadalcanal and the Battle of the Eastern Solomons, August 1942 also

			age carrier aviation. A new look at the legends of William Halsey and Douglas MacArthur; the relationships and rivalries among such admirals as Nimitz, King and Spruance; and above all the sacrifices made by the Navy and Marine pilots whose valor gave ever higher meaning to the call of duty.
2016.403.040	Ship That Held the Line, The : The U.S.S. Hornet and the First Year of the Pacific War	Rose, Lisle Abbott	USS Hornet and its participation in the first year of the Pacific war, including the Doolittle raid, the Battle of Midway, and its demise and sinking at the Battle of Sant Cruz.
2016.403.041	Shades of Blue : US Naval Air Power Since 1941	Bowman, Martin W.	(from Amazon.com:) To protect commercial, political, and social interests on every continent, the U.S. relies heavily on its fleet of massive aircraft carriers and the squadrons of spectacular aircraft aboard each. In fact, a single Nimitz-class nuclear-powered carrier packs a bigger punch than the combined air, sea, and land forces of most countries. This book examines the dramatic developments that have taken place in U.S. Naval aviation.
2016.403.042	Zoomies, Subs, and Zeros	Lockwood, Charles A.	It was decided that a vital need for morale and rescue purposes could be fulfilled by stationing submarines at points close to the target areas in order to rescue aviators shot down or forced to hit the silk. Thus, in the teeth of enemy shore fire and low-level bomber attacks, the daring Lifeguard League of rescuing submarines was born.
2016.403.043	Thunder Gods : The Kamikaze Pilots Tell their Story	Naito, Hatsuho	From Publishers Weekly The Thunder Gods were a Japanese naval-aviation unit trained for one-way missions in flying bombs called the Okha , which were launched from a mother-plane. Employed mostly in the 1945 Okinawa campaign, they sank one U.S. destroyer at a cost of 438 pilots and crew members. The author, who took part in the wind-tunnel testing of the Okha , describes the flying bomb's conception,

Object ID	Title	Author	Summary
			development and the training of the pilots. Volunteers were categorized as Compliant, Eager, Very Eager and--if they signed their application in blood --Earnest. Missions are described from the mother-plane crew's point of view or by Okha pilots who were not launched at the target for one reason or another. More fully than in other recent books on kamikazes , Naito explains the spiritual dimension of the kamikaze phenomenon and its complicated effect on individual pilots. Photos. BOMC selection; paperback rights to Dell. Copyright 1989 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. From Library Journal In the summer of 1944, the Japanese military was short of materiel, and the American Navy was on its way. Reluctantly, the high command decided to institutionalize the ad hoc practice of suicide attacks, and special attack units were formed and trained to crash bomb-laden planes into the American ships. This grimly inexplicable turn of tactics killed about 4500 young Japanese pilots and caused serious damage to the U.S. advance in the Pacific. The approach taken by the author is more compassionate than earlier histories, now at least a decade out of print, and concentrates on the 721st Flying Corps. The poignancy of these sacrifices, and their obvious belief that they would save their nation, make those inconceivable acts more comprehensible, and demonstrate the astonishing breadth of the human experience in battle. Cautiously recommended. - Mel D. Lane, Sacramento, Cal. Copyright 1989 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title.

2016.403.044	Carrier Warfare in the Pacific : An Oral History Collection	Wooldridge, E. T. (ed)	This book records the exploits of the men who fought the war in the air and on the sea, including pilots and air crewmen of carrier squadrons, officers and men of the ship's company, and admirals and their staffs. These compelling personal accounts reveal the behind-the-scenes planning and operations for six major carrier-versus-carrier battles: Coral Sea. Midway, Eastern Solomons, Santa Cruz Islands, Philippine Sea, and Leyte Gulf.
2016.403.045	Fly Navy : Naval Aviators and Carrier Aviation : A History	Kaplan, Philip	Author describes the first ramshackle seaplane carriers built during immediately prior to the advent of World War I all the way through the nuclear powered supercarriers. He describes the planes that have flown on these carriers, from the Swordfish biplanes that devastated the Italian fleet at Taranto, the Hellcats that swept the Japanese from the skies of the Pacific, and the Hornets, Hawkeyes, and Sea Harriers of today.
2016.403.046	Flight of Jesse Leroy Brown, The	Taylor, Theodore	Jesse was raised in a poor but loving family and instilled with values of dignity, education, and perseverance even in the midst of deeply entrenched segregation. A star athlete and an outstanding student, Jesse turned a deaf ear to everyone who told him that he should attend a black college, or that he didn't stand a chance of becoming a Navy pilot. Undeterred, he made his way from the deep South to the campus of Ohio State University. Then, defying the wishes of his family and an unwritten rule of racial exclusion, he qualified for the Navy reserve and was accepted into the Naval Air Training School at Glenview, Illinois-the first black man to enter the program. On March 18, 1947, late morning, like a bird, like a kite, like an impossible dream, Jesse Leroy Brown was flying. While other applicants-many

Object ID	Title	Author	Summary
			from upper-class backgrounds--were weeded out of the rigorous qualifying process, Jesse forged ahead, often directly in the face of shameful racism and hostile superior officers. When he arrived at the cradle of Naval aviation in Pensacola, Florida, in 1947, he knew the washout rate was high and the odds were stacked against a man openly referred to as "nigger." But Jesse Leroy Brown had lots of practice beating the odds, and now he was on his way to becoming the first black man to fly a Navy fighter and make a carrier landing. He was also on his way to becoming an American hero over the battlefields of Korea. The Flight of Jesse Leroy Brown is both a stirring story of a man breaking historic racial barriers and a thrilling tale of Naval carrier aviation. Award-winning author Theodore Taylor, a master of adventure on land and sea, has written a biography that will speak to both those who love the excitement of combat in the air ... and to anyone who has ever dreamed the impossible dream. Jesse Leroy Brown was raised in the segregated South by a hard-working, loving family who instilled values of dignity, education, and perseverance. A star athlete and an outstanding student, he was determined to become a Navy pilot, although such a thing was unheard of for a black man in the 1940s. Undeterred, he entered Ohio State University, rather than a black college, and was able to qualify for the Navy reserve and was accepted into the Naval Air Training School at Glenview, Illinois. Despite racism, and open hostility by many of his superior officers, he finally reached his goal, flying a Navy fighter plane and landing it on a carrier--the first African American ever to do so. Publication Date: November 1, 1998

2016.403.047	Greatest Fighter Missions of the Top Navy and Marine Aces of World War II	Sims, Edward H.	The actual shooting of the naval war in the Pacific was waged almost exclusively in the air. In the great naval battles from Midway to Okinawa it was plane against ship, and, ultimately, plane against plane. The aircraft carrier replaced the battleship as the queen of the fleet, and even in the painful American counteroffensive, island-hopping from Guadalcanal to Okinawa, it was the airplane--observing, bombing and raiding enemy bases--that paved the way for the Marine and Army land forces. Sequel and companion to American aces (1958)
2016.403.048	Kamikazes, The	Hoyt, Edwin P.	A powerful, incisive portrait of the men who carried out the Japanese suicide missions during the Pacific campaign of World War II, and their role in prolonging the war.
2016.403.049	MiG Master : The Story of the F-8 Crusaders	Tillman, Barrett	Foreword by Vice Admiral James B. Stockdale, U.S. Navy (Ret.) (from dust jacket flap:) Described as a "thoroughbred" worthy of all the care it demanded, the Chance Vought F-8 Crusader served as one of the most capable and long-lived aircraft in naval aviation history. It was designed as an air superiority fighter, a "gunfighter" armed with four 20-mm cannon rather than air-to-air missiles. Eventually the Navy adapted the Crusader to carry many other kinds of armament. It also served in other roles such as photo recce, strike, and experimental. Known for its speed, the Crusader was the first production aircraft to exceed 1000 mph in level flight. Future astronaut and senator John Glenn flew the F-8 in "Project Bullet," setting a world record for crossing North America in three hours and twenty-three minutes.

Object ID	Title	Author	Summary
			The F-8 compiled a distinguished combat record in Vietnam, scoring the highest kill ratio of any U.S. fighter in the war. According to one pilot, "Every F-8 jock I knew had one big ambition. We all wanted to bag five MiGs with our 20-millimeters, never firing a missile, then go back to Miramar and lord it over the F-4 drivers." The Crusader continues to serve today as a photo reconnaissance aircraft in the U.S. Navy, and as a fighter in the French and Philippine navies. Featured are: • a design and construction history of the F-8 • F-8 armaments • Vietnam operations, including a chapter devoted to MiG battles • extensive appendices that furnish details of F-8 deployments, pilots, and engineering • over 70 photos Barrett Tillman is a noted writer on naval aviation. His previous books include "biographies" of the Dauntless, Hellcat, Corsair, and Avenger.

2016.403.050	Flying with Iron Angels : The Diaries and Memories of Navy Carrier Pilots Fighting the Pacific War in 1944 : Carrier Air Group Fourteen and the U.S.S. Wasp CV-18	Houston, Charles	The Iron Angels were Navy fighter pilots who flew the Grumman Hellcat to escort and protect our dive bombers and torpedo planes. Here is a collection of personal diary accounts of their daily activities, interspersed with today's memories of these same veterans as they review their adventures of a half-century ago. The USS Wasp and Air Group 14 operated with the Fast Carrier Task Force during the most intensive naval combat of the Pacific War, supporting the invasions of Saipan, Tinian, Guam, Palau, Morotai and all the Philippine Islands, as well as attacking Wake, Marcus, Pagan, Rota, Iwo Jima, Formosa, Okinawa and fighting the Japanese fleet twice--the

Flattop Fighting in World War II : The Battles Between American and Japanese Aircraft Carriers

Degan, Patrick

"Outstanding summary of the war in the Pacific...captures attention and is hard to put down... strongly recommended"
- Editorial Review -- Catholic Library World

Book Description -- World War II's naval battles between the United States and Japan have been the subject of many books, popular movies, and documentaries, but the very important story of the fighting between United States and Japanese aircraft carriers is often lost in broader discussions of the Pacific naval war.

The subject of this book is the naval war against Japan , 1941-1945. The entire focus is on clash between the U.S. Pacific Fleet and the Imperial Japanese Navy in the course of four years of warfare. It is the story of the great clash between great fleets, of struggle against lopsided odds, of the introduction of new technologies and the evolution of a whole new paradigm of at-sea warfare and the horrendous cost imposed by admirals who failed to make the conceptual leap soon enough and sent seamen to the deaths by the

Object ID	Title	Author	Summary
			hundreds and even thousands as the result. This work concentrates exclusively on the fighting between the American and Japanese aircraft carriers, examining how strategies were planned and carried out on both sides. Presented are the stories of the USS Hornet, which launched the B-25s of James Doolittle's daring raid of Tokyo in 1942; the USS Yorktown, which suffered fierce attacks during the Battle of Midway; the USS Lexington, which refueled and rearmed Hellcats during the Great Marianas Turkey Shoot; the USS Enterprise, the leader of a motley assortment of cruisers and destroyers left to hold a very precarious line in the campaign for Guadalcanal; and the Japanese battleship Yamato, sacrificed for a suicide mission against 900 aircraft bombers. About the Author Patrick Degan is a writer and researcher from New Orleans, Louisiana. (from Amazon.com)
2016.403.059	Avenger at War	Tillman, Barrett	Grumman Avenger (Bombers)
2016.403.060	U.S. Navy Fighters of WWII	Tillman, Barrett	From Pearl Harbor to Tokyo Bay, the U.S. Navy fighter planes and pilots played a key role in securing an Allied victory in World War II. Complete with 85 color photographs, U.S. Navy Fighters of World War II includes information on: Grumman F4F Wildcats Grumman F6F Hellcats Grumman F7F Tiger cats Grumman F8F Bearcats Vought F4U Corsairs Ships, squadrons, and aircraft groups
2016.403.061	F6F Hellcat at War	Graff, Cory	Descended from the F4F Wildcat (and sometimes called the Wildcat's "big brother"), the Grumman F6F Hellcat debuted with the Pacific Fleet in mid-1943 and soon was taking on

Object ID	Title	Author	Summary
			Japanese Zero fighters. Over the next two years, the Hellcat proved to be the most successful fighter aircraft in naval history--with more than 5,000 air-to-air kills in the Pacific, and the highest kill/loss ratio of any American fighter plane in Army, Navy, or Marine service during World War II. Taking advantage of the Hellcat's combination of easy handling and lethality, more than 300 of its pilots achieved "ace" status. This lavishly illustrated book offers a thrilling look at the Hellcat at war--from its first action in September 1943, when fighters off the USS Independence shot down a spying seaplane, to its service with the British Fleet Air Arm and its part in the invasion of Southern France. Detailing the Hellcat's design and development, telling its pilots' war stories, and tracing the aircraft's adventures through the end of World War II, this book is a fitting and fascinating tribute to a fighter plane whose performance in a few short years remains unmatched in the annals of naval warfare. (Source: Amazon.com)

2016.403.062	F4U Corsair	Veronico, Nicholas A.	F4U Corsair is a superb new history of the design, development, combat record, and air-racing career of the F4U Corsair and all its variants. Through first-person interviews with dozens of Corsair test pilots, combat pilots, ground-crew members, and air-race pilots, the authors take you along on hair-raising combat missions over Japan and Korea and onto the race courses at Cleveland and Reno. These veterans opened their personal photo archives for this book, contributing dozens of never-before-published color and black-and-white photos of their Corsairs, their fellow crews, and themselves. This combination of first-person anecdotes and history on the

2016.403.063	Decision and Dissent : With Halsey at Leyte Gulf	Solberg, Carl	In October 1944, the author of this book, Carl Solberg, was serving in the Pacific as a young air combat intelligence officer on Admiral William F. Halsey's flagship, New Jersey, as three Japanese fleets converged on the Philippines for one of the largest and most complex naval battles of World War II. As Solberg recalls in this compelling memoir, the Japanese Navy's master plan for repelling American invasions had just been captured, translated, copied, and interpreted - but we know now not fully understood. Reportedly, Admiral Halsey had seen the document and ignored it. Solberg explains that his roommate, Lt. Harris Cox, pored over the plan for several nights and with Solberg suddenly came to realize what the enemy's big surface ships were up to at Leyte. The two young intelligence officers urgently tried to warn the admiral on the night of 24 October that by going north after the Japanese carriers he was doing exactly what the enemy wanted him to do. But Halsey had already retired for the night and their message never got through to him. Had it been heeded, their warning might have had a significant impact on the battle. This book offers new insights into the events that led to Halsey's controversial decision to send Task Force 34 north and provides a better understanding of what happened that night. 2016.407.001	Slow but Deadly : WWII Memoirs of an SBD Dive Bomber Pilot	Anderson, Robert E.	Anderson's written memoirs of his time as a World War II, USMC Dauntless Dive Bomber pilot began as something to give to his children who had enjoyed hearing about his World War II adventures. It was published a few years later because the interest in personal anecdotes from World War II survivors had grown. Because Anderson had completed 2 years of college, he was eligible for flight school. "Stage D, the last barrier to advanced flight training using military type aircraft proved to be the most fun of all. Right-side-up gave way to inverted flight. One was given to understand that, not only was it a thrill to level the wings with the horizon at the top of the loop while hanging from a seatbelt, it was a requirement. Occasionally a student would forget to fasten the seatbelt and fall out of the plane at the top of a loop or perhaps an Immelmann. If the parachute worked, it was a sure way of getting to see the old girl friend."

2016.409.001	USS Midway (CVA-41) Voyage 71	Rehr, W. E. (ed)	USS Midway (CV-41) aircraft carrier; lead ship of the class. Pictorial summary of the western Pacific deployment of USS Midway in 1971 including strike operations off Yankee Station in the Tonkin Gulf during the Vietnam War. Departed San Francisco Bay 16 April 1971 with Attack Carrier Air Wing Five consisting of VA -56 (A-7 Corsair IIs), VA-93 (A-7 Corsair IIs), VA-115 (A-6 Intruders), VAW-115 (E-2 Hawkeyes), VF-151 (F-4 Phantom IIs), VF-161 (F-4 Phantom IIs), VAQ-130 Det 2 (EKA-3 Skywarriors), VFP-63 Det 3 (RF-8 Crusaders), and HC -1 (SH-3 Sea Kings) Det 8 deployed aboard. Ports of call included Yokosuka & Sasebo, Japan; Subic Bay, The Philippines; Hong Kong; Hawaii. Includes encounters with Russian naval vessels and Tu-16 "Badger" and Tu-95 "Bear" aircraft. Mistakenly lists October 27, 1945 as commissioning date in "History" - keel was laid on October 27, 1943, commissioning was on September 10, 1945.
2016.409.002	Mission : Seventy-two - USS Midway (CVA-41) - 1972-73	Dowearly, M. M. (ed)	A pictorial account of the western Pacific deployment of USS Midway in 1972/73. The ship departed Alameda 10 APR 72 and returned to Alameda 3 March 1973, 1 week short of an 11-month deployment. Not only was it a long deployment, Midway was deployed 7 weeks ahead of schedule with less than one week's notice. Significant operations included 9 periods of line operations off Vietnam in support of the Vietnam War. Port calls included Pearl Harbor, Subic Bay (multiple), Hong Kong and Singapore. Bob Hope performed on Midway with his troop on 27 December in Singapore. The show was taped and broadcast on U. S. national television on 17 January 1973 as the Bob Hope Christmas Special. CVW-5 was embarked. The airwing consisted of VF-151 (F-4B),

2016.417.001	Washington Navy Yard, The : An Illustrated History	Marolda, Edward J.	The Washington Navy Yard is over 200 years old. During the 19th and 20th centuries, the "Washington Navy Yard was the most recognizable symbol of the United States Navy in the nation's capital. The shipyard built a number of the Navy's first warships and repaired, refitted, and provisioned most of the frigates, sloops, and other combatants of the fledgling naval service. The masts and rigging of the USS Constitution were a common site on the banks of the Anacostia River. Booming cannon became routine in southeast Washington during the mid-19th century as Commander John A. Dahlgren, "father of American naval ordnance," test-fired guns for the fleet..."

2016.418.001	USS Taussig (DD-746) - West Pac Cruise - 1965	Canterine, Tom (ed.)	A pictorial account of the deployment of the Allen M. Sumner-class destroyer USS Taussig (DD-746) to the Western Pacific. On 23 October 1964 she cleared her homeport of San Diego. She operated in the Hawaiian Islands until Christmas and then continued on to the western Pacific. On 6 January 1965, the destroyer joined a task unit built around USS Constellation (CVA 64) off the coast of Japan to begin duty with the 7th Fleet. During this deployment, the warship saw her first tour of duty off the coast of Vietnam, where civil strife was growing steadily in intensity. Taussig's one short patrol at "Yankee Station" in March constituted her only Vietnam service during her ninth deployment since the Korean War. For the remainder of that deployment, she conducted normal peacetime training and patrol operations, including a tour in the Taiwan Strait Patrol. The destroyer departed the Orient on 2 May and, after a stop at Pearl Harbor, reached San Diego on 24 May. Other port calls included Subic Bay, Sasebo, Hong Kong and Kaohsiung. The ship steamed more than 49,000 nautical miles, and the crew consumed almost 35,000 pounds of potatoes.
2016.419.001	Lore of Ships, The	Tryckare, Tre	Beautifully produced large format pictorial history of ship design beginning with the hull design of the Santa Maria to the design of modern warships, merchant and passenger vessels. Includes chapters on navigation and ship handling, a list of important lighthouses, sailor's hobbies and all told through drawings. Kihlberg, Bengt (editor); Gorman, Curt (Art); Nielsen, Per (Lithography)

			and fought through the most momentous conflict in world history. Contents: A New Germany: 1933-1939 - Stricken by humiliating defeat and deep economic depression Germany seeks new hope, pride and prosperity through National Socialism. Adolf Hitler leads the Nazi movement with the fervent support of millions of German citizens. As Europe looks on apprehensively, Germany threatens to attack Poland. Writer Neal Ascherson. Director Hugh Raggett. Distant War 1939-40 - Germany invades Poland and bombs Warsaw into submission. Prime Minister Chamberlain is forced to bring an unprepared Britain into the war. Following the failure of the British expeditionary force to Norway, the Chamberlain government falls and is replaced by Churchill. The Nazi war machine rolls into the Low Countries and France. Writer Laurence Thompson. Producer and director David Elstein. France Falls May-June 1940 - The eyes of the world are on France--its huge army, its impregnable Maginot Line. Incredibly, the Wehrmacht skirts the Line and forges South. As the humiliated French Army collapses, Paris is occupied and France falls. The British retreat to the Channel coast as Hitler stands poised, ready to invade Britain. Writer and producer Peter Batty. Narrator: Sir Laurence Olivier Originally broadcast in 1973; bonus documentaries produced in 1974, 1975, 1976, and 2004. Bonus documentaries have note: "The world at war : a special presentation." Special features: disc 1: The making of the series; disc 11: The history of 'The world at war'; biographies; gallery of photos from the Imperial War Museum collection. Discs 8-11 contain bonus documentaries, compiled from interviews and archive materials gathered for the series World at war.

2016.422.002	World at War, The, vol. 2	Isaacs, Jeremy	This is the definitive film about World War II, made using the most dramatic documentary footage ever seen. In addition to action at the fronts and in the war rooms around the world, there are penetrating interviews with statesmen and military leaders of the time. Further, The World at War chronicles events through the experiences of ordinary men and women-- American, British, German, Japanese, and Russian, in uniform and out--who lived and fought through the most momentous conflict in world history. Contents: Alone--Britain--May 1940-June 1941 - Nearly 350,000 Allied troops are dramatically rescued at Dunkirk. British morale plummets, but Churchill inspires his nation to fight on alone. The RAF heroically battles the Luftwaffe in the skies over London, and Britain gains a reprieve as Hitler's offensive turns to Russia. Writer Laurence Thompson. Producer and director David Elstein. Barbarossa--June-December 1941 - Germany, master now of all Europe, including the Balkans, turns against Russia. The early stages are composed of devastating German victories as the Panzers sweep with appalling speed deep into Russia. But the German high Command delays, fatally, and the advance is held a few kilometers from Moscow when the mud and then the fierce cold takes a grip. Writer Laurence Thompson. Producer and director David Elstein. Banzai Japan 1931-1942 - Following Japan's conquest of Eastern Asia; the Allies finally respond with sanctions. They prove so threatening to Japan that it prepares to conquer Southeastern Asia to secure the resources it needs. But first the threat from the British and American Pacific fleets must be eliminated. This volume leads up to the attack on Pearl Harbor. Archival film footage

Object ID	Title	Author	Summary
			shows the Nanking Massacre; as well as events in the Philippines; Singapore and Hawaii. 52 minutes. On Our Way--America Enters the War - The conflicts in Europe and the Pacific are two separate wars. Many Americans are content to forget about Hitler and Europe and concentrate their war efforts on the Japanese. President Roosevelt is committed to the fight against Hitler, but Congress is not. Inexplicably, Hitler declares war on America, thus relieving Roosevelt of a difficult decision and, ultimately, altering the course of the war. Written and produced by Peter Batty. Narrator: Olivier, Laurence (narrator) Originally broadcast in 1973; bonus documentaries produced in 1974, 1975, 1976, and 2004. Bonus documentaries have note: "The world at war : a special presentation." 			three years and is fought and refought over the same 600 miles of desert between Alexandria in Egypt and Benghazi in Cyrenaica (Libya) before Montgomery's "Desert Rats" defeat Rommel's Afrika Korps at El Alamein. The Germans are driven from North Africa and the way seems clear to the underbelly of Europe, Italy. Written and produced by Peter Batty. Stalingrad - The encirclement and defeat of the German army at Stalingrad holds more importance than the numbers of men lost--large though they were. For the first time, the Germans are beaten in the field. The legend of German mastery on land is dispelled as the people Hitler once called sub-human prove themselves more clever than he is. Written by Jerome Kuehl. Wolfpack - The German attempts to starve Britain by attacking ships bringing supplies from North America are very nearly successful. Many tons of shipping are sunk and many lives lost to the U-Boat attacks (Wolfpacks) of Gross Admiral Carl Doenitz. The allied merchant ships, despite convoy techniques, Navy Escorts and elementary underwater detection devices, are extremely vulnerable. Admiral Doenitz and some of his U-Boat commanders; as well as British officers, ratings, and merchant seamen who survived being sunk in the Atlantic; are among those who appear in this video. Writer J.P.W. Maldieu. Producer and director Ted Childs. Red Star - The story of Russia's massive, lonely war with its 20,000,000 military and civilian casualties. A Leningrad housewife who survived the 890 day siege from September 1941 until January 1944 appears in the program. She agrees she was lucky to survive. In her city of three million inhabitants, 200,000 people were killed by German shells, and a further 630,000 died of

2016.422.004	World at War, The, Vol. 4	Isaacs, Jeremy	From victory in Italy and Burma to the beginning of the end of the Third Reich, THE WORLD AT WAR presents an unsurpassed visual history of WWII. Contents: Whirlwind: Bombing Germany September 1939 - April 1944 - Fueled by revenge, the British show their mettle and with the help of American forces, retake the skies and bomb Germany into submission. Tough Old Gut: Italy November 1942 - June 1944 - Eleven months after Pearl Harbor, Churchill convinces the American forces to join the Allies in taking Italy. After an initial setback in North Africa, the German war machine begins losing its air of invincibility. It's A Lovely Day Tomorrow: Burma 1942 - 1944 - After an initial retreat in the jungle environs of Burma, Louis Mountbatten's arrival in 1943 boosts morale and leads to the first major Japanese defeat at Arakan. Home Fires: Britain 1940 - 1944 - A nation under duress finds its strength in unity, while Germany's defeat in the Battle of Britain sends their bombing raids into the countryside.

Contents: Inside the Reich--Germany 1940-1944 - In the Summer of 1940 the German forces are the conquerors of Western Europe, and at home the feeling is that the war is over. German cities are untouched and there is thankfulness that the courage of the First World War has not been repeated. There are no plans for a long struggle and the Nazi Regime, looking for populating, ensures that most peacetime goods are still in the shops. It is for the Germans a happy time and many babies are conceived. Written by Neal Ascherson. Produced by

Object ID	Title	Author	Summary
			Philip Whitehead. Morning - In the early morning of 5 June, 1944, the largest amphibian invasion force ever gathered reaches the beaches of Normandy. Americans, British and Canadians attack on five separate beaches--and although beachheads are made on all, the Americans meet strong opposition and have many casualties. Written by John Williams. Produced and directed by John Pett. Occupation - The Netherlands, a neutral country, is attacked without warning in 1940, and to stop more bloodshed capitulates quickly after Rotterdam is badly bombed. So subtly do the German occupiers proceed--with assurances of "no animosity"--that most find it easy to carry on their normal lives. Written by Charles Bloomberg and Michael Darlow. Pincers - With the liberation of Paris on August 25, 1944, the war seems to some to be as good as over. The Russians from the East and the Allies from the South and West are ready for the advance on the Fatherland. At this point, the disparity of views between Montgomery and Eisenhower reaches a critical point. The Americans plan advance on a broad front; Montgomery wants a narrow strike to burst through to the Ruhr and thus plans the Arnheim raid. Written and produced by Peter Batty. Olivier, Laurence (narrator) Originally broadcast in 1973; bonus documentaries produced in 1974, 1975, 1976, and 2004. Bonus documentaries have note: "The world at war : a special presentation." 2016.422.006	World at War, The, Vol. 6	Isaacs, Jeremy	An historical collection of the words and film footage of World War II featuring interviews with statesmen and military leaders of the time. Contents: Genocide, 1941-1945: From the very beginning of the Nazis' rise to power, the notion of the Aryan ideal was already in place. By the end of the war, the world would know the full horror of its ghastly vision. Nemesis, Germany February-May 1945: As the Allies close in on Berlin, the Russians lose more than 100,000 men in battle. Hitler hides in his bunker and contemplates his own end. Japan, 1941-1945: Initially apprehensive about the outcome of declaring war, the Japanese quickly turn to celebration with early victory. In the end, their worse fears are unimaginably exceeded. Pacific, February 1942-July 1945: Under the command of General MacArthur and Admiral Nimitz, the Allies slowly but assuredly achieve victory in the Pacific, one island at a time. Contents: Genocide: 1941-1945 / produced & directed by Michael Darlow ; written by Charles Bloomberg -- Nemesis: Germany February-May 1945 / produced & directed by Martin Smith ; written by Stuart Hood -- Japan: 1941-45 / directed by Hugh Raggett ; written by Courtney Browne -- Pacific: February 1942-July 1945 / produced & directed by John Pett; written by David Wheeler. 2016.422.007	World at War, The, Vol. 7	Isaacs, Jeremy	From victory in Italy and Burma to the beginning of the end of the Third Reich, THE WORLD AT WAR presents an unsurpassed visual history of WWII. Contents: The Bomb - On August 6, 1945, an American B-29 bomber, the "Enola Gay," named after the mother of the pilot Paul Tibbetts dropped the world's first uranium bomb on the Japanese city of Hiroshima. Four days later a second bomb was dropped on Nagasaki. Written and produced by David Elstein. Reckoning - Germany remains the key to European problems. Nobody wants Germany to be strong again, yet no one is ready to face the consequences of keeping her a ruin forever. Thus it has been decided that four armies of occupation will supervise Germany's recovery so that she can make good what she has damaged and destroyed. Under zoning arrangements agreed to at Yalta, the Russian zone has food and raw materials; the American, British and French zones have the industry. Trade between East and West areas ought to take place, but by the time the Big Three leaders meet again at Potsdam in July 1945, it is apparent that there is mutual mistrust. Russia has greater manpower in Europe, but the Americans have the atomic bomb. When the Japanese surrender, the Americans decide that the occupation forces in Japan will be American troops. They want an industrialized Japan as quickly as possible in America's image and within the American orbit. MacArthur begins the task. Written and produced by Jerome Kuehl. Remember - In the Second World War twenty million Russians died in action and in captivity-- fighting men and

Object ID	Title	Author	Summary
			women, and ordinary civilians; Britain and the Commonwealth lost four hundred and eighty thousand--sixty thousand of them civilians killed in bombing raids. Germany, in the war she started, lost nearly five million men and women; two and a half million Japanese were killed. America--not invaded or bombed--lost nearly three hundred thousand men. Those who lost people close to them can remember, vividly, the moment they heard the news. And many still remember, each year, at reunions, at the Cenotaph, and at grave sites. Remember is the 26th and final program in The World at War. Written and produced by Jeremy Isaacs. Olivier, Laurence (narrator) Originally broadcast in 1973; bonus documentaries produced in 1974, 1975, 1976, and 2004. Bonus documentaries have note: "The world at war : a special presentation." 2016.422.009	World at War, The, Vol. 9	Isaacs, Jeremy	The Award-Winning Classic, THE WORLD AT WAR, Volume 9. Narrated by Academy Award Winner Sir Laurence Oliver. Copyright 1973. Bonus Documentaries: Secretary to Hitler / written & directed by Michael Darlow (ca. 23 min. ; 1974) A remarkable first-hand account of the last days of the Fuehrer and the collapse of the third Reich through the eyes and words of his personal secretary, Traudle Junge. Warrior / produced by Alan Afriat; (ca. 49 min. ; 1975) Reflections of the men at war complied from interviews and archive film obtained for the world at war series; a measured and decidedly unromantic look at the heat of battle, Warrior weaves together eyewitness accounts and rarely seen archival footage to reveal the deadly realities of combat. From war to peace / produced by Jerome Kuehl (ca. 23 min. ; 1975?) An interview with Prof. Stephen Ambrose, Producer Jerome Kuehl. Renowned historian Stephan Ambrose examines the aftermath of World War II. Was peace truly gained? or did an new war, with weapons of policy, take its place? Running time: 98 minutes in color and black & white. Originally broadcast in 1973;

2016.422.012	Battle History of the Coast Guard, The : Lifesavers to the World	Reda, Lou	Originally broadcast on the History Channel in 2004 : narrated by: Stan Watts. In its third century of astonishing service, the United States Coast Guard stands as the worldwide emblem of rescue from the sea. Beginning as a tiny stepchild service that struggled for its very existence, the Coast Guard has overcome all odds to be recognized today as the indispensable hero of the sea. History of the U.S. Coast Guard: Lifesavers to the World is a salute to the men and women who have dedicated

Object ID	Title	Author	Summary
			their lives and courage performing incredible feats at sea, always living up to their motto, Semper Paratus.
2016.422.013	Battle History of the Coast Guard, The, Part II : Valor in War and Peace	Reda, Lou	Originally shown on the History Channel in 2004. Valor in War and Peace continues the rich story of the United States Coast Guard. Along with the rest of America, the Coast Guard was destined to suffer as the great economic depression turned the thirties into a time of cruelly reduced budgets, equipment and personnel. As the international crises of the 20th century came to a boil, the men and women of the Coast Guard repeatedly found themselves on the front lines of confrontation, risking their lives and protecting America's shores. And this tradition lives on.
2016.422.014	Battle History of the Navy, The, : Second to None	Reda, Lou	Originally shown on the History Channel. The story continues as a special fleet of small armored boats take command of Vietnam's rivers to fight enemy infiltration. Navy SEALs raid, spy and charge the enemy in every corridor of the conflict. As the Vietnam War ends, the U.S. and Soviet Navies engage in a technological race to be the strongest. WWII era Battleships pound enemy positions and the Navy develops submarine missiles that can kill, without surfacing, multiple cities with uncanny accuracy. After Iran's seizure of U.S. hostages shatters, a naval arms race of unprecedented size, cost and ingenuity emerges and a quarter century of violent peace begins.
2016.422.015	Battle History of the Navy, The : Steel Whales of Freedom	Reda, Lou	Originally broadcast on the History Channel in 2000. Narrated by Edward Hermann. As WWII begins to fade away, new wars loom on the horizon-- and the story continues. The battle raged in the Pacific, but the U.S. Navy was not to be undone. The Battle of Leyte Gulf saw the Japanese outnumber the lonely U.S. ships but the American shipmates fought hard. Thinking that

Object ID	Title	Author	Summary
			they were about to encounter a major battle with Halsey and his fleet, the Japanese turned around and headed out, not wanting to sacrifice their entire fleet. But to their surprise, the Americans, though few in numbers, were steadfast and won the battle, which took away Japan's strategic force in the Pacific War. And so the U.S. was ready to move ahead into new historical encounters
2016.422.016	Great Ships, The : Aircraft Carriers	Markham, Monte	Take a tour of one of the sea's mightiest forces--The Aircraft Carrier. Roaming majestically through the world's oceans, the modern Aircraft Carrier is the largest warship ever to sail the seas. It's more than 1000 feet long, and 200 feet wide, and 4 acres of armored steel flight deck towering above the water. This floating city can be home, workplace, and battle station to its crews for months at a time--projecting overwhelming military force to the far corners of the earth. With nearly 90 aircraft acting as her striking force, the modern Aircraft Carrier is the most powerful and complex surface ship in nautical history.
2016.422.017	Fellowship of Valor, A, Pt. II : Pacific Inferno	Reda, Lou	Based on the book by Joseph Alexander. In 1941, the United States Marine Corps overcame enormous odds in the South Pacific and earned a series of victories in the Solomons, New Britain, Tarawa and the Marianas. But the immensity of what was still waiting for them would test the resolve of the Marines' fellowship of valor like never before. In this special edition of the Shipmates DVD Series, see the marine's century-and-half heritage of courage shine as they fought selflessly in the intense and bloody battles of Peleliu, Iwo Jima and Okinawa.
2016.422.018	Fellowship of Valor, A, Pt. I : Born in Blood	Reda, Lou	Glory and pride--that sums up the United States Marines. They have a special spirit and bond that cannot be broken, that sets them apart from all others. A Fellowship of Valor : Born in Blood follows the marine's

Object ID	Title	Author	Summary
			involvement in the Revolutionary War, War of 1812, the Civil War, WWI and up through the beginning of WWII. "First to fight," were not just the words in a battle song, but the bedrock of Marine glory.
2016.422.019	Fellowship of Valor, A, Pt. III : From Tragedy to Triumph	Reda, Lou	This DVD chronicles the marines involvement along the fighting edge of the dispiriting war in Korea and Vietnam through the sands of Kuwait where they see action in the awesome victories of Desert Storm. Semper Fidelis --always faithful--is more than the Marine's motto; it is a way of life and a commitment to protect their country every time a hostile force roars up to threaten what years of blood and courage have won.
2016.422.020	Great Ships, The : Destroyers	Markham, Monte	With their steel bows cutting through the waves as they speed into harm's way, Destroyers are among the fastest and most deadly warships ever built. They began as stripped down vessels designed exclusively to destroy Torpedo Boats and emerged into great fighting machines capable of striking targets dozens of miles away with advanced anti-aircraft missiles. From stem to stern they are fighting ships--born and bred for combat--and their bold spirit still sails on.
2016.422.021	Great Ships, The : Submarines	Markham, Monte	From the cramped and airless confines of the TURTLE to the computerized world of the USS SEAWOLF, the Submarine's journey to penetrate the watery realm of inner space has been fueled by the bravery, vision, and drive of countless individuals. Operating at depths well beyond eight hundred feet and capable of submerged speeds in excess of twenty-five knots, her crew must be trained as exactly as their ship is engineered. For in this aquatic world of extreme dynamics forces and pressures, even the smallest accident or slightest mistake can have catastrophic consequences.
2016.422.022	Great Ships, The : Battleships	Markham, Monte	For the awesome firepower

Object ID	Title	Author	Summary
			they can bring to bear, aircraft carriers are the kings of the fleet. For strategic importance, submarines are unmatched. But with the biggest guns ever put on a vessel, battleships remain the most impressive warships of all. Learn what separates battleships from their precursors, the dreadnoughts, and explore the technological advances that have kept them in service to this day. Thrill to incredible footage of them in action in conflicts from World War II to the Gulf War. Relive one of the most dramatic moments in naval history when U.S. Battleships raised from the mud at Pearl Harbor faced the Japanese fleet at the Battle of Leyte Gulf. But in today's navy, the role of the battleship is a subject of debate. Find out why from naval historian Commander Ty Martin, USN (Ret.) and explore the possible fate of these mighty warships.
2016.422.023	Great Ships, The : Frigates	Markham, Monte	Presents the story of the frigate, the most versatile and arguably the most vital warship in the age of sail. Through the late 18th and early 19th centuries, they prowled the seas, acting as the "eyes of the fleet" for the navies they served. Frigates were the heart of the first American Navy - not from choice, but because the Colonies could afford these small swift ships that could be built in only two months. Traditionally used for dispatches and scouting, the American ships were armed with enough guns to devastate the renowned Royal British Navy. Brings the great engagements of the Revolution to life through period art and accounts and expert commentary. Go aboard the most famous frigate of all - the U.S.S. Constitution.
2016.422.024	Great Ships, The : Amphibious Assault Ships	Markham, Monte (narr.)	Covers modern amphibious assault operations and the ships involved. This video features an amphibious ready group (ARG) led by USS Tarawa (LHA-1). Other units include LPD, LSD, LCAC LCU,

Object ID	Title	Author	Summary
			other landing craft and Marine Corps helicopters and fixed wing aircraft. Some of the activity takes place along the landing beach at Camp
2016.422.025	Great Ships, The : Ships of the Line	Markham, Monte (narr.)	Features the powerful towering hulls of 18th century sailing ships bristling with over 100 cannons. The ship was the core of a nation's battle fleet.
2016.422.026	Korean War, The : Fire & Ice	Markham, Monte (narr.)	When North Korea surged across the border of its southern neighbor on June 25, 1950, South Korea and its Western allies were caught off guard. The UN acted swiftly, but the contingent, unprepared for North Korea's fanatical determination and fighting skill, soon found itself thrown back into disarray; and the allies faced a humiliating evacuation. With the UN forces on the verge of being pushed into the sea, the stage was set for one of the most dramatic reversals of the war. UN supreme Commander Douglas MacArthur executed an amphibious landing. Within months, UN troops would drive the North Koreans almost to the Chinese border. But the victory would turn to devastating defeat, at the unexpected onslaught of Chinese troops. Nearly overrun by the Chinese, American forces were soon engaged in the longest retreat in US history. By December of 1950, the Communists had recaptured the North Korean capitol. A month later, the southern capitol fell. As American casualties mounted, U.S. President Harry Truman came under increasing military and political pressure finally resulting in MacArthur's dismissal and the arrival of General Matthew Ridgway. After retaking Seoul the U.N. forces confronted the re-grouped enemy in the biggest battle of the war. But by now, U.S. policy had shifted from liberation to containing the communists at the 38th parallel. The war raged on until the armistice of July, 1953, a tenuous unstable cease-fire

2016.430.007	Boiler Operations : Questions and Answers	Chattopadhyay, P.	From the Preface: "The production of steam and its utilization have undergone radical changes over the years through the pioneering efforts of scientists and engineers in the field of fuel and combustion technology, boiler operation, and power generation. Though there are many excellent texts dealing separately with these subjects, engineers and operators in charge of boiler operation may find it difficult to obtain a single book, covering the various aspect of boiler operation technology. I hope this book will fulfil their requirements and also be advantageous to students undergoing courses in power plant engineering and fuel combustion technology."
2016.430.008	Steam Tables and Mollier Diagram	Keenan, Joseph. H.	From the Preface: "Much confusion has resulted from the necessity of carrying forward design in the field of steam power engineering to pressures of 500 to 3200 lb. per sq. in. on the basis of steam tables whose reliable experimental sources in the superheat region extended to less than 200 lb per sq. in. These tables differed radically from each other outside this limit and in themselves emphasized the need for further experiment. From this need has sprung an extraordinary activity in steam research that is international in scope. It has already produced a body of empirical data in hitherto unexplored regions which has made possible the development of high-pressure steam tables based on and verified by reliable experiment throughout the entire range of pressures. It is believed that these new tables, covering as they do the field of present-day operation and development, will be a valuable aid in the design of

			practices, and overall electronic equipment and material-handling procedures required to implement the major policies set forth in Chapter 400 of the Naval ship's Technical Manual.
2016.601.004	Nomenclature of Naval Vessels	United States. Navy Dept.	In its construction, a ship or vessel, like a building, is started on its foundation and carried through to completion by the fitting and securing of its many parts together to form a designed shape. However, the nomenclature of the several members of which the ship is composed and the parts and spaces provided in its erection differs from that used for buildings. The foundation of a ship is called the KEEL and extends FORE and AFT from BOW to STERN, which, when speaking of a building in a similar way, would be from front to back. The STEM is located at the very forward end of the keel and the STERN POST to which the RUDDER is attached is at the after end.
2016.601.005	Naval Air Systems Command Technical Manual Program	Dept. of Defense	This document has been prepared for the purpose of explaining to all personnel the basic policy covering the design of The Naval Air Systems Command (NAVAIR) Technical Manual Program, how the system works, and how the documents may be used in support of fleet operations, maintenance and training. This manual supersedes NAVAIR 00-25-100 dated 1 May 1972 changed 1 March 1978.
2016.601.006	Audels Machinist and Tool Makers Handy Book	Graham, Frank D.	The purpose of this book is to provide a complete course of study for those desiring to become machinists, and to help machinists become tool makers. The author has adopted a progressive method of presentation, each machine being explained as follows: 1. How it works 2. Its actual construction 3. Machining operations
2016.601.007	Strength of Materials, Part 1 : Elementary Theory and Problems	Timoshenko, S.	This third edition was expanded by two new chapters which deals with bending of beams in a plane which is not a plane of symmetry and bending of

Object ID	Title	Author	Summary
			curved bars. The notion of shear center, which is of great practical importance in the case of thin walled structures is introduced. The material on curved bars which previously appeared in the second volume of this book. Tension and compression within the elastic limit, analysis of stress and strain, bending moment and shearing force, stresses in laterally loaded symmetrical beams, deflection of laterally loaded symmetrical beams, statically indeterminate problems in bending, symmetrical beams of variable cross section beams of two materials, bending of beams in a plane which is not a plane of symmetry, combined bending and axial load-theory of columns, torsion and combined bending and torsion, strain energy and impact, curved bars. Mr. Timoshenko is Professor Emeritus of Engineering Mechanics, Stanford University
2016.601.008	Progress in Materials Science : Embrittlement by Liquid Metals	Kamdar, Madhusudan H.	When an oxide-free solid metal is coated with a thin film of a liquid metal only a few microns in thickness and then immediately deformed in tension, its yield and flow behaviour are not significantly affected. Its fracture behavior, however, can be markedly different from that observed in air. In many instances a reduction in fracture stress or strain results.
2016.601.009	Type I Technical Manual for Rotary Pump AFFF Liquid Service (U)	Department of the Navy	General information, maintenance, list of tables, List of figures. AFFF stands for Aqueous Film-Forming Foam.
2016.601.010	Instruction Book for Salinity Indicator Equipment	Naval Sea Systems Command	NAVSEA TECHNICAL MANUAL CHANGE GUIDE, Change 2 Saline water conversion is used for the subject desalination.
2016.601.011	Naval Ships' Technical Manual, Chapter 634 : Deck Coverings	Naval Sea Systems Command	General Information, approved deck covering materials by area, materials, installation, and repair, deck seam caulking installation, wood deck repairs, cleaning of shipboard deck covering, miscellaneous repairs. Revision 3 - This Chapter supersedes Chapter 634

2016.601.027	Damage Control Book CV 41 Aircraft Carrier, Volume I	Department of the Navy/Department of Defense	This book is prepared to assist in the understanding and teaching of damage control by embodying in two volumes the fundamental principles of damage control, together with sufficient data to apply these principles to the USS Midway CV 41. Part I - General Information Part II - Damage Control Systems

Object ID	Title	Author	Summary
			There is a section "Stability and Loading" that was revised in 1988. The revision page indicates only revisions in 1986.
2016.601.028	Damage Control Book CV 41 Aircraft Carrier, Volume II	Department of the Navy/Department of Defense	Damage Control Systems Miscellaneous Systems Electrical Systems
2016.601.029	NAVY COMPASS, Navy Region Southwest	O'Rourke, Brian (ed)	Articles, A different kind of mission: Seabee enlists in another family's battle to save son, Navy College Office seeks tansitioning Sailor for special admissions program, Improvements for inpatients: NMCS D opens combat and poly trauma care unit, Purified water that's worth its salt: ACB-1 improves mission capability with land-based purification system, Last landings: End of an era for C-12 Huron in US, US Third Fleet participates in San Francisco Fleet Week, Vinson's Green Machine: Carrier Sailors lend helping hand to San Francisco cleanup, Planning for the worst: Sea services meet with civilian agencies to discuss response efforts, Energized for efficiency: Seal Beach audit lays foundation for base's energy goals, Protecting hallowed nesting grounds: Sailors help conserve sensitive habitat with Silver Strand beach cleanup, Stray cat hut: New shelter opens for Lemoore's feral felines, Fitzgerald's's Russian October: San Diego destroyer visits Vladivostok before binational exercise.
2016.601.030	Navy Occupational Safety and Health (NAVOSH) Program Manual for Forces Afloat, Volume I and II	Department of the Navy/Office of the Chief of Naval Operations	The manual is organized in three sections. Section A: NAVOSH Program. This section outlines the overall administration, organizational, and training aspects of the NAVOSH Program including a statement of policy and a listing of responsibilities. Section B: Major Hazard - Specific Programs. This section outlines NAVOSH programs which address specific hazards such as, asbestos control, heat stress, hazardous material/hazardous waste, radiation protection,

Object ID	Title	Author	Summary
			electrical safety and gas free engineering as well as the tag-out program and personal protective equipment. The objective of this section is to reduce to a manageable degree, the NAVOSH Program management requirements applicable to shipboard personnel. This section is addressed to personnel who would assist the commanding officer in NAVOSH Program management, e.g., safety officer, electrical safety officer, gas free engineer, hazardous material/hazardous waste coordinator and the medical department representative. Section C: Safety Standards. This section contains basic safety requirements that are applicable to shipboard activities and/or equipment.
2016.601.031	Instructions Relative to Commissary Equipment	United States Navy Department, Bureau of Ships	Section I - Appliances, Section II - Baking, Cooking, Roasting Equipment
2016.601.032	Equipment Identification Code Master Index, NAMSO 4790.E2579	Navy Ships Parts Control Center	Section 1 - EIC Code Sequence, Section 2 - Nomenclature Sequence
2016.601.033	Fundamentals of Radio	Terman, Frederick Emmons	The purpose of this book is to present the basic principles of radio communication in a form suitable for use in an introductory radio course. With the Collaboration of Lt. F. W. Macdonald, U.S.N.
2016.601.034	Instructions Relative to Laundry	Bureau of Ships	Section I - Laundry Appliances, Section II - Disinfecting
2016.601.035	Engine and Propeller Data for Standard Boats, Special Boats and Minor Landing Craft	Bureau of Ships	The purpose of this publication is to provide a listing of the standard boats, special boats, and minor landing craft under the Inventory Control Plan of the Bureau of Ships; also, a listing showing the engines applicable to and propellers normally issued for use in each type and size of self-propelled boat
2016.601.036	Naval Ships Technical Manual, Chapter 079 Volume 1, Damage Control Stability and Buoyancy	Naval Sea Systems Command	This revision results from the Naval Sea Systems Command's program to revise, repackage, and reissue the NSTM. Introduction, Basic Principles, Fundamentals of Buoyancy, Transverse Stability, and Draft, Inclining Experiment, Vertical Weight Movement,

Object ID	Title	Author	Summary
			Transverse Weight Movement, Trim, Weight Addition or Removal, Loose Water, Flooding, List, Hull Strength, Stability Data, Preparatory Measures to Resist Flooding Before Damage, Effects of Damage, Situation Estimate, Corrective Measures,

2016.601.043	Electronic Systems (U), USS Midway CV 41, Ship Information Book, Vol 4	Naval Sea Systems Command	Beacon Systems, Sonar Systems, Carrier Air Traffic Control Center, Electronic Warfare Systems, IFF System (AIMS), Radar Systems, Naval Tactical Data System, Radio Communication Systems, Radio Direction Finder, Loran Systems and SINS/SNAIAS, Radiosonde Equipment, Radiac
2016.601.044	7,000 Pound Upper Stage Weapons Elevators for CV-41 : Description, Operation, and Maintenance	Naval Sea Systems Command	This manual contains the information necessary to operate, maintain, troubleshoot, and repair the 7,000 pound upper stage (US) weapons elevators, in CV-41.
2016.601.045	Identification of Ammunition, Technical Manual	Naval Sea Systems and Naval Air Systems	Introduction, Small Arms, Riverine, Assault Force and Artillery Ammunition, Navy Gun Ammunition, Navy Rockets, Guided Missiles/Guided Weapons, Underwater Ordnance, Aircraft Bombs, Cluster Munitions and Dispensers, Explosive/Cartridge Actuated Devices, Demolition Material, Pyrotechnics, Ammunition Packaging, Handling Containers, and Pallet Loads
2016.601.046	Shipboard Allowance List	Department of the Navy	Ships Parts Control Center, CO SAL - Coordinated Shipboard/Shorebased Allowance List, Hull, Mechanical, Electrical, Ordnance and Electronics
2016.601.047	CVA-41 Weapons Elevator, Upper Stage 2A	Naval Sea Systems Command	The information in this manual includes: the description, installation and operating

Object ID	Title	Author	Summary
			instructions, maintenance information, and repair parts list for the Sponson Type Weapons Elevator aboard the CVA-41. The elevator is located on the starboard side and is used between the main deck and the flight deck. This elevator, Model M-20034, was designed and manufactured by Jered Industries, Inc., Birmingham, Michigan.
2016.601.048	Principles of Naval Engineering	Training Publications Division, Naval Personnel Program Support Activity	This text provides an introduction to the theory and design of engineering machinery and equipment aboard ship. Primary emphasis is placed on helping the student acquire an overall view of shipboard engineering plants and an understanding of basic theoretical considerations that underlie the design of machinery and equipment. Details of operation, maintenance, and repair are not included in this text.
2016.601.049	Navy Electricity and Electronics Training Series Module 3 : Introduction to Circuit Protection, Control, and Measurement	Naval Education and Training Command	Module 3 - Introduction to Circuit Protection, Control, and Measurement
2016.601.050	Russellstoll Marine Electrical Equipment	None Stated	Receptacles, Plugs, Connectors, Lighting Fixtures, Dock Crane Festoon Systems Control Devices and Covers Suggested Resale Price List No. 85
2016.601.051	Organizational Maintenance Management system (OMMS) Users Manual	Navy Management Systems. Support Office	Provide improved automated support for the internal management of work centers in the ship's organization maintenance department, provide improved OMMS-related maintenance data, provide improved automated data processing (ADP) support services to the Intermediate Maintenance Management System (IMMS). Contents include general, system summary, staff functions related to technical operations, file query procedures, terminal data display and retrieval procedures, terms, acronyms, abbreviations, field data elements, sample reports. Shipboard Non-Tactical ADP Program (SNAP) I

Object ID	Title	Author	Summary
2016.601.113	Boat Information Book : 26-Foot Motor Whaleboat MTRWHAL 26-MK10	Naval Sea Systems Command	The manual contains the necessary information for operating and maintaining the 26 -Foot Motor Whaleboat MK10. Most of the mechanical and electrical components on the craft were manufactured for commercial use and can be replaced with parts available from commercial sources. The technical service and engine manuals, referred to under the Index of Reference Manuals, provides comprehensive information that should be used in conjunction with this manual.
2016.601.114	Amiga Express Paint User's Manual	Vermeulen, Stephen	Express Paint is a unique program for the Commodore Amiga computer that incorporated full featured graphics creation and editing as well as some very unique text generation and integration capabilities. This combination gives you the features of a powerful Paint program with the added capabilities of being able to import and format text files created by the Notepad or another editor (such as your favorite word processor. Amiga is a trademark of Commodore-Amiga, Inc. Express Paint is a trademark of Professional Automation Resources, Icons by Steve Jeans Edited by Development Department of Professiona Automation Resources
2016.601.115	Digital Data Transmitter Terminal Radio Set AN/SRC-40	Naval Sea Systems Command	This manual provides oganizational dn inmediate maintenance information presented in a format developed to simplify the finding of desired information; ease the learning process and to reflect the operational, maintenance, and logistical support philosophy established for the equipment. The manual contains general information, operation, general theory of operation, installation and troubleshooting and repair.
2016.601.116	Electronics Installation & Maintenance Books	Naval Sea Systems Command	The purpose is to provide Naval personnel with information which will aid in the installation, maintenance, and repair of all types of radio, radio communications, and

Object ID	Title	Author	Summary
			associated equipments. There is a complete revision to the Communications chapter of the Electronics Installation and Maintenance Book. The EIMB was established as the medium for collecting, publishing, and distributing, in one convenient source document, those subordinate maintenance and repair policies, installation practices, and overall electronic equipment and material-handling procedures required to implement the major policies set forth in Chapter 400 of the Naval Ships' Technical Manual.
2016.601.117	Fleet Moorings : Basic Criteria and Planning Guidelines	United States Navy, Naval Facilities Engineering Command	This manual presents basic information required for the selection and design of fleet-mooring systems in protected harbors. This manual, NAVFAC DM-26.5, Fleet Moorings, cancels and supersedes Chapter 6 of the basic Design Manual 26, Harbor and Coastal Facilities, dated July 1968, and Change 1, dated December 1968.
2016.601.118	7,000 Pound Upper Stage Weapons Elevators for CV-41 : Description, Operation, and Maintenance	Naval Sea Systems Command	This manual supersedes Navships 0978-032-1010 dated July 1970 and all changes thereto. The manual contains the information necessary to operate, maintain, troubleshoot, and repair the 7,000-pound upper state (US) weapons elevators, in CV-41.
2016.601.119	Naval Ships' Technical Manual, Chapter 631, Volume 1 : Preservation of Ships in Service - General, Volume 2 - Surface Preparation and Painting, Volume 3 - Surface Ship/Submarine applications	Naval Sea Systems Command	Provides instructions, requirements, and information for prevention of corrosion and deterioration of ships, boats, and small craft in the naval service by means of surface preparation, painting, and application of other preventive measures.
2016.601.120	7,000 Pound Weapons Elevators, Lower Stage 1, 3, 6 and 7 for CV-41 : Description, Operation, and Maintenance	Naval Sea Systems Command	The purpose of this change is to correct door pneumatic diagrams, Figures 3-37 and 3-38, to show unrestricted flow from the pneumatic speed control valves to the double-acting door cylinder. This publication supersedes Navships 0978-031-8010 dated September 1969, and all changes thereto.
2016.601.121	Electronics Installation and	Naval Ship Engineering Center	The book is a source of

Object ID	Title	Author	Summary
	Maintenance Book Electromagnetic Interference Reduction		information for persons involved in efforts to achieve electromagnetic compatibility among shipboard electronic systems. This publication supersedes NAVSHIPS 0967-000-0150
2016.601.122	Electronics Installation & Maintenance Books : Reference Data	Naval Ship Engineering Center	This publication supersedes and cancels NAVSHIPS 0967-000-0140. The purpose is to provide Naval personnel with an informative reference of pertinent definitions, abbreviations, designations formulas, charts, tables, graphs and other general data related to electronic installations, maintenance and allied functions.
2016.601.123	Electronics Installation and Maintenance Book : Sonar	Naval Sea Systems Command	Section 1 - General, Section 2 - Circuit Applications, Section 3 - Field Change Identification Guide, Section 4 - Service Notes, Section 5 - Reference Data
2016.601.124	Electronics Installation and Maintenance Book for Test Equipment	Naval Sea Systems Command	First Revision Section 1 - General, Section 2 - Circuit Applications, Section 3 - Field change Identification Guide, Section 4 - Service Notes, Section 5 - Reference Data
2016.601.125	Electronics Installation and Maintenance Book General Maintenance	Naval Sea Systems Command	The material constitutes a complete revision to the General Maintenance Chapter of the Electronics Installation and Maintenance Book. Section 1 - Introduction, Section 2 - Maintenance Concepts, Section 3 - Routine Maintenance and Maintenance Aids, Section 4 - Soldering Techniques, Section 5 - Miniature Repair, Section 6 - Microminiature Repair, Section 7 - Digital Troubleshooting Techniques
2016.601.126	Electronics Installation & Maintenance Book General Handbook	Naval Sea Systems Command	Section 1 - Introduction, Section 2 - Administration, Section 3 - Safety & Accident Prevention, Section 4 - Publications & Their Handling, Sections 5 - EIB/EIMB Indexes
2016.601.127	Electronics Installation & Maintenance Books General Handbook	Naval Sea Systems Command	Section 1 - Introduction, Sections 2 - Administration, Section 3 - Safety & Accident Prevention, Section 4 - Publications & Their Handling, Section 5 - EIB/EIMB Indexes

Object ID	Title	Author	Summary
2016.601.128	Electronics Installation & Maintenance Book Installation Standards	Naval Sea Systems Command	Section 1 - General, Section 2 - Cable, Flexible and Semi-Rigid, Section 3 - Support Equipment, Section 4 - Antennas, Section 5 Waveguide and Rigid Coaxial Lines, Section 5 - Equipment Installation
2016.601.129	Electronics Installation and Maintenance Book Countermeasures	Naval Sea Systems Command	Section 1 - General, Section 2 - Circuit Applications, Section 3 - Field Change Identification Guide, Section 4 - Service Notes, Section 5 - Reference Data
2016.601.130	Electronics Installation and Maintenance Book Test Methods and Practices	Naval Sea Systems Command	Section 1 - General, Section 2 - Basic Measurements, Section 3 - Test Techniques and Practices, Section 4 - Waveform Interpretation, Section 5 - Antenna and Transmission Line Measurements, Section 6 - System Testing. The material constitutes a complete revision to the Test Methods and Practices Handbook of the Electronics Installation and Maintenance Book.
2016.601.131	Electronics Installation and Maintenance Book : Communications	Naval Sea Systems Command	Since its inception, the Electronics Installation and Maintenance Book (EIMB) has been expanded to include selected information of general interest to electronic installation and maintenance personnel. These items are such as would generally be contained in textbooks, periodicals, or technical papers, and form a comprehensive reference document. Contents: Chapter 1 1) Introduction 2) Types of Emission 3) The Importance of Frequency Accuracy 4) UHF Communication Systems 5) Teletype Equipment 6) Transmitting Equipment 7) Power Supplies 8) Receivers 9) Remote Control Units 10) Terminal Equipment 11) Antennas and Antenna Systems 12) Navigational Aids 13) Supplementary Data Chapter 2 - Circuit Applications Chapter 3 - Field Change Identification Guide Chapter 4 - Service Notes

2017.002.003	USS Independence (CVA-62) - The Face of the Independence - Mediterranean Cruise - 1960-61	Brinn, Ron (ed)	Pictorial history of the deployment of USS Independence, CVA-62, on a Mediterranean cruise between August 1960 and March of 1961. She departed Norfolk on 4 August 1960 and returned to Norfolk on 3 March 1961. Ports of call and interesting photos included: Rome, Cannes, Maritime Alps, Paris, Athens, Naples, Vesuvius, 20,000th landing of LTJG Marshal E. Feltham; Palermo; Genoa. Onboard were: Carrier Air Group Seven (CVG-7)) VF-41 (F3H-2) VF-84 (F8U-2) VA-72 (A4D-2N) VA-75 (AD-6) VA-86 (A4D-2) VAH-1 (A3D-2) VFP-62 Det. (F8U-1P) VAW-12 Det. (WF-2) HU-2 Det.
2017.015.003	USS Midway CVB 41 Mediterranean Cruise 1952	Fox, Duane C. (ed)	Pictorial account of the 126-day deployment of USS Midway

Object ID	Title	Author	Summary
			(CVB-41) to the Mediterranean Sea in 1952. The ship departed Norfolk, VA on 12 January and returned to Norfolk on 5 May. Port visits included Gibraltar, Augusta, Naples, La Spezia, Genoa, Palermo, Gulf Juan, Suda Bay, Athens and Palma. Onboard: Carrier Air Wing Six (CVW-06) VF-21 (F9F-2) VF-61 (F9F-2) VF-41 (F4U-4) VMF-225 (F4U-4) VA-25 (AD-4/4L) VC-62 Det. 5 (F2H-2P) VC-33 Det. 5 (AD-4NL/4Q) VC-12 Det. 5 (AD-4W) VC-4 Det. 5 (F4U-5NL) HU-2 Det. 5 (HUP-1)
2017.047.003	American Warplanes	Gunston, Bill	Over 400 photographs; More than 75 color profile drawings; Over 200 three-view drawings The combat aircraft of the various air arms of the United States armed forces represent a military capability which no other nation can match, providing the yardstick against which the warplanes of all other air forces must be judged. Today, the United States fields more than 15,000 aircraft, the largest number of military airplanes and helicopters used by any single nation. In fact the single word which appears to fit descriptions of American warplanes throughout three-quarters of a century is "most" — most powerful, most advanced, most expensive, most weapons carried, most produced, even most functional This book chronicles the development of most of them — from the Wright Flyers of the early 1900s to the AV-8B serving today's Marine Corps. It is a magnificent tribute to more than 200 combat aircraft to have seen service, each of them illustrated with a detailed three-view line drawing and a photograph, usually in color and often appearing in a book for the very first time; many

Object ID	Title	Author	Summary
			of the aircraft are also depicted in superb color profile drawings which emphasize camouflage schemes and unit markings. Bill Gunston wastes not a word in presenting literally hundreds of thousands of facts. Yet his text is nonetheless extremely readable, not least in his introduction which sets the main body of the book — the chronologically arranged directory — against a backdrop of design and industrial development and international conflict, describing how America's pioneering spirit first thrust man and machine into the air and now promises more exciting shapes and record-breaking achievements for the future. (from dust jacket flap)
2017.047.004	Those Navy Guys and Their PBY's : The Aleutian Solution : Experience of a Typical Aleutian Aircrewman	Freeman, Elmer A.	We have a later, 1992 edition. The large, ungainly, twin-engined flying boats used by the U.S. Navy as patrol aircraft played a significant if unheralded role in the Pacific and Atlantic during World War II; far more has been written about the Mustangs, Liberators, and Wildcats in the American air campaigns than of patrol planes like the PBY. Freeman does a solid job telling the story of this forgotten plane and the crews that flew it during a little-remembered 1942-43 campaign against the Japanese in the Aleutians. Useful for its depiction of service life on World War II's secondary fronts and suitable for comprehensive military and aircraft collections. -John R. Vallely, Siena Coll. Lib., Loudonville, N.Y. Editorial Review from Library Journal Copyright 1992 Reed Business Information, Inc. (from Amazon.com)
2017.054.001	USS Midway (CV-41) - Mediterranean Cruise - 1953	Hague, R. B. (ed.)	Pictorial account of USS Midway 170-day Mediterranean cruise From December 1952 to May 1953, of which 65 days were spent in various ports. The ship

2017.301.003	Anchor, The -- Company 63-259	Naval Training Center. San Diego.	The Anchor, Company 259, Recruit Training Command, United States Naval Training Center, San Diego, CA with a history of the "countless generations of seafaring men who have come to regard the anchor as a symbol of their profession and a mark of security to the ships on which they serve." Captain William B. Wideman, Captain David F. Loomis, Commander T. F. Houston, Camp Nimitz, Graduation Pictures, Awards, In Processing, Seamanship, Small Boat Handling, Damage Control, Barracks, and Roster are included in this book. Includes 33 1/3 rpm record - Sounds of "Boot" Training. The recording is a sixteen minute record recalling the loud, the soft, the strange, the memorable--once all-too-familiar--sounds of Boot Training. Also, includes Recruit Brigade Review, Recruit Training Command, NTC, San Diego, CA, 9 August, 1963. Bluejackets on Parade and Recruit Brigade Review United States Naval Training Center, San Diego, California
2017.301.005	Midway	Barker, A. J.	Midway was psychologically and logistically an important island to the American Navy. It served as a sentry for Hawaii and as a fueling station for American submarines. After the carrier launched Doolittle raid on Japan, the Japanese determined that the only feasible land based airport had to be Midway. So both sides had a vested interest in the island. The Americans had also broken the Japanese secret code and knew that an attack was eminent. The ensuing battle proved to be the pivotal point in the Pacific War.
2017.301.006	Pearl Harbor	Willmott, H. P.	Japan wanted to be the eminent power in eastern Asia. In order to do this, they needed raw

Object ID	Title	Author	Summary
			commodities like oil. In 1939, the start of war in Europe provided them with a possible opportunity. Although Japan originally declared itself neutral, the defeat of France and the uncertain future of Great Britain, showed the Japanese that by 1940, new opportunities for expansion had occurred. The Japanese began preparing for war against the western powers: United States, Great Britain, and France.
2017.301.008	Aleutian Sense	Aviation Training Division, Office of the Chief of Naval Operations	Discusses the perils and pitfalls of flying in the Aleutian Island chain in World War II. Cartoon style presentation. Williwaw.
2017.301.009	Curtiss Electric Propeller, The	Curtiss-Wright Corporation. Propeller division.	Covers the design and operation of the Curtiss Electric propeller for those engaged in maintenance and flying of the aircraft. An electric motor controls the blades through a two-stage planary-type speed reducer which drives a master bevel gear. Depending on the direction of rotation of the motor, the angle of the blades is increased or decreased. - variable pitch propeller. Diagrams of operation and depiction of various parts that make up the assembly are provided.
2017.301.011	Rules of Engagement	Weber, Joe	Rules of Engagement refers to the restrictions military pilots faced in action during the Vietnam War. Many pilots found these rules detrimental to way they fought and flew. Marine Corps pilot Brad Austin flies the air war in Route Pack Six. The author puts the reader right in the cockpit as the aircrews fight the North Vietnamese defenses. On top of this is added the sweat of bringing a damaged fighter back on board the carrier. However, half way through the book the main thrust of the plot shifts to handwringing about the over management of the war by the White House and the DoD (rules of engagement.). This seems to take on a life of its own among the aircrews, and their viewpoint toward the war.

