2003.010.002	Grumman A-6 Intruder	Jenkins, Dennis R.	1997. A book (8 1/2x11"), "Warbird Tech Series, Vol. 33, 'Grumman A-6 Intruder'", by Dennis R. Jenkins, and published by Specialty Press Publishers and Wholesalers, 2002.
2003.013.001	Official Monogram US Navy & Marine Corps Aircraft Color Guide, The, Vol. 4, 1960-1993	Elliott, John M.	A book (9 1/2x12 1/2"), "The Official Monogram US Navy & Marine Corps Aircraft Color Guide, Vol. 4, 1960-1993", by John M. Elliott, Maj. USMC (Ret), published by Monogram Aviation Publications, Sturbridge, MA, 1993. Table of Contents: Section 1 - Aircraft Coloring and Protection Coatings. Section 2 - National Aircraft Insignia. Section 3 - Identification and Recognition Markings. Section 4 - Maintenance and Safety Markings. Section 5 - Meritorious Recognition Markings. Appendix A - New System of Naval Aircraft Designation. Appendix B - Blue Angels. Appendix C - Colors for US Naval Aircraft. ===== This fourth and final volume in the series, covers the 33 years between 1960 and 1993. This book covers the Navy and Marine Corps aircraft colors and markings during the period of the war in Vietnam, conflicts in Africa as well as the Middle East and Operation Desert Storm. Like previous volumes, this book covers all of the changes in the coloration and markings of Naval and Marine Corps aviation during this remarkable period. This volume contains 5 sections and 11 chapters plus 3 appendices including the colors of the Navy's Blue Angels. At the end are 3 pages of 45 genuine lacquer paint chip samples, each measuring 1 3/4 inch square. This book also contains 344 photographs, 262 color photographs, 23 color illustrations and 48 full-color unit insignia.

Object ID	Title	Author	Summary
			Review During the period covered in volume 4, Navy and Marine Corps aircraft progressed from overall glossy gray-and-white paint schemes with colorful tail markings accented by red, white and blue national aircraft insignia to drab, flat and often times spotty tactical gray paint schemes developed to increase survivability. It is nice to note that even today a few colorful paint schemes appear in the air wings, if only on one plane per squadron. This book has a few caption errors and the occasional wrong aircraft designation, but the few flaws are more than offset by the wealth of useful information in this book. Vol.4, with the other three, are essential references for historians as well as aircraft modelers. -- The Hook, Fall 1994 About the Author Major John M. Elliott USMC (ret.) has had a life-long interest in Naval and Marine Corps aviation. His credentials are well-known to aviation history buffs and writers alike. He has been on the staff of the Naval Aviation News, and the Smithsonian Institution, and has served as an aviation consultant to numerous aviation museums around the globe. He is presently retired and lives in Woodbridge, Virginia where he continues to write about Naval and Marine Corps aviation subjects. (from Amazon.com)

2003.016.001	USS Midway (CVA-41) - Western Pacific Cruise - 1958-1959	May, Larry (ed.)	A pictorial account of the life aboard USS Midway from the time of her recommissioning at Bremerton, WA in 1957 through the end of her WESTPAC cruise of 1958-59. Includes workups in southern California, and calls at Long Beach and San Francisco prior to deployment from her new homeport of Alameda on 16 August 1958.. Deployment port visits included Pearl Harbor, Subic Bay, Buckner

The Air at Last 4. Home Port --- 5. What Use is a Baby? --- 6. The Factory 7. The Gyrenes --- 8. VP 221-8 -- - 9. The Big Boats 10. Day on a Carrier --- 11. Chit-Chat of the Fighting Fliers 12. Carrier and Battleship
2003.017.008	Grim Reapers, The	Johnston, Stanley	WWII is a war of machines, indeed, but one in which each machine depends on a man, or crews of men, and where the destructive power of each weapon is increased in direct ratio to the skill and audacity of those who control and direct it. Thus the age of machine war is not only dependent on individuals, but it has given individuals a fighting power far in excess of that possessed by other fighting men in other wars of the past. War in the Pacific as seen from the cockpits of

			summary of the USS Midway crew on a deployment from Alameda NAS to the western Pacific with the Seventh Fleet from 8 November 1963 to 26 May 1964 with CAW-2 consisting of VF-21, VF-24, VA-22, VA-23, VA-25, VAH-8, VAW-11, and VFP-63 embarked aboard. Port visits included Hawaii; Subic Bay, The Republic of the Philippines; Hong Kong; and Sasebo, Beppu, Iwakuni, and Yokosuka, Japan. In original
2004.016.008	Merchant Marine Officers' Handbook	Turpin, Edward A.	The main purpose of the "Merchant Marine Officers' Handbook" is to give as briefly as possible the essentials of the new examination proposed by the U. S. Bureau of Marine Inspection and navigation, and to serve as a compact and practical reference bood for everyday use on shipboard.
2004.016.009	Thousand Aviator Study Methodology	Oberman, Albert	"The Pensacola Study of Naval Aviators, commonly termed the "Thousand Aviator Study began in July, 1940 as a survey to validate techniques for preselecting pilot trainees in order to reduce the large attrition rate in the flight training program at that time. More than one thousand preselected men were given a large battery of psychological and physiological tests and measures for the purpose of improving the criteria then in use for selection of candidates for flight training. Captain Ashton Graybiel, one of the original investigators, foresaw the potential yield of continuous physiologic information on a group of healthy males from youth to senescence, and initiated re-examinations of these former aviators in 1951, 1957, and 1963. Each successive evolution increased in scope as new physiologic measures became available, and in significance as the subjects grew older."

Contains photos and short biographies of the graduating class.
2004.019.003	Compass, The - 1952	None Stated	Courtesy of John Clancy. NTC Bainbridge, MD. Book includes History of NTC Bainbridge, MD. NTC had its beginnings in 1942 when land was purchased from the Jacob Tome Institute. It was first activated on October 1, 1942 and ten days later was in operation training newly arrived recruits. From August 1945 until June 1947, the training activities of the Center decreased and it was deactivated on June 30, 1947. In the summer of 1950, when the Korean Crisis once more made it evident that a large Navy is vital to our nation's defense, plans were formulated to reactivate the Bainbridge Training Center to provide the needed input of trained men to man our rapidly expanding fleet and shore bases. "It is planned to use three of the Camps (Rodger, Perry, James and

Object ID	Title	Author	Summary
			Barney) to train males recruits to the maximum capacity of about 15,000 men. The fourth Camp will contain the only WAVE Recruit Training School in the Navy; which school, previously located at the U.S. Naval Training Center, Great Lakes, Illinois, was established in October 1951. It is expected to that the WAVE recruit population will reach a total of 4,500 young women."
2004.019.005	USS Midway (CVA-41) - World Cruise - 1954-55	Patureau, Alan C. (ed.)	Pictorial account of the world cruise of USS Midway in 1954-55, conducted as Midway was changing homeports from Norfolk, VA to the west coast of the U. S. The ship departed Norfolk 27 December 1954 and transited to the Pacific via the Cape of Good Hope. She operated in the western Pacific with the U.S. Seventh Fleet, conducting the Formosa Straits patrol and other fleet exercises and maneuvers in the South China Sea. She arrived at her new homeport of Alameda, CA on 14 July 1955. She remained there for only a week before proceeding north for a major overhaul at Bremerton, WA which commenced on 3 August 1955. Port calls during her deployment included Mayport, Capetown, Colombo, Manila, Hong Kong, Yokosuka and Pearl Harbor.
2004.019.006	USS Midway (CVA-41) - Western Pacific Cruise - 1958-1959	May, Larry (ed.)	A pictorial account of the life aboard USS Midway from the time of her recommissioning at Bremerton, WA in 1957 through the end of her WESTPAC cruise of 1958-59. Includes workups in southern California, and calls at Long Beach and San Francisco prior to deployment from her new homeport of Alameda on 16 August 1958.. Deployment port visits included Pearl Harbor, Subic Bay, Buckner Bay, Yokosuka, Hong Kong and Manila. Midway returned to Alameda on 8 March 1959. CVG-2 embarked, consisting of: VF-211 (F8U-1) VF-64 (F3H-2) VA-63 (FJ-4B)

2004.019.008	USS Midway 1963-1964	Romano, Jerry (ed)	USS Midway (CVB/CVA/CV-41) aircraft carrier; lead ship of the class. A pictorial summary of the USS Midway crew on a deployment from Alameda NAS to the western Pacific with the Seventh Fleet from 8 November 1963 to 26 May 1964 with CAW -2 consisting of VF-21, VF-24, VA-22, VA-23, VA-25, VAH-8, VAW-11, and VFP-63 embarked aboard. Port visits included Hawaii; Subic Bay, The Republic of the Philippines; Hong Kong; and Sasebo, Beppu, Iwakuni, and Yokosuka, Japan.
2004.019.011	USS Midway (CVA-41) - 1979-1980	Guiam, D. (ed.)	A pictorial account of the general period June 1979 through the end of 1980 for the USS Midway, lead ship of its class. Operations included routine Westpac ops from August 20 - September 14, 1979, an Indian Ocean deployment from 30 September 1979 to 20 February 1980, and a second I.O. deployment from 14 July to 26 November 1980. The first I.O. deployment of the period coincided with the Iranian Hostage crisis and featured 91 consecutive days at sea, the longest continuous at-sea operations by the ship to date. Port visits in the overall period included Hong Kong, Subic Bay, Perth, Mombasa and Korea. Carrier Air Wing Five was embarked with: VF-161 (F-4J); VF-151 (F-4J); VA-93 (A-7E); VA-56 (A-7E); VA-115 (A-6E and KA-6D); VAW-115 (E-2B); VMFP-3 Det.1 (RF-4B); VAQ-136 (EA-6B); and HC-1 Det.2 (SH-3G).
2004.019.012	USS Midway (CV-41) - Fortieth Anniversary 1945-1985 - The Magic Goes On - 1984-85	Williamson, Willie (ed.)	A pictorial account of an approximate 2-year period in Midway's forward deployed life. It covers the 28 December 1983 to 23 May 1984 deployment to the Western Pacific--Indian Ocean and Persian Gulf; the 15 October

Object ID	Title	Author	Summary
			1984 to 12 December 1984 deployment to the Western Pacific, and the history of the Midway until she went in to drydock in March of 1985.. Midway was at this time homeported in Yokosuka, Japan. During the 5 month cruise (11984-85), Midway spent 111 continuous days at sea (on Gonzo Station) and steamed over 63,000 miles. Conducting almost 9,800 hours of flight operations, she launched and recovered over 5,300 aircraft, breaking the all-time record for the first quarter in any year of her history. Ports visits included Sasebo, Subic Bay, Manila, Pattaya Beach, and Singapore. A visit to Perth was cancelled to take up a USS Kitty Hawk commitment in the Indian Ocean. Carrier Air Wing Five (CVG-5) was embarked. Onboard for the 1983-84 deployment were: VF-161 (F-4S), VF-151 (F-4S), VA-93 (A-7E), VA-56 (A-7E), VA-115 (A-6E and KA-6D), VAW-115 (E-2B), VMFP-3 Det.B (RF-4B), VAQ-136 (EA-6B), and HC-1 Det.2 (SH-3G). Onboard for the October - December deployment were: VF-161 (F-4S), VF-151 (F-4S), VA-93 (A-7E), VA-56 (A-7E), VA-115 (A-6E and KA-6D) , VAW-115 (E-2B), VAQ-136 (EA-6B), and HS-12 (SH-3H). Page 457 lists deaths which includes personnel from VF-161, VA-115, VA-56, VA-93, Eng and Wep.
2004.019.014	USS Midway (CVA-41) - Mediterranean Cruise - 1954	D'Argenio, Raymond M. (ed.)	A pictorial account of the deployment of the USS Midway to the Mediterranean Sea in 1954. The ship departed Norfolk on 4 January and returned to Norfolk on 4 August. Port calls included: Gibraltar; Algiers, Algeria; Augusta, Sicily, Italy; Taranto, Italy; Salonika, Greece; Athens, Greece; Cannes, France; Marseilles, France; Barcelona, Spain; Genoa, Italy; Livorno, Italy; Palermo, Sicily, Italy; Naples, Italy; and Tangier, Morocco. 2004.063.001	Carrier History, CVE-56 : USS Liscome Bay : Loss In Action, Gilbert Islands, Central Pacific, 24 November 1943	Bureau of Ships	USS Liscome Bay Loss In Action Report. Includes 3 plates: Damage and Paths of Survivors, Part I; Damage and Paths of Survivors, Part II; and Section at Frame 162.
2004.063.002	Carrier History, CVE-56 : USS Liscome Bay, Vol. 1	USS Liscome Bay	This binder contains photocopies of USS Liscome Bay newsletter while in service, and photocopies of the newsletter from the USS Liscome Bay Association. The first edition of the USS Liscome Bay newsletter, Vol. 1, No. 1, September 4, 1943. Also includes Vol. 1, nos. 2-3, 6, and 10. Includes Vol. 2, no. 5 of Otay Olla from the official station bulletin US Naval Auxiliary Air Station, Otay Mesa, California. Contains Correspondence and announcements from the USS Liscome Bay Association from 1993-2002.
2004.063.003	Carrier History, CVE-56 : USS Liscome Bay, Vol. 11 : Ship & Unit History	USS Liscome Bay Association	Includes letter from Tim E. Woodham, historian for the USS Liscome Bay Association which confirms turning over all the USS Liscome Bay history to the USS Midway Aircraft Museum; includes photo from commissioning; chronology of ship events; history of the ship; photos and plans of the ship; photo of explosion after hit by Japanese torpedo; articles about the sinking; letters to and from Japan seeking information about the Japanese ship that torpedoed the Liscome Bay; newsletter from US Naval Auxiliary Air Station, Otay Mesa, Calif.--the last shore training for VC-39.
2004.063.004	Carrier History, CVE-56 : USS Liscome Bay, Vol. 9 : Reunions, 1994-1998	USS Liscome Bay Association	Photos of Liscome Bay Association reunions, 1994-1998
2004.063.006	Carrier History, CVE-56 : USS Liscome Bay, Vol. 5 : Memories	USS Liscome Bay Association	Articles and newspaper clippings about the sinking of the Liscome Bay. Includes list of carriers sunk in WWII; sheet music for Eternal Father Strong to Save; includes newspaper clippings of survivors; a clipping about USS Hollister in honor of two brothers who were lost on the Liscome Bay and their brother who was lost on USS Plunkett. Title on cover

Object ID	Title	Author	Summary
			lists Squadron VC-39, but there isn't anything specifically about the squadron.
2004.063.009	Twenty-three Minutes to Eternity : The Final Voyage of the Escort Carrier U.S.S. Liscome Bay	Noles, James L., Jr.	The loss of the USS Liscome Bay came on her first combat operation: the American invasion of the Gilbert Islands. Despite her short career, she touched a number of remarkable and famous lives. Doris Miller, the first black American sailor to win the Navy Cross, lost his life, as did Rear Admiral Henry Mullinax, one of the Navy's first "air admirals". The authors account of the Liscome Bay and those who served aboard her is based on interviews with the ship's survivors and an unpublished memoir that the ship's pay officer made available.
2004.063.011	Carrier History, CVE-56 : USS Liscome Bay, Vol. 7 : Reunions, 1990-1993	USS Liscome Bay Association	Color photos of the 1st, 2nd, 3rd, and 4th USS Liscome Bay Association reunions in 1990, 1991, 1992 and 1993. The cover has Squadron VC-39 on it, but there is nothing specifically about that squadron in the binder.
2004.063.012	Carrier History, CVE-56 : USS Liscome Bay, Vol. 8 : Reunions, 1999-2003 & Survivors' Statements	USS Liscome Bay Association	Color photos of reunions from 1999-2003. Majority of the binder contains statements by the survivors about the sinking.
2004.063.013	Carrier History, CVE-56 : USS Liscome Bay, Vol. 10 : Scrapbook	USS Liscome Bay Association	Includes photos of Liscome Bay and airplanes; photocopies of photos; history of Liscome Bay; photocopies of newspaper articles about the sinking and about the loss of Capt. Irving D. Wiltsie; article about escape of Tim Woodham; articles about sailors lost and rescued; includes articles about Doris Miller who was a hero at Pearl Harbor; article about the Nimitz museum; articles on Navy policy of announcing ship losses is cited as cruel; photo of sailors from Georgia; obit of Captain Marshall U. Beebe; article by Capt. Beebe about Frank Sistrunk; artist rendering of the proposed Midway Museum's plan for Midway Memorial Park Pier; articles about heroic acts of sailors; article about proxy wedding; Navy and Marine Corps medal copies to Norman William

			Gierke and Irving Virgil Jones; includes list of survivors; deck log 2 December 1943 of USS Neville who transferred survivors; list of casualties from ship and Composite Squadron 39.
2004.102.013	NATOPS Pocket Checklist F/A-18 A/B/C/D 161353 and Up Aircraft Equipped with F4-4-GE-400 Engines	Commander, Naval Air Systems Command	Standardizes operating procedures for the U.S. Navy F/A-18 Hornet aircraft. This is a scaled down version of the NATOPS manual for the same aircraft. It can be carried in a flight suit pocket or strapped to a kneeboard for ease of reference in flight.
2004.113.004	USS San Jacinto CVL-30 1944-45 - A Short History	None Stated	Pictorial and detailed narrative account of the 3 May 1944 to 14 August 1945 cruise and combat operations of the USS San Jacinto (CVL-30) Independence-class light aircraft carrier. Crew member and future U.S. President George H.W. Bush mentioned on pages 11 & 44.
2004.115.023	Landmarks : A Survey of all Official Historic Landmarks in San Diego County	County of San Diego	San Diego County, California's oldest county (1850), offers history buffs, scholars, students and the casual observer an abundant treasury of anthologies, collections and volumes in which to explore the sites of historic significance and interest amidst the nearly 4,300 square miles which comprise the region. This volume is significant in that it is the first compendium of all official historic landmarks in San Diego County. Officially marked designations are provided by Federal, State, County or City bodies which are authorized, by ordinance, to make such declarations based on historical, cultural, architectural or archaeological values. This chronicle is noteworthy in that it also is the first document to focus on historic landmarks in the unincorporated areas of San Diego County and on sites of historic importance which are owned by the County of San Diego.

Object ID	Title	Author	Summary
			While this archive contains a record of nearly 800 landmarks of historic importance in San Diego County, several hundred additional potential sites are not included for lack of designation by an official governmental body. At this writing, ordinances governing historic sites exist in the cities of Carlsbad, Chula Vista, Coronado, Del Mar, La Mesa, National City, Oceanside, Poway, San Diego, San Marcos, Santee, and Vista, as well as the County of San Diego.
2004.117.029	Foundations of Moral Obligation	Brennan, J. G.	Naval War College Electives Program course for 1981-1982 term - EL 101
2004.117.030	Extracts from THE CONCEPT OF LAW by H.L.A. Hart, "Justice and Morality", "Laws and Morality"	Hart, H. L. A.	Extracts from The Concept of Law originally published in 1961, for Naval War College course on Foundations of Moral Obligation.
2004.117.031	Syllabus, Policy and Strategy	None Stated	Naval War College syllabus for Policy and Strategy course conducted 20 NOV 81 - 24 MAR 82
2004.117.033	Assorted Naval War College Topics	Brodie, Bernard	Assorted writings on topics germane to the Naval War College Operations Department studies probably in the late 1981 to early 1982 term.
2004.117.035	USS Midway (CV-41) - Fortieth Anniversary 1945-1985 - The Magic Goes On - 1984-85	Williamson, Willie (ed.)	A pictorial account of an approximate 2-year period in Midway's forward deployed life. It covers the 28 December 1983 to 23 May 1984 deployment to the Western Pacific--Indian Ocean and Persian Gulf; the 15 October 1984 to 12 December 1984 deployment to the Western Pacific, and the history of the Midway until she went in to drydock in March of 1985.. Midway was at this time homeported in Yokosuka, Japan. During the 5 month cruise (11984-85), Midway spent 111 continuous days at sea (on Gonzo Station) and steamed over 63,000 miles. Conducting almost 9,800 hours of flight operations, she launched and recovered over 5,300 aircraft, breaking the all-time record for the first quarter in any year of her history.

Object ID	Title	Author	Summary
			Ports visits included Sasebo, Subic Bay, Manila, Pattaya Beach, and Singapore. A visit to Perth was cancelled to take up a USS Kitty Hawk commitment in the Indian Ocean. Carrier Air Wing Five (CVG-5) was embarked. Onboard for the 1983-84 deployment were: VF-161 (F-4S), VF-151 (F-4S), VA-93 (A-7E), VA-56 (A-7E), VA-115 (A-6E and KA-6D), VAW-115 (E-2B), VMFP-3 Det.B (RF-4B), VAQ-136 (EA-6B), and HC-1 Det.2 (SH-3G). Onboard for the October - December deployment were: VF-161 (F-4S), VF-151 (F-4S), VA-93 (A-7E), VA-56 (A-7E), VA-115 (A-6E and KA-6D), VAW-115 (E-2B), VAQ-136 (EA-6B), and HS-12 (SH-3H). Page 457 lists deaths which includes personnel from VF-161, VA-115, VA-56, VA-93, Eng and
2004.117.041	American Bridge Head Coblenz, Germany 1919	US Army	Pamphlet "American Bridge Head" Coblenz, Germany 1919 (9x11).
2004.117.042	Virginia State Convention of the American Legion, Harrisonburg, 1930	American Legion	Booklet "American Legion" Virginia State Conv. 1930 (9x12).
2004.117.043	Americans at Their Best : 1st Battalion 303rd Armor	1st Bat. 303 Armor	Pamphlet "Americans at Their Best" story of 1st Bat. 303 Armor (9x11).
2004.117.045	Rand McNally Encyclopedia of World War II	Keegan, John (ed)	A detailed study of the battles, weapons, personalities and political events which comprised the most complex war in modern history. Every major plane, tank, artillery piece, hand gun and ship is described -- from the B-17 to the aircraft carrier, from the M-1 rifle to the V-2 rocket. Biographical sketches of leading and less important figures in the war from warlords like Hitler and Stalin to generals like Patton, Rommel, Guderian, Yamashita, Eisenhower and Montgomery have been covered. Every battle is described with every major campaign, and dozens of relevant maps have been juxtaposed near them to give them greater clarity. Important tanks, planes and other weapons are illustrated by photographs

Object ID	Title	Author	Summary
2004.117.048	Tung Chou (Lucky Bag)	Wittcoff (ed)	and line drawings. A pictorial history of the 1945 Chinese Training Program. One thousand Chinese reported to the Naval Training Center, Miami, to prepare to man a squadron of ships transferred by the US to the Republic of China under lend-lease arrangements. Phases of training included Basic, Specialized and Operational. Photos of the Officers and Crew with their assigned ships are in the back of the book. Ships Transferred: USS Wiffles (DE-6), USS Decker (DE-47), USS Lance (AM-257), USS Logic (AM258), USS Lucid (AM-259), USS Magnet (AM-260), USS PCE-867, and USS PCE-869. United Nations Naval Training Center
2004.130.008	Carrier : Fortress at Sea	Lipscomb, James (Director)	We have another copy filed in COMPUTER MEDIA: 2005.302.122. From the Discovery channel's TV documentary, this CD-ROM provides hours of firsthand exploration. Discover everything you ever wanted to know about aircraft carriers: learn how it works and visit with crew members on and off duty. Historical film footage and stills, graphics and sound effects enhance the experience. Comprehensive database gives instant access to technical details regarding USS Carl Vinson and its aircraft, crew assignments, operations, and 3D maps of major carrier actions. Includes a program to simulate guiding an F-14 to carrier landings, day, night, or foul weather.
2004.130.015	Remembering Pearl Harbor : U.S.S. Arizona Memorial	Stevens, Larry	The USS Arizona Memorial, located at Pearl Harbor in Honolulu, Hawaii, marks the resting place of 1,102 of the 1,177 sailors killed on the USS Arizona during the attack on Pearl Harbor on December 7, 1941 by Japanese imperial forces and commemorates the events of that day. The attack on Pearl Harbor and the island of Oahu was the action that

Object ID	Title	Author	Summary
			led to United States involvement in World War II. The memorial, dedicated in 1962, is visited by more than one million people annually. Accessible only by boat, it straddles the sunken hull of the battleship without touching it. Historical information about the attack, shuttle boats to and from the memorial, and general visitor services are available at the associated USS Arizona Memorial Visitor Center, which opened in 1980 and is operated by the National Park Service. The sunken remains of the battleship were declared a National Historic Landmark on 5 May 1989. (from Wikipedia)
2004.130.016	Away All Boats	Pevney, Joseph (director)	A war drama about the experiences of members of the crew of a U. S. Navy attack transport during World War II as their ship participates in assault landings on Pacific islands and is severely damaged by Japanese kamikaze attacks. Filmed in the Virgin Islands and the Caribbean Sea. (from http://catalog.loc.gov) Capt. Jebediah Hawks must weld a new ship and her inexperienced crew into a well-oiled war machine. Highlighted by spectacular battles with kamikaze planes, this is the exciting story of the amphibious attack transports that landed U.S. troops in the laps of their Japanese enemies during World War II. (from WorldCat)
2004.130.017	We Deliver : Triumphs of Columbia and the Challenger	National Aeronautics and Space Administration	Covers the first four operational flights of the Space Transportation System, STS flights 5, 6, 7, and 8 and stresses satellite deployment, the operational common denominator of these missions. Also includes secondary achievements such as EVAs, the first female and the first black astronauts, the first night launch and landing, and some of the

Object ID	Title	Author	Summary
			onboard experiments. (Source: WorldCat)
2004.130.018	At Sea	United States Navy Memorial	This program takes you into the Navy task force - screaming jet aircraft, the men and women who make them fly (from take-off to landing), through the burden of family separation and the joy of homecoming. (Source: WorldCat)
2004.130.019	Flight of the Intruder	Milius, John (director)	DVD also available: 2011.302.044. Danny Glover plays Commander Frank Camparelli, the battle-Hardened squadron leader of an aircraft carrier during the Vietnam War. Brad Johnson is pilot Jake Grafton, a disillusioned young renegade looking for payback. Willem Dafoe is Cole, the cynical, hell-bent bombardier Grafton recruits to fly an unauthorized mission behind enemy lines. The target: a missile depot in Hanoi. The plane: the A-6 Intruder, a low-altitude bomber with no defensive weapons. The risk: court-martial at the hands of Commander Camparelli ... if they live to return. (Source: back of slipcase)
2004.130.020	Intrepid Sea-Air-Space Museum	Clark, Glenn	The rich history of this noble vessel, the aircraft carrier USS Intrepid, is explored through original Navy films and the artifacts and aircraft aboard her deck. (Source: WorldCat)
2004.130.024	Crusade in the Pacific, nos. 6, 22-24	Tourtellot, Arthur B.	These videos are duplicates of the ones in the 2-disc set, War in the Pacific (2004.144.011 and 2004.144.014). The 1951 docudrama about WWII details the wartime events with original footage accompanied by the booming and bold narration of Westbrook Van Voorhis. A strong, moving 1950s depiction of stalwart US soldiers in the Pacific. The original video was produced in six volumes. This video contains parts from those volumes. See also 2004.193.025 and

Title on slipcase: "War Bird City" Palmer, Steve (writer, producer, director)
2004.131.023	Victory At Sea	Video Treasures (Firm)	The first part of this video, Full Fathom Five, is also part of the 26 part Victory at Sea DVDs--we have two copies of those. However, part two, Jap Zero is not part of that series. Part 1 is the story of the U.S. submarine fleet from 1941-1945. Part 2, Jap Zero, has Ronald Reagan starring in this training film made by the War Department. How do you tell the difference between U.S. and Japanese fighter planes? With some difficulty, as we see the Great Communicator almost shoot down the wrong plane. This teach film is of historic importance and with President Reagan starring in it, a great deal of fun to watch.
2004.131.024	Sea Power Plymouth Rock to Polaris and Sea War	Price Butler Publishing	This video contains two films: Sea Power Plymouth Rock to Polaris and the video Sea War. The Sea Power video covers wooden sailing ships to nuclear subs and carriers. Unforgettable visual history of the development of the United States Navy. Possibly originally produced by the US Navy and distributed by the National Audiovisual Center. The second video, Sea War, is a

2004.146.003	USS Midway (CVA-41) - World Cruise - 1954-55	Patureau, Alan C. (ed.)	Pictorial account of the world cruise of USS Midway in 1954-55, conducted as Midway was changing homeports from Norfolk, VA to the west coast of the U. S. The ship departed Norfolk 27 December 1954 and transited to the Pacific via the Cape of Good Hope. She operated in the western Pacific with the U.S. Seventh Fleet, conducting the Formosa Straits patrol and other fleet exercises and maneuvers in the South China Sea. She arrived at her new homeport of Alameda, CA on 14 July 1955. She remained there for only a week before proceeding north for a major overhaul at Bremerton, WA which commenced on 3 August 1955. Port calls during her deployment included Mayport, Capetown, Colombo, Manila, Hong Kong, Yokosuka and Pearl Harbor.
2004.149.001	USS Midway (CV-41) - Mediterranean Cruise - 1947-1948	Mahler, W. A. (ed)	A pictorial account of the USS Midway (CVB-41) Mediterranean Cruise, 1947-48. The ship departed Norfolk, VA on 29 OCT 1947 and returned to Norfolk on 11 MAR 1948. Port visits included Gibraltar, Malta, Tangier, Cannes, Bone, Genoa, Naples, Syracuse, and Taranto. Total miles travelled - approx 19,000.

2004.157.006	USS Midway (CV-41) - A Touch Of Salt - 1976-1978	Begy, C. R. (ed)	Pictorial account of USS Midway activities during the period of 1976 to 1978 including an 89 day South China Sea/Indian Ocean deployment commencing in August of 1977. The ship departed from Yokosuka, Japan. There is a 1976 cruise book, and a 1978-79 cruise book. One source on the internet lists 4 deployments in 1976, 3 deployments in 1977, and 2 deployments in 1978. It is difficult to determine which deployments this book covers. Port calls in this book included the Pusan, Hong Kong, Subic Bay, Freemantle (Perth), Karachi, Singapore, Diego Garcia, Bandar Abbas, Misawa, Kadena. Onboard was: Carrier Air Wing Five (CVW-5) Squadrons listed in this book but which change with other deployments in 1977 are: VF-161 (F-4N) VF-151 (F-4N) VA-115 (A-6A/B and KA-6D) VAW-115 (E-2B) VQ-1 VMAQ-2 Det. (EA-6A) HC-1 Det.B-1 and B-2 (SH-3G) The following was written by Pete Clayton and Robert L. Broadus and appears on page 279 of the Midway cruise book for 1978-79: Beginning in May of 1977, VF-151 and VF-161 transitioned to F-4Js and VA-56 and VA-93 started flying A-7Es. VA-115 also exchanged their A-6As and Bs (A-6Bs) for A-6Es. This CVW-5 transition occurred while the ship was in port for its 60 day EISRA (Extended Incremental SRA, a unique modernization concept developed for Midway). The air wing transition was completed in September when USS

2004.160.002	Air Force One : Aircraft That Shaped the Modern Presidency, The	Hardesty, Von	From Publishers Weekly This compelling history of presidential air transportation begins with the first president to fly (and to fly abroad, and to have a special plane): FDR.