2017.301.013	Rigging	Department of the Army	This manual is prepared as a guide and basic reference for those men in the U.S. Army whose duties require the use of rigging. It is intended for use in training and as a handbook for field operations.
2017.301.014	Nomenclature of Naval Vessels	Navy Department	In its construction, a ship or vessel, like a building, is started on its foundation and carried through to completion by the fitting and securing of its many parts together to form a designed shape. However, the nomenclature of the several members of which the ship is composed and the parts and spaces provided in its erection differs from that used for buildings. The foundation of a ship is called the KEEL and extends FORE and AFT from BOW to STERN, which, when speaking of a building in a similar way, would be from front to back. The STEM is located at the very forward end of the keel and the STERN POST to which the RUDDER is attached is at the after end.

2017.302.001	Grumman S2F/S-2 Tracker, Part 1 : Development, Testing, Variants, and Foreign Users	Kowalski, Robert J.	From the introduction: "The Grumman S2F was originally developed to meet a specific mission requirement, antisubmarine warfare (ASW). the basic design proved to be so useful and adaptable that is still in military and civil service more than 60 years after its first flight. The U.S. navy didn't have any time to rest on it's oars after defeating the German Unterseebooen (U-boat) threat in the Atlantic and the Japanese Navy in the Pacific. It was now facing two new enemies after World War II ended, the U.S. Air Force and the Russian Navy. The former, newly separated from the U.S. army, was promoting the elimination of the carrier as an offensive weapon in the belief that the war had ultimately been won by use of the atomic bombs and only the Air Force was capable of delivering them. The

2017.302.008	Flying Warrior : My Life as a Naval Aviator During the Vietnam War	Harper, Jules	Reconciliation. Beginning as a young boy, Jules takes you through the unique process of becoming a Naval Aviator, engages you into his experiences as a brand new pilot in a combat squadron and, finally becoming a flying warrior. Having survived two combat cruises aboard the aircraft carrier USS Kitty Hawk from 1966–1968, compiling 332 career carrier take offs and landings, being shot at daily by enemy fire while completing 200 combat missions over Vietnam, he clearly shares the views of the aviators who flew along with him on these missions while fighting this unpopular war. Jules was awarded the Nation's Distinguished Flying Cross, 21 Air Medals, and many other accolades. After reading this book the reader will have a new understanding and appreciation about the Warriors who protect not only their comrades in arms, but the defense of the nation as well.
2017.302.009	Inside the Tailhook Scandal : A Naval Aviator's Story	Beck, Robert L.	When thousands of naval aviators and flight officers gathered in Las Vegas in September 1991 to celebrate their victory in the First Gulf War, none could have imagined that their behavior during Tailhook '91 would have such devastating consequences for the Navy. Just weeks after the annual reunion's conclusion, rumors of a raucous late night gauntlet made up of junior officer jet jockeys began to surface. It wasn't until a female Navy lieutenant complained in writing to her Navy superiors, and in person to former Navy captain, Sen. John McCain, that the disturbing details came to light. Thus began the greatest upheaval in the history of the US Navy. For nearly three years, it remained a compelling front-page drama, even making it to the private quarters of the White House. Although the scandal caused forced retirements among the Navy's top brass, courts-martial,

Object ID	Title	Author	Summary
			investigations, and lawsuits, many remain convinced that justice has still not been served. Complete with photographs and original documents, Inside the Tailhook Scandal: A Naval Aviator's Story is a personal account from the perspective of a naval aviator who was an "insider" having first worked in the Navy office which sponsored Tailhook '91 and subsequently in the Navy office which conducted one of the initial investigations. It describes the story's twists and turns, the obstacles and machinations, and the major players many of whom were Vietnam comrades-in-arms, mentors, and close personal friends. Contents: The day of reckoning -- The office visit -- Stingers get an award -- Tailhook '71 -- The 912 Annapolis gang -- The admiral and his aide -- The dark ages -- The boss and SECNAV step down -- DoD IG Report: part 1 -- DoD IG Report: part 2 -- Cruising with the "boys" -- Tailhook '91 -- Courts-martial proceedings -- Awaiting the decision -- Capt. Vest's ruling and its effects -- My final naval cruise -- Three reunions in 2011.
2017.302.010	Fire From the Sky : Seawolf Gunships in the Mekong Delta	Knott, Richard C.	Fire from the Sky is the first complete history of the most decorated Navy squadron of the Vietnam War. Richard C. Knott tells the dramatic history of the HAL-3 Seawolves, the U.S. Navy's first and only helicopter gunship squadron of the Vietnam War. The squadron was established "in country" to support the fast, pugnacious river patrol boats of the brown water navy. Flying combat-worn Hueys borrowed from the Army, the mission of the Seawolves quickly expanded to include rapid response air support to any friendly force

Object ID	Title	Author	Summary
			in the Delta needing immediate assistance. The Seawolves inserted SEALs deep into enemy territory, and extracted them, often despite savage enemy opposition. They rescued friendly combatants from almost certain capture or death, and evacuated the wounded when Medevac helicopters were not available.
2017.302.011	Gear Up, Mishaps Down : The Evolution of Naval Aviation Safety, 1950-2000	Dunn, Robert F.	"Less than five years after naval aviation had been in the forefront of the forces that defeated Imperial Japan, it found itself in serious trouble. One of the first steps to re-order priorities and save naval aviation was to solve the problem of increasing numbers of accidents. Over the next fifty years that problem was indeed solved to the extent that today, despite hot wars, cold wars, contingencies and peacetime operations in support of friends and allies the Navy/Marine accident rate is at least as good as that of the Air Force and approached that of commercial aviation. The keys to how this was achieved lies with dedicated and professional leadership, a focus on lessons learned from mishaps and near-mishaps, a willingness to learn and adopt new leadership, training, management, maintenance and supply styles and procedures. All this and more is described in this book."- -Provided by publisher.

This book give a short history of jamming, a short history of ECM aircraft in Vietnam and post-Vietnam, and then gives specifications and pictures of the EA-6A Intruder, the EA-6B Prowler, the F-105F/G Thunderchief (Wild Weasel II/IV), the F-4G Phantom II (Wild Weasel V), the EF-111A Raven, and the EA-18G Growler.
2017.302.020	Wings of the Navy : Testing British and US Carrier Aircraft	Brown, Eric Melrose	This book records Captain Eric "Winkle' Brown, CBE, DSC, AFC, and RN cockpit experiences testing a unique range of British and American carrier aircraft. First published by Jane's in the 1980s, this edition has been greatly revised and expanded and now covers all the most important naval aircraft developed during Captain Brown's legendary career. As naval aviation entered the Second World War, the venerable wood and fabric aircraft had to be quickly replaced with powerful fighters and bombers, all of which had to be tested to their limits and, as the jet age arrived, the rate of technological advance continued unabated as Eric Brown soon found himself testing re-hear, boundary layer control and hydraulically powered flight controls. Other innovations such as the angled flight deck, steam catapult, mirror landing sight (optical landing) and underwater escape ejection system followed, Pages 18-20 cover the angled deck tests on the USS Midway. The Midway is listed on three other pages as well.
2017.302.021	Fighters Over the Fleet	Friedman, Norman	An account of the evolution of naval fighters for fleet air defense and the parallel evolution of ships operating and controlling them. Concentrates on three main exponents of carrier warfare, the Royal Navy, the U.S. Navy, and the Imperial Japanese Navy.

			Ports visited: Tiger Cruise - Norfolk to Virgin Islands. Includes St. Thomas, Rio De Janeiro, Brazil, Acapulco (9/88-10/88).
2017.302.024	USS Constellation (CV-64) - Westpac - 1988-89	Bear, Charles (ed.)	Pictorial account of the 1988-'89 deployment of the Kitty Hawk-class aircraft carrier USS Constellation (CV-64) to the Western Pacific. She began to depart San Diego, California, on 2 August 1988 but suffered a major fire caused by a JP-5 fuel leak into One Main Machinery Room and had to return immediately the next day. She left again on 1 December 1988 and returned 1 June 1989. She relieved USS Nimitz in the Indian Ocean. Ports of call: Pearl Harbor, HI; Subic Bay, Philippines; Masirah, Oman; Diego Garcia; Karachi, Pakistan; Perth, Australia; Pattaya, Thailand; Hong Kong; and Seattle, Wash. Embarked: Carrier Air Wing One Four (CAW-14) with: VFA-113 "Stingers" (F/A-18 Hornets); VFA-25 "Fist of the Fleet" (F/A-18 Hornets); F-21 "Freelancers" (F-14 Tomcats); VF-154 "Black Knights" (F-14 Tomcats); and VA-196 "Milestones" (A-6E and KA-6D).
2017.302.025	USS John F. Kennedy (CV-67) - JFK - 1977	Villali, David W. (ed.)	Pictorial account of the deployment of the modified Kitty Hawk-class aircraft carrier USS John F. Kennedy (CV-67) to the Mediterranean Sea in 1977. The ship departed Norfolk, VA on 15 January and returned to Norfolk on 1 August. She relieved USS Nimitz (CVN-68) at Rota, Spain on 26 January. Port visits included: Naples, Italy; Dubrovnik, Yugoslavia; Alexandria, Egypt; Barcelona, Spain; Palma de Mallorca, Spain; and Malaga, Spain. CCG-2 was embarked with: VF-14 (F-14A); VF-32 (F-14A); VA-46 (A-7B); VA-72 (A-7B); VA-34 (A-6E and KA-6D); VFP-63 Det.2 (RF-8G); VAQ-133 (EA-6B); VAW-125 (E-2C); VS-32 (S-3A); and HS-11 (SH-3D).

Object ID	Title	Author	Summary
2017.302.026	USS America (CV-66) - Desert Shield/Desert Storm - 1990-91	Rice, Gary R. (ed.)	Pictorial account of the Kitty Hawk-class aircraft carrier USS America deployment to the Red Sea and Persian Gulf to take part in Operation Desert Shield and Operation Desert Storm. In fact she was the only carrier during the war to operate on both sides of the Arabian Peninsula. She departed Norfolk for the deployment on 28 December 1990 and returned to Norfolk from the deployment on 18 April 1991. There was only one port visit involved, Hurghada, Egypt. The book also covers predeployment activities of port visits to Fort Lauderdale and St. Thomas, SRA-90, Refresher Training and a FLT X 2-91. Also a post-deployment port visit to New York City and participation of members of the crew in a celebratory parade to honor the successful completion of Desert Storm.
2017.302.027	F-14 Tomcat	Sixma, Herman J.	A comprehensive color album of the 'world's best total fighter.'
2017.302.028	USS Randolph (CV-15) - Mediterranean Cruise - 1946	None Stated	Pictorial account of the Essex-class aircraft carrier USS Randolph (CV-15)'s Mediterranean cruise from 23 October (Norfolk) to 21 December 1946 (Boston) as part of Carrier Division Four with Air Group Seventeen embarked. Ports of call included Gibraltar, Naples, Izmir, Marmaris, Beirut, Athens, Malta, and Quonset Point, RI. Other title: U.S.S. Randolph's Mediterranean Cruise, Oct. 23 - Dec. 21, 1946.
2017.302.029	USS Kearsarge (CV-33) - Mediterranean Cruise - June 1-October 2, 1948	None Stated	A pictorial account of the deployment of the USS Kearsarge (CVA-33) to the Mediterranean Sea in 1948 for operations with Sixth Task Fleet. The ship departed Norfolk on 1 June 1948. Ports of call included Gibraltar, Golfe Juan (French Riviera), Malta, Augusta Bay, Argostoli (Greece) Suda Bay and Tripoli. Excellent artwork (drawings) throughout the book. Last page has photo of two sailors with Jack Benny at Monte Carol. The ship steamed 20,000

			miles on the deployment. It returned to Norfolk on 2
2017.302.030	USS Kearsarge (CV-33) - "B" Division - 1950	None Stated	An unusual commemorative/cruise book in that it is for only the "B" Division of USS Kearsarge on its interfleet movement from the Atlantic to the Pacific via the Panama Canal. The ship departed Norfolk on 27 January 1950 and arrived at Puget Sound Naval Shipyard on 23 February in preparation for decommissioning and a modernization overhaul. There is one photo of the ship underway, and five smaller photos of the ship transiting the Panama Canal. All others are individual photos of crewmembers of "B" Division.
2017.302.031	USS Forrestal (AVT-59) - Decommissioning Annual - 4 Feb 1992-30 Sept 1993	Pailthorpe, Robert (ed.)	Pictorial account of the final 19-months of active service of the USS Forrestal (CVA/CV/AVT-59). Forrestal was designated the navy's training aircraft carrier in February 1992, changed homeports to Pensacola, FL, replaced the USS Lexington in that role, and was the first carrier to take on the expanded role of a fleet training ship. That September she entered Naval Shipyard, Philadelphia for modernization. While in the yard SECDEF made the decision to have the ship decommissioned. She was removed from the Fleet on 11 September 1993, marking exactly 38 years of service. She was decommissioned on 30 September 1993. The highlight of this period for the crew was a port visit to New Orleans.
2017.302.032	I Was Just a Radioman : The Memoirs of a WW2 Pearl Harbor Survivor	Lawrence, Henry P.	A personal narrative of World War II in the Pacific by a radioman in U.S. Navy fixed-wing patrol aircraft. Account includes being present during the Japanese attack on Pearl Harbor on 7 December 1941.
2017.302.033	MiG-17 and MiG-19 Units of the Vietnam War	Toperczer, Istvan	The erstwhile enemy of the USAF and US Navy during the nine years of American involvement in the Vietnam War, the Vietnamese Peoples' Air Force (VPAF) quickly grew from an ill-organised rabble of poorly trained pilots flying

Object ID	Title	Author	Summary
			antiquated communist aircraft into a highly effective fighting force that more than held its own over the skies of North Vietnam. Flying Soviet fighters like the MiG-17, and -19, the VPAF produced over a dozen aces, whilst the Americans managed just two pilots and three navigators in the same period. István Toperczer is a flight surgeon with the Hungarian Air Force. In his spare time, he has become one of the few individuals from outside Vietnam to be given open access to the files of the Vietnamese People's Air Force. He has made several visits to Hanoi, and other Vietnamese cities, in the past five years, and has interviewed many of the leading aces from the war years. Mark Styling has illustrated several books in both the Aces and Combat Aircraft series. Since switching mediums from airbrush to Mac art he has produced some of the best profiles Osprey has ever used. Iain Wyllie is one of Britain's leading cover artists. Since becoming a full-time aviation artist he has created over 40 cover artworks for Osprey's hugely successful Aircraft of the Aces and Combat Aircraft series. CONTENTS Establishing the VPAF Training MiG-17 MiG-19 MiG-21 Appendices Full Ace Listing Confirmed Kill Listing Commentary on the Colour Profiles (https://ospreypublishing.com/mig-17-and-mig-19-units-of-the-vietnam-war)

2017.302.034	MiG Aces of the Vietnam War	Toperczer, Istvan	Based on research and personal interviews, this book presents the most successful North Vietnamese pilots' careers from their training years to their

Object ID	Title	Author	Summary
			missions and aerial victories. There were nineteen aces in the Vietnamese People's Air Force during the war. An additional eight MiG pilots were also successful in dogfights; each claimed four aerial victories. More than 240 illustrations feature rare war-era photography, color MiG profiles, maps of air engagements, and lists of air victories and losses that reconstruct the events that took place over North Vietnam from 1965 to 1973. AUTHOR(s) István Toperczer was born in 1963, Hungary. He graduated in the University of Medical Sciences in Pécs. He worked for ten years in the Department of Traumatology of the County Hospital. From 1996, he is serving as a specialized flight-surgeon for the Hungarian Air Force. He served two half years as military surgeon in Afghanistan. In the past twenty years, he has been a writer and photographer of aviation magazines as a member of the National Federation of the Hungarian Journalists. He has already published more than five photography albums about the Hungarian Air Force. From 1994, he made several visits to Vietnam, where he collected archive materials and interviewed famous North Vietnamese MiG pilots and aces. Following in-depth research he published three books about Vietnamese People's Air Force from the war years. (http://www.schifferbooks.com/mig-aces-of-the-vietnam-war-5755.html)
2017.302.035	MiGs over North Vietnam : The Vietnamese People's Air Force in Combat, 1965-1975	Boniface, Roger	Until now, the day-to-day working and opinions of the Vietnamese People's Air Force (VPAF) has remained relatively unknown. For the first time, this book focuses on the pilots and, using rare first-hand accounts and many new photographs, analyzes their fighter

Object ID	Title	Author	Summary
			operations over North Vietnam between 1965 and 1975. Frank opinions are voiced on how the North Vietnamese viewed the gradual escalation of the aerial conflict over their country, including details on key operations and VPAF tactics against USAF F-4s, F-105s, F-8s, and B-52s. Details of the Black Friday Massacre, America's heaviest aerial defeat, are related in the words of Nguyen Van Coc (the highest-scoring pilot of the Vietnam conflict) who tells of his first kill, and Dong Van De, who recalls how he achieved the first-ever double kill over American-flown aircraft, events which have never, until now, been released into the public domain. Leading VPAF pilots, including Major General Pham Ngoc Lan, discuss their aerial engagements and tactics, and Nguyen Tiem Sam recollects his kills of F-4 Phantoms using only ATOLL air-to-air missiles. Following exhaustive research, the author reveals much new data, which challenges previous reports. Three kills claimed by Lt. 'Duke' Cunningham, later a U.S. Senator, and the success of Operation Bolo, America's response to the Black Friday Massacre, are discussed. Also for the first time outside Vietnam, details of the Christmas bombings are released, including the controversial first night-fighter kill of a B-52 by Vu Xuan Thieu a fact which the U.S. military has never accepted. Comprehensive appendices reveal the first complete loss list of all VPAF personnel and a victory table with a breakdown of all known kills and shared kills and types. The book includes 24 intricate profiles of extremely rare aircraft, including the VPAF Soviet-supplied MiG 15, MiG 17F, and Chinese MiG 19 (Shenyang F-6); combined with the text they offer a unique insight into the aerial war from the Vietnamese viewpoint.

Object ID	Title	Author	Summary
			About the Author Roger Boniface completed a postgraduate degree at Dundee University in Natural Resources Law. On passing his Solicitor's Finals he worked in legal practices in London and Bournemouth. Returning to Singapore in 1994, he lectured in History and Law for the next six years. In 2000 he moved back to England, where he works as a customer care officer. His Interests include military and aviation history, especially that of the Luftwaffe in World War Two as well as the air wars over North Vietnam and North Korea. (from Amazon.com) Contents The Gulf of Tonkin incident -- "Rolling Thunder" -- A victory from rice-pounding tactics -- The December massacres -- "Operation Bolo" -- High stakes! -- End of Rolling Thunder -- The intermission period, 1968-72 -- Calm before the storm -- Time of the red eagle -- "Bamboo shoots" -- The tide changes -- No quarter given -- A false dawn -- The Christmas bombings and the war with the B-52s -- The beginning of the end -- The final victory -- Some conclusions about air victories -- Three of a kind.
2017.302.036	Air War Over North Vietnam : The Vietnamese Peoples' Air Force, 1949-1977	Toperczner, Istvan	An overview of the North Vietnam Peoples' Air Force. Includes many photos, some in color. According to the Editor's Note on page 3, "Readers may note that many of the events described in these pages, especially claims of aircraft shot down, may in fact not be able to be verified by records now available. However, what appears in these pages is the history of the air war over North Vietnam as seen through the eyes of the North Vietnamese and may seem like propaganda to an American reader; just as a North Vietnamese reader would

Object ID	Title	Author	Summary
			view an American account of the air war over North Vietnam." According to a review on Amazon, this book is a translation of the official "History of the People's Air Force of Vietnam (LICH SU KHONG QUAN NHAN DAN VIET NAM)."
2017.302.037	Wings : Hugging the Deck	Nolan, Claire	Season 1 Episode 166 of Wings that was shown on various channels. Several copies are available on youtube.com The episode starts and ends with a graduating class of naval aviators from the Naval Auxiliary Air Station (NAAS), Meridian, Mississippi. The aviators were trained on the McDonnell Douglas A-4 Skyhawk. Includes video of Skyhawk in Vietnam, and launching from carriers. Also, includes videos of James Stockdale and John McCain-- both Naval aviators.
2017.302.038	USS Intrepid (CV-11) - 1943-46	Morgan, Williams T. (ed)	Pictorial account of the wartime and post-war activity of the USS Intrepid (CV-11) in the period from her commissioning in 1943 through mid-1946. While the Chaplain's introduction indicates the period covered was the previous year from 30 July 1946, there is considerable photographic and textual accounts of Intrepid's shakedown cruise after commissioning, transit of the Panama Canal to the Pacific, and of her wartime exploits and yard periods in 1944 and 1945. Includes combat photos of Japanese air attacks on the ship and Japanese torpedo and bomb damage. Also ports calls in Hawaii and Japan Ulithi Atoll. There were five ship Captains and five Air Groups associated with Intrepid in the period from commissioning through the publish date of the book.
2017.302.039	Philippine Sea 1944, The : The Last Great Carrier Battle	Stille, Mark	After suffering devastating losses in the huge naval battles at Midway and the Soloman Islands, the Imperial Japanese navy attempted to counter-attack against the US forces threatening the Home

Object ID	Title	Author	Summary
			Islands. Involving the US Fifth Fleet and the Japanese Mobile Fleet, the battle of the Philippine Sea took place during the United States' amphibious invasion of the Mariana Islands during the Pacific War. The two fleets clashed on 19-20 June 1944 and the Japanese carrier fighters were shot down in devastating numbers by US aircraft in what became known as the "Great Marianas Turkey Shoot", before US counterattacks and submarine strikes forced the withdrawal of the Japanese fleet. Fully illustrated with stunning specially commissioned artwork, Mark Stille tells the enthralling story of the last, and largest, carrier battle of the Pacific War, the one that saw the end of the Imperial Japanese Navy as a formed fighting force. Mark E. Stille (Commander, United States Navy, retired) received his BA in History from the University of Maryland and also holds an MA from the Naval War College. He has worked in the intelligence community for 35 years including tours on the faculty of the Naval War College, on the Joint Staff and on US Navy ships. He is currently a senior analyst working in the Washington DC area. He is the author of numerous Osprey titles, focusing on naval history in the Pacific. (https://ospreypublishing.co
2017.302.040	USS Yorktown (CV-5) : From Design and Construction to the Battles of Coral Sea and Midway	Doyle, David	USS Yorktown (CV-5) was the US Navy's first battle-worthy, purpose-built aircraft carrier. Her crew, already accustomed to wartime conditions by maintaining Neutrality Patrols during 1941 in the Atlantic, quickly adapted to the Pacific Theater, having been dispatched there immediately after Pearl Harbor. First at Coral Sea, then at Midway, Yorktown's flyers blunted the sword of Japanese aggression. The men flying

Object ID	Title	Author	Summary
			from her decks were instrumental in turning the tide of WWII in the Pacific. This volume explores Yorktown's construction, prewar and wartime activities through carefully researched photos, many of which have never before been published, which are reproduced in remarkable clarity. This clarity, and the large size of many of the photos, coupled with descriptive and informative captions, puts the reader on the deck of this historic warship throughout her history. Part of the Legends of Warfare series. (http://www.schifferbooks.com/uss-yorktown-cv-5-from-design-and-construction-to-the-battles-of-coral-sea-and-midway-6227.html)
2017.302.041	USS Ronald Reagan CVN 76 Commemorative Program : Homeporting July 23, 2004, San Diego, California	Seeger, Eric (ed.)	Program commemorating the arrival of USS Ronald Reagan at its new homeport of San Diego, CA. Includes letter from Nancy Reagan. Includes comment from naval and civilian dignitaries a features of the Fleet, aircraft carriers, air wings, etc.
2017.302.042	USS Constellation (CV-64) - Westpac - 1987	Miles, C. W., Jr. (ed.)	Pictorial account of predeployment port visits and the deployment of USS Constellation (CV-64) to Westpac and the Indian Ocean in 1987. She departed San Diego on 11 April and returned to San Diego on 13 October. She steamed 35,000 miles and spent 139 days at sea, including 79 consecutive days in the Indian Ocean and Northern Arabian Sea in support of national objectives in that area.. Ports of Call on the deployment included Pearl Harbor, Perth, Subic Bay and Diego Garcia. COMCARGRU 7 was Officer in Tactical Command. Destroyer Squadron 13 was deployed with Constellation. Carrier Air Wing Fourteen was aboard with: VF-154 (F-14A); VF-21 (F-14A); VFA-113 (F/A-18A); VFA-25 (F/A-18A); VA-196 (A-6E and KA-6D); VAW-113 (E-2C); VAQ-139 (EA-6B); VS-37 (S-3A); and HS-8 (SH

2017.302.044	Stanley Johnston's Blunder : The Reporter Who Spilled the Secret behind the U.S. Navy's Victory at Midway	Carlson, Elliot	Elliot Carlson tells of Stanley Johnston, a Chicago Tribune reporter who exposed a vitally important secret during World War II. After Johnston is embarked in the USS Lexington during the Battle of the Coral Sea, he is assigned to a cabin on the rescue ship Barnett where messages from Pacific Fleet commander Admiral Chester Nimitz are circulated. One reveals the order of battle of Imperial Japanese Navy forces advancing on Midway Atoll. Johnston shares this info in a 7 June 1942 Chicago Tribune front-page story. Navy officials fear the Japanese will discover the article, realize their code has been cracked, and quickly change it. Drawing on seventy-five-year-old testimony never before released, Carlson describes the grand jury room where jurors convened by the FDR administration consider charges that Johnston violated the Espionage Act. Using FBI files, U.S. Navy records, archival materials from the Chicago Tribune, and Japanese sources, Carlson at last brings to light the full story of Stanley Johnston's trial.-Provided by publisher.
2017.303.001	Hamlyn Concise Guide to American Aircraft of World War II, The	Mondey, David	This book provides a useful guide to some 120 aircraft that served with the US Air Force from 1939-1945. Both combat and non-combat aircraft are covered by text detailing each type's origin, history, and variants, followed by a full technical specification. This illustrated guide looks at major American aircraft of World War II, showing the design of fighter bombers used in the war. It describes how the aircraft were deployed in bombing missions, their pilots, the firepower

Object ID	Title	Author	Summary
			they were capable of, and how they survived the conflict.
2017.303.002	Fighting to Leave : The Final Years of America's War in Vietnam, 1972-1973	Stoffey, Robert E.	Contents : Afloat with the Seventh Fleet -- The NVA invades -- The fall of Quang Tri City -- Bat 21 -- The Seventh Fleet counterattacks -- B-52s return to the North -- MiGs and the Redeye missile -- Mining Haiphong Harbor -- Operation Linebacker -- The defense of Hue City -- Lam Son 72 -- Retaking Quang Tri City -- Stranglehold on North Vietnam - - Marine hunter killers -- Preparing for End Sweep -- Linebacker II -- The end nears -- Ceasefire -- Operation End Sweep -- Operation Homecoming -- Back to the real world. Perhaps more vexing than any part of the Vietnam War--Americas longest--was getting out. This book offers a chronicle of those last difficult years, 1972 and 1973, that is at once a detailed and thorough overview and at the same time a vividly personal account. The year 1972 found Marine Corps pilot Robert E. Stoffey beginning his third combat tour in Vietnam. After flying 440 combat missions out of Da Nang and Marble Mountain Airfields in South Vietnam (and being shot down twice) between 1965 and 1970, Stoffey was in a unique position to judge the United States changed strategy. From the vantage point of the USS Oklahoma City, he fought--and observed--the critical and complex last two years of the war as Marine Air Officer and Assistant Amphibious Warfare Officer on the staff of the Commander, Seventh Fleet. As the South Vietnamese battled for survival against the onslaught from the Communist North Vietnamese Army, the U.S. Seventh Fleet, afloat in the Gulf of Tonkin and the South China Sea, was a significant supporting force.

Object ID	Title	Author	Summary
			With the U.S. Navy's mining of North Vietnam's waterways, concentrated shore bombardments, and air attacks, this sea power was instrumental in leading to the negotiated end of the war and return of our POWs. This is the story that Robert Stoffey tells in his firsthand account of how the Vietnam War finally ended and what it took to get our POWs home.
2017.303.003	Military Sea Transportation Service	Bureau of Naval Personnel	This guide is to provide officers of the Regular Navy and Naval Reserve with information concerning the Military Sea Transportation Service.(MSTS). A correspondence course for all officers qualifying for MSTS mobilization billets, and others as appropriate, will be based on this text. Name changed to Military Sealift Command in 1970. Major stress is placed on MSTS functions and responsibilities. Relationships with various segments of the Department of Defense and other Government agencies are indicated. Some of the more important MSTS operating procedures, particularly when they differ from those followed by the remainder of the fleet are explained in general terms.
2017.303.004	Naval Firepower	Peacock, Lindsay T.	Extensively illustrated catalog of naval surface, subsurface and air platform weapons systems circa 1990. 46 pages on aircraft carrier and carrier-based systems.
2017.303.005	Rise and Fall of the Aircraft Carrier, The	Ireland, Bernard	Man's greatest ingenuities, it is said, are dedicated to the arts of war. Through the ages, each new weapon is created as the ultimately unassailable one... until it is superseded. "The Rise and Fall of the Aircraft Carrier" traces the history of one such weapon from the early days when men and machines hurled themselves from temporary structures on the topsides of warships through to the toppling of the carrier from

Object ID	Title	Author	Summary
			her proud position by the advent of the nuclear submarine. These "mobile airbases" have had a rich history and Bernard Ireland's text brings alive their achievements in the twentieth century. In the 1920s, the major fleets embarked on carrier construction at a rapid pace. Then, with hostilities, the carrier emerged as 'Queen of the Board' — moving at will to strike the enemy fleet at its base; to counter the hated U-boat — or to prove itself in the massed attacks of the Pacific battles. Pearl Harbor, Coral Sea, Midway and Leyte showed it to be a weapon of infinite flexibility. This well—researched book brings the story up to the modern day with the passing of the great strike carrier moving a step nearer. Today, it is undergoing a radical metamorphosis. The new breed is likely to be a missile—armed warship with flight deck and hangar. Carefully chosen photographs, illustrations and maps, plus an authoritative text make "The Rise and Fall of the Aircraft Carrier" a fascinating account of a weapon which has left its mark on naval history. Front Cover: A symbolic view of the last of Britain's fleet carriers, 'Ark Royal` which retired at the end of 1978. Photographed by Michael Turner Back Cover: A surface to air missile being launched at a target drone from the USS 'America'. Courtesy of The Naval Photographic Center, Washington 168 pages 34 photographs in full colour 12 illustrations in colour 90 photographs in black and white

			of their planes and their most important battles, and commentary by two distinguished historians. This stunning collection is a must-have for fans of military history and aviation enthusiasts alike.
2017.303.009	Corsair Aces : The Bent-Wing Bird Over the Pacific	Musciano, Walter A.	In the history of aerial warfare, few aircraft have been so instrumental in battlefield history as the Chance Vought F4U Corsair. Entering action in early 1943 in the South Pacific, the Corsair was the first Allied plane to meet the Japanese on even terms Relates the story of the development and employment of the Vought F4U Corsair by Marine and Navy aces flying against the Japanese in the Pacific
2017.303.010	United States Naval Academy : Being the Yarn of the American Midshipman (Naval Cadet)	Park, Benjamin	Excerpt from The United States Naval Academy: Being the Yarn of the American Midshipman Here were stationed the quartermasters, who were assistants to the Officer in charge Of the deck, besides having their own especial functions Of stowing the hold, coiling down the cables, attending to the steering, and keeping the time by the watch-glasses. Upon them first fell the additional work Of transmitting orders from the quarter-deck to the forecastle, and thus saving the meces sity Of the Officer in command aft leaving his proper station. It was found, however, that the quartermasters had about enough to do in the other particulars before noted, and therefore the practice grew up Of detailing seamen - men Of experience selected from the crew - who could be relied upon to carry orders intelligently, to con vey messages between the two points. The tradition is that, because these men were stationed in the waist, or mid-ship portion, Of the vessel, they were called midshipmen. 2017.303.014	One Giant Leap : Neil Armstrong's Stellar American Journey	Wagener, Leon	A biography of Neil Armstrong, Navy pilot and the first man to walk on the moon.
2017.303.015	Pearl Harbor 75 Years Later : A Day of Infamy and Its Legacy	Link, Tessa	"On December 7, 1941, the Japanese Empire stunned the world with a surprise attack on the United States Naval Base at Pearl Harbor. The courage and glory, the infamy and scandal, make that day one of the most important moments in American history. Here is that electrifying story, told in words and photographs, many of the pictures rare, others published here for the very first time. The fascinating saga that is Pearl Harbor begins before the attack, in Europe, Japan and behind the scenes in the U.S. We meet a desperate Churchill, an inspired Yamamoto, a determined Roosevelt. Then the attack itself is memorably presented in all its unparalleled fury. Japan

			had hoped to cripple an enemy. In the end, it awakened a sleeping giant." (from jacket
2017.303.016	Plane Spotter's Guide	Holmes, Tony	Aviation has revolutionised warfare over the last 100 years, and this new pocket guide gives the reader the essential details of 70 iconic aircraft, including the Sopwith Camel, the Spitfire, the Messerschmitt Bf 109, the P-51 Mustang and the F-4 Phantom. Drawing on Osprey's comprehensive aviation archive, the Plane Spotter's Guide uses detailed profile artwork to illustrate and aid recognition, as well as specification boxes to provide all the technical details. (SDPL) Numerous U.S. Navy, Japanese and Soviet aircraft included.
2017.304.001	Whitey : The Story of Rear Admiral E.L. Feightner, A Navy Fighter Ace	Mersky, Peter B.	There are several references to the USS Midway on pages: 82-84 (describes carrier quals of the Cutlass on the Midway in July 1951), 91, 119, and 126. There are two pictures of Midway on page 19 of the photo section: Lieutenant Commander "Whitey" Feightner, the only man to operate the F7U-1 Cutlass from a carrier, comes aboard Midway, and Whitey taxis past the Midway's Island. From dust jacket: Whitey is the first complete biography of one of the last surviving U.S. Navy World War II Aces. Following a typical American Midwestern boyhood, Whitey Feightner was in the vanguard of the huge group of young men thrust into World War II. Upon receiving his commission and his gold wings, he was assigned to a fighter squadron in the Pacific and soon found himself flying with the likes of Jimmy Flatley and Butch O'Hare. He flew through many of the war's most hectic and dangerous campaigns, such as Guadalcanal and the Marianas, gaining nine official kills. After the war Whitey became a member of the Regular Navy and was assigned to several

			of the Navy's most secret and action-filled projects at Patuxent River, Maryland.
2017.304.002	Act of War : Lyndon Johnson, North Korea, and the Capture of the Spy Ship Pueblo	Cheevers, Jack	In January 1968, the Pueblo was monitoring military radar sites near the port of Wonsan, off North Korea. They were confronted by a North Korean gunship. While trying to escape, the captain and crew were surrounded by several gunships, captured, and became prisoners of war. The ship was "jammed with sophisticated electronic surveillance gear, code machines, and top secret documents" when it was captured.
2017.304.003	Fabled Fifteen : The Pacific War Saga of Carrier Air Group 15	Cleaver, Thomas McKelvey	The record of Carrier Air Group 15 in World War II is astonishing by any measure: it scored 312 enemy aircraft destroyed, 33 probably destroyed, and 65 damaged in aerial combat, plus 348 destroyed, 161 probably destroyed, and 129 damaged in ground attacks. Twenty-six Fighting 15 pilots became aces, including their leader, Commander David McCampbell, who became the U.S. Navy's "Ace of Aces." Twenty-one squadron pilots were killed in action and one in an operational accident aboard the carrier Essex. The fighter squadron's partners, Bombing Squadron 15 and Torpedo Squadron 15, scored 174,300 tons of enemy shipping, including 37 cargo vessels sunk, 10 probably sunk, and 39 damaged. As well, Musashi, the world's largest battleship, was sunk, along with a light aircraft carrier, a destroyer, destroyer escort, two minesweepers and other craft—plus the Zuikaku, the last surviving carrier that participated in the Pearl Harbor attack. Incredibly, every pilot of Torpedo 15 was awarded the Navy Cross, the highest award for bravery after the Medal of Honor. All of this took place between May and November, 1944.

Object ID	Title	Author	Summary
			No other American combat unit in any service came close to a similar score in such a short time period. Air Group 15 participated in the two greatest naval battles in history, the Philippine Sea—also known as the Marianas Turkey Shoot—and Leyte Gulf, which saw the end of Japanese naval power. On June 19, 1944, Fighting 15 shot down 68.5 attacking Japanese aircraft, a one-day record unmatched by any other U.S. fighter squadron. In documenting the saga of Air Group 15's momentous six months at war, the author provides an intimate and insightful view of the group's fabled combat tour, including details of daily life and human interactions aboard the fleet carrier USS Essex during the busiest phase of the Pacific War. "does an excellent job of weaving the stories of the air men- from day to day affairs to a grueling succession of air battles - within the context of the Pacific offensive...nicely balanced history" Aviation History Few authors cover aviation and war with the authenticity that Thomas McKelvey Cleaver brings to "Fabled Fifteen." The carrier based naval aviators who fought in the Pacific in World War II had a difficult, demanding, exciting job and Cleaver captures their experience, from a well known Medal of Honor ace to an obscure, lowly ensign. This is a fast paced, character driven narrative that will grab you and hold you. -- Robert F. Dorr, author "Mission To Tokyo" Cleaver's book is a splendid effort that is eminently readable, detailed, and action packed. Buttressed by years of research, the book is not just a dry recounting of dates and missions; rather, it examines

Object ID	Title	Author	Summary
			the men and their lives through interviews with surviving members, diaries and contemporary letters. Cleaver uses it all to transform words on a page into real and empathetic men. -- LCOL Jay A. Stout USMC (Ret), author, "Fighter Group" Cleaver provides a very clear sequence of both naval strategy and tactics of both sides of the two greatest naval battles in history, the Marianas Turkey Shoot and the Battles of Leyte Gulf. -- CDR Jack D. Woodul, USN (Ret) Cleaver does a magnificent job in telling the human side of the story of Carrier Air Group 15, perhaps the most successful of its type. The author gives the human story of the heroism of the fighter, dive bomber and torpedo plane pilots who inflicted tremendous losses on the Japanese. But he also places Air Group 15's exploits in the context of the larger events of the war. -- COL Walter J. Boyne, USAF (Ret), retired curator, National Air And Space Museum, author "The Wild Blue." Thomas McKelvey Cleaver's FABLED FIFTEEN, The Pacific War Saga of Carrier Air Group 15 is a great bit of history mixing factual research and the personal touch through letters and interviews. The sagas of USS Enterprise, Air Wing 15 and its CAG, David McCampbell, have each been told before, but, until now, not together in a comprehensible and readable whole. This book is on the top of my reference stack. —CDR Robert R. "Boom" Powell, USN (Ret) Previous accounts of Air Group 15's activities have mostly been a summary of flight records with little other detail, so we have learned little of the men who actually flew and

Object ID	Title	Author	Summary
			maintained the planes during that time. They all have fascinating stories to tell that the author has captured for our enjoyment. -- CDR David P. McCampbell, USN (Ret)
			"strives to put a more human face on a topic that is often presented as a simple series of basic chronological facts... presents the history of the CVG-15 from the perspective of those who made the history. This is much more important than just facts and figures...packed with vivid accounts of the men who fought the war...highly recommend it. You cannot distill human history down to a chart." Logbook
			a truly outstanding book about this famous unit, a unit whose record has never been equaled and probably never will. You need to buy this one. Modeling Madness

2017.304.005	Aviators, The : Eddie Rickenbacker, Jimmy Doolittle, Charles Lindbergh, and the Epic Age of Flight	Groom, Winston	"Written by gifted storyteller Winston Groom (author of Forrest Gump), The Aviators tells the saga of three extraordinary aviators--Charles Lindbergh, Eddie Rickenbacker, and Jimmy Doolittle--and how they redefine heroism through their genius, daring, and uncommon courage. From Winston Groom, the best-selling author of Forrest Gump, Shiloh 1862, and Vicksburg 1863, comes the fascinating story of three extraordinary heroes who

Object ID	Title	Author	Summary
			defined aviation during the great age of flight. These cleverly interwoven tales of their heart-stopping adventures take us from the feats of World War I through the heroism of World War II and beyond, including daring military raids and survival-at-sea, and will appeal to fans of Unbroken, The Greatest Generation, and Flyboys. With the world in peril in World War II, each man set aside great success and comfort to return to the skies for his most daring mission yet. Doolittle, a brilliant aviation innovator, would lead the daring Tokyo Raid to retaliate for Pearl Harbor; Lindbergh, hero of the first solo flight across the Atlantic, would fly combat missions in the South Pacific; and Rickenbacker, World War I flying ace, would bravely hold his crew together while facing near-starvation and circling sharks after his plane went down in a remote part of the Pacific. Groom's rich narrative tells their intertwined stories--from broken homes to Medals of Honor (all three would receive it); barnstorming to the greatest raid of World War II; front-page triumph to anguished tragedy; and near-death to ultimate survival--as all took to the sky, time and again, to become exemplars of the spirit of the 'greatest generation'"
2017.304.006	Feet Wet : Reflections of a Carrier Pilot	Gillcrist, Paul T.	CVB-41 mentioned on pages 138-140. Ramp strike on Midway discussed on pages 180-187. "Paul Gillcrist was a navy carrier pilot for almost thirty years, from the early days, of flying propeller planes from straight deck carriers, to the days of high-tech, lethal "teen" jets and supercarriers. In his remarkable career - from "nugget", to competent jet aviator, to test pilot, to Vietnam fighter pilot, to air wing commander, to head of "Fightertown, USA," Gillcrist flew the F-8 Crusader, F-4 Phantom, F-14 Tomcat, and a myriad of other tactical

Object ID	Title	Author	Summary
			aircraft. He took part in the Navy's transition to jet aircraft, when accident rates were high and many feared that jets would not be able to operate in the harsh, demanding environment of "blue water ops." Gillcrist saw the introduction of critical innovations - the angled deck, steam catapult, optical landing system - that saved carrier jet aviation from extinction. Few aviators have had such varied and fascinating experiences, and few could write about them with such eloquence. Available now in a new hard cover reprint edition, Feet Wet (aviator talk for reaching the safety of water) is a chronicle of adventure, heroism, courage, and humor, with some of the most exciting passages ever written on flying. From his magical first flight - the sheer exstasy of being airborne, to the heart-pounding excitement of his first night "trap," the terror of ejecting from a test plane spinning out of control, to dodging SAMs and jousting with MiGs over Hanoi - Gillcrist takes the reader into his world and vividly conveys what all pilots live for - the tremendous "high" of all-out flying. As part of his absorbing stories. Gillcrist shares technical information on carrier aviation; the reader sees, step-by-step, how an airplane is launched, and then trapped again on a small deck aboard a moving ship - this, the most difficult feat in aviation. Paul gillcrist retired in 1985 after a 33-year career as a naval aviator. He commanded a fighter squadron, a carrier air wing, a major jet base, and as a flag officer, the Pacific Fleet fighter wing. He flew 167 combat missions in three Vietnam combat deployments, for which he was awarded seventeen combat decorations. Paul Gillcrist is also the author of Tomcat! The Grumman F-14 Story, Crusader! Last of the Gunfighters, and Vulture's Row: Thirty Years in Naval Aviation." (from schifferbooks.com)

2017.304.009	Fast Movers : America's Jet Pilots and the Vietnam Experience	Sherwood, John Darrell	The story of the air war in Vietnam is really story of the "fast movers", men who flew the jet fighters and fought in the MiG and SAM infested skies of North Vietnam. In this book, the author John Sherwood, an official historian with the U.S. Navy, draws on more than 300 revealing interviews with these courageous pilots and crews, offering an in-the-cockpit perspective on the Vietnam

Object ID	Title	Author	Summary
			experience never before possible. He profiles fourteen aviators, including such MiG killers as Robin Olds, Steve Ritchie, and John "Pirate" Nichols, and captures the heroism and sacrifice of this truly elite group of air warriors. From flying through walls of flak in Operation Rolling Thunder to how it feels to shoot down a MiG to the crushing ordeal of capture and imprisonment in the infamous "Hanoi Hilton," every aspect of air combat in Vietnam comes powerfully to life. Fast Movers celebrates these men and their aircraft, chronicling an aspect of the Vietnam conflict too long overlooked. From Publishers Weekly A staff historian for the U.S. Navy, Sherwood (Officers in Flight Suits) offers this compelling presentation of America's fighter pilots of the Vietnam era. His study, though based heavily on interviews with and narratives of just 14 pilots, is by no means impressionistic. It is a presentation of personalities and mentalities in a military community that is becoming increasingly a band apart from the rest of the armed forces as well as from civilian society. Sherwood effectively conveys a central part of his subjects' Vietnam experience: frustration at not being allowed to wage all-out war. He describes in detail such fierce but futile campaigns as Rolling Thunder and Commando Hunt, which, Sherwood writes, "[f]or its technological wizardry... had little impact on the Communists' ability to wage war." Stress was a constant companion for the pilots. But few resigned their commissions or turned in their wings. Not everyone met the standards, and Sherwood is blunt in naming names. Nor was there a common pattern of behavior. Some fighter pilots were like Robin Olds, leader of one of

Object ID	Title	Author	Summary
			the top-ranked F-4 wing, larger-than-life figures, charismatic iconoclasts. Others, like navy commander Roger Sheets, took pride in their professionalism. But all fighter pilots describe their common ground: the shared knowledge that they would do almost anything to help each other in need, manifested in high-risk rescue missions and again in the POW camps. It was the final element that cemented a community of warriors fighting what many saw as a senseless war. (Feb.) Copyright 1999 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. From Library Journal From 1965 through 1973, while U.S. and Vietnamese forces in the South dealt with an elusive enemy on the ground, Marine, Navy, and Air Force pilots were pressing a grim series of attacks meant to force the enemy into peace talks. In this kind of warfare, "going Downtown" meant risking life on every mission against the most concentrated antiaircraft fire ever seen. The stories of several of the outstanding pilots of these campaigns, taken from both their recollections and transcripts of their on-site air-to-air conversations, generate a vivid sense of the sort of action they saw and the work they were asked to do. Sherwood, a historian at the Naval Historical Center, has produced an earnest and solid treatment. He presents the all-volunteer flyers as singularly courageous, dedicated, and capable. His book ranks among the best of this type for its sketches of the personalities in the bombing campaigns against North Vietnam. Recommended for public and academic libraries. -Mel D. Lane, Sacramento, CA Copyright 2000 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. (from Amazon.com)

2017.305.001	Album of Memories, An : Personal Histories from the Greatest Generation	Brokaw, Tom	Companion to the Greatest Generation. From the Depression to Pearl Harbor -- The war in Europe -- The war in the Pacific -- The home front -- Reflections. A seventeen-year-old who enlisted in the army in 1941 writes to describe the Bataan Death March. Other members of the greatest generation describe their war in such historic episodes as Guadalcanal, the D-Day invasion, the Battle of the Bulge, and Midway as well as their life on the home front. In this beautiful American family album of stories, reflections, memorabilia, and photographs, history comes alive and is preserved, in people's own words and through photographs and time lines that commemorate important dates and events. Starting with the Depression and Pearl Harbor, on through the war in Europe and the Pacific, this unusual book preserves a people's rich historical heritage and the legacy of the heroism of a nation.
2017.305.002	Rockets & Missiles of World War III	Berman, Robert P.	Developments in rocket and missile technology since World War II have come to dominate the relationship between the superpowers and have created a balance of terror which threatens the existence of the human race. While the U.S. military was preoccupied by the Vietnam War and its confused aftermath Soviet rocket technology was leaping ahead. For many years Soviet missiles have been larger and their warheads more destructive. Now they may be more accurate as well. The Peacekeeper (MX) missile, the Trident submarine program and the deployment of cruise missiles are the principal Western attempts to redress the balance. Robert Berman discusses the competing strategies and describes the technical and service histories of the superpowers' long-range forces and the smaller but

			nonetheless less deadly arsenals of Britain, France, and China.
2017.305.003	Stealth Aircraft : Secrets of Future Airpower	Sweetman, Bill	The book tells the secret story of how aircraft manufacturers are applying "Stealth" technology to aircraft design in unprecedented detail. "Stealth Aircraft - Secrets Of Future Airpower" represented the first book, at the time of it's publishing, to describe a secret revolution in military aviation. The author describes how in windowless offices, closely guarded factories and secret United States Air Force bases engineers and pilots were building and testing extraordinary fighters, bombers and spy-planes that are designed to take on the world's toughest air defenses. As remarkable as it may seem, the stealth technologies being developed in the mid-1980s, when applied to aircraft designs like the B-1 bomber, essentially produced a radar signature of a large bird, making them essentially invisible to potential enemies radar. This book specifically addresses the following concepts: 1) "High-tech design concepts easily explained"; 2) "Current Stealth aircraft detailed both ours and theirs"; 3) "Personal anecdotes from Stealth aircraft pilots and designers"; 4) "Who's leading the field?"; 5) "Future think"; 6) "Flying tactics and strategy" and 7) "How high, how fast, how far and how much". The major sections of this book are as follows: 1) Introduction; 2) Now you see it; 3) Stealth in the sixties; 4) Design for Stealth; 5) Stealth fighter; 6) Stealth bomber; 7) Vanishing air force; 8) Bibliography; 9) Biography and 10) Index. In addition to an informative text, Stealth Aircraft - Secrets Of Future Airpower" includes the following features: 1) Approximately 41 black and white photographs and 2) About 26 black and white illustrations. This book is fascinating in that when it was written, the American public had not

Object ID	Title	Author	Summary
			been formally told about the existence of new stealth aircraft like the F-117 fighter-bomber and the B-2 bomber projects. At the time, this book came the closest to accurately describing what was happening behind the secrecy of the stealth revolution in aircraft design.
2017.305.004	Battle of the Java Sea, The	Thomas, David A.	Immediately following the attack at Pearl Harbor, Japanese forces began extending their empire into South Asia, capturing American, British, and Dutch colonial possessions as they swept south. They were confident and had every reason to expect continued success. The American fleet was still recovering from Pearl Harbor and could only muster their small Asiatic fleet of outdated ships. The British fleet was spread thin around the world and would only release token forces from the "home waters" of the Atlantic to the Pacific Theater. The Dutch fleet was small and would constitute the bulk of this small Allied force. These Allied fleets faced a large, modern, and determined navy which outclassed them in every aspect of the battle. The result, an overwhelming Japanese victory early in World War II. The Battle of the Java Sea is a good book. It describes the naval operations in and around the Java Sea from December 1941 to March 1942. It did an excellent job of discussing the political background of the early Pacific War. The tactical details of the engagement were also well written and very detailed. The book begins with a prelude of events leading up to the opening of hostilities. Next, the disastrous sinking of the Prince of Wales and the Repulse, two modern British warships sunk by Japanese aircraft, is described. It continues as the Philippines and Singapore are lost. The formation of the Allied Combined Fleet and the difficulty of communications

Object ID	Title	Author	Summary
			and logistics experienced by these new Allies is also discussed in great detail. Finally, the worthless sacrifice of men and ships in the closing days of the battle is described. I feel the term worthless is appropriate because most leaders must have known the battle would end in defeat. The Battle of the Java Sea would be avenged, but this book makes clear that the Allies were unprepared to defend their territory or work together in the early days of World War II.
2017.305.006	Road to Pearl Harbor--1941, The	Collier, Richard	A narrative history that draws upon the experiences and memories of hundreds of participants, great and small, to bring the past to life, The Road To Pearl Harbor provides a totally fresh perspective on the events of that extraordinary year 1941. (from Amazon.com)
2017.305.007	Typhoon of Steel : The Battle for Okinawa	Belote, James H.	"Typhoon of Steel" is the first comprehensive history of the last military campaign of World War II ever written for the general reader. It is based on interviews in Japan and Okinawa with military and civilian survivors, with numerous Americans who fought in the campaign, and on many months of research in the official American and Japanese reports. The results is an authoritative and engrossing narrative of the most difficult and costly undertaking in the Pacific theater. (Replaces 2004.315.046.)

In print since 1901 and updated and expanded to meet recent developments. Chapters include Ships and Boats; Shiphandling; Oceanography and the Weather; and Rules of the Road.
2017.306.004	Driver 3 & 2	Bureau of Naval Personnel	Written for men of the Navy and the Naval Reserve who are studying for advancement to the rates of Driver 3 and Driver 2. First chapter deals with the work and responsibilities of a driver. Subsequent chapters deal with safety precautions, types and models of equipment used, principles of earthwork, specific operating instructions for earth moving and automotive equipment, etc.
2017.306.005	Driver 1 & C	Bureau of Naval Personnel	Written for men of the Navy and the Naval Reserve who are studying for advancement to the rates of Driver 1 and Driver Chief. First chapter deals with duties of dispatcher, administration of a garage, planning of earthwork, repair and maintenance of construction equipment, and training and supervision.
2017.306.006	Mechanic 3 & 2	Bureau of Naval Personnel	Written for men of the Navy and the Naval Reserve who are studying for advancement to the rates of Mechanic 3 and Mechanic 2. The first chapter describes the Mechanic's job, and subsequent chapters deal with operating principles and description of both gasoline and Diesel engines. Also contained is maintenance and repair information on systems and assemblies common to both gasoline and Diesel engine equipment.
2017.306.007	Mechanic 1 & Chief	Bureau of Naval Personnel	Written for men of the Navy and the Naval Reserve who are studying for advancement to the rates of Mechanic 1 and Chief Mechanic. The first two chapters discuss the duties of the leading petty

2017.307.004	World's Worst Aircraft, The : From Pioneering Failures to Multimillion Dollar Disasters - 2005	Winchester, Jim	From the Introduction: 'The choice of the 150 'worst' aircraft contained in this volume is the author's own, although friends offered many suggestions. As such it should not be regarded as definitive in any way. Strictly speaking, a number of these entries could be considered as 'flops' rather than 'worst' in the sense of having many inherent faults. Most of the aircraft here have some redeeming features. Many were arguably not bad at all. Some

Object ID	Title	Author	Summary
			were commercially unsuccessful, other no longer met military requirements or followed them too rigidly. Some should never have left the drawing board. One or two barely did--making it as far as a mock-up or partly completed prototype."
2017.307.006	Bye Bye Black Sheep	Kawato, Masajiro	The author, also known as Masajiro "Mike" Kawato, writes of his time as a Japanese Fighter pilot during World War II. He asserts that he was the one that shot down Pappy Boyington; however, that claim has been disputed by several. This is an abridged reprint of the book originally titled Flight to Conquest. Dedication to previous owner by the author on front loose end page dated 11 May 1987.
2017.307.007	I Could Never Be So Lucky Again	Doolittle, James Harold	He did it all. As a stunt pilot, he thrilled the world with his aerial acrobatics. As a scientist, he pioneered the development of modern aviation technology. During World War II, he served his country as a fearless and innovative air warrior, organizing and leading the devastation raid against Japan. This is his story -- James Harold "Jimmy" Doolittle--an Autobiography with Carroll V. Glines
2017.308.001	Complete Rhymes of the Midway Mariners, The	USS Midway Museum. Library Volunteers	A collection of January 1st deck log verse from 1946-1991. Also includes other verses about the Midway.
2017.309.001	Battle Bay : A Pictorial History of the Escort Carrier U. S. S. Savo Island (CVE-78)	Benton, Brantford B. (ed.)	A pictorial account of the commissioning, wartime shakedown and wartime missions of U.S.S. Savo Island in the Pacific. The ship was commissioned at Astoria, OR on 3 FEB 1944. A list of plank owners is provided. After Shakedown the ship proceeded to the South Pacific. She participated in landings at Anguar, Peleliu, Leyte Gulf and Lingayen Gulf (Luzon). The ship also made numerous shuttle trips carrying aircraft, and participated in Operation Magic Carpet ferrying personnel after the war was over. A crew list as of return

2017.310.001	USNA : The United States Naval Academy : A Pictorial Celebration of 150 Years	Kohlhagen, Gale Gibson	Three years of research, including taking part in the daily activities of the midshipmen, has paid off for historians Kohlhagen and Heinback in this account of the U.S. Naval Academy at Annapolis. Using historical and contemporary photographs, the authors create a rich, intriguing, and intimate portrait of the academy in celebration of its 150 years of service to the navy and the United States. Included in the book are chapters on the history and traditions of the academy, as well as coverage of the city of Annapolis. This book will give the reader a good idea of what it is like to be a midshipman, without actually having to be one. For a century and a half, the United States Naval Academy has carried out its mission: to prepare future leaders of the navy "morally, mentally, and physically." Over the years the Academy has graduated more than 58,000 midshipmen (today women as well as men). Graduates range from Admiral of the Navy George Dewey, to World War II's Fleet Admirals Halsey, King, Leahy, and Nimitz, astronauts Alan Shepard and Wally Schirra, distinguished Marine Corps commanders, and many others. Celebrating this colorful history and its special traditions, authors Gale Gibson Kohlhagen and Ellen Boraz Heinbach

Object ID	Title	Author	Summary
			present a stirring, anecdote-filled narrative. In addition to tracing all the key events in the Academy's development and evolution, the authors also paint a lively, intimate picture of daily life at "the Yard," and follow the activities of midshipmen from Plebe Summer through Commisioning Week four years later. Their extensive research into the lore and legend of the Academy is matched with dozens of personal interviews with current midshipmen in all classes, faculty, graduates, and other naval officers. An introduction to the book by Vice Admiral William P. Lawrence, a former Superintendent of the Academy, sets the scene. Readers who don't already know about Professional Development, "dixie cups," and what it is to "chop," or "bone," will learn this and more. Here are class social traditions like the "Ring Dance," and superstitions such as the left-handed salute to Tecumseh before an exam; and here is the plebe's grueling daily schedule - from forty-five minutes of PEP at 0515 to when they "rate their racks" at 2200. Athletics play a big part in Academy life, and they are treated extensively here, from the Army-Navy game to intramural boxing and crew.

2017.310.002	Many Specialties, One Corps : A Pictorial History of the U.S. Navy Medical Service Corps	Gray, David P.	Commissioned to mark fifty years of service to the Navy and Fleet Marine Force, Many Specialties, One Corps describes, interprets, and presents the rich heritage of the U.S. Navy Medical Service Corps. This volume transcends the formal establishment of the Medical Service Corps in 1947, and traces the tradition of medical service support from the genesis of the American Navy. The story of the Medical Service Corps is dramatically presented withing the context of Navy medicine, the U.S. Navy, and the global forces that have shaped our Nation and the world.