Object ID	Title	Author	Summary
			Eisenhower and Truman both had dedicated prop planes, but JFK took the leap into the jet age with the 707 that had the grimmest task of any Air Force One-bringing his body home from Dallas. Other Air Force Ones have had less well-known dramas: Lyndon Johnson's impromptu around-the-world flight in 1967, Richard Nixon's last departure from Washington and Bush's escorted, circuitous route home after 9/11. But mostly the 707s and their successors the 747s have made the president accessible to the world and vice versa, without having to be out of touch with his responsibilities or reducing his security. The price of this is imposing; a double-page spread shows the logistics of a major presidential journey abroad. Among any number of fascinating sidebars are digressions on the transportation of other chief executives and on the presidential helicopters. With well-chosen and well-reproduced photographs, the author, a curator at the National Air and Space Museum, has provided a sterling contribution to the history of both the presidency and of American aviation and even includes an annotated bibliography of print, visual and electronic media. Copyright 2003 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. From School Library Journal Grade 6 Up-An attractive cover is only the beginning of an interesting and informative presentation by the curator of the Smithsonian National Air and Space Museum. Divided into seven chapters, the text is basically a chronology of presidential travel. Brief mention is made of James Monroe's two treks by horseback through the northeastern states, and then through the South. The train later became the presidents' unofficial mode of long-distance transportation.

Object ID	Title	Author	Summary
			Beginning with the Guess Where II used by First Lady Eleanor Roosevelt, the author describes the type, design, accommodations, and uses of the planes by each administration. Among those described are Sacred Cow, Independence, Columbine, and the various models known as Air Force One. Considerable space is devoted to how the interiors were redesigned to suit the personality of each leader. Double-columned text, sidebars, detailed captions, and wide margins result in a pleasing format. The text is generously illustrated with black-and-white vintage and color photos of all sizes. This title is not just a history of presidential aircraft, but is also a history of the presidency and how each plane played an important part in diplomatic and historical occasions, including the role of Air Force One on 9/11. A short epilogue lists where the retired planes may be viewed. Andrew Santella's Air Force One (Millbrook, 2003), which is much shorter, is for a younger audience, and focuses more on the planes than on history. However, it makes an excellent companion to this title. A first-class production. Eldon Younce, Harper Elementary School, KS Copyright 2003 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. (from Amazon.com)
2004.160.005	Defining a Nation	Halberstam, David	From Publishers Weekly Bestselling author and Pulitzer winner Halberstam brings together a powerhouse list of journalists and scholars to consider why America, "for all its flaws, for all the things I dissent from, remains so powerful a beacon to so many of the less favored of the world." Thirty-six writers consider a range of issues in American history and culture, from foreign policy to

Object ID	Title	Author	Summary
			education, technology, and even cuisine. Anthony Lewis examines our open society and the role of the courts in maintaining our freedoms. Harold Moore (We Were Soldiers Once...and Young) extols the citizen-soldier and the remarkable courage he has seen such soldiers exhibit. Anna Quindlen discusses Margaret Sanger, the woman who put family planning on the national agenda, as a central figure in 20th century feminism. With 300 black-and-white and color illustrations, this beautiful volume makes a wonderful gift for patriots of all stripes—even those, like Halberstam, who often label themselves dissenters. Copyright 2003 Reed Business Information, Inc. --This text refers to an alternate Hardcover edition. Product Description How to define America? In this unique compilation, David Halberstam enlists leading historians and writers—including Walter Cronkite, Louis Auchincloss, John Gregory Dunne, Joan Didion, Mary Gordon, Stan Katz, David Kennedy, Molly O'Neill, Arthur Schlesinger, and Anna Quindlen—in a quest to understand the American experience in all of its complexity. In each chapter, Halberstam defines key issues that have shaped the American character: the sheer physical size of the country; the rise of the meritocracy; the legendary events; leaders, rogues, and icons that have left their mark on American mythology; and the cultural contributions that are uniquely American. Halberstam's introductions are followed by richly varied essays that cover subjects ranging from Manifest Destiny to John Wayne movies, from FDR's New Deal to Margaret Sanger and the birth control pill, from Paul Revere's ride to the Joseph McCarthy

2004.165.003	USS Coral Sea (CV-43) - Westpac - 1979-1980	Pate, J (ed)	A pictorial depiction of the Midway-class aircraft carrier USS Coral Sea (CV-43)'s 1979 - 1980 WESTPAC Cruise. A port of call in Hawaii which was scheduled for 3 days had to be cut short due to political unrest in the rest of the world. Before arriving in Hawaii for a port call scheduled 24 to 26 November the president of South Korea was assassinated and the Iranians took over the US Embassy. Due to these events the USS Coral Sea was ordered into Hawaii on 21 November to take on supplies and depart within 7 hours. The ship exited Pearl Harbor 6 and 1/2 hours later after repairs and taking on supplies/fuel.

Object ID	Title	Author	Summary
			complete information at this site: http://www.veteransadvantage.com/cms/content/history-channel-air-veterans-story-films This film is dedicated to Calvin T. Brown. It begins with a history of his family, and moves on to his time in the US Navy from 1941-1952. He served on the following ships: USS Alden (DD-211) USS Dixie (AD-14) USS Pasig (AW-3) USS Utina (ATF-163) USS Sicily (CVE-118) USS Kearsarge (CV-33) USS Coral Sea (CV-43)
2004.172.002	USS Midway (CVA-41) - Cruise - 1959-60	Welles, Chris (ed)	Pictorial account of the USS Midway (CVA-41) deployment to the western Pacific (WestPac) departing Alameda, CA 16 August 1959 and returning in March 1960 with CVG-2 consisting of VF-21 (F-3H Demons), VA-22 (FJ-4B Furys), VA23 (FJ-4B Furys), VF-24 (F8U/F-8 Crusaders), VA-25 (AD/A-1 Skyraiders), and VAH-8 (A3D/A-3 Skywarriors) embarked aboard. Port calls included Pearl Harbor, Guam, Subic Bay, Buckner Bay, Yokosuka, Kobe, Sasebo and Hong Kong. Good pics of heavy seas in Typhoon Charlotte.
2004.180.003	World War II, Vol. 2 : Pacific	Grofe, Ferde	These two extraordinary videos feature striking footage (including some never seen before) on how The Great War took shape. Volume I takes you to Europe. Lay low in the trenches with the Allies... fly with pilots over London... march into Berlin... and experience victory as General Eisenhower leads our troops on D-day. Volume II shifts to the Pacific. Relive Pearl Harbor and Midway... witness a "kamikaze" attack... be there when the flag goes up at Iwo Jima... and the A-Bomb drops on Hiroshima. Two unforgettable videos you'll want to watch again and again. It's a story only TIME could

			eyewitness accounts by both American and Japanese survivors; images captured inside the sunken hull of the battleship Arizona" -- container. Includes bonus video: U-Boats : Terror on our Shores (Source: WorldCat)
2004.189.002	Battle for Midway, The : The Discovery of the U.S.S. Yorktown	Ballard, Robert D.	Dr. Robert Ballard leads a team of experts and four World War II veterans to Midway Island where the U.S. and Japan fought one of the fiercest battles of the war. They're in a race against time to find at least one of the downed aircraft carriers including the U.S.S. Yorktown. (from WorldCat)
2004.189.003	Untold Stories of WWII : Three secrets that Changed the War	Barrat, James (writer)	This video takes a look at three military threats that could have changed the course of World War II: Germany's atomic bomb project, the Japanese mini-sub, and the infamous Japanese kamikaze squads. (from WorldCat)
2004.193.024	Remembering Pearl Harbor : USS Arizona Memorial	Stevens, Larry	The USS Arizona Memorial, located at Pearl Harbor in Honolulu, Hawaii, marks the resting place of 1,102 of the 1,177 sailors killed on the USS Arizona during the attack on Pearl Harbor on December 7, 1941 by Japanese imperial forces and commemorates the events of that day. The attack on Pearl Harbor and the island of Oahu was the action that led to United States involvement in World War II. The memorial, dedicated in 1962, is visited by more than one million people annually. Accessible only by boat, it straddles the sunken hull of the battleship without touching it. Historical information about the attack, shuttle boats to and from the memorial, and general visitor services are available at the associated USS Arizona Memorial Visitor Center, which opened in 1980 and is operated by the National Park Service. The sunken remains of the battleship were declared a

2004.193.025	Crusade in the Pacific, nos. 5-9	Tourtellot, Arthur B.	These videos are duplicates of the ones in the 2-disc set, War in the Pacific (2004.144.011 and 2004.144.014). This volume parts 5-9. Part 5 traces the development of the Philippine Commonwealth towards independence and the setbacks suffered when the islands were drawn into World War II. Part 6 is a special look at the Pacific in transition, from the assumption of the Pacific Naval Command by Admiral Nimitz two weeks after Pearl Harbor, to the turning point of the Battle of Midway. Part 7 shows the Marines fight to capture and secure Guadalcanal from its embarkation from New Zealand in July of 1942. Part 8 is the story of Japan's capture, and the United States' recapture of the Aleutian Island chain which stretches across the North Pacific between Japan and North America. Part 9 reviews the Allied-Japanese struggle for New Guinea and the amphibious operation undertaken by the Australian and American troops to secure the island and put Japan on the defensive. Contents: part 5; U.S. and the Philippines; (27 min.) --; part 6; Navy Holds-1942; (26 min.) --; part 7; Guadalcanal: America's first offensive; (24 min.) --; part 8; War in the North-The Aleutians; (26 min.) --; part 9; Road back-New Guinea (26 min.). See also 2008.302.147 and 2004.130.024. Also published as War in the Pacific by the same group. Here are the parts to that: disc 1, pt. 1. The Pacific in eruption ; pt. 2. Awakening in the Pacific ; pt. 3. The rise of the Japanese empire ; pt. 4. American goes to war in the Pacific ; pt. 5. The U.S. and the Philippines ; pt. 6. The Navy holds, 1942 ; pt. 7. Guadalcanal: America's first

			the Japanese. She was one of the first American Carriers to be attacked by the dreaded kamikazes.
2004.193.061	Escort Carriers of the U.S. Navy	Polk, David	Category: US Navy History Description: This story will take us around the world and back, often in harm's way. It will leave some ships and men at the bottom of the sea, God rest them. And it will make of many largely unsung heroes. The comprehensive history is complimented by photographs from the Navy and the Reynolds/Gilbert Collection. This book superbly depicts the combat and non-combat lives of the escort carriers. Individual histories of the 86 escort carriers and biographies of veterans are included. 144 pages, 9" x 12" Hardbound (from turnerpublishing.com)
2004.193.062	Lost Ships of Guadalcanal, The	Ballard, Robert D.	Dozens of battered warships lie beneath the constricted waters off Guadalcanal, justifying the macabre moniker of Iron Bottom Sound. Unseen for 50 years, this submarine battlefield received its first visitor in 1992, aquanaut Robert Ballard. The twisted, encrusted shapes he saw are here spread out with the same lavish pictorial formula used in his enormously popular albums on the Titanic and the Bismarck. Prewar photos of battleships in dress regalia contrast graphically with eerie paintings and photos of shell and torpedo strikes that destroyed them and their crews. Now--as in the moment of foundering during the half dozen sharp, short naval battles around the island--guns aim askew, fatal holes gape wide, and turret plates peel back. The Titanic and the Bismarck--both on maiden voyages--sailed to the deep with ill-fated majesty. But Ballard treats these unheralded ships--American, Australian, and Japanese--with the same technical accuracy and awesome reverence. The

			author's name alone should trigger demand. Where will Ballard dive next? Jutland? Trafalgar? Gilbert Taylor Product Description A chronicle of the search for the ships sunk during the Battle of Guadalcanal integrates a first-person narrative of the expedition with photographs of ships from both sides lost in the battle. TV tie-in. 150,000 first printing. \$150,000 ad/promo. Tour. (from Amazon.com)
2004.193.063	East Wind Rain : A Pictorial History of the Pearl Harbor Attack	Cohen, Stan	The most comprehensive collection of pictures of the historic event that has yet been done. We also have the revised edition put out in 1994 and titled East Wind Rain objectid is 2009.304.026.
2004.193.068	Allied Escort Carriers of World War Two in Action	Poolman, Kenneth	'Woolworth carriers', 'jeeps', 'banana boats' they called them - pocket warships converted from tankers, tramp steamers and merchantmen - unlikely heroes in the war at sea. Yet these were destined to become key weapons in the Battle of the Atlantic and to play vital roles in all the naval theatres of war. HMS Audacity was the first of these brave and busy little ships, built to counter the menace of the German Condor long-range bombers and U-boats to the transatlantic convoys. A burned-out, captured enemy fruit ship, she was turned into a primitive auxiliary aircraft carrier with no hangar, operating just six US-built Martlet fighters flown by the Fleet Air Arm of the Royal Navy. Her presence, and that of her sisters, was to turn the tide of the Atlantic battle. More than 120 'escort carriers', as they became known, were produced during the Second World War, their urgent construction speeded by new techniques. In the United States, 'Hurry up' Henry Kaiser, the genius of the Liberty Ship, built 50 jeep carriers in less

Object ID	Title	Author	Summary
			than two years using prefabrication and all-welded construction. They were controversial ships: unsound, unseaworthy and vulnerable, said their critics. Disaster was sure to follow - their welds would crack in a heavy sea or the stress of combat; a torpedo would blow them apart . . . Vulnerable they were, and very lively in high seas, with their thinly-plated, armoured merchant hulls and heavy top-hamper - 'an awful lot perched on very little', said a British CVE captain. And some indeed suffered the fates prophesied for them. Others saw the war out triumphantly and were recycled into merchantmen after the cessation of hostilities, having proved their worth time and again. The mobile air cover they provided was of the greatest significance in defeating the U-boats and fending off the depredations of the Luftwaffe in the Arctic convoys to Russia. But the escort carrier became 'a great deal more than the name implies', as Admiral Nimitz wrote, not merely ferrying aircraft to the big fleet carriers, but actually standing in for them. Escort carriers were used to support amphibious landings in North Africa, Italy, Burma and dozens of Japanese-held islands in the Pacific. With more than 400 photographs (many of which have not been published before), line drawings and maps, this book tells the full story of these humble heroes. The author, Kenneth Poolman, is well qualified to present this lively account: a former Fleet Air Arm instructor, he knows how the men who fought the war at sea from the air really felt, their fears and their gritty fortitude - and their fatalistic humour. Here he presents, in highly readable form, the fruits of deep research in official archives and the personal

Marshall U. Beebe; an article about a pilot, Lt. Maurice E. Wells, landing on Carrier X and hearing that his ship, the Liscome Bay had sunk; photos of survivors of Liscome Bay; citation to Irvin Virgil Jones from C. W. Nimitz; list of Navy Cross and Temporary Citation for LCDR John B. Rowe, and list of navy and marine Corps Medals for 11 others; burial at sea for two survivors; list of survivors; list of the 642 lost; list of sailors not on the ship when it was sunk; deck log for the USS Neville, 2 December 1943 which lists survivors transferred to the Naval Hospital; article about Doris Miller who was a hero at Pearl Harbor and who died on the Liscome Bay; letter from Chaplain Robert H. Carley to father of James W. McCoy about his son's death; statement of William Woodward, Jr.; questionnaire for Liscome Bay survivors on board the USS Saratoga; shellback certificates for Arthur L. Chitchett and Arthur Norman Krueger; memorabilia of Leonard Joseph Bohm.
2004.195.003	Men of the Gambier Bay	Hoyt, Edwin P.	This is the vivid story of men at all levels --- from the captain to the seamen --- and the Japanese they faced in battle, first at the Marianas in June 1944 and finally on October 25, 1944, during the battle of Leyte Gulf. The Gambier Bay became the only US aircraft carrier in WWII to be sunk by naval gunfire.
2004.195.006	Gold Wings, Blue Seas	Rausa, Rosario	Long before "Zip" Rausa was