2017.310.009	Under Two Flags : The American Navy in the Civil War	Fowler, William M.	From the Preface: "Along the Atlantic and Gulf coasts the Union navy blockaded the South and assaulted its shores. On the inland waterway Federal gunboats steamed up and down rivers, helping the army strike at the heart of the Confederacy. And on distant stations off Australia, off the Cape of Good Hope, in the Atlantic, Mediterranean and Indian oceans, Union steamers pursued the wily Confederate raiders. Without a powerful navy the North could not have won the war. The South's seacoast was far longer than that of the North, and its interior was crisscrossed with navigable streams. Confederate strategists knew that they must control the waterways. But the South had too few sailors to put theory into practice, and it lacked the resources--of iron in particular--to make up for its scanty manpower. Still the Confederate navy deserves to be remembered for its flamboyant--if ultimately unsuccessful--exploits."
2017.310.010	We Build a Navy	Frost, Holloway Halstead	Reset and reprinted in 1940. Sir Walter Raleigh from his jail cell observed "Whoever commands the sea commands the trade; whoever commands the trade of the world commands the riches of the world and consequently the world itself." The US Navy set out to do just that from harrying the British (1777-1779) , fighting the Barbary Pirates (1801-1805), participating in the War of 1812 (1812-1815), and holding the lake frontier (1812-1815). The book

2017.310.011	Fighting Fleets : A Survey of the Navies of the World	Rimington, Critchell	Fighting Fleets, 1943 Edition by Critchell Rimington Associate Member, United States Naval Institute with Note page and To Franklin Delano Roosevelt, dedication; Forward with black and white geographic map of China, Marshall Islands, etc. Pacific Area; and Introduction by Leland P. Lovette, Capt US Navy, Director of Public Relations. XV Chapters beginning with Sea Power, 1942, Aircraft Carriers, Naval Aircraft to name a few. There is a Reference Tables Chapter on World's and Japan's ships, and Naval War Losses; and the Index. There are black and white photographs of ships, aircraft, and drawings and tables.
2017.310.012	Greatest Crusade : Roosevelt, Churchill and the Naval Wars, The	Hough, Richard	From the Preface: "As former naval person, Roosevelt as Assistant Secretary of the Navy in the First World War and Churchill twice as First Lord of the Admiralty, the two war leaders enjoyed a special affection for and interest in their navies. The war at sea was a common base, a medium in which they both spoke the same language and possessed a mutual understanding that would have seen them happily through even if they had not share so much else, not at least a similar patrician background. This book, then, is an account of their lives in naval terms of two of the most remarkable and powerful men of this century who came together in a massive cause, which they tackled with zest and joyous authority. Their mutual affection and admiration were so evident that they were, in the eyes of those close to them, something to behold.
2017.310.013	Marine Officer's Guide, The	Estes, Kenneth W.	Designed to serve as a bridge between the individual officer and the great body of regulations, directives, customs, courtesies, traditions and service usages that make up

			the formal structure of the Corps. Although written with newly commissioned officers in mind, its usefulness extends to officers of all grades and seniority.
2017.310.014	Blood on the Sea : American Destroyers Lost in World War II	Parkin, Robert Sinclair	From the Author's Note: This books is a compilation of historical sketches of the seventy-one U.S. destroyers lost in World War II. Of that number, sixty went down as a result of confrontations against enemy sea, land and air forces. The remaining eleven were lost under such tragic circumstances as accidental groundings, sever storms, friendly mines and collisions."
2017.310.015	MacArthur's Airman : General George C. Kenney and the War in the Southwest Pacific	Griffith, Thomas E.	A fighter pilot who flew 75 combat missions in World War I, George C. Kenney was a charismatic leader who established himself as an innovative advocate of air power. As General MacArthur's air commander in the Southwest Pacific during World War II, Kenney played a pivotal role in the conduct of the war, but until now his performance has remained largely unexplored. Thomas Griffith offers a critical assessment of Kenney's numerous contributions to MacArthur's war efforts. He depicts Kenney as a staunch proponent of airpower's ability to shape the outcome of military engagements and a commander who shared MacArthur's strategic vision. He tells how Kenney played a key role in campaigns from New Guinea to the Philippines; adapted aircraft, pilots, doctrine, and technology to the demands of aerial warfare in the southwest Pacific; and pursued daring strategies that likely would have failed in the European theater. Kenney is shown to have been an operational and organizational innovator who was willing to scrap doctrine when the situation called for ingenuity, such as shifting to

Object ID	Title	Author	Summary
			low-level attacks for more effective bombing raids. Griffith tells how Kenney established air superiority in every engagement, provided close air support for troops by bombing enemy supply lines, attacked and destroyed Japanese supply ships, and carried out rapid deployment by airlifting troops and supplies. Griffith draws on Kenney's diary and correspondence, the personal papers of other officers, and previously untapped sources to present a comprehensive portrayal of both the officer and the man. He illuminates Kenney's relationship with MacArthur, General "Hap" Arnold, and other field commanders, and closely examines factors in air warfare often neglected in other accounts, such as intelligence, training, and logistical support. MacArthur's Airman is a rich and insightful study that shows how air, ground, and marine efforts were integrated to achieve major strategic objectives. It firmly establishes the importance of MacArthur's campaign in New Guinea and reveals Kenney's instrumental role in turning the tide against the Japanese. (from Amazon.com)

2017.310.019	Division Officer's Guide - 1995	Stavridis, James	Just as Watch Officer's Guide tells the young officer what to do and how to do it while he is on watch on the bridge or on the quarterdeck, Division Officer's Guide tells him how to handle his duties the rest of the time when he is not on watch.
2017.310.020	Watch Officer's Guide - 1992 : A Handbook for All Deck Watch Officers	Stavridis, James	Watch Officer's Guide, 1992, United States Naval Institute. ----- This handbook addresses every aspect of a watchstander's duties at sea and in port. A classic reference of the profession since its initial publication in 1911, the guide is a compendium of information and wisdom contributed by hundreds of naval officers and mariners over the past eighty years. For watch officers beginning their training, the book provides an abundance of useful, up-to-date information. For experienced watch officers, it is handy both for general review and for use while actually standing watch. The revised edition offers much new material, including sessions on standing watch in the combat information center, training, and engineering, and a quick-reference guide filled with the shiphandler's tricks of the trade. Other material has been brought into line with current practice. No officer who stands watch at sea or in port should be without this useful volume. (from Amazon.com)

2017.310.023	Panay Incident, The : Prelude to Pearl Harbor	Perry, Hamilton Darby	Largely Forgotten First Blow in World War II By C. Davis, VINE VOICE on July 24, 2006 Format: Hardcover On 12 December 1937, USS PANAY, a small, under-armed gunboat, was sunk by Japanese planes. As the survivors of the PANAY rowed ashore in their lifeboats, they were shot at from Japanese ground troops. The incident was a footnote in the Japanese battle for Nanking. Nor was this the only attack against a neutral power during the aptly named Rape of Nanking. Sadly, many have forgotten this event. The Panay Incident by Hamilton Darby Perry is an extremely well written popular history of the event. Based primarily on interviews of this event, it is, perhaps, the only book still available, if not still in print. The only critique that I have of this excellent book is that it fails to footnote the interviews and other sources of information. As a popular history, lack of such academic details are probably not a true failing, but as the only book on the event it is disheartening to think how difficult it might be to reconstruct the research for a more rigorous study. There are many things to learn from this event. First, the Japanese were greatly concerned about a

Object ID	Title	Author	Summary
			"Remember the Maine" reaction. They engaged in a government sponsored (as opposed to government supported) letter writing campaign that showed great tact and skill in manipulating popular opinion in the United States. Second, the reaction of the American people to the event was amazing. Rather than the rage that would accompany Pearl Harbor, most Americans - about 75% in one Pew poll - questioned exactly what we were doing in China that was worth American lives and if it was possible to get businesses and missionaries out before they pulled the United States into a meaningless land war in Asia. Third, the level of technology in 1937 was far from what the U S, and even Japan for that matter, could bring to bear in 1945. Biplanes and radio communications that routinely failed for up to 36 hours were the norm. This is an excellent book about an understudied event. Many historians have disregarded the Panay incident because it had no effect on either Japanese or American strategies or policies. However, if one looks at Japanese strategy starting with the Sino-Japanese War through 1945, this event is an important marker as the level of violence and the need to dominate the Asian mainland continued to grow.

2017.310.026	MiG-29 : Soviet Superfighter	Lake, Jon	From the Introduction; "There has long been a widespread and erroneous belief that the Mikoyan MiG-29 is inferior to contemporary Western Fighters...However, most people have assumed that the new aircraft is a little more than a clever extrapolation of Western designs, a Soviet F/A-18 Hornet incorporating some F-14 and F-15 aerodynamics, and equipped with a weapons that

Object ID	Title	Author	Summary
			is a slavish copy of the APG-65. " When people actually got the chance to actually see the MiG-29, they found it was "at least as manoeuvrable as the F-16, with better high alpha performance, the MiG-29 (was) also capable of operating from much shorter, more primitive airstrips. Its sophisticated intakes allowed it to exceed mach 2, and it had a faster rate of climb."
2017.310.027	Before the Aircraft Carrier : The Development of Aviation Vessels 1849-1922	Layman, R. D.	This book describes by particulars and brief histories the surface craft that over a span of 73 years were employed experimentally or operationally in efforts to adapt aerial devices to the service of naval warfare. This follows the successful approach of the Conway's Fighting Ships series, divided by country with general introductions followed by tabular data and histories of all the ships. The book is illustrated with some very rare photos of these little-known vessels and their aircraft.
2017.310.028	Conway's the War at Sea : In Photographs, 1939-1945	Robertson, Stuart	Showing the realities of the Second World War through photographs, this is a moving and informative addition to the library of anyone interested in the Second World War. Hailed as the most extensive photographic record of the naval side of World War II ever produced when published in the U.K., this book is a must for anyone interested in the naval history of that war. From Robert Capa's images of the mayhem on Omaha Beach to the amateur photography of a serviceman on board a destroyer, the collection offers a moving and informative look at all theaters. The introduction of the 35-mm camera and the easing of censorship allowed photographers to get close to the action for unflinching images of combat and the catastrophic consequences of war as never before. The book's 250 photographs cover all aspects of the war at sea, from the scuttling of the Graf Spee to the moment of impact of a

2017.310.040	Tragedy at Honda	Lockwood, Charles A.	The Honda Point Disaster was the largest peacetime loss of U.S. Navy ships. On the evening of September 8, 1923, seven destroyers, while traveling at 20 knots (37 km/h), ran aground at Honda Point, a few miles from the northern side of the Santa Barbara Channel off Point Arguello on the coast in Santa Barbara County, California. Two other ships grounded, but were able to maneuver free of the rocks. Twenty three sailors died in the disaster. (from Wikipedia)

2017.310.041	American Voyages to the Orient 1690 - 1865 : An Account of Merchant and Naval Activities in China, Japan, and the Various Pacific Islands ; a collection of articles from the United States Naval Institute proceedings	Paullin, Charles Oscar	This is a collection of articles from the United States Naval Institute Proceedings which explain the early US Navy and US commerce in the Orient.
2017.310.042	Man-of-war : A History of the Combat Vessel	Macintyre, Donald G. F. W.	She measures 1123 feet over-all and displaces 74,700 tons. Powered by eight nuclear reactors, she once went for three years and 200,000 miles without having to be "refueled." For the moment, she remains the most formidable surface ship ever launched. Her name is the U.S.S. Enterprise. She is an aircraft carrier, the queen of our fleets. But, as a glance at this richly illustrated history of the world's combat vessels will show, her dominion is far from absolute. Powerful as she is, submarines equipped with Polaris-type missiles may already have turned the Enterprise into a floating fossil. By the end of this century she will have gone the way of the Greek trireme, the Viking longboat and the medieval armadas of dromons, galley busses and cogs. Since men began arming their ships, today's epitome of naval might has inevitably been superseded by tomorrow's innovation. Common to every era, however, are the artistry and the ingenuity lavished on the combat vessel. Down through the ages it has been a principal tool in the shaping of history -- a thing of beauty and grace. "Man-of-War" is the first book to chronicle the epic of the fighting ship from the days when Rameses III was repulsing the raids of a mysterious invading fleet known only as "Sea People" to naval operations in the Gulf of Tonkin. Written by two acknowledged experts, it is unique in that it is neither narrowly nationalistic in tone nor limited in scope to

Object ID	Title	Author	Summary
			one particular type of warship. The authors have consulted comparable maritime authorities in every major industrial nation in the world to ensure the fairest and most comprehensive coverage of the long history of the world's fighting ships. Over 300 illustrations, many in color, show the main structure and form, together with the most significant details of the equipment, machinery and weapons of mankind's armed sea-going vessels. "Battles like Lepanto, Trafalgar, Jutland and Midway are of the past," writes Captain Edward L. Beach in his Preface, "but the power of the sea to influence and to command the shore has never been greater. We have not seen the end of an epoch, but only the prelude to the uses of sea power. "In this book are the ships and how they became what they are today." THE AUTHORS Captain Donald Macintyre, after thirty years in the Royal Navy of Great Britain, retired in 1952 to take up a career as a writer. He has since established himself internationally as an authority on naval history. After an autobiographical account of his wartime experiences, "U-Boat Killer," he published a number of books on maritime history: "Jutland," an account of the great sea battle of that name; "Narvik," the story of the 1940 Norwegian Campaign; "Admiral Rodney," a biography, and a trilogy entitled "Battle of the Atlantic," "Battle for the Mediterranean" and "Battle for the Pacific." Captain Macintyre now has a post in the Naval Historical Branch of the Ministry of Defence, London. B. W. Bathe wrote the first ten chapters of this book, which cover the historical development of the warship

			shifting surface and skies, its very unpredictability, fulfill any number of the requirements of the man searching for adventure, who hopes to accomplish what no other has done before: to be The First. To pit one's intelligence, skill, and strength against an indifferent and inexorable Nature was the highest form of enterprise; should renown and affluence follow, so much the better. "There was the other side of the coin, of course. If you should not make it, your passing would be duly noted and you would be accorded an obituary fit for a king. For a brief time, in death, you would live as never before. So the risks had their compensations and rewards, and loss was its own kind of glory." -from ATLANTIC FEVER THE MACMILLAN COMPANY (from back cover) Included: NC-3 (Aircraft), NC-4 (Aircraft); United States. Navy--Aviation--History, Bellinger, Patrick N. L., 1885-1962. Byrd, Richard Evelyn, 1888-1957, Hinton, Walter, 1888 or 1889-1981, Towers, John H. (John Henry), 1885-1955, Aeronautics--United States--1910-1920, Air pilots--American--1910-1920, Seaplanes--American--1910-1920.

2017.310.045	Glorious Way to Die, A : The Kamikaze Mission of the Battleship Yamato, April 1945	Spurr, Russell	The Yamato was the biggest battleship ever built. Yet, before she was commissioned, in December 1941, The Japanese themselves rendered the battleship obsolete by their carrier strike against Pearl Harbor. Throughout most of the Pacific war ,the pride of the Imperial Japanese Navy was relegated to minor roles-until the American invasion of Okinawa. The mighty ship was ordered to attack the invading force--the greatest assemblage of warships the world had

Object ID	Title	Author	Summary
			ever seen--backed by only eight escorts. No planes or pilots could be spared to provide air cover. Combat directives made it clear that this was a one-way Kamikaze mission. (Replaces 2016.387.017)
2017.310.046	Generals' War, The : The Inside Story of the Conflict in the Gulf	Gordon, Michael R.	From Publishers Weekly Drawing on interviews with senior officials and newly declassified documents, Gordon and Trainor provide a behind-the-scenes look at the Gulf War's generalship. The dominant figure, then-chairman of the joint chiefs General Colin Powell, is spotlighted as a politico-military maestro overseeing the dawn of a new era in military technology. In their review of the short, violent, one-sided war, the authors uncover the problems of cooperation among coalition forces and reveal details of interservice tensions, as well as difficulties within the U.S. branches themselves. This meticulous reconstruction of American leadership in Desert Shield/Desert Storm presents the conflict as a laboratory for testing new weapons and doctrine and the services' capacity for cooperation in the field. It also serves as an object lesson in the failure of deterrence and the problem of war termination, with a discussion of President Bush's premature cease-fire order. Gordon is chief New York Times Pentagon correspondent; Trainor is military columnist for the Times. Photos not seen by PW. Copyright 1994 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. From Library Journal If the Vietnam War was conducted by politicians in Washington, the war for Kuwait was, according to New York Times correspondent Gordon and retired general Trainor, our "generals' war." The authors astutely conclude that President Bush understood what his

Object ID	Title	Author	Summary
			predecessors never did. Neither Johnson nor Nixon, nor for that matter National Security Council adviser Henry Kissinger, allowed the military to wage a winning war. The lesson was well learned by the savvy Gen. Colin Powell, chair of the Joint Chiefs of Staff, who directed his subordinates to lash out against the Iraqis with everything we had save for nuclear, biological, and chemical weapons. Kuwait was not Vietnam, however, and the unmotivated Iraqis were not the Vietcong. Aggrandized as "the world's fourth largest military," the enemy fizzled away within hours when confronted with the world's premier military force. Thus, it came as no surprise that Washington won the battle, but with Saddam Hussein still in power four years after hostilities ended, has it won the war? This cogent analysis provides several disturbing answers worthy of our attention. Recommended for informed lay readers and specialists. Joseph A. Kechichian, Rand Corp., Santa Monica, Cal. Copyright 1994 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. (from Amazon.com) (Replaces 2004.310.018)

2017.310.047	And I was There : Pearl Harbor and Midway--Breaking the Secrets	Layton, Edwin T.	According to Admiral Layton, the Japanese succeeded at Pearl Harbor because of audacious planning plus a dramatic breakdown in our intelligence service. This failure was caused by feuding among high-level officers for control of the intelligence and radio intercept divisions. Six months after Pearl Harbor, self-serving petty jealousy at naval headquarters almost caused us to lose the decisive battle of Midway. Layton reveals the full details of this deplorable situation and vigorously defends Admiral H.E. Kimmel, naval commander at Pearl Harbor,

Object ID	Title	Author	Summary
			who was blamed for the disasters. Layton accuses instead some high-ranking naval officers in Washington who failed to pass along the latest intelligence intercepts.

From Honolulu to Murmansk to Iwo Jima, Okinawa, and Guadalcanal, this is the story of the Washington and the men who guided her.
2017.310.051	Second Admiral, The : A Life of David Dixon Porter, 1813-1891	West, Richard Sedgewick	David Dixon Porter (June 8, 1813 – February 13, 1891) was a member of one of the most distinguished families in the history of the United States Navy. Promoted as the second man to the rank of admiral, after his adoptive brother David G. Farragut, Porter helped improve the Navy as the Superintendent of the US Naval Academy after significant service in the American Civil War. He began naval service as a midshipman at the age of 10 under his father, Commodore David Porter, on the frigate USS John Adams. For the remainder of his life, he was associated with the sea. Porter served in the Mexican War in the attack on the fort at Vera Cruz. At the outbreak of the Civil War, he was part of a plan to hold Fort Pickens, near

Object ID	Title	Author	Summary
			Pensacola, Florida, for the Union; its execution disrupted the effort to relieve the garrison at Fort Sumter, leading to its fall. Porter commanded an independent flotilla of mortar boats at the capture of New Orleans. Later, he was advanced to the rank of (acting) rear admiral in command of the Mississippi River Squadron, which cooperated with the army under Major General Ulysses S. Grant in the Vicksburg campaign. After the fall of Vicksburg, he led the naval forces in the difficult Red River Campaign in Louisiana. Late in 1864, Porter was transferred from the interior to the Atlantic coast, where he led the Navy in the joint assaults on Fort Fisher, the final significant naval action of the war. Porter worked to raise the standards of the US Navy in the position of superintendent of the Naval Academy when it was restored to Annapolis. He initiated reforms in the curriculum to increase professionalism. In the early days of President Grant's administration, Porter was de facto Secretary of the Navy. When his adoptive brother David G. Farragut was advanced from rank of vice-admiral to admiral, Porter took his previous position; likewise, when Farragut died, Porter became the second man to hold the newly created rank of admiral. He gathered a corps of like-minded officers devoted to naval reform. Porter's administration of the Navy Department aroused powerful opposition by some in Congress, who forced the Secretary of the Navy Adolph E. Borie to resign. His replacement, George Robeson, curtailed Porter's power and eased him into semi-retirement. (from Wikipedia)
2017.310.052	USS Edward McDonnell (FF-1043) - The Emerald Griffin -	Moore, Jim (ed.)	A pictorial account of the deployment of the USS

Object ID	Title	Author	Summary
	6 January - 3 July 1975		Edward McDonnell to the Northern Atlantic Ocean as part of Standing Forces North Atlantic in 1975. The ship departed Mayport on 6 January and returned to Mayport on 3 July. Significant operations included Locked Gate, Bright Horizon and Roaming Nut. Port calls included St. Johns; Portland, England; Rosyth, Scotland; Hamburg, Portsmouth; Stavenger, Norway; Bergen; Oslo; Brest; Lisbon; and Halifax. A complete schedule and track of the ship is provided on page 8. Other highlights included crossing the Arctic Circle and hosting the CSNFL Change
2017.310.053	Annapolis Book of Seamanship, The	Rousmaniere, John	First launched in 1983, Annapolis remains the sailor's bible, a comprehensive chapter and verse guide to all aspects of seamanship from the simplest ABC's to the most advanced skills and latest electronics. And while much of the original edition has been left in dry dock to make way for the many changes on the water since 1983 --like multihull vessels, satellite tracking, and the reality that while all ships remain "she," there is no longer the assumption that it's a "he" at the helm--Rousmaniere still emphasizes what he's stressed from the first tack: the importance of mastering sailing's fundamentals. This means knowing every inch of your boat and how to handle her, understanding the importance of safety on the seas and preparing for all emergencies, reading the weather, learning to navigate, knowing essential boat maintenance, and being aware of the traditions every sailor steps into whenever he or she sticks feet in a pair of topsiders. Clearly organized and presented, cleanly and smoothly written (given how much technical information he presents, Rousmaniere's prose is blessedly jargon-free), and thoroughly illustrated with photos and drawings,

Object ID	Title	Author	Summary
			Annapolis is as essential as a good wind, perhaps the one volume no sailor should leave port without. --Jeff Silverman Review Yachting magazine A volume that any sailor or would-be sailor simply must own. American Sailing Association The beauty of the book is that it is both a superb reference manual, which any sailor -- regardless of experience -- will want to own, and a readable, practical introduction to sailing for the beginner, A joy to behold. The most complete and best reference book on the sport that has ever been available. Chuck Hawley West Marine Products The Annapolis Book of Seamanship is thorough, well written, and nicely illustrated. Not just a repeat of tired old sailing methods of thirty years ago, it integrates the classic techniques (storm tactics, navigation) with the modern (Crew Overboard Recovery, modern anchors, and electronics). I highly recommend this book and encourage anyone to buy it if they want to improve their sailing skills. Sail magazine The Annapolis Book of Seamanship is about practically everything that has to do with sailing and sailboats. Yachting magazine [Rousmaniere's] chapters on sail trim and weather, in particular, are the best that I can recall reading. Sea magazine The piloting part is unusually thorough and understandable and could serve as a text all by itself. The individual chapters on sailing in heavy weather and handling emergencies are recommended reading for all who sail. Great Lakes Sailing Scanner magazine If you buy one book on sailing this year, this is the one of get.

2017.310.056	American Naval History : An Illustrated Chronology of the U.S. Navy and Marine Corps, 1775-present	Sweetman, Jack	This new edition of Jack Sweetman's popular chronology of American naval history brings his original 1984 publication up to date with the addition of events through 2002. Nearly encyclopedic in its coverage and supported with more than two hundred illustrations, the book presents a concise year-by-year summary of significant U.S. Navy and Marine Corps activities from the Revolution through Desert Storm. Along with the expected listings of battles, important operations, the capture of enemy warships, and the loss of American vessels, readers will find entries on major explorations, naval appointments, the introduction of new ship types, and even events external to the sea services that have influenced naval affairs. But this book does much more than simply catalog facts. In his introduction Professor Sweetman explains that after teaching American naval history for nearly two decades, he has learned that the facts do not necessarily speak for themselves. With this in mind, he has often included both descriptions of events and explanations of their consequences. When dealing with episodes of particular significance, he has provided a series of entries to show stages of development and give a sense of continuity. New to this edition are entries on the apprehension of the Achille Lauro hijackers, the

2017.310.068	Flying Cats : The Catalina Aircraft in World War II	Hendrie, Andrew	The Consolidated PBY Catalina was probably the most versatile and successful flying boat/amphibian ever built, serving not just with the US Army Air Force, Navy and Coast Guard during the Second World War but also with the air forces of Britain, Canada, Australia and New Zealand, with the Danes, Free French and Norwegians as well as in Brazil, Chile, Indonesia and elsewhere. With a remarkable lifting capacity and endurance, this long-range twin—engined aircraft could absorb a great deal of punishment and still return home safely after flights lasting an entire day and covering thousands of miles. It was employed as a maritime reconnaissance aircraft, as a bomber and torpedo—bomber, as an anti-submarine weapon, as a mine layer, as a special operations machine and as a search and rescue craft by day and night. It ferried stores, mail and people — many of them sick and injured — across all the world's oceans and is rightly held in the deepest respect by all who had anything to do with it, flying or being flown. In this book Andrew Hendrie tells the whole amazing story of the 'Flying Cats', of their exploits and achievements, of the heroism of many of their crews and the problems they had to endure. With numerous photographs as well as appendices listing technical data and individual aircraft histories, this is the definitive history of the Catalina and its operations world—wide. (from dust jacket flap)

2017.310.070	Fox Two	Cunningham, Randy	I am a fighter pilot by heart, and I love turning and twisting through the skies in search of a good fight. But this is more than a story of aerial combat. It is a story of a ship, USS Constitution, and the men who sailed her, their feelings, thoughts and actions during the Vietnam conflict. Fox Two describes many of our air-to-air combats, recorded as they happened. We didn't win them all, but lessons learned and some of the restrictions that we had to live with - and in some cases die with - should be known by every American so that your sons will not pay the same price as did many of our men in a war we weren't allowed to win.... From 1965 through 1971 the US Navy scored 29 kills with Sidewinders. During the time period of this book, Navy pilots were credited with 23 Sidewinder kills and one Sparrow kill. All five of my victories were made with the Sidewinder, making Lieutenant (jg) Bill Driscoll and me the first US aces of the Vietnam War. Thus the Title, Fox Two. --- excerpts from book's Preface Randy "Duke" Cunningham (from Amazon.com)

			Civil War, the loss of the Norfolk navy yard, confederate privateers, fort of Hatteras Inlet taken, the gulf of Mexico battles, the Trent Affair with Capt. Charles Wilkes, the capture of Port Royal, the battle between the Monitor and the Merrimac, the First Battle between Ironclads, Mississippi Gunboats, Farragut at New Orleans, Mobile Bay, Confederate cruiser, the Albemarle and Cushing, Charleston, Capture of Fort Fisher and the Story of the New Navy with an Index at the end.
2017.310.082	Annapolis Today	Banning, Kendall	Annapolis Today by Kendall Banning First Edition with Sunday Morning at Annapolis, U. S. Navy photograph. Contents include XVIII Chapters, Appendix, First year of Midshipman, Mission of the Naval Academy, Navy Goat meets the Army Mule, Practice Cruises, Trails of Glory.
2017.310.083	Aerial Espionage : Secret Intelligence Flights by East and West	Aart, Dick van der	Translation of: Spionage vanuit de lucht. A revealing book about the secret reconnaissance flights carried out by the Soviets and the West since the beginning of the Cold War.
2017.310.084	Aviator's Guide to Navigation	Clausing, Donald J.	Describes the principles of airplane navigation, and discusses equipment and techniques for methods from dead reckoning to use of the most advanced flight information and management systems. Rev. ed. of: The aviator's guide to modern navigation. 1st ed. c1987.
2017.310.085	Flying Machine, The : Its Evolution through the Ages	Andrews, Allen	American edition of the British version entitled. Back to the Drawing Board: the Evolution of Flying Machines . An analysis of the development of aircraft technology from ancient times to the present.
2017.310.086	Learning to Fly Helicopters	Padfield, R. Randall	An introduction to helicopter flying techniques, many of which are difficult to master, as well as a discussion of emergency procedure, human factors, advanced operations and even a section on careers.

Object ID	Title	Author	Summary
2017.310.087	NATO Major Combat Aircraft	Taylor, Michael J. H.	Shows and describes the airplanes and helicopters used by NATO member countries, and provides specifications and technical data on the aircraft and their weapons
2017.310.088	Stick and Rudder : An Explanation of the Art of Flying	Langewiesche, Wolfgang	Originally published in 19421. Special appendix on The Dangers of the air, by Leighton Collins From the back cover: The invisible secret of all heavier-than-air flight--the Angle of Attack. What it is, and why it can't be seen. How lift is made, and what the pilot has to do with it. -- Why airplanes stall -- How do you know you're about to stall? -- The landing approach. How the pilot's eye functions in judging the approach. The visual clues by which an experienced pilot unconsciously judges: how you can quickly learn to use them. -- "The Spot that does not move." This is the first statement of this phenomenon. A foolproof method of making a landing approach across pole lines and trees. -- The elevator and the throttle. One controls the speed, the other controls climb and descent. Which is which? -- The paradox of the glide. By pointing the nose down less steeply, you descend more steeply. By pointing the nose down more steeply, you can glide further. -- What's the rudder for? The rudder does NOT turn the airplane the way a boat's rudder turns the boat. Then what does it do? -- How a turn is flown. The role of ailerons, rudder, and elevator in making a turn.-- The landing-- how it's made. The visual clues that tell you where the ground is. -- The "tail-dragger" landing gear and what's tricky about it. This is probably the only analysis of tail-draggers now available to those who want to fly one.-- The tricycle landing gear and what's so good about it. A strong advocacy of the tricycle gear written at a time when almost all civil airplanes were taildraggers. -- Why the airplane doesn't feel the wind. Why the airplane usually

Object ID	Title	Author	Summary
2017.310.089	Japan's War : The Great Pacific Conflict, 1853 to 1952	Hoyt, Edwin P.	flies a little sideways. This authoritative account of the Pacific arena in World War II brings fresh insight to the crucial questions: Why did Japan start the war in the Pacific? Why was the U.S. unprepared to meet the challenge? Tracing the history of Japanese aggression from 1853, Hoyt sheds new light on the "China Question," the rape of Hong Kong, the Bataan Death march, and the murder camps of the East Indies. he analyzes Japan's policy of hakko ichiu--all eight corners of the world under one roof--that precipitated their military build-up. Japan's historical rivalry with the U.S.--more recognized there than here--made conflict, if not inevitable, at least probable. Superbly researched and written, drawing on previously unpublished Japanese documents, huge in scope, this book is a major revisionist history of Japanese militarism and World War II.
2017.310.090	U.S. Coast Guard Aircraft Since 1916	Pearcy, Arthur	This book to detail all aircraft used since the Coast Guard introduced its air arm over 80 years ago. This book covers: 75 years of Coast Guard Wings, Aircraft Markings & Insignia, Aircraft Serial System, Rotary Wing Period, Aircraft Acquisition, Aircraft repair and supply center, and more
2017.310.091	History of the U.S. Navy, Vol. 1 : 1775-1941	Love, Robert W.	Attempts to chronicle and explain the high politics of American naval history, the reasons why the statesmen, politicians, bureaucrats and Navy men accepted certain ideas and adopted particular plans, strategies and shipbuilding policies rather than others. The book is also concerned with the interplay among international politics, American foreign policy, overall military strategy, naval strategy, tactics, and naval operations. (quoted from Introduction)
2017.310.092	VFA-146 Blue Diamonds Cruise 2007	None Stated	Action packed footage from cockpit and flight deck of operations in South Asia

Object ID	Title	Author	Summary
			while aboard USS Stennis (CVN -71) for the 2007 WESTPAC/IO/Arabian Gulf cruise in support of Operations ENDURING FREEDOM, IRAQI FREEDOM and the Global War on Terrorism. The STENNIS/SHOGUN team was on station more than five months in the Arabian Gulf and deployed more than seven and a half months in total. From Stennis cruise book summary: The ship departed homeport Bremerton 16 January and did an onload at San Diego before heading to the western Pacific, Indian Ocean and Persian Gulf. The ship returned, first to San Diego for offload and then back to Bremerton, arriving Bremerton on 31 August. Port calls on deployment included Dubai and Hong Kong. CVW-9 was embarked, consisting of VF -154, VMFA-323, VFA-146, VFA-147, VAQ-138, VAW-112, VS-31, HS-8 and VRC-30.
2017.310.093	Cradle of the Navy, 1923-1997 : The History of Naval Training Center San Diego	Camacho, Mary	History of the Naval Training Center San Diego in words and pictures
2017.310.094	Our Modern Navy	Howard, Joseph L.	Describes the role of the Navy in peace and war.
2017.312.001	Desert Storm/Desert Shield : Focus on the Naval Presence	Alderman, Patricia (ed)	List includes books, cruisebooks, videos, and some artifacts. It also includes USS Midway (CV-41): Operation Desert Storm (13 January-28 February 1991) paper and powerpoint presentation by Frank Kelly, USS Midway Museum docent.
2017.312.002	Dogfight to Detente : Annotated Bibliography of the Air War in Vietnam	Alderman, Patricia (ed)	Pat is a Library volunteer who compiled a list of books, videos, and cruise books about the air war in Vietnam. This annotated bibliography is based on the collection of the USS Midway Museum Library, and was compiled for the Dogfight to Detente event on the ship on 21 September 2017. Digital copies were given away for interested parties who attended the event. There are 83 books, 12 videos, and 21 cruise books in the list.
2017.314.001	Ship Control During Replenishment at Sea	USS Midway	A .pdf of this manual is available at 2017.317.001 in

Object ID	Title	Author	Summary
			K:\Emanuals. At the beginning of Midway's life, the phrase for Replenishment at Sea was Underway Replenishment. This publication has 9 pages of procedure signed by Capt. Cebrowski. Also included are Underway Replenishment Checklists; Underway Replenishment - Illustrations; Underway Replenishment - View from the Bridge; Underway Replenishment - Emission Controlled (Silent) Replenishment at Sea. The purpose of this instruction is to establish procedures which will ensure maximum safety during alongside (connected replenishment) evolutions and promulgate responsibilities in accordance with listed references.
2017.314.002	Standing Orders	USS Midway	A .pdf of this manual is available at 2017.317.002 in K:\Emanuals. This instruction in conjunction with USS Midway Instruction C3510.6B "Ship's Information Manual" and references comprise the Officer of the Deck Notebook and are the basis for Officer of the Deck Procedures. Included in this manual are the following Midway Instructions. Most are signed by Capt. Cebrowski. MIDWAYINST 1601.2 - Import Watch Organization MIDWAYINST 1601.10 - Underway Watch Organization MIDWAYINST 3130.1B - Man Overboard Bill MIDWAYINST 3150.1 - Low Visibility Detail MIDWAYINST 3510.8 - Alarms and the General Announcing System MIDWAYINST 3510.9 - Conning and Orders to the Helm MIDWAYINST 3510.10 - Restricted Maneuvering MIDWAYINST 3510.11 - Formation Steaming MIDWAYINST 3510.12 - Flight Operations MIDWAYINST 3510.14 - Required Reports MIDWAYINST 3510.15 - Contact Management MIDWAYINST 3510.16 -

2017.314.003	Ship's Information Book, 1987	USS Midway	A .pdf of this manual is available at 2017.317.003 in K:\Emanuals. This is the unclassified portion of the USS Midway Ship's Information Book dated 1987. Chapters include A. History B. Departments and Divisions C. Bridge Equipment D. Combat Direction Center (classified pages not included) E. Communications F. Engineering G. Damage Control H. Flight Deck/Hangar Bay I. Air Operations/CATCC J. Defensive Systems K. Deck Equipment L. Aftersteering M. Degaussing N. Tactical Data
2017.316.001	World War II : The War Chronicles, Vol. 1	Horan, Don	Volume 1 includes: 1) The greatest conflict : W.W. II which is an overview of the war from 1939-1945, and 2) North Africa : the desert war -- Here the Allies faced the legendary Field Marshal Rommel, the Desert Fox. This account details the defining battle of that campaign, the German attack on Kasserine Pass, where the British 1st Army and untested American troops faced the full force of German's seasoned Africa Corps.
2017.316.002	World War II : The War Chronicles, Vol. 2	Horan, Don	Volume 2 includes: 1) The Beachhead at Anzio - May 1944 The Allies planned a daring invasion of Italy., aimed at cutting the German lines between Rome and Cassino. The site they chose for the assault would become forever enshrined in military history as The Beachhead at Anzio.

Object ID	Title	Author	Summary
			This is the story of the Allied landing, the German counterattack, and the final Allied offensive that would turn the tide of this historic battle. 2) D-Day...The Normandy Invasion - It remains the largest amphibious assault in world history, when the Allies threw the full weight of their forces at Hitler on D-Day. Combat footage reveals the full horror and heroism experienced by the more than 150,000 Allied soldiers who stormed ashore that day to wage World War II's most critical Battle.
2017.316.003	World War II : The War Chronicles, Vol. 3	Horan, Don	Volume 3 includes: 1) Pursuit to the Rhine - With a beachhead in Normandy established, the Allies needed a way to break through the German lines. General George S. Patton provided the solution: Operation Cobra. This is the story of that daring offensive--the 1st Army's bold thrust forward under tactical air support, and the enemies' crumbling resistance. 2) The Bomber Offensive: Air War in Europe - Climb aboard a B-17 on a harrowing mission deep inside Nazi Germany. the allies had yet to control the skies, but on October 17, 1943, they launched a historic penetration raid on a German munitions factory. the Americans paid an extraordinary price in men and machines that day, but this battle would prove to be a turning point.
2017.316.004	World War II : The War Chronicles, Vol. 4	Horan, Don	Volume 4 includes: 1) Battle of the Bulge--It was the largest pitched battle in American military history, the last major engagement of the European campaign, and the scene of some of the war's fiercest fighting. It shows the street fighting in the Ardennes, the breaching of the Sigfried Line, and the bloody combat in the Hurtgen forest. Victory here would deal a death blow to the Nazi war machine. 2) Battle of Germany--The final campaign of the European theater unfolded in the aftermath of the Battle of the Bulge.

Object ID	Title	Author	Summary
			Beginning with a plan to cross the Rhine River, the curtain rose on the final act of the Battle of Germany. It recounts the British and Canadian offenses, the histories crossing of the Rhine at Renagen, and Eisenhower's final drive to
2017.316.005	World War II : The War Chronicles, Vol. 5	Horan, Don	Volume 5 includes: 1) Island Hopping: The Road Back--During the first year of the war, Japan scored impressive victories. But the Empire's made a critical mistake of extending its military bases beyond supply lines. The Allies' counterattack plan was simple: sage a bloody island-by-island campaign, using massive amphibious assaults. It is the epic story of fighting on those bloody battlefields in the Pacific. 2) Jungle Warfare: New Guinea to Burma--In the steamy jungles of New Guinea, the Solomons, and New Britain, Marines battled not only the Japanese, but malaria, heat exhaustion, and swarms of parasites. The U.S> naval and air forces also had to overcome the harsh environment as the fought the Japanese for control of the sea and air.
2017.316.006	World War II : The War Chronicles, Vol. 6	Horan, Don	Volume 6 includes: Air War in the Pacific--The war against Japan took place in the skies as well as on land and sea. It's the story of the Hellcats, the TBFs, the B29s, and the Lightnings that changed the course of the war. It sweeps across the Pacific from the war's first days, when U.S. pilots flew outmoded airplanes, to the suicidal kamikaze attacks and the bombing mission that brought the war to the Japanese homeland. 2) The Blood Ridges of Peleliu--It should have been of the easiest victories of the Pacific campaign. But when Marines landed on this desolate island they found the Japanese had dug caves into the ridges. The Marines suffered a 40% casualty rate.
2017.316.007	World War II : The War Chronicles, Vol. 7	Horan, Don	Volume 67includes: 1) The Return to the Philippines--General MacArthur's pledge

Object ID	Title	Author	Summary
			to the Philippines, "I shall return," began one of the war's most heroic surges. From MacArthur's strategy to the heroics of the ground troops--1st Cavalry and 7th and 9th Infantry Divisions--and from the 7th Fleet's naval forces to the pilots of the Air Force, it's a stunning story of unstoppable determination. 2) Okinawa--The Last Battle--Winston Churchill described it as the most intense and famous battle in military history. Here the Imperial Army braced for its last stand. From the bloody victories that brought U.S. forces to Okinawa, to the desperate suicidal resistance of the Japanese, this is the complete story of the last beachhead battle of the Pacific campaign.

2017.317.004	Naval Ships Technical Manual, Chapter 9560 Boiler Water/Feedwater Test and Treatment.	Naval Ships Systems Command	A hard copy of this manual is located at 2004.332.487 in the Engineering Library. Shipboard Water Cycle, Principles of Boiler-Water Treatment, Care of Feedwater and Makeup Feedwater, Water Treatment 600 psi Boilers and Below, Water Treatment 1200 psi Boilers and Water Treatment-Ships with Diatomite Feedwater Filters.
2017.317.005	Naval Ships Technical Manual, Chapter 9562 Feedwater System and Apparatus	Naval Ships Systems Command	A hardcopy of this manual is located at 2004.332.488 filed in the Engineering Library. General Information, Open Feed System, Semienclosed Feed System, Pressure Closed Feed System and Preservation, Periodic Inspection, and Return to active Service Procedures.
2017.317.006	Naval Ships Technical Manual, Chapter 9830 Elevators	Naval Ships Systems Command	A hardcopy of this manual is located at 2004.332.500 filed in the Engineering Library. Hydraulic airplane elevators, Electric Airplane elevators, Electro Hydraulic Bomb Freight, Mine, Torpedo and Ammunition elevators, Safety precautions and Maintenance, Inspection and test during Shipyard, Installation Maintenance safety precautions and reporting replacement of airplane elevator wire rope.
2017.317.007	Summary of Findings, Informal Fire Investigation, USS Midway (CV-41)	NAVSEA Team Report	A NAVSEA Team conducted a lessons learned analysis of the fire that occurred aboard USS MIDWAY (CV 41) on 20 June, 1990. Three men died and 8 more were severely burned. All names have been redacted with the exception of the three men who died: Jeffrey Allen Vierra, Ulric Patrick Johnson died at the scene, and Robert Shane Kilgore died at a burn center in Texas on 27 June. these three names are on the Memorial Board in the Chapel and on a plaque on the bulkhead near frame 85 (starboard side) on Deck 2. This file contains: 1) Letter from Naval Sea Systems Command with Enclosure : Summary of findings, Informal Fire Investigation, USS Midway 9CV-41) dated 1 May 1991

Object ID	Title	Author	Summary
			with approximate 20 pages 2) Letter from RADM to Commander Seventh Fleet, 41 pages of detailed description of the accident, there were 125 enclosures, but none of them in this document, no date 3) Various letters to JAG and between these commanders: Commander, USS Midway Commander, Task Force Seven Zero Commander, Seventh Fleet Commander, Carrier Group Five Commander, Naval Air Force, U.S. Pacific Fleet
2017.317.008	NATOPS Landing Signal Officer Manual	Chief of Naval Operations	This manual is a single source of LSO information for LSOs, unit commanders, and air crewmembers that contains descriptions of visual landing aids, command relationships, a compendium of LSO-related policies and responsibilities, pilot and LSO training requirements and qualifications, descriptions of visual landing aids, and LSO procedures for recovering fixed-wing non-V/STOL aircraft aboard CV and CVN-class ships.
2017.317.009	United States Naval Aviation 1910-2010, Volume I : Chronology	Evans, Mark L.	Volume 1 documents the people and events that proved crucial to naval aviation's history. We also have a hard copy at 2015.302.067. It presents the data in chronological order. Chapter 1 covers 1898 - 1916. Chapter 2 covers 1917-1919. Chapters 3 through 13 cover 1920 to 2010 in ten year increments. Indices provide Aircraft by Designation, Aircraft by Name, Missiles and Rockets, Ships, U.S. Military Units, Individuals, and General. USS Midway has 55 entries in the index for Ships.
2017.317.010	United States Naval Aviation 1910-2010, Volume II : Statistics	Grossnick, Roy A.	Volume 2 of 2 provides many statistics via tables not suitable for a chronological approach. We also have a hard copy at 2015.302.069. It is divided into seven parts: Aircraft; Personnel; Units; Ships; Deployments; Operations; and Other Actions. Each part is comprised of between two and 13 chapters.
2017.318.001	Top Gun, Disc 1	Simpson, Don	At the elite Navy Fighter

Object ID	Title	Author	Summary
			Weapons School, cocky, young pilots compete against one another in the air as well as on the ground..... Originally produced and released as a motion picture in 1986. Special features (disc 1): Commentary by Jerry Bruckheimer, Tony Scott & Naval experts; vintage gallery; 4 music videos (Kenny Loggins "Danger Zone, Berlin "Take my breath away", Loverboy "Heaven in your eyes", Harold Faltermeyer and Steve Stevens "Top Gun anthem"); TV spots. Special features (disc 2): Danger zone (the making of Top-Gun, 6 part documentary); Multi-angle storyboards with optional commentary by director Tony Scott; vintage gallery; Behind-the-scenes featurette; survival training featurette; Tom Cruise interviews; production photography. Disc 1. Feature -- Disc 2. Special features.
2017.318.002	Top Gun, Disc 2	Simpson, Don	At the elite Navy Fighter Weapons School, cocky, young pilots compete against one another in the air as well as on the ground..... Originally produced and released as a motion picture in 1986. Special features (disc 1): Commentary by Jerry Bruckheimer, Tony Scott & Naval experts; vintage gallery; 4 music videos (Kenny Loggins "Danger Zone, Berlin "Take my breath away", Loverboy "Heaven in your eyes", Harold Faltermeyer and Steve Stevens "Top Gun anthem"); TV spots. Object ID	Title	Author	Summary
			Disc 1. Feature -- Disc 2. Special features.
2017.319.001	Survival on Land and Sea	Ethnogeographic Board	Includes a 16 page supplement at the beginning which pertains directly to survival for Naval Aviators. The remaining pages men at sea, navigation, food, and making fires.
2017.319.002	Castaway's Baedeker to the South Seas	Commander Air Force, Pacific Fleet	A manual for naval aviators and shipwrecked sailors on how to survive. Prepared jointly by Commander Air Force, Pacific Fleet and Joint Intelligence Center, Pacific Ocean Areas.
2017.319.003	Glenview Naval Air Station	Dawson, Beverly Roberts	In 1923 a Naval Reserve aviation training program was established at Great Lakes Naval Training Center. Originally, sea planes and a few small land-based planes were used for primary flight instruction. With the development of heavier, faster military aircraft, the Great Lakes facility became inadequate. Under Rear Adm. John Downes, commandant of the 9th Naval District, the search for a suitable new location was undertaken. Curtiss-Reynolds-Wright Airfield was deemed ideal for relocation of the aviation training program. From humble beginnings as Naval Reserve Aviation Base Chicago, Naval Air Station Glenview went on to play a vital and unique role during World War II. Until closure in 1995, the base was home to thousands of Navy and Marine Reserve pilots, aircrews, and support personnel--proudly known as weekend warriors.
2017.319.004	Quonset Point Naval Air Station, Vol. 1 : Gem of the Atlantic	Milligan, Sean Paul	The Naval Air Station, Quonset Point, RI, originally built as a Neutrality patrol Seaplane Base, eventually became a unique and fundamentally important asset to the American armed forces. In World War II, more than one half of all U-boats sunk by U.S. aviation--including the first two--were destroyed by Quonset-trained shore and carrier-based squadrons. In the years

Object ID	Title	Author	Summary
			following World War II, Quonset remained a premier industrial naval air station, sending squadrons or overhauling equipment for use in the Korean, Vietnam, and Cold War conflicts. For thirty-four years and through four wars, the Quonset Point Naval Air Station stood proud and tall on behalf of the United States military.
2017.319.005	Quonset Point Naval Air Station, Vol. 2 : V-J Day to Vietnam	Milligan, Sean Paul	The Naval Air Station, Quonset Point, RI, originally built as a Neutrality patrol Seaplane Base, eventually became a unique and fundamentally important asset to the American armed forces. In World War II, more than one half of all U-boats sunk by U.S. aviation--including the first two--were destroyed by Quonset-trained shore and carrier-based squadrons. In the years following World War II, Quonset remained a premier industrial naval air station, sending squadrons or overhauling equipment for use in the Korean, Vietnam, and Cold War conflicts. For thirty-four years and through four wars, the Quonset Point Naval Air Station stood proud and tall on behalf of the United States military. Volume 2 uncovers nearly 200 more scenes of the installation's achievements and activities during the entire period of its service.
2017.319.006	U.S. Naval Air Station at Vero Beach, Florida during World War II	Gross, George W.	From the Introduction: "Although the U.S. Naval Air Station at Vero Beach, Florida officially existed for only 40 months, its effect on many lives was tremendous during World War II and continues to the present day. The city kept most of the airport for municipal airport operations, but has converted preferential areas to a commercial industrial park.. Thirty-year leases have been signed with 130 privately owned businesses, which contribute over \$370 million yearly to the local economy (2000 estimate.) One of the activities that was started by the Navy (and continues today)

Object ID	Title	Author	Summary
			was an attempt to control the mosquitoes by aerial spraying and reducing swampy areas by drainage or filling the low-lying areas..."
2017.319.007	North American Rockwell A3J/A-5 Vigilante	Grove, Michael	The Aerofax Minigraph series provides a concise design and development history of the A3J / A-5 Vigilante, together with it's service history. A large number of black and white photos are featured, plus some color photos and line drawings. (from ebooksx.com:)
2017.319.008	Lockheed R60/R6V Constitution	Ginter, Steve	From the Introduction: "Although a military airplane, the Lockheed Constitution began life through the urgings of Pan Am Executives. Before the war, Pan Am was the world's largest over ocean operator using large flying boats like the Sikorsky S-42, Martin M-130 and Boeing 314. But they would need high capacity landplanes to expand their routes in the continental United States. In 1936, they became one of five sponsors of the Douglas DC-4. Later in the year they switched to backing the Boeing 307 with its pressurized cabin. Once the war started the airline's aircraft and crews were pressed into service to transport troops and equipment. In this capacity they solicited the Navy to build a true heavy lifter transport. This 1942 concept evolved into the Lockheed Model 49 Constitution. The final agreement between Pan Am and Lockheed was finalized under Lockheed specification 2957, dated 20 November 1942. These initial requirements called for a 5,000 mile range with a 17,500 pound payload at speeds in excess of 250 mph and altitudes about 25,000 feet. this specification evolved nearly a year later into Lockheed specification 4418 and the Navy contract was issued on 1 November 1943."
2017.319.009	Grumman F-14A/B	Miller, Jay	Detailed photographs and drawings of all aspects of F-14 construction and armament. Many photographs depicting

Object ID	Title	Author	Summary
			airframe markings of various squadrons, TARPS pod and aircraft ordnance.
2017.319.010	Douglas A3D Skywarrior, Part One : Design/Structures/Testing	Cunningham, Bruce	From the Editor's Note: "Another child of the 'fabulous fifties' was the big-bad A3D Skywarrior, affectionately known as the 'Whale' or 'Killer Whale'. It was not the most glamorous, but became arguably the most utilitarian carrier-based aircraft to come out of the 50s. With Hughes Aircraft's current stable of twelve whales, it will certainly outlive the few QF-4 drones still flying. As a test aircraft, size, speed, as well as ease of maintenance, have kept the Skywarrior in demand."
2017.319.011	North American AJ-1 Savage	Ginter, Steve	Even though this book has a different title, it is a duplicate of 2005.304.032, North American AJ Savage. The predecessor of the Douglas A3D Skywarrior, the North American AJ Savage was the Navy's rebuttal to the U.S. Air Force claim that it should be the only service to transport nuclear bombs. Designed shortly after WWII, it was the heaviest bomber designed to operate from an aircraft carrier. It had two Pratt and Whitney R-2800-44W radial engines and a single GE J-33 turbojet (two turning and one burning.). It was operational from 1950-1957.
2017.319.012	Your Future in the Navy	Bureau of Naval Personnel	From the title page: "...to the Naval Recruit. This booklet has been prepared for you. It contains a brief description of the opportunities open for you in the Navy. The mission of the peacetime Navy is to produce broadly qualified, well-rounded, versatile personnel who in time of emergency can be advanced to higher positions of responsibility and authority. The paths along which you may advance in the Navy are widely varied and many. All can lead you through an unbroken series of steps to warrant officer classification. Should you, by your effort, demonstrate that you are qualified to advancement to

Object ID	Title	Author	Summary
			commissioned status, the Navy will consider you for enrollment in one of its
2017.319.013	Aircraft Electrical Systems	Naval Air Technical Training Command	Designed to give the enlisted man of Naval Aviation the information necessary to perform his duties. Begins with basic information about aircraft wiring systems and proceeds with discussion of starters, ignition and spark plugs, and ends with problems of aircraft power supply.
2017.319.014	Aviation Machinist's Mate 2	Naval Education and Training Command	Rate training Manual for Aviation Machinist's Mate (AD) 2. Covers reciprocating and gas turbine engine fuel and lubricating systems, valves, compressor and turbine blade maintenance and propellers. Also covered are preservation and depreservation, helicopter maintenance and lubrication and administration.
2017.319.015	Naval Aircraft Maintenance Program, The	Naval Air Systems Command	From the Background: "The Naval Aircraft Maintenance Program, which provides a uniform system for performing aircraft maintenance and all related support functions, was established 26 May 1959 by the Chief of Naval Operations and implemented 26 October 1959 by the Chief, Bureau of Aeronautics. This instruction retains the basic system and incorporates improved procedures to increase its effectiveness including the Three Levels of Maintenance Concept...."
2017.319.016	Class of 1922, United States Naval Academy, Directory, August 1962	United States Naval Academy. Class of 1922.	A compendium of the current names, addresses business interests and family members belonging to members of the USNA Class of 1922.
2017.319.017	Fly Navy : Celebrating the First Century of Naval Aviation	Hildebrandt, Erik	A book commemorating the centenary of naval aviation, primarily through the author's photographs. Most photos are of later vintage aircraft. Chapters based primarily on missions of naval aviation and associated platforms. Title page includes signatures of the Centennial of Naval Aviation Board of Directors.
2017.319.018	I Saw Stars	Lamar, Hal Arthur	Commander Lamar was ADM Nimitz's flag lieutenant, 1941

Object ID	Title	Author	Summary
			-1945. From the foreword: "In February of 1941, my commanding officer, Commander Ihrig told me that Admiral Nimitz had invited me to dinner the next Saturday night --black tie. I was surprised to find myself the only guest, but had a very enjoyable evening in spite of the Admiral's many probing questions. Next Monday morning, Admiral Nimitz sent for me and informed me that he had selected me to be Aide to the Chief of the Bureau of Navigation. He also warned me about aides who tried to wear their admiral's stars. That day an Alnav went out to all flag officers saying, "Today I have taken a Naval Reserve officer as my personal aide. You will do the same and make your Naval Academy graduates available for sea duty--Nimitz."
2017.319.019	Wiring Diagrams, Navy Model KC-130R Aircraft	Lockheed-Georgia Company	Provides wiring diagrams for the electrical and electronic equipment that is considered part of the basic Lockheed Martin KC-130R aircraft, tanker version of the Lockheed C-130 Hercules.. Enables maintenance personnel to troubleshoot and repair various electric and electronic circuits.
2017.319.020	Navy Guide for Retired Personnel and Their Families	Bureau of Naval Personnel	This guide is to provide complete information on rights, benefits, and responsibilities of members of the U.S. Navy and Naval Reserve entitled to retired or retained pay.
2017.319.029	At War, At Sea : Sailors and Naval Combat in the Twentieth Century	Spector, Ronald H.	Covers naval warfare from the battle of Tsushima in 1905 to the Gulf War of 1991. Draws from diaries, memoirs, letters and interviews. The human side of war from the sailors who experienced it.
2017.319.030	Wings of Gold : The U.S. Naval Air Campaign in World War II	Astor, Gerald	First wings -- War begins -- The engagements begin -- From Tokyo to the Coral Sea -- The Midway sideshow -- The Battle for Midway -- Guadalcanal -- Taking the offensive -- Flights back, escapes, and rescues -- Antisubmarine warfare -- Invasion hawks and birds of the night -- Aces and advances -- Mitscher shampoos and New

Object ID	Title	Author	Summary
			Guinea -- The Marianas overtures -- The Great Marianas turkey shoot -- The Battle of the Philippine Sea -- Night fighters and ground support -- The battle of Leyte Gulf, act I -- The battle of Leyte Gulf, act II -- Carrying the fight to the home islands -- Iwo and Okinawa -- The endgame -- The last tallyho
2017.319.031	Air Navigation, Part 1 : Introduction to Earth	Bureau of Aeronautics	Prepared for the purpose of orienting aviation cadets to navigation that may encircle the earth. This manual gives an overall view of the earth as a sphere, place relationships of war zones, general climatic considerations underlying war strategy and something of the strategic significance of military objectives.
2017.319.032	Air Navigation, Part 2 : Introduction to Navigation	Bureau of Aeronautics	Covers the basic fundamentals of navigation technique. It includes a detailed explanation of the various types of map projections.
2017.319.033	Air Navigation, Part 3 : Dead Reckoning and Lines of Position	Bureau of Aeronautics	From the foreword-"This manual, the third of the Air Navigation Series, introduces some basic applications to the fundamentals covered in the first two volumes. It explains how the aerial navigator records the progress of his plane over the surface of the earth. It describes certain methods used to check the estimated position of the plane during flight, and the manner by which the effects the air currents on the movement of a plane can be determined. This manual, like all others in the series, provides an essential foundation for work to follow."
2017.319.034	Air Navigation, Part 4 : Navigation Instruments	Bureau of Aeronautics	Deals with basic instruments used in navigation, a miscellaneous group consisting of those needed to do chart work, make necessary computations in flight, work the triangle of velocity, establish airspeed and altitude, obtain drift, determine heading, take visual and radio bearings, observe the altitude of heavenly bodies and identify individual stars.
2017.319.035	Air Navigation, Part 6 :	Aviation Training Division,	Part 6 of the Flight

Object ID	Title	Author	Summary
	Contact Flying	Office of the Chief of Naval Operations	Preparation Training series. Covers flying/directing of a plane to its destination by references to visible landmarks under contact conditions.
2017.319.036	Air Navigation - Nautical Astronomy and Celestial Navigation - Part 7	Bureau of Aeronautics	Part 7 of the Air Navigation series prepared to meet the special needs of the U.S. Navy's Aviation Training Program in World War II.
2017.319.037	50th Anniversary of Naval Aviation, 1911-1961	Douglas Aircraft	Souvenir issue (Jan.-Feb. 1962) of Service information survey. A vanity piece for Douglas Aircraft using the 50th anniversary of Naval Aviation to showcase all of the planes that Douglas had built for the Navy. It's billed as a tribute to Naval Aviation and it's contribution to the art and science of aeronautics. Book has six sections: Torpedo-Bombers, Patrol Aircraft (which happens to be the first type of Douglas aircraft delivered to the Navy), Observation-Scouting with a chronology of Navy and Douglas aircrafts), Fighter Aircraft, and Transport Aircraft with a tribute Douglas El Segundo Division.
2017.319.038	Aircraft and Sea Power	Hezlet, Arthur	This book deals with the influence on sea power from the turn of the century until the present day, and the probable developments of the future. Attention is not confined to naval aviation or to specialized maritime air forces; there is, for instance, an acute analysis of the effect of strategic bombing on sea power.
2017.319.039	Prisoner of War : Six Years in Hanoi	McGrath, John M.	During the era of the unpopular Vietnamese conflict few issues united the American people as did the emotion-laden problem of the POWs and MIAs. When the peace treaties were signed and the POWs finally returned to American soil, the nation was collectively exalted by their safe return. One of the returned men was LCDR John McGrath, a young Navy pilot who was captured in June of 1967. As a former POW, McGrath believes that the story of life in the prison camps must be told, both for the sake of history and to disprove forever the claims

Object ID	Title	Author	Summary
			of the Communist government that the captured men were treated humanely, and in accordance with the provisions of the Geneva Convention. A self-taught artist, McGrath vividly presents in words and many pen and ink drawings, a simple straightforward tale of survival, of years of suffering, and the human will to endure. The starkness of the drawings underscores a remarkable chronicle of lives constantly in peril. almost unimaginable in civilised times. 'The book cannot be adequately described — it has to be seen and read. It is superb. Some philanthropist, we hope, will buy a copy for every American library. Do yourself a favor — buy yourself a copy, and another one for a friend.' Armed Forces Journal International (from dust jacket back)
2017.319.042	White Hats of the Navy : A Tribute to the American Sailor	Sharrow, George R.	White Hats of the Navy is a collection of true stories, poems, cartoons, and photographs about the United States Navy written by the former White Hats themselves. Humor, battle-action, liberty, love, wit, and wisdom, coupled with some Navy tradition are the subject of these stories. Stories and cartoons from the old Our Navy magazine are highlighted as is a story on The Shellback Initiation, one of the oldest traditions in the Navy, complete with photographs. Every sailor, past and present, their families, friends, anyone interested at all in the United States should have this book. It is truly a treasure of Navy stories, poems, cartoons, and photographs. (from dust jacket flap) A Tribute to the American Sailor; Over 200 stories, photos, & cartoons (from dust jacket)

Object ID	Title	Author	Summary
2017.319.043	Slipstream : The Autobiography of an Air Craftsman	Wilson, Eugene Edward	CONTENTS ONE. It's Anybody's Fight TWO. The Power Plant; the Heart of an Airplane THREE. Its Vital Spark FOUR. A Backward Art FIVE. Toil and Trouble SIX. What the Doctor Ordered SEVEN. Calvin Coolidge's Town Meeting EIGHT. Dwight Morrow Advances the Throttle NINE. The Gospel According to Aunt Lucy TEN. 2017.319.044	Aircraft Construction	United States Naval Academy. Department of Engineering and Aeronautics	A textbook prepared for the US Naval Academy on aircraft construction.
2017.319.045	Elmer Carries On : Pilot's and Mechanic's Operating Bulletin A -3 (MK 3) Gyropilot	Sperry Gyroscope Co.	January, 1944 bulletin provides the pilot and the mechanic with condensed, illustrated instructions for the A-3 (Mark 3) Gyropilot. Part 1, for the pilot, gives the steps in one-two-three order for operating the equipment. Part 2, for the mechanic, covers the pre-flight ground check and lists the check periods required for Gyropilot maintenance. Second in the "Elmer" series of graphic instructions covering Sperry Gyropilots. Pub. 15-760A
2017.319.046	Radius of Action of Aircraft	Tornich, Mary	This book looks at two navigation problems submitted to the author in 1939. These involved radius of action problems involving an alternate airport as required by the Civil Aeronautics

Object ID	Title	Author	Summary
			Authority fo the instrument flight. Intention of the book is to present dead reckoning navigation in a simple and comprehensive manner. It is to be a useful handbook for aviators.
2017.319.047	Airplane and Its Engine, The	Chatfield, Charles Hugh	The book is intended primarily for the reader who desires a sound knowledge of the basic principles and a broad view of the present development of the airplane and its power plant. This edition includes discussions of the major advances in the airplane and its power plant which have been made since the publication fo the third edition.
2017.319.048	Sea Power : A Modern Illustrated Military History	Batchelor, John H.	This book tells the story of Sea Power from the early battleships and submarines to the naval aircraft and carriers which provided the basis for the long-range sea battles of the Second World War. Illustrated by John Batchelor. First section describes the rise and fall of the battleship from ironclad La Gloire to the New Jersey. Second section deals with the concept of underwater travel. The final section details the evolution of the navel aircraft from frail and the primitive observation biplanes to the deadly instruments of power at sea.
2017.319.049	WWII US Navy Fighters	Koku-Fan	US Navy fighter and torpedo bombers of WWII. Airplanes documented include TBF Avenger, F4U Corsair, F6F Hellcat, F2A Buffalo, F4F Wildcat, F7F Tigercat, F5F Skyrocket, XP-50, F8F Bearcat, SB2C Hell Diver, SBD Dauntless, Douglas Vindicator/Devastator and the camouflage markings of U.S. Aircraft.
2017.319.050	Last Battle Station, The : The Story of the U.S.S. Houston	Schultz, Duane P.	USS Houston (CA-30) (originally designated CL-30), nicknamed the "Gallopig Ghost of the Java Coast", was a Northampton-class heavy cruiser of the United States Navy. She was the second Navy ship to bear the name "Houston".