Object ID	Title	Author	Summary
			flying combat missions over the jungles of Vietnam, a gawky college basketball player sat mesmerized in a small-town movie theatre hatching a Navy carrier pilot roar toward his healing seaborne runway. The gold wings of the actor aviator haunted the young athlete for days and months and finally became the focus for his future career. Gold Wings, Blue Sea is the exciting tale of Rausa's way to the wings-one man's professional life as an aviator in the U.S. Navy. From flight school through successive tours in the Mediterranean, Washington, D.C., and Vietnam, Rausa captures the spirit of naval aviation and races the reader along in the copilot's seat through the humorous and dangerous events that are part of a pilot's life. Here is the sheer drama of the first solo landing on a moving runway at sea; the mad scramble from holding pattern to clear airspace so a low-fuel Skyhawk can land before ditching in the ocean; the light-headed euphoria that is the deadly danger signal of carbon monoxide poisoning; the tension of straining in the carrier's catapult-aircraft engines howling -and then being hurled off into the sky; and the serenity of standing on the flight deck late at night amidst the parked airplanes and listening to the giant carrier creak as it heaves slowly on the tranquil sea. The people of naval aviation are here, too: the tough, bellowing drill instructor who later proudly saluted "his" new ensigns; the returned POW who smilingly wore his cap into an officers' club bar, deliberately setting himself up to buy a "round of cheer" for everyone in the packed house; the enlisted troops who labored long and hard to keep the planes flying; and the vigorous, popular squadron commander who was killed leading a bombing attack on a storage facility near the coast of

			Vietnam. "Gold Wings, Blue Sea" is a real-life adventure story set against the world events of the last twenty years. Refreshing, humorous, and exciting, it is must o reading for people who fly airplanes, would like to fly them, or just wonder about the lure of the gold wings. Jacket illustration: VA-25 A-1s by R. G. Smith Back of jacket photos: top: T-28 Trojan, middle: A-4 Skyhawk, bottom: A-7 Corsair. (from dust jacket flap)
2004.195.007	Leyte, June 1944-January 1945	Morison, Samuel Eliot	This volume records the Battle for Leyte Gulf. This battle is not only the greartest naval battle of all time, but one of the most controversial engagements in the American War in the Pacific. The Japanese sent three separate fleets to Leyte Gulf. Ozawa's Northern Force was demolished by Halsey's Third Fleet, with Mitscher in tactical command; the Southern Force was wiped out by Seventh Fleet in what probably will be the last battle line engagement in naval history, the night action in Surigao Strait; the Center Force, although lucky to surprise off Samar a vulnerable group of American escort carriers under Rear Admiral Clifton Sprague, was thrown back in confusion and suffered grave damage.
2004.195.011	Devotion to Duty : Biography of Admiral Clifton A. F. Sprague	Wukovits, John F.	Sprague held the line., March 24, 2008 By David C. Nilsen (Radcliff, KY United States) When Kurita's battleships and cruisers appeared above the horizon, any sane naval officer knew that he was done.... Except that sane naval officers knew they had to hold off the enemy by any means at their disposal. And Clifton Sprague had the guts to bluff and fight and charge and bludgeon the Japanese..... until they broke and ran.

Object ID	Title	Author	Summary
			In the face of the biggest battleship in existence and all of her fellow battleships and cruisers, Clifton Sprague's baby aircraft carriers and tiny destroyers and destroyer escorts roused themselves and attacked--and won. They had no excuse to win, no excuse except audacity and courage and sheer toughness... But they won. Most of them died, pushing their audacity in the face of the Japanese battleships and cruisers, but they won. This is their story, and the story of the sort of man who could lead them, even if his story receded into the untold recesses of history that you didn't know until you read this book. "Ziggy" Sprague rules. Anyone who doesn't know it can choke. This is the story of "Ziggy" Sprague, and how his little collection of lightweights beat the biggest collection of heavyweights in 20th Century history...no kidding. You want to be proud to be an American? Read this book. Or else just die. These men didn't just die. They won. (from Amazon.com)

2004.197.004	Aviation Enthusiasts' Data Book	Robertson, Bruce	This unique book, compiled, by one of the world's greatest aeronautical historians, contains a fascinating collection of facts, dates and figures which it would be impossible to look up otherwise without access to a specialist library. Designed equally to meet the needs of the budding enthusiast or the dedicated historian, it contains chapters on: the language of aeronautics, world aircraft industries, national nomenclature, national insignia, aircraft identities and official specifications, the organisation of military aviation, Services' rank structures, the language of operations, honours and awards, Victoria Crosses, the aces, tactics, formations and evolutions, air display and aerobatic teams, aero engines, aero armament, the language of the ether and airships. In addition there are sections on works of reference, aeronautical publications, aircraft plans, civil registration markings, NATO code-names for Soviet aircraft, Allied code-names for wartime Japanese aircraft, calibres of aircraft and anti-aircraft weapons, world absolute speed records, world absolute distance records, world absolute height records and Schneider Trophy winners. Numerous diagrams and photographs complement the authoritative text, helping to make this the book in which to look up that elusive fact or figure. It will thus be extremely useful to journalists, writers, spotters, model makers and all other aviation enthusiasts. Bruce Robertson started his

2004.197.005	Naval Aviation Since 1927	United Technologies. Sikorsky Aircraft Division.	Aircraft in the period 1927 through the late 1970's. Publishing date unknown, but probably late 1970's. This book shows 22 Sikorsky airplanes (some labeled Vought Sikorsky) and helicopters from the PS-1 in 1927 to the SH-60B in 1977. Each entry has a full page black and white photo with a short description.
2004.201.001	USS Midway CVA-41 - Twentieth Anniversary - 1945-65	Hanish, Lance G. (ed)	A pictorial account of the cruise of the USS MIDWAY during it's 1965 western Pacific (WestPac) deployment with Carrier Air Wing Two consisting of VF-21 (F-4 Phantom IIs), VF-111 (F-8 Crusaders), VA-22 (A-4 Skyhawks), VA-23 (A-4 Skyhawks), VA-25 (A-1 Skyraiders), VAW-11 (E-1B Tracers), VFP-63 (RF-8 Crusaders), and VAH-8 (A-3 Skywarriors) deployed aboard. Departed Alameda, CA, 6 March 1965. Returned 23 November 1965. Ports of call include Honolulu, Hawaii; Subic Bay, Philippines; Yokosuka, Japan; Hong Kong, China. USS Midway (CV-41) aircraft carrier; lead ship of the class.

Object ID	Title	Author	Summary
2004.201.002	USS Midway 1963-1964	Romano, Jerry (ed)	USS Midway (CVB/CVA/CV-41) aircraft carrier; lead ship of the class. A pictorial summary of the USS Midway crew on a deployment from Alameda NAS to the western Pacific with the Seventh Fleet from 8 November 1963 to 26 May 1964 with CAW -2 consisting of VF-21, VF-24, VA-22, VA-23, VA-25, VAH-8, VAW-11, and VFP-63 embarked aboard. Port visits included Hawaii; Subic Bay, The Republic of the Philippines; Hong Kong; and Sasebo, Beppu, Iwakuni, and Yokosuka, Japan.
2004.202.001	USS Midway (CV-41) - A Touch Of Salt - 1976-1978	Begy, C. R. (ed)	Pictorial account of USS Midway activities during the period of 1976 to 1978 including an 89 day South China Sea/Indian Ocean deployment commencing in August of 1977. The ship departed from Yokosuka, Japan. There is a 1976 cruise book, and a 1978-79 cruise book. One source on the internet lists 4 deployments in 1976, 3 deployments in 1977, and 2 deployments in 1978. It is difficult to determine which deployments this book covers. Port calls in this book included the Pusan, Hong Kong, Subic Bay, Freemantle (Perth), Karachi, Singapore, Diego Garcia, Bandar Abbas, Misawa, Kadena. Onboard was: Carrier Air Wing Five (CVW-5) Squadrons listed in this book but which change with other deployments in 1977 are: VF-161 (F-4N) VF-151 (F-4N) VA-115 (A-6A/B and KA-6D) VAW-115 (E-2B) VQ-1 VMAQ-2 Det. (EA-6A) HC-1 Det.B-1 and B-2 (SH-3G) The following was written by Pete Clayton and Robert L. Broadus and appears on page 279 of the Midway cruise book for 1978-79: Beginning in May of 1977, VF-151 and VF-161 transitioned to F-4Js and VA-56 and VA-93 started flying A-7Es. VA-115 also exchanged their

Object ID	Title	Author	Summary
			A-6As and Bs (A-6Bs) for A-6Es. This CVW-5 transition occurred while the ship was in port for its 60 day EISRA (Extended Incremental SRA, a unique modernization concept developed for Midway). The air wing transition was completed in September when USS Coral Sea fighter squadrons VF-191 and VF-194 exchanged their F-4Js with Midway's F-4Ns, prior to Coral Sea returning to Alameda after her 1977 deployment. In late 1977, Midway made an 87 day deployment to the Indian Ocean where she was the principal participant in Midlink 77, an exercise hosted by the Iranian Navy and including representation from Pakistan, Turkey, and the Royal Navy.

2004.301.002	American Women in a World at War : Contemporary Accounts from World War II	Litoff, Judy Barrett (ed)	This book brings together twenty-five writings by women who share their rich and varied World War II experiences, from serving in the military to working on the home front to preparing for the postwar

Object ID	Title	Author	Summary
			world. By providing evidence of their active and resourceful role in the war effort as workers, wives, and mothers, these women offer eloquent testimony that World War II was indeed "everybody's war."
2004.301.003	Since You Went Away : World War II Letters from American Women on the Home Front	Litoff, Judy Barrett (ed)	This book focuses on the responses of women to the outbreak of war, courtship by mail, the varied responses experiences of war brides and war wives, and the challenges faced by female war workers. In addition, it provides examples of home-front responses to the demands created by the war.
2004.301.004	Hornet's Nest : The Experiences of One of the U.S. Navy's First Female Fighter Pilots	Cummings, Missy	"A brutally honest book by a courageous naval officer. Cummings' Hornet's Nest is a must read for anybody who wants the real inside story about the United States Navy." -- Gregory L. Vistica, Newsweek Correspondent and author of Fall From Glory, the Men Who Sank the U.S. Navy. "Cummings tells her story in a clear, sometimes humorous, but always riveting manner... Cummings was there, among the first women combat aviators. Her book gives society valuable knowledge of and to voices yet unheard." -- Rosemarie Skaine, author of Women at War: Gender Issues of Americans in Combat "Rarely do I get an opportunity to read a manuscript written in the "whole cloth" of someone who has been there and done that, but which is also articulately written and artfully constructed. " -- Rear Admiral Paul T. Gillcrist, USN -Ret., author of Feet Wet, Reflections of a Carrier Pilot Product Description In 1993, the Combat Exclusion Law was repealed in a landmark decision. For the US Navy, this meant that one of the last bastions of all male combat roles would be opened to women: the fighter and bomber squadrons. Despite the adamant protests of the male pilots,

Object ID	Title	Author	Summary
			senior naval leadership, and various conservative groups, women were assigned to fighter squadrons in late 1993. Hornet's Nest is the compelling account of one of the women in this first group, Lieutenant Missy Cummings. Waiting in the wings, Missy was an established adversary pilot and perfectly primed to step into the role of a combat pilot. Flying one of the world's most technologically advanced fighters would be exhilarating for Missy, but not without an exacting price. Missy's reception into the warrior ranks is overwhelmingly hostile and senior leadership in her squadron ensures that she receives harsh treatment, often deliberately criminal. Betrayed by the very institution that prides itself on honor, courage, and commitment, Missy eventually resigns from the Navy and abandons her dreams of a career. This real-life drama concludes with a critical analysis of the integration of women into combat pilot roles, and the future of women in combat aviation. (from Amazon.com)
2004.301.006	Making WAVES: A Woman in This Man's Navy	Johnson, Louanne	From Publishers Weekly Another story about a naive recruit learning to live in the military services genre that goes all the way back to World War II and See Here, Private Hargrove. This entry is unusual because the recruit is a woman and because she is a spunky and feisty human being. There are the customary mock-horrors of basic training, the shock of living without privacy and the petty officer, outwardly hard as nails, who sheds a tear when her "girls" finish. There are adjustments to conditions on various bases in the U.S. and the difficulties of finding quarters in the Philippines. But most of all, there is the problem of fitting into "this man's

Object ID	Title	Author	Summary
			Navy," and, despite Johnson's light touch, she raises some serious questions. She claims she was sexually harassed at almost every turn and on many occasions was discriminated against by men genuinely bitter about females serving in the armed forces. (December 15 Copyright 1986 Reed Business Information, Inc. From Library Journal Johnson tells what it is like to be an enlisted woman in the U.S. Navy. She details in a humorous, journalistic style the anti-female prejudice, the blatant sexual harassment, and the tedium of daily life and work. Johnson holds nothing back, writing well and often graphically. The tour of duty described is typical, beginning with her first day as a raw recruit and continuing along as she achieves a measure of success as a Navy journalist. Both as autobiography and as a description of life for women in the Navy, this is a good book. Recommended for large public libraries, as well as smaller libraries with readers connected with the Navy. Edward Gibson, Union Coll. Lib., Barbourville, Ky. Copyright 1986 Reed Business Information, Inc. (from Amazon.com)
2004.301.008	Dear Joan : The Epic Story of One of the Original Women Commissioned in the United States Navy	Bench, Marion R.	This book is not about soldiers battling in foreign lands but of strength and courage on the home front, and is told through the character Joan Evens. In March 1942, she was called to a top-secret meeting with navy officials where she discovers she has been chosen as one of the first three women to be commissioned into the United States Navy. One of her many responsibilities was to screen and select applicants for appointment as officers in the WAVES. This epic portrays the patriotic career of a Navy heroine serving her country. This epic portrays the patriotic career of a Navy heroine

Object ID	Title	Author	Summary
2004.301.011	Women in the Military : An Unfinished Revolution	Holm, Jeanne	serving her country. From Publishers Weekly Holm has updated this standard work, originally published in 1982, by adding material on the role of military women in the Grenada, Panama and Persian Gulf campaigns, along with a discussion of the bitter ongoing debate over the combat exclusion laws and draft policies relating to women. A retired Air Force major general, she chronicles women's struggle for a proper place in the armed services in the face of the sexist male leadership, which tolerated their presence as nurses and office clerks but did not take them seriously as soldiers until such breakthroughs as the introductions of weapons training in 1975 and the graduation of the first female cadet from West Point in 1980. Holm describes how Operation Desert Storm in 1991 became the catalyst for demands to review in practical terms the role of women in combat. She shines both as scholar and as journalist, and her account of how women have earned the right to be treated as "members of the first team rather than as a protected subclass" is eloquent, inspiring and richly informative. Director of Women in the Air Force (WAF) from 1965 to 1973, Holm was the first woman to attain two-star rank in the U.S. armed forces. Copyright 1992 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. From Library Journal Updated through Desert Storm, this revision of Holm's comprehensive history of women in the U.S. armed forces (originally reviewed in LJ 10/1/82) exemplifies advocacy scholarship at its best. Holm, a retired major general and former director of the WAF, marshals an impressive body of evidence to support her contention that the increasing number of women in uniform