Object ID	Title	Author	Summary
			She was launched by Newport News Shipbuilding & Dry Dock Company, Newport News, Virginia on 7 September 1929, sponsored by Elizabeth Holcombe (daughter of Oscar Holcombe, then-mayor of Houston, Texas), and commissioned as CL-30 on 17 June 1930, Captain Jesse Bishop Gay commanding. Her designation was changed to CA-30 on 1 July 1931. (from Wikipedia)
2017.319.051	Aviation Machinist's Mate 1 & C	Bureau of Naval Personnel	Rate training manual for Aviation Machinist's Mate 1 & C
2017.319.052	Naval Air Weapons Meet, 1956-1959	Romano, Angelo	In 1956 the US Navy decided to establish an annual competition between specially selected Navy and Marine Corps squadrons from both coasts. The first such was called the Navy Fleet Air Gunnery Meet and was held at NAAS, El Centro in June 1956. The second meet which was renamed the Naval Air Weapons Meet in April 1957. The third was held in 1958; the fourth and last was in 1959 and was at MCAAS Yuma. After the fourth the Navy suspended the meets. This book is a photographic history of the meets.
2017.319.053	A-1 Skyraider, The	Birdsall, Steve	"When I started on this book, the A-1s were still in twelve of the fifteen Attack Carrier Air Wings. They were fighting with the Air Force and the VNAF, and were being called the most effective COIN aircraft we had. Then there were the MiG kills, Medal of Honor, and finally the Navy retirement. " (from Acknowledgement)
2017.319.055	Development of Amphibious Tactics in the U.S. Navy, The	Smith, Holland M.	Reprint of the original occasional Paper' originally serialized in The Marine Corps Gazette. It is incomplete due the transfer of the real author from active duty in 1946. According to the officer who was assigned to publication of the document and who wrote the preface, the piece was very thorough as far as it went,

Object ID	Title	Author	Summary
			particularly strong in the coverage of the theoreticals developments and landing exercises between World Wars I and II. It also covers both the Pacific and European theaters and includes all significant landings, as well as Marine. The approach is analytical. The Preface also includes a biography of the named author, General Holland M. Smith.
2017.319.056	Skyward : Man's Mastery of the Air as Shown by the Brilliant Flights of America's Leading Air Explorer.	Byrd, Richard E.	Man's mastery of the air as shown by the brilliant flights of America's leading air explorer, destined to be Rear Admiral, Richard Evelyn Byrd. It is a story of his life, his thrilling adventures, his North Pole and trans-Atlantic flights, together with his plans for conquering the Antarctic by air. (paraphrased from books subtitle). Forward by RADM, William A. Moffett, USN, Chief of the Bureau of Aeronautics.
2017.319.057	Department of the Navy Standard Subject Identification Codes	Chief of Naval Operations	An instruction providing a standard system of numbers and/or letter symbols to be utilized throughout the Department of the Navy for categorizing, subject classifying and identifying directives, blank forms and reports.
2017.319.058	American Fighter Plane, The	Williams, Ted (ill.)	Traces the evolution of the U.S. warbird by showcasing forty of the most groundbreaking designs in the history of the of American military aviation.
2017.319.059	Air Force Air Refueling for Naval Operations : History, Practice and Recommendations	Ryan, Dennis K.	Air Refueling has been an accepted practice since the 1920s because it increases the operational range the aircraft while allowing them to carry maximum payloads. Tanker aircraft have been built to meet that purpose. In the 1980s, the USAF and the USN both understood the importance of operational improvements to the KC-135s and the KC-10s. Various operations in Asia showed the need for the two services to cooperate in the use of these assets. A joint policy understood by both services would be more effective than a system cobbled together on an ad hoc basis. This book is an initial step in that process.

Object ID	Title	Author	Summary
2017.319.060	Register of Commissioned and Warrant officers of the United States Navy and Marine Corps - 1934	Chief of Naval Personnel	Comprehensive list of all active duty officers in the Navy and Marine Corps. Gives pay grades off officers and enlisted; also lists decorations of the officers and gives a short list of abbreviations.
2017.319.061	Wasp Major, The	Pratt & Whitney Aircraft	Pratt & Whitney Aircraft presents another dependable engine. This promotional book highlights how the Wasp Major was developed from its design authorization in November 1940, the first engine run in April 1941, and the first one flown in May 1942. The cylinder design and arrangement are presented in both words and colored pictures. The ignition, supercharger, anti-vibration, accessories and installations are also included.
2017.319.062	F/A-18E/F Hornet	McDonnell Douglas Aircraft	Promotional booklet put out by McDonnell Douglas. Includes General Info, APG Systems, and Avionic Systems.
2017.319.063	Aerodynamics for Naval Aviators	Hurt, Hugh H.	Presents elements of applied aerodynamics and aeronautical engineering which relate directly to the problems of flying operations.
2017.319.064	F/A-18 Hornet Strike Fighter	McDonnell Douglas Aircraft Co.	This appears to be a promotional brochure put out by McDonnell Aircraft Co. Sections on Program Overview, Configuration, Survivability, Safety, Air-to-Air, Air-to-Ground, Growth, Summary, Appendices: Integrated Logistics Support and Training/Trainers. The McDonnell Douglas (now Boeing) F/A-18 Hornet is a twin-engine supersonic, all-weather carrier-capable multirole fighter jet, designed to dogfight and attack ground targets (F/A for Fighter/Attack). Designed by McDonnell Douglas and Northrop, the F/A-18 was derived from the latter's YF-17 in the 1970s for use by the United States Navy and Marine Corps. The Hornet is also used by the air forces of several other nations. It has been the aerial demonstration aircraft for the U.S. Navy's

Object ID	Title	Author	Summary
			Flight Demonstration Squadron, the Blue Angels, since 1986. The F/A-18 has a top speed of Mach 1.8. It can carry a wide variety of bombs and missiles, including air-to-air and air-to-ground, supplemented by the 20 mm M61 Vulcan cannon. It is powered by two General Electric F404 turbofan engines, which give the aircraft a high thrust-to-weight ratio. The F/A-18 has excellent aerodynamic characteristics, primarily attributed to its leading edge extensions (LEX). The fighter's primary missions are fighter escort, fleet air defense, Suppression of Enemy Air Defenses (SEAD), air interdiction, close air support and aerial reconnaissance. Its versatility and reliability have proven it to be a valuable carrier asset, though it has been criticized for its lack of range and payload compared to its earlier contemporaries, such as the Grumman F-14 Tomcat in the fighter and strike fighter role, and the Grumman A-6 Intruder and LTV A-7 Corsair II in the attack role. The F/A-18 Hornet provided the baseline design for the Boeing F/A-18E/F Super Hornet, a larger, evolutionary redesign of the F/A-18. Compared to the Hornet, the Super Hornet is larger, heavier and has improved range and payload. The F/A-18E/F was originally proposed as an alternative to an all-new aircraft to replace existing dedicated attack aircraft such as the A-6. The larger variant was also directed to replace the aging F-14 Tomcat, thus serving a complementary role with Hornets in the U.S. Navy, and serving a wider range of roles including refueling tanker. The Boeing EA-18G Growler electronic jamming platform was also developed from the F/A-18E/F Super Hornet. (from Wikipedia)

The McDonnell Douglas (now Boeing) F/A-18 Hornet is a twin-engine supersonic, all-weather carrier-capable multirole fighter jet, designed to dogfight and attack ground targets (F/A for Fighter/Attack). Designed by McDonnell Douglas and Northrop, the F/A-18 was derived from the latter's YF-17 in the 1970s for use by the United States Navy and Marine Corps. The Hornet is also used by the air forces of several other nations. It has been the aerial demonstration

Object ID	Title	Author	Summary
			aircraft for the U.S. Navy's Flight Demonstration Squadron, the Blue Angels, since 1986. The F/A-18 has a top speed of Mach 1.8. It can carry a wide variety of bombs and missiles, including air-to-air and air-to-ground, supplemented by the 20 mm M61 Vulcan cannon. It is powered by two General Electric F404 turbofan engines, which give the aircraft a high thrust-to-weight ratio. The F/A-18 has excellent aerodynamic characteristics, primarily attributed to its leading edge extensions (LEX). The fighter's primary missions are fighter escort, fleet air defense, Suppression of Enemy Air Defenses (SEAD), air interdiction, close air support and aerial reconnaissance. Its versatility and reliability have proven it to be a valuable carrier asset, though it has been criticized for its lack of range and payload compared to its earlier contemporaries, such as the Grumman F-14 Tomcat in the fighter and strike fighter role, and the Grumman A-6 Intruder and LTV A-7 Corsair II in the attack role. The F/A-18 Hornet provided the baseline design for the Boeing F/A-18E/F Super Hornet, a larger, evolutionary redesign of the F/A-18. Compared to the Hornet, the Super Hornet is larger, heavier and has improved range and payload. The F/A-18E/F was originally proposed as an alternative to an all-new aircraft to replace existing dedicated attack aircraft such as the A-6. The larger variant was also directed to replace the aging F-14 Tomcat, thus serving a complementary role with Hornets in the U.S. Navy, and serving a wider range of roles including refueling tanker. The Boeing EA-18G Growler electronic jamming platform was also developed from the F/A-18E/F Super Hornet. (from Wikipedia)

Object ID	Title	Author	Summary
2017.319.076	Martin P5M Marlin, The	Barth, Bruce D.	This publication is intended to provide a comprehensive accounting of the U.S. Navy's last production seaplane, from its post-war development in the late 1940s to its untimely demise in the mid-1960s. Also included, is a complete history of the Navy's last seaplane squadron, Patrol Squadron Forty. At head of title: The end of an era in naval seaplane aviation.
2017.319.077	Illustrated History of Seaplanes and Flying boats, The	Casey, Louis S.	A history of planes designed for flying over and landing in bodies of water.
2017.319.078	Rudder 1945, The : The Saga of the Fifth Aircraft Repair Unit (Floating) (ARU(F)-5	United States. Army Air Forces. Aircraft Repair Unit (Floating), 5th	Chronicles the wartime exploits of the Fifth Aircraft Repair Unit (Floating) or 5th ARU (F) embarked on the SS Brigadier General Clinton W. Russell, a converted Liberty Ship, in the western Pacific during the final year of WWII. Fifth Aircraft Repair Unit (Floating) SS Brigadier General Clinton W. Russell (5th ARUF) Sikorsky R-4 helicopter 17 JULY 44 BROOKLEY FIELD, ALA 20 DEC 44 EMBARKED 27 DEC 44 GUANTANAMO BAY, CUBA 3 JAN 45 PANAMA 2 FEB 45 MANUS ISLAND 8 FEB 45 BIAK ISLAND 20 FEB 45 TACLOBAN, LEYTE 13 MAR 45 SUBIC BAY 20 MAR 45 MANILA 14 JULY 45 OKINAWA Sikorsky R-4 helicopter
2017.319.080	Aircraft Collection National Museum of Naval Aviation, The	National Museum of Naval Aviation	This book is a description (with photographs) of various planes in the National Museum of Naval Aviation in Pensacola, Florida. There is also a brief specification for each plane. The chapters are divided into Pre-World War II, World War II, Korean War Era, Vietnam War Era, and Modern Era.
2017.319.081	Principles of Flying	None Stated	This book is written for aviation cadets to become top-notch pilots. In this manual it has four sections: Nomenclatures, theory of flight, structures, and effects of flight.

Object ID	Title	Author	Summary
2017.319.082	Effects of Flight, The	Training Division Bureau of Aeronautics	An attempt to explain to the student pilot the causes of the sensations he will encounter while flying in hopes of making them less disconcerting. Also chapters on psychological aspects of flight training and first aid. Volume II of Principles of Flying
2017.319.083	Practical Air Navigation and the Use of the Aeronautical Charts of the U. S. Coast and Geodetic Survey	Lyon, Thoburn C.	Practical Air Navigation and the Use of The Aeronautical Charts of the U. S. Coast and Geodetic Survey by Thoburn C. Lyon, Associate Cartographic Engineer Department of Commerce USA , Harry L. Hopkins, Secretary, and Leo Otis Colbert, Director, Special Publication No. 197 with Preface. Aeronautical charts are constructed for simple methods of air navigation and this book is to enable pilots to make full and efficient use of them. Meteorology has been added to the first and second edition on celestial navigation and in hope that this volume contributes to the development of practical air navigation. VII Chapters from Chart Reading, Cross-Country Flying-Piloting, Air Navigation by Dead Reckoning, Radio Navigation, Celestial Navigation, Meteorology and Practical Examples with Illustrations and Frontispiece of Airway map of the United States and Tables
2017.319.084	U.S. Navy Combat Aircraft in the 1970s	Peacock, Lindsay T.	Introduction: There can be few who would dispute that carrier aviation is one of the most hazardous and demanding forms of flight, or that it is one of the most fascinating aspects of a fascinating subject. The US Navy is one of the pioneers of naval aviation, and remains wholly committed to the concept of carrier power. Consequently, it provides a rich hunting-ground for compilers of photographic albums, with many authors attempting to capture some of the undoubted glamour, noise and fury of the flight deck. Personally, I doubt that any book can succeed in conveying the atmosphere of carrier operations, for so many of the intangible aspects —

Object ID	Title	Author	Summary
			sound and smell being just two — are missing. The only way to get a real feel for air power at sea is to spend some time aboard an aircraft carrier; I have been fortunate enough to do just that, and many of the photographs contained in this volume were obtained on such visits. The US Navy is not, however, merely a sea-going organization; it should be remembered that they also operate a large number of shore-based aircraft which are generally overlooked. I have attempted to redress the balance to some degree by including a selection of these aircraft, which make a significant contribution to US naval air power. Ultimately, though, it is the carrier which serves as the principal cutting edge of naval aviation, and the bulk of the photographs are of carrier aircraft. Whether I have succeeded in conveying some of the atmosphere is a matter of opinion, but I certainly hope that you find the selection interesting. Lindsay T. Peacock, 1982.
2017.319.085	Reciprocating Power Plants, 21R(A)	Naval Air Training Command	A study aid for the student in the Aviation Machinist's Mate R (Reciprocating) Course (Class A) at the Naval Air Technical Training Center, U.S. Naval Air Station, Memphis, TN.
2017.319.086	Sight Reduction Tables for Air Navigation, Vol. 1 : (Selected Stars), Epoch 1955.0	Hobbs, Allen (ed.)	First of three volumes containing computed altitudes and azimuths representing solution of the navigational triangle as required in usual navigational practices employing modern line of position methods. This volume represents a revision of Star Tables for Air Navigation originally published in 1947. All data have been recomputed for the epoch 1955.0.
2017.319.087	Consolidated P2Y Ranger	Ginter, Steve	The book begins with a 24-page in depth review of the origins of the patrol flying boat covering most Curtiss boats (except

Object ID	Title	Author	Summary
			the NC boats), the Naval Aircraft Factory PN boats and their derivatives (Douglas PD-1, Keystone PK-1, Martin PM-1/2) , the Boeing PB-1, and the Hall PH-1/2/3 and XP2H-1. Thirteen 3-view drawings by Lloyd Jones help illustrate this section. The book then goes on to cover the Consolidated XPY-1 Admiral, Consolidated Model 16 Commodore, Martin P3M-1/2 and XP2M-1 before detailing the Consolidated's P2Y Ranger development and squadron usage. The P2Y was the aircraft that put Consolidated on the map of great aircraft manufacturers and led to the PBY and PB2Y flying boats that served with such distinction during WWII.
2017.319.088	Sight Reduction Tables for Air Navigation, Vol. 2 : (Latitudes 0 - 39 Degrees), (Declinations 0 - 29 Degrees)	Hobbs, Allen (ed.)	Second of three volumes containing computed altitudes and azimuths representing solution of the navigational triangle as required in usual navigational practices employing modern line of position methods. This volume provides complete data for the reduction of the sun, moon and planet sights from the zenith to the horizon and below in the subject ranges of latitude and declination.
2017.319.089	Sight Reduction Tables for Air Navigation, Vol. 3 : (Latitudes 40 - 89 Degrees), (Declinations 0 - 29 Degrees)	Hobbs, Allen (ed.)	Second of three volumes containing computed altitudes and azimuths representing solution of the navigational triangle as required in usual navigational practices employing modern line of position methods. This volume provides complete data for the reduction of the sun, moon and planet sights from the zenith to the horizon and below in the subject ranges of latitude and declination.
2017.319.090	Empire Express, The : The Story of the U.S. Navy PV Squadrons' Aerial Strikes Against the Japanese Kuriles During WW II	Scrivner, Charles L.	Following the devastating defeat of the Imperial Navy at Midway, both adversaries made serious reassessments of the Aleutian, but it wasn't until mid-1943 that the American forces were strong enough to attempt the reoccupation of Attu and Kiska. With the capture of the American Islands, the U.S.

Object ID	Title	Author	Summary
			Navy immediately set about establishing an air base. Casco Field was built and Navy bomber squadrons moved in. Their job was to take the offensive--to strike at the northern end of the Japanese Empire. Thus a special breed of Navy fliers was formed--the Empire Express. This is their story...their special niche in aeronautical history.
2017.319.091	Air Almanac 1963, The, January-April	United States Naval Observatory	Provides in a convenient form the astronomical data required for air navigation in the period January thru April 1963.
2017.319.092	Fundamentals of Electronics, Volume 1a : Basic Electricity, Direct Current	Bureau of Naval Personnel	First book of volume one of eight volumes on the essential components of the field of electronics. This book addresses direct current.
2017.319.093	Fundamentals of Electronics, Volume 1b Basic Electricity, Alternating Current	Bureau of Naval Personnel	Second book of volume one of eight volumes on the essential components of the field of electronics. This book addresses alternating current.
2017.319.094	Fundamentals of Electronics, Volume 2 : Power Supplies and Amplifiers	Bureau of Naval Personnel	Second of eight volumes on the essential components of the field of electronics. This book addresses power supplies and amplifiers.
2017.319.095	Fundamentals of Electronics, Volume 3 : Transmitter Circuit Applications	Bureau of Naval Personnel	Third of eight volumes on the essential components of the field of electronics. This book addresses transmitter circuit applications.
2017.319.096	Fundamentals of Electronics, Volume 4 : Receiver Circuit Applications	Bureau of Naval Personnel	Fourth of eight volumes on the essential components of the field of electronics. This book addresses receiver circuit applications.
2017.319.097	Fundamentals of Electronics, Volume 5 : Oscilloscope Circuit Applications	Bureau of Naval Personnel	Fifth of eight volumes on the essential components of the field of electronics. This book addresses oscilloscope circuit applications.
2017.319.098	Fundamentals of Electronics, Volume 6 : Microwave Circuit Applications	Bureau of Naval Personnel	Sixth of eight volumes on the essential components of the field of electronics. This book addresses microwave circuit applications.
2017.319.099	Fundamentals of Electronics, Volume 7 : Electromagnetic Circuits and Devices	Bureau of Naval Personnel	Seventh of eight volumes on the essential components of the field of electronics. This book addresses electromagnetic circuits and devices.

Object ID	Title	Author	Summary
2017.319.100	Fundamentals of Electronics, Volume 8 : Electromagnetic Circuits and Devices	Bureau of Naval Personnel	eighth of eight volumes on the essential components of the field of electronics. This book contains tables and a master index.
2017.319.101	Airway Aids	Jam Handy Organization, The	History of and currently used aids to air navigation in the United States. Most of the book is taken up with determining range by radio using radio antenna arrays. Also covered are the radio compass and the radio direction finder.
2017.319.102	Flight Control Systems : How They Work	Jam Handy Organization, The	Covers the purpose and description of various flight controls in World War II vintage military aircraft. Essentially paper copies of slides from a slide projector or film presentation made by the same company.
2017.319.103	Parachutes	Jam Handy Organization, The	Covers the purpose and description of the parachute and methods of using same. The booklet is essentially paper copies of slides from a slide projector or film presentation made by the same company.
2017.319.104	Instrument Sense	Aviation Training Division, Office of the Chief of Naval Operations	Tips on instrument flying in 1947. Cartoon style.
2017.319.105	Recognition Sense	Aviation Training Division, Office of the Chief of Naval Operations	Advice to Navy pilots on how to distinguish friend from foe. Cartoon style presentation.
2017.319.106	Night Fighter Sense or Who Killed the Japanese Sandman?	Aviation Training Division, Office of the Chief of Naval Operations	Descriptions through fictional stories of the right way and the wrong way to conduct naval night fighter (VFN) operations against the Japanese in World War II. Cartoon style presentation. Features Ensign Dilbert.
2017.319.107	Battles of Cape Esperance, 11 October 1942 and Santa Cruz Islands, 26 October 1942, The	Poor, Henry	From the Foreword, "Following the Battle of the Eastern Solomons in late August 1942, the naval phase of the Guadalcanal Campaign entered a lull which lasted through September." The Americans controlled the waters by daylight, while the Japanese sailed through the "Slot" at night. After the Japanese failed to dislodge the Marines at the Battle of Bloody Ridge on 12-14 September, the U.S. Navy retaliated against a

Object ID	Title	Author	Summary
			stepped up Tokyo Express with a destroyer-cruiser force in the Battle of Cape Esperance. Henry V. Poor authored the account of the Battle of Cape Esperance while the Battle of the Santa Cruz Islands was written by Henry V. Poor, Henry A. Mustin, and Colin G. Jameson; both were published together without attribution by the Office of Naval Intelligence in 1943. Originally published: Washington, D.C. : Publications Branch, Office of Naval Intelligence, United States
2017.319.108	Register of Alumni, Graduates and Former Naval Cadets and Midshipmen - 1994	U.S. Naval Academy Alumni Association	Formerly titled U.S. Naval Academy Alumni Association. Register of graduates. Every person who has enrolled for the regular and prescribed course of instruction at the Naval Academy since the founding of the institution, and including the current class year is listed in this volume.
2017.319.109	Parachute Sense	Aviation Training Division, Office of the Chief of Naval Operations	Description of the parachute and how and when to use it. Cartoon style presentation.
2017.319.110	NAVSEA Mine Familiarizer	Naval Sea Systems Command	From the back of the front cover: "In 1776, the first known sea mine was invented by an American, David Bushnell, who is also recognized as the inventor of America's first submarine. Bushnell's mine was a simple watertight wooden keg, loaded with gunpowder, which hung from a float and at the time, was called a torpedo. In 1777, under orders from General Washington, a number of the kegs were set adrift by Bushnell in an attempt to destroy a fleet of British warships anchored in the Delaware River off Philadelphia. The attempt failed. But the naval mine has since--through the American Civil War, World War I and II, and the Korean and Southeast Asian Conflict--gained a reputation as one of the Navy's least costly, yet most effective offensive and defensive weapons.
2017.319.112	Automatic Flight : P-1	Chief of the Bureau of	An cartoon character

Object ID	Title	Author	Summary
	Automatic Pilot	Aeronautics	American Indian by the name of Pone (P1) leads the reader through operation, maintenance and troubleshooting of the P-1 automatic pilot for aircraft. Well-illustrated.
2017.319.113	Wings from the Coral Sea : A Pictorial Survey of the Carrier Air Wing Thirteen and its Aircraft	Romano, Angelo	Contains a brief history and picture of the Coral Sea, and CVW-13, the Guardians. Pictures of the carrier air wing, the men, the hangar deck, the weapons, the flight deck, flight operations, HS-17 Neptune's Raiders, VFA-131 Wildcats, VFA-132 Privateers, VMFA-314 Black Knights, VMFA-323 Death Rattlers, VAW-127 Seabats, and VA-55 Warhorses,
2017.319.114	Security in the Nuclear Age	Newport News Shipbuilding and Dry Dock Company	From the foreword: "This pamphlet portrays the (aircraft) carrier's significance as an investment to ensure the preservation of World peace during these tense times of cold war. It is designed to set forth the facts regarding the great fighting power of our aircraft carriers as they range the Mediterranean and the Western Pacific, close to potential--and active--trouble spots, thousand of miles from our shores. and it tells what we must do to make sure that this defender of the security of the world's free peoples is kept strong and ready in the perilous years ahead."
2017.319.115	Ice Formation on Aircraft	Training Division Bureau of Aeronautics	Discusses properties and types of ice, where it forms on an aircraft, the behavior of planes under the influence of icing, and the counsel from an airline pilot who has flown weather for many years in all regions of North America.
2017.319.116	Thunderstorms	Training Division Bureau of Aeronautics	Designed to introduce navy pilots to thunderstorms, to give some idea of the danger signals that precede them, to describe how they form and what causes them.
2017.319.117	Fog	Training Division Bureau of Aeronautics	Describes what fog is, how it forms, the types of fog and fog forecasting.
2017.319.118	Swift and Effective Retribution : The U.S. Sixth Fleet and the Confrontation with Qaddafi	Stanik, Joseph T.	This is a third in a series on the "vital contributions of the Navy to America's national security, economic prosperity, and global presence during the

Object ID	Title	Author	Summary
			contemporary era....Less well known, but no less important, the fleet has also been involved during the last half century in several short-term combat actions in support of U.S. foreign policy. The American confrontation with Muammar al-Qaddafi's Libya during the 1980s, the subject of this monograph, was a classic example of how national objectives can often be met through the uses of naval force."
2017.319.119	Cold Front, The	Training Division Bureau of Aeronautics	Describes a cold front as a manufacturing area which makes all kinds of weather. Discusses what causes cold fronts, how they appear at a distance, what is in a cold front zone, and how to fly the cold front.
2017.319.120	Flying the Weather Map	Training Division Bureau of Aeronautics	A guidebook to the Aeorology Office for the navy pilot - what information one can expect to get there, when one can get it, how to go about getting it, and why one needs it.
2017.319.121	Operation Heritage and the Land Down Under : USS Hornet Visits Sydney, Australia	None Stated	10th deployment final leg: 17 Feb 1966 - 23 Mar 1966, CVSG -57, WestPac (Yokosuka to Long Beach via Sydney. Special cruise book for a part of the Hornet's 65-66 Westpac tour. The USS Hornet and four destroyers of Antisubmarine Warfare Group One sailed from Tokyo Bay through the great Battlefields of WWII in the Pacific. The Hornet, McCain, Epperson, Nicholas, and Fletcher arrived in Sydney Australia for a good will visit of six memorable days. She joined the Royal Australian Navy for a ceremonial tribute to her WWII predecessor, the USS Hornet (CV-8) that was sunk near Guadalcanal in 1942.
2017.319.122	Typhoons and Hurricanes	Training Division Bureau of Aeronautics	makes the point there is very little in the difference in the names of the largest storms. Discusses dangers, patterns, records of frequency in the western Pacific, profile of a typhoon, how to avoid them, early signs of a storm, the need to have an effective heavy weather bill, and what to do

Object ID	Title	Author	Summary
			if you are in the midst of a typhoon circulation.
2017.319.123	Aircraft Maintenance Officer Course, Data Sheet No. 4.1.1	Naval Air Technical Training Center	A handy, pocket-size guide to aid in locating directives which pertain to common maintenance actions and problems frequently occurring in operating aircraft activity. Subjects are listed alphabetically, with directives containing information or requiring action immediately following.
2017.319.124	Guide Book : Vieques- San Juan- St. Thomas	Fleet Marine Forces Atlantic	A pamphlet meant as an orientation and guide to things to do, places to go, health warnings, etc., for Marines on exercise or liberty on the islands of Vieques and St. Thomas and the city of San Juan in the Caribbean Sea.
2017.319.125	For Pilots Only : How to Measure Angle of Attack for More Hits with Rockets and Bombs	Bureau of Naval Ordnance	Handbook prepared to acquaint naval pilots with the newly developed over-the-ocean method of measuring angle of attack of the airplane, and as a guide for serviceuse in calibrating fire-control systems to specific aircraft by determining an accurate angle of attack curve. Formerly Restricted handling.
2017.319.126	U.S. Navy Flight Training Manual, No. 2 : Primary	Training Division Bureau of Aeronautics	Written to assist the pilot already experienced in flying light planes in the transition to flying heavier trainers, and from elementary to more advanced maneuvers.
2017.319.127	Introduction to Airplanes	Bureau of Naval Personnel. Standards and Curriculum Division	Written for the enlisted men of Naval Aviation in order to give them the background information necessary to perform their naval aviation duties. Discusses aviation history, aerodynamics, nomenclature of airplane structures, and power plants.
2017.319.128	Aircraft Electrical Systems	Naval Air Technical Training Command	Designed to give the enlisted man of Naval Aviation the information necessary to perform his duties. Begins with basic information about aircraft wiring systems and proceeds with discussion of starters, ignition and spark plugs, and ends with problems of aircraft power supply.
2017.319.129	Aircraft Engines	Bureau of Naval Personnel	Aircraft Engines in 15 Chapters with Preface. The book

Object ID	Title	Author	Summary
			written for the enlisted men of Naval Aviation and is one of a series designed to give them the necessary information to perform their aviation duties. A knowledge of aircraft engines is important to Aviation Machinist Mates responsible for general maintenance work with subdivisions of Aviation Hydraulics Mechanics, Aviation Instrument Mechanics, Aviation Carburetor Mechanics, Aviation Propeller Mechanics, and Aviation Flight Engineers. Various Aircraft Engines from the Pratt and Whitney Double Wasp R-2800 to the Twin, and Wright Cyclone R-1820 and Ranger V-770 are discussed.
2017.319.130	Operation of Aircraft Engines	Bureau of Naval Personnel	A primer for the future aviator on aircraft engines. Covers basic principles, engine parts, fuel systems, carburetors and induction systems, lubrication systems, the ignition system, aircraft propellers, engine instruments and controls, general considerations, starting up and warming, and flight operation.
2017.319.131	Basic Field Manual, Vol. 10 : Military Intelligence, Part 3 : Examination of Enemy Personnel, Repatriates, Documents and Materiel	War Department	Sets forth the fundamental principles and prescribed procedure to be followed in the examination of personnel, documents and materiel.
2017.319.132	U.S. Navy Shore Patrol Manual	Bureau of Naval Personnel	Policy for operation of the Shore Patrol. Intended as a guide and aid in maintaining uniformity of policy and efficiency of operation.
2017.319.133	NAS Kingsville : 1971 Unofficial Guide	None Stated	Unofficial guide for newly reporting members to facilities and services available to military personnel assigned to commands based at or near Naval Auxiliary Air Station, Kingsville, Texas.
2017.319.134	Defensive Tactics Against Fighters	Training Division Bureau of Aeronautics	This document has been scanned and the digital version is available on Library 1 Onedrive\Emanuals\by ObjectID number. Dedicated to showing ways for a single-seater fighter pilot to get out of a situation in which he finds himself on the defensive. The key is to have

Object ID	Title	Author	Summary
			a plan of action ahead of time. Formerly Restricted handling (downgraded from Confidential) .
2017.319.135	Aircraft Refueling	Chief of the Bureau of Naval Weapons	List information and procedures intended to serve as a standard for refueling operations at all navy and Marine Air activities ashore. Covers objectives of fuel handling operations, characteristics of aviation fuels, safety in fuel handling operations, contamination of aircraft fuels, preventative maintenance, organization, aircraft refueling equipment, and aircraft defueling equipment.
2017.319.136	Aviation Ordnance, Bombs, 1930's	Bureau of Naval Ordnance	A multi-ring plastic binder book containing three publications related to naval bombs in the 1930's. The publications are: Bombs, Bomb Characteristics, NAVORD 1831 of 11 NOV 30: Bombs, Bomb Characteristics, NAVORD 1831 of 12 DEC 35; and NAVORD 736, Aviation Ordnance, Aircraft Bomb and Fuse Characteristics of FEB 1938. All publications were formerly Restricted or Official Use Only for handling purposes. All are photocopy reproductions. Each pub subsequent in the list superseded the prior publication.
2017.319.137	Landing Party Manual - 1960	USN	"SCOPE OF MANUAL--a. The drills and instructions set forth in this manual are intended as a guide for the training and operations of landing parties organized by units afloat and emergency ground defense force units organized at naval shore establishments. Where instructions refer to units afloat or naval landing parties, it is intended that such instructions be utilized by shore stations and naval emergency ground defense forces (NEGDF) as applicable."
2017.319.138	Aerology for Naval Aviators	Naval Air Training Command	Provides the naval aviator with an understanding of basic weather phenomena; particularly weather hazards, weather office information, and flight techniques.

Object ID	Title	Author	Summary
2017.319.139	Flight Training Instructions, Vol. 3 : Stages K and L	Naval Air Basic Training Command	3rd of three books in the series published primarily to assist the student pilot to become acquainted as quickly as possible with the fundamental requirements of the carrier qualification syllabus. Covers field carrier landing practice, safety and emergency procedures, FCLP Demonstration flight, the slow air work flight, carrier qualification procedures, catapulting procedure, and pre-qualification pointers. Contains loose-leaf Aux Station Corry Field memo regarding correction to Appendix B, undated. Publication formerly Restricted handling.
2017.319.140	Programed Text : Slope Aviation Mathematics	Chief of Naval Air Basic Training	Part of auto-instructional program to be completed by students during regularly scheduled class periods. This segment deals with slope.
2017.319.141	Basic Aerodynamics, Part I : Programed Text	Chief of Naval Air Basic Training	Part of auto-instructional program to be completed by students during regularly scheduled class periods. This segment deals with aerodynamics.
2017.319.142	Typical Axial Flow Power Plant, 21J(A)	Naval Air Training Command	A supplement to the course of instruction in the Aviation Machinist's Mate J (Jet Engine) Course (Class A) at the Naval Air Technical Training Center, U.S. Naval Air Station, Memphis, TN. It features the J65-W-4B and -16A turbojet power plant.
2017.319.143	DR Navigation : Programed Text	Chief of Naval Air Basic Training	Part of auto-instructional program to be completed by students during regularly scheduled class periods at the U.S. Naval Air Station, Pensacola, FL. This segment deals with the dead reckoning form of navigation.
2017.319.144	DR Navigation : Lesson Plans and Workbook, Basic, Vol. 1	Chief of Naval Air Basic Training	used to implement instruction in the basic phase of the academic syllabus at the U.S. Naval Air Station, Pensacola, FL. This segment deals with the dead reckoning form of navigation.
2017.319.145	Naval Air Training Command, Pensacola, 1948	None Stated	A pictorial depiction of the major activities and locations common to the Naval Air Station, Pensacola, Florida.

Object ID	Title	Author	Summary
			Meant to serve personnel assigned and official visitors as a memento of days spent at the Annapolis of the Air. The date of publication is an estimate based on the presence of the USS Wright (1947-48) and when Bearcats were used by the Blue Angels (1946-49).
2017.319.146	U.S. Navy Cold Weather Handbook for Surface Ships	Barr, Robert K. (ed.)	Guise for preparation of surface ships for deployments to cold weather areas. Provides a baseline for establishment of cold weather capabilities. Discusses readying the ship for deployment to include training. Also covers recognition of cold weather phenomena, identification of cold weather clothing, ice accumulation, heavy weather shiphandling, safety and medical considerations. Sample Cold Weather Bill.
2017.319.147	Radar Circuit Analysis - 1959	Commander Air Training Command (USAF)	We have a 1951 edition filed at NAVWEPS 00-80T-79. Provides basic principles and basic circuits of radar. Includes refresher studies on mathematics, electricity and radio. Remaining chapters analyze the circuits which serve as the basic components of radar equipment. Most circuits discussed are common; only a few cases are taken from specific sets.
2017.319.148	DR Navigation : Lesson Plans and Workbook, Basic, Vol. 2	Chief of Naval Air Basic Training	Used to implement instruction in the basic phase of the academic syllabus at the U.S. Naval Air Station, Pensacola, FL. This segment deals with the dead reckoning form of navigation and includes sample problems.
2017.319.149	Aviation Maintenance	Harris, Arthur W. D. (ed.)	This is a reprint of the entire issue of the July 1945 Aviation Maintenance magazine meant for special distribution to the naval personnel of the U.S. Navy Bureau of Aeronautics. It covers a wide range of topics including the Bureau of Aeronautics, Carrier operation and maintenance, mobile air trainers. USMC aircraft repair base and training carrier aircraft service squadrons.
2017.319.150	American Warplanes	Gunston, Bill	Over 400 photographs; More

Object ID	Title	Author	Summary
			than 75 color profile drawings; Over 200 three-view drawings The combat aircraft of the various air arms of the United States armed forces represent a military capability which no other nation can match, providing the yardstick against which the warplanes of all other air forces must be judged. Today, the United States fields more than 15,000 aircraft, the largest number of military airplanes and helicopters used by any single nation. In fact the single word which appears to fit descriptions of American warplanes throughout three-quarters of a century is "most" — most powerful, most advanced, most expensive, most weapons carried, most produced, even most functional . . . This book chronicles the development of most of them — from the Wright Flyers of the early 1900s to the AV-8B serving today's Marine Corps. It is a magnificent tribute to more than 200 combat aircraft to have seen service, each of them illustrated with a detailed three-view line drawing and a photograph, usually in color and often appearing in a book for the very first time; many of the aircraft are also depicted in superb color profile drawings which emphasize camouflage schemes and unit markings. Bill Gunston wastes not a word in presenting literally hundreds of thousands of facts. Yet his text is nonetheless extremely readable, not least in his introduction which sets the main body of the book — the chronologically arranged directory — against a backdrop of design and industrial development and international conflict, describing how America's pioneering spirit first thrust man and machine into the air and now promises more exciting shapes and record-breaking achievements for

2017.319.152	Naval Institute Guide to the Ships and Aircraft of the U.S. Fleet - 2013	Polmar, Norman	This updated, 19th edition of The Naval Institute Guide to the Ships and Aircraft of the U.S. Fleet meets the high expectations and exacting standards of those who rely on this volume to stay informed and to make related policy, force level, technological and weapons decisions related to the U.S. Navy. Packed with comprehensive information, up-to-date photographs, line drawings, and useful appendixes, this timely volume describes the U.S. Navy, Marine Corps, and Coast Guard during a period of intensive transformation while engaged in combat operations. In describing the Navy's "ships and aircraft," extensive coverage is given to the new littoral combat ships (LCS), joint high-speed vessels (JHSV), Gerald R. Ford-class aircraft carriers, and other new ships as well as developments in shipboard ballistic missile defense. At the same time, the convoluted path in surface combatant construction is "deciphered," while the belated decision to cancel the Marine expeditionary fighting vehicle (EFV) is explained. Also addressed in detail is the new F-35 series Joint Strike Fighter (JSF) and other aviation programs. Similarly addressed are Navy personnel, Marine Corps issues, Coast Guard forces, marine mammals, unmanned underwater and aerial vehicles, and other aspects of U.S. naval forces. Continuing the longstanding tradition as the most complete resource of its kind, this updated 19th edition meets the high expectations and exacting standards of those who rely on this volume to stay informed in the field.

			integral degrees of declination 0-28 degrees catering for the Sun, moon, planets and for all stars with latitudes of 20-24 degrees north and south.
2017.319.155	Loyalty, Betrayal, and Other Contact Sports : The Story of a Fighter Pilot (Alpha)	Schaffert, Richard W.	Handwritten dedication from author to Barrett Tillman on Dedication page. Self-published paperback .Only contains Alpha. Schaffert, himself a former Navy fighter pilot, has written a novel about fighter pilot, Dick Williams. The book opens with the hero being shot down by Soviet MiGs, in one of the unacknowledged hot spots of the Cold War. Since William's call sign Brown Bear, is the same as Schaffert's, it may be hard to determine how much is truly fiction and how much is semi-autobiographical.
2017.319.156	Jet Engine Accident Investigation	General Electric Company. Flight Propulsion Division. Product Service Training	Published by the division under its earlier name: Aircraft Gas Turbine Division. This textbook presents the elements of applied aerodynamics and aeronautical engineering which relate directly to flight training and general flight operations.
2017.319.158	First Team and the Guadalcanal Campaign, The : Naval Fighter Combat from August to November 1942	Lundstrom, John B.	A fascinating chronicle of the carrier-based air battles that turned the tide of the war in the Pacific. The author draws from a decade of research to present a thoroughly detailed and scrupulously accurate account of naval air combat in the arduous Guadalcanal campaign. Picking up the story after Midway, this book describes in rich detail the actual planes and pilots pitted in battles of rarely matched ferocity.
2017.319.159	Wings and Warriors : My Life as a Naval Aviator	Engen, Donald Davenport	In this account of his first twenty-five years as a naval aviator, Engen vividly recalls the slow start, heroics, and hardships of the golden age of jet airplane development. Flying from bases and carriers throughout the world, Engen and his fellow pilots achieved new heights, speeds, and distances in death-defying tests that epitomized a period of exhilarating experimentation. (from Amazon.com:)

Object ID	Title	Author	Summary
			"Engen had a remarkable military career, and his book-part autobiography, part historical narrative of his first twenty-five years as a naval aviator, gives the reader a fascinating glimpse into the development of the Navy's aviation capabilities during the latter half of the twentieth century." (From The Washington Post)
2017.319.160	Flying Black Ponies : The Navy's Close Air Support Squadron in Vietnam	Lavell, Kit	The tragic, the comic, the terrifying, the poignant are all part of the story of the Black Pony pilots who distinguished themselves in the Mekong Delta during the Vietnam War. Flying their turboprop Broncos "down and dirty, low and slow," they killed more of the enemy and saved more allied lives with close-air support than all the other naval squadrons combined during the three years they saw action. Author Kit Lavell was part of this squadron of "black sheep" given a chance to make something of themselves flying these dangerous missions. The U.S. Navy's only land-based attack squadron, Light Attack Squadron Four (VAL-4) flew support missions for the counter insurgency forces, SEALs, and allied units in borrowed, propeller-driven OV-10s. For fixed-wing aircraft they were dangerous, unorthodox missions, a fact readers quickly come to appreciate. (from usni.org:) Kit Lavell flew 243 missions with the Black Ponies and earned the Distinguished Flying Cross. He is now a screenwriter and playwright, living in California.
2017.319.161	Alpha Strike Vietnam : The Navy's Air War 1964 to 1973	Levinson, Jeffrey L.	Levinson, a freelance writer, has captured the salty lingo, devil-may-care attitude and special flair for combat characterizing the Vietnam-era naval aviator. The kind of tactical-technical detail that appeals to air-war buffs abounds as 22 former U.S. Navy pilots recall missions in the skies over Southeast Asia from the earliest days of the

Object ID	Title	Author	Summary
			war to the final air evacuation. Several served hard time at the infamous "Hanoi Hilton" prisoner-of-war camp and all express pride over the defiance their downed colleagues displayed toward their captors. Most of these men remain "unreconstructed" in their resentment at Washington-dictated restrictions that kept them from wreaking even greater destruction against the enemy. Pride, fierceness and technical mastery dominate as the pilots describe bombing runs, flak-suppression missions and other tasks (including the shooting-down of a MIG). Levinson provides a solid background to their testimony, summarizing the strategic aims of the air war, month by month. Photos. Copyright 1989 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. (from Amazon.com)
2017.319.163	Navy Pilots' Information File	Chief of Naval Operations. Object ID	Title	Author	Summary
			August of 1977. The ship departed from Yokosuka, Japan. There is a 1976 cruise book, and a 1978-79 cruise book. One source on the internet lists 4 deployments in 1976, 3 deployments in 1977, and 2 deployments in 1978. It is difficult to determine which deployments this book covers. Port calls in this book included the Pusan, Hong Kong, Subic Bay, Freemantle (Perth), Karachi, Singapore, Diego Garcia, Bandar Abbas, Misawa, Kadena. Onboard was: Carrier Air Wing Five (CVW-5) Squadrons listed in this book but which change with other deployments in 1977 are: VF-161 (F-4N) VF-151 (F-4N) VA-115 (A-6A/B and KA-6D) VAW-115 (E-2B) VQ-1 VMAQ-2 Det. (EA-6A) HC-1 Det.B-1 and B-2 (SH-3G) The following was written by Pete Clayton and Robert L. Broaddus and appears on page 279 of the Midway cruise book for 1978-79: Beginning in May of 1977, VF-151 and VF-161 transitioned to F-4Js and VA-56 and VA-93 started flying A-7Es. VA-115 also exchanged their A-6As and Bs (A-6Bs) for A-6Es. This CVW-5 transition occurred while the ship was in port for its 60 day EISRA (Extended Incremental SRA, a unique modernization concept developed for Midway). The air wing transition was completed in September when USS Coral Sea fighter squadrons VF-191 and VF-194 exchanged their F-4Js with Midway's F-4Ns, prior to Coral Sea returning to Alameda after her 1977 deployment. In late 1977, Midway made an 87 day deployment to the Indian Ocean where she was the principal participant in Midlink 77, an exercise hosted by the Iranian Navy and including representation from Pakistan, Turkey, and the Royal Navy.

2017.323.001	USS Midway (CVA-41) - World Cruise - 1954-55	Patureau, Alan C. (ed)	Pictorial account of the world cruise of USS Midway in 1954-55, conducted as Midway was changing homeports from Norfolk, VA to the west coast of the U. S. The ship departed Norfolk 27 December 1954 and transited to the Pacific via the Cape of Good Hope. She operated in the western Pacific with the U.S. Seventh Fleet, conducting the Formosa Straits patrol and other fleet exercises and maneuvers in the South China Sea. She arrived at her new homeport of Alameda, CA on 14 July 1955. She remained there for only a week before proceeding north for a major overhaul at Bremerton, WA which commenced on 3 August 1955. Port calls during her deployment included Mayport, Capetown, Colombo, Manila, Hong Kong, Yokosuka and Pearl Harbor.
2017.327.001	Second in Command : The Uncensored Account of the Capture of the Spy Ship Pueblo	Murphy, Edward R.	From the front flap--"The seizure of the Pueblo need never have happened," bluntly states former Lieutenant Edward R. Murphy, Jr., who served as Executive Officer of the ill-fated spy ship. Now out of the Navy, he is free to give an uncensored account of the capture of the Pueblo and the imprisonment and torture of its crew by the North Koreans--a story that differs substantially from Commander Bucher's and from the official Navy version of the affair."
2017.330.001	Silent Chase : Submarines of the U.S. Navy	Kaufman, Steve	Silent Chase, Submarines of the U. S. Navy with color photographs and Foreword by Tom Clancy, Introduction by Vice Admiral R. Y. Kaufman, USN (Ret.) Attack Subs p.33; Tenders; Missile Subs pg. 96; the Polaris Launch. Photographs shot over the course of a year chronicling the officers and crew on maneuvers, torpedo retrievers, rescue vehicles, the galley, periscope, night vision and life aboard this close environment. She departed Alameda on 15 February 1958 and returned to Alameda on 2 October 1958. Ports of call and special photos included: San Francisco, Hawaii, Yokosuka, Japan; Tokyo, Japan; central Japan; Iwakuni, Japan; Hiroshima; Okinawa; Subic Bay, Philippines; Luzon; Hong Kong, and great color picture of flight deck crew on page 151. Pages 295-300 include a roster by department of all personnel. Onboard were: Air Group Fifteen (CAG-15) Carrier Division One VF-23 VF-154 VA-155 VA-153 VAH-4 VAW-11 VA(AW)-35 VFP-61
2017.333.003	Complete Book of Fighters, The : An Illustrated Encyclopedia of Every Fighter Aircraft Built and Flown	Green, William	This is without doubt the most comprehensive illustrated volume on fighter aircraft ever published. It covers nearly 1,700 different fighters that have flown, from the birth of the type during World War I to the latest stealthy, sophisticated machines now being flight-tested for service with tomorrow's air forces. Many of the aircraft have continued to full-scale production, some to win enduring fame in combat conditions; others have sunk back into obscurity, perhaps never developing beyond a first prototype. All of them -- the famous, the notorious, and the virtually unknown -- are gathered together in one compendious volume.

Object ID	Title	Author	Summary
			The text provides succinct information on the development, variants, and production history of every fighter type flown to date. Entries are arranged alphabetically by manufacturer's name for ease of reference. The authoritative text is complemented by rare historical photographs, meticulously executed general arrangement drawings, over 450 beautiful colour profile artworks of aircraft in operational markings, and large-scale cutaway drawings which reveal internal structure in minute detail of more than 80 of the most significant fighters. The entire volume constitutes one of the most remarkable reference works in aviation publishing; a true encyclopedia of fighters. (from dust jacket flap)

2017.333.004	Pictorial History of Sea Battles, The	Foster, Thomas	Victory and disaster, heroism and foolhardiness, strategic genius and wasteful slaughter -- "The Pictorial History of Sea Battles" gives you a complete picture of war at sea through full accounts of some of the most important battles of all time. The struggle for control of the sea from slave galleys to battleships (dust jacket) From the picture-packed pages you'll learn about the tactics of the great admirals, the weapons and ships that altered the course of war -- and the fighting qualities of the common sailor. Dozens of illustrations and action photos, many in full colour, maps and technical diagrams, an informative and highly-readable text make "The Pictorial History of Sea Battles" an exciting introduction to the history of warfare at sea and a must for every enthusiast's bookshelf. * America slams the Japanese at Leyte Gulf * Submarines attack the

2017.333.005	Flying Boats : The J-class Yachts of Aviation	Marshall, Ian	In the 20s and 30s, airfields were a rarity. If you flew across the oceans, it was best to do it in a plane that could land on water. This book is an attempt to bring to life something of the dash and glitter of making a journey in a boat that could fly. There are 52 plates of water colors of seaplanes across from text describing the plane.
2017.333.006	War Paint : Fighter Nose Art from WWII & Korea	Campbell, John M.	World War II fighter aircraft nose art from the collection of John Campbell.
2017.333.008	Liberator Legend, The : The Plane and the People	St. John, Philip A.	This books traces the history of the Liberator from the beginning. It was the most widely produced airplane in the war. It served in all theaters and was also used by other Allied forces. CONTENTS: The Liberator in Europe--In the Beginning, Early Birds, 15th Air Force in Italy, 8th Air Force in England; the Liberator in the Far East and the Pacific--11th Air Force in the Aleutian Islands, Alaska, 10th and 14th Air Forces in China, Burma, India, 5th and 13th Air Forces in the Southwest Pacific, 7th Air Force in the Central Pacific, Navy Liberator Squadrons in WWII; Liberator Photo Log; Unit Histories/Special Stories, Those Behind the Liberator, B-24 Memorial Museum.
2017.333.009	Liberator : The Need, the Plane, the Crew, the Missions	General Dynamics Corp.	Promotional piece published by the plane's creator. "This book commemorates the 50th anniversary of the first flight of the Consolidated B-24 Liberator, the most produced

Object ID	Title	Author	Summary
			American bomber of World War II. It is also a snapshot of an era when an aircraft could go from drawing board to test flight in less than a year, unthinkable by today's standards."
2017.333.010	Sikorsky VS-44 Flying Boat	Pember, Harry E.	Navy designation was JR25-1. Table of Contents: Introduction; PBS-1 "Flying Dreadnought"; VS-44A Design, Construction, and Operations; Avalon Air Transport; Antilles Air Boats; Excambian Restoration; End of an Era; Notes, Data Tables, Bibliography
2017.335.001	Fleet at Flood Tide, The : America at total war in the Pacific, 1944-1945	Hornfischer, James D.	From the award-winning historian who has been acclaimed as "doing for the Navy what popular historian Stephen Ambrose did for the Army," here is an unprecedented account of the extraordinary World War II air, land, and sea campaign that brought the U.S. Navy to the apex of its strength and marked the rise of the United States as a global superpower. Drawing on new primary sources and personal accounts by Americans and Japanese alike, The Fleet at Flood Tide is a thrilling narrative of the climactic end stage of the Pacific War, focusing on the U.S. invasion of the Mariana Islands in June 1944 and the momentous events that it produced. With its thunderous assault into Japan's inner defensive perimeter, America crossed the threshold of total war. From the seaborne invasion of Saipan to the stunning aerial battles of the Great Marianas Turkey Shoot, from the largest banzai attack of the war to the first mass suicides of Japanese civilians to the strategic bombing effort that culminated at Hiroshima and Nagasaki, the Marianas became the fulcrum of the drive to compel Tokyo to surrender--with consequences that forever changed modern war.

Object ID	Title	Author	Summary
			These unprecedented operations saw the first large-scale use of Navy underwater demolition teams; a revolution in the fleet's ability to sustain cross-hemispheric expeditionary warfare; the struggle of American troops facing not only a suicidal enemy garrison, but desperate Japanese civilians; and the rise of the U.S. Navy as the greatest of grand fleets. From the Marianas, B-29 Superfortresses would finally unleash nuclear fire on an enemy resolved to fight to the end. Hornfischer casts this clash of nations and cultures with cinematic scope and penetrating insight. Focusing closely on people who rose to challenging events, he shows us Raymond Spruance, the brilliant, coolly calculating commander of the Fifth Fleet; Kelly Turner, whose amphibious forces delivered Marine General "Howlin' Mad" Smith's troops to the beaches of Saipan and Tinian; Draper Kauffman, founder of the Navy unit that predated today's SEALs; Paul Tibbets, the creator of history's first atomic striking force, who flew the Enola Gay to Hiroshima; and Japanese warriors and civilians who saw the specter of defeat as the ultimate test of the spirit. From the seas of the Central Pacific to the shores of Japan itself, <i>The Fleet at Flood Tide</i> is a stirring and deeply humane account of World War II's world-changing finale. (from Amazon.com)
2017.336.001	USS Enterprise (CVN-65) - 25th Anniversary - Westpac/Medcruise - 1986	USS Enterprise. KENT	Video account of the deployment of USS Enterprise CVN-65 to Westpac and then to the Mediterranean. First portion gives a short history of the first seven ships named Enterprise. Then there are shots of this one being built at Newport News, and video of its commissioning. There is video of the workups, VIP guests, and time in dry dock at Hunter's Point before

Object ID	Title	Author	Summary
			deployment in January. She departed San Francisco 5 January 1986 and returned 13 August 1986. Between the ports of call and items of interest there are many videos of flight ops and typical work and play on the ship. Ports of call and items of interest: George Allen of the Redskins visits, actor Lee Horsley visits; Enterprise is used for filming Top Gun and Tom Cruise and Anthony Edwards give interviews; in August 1985 VP George H. W. Bush and wife Barbara are on Enterprise to commemorate the 40th anniversary of the end of WWII; Dependent's Day cruise; visit to San Diego 27-30 September 1985; Hunter's Point Dry Dock, December 1985; deployed 12 January 1986; 27 January change of command for captain; Pearl Harbor; Subic Bay; Singapore; Karachi; change of command for the Admiral; VP Bush and Barbara visit again; 25 April begins transit of Suez Canal with the five other ships in Task Force--first nuclear ship to transit the canal; Naples and Rome; ship spells out E WIVES #1 and video saying how important wives are; Toulon and Paris; Miss USA/USO show; through the Straits of Gibraltar, around Africa; Fremantle and Perth; Subic Bay; Tiger Cruise; traveled 58,000 nautical miles; recap at the end.

2017.336.002	Lightning Bugs and Other Reconnaissance Drones	Wagner, William	Gathering intelligence remains one of the airplane's most significant and fascinating functions. In World War I, the first military use of aircraft was in gathering information behind enemy lines on troop dispositions and in serving as forward artillery observation posts. More than six decades later the intelligence-gathering function of the airplane remained essentially the same but the technique had undergone dramatic sophistication. In the early 1960s technicians took the pilot out of the plane's cockpit, put him on the ground at an

Object ID	Title	Author	Summary
			electronic black box and had him 'fly' spy missions by remotely controlling a pilotless jet airplane. Because of this advanced technique, formerly dangerous intelligence-gathering flights in hostile areas were possible without risking the lives of pilots or the loss of extremely costly manned aircraft. This then is the story of 'Lightning Bugs' and other Ryan reconnaissance drones and the contributions they made in combat in Southeast Asia. What made it possible was the can-do attitude of a small band of dedicated military and civilian technicians and the use of red-tape-cutting techniques in response to significant international events. It's a fascinating story of QRC - quick reaction capability - which is invaluable in time of war. In addition to basic daytime aerial photo reconnaissance of 'enemy' territory, the 'Lightning Bug' missions were expanded to include electronic intelligence (Elint), communications intelligence (Comint), night photo, chaff dispensing and leaflet distribution. Paralleling these wartime missions were state-side demonstrations of surface-to-surface weapons delivery, simulated air-to-air combat 'dog-fights,' and air-to-surface weapons delivery for the suppression of defense installations. The original reconnaissance missions and the additional demonstrated capabilities of unmanned aircraft were all designed to minimize the exposure of American pilots to unacceptable risks. The manuscript was written as the war in Vietnam was drawing to a troubled close but is only now being published because of years-long delay due to security and policy considerations. (from dust jacket flap:)
2017.336.003	Carrier Based Air Logistics Study : Integrated Summary	Lippiatt, Thomas F.	The Carrier Based Air Logistics Study (CABAL) was conducted to examine alternative

Object ID	Title	Author	Summary
			logistics support policies for avionics equipment with respect to their potential to improve aircraft availability and performance in wartime. Toward this end, its objectives were to: (1) evaluate a specific alternative to the current logistics support structure identified for further analysis in the Defense Resource Management Study (DRMS) and (2) identify and evaluate potential improvements in the current logistics support structure that could enhance wartime aircraft availability without the complete structural change implied by the DRMS alternative. The study was to consider the entire logistics support system and the interaction of its various functions and resources, through a detailed examination of expected avionics suite availability under alternative logistics structures and policies. It dealt with six aircraft types included in most carrier deckloads--the F-14A, S-3A, E-2C, and three A-6 variants. Most of the substantive results presented here are based on analysis of avionics suite support for the first three type, model, series (TMS) of aircraft listed above.
2017.337.001	Aircraft Prototypes : Aerospace Technology, From the Light Fighter to the B2 Stealth Bomber	Chant, Christopher	AIRCRAFT PROTOTYPES will inform the specialist and enthral the amateur, for in gripping detail it relates the development of some fascinating prototype aircraft from World War II to the present day, and relates how many evolved into mass-produced machines. Author Christopher Chant also explains the historical background essential to a full understanding of the subject, for example how the destruction of Hiroshima and Nagasaki changed the concept of bombing. Successes in designing long-range strategic and nuclear bombers spurred the development of a fresh breed of fighter to guard

Object ID	Title	Author	Summary
			newly threatened air space. This demand coincided with the appearance of new propulsion and aerodynamic technology (such as swept wings), producing a crop of innovative fighters and the breaking of the sound barrier. Covering bombers, fighters and research aircraft from around the world, this books tells an amazing story of technical achievement matching military need. The development of turbojet powered machines, rocket motors, innovative wing shapes, the introduction of vertical take off and landing (VTOL) technology and much more are explained in authoritative detail, supported by more than 100 photographs and illustrations. Famous names such as the Superfortress, the B-52, Lightning and Concorde mix with some less familiar antecedents - including the Flying Bedstead and the Cutlass. This book contains a wealth of accessible detail, offering a superb account of the development of modern aircraft technology and concluding with descriptions of some planes that have not yet reached the skies. (from dust jacket flap)
2017.338.001	Brink, The	Setlowe, Rick	Setlowe served as an operations officer on the USS Midway, the flagship during the 1958 nuclear crisis over Quemoy and Matsu in the Straight of Taiwan. He uses that incident as the setting for the Brink.
2017.340.002	USS Ticonderoga (CV-14) - Skylab II - Primary Recovery Ship - 1973	McDaniel, Bobby	This is a Welcome Aboard brochure and guide for the 300 guests coming on board the USS Ticonderoga to witness the recovery of Skylab II. There is a section about living aboard the Tico which covered such topics as Stewards, Linen service, Laundry, and Meals. Guests were asked to pay \$4.50/day. Military officers were charged \$67.50. There is a two page chart on Finding Your Way. The recovery

			took place on 22 June, 1974, and Ticonderoga arrived back at her homeport of San Diego with the ship's deactivation process already underway.
2017.342.001	Bluejackets' Manual, 1950	United States Naval Institute	The Bluejacket's Manual was and still is published by the U.S. Naval Institute as a "Bible" of the Navy for the US Sailor. In modern day, this publication is issued to the new "Bluejacket" on arrival at Boot Camp. (from bluejacketsmanual.com)
2017.342.002	Division Officer's Guide - 1957	Noel, John V.	Just as Watch Officer's Guide tells the young officer what to do and how to do it while he is on watch on the bridge or on the quarterdeck, Division Officer's Guide tells him how to handle his duties the rest of the time when he is not on watch.
2017.342.003	American Carrier Air Power at the Dawn of a New Century	Lambeth, Benjamin S.	Campaign against Osama Bin Laden's terrorist infrastructure in Afghanistan, a tasking that required deep attacks from the sea in a remote part of the world where the US lacked access close enough to the war zone for landbased theater air forces. Reviews the role of American carrier-based air power in conducting around-the-clock operations during the 3 weeks of major combat in Operation Iraqi Freedom. An optimistic view of American carrier air power's future that will be marked by greater carrier surge potential, the introduction of new combat aircraft, a successor to the Nimitz-class carrier, and an ever-tighter fusion of platforms, sensors, networks, and weapons.
2017.343.001	Honor Before Glory : The Epic World War II Story of the Japanese American GIs Who Rescued the Lost Battalion	McGaugh, Scott	The story of how a segregated unit of Japanese American soldiers recued the 'lost battalion' on the German border in World War II. Contents: A strong force will follow -- Back to the front -- Fire for effect -- Combat efficiency: poor -- Keep them coming -- About to die -- Need any cigarettes? -- Paths to peace -- Honor bestowed.
2017.344.001	USS Midway (CVA-41) -	Welles, Chris (ed)	Pictorial account of the USS

Object ID	Title	Author	Summary
	Cruise - 1959-60		Midway (CVA-41) deployment to the western Pacific (WestPac) departing Alameda, CA 16 August 1959 and returning in March 1960 with CVG-2 consisting of VF-21 (F-3H Demons), VA-22 (FJ-4B Furys), VA23 (FJ-4B Furys), VF-24 (F8U/F-8 Crusaders), VA-25 (AD/A-1 Skyraiders), and VAH-8 (A3D/A-3 Skywarriors) embarked aboard. Port calls included Pearl Harbor, Guam, Subic Bay, Buckner Bay, Yokosuka, Kobe, Sasebo and Hong Kong. Good pics of heavy seas in Typhoon Charlotte.
2017.345.001	Power-on and Simulated Canted Deck Carrier Landing Tests	Naval Air Test Center. Flight Test Division	In May of 1952, the Navy conducted tests on the USS Midway and the USS Wasp to test the feasibility of an angled (or canted) deck. This report covers that testing on the Midway which consisted of using paint to outline the angled deck.
2017.347.001	Landing Force Manual - 1921	USN	"SCOPE OF MANUAL--The book has been divided into two parts. Part I covers the general principles of land warfare together with the tactical uses of forces on shore. Part II covers the details of training individuals in infantry, artillery, and other drills correlated thereto; it also addresses the roles and regulations governing the handling of tactical units constituting land forces. This manual contains photographs of hand-to hand combat, illustrations on tending to wounds, sheet music for bugle calls, as well as additional drawings. Keywords: Drills; Regulations; United States Navy; Handbooks, manuals, etc.; First aid; Land warfare; Training; Infantry; Artillery; Tactical units
2017.349.001	Thousand-mile War, The : World War II in Alaska and the Aleutians	Garfield, Brian	It is about a thousand miles from Dutch Harbor, near the Alaska Peninsula, to Attu at the far western tip of the Aleutian Island Chain. They are the most brutal thousand miles in the pacific ocean. Here, for

Object ID	Title	Author	Summary
			fifteen months in 1942-43, was fought one of the toughest campaigns of World War II. In the context of global war it was relatively small. About 500,000 men took part--Americans, Canadians, Russians, Japanese. Its battles were fought on land, at sea, and in the air. It cost scores of ships, hundreds of airplanes, and perhaps ten thousand lives. It was the only campaign of World War II fought on the United States' own North American soil. And it gave the United States her first theatre-wide victory
2017.349.003	Pearl Harbor : The Story of the Secret War	Morgenstern, George	This is the documented story of how the United States got into World War II. Here is the record of secret diplomacy and military intrigue which resulted in the catastrophe of December 7, 1941.
2017.349.004	Fatal Voyage : The Sinking of the USS Indianapolis	Kurzman, Dan	The true story of the Navy's greatest sea disaster that resulted in almost 900 deaths. A WWII scandal that still haunts the Pentagon. The author reveals in telling detail the bureaucratic snafus that prevented the Navy from even being aware that the Indianapolis was missing. By the time the crew was found, only 316 of the original 1200 men were still alive.
2017.349.005	Battle Report, Vol. 2 : The Atlantic War	Karig, Walter	Volume II of Battle Report series covering U.S. naval operations in the Arctic, Atlantic and Mediterranean. The war in the Atlantic was mainly an antisubmarine war and its principal effort had to be the safe transportation of troops and supplies to the far side of the ocean. Instead of a minute chronicle of every action, with the earned citation of those who participated, this volume presents characteristic examples of that naval war on the sea, under it, in the air, and on the beaches and river of the Old World. The theme ranges from prewar unpreparedness to the achievement of present-day power.
2017.349.006	Battle Report, Vol. 5 : Victory in the Pacific	Karig, Walter	This volume of the series tells the story of the drive through

Object ID	Title	Author	Summary
			the Pacific to victory in Japan. It covers the Southwest Pacific Area, under the supreme command of General Douglas MacArthur, and the Pacific Ocean Area, with Admiral Chester W. Nimitz as top boss. It tells the story of Allied air and ground forces in Burma and China as they surrounded and isolated the Japanese. It continues to the destruction of the Japanese Fleet and on to complete victory in the Pacific.
2017.349.007	Battle Report, Vol. 1 : Pearl Harbor to Coral Sea	Karig, Walter	The authors were directed by Secretary of the Navy to "tell the story of the Navy's part in the war." The authors selected for the first volume a period that is nearly all defeat, but defeat in a manner of which every United States citizen can well be proud: The Story of officers and men who fought with all the weapons they had, who continued to fight against all overwhelming odds as often as the enemy challenged, and as often took the initiative themselves. This volume covers from Pearl Harbor to the Marshalls and Gilberts raids, Army Air Corps raids on Tokyo; Philippines Islands; Bataan and Corregidor.
2017.349.009	Battle Report, Vol. 4 : The End of an Empire	Karig, Walter	This volume is the story of our Navy and its men well on their way to victory. It tells the story of the final mopping up in the Southwest Pacific which culminated in the great Battle for Leyte Gulf, where the Japanese made their supreme gamble in order to stop our landings in the Pacific, lost their gamble--and also lost their fleet.
2017.349.010	U.S. Submarine Losses World War II	U.S. Pacific Fleet. Commander Submarine Force	The submarines paid heavily for their successes in World War II. A total of 52 submarines were lost, with 374 officers and 3,131 enlisted men. The 52 submarines represent approximately 18% of all submarines which saw combat duty. Lists information about the 52 American subs. The 1953 edition which we have includes Appendices that

2017.350.001	History of the Long Beach Naval Shipyard, Roosevelt Base & Reeves Field, A	Landgraff, Richard A.	A history of the Long Beach Naval Shipyard by someone who worked there. Includes the following appendices: A) List of all dockings from 1942-1996 B) Special or noteworthy dockings at LBNSY C) Crests, Logos and Memorabilia D) Shipyard maps' E) List of all apprentice graduates from 1947 to 1991 F) List of Commanding Officers G) List of Officers and CPOs of Reeves Field H) One day's deck log
2017.351.001	Naval Aircraft	Casey, Louis S.	The book traces the development of carrier aircraft from the beginning to the climax of the World War II.
2017.351.002	US Flush Deck Destroyers in Action	Adcock, Al	The US Navy's flush deck destroyers--built during and just after World War One--were outdated and ready for the scrapper's torch by the beginning of World War Two. Nonetheless, they were pressed into service and all performed up to expectations. This book covers the Sampson Class, the Caldwell Class, the Wickes class, the Clemson class, the lend lease to Britain, the conversions to light minelayers (DM), the conversions to high-speed minesweeper (DMS), the conversions to seaplane tenders (AVP/AVD), and the conversions to fast attack transport (APD).
2017.351.003	Japanese Destroyer Captain : Pearl Harbor, Guadalcanal, Midway -- The Great Naval Battles as Seen Through Japanese Eyes	Hara, Tameichi	One of Japan's most famous naval heroes, Captain Tameichi Hara —"the unsinkable captain"—led his destroyers into the thick of the fight in practically every naval battle in the Pacific during World War II. JAPANESE DESTROYER CAPTAIN is his account of some of the most famous actions in the history of naval warfare — Pearl Harbor, Coral Sea, Midway, Guadalcanal, Leyte Gulf, Okinawa — a

Object ID	Title	Author	Summary
			fascinating view of battles with the U.S. Navy, as seen by Japanese eyes. A best-seller in Japan, this book has been edited for the American reader by Associated Press reporter Fred Saito (coauthor of SAMURAI!) and Roger Pineau, former assistant to Rear Admiral Samuel Eliot Morison in the preparation of the 14-volume "History of the United States Naval Operations." (from back cover of 1965 edition)
2017.351.004	Aircraft Carrier	Winston, Robert Alexander	The purpose of this book is to sketch the development of the aircraft carrier up to the entry of the United States into the War for Survival, to show how our aircraft carriers were employed in the early phases of that conflict and, in particular, to show the kind of men who manned these ships and made them into such formidable naval weapons that they changed the course of history in less than half a year.
2017.351.005	V-J Day : America's World War II Triumph in the Pacific	Knauer, Kelly (ed.)	The war in review: Pacific theater -- Situation report: July 1944 -- "I have returned" -- Profile: promise fulfilled -- A soldier's life: the perils of paradise -- Wings across the water -- A sailor's life: flyboys and flattops -- Death's divine wind -- A sailor's life: shipmates -- Beneath the waves, a silent service -- Profile: a question of balance -- Off the beaten path -- Profile: a crisis in China -- A soldier's life: Off duty -- Mission to Manila -- A photographer's eye: Carl Mydans -- A soldier's life: prisoners of Japan -- The ghosts of Bataan -- A soldier's life: a higher power -- Duel on Sulphur Island -- A photographer's eye: Joe Rosenthal -- America at war: facing the rising sun -- Embracing death -- Uncommon soldier -- A soldier's life: the healing touch -- Secrets in the desert -- "Expect a rain of ruin" - - Reluctant surrender -- Victory's sweet song.