Object ID	Title	Author	Summary
			since the 1960s has diminished neither the American military's operational readiness nor its combat effectiveness. Holm concludes that the United States will be best served by gender-neutral policies matching individual talents with necessary jobs--including combat assignments. Though her case for the entirely artificial nature of gender-based restrictions on women's military roles is less than convincingly demonstrated by the limited evidence from the Gulf War that forms the core of her argument, this updated work makes a major intellectual contribution to a major national debate. This is recommended for all collections. - D.E. Showalter, U.S. Air Force Acad., Colorado Springs Copyright 1992 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. (from Amazon.com)
2004.301.012	Crossed Currents: Navy Women in a Century of Change	Ebbert, Jean	This is the new, revised edition of the path-breaking first history of U.S. Navy women from World War I until the present day. Updated to include accounts of the integration of Navy women into the crews of combatant ships, tactical aviation squadrons, and of the work of Navy women in space. With a forward by Capt. Edward L. Beach, USN (Ret.), author of <i>The Navy: Two Hundred Years</i>, <i>Crossed Currents</i> is a comprehensive and inspiring chronicle. Review "A clear-eyed look at Navy women in history." -- Navy Times "Belongs in the bookcase of every man and woman who wishes to be knowledgeable about the complete history of the U.S. Navy." -- Naval Institute Proceedings "Solidly researched and engagingly written." --

"The author explain[s] the events surrounding the war and the economic conditions that temporarily produced a female-dominated work force," said PW. Ages 10-up. (Feb.)-- the events surrounding the war and the economic conditions that temporarily produced a female-dominated work force," said PW. Ages 10-up. (Feb.)r Copyright 1998 Reed Business Information, Inc. From School Library Journal Grade 6-9?Colman chronicles the drive to get women to enter wartime industries, providing insight into the federal government's propaganda campaign and incentives. She also supplies the facts and figures: many more women than one might suppose had full-time employment before the war, and many continued to work after it, sometimes in positions that were considerably less important and less lucrative. The author also discusses the sexual harassment and racial discrimination women experienced while doing their patriotic duty. The compromises they had to make in order to manage child care and to prove to men on the job that they were their equals

			are frequently ignored in other historical treatments of the Rosie -the-riveter phenomenon. From Colman's point of view, the experiences of stateside workers led the way to some of the more liberal reforms later in the century, especially for women and minorities. The abundant black-and-white photographs included are a real treat. An excellent addition.?Ruth K. MacDonald, Bay Path College, Longmeadow, MA Copyright 1995 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. (from Amazon.com)
2004.301.017	McDonnell Douglas Story, The	Ingells, Douglas J.	(from dust jacket flap:) Today the McDonnell Douglas Corporation is the largest Aerospace company in the country with backorders that total billions of dollars. The aerospace technology developed by their various divisions (much of which carries a "Secret classification") helps insure that America will be militarily strong, as well as being a leader in producing safe air transportation for the airlines of the world. Furthermore, there are many by-products of the Space Age that have been developed by the company which will give us goods and services for a better way of life. In this book:— *You will meet the men and women who have performed the tasks that give McDonnell Douglas its leadership role in these developments. *You will fly with test pilots when they dared to break through the once-feared sound Barrier—The "Brick Wall in The Sky." *You will see the birth of a giant wide-bodied airliner—the DC-10.

Object ID	Title	Author	Summary
			*You will meet two men—Mr. Douglas and Mr. McDonnell—who founded this aerospace giant, and learn of their thoughts and views of yesterday, today and tomorrow. *You will meet Astronauts on their way to the moon, and learn first-hand about the vehicles which put them on their way to the stars. *You will "sit in" on executive meetings and see the giants of industry at work, and learn how they put it all together and keep it that way. *You will meet the engineers who design the latest spacecraft, and the production workers who turn these dreams into hardware. IT'S ALL THERE and much more in "The McDonnell Douglas Story" told in a dramatic, fast moving style. Hundreds of photographs in black-and-white and color help put you right there where the action is. It will make you proud to be an American. Dust jacket by Jack Leynnwood AERO PUBLISHERS, INC. 229 West Aviation Road, Falbrook, CA 92028

2004.301.020	Marine Navigation 2 : Celestial and Electronic	Hobbs, Richard R.	Vol. 1 is titled Piloting. This volume is titled Celestial and Electronic. This volume was originally written as a textbook for use by midshipmen at the U. S. Naval Academy and the various NROTC colleges and universities.
2004.301.021	Radar Observer Manual (Fifth Revision)	Block, Richard A.	From the Acknowledgements--" The RADAR INSTRUCTION MANUAL was originally prepared by the U.S. Maritime Administration for use in its four radar schools. In 1982, these schools were transferred from government to civilian control. Marine Education Textbooks obtained permission to reprint this manual a number of years ago so that it would be available to those individuals who were unable to attend radar school or who wished to study material in advance of their attendance at school. The Coast Guard announced that effective November 15, 1982, it was discontinuing its practice of giving a separate radar observer examinations (except at certain remote locations) and that all future radar observer training would be conducted in schools offering an approved radar observer course. .. This "Fifth Revision of the RADAR INSTRUCTION MANUAL has been independently updated by the Marine Education Textbooks for instructional aid and guidance for the seafarer who is preparing to either upgrade, recertify or sit for the original license."
2004.301.022	Social Usage and Protocol Handbook	Office of the Chief of Naval Operations. Foreign Liason and Protocol Division.	This instruction sets forth current information on formal and informal activities which have a distinctly naval, military and /or diplomatic setting. It does not seek to duplicate the material available in numerous civilian etiquette texts which apply equally well to the military community.

2004.301.024	Applied Aerodynamics for the Naval Flight Instructor	Hayek, Paul A.	From endorsement letter "'Applied Aerodynamics for the Naval Flight Instructor' is promulgated for use in training prospective flight instructors. The manual is designed to increase the flight instructor's knowledge of basic aerodynamics. Through further study, research, and application of this knowledge, the naval aviator can improve his own professional competence, at the same time increasing his capability to train student naval aviators. The potential benefits to naval aviation fully justify such efforts." From the Introduction "It is readily agreed that it is impossible for have every naval aviator an aeronautical engineer, but it is hoped that the contents of this book will prove of some value in bringing the prospective flight instructor up to a level compatible with his task."

2004.301.029	Dreadnought Returns : USS New Jersey BB62, Mothballs to Vietnam	Leifer, Neil	In an age when seapower has come to mean aircraft carriers, nuclear submarines and highly-automated missile ships, a sailor getting his first glimpse of the massive gray battlewagon NEW JERSEY invariably thinks, "Man, this is the real Navy!"

Object ID	Title	Author	Summary
			One who agrees is the skipper of the NEW JERSEY, Captain J. Edward Snyder, Jr., whose assignment it was to bring the great ship back to life, after a decade in mothballs, and sail her into action off Vietnam. "This ship has a mystique," says Snyder. "She intrigues everyone from the Secretary of the Navy on down. And they all want a ride on a battleship." Mystique she has. Born in part of the yearnings of seagoing men for a more romantic past. For the proud December morning in 1907, for instance, when Teddy Roosevelt saluted the 16 battleships of his Great White Fleet (the original NEW JERSEY among them) as they stood out from Hampton Roads at the start of a triumphant world cruise. For the crucial hours in 1916 when 58 battlewagons, no less, slugged it out at Jutland. For the fighting months in the South Pacific when a brand new NEW JERSEY, flying the flags of Spruance and Halsey, carried the battle to Kwajalein, Eniwetok, the Carolinas, Saipan, Luzon, Iwo Jima, Okinawa, Truk and finally to Tokyo Harbor. But all that is past. The original NEW JERSEY was sunk in 1922 as target practice for Billy Mitchell's first experimental bombers. Even in World War II the battleship-whose original mission had been to duel other battleships for mastery of the sea -was limited largely to bombarding shore defenses and providing cover for carriers and invasion fleets. Now those tasks had passed to the airborne, the undersea and the missile ships. Mothballed once, the NEW JERSEY was called back to duty in 1951 and assigned to bombard the North Korean coast. Again in 1957 the NEW JERSEY was decommissioned, the last of the battleships to go. This time, it seemed, for good. "But we still had those guns,"

Object ID	Title	Author	Summary
			argues Captain Snyder. The guns indeed! Therein lies the rest of the NEW JERSEY's mystique. Nine 16-inchers they are. Nine monster cannon, mounted three each in three massively armored turrets. Each turret the size of a house - or a small fort. Each cannon twice the size of any other gun in any man's navy. Each capable of accurately hurling a 2,700-pound projectile over 20 miles in any weather. Enough to penetrate 30 feet of concrete or to "collapse a mountainside." And when all nine are fired together ... Thus was the NEW JERSEY ordered back to war, at a cost of 21.5 million, to project her tremendous firepower far into Vietnam in support of our troops in the field. This then is the story of the rebirth of a proud old ship, the only active battleship in the world, and of the men who brought her back. Neil Leifer's pictures, shot over a period of 14 months, trace her story from a nautical graveyard at Philadelphia to the firing line in Vietnam. It might be titled "the last cruise of the last battleship." But knowing the resiliency of the NEW JERSEY, don't count on that. (from dust jacket flap)

2004.301.030	Dreadnought Farewell : USS New Jersey BB62 Returns to Mothballs	Leifer, Neil	On 21 August 1969 the battleship NEW JERSEY and her crew were primed to sail once more for Vietnam when the harsh news came. Decommission. In a broad budget cut, NEW JERSEY and more than 100 other U.S. Navy ships were to be mothballed or scrapped. Instead of returning to Vietnam, where she had spent five effective months on the offshore gun-line in late 1968 and early 1969, NEW JERSEY was ordered to make one last short voyage-the cruise from Long Beach, California to Bremerton, Washington and deactivation. Though deeply disappointed, the officers and men of NEW

Object ID	Title	Author	Summary
2004.301.032	Midway : Battle for the Pacific	Castillo, Edmund L.	JERSEY turned to the new assignment with the same professionalism that had been the ship's tradition through three wars, and two previous decommissionings. Under a new commanding officer, Captain Robert "C" Peniston, NEW JERSEY made the final cruise to Bremerton. On 17 December she was formally decommissioned. Less than 20 months had passed since the proud day of her third commissioning in April, 1968. Photographer Neil Leifer had brilliantly documented the rebirth of the venerable World War II battleship in his book Dreadnought Returns. In it he traced NEW JERSEY and her great 16-inch guns from the mothball fleet in Philadelphia to the war zone in Vietnam. There, in support of Allied ground forces, she fired 12 million pounds of high explosives into Communist positions with intense effect. In Dreadnought Farewell, Leifer is aboard NEW JERSEY once more, recording with his acute and compassionate camera the final months of this latest stanza in NEW JERSEY's indomitable career. There are no gala commissioning ceremonies this time, no thundering broadsides from the mighty 16-inch cannon. But the job is accomplished, with style and dispatch, giving weight to Captain Peniston's parting message to his crew: "NEW JERSEY will lie resting and ready for her fourth call, should America once again need the guns of the last Dreadnought." Tom Flaherty
			18 American warships and hundreds of American warplanes were destroyed or badly damaged in the Japanese attack on Pearl Harbor, and it would take months or years for American industry to replace them all. So in the spring of 1942 the commander of the

2004.301.038	Famous Ships of World War 2 : In Colour	Ellis, Chris	INTRODUCTION This book follows the style of Laurence Dunn's Merchant Ships of the World in Colour 1910-29 and was originally going to be restricted to warships only. However, the title was broadened to include some mercantile ships or ships of merchant origin, since both world wars saw sea warfare become a 'total' conflict, above, on, and below the ocean, and any ship at sea was likely to get involved in some aspect of hostilities, including the most innocent of neutrals. Modern sea warfare is uncompromisingly hostile, for apart from the hazards of shot, shell, torpedo, and bomb

Object ID	Title	Author	Summary
			there is the common enemy of all ships and mariners, the sea and the weather, which can kill and destroy even when weapons fail to do so. In a conflict as long as World War 2, six years of intense naval activity involved ships of virtually every maritime nation. Actions took place in almost every sea and ocean of the world, though the really intense fighting was in the Atlantic, Mediterranean, and Pacific. Naval strengths were built up on a vast scale, unlikely to be surpassed in future, by the United States and Great Britain and the lesser participants, with only the Soviet Union in the 1960s and 1970s building up a naval and merchant fleet bigger than ever before. This book presents a selection of the ships and types of ship which fought in the greatest of all wars, the 1939-45 period. The most difficult work in the preparing of this book was selecting the subjects. An initial listing of ships which could be considered 'famous' in the sense of celebrated and renowned worked out about five times longer than the final choice. A ruthless pruning of the initial listing still left about twice as many ships as the size of the book would allow. Bearing in mind the nature of the series, with colour illustrations and an international readership, a final selection was made which had regard to a balance reflecting very roughly the naval strengths of the participants in World War 2, and a visual contrast between types and colour schemes. If we stuck to the definition of 'famous' already noted, many types of ship would not be included at all. But there were a good many classes and types of both warship...
2004.301.039	Ships of the United States Navy and Their Sponsors, 1950-1958	Somerville, Keith Frazier	FOREWORD: THROUGHOUT HISTORY new weapons have often been heralded as the ultimate

Object ID	Title	Author	Summary
			weapon that will sweep surface ships from the seas. This is an old story to sailors. In the 19th Century, it was the rifled gun; then it was the torpedo, the submarine, the airplane and now the H-bomb. Sailors have never underestimated these new weapons. But rather than spelling the doom of navies, these powerful new weapons invariably have added to the strength of seapower. Your Navy has changed a great deal since Volume 3, <i>Ships of the United States Navy and Their Sponsors</i>, appeared in 1950. By the time Volume 5 appears, there will be even more change. While the ships and their design may become radical in today's terms, they will be more effective tools with which to maintain control of the seas. In this nuclear-missile age, mobile forces are becoming more and more important. The fixed military installations are likely targets in the initial stages of a war. Mobility is important now and its importance will increase as better missiles are developed. Nuclear power in our ships of the future will give our forces more mobility. Our forces at sea will be able to stay at sea longer and cruise faster without our former concern for fuel. Our forces at sea no longer resemble the tight formations used during the last war. We have spread out, moved the ships far apart; this way we improve our defense against attack. Even if hit, which would be hard for an enemy to do, we still would not lose more than a ship or two. By spreading our ships out we also provide a defense in depth. Should an enemy try to get our attack carriers he would have to fly through many rings of defense. The outer ships would provide warning long before the enemy came within reach of our

Object ID	Title	Author	Summary
			force. He would be instantly attacked by our fighter aircraft. If he managed to get by them, our missile firing destroyers and cruisers would go to work on him. The missiles we have on these ships are good and we have had excellent results with them. By the time the enemy had arrived at the place he thought the carriers were they would have dispersed even more. The advent of new weapons is not a cause for concern about their adverse effects upon the future of the United States Navy—on the contrary, they are a source of ever-increasing strength to our forces afloat.

2004.302.025	Evolution of Aircraft Carriers	MacDonald, Scot	An electronic version is available at : https://www.history.navy.mil/content/dam/nhhc/research/historics/naval-aviation/evolution-of-aircraft-carriers/car-cont.pdf This booklet is a reprint of articles appearing in Naval Aviation News between 1962 and 1964 under the title "Evolution of Aircraft Carriers."
			This collection provides an interesting account of how

Object ID	Title	Author	Summary
			and why the carrier developed as it did.
2004.302.026	Flat-Tops and Fledglings : A History of American Aircraft Carriers	Pawlowski, Gareth L.	Traces the history of the American aircraft carrier from the early days of the 1920's and 1930's of experiment and theory which would not be proven until the outbreak of World War II when the aircraft carrier becaome the backbone of our task forces in the Pacific and Atlantic campaigns. The role of the American aircraft carrier in Korea, the cold war and Vietnam conflicts are described in length.
2004.302.027	Aircraft Carriers	Norman, C. J.	Types of aircraft carriers -- takeoff and landing -- above and below deck -- the story of carriers -- facts and records
2004.302.028	Daybreak for Our Carrier	Miller, Max	Top styling, and a swell feel for these impressions of life aboard a carrier in the mid-Pacific, the meaning of ship to men, the immediacy of each day, the rapid transitions from monotony to high tension, from fear to exhilaration. What a carrier looks like -- from flight deck to ready-rooms and General Quarters; her men, the ""airedales"" on the top deck, the young-old pilots, the little rear gunners and their basic English (they've got it down to one word); intelligence interviewers and signal landing officers; scuttlebutt, the unseen, but plenty audible cargo; D-Days, and nights before attack; take-off of planes, search for the missing, and always the uncertainty. The men, their jobs, their ship, recorded with feeling but without sentimentality, transmitting the intensity, bluffed over, of combat hazards. Prepared through the auspices of the Navy. Pub Date: May 24th, 1944 (kirkusreviews.com) An unidentified Essex class carrier in World War II combat operations. (from militarybookman.com and other sites)

2004.302.029	Fast Carriers : The Forging of an Air Navy, The	Reynolds, Clark G.	(from Amazon.com:) Originally published in 1968, this now classic study is considered essential reading for its analysis of fast aircraft carrier development. It provides a fascinating record not only of the U.S. Navy's metamorphosis from a battleship-oriented to a carrier-centered fleet, but also of the heated debates that took place over the changing naval strategy. With an insider's grasp of the personalities involved, award-winning naval historian Clark G. Reynolds takes readers from the war rooms of Washington to the flight decks of the Pacific. He vividly describes the battles over the concept of fast carriers between the air admirals and battleship admirals and offers little-known details gleaned from personal interviews and private diaries. About the Author Clark G. Reynolds, was professor emeritus of the College of Charleston in South Carolina. He is also the author of On the Warpath in the Pacific: Admiral Jocko Clark and the Fast Carriers and Admiral John H. Towers: The Struggle for Naval Air Supremacy, both published by the Naval Institute Press.
2004.302.032	World's Navies, The	Chant, Christopher	The World's Navies listed from A-Z with an Introduction intended as a manageable guide to the navies of the world at the beginning of 1979 listing aircraft carriers, anti-submarine cruisers, destroyers, frigates, corvettes, coastal patrol craft, assault ships, minelayers, ocean minesweepers, minehunters, and coastal minesweepers with photographs.

			drama and even the lighter side of operational activity. Never before has such a wealth of photographic material been presented in a handy reference format.
2004.302.035	Modern Naval Combat	Miller, David (David M. O.)	A compendium of NATO, Soviet and Japanese fighting ships, systems, characteristics and tactics as of 1986.
2004.302.036	Naval Shiphandling	Crenshaw, R. S. (Russell Sydnor)	Provides the fundamentals of good ship handling including the seaman's eye, forces affecting the ship, going alongside, anchoring, mooring, handling at sea, CIC, arctic ship handling, and pilots and tugs. Includes chapters on various ships including aircraft carriers, destroyers, cruisers, battleships, submarines, large amphibious and service ships, and landing ships.
2004.302.037	United States Naval Fighters of World War II in Action	O'Leary, Michael	A story of the war at sea in the vast Pacific theater. it appears paradoxical that some of the greatest sea battles of all time should have been contested not by a direct confrontation of the heavy ordnance of capital ships but by naval aviators in action often hundreds of miles from their carrier bases. This book vividly recalls the saga of these Naval and Marine airmen and the great machines they flew in the war that in daily encounters with the enemy promised less than an even chance of survival. The author made a penetrating technical analysis of such famous types as Corsair, Hellcat, Wildcat, Tigercat, and Bearcat. Even the Brewster Buffalo described by the author as an "unmitigated disaster" assumes the aura of the plucky fighter equal in spirit if not in construction and performance to the challenge of the air.
2004.302.038	Wings of the Navy : Flying Allied Carrier Aircraft of World War Two	Brown, Eric Melrose	Carrier aircraft, since their beginning, have been a very special kind of machine and demanded something equally special of the men who flew them. Eric 'Winkle' Brown was one such, a pilot who has enjoyed one of the most extraordinary

Object ID	Title	Author	Summary
			careers in flying. He was the first naval officer to head the elite Aerodynamics Flight at Farnborough where he tested captured German types at the end of World War II. His experiences then are recorded in Wings of the Luftwaffe. Here is the follow-up to that fascinating book, again edited by William Green, which records Eric Brown's from the cockpit experiences testing British and American carrier aircraft. Carrier operations are potentially the harshest and most dangerous test aircraft and pilot can face. Landing on the pitching, bucking deck of a carrier or catapulted over a plunging bow, shipboard aircraft had to be exceptional. Their real characters have been forgotten and distorted over the passage of time; now this book places on record the flying characteristics, good, bad and indifferent, of aircraft as varied as the Fairey Swordfish and Grumman Hellcat. Sixteen types are covered, each illustrated with cutaways, cockpit details and many photographs. (from front dust jacket flap)
2004.302.039	Air Power at Sea 1939-45	Winton, John	(from dust jacket flaps:) Nobody really knew in 1939 what aircraft would do in the coming war at sea. By 1945 there was no doubt that air power had proved to be the most powerful, most flexible, longest-ranging weapon ever used at sea. This book is the first to examine in detail the influence of air power. its successes and its failures, over the whole span of the Second World War at sea -- from the first tentative maneuverings of the British Home Fleet carriers in 1939 to the final triumphant strikes of the U.S. Fast Carrier Task Force against the mainland of Japan in 1945.

Object ID	Title	Author	Summary
			Illustrated by some of the most dramatic war pictures ever published, <i>Air Power at Sea</i> highlights the part aircraft played in all the great actions of the war: in the long and bitter struggle against the Atlantic U-boats, in the daring night attack on the Italian battle fleet at Taranto, the pursuit and destruction of the Bismarck, the blood and sacrifice off Norway, Crete and Guadalcanal, Pearl Harbor. the fate of Prince of Wales and Repulse. the defense of Malta, the life and death of the Tirpitz, the crucial battles of the Coral Sea and Midway, and in the great Allied advance across the remote islands of the Pacific. There seemed no end to the roles aircraft could play : torpedo strike, fighter defense above fleet and convoy, close support to the assault troops in an amphibious landing, long-range reconnaissance, mine-laying, air-sea rescue, and weather reporting. The art of flying was constantly being refined. There were new aircraft, new weapons, new techniques — and there were new personalities. The Second World War produced a different type of sea captain, one who fully understood the power of aircraft at sea. As John Winton points out, it was symbolically appropriate that the aircraft carriers, which had so often held the ring in the war, stayed at sea, off Japan, while the final Japanese surrender was signed in Tokyo Bay. JOHN WINTON is widely known as a novelist and historian who specializes in stories of the sea. He was born in 1931. and served in the Royal Navy from 1949. when he joined as a cadet. to 1963. when he retired as a Lieutenant Commander. having served in the Korean War. at Suez and for several years in submarines. He is now a full-time writer, not

			Northrop F-5E Tiger II -- Grumman F-14 Tomcat -- Navy Aircraft on Display
2004.302.044	F-4 Phantom	Gunston, Bill	(from dust jacket flap:) "When you watch her take off, you see her arched nose and down-swept stabilator separated by a bulky midriff that looks as awkward as a goose with drooping tail feathers and middle-aged spread." So wrote a spokesman for the U.S. Navy, first customer for the Phantom. An Air Force major was even more outspoken: "When I first saw a Phantom I thought it so ugly I wondered if it had been delivered upside down." Who would have thought the grotesque object they were referring to would be the greatest combat aircraft of its day? Big, tough, and enormously capable, the F-4 Phantom has twin engines that make noises like a vast celestial organ and leave sooty trails. Under its broad body and wings it carries a bigger load of weapons than any other fighter, and it sets more world records for speed, climb, and ceiling than any other aircraft in history. In production after over twenty years in service, the great multirole Phantom is still hard to beat. In this book Bill Gunston, an outstanding aviation writer tells the history of the Phantom and its design, how it works, how it flies, and how it fights, The book will be of interest to the professional, the amateur aircraft enthusiast, the spotter, and the modeler.
2004.302.045	US Navy Air Wings : Flamboyant Markings 1965 - 1975	Francillon, René J.	Introduction: With the promulgation on 23 February 1955 of MIL-C-18263(AER), a new era began for Naval Aviation, as for the next 25 years carrier aircraft were to have unspectacular Light Gull Gray upper surfaces and gloss Insignia White under surfaces. Moreover, colourful squadron markings, which had begun to brighten naval aircraft after

Object ID	Title	Author	Summary
			the Korean War, became the norm rather than the exception and in the process heightened esprit de corps,'brought joy to aircraft enthusiasts, and boosted Kodak's profit. Even sustained combat operations in Southeast Asia did not lead to toning down these markings and the evaluation in 1965-66 of tactical camouflage for carrier aircraft remained inconclusive. In fact, the most colourful schemes were those carried in the early seventies by CAG aircraft. Unfortunately for Kodak and aviation enthusiasts, a new awareness of the ease with which brightly marked aircraft can be spotted and tracked by infrared sensors finally led to the progressive adoption of new TPS (Tactical Paint Schemes) in the early eighties. This title in the growing Osprey Colour Series makes no pretence either to be an historical survey of camouflage and markings as applied to carrier aircraft of the US Navy during the 1965-1975 period or to be exhaustive. Rather, work on this photo book was begun by greying enthusiasts who, remembering with fondness the 'good old days' when photographing naval aircraft was fun, decided to share with younger enthusiasts their Kodachrome memories. You may not find in the midst of these 120 photographs one of your favourite aircraft or squadrons. We hope, however, that the splashes of colour on the following pages will help you forget for a moment the dullness of TPS and the drabness of subdued markings. Rene J Francillon & Peter B Lewis Vallejo, California, May 1988

			a concept at least, has been with us for over 500 years. The first recorded helicopter concept to be put on paper flowed from the visionary pen of the multi-talented Italian, Leonardo Da Vinci, who, in 1483, drew up a scheme for a manpowered "Aerial Screw Machine". Others, largely unknown but including Britain's Sir George Cayley in 1843, were to take up the challenge of producing a flying machine supported by rotating wings through most of the next 4 centuries: all to little avail. Contents: Enter the Helicopter Vertical Infantry The Helicopter goes to Sea The Tank Killers Into the Future
2004.302.055	Vietnam : The War in the Air	Gurney, Gene	This is the second volume in a series called The War in the Air by Gene Gurney. The first, World War II, was published twenty years ago and is still selling well after many printings. Illustrated with more than 300 full-color and duotone photographs and maps, it covers the entire Vietnam War from the first entrance of U.S. planes to the end of the Strategic Airlift returning the prisoners of war. Air operations in South Vietnam are presented in two sections: 1962-64 and 1965-72. There follow chapters on the air war in North Vietnam, Army mobility, Naval air operations, Marine Corps air operations, American 131st AF, and Operation Homecoming. An index is included. COL. GENE GURNEY, USAF (Ret), author of a book a year for the past twenty-five years, is a former U.S. Air Force career pilot now working in public relations for the government in Washington, D.C. He received a B.S. in military science from the University of Maryland, an MA in government administration from George Washington University, and a Ph.D. in public

2004.302.066	Astronauts : Pioneers in Space, The	Wainwright, Loudon	A grueling ride in a centrifuge, the eerie feeling of total weightlessness, the ear-splitting thunder of a giant rocket lifting off --- these are some of the sights, sounds and impressions that come to life as the seven astronauts of Project Mercury tell, in their own words, the story of their preparations for the historic leap to outer space.
2004.302.067	Let's Go to the Moon	National Geographic Society	3 astronauts are ready to go to the moon. They will travel in a spaceship. The giant rocket will carry them away from the earth, far into space. Each man wears a space suit and helmet. The astronauts go up the tower and walk to the spaceship. Soon they will begin a great journey to explore the moon. Would you like to go along?
2004.302.068	Submarines : Hunter/Killers & Boomers	Lightbody, Andy	With 219 photographs and 7 illustrations Deep down in the intensely silent fathoms beneath the waves there dwell creatures stranger in appearance and greater in size than any fairytale sea monster. Fast, silent, and metal-skinned, they bear within their tubelike hulls a human crew, state-of-the-art electronics equipment, and, in many cases, a planet-destroying armament. These formidable creatures are submarines, the capital ships of today's navies. They come in two basic variants: ballistic missile submarines, and attack submarines. Known as "boomers" and "hunter/killers," they are continuously engaged in a submerged game of hide-

Object ID	Title	Author	Summary
			and-seek-a game that enables their crews to prepare for a war they hope they'll never have to fight. SUBMARINES: HUNTER/KILLERS & BOOMERS provides an up-to-date and visually enthralling guide to these fearsome and fascinating vessels. Dozens of seldom-seen photographs of the interiors of American submarines will give you a graphic idea of what life aboard such boats is really all about; and many rare shots of Soviet submarines will show you what sort of challenge their crews face on a daily basis. In addition to these compelling images, you'll be further entertained by the insightful and informative text by noted military affairs journalists Andy Lightbody and Joe Foyer. It all begins with an engrossing account of history's first recorded submarine attack, an action carried out during America's Revolutionary War by a submersible named the Turtle. Manned by a crew of one and driven by a hand-cranked propeller, the Turtle was a crude vessel that failed in its mission to sink a British man-of-war in New York Harbor. But you'll understand how, despite its lack of success, it served as the inspiration for the extraordinary achievements in design and purpose that culminated in modern boomers and hunter/killers. The precise nature of these achievements are [sic] highlighted in 18 clear, concise profiles of boomer and hunter/killer types currently in service in the U.S. and Soviet navies. You'll learn about the powerful Ohio-class boats, U.S. boomers that carry within their 24 missile tubes a capacity for destruction unmatched by all the bombs dropped in World War II. Or the equally mighty Soviet Typhoon-class boomers -- boats that displace more

Object ID	Title	Author	Summary
			weight than most surface warships, and that carry missiles armed with 200 nuclear warheads targeted at the cities and military installations of America's heartland. You'll also find out about the hunter/ killers that prowl the ocean depths like hungry sharks, always searching for boomers to kill. Meet the supremely predatory Los Angeles-class boats, with the weapons and sophisticated sonars that make them the scourge of Soviet boomers. Or the Sturgeon boats, which can punch their way through the polar ice. Or Soviet hunter/ killers like the silently elusive Akula boats, and the noisy but incredibly deep-diving Alfa boats. Here, too, you'll discover a great many interesting facts about the strategic function of hunter/killers and boomers; about the oceans in which hunter/ killers and boomers ply their respective trades; about the missiles, torpedoes, and other weapons hunter/killers and boomers might use to harm each other and the world above the waves; and about submarine propulsion systems, communications, sonar, and forms of electronic and antisubmarine warfare. How all these elements may be brought into play during a time of actual superpower crisis is the focus of the book's final section. In "Stalking Armageddon: A Scenario for Undersea Warfare," you'll be taken inside the control rooms of a Soviet boomer and the American hunter/killer that's pursuing it. There, you'll experience the sometimes nerve-racking, sometimes exhilarating realities of submarine warfare as the two boats jockey for position and advantage on the eve of World War III. With its absorbing text and

Object ID	Title	Author	Summary
			exciting illustrations, SUBMARINES: HUNTER/KILLERS & BOOMERS is a book that will be enjoyed by anyone with an interest in these amazing vessels. (from dust jacket flaps)
2004.302.069	Submarines : The History and Evolution of Underwater Fighting Vessels	Preston, Antony	The concept of underwater travel has always fascinated men and the first recorded design for an underwater vessel was made as early as 1578. This book traces the evolution of the submarine from its early beginnings to the present. It describes how, with the invention of the torpedo and the battery-powered electric motor, the submarine became a lethal weapon, and how during World War I it really came into its own. It examines the development of submarines between the wars and their vital role in all the major theatres of war during World War II; and it concludes with a survey of post-war development culminating in the almost limitless power of ICBM -armed nuclear submarines of today. The authoritative text and the fine illustrations tell how the submarine has reached the height of its powers, and is a giant warship without a challenger. (from dust jacket flap)
2004.302.070	Modern Submarine Warfare	Miller, David	275 photographs 46 full-color perspective [sic] drawings More than 90 explanatory diagrams Anyone who thinks a submarine is essentially just a metal tube with torpedoes in the front and a periscope on top will be astonished at the variety of shapes and sizes on display in the central section of this book. The range of sizes is explained by several factors, including the roles for which they were designed and the technological and economic resources available.