US Navy PBJ versions also described as well as the Doolittle Raid aircraft.
2017.351.023	USS Midway	Clayton, I. B. (Pete)	History of the USS Midway from design and construction to decommissioning. This book has been published later as two books: USS Midway Airwings, Aircraft Pictorial, no. 1; and USS Midway CV 41, Warship Pictorial, no. 41; both of which we have. Gives technical information, pictures of all the captains, and lists of major changes. Includes color copies of the squadron patches.
2017.351.024	F4F Wildcat in Action	Dann, Richard S.	Richard Dann's latest contribution to the history of Grumman aircraft takes the form of an "in action" on the F4F. Rich covered the Wildcat previously in a Walk-Around, but this new book is by no means a rehash of his older work. The Wildcat's ancestry stems

Object ID	Title	Author	Summary
			from the Grumman G-16/XF4F-1, a never-built biplane that was to have replaced the F3F carrier fighter. The introduction provides a photo of the FF-1 fighter, another of an F3F-3, and a side drawing of the G-16/XF4F-1. In response to Brwester's F2A Buffalo, Grumman used the G-16 as the basis for a monoplane fighter, the G-18/XF4F-2. Rich provides us with three images of the prototype, two side views, and overhead drawings of the wings. The XF4F-2 lost out to the Buffalo, but Grumman continued to refine the Wildcat, and produced the XF4F-3 from the remains of the crashed -2 prototype. There are two images of this aircraft and three sideview drawings shaowing the aircraft's various onfigurations. The F4F-3 was the first production Wildcat, and Rich includes a dozen -3 images. There were some differences between the -3 subtypes, and these are illustrated by a series of drawings, helpfully labeled with the appropriate BuNos. There is also a large 3-view. Three of the photos are detail shots, showing the wheel bay, gun bay, and the Fairchild F-56 camera. The XF4F-6 had single-stage supercharged engine, and this model is represented by a photo and frontal drawings showing the deletion of the intercoolers. The -6 led to the F4F-3A, three images of which are included. One of these is a detail shot showing the supercharger installation. The first of the photo-recon Wildcats was the F4F-3P, and this is represented by one image. There are two photos of the later long-range F4F-7, as well as a side-view drawings and an overhead drawing of the wings.

Object ID	Title	Author	Summary
			An interesting subject for a kitbash would be the F4F-3S "Wildcatfish" floatplane fighter, a single prototype of which was built. There are three -3S photos, one showing the aircraft with the vertical fin under the rear fuselage, which was found to be necessary to maintain directional stability. There is a single photo of the XF4F-5 prototype, and three side-view drawings. The next major production version was the F4F-4, and there are 23 photos of this mark. Notable are four cockpit shots, an aircraft with duplex flaps, another making a JATO takeoff, a Wildcat with extended wingtips, and another with breakaway wingtips as on the F8F. Wildcat production at Grumman was finished out by the XF4F-8 lightweight version - Rich includes two overall shots of this model, a closeup of the powerplant installation, and an overhead drawing of the wing. Production of the Wildcat shifted to the Eastern Aircraft Division of GM, as Grumman prepared to embark on the F6F program. The FM-1 was the Eastern equivalent to the F4F-4 - there are five photos of this model and one drawing of the wing. The most produced Wildcat was the FM-2, which stemmed from the XF4F-8. There are thirteen images, a side-view drawing, a large 3-view drawing, an overhead drawing of the wing, and a drawing of a 5" HVAR rocket. There are two images of the first G-36A, an export version intended for France before that country fell to the Germans. There is a side-view drawing and a drawing of the wing as well. The Royal Navy's Fleet

Object ID	Title	Author	Summary
			Air Arm would be the major export user of the F4F, and there are five photos of the Martlet Mk. I, a side view drawing, and a wing drawing. The Martlet II is covered by two side drawings, a wing drawing, and five photos. The history of the Martlet III variant is certainly convoluted, and Rich notes that he may not be 100% right on all the particulars. This does not degrade from the coverage of this model, as there are five photos, a side drawing, and two drawings showing the different windshields seen on this model. The Mk.V was an F4F-3B equivalent, and is represented by a side drawing and two photos. The Martlet/Wildcat V was an FM-1 for the FAA; there are two photographs, an overhead drawing of the wing, and a drawing of the 58-gallon drop tank. And finally, the Wildcat Mk. VI was a UK version of the FM-2; there are two photos and a side-view drawing. In the center of the book are ten color side views, including: *BuNo 1844 1st production Wildcat, with cowl-mounted guns *F4F-3 VF-72 prewar colors *Martlet II No.805 squadron *F4F-4 of John Thach *Martlet Mk.V from HMS Searcher *F4F-3P of VMO-251 *Martlet Mk.IV from HMS Biter (Ju290 killer) *FM-2 from VC-36 *FM-2 from VC-79 *FM-2 in silver lacquer advanced training scheme Recommended. A very detailed rundown on all Wildcat subtypes, with some excellent detail references. Add in the coverage of the oddball models, and you've got a must-have. (from cs.finescale.com)

2017.351.032	PT Boats in Action	Doyle, David	The American Patrol Torpedo, or PT, boat was conceived as a high-speed, nighttime raider in the 1930s. Manufacturers included Elco (Electric Launch Corporation), British Power Boat Company, Higgins Industries, and Huckins Yacht Company. The PT boats were organized and commissioned as squadrons rather than

Object ID	Title	Author	Summary
			individual boats. The official designation, Motor Torpedo Boat Squadron, was informally abbreviated "RON."Between 1940 and VJ-day, a total of 45 RONS were commissioned, although RONS 41 and 42 were never deployed. RONS 43, 44, and 45 were decommissioned and transferred to the USSR under lend-lease. A squadron typically consisted of 12 to 16 boats, usually all of the same type, although some RONS were larger, and some contained a mixed bag of boats.
2017.351.033	Complete Guide to Fighters & Bombers of the World, The	Crosby, Francis	A -Z directories of over 300 fighters and bombers, with 1200 wartime and modern identification photographs. This soft cover book features 1200 wartime and modern identification photographs. It is an illustrated history of the world's greatest military aircraft, from the pioneering days of air fighting in world War I through to the jet fighters & stealth bombers of the present day. This book is a combination of two books and devotes 1/2 or a full page to each aircraft. A lot of aircraft are covered, from the famous Spitfire to the less famous Douglas B-18. This book is quite large and has a lot of information. I really like this book because it gives me enough information about each aircraft without drowning me. This book doesn't cover all the world's military aircraft, but it covers enough aircraft to satisfy me. However, I have read reviews that complained about the large amount of British aircraft being featured. I do agree that more attention is paid to the British airplanes and I wish that more attention had been given to the Japanese, French, and Soviet air forces. Nevertheless, I've had this book for about a year and I don't plan in giving it up anytime soon. Highly recommend anyone interested in aviation to purchase this.
2017.351.034	Aircraft of World War II	Gunston, Bill	Aircraft of World War 2 with Introduction, 40 different

Object ID	Title	Author	Summary
			aircraft types all of which played a significant part in the war. Fighters such as the Spitfire, Hurricane, Mustang, Messerschmitt Bf109, Zero, Fw190, and classic bombers, the Lancaster, Flying Fortress, Liberator, Heinkel He111, and transports such as the Ju52 and C-47 to name a few. There are 208 pages of 600 full-color scale drawings with camouflaged markings on aircraft with five-view drawings of each type.
2017.351.035	Bomber Missions : Aviation Art of World War II	Murray, G. E. Patrick	From the Battle of Britain to the War in the Pacific, the bombers of World War II had a fearsome reputation, unleashing some of the most devastating aerial attacks of the war. The bravery of steel-nerved bomber pilots and crews from both sides has inspired such noted aviation artists as Jim Dietz, Roy Grinnell, and Stan Stokes, who have recreated bomber missions and action in vivid detail. With more than seventy-five full-color paintings, Bomber Missions: Aviation Art of World War II> brings to life the drama of the air war, and the compelling stories of the men who fought it.
2017.351.036	Nautilus 90 North	Anderson, William R.	In response to the nuclear ICBM threat posed by Sputnik, President Eisenhower ordered the US Navy to attempt a submarine transit of the North Pole to gain credibility for the soon-to-come SLBM weapons system. On 25 April 1958, [USS Nautilus (SSN-571)] was underway again for the West Coast, now commanded by Commander William R. Anderson, USN. Stopping at San Diego, San Francisco, and Seattle, she began her history-making polar transit, operation "Sunshine", as she departed the latter port 9 June. On 19 June she entered the Chukchi Sea, but was turned back by deep draft ice in those shallow waters. On 28 June she arrived at Pearl Harbor to await better ice conditions. By 23 July her wait was over, and she set a course northward. She

Object ID	Title	Author	Summary
			submerged in the Barrow Sea Valley on 1 August and on 3 August, at 2315 (EDST) she became the first watercraft to reach the geographic North Pole. The ability to navigate at extreme latitudes and without surfacing was enabled by the technology of the North American Aviation N6A-1 Inertial Navigation System, a naval modification of the N6A used in the Navaho cruise missile. (The N6A-1 had been installed on the Nautilus and the Skate, after initial sea trials on the USS Compass Island in 1957.) From the North Pole, she continued on and after 96 hours and 1,590 nmi (2,940 km) under the ice, she surfaced northeast of Greenland, having completed the first successful submerged voyage around the North Pole. The technical details of this mission were planned by scientists from the Naval Electronics Laboratory including Dr. Waldo Lyon who accompanied Nautilus as chief scientist and ice pilot. (from Wikipedia)
2017.351.038	Boeing B-17B-H Flying Fortress In USAAF,USAF, USN,USMC, USCG, RAF, French, Danish, Portuguese, IDF/AF, Dominican and Brazilian AF Service	McDowell, Ernest R. 			were done by the crew themselves. " Hundreds of examples are shown in a combination of archival photos from the wars and current photos of artwork in museum collections. Fully captioned with aircraft type and unit assignment."
2017.351.049	US Heavy Cruisers in Action, Part 1	Adcock, Al	USN Heavy Cruisers at War! By Mike O'Connor on May 6, 2009 With many American battleships sunk or damaged at Pearl Harbor, the U.S. Navy's heavy cruisers found themselves taking on much of the duties formerly handled by the BBs. Al Adcock's US HEAVY CRUISERS IN ACTION, published by Squadron/Signal in 2001, examines the various heavy cruisers that took up the slack in the early part of World War II. Adcock's book covers four pre-war heavy cruiser classes: Pensacola, Northampton, Portland and New Orleans. Included in those categories are some of the most highly-decorated warships in the history of the USN: Salt Lake City, Chicago, Houston, Indianapolis, Astoria, Minneapolis, Quincy and San Francisco. 'Warships Number 14' follows the established S/S format of concise but engaging text, dozens of photographs and great Don Greer artwork. Many of the ships covered in this book were involved in some of the toughest sea battles of the war, a number of them being lost in action. Adcock does a good job of summarizing the combat careers of these great warships and their brave crews. NB. This is the first part of a two-volume set. ----- US Heavy Cruisers Part 1 By matt8386 VINE VOICE

Object ID	Title	Author	Summary
			on November 23, 2009 There were 11 different classes of Heavy Cruisers created by the US before/during WW2. Part 1 covers the first four. An excellent blend of the history of US heavy cruisers, development of each class and what makes one different from the other. The B&W photos help show the gun positions, the lines of each class and there are two pages of color plates showing the camouflage schemes used during the war. Of particular interest are photos showing battle damage incurred and how these ships could take unbelievable punishment. Plenty of data and statistics, line drawings that show the planes, different weapons used (gun mounts from 20mm all the way up to 8" cannon), radar masts. A really great book for modelers and those who want to get an introduction of US cruisers that were built and used to great effect in WW2. It's a very affordable way to increase your knowledge of naval weaponry and history, I highly recommend it. (Amazon.com reviews)

2017.351.051	US Destroyers in Action, Part 2	Adcock, Al	Provides an in-depth look at the history of the five classes of US destroyers. Includes full color artwork, B&W line art, technical data, and over 100 B&W photos. Adcock; 50 pgs. (from Amazon.com)
2017.351.052	Handbook of Fighter Aircraft, A	Crosby, Francis	An Illustrated history of fighter aircraft, their origins and evolution. Fokkers, Spitfires, Messerschmitts and many others from WW I & II. Today's Powerful supersonic jets, including F-15 Eagles, MiGs and the Eurofighter. Features Photographs from the Imperial War Museum.
2017.351.053	Wonder Book of the Air, The	Allen, C. B.	This Wonder Book of the Air brings to every boy the thrilling romance of man's conquest of the air and with first-hand description of actual flights, carries him over the sky lines of the world as entrancingly as if he were seated in a modern air liner speeding swiftly toward the far horizon. The authors have captured the spirit of flight so completely that it is a simple matter for the reader to imagine that he is experiencing the vibrant rush of an airline through the skies while the earth moves steadily below like some gayly colored curtain unrolled by a giant hand. We are transported across far-flung continents, over surging oceans, and even into unexplored territories as the wonders of flight are revealed in the pages of this book.
2017.351.054	Famous Bombers of the Second World War	Green, William	What was the most famous bomber in World War II? Many British readers will insist that

Object ID	Title	Author	Summary
			the Lancaster, which spearheaded R. A. F. Bomber Command's night offensive against Germany from mid-forty two, can justifiably lay claim to this title; Others are staunch adherents of the Wellington. American readers may insist that the versatile Liberator, or the Fortress is entitled to this title, while German readers will possibly select the ubiquitous Junkers Ju 87. Great photos and drawings
2017.351.055	Yangtze River Gunboats 1900-49	Konstam, Angus	From the end of the 19th century through the first half of the 20th, most Western powers maintained a naval presence in China. These gunboats protected traders and missionaries, safeguarded national interests, and patrolled Chinese rivers in search of pirates. It was a wild, lawless time in China as ruthless warlords fought numerous small wars to increase their power and influence. This book covers the gunboats of all the major nations that stationed naval forces in China, including America, Britain, France, Germany, Italy, Portugal, and Japan, and looks at such famous incidents as the Japanese bombing of the USS Patay and the dramatic escape of the HMS Amethyst from Communist forces in 1947, which marked the end of the gunboat era.
2017.351.056	Iwo Jima Recon : The U.S. Navy at War, February 17, 1945	Camp, Richard	Iwo Jima, February 17, 1945: The mission: to scout the beaches for underwater obstacles and mines and determine whether the soil would support vehicles. Four Navy Underwater Demolition Teams (predecessor to the SEALs) and twenty-two Marine observers-backed by battleships Tennessee and Nevada, a cruiser, several destroyers, and twelve Landing Craft Infantry ships configured as gunboats proceeded with the operation. The story of what followed - the battle for Iwo Jima that no one knows - is fully told for the first time in this book, a heart

Object ID	Title	Author	Summary
			-stopping account of ill-equipped but heroic forces under fire from an unexpected, overwhelming enemy. Drawing on first-person accounts, deck logs, and after-action reports, Dick Camp brings the action to harrowing life: the thin-skinned reconfigured LCIs fighting it out with the Japanese in a valiant effort to protect the swimmers caught five hundred yards off the beach; the battleship Nevada ignoring orders to withdraw and moving in to knock out the enemy's heavy caliber guns; the devastating action - casualties of 40 percent - that very likely saved the actual landing on the 19th.
2017.351.057	Guide to the National Museum of the Pacific War, A	Hunt, Jeffrey Wm	Fredericksburg, Texas is home of the only museum in the United States dedicated solely to telling the history of World War II in the Pacific because Fleet Admiral Chester W. Nimitz was born on February 24, 1885 just a short distance from the museum complex. This is a guide to the museum.
2017.351.058	Evergreen Aviation & Space Museum : The Captain Michael King Smith Educational Institute Guidebook	Evergreen Aviation & Space Museum	This is a guide to the Evergreen Aviation & Space Museum in McMinnville, OR. Each page has a color picture with a description of the plane.
2017.351.059	From Submarines to Satellites : Science in Our Armed Forces	Hyde, Margaret O. (Margaret Oldroyd)	Gives an overview of science careers in the US military services.
2017.351.060	World's Strangest Aircraft, The : A Collection of Weird and Wonderful Flying Machines	Taylor, Michael John Haddrick	This book is dedicated to those flying machines of all periods of aviation history that were somewhat less than conventional in configuration or purpose.
2017.352.001	Mister Roberts	Ford, John	Mister Roberts : A comedy-drama about life aboard a Navy cargo ship in Pacific waters during World War II. The monotonous non-combat duty of a fun-loving crew is enlivened by a feud between the petty, intolerant captain and an impetuous, highly-respected cargo officer whose continuous efforts to get a transfer to combat duty are blocked by

Object ID	Title	Author	Summary
			the captain. (from catalog.loc.gov)
2017.352.002	Tora! Tora! Tora! : The Attack on Pearl Harbor	Fleischer, Richard (director)	Based on the books: Tora! Tora! Tora! by Gordon W. Prange, and The broken seal by Ladislav Farago. "Sir, there's a large formation of planes coming in from the north, 140 miles, 3 degrees east." "Yeah? Don't worry about it." This is just one of the many mishaps chronicled in Tora! Tora! Tora! The epic film shows the bombing of Pearl Harbor from both sides in the historic first American-Japanese coproduction: American director Richard Fleischer oversaw the complicated production (the Japanese sequences were directed by Toshio Masuda and Kinji Fukasaku, after Akira Kurosawa withdrew from the film), wrestling a sprawling story with dozens of characters into a manageable, fairly easy-to-follow film. The first half maps out the collapse of diplomacy between the nations and the military blunders that left naval and air forces sitting ducks for the impending attack, while the second half is an amazing re-creation of the devastating battle. While Tora! Tora! Tora! lacks the strong central characters that anchor the best war movies, the real star of the film is the climactic 30-minute battle, a massive feat of cinematic engineering that expertly conveys the surprise, the chaos, and the immense destruction of the only attack by a foreign power on American soil since the Revolutionary War. The special effects won a well-deserved Oscar, but the film was shut out of every other category by, ironically, the other epic war picture of the year, Patton. -- Sean Axmaker "Tora! Tora! Tora!" is the Japanese signal to attack - and the movie meticulously recreates the attack on Pearl Harbor and the events leading up to it. Opening scenes

Object ID	Title	Author	Summary
			contrast the American and Japanese positions. Japanese imperialists decide to stage the attack. Top U.S. brass ignore it's possibility. Intercepted Japanese messages warn of it - but never reach F.D.R.'s desk. Radar warnings are disregarded. Even the entrapment of a Japanese submarine in Pearl Harbor before the attack goes unreported. Ultimately the Day of Infamy arrives - in the most spectacular, gut-wrenching cavalcade of action-packed footage ever. You'll see moments of unsurpassed spectacle and heroism: U.S. fighters trying to take off and being hit as they taxi; men blasted from the decks of torpedoed ships while trying to rescue buddies; savage aerial dogfights pitting lone American fliers against squadrons of Imperial war planes. It's the most dazzling recreation of America's darkest day - and some of her finest hours. (from Amazon.com) Includes special 20 minute documentary "Day of Infamy" with commentary by director Richard Fleischer and Japanese film historian, Stewart Galbraith.
2017.352.003	In Harm's Way	Preminger, Otto	Based on the novel Harm's way by James Bassett, and originally released as a motion picture in 1965. This is Otto Preminger's epic treatment of the bombing of Pearl harbor which details the devastating sneak attack on the Naval base as well as the explosive behind the scenes stories. An awesome cast of stars are interwoven into this account of the attack itself, the disobeyed orders, the American counter-offensive, father-son reunions, battles at sea and layers of romantic entanglements.
2017.352.004	Hunt for Red October, The	Clancy, Tom	Based on Tom Clancy's best-seller, directed by John McTiernan and starring Sean Connery and Alec Baldwin, The Hunt for Red October seethes with high-tech excitement and sweats with the tension of

Object ID	Title	Author	Summary
			men who hold Doomsday in their hands. A new, technologically superior Soviet nuclear sub, the Red October, is heading for the U.S. coast under the command of Captain Marko Ramius. The American government thinks Ramius is planning to attack. A lone CIA analysis has a different idea: he thinks Ramius is planning to defect, but he has only a few hours to find him and prove it--because the entire Russian naval and air commands are trying to find him, too.
2017.352.005	Letters from Iwo Jima	Eastwood, Clint	This movie is the untold story of Japanese soldiers defending their homeland against invading American forces during World War II. With little defense beyond sheer will and the terrain of Iwo Jima itself, the tactics of General Tadamichi Kuribayashi and his men transform what might have been swift defeat into nearly 40 days of heroic combat. Some scenes of warships bombarding the island. Their sacrifices, struggles, courage and compassion live on in the film that Rolling Stone magazine calls "unique and unforgettable" and which won 4 Academy Award nominations. This is the Japanese account--the American account--also filmed by Clint Eastwood was titled Flags of our Fathers. Mostly in Japanese with English, French and Spanish subtitles.

2017.354.001	Warships	Atlas Editions	This loose-leaf book in a 3 ring binder contains cards for many warships from different countries. On the front of each card is a picture of the ship and on the reverse are some details. For the Midway, it lists the length when it was built--not after its major modifications. Also, the ships are compared with others in different classes.
2017.354.002	USS Saint Paul (CA-73) in Action in Vietnam, 1966-1967	USS Saint Paul Association	The first part of this video is a slide show given at the USS Saint Paul reunion in 1991. Most of the presentation is about the Saint Paul's Weapons Department during the 1966 and 1967 cruises. There are some great photos of the Saint Paul firing her guns. At the end, there is a video of a model of the Saint Paul being sailed in a pool, then there are conversations with Albert J. L'Heureux about the model.
2017.354.003	K-350 Submersible	Kittredge, George	The Kittredge K-350 is a 1ATM dry submersible designed to reach a maximum depth of 350 feet. This is a complete set of plans for one of the most popular personal submersibles fabricated by home builders. Designed by George Kittredge who is considered by many

Object ID	Title	Author	Summary
			to be the father of personal submersibles, this vessel can carry up to two people in the comfort of one atmosphere (1ATM) to a depth range well beyond that available to sport divers. The K-350 uses three electric motors for propulsion with power supplied from 12 volt batteries stored in the lower pods. SCUBA tanks provide the air for main ballast control and a small variable ballast tank between the battery pods allows fine tuning of buoyancy. The main ballast tanks, lights, and viewports can be customized to fit your particular application. Completed in 1988 this submarine has made over 100 successful dives utilized primarily for recreation purposes. Equipped with 3 12-volt DC propulsion motors and 8 105 amp/hr deep cycle marine batteries replaced in 2011. Includes a custom tandem trailer which launches and transports the submarine like a boat. Low operating costs using oxygen, compressed air, Sobasorb CO2 scrubber and rechargeable battery powered. Easy to operate with basic understanding of control system. Maximum operating depth 350 feet, cruising speed 1 knot with a maximum of 2.5 knots, length 14 feet, hull 3 feet diameter with 1/4" ASTM 516 grade 70 steel, typical run time 8 hours, weight 3,000lbs, digital compass, CO2 scrubber, life support electronic battery status capacity, bottom scan sonar, analog depth gauge, emergency drop weights 500lbs, 9 acrylic viewports

2017.356.003	Lessons from the Hanoi Hilton : Six Characteristics of High Performance Teams	Fretwell, Peter	Why were the American POWs imprisoned at the "Hanoi Hilton" so resilient in captivity and so successful in their subsequent careers? This book presents six principles practiced within the POW organizational culture that can be used to develop high-performance teams everywhere. The authors offer examples from both the POWs' time in captivity and their later professional lives that identify, in real-life situations, the characteristics necessary for sustainable, high-performance teamwork. Taylor Baldwin Kiland and Peter Fretwell show readers how to apply these principles to their own organizations and create a culture with staying power. Originally intending their book to focus on fighter pilot James Stockdale's leadership style, the authors found that his approach toward completing a mission was to assure that it could be accomplished without him. Stockdale, they explain, had created a mission-centric organization, not a leader-centric organization. He understood that a truly sustainable culture must not be dependent on a single individual. (https://www.usni.org/store/books/fall-2017-catalog/lessons-hanoi-hilton) Contents Preface: The man in the corner cell -- Chronology of a high-performance culture -- Introduction -- The Rosetta Stone: performance enhancement -- Lucky or learned: looking for resilience -- The mission leads: the seed of virtual leadership -- You are your brother's keeper: the catalyst for virtual leadership -- Think big and basically: the daily map for virtual leadership - - No excuses: the foundation of a viral culture -- Don't piss off the turnkey: focusing on what you can control -- Get on the wall: the catharsis of

2017.358.005	Longest Battle : The War at Sea, 1939-45, The	Hough, Richard Alexander	According to prolific naval historian Hough, "World War II at sea was a non-stop sailor's battle." Constant battle, with few intermissions, is the theme of this one-volume naval history. While the author emphasizes the U.S. Navy, operations of the British, German, and Japanese navies are included. The sheer magnitude of the conflict makes it impossible to delve deeply into any action or campaign. Many important events are excluded, and the treatment of major campaigns varies from a few paragraphs to a page or two. There is no new information or viewpoint. Libraries in need of a one-volume history should still consider Samuel Elliot Morison's <i>The Two Ocean War</i> (1963). From Library Journal Stanley Itkin, Hillside P.L., New Hyde Park, N.Y. Copyright 1987 Reed Business Information, Inc. Book Description For those who served on shipboard during World War II, danger lurked 24 hours a day. Through a brilliant mixture of narrative history and personal accounts—collected over almost 30 years of interviewing combatants from both sides—a very powerful, human story emerges of the danger,

			elation, and miseries of six years of "the longest battle" in the war.
2017.358.006	Military Heritage of America	Dupuy, Richard Ernest	From the Preface: "The essence of military leadership rests upon a thorough knowledge and understanding of the strategic and tactical lessons gained upon the battlefields of the past-- lessons which in oftentimes have been learned at immense loss in blood and treasure. To serve this purpose the authors, two distinguished soldiers of the United States Army, father and son, have undertaken to prepare a comprehensive treatise, and by doing so are rendering a distinct service to our military leadership of the future." Although weapons and tactics may change over the years, the will to win has not. The soldier must understand the national objectives for which he is being asked to sacrifice and to expect the full support of the country once he begins to fight. "All this is in the American tradition."

Object ID	Title	Author	Summary
			the globe to trace the colorful history of fighter planes and their pilots. (from books.google.com) Excellent though slim survey of the history of dogfighting, May 4, 2001 By Rottenberg's rotten book review (nyc) The story of air warfare and fighter aircraft is almost as old as aviation itself. When war came shortly after the Wright brothers' first flight, it didn't take long for militaries to recognize the uses (though not immediately offensive) of the airplane. This book goes back to those early, clumsy beginnings, tracing the history of dogfighting from the Red Baron until Desert Storm, with stops in Britain (as in "Battle of"), Korea and Vietnam. This is more of a coffee table book, and few aviation buffs will find anything that new. An historical survey of fighter aircraft is a bit ambitious for a single book, even as slim as this one. But the pictures are excellent, and the reading, if light, is engaging. The author also remains close to the humans who drive these killer machines - from brooding Frank Luke and the cold-blooded Richtoven to the WWII aces turned jet-age wing commanders like Robin Olds. The author wisely breaks down the periods rather than consolidate them, and also has separate chapters for each nation. It's in WWI chapters that the author shines - his tales of the early aces give those pioneer warriors the attention that usually goes to pilots of Mustangs, Sabrejets and Fulcrums. The technology was barely existent to get planes in the air, let alone coordinate them (no radar or wireless radio was available; even in the next war, Russian pilots preferred their slow and unmaneauverable lend-lease P-39 fighters over faster and more agile Yaks, because the American planes came with radio), and even tactics weren't rigidly enforced (German ace

Object ID	Title	Author	Summary
			Boelke warned his squadronmates against letting more than one plane attack an enemy, since in the fray, the two wingmen might collide - a fear that turned true when Boelke collided with a fellow Albatross while he and the wingmen concentrated on a single enemy plane). Even when air superiority was achieved, the weak technology of the age gave this little meaning - the British had air superiority over the Somme, yet still lost in one day more men than America lost in a decade in Vietnam. Unfortunately, the story thins out after WWI, and the author feels comfortable enough to rely on the same material aviation fans have seen in countless forgettable discovery-channel documentaries. Although the pictures are great, the author runs out of stories to in them to. Nevertheless, the pictures are still enough reason for your resident flyin fool to appreciate. (from Amazon.com)

2017.359.024	Battle Ground, Disc 4 : The Battle of Britain, Disc 2	Timeless Media Group	In June of 1940, Nazi Germany, having swept victoriously across Western Europe, was poised for an invasion of England. To prepare for the invasion, they planned a bombing campaign to bring England to its knees. Prime Minister Winston Churchill addressed Parliament and declared "I expect that the Battle of Britain is about to begin," and begin it did, with the Luftwaffe launching the most deadly and sustained aerial bombardment in the history of warfare. The British people and their Royal Air Force responded with valor and glory, bending, but not breaking. Churchill called it "their finest hour." Disc 2 Target for Tonight The Air Plan RAF in Action
2017.359.025	Battle Ground, Disc 5 : The Battle of the Atlantic, Disc 1	Timeless Media Group	The conflict at seas between Allied merchant ships and their escorts and German U-boats, christened the Battle of the Atlantic by Winston Churchill, was the longest and arguably the most critical campaign of WWII. If Britain had fallen, there would have been no base for the western Allies to launch a strategic air offensive or a land invasion of the European mainland to defeat Germany. To survive, Britain needed imports of food, fuel and raw materials from overseas. The Germans used submarines (U-boats), mines, surface warships, armed merchant ships and aircraft during the battle, but it was the U-boats that posed the deadliest threat to Britain's survival.-- Container. 			Churchill, was the longest and arguably the most critical campaign of WWII. If Britain had fallen, there would have been no base for the western Allies to launch a strategic air offensive or a land invasion of the European mainland to defeat Germany. To survive, Britain needed imports of food, fuel and raw materials from overseas. The Germans used submarines (U-boats), mines, surface warships, armed merchant ships and aircraft during the battle, but it was the U-boats that posed the deadliest threat to Britain's survival.--Container. Disc 2 - Crisis in the Atlantic Atlantic Patrol Sea War - Timely Arrival D-Day + 3 Beachhead to Berlin
2017.359.027	Battle Ground, Disc 7 : North Africa and Italy, Disc 1	Timeless Media Group	With Germany firmly in control of continental Europe, the Allies, with pressure from the British, made the decision to attack the underbelly of Europe. In the first offensives involving American troops, Operation Torch was launched against the Axis in North Africa. After the successful Battle of El Alamein, the Allies punched north to the island of Sicily and quickly into the Italian mainland. There they made slow, steady progress against an entrenched, determined enemy. This is the story of the bravery and valor of the gallant Allied armies that finally crushed the Italian fascists, and drove Nazi Germany to the brink of surrender in the mountains of Northern Italy. Disc 1- El Alamein Operation Torch Sicily Salerno Monte Cassino

2017.359.030	Battle Ground, Disc 10 : The German Frontier, Disc 2	Timeless Media Group	By late 1944, the Western Allies were infected with the over-confidence that flowed from the sweeping victories they had gained since the Breakout from Normandy and that by December had carried them to the very borders of the Third Reich. They were confident that the war would soon be over, but they were sadly mistaken. On December 16, Germany forces launched a massive attack through the Ardennes, the opening blows of Operation Watch on the Rhine, known to history as the Battle of the Bulge.-Container

			Disc 2 - The Battle at St. Vith Bastogne The Bridge at Remagen
2017.359.032	Battle Ground, Disc 12 : Wings Over Europe, Disc 2	Timeless Media Group	In the dark days of WWII, Nazi Germany's military stunned the world with its blitzkrieg, quickly overtaking Europe. A very large part of their success was the German air force, the Luftwaffe. Their aircraft, superior in number and design to the Allies, controlled the skies, raining death and destruction from Poland to Great Britain. The Royal Air Force had to take to the skies and do battle with the Luftwaffe, until America entered the war, and were badly overmatched by the Nazi's Luftwaffe. In 1941, when Germany declared war on the United States, they awakened a sleeping giant. All across America factories turned to the production of war material, from tanks and troop ships to warplanes. The U.S. Army Air Force moved quickly to train as many pilots, bombardiers and navigators as possible, and in a surprisingly short time, the US and its Allies were taking the fight to the Nazis in the skies over Europe.-Container

			aircraft carriers and the Naval Aviators who flew from their decks. Yet, as important as the carriers were, the most significant naval warships in actually prosecuting the war toiled in almost complete obscurity. While battles like those that occurred at Midway, Santa Cruz and Leyte Gulf grabbed the headlines, the Pacific Fleet Submarine Force quietly went about the task of isolating Japan. The submarine fleet crippled Japan's industry and prevented re-supply and reinforcement of Japanese island garrisons by virtually destroying her merchant fleet. Silent Victory includes rare archival footage of epic naval battles and exclusive veteran interviews, covering the submarine war from the declaration of unrestricted submarine warfare after Pearl Harbor to Japan's unconditional surrender in Tokyo Bay." "Devil Boat follows a group of Portland, OR PT boat Veterans as they attempt to resurrect a PT boat from the ravages of time and neglect, sixty years after the war's end. Their aim was to restore PT 568 to its original state, complete with armaments and the original compliment of three 1,200-horsepower Packard engines."

2017.359.118	Untold Stories of WWII : Three Secrets that Changed the War	David, Ron	Reveals compelling stories about secret weapons, ruthless tactics, and heroism of World War II. The Raids to destroy Nazi Germany's heavy water production based in Norway, plus the final desperate act to deny them what had already been stockpiled. The Japanese midget submarines role and participation in the attack on Pearl Harbor, December 7, 1941. What they achieved plus what was their ultimate fate. The attacks on United States warships in the Pacific late in World War 2 by the Japanese Kamikaze and Okha Squadrons. The Kamikaze attacks were in whatever planes the Japanese forces were able to gather. The Okha attacks were made in specially built flying bombs that were towed by larger and usually slower aircraft that were not suitable for fighter work. Originally broadcast as a National Geographic Society special

			battleground -- Episode 5. Ho Chi Minh's revolution A look at some of the most daring covert operations and spy gadgets deployed during the Vietnam war. Alpha strike focuses on the air war of the Vietnam conflict, including interviews with North Vietnamese veterans, secret American operations in Laos and Cambodia, and the Navy's classified program to counter heavy losses against Vietnamese pilots. Hidden in plain sight tells the story of hidden supply highways, underground cities, covert camps, and double agents, including special film footage of the Ho Chi Minh Trail and the tunnels of Cu Chi. Special operations tells the story of the Special Forces involvement in Vietnam. Their clandestine operational groups, their missions and their ability to survive is documented with interviews and film footage

2017.359.155	War is Hell (Hollywood Goes to War), Disc 1	Capra, Frank	The incredible films in this 3-DVD set bear witness to the terrifying realities of World War II's brutal battles. Written, filmed, and narrated by Oscar winner John Huston, The Battle of San Pietro is a vivid record of the horror of war. Diary of a Sergeant and Thunderbolt are both introduced by Jimmy Stewart; the latter's unique color footage was shot from cameras affixed to P-47 fighter-bombers. Tunisian Victory is a stunning outline of the battle strategies of the U.S./British military operation code-named Acrobat, while Attack! The Battle for New Britain examines the inner workings of jungle warfare. The documentary Let There Be Light is John Huston's legendary account of the ordeal of shell-shocked soldiers. The Price of Freedom encompasses three films: Freedom Comes High, a tribute to civilian sacrifices; Pay Day, a Dr. Seuss cartoon on proper military conduct; and the propaganda film Our Job in Japan. Among the selections on the CD Marching Off to War are "Der Fuehrer's Face" by Spike Jones, "A Boy in Khaki, A Girl in Lace" by Tommy Dorsey, "Goodbye Sue" by Perry Como with Benny Goodman, "He Wears a Pair of Silver Wings" by Alvino Rey, "You Can't Say No to a Soldier" by Joan Merrill, "Sentimental

			history of United States--backed covert anti-Communist operations in Vietnam in the 1950s and early 60s. By 1963 the Joint Chiefs of Staff formalized plans for an ongoing program of covert action against North Vietnam. This included intelligence collection and psychological warfare operations, as well as air and naval attacks against North Vietnam. At the beginning of the Vietnam War, few U.S. military personnel had any experience in the sort of activities needed to conduct Special Ops in the jungles of Vietnam. As the war grew in its intensity and as more supplies were moved down the Ho Chi Minh Trail, interdiction became a top priority. Special Operation teams were dispatched into Laos, Cambodia and North Vietnam to gather information to be used in targeting airstrikes. Over the course of the war, these units achieved a 100-1 kill ratio and became the most feared weapon in the U.S. arsenal. War in the Shadows offers a wealth of little-known information about this shadowy world"

2017.359.169	Great Air Battles of WWII, Disc 1 : Great Battles of WWII	Lewman, Lance	WWII raised the stakes as the skies over Germany and the South Pacific raged with deadly air combat. Great air battles thundered as the Axis and the Allies waged a menacing race of arms. Faster and more lethal planes from the Nazi Focke-Wulf 190 and Messerschmitt 109G to the allies P47 Thunderbolt and P51 Mustang and Spitfire Mk24 protected the around the clock bombers. The air battles of the Pacific had been going the Allies way, but the Japanese Kamikazes were the killers that left the U.S. Navy reeling. The final air battles culminated with the first combat jet fighters and the B29 Superfortress and the Atom Bomb. These battles set records of air combat that still stand today.
2017.359.170	Great Air Battles of WWII, Disc 2 : Great Planes of World War II	Lewman, Lance	Germany, Italy and Japan developed some of the most advanced and effective fighters of their time. To protect their

Object ID	Title	Author	Summary
			rapidly moving troops, and later to defend against devastating Allied bombing, the Germans and Japanese deployed superb fighters, such as the ME-109, FW-190, and the Zero for supremacy of the skies. These and many others, including earlier operational jets and rocket fighters, are seen in unique live-action footage. This film was made with the cooperation of Britain's Imperial War Museum and U.S. National Archives.
2017.359.171	Great Air Battles of WWII, Disc 3 : Great Aces of World War II	Lewman, Lance	From the fighter pilots of the Spitfires who won the Battle of Britain and the U.S. Army Corps pilots in their Mustangs that escorted the bomber assaults on Germany's heartland, to the Lightnings and Corsairs which dominated the Pacific, this program looks at all major United States, British and Russian combat fighters. These Allied fighters turned the tables on the Axis air power.
2017.359.172	Vietnam War Stories, Disc 1	Creation Films Documentary	"Witness the Vietnam War, its roots, its battles, its heroes and the price paid in the name of freedom. This stunning, detailed collection shows the war with heartbreaking realism. It looks at troubling questions about America's justification for the conflict, the horrors of jungle warfare and the human calamity of the war. Ultimately, it profiles the courage of the soldiers who put their lives on the line in the name of patriotism. In addition to the outstanding color action footage in the documentary, we have eyewitness interviews ranging from accounts of policy makers in Washington to remembrances of 'Grunts' who were humping the boonies trying to survive a '365 and a wake up' for a trip home on the 'freedom bird.' Since Robert McNamara's confessions won an Oscar, many of the policy makers are willing to speak on the record for the first time. This timely DVD set features rare archival footage and photographs and over 5 hours of captivating

2017.365.004	Miramar : The Home of Top Gun	Hall, George	Author/photographer George Hall takes you to Miramar Naval Air Station, CA., where you pull on your "speed jeans," strap into a Tomcat, Hornet, or Phantom, and light the afterburners.
2017.365.005	Illustrated Encyclopedia of Military Aircraft, The, 1914 to the Present	Angelucci, Enzo	This is a revised edition of Rand McNally Encyclopedia of Military Aircraft, 1980 which we have. Huge book that covers all military aircraft 1914-to the present. If you have seen Jane's All the World's Aircraft, then you have an idea of what this book is like, but this book is done much nicer. Color drawings and historical descriptions are included for each plane. A great reference book for those interested in military aircraft. 2 of 2 people found the review helpful From the Inside Jacket May 29, 2008 By Emily Rounds The Rand McNally Encyclopedia of Military Aircraft, 1914-1980 is the most complete, authentic, and spectacular book of its kind ever prepared. It depicts and describes all of the world's principal military aircraft produced from the outbreak of World War I to the present day. There are 800 types in all, ranging from fighters and bombers to reconnaissance planes and trainers, with 1,706 airplanes shown in color, 16

Object ID	Title	Author	Summary
			color charts, 252 photographs, 772 cutaway drawings, and seven color diagrams. Full-color illustrations are paired with capsule descriptions that provide extensive technical information on each plane, including insignia, manufacture, type, year, engine wingspan, length, height, weight, maximum speed, ceiling, range, armament, and crew. The extraordinary graphics include: *Dramatic gate-fold illustrations--such as a four-page fold-out with minutely detailed color drawings of the 88 principal bombers of World War II, ranging from Japan's tiny Yokosuka Ohka 11 to America's jumbo Boeing B-29 Superfortress, from Germany's Junkers Ju.86 to Russia's Tupolev TB-3. *Major diagrams, on two-page spreads, which minutely detail individual models by presenting a cutaway view of the plane in color, with up to 100 parts numbered and keyed to an index adjacent to the diagram. An informative text traces the development of military aircraft through the years, including such background information as production costs, quantities produced, strengths and weaknesses, and impact on aerial warfare. This is the definitive reference, prepared over a period of six years by the same creative group responsible for Rand McNally's highly acclaimed "Color Illustrated Guide" aircraft series. 1 of 1 people found the review helpful (from Amazon.com)

2017.365.016	Military Jets : Design and Development	Jackson, Robert	Provides a detailed look at 50 of the most important jet-engined aircraft developed between 1945 and the present day. Each aircraft is introduced with large-format artwork in full color, showing every detail of the aircraft in action wearing authentic markings. Detailed annotations indicate innovative design features and other points of interest.
2017.365.017	Illustrated History of Fighters	Gunston, Bill (ed)	Since the dawn of technological warfare the principle behind fighter aircraft has remained the same - to enter into combat with another aircraft and shoot it down. But during the last fifty years, vast improvements in design and armament have radically altered the means of achieving that goal. THE ILLUSTRATED HISTORY OF FIGHTERS traces the dramatic development of aircraft from the 1930s, when the threat of war caused Allied and Axis nations to step up their armament and develop better aircraft than the enemy. Important technical improvements ensured that

Object ID	Title	Author	Summary
			aircraft would play a far greater role than they had previously and led to the innovation of the Spitfire, the Mustang, the Zero and the Fw 190 among many other fighters. The American fighters in this book include the first-class Navy F4F, F6F and F8U as well as the modern and maneuverable F-16. Fully illustrated with color photographs, side elevations and precision drawings by John Batchelor, this highly informative volume details the progress of fighter aircraft beginning with the Koolhoven FK.58, which was powered by one 14-cylinder air-cooled radial engine giving a speed of 313 mph and armed with four FN-Browning machine-guns. The introduction of the jet proved to be the most revolutionary factor in aircraft design. The first fighter outfitted with a jet engine was the Messerschmitt Me 262, which made its debut too late to alter the outcome of World War II. Soon the jet engine had replaced the piston engine as the fighter's powerplant thus allowing more flexibility in the shape of the aircraft. The volume concludes with the recent Dassault-Breguet Mirage 4000, powered by two augmented after-burning turbofans giving a speed of 1450 mph and armed with two DEFA cannons and eleven hard-points for missiles. THE ILLUSTRATED HISTORY OF FIGHTERS examines the changes and improvements of the fighter from the 1930s right up to the present day. Each aircraft is discussed individually enabling the reader to tell at a glance the aircraft's strengths and weaknesses. 450 illustrations, 180 in color Bill Gunston was educated at University College, Durham and Northampton Engineering College, London. From 1943

2017.365.018	US Navy : West Coast Warriors	Hall, George	The heart of the Navy's air combat evaluation programme on the West Coast beats at Point Mugu 40 miles north of Los Angeles. Here Navy test pilots, including VX-4 'Evaluators' and VX-5 'Vampires', wring the bugs out of each new generation of fleet warplanes, marrying them to new weapons systems under the perfect conditions of a fully-instrumented 35,000-square mile range facility. The Tomcats and Hornets stalk 'smart drones' . . . and wired-up Sabres and Phantoms, flown by shirtsleeve pilots on the deck through the responses of 'Ensign Nolo' in the cockpit - and Nolo doesn't always lose! Apart from the colourful denizens of the Pacific Missile Test Center, respected aviation photographer GEORGE HALL and his colleagues have captured a fascinating gallery of other Navy types in and around Mugu, which is home to more than 20 Reserve units operating increasingly sophisticated inventory. Here are Hornets of VFA-305 'Lobos', alongside the extraordinary ski-equipped LC-130R Herks of the Antarctic support squadron; Orion patrol ships of VP-65 'Tridents', and the Navy's latest combat support HH-60 choppers of HCS-5 'Firehawks' fresh from the Gulf; and a wide range of other residents and 'drop-ins',

2017.365.019	U.S. Navy Combat Aircraft in the 1970s	Peacock, Lindsay T.	Introduction: There can be few who would dispute that carrier aviation is one of the most hazardous and demanding forms of flight, or that it is one of the most fascinating aspects of a fascinating subject. The US Navy is one of the pioneers of naval aviation, and remains wholly committed to the concept of carrier power. Consequently, it provides a rich hunting-ground for compilers of photographic albums, with many authors attempting to capture some of the undoubted glamour, noise and fury of the flight deck. Personally, I doubt that any book can succeed in conveying the atmosphere of carrier operations, for so many of the intangible aspects — sound and smell being just two — are missing. The only way to get a real feel for air power at sea is to spend some time aboard an aircraft carrier; I have been fortunate enough to do just that, and many of the photographs contained in this volume were obtained on such visits. The US Navy is not, however, merely a sea-going organization; it should be remembered that they also operate a large number of shore-based aircraft which are generally overlooked. I have attempted to redress the balance to some degree by including a selection of these aircraft, which make a significant

Object ID	Title	Author	Summary
			contribution to US naval air power. Ultimately, though, it is the carrier which serves as the principal cutting edge of naval aviation, and the bulk of the photographs are of carrier aircraft. Whether I have succeeded in conveying some of the atmosphere is a matter of opinion, but I certainly hope that you find the selection interesting. Lindsay T. Peacock, 1982.
2017.365.020	Wings of Gold	Dorr, Robert	Every young boy wants to be a fighter pilot. Some want more. They want to be a Navy fighter pilot. Navy pilots are one step above, supermen who launch their F-14 Tomcats off the pitching deck of the Enterprise to go hunt MiGs. Years go by, eyes go bad and most of those boys grow up to be lawyers, construction workers or accountants. (from back cover:) Still, the dream never dies. Most would love to strap into an F-14, line up on the catapult, push the throttles into burner, salute the LSO and launch off the deck into the freedom of the sky. Who wouldn't? But before you can strap into that Tomcat, you've got to earn your wings, Navy wings of gold. If you've ever wondered if you had the right stuff to be one of these supermen, this book is for you. The story begins at NAS Pensacola, Florida, where all future Navy pilots and flight officers fight their way through Aviation Officer Candidate School (AOCS) or Aviation Indoctrination (AI). As in "An Officer and a Gentleman," the physical challenges of AOCS are daunting - you'll endure countless push-ups, muscle over the wall on the obstacle course and fight blind panic in the Dilbert Dunker - and the

Object ID	Title	Author	Summary
			mental challenges are at least as great. Every second is filled with sweat and study. What you need most to succeed are self discipline, motivation and smarts. The next step is basic flight trading at NAS Whiting Field, Florida, or NAS Corpus Christi, Texas. Most trainees want jets. Your performance in basic, along with the needs of the Navy determine your next assignment and whether you get jets. If you're selected for the advanced strike pipeline (meaning jet fighter or attack aircraft), you advance to intermediate and advanced strike training. Here you are fitted for "speed jeans" (a g-suit) and learn to fly and fight in modern jets. At the end of the year-and-a-half pressure cooker you are awarded your coveted wings of gold. Earning those wings is the achievement of a lifetime, but the real reward for all your hard work is yet to come: assignment to a Fleet fighter or attack squadron and a Tomcat, Hornet or Intruder with your name on it! Similar challenges and rewards await those in the maritime (multi-engine propeller) and helicopter pipelines. Author Robert F. Dorr and photographer Robert D. Ketchell visited NAS Pensacola and Whiting field in Florida; NAS Meridian in Mississippi; and NAS Beeville, Corpus Christi and Kingsville in Texas to witness the excitement and drama of young men and women being molded into naval aviators. AOCS, first solo flight, launches and traps aboard the Lady Lex through the "winging" ceremony, "Wings of Gold" brings it all to you, firsthand, and lets you live it.

2017.375.001	Boeing XF8B-1 Five-in-one Fighter	Koehnen, Richard	The F/A 18 Hornet was not the first Naval Aircraft designed to meet all the Navy needs. The XF8B-1 was another Boeing called it the "Five-in-one" fighter (fighter, interceptor, dive bomber, torpedo or horizontal bomber). This aircraft had the ability of carrying two 1600lb bombs in a internal weapons bay and two more on strong point under the wing or a pair of 2000lb torpedoes under the wing. Six 50 cal. machine gun in the wing or 20 mm cannons. It was powered by XR4360-10 Wasp Major with a contra-rotating propeller.
2017.375.002	Douglas R4D-8/C-117D Super Gooney	Ginter, Steve	15-color and over 300 b&w photos and text cover its usage as a transport, VIP carrier, station hack, a trainer with VT-29, and its usage in Antarctica with VX-6 from 1952 into the 1980s. The DC-3S was a Douglas venture to add capability and life to the post war fleet of surplus DC-3s, C-47s and R4Ds. It was an remanufactured aircraft with a stretched fuselage, new taller and wider tail group, new square tip outer wings, larger engines and fully enclosed main gear housings. It did not find

Object ID	Title	Author	Summary
			favor with the airlines which instead turned to Convairs and Martins, but found a home in the Navy and Marines. 96 aircraft were eventually re-manufactured as R4D-8s and 4 as R4D-8Zs.
2017.375.003	Grumman F8F Bearcat	Meyer, Corwin	By the last half of the Second World War, most new US fighter designs were much heavier and more complex than earlier fighters. When planning a replacement for their successful F6F Hellcat carrier fighter, however, Grumman chose to built as lightweight a design as possible around the most reliable large radial engine. The result was the F8F Bearcat, which was often called a "hot rod" by its pilots for its fantastic acceleration and climbing ability. Using the well-proven Pratt & Whitney R-2800 engine, the first Bearcat prototype flew on August 21, 1944. After minor modifications, including the addition of a dorsal fin, early production F8F-1s began armament tests and carrier qualification trials in early 1945. By May of 1945, the Bearcat was cleared for operations, with very few restrictions on its flight operations over its wide speed range. A total of 654 F8F-1s were delivered, all fitted with the 2,100 hp R-2800-34W engine.
2017.375.004	Lockheed R60/R6V Constitution	Ginter, Steve	The Lockheed R6V Constitution was a large, propeller-driven, double-decker transport aircraft developed in the 1940s by Lockheed as a long-range, high capacity transport and airliner for the U.S. Navy. The first time I saw this aircraft was in a photo of a Bearcat and it was in the back ground. This book covers this and more.

2017.377.015	Aerial and Marine Navigation Tables	Gingrich, John E.	These tables are designed to give in as short and convenient form as possible the necessary help for the calculation of the azimuth and altitude of a celestial body required for the Marcq St. Hilaire method of determination of positions by position line. The tables follow the method of Dr. Ogura, the Japanese hydrographic engineer as regards altitude, and A.B.C. azimuth tables of Captain Lecky and Blackburne for azimuth but the two methods are combined in a very ingenious method which make both easier to use.
2017.377.016	American Practical Navigator	US Naval Oceanographic Office	Navigation classic originally published in 1802 by Nathaniel Bowditch whose intent was to provide a compendium of navigational material understandable to the mariner. This theme continues under the auspices of the U.S. Naval Hydrographic/Navigational Office.

2017.377.018	Golden Thirteen : Recollections of the First Black Naval Officers	Stillwell, Paul	community. The thirteen men who became the United States Navy's first African-American officers on active duty in 1944 recall--in their own words--how they fought prejudice, maintained their dignity, and served as role models for all African-Americans. Foreward by GEN Powell. Although all sixteen members of the class passed the course, only twelve were commissioned in March 1944: John Walter Reagan (b.1920-d.1994), Jesse Walter Arbor (b.1914-d.2000), Samuel David Jones, Darion Damon Ivy III (b.1914 - d. 2014), Graham Edward Martin (b.1917- d.?), Phillip George Barnes, Reginald Goodwin, James Edward Hair (b.1915-d.1992), Samuel Edward Barnes, George Clinton Cooper, William Sylvester White, and Dennis Denmark Nelson were commissioned as Ensigns; Charles Byrd Lear (b.1920-d.2006) was appointed as a Warrant Officer.
2017.377.019	1931 International Code of Signals (American Edition), Vol. II - Radio	Hydrographic Office, Secretary of Navy	1952 revision to the 1931 publication which grew out of the 1927 International Radiotelegraph Conference held in Washington, D.C. at the urging of the British Government. The code was published in two volumes, one for radiotelegraphy (Vol II/H. O. 88) and one for Visual. Flags were increased by addition of 10 numeral pennants and three substitute flags. The signal letters of ships would be the same as their radio call signs. To be published in 7 editions (languages).
2017.377.020	Marine Navigation 1 : Piloting	Hobbs, Richard R.	This edition of Marine Navigation is published as a two-volume text to introduce U. S. Naval Academy and NROTC midshipment to the shipboard navigation department organization and to principles of piloting and celestial and electronic navigation as practiced in the U.S. Navy. Vol. 2 is Celestial This edition contains an appendix of 25

Object ID	Title	Author	Summary
			pages at the back: Nautical Chart Symbols and Abbreviations.
2017.377.021	Marine Navigation 2 : Celestial and Electronic	Hobbs, Richard R.	Vol. 1 is titled Piloting. This volume is titled Celestial and Electronic. This volume was originally written as a textbook for use by midshipmen at the U. S. Naval Academy and the various NROTC colleges and universities.
2017.377.022	Naval Shiphandling	Crenshaw, R. S. (Russell Sydnor)	Provides the fundamentals of good shiphandling including the seaman's eye, forces affecting the ship, going alongside, anchoring, mooring, handling at sea, CIC, arctic shiphandling, and pilots and tugs. Includes chapters on various ships including aircraft carriers, destroyers, cruisers, battleships, submarines, large amphibious and service ships, and landing ships.
2017.377.023	Primer of Navigation with Problems in Practical Work and Complete Tables	Mixter, George W.	"Books on navigation": p. 2-3. "Official publications": p. 429-432. Navigation. Since 1940, Mixter's Primer of Navigation has been the most relied-upon guide for sailors and boaters throughout the world. Within three years of its original publication, the book went through fifteen printings; in 1943 the second edition appeared and was followed by seven reprintings. In the early 1940s, the text was widely used as the primary resource in the training of navigators for service in World War II. After the war, when pleasure sailing and boating became an increasingly popular pastime, Primer of Navigation found a new audience of readers eager to ensure their families and friends of safe, pleasurable, bluewater adventures.
2017.377.024	U.S. Navy Destroyers Lost or Damaged during World War II	Peltin, Thomas J.	"Tin Can Sailors salutes 100 years of the destroyer"--P. [4] of cover. More than 70 destroyers were lost during World War II and hundreds more were damaged.
2017.378.001	Mission : Seventy-two - USS Midway (CVA-41) - 1972-73	Dowear, M. M. (ed.)	A pictorial account of the western Pacific deployment of USS Midway in 1972/73. The ship departed Alameda 10

Object ID	Title	Author	Summary
			APR 72 and returned to Alameda 3 March 1973, 1 week short of an 11-month deployment. Not only was it a long deployment, Midway was deployed 7 weeks ahead of schedule with less than one week's notice. Significant operations included 9 periods of line operations off Vietnam in support of the Vietnam War. Port calls included Pearl Harbor, Subic Bay (multiple), Hong Kong and Singapore. Bob Hope performed on Midway with his troop on 27 December in Singapore. The show was taped and broadcast on U. S. national television on 17 January 1973 as the Bob Hope Christmas Special. CVW-5 was embarked. The airwing consisted of VF-151 (F-4B), VF-161 (F-4B), VA-56 (A-7B), VA-93 (A-7B), VA-115 (A-6A and KA-6D), VAQ-130 Det 2 (EKA-3B), VFP-63 Det 3 (RF-8G), VAW-115 (E-2B), HC-1 Det 2 (SH-3G), and HC-7 Det 110 (HH-3A).
2017.378.002	USS Midway (CVA-41) Voyage 71	Rehr, W. E. (ed)	USS Midway (CV-41) aircraft carrier; lead ship of the class. Pictorial summary of the western Pacific deployment of USS Midway in 1971 including strike operations off Yankee Station in the Tonkin Gulf during the Vietnam War. Departed San Francisco Bay 16 April 1971 with Attack Carrier Air Wing Five consisting of VA-56 (A-7 Corsair IIs), VA-93 (A-7 Corsair IIs), VA-115 (A-6 Intruders), VAW-115 (E-2 Hawkeyes), VF-151 (F-4 Phantom IIs), VF-161 (F-4 Phantom IIs), VAQ-130 Det 2 (EKA-3 Skywarriors), VFP-63 Det 3 (RF-8 Crusaders), and HC-1 (SH-3 Sea Kings) Det 8 deployed aboard. Ports of call included Yokosuka & Sasebo, Japan; Subic Bay, The Philippines; Hong Kong; Hawaii. Includes encounters with Russian naval vessels and Tu-16 "Badger" and Tu-95 "Bear" aircraft.