Object ID	Title	Author	Summary
			The number of variations on a fundamentally cylindrical shape is the result of other factors, which are examined in the first part of the book, where a brief historical introduction and a more detailed look at a handful of the most significant designs in the evolution of the submarine is followed by an examination of the underwater environment in which submarines must function and a survey of particular aspects of submarine technology. Construction, propulsion, weapons, sensors and communications are all discussed in general terms and illustrated by photographs and diagrams showing the function and operation of representative systems. Since all submarine design is dominated by considerations of the threats with which the resulting vessels will have to deal, surface antisubmarine warfare is also discussed in general terms and, again, a selection of representative systems is shown in photographic and diagrammatic form. Finally, since no navy which seeks to recruit personnel of suitable caliber and maintain a healthy level of morale can afford to overlook the possibility of accidents, the section concludes with a chapter on the modern escape and rescue systems that would help a crew survive in the aftermath of a disaster. Having explored the technological aspects of submarine design and the specific forms which different builders have produced to meet the requirements and limitations under which they must work, the reader should be in a position to appreciate the tactical aspects of submarine and antisubmarine warfare which form the subject of the book's final section. Once again, photographs and diagrams combine to present a uniquely informative account of the methods employed by

2004.302.078	International Directory of Military Aircraft 1996/97	Frawley, Gerard	The inaugural and since superseded edition of the only biennial directory of the world's military aircraft. It features over 280 individual military aircraft types (from the Eurofighter to the UH-60 Black Hawk, MiG-21, C-130 Hercules and T-6 Texan) and their many individual variants that are currently in service or under development. Each aircraft listing features a photograph and details of its powerplant/s, performance, weights, dimensions, armament, accommodation, operators, and development and operational history. In addition it contains a listing of the inventories of the world's air arms and a concise review of the major developments and trends of the past two years in the world of military aviation. Full colour with 300+ photographs.
2004.302.079	Day We Walked on the Moon : A Photo History of Space Exploration	Sullivan, George	At 10:56 PM on July 20, 1969, astronaut Neil Armstrong became the first human to set foot on the moon. After years of research by both the US and the Soviet Union, we had accomplished what no one had thought possible. A man was on the moon! Illustrated with dramatic color photographs and historic newspaper headlines, The Day We Walked on the Moon takes an exciting look at the space age, from Sputnik to Neil Armstrong's famous steps, from Skylab to the space shuttle. The book then goes beyond...to whatever lies ahead in the exploration of outer space. A permanent space station? A colony on the moon? An expedition to Mars? Anything is possible.
2004.302.080	Question and Answer Book of Space, The	Sonneborn, Ruth A.	A wealth of information for the youngest reader presented in clear, direct answers to the questions children most often ask about the subjects that interest them most.

ASNE: The First 100 Years: The History of The American Society of Naval Engineers, 1888-1988 Meader, Bruce I.

(Foreword:) One of the best things about a centennial celebration is the special opportunity it gives to reflect upon all that has gone before and at the same time consider the challenge of the future. This slim volume represents a look at the past one hundred years. It remains for each of us to extend the list of accomplishments.

The history of the American Society of Naval Engineers is rich in achievements. Over the years, the membership has included some of our Navy's and our Nation's most illustrious leaders. Equally important, it has included thousands of naval engineers dedicated to high standards in their technical community; that membership also has

Object ID	Title	Author	Summary
			participated consistently in the life of our Society. This remarkable assembly of professional fellowship is a legacy to us; our appreciation for such a heritage can be displayed through a recommitment to the Society's objectives which have stood the test of time and continue to offer useful goals for our successors. We are particularly indebted to that small group of naval engineers who met on September 30, 1888, and had the vision to establish such a worthy institution. This is their story. It is our story. And it is a story that is, again, at its beginning. Alfred Skolnick President
2004.302.091	Out of This World : The Apollo Moon Landings	Skootsky, Steve	Newly Restored Footage: Between 1969 and 1972, Man landed on the moon six times. Featuring superb picture quality, this exclusive production is the ultimate Apollo Adventure, painstakingly assembled by Finley-Holiday Films from hundreds of hours of footage taken by the astronauts, and live f television pictures beamed to Earth from the surface of the Moon. Man's Greatest Adventure: From President Kennedy's challenge to Nell Armstrong's first step on the Moon, from the near disaster of Apollo 13 to the Lunar Rover missions, this historically accurate video tells the story of Mankind's greatest adventure. Witness inspiring liftoffs, the Earth from space and dramatic moments as the Apollo astronauts explore the alien landscape of another world. 			landing missions except one were commanded by former naval aviators.
2004.302.093	Great WWII Airwars	Jones, Richard	This video has two parts: Fight for the Sky and Wings Over Water. Fight for the Sky uses actual footage to chronicle major air battles during World War II. Featured aircraft include: British Spitfires, British Hurricanes, U.S. Mustangs, U.S. P38 Lightnings, U.S. P47, German Messerschmitt 109, and the German Messerschmitt Me263. Wings Over Water chronicles the U.S. Navy's aircraft battles against the Japanese. Featured aircraft include: U.S. Hellcat, U.S. F4U Corsair, U.S. Wildcat, U.S. Catalina, British Skua, British Sunderland, and the Japanese Zero.
2004.302.095	Sink the Bismarck!	Gilbert, Lewis (director)	(from http://sdplweb.sannet.gov) The Bismarck was the fabled German battleship of World War II. Traces the "life" of the Bismarck from its launching (courtesy of newsreel footage) through its many battles and narrow escapes, concluding with its far-from-inevitable sinking in the Spring of 1941. The story concentrates on the human element, specifically a British intelligence captain, who has lost his family in the London blitz and thus has a personal reason for seeing the Bismarck blasted from the sea. The captain's tireless efforts are abetted by the love and support of a female naval officer.
2004.302.096	No Easy Days : The Incredible Drama of Naval Aviation	Keeney, Douglas	Nothing is easy about flying from an aircraft carrier. Just why that statement is true is amply illustrated in this remarkable video. Based the popular book by the same name, No Easy Days captures some of the most dramatic mishaps in naval aviation.
2004.302.097	Submarines	Braun, Ted (writer, director)	(from WorldCat) Traces the development of the submarine. Includes the early development, the use of German U-boats in World

			War II, the Cold War race to build faster, deadlier craft, and the development of nuclear powered and nuclear armed craft such as the Nautilus and the Polaris.
2004.303.002	Brave Men, Dark Waters : The Untold Story of the Navy SEALs	Kelly, Orr	From Publishers Weekly The best work to date on the SEAL (acronym for "Sea, Air, Land") unit, this well-written survey presents the unit's history from its origins in the underwater demolition teams of WW II, through its Vietnam incarnation as a group of scouts and raiders, to its present status as an elite special-missions force. Kelly (King of the Killing Zone) does not whitewash such controversial aspects as the commandos' role in the invasion of Panama and the scandals surrounding the controversial antiterrorist "Team Six" in the 1980s. He is, however, generally positive in evaluating SEAL performance. He also argues convincingly that in the future the SEALs should concentrate on clandestine small -unit operations, as opposed to larger-scale raiding missions of the kind they performed in Panama. Copyright 1992 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. From Library Journal Readers who enjoyed Kelly's previous books-- King of the Killing Zone (Norton, 1989) about the M1 Abrahams, and Hornet: The Inside Story of the F/A-18 (Presidio Pr., 1990)--will enjoy Brave Men, Dark Waters . The U.S. Navy SEALs (Sea, Air, and Land) may be the most elite special operating force in the world today. Created during World War II, they cleared the approaches to Normandy. In Vietnam, they were able to deny whole areas of the country to the Communists. After the invasion of Panama, during which the SEALs lost 11 men, killed or wounded, they were forced to think more about the role they should play in the future.

2004.303.003	Naval Institute Guide to Combat Fleets of the World - 1993 : Their Ships, Aircraft, and Armament	Prezelin, Bernard (ed)	Internationally acknowledged as the best one-volume reference to the world's naval and paranaul forces, this popular Naval Institute guide is both comprehensive and affordable. Updated biennially since 1976, it has come to be relied on for all-inclusive, accurate, and up-to-date data on the ships, navies, coast guards, and naval aviation arms of more than 180 countries and territories. Large fleets and small maritime forces get equally thorough treatment as evidenced in this new edition, which highlights major and even minor developments that could have an impact on the world scene. A thorough indexing of material and a logical ship-typing system make the book easy to use and allow for quick comparisons between fleets. The guide continues to present timely, authoritative information supported by more than four thousand illustrations from correspondents throughout the world. From giant aircraft carriers and ballistic missile submarines to tugboats and launches, the characteristics and capabilities of ships large and small are reliably recorded. Complete descriptions of naval aircraft, weapons, weapon systems, and sensors are also provided along with useful commentary on organization, personnel strengths, and bases.

2004.303.005	Military Requirements for Chief Petty Officer	Naval Education and Training Command	From the Introduction--"The United States Navy has always placed great emphasis on the pride and professionalism of its personnel. In keeping with this strong tradition, the Navy has taken a new approach in teaching military subjects by developing individual military requirements training manuals. These manuals are divided into the basic military requirements (BMR) for apprenticeships and advanced requirements for third class, second class, first class, and chief petty officers. These manuals cover the MINIMUM Naval Standards required for advancement in rate.... This rate training manual covers the Naval Standards (military requirements) for chief petty officer. As a chief petty officer you will be responsible for the standards listed below and for all the lower standards. Additional subjects which expand upon the lower Naval Standards (E2-E6) are also included to broaden and enhance your knowledge of military subjects" Standards include Personnel Safety -- Material Condition -- Professional Development -- Naval Tradition-- Human Resource Management Support

2004.303.010	Master-At-Arms	Naval Education and Training Command	From page 1 "On 4 May 1973, the Secretary of the Navy approved the establishment of the Master-at-Arms (MA) general rating...The new Master-at-Arms in today's navy must be able to plan, supervise, and perform security duties afloat, and ashore including investigation, interrogation, apprehension, and correction; enforce law and order to maintain military discipline; maintain vehicular and personnel traffic control; investigate incidents and offenses, under their cognizance, involving or occurring on government property and/or to personnel subject to the UCMJ; perform duties of Master-at-Arms onboard ship; organize and train supplementary personnel assigned to MA duties; maintain liaison with local law enforcement agencies; render assistance and general well-being of Armed Forces personnel; and prepare required records and reports.
2004.303.011	Basic Electronics Vol. 2	Naval Education and Training Command	From the Preface - "Basic Electronics is written for men and women of the U.S. Navy and Naval Reserve whose duties require them to have a knowledge of the fundamentals of electronics. Electronics concerns itself with the emission, behavior, and effect of electrons in vacuums, gases, and semiconductors. Technically speaking, electronics is a broad term extending into many fields of endeavor. Today, electronics projects itself into Navy life at every turn. It facilitates a means of rapid communications, navigates ships, helps control engineering plants, aims guns, drops bombs, and performs logistic functions. It is therefore, important to become well informed in all areas of basic electronics, in order to be able to qualify for

			many applicable rates or ratings. " "Volume II treats dual trace oscilloscopes, the operation and application of pulse forming and pulse shaping circuits, microwave devices such as skystrons, magnetrons, phantastrons, resonant cavities, waveguides, and duplexers. A detailed coverage of microwave receiving, transmitting and indicating systems is also presented."
2004.303.014	Navy Electricity and Electronics Training Series Module 4 : Introduction to Electrical Conductors, Wiring Techniques, and Schematic Reading	Chief of Naval Education and Training	From the Navy Electricity and Electronics Training Series-- "Module 4 presents the use of conductors, the insulation used as wire covering, splicing, termination of wiring, soldering techniques and reading electrical wiring diagrams." "Comprehensive check questions are distributed through each of the modules, except for module 19 and module 20 which are used as references. If you have difficulty in answering the questions, you should restudy the applicable paragraph(s). Answers to the questions are given on the next even-numbered page." Learning Objectives are listed for each section--Electrical Conductor, Wiring Techniques, and Schematic Reading.
2004.303.015	Navy Electricity and Electronics Training Series Module 13 : Introduction to Number Systems, Boolean Algebra, Logic Circuits	Chief of Naval Education and Training	From the Preface - "This module and its associated Officer-Enlisted Correspondence Course (OCC-ECC) provides the information needed by personnel of the U.S. Navy and Naval Reserve whose duties require and elementary and general knowledge of the fundamental concepts of number systems, logic circuits, and Boolean algebra. Topic 1, Number Systems describes the radix, positional notation, the decimal, binary, octal, and hexadecimal number systems, and the conversion techniques needed to convert from one system to another. Topic 2, Boolean Algebra, includes rules, laws, mechanization and simplification techniques, Topic 3 Logic Circuits,

Object ID	Title	Author	Summary
			includes logic computation, logic polarity, and the six basic logic circuits--AND, OR, NOT, NAND, NOR, and Exclusive OR."
2004.303.016	Navy Electricity and Electronics Training Series Module 15 : Principles of Synchros, Servos, and Gyros	Chief of Naval Education and Training	From the Preface "This module... is one of the textbooks in the Navy Electricity and Electronics Training Series (NEETS) which is an introductory training package within the broad fields of electricity and electronics." From Topic 1--Synchros--"The term synchro is an abbreviation of the word synchronous." It is the name given to a variety of rotary, electromechanical position-sensing devices." Synchros are primarily used for the rapid and accurate transmission of information between equipment and stations." From Topic 2 -- Servos "Servomechanisms, also called SERVO-SYSTEMS or SERVOS for short, have countless applications in the operation of electrical and electronic equipment. In working with radar and antennas, director, computing devices, ship's communications, aircraft control and many other equipment, it is often necessary to operate a mechanical load that is remote from its source of control. To obtain smooth, continuous, and accurate operation, these loads are normally best controlled by synchros. As you already know, the big problem here is that synchros are not powerful enough to do any amount of work. That is where servos come into use." From Topic 3, Gyros - - "Any rapidly spinning object--a top, a wheel, an airplane propeller, or a spinning projectile--is fundamentally a gyroscope. Strictly speaking, however, a gyroscope may be defined as a mechanical device containing a spinning mass which is universally mounted, that is mounted so it can assume any position in space."
2004.303.017	Mathematics, Vol. 2	Bureau of Naval Personnel	From the Preface--"The purpose of this Navy Training Course is to aid personnel

Object ID	Title	Author	Summary
			who need an extension of the knowledge of the mathematics gained from Mathematics, Vol. 1, NavPers 10069-C. To serve the wide variety of needs, the text is general in nature and is not directed, therefore, toward any one specific specialty. The definition and notations of logarithms followed by computations of logarithms occur early in the text. Trigonometric ratios and analysis and applications along with aids to computations occur next. Vectors and static equilibriums are followed by trigonometric identities and equations. Straight lines, conic sections, tangents, normals, and sloped precede the introduction to differential and integral calculus. The introduction to calculus is intended as a survey course prior to a more rigorous study of the subject. The limit concept is followed by a discussion of derivatives and integration. Basic integration formulas follow this discussion. The last chapter of the course covers combinations and permutations, and gives an introduction to probability."