2017.384.001	Whirlwind : The Air War Against Japan, 1942-1945	Tillman, Barrett	WHIRLWIND is the first book to tell the complete, awe-inspiring story of the Allied air war against Japan—the most important strategic bombing campaign in history. From the audacious Doolittle raid in 1942 to the atomic bombing of Hiroshima and Nagasaki in 1945, award-winning historian Barrett Tillman recounts the saga from the perspectives of American and British aircrews who flew unprecedented missions over thousands of miles of ocean, as well as of the generals and admirals who commanded them. Whether describing the experiences of bomber crews based in China or the Marianas, fighter pilots on Iwo Jima, or carrier aviators at sea, Tillman provides vivid details of the lives of the fliers and their support personnel. Whirlwind takes readers into the cockpits and gun turrets of the mighty B-29 Superfortress, the largest bomber built up to that time. Tillman dramatically re-creates the sweep of wartime emotions that crews endured on fifteen-hour missions, grappling with the extreme tedium of cramped spaces and with adrenaline spikes in flak-studded skies, knowing that a bailout would put them at the mercy of a merciless enemy or an unforgiving sea. A major character is the controversial and brilliant General Curtis LeMay, who rewrote strategic bombing

Object ID	Title	Author	Summary
			tactics. His command's fire-bombing missions incinerated fully half of Tokyo and many other cities, crippling Japan's industry while still failing to force surrender. Whirlwind examines the immense logistics and construction efforts necessary to support Superfortresses in Asia and the Mariana Islands, as well as the tireless efforts of engineers to build huge air bases from scratch.It also describes the unheralded missions that American bomber crews flew from the Aleutian Islands to Japan's northernmost Kuril Islands. Never has the Japanese side of the story been so thoroughly examined. If Washington, D.C., represented a "second front" in Army-Navy rivalry, the situation in Tokyo approached a full-contact sport. Tillman's description of Japan's willfully inadequate approach to civil defense is eye-opening. Similarly, he examines the mind-set in Tokyo's war cabinet, which ignored the atomic destruction of Hiroshima and Nagasaki, requiring the emperor's personal intervention to avert a ghastly Allied invasion. Tillman shows how, despite the Allies' ultimate success, mistakes and shortsighted policies made victory more costly in lives and effort. He faults the lack of a unified command for allowing the Army Air Forces and the Navy to pursue parochial goals at the expense of the larger mission, and he questions the premature commitment of the enormously sophisticated B-29 to the most primitive theater in India and China. Whirlwind is one of the last histories of World War II written with the contribution of men who fought in it.With unexcelled macro- and microperspectives,

Object ID	Title	Author	Summary
			Whirlwind is destined to become a standard reference on the war, on multiservice operations, and on the human capacity for individual heroism and national folly. (from dust jacket flaps) ----- Contents Before the beginning -- China skies -- From the South -- From the sea -- Firestorm -- Pacific ponies -- The Harbor war -- "A most cruel bomb" -- Legacy.
2017.385.002	As You Were 1956, The - Naval Reserve Officers Training Corps, Purdue University, Class of 1956	Schwarz, Alden	Purdue University Naval Reserve Officers Training Corps, NROTC publication with dedication "to the United States Navy's great participation in winning the peace, and to Purdue University's cooperation with the Navy to prepare reserve officers for the responsibilities they were soon to assume. 2017.393.007	USS Midway (CV-41) - A Touch Of Salt - 1976-1978	Begy, C. R. (ed)	Pictorial account of USS Midway activities during the period of 1976 to 1978 including an 89 day South China Sea/Indian Ocean deployment commencing in August of 1977. The ship departed from Yokosuka, Japan. Port calls in this book included the Pusan, Hong Kong, Subic Bay, Freemantle (Perth), Karachi, Singapore, Diego Garcia, Bandar Abbas, Misawa, Kadena. Onboard was: Carrier Air Wing Five (CVW-5) Squadrons listed in this book but which change with other deployments in 1977 are: VF-161 (F-4N) VF-151 (F-4N) VA-115 (A-6A/B and KA-6D) VAW-115 (E-2B) VQ-1 VMAQ-2 Det. (EA-6A) HC-1 Det.B-1 and B-2 (SH-3G) The following was written by Pete Clayton and Robert L. Broadus and appears on page 279 of the Midway cruise book for 1978-79: Beginning in May of 1977, VF-151 and VF-161 transitioned to F-4Js and VA-56 and VA-93 started flying A-7Es. VA-115 also exchanged their A-6As and Bs (A-6Bs) for A-6Es. This CVW-5 transition occurred while the ship was in port for its 60 day EISRA (Extended Incremental SRA, a unique modernization concept developed for Midway). The air wing transition was completed in September when USS Coral Sea fighter squadrons VF-191 and VF-194 exchanged their F-4Js with Midway's F-4Ns, prior to Coral Sea returning to Alameda after her 1977 deployment. In late 1977, Midway made an 87 day deployment to the Indian Ocean where she was the principal participant in Midlink 77, an exercise hosted by the

2017.396.002	Shoot Like A Girl	Hegar, Mary	Written by the Commanding Officer HC-1 in 1965.
			On July 29, 2009, Air National Guard major Mary Jennings "MJ" Hegar was shot down while on a Medevac mission on her third tour in Afghanistan. Despite being wounded, she fought the enemy and saved the lives of her crew and their patients. But soon she would face a new battle: to give women who serve on the front lines the credit they deserve.
			After being commissioned into the U.S. Air Force, MJ Hegar was selected for pilot training by the Air National Guard, finished at the top of her class, then served three tours in Afghanistan, flying combat search-and-rescue missions, culminating in a harrowing rescue attempt that would earn MJ the Purple Heart as well as the Distinguished Flying Cross with Valor Device.
2017.397.001	USS Midway (CV-41) - A Touch Of Salt - 1976-1978	Begy, C. R. (ed)	But it was on American soil that Hegar would embark on her greatest challenge--to eliminate the military's Ground Combat Exclusion Policy, which kept female armed service members from officially serving in combat roles despite their long-standing record of doing so with honor.
			In Shoot Like a Girl, MJ takes the reader on a dramatic journey through her military career: an inspiring, humorous, and thrilling true story of a brave, high-spirited, and unforgettable woman who has spent much of her life ready to sacrifice everything for her country, her fellow man, and her sense of justice.
			Pictorial account of USS Midway, lead ship of its class, activities during the period of 1976 to 1978 including an 89 day South China Sea/Indian Ocean deployment commencing in August of 1977. The ship departed from Yokosuka, Japan. There is a 1976 cruise book, and a 1978

			-79 cruise book. One source on the internet lists 4 deployments in 1976, 3 deployments in 1977, and 2 deployments in 1978. It is difficult to determine which deployments this book covers. Port calls in this book included the Pusan, Hong Kong, Subic Bay, Freemantle (Perth), Karachi, Singapore, Diego Garcia, Bandar Abbas, Misawa, Kadena. Onboard was Carrier Air Wing Five (CVW-5). Squadrons listed in this book but which change with other deployments in 1977 are: VF-161 (F-4N) VF-151 (F-4N) VA-115 (A-6A/B and KA-6D) VAW-115 (E-2B) VQ-1 VMAQ-2 Det. (EA-6A) HC-1 Det.B-1 and B-2 (SH-3G) The following was written by Pete Clayton and Robert L. Broadus and appears on page 279 of the Midway cruise book for 1978-79: Beginning in May of 1977, VF-151 and VF-161 transitioned to F-4Js and VA-56 and VA-93 started flying A-7Es. VA-115 also exchanged their A-6As and Bs (A-6Bs) for A-6Es. This CVW-5 transition occurred while the ship was in port for its 60 day EISRA (Extended Incremental SRA, a unique modernization concept developed for Midway). The air wing transition was completed in September when USS Coral Sea fighter squadrons VF-191 and VF-194 exchanged their F-4Js with Midway's F-4Ns, prior to Coral Sea returning to Alameda after her 1977 deployment. In late 1977, Midway made an 87 day deployment to the Indian Ocean where she was the principal participant in Midlink 77, an exercise hosted by the Iranian Navy and including representation from Pakistan, Turkey, and the Royal Navy.
2017.397.002	USS Midway (CV-41) - A Touch Of Salt - 1976-1978	Begy, C. R. (ed)	Pictorial account of USS Midway, lead ship of its class, activities during the period of 1976 to 1978 including an 89 day South China Sea/Indian

Object ID	Title	Author	Summary
			Ocean deployment commencing in August of 1977. The ship departed from Yokosuka, Japan. There is a 1976 cruise book, and a 1978-79 cruise book. One source on the internet lists 4 deployments in 1976, 3 deployments in 1977, and 2 deployments in 1978. It is difficult to determine which deployments this book covers. Port calls in this book included the Pusan, Hong Kong, Subic Bay, Freemantle (Perth), Karachi, Singapore, Diego Garcia, Bandar Abbas, Misawa, Kadena. Onboard was Carrier Air Wing Five (CVW-5). Squadrons listed in this book but which change with other deployments in 1977 are: VF-161 (F-4N) VF-151 (F-4N) VA-115 (A-6A/B and KA-6D) VAW-115 (E-2B) VQ-1 VMAQ-2 Det. (EA-6A) HC-1 Det.B-1 and B-2 (SH-3G) The following was written by Pete Clayton and Robert L. 2017.397.003	USS Midway (CV-41) - The Magic Touch - 1985-87	Thornton, Jon (ed.)	A pictorial account of the life of the USS Midway that covers a period from mid-1985 to about April 87. Operations included a deployment to Indian Ocean as Battle Group Alfa JUL to SEP 85. Exercises included Team Spirit 85-86, Inferno Creek, Annuaalex w/JMSDF, Multiplex and ASWEX. A significant maintenance period, EISRA '86, took place April to November 86 and included preps for the F/A-18 Hornet. The last A-4's and A-7's departed Midway in March 86. Port visits included Fremantle, Subic Bay, Hong Kong, Pattaya Beach, and Sasebo. Carrier Air Wing Five was embarked for the I.O. deployment and underway portions of the period when aircraft were aboard.
2017.397.004	Taking Care of Business... USS Midway CV-41 - 1976	Wong, Gordon (ed.)	Pictorial account of the activities of the USS Midway over an undetermined period that covered events in 1975 to sometime in the first half of 1976. 16 pages of photos are devoted to Operation Frequent Wind during the fall of Saigon in 1975. Port visits in the period included Singapore, Pusan, Karachi, Hong Kong and Subic Bay.
2017.398.001	USS Boston (CAG-1) - 1958	Armstrong, Peter (ed.)	A pictorial summary of the Boston's activities from the beginning of 1958 through the end of her Mediterranean cruise. Boston began the year in overhaul at Portsmouth, VA. While in the yard the ship had a party at the Arena in Norfolk and exchanged crew visits with the German destroyer Zerstoerer "Z-1" while it was being refitted in the same yard. Boston completed her yard period on 17 March, conducted sea trials, and then visited Annapolis, MD. On 3 April Boston played host to the COMCRUDIV 4 change of command. Then it was off to Guantanamo Bay for seven weeks of refresher training. After a visit to Kingston, Jamaica the Boston was put on standby for a situation in Venezuela occasioned by the stoning of Vice-President

Object ID	Title	Author	Summary
			Nixon and his wife by a mob there. When that situation died down Boston returned to her homeport of Norfolk. On 16 June the ship departed Norfolk for a Mediterranean cruise. The deployment included the 100th firing of a terrier missile from Boston. A Mid-East crisis saw Boston head to the vicinity of Beirut at flank speed, but after days on line there the crisis dissipated. Port visits on the deployment included Cadiz, Gibraltar, Naples, Rhodes, Suda Bay, Athens, Palma and Izmir. The ship returned to Norfolk on 25 September. Later redesignated USS Boston CA-69.
2017.398.002	USS Boston (CAG-1) - 1959	LaSalla, A. J. (ed.)	A pictorial summary of the Boston's activities from late 1958 through the end of her seven-month Mediterranean cruise in 1959. Boston shifted homeports from Norfolk to Boston in late September 1978, a move with which the crew seemed very happy. In early 1959 Boston participated in Operation Springboard in the Caribbean, and later in LANTFLEX 2-59. Port visits included Mayport, San Juan, Port of France, St. Thomas and Port Everglades, Boston hit New York City on the way home. The ship deployed to the Mediterranean in May and had many port visits, some giving the crew a chance to see other major cities in Europe. Some of these included Cadiz, Gibraltar, Malta, Palma, Genoa, Tunis, Isle of Capri, La Spezia, Pisa, Rome, Venice, Florence, Barcelona, Cannes, Monaco, Livorno, Naples, Taranto, Rhodes, Athens, Izmir, Suda Bay and Messina. The ship returned on an unknown date, but it was winter in Boston, judging by the homecoming photos. Later reclassified USS Boston (CA-69).
2017.399.001	Fly Soldiers	Pham, Phu Thai	An autobiography of Phu Thai Pham who was an aviator during the Vietnam War. The book was donated and inscribed to RADM Mac McLaughlin, USN, With Compliments

			from the author.
2017.399.002	Air War in Vietnam, 1965-1973, The : Behind the Air Combat	Nguyen, Duc Soat	This books was presented and inscribed to RADM Mac McLaughlin, USN, With Compliments and signed by the authors.
2017.400.001	Fleet Service Schools of the Schools and Training Command, San Diego, 1945	U.S. Naval Repair Base (San Diego, Calif.)	Provides a history of shore-based naval fleet training in San Diego and a description of the types of training that takes place at the Fleet Service Schools compound at the Naval Repair Base, San Diego.
2017.401.001	Photographic Report of the Iwo Jima Operations	Commander Amphibious Forces U.S. Pacific Fleet	Official after-action photo report on the U.S. landings and results of ground combat at Iwo Jima in World War II. Documents the efforts of Task Force 51/Joint Expeditionary Force. This copy belonged to RADM Claude Sexton Gillett, USN (Ret.) whose signature is on front cover. RADM Gillet was in charge of the Pearl Harbor Shipyard 1939-42 and was responsible for the salvage and repair of vessels there after the Pearl Harbor attack. Loose-leaf bio insert included.
2017.403.001	Yeoman's Guide, The	Naval Training Center (Miami, Fla.)	The Yeoman's Guide has been compiled by the Yeoman & Storekeeper School, U.S. Naval Training Center, Miami, Florida, to aid in familiarizing yeomen with naval procedure, reports, correspondence, etc., and to assist in the proper and efficient conduct of their varied duties.
2017.403.002	Ship and Gunnery Drills United States Navy - 1927	Dept. of the Navy	Chapters include: 1) Leadership and principles of training 2) Organization 3) Battle organization and exercises 4) Emergency drills 5) Gunnery drills 6) Gas defense 7) Destroyers 8) Ship manuals 9) Physical exercises 10) Bugle calls
2017.403.003	Watch Officer's Guide - 1945	Willson, Russell	1945 edition of old standard. Revision designed to bring the 1941 edition up to date. Minor changes in text have been made which clarify but do not alter the substance. The chapter, "Flags and Insignia," has

Object ID	Title	Author	Summary
			been omitted since this information may be found elsewhere. The work of revision was done by officers of the Department of Seamanship and Navigation. Revised from earlier versions to put more emphasis on relative importance of watch officer duties like shiphandling and technique and safety of personnel and materiel with less emphasis on watchstanding
2017.403.004	Modern Shipfitter's Handbook	Swanson, William Elmer	2nd revised and enlarged. Covers blueprint reading, mold loft and structural shop work, angle smithing, riveting, and more, with hundreds of drawings, B/W photos and fold out plans, and glossary. Bound in maroon cloth. The object of the Modern Shipfitter's Handbook is to cover the fundamental principles and the working problems encountered in building a ship. The Handbook is arranged to take up in order the four major stages in a ship's construction : mold loft work and template making; structural shop work and angle-smithing; preassembly of sections; and erection of parts and sections on the ways. Chapters on welding, blueprint reading, etc., are included, together with a glossary of ship construction terms.
2017.403.005	Instructions for Use in Preparation for the Ratings of Quartermaster 1C and Chief Quartermaster : A Course in Eleven Assignments	Bureau of Navigation	Training course for Quartermaster 1c and Chief Quartermaster.
2017.404.001	General Training Course for Petty Officers--Part I	Bureau of Naval Personnel	General Training Course for Petty Officers, The Petty Officer a Leader.
2017.404.002	1914-1918 : World War I Told with Pictures	Werstein, Irving	This book contains several hundred pictures and 20,000 words of concise history of the First World War.
2017.404.003	Principles of Naval Staff Organization	Beary, D. B.	This booklet indicates certain principles which are a basis for effective staff organization. The functions and procedures of a "Representative Navy Staff" have been included as a

			guide.
			D.B. Beary Vice Admiral, U.S. Navy
2017.405.001	Flyboys	Bill, Tony	From the producer of Independence Day and The Patriot, and starring James Franco (Spider-Man 3), Flyboys soars to new cinematic heights with spectacular special effects and thrilling, edge-of-your seat aerial dogfights. Inspired by the true story of the legendary Lafayette Escadrille, this action-packed epic tells the tale of America's first fighter pilots. These courageous young men distinguish themselves in a manner that none before them had dared, becoming true heroes who experience triumph, tragedy, love, and loss amid the chaos of World War I. Hang on for the ride of your life!
2017.405.002	Searching for the Truth : The Battle of Midway	Walsh, George	How elements of the United States Navy withheld the truth about the Battle of Midway long after it mattered.
2017.405.003	Hornet's Nest : The Experiences of One of the U.S. Navy's First Female Fighter Pilots	Cummings, Missy	"A brutally honest book by a courageous naval officer. Cummings' Hornet's Nest is a must read for anybody who wants the real inside story about the United States Navy." -- Gregory L. Vistica, Newsweek Correspondent and author of Fall From Glory, the Men Who Sank the U.S. Navy.
2017.405.004	Military Aircraft Boneyards	Veronico, Nicholas	Unlike any other boneyard book you've seen in the past, Military Aircraft Boneyards takes a complete look at the fate of a variety of abandoned and obsolete aircraft across America. Nick Veronico uncovers the early history of aircraft disposal sites, plus how to insider details on the entire disposal process. Graveyards of the past at Kingman and Litchfield Park, Arizona, are covered along with today's disposal site at Davis Monthan Air Force Base. Includes coverage of the most recent boneyard arrivals. Amazon
2017.405.005	Douglas AD/A-1 Skyraider,	Ginter, Steve	From Wikipedia:

Object ID	Title	Author	Summary
	Part One		The Douglas A-1 Skyraider (formerly AD) was an American single-seat attack aircraft that saw service between the late 1940s and early 1980s. The Skyraider had a remarkably long and successful career; it became a piston-powered, propeller-driven anachronism in the jet age, and was nicknamed "Spad", after the French World War I fighter. It was operated by the United States Navy (USN), the United States Marine Corps (USMC) and the United States Air Force (USAF), and also saw service with the Royal Navy, the French Air Force, the Air Force of the Republic of Vietnam (VNAF), and others. In U.S. service it was finally replaced by the LTV A-7 Corsair II swept wing subsonic jet in the early 1970s. Covers: Development, Testing, Variants, Test/R&D, CAG, FASRONS, Training Squadrons, Base/Carrier/Air Group/Squadron Hacks & USMC
2017.405.006	Hog Pilots, Blue Water Grunts	Kaplan, Robert	In this extraordinary book, Robert D. Kaplan lets readers experience up close the American military worldwide in the air, at sea, and on the ground: flying in a B-2 bomber, living on a nuclear submarine, and traveling with a Stryker brigade on missions around the world. Provided unprecedented access, Kaplan moves from destroyers off the coast of Indonesia to submarines in the central Pacific, from simulated Iraqi training grounds in Alaska to technology bases in Las Vegas, from army and marine land forces in the heart of the Sahara Desert, to air bases in Guam and Thailand and beyond. Hog Pilots, Blue Water Grunts provides not only a riveting ground-level portrait of the Global War on Terrorism on several continents, but also a gritty firsthand account of

Object ID	Title	Author	Summary
			how U.S. soldiers, sailors, marines, and airmen are protecting sea-lanes, providing disaster relief, contending with the military rise of China, fighting the war in Iraq, and crafting contingency plans for war with North Korea and Iran. Expanding on Kaplan's acclaimed Imperial Grunts, the first volume of his exploration of the American military, which "offers the reader an enlightened way to understand what is happening in the world" (San Francisco Chronicle),Hog Pilots, Blue Water Gruntsshifts focus to the Pacific, where emerging Asian powers present vexing diplomatic and strategic challenges to U.S. influence. In this volume, Kaplan completes his analysis of army Special Forces and the marines, while also taking readers into the heart of the myriad tribal cultures of the air force, surface and subsurface navies, and the regular army's Stryker brigades. Kaplan goes deep into their highly technical and exotic worlds, and he tells this story through the words and perspectives of the enlisted personnel and junior officers themselves--men and women who, as he writes, have "had their national identities as Americans engraved in sharp bas-relief." This provocative and illuminating book, likeImperial Gruntsbefore it, not only conveys the vast scope of America's military commitments, which rarely make it into the news, but also shows us astonishing and vital operations right as they unfold--from the point of view of the troops themselves. From the Hardcover edition.
2017.405.007	F-8 Crusader Units of the Vietnam War	Mersky, Peter B.	(from ospreypublishing.com:) About this book Known to its pilots as the 'last of the gunfighters' due to its quartet of Colt-Browning Mk 12 20 mm cannon, the F-8 Crusader was numerically the most populous fighter in the

Object ID	Title	Author	Summary
			US Navy at the start of America's involvement in the Vietnam conflict in 1964 – some 482 F-8C/D/Es equipped 17 frontline units. It enjoyed great success against North Vietnamese Mig-17s and Mig-21s during the Rolling Thunder campaign of 1965-68, officially downing 18 jets, which represented 53 per cent of all Mig claims lodged by Navy squadrons during this period. Contents * First Engagement * Setting Things Up * Making a War * Action in the Tonkin Gulf * War Begins in Earnest * MiG Killers * Assessing the Enemy * Beyond the MiGs * 'Leatherneck' Crusaders, 1965-68 * Final Word Paperback; August 1998; 116 pages; ISBN: 9781855327245
2017.405.008	50 Years of the Desert Boneyard	Chinnery, Philip D.	Subtitled: Davis Monthan AFB Arizona. A fascinating glimpse into the war-weary, battle-scared warbirds collected for 5 years at Arizona's Davis Monthan AFB. From yesterdays C-47s to today's F-16s, Chinnery leads you through the endless rows of fighters, bombers and reconnaissance aircraft laid to rest at Davis Monthan.
2017.406.003	Flight Jacket, The : Classes, Cadets 1-46, 1965	None Stated	Commemorative annual featuring the 46 NAS Pensacola 16-week, Pre-Flight training graduating classes of 1965. The first eight weeks serve as an officer candidate school for Aviation Cadets and the second eight weeks provide academic, physical and military training in preparation for earning their Wings. Also contains description of activities conducted at the training school and photos of the staff and students,
2017.407.001	Mission : Seventy-two - USS Midway (CVA-41) - 1972-73	Doweary, M. M. (ed.)	A pictorial account of the western Pacific deployment of USS Midway in 1972/73. The ship departed Alameda 10

Object ID	Title	Author	Summary
			APR 72 and returned to Alameda 3 March 1973, 1 week short of an 11-month deployment. Not only was it a long deployment, Midway was deployed 7 weeks ahead of schedule with less than one week's notice. Significant operations included 9 periods of line operations off Vietnam in support of the Vietnam War. Port calls included Pearl Harbor, Subic Bay (multiple), Hong Kong and Singapore. Bob Hope performed on Midway with his troop on 27 December in Singapore. The show was taped and broadcast on U. S. national television on 17 January 1973 as the Bob Hope Christmas Special. CVW-5 was embarked. The airwing consisted of VF-151 (F-4B), VF-161 (F-4B), VA-56 (A-7B), VA-93 (A-7B), VA-115 (A-6A and KA-6D), VAQ-130 Det 2 (EKA-3B), VFP-63 Det 3 (RF-8G), VAW-115 (E-2B), HC-1 Det 2 (SH-3G), and HC-7 Det 110 (HH-3A).

2017.408.001	Aviation in San Diego	Pescador, Katrina	For nearly a century, San Diego has been a hub of aviation development, air power, and flying adventure. The city's ideal weather and protected bay allowed San Diego to have an aviation history unrivaled by any local community. From the pioneering days of Glenn Curtiss and naval aviation at North Island to the present cutting-edge aerospace technology, Aviation in San Diego captures it all. With many never-before-published photographs, Aviation in San Diego documents the people and events that made San Diego's aviation heritage unique. From Ryan to Consolidated, Curtiss to Lindbergh, and everything in between, Aviation in San Diego is the preeminent photographic record of flight in "America's Finest City." History of flight San Diego Air and Space Museum Experimental, lighter-than-air craft to modern commercial, military and private air

Object ID	Title	Author	Summary
2017.408.002	Consolidated Aircraft Corporation	Pescador, Katrina	machines Founded by Reuben H. Fleet in 1923, Consolidated Aircraft Corporation (later Convair) became one of the most significant aircraft manufacturers in American history. For roughly 60 years, this prolific company was synonymous with San Diego. In fact, whole sections of the city were designed to provide homes for the Convair workers and their families. These men and women were responsible for building some of the most significant aircraft in aviation history, including the PBX Catalina, B-24 Liberator, F-102 Delta Dagger, as well as the reliable Atlas missile, which was vital in launching America into space. For more than 40 years, the San Diego Air and Space Museum has preserved the nation's aerospace history and technology. In this unique publication, head archivist Katrina Pescador and historian Mark Aldrich selected photographs from the museum's extensive collection to highlight the story of this major aircraft company and the people who contributed to its success.
2017.408.003	Patrol Squadron Forty-Eight - 1964	O'Brien, P .E.	Cruise book (though no ships involved, if any, are named) for Naval Patrol Squadron Forty Eight (VP-48) . 19 March-September 1964: The squadron deployed from NAS San Diego/NAS North Island, Calif. The squadron made its first deployment in over four years to WestPac, relieving VP-40 at NAS Sangley Point. In the last month of the deployment, on 2 August 1964, the Gulf of Tonkin Incident brought VP-48 into the South China Sea to support fleet operations. During these operations the squadron accumulated over 1,500 hours on patrol. Aircraft P-5M Marlin
2017.408.004	Advanced Mathematics for Electronics Technicians	Bureau of Naval Personnel	This book has been prepared for the use of enlisted men of the Naval Reserve who seek training and advancement in ratings involving electronics.

Object ID	Title	Author	Summary
			It is a companion volume to Essentials of Mathematics for Naval Reserve Electronics, NAVPERS 10093-A.
2017.408.005	Essentials of Mathematics for Electronics Technicians	Bureau of Naval Personnel	This book has been prepared for those enlisted men of the U.S. Navy and Naval Reserve who seek training and advancement in fields involving electronics.
2017.408.006	Mathematics Vol. 2	Bureau of Naval Personnel	This book covers mathematics from quadratic equations through the first principles of differential calculus.
2017.408.007	Aviation Electrician's Mate 1 & C	Bureau of Naval Personnel	This Navy Training Course is written primarily for Aviation Electrician's Mates of the U.S. Navy and Naval Reserve who are preparing for advancement to AE1 and AEC.
2017.408.008	Armed Forces Officer, The - 1950	Department of Defense	This manual on leadership has been prepared for use by the Department of the Army, the Department of the Navy, and the Department of the Air Force, and is published for the information and guidance of all commissioned officers.
2017.408.009	Training Aids	Office of the Chief of Naval Operations	This book is intended to help everybody do a better and faster job of training. Whether you are an instructor in one of the Navy schools, the man administering training aids at a base or air station, or the officer told yesterday afternoon to look after squadron instruction, you can carry out your assignment better if you have a clear idea of what training aids are and how they can speed up, clarify, and improve training.
2017.408.010	Fundamentals of Single Side Band	Bureau of Ships	This manual discusses single sideband radios used for military applications. Contents include: 1) Introduction to single sideband 2) Single-sideband exciters 3) Single-sideband receivers 4) Stabilized master oscillators 5) Frequency standards 6) Principles of servomechanisms 7) R-F linear power amplifier 8) Test equipment and techniques 9) High-frequency antennas 10) Antenna feed systems 11) Radio wave propagation

Object ID	Title	Author	Summary
2017.408.011	Single Sideband Communications	Philco Corporation	12) Kineplex data transmission The information presented in this manual is not intended to replace the equipment manufacturer's information, but merely to present the general concepts of single-sideband transmitting and receiving techniques.
2017.408.012	Aeronautical Technical Inspection Manual, Volume 7 - Section 1	Chief of the Bureau of Aeronautics	This text describes the inspection given at point of installation to airborne radio equipment. Equipment used in Naval aircraft will have been source inspected; consequently no attempt is made to deal with manufacturing inspection or type tests.
2017.408.013	Basic Teaching Principles	Chief of Naval Air Technical Training	A guide for new and a reference for experienced instructors within the Naval Air Training Command. Illustrated in cartoon format.
2017.408.014	Programmed Instruction : How to Study	Chief of Naval Air Technical Training	This is a programmed text where subject matter is covered in individual frames and the person doing the study fills in blanks to complete the frame. The blanks are filled-in in this booklet. This booklet teaches good study habits,
2017.408.015	Programmed Instruction : Solid State Theory : Introduction to Semiconductors T-1	Chief of Naval Air Technical Training	This booklet describes the transistor and covers atomic structure and characteristics of semiconductors. It is a programmed text where subject matter is presented in individual frames and the person doing the study fills in blanks to complete the frame. The blanks are filled-in in this booklet.
2017.408.016	Programmed Instruction : Solid State Theory : Single Junction Semiconductor T-2	Chief of Naval Air Technical Training	This booklet describes PN junctions and the effects of forward and reverse bias on these junctions. It is a programmed text where subject matter is presented in individual frames and the person doing the study fills in blanks to complete the frame. The blanks are filled-in in this booklet.
2017.408.017	Programmed Instruction : Solid State Theory : Multijunction Semiconductors T-3	Chief of Naval Air Technical Training	This booklet describes the chemical insertion of two PN junctions into a single crystal, thus forming a transistor, a device capable of amplification. It is a programmed text where subject matter is presented in

Object ID	Title	Author	Summary
			individual frames and the person doing the study fills in blanks to complete the frame. The blanks are filled-in in this booklet.
2017.408.018	Radar Circuit Analysis - 1951	Air Training Command	We have a 1959 edition filed at NAVAIR 00-80T-79. Provides basic principles and basic circuits of radar. Several chapters review mathematics, electricity and radio. For the most part circuits discussed are circuits common to most radar sets and the circuits which the radar technician understands. Air Force serial for this publication is AF Manual 52-8.
2017.408.019	Programmed Instruction : Solid State Theory : Common Emitter Characteristics	Chief of Naval Air Technical Training	This booklet describes the common-emitter amplifier which is one of the more widely used transistor circuits. It is a programmed text where subject matter is presented in individual frames, and the student fills in blanks to complete the frame. The blanks are filled-in in this booklet.
2017.408.020	Information Sheets : Instructor Training Course Class C	Chief of Naval Air Technical Training	This booklet contains information sheets to be used in the Class C Instructor Training Course. It is a reference text where subject matter is presented on individual sheets to be used as examples by the student in completing various instructor tasks.
2017.408.021	Handbook : Service Instructions : Detecting Set AN/ASQ-8	Chief of the Bureau of Naval Weapons	This handbook contains instructions to enable organizational and field maintenance personnel to perform repairs, replacements, adjustments, and recalibrations on Detecting Set AN/ASQ-8. This Detecting Set determines the presence of submarines by measuring the change in the earth's magnetic field produced by submarines. The set is designed for installation in patrol-type aircraft or airships.
2017.408.022	Effective Naval Leadership and the Code of Conduct	Bureau of Naval Personnel	This handbook contains detailed instruction on the U.S. Armed Forces Code of Conduct with special emphasis on the moral aspects of leadership development.
2017.408.023	Supervisor Training	Naval Air Technical Training Center	This guide is used in Phase I, Fundamentals of Supervision, of the NATTC Supervisor

Object ID	Title	Author	Summary
			Training course. The student completes various lessons in the guide which focuses on different aspects of effective supervision..
2017.408.024	Supervisor Training Glossary	Naval Air Technical Training Center	This guide provides a glossary of terms, phrases, and definitions used in the 80-hour Supervisory Course at NATTC Memphis, TN.
2017.412.001	USS Midway (CV-41) / Carrier Air Wing Five "Winners" 1978-1979	Begy, C. R. (ed.)	A pictorial account of the activities of USS Midway in the general period February 1978 through May 1979. Operations included deployments through the South China Sea to the Indian Ocean and exercises Multiplex 79, Team Spirit 79 and a joint exercise with the Iranian Navy. Also documented are many visits by VIPs to the Midway. Countries visited included Japan, Korea, Thailand, Republic of the Philippines, and Kenya. Pages 186-191 show the Russian (Soviet Union) ships and planes in the area. Onboard: Commander Carrier Group Seven (COMCARGRU-7) Commander Carrier Group One (COMCARGRU-1) Commander Carrier Group Three (COMCARGRU-3) Carrier Air Wing Five (CVW-5) VF-161 (F-4J) VF-151 (F-4J) VA-93 (A-7E) VA-56 (A-7E) VA-115 (A-6E and KA-6D) VAW-115 (E-2B) VMFP-3 Det.2 (RF-4B) VMAQ-2 Det. 2018.301.003	Grumman Horizons, Vol. 9, No. 1	Grumman Corporation	The new F-14 fighter is underway. It is an air-superiority weapon system designed around a combat weapon load of four Sparrow air-to-air missiles. Multiple weapons flexibility permits use of Phoenix and Sidewinder missiles, plus an internal M-61 20-mm cannon. It is being built to meet enemy fighters anywhere, as well as bomber and missile threats to the attack carrier strike force.
2018.301.004	T-45 Hawk : U.S. Navy Undergraduate Jet Flight Training System	McDonnell Douglas Corporation	A pamphlet describes training on the T-45 Hawk. The T-45 Hawk aircraft was developed by British Aerospace for the Royal Air Force. McDonnell Douglas and British Aerospace will modify the Hawk for the T-45STS (Strike Training System) program for naval aviators. Includes aircraft characteristics.
2018.301.005	Outstanding Navy Speeches, Vol. 2	Navy Department. Office of Information	This is a collection of 15 speeches which can be used by the Navy Department Speech Bureau. "The data in the speeches is out-of-date, but the unique ideas, organization, and information remain useful."
2018.301.006	Battle Streamers of the United States Navy	Navy Department. Naval History Division	A collection of Naval streamers from the Revolutionary War to the struggle in Southeast Asia. For each streamer, brief mention is made of the services and operations it commemorates, and the campaigns and battles for which stars are awarded.
2018.301.007	Destroyers in the United States Navy	Navy Department. Naval History Division	A history of destroyers in the United States Navy.
2018.301.008	Navy History and Tradition : The Daring and Diplomacy That Built A Great Nation and Navy, 1782-1817	Stokes Walesby	A history of the beginning of the US Navy in a comic book format.

Object ID	Title	Author	Summary
2018.301.009	Navy History and Tradition : The Daring and Diplomacy That Built A Great Nation and Navy, 1865-1936	Stokes Walesby	A history of the US Navy from 1865 to 1936 in a comic book format.
2018.301.010	World War II's U. S. Navy Demolition Research Unit, Ft. Pierce, Florida	Henstock, Charles J. (ed)	This book contains a short history of the Navy Demolition Research Unit in Ft. Pierce, Florida. It also contains of the base, candid photos, and crew photos.
2018.301.011	Captain Bryan's Pacific War Atlas	Bryan, E. H.	Captain Bryan's Pacific war atlas ... containing 75 detailed maps of Pacific areas and of the world, also complete index of 5000 place names.
2018.301.012	Commissioning of USS Omaha, San Diego, CA : Broadway Pier, 03 February 2018	USS Omaha Commissioning Committee (?)	This is the commissioning program for the Independence-class littoral combat ship USS Omaha (LCS-12). Commissioning was on 3 February 2018 at Broadway Pier, San Diego, California. Includes color photographs of the crew.
2018.301.013	United States Ship MINDORO-CVE 120, Commissioning December 1945	Non Stated	This is the commissioning program for the USS Mindoro CVE-120 Commissioning on December 4, 1945
2018.301.014	Naval Advisor's Handbook, The	Naval Advisory Group Staff	A guide to the newly reporting U. S. naval advisor to the Vietnamese Navy during the Vietnam War. The forward provides some advice to the new officer on the nature of his job, while the bulk of the book is concerned with the organization of U.S. and Vietnamese navies in Vietnam. Major sections of the book cover the Naval Advisory Group, Advisor Administration (personnel administration, base defense, intelligence, psychological operations are included), and the Vietnamese Navy.
2018.301.015	Instrument Flying : Technique in Weather	United States Army Air Forces	A guide to proper flying in adverse weather featuring Scratchy, the average pilot, and his misadventures. Technical Order No. 30-100D-1
2018.301.016	Instrument Flying, Basic : Theory and Practice	United States Army Air Forces	A book of instruction to accompany a pilot's course of learning in how to fly an airplane by instruments. Technical Order No. 30-100A-1
2018.301.017	Instrument Flying, Advanced : Theory and Practice	United States Army Air Forces	A book of instruction to accompany a pilot's course of

2018.301.018	Summary of War Damage to U.S. Battleships, Carriers, Cruisers, Destroyers & Destroyer Escorts, 17 October 1941 to 7 December 1942	Bureau of Ships	A compendium with descriptions and diagrams addressing all major U.S. Navy combatants lost or damaged due to enemy action in the time period covered. This is a reproduction of original done by The Floating Drydock, Kresgeville, PA.
2018.301.019	Summary of War Damage to U.S. Battleships, Carriers, Cruisers, Destroyers & Destroyer Escorts, 8 December 1942 to 7 December 1943	Bureau of Ships	A compendium with descriptions and diagrams addressing all major U.S. Navy combatants lost or damaged due to enemy action in the time period covered. This is a reproduction of original done by The Floating Drydock, Kresgeville, PA.
2018.301.020	Summary of War Damage to U S Battleships, Carriers, Cruisers, Destroyers, & Destroyer Escorts, 8 December 1943 to 7 December 1944	Bureau of Ships	A compendium with descriptions and diagrams addressing all major U.S. Navy combatants lost or damaged due to enemy action in the time period covered. This is a reproduction of original done by The Floating Drydock, Kresgeville, PA.
2018.301.021	Summary of War Damage to U.S. Battleships, Carriers, Cruisers, Destroyers & Destroyer Escorts, 8 December 1944 to 9 October 1945	Bureau of Ships	A compendium with descriptions and diagrams addressing all major U.S. Navy combatants lost or damaged due to enemy action in the time period covered. This is a reproduction of original done by The Floating Drydock, Kresgeville, PA.
2018.301.022	Cross Sections of Typical American Ships	Bureau of Ships	A large pamphlet designed for instruction of Naval Reserve personnel which depicts cross sections of a typical U.S. destroyer (1 page), a typical submarine (2 pages), a typical cruiser, (2 pages), a typical aircraft carrier (2 pages) and a typical battleship (2 pages). Most compartments and equipments are labelled. Drawings are to scale. Formerly RESTRICTED handling. Publishing date approximate. Drawings completed in late 1942.
2018.301.023	USS Coral Sea (CV-43) Calendar Cruise Book - 1953	Furchgott, M. H. (ed.)	A 1953 calendar supplemented with photos from the 1952 cruise of the USS Coral Sea (CVA-63) cruise to the

Object ID	Title	Author	Summary
			Mediterranean Sea in 1952. Also includes a six-page textual summary of the 1952 cruise. Arranged such that one week of dairy type entries is allowed per page with each facing page containing a b&w photo. Each calendar/diary page features a cartoon relating to deployment life. A two-page spread is a drawing of the Med and the track of the ship during the deployment. Another page list ports of call and dates visited.
2018.301.024	USS Valley Forge (CVS-45) 1955 Calendar Book	Kirk, M. S. (ed.)	A 1955 calendar supplemented with photos from the 1954 cruise of the USS Valley Forge (CVS-45) cruise to Spain and the North Atlantic. Arranged such that one week of daily type entries is allowed per page with each facing page containing a b&w photo.
2018.301.025	Navy Department, The : A Brief History until 1945	Naval Historical Foundation	As per the title, this is a brief history of the Navy Department from its inception in 1798 until 1945.
2018.301.026	MH-53E Super Stallion : The Western World's Largest and Most powerful Helicopter	Sikorsky Aircraft	This is a sales brochure for the Sikorsky MH-53E Super Stallion heavy-lift transport helicopter. Includes statistics about the helicopter.
2018.301.027	United States Naval History : A Bibliography	Navy Department Library	This brief bibliography was prepared in the Navy Department Library to meet requests from numerous individuals who apply to the Library or to the Naval History Division. The titles listed are those likely to be found in larger school, college, university, and public libraries. The comments are intended to assist the reader by explaining what is to be found in a particular title.
2018.301.028	This Is Saufley	Durocher, C. O.	This book provides highlights of primary flight training at Naval Auxiliary Air Station, Saufley Field, Pensacola, Florida.
2018.301.029	United States Navy Supply Corps Officers Directory 1992	Naval Supply Systems Command	United States Navy Supply Corps Officers Directory 1992. Sometimes called roster of officers.
2018.301.030	Fairchild 91 Amphibian	Fairchild Aviation, Inc.	This booklet is a manufacturer's advertising brochure for the Fairchild 91 amphibian aircraft.

Object ID	Title	Author	Summary
2018.301.031	Thirty Seconds Over Tokyo	Lawson, Ted W.	This first-hand account of the Doolittle Raid over Tokyo--the secret preparations, the raid itself and the almost unbelievable adventures of the airmen in the weeks that followed--is one of the greatest stories of American bravery and ingenuity that has ever been written.
2018.301.032	Assignment San Diego	Naval Station San Diego. Personal Information and Services Center	An unofficial directory and guide published for Naval Station newcomers.
2018.301.033	Vietnam War, The : A Chronology of War	Bluhm, Raymond K.	A richly detailed, day-by-day history of significant Army, Navy, Marine Corps, and Air Force events from the Vietnam War. The Vietnam War was one of the defining events of the twentieth century, and a formative part of the turbulent 1960s. The Vietnam War: A Chronology of War is a lavishly illustrated, all-services chronology of the war—serving as both a reference tool and a handsome addition to any military history collection. This book presents a day-by-day summary of events from the prewar role of military advisors to the fall of Saigon in 1975. With a foreword by Vietnam veteran and U.S. Senator Jim Webb, USMC (Retired), this volume includes one of the most powerful voices from this often-unsung generation of servicemen and women "The Army Historical Foundation, Naval Historical Foundation, Marine Corps Association, The Air Force Historical Foundation." "The content of this book is based on the text originally written for four separate service chronologies: 'U.S. Army: a complete history'; 'U.S. Navy: a complete history'; 'U.S.M.C.: a complete history'; and 'U.S. Air Force: a complete history'."--Page 4. "This 2012 edition is published for Barnes & Noble, Inc., by Rizzoli International Publications, Inc."--Page 6. Includes index.

		Weapons	published for all the U.S. military services by Department of Defense
2018.301.036	Fall of Saigon, The	Landsburg Company	Promotional film for The day of, an unsold series (anthology drama), is actually a Condensed version of the pilot episode, The fall of Saigon, a dramatization using new and actuality footage of events of April 30, 1975 on the aircraft carrier Midway. The day of series was to "capture the dramatic moments of our time by showing stories of heroism, achievement and stories of unusual moments that have marked all our lives." Copyright notice on videocassette: c1985 by the Landsburg Company. (from WorldCat:) The fall of Saigon is chronicled with rare news footage and eyewitness accounts from both sides of the conflict. Now, twenty years later, former President Ford and former Secretary of State Henry Kissinger offer a new perspective on the U.S. role in the chaotic evacuation. Sarah Jones-Chambers, the wife of RADM Larry Chambers, sent us these remarks about the film. It has been years since we have seen that terrible pilot. I had forgotten how terribly inaccurate it is. For example: Refugees did not stand around on the deck waiting for Maj. Ly to land. They were hustled below for safety and processing. Most of the people rescued by Midway were refugees and not combat troops, as the film claims. There were 300 marines on board, not 1500. Maj. Ly had no radio and although Midway explored the option of radio communications, none ever happened. In the scene where the B-girl contacts Ly on the radio, the receiver with the

Object ID	Title	Author	Summary
			incoming message in Vietnamese is not offered to her. Makes no sense if indeed there had been communication since she was the only person there who would have understood what Ly said. Another flight of eight helos landed without signal after the first batch went over the side. They followed. That was not mentioned. RADM Harris never addressed Larry as "Larry." His mode of address to him was usually profane. Larry never consulted with him about options or what to do in regard to the small plane. It was not Harris' call and L never ducked his responsibility to make all the real time decisions All the language used by everyone was much too polite. "Vern" was always in the tower during this operation, never on the bridge. And worst of all, they chose an old, fat man to play My Hero, who was neither old nor fat. Their whole plan seemed to make a big point about his race and that seemed all that mattered to them. It's no wonder that pilot didn't sell the series. It was hokey, inaccurate, and failed to capitalize on areas where it could have been much more dramatic. The really sad thing is the film makers flew L to Pensacola to be the "technical adviser" for the film and then ignored most of what he said. The really, really sad thing is that I was working and nobody thought to ask me to go with. I believe I could have done a better job of getting the truth into the film. I think L was so embarrassed by the whole idea that he didn't speak up like I would have. It was the first time anybody ever called attention to that event and he didn't know quite what to do with it. Sarah

Object ID	Title	Author	Summary
	Westpac - 1993		deployment of the USS Kansas City to the Western Pacific and Indian Ocean in 1993. The ship departed the San Francisco Bay on 1 February and returned home on 29 July. During the deployment she conducted 78 UNREPS, 75 VERTREPS and 21 NREPS and serviced 25 different ships of three nations. Ports of call included Pearl Harbor, Hong Kong, Singapore, Phuket, and Jebel Ali. On front cover USS KC AOR3.
2018.301.046	USS Kitty Hawk (CV-63) - Westpac - 1977-78	Medina, Salvador (ed)	Pictorial account of USS Kitty Hawk (CV-63) aircraft carrier, lead ship of the class, on her western Pacific (WESTPAC) cruise from San Diego on 25 September 1977 to 15 May 1978 with Carrier Air Wing 11 (CVW -11) consisting of HS-8, VA-52, VA-192, VA-195, VAQ-131, VQ-1 Det. B, VAW-122, VF-114, VF-213, VS-33, RVAH-7 embarked aboard. Ports of call in Japan, Korea, the Philippines, Hong Kong, Thailand, Singapore.
2018.301.048	USS Constellation (CV-64) - Letters Home - Westpac 80 - 1980	Cerabino, Frank (ed)	Pictorial account of the 1980 Western Pacific deployment of the USS Constellation. The ship departed from San Diego 26 February and returned to San Diego on 15 October 1980. She participated RIMPAC 80 in the Hawaiian area on the way to Westpac. Ports of call included Pearl Harbor, Subic Bay, Singapore and Pusan. Carrier Air Wing Nine was aboard and included: VF-24 (F-14A), VF-211 (F-14A), VA-146 (A-7E), VA-147 (A-7E), VA-165 (A-6E and KA-6D) VS-37 (S-3A), VAW-116 (E-2C), VAQ-132 (EA-6B), VFP-63 Det (RF-8G), HS-6 (SH-3H) Ports of Call: Hawaii, Philippines, Corregidor, Singapore, Korea, and Western Pacific.
2018.301.051	USS Intrepid (CVS-11) - A History - 1943-1963	Greenberg, A. Frederick (ed)	Pictorial and historical account of the deployment of USS Intrepid from 1943-1963. The aircraft carrier was commissioned on August 16, 1943. When her keel was laid on December 1, 1941, the world was then at war. On April 26,

Object ID	Title	Author	Summary
			1943, Intrepid was christened at Newport News Shipyard. Intrepid worked in the Gulf of Paria from 10/12/43 - 10/17/43, She entered Trinidad/Port of Spain 10/27. On Decem 3, with Air Group 8 she was ready for her trip to the Pacific and the war. During this period, she has been to the Marshall Islands (1944), Her air groups participated in bombings at Shinchiku, Formosa, Luzon, Okinaqay, le Shimat throughout October 1944. In March 12, 1952, Intrepid was underway enroute to Norfolk via the Panama canal. She was recommissioned on June 18, 1954 underwent conversion from CVA to a CVS in 1961-62. Summary of Intrepid's ports of call: East China Sea, Yellow Sea, Ryuku Islands, Sibuyan Sea, Korea(Moppo/Kunzan/Keijo/Ka ijo/Kaishu/Jinsen), Tokyo, Okinawa, Marianas, Saipan, Pearl Harbor, Marshall Islands, Luzon, Kyushu, Honshu, Guam, San Francisco, Wake island, Panama Canal, Balboa, Quebec, Halifax, Roakland, Casco Bay, Boston, New York, Portsmouth, Norfolk, Mayport, Guantanamo Bay, Port of Spain, Gulf of Paria, Barcelona, Palma, Majorca, Cannes, Marseilles, Nice, Monaco, Palermo, Naples, Beirut, Piraeus, Rhodes, Athens, Istanbul,Capri, Ischia, Livorno, Rapallo, Rotterdam, Lisbon, Brest, Gibralter, Belfast, Oslo, Suda Bay, Salonica Air Groups throughout the 20 years: Air Group 8 (VF-8, F6F-3, F6F-5, VB-8, SB2C-1C, SBF-1, SBW-1, VT-8, TBM-1C Air Group 6 (VB-6, VF-6, VT-6, SBD-5, F6F-3, TBF-1, CVL 28) Air Group 4 Air Group 10 In 1963 Intrepid completed refresher training early in the year and then conducted two summer cruises in WESTLANT with midshipmen embarked. ASW exercises were

			featured. Ports visited included Bermuda, New York, Halifax, Boston and Quebec. In December she participated in a PHIBASWEX in the
2018.301.052	Thirteen Days	Donaldson, Roger	The film is set during the two-week Cuban missile crisis in October of 1962, and it centers on how President John F. Kennedy, Attorney General Robert Kennedy, and others handled the explosive situation. ----- In October, 1962, U-2 surveillance photos reveal that the Soviet Union is in the process of placing nuclear weapons in Cuba. These weapons have the capability of wiping out most of the Eastern and Southern United States in minutes if they become operational. President John F. Kennedy and his advisors must come up with a plan of action against the Soviets. Kennedy is determined to show that he is strong enough to stand up to the threat, and the Pentagon advises U.S. military strikes against Cuba--which could lead the way to another U.S. invasion of the island. However, Kennedy is reluctant to follow through, because a U.S. invasion could cause the Soviets to retaliate in Europe. A nuclear showdown appears to be almost inevitable. Can it be prevented? Written by <jgp3553@excite.com> (from IMDb.com) Based on "The Kennedy Tapes: Inside the White House during the Cuban Missile Crisis" edited by Ernest R. May & Philip D. Zelikow. Includes aircraft carrier and naval aircraft footage.
2018.302.001	Stanley Johnston's Blunder : The Reporter Who Spilled the Secret behind the U.S. Navy's Victory at Midway	Carlson, Elliot	Elliot Carlson tells of Stanley Johnston, a Chicago Tribune reporter who exposed a vitally important secret during World War II. After Johnston is embarked in the USS Lexington during the Battle of the Coral Sea, he is assigned to a cabin on the rescue ship Barnett where messages from Pacific Fleet commander Admiral Chester

Object ID	Title	Author	Summary
			Nimitz are circulated. One reveals the order of battle of Imperial Japanese Navy forces advancing on Midway Atoll. Johnston shares this info in a 7 June 1942 Chicago Tribune front-page story. Navy officials fear the Japanese will discover the article, realize their code has been cracked, and quickly change it. Drawing on seventy-five-year-old testimony never before released, Carlson describes the grand jury room where jurors convened by the FDR administration consider charges that Johnston violated the Espionage Act. Using FBI files, U.S. Navy records, archival materials from the Chicago Tribune, and Japanese sources, Carlson at last brings to light the full story of Stanley Johnston's trial.
2018.302.002	USS Constellation (CV-64) - Westpac - 1981-82	Haney, Phil (ed)	Pictorial account of the 1981-82 deployment of the USS Constellation (CV-64) to the Western Pacific. She departed San Diego, CA on 20 October 1981 and returned 23 May 1982. Items of interest and ports of call: President Ronald Reagan visit; Hawaii; Subic Bay; Kenya; Perth; MARS station; Dallas Cowboy Cheerleaders; Singapore; Tiger Cruise 16 May - 21 May; St. Louis High School graduation; Father Daughter Night 3 June. Onboard: Commander Carrier Group Seven (CCG-7) Battle Group Delta Carrier Air Wing Nine (CAW-9) VF-24 (F-14A) VF-211 (F-14A) VA-146 (A-7E) VA-147 (A-7E) VA-165 (A-6E and KA-6D) VS-38 (S-3A) VAW-112 (E-2C) VAQ-134 (EA-6B) HS-8 (SH-3H)
2018.302.003	Pacific Thunder : The US Navy's Central Pacific Campaign, August 1943-October 1944	Cleaver, Thomas McKelvey	On 27 October 1942, four "Long Lance" torpedoes fired by the Japanese destroyers Makigumo and Akigumo exploded in the hull of the aircraft carrier USS Hornet

Object ID	Title	Author	Summary
			(CV-8). Minutes later, the ship that had launched the Doolittle Raid six months earlier slipped beneath the waves of the Coral Sea 100 miles northeast of the island of Guadalcanal and just north of the Santa Cruz Islands, taking with her 140 of her sailors. With the loss of Hornet, the United States Navy now had one aircraft carrier left in the South Pacific, USS Enterprise (CV-6), herself badly damaged in the two previous days of the Battle of Santa Cruz. For the American naval aviators, it would be difficult to imagine that within twenty-four months of this event, Zuikaku, the last survivor of the Imperial Japanese Navy aircraft carriers that had attacked Pearl Harbor, would lie at the bottom of the Philippine Sea north of Cape Engano on the island of Luzon, alongside the other surviving Japanese carriers, sacrificed as lures in a failed attempt to block the American invasion of the Philippines, and that the United States Navy's Task Force 38, composed of sixteen fleet carriers, would reign supreme on the world's largest ocean.
2018.302.004	Bird Farm, The : Carrier Aviation and Naval Aviators : A History and Celebration	Kaplan, Philip	How does it feel to sit aboard a thirty-ton jet and be hurled over a ship's bow at 140 miles per hour? And how does a deck crew coordinate its efforts to achieve such a feat every thirty seconds? Offering a rare glimpse of life aboard an aircraft carrier, The Bird Farm paints a vivid and often hair-raising portrait of military aircraft carriers and carrier crews, and of the planes and pilots who depend on them. Based on archival research and interviews with veterans and contemporary carrier personnel, this stunning volume tells the story of the aircraft carrier—from the first ramshackle seaplane carriers to today's nuclear-powered supercarriers—and celebrates their undeniable impact on modern warfare.

			Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.
2018.302.005	Marines' Lost Squadron, The : The Odyssey of VMF-422	Carlson, Mark	Finally, there is a book that reveals the truth about the worst air disaster to strike a Marine Corps fighter squadron during the Second World War. Marine Fighter Squadron 422 was a group of twenty-four typical young Americans trained to fly the famous F4U Corsair into combat with the legendary Japanese Zero. When they arrived in the Pacific, they suddenly found that not all their enemies carried guns in savage Banzai charges. Their two most dangerous and merciless adversaries were the fury of a tropical typhoon and the cold heartless whims of a Marine Corps general. Together, these two foes seal the fate of VMF-422 and cause the greatest disaster ever to strike a Marine squadron. Aviation historian Mark Carlson has written the first full account of a group of ordinary young men who were suddenly challenged beyond their experience and which forever changed the lives of the survivors. The Marines' Lost Squadron is the dramatic true story of a desperate and courageous fight for survival against the forces of nature and a conspiracy of silence. The Marines' Lost Squadron is a saga of courage and

Object ID	Title	Author	Summary
			conspiracy, patriotism and pride, fate and futility in a struggle to survive the ferocity of a huge typhoon in the midst of the Second World War. Mark Carlson explains in great detail the tragic story. The flight was just supposed to be a routine flight, ferrying 24 F4U-1D Corsairs to another island. The end result: Only one plane actually landed where intended. The rest were either lost forever, or ditched at sea. Although not often mentioned, the "Flintlock Disaster" was actually the worst non-combat loss of a marine squadron in the war. Here was the key problem: They were heading "right at one of nature's most powerful and dangerous forces: a Pacific typhoon." Adding to the problem was that the commanding general never told the arriving location that the planes were on the way. So, when they didn't show up, no one knew to take action to look for them. The pilots became hopelessly confused in the typhoon. Just one managed
2018.302.006	Future Aircraft Carrier Options	Martin, Bradley	Although the integrated carrier air wing is the actual component of sea-based tactical aviation delivering warfighting capability for power projection, the individual air wings require aviation support for launch and recovery at tactical distances, fuel and flight crew replenishment, maintenance, and other sustainment. The aircraft carrier and embarked crew provide this support. Some are concerned that continuing the current carrier program imposes high acquisition cost and might unduly affect the whole of the Navy shipbuilding budget. The Senate Armed Services Committee noted that alternatives could be developed for less cost and potentially

Object ID	Title	Author	Summary
			with sufficient capability. This led to a request for the Navy to examine lower-cost alternatives. This report is a shorter version of a classified, restricted-distribution report provided to the Navy in July 2016. Neither report is of a formal analysis of alternatives or detailed engineering study, nor is either a requirement document. It is an exploration of possible alternatives for further consideration to potentially replace the legacy force as it begins reaching expected service life in decades to come. The variants analyzed are possible alternatives and do not represent recommendations for a specific future course of action.
2018.302.007	Tales of Westpac	Bowman, David K.	Tales of Westpac is a trip down Memory Lane for the former carrier sailor. It contains the author's vintage photography for the two cruises and five squadron newsletters filled with photos and info about the day to day life on an aircraft carrier.
2018.302.008	US Navy Escort Carriers 1942-45	Stille, Mark	Escort carriers made an enormous contribution towards Allied victory both in the Pacific and Atlantic theaters of World War II. Fully illustrated with contemporary photographs and specially commissioned artwork, this book shines a new light on these unjustly overlooked workhorses of the U.S. Navy--ships that helped usher in the Allied victory over the Axis powers in the Atlantic and Pacific.
2018.302.009	Russian/Soviet Aircraft Carrier & Carrier Aviation Design & Evolution, Vol. 1	Harkins, Hugh	The author provides specifications for Russian/Soviet aircraft carriers and describes the design and evolution of Russian/Soviet carrier aviation along with photographs and diagrams of carriers and aircraft. Includes information on seaplane carriers, Project 71/72, Graf Zeppelin, Project 1123 ASW Cruiser & Project 1143-1143.4 heavy aircraft carrying cruiser.
2018.302.010	Russian/Soviet Aircraft	Harkins, Hugh	The author provides

Object ID	Title	Author	Summary
	Carrier & Carrier Aviation Design & Evolution, Vol. 2		specifications for Russian/Soviet aircraft carriers and describes the design and evolution of Russian/Soviet carrier aviation along with photographs and diagrams of carriers and aircraft. Includes aircraft carrying heavy cruisers -- Project 1143.5/6 Kuznetsov class, INS Vikramaditya & the nuclear powered ASW/Attack carriers -- Project 1153, Project 1160, Project 1143.7 UL'Yanovsk & Project 23000E
2018.302.011	Vought F-8 Crusader : Development of the Navy's First Supersonic Jet Fighter	Spidle, William	This book covers the F-8 Crusader's design and evolution from the earliest Navy Bureau of Aeronautics specifications through mock-up, prototype, flight test, and carrier qualifications. The author includes never-before-seen photographs acquired through his close association with the Vought Heritage archives in Dallas, TX. Contents: Wins, but losses -- Navy day fighter program -- First flights -- F8U-1: the crusade begins -- Fleet introduction/record flights -- F8U-1T: a crusader built for two -- F8U-2: improving the breed -- F8U-3: a super crusader -- Modernization -- Paper airplanes -- A date with NASA -- Epilogue.
2018.302.012	Fire on the Flight Deck	Sapp, Darren	"Fire on the flight deck!" Ominous words when living on an aircraft carrier hundreds of miles at sea. An American supercarrier flight deck is considered by many to be one of the most dangerous places on earth. Multi-million dollar aircraft launching, landing, and taxiing in the space of a few football fields, all orchestrated by a control tower and flight deck crew whose average age is nineteen. During the Cold War of the 1980s, this massive ship provided the largest, mobile weapon in the United States arsenal, instilling fear and respect among opposing forces. While the supercarrier can deliver an awesome display of firepower, it carries an inherent danger for those who fly and work among the aircraft.

Object ID	Title	Author	Summary
			Brian Donley survived boot camp and completed aircraft firefighter school to serve as a yellow shirt on the flight deck of the USS William Halsey. Would his training, will, and courage equip him for the most challenging day of his life? Darren Sapp's breakout novel delivers the sights, sounds, and action of a supercarrier. He served in the inaugural flight deck crew of the aircraft carrier USS Theodore Roosevelt as a crash crew member and yellow shirt aircraft director. (from back cover)
2018.302.014	Rear Admiral Larry Chambers, USN : First African American to Command an Aircraft Carrier	Murphy, Ric	The first African American aircraft carrier commander, Rear Admiral Lawrence Cleveland Chambers (1929-) played a prominent role as captain of the USS Midway during the Vietnam War. During the evacuation of Saigon--known as Operation Frequent Wind--he famously ordered several UH-1 helicopters pushed overboard to make room for an escaping South Vietnamese Air Force major to land his Cessna. Chambers, who had only commanded Midway for a few weeks, gave the order believing (wrongly) that he would be court-martialed for the \$10 million loss. This biography covers his early life and military career, including his role in the desegregation of the U.S. Navy during a period of racial strife.
2018.302.015	USS Nimitz (CVN-68) - Around the World - 1996-1998	Bassett, Scott (ed.)	The ship began an Extended Selected Restricted Availability (ESRA) at Bremerton Naval Shipyard in July 1996 which lasted into January 1997. Some details and photos from this yard availability are included. In this period the ship had its 10th change of command on November 8th 1996 and its 1996 Christmas party. The ship commenced sea trials in January 1997 and loaded weapons on 23 January. Other predeployment activities documented included workups in Southern California, a

Object ID	Title	Author	Summary
			Surge Ops exercise, and a Family Day cruise on 24 May. After a decade of being homeported in Everett, WA Nimitz departed on 1 September 1997 for a round-the-world deployment to its new homeport of Norfolk, VA. She loaded Air Wing 9 in San Diego on 4-5 September and departed for the Western Pacific, Indian Ocean, Suez Canal. Mediterranean Sea and Atlantic Ocean with Commander Carrier Group 7 embarked. Significant activities during the deployment included Operation Southern Watch and Exercise Valiant Blitz. Port calls were made at Yokosuka, Japan; Hong Kong; and Jebel Ali, U.A.E. (4 times). She offloaded the air wing in Mayport Florida on 26-27 February 1998 and arrived in Norfolk on 1 March 1998. A Tiger Cruise was conducted between Mayport and Norfolk. Air Wing 9 consisted of: VF-211 (F-14); VFA-146 (F/A-18C); VFA-147 (F/A-18C); VMFA-314 (F/A-18C); VAW-122 (E-2C); VS-33 (S-3B); VAQ-138 (EA-6B); VQ-5 Det.9 (ES-3A); and HS-8 (HH/SH-60H/F).
2018.302.016	USS Hancock (CVA-19) - 1972	Taylor, C. J. (ed.)	Pictorial account of Essex-class aircraft carrier USS Hancock (CVA-19)'s Deployment to the Western Pacific in 1972. The ship departed Alameda on 7 January and participated in combat operations in the Vietnam War from stations in the South China Sea. Port visits included Pearl Harbor, Subic Bay, Yokosuka and Hong Kong. Highlights included visits by a Bob Hope tour and a Miss America USO show. The ship returned to Alameda on 3 October. Carrier Air Wing 21 (CVW-21) was embarked for the deployment and included the following: VF-211 (F-8J); VF-24 (F-8J); VA-212 (A-4F); VA-164 (A-4F); VA-55 (A-4F); VFP-63 Det. 1 (RF-8G); VAQ-135 Det. 5 (EKA-3B); VAW-111 Det. 2 (E-1B); and HC-1 Det. 7 (SH-3G).
2018.302.017	CVW : US Navy Carrier Air	Crutch, Mike	COPYRIGHTED EBOOK.

Object ID	Title	Author	Summary
	Wing Aircraft, 1975-2015, Vol. 1 : F-4 Phantom II, F-8 Crusader, F-14 Tomcat		Do not copy nor distribute. Permission given to store on our library drive by Mike on 6/30/2018 via email. A brief history of each CVW is given in Chapter One, with emphasis on those fighter squadrons and reconnaissance fighter detachments as assigned to each since 1 January 1975. The CVWs are listed in numerical order, and the narratives for each are headed by a panel detailing MODEX allocation, squadron, aircraft type and dates assigned. The accompanying narratives are biased towards the fighter and 'recce fighter' elements of the CVW, details of major deployments (i.e. cruises) and operations provide context as appropriate to the political, military and regional situations at the time. Mike Crutch's email at publication was a9aviation@gmail.com.
2018.302.018	USS Ticonderoga (CV-14) - Far East Cruise - 1964	Trotter, Edgar S. (ed)	Pictorial account of the USS Ticonderoga (CVA-14) cruise to the Far East. the ship departed San Diego, CA 14 April 1964 returned to San Diego 25 November 1964. This is not a typical cruise book. There are ship nor air wing crew photos. There are a few photos of the Captain. Items of interest and ports of call: article on Why Carriers; map of Tonkin Bay; Tico in the Gulf of Tonkin; p. 15 cruise chronology; change of command; Dependents Cruise; Open House; Tico ball; crew pictures; Air Ops; Philippines; Japan; p.231 shows department heads; history of the Ticonderoga; In Memoriam. On board: Carrier Air Wing Five (CAW-5) VF-51 (F-8E) VF-53 (F-8E) VA-52 (A-1H) VA-56 (A-4E) VA-55 (A-4E) VAH-4 Det. B (A-3B) VFP-63 Det. B (RF-8A) VAW-11 Det. B (E-1B) HU-1 Det. B (UH-2A)
2018.302.019	U. S. Navy and Marine	Kinzey, Bert	The latest book from Detail

Object ID	Title	Author	Summary
	Carrier-Based Aircraft of		& Scale is a unique look at all of the American carrier-based fighters, scout/dive bombers, and torpedo bombers of World War II. Each of the well-known aircraft types are covered, but so too are the lesser known aircraft that reached the flying prototype stage during the war. The book also includes a section with maps showing the major battles and engagements as well as the capital ship losses on both sides in the Pacific Theater. The final section covers Navy paint schemes and markings used on these aircraft in the years leading up to the war, and how they continued to evolve during the conflict. The Navy and Marine fighter chapter covers fourteen aircraft. The most famous of these are the F2A Buffalo, F4F Wildcat, F4U Corsair, and F6F Hellcat. Also included are those aircraft that were flying operationally as the war came to an end, such as the F7F Tigercat, F8F Bearcat, and the FR-1 Fireball, although none of these arrived in theater in time to see combat. Finally, this chapter covers those aircraft that were not pursued for a variety of reasons after the prototype flew. These aircraft either carried exotic names like Airabonita, Skyrocket, Flying Pancake, Dark Shark, and Stingeree, or they were never given a name, simply being known by their designation like the Curtiss XF14C and XF15C-1, and the Boeing XF8B-1. The next chapter covers eleven torpedo bombers, scout/dive bombers, and the beginning of a new generation of attack aircraft. Again, the well-known types, including the two Curtiss aircraft named Helldiver, the Devastator, Vindicator, Dauntless, and Avenger, are covered. Other named aircraft in the chapter are the Buccaneer, Sea Wolf, and the Destroyer, while the designation-only aircraft include the Brewster XSBA-

Object ID	Title	Author	Summary
			1 and SBN-1, and the Kaiser-Fleetwings XBTK-1. Each aircraft section includes photographs and a history of the aircraft. For those with significant histories, each variant of the aircraft is described and illustrated. Photographs of cockpit and aircraft details, long the trademark of Detail & Scale publishing, are also included for the most famous variants. The book also includes two appendices. The first provides maps and a brief history of naval combat in the Pacific Theater in World War II. The second contains a significant amount of colorful details on the paint schemes used on Navy and Marine aircraft, and the general marking systems in use. This look begins with the colorful "Yellow Wing" aircraft of the 1930s and shows how war clouds on the horizon in 1940 began a six-year period of evolving camouflage schemes for naval combat aircraft. Details of Navy markings over the same timespan are also provided and are profusely illustrated with artwork. U. S. Navy and Marine Carrier-Based Aircraft of World War II is a unique look at a fascinating period of American naval aviation history. The book features 271 pages, with over 280 photographs (more than 60 in color) and 31 full color aircraft profiles and over 60 markings illustrations. Coverage includes: " Fighters " F2A Buffalo " F4F/FM Wildcat " XFL Airabonita " XF5F Skyrocket " F4U/FG/F3A Corsair " XF14C " F6F Hellcat " F7F Tigercat " F8F Bearcat " XF5U Flying Pancake " FR Fireball

2018.302.021	USS Hornet (CV-12) - First War Cruise - 1943-1945	Unknown	Pictorial account of the World War II Pacific Theatre combat deployment of the Essex-class aircraft carrier USS Hornet (CV-12) through 19 June 1945. "Reprinted from original that was lithographed on board the U.S.S. Hornet." Pictures of commissioning 29 November 1943, joining Task Force 58, flight deck operations, Truk, Neptunus Rex (crossing the line), Battle of Philippine Sea, R&R, strikes on Japanese mainland, Yamato, UNREPs, various departments at work, and general life aboard the ship. Map of Pacific operations centerspread, scoreboard (ships struck and planes shot down), and statistical summary.
2018.303.001	Fire in the Sky : Triumph and Tragedy in America's Missile Program	Keeney, Douglas	The modern era of rocket and missile technology began in World War II and accelerated steadily throughout the following decades, propelled first by an arms race between the USA and the Soviet Union, and then by a space race. In the course of experimenting with vehicle design and power sources for air-to-air and air-to-ground missiles as well as space applications, America's rocket programme went through days of explosive failures and spectacular successes. This book offers a detailed account of the triumphs and tragedies of American rocketry, from the early days of weapons design to the Shuttle disaster. "What is the difference

Object ID	Title	Author	Summary
			between 4th of July fireworks and a Tomahawk missile? Answer: not much. Only intent and a little guidance technology, for peace or war, is always the question. In either case, the modern development of rockets and missiles makes for a fascinating exploration of how man-made power can overcome Nature's most elemental force - gravity."
2018.303.002	Regulations of the U.S. Naval Academy	United States Naval Academy	Naval Academy standing orders, Brigade Orders Contents: 1. Schedule of Demerits and Extra Duties 2. 2018.303.003	Grumman : Sixty Years of Excellence	Gunston, Bill	For nearly sixty years the name Grumman has been synonymous with naval aviation. This unique company has supplied aircraft which have consistently broken new ground both in design and performance. "Grumman: Sixty Years of Excellence," written by the world's foremost aviation writer tells the story of the men and machines that have made Grumman so special. Bill Gunston, for many years editor of "Flight International," weaves a powerful story that traces the development of a company that has remained independent and unique since it was formed by Leroy Randle Grumman in 1929. It is also about Long Island and the people who have supported the company from that day in January 1930 that the Grumman Aircraft Engineering Corporation started operations in an abandoned garage in Baldwin, New York. "Grumman: Sixty Years of Excellence" is a tribute to a single-minded pursuit of excellence by a company and its employees.

Object ID	Title	Author	Summary
			The growth of Grumman is traced through each decade — from the first flight of the XFF-1 to the dynamic years of World War II and the successes of the Wildcat and Hellcat; from post war jets to today's operational aircraft — the Navy's A-6 Intruder and F-14 Tomcat, also the Army's OV-1 Mohawk, the Air Force's EF-111 Raven. The future is equally exciting — "Grumman: Sixty Years of Excellence" considers the X-29 and the challenges beyond. But Grumman is much more than an airframe manufacturer and no book would be complete without mention of its other products, from canoes to truck bodies. It is also a world leader in electronic systems and integration, avionics, test equipment and advanced computer simulators. Grumman has always played a major role in the development of space, which reached a high point when its Lunar Module placed men on the moon. And as we head for the 1990's, Grumman is deeply involved in building the Space Station. Illustrated throughout, "Grumman: Sixty Years of Excellence" has many photographs not seen before. These, skilfully captioned, augment this unique story of a unique company revealing the many aspects that combine to make the Grumman Corporation. (from dust jacket flap)

2018.303.005	Pearl Harbor : From Fishponds to Warships : A Complete Illustrated Hstory	Seiden, Allan	In this timely release, author-photographer Allan Seiden walks us through Pearl Harbor's fascinating history, from pre-settlement days when the spot was an uninhabited tropical lagoon, to the famous bombing in 1941, to the present. Thorough and insightful, this

Object ID	Title	Author	Summary
			meticulously researched text and collection of photos will serve as a valuable resource for everyone interested in Pearl Harbor. Pearl Harbor is seen through a window of catastrophe, forever frozen in time as the 'date which will live in infamy.' But the years leading up to and following the surprise attack are rarely examined, and this rich history is often missed. 'From Fishponds to Warships: Pearl Harbor' not only gives a detailed visual account of the catastrophic raid, but it provides a much-needed context for the event, examining the circumstances which brought this once-tranquil lagoon into the international spotlight.
2018.304.001	Milestones of Aviation : Smithsonian Institution, National Air and Space Museum	Greenwood, John T. (ed)	A history of aviation developed in concert with the Smithsonian Institute. More than 400 illustrations, including 149 in color.
2018.304.002	Target Tokyo : Jimmy Doolittle and the Raid that Avenged Pearl Harbor	Scott, James M.	From the Introduction--"The Doolittle Raid is one of the most iconic stories of World War II. Even before rescuers could pluck all the dead from the oily Hawaiian waters following Japan's December 7, 1941, surprise attack on Pearl Harbor, American planners started work on an ambitious counterassault, a strike not against an outlying enemy base in the far-flung Pacific Islands but against the heart of the Japanese Empire: Tokyo. That April 1942 raid led by famed stunt and racing pilot Jimmy Doolittle would test American ingenuity, gamble the precious few flattops and warships left in the Pacific Fleet's battered arsenal, and jump-start Japan on the road to ruin. Sixteen Army bombers crewed by eighty volunteers specially trained in carrier takeoffs would thunder into the skies over the enemy's capital and key industrial cities, pummel factories, refineries, and dockyards and then escape to Free China. At home in the United States the mission

Object ID	Title	Author	Summary
			would derail questions over the government's failure to guard against Japanese aggression in the Pacific and buoy the morale of a shell-shocked nation. The forty-five-year-old Doolittle would come to personify the raid's success, his grinning image would be plastered around the nation on war bond posters, and strangers would write him poems and songs. A Missouri own would even take his name."
2018.304.003	Code Talker	Nez, Chester	This book is the story of the only original World War II Navajo code talker that is still alive. During World War II, the Japanese had managed to crack every code the United States used. However, when the Marines turned to its Navajo recruits to develop and implement a secret military language, they created the only unbroken code in modern warfare and helped assure victory for the United States over Japan in the Pacific.
2018.304.004	MiG Units of the Vietnam War	Toperczer, Istvan	This is a special binding for the Veterans of Foreign Wars which combines the Osprey Combat Aircraft volumes 25 and 29. Part 1: The erstwhile enemy of the USAF and US Navy during the nine years of American involvement in the Vietnam War, the Vietnamese Peoples' Air Force (VPAF) quickly grew from an ill-organised rabble of poorly trained pilots flying antiquated communist aircraft into a highly effective fighting force that more than held its own over the skies of North Vietnam. Flying Soviet fighters like the MiG-17, and -19, the VPAF produced over a dozen aces, whilst the Americans managed just two pilots and three navigators in the same period. István Toperczer is a flight surgeon with the Hungarian Air Force. In his spare time, he has become one of the few individuals from outside Vietnam to be given open access to the files of the

Object ID	Title	Author	Summary
			Vietnamese People's Air Force. He has made several visits to Hanoi, and other Vietnamese cities, in the past five years, and has interviewed many of the leading aces from the war years. Mark Styling has illustrated several books in both the Aces and Combat Aircraft series. Since switching mediums from airbrush to Mac art he has produced some of the best profiles Osprey has ever used. Iain Wyllie is one of Britain's leading cover artists. Since becoming a full-time aviation artist he has created over 40 cover artworks for Osprey's hugely successful Aircraft of the Aces and Combat Aircraft series. CONTENTS Establishing the VPAF Training MiG-17 MiG-19 MiG-21 Appendices Full Ace Listing Confirmed Kill Listing Commentary on the Colour Profiles (https://ospreypublishing.com/mig-17-and-mig-19-units-of-the-vietnam-war) Part 2: Having honed their piloting skills on the subsonic MiG-17 and transonic MiG-19, the Vietnamese Peoples' Air Force (VPAF) received their first examples of the legendary MiG-21 supersonic fighter in 1966. Soon thrown into combat over North Vietnam, the guided-missile equipped MiG-21 proved a deadly opponent for the USAF, Navy and Marine Corps crews striking at targets deep into communist territory. Most of the VPAF's 12+ aces scored their bulk of their kills in the MiG-21, which was then the best fighter produced by Russia's premier fast jet manufacturer, Mikoyan Gurevich. Well over 200 MiG-21s were supplied to the VPAF, and the numerous models and the schemes they wore are

2018.304.010	Illustrated Encyclopedia of Combat Aircraft of World War Two, The : A Technical Directory of the Warplanes of 1939-1845	Gunston, Bill	Contains 150,000 words of text and 780 illustrations, including 25 cut-away drawings and facts and figures on about 250 aircraft.
2018.304.011	First Hellcat Ace, The	McWhorter, Hamilton	Mac McWhorter was a naval aviation cadet undergoing training when Pearl Harbor was attacked. After earning his wings IN 1942 he was trained as a fighter pilot in the F-4F Wildcat and then later to the Grumman F6F Wildcat--the fighter the US Navy would use to crush Japanese air power during the long offensive from the Southwest Pacific to the shores of Japan. From mid 1943, he was constantly engaged in the unforgiving and deadly aerial warfare that characterized the battles against Imperial Japan. His fifth aerial victory, in November 1943 off Tarawa Atoll, made him the first ace in the Hellcat, and seven subsequent victories ensured his place in the annals of air-to-air combat.
2018.304.012	F/A-18E & F/A-18F Super Hornet : In Detail & Scale	Kinzey, Bert	A highly informative and detailed inside-&-out look at the modern Super Hornet U.S. fighter-bomber. Contains full color profiles, B&W line art, technical data, 51 color photos, and dozens of B&W photos. Kinzey. 80 pgs. (from squadronsignalpublications.com)
2018.304.014	Midway	Barker, A. J.	Midway was psychologically and logistically an important island to the American Navy. It served as a sentry for Hawaii and as a fueling station for American submarines. After the carrier launched Doolittle raid on Japan, the Japanese

Object ID	Title	Author	Summary
			determined that the only feasible land based airport had to be Midway. So both sides had a vested interest in the island. The Americans had also broken the Japanese secret code and knew that an attack was eminent. The ensuing battle proved to be the pivotal point in the Pacific War.
2018.304.015	Green Five	Cordell, Charles E.	Inscribed to Bob and signed by the author. Green Five was the Navy's primary air route between World War II aircraft factories in the Middle West and the West Coast. The route soon became familiar territory to Charles Cordell, a young Marine lieutenant, who devoted six wartime months to shuttling military aircraft from factory to port of embarkation. After the war, Cordell ran an insurance business in El Cajon, California. Lt. Cordell's picture appears in 2005.319.143 US Naval Air Facility, Air Ferry Squadron Two, Columbus Ohio. Contents: Learning the trade -- Retrofit -- Back in the saddle -- Lemon delivery -- Alone to San Diego -- Curtiss novelty -- A pair of aces -- Little red toy -- Slightly used twins -- Midwestern ice box -- Adios via SNJ-6 -- Radar transition.
2018.304.016	Bataan Diary	Ashton, Paul L.	Eyewitness Account of Army Surgeon Dr. Paul Ashton. Rich detailed narrative of events and experiences traveling from one unit to another throughout Bataan. Spending time with the Philippine Army setting up the original M.A.S.H.-type units, insight was gained as to how the War progressed. Captured by the Japanese and put into Bilibid Prison for years, he has many stories to tell. Not the least of these was the return of General MacArthur and rescue of the few survivors. There are eyewitness accounts from fellow prisoners, soldiers, Filipinos, civilians, nurses,

Object ID	Title	Author	Summary
			etc., and personal letters from Dr. Ashton and his wife. Learn what it was like there and how it feels to be a prisoner of war. Find out about little known and seldom-heard-of events (Tayabas Detail, the Second Death March, Hell Ships, The Prison Camps, and more). (from the author's webpage, http://www.prisonerofwar.com/bataan.html).

2018.305.004	Explanatory Supplement to the Astronomical Ephemeris and the American Ephemeris and Nautical Almanac	Great Britain. Commissioners of Longitude	from the preface: " The purpose of this Explanatory Supplement is to provide the users of The Astronomical Ephemeris ... and The American Ephemeris and Nautical Almanac with fuller explanations of their content, derivation, and use than can conveniently be included in the publications themselves. A rigorous treatment is given of the fundamental basis of the tabulations; this is supplemented by a detailed derivation, showing how each tabulated quantity is obtained from basic data. The use of the ephemerides is also explained and illustrated, but completeness is not attempted. Auxiliary tables, lists of constants, and miscellaneous data are added, partly for convenience of use with the Ephemeris and partly for reference." Prepared jointly by Nautical Almanac Offices of the United Kingdom and the United States of America The book is a detailed reference text to the algorithms and theories used to produce The Astronomical Almanac. It covers the history, significance, sources, methods of computation, and use of the data presented in The Astronomical Almanac. Because The Astronomical Almanac prints primarily positional data, this book

Object ID	Title	Author	Summary
			goes into great detail on techniques to get astronomical positions. The book, however, is not a basic textbook on spherical, dynamical, or positional astronomy. It supplements such textbooks because it contains detailed explanations and current
2018.305.005	Eleven : The Movie	Enander, Kermit	Eleven WWII veterans from Carrier Air Group 11 (CVG-11) share stories with the namesake grandson of their fellow airman (George Retelas). Featuring rare U.S. Navy footage and wartime photos, this national treasure is told entirely by the surviving veterans- in their own words. Discover personal stories from Guadalcanal to the USS Hornet, by Naval Aviation heroes of Carrier Air Group "Eleven."
2018.305.006	Thirteen Days	Donaldson, Roger	The film is set during the two-week Cuban missile crisis in October of 1962, and it centers on how President John F. Kennedy, Attorney General Robert Kennedy, and others handled the explosive situation. ----- In October, 1962, U-2 surveillance photos reveal that the Soviet Union is in the process of placing nuclear weapons in Cuba. These weapons have the capability of wiping out most of the Eastern and Southern United States in minutes if they become operational. President John F. Kennedy and his advisors must come up with a plan of action against the Soviets. Kennedy is determined to show that he is strong enough to stand up to the threat, and the Pentagon advises U.S. military strikes against Cuba--which could lead the way to another U.S. invasion of the island. However, Kennedy is reluctant to follow through, because a U.S. invasion could cause the Soviets to retaliate in Europe. A nuclear showdown appears to be almost inevitable. Can it be prevented? Written by <jgp3553@excite.com> (from IMDb.com) Based on "The Kennedy

2018.305.007	Battleship Yamato	Morris, Ashley (producer/director)	In 1934 the Japanese begin designing The Yamato, the most powerful battleship in history. Japan is determined to retain control in the Pacific so builds a ship 30 percent larger than anything their enemies have. Constructed in absolute secrecy, the Japanese go to extraordinary lengths to ensure no detail is revealed. (Premiere Date: March 28, 2018)
2018.305.008	Impact : The History of Germany's V-weapons in World War II	King, Benjamin	An in-depth account of Hitler's V -weapons, the devastation they caused, and the massive allied countermeasures taken to destroy them. (dust jacket rear) During World War II, when the V1s and V2s soared in their thousands against London, Antwerp and other targets, they were launched by Germans who had made a technological leap over their Allied scientific counterparts. Ultimately, as the German front fell back, the V launch-sites and factories were overrun. Nevertheless, for a time, the Germans had wielded a revolutionary new weapon that we now know pointed to the future of warfare. This intensely researched book overturns many of the myths about the V-weapons by tracing their development under pressure, their employment in combat, and the massive effect their existence had on operations. (from Amazon.com)
2018.305.009	Hitler's Rocket Sites	Henshall, Philip	Explores the Nazi bases used to launch V1 and V2 rockets at England from northern France and speculates on the real goals of the V2 program, including the possible use of chemical or nuclear warheads.

Object ID	Title	Author	Summary
2018.305.010	Scramble the Seawolves	Arballo, Jeff	The untold story of the most decorated squadron in US Naval Aviation history...the HA(L)-3 Seawolves. From meager beginnings, the most effective and offensive Navy squadron, Helicopter Attack Light Squadron Three Seawolves, was established inside the Republic of Vietnam in support of Task Force-116, Operation Gamewarden in 1967. The Navy Seawolves were an all-volunteer squadron of approximately 3000 brave young men. 9 detachments, consisting of two crews, 4 men each, were strategically located throughout Military Regions III and IV, Mekong Delta. Over their 5 year existence, The Battle of VC Lake, September 1970, is remembered as one of the most intense combat events that included multiple Seawolf detachments, Sealords and Dustoff 86. Hear the raw emotional account of this battle from those that survived and witnessed their Seawolf brother's parish. The HA(L) -3 Seawolves would become the most decorated Squadron in the Vietnam War, arguably in all of Naval Aviation History with 5 NAVY Crosses awarded, 31 Silver Stars, 219 Distinguished Flying Crosses, 15,964 Air Medals, countless other Medals, and received multiple Presidential Unit Citations, yet their story is virtually unknown to most.
2018.305.011	Otokotachi no Yamato (The Men of the Yamato)	Jun, Henmi	Based on Henmi Jun's novel Otokotachi no Yamato. (from IMDb.com:) Plot Summary for Otokotachi no Yamato (2005) Makiko Uchida arrives in a southern Japanese port hoping to find a boat that will take her to the final resting place of the Battleship Yamato on the 60th anniversary of its sinking. She is rebuffed by all until she reveals to Katsumi Kamio that she is the daughter of Petty Officer Uchida. Kamio is

Object ID	Title	Author	Summary
			surprised for he thought unlike himself, Uchida had been lost when the Yamato was besieged and sunk on April 7, 1945 by American aircraft which prevented its fulfilling a final suicide mission against the American fleet battling to capture Okinawa. Kamio and Uchida were part of a close set of comrades that proudly and bravely served on board this, the largest battleship ever constructed. He agrees to journey with Makiko with only the help of Atsushi, a 15 year old deckhand. As he pilots the way throughout the rough 15 hour journey Kamio reminiscences about life aboard the Yamato during the war and also about the sailor's mothers and girlfriends left back home. Summary written by Brian Greenhalgh
2018.305.012	Mariner/Marlin : Anytime, Anywhere	Raithel, Albert (ed)	The intent of the book is to provide as much history about the two great navy flying boats as possible: the Mariner and the Marlin.
2018.305.013	Boat in the Sky, The : A 35,000 Mile Pacific Odyssey	Proctor, John	The ultimate traveling machine-a Grumman Albatross. Designed in 1944, this antique 30,000 pound ex-U.S. Navy flying boat was converted to a modern yacht. The voyage ranged from ice-filled lakes above the Arctic Circle to the chilly waters of the Tasman Sea, covered 14 months, 35,000 miles, and 12 countries. No ordinary yacht can take off and land in pristine high mountain lakes or landlocked South Pacific lagoons. Joining pilots and SCUBA divers Joyce and John Proctor as they travel to exotic lands and seas, such as Siberia and South Pacific cannibal islands, in search of old flying boat bases. This VHS tape is very interesting for two reasons. First to view and listen of the problems these two had in acquiring Av Gas and other provisions as they made their trek around the Pacific. The great places that they were

Object ID	Title	Author	Summary
			able to access by using an amphibian aircraft makes this tape well worth the price. The second, and to me the most important reason, was to discover that the Grumman Albatross that they choose to make the trek in was the same one that I flew in as Navigator while serving in the Navy. I was stationed at NAF Oppama Japan in 1957 and 1958, and have well over 1000 flight hours logged in on that aircraft when it was Navy 137908. The fond memories this tape brought back to me are priceless. I only wish that the modifications the Proctors made to the interior of the Aircraft had been there when I was a crewman. It would have made the long hours we spent on search and rescue a lot
2018.307.001	Captain Charles S. Melton, USAF, with VC-62, 1953-1954	Melton, Charles S.	Charles Smith Melton, Captain in the United States Air Force (USAF), was loaned to the Navy in 1953 and assigned to VC-62, Light Photographic Squadron, based at Naval Air Station, Jacksonville, FL (NAS Jax). This collection includes his diary of the 1954 Midway cruise, starting on January 3, 1954, and ending on August 2, 1954. The diary includes aircraft mishaps, ports of calls, and other items about the daily life of the ship. While on the Midway cruise, Melton flew the F2H-2P Banshee. Also included are Captain Melton's first report about his Navy experience that covers July 1, 1953 through September 30, 1953. Additionally, there are two VC-62 newsletters from Naval Air Station (NAS) Jacksonville (JAX) from October and November of 1953. These newsletters record names of men who will go on the 1954 Midway cruise, plus several items about Melton including his being awarded his Navy wings. Tragically, Melton was killed on June 25, 1960 in an airplane crash in Mallorca, Spain. The items were donated by his daughter, Candace.

Object ID	Title	Author	Summary
	-1, The : N.A.A.S. Cecil Field NAOTC		syllabus with seven period in length. Imperatives that instructors have most of the kinks ironed out of the students by the end of the second "dummy" hop. To achieve air discipline needed to run off a smooth gunnery flight in only two hops is fairly hard but no means impossible. On the back is handwritten: U.S. Navy-Ensign Rollo, served on U.S.S. Saratoga--Pacific Theatre--1942-1945--many combat missions--dive bombers--1945 returned to U.S.--worked as instructor - Florida--stayed in navy--became first Navy helicopter pilot--first to rescue downed Navy pilot-Korean War" None of this could be verified.
2018.310.001	Final Impact : A Novel of the Axis of Time	Birmingham, John	In the year 2021 a multinational fleet--experimenting with untested weapons technology--pitched through time, crash-landing in 1942. The world is thrown into chaos as Roosevelt, Hitler, Churchill, Tojo, and Stalin scramble to adapt to new, high-tech killing tools, and twenty-first-century ways of war. For "uptimers" like Britain's Prince Harry and the men and women who serve aboard the supercarrier USS Hillary Clinton, war is a constant struggle with their own downtime allies, who are mired in ignorance and bigotry. As the Allies counter the Nazi assault and set off for the coast of France, Japan begins to buckle, soon every battle will be played out in a lethal dance of might and intelligence, unholy alliances and desperate gambles, and each clash will be fought with the ultimate weapon; knowledge from the future. Thanks to the historical records, all sides know that two superpowers will emerge, while the losers will be pounded into submission. But time has shifted on its axis, so none know who will survive, or

Object ID	Title	Author	Summary
			how peace will take hold in a world turned upside down. These are the questions that John Birmingham brilliantly answers in his critically acclaimed adventure of war and imagination. "The action is nonstop, the characters very real—and very different from each other—and, to coin a phrase, it makes you think." —S. M. Stirling, author of <i>Island in the Sea of Time</i> From the Trade Paperback edition.
2018.310.002	Handbook of Magnetic Compass Adjustment and Compensation	U. S. Navy Hydrographic Office	This document has been prepared in order to present all pertinent information regarding the practical procedures of magnetic compass adjustment in one text. As such, it treats of the basic principles of compass deviations and their correction, and not of the details of particular compass equipment. Although this text is presented as a systematic treatise on compass adjustment, ship's personnel who are inexperienced with compass correction will find sufficient information. In this handbook, the term compass adjustment refers to any changes of permanent magnet of soft iron correctors whereby normal compass errors are reduced.
2018.311.001	Andrew Jackson Higgins and the Boats that Won World War II	Strahan, Jerry E.	Andrew Jackson Higgins is perhaps the most forgotten hero of the Allied victory. He designed the LCVP (landing craft vehicle, personnel) that played such a vital role in the invasion of Normandy as well as the first effective tank landing craft. During the war, New Orleans-based Higgins Industries produced over twenty thousand boats, including lightning-fast PT boats and the twenty-seven-foot airborne lifeboat. Higgins dedicated himself to providing Allied soldiers with the finest landing craft in the world, and he fought the Bureau of Ships, the Washington bureaucracy, and the powerful eastern

Object ID	Title	Author	Summary
			shipyards to succeed. Jerry Strahan's biography of Higgins reveals a colorful, controversial character?hard fisted, hard swearing, and hard drinking?who was an outsider to New Orleans' elite social circles. He was also, however, a hardworking boatbuilder who became a major industrialist with a worldwide reputation?even Hitler was aware of Higgins, calling him "the new Noah."

2018.311.006	Grumman XF5F-1 & XP-50 Skyrocket	Lucabaugh, David	(from ginterbooks.com:) The Skyrocket story was originally published in the American Aviation Historical Society (AAHS) Journal in 1989. All of the comic book reading public during the 1940's followed the adventures of "Blackhawk" and his mighty men as they conquered the world of evil. Those of us with a mindbent toward things aeronautical knew that it was not "Superman" or "Batman" who held the keys to a crime-free society, bring on "Blackhawk." Dressed in daring dark uniforms, the dashing figures of this 1940's version of the "A-Team" were mounted on the very latest of aircraft. Through the paint brush the artist portrayed an entire squadron of snub-nosed twin engine fighters which those of us old enough to remember know that only a single actual aircraft existed for the artist to illustrate, the Grumman XF5F-1 Skyrocket. --Steve Ginter 32 PAGES, 83-B&W PHOTOS, 5-PAGES DRAWINGS INCLUDING 3-VIEWS ORDER NUMBER - NF31 - \$7.95
2018.311.007	Boeing XF8B-1 Five-in-one Fighter	Koehnen, Richard	The F/A 18 Hornet was not the first Naval Aircraft designed to meet all the Navy needs. The XF8B-1 was another Boeing called it the "Five-in-one" fighter (fighter, interceptor, dive bomber, torpedo or horizontal bomber). This aircraft had the ability of carrying two 1600lb bombs in a internal weapons bay and two more on strong point under

2018.311.010	Kaiser Fleetwings XBTk-1	Kowalski, Bob	(from ginterbooks.com:) The Kaiser Fleetwings XBTk-1 was initially designed to meet a 1943 Navy requirement for a "single-seat carrier based high performance dive bomber." As was the normal war-time practice, design studies were requested from companies without a major production model and, with the Navy's acceptance of the proposal from the Fleetwings company, the design was designated XBK-1..... --Bob Kowalski Also, designed to be a torpedo bomber. Only five were manufactures, and only two flew.
2018.311.011	Curtiss XBT2C-1 Bomber/Torpedo Aircraft Prototype	Kowalski, Bob	(from ginterbooks.com:) This is the fifth book in the series of World War II aircraft designed under the Navy's Bomber Torpedo requirements. The other books are Naval Fighters #24 Martin AM-1/1Q Mauler, #30 Douglas XSB2D/BTD-1 Destroyer, #36 Douglas XTB2D Skypirate and #48 Kaiser Fleetwings XBTk-1. In the eyes of the editor, the Curtiss XBT2C-1 was an attractive aircraft in flight. But these good looks masked the true identity. 73 PAGES, 116 B&W PHOTOS, 48 PAGES DRAWINGS AND TABLES, History of the squadrons and the foreign countries that flew them. A great resource for modelers who are detail oriented, and for those who want to know what's "under the skin" of an aircraft. ORDER NF62 \$17.95
2018.311.012	Phase II Equal Opportunity/Race Relations Program : Equal Opportunity Specialist Consultant Guide, Vol. 1	Chief of Naval Personnel	Designed to build on heightened racial awareness generated by the first phase of the Navy's Race Relations Education Program which

Object ID	Title	Author	Summary
			successfully brought into focus the divisive effects of personal and institutional racism within the Navy. Phase II is structured to ensure mission effectiveness by maximizing the use of all of the Navy's resources.
2018.311.013	Human Behavior and Leadership	Sanford, Filmore H.	A book written for Chief Petty Officers of the U.S. Navy, assisting them in the execution of one of their most important functions, the handling of men. The book not only deals with human behavior and leadership, but shows the inter-relationship between them.
2018.311.014	Your New Career, Planning for Retirement	Bureau of Naval Personnel	Designed to aid, prior to retirement from active service, all naval personnel who desire to obtain civilian employment after retirement.
2018.311.015	Manual for Use in the Preparation and Administration of Practical Performance Tests, A	Wilson, Clark L.	A guide to performance testing of work and forms submitted by naval personnel in various trades and organizations.
2018.311.016	American Practical Navigator, Vol. 1	Defense Mapping Agency Hydrographic/Topographic Center	Navigation classic originally published in 1802 by Nathaniel Bowditch whose intent was to provide a compendium of navigational material understandable to the mariner. Earlier volumes were published by the U.S. Naval Hydrographic/Navigational Office. This edition is published by the Defense Mapping Agency Hydrographic/Topographic Center. Volume I is the text and Volume II contains the tables.
2018.311.018	Manual for Navy Instructors, A : An Introduction to the Navy's Systems Approach to Training	Naval Education and Training Command	There are four factors involved in an training situation. They are the instructor, the trainee, the subject matter and the method of instruction. It is the intent of this manual to show the new instructor (1) how to be a good instructor, (2) what kinds of trainees he is apt to encounter, (3) how trainees learn, (4) how to recognize the important parts of his specialty and how to organize them in a teaching order, (5) the methods of instructions and how, when, and where to use each.
2018.311.019	Sight Reduction Tables for Marine Navigation, Vol. 3 : Latitudes 30-45 [Degrees],	Defense Mapping Agency Hydrographic Center	One of a six-volume series designed to facilitate the practice of celestial

Object ID	Title	Author	Summary
	Inclusive		navigation at sea by the Marc Saint Hilaire or intercept method. The tabular data are the solutions of the navigational triangle of which two sides and the included angle are known and it is necessary to find the values of the third side and adjacent angle. the tables are designed for precise interpolation of altitude for declination by means of means of interpolation tables which facilitate linear interpolation.
2018.311.020	Admiral "Bull" Halsey	Pearl, Jack	As Commander of the South Pacific Area, Halsey's brilliant strategy and daring audacity with the Third Fleet in the battles for the Gilbert Islands, the Marshalls, Guadalcanal and his famous Battle of Leyte Gulf established his reputation as one of the greatest admirals the world has ever known.
2018.311.021	Navy Instructor Manual	Chief of Naval Education and Training	One of a series of publications that provide fundemental guidance within the Naval Education and Training Commandfor development of cirricula, delivery of instruction, and management and evaluation of training programs. The purpose of this particular manual is to present knowledge factors and background information on the theory and techniques of Navy classroom education.
2018.311.022	Command of the Seas	Lehman, John F.	This memoir by John Lehman, the most colorful and controversial Navy Secretary in memory, provides the inside story of the battles at home and abroad that he faced in building a 600-ship Navy. John Lehman came to office refusing to be just another figurehead. During the six years that he served in the Reagan administration, he helped forge an aggressive strategy for achieving maritime supremacy and for rebuilding the U.S. Navy. In this personal account of those years between 1981 and 1987, he speaks with candor and authority about the ills of the military establishment and the struggles and frustrations he encountered.

Object ID	Title	Author	Summary
			Lehman reveals instances of political intrigue, including his dramatic Oval Office confrontation with Admiral Rickover at the time of the admiral's firing in 1982 and battles within the Pentagon and Congress. His explanation of the administration's new naval strategy has been called the most comprehensive and lucid ever written, and his descriptions of the Navy in combat over Libya, Lebanon, and Grenada are packed with fascinating details that only an insider could know. The bold insights he presents of a critical turning point in the Cold War will continue to inform and, with the addition of new material to this paperback edition, promise to renewed discussion of the role of the U.S. Navy then and into the future.
2018.311.023	World War II : 4,139 Strange and Fascinating Facts	McCombs, Don	A compendium of over 4,000 entries on the people, battles and events of World War II for history buffs, trivia fans and curious readers.
2018.311.024	Piloting and Dead Reckoning	Shufeldt, H. H.	The new second edition of Piloting and Dead Reckoning provides all of the information essential for safe navigation in pilotage and dead reckoning. It covers everything from chart construction to radio navigation and includes a new chapter devoted exclusively to the use of electronic calculators and their application to many of the problems associated with piloting and dead reckoning.

2018.311.026	Destination : Tokyo : A Pictorial History of Doolittle's Tokyo Raid, April 18, 1942	Cohen, Stan	Stan Cohen takes you back to America's first major strike against Japan since Pearl Harbor, 4 months earlier. What an incredible event, On April 18, 1942, after being spotted by a Japanese boat, Jimmy Doolittle and his 16 air crews took off from the USS Hornet to bomb Tokyo and other cities. It was a full 24 hours earlier than they had planned to launch, as well as hundreds of miles away from the intended launch point. Before they left, they all knew that with this sudden change in plans, they did not have enough fuel to fly all the way to friendly areas in China to land safely. They chose to go anyway. After hitting their intended targets, every single plane went down either in the water or in occupied China (except one which managed to land in Russia where the crew was promptly interned). Eight men were captured by the Japanese and only 4 of them survived the 3 1/2 year imprisonment. Japan was shocked and mortified that someone was actually able to hit them on their homeland so unexpectedly. It was a major morale booster for the USA at a time when the Japanese were winning in the Pacific. Mr. Cohen includes some fantastic photos and at the end of the book he includes a follow-up about the surviving crew members today. There are also accounts of expeditions that went back to the crash sites and talked to the Chinese people who helped the Raiders make it back home safely.
2018.311.027	Aircraft Carrier Command	Booth, Peter B.	Commanding any warship takes the finest sense of knowledge, experience and leadership. A carrier, even more so given that only about eight are ready for sea out of our eleven nuclear powered carries; each represents an irreplaceable

Object ID	Title	Author	Summary
			national asset. In some 300 pages, this book lays out the basics of command in a brief first section, followed by a host of bold-faced pragmatics in running an incredibly complex operation. This is followed by a detailed analysis of two-dozen case histories of groundings, fires and collisions with no holds barred. Finally, are some 100 pages of command commentary by 24 seasoned carrier and combatant former commanding officers--how about 150 years of sea-command? This latter section is the meat of the book and one that any ship captain, flag officer or future OOD is invited to study, dissect, agree, disagree or modify, for absolutes in command are few and far between. Great reader comments. The second edition was published in 2013 featuring a sixty-page appendix with a great foreword by the head of Naval Aviation, VADM David Buss. Included are five more case studies of maritime miscues that ought not to have happened, led by the infamous hot-dogging master of the Costa Concordia. And finally, are additional inputs from more recent carrier COs and three former super CAGs. Several pages of unbelievable reader comments are tacked on to the final pages of the new edition. The book has found its way into the inner sanctums of all of our carriers, including use at the Surface Warfare School in Newport. The most repetitive comment by former carrier commanding officers is along the lines of "I wish I had had something like this back then!"
2018.311.028	Table of Distances Between Ports	Hydrographic Office, Secretary of Navy	Contains all distances between ports that have been computed by the Hydrographic Office. This 1943 edition was the last edition of the book published. Library of Congress considers it a periodical.
2018.311.029	Ordnance Maintenance : Pistols and Revolvers	War Department	Published for the guidance of ordnance maintenance personnel, this booklet contains information relative to the

			characteristics, functions, inspection, disassembly, assembly, maintenance and repair of the automatic pistol, cal. .45 M1911 and M1911A1, the Colt revolver cal. .45 M1917, and the Smith & Wesson revolver cal. .45 M1917.
2018.311.030	Modern Military Aircraft	Bowman, Martin	This book presents a complete photographic overview of all aeronautical developments of the last two decades. It takes older aircraft such as the B-52 Stratofortress, the F-106 Delta Dart and the F-4 Phantom and illustrates the latest technical developments which have extended their operational lives. It covers aircraft such as the latest Harriers, the Mirage 5, the B-1 bomber, the Aeritalia G.222, Sikorsky HH-53C and many others from all over the world.
2018.311.031	Great Warplanes of the 1990s, The	Yenne, Bill	This book brings the reader up close to the world's top combat aircraft. These combat jets represent not only the state of the art in warplane technology of the 1990s, but the backbone and leading edge of over 40 of the world's top air arms.
2018.311.032	Jane's Encyclopedia of Aviation	Taylor, Michael J. H. (ed)	This definitive reference source brings together in one volume five encyclopedic guides to the history of aviation from the days of hot air balloons to today's supersonic transports. Both aviation professionals and enthusiasts will find the encyclopedia to be a fascinating chronicle of the tremendous advances in flight technology.
2018.311.033	Two Souls Indivisible	Hirsch, James S.	An unforgettable true story, this book stirringly recounts the forging of a legendary, heroic bond between two men. Fred Cherry and Porter Halyburton first met in their shared cell in a brutal POW camp in Vietnam. Cherry, an Air Force pilot, was badly injured after his plane crashed; he became the first black officer to be captured by the North Vietnamese. Halyburton, a young Navy flier, was a naive white southerner thrown in as Cherry's cellmate. Their captors hoped close

Object ID	Title	Author	Summary
			quarters would inflame American -bred racial tensions and break both men. Instead, as Cherry was nursed back to health, a friendship grew strong. The intense connection would sustain both men through the war and throughout their lives. Inspiring, heartbreaking, and remarkable, this story shows how good people can achieve greatness in the most hellish of circumstances.
2018.311.034	Marine Corps Air Station El Toro	O'Hara, Thomas	This publication is dedicated to the history of the Marine Corps Air Station (MCAS) El Toro, with a section covering MCAS Tustin. The book presents a detailed account of the installation's achievements and activities during the entire period of its service to the U.S. military. Over 200 images illustrate the base's history from its role in World War II through Desert Storm.
2018.311.035	Basic Naval Architecture	Barnaby, Kenneth C.	This book on Naval Architecture is written from the standpoint of a practicing designer rather than from the more professorial angle of a teacher. The book also treats subjects "from the ground up" and includes elementary methods while excluding matters of theoretical interest.
2018.311.036	U.S. Marine Corps Aviation Since 1912	Mersky, Peter B.	This heavily illustrated work is the only book to describe the entire history of the U.S. Marine Corps air arm. With hundreds of rare photographs, this book represents a major redesign and update of the last edition. Chapters include descriptions of early development and training, as well as combat deployments during World War I, World War II, Korea, Vietnam, Desert Storm and Operation Iraqi Freedom.
2018.311.037	Battle for the Solomons	Wolfert, Ira	Ira Wolfert was sent to Guadalcanal by the North American Newspaper Alliance early in October. He travelled to Honolulu by troop transport, and by plane down the amazing seaway and skyway the navy has thrown southwest across the Pacific, reaching

Object ID	Title	Author	Summary
			Guadalcanal just as a Japanese task force had battered its way through, and the Americans were slugging it out with them, toe to toe. The most vivid and exciting eye-witness account of fighting in three dimensions ...
2018.311.038	Navy at Point Mugu, The	Nichols, Gina	Point Mugu has played a major part in naval history since 1943, when a small group of US Navy Seabees and several newly organize amphibious units headed across the Oxnard Plain to establish an advance base training facility. Toward the end of World War II, the small naval air base began testing newly developed guided missiles, pilotless aircraft, and special weapons to combat kamikaze pilots. this early testing transitioned Point Mugu from a temporary base into a pioneer in the world of science and national defense. On October 1, 1946, the Naval Air Missile Test Center Point Mugu and, later, the Pacific Missile Range were established to create, research, and test weapons systems. Point Mugu continues to support many diverse military missions, including testing weapons systems, operating space satellite systems, and providing radar and communication support to the naval aviation community.
2018.311.039	Dream Machine, The : The Untold History of the Notorious V-22 Osprey	Whittle, Richard	WHEN THE MARINES decided to buy a helicopter-airplane hybrid "tiltrotor" called the V-22 Osprey, they saw it as their dream machine. The tiltrotor was the aviation equivalent of finding the Northwest Passage: an aircraft able to take off, land, and hover with the agility of a helicopter yet fly as fast and as far as an airplane. Many predicted it would reshape civilian aviation. The Marines saw it as key to their very survival. The dream -- The salesman -- The customer -- The sale -- The machine -- Young Winston's Osprey -- Period of darkness -- Survivability -- Another period of darkness -- You want it bad, you get it bad -- The dark

2018.311.046	Naval Station Norfolk	Hampton Roads Naval Historical Foundation	Naval Station Norfolk is the world's largest naval station, supporting the Navy ships, submarines, and aircraft of

Object ID	Title	Author	Summary
			the US Fleet Forces Command with a multitude of facilities and services. This shore establishment, located on the historic harbor of Hampton Roads, has remained vital to the Navy since its foundation in 1917. Once established, the naval station focused on serving the fleet in four areas: aviation, recruit training, a submarine base, and a supply base. Men and women of the station continued to work on these and other activities through the pressures of World War I, the Depression, World War II, and wars in Korea, Vietnam, Iraq, and Afghanistan. They made sure that ships and aircraft were successfully deployed to the far reaches of the globe--the nation's indispensable response to international conflicts. Nowadays, the station is the hub for Navy logistics supporting the defense of the entire Atlantic area, from the North Pole to the South Pole.
2018.311.047	Military Aircraft Visual Encyclopedia	Winchester, Jim (ed)	A highly illustrated guide to military aircraft from World War I to the present day. Featuring all the most famous aircraft from around the world, such as the Supermarine Spitfire, Junkers Ju 87 Stuka, North American Aviation F-86 Sabre, and McDonnell Douglas F-4 Phantom. Hundreds of artworks show each aircraft in profile in full color. Each aircraft is accompanied by a detailed caption and a specification box listing dimensions, powerplant, weights, armament, and performance. (From back cover.)

2018.311.050	Official and Unofficial US Navy Air Patches 1920s to Today	Nelson, Derek	This book presents a gallery of more than 500 squadron patches in full color and many more in black and white.
2018.311.051	Black Sheep One : The Life of Gregory "Pappy" Boyington	Gamble, Bruce	Anyone over 50 should recognize the name: leading the WWII Marine Fighting Squadron 214. At the air and ground fighting Black Sheep Boyington ("Black Sheep One") racked up the most hits in the Marines, earning the Medal of Honor before being shot down over Japanese territory in 1944. Presumed dead, he spent 20 months in a prisoner-of-war camp, and was released at war's end to the surprise of the nation. Twelve years later, his memoir Baa Baa Black Sheep hit bestseller lists, and six years after that, the book became a hit TV series starring Robert Conrad. Retired naval flight officer Gamble, who has already penned an account of the squad's exploits, here narrows his focus to its most famous exponent. The results are less than heroic. Black Sheep's appeal was in its raciness for its time (in one scene quoted here, Boyington is on his knees "in front of two very gorgeous gams"); one purpose of this book seems to be to fill in the blanks and innuendo, and to detail some years better lost. It's unclear that anyone still cares about these matters, though, and the same is true of the numbing familial detail of the first chapters. But Boyington's military exploits are still of interest to buffs, and here

Object ID	Title	Author	Summary
			Gamble's expertise comes to the fore. If Boyington, who died in 1988 at 76, had a tendency to fudge or exaggerate, Gamble carefully sets the matter of his actual achievements straight, and they remain impressive. Veterans of the war and fans of the show may want the full story here, but since Gamble assumes Boyington's status rather than rehabilitates it, few others will tune in. (Dec.) (From Publishers Weekly) Copyright 2000 Reed Business Information, Inc. --This text refers to the Hardcover edition. From Booklist Gamble's Black Sheep (1998) made it clear that the men of Marine Fighting Squadron 214 were misfits only according to bureaucratic regulations. Their legendary commanding officer, Gregory "Pappy" Boyington, however, was about as unorthodox as one could be and still accomplish anything useful. The product of a catastrophically dysfunctional family, he spent his life fighting a ferocious drinking problem, a string of wives and lovers, and, somewhat more successfully--he won the Medal of Honor for 20-odd air-to-air victories--the Japanese. As World War II loomed, he was about to be thrown out of marine aviation for his drinking and debts. He volunteered for the Flying Tigers and compiled a combat record that made him invaluable. He ended the war a prisoner of the Japanese, and until he died in 1988, he was often a prisoner of alcoholism. Nowadays a reader has to understand Boyington's time and place to tolerate him. Gamble gives us such an understanding, and even so, you may feel slightly hungover at the end of this fine biography. Roland Green Copyright © American Library Association. All rights reserved --This text refers to the Hardcover edition. (from Amazon.com)

2018.311.060	Operation End Sweep : A History of Minesweeping Operations in North Vietnam	Marolda, Edward J. (ed)	Operation End Sweep: A History of Minesweeping Operations in North Vietnam was written in 1977 by staff members of Tensor Industries of Fairfax, Virginia. Tensor prepared this account under the terms of a contract with the Mine Warfare Project Office of the Naval Sea Systems Command which, in turn, responded to a requirement from the Office of the Chief of Naval Operations. Since the study was a security-classified document, it originally saw limited circulation. Tensor's preface pointed out the importance of End Sweep. That operation represented the U.S. Navy's first major minesweeping campaign since the Navy faced the challenge, in 1950-1951, of clearing extensive enemy minefields laid at Wonsan, Korea. The helicopter mine countermeasures systems developed after the Navy's experience in Wonsan saw their first extensive use in End Sweep. Finally, Tensor's authors noted the special problems posed by the shallow depths of North Vietnam's coastal waters and the sensitivity of the mines involved. Ironically, the U.S. Navy originally laid the mines swept by American naval forces off North Vietnam. The Seventh Fleet's 1972 mine offensive severely hampered Hanoi's ability to import war supplies from abroad and was a factor in encouraging Hanoi to negotiate a peace accord with the United States. The mines posed an equal threat to seaborne commerce once America withdrew from Southeast Asia. It is not surprising, therefore, that in the talks leading up to the Paris cease-fire agreement of January 1973, Hanoi demanded that the United

Object ID	Title	Author	Summary
			States enter into a separate diplomatic protocol in which America agreed to "render harmless" the mines we had laid in the waters of the Democratic Republic of Vietnam. Over the next six months, as the U.S. Mine Countermeasures Force accomplished this work, and American forces withdrew from Southeast Asia, Hanoi continued to wage war against South Vietnam. During that period the United States viewed the minesweeping operation as a means of attempting to influence North Vietnam's behavior. Dr. Edward J. Marolda, Head of the Naval Historical Center's Contemporary History Branch and a well-known historian of the naval war in Southeast Asia, skillfully revised this document for publication and composed an introduction that places these events in historical perspective. I also wish to acknowledge the major contributions made by Sandra J. Doyle, the Center's Senior Editor, in copy editing the study and overseeing its printing. Operation End Sweep describes a classic mine clearance campaign involving the deployment of men, ships, and specialized equipment halfway around the globe to complete a demanding and politically sensitive naval operation. Considering the continuing importance of mine warfare, the Navy's historians publish this account in the hope that it will be of special interest to today's naval professionals. Dean C. Allard Director of Naval History
2018.311.061	Technology for the United States Navy and Marine Corps, 2000-2035 : Becoming a 21st-Century Force, Vol. 1 : Overview	Naval Studies Board	This edition or Volume 1 of 9, is on "Overview." This study was inspired by events of the past decade, which saw a vast transformation in the international strategic landscape facing the United States, and in the missions and perspectives of the U.S. Navy and Marine Corps as implementing arms of U.S. national security strategy.

Object ID	Title	Author	Summary
			Overview Discussion includes: International Security Environment:2000-2035n Anticipated U.S. Naval Force Capabilities: 2000-2015, Entering Wedges of Capability to Shape the Naval Forces of 2000 to 2035, Implications for the Department of the Navy.
2018.311.062	In the Service of Our Country : The Ship and Her Men of the USS Zellers DD 777	Barnes, Arthur H.	A chronicle of the life of the Sumner-class destroyer Zellers from keel laying on 24 December 1943 in Puget Sound through World War II, Korean War and peace time duties up until being struck from Navy records on 19 March 1971. The bulk of the book is concerned with Zeller's participation in the Battle of Okinawa in 1945 where she was struck by a Japanese Kamikaze airplane, resulting in numerous deaths and injuries. After a section on the ship's history some of the surviving crew members provide there personal accounts of life aboard Zellers. Included are deck log pages, copies of naval messages and many black & white photographs of ship and crew. One page documents Zellers' first 'duty' after WW II as plane guard destroyer for the newest carrier USS Midway in the Midway's shakedown cruise in the Caribbean in 1945.
2018.311.063	Great Sea Battles of World War II	Sweetman, Jack	Exciting stories of war waged on the high seas are the stock of this Naval History and accounts of 21 great naval engagements of WWII.
2018.311.064	Naval Documents of the American Revolution, Volume 6 : American Theater Aug. 1, 1776 - Oct. 31, 1776; European Theater, May 20, 1776-Oct 5, 1776	Morgan, William James (ed.)	Contains copies of documents regarding the time periods indicated in the title from depositories all across Europe and the United States. Included are 67 illustrations. By the time of the start of these periods the colonists had been dealt defeats on Long Island and Lake Champlain. Those defeats had bought time, but what would time bring? With Forward by President Richard Nixon and Introduction by Vice Admiral Edwin R. Hooper, USN (Ret.), Director of Naval History
2018.311.065	Fire & Ice	Brantingham, Hank	A somewhat humorous autobiography of a naval

Object ID	Title	Author	Summary
			officer covering a period from his graduation from the U.S. Naval Academy through his 25-year naval career. The author enjoys the unique distinction on participating in both the evacuation of Douglas MacArthur from the Philippines in 1942 and the rescue of John F. Kennedy after a Japanese destroyer rammed JFK's PT boat. Lengthy inscription to former owner from wife of author on first flyleaf. Book published under the nickname of Hank.
2018.311.066	JFIRE : Multi-Service Tactics, Techniques, and Procedures for the Joint Application of Firepower	Navy Warfare Development Command	A quick reference guide for requesting fire support in accordance with approved joint tactics, techniques and procedures (TTP). Applies to the tactical and special operational forces of the Navy, Army, Marine Corps and Air Force.
2018.311.067	Welcome Aboard! : USS Comstock (LSD-45)	Commanding Officer, USS Comstock (LSD-45)	This item consists of a three-ring binder containing a ship's Welcome Aboard pamphlet and paper copies of a lengthy slide presentation on ship familiarization and a description of the ship's upcoming deployment to the Western Pacific and participation in Exercise CARAT '99. The fifth annual Cooperation Afloat Readiness and Training (CARAT) series of exercises between the U.S. and four Southeast Asia nations began on June 28 and continued until August 25, 1999. A series of bilateral exercises, CARAT 99 had U.S. forces operating with military forces of Indonesia, Malaysia, Thailand and Singapore. CARAT exercise was scheduled to take place in Thailand July 26 to August 6. The fifth annual event drew military participation from the United States, Indonesia, Malaysia, Thailand, Singapore and the Philippines. Overall, the event involved more than 1,500 Navy and Marine Corps personnel in mock combat scenarios designed to emulate real world events. The CARAT Task Force, composed of San

Object ID	Title	Author	Summary
			Diego based USS COMSTOCK (LSD 45), the Task Force flagship, USS GARY (FFG 51) and USS GEORGE PHILIP (FFG 12), completed final preparations and deployed May 21 for the fifth annual Cooperation Afloat Readiness and Training (CARAT) 1999 exercise. The three ships were joined by USS FREDERICK (LSD 1184) in Pearl Harbor and Marines from Okinawa for bilateral exercises between U.S. Navy representatives and their counterparts from several Southeast Asian countries. Commander, Destroyer Squadron ONE from San Diego, CA, served as CARAT 99 Task Group Commander. Beginning in June, the CARAT 99 exercise focused on increased interoperability in Anti-Submarine, Anti-Air, Amphibious Warfare, Mine Warfare, In-Shore Undersea Warfare, diving and salvage operations, and logistics with participating Asian countries. The deployment consisted of a series of bilateral phases hosted by the Armed Forces of Malaysia, Singapore, Indonesia and Thailand. Each phase consisted of land based and at-sea operations within the naval training areas of each host country. U.S. Navy and Marine Corps participants also took part in activities ashore designed to foster goodwill between host countries and U.S. forces. Community Relations projects such as repairing a local orphanage's playground or painting a school give Sailors and Marines an opportunity to lend a helping hand. Also, the Task Force brought Project Handclasp supplies to distribute where needed. Among the supplies were hygiene products, non-perishable foods, school textbooks and toys. Each country also hosted sporting and social events to enhance the personal military-to-military ties between U.S. and host nation forces.
2018.311.068	Green Five	Cordell, Charles E.	Inscribed and signed by the

Object ID	Title	Author	Summary
			author. Green Five was the Navy's primary air route between World War II aircraft factories in the Middle West and the West Coast. The route soon became familiar territory to Charles Cordell, a young Marine lieutenant, who devoted six wartime months to shuttling military aircraft from factory to port of embarkation. After the war, Cordell ran an insurance business in El Cajon, California. Lt. Cordell's picture appears in 2005.319.143 US Naval Air Facility, Air Ferry Squadron Two, Columbus Ohio. Contents: Learning the trade -- Retrofit -- Back in the saddle -- Lemon delivery -- Alone to San Diego -- Curtiss novelty -- A pair of aces -- Little red toy -- Slightly used twins -- Midwestern ice box -- Adios via SNJ-6 -- Radar transition.
2018.311.069	Pearl Harbor, December 7, 1941, Vol. 1 : Kamikaze	Wolff, Perry	Documentary in the Pacific war beginning with Japanese preparations before the bombing of Pearl Harbor and ending with the dropping of the atomic bomb on Pearl Harbor. Vol 1 of 5-volume set. Bonus feature is "Know Your Enemy" directed by Frank Capra. Volume 1 (Kamikaze) is a revealing documentary on the Pacific War beginning with Japanese preparations before the bombing of Pearl harbor and ending with the US dropping the atomic bombs on Nagasaki and Hiroshima. Aside from the interesting footage on the Japanese home front before Pearl harbor; there are also many questions raised as to why the US was not aware that Pearl harbor might be bombed. Evidence is given that enemy planes were sighted earlier and messages were decoded, both in time to give plenty of warning. Bonus feature "Know Your Enemy" directed by Frank Capra. In this documentary,

Object ID	Title	Author	Summary
			Capra uses images and sounds to give the American soldier a look into the mentality of the enemy in Japan.
2018.311.070	Pearl Harbor, December 7, 1941, Vol. 2 : December 7, 1941	Ford, John	Volume 2 of 5 volume set. This volume is a classic recreation combining actual footage of the Japanese attack on Pearl Harbor. It won the Academy Award for Best Short Subject. It is directed by John Ford. There are several bonus features: 1) Pearl Harbor Newsreel special on Pearl Harbor attack 2) Formal Japanese Surrender--The Japanese surrender to end the War wit The Allies 3) Recognition of the Japanese Zero Fighter hosted by Ronald Reagan--information about the Japanese Zero fighter plane (dramatized story)
2018.311.071	Pearl Harbor, December 7, 1941, Vol. 3 : Appointment in Tokyo	Madacy Entertainment Group	Volume 3 of 5 boxed set. This inspiring WWII documentary covers the entire American Pacific campaign from the Bataan retreat to the surrender of Japan. Many of the film's more unforgettable scenes, notably the rape of Manila, have been culled from captured Japanese newsreels. The "Star" of the proceedings is General Douglas MacArthur, who after three years of relentless fighting makes good his promise "I Shall Return. Bonus Feature is "Japan's Air War". From the Asian mainland and newly liberated islands, American airborne firepower hammers at Japan itself. Dizzying film sequences capture the awesome sights of bombing missions and aerial dogfights. America fields a new and incredibly destructive weapon - the atom bomb.
2018.311.072	Pearl Harbor, December 7, 1941, Vol. 4 : Iwo Jima	Madacy Entertainment Group	Volume 4 of a 5 volume boxed set. The first part is Iwo Jima. Potentially invaluable as forward US airbase, Iwo Jima becomes the scene of earth-shaking bombardments and an epic, bloody battle. A mountain redoubt, Kamikaze attacks and loose sand that bogs down troops and vehicles complicate the assault. A steady stream

Object ID	Title	Author	Summary
			of casualties leaves the fortress island as American firepower pounds the fanatical Japanese defenders for five weeks. Bonus feature is "Okinawa." American and Japanese footage provides a close-up view of another intense island battle. A US amphibious landing of unprecedented size seeks to claim a new base from which to disrupt the enemy's supply lines. Ferocious combat sequences tell the whole story of the Okinawa offensive step by step, including Kamikaze raids and infantry action in atrociously difficult weather.
2018.311.073	Pearl Harbor, December 7, 1941, Vol. 5 : The Rise of the Japanese Empire	Madacy Entertainment Group	Volume 5 of 5 volume boxed set. This volume contains The Rise of the Japanese Empire--Japan's armies surge into Manchuria. There, the Chinese must labor to exploit their own nation's resources and infrastructure to the invaders' benefit. Meanwhile, the Japanese militarists eagerly plan their next conquests. America goes to war after a surprise Japanese bombing raid spectacularly pulverizes the US fleet at Pearl Harbor, Hawaii. Bonus Feature is "Surrender and Occupation of Japan." Extensive footage documents military, political, and social events in Japan following the war's conclusion. Sequences include : Japan's historic formal surrender aboard the battleship Missouri; a war crimes tribunal sentencing Premier Tojo to death for his pivotal role in Japan's aggressive war; the extensive changes in Japanese politics and women's rights; warm new acceptance of the American people and culture.
2018.311.074	Semper Fi in the Sky : The Marine Air Battles of World War II	Astor, Gerald	Astor now adds to his distinguished record as a popular military historian this superior history of Marine Corps aviation in World War II. That story opened in the wreckage of the corps' Hawaiian base at Ewa and with heroism in the last-ditch defense of Wake Island. It ended with marine Corsairs flying tactical missions in

Object ID	Title	Author	Summary
			support of the coming invasion of Japan from bases in Okinawa. In between, the marines raised one of the world's larger air forces and carried out every form of mission except strategic bombing and despite the high casualty rate of their efforts at carrier-based fighter operations. Astor's treatment is balanced and sober. He doesn't exaggerate the swashbuckling qualities of Gregory Boyington's famous "Black Sheep" squadron, and he gives all due credit to the outstanding air-defense and antishipping work done at Guadalcanal. Altogether, this book is Robert Sherrod's venerable History of Marine Corps Aviation in World War II (1952; 2d ed., 1980) updated for younger generations who need the story newly retold. Roland Green --- From Booklist Copyright © American Library Association. All rights reserved Review "Captures the drama of aerial combat in the Pacific as never before." —Carlo D'Este, author of Eisenhower: A Soldier's Life "All I wanted to be was an airplane pilot, and here I am in an airplane trying to kill someone." —Mel Freeman, pilot, Guadalcanal, from Semper Fi in the Sky "A riveting account, by a master craftsman, of the exploits of the heroic Marine Corps airmen of World War II." —Carlo D'Este (from Amazon.com)
2018.311.075	Lady in the Navy : A Personal Reminiscence	Hancock, Joy Bright	"Anyone who served in the U.S. Navy during World War II or the Korean War will remember with pride the WAVES—enthusiastic, determined, helpful, and resourceful. It would have been impossible to issue enough ribbons and commendations

Object ID	Title	Author	Summary
			to commend them all for their service. Officers and enlisted, they have now become so much a part of the Navy that I doubt we could ever get along without them. I hope we never have to." -Adm. Arthur W. Radford, USN (Ret.) WHEN legislation was passed in 1948 giving American women permanent status in the regular and reserve Navy, it was largely due to the efforts of Joy Bright Hancock. Her ideals, energy, and enthusiasm were the moving force behind the historic integration of women into the U.S. Navy, including the establishment of the WAVES (Women Accepted for Volunteer Emergency Service). This new edition of Hancock's revealing memoir, first published in 1972 and out of print for years, commemorates the sixtieth anniversary of the birth of the WAVES in 1942. Thanks to her, WAVES always served with equal pay for equal work. As a Yeoman in World War I, Hancock offered the armed services a lesson in the benefits of having women in uniform. Her descriptions of those early days and later efforts, when Hancock was finally in a position of authority, to argue the case for women add a wealth of colorful details to this chronicle of her career and of the battles to get women admitted into the regular Navy. Her dogged pursuit of fair treatment for women in the armed services finally resulted in the last restriction of rank being removed in 1967. (from back cover)
2018.311.076	Watch Officer's Guide - 2007 : A Handbook for All Deck Watch Officers	Stavridis, James	Watch Officer's Guide, 2007, United States Naval Institute. ----- This handbook addresses every aspect of a watchstander's duties at sea and in port. A classic reference of the profession since its initial

Object ID	Title	Author	Summary
			publication in 1911, the guide is a compendium of information and wisdom contributed by hundreds of naval officers and mariners over the past eighty years. For watch officers beginning their training, the book provides an abundance of useful, up-to-date information. For experienced watch officers, it is handy both for general review and for use while actually standing watch. The revised edition offers much new material, including sessions on standing watch in the combat information center, training, and engineering, and a quick-reference guide filled with the shiphandler's tricks of the trade. Other material has been brought into line with current practice. No officer who stands watch at sea or in port should be without this useful volume. (from Amazon.com)
2018.311.078	Wake Island : The Heroic Gallant Fight	Schultz, Duane P.	The author describes the early Wake Island before the War and then as it was prepared for battle. It is a personalized account of many American defenders of the island.
2018.311.079	Cheating Death : Combat Air Rescues in Vietnam and Laos	Marrett, George J.	They flew low and slow, at treetop level, at night, in monsoons, and in point-blank range of enemy guns and missiles. They were missions no one else wanted, but the ones all other pilots prayed for when shot down. Flying the World War II-vintage Douglas A-1 Skyraider, a single-engine, propeller-driven relic in a war of "fast-movers," these intrepid US Air Force pilots, call sign Sandy, risked their lives with every mission to rescue thousands of downed Navy and Air Force pilots. With a flashback memory and a style all his own, George J. Marrett depicts some of the most dangerous aerial combat of any war. The thrilling rescue of "Streetcar 304" and William Jones's selfless act of heroism that earned him the Medal of

Object ID	Title	Author	Summary
			Honor are but two of the compelling tales he recounts. Here too are the courageous Jolly Green Giant helicopter crews, parajumpers, and forward air controllers who worked with the Sandys over heavily defended jungles and mountains well behind enemy lines. Passionate, mordantly witty, and filled with heart-pounding adrenaline, <i>Cheating Death</i> reads like the finest combat fiction, but it is the real deal: its heroes, cowards, jokers, and casualties all have names and faces readers will find difficult to forget. 2018.314.002	USS Midway (CVA-41) - Mediterranean Cruise - 1954	D'Argenio, Raymond M. (ed.)	A pictorial account of the deployment of the USS Midway to the Mediterranean Sea in 1954. The ship departed Norfolk on 4 January and returned to Norfolk on 4 August. Port calls included: Gibraltar; Algiers, Algeria; Augusta, Sicily, Italy; Taranto, Italy; Salonika, Greece; Athens, Greece; Cannes, France; Marseilles, France; Barcelona, Spain; Genoa, Italy; Livorno, Italy; Palermo, Sicily, Italy; Naples, Italy; and Tangier, Morocco. CAG-6 was the embarked airwing and consisted of: VF-31 (F2H-2), VF-33 (F9F-6), VF-73 (F9F-6), VA-25 (AD-6/AD-4B), VC-12 Det. 35 (AD-4W) , VC-3 Det. 35 (AD-3Q/4NL), VC-62 Det. 35 (F2H-2P), VC-5 Det. 35 (AJ-1), and HU-2 Det. 35 (HUP-2).
2018.317.001	US Navy Ships vs Kamikazes 1944-45	Stille, Mark	The ineffectiveness of conventional air attacks on US Navy surface ships, particularly heavily defended targets like carrier task groups, forced the Japanese to re-evaluate their tactics in June 1944. The solution they arrived at was simple -crash their aircraft into American ships. This notion of self-sacrifice fitted well within the Japanese warrior psyche and proved terrifying to the American sailors subjected to it. These tactics brought immediate results, and proved effective until the end of the war. The US Navy was forced to adapt its tactics and operations and deploy new weapons to counter the threat. While American defenses destroyed most kamikazes before they had a chance to strike a ship, the cost was very high. With stunning artwork, this book analysis the actual military benefits of kamikaze missions, assessing whether the damage done to American naval strength was worth the 1055 of pilots and aircraft to the Japanese and

2018.317.003	World War I Seaplane and Aircraft Carriers	Lardas, Mark	In 1910 the first aircraft was successfully launched from a small wooden platform on a stationary ship. Just four years later, seaplane-carrying warships were being used to launch the first naval air raids, and by 1918 the first aircraft carrier to feature a full-length flight deck was in service. High quality artwork and historical photographs help author Mark Lardas tell the fascinating story of the pioneering years of naval aviation, covering such historic clashes as the Japanese siege of Tsingtao, the British raid against German Zeppelin bases at Cuxhaven, and the Battle of Jutland, which saw the first airplane take part in a naval battle. Through detailed analysis he explores their development from hastily adapted merchant ships to the launch of HMS Argus, the first aircraft carrier to have a full-length flight deck, and shows how they paved the way for the aircraft carriers of the future. 2018.321.001	Naval Air Training and Operating Procedures Standardization Manual A-4A/B/C	Chief of Naval Operations	This manual is applicable to A-4 aircraft. Chapter 1 establishes minimum requirements for training, initial qualification, and currency in specified areas. Subsequent chapters provide the operational information considered necessary to ensure safe and efficient operation of the A-4, when used in conjunction with the Flight Manual and the Naval Warfare Publications series. Introduction was signed by J. S. Thach.
2018.321.002	NATOPS Flight Manual Navy Model F-8D, F-8E Aircraft	Chief of Naval Operations	NATOPS manual for F-8D, F-8E Crusader. This manual standardizes ground and flight procedures but does not include tactical doctrine. Compliance with the stipulated manual procedure is mandatory except as authorized herein. The library has a later edition at 2015.328.020.
2018.321.003	Pilot's Handbook Model PBY-5 Flying Boat	Bureau of Aeronautics	The purpose of this book is to describe briefly the principal operating features of the PBY

Object ID	Title	Author	Summary
			-5 airplanes with which the flight personnel are concerned. As in many of the advanced type large airplanes, the duties of operating the PBY-5 are divided between the pilot and the flight engineer. With this division of duties, it becomes essential for the pilot and flight engineer to co-ordinate their respective duties at all times for the safe and economical operation of the craft. This books is brief, but covers all the features of the plane necessary for its efficient operation. Details of the equipment and mechanisms of the airplane are covered by other manuals placed aboard the airplane or at the operations base. Specific reference should be made to the Erection and Maintenance Manual as well as to the other manuals and handbooks for airplane equipment. Manufactured by Consolidated Aircraft Corp. San Diego, CA .

2018.321.010	Pearl Harbor Revisited : U.S. Navy Communications Intelligence 1924-1941	Parker, Frederick D.	Mr. Parker's monograph is the first in a series treating the U.S. Navy's communications intelligence (COMINT) efforts in the Pacific during World War II. A second volume, also by Mr. Parker (A Priceless Advantage: U.S. Navy Communications Intelligence and the Battles of Coral Sea, Midway, and the Aleutians), was recently published. The series as a whole and this volume in particular are unique in many ways but primarily because they represent a

Object ID	Title	Author	Summary
			closely analyzed, comprehensive examination of the COMINT record juxtaposed with extensive research into the written history of events. Mr. Parker's work also includes research into the Japanese Navy messages which remained untranslated until 1945 and undiscovered until now. These messages revealed the Japanese Navy plans for war with the United States, Great Britain, and the Netherlands and the preliminary exercises that occurred in the months prior to Pearl Harbor. This activity clearly signaled the creation of a massive car-rier strike force with the major naval objective somewhere in the Pacific Ocean far distant from either Indochina or the Philippines. This comparison of the COMINT record with the published material covering the same period will benefit not only NSA but also the academic community, which continues to pursue the history of the Second World War. Thus whether or not the results agree with the literature, particularly if they do not, the effort to create an "official" COMINT history is more than justified. Mr. Parker's perseverance, diligent research, and detailed analysis have made this a significant and unique contribution to U.S. COMINT history, U.S. military history, and U.S. history.
2018.321.011	West Wind Clear : Cryptology and the Winds Message Controversy - A Documentary History	Hanyok, Robert J.	Before Pearl Harbor, the Japanese were using an open code to communicate with embassies. They used "Winds" and other terms to indicate problems with US, USSR, and Britain. These were called the Winds Messages. There was also a code used to indicate Execute, and that was called the Execute Message. This is an extensive review of the intelligence and its interception by the US before the attack on Pearl Harbor. There are reviews of the 8 formal investigations after the Pearl Harbor attack.

Object ID	Title	Author	Summary
	Reconnaissance During the Cold War : Commemorating Silent Sacrifices		same edition as the [2002] print version. During the Cold War, the U.S. Navy was a full participant in the secret war in the ether against the Communist bloc. Many Naval aircraft and lives were lost in this secret struggle-to enemy fighters, to the elements, to mishaps-and 90 men who gave their lives are commemorated in this publication. This brochure is published by the National Security Agency to celebrate the dedication of the U.S. Navy memorial at National Vigilance Park. This brochure outlines the history of Naval aerial reconnaissance during the Cold War, and commemorates the many veterans of that long, secret struggle, especially the sailors-fathers, husbands, sons, and shipmates-who gave their lives. From the Introduction by John R. Schindler.

2018.321.016	Eyes of the Fleet, The : An Analysis of the E-2C Aircraft Acquisition Options	Younossi, Obaid	Ebook was downloaded for free from this website: https://www.rand.org/pubs/monograph_reports/MR1517.html. Prepared for the United States Navy. Approved for public release; distribution unlimited. The U.S. Navy's E-2C Hawkeye aircraft provides airborne early warning for the navy's carrier battle group. A portion of the fleet is currently being replaced with a more capable version of the aircraft, the Hawkeye 2000. However, even with this improvement, the aircraft will not be able to deliver the operational performance the navy believes it will need in the future. Furthermore, many of the aircraft in the current fleet are approaching their service life limits. Thus, the navy has to decide whether to buy new aircraft, refurbish old ones, modernize portions of the E-2C fleet, or adopt some combination of these strategies. it must make a decision relatively soon if it is to keep enough aircraft to meet its operational requirements. This report analyzes the costs, benefits, and risks of some of the options the navy might consider.

2018.322.001	Jane's All the World's Aircraft - 1956-57	Bridgman, Leonard (ed)	Jane's All the World's Aircraft is an aviation annual publication founded by Fred T. Jane in 1909. It is published by Jane's Information Group. Jane's All the World's Aircraft has chronicled a century of ever-accelerating aviation progress and recorded the particulars of an unprecedented number of flying machines, using the widest possible interpretation of that phrase, in the most minute detail. Six editors have had the privilege of commenting upon the significant aircraft and events of manned flight since the first edition appeared in November 1909 as All the World's Airships (which was then a generic term for any machine that flew). This first publication was seen as being ahead of its time but even the skeletal book showed the strength of Fred T Jane's standardised approach to data collection. The first edition even carried a pre-addressed return proforma for aviation pioneers to supply the details of new machines. Besides listing the different types of aircraft by nationality, the first issues covered aerial societies, journals and flying

Object ID	Title	Author	Summary
			grounds and cost just 21 shillings (£1.05). Jane himself had a desire to fly and he was nearly killed doing so in 1909 whilst attempting a flight on Dartmoor. His aircraft caught fire, but he merely commented that it would be one less machine to include in his forthcoming work. As with Jane's Fighting Ships, Jane received extensive help from enthusiasts worldwide, including Louis Blériot, A.V. Roe and Prince Heinrich of Prussia.
			Jane censored the 1914 issue, which was published just after the outbreak of the First World War, blacking out whole sections describing British equipment and organisation. He noted in it that, for all practical purposes, aircraft have no more to do with peace than submarines. The work's accuracy helped morale by dispelling alarmist rumours about imminent German air raids, showing that the Germans did not possess anything but the smallest fleet of airships. Respect for the accuracy of Jane's All the World's Aircraft transcended political enmities. Cold War notwithstanding, Soviet authorities supplied Jane's with information. Such was the technical reference book's reputation that Argentina even provided details of its aircraft during the Falkland's Conflict in 1982. Altogether, there have been only 97 editions, mainly due to disruptions during the two World Wars.
			2009 was the 100th Year of Jane's All the World's Aircraft.

2018.331.002	Code-Name Downfall : The Secret Plan to Invade Japan and Why Truman Dropped the Bomb	Allen, Thomas B.	Revealing a secret World War II invasion plan that would have meant destruction worse than that caused by the atomic bombs, acclaimed military authors examine a plan code-named Downfall that would have turned Japan into a wasteland Historians have challenged President Truman's decision to drop the atomic bomb on the Japanese cities of Hiroshima and Nagasaki, claiming that the war with Japan could have been ended by negotiations. Allen and Polmar (Rickover: Controversy and Genius) counter that the Japanese were not ready to surrender until after the second bomb was dropped. Accordingly, massive Allied landings on Japan's home islands thus remained a probability until very late in the war. The secret plan for this invasion, along with the Japanese plan for opposing it, are presented here for the first time. Experts predicted that the Americans would suffer at least half a million casualties, while critics have suggested that this figure was inflated to justify dropping the bomb. The authors have uncovered evidence to support the prediction: for example, the requisition of 370,000 Purple Heart medals by the Quartermaster Corps, indicating the number of wounded expected; 130,000 killed in action would fit the average war dead/wounded ratio, for a total of about 500,000 casualties. Finally, Allen and Polmar convincingly argue that Truman actively sought ways to end the conflict at the lowest cost of

2018.335.001	Battleship Oklahoma, BB-37	Phister, Jeff	more). On a quiet Sunday morning in 1941, a ship designed to keep the peace was suddenly attacked. This book tells the remarkable story of a battleship, its brave crew, and how their lives were intertwined. Jeff Phister and his coauthors have written the comprehensive history of the USS Oklahoma from its christening in 1914 to its final loss in 1947. Phister tells how the Oklahoma served in World War I, participated in the Great Cruise of 1925, and evacuated refugees from Spain in 1936. But the most memorable event of the ship's history occurred on December 7, 1941. Phister weaves the personal narratives of surviving crewmen with the necessary technical information to recreate the attack and demonstrate the full scope of its devastation. Captured Japanese photographs and dozens of historic U.S. Navy photographs deepen our understanding of this monumental event. Raised after the attack, the Oklahoma sank again while being towed stateside and now rests on the ocean floor, 540 miles northeast of Oahu. Battleship Oklahoma: BB-37 tells the complete story of a proud ship and her fall through the eyes of those who survived her loss.

			famous aviator duo, Lieutenant Tom Hudner and Ensign Jesse Brown, and the Marines they fought to defend. A white New Englander from the country-club scene, Tom passed up Harvard to fly fighters for his country. An African American sharecropper's son from Mississippi, Jesse became the Navy's first black carrier pilot, defending a nation that wouldn't even serve him in a bar. While much of America remained divided by segregation, Jesse and Tom joined forces as wingmen in Fighter Squadron 32. Adam Makos takes us into the cockpit as these bold young aviators cut their teeth at the world's most dangerous job--landing on the deck of an aircraft carrier--a line of work that Jesse's young wife, Daisy, struggles to accept. Deployed to the Mediterranean, Tom and Jesse meet the Fleet Marines, boys like PFC 'Red' Parkinson, a farm kid from the Catskills. In between war games in the sun, the young men revel on the Riviera, partying with millionaires and even befriending the Hollywood starlet Elizabeth Taylor. Then comes the war no one expected, in faraway Korea. Devotion takes us soaring overhead with Tom and Jesse, and into the foxholes with Red and the Marines as they battle a North Korean invasion. As the fury of the fighting escalates and the Marines are cornered at the Chosin Reservoir, Tom and Jesse fly, guns blazing, to try and save them. When one of the duo is shot down behind enemy lines and pinned in his burning plane, the other faces an unthinkable choice: watch his friend die or attempt history's most audacious one-man rescue mission. A tug-at-the-heartstrings tale of bravery and selflessness, Devotion asks: How far would you go to save a friend?"--Provided by publisher. Contents Ghosts and Shadows -- The

2018.338.011	Captain Hook : A Pilot's Tragedy and Triumph in the Vietnam War	Foster, Wynn F.	On 23 July 1966 Wynn Foster was flying his 163rd combat mission of the Vietnam War when antiaircraft artillery hit his A-4 Skyhawk and severed his right arm at the elbow. Bleeding profusely, his still-gloved hand lying on the starboard console, Foster flew his plane out over the Tonkin Gulf and ejected. As recounted for the first time in this book, Foster's story of his injury and rescue is spellbinding. But Captain Hook is more than a description of an air casualty. It is an honest insider's look at naval aviation during the early Vietnam War years. Foster

Object ID	Title	Author	Summary
			tells of his experiences in 1965-66 as executive officer and commanding officer of VA-163, stationed aboard the USS Oriskany, including the shoot down of James Stockdale's A-4. Describing the people he worked with and led, he details their frustrations and despair as well as their moments of joy and camaraderie. Foster also provides an incisive evaluation of the medical care he received after his own ordeal, and explains how his aggressive response to his life-altering injury threw him into conflict with his care providers and officers and bureaucrats in the Navy's hierarchy. Confident that he could continue to be of service to the Navy, he embarked on a long legal battle to remain on active duty, finally winning the right to complete his naval career. Promoted to captain and awarded the call sign "Captain Hook," he made two subsequent deployments to the Western Pacific. Foster's case is important because he was willing to test society's preconceptions about the handicapped, and because he was willing to test his own limits. His ultimate success provides an uplifting ending to a fascinating story and stands as a testament to the indomitability of a positive, never-say-die spirit. 2018.338.014	Military in San Diego, The	McGaugh, Scott	No city is as proud of its military heritage as San Diego, known as "Navy Town, USA." Congress also has designated San Diego as "the Birthplace of Naval Aviation." However, its community fabric reflects a more diverse and tightly woven relationship with our nation's defense. Over the past century, the city has invented and then reinvented itself in response to shifting world affairs and national priorities. It began with a successful campaign to become a West Coast Navy base in the early 1900s. By the 1930s, military aircraft manufacturing drove economic development. After explosive growth in World War II, San Diego emerged as an established military metropolis. At the dawn of the Cold War, San Diego recast itself as a home for Cold War research and development and defense contractors. Today, San Diego is an internationally renowned defense science and technology development center, a city in which one in four jobs and fully 50 percent of regional domestic product are defense related. Like no other city in America, San Diego has grown from a remote military presidio outpost to become a preeminent Pacific powerhouse. Author Scott McGaugh is a San Diego native who has written several military books. McGaugh served as co-curator of the San Diego History Center's From Presidio to Pacific Powerhouse, an exhibition focusing on the unique relationship between San Diego and the US military. He also is the founding marketing director of the USS Midway Museum in San Diego
2018.338.015	Defender Dolphins : The Story of Project Short Time	Goforth, Harold Walton	DEFENDER DOLPHINS: The Story of Project Short Time is the first eyewitness account of a unique and daring SECRET project during the Vietnam War involving the first-ever military use of dolphins. Meet Garth,

2018.338.018	Tet Offensive 1968 : Turning Point in Vietnam	Arnold, James R.	(from ospreypublishing.com:) About this book The 1968 Tet Offensive was the decisive battle for Vietnam. Masterminded by the brilliant North Vietnamese General, Vo Nguyen Giap, it was intended to trigger a general uprising in South Vietnam. However, the bloody fighting for Saigon, Hue and other cities actually resulted in a catastrophic defeat for the North. In this excellent assessment of the key battle of the Vietnam conflict, James Arnold details the plans and forces involved and explains how, despite the outcome of the battle, the American people and their leaders came to perceive the war for Vietnam as lost. Contents Background to Surprise Men, Weapons and Tactics

2018.338.019	Khe Sanh 1967-68 : Marines Battle for Vietnam's Vital Hilltop Base	Arnold, James R.	(from ospreypublishing.com:) Khe Sanh was a small village in northwest South Vietnam that sat astride key North Vietnamese infiltration routes. In September 1966 of the Vietnam War (1955-1975), a Marine battalion deployed into the area. Action gradually increased as the NVA attempted to destroy Free World Forces bases, and the siege of Khe Sanh proper began in October 1967. The bitter fight lasted into July 1968 when, with the changing strategic and tactical situation, the base was finally closed. This book details the siege and explains how, although the NVA successfully overran a Special Forces camp nearby, it was unable to drive US forces from Khe Sanh. Contents: Origins of the Campaign Chronology Opposing Plans Opposing Commanders Opposing Forces Setting the stage 1964-67 The Siege 1967-68 Air Support Aftermath The Battlefield Today
2018.338.020	On the Treadmill to Pearl Harbor : The Memoirs of Admiral James O. Richardson as Told to George C. Dyer	Richardson, James O.	James Otto Richardson (18 September 1878 – 2 May 1974) was an admiral in the United States Navy who served from 1902 to 1942. As Commander in Chief, Pacific Fleet, he protested against the redeployment of the fleet forward to Pearl Harbor, believing that a forward defense was neither practical or useful, and that the Pacific Fleet would be the logical first target in the event of war with Japan. He was subsequently relieved of command in February 1941. His concerns were to be proved justified in December.

2018.341.001	Sea of Consequence, A : The Battle of the Sibuyan Sea	Zingheim, Karl	This is a thesis submitted in partial fulfillment of the requirements for the Degree of master of Military History from Norwich University. "Over the course of the morning and afternoon of 24 October 1944, aircraft from Admiral William F. Halsey's U. S. Third Fleet subjected Vice Admiral Kurita Takeo's fleet of five battleships, nine cruisers, and thirteen destroyers to a series of dive bombing and torpedo attacks as it crossed the Sibuyan Sea in the central Philippines. Kurita's foray was the key part of a last-ditch attempt by the Imperial Japanese Navy to defeat the recent U. S. landing on Leyte, and, thereby, preserve the connection of the Japanese homeland with the oil resources in Southeast Asia. Despite enjoying aerial superiority and good weather, and suffering the loss of just eighteen aircraft, the American fliers only accounted for the sinking of the battleship Musashi, the crippling of the cruiser Myoko, and the infliction of moderate damage on several of Kurita's other ships. With the tactical factors apparently favoring the attackers, why did Halsey's aviators deal Kurita such a glancing blow?"

Object ID	Title	Author	Summary
2018.341.002	Marines' Lost Squadron, The : The Odyssey of VMF-422	Carlson, Mark	Finally, there is a book that reveals the truth about the worst air disaster to strike a Marine Corps fighter squadron during the Second World War. Marine Fighter Squadron 422 was a group of twenty-four typical young Americans trained to fly the famous F4U Corsair into combat with the legendary Japanese Zero. When they arrived in the Pacific, they suddenly found that not all their enemies carried guns in savage Banzai charges. Their two most dangerous and merciless adversaries were the fury of a tropical typhoon and the cold heartless whims of a Marine Corps general. Together, these two foes seal the fate of VMF-422 and cause the greatest disaster ever to strike a Marine squadron. Aviation historian Mark Carlson has written the first full account of a group of ordinary young men who were suddenly challenged beyond their experience and which forever changed the lives of the survivors. The Marines' Lost Squadron is the dramatic true story of a desperate and courageous fight for survival against the forces of nature and a conspiracy of silence. The Marines' Lost Squadron is a saga of courage and conspiracy, patriotism and pride, fate and futility in a struggle to survive the ferocity of a huge typhoon in the midst of the Second World War. Mark Carlson explains in great detail the tragic story. The flight was just supposed to be a routine flight, ferrying 24 F4U-1D Corsairs to another island. The end result: Only one plane actually landed where intended. The rest were either lost forever, or ditched at sea. Although not often mentioned, the "Flintlock Disaster" was actually the worst non-combat loss of a marine squadron in the war. Here was the key problem: They were heading "right at one of nature's most powerful

Object ID	Title	Author	Summary
			and dangerous forces: a Pacific typhoon." Adding to the problem was that the commanding general never told the arriving location that the planes were on the way. So, when they didn't show up, no one knew to take action to look for them. The pilots became hopelessly confused in the typhoon. Just one managed
2018.342.001	Hi Hattie, I'm in the Navy Now : The Salty Letters of a Sailor to His Girl Friend	Viney, Johnny	A humorous portrayal of sailor life as experienced by a young man who joins the Navy to avoid being drafted into the Army, presented in the form of letters to his girlfriend Hattie. Includes dictionary of Navy slang.

2018.348.002	God's Samurai : Lead Pilot at Pearl Harbor	Prange, Gordon W.	God's Samurai is the incredible story of Mitsuo Fuchida, the career naval aviator who not only led the air attack on Pearl Harbor, but participated in most of the fiercest battles of the Pacific. One of the very few second-echelon Japanese officers to serve through the entire war (including Midway, the Marianas Turkey Shoot, and Leyte Gulf), Fuchida narrowly escaped death in a jungle crash, was in Hiroshima the day before and the day after the atomic bombing and was aboard the Missouri at the surrender ceremonies.
2018.348.003	United States Navy in World War II, The : The One-Volume History, from Pearl Harbor to Tokyo Bay	Smith, Stanley E.	The substance of this history of World War II is largely personal narrative with running commentary and connective. Any flaws are the imperfections of men whose personal involvement took precedence over mere battle technicalities. No period marks the history of man's struggle for freedom more dramatically than the great war that burst like Apocalypse upon the Navy and America at Pearl Harbor. Coming to a close, appropriately, on the main deck of the U.S.S. Missouri, this war began and ended with a fleet. It seems most fitting, therefore, that this well-selected anthology should be devoted to those giant events which took place at sea--for had they failed, freedom would have failed. , by men who fought in the Atlantic and the Pacific and by distinguished naval experts, authors and newspapermen
2018.349.001	Surface Weather Map Analysis	None Stated	A programmed instruction unit which concentrates on the analysis of the surface weather map to gain an overall picture of en route weather for a flight.Promulgated for information, standardization of instruction, and guidance of instructors and students in the Naval Air Training Command.
2018.349.002	Formation of Dew-Frost-Fog-Clouds	None Stated	A programmed instruction unit which concentrates on the various occurrences that can

2018.349.030	Types of Clouds Review	None Stated	A programmed instruction unit which provides a review of clouds covered previously in the Primary academic cirriculum. Promulgated for information, standardization of instruction, and guidance of instructors and students in the Naval Air Training Command.
2018.350.001	Nimitz	Potter, E. B. (Elmer Belmont)	This definitive biography of the commander in chief of the Pacific Fleet in World War II is considered the best book ever written about Admiral Chester W. Nimitz. Highly respected by both the civilian and naval communities, Nimitz was sometimes overshadowed by more colorful warriors in the Pacific such as MacArthur and Halsey. The author's lively and authoritative style fleshes out Admiral Nimitz's personality to help readers appreciate the contributions he made as the principal architect of Japan's defeat. Following the Japanese attacks on Pearl Harbor on 7 December 1941, President Roosevelt named Nimitz as commander of the Pacific Fleet. An experienced and respected leader, Nimitz was also an effective military strategist who directed U.S. forces as they closed in on Japan, beginning in May and June of 1942 with the battles of the Coral Sea and Midway. Nimitz was promoted to the newly-created rank of fleet admiral in 1944 and became the naval equivalent to the army's General Dwight Eisenhower. The book covers his full life, from a poverty-stricken childhood to postwar appointments as Chief of Naval Operations and U.N. mediator. The book also candidly reveals Nimitz's opinions of Halsey,

2018.361.001	Naval Aircraft 1914-1939	Casey, Louis S.	About this book: In 1914 the ultimate expression of naval power was the battleship. Already however, eight years after the Wright brothers first flight, courageous and daring pioneers in America and Great Britain had made the first landings on warships at sea. Naval warfare had been expanded into a third dimension and naval flying took off with the outbreak of war. Shipborne fighters and Zeppelins duelled over the North Sea. Torpedo-bombers went into action, like the submarine, threatening the supremacy of the big-gun ship. By 1918 true aircraft carriers were in service and special classes of aircraft were being designed to equip them. This is the story of naval aircraft from the beginning to the outbreak of the Second

Object ID	Title	Author	Summary
			World War — from Eugene Ely's first flight from the USS Birmingham in 1910 to the dive-bombers of 1939 designed to crack open a battleship. John Batchelor's illustrations show off the highly colourful machines to perfection and Lou Casey of the Smithsonian Institution provides a fully researched and authoritative account of the development of carrier aircraft. Includes insert of article reprint from 1979 Annals of Science magazine titled, "Christian Huygens: Aviation Pioneer Extraordinary."

2018.364.006	Talking About Naval History : A Collection of Essays	Hattendorf, John B.	The twenty essays in this book were written between 2001-2009 and represent a wide historical perspective that ranges across nearly four centuries of maritime history. A number of these pieces have been published previously but have appeared in other languages and in other countries, where they may not have come to the attention of an American naval reading audience. This collection is divided into parts that deal with four major themes: the broad field of maritime history; general naval history, with specific focus on the classical age of sail, from the mid-seventeenth century to the end of the Napoleonic Wars in 1815; the wide scope of American naval history from 1775 to the end of the twentieth century; and finally, the realm of naval theory and its relationship to naval historical studies.
2018.364.007	Clear the Deck! : Naval Aviation Incidents and Accidents of World War II	Graff, Cory	Aircraft carrier operations were a dangerous business, especially in wartime. When air operations are confined to a flight deck of 50,000 square feet (escort carrier size), it was one of the most hectic and hazardous places on earth. Accidents were bound to happen. In wartime, the stakes were even higher as heavily loaded and armed combat planes went about their missions in unprecedented numbers. Commonly, there was no alternate airfield, no time

Object ID	Title	Author	Summary
			to lose, and absolutely no room for error. Clear the Deck! showcases many never-before-published amazing and dramatic World War II-era, U.S. Navy battle damage, accident, and flight operations photographs gathered from the National Archives, National Museum of Naval Aviation, the Seattle s Museum of Flight, and numerous other collections. This book features U.S. Naval aircraft in action from Eugene Ely to the Brewster Buffalo, to the ultimate fighters of World War II Corsairs, Hellcats, Tigercats, and Bearcats many coming to grief on pitching, rolling carrier decks. The action begins in the 1920s, heats up during the carrier battles of 1942 -44, and concludes in the waters off the Japanese home islands as damaged fighters and torpedo bombers come back aboard ship often times with disastrous consequences. About the Author Cory Graff is the Assistant Curator for Military Collections at The Museum of Flight in Seattle, Washington. In his free time, Graff works on aviation-related history projects including exhibits and books. His articles have been published in Air & Space Magazine and The Museum of Flight's Aloft Magazine. Graff is the author of several books on military aviation subjects. (from Amazon.com)

Object ID	Title	Author	Summary
			shoot it down. But during the last fifty years, vast improvements in design and armament have radically altered the means of achieving that goal. THE ILLUSTRATED HISTORY OF FIGHTERS traces the dramatic development of aircraft from the 1930s, when the threat of war caused Allied and Axis nations to step up their armament and develop better aircraft than the enemy. Important technical improvements ensured that aircraft would play a far greater role than they had previously and led to the innovation of the Spitfire, the Mustang, the Zero and the Fw 190 among many other fighters. The American fighters in this book include the first-class Navy F4F, F6F and F8U as well as the modern and maneuverable F-16. Fully illustrated with color photographs, side elevations and precision drawings by John Batchelor, this highly informative volume details the progress of fighter aircraft beginning with the Koolhoven FK.58, which was powered by one 14-cylinder air-cooled radial engine giving a speed of 313 mph and armed with four FN-Browning machine-guns. The introduction of the jet proved to be the most revolutionary factor in aircraft design. The first fighter outfitted with a jet engine was the Messerschmitt Me 262, which made its debut too late to alter the outcome of World War II. Soon the jet engine had replaced the piston engine as the fighter s powerplant thus allowing more flexibility in the shape of the aircraft. The volume concludes with the recent Dassault-Breguet Mirage 4000, powered by two augmented after-burning turbofans giving a speed of 1450 mph and armed with two DEFA cannons and eleven hard-points for missiles.

Object ID	Title	Author	Summary
			THE ILLUSTRATED HISTORY OF FIGHTERS examines the changes and improvements of the fighter from the 1930s right up to the present day. Each aircraft is discussed individually enabling the reader to tell at a glance the aircraft's strengths and weaknesses. 450 illustrations, 180 in color Bill Gunston was educated at University College, Durham and Northampton Engineering College, London. From 1943-1948 he served in the Royal Air Force as a pilot, flying instructor and accident-prevention lecturer. In 1951 he joined "Flight International," becoming technical editor four years later. In 1970 he began a freelance career as a writer and broadcaster. Since then he has written and contributed to more than 80 books including the prestigious "Jane's All The World's Aircraft." He is a member of the Association of British Science Writers and has twice been chairman of the Circle of Aviation Writers.

			hand interviews with those who participated in shortening the war and saving thousands of lives in the Pacific Theater. Includes an escape from a Japanese POW camp so dramatic that it seems implausible. (less)
2018.367.008	Combat Aircraft of World War II	Bavousett, Glenn B.	This book was originally published in two volumes: World War II Aircraft in Combat (1976) and More World War II Aircraft in Combat (1981). This omnibus edition brings together the stories of the great fighting aircraft of World War II --along with full-color painting of these same aircraft in raging conflict. A total of seventy-two (72) aircraft are shown here in their various combat roles; the secondary type of plane also frequently illustrated brings the grand total of aircraft depicted to ninety (90). Each scene includes details and landscapes familiar to pilots and crew members. These paintings have been meticulously researched, and all details of markings, numbers, personal decorations, as well as the actions themselves, have been verified from official records, photographs, and, where possible, personal interviews and eyewitness accounts by participants. Volume 1 tells the stories of thirty-six aircraft and their combat actions in a loosely connected chain of events that races the progression of the war. Volume II portrays some of the rarer types of aircraft use in conflict--the 163 Komet, the Fi 156 Storch, and the Boeing P-26A Peashooter--as well as classics such as the Supermarine Spitfire and the P-61B Mustang. These thirty-six additional scenarios and paintings include a variety of aircraft from practically all of the participating forces in the war. Also includes: Wildcat (Fighter plane)--History. Hellcat (Fighter planes)--History. Zero (Fighter plane)--History.

2018.367.009	But for the Grace of God : The Kamikaze Attack : Japanese Invasions Carried Out by the U.S.S. Zeilin in World War II	Hacker, Melvin Eugene	Page 8 of the book uses the date of 13 December 1945 as the date the kamikaze hit the USS Zeilin. As the war was over by then, the date was probably 13 January 1945 (according to wikipedia). Prologue: Growing up in Ontario, California -- Melvin goes to war -- Calvin joins the Navy and gets married -- Kamikaze - the desperate time -- Saipan and Philippine battles -- Epilogue: Returning to civilian life. Melvin Eugene Hacker is a transplanted California Boy who was born on March 30, 1925 in Ontario, California. He left high school in March 1943 for a three -year hitch in the U.S. Navy where he was assigned to a troop transport as a RADAR Operator. Returning to Civilian life in 1946, Mel married and spent the next fifty years as a telephone design engineer. In 1938, Mel developed an interest in motion picture photography and following WWII amassed a film library of 27,000 feet of movie film devoted to his family. Now in retirement with his wife, Charo, on the shores of Old Hickory Lake in Nashville, Tennessee, he devotes his available time to preserving his motion picture images on DVD discs. This project allows him to share his collection with his children, grand children, brothers and sisters as well as

2018.369.001	Battle of Midway, The	V-Mail News	Special article on Page 7 from Director John Ford filmed The Battle of Midway to help personalize the young Americans who served in remote war zones and inspire audiences to support their efforts.
2018.372.001	Clash of Fleets : Naval Battles of the Great War, 1914-18	O'Hara, Vincent P.	"Clash of Fleets is an operational history that records every naval engagement fought between major surface warships during World War I. Much more than a catalog of combat facts, Clash of Fleets explores why battles occurred; how the different navies fought; and how combat advanced doctrine and affected the development and application of technology. The result is a holistic overview of the war at sea as it affected all nations and all theaters of war. A work of this scope is unprecedented. Organized into seven chapters, the authors first introduce the technology, weapons, ships, and the doctrine that governed naval warfare in 1914. The next five chapters explore each year of the war and are subdivided into sections corresponding to major geographic areas. This arrangement allows the massive sweep of action to be presented in a structured and easy to follow format that includes engagements fought by the Austro-Hungarian, British, French, German, Ottoman, and Russian Navies in the Adriatic, Aegean, Baltic, Black, Mediterranean, and North Seas as well as the Atlantic, India, and Pacific Oceans. The role of surface combat in the Great War is analyzed and these actions are compared to major naval wars before and after. In addition to providing detailed descriptions of actions in their historical perspectives, O'Hara and Heinz advance several themes, including the notion that World War I was a war of navies as much as a war of armies. They explain that surface combat had a major

Object ID	Title	Author	Summary
			impact on all aspects of the naval war and on the course of the war in general. Finally, Clash of Fleets illustrates that systems developed in peace do not always work as expected in war, that some are not used as anticipated, and that others became unexpectedly important. There is much for today's naval professional to consider in the naval conflict that occurred a century ago"--Provided by publisher.
2018.372.002	Struggle for the Middle Sea : The Great Navies at War in the Mediterranean Theater, 1940-1945	O'Hara, Vincent P.	Offers detailed accounts of the actions of the five major navies in the Mediterranean Sea during World War II. Sheds light on the successful maritime strategy and often credible performance of the Italian Navy.
2018.372.003	German Fleet at War, 1939-1945, The	O'Hara, Vincent P.	Describes 69 surface actions fought by large German warships against British, French, American, Polish, Soviet, Norwegian and Greek warships of similar size. Provides insight to the German Navy's contribution to the country's war effort and hopes for victory.
2018.373.001	USS Midway (CV-41) - The Magic Touch - 1985-87	Thornton, Jon (ed.)	A pictorial account of the life of the USS Midway that covers a period from mid-1985 to about April 87. Operations included a deployment to Indian Ocean as Battle Group Alfa JUL to SEP 85. Exercises included Team Spirit 85-86, Inferno Creek, Annuaalex w/JMSDF, Multiplex and ASWEX. A significant maintenance period, EISRA '86, took place April to November 86 and included preps for the F/A-18 Hornet. The last A-4's and A-7's departed Midway in March 86. Port visits included Fremantle, Subic Bay, Hong Kong, Pattaya Beach, and Sasebo. Carrier Air Wing Five was embarked for the I.O. deployment and underway portions of the period when aircraft were aboard.

2018.376.001	Naval Aviation 1911-1986 : A Pictorial Study	Russell, Sandy (ed)	This books is not intended to be an in-depth treatment of Naval Aviation history, but rather a short visual monograph designed to capture the essence. There are several good pictures of women in the Navy: photo of a Wave tearing down an aircraft engine, first female Naval Aviator, Barbara Ann Allen, a woman preflighting a helicopter, and the first woman graduate of the U.S. Naval Test Pilot School. P. 60 has a picture of the first black Naval Aviator, Jesse L. Brown. P. 70 has a picture of pilots who scored the first MiG kills in Vietnam (from the Midway). Also on P. 70 is a picture of the V/STOL making its first carrier landings aboard the Bennington off San Diego.

2018.383.014	USS America (CV-66) - Sailors, Shellbacks and Sugarloaf - 1977	Riley, David (ed.)	A pictorial account of the five-week cruise of USS America (CV-66) as part of Carrier Group Eight to the South Atlantic to participate in exercises with the Brazilian Navy and port calls in Brazil. The ship departed Norfolk on 10 June 1977 and returned to Norfolk on 19 July. America visited the ports of Salvador and Rio de Janeiro. A

Object ID	Title	Author	Summary
			crossing the line ceremony was held on the journey south and a 4th of July BBQ was conducted on the flight deck for the crew and 1,000 Brazilian guests. This was very much a goodwill cruise and goodwill was engendered among the America's crew, the Brazilian people and the Brazilian Navy. This thin, large format, paperback book is filled with wonderful photos of the voyage and Rio. Carrier Air Wing Six was embarked, consisting of: VF-143 (F-14A); VF-142 (F-14A); VA-15 (A-7E) ; VA-87 (A-7E); VA-176 (A-6E and KA-6D); VS-28 (S-3A); VAQ-137 (EA-6B); VFP-63 Det.5 (RF-8G); VAW-124 (E-2C); and HS-15 (SH-3).
2018.384.002	USS Midway (CV-41) - A Touch Of Salt - 1976-1978	Begy, C. R. (ed)	Pictorial account of USS Midway, lead ship of its class, activities during the period of 1976 to 1978 including an 89 day South China Sea/Indian Ocean deployment commencing in August of 1977. The ship departed from Yokosuka, Japan. There is a 1976 cruise book, and a 1978-79 cruise book. One source on the internet lists 4 deployments in 1976, 3 deployments in 1977, and 2 deployments in 1978. It is difficult to determine which deployments this book covers. Port calls in this book included the Pusan, Hong Kong, Subic Bay, Freemantle (Perth), Karachi, Singapore, Diego Garcia, Bandar Abbas, Misawa, Kadena. Onboard was Carrier Air Wing Five (CVW-5). Squadrons listed in this book but which change with other deployments in 1977 are: VF-161 (F-4N) VF-151 (F-4N) VA-115 (A-6A/B and KA-6D) VAW-115 (E-2B) VQ-1 VMAQ-2 Det. (EA-6A) HC-1 Det.B-1 and B-2 (SH-3G) The following was written by Pete Clayton and Robert L. Broadus and appears on page 279 of the Midway cruise book for 1978-79: Beginning in May of 1977,

Object ID	Title	Author	Summary
			VF-151 and VF-161 transitioned to F-4Js and VA-56 and VA-93 started flying A-7Es. VA-115 also exchanged their A-6As and Bs (A-6Bs) for A-6Es. This CVW-5 transition occurred while the ship was in port for its 60 day EISRA (Extended Incremental SRA, a unique modernization concept developed for Midway). The air wing transition was completed in September when USS Coral Sea fighter squadrons VF-191 and VF-194 exchanged their F-4Js with Midway's F-4Ns, prior to Coral Sea returning to Alameda after her 1977 deployment. In late 1977, Midway made an 87 day deployment to the Indian Ocean where she was the principal participant in Midlink 77, an exercise hosted by the Iranian Navy and including representation from Pakistan, Turkey, and the Royal Navy.
2018.385.001	USS Midway (CVA-41) - World Cruise - 1954-55	Patureau, Alan C. (ed.)	Pictorial account of the world cruise of USS Midway in 1954-55, conducted as Midway was changing homeports from Norfolk, VA to the west coast of the U. S. The ship departed Norfolk 27 December 1954 and transited to the Pacific via the Cape of Good Hope. She operated in the western Pacific with the U.S. Seventh Fleet, conducting the Formosa Straits patrol and other fleet exercises and maneuvers in the South China Sea. She arrived at her new homeport of Alameda, CA on 14 July 1955. She remained there for only a week before proceeding north for a major overhaul at Bremerton, WA which commenced on 3 August 1955. Port calls during her deployment included Mayport, Capetown, Colombo, Manila, Hong Kong, Yokosuka and Pearl Harbor
2018.387.001	USS Midway CVB-41 Mediterranean Cruise 1952	Fox, Duane C. (ed)	Pictorial account of the 126-day deployment of USS Midway (CVB-41) to the Mediterranean Sea in 1952. The ship departed Norfolk, VA on 12 January and returned to Norfolk on 5 May. Port visits included Gibraltar, Augusta, Naples, La Spezia,

2018.391.001	USS Midway (CV-41) - Fortieth Anniversary 1945-1985 - The Magic Goes On - 1984-85	Williamson, Willie (ed.)	A pictorial account of an approximate 2-year period in Midway's forward deployed life. It covers the 28 December 1983 to 23 May 1984 deployment to the Western Pacific--Indian Ocean and Persian Gulf; the 15 October 1984 to 12 December 1984 deployment to the Western Pacific, and the history of the Midway until she went in to drydock in March of 1985.. Midway was at this time homeported in Yokosuka, Japan. During the 5 month cruise (11984-85), Midway spent 111 continuous days at sea (on Gonzo Station) and steamed over 63,000 miles. Conducting almost 9,800 hours of flight operations, she launched and recovered over 5,300 aircraft, breaking the all-time record for the first quarter in any year of her history. Ports visits included Sasebo, Subic Bay, Manila, Pattaya Beach, and Singapore. A visit to Perth was cancelled to take up a USS Kitty Hawk commitment in the Indian Ocean. Carrier Air Wing Five (CVG-5) was embarked. Onboard for the 1983-84 deployment were: VF-161 (F-4S), VF-151 (F-4S), VA-93 (A-7E), VA-56 (A-7E), VA-115 (A-6E and KA-6D), VAW-115 (E-2B), VMFP-3 Det.B (RF-4B), VAQ-136 (EA-6B), and HC-1 Det.2 (SH-3G). Onboard for the October - December deployment were: VF-161 (F

2018.393.001	World's Warships, The	Blackman, Raymond V. B.	Third edition of the World's Warships by Raymond Blackman. This is a concise and authoritative survey of the modern fighting ships of the world's navies. The ships are arranged by class--battleships, aircraft carriers, cruisers, etc. for easy reference, and illustrated with over one hundred carefully chosen photographs. The maximum information is given, including details of tonnage, armaments (security permitting), specifications; and in the case of smaller craft, a list of sister ships to which the same data applies.
2018.393.002	Soviet Military Power 1981	U. S. Dept. of Defense	Soviet Military Power was a Public Diplomacy publication of the United States Department of Defense, which provided an estimate of the military strategy and capabilities of the Soviet Union during the final years of the Cold War, ostensibly to alert the U.S. public to the significant military capabilities of the Soviet Armed Forces. First published in early October, 1981, it became an annual publication from 1983 until the collapse of the Soviet Union in 1991. Already in draft as the Soviet Union collapsed, the 1991 version was retitled "Military Forces in Transition". In addition to the majority English version, Soviet Military Power was translated, printed, and disseminated in a variety of languages, including German, French, Japanese, Italian and Spanish. (from Wikipedia.org)

2018.394.001	Seven at Santa Cruz : The Life of Fighter Ace Stanley "Swede" Vejtasa	Edwards, Ted	"This biography details how Stanley "Swede" Vejtasa became a World War II naval hero. During the Battle of the Coral Sea, Swede flew an SBD Dauntless dive-bomber and helped sink Shoho, the first aircraft carrier lost by Japan in World War II. The next day, in that same Dauntless, he took off from USS Yorktown and out-flew and out-gunned three Japanese Zeros, making him the only dive bomber pilot to be awarded Navy Crosses for both bombing and aerial combat. During the Battle of Santa Cruz, Swede Vejtasa single-handedly downed an unprecedented two Japanese dive bombers and five torpedo bombers and saved the USS Enterprise."--Provided by publisher. During the Battle of the Coral Sea, Swede flew an SBD Dauntless dive-bomber and helped sink Shoho, the first aircraft carrier lost by Japan in World War II. The next day, in that same Dauntless, he took off from USS Yorktown and out-flew and out-gunned three Japanese Zeros, making him the only dive bomber pilot to be awarded Navy Crosses for both bombing and aerial combat.

Object ID	Title	Author	Summary
			Months later, the day before the Battle of Santa Cruz, Swede was flying an F4F Wildcat fighter off USS Enterprise and had no recourse but to follow orders he knew to be insane. He and his squadron mates flew their predictably empty search legs and beyond, only to discover upon their return to Point Option in the dark, that Enterprise was nowhere to be found. Incredibly, Swede located the oil slick he had noticed seeping from Enterprise during a morning combat air patrol and was able to track it back to the carrier. After their harrowing return, during the Battle of Santa Cruz, the fate of Enterprise, and by extension Guadalcanal, lay in the hands of that same Swede Vejtasa. He responded by single-handedly downing an unprecedented two Japanese dive bombers and five torpedo bombers attacking the carrier. Skipper Jimmy Flatley recognized that in all likelihood, Swede had saved Enterprise from destruction, and he recommended Swede for the Medal of Honor. Contents: "The admiral is a stupid ass" -- Beginnings -- Naval aviator -- Pearl Harbor -- Tulagi -- Battle of the Coral Sea -- Intermission: Summer of 1942 -- Developments elsewhere -- A phantom goose chase concluded -- The Battle of Santa Cruz -- A battle concluded -- What does victory look like? -- The naval Battle for Guadalcanal -- On to Guadalcanal -- From combat to commander -- No easy days: Air Boss on USS Essex -- Grooming -- USS Constellation, "America's flagship" -- Do not pass Captain -- Afterthoughts -- Epilogue -- Appendix 1. Goose chase controversies -- Appendix 2. Mission myths deconstructed -- Appendix 3. Crisis in leadership: Kinkaid's failure -- Appendix 4. Medal of honor

2018.397.011	USS Midway (CV-41) - Fortieth Anniversary 1945-1985 - The Magic Goes On - 1984-85	Williamson, Willie (ed.)	A pictorial account of an approximate 2-year period in Midway's forward deployed life. It covers the 28 December 1983 to 23 May 1984 deployment to the Western Pacific--Indian Ocean and Persian Gulf; the 15 October 1984 to 12 December 1984 deployment to the Western Pacific, and the history of the Midway until she went in to drydock in March of 1985.. Midway was at this time homeported in Yokosuka, Japan. During the 5 month cruise (11984-85), Midway spent 111 continuous days at sea (on Gonzo Station) and steamed over 63,000 miles. Conducting almost 9,800 hours of flight operations, she launched and recovered over 5,300 aircraft, breaking the

2018.400.001	USS Leonard F. Mason (DD-852) - Review, Vol. 2 - 1968-70	Fedyszyn (ed)	A pictorial account of the FRAM II Gearing-class destroyer USS Leonard F. Mason (DD-852) in its two-year period of forward homeporting to Yokosuka, Japan. She arrived in Yokosuka in August 1968 and returned to San Diego in August of 1970. The book depicts the various types of operations in which the ship engaged, the places visited and the work done by the crew. Japan, Hong Kong, Taiwan, Okinawa and the Philippines are showcased.

Object ID	Title	Author	Summary
			We were given permission by Dave Faige RD3/OS3, USS Leonard F. Mason (DD-852). 1971-1974 to copy data about the Mason from his website: http://cosmicshipmedia.net/history.htm. The following data covers the history of the ship during the 1968-1970 deployment: Her stay at Long Beach was short; three months of upkeep and training. She left once again for the Far East at the end of July 1968, returning to Yokosuka on 19 August as her home port. During the following months, Mason operated with the 7th Fleet from Japan to the South China Sea, participating in gunfire support and plane guard duties. On 26 September 1968, while on Yankee Station, Mason was re-armed by the USS Great Sitkin (AE-17). Mason operated as a part of Operation Sea Dragon throughout October and returned to Yokosuka for the Christmas holidays via Hong Kong and Kaohsiung, Taiwan. On 7 December 1968, Mason launched and controlled a "Snoopy" drone for the USS New Jersey (BB-62), operating in the Tonkin Gulf, to check out control and video monitoring equipment. The next day, Mason accompanied the New Jersey to Subic Bay, arriving 10 December 1968. January of 1969 saw Mason operating as a Search And Rescue (SAR) unit in the Gulf Of Tonkin, returning to Yokosuka at the end of the month to prepare for duties as Apollo 9 standby recovery station in the Pacific. From 3 March to 13 March 1969, Mason was part of the Apollo 9 recovery force. Afterward, she was detached and headed across the equator for gunfire support duties in Vietnam. During May and June 1969, the ship received an overhaul in Yokosuka and prepared for upcoming inspections and a

Object ID	Title	Author	Summary
			change of command. Mason operated on Vung Ganh Rai Bay and channels during August 1969. [source: "Navy and Coast Guard Ships Associated with Service in Vietnam and Exposure to Herbicide Agent", 6 January 2011] The remainder of the year was spent dividing time between plane guard duty, gunfire support, and upkeep. The first half of 1970 provided Mason with much sea time. She operated in the Sea of Japan as a picket, as plane guard on Yankee Station, and as training ship in the Okinawa area. The ship was homeported at the US Naval Station, Yokosuka, Japan and was a unit of Destroyer Squadron 9 in the Western Pacific Fleet (WestPac). The ship and crew's principal operating tasks were: Carrier Ops Vietnam. The ship escorted the carriers Coral Sea, Enterprise, Kennedy, Oriskany, and others. Naval Gunfire Support Vietnam. Mason's 5"/38 guns were on call 24 hours per day on gunnery deployments. North SAR (search and rescue). This was challenging duty in the North Sea of Japan, riding picket line routes off North Korea in harsh conditions (18 to 20 degree Fahrenheit surface temperatures in Sea State 10). Salt water froze solid on all top side decks and the ship looked like a huge, dismal ice mass. South SAR, off shore Vietnam. Mason was called in to offer gunfire support and cover fire for helicopter crews going in-country to rescue downed fighter pilots. The routing to this South SAR duty station offered the ship the opportunity to transit the San Bernadino Straits of the Philippine Islands, reputed to be some of the most beautiful offshore cruising lanes in the world. During the 1969/1970 period, Mason received the SAMID package as part of the Fleet-In-Depth Overhaul, which

Object ID	Title	Author	Summary
			included the AN/SLQ-19(B) and CHAFFROC launchers. On 29 July 1970, Mason departed Yokosuka in company with the USS Henry W. Tucker (DD-875), USS Sterrett (DLG-11), USS Orleck (DD-886), USS Rupertus (DD-851), and the USS George K. Mackenzie (DD-836), headed for San Diego, California. The ships celebrated two Mondays when they crossed the International Date Line on 3 August. The Task Group did not stop at Midway for refueling. Instead, the oiler USS Mattaponi (AO-41) was dispatched to meet the ships enroute near Midway Islands for at sea refueling. The Squadron made a three-day port of call in Pearl Harbor, Hawaii, lasting from 6 August 1970 to 9 August 1970. On 15 August, the six destroyers entered San Diego harbor, led by the USS Sterrett (DLG-11). The Mason moored outboard of the USS Henry W. Tucker (DD-875). The Mason, along with the other destroyers, entered San Diego harbor flying the "Homeward Bound" pennant. This port entry was the last time the pennant was flown from so many ships on entry. San Diego, California was now the Mason's new home port - and remained so for the remainder of the Mason's deployment as a United States Ship. In December, Mason prepared for her overhaul at Long Beach Naval Shipyard.
2018.400.002	USS Leonard F. Mason (DD-852) - Keep on Trucking - 1971-72	Strickland, W. (ed)	A pictorial account of the FRAM I Conversion-class destroyer USS Leonard F. Mason (DD-852) WESTPAC cruise. She departed October 1971 and returned to San Diego in March of 1972. Items of interest and Ports of call: short history of the ship; bio of Leonard F. Mason, USMC, a Medal of Honor recipient; Pearl Harbor, Hawaii; Yokosuka, Japan; Kaohsiung, Taiwan; Subic Bay, Philippines; Tonkin Gulf operating SAR; Hong Kong.

Object ID	Title	Author	Summary
			We were given permission by Dave Faige RD3/OS3, USS Leonard F. Mason (DD-852). 1971-1974 to copy data about the Mason from his website: http://cosmicshipmedia.net/history.htm. The following data covers the history of the ship during the 11971-72 deployment: The ship deployed to the Western Pacific in October of 1971. At that time, Mason was the fastest accelerating unit in the destroyer squadron. The ship's ability to reach flank speed quickly enabled her to overwhelm the latest destroyers in short maneuvers (races). Upon leaving Pearl Harbor, Hawaii, Mason joined the USS Worden (DLG-18) and ships of Destroyer Squadron 15 for the transit to Yokosuka, Japan, arriving on November 11. Mason then continued for WestPac operations via Kaohsiung, Taiwan. Mason's initial operations in the Tonkin Gulf largely involved North SAR (search and rescue) patrols and gunfire support. Mason spent the early part of January 1972 in Subic Bay, Philippines, then returned to the Tonkin Gulf after underway replenishment on 12 January 1972 from the USS Mauna Kea (AE-22). During WestPac operations from January to March of 1972, Mason provided gunfire support, patrol, and carrier operations with the USS Constellation (CVA-64) and the USS Coral Sea (CVA-43) Other ships Mason operated with during this time were the USS Francis Hammond (DE-1067), USS John R. Craig (DD-885), USS Mahan (DLG-11), and USS Carpenter (DD-825). The first week of February 1972, Mason paid a visit to Hong Kong while in company with the USS Constellation (CVA-64) and the USS White Plains (AFS-4). 4 February

Object ID	Title	Author	Summary
			1972, while on the way in to Hong Kong, the Mason struck a junk in dense fog. The junk apparently did not have a radar reflector. The ships later returned to Yankee Station. On 10 February 1972, a helicopter from the USS Constellation (CVA-64) went down in the Yankee Station area. After the crew were rescued, the carrier attempted to retrieve the helicopter, but was unsuccessful. Mason was ordered to sink the aircraft to prevent it from becoming a navigational hazard. The Mason slowly sailed over the top of the helicopter, sinking it. From 17 February to 21 February, Mason was in Subic Bay, Philippines for maintenance, returning to Yankee Station afterward. After a brief stopover at Subic Bay, Mason departed WestPac on 8 March 1972 in company with the USS Chevalier (DD-805) and steamed to San Diego, California by way of Guam, Midway Islands, and Hawaii.
2018.403.001	Sea Wolf : A Biography of John D. Bulkeley, USN	Breuer, William B.	John Duncan Bulkeley (August 19, 1911 – April 6, 1996) was a Vice Admiral in United States Navy and was one of the most decorated naval officers. Bulkeley received the Medal of Honor for actions in the Pacific Theater during World War II. He was also the PT boat skipper who evacuated General Douglas MacArthur from Corregidor in the Philippines and commanded at the Battle of La Ciotat. The Navy named an Arleigh Burke-class guided missile destroyer after him: USS Bulkeley (DDG-84), commissioned in 2001. (from Wikipedia)

			May 1, 1898 Naval aviation and world war: the Battle of Midway, June 4, 1942 Missile warfare and the American imperium: Operation Praying Mantis, the Persian Gulf, April 18, 1988 Epilogue: naval battles and the 21st century. (from Amazon.com:) From Booklist A distinguished specialist in naval history and the Civil War studies five decisive moments in American naval history. In the Battle of Lake Erie, Oliver Hazard Perry's modest fleet prevented a British invasion of the Northwest. The Civil War duel between the Monitor and the virginia touched off a building race in ironclads, something that the Confederacy couldn't possibly win. At the Battle of Manila Bay, Commodore George Dewey's victory proved the potential of the new steel-shell-firing navy and opened the way to American overseas expansion. In World War II, the Battle of Midway, if it didn't necessarily prevent a Japanese victory, certainly sped an American one and proved the worth of the carrier-based aviation that has been America's major maritime striking arm ever since. Finally, Operation Praying Mantis in the Persian Gulf proved that when one goes closer inshore, attackers lacking command of the air can still use missiles to noteworthy effect. 2018.411.001	Wildcats & Hellcats : Gallant Grummans in World War II	Mendenhall, Charles A.	Wildcats, Zeros, Hellcats, the South Pacific, Wake Island, Guadalcanal, Midway, David McCampbell, Joe Foss, Butch O'Hare, they're all here - the planes, pilots and events in the South Pacific on which hung the early course of World War II. In this comprehensive work author Charles Mendenhall pays particular attention to the aircraft, the design of the Wildcat, the shocking appearance of the Zero at Pearl Harbor and the subsequent development of the Hellcat. Emphasis is on design philosophies of the period, air combat results and evolution of the Grumman planes. Included is coverage of foreign models and a special Wildcat/Hellcat fact file containing specifications, performance data and production information on every model of the Wildcat and Hellcat produced. 160 pages, 121 photos - including cockpit close-ups and eight scale drawings. (from back cover:)

2018.413.001	Essex Aircraft Carriers, The	Faltum, Andrew	A comprehensive operational history of Essex-class aircraft carriers, depicting life on board the ships, developments in US naval aviation, and military and peaceful uses of the ships during various eras. Includes numerous b&w photos and plan drawings, and appendices on technical data, individual ships, aircraft technical data, and camouflage, plus a glossary. The introduction of the first of the twenty-four Essex-class aircraft carriers in 1943 set a new standard for the exercise of American sea power. Andrew Faltum traces the evolution of these versatile carriers and the developments in United States naval aviation that accompanied their long service. Between the commissioning of the USS Essex, on the last day of 1942, and the retirement of the USS Lexington in 1991, the Essex carriers made the transition from propeller to jet aircraft, and they were improved by the introduction of the steam catapult and the angled flight deck. Considering the importance of the Essex carriers to naval history, surprisingly little has been written about them. The Essex Aircraft Carriers provides a comprehensive operational history of these ships and depicts life aboard. This book is illustrated with photos, maps,