2004.303.025	From Pearl Harbor to the Pulpit: The Dramatic Story of Capt. Fuchida & Jacob Deshazer	Hembree, Charles R.	From the ashes of Pearl Harbor and WWII there are 2 famous men who found their lives profoundly changed. One was Mitsuo Fuchida who led the attack on Pearl Harbor. Fuchida, a dedicated Japanese soldier, had learned well to hate the "demon whites." The other, Jacob DeShazer, was an Oregon farmboy who bombed with vengeance the "yellow devils" in Doolittle's Tokyo raid. Today these two former enemies are Christian brothers, often preaching together on the same platform in modern Japan. This is their story.
2004.303.026	Combat Aerial Escapades : A Pilot's Log Book	Reinburg, J. Hunter	Colonel J. Hunter Reinburg graduated as a Naval aviator in 1941 and immediately joined a Marine Corps Fighter Squadron on the east coast, flying F3F-2 biplane fighters. Soon thereafter, the squadron was equipped with F4F-3 Wildcats. A few days after the Pearl Harbor attack, the squadron arrived in San Diego with loaded guns, looking for the enemy. Several weeks later, the squadron was told to get ready to dash to the relief of Wake Island. The orders were changed and the squadron ended up in Samoa in March, 1942. After a number of dull months in Samoa, Reinburg was in a group of replacement pilots sent to Guadalcanal. While assigned to VMF-121 and VMF-122 there, Reinburg scored seven confirmed aerial victories

Object ID	Title	Author	Summary
			and nine unconfirmed, as well as the destruction of much enemy surface equipment. In April 1945, Reinburg was assigned to commend VMF-225 on Guam. At the end of WWII, Reinburg had collected 12 air medals and 6 Distinguished Flying Crosses. Remaining in the Marines after WWII, Reinburg was loaned to the RAF in England, flying with their night-fighter jet squadrons. When the Korean War broke out, Reinburg was rushed from England to command the first Marine Corps night-fighter squadron in action over Korea. He was awarded the Silver Star for this work. --- from book's back cover March 1, 2007 By cortezhill (San Diego, CA)

2004.303.030	F-4 Phantom II : in Detail & Scale, Vol. 12, Part 3 : USN & USMC Versions	Kinzey, Bert	INTRODUCTION As part three of Detail & Scale's three-part series on the Phantom, this volume covers the U.S. Navy and Marine Corps versions of the F-4. These versions include the F-4B, N, J, S, and RF-4B. As with parts one and two, every effort has been made to cover every detail possible on these particular versions. Trips were made to both Oceana and Miramar Naval Air Stations, and to EI Toro where the Marine RF-4Bs are based. A separate trip was made to

Object ID	Title	Author	Summary
			Hayes Inter- national in Birmingham, Alabama where F-4s go through rebuild. McDonnell Douglas contributed photos and drawings, as did a number of other contributors who all added to the extensive coverage of this publication. On the pages that follow, we are presenting the most detailed coverage possible on these versions of the F-4 Phantom. As is the case with most books in the Detail & Scale Series, most photographs were taken specifically for use in this publication. For security reasons, parts of the cockpits had to be covered since the photographs were taken in operational aircraft. Emphasis is given to covering the differences between the versions. Examples of these differences include the landing gear, engines, RHAW antenna fit, and the radar used. Other details, such as wheel wells, open emergency ram air electrical generator, missile bays, engine bays, the slats on the F-4S, and much more, are presented with more photographic coverage than ever before published. This is largely due to the cooperation of Navy and Marine Corps personnel from AIRLANT, VF-171, VF-301, and VMFP-3 who arranged for these detailed photo- graphs to be taken at their respective bases. They patiently opened cockpits, panels, radars, and camera bays, and they answered scores of technical questions. A special acknowledgement of their efforts and cooperation is due in this introduction. Taken together, the three Detail & Scale volumes on the F-4 cover all U.S. versions of the Phantom. They present the most extensive detail coverage of the Phantom that is available to the general public, and we hope that they justify the efforts by so many to provide quality publications that this

2004.305.	Flying Leathernecks in World War II	Doll, Thomas E.	(Foreword:) Midway, Guadalcanal, Vella Lavella; names of places that before World War II few people knew existed. But in the years from 1941 to 1945 these remote islands became well known to almost every American old enough to comprehend the world around him. To those of us who served on these and the many others of islands in the Pacific, their names will not be forgotten nor the events that took place on these small but important landmarks. This pictorial review of World War II United States Marine Corps aircraft will remind those of us that flew some of these aircraft in combat of events which not only affected our personal lives but may also have influenced the course of the war. The photographs of the aircraft on Guadalcanal's Henderson Field will bring to mind special memories for we who served there; the primitive living_ and working conditions; the dust; the mud and the almost constant harassment by the enemy in the early days of our presence on the island. This was Guadalcanal. Munda, Tarawa, Bougainville, Espiritu Santo, Peleliu, Iwo Jima, Okinawa; each a name, each a different place, each a poignant recollection. The photographs within this book will give us all a nostalgic glimpse of an important time

			in our lives through the aircraft we flew and depended upon for our very existence. Although directed primarily toward the World War II naval aviation enthusiast, all who are interested in aviation will find this book both interesting and informative. This collection of photographs depicts a critical era in the history of United States Marine Corps aviation and that of our country. Major General Marion E Carl, USMC June 1970
2004.305.001	Commodores: The U. S. Navy in the Age of Sail, The	Guttridge, Leonard F.	The wonder is that there ever was an American Navy. Threatened at birth, nearly strangled in its infancy, dwarfed in its youth, the Navy's existence for half a century was a constant struggle to survive against Jeffersonian Republicans and such rabid penny-pinchers as Albert Gallatin. The Commodores chronicles the economic and political currents in the young nation which determined the Navy's faltering early years.
2004.305.002	Under the Blue Pennant or Notes of a Naval Officer 1863 - 1865	Grattan, John W.	Amazon.com Review The Union Navy played an essential role in winning the Civil War. Its blockade of more than 3,000 miles of Southern coastline, joint operations with the Union army, and pursuit of Rebel commerce raiders helped secure the 1865 Union victory over the Confederacy. While the majority of Civil War histories focus on the personalities and battles of the Union Army, few explore Union naval operations and their importance. John W. Grattan's journal, Under the Blue Pennant, or Notes of a Naval Officer 1863-1865, helps to fill this historical void. Grattan served for two years as clerk and aide to the squadron commander aboard the flagship of the largest Union naval command, the North Atlantic Blocking Squadron. Editor

Object ID	Title	Author	Summary
			Robert J. Schneller presents Grattan's narrative essentially in its original form, adding a 50-page introduction and explanatory notes to provide important background information and place the narrative's events in historical context. The journal, written in unembellished Victorian prose, provides rare eyewitness observations of daily life at sea, the hopes and fears of inexperienced soldiers, and the military leaders that commanded them. Grattan's sketches provide glimpses of real war, and Schneller's illustrations and maps further bring to life an important episode in our nation's military history. --Bertina Loeffler Sedlack --This text refers to the Hardcover edition. From Kirkus Reviews While researching another book, historian Schneller (A Quest for Glory: A Biography of Rear Admiral John A. Dahlgren, not reviewed) discovered this never-before-published memoir of a young officers experience in the Union navy. Grattan was a young Brooklynite who served first in the army until 1862, then was mustered out probably for medical reasons and enlisted in the navy in 1863. Although his family origins are unclear, his writing and general literacy indicate that he was well educated and from a middle-class or higher background. Grattan was assigned to the North Atlantic Blockading squadron and spent most of his naval career 'under the blue pennant,' or serving on a flagship. The memoir he later wrote paints a unique portrait of life in the Union navy, offering fascinating glimpses of Federal blockading actions which aided (invaluably) the cause of Northern victory. Also of note is the depiction of relationships between the officers and men of the navy and their African-American stewards (serving in the only available role for blacks in the navy). Grattans

Object ID	Title	Author	Summary
			writing is sharp and surprisingly unaffected by the flowery prose of typical Victorian memoirs; although it does wax repetitive, overall this is a surprisingly lively and modern read. The authors profuse details show a side of the war effort that few readers could have imagined, such as dinners that would sound more believable on the Titanic than on any US naval vessel. His descriptions of combat are more than believable, though sometimes woodenly penned. Schnellers foreword places Grattan in a context that illuminates the memoir. And his notes (fortunately incorporated into the text, not printed as endnotes) are informative and easily read by the nonhistorian. A welcome addition to our knowledge about the lives of men who served in the Civil War. (45 photos, 5 maps, not seen) -- Copyright ©1999, Kirkus Associates, L.P. 2004.305.003	Uniforms of the Civil War 1861 - 1865	Haythornthwaite, Philip J.	Pictorial history for the armed services uniform during the Civil War.
2004.305.004	Guns on the Western Waters: The Story of River Gunboats in the Civil War	Gosnell, H. Allen	"... Unique among the many books about naval aspects of the Civil War. Gosnell openly focuses on the personal accounts of officers and sailors in the Union and Confederate river forces as well as several newspaper columnists that witnessed incidents. After giving the reader a sound overview of the weapons and ships used in the western rivers, Gosnell allows the personal accounts of those that were there to walk the reader through the river war. Gosnell's comments contextualize the personal accounts but do not overshadow them. It's a very effective way of engaging the reader. The negative aspect of the book is that Gosnell overlooks some events, although he openly acknowledges it when he

Object ID	Title	Author	Summary
			does so. This book would serve as a fine companion for a more chronologically thorough, less-personal CW naval book." (from Amazon.com)
2004.305.005	Hardluck Ironclad : The Sinking and Salvage of the Cairo	Bearss, Edwin C.	"Ed Bearss is both one of the most knowledgeable Civil War historians of the present day AND one of the men who found the gunboat Cairo. "Hardluck Ironclad" is both Civil War history and modern archaeology... it details the history of the first warship in the world to be sunk by a mine and the story of the people who worked to raise her and display her at Vicksburg." (from Amazon.com)
2004.305.007	Monitor: The Story of the Legendary Civil War Ironclad and the Man Whose Invention Changed the Course of History	DeKay, James Tertius	Amazon.com Review Many writers have described the famous clash between the Monitor and the Merrimac, but James Tertius deKay's book probably belongs at the top of the stack. Much of Monitor focuses on how these ships came into being, including John Ericsson's struggle of more than 20 years to have his vision of an ironclad warship become a reality. As the title suggests, Monitor is more about the Monitor than the Merrimac, but both vessels get their due in deKay's wide-ranging narrative. Like so much of Civil War history, the coincidences and ironies of what happened at the mouth of the Chesapeake in 1862--how the two ships met, how brother fought brother, how neither impregnable warrior survived the calendar year--make for a spellbinding story, and deKay tells it as well as it has ever been told. --This text refers to an out of print or unavailable edition of this title. From Library Journal Naval historian deKay spins a good seaman's yarn about the making and fighting of the ironclads during the American Civil War. DeKay wants readers to believe that the significance of the Monitor lay less with the technology than in the battle it fought against the

Object ID	Title	Author	Summary
			Confederate ironclad Merrimac in 1862, but, as he shows so well, innovations in ship design, screw propellers, and even waste disposal made the ironclad functional and helped point the way to modern naval warfare. DeKay provides useful discussions of naval strategy, personality clashes, and ship construction, and he refights the battle with verve. But the story is well known and the author offers no new facts or interpretation. He also founders on his bloated claims that not only the war but the world's future hinged on the events at Hampton Roads. The result is a rollicking good read but a dubious argument. For general readers.?Randall M. Miller, St. Joseph's University, Philadelphia Copyright 1997 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. (from Amazon.com)
2004.305.008	Granite Sea: Navigating the United States Navy Memorial and Visitors Center	Coldwell, Thomas	THE LONE SAILOR is 25 years old at most, a senior second class petty officer who is fast becoming a seagoing veteran. He has done it all — fired his weapons in a dozen wars, weighed anchor from a thousand ports, tracked supplies, doused fires, repelled boarders, typed in quadruplicate and mess-cooked, too. He has made liberty call in great cities and tiny villages, where he played tourist, ambassador, missionary to the poor, adventurer, souvenir shopper and friend to new lands. His shipmates remember him with pride and tell their grandchildren stories, some of which, like him, are seven feet tall. United States Navy Memorial (from back cover)
2004.305.009	Climate and Weather for Flight in Naval Operational Zones	Naval Air Training Command, Pensacola, Florida	PREFACE: This book is intended as a text to serve aviation cadets who have completed previous courses in aerology and flight planning.

Object ID	Title	Author	Summary
			It presupposes an understanding of weather in its relationships to flying. It is designed to broaden the cadet's horizon and give him a background of the climate and weather over the several oceans where a naval aviator might fly during the present conflict. The broad concept of causes and effects presented in this volume will give the cadet a basis upon which to add more detailed information gained from experience. It is hoped that the principles set forth will guide him in utilizing weather as an ally — using weather to his advantage in conflict and avoiding the weather hazards. Acknowledgment is made to the numerous organizations and individuals who have so generously contributed both time and material used in preparing this text.

2004.305.011	American Battleships : A Pictorial History of BB-1 to BB-71 with Prototypes 'Maine' & 'Texas'	Newhart, Max R.	The modern battleship can trace its ancestry back to the ironclads with their steam drives, turreted guns, and armored hulls. The operational history of the battleship begins with the commissioning of Texas (BB-000) on August 15, 1895. (from www.pictorialhistoriespublishing.com)
2004.305.013	American Gunboats and Minesweepers	Lenton, H. T.	(from front cover:) This book lists all the auxiliary escort vessels of the US Navy during the Second World War. Apart from pre-war construction of gunboats proper, the USN applied the term to all the anti-submarine vessels which were taken over after December 1941. They included converted fishing craft and yachts, ex-British corvettes, and even the famous "Eagle" boats built by Henry Ford in the First World War. Although small, this motley collection of ships performed a vital role in keeping the coastal waters of the United States safe for shipping. The yachts were graded according to size, and ranged from large ocean-going vessels of 2-3000 tons down to small craft of 100-200 tons used for harbour defences. Most were returned after the war to their owners or sold for scrap. The river gunboat had been built in the 1920s for the Yangtze Patrol, but after the Japanese attack on the Philippines the lone survivor was handed over to the Chinese.
2004.305.014	War in the Pacific, The : From Pearl Harbor to Okinawa 1941 - 1945	Gawne, Jonathan	The stereotypical view of the war in the Pacific is that of US Marines storming the beaches of small tropical islands. There is an element of truth in this, but the war in the Pacific was much more far-reaching. Almost every possible type of terrain was fought over in the Pacific Theater, ranging from

Object ID	Title	Author	Summary
			the cold Aleutian Islands off the coast of Alaska, down the California coast and across the empty South Pacific Ocean to Australia. In the South-West Pacific fighting took place in thick, steamy jungles and on mountain slopes. Father west men fought in China and Burma -- where the mountains were the outposts of the Himalayas.
2004.305.015	Great Naval Disasters : U. S. Naval Accidents in the 20th Century	Bonner, Kit	(from Amazon.com:) Landlubbers beware! Great Naval Disasters is a collection of 19 incredible stories of ill-fated ships, each including a full recounting of the ship's early history, the events surrounding her tragedy, and her ultimate misfortune. The most deadly enemies of the warship other than combat - collision, explosion, fire, grounding, and, of course, the mysterious and curious... Contains accounts of raging fires on the USS Enterprise, USS Uriskany [sic] (USS Oriskany), USS Forrestal, and USS Constellation.
2004.305.016	Batmen: Night Air Group 90 in World War II	MacGlashing, John W.	"Until late 1942, the Japanese owned the night skies of the Pacific. In October 1942 a USN Lt. Bill Martin - was established to pioneer this new form on aerial warfare. BATMEN, written by NAG 90 vet John MacGlashing, documents the history of that legendary unit. Assigned to USS Enterprise, NAG 90 went to war equipped with radar-equipped Grumman Avengers and Hellcats. NAG 90 would fly both offensive and defensive ops during the war, eventually being credited with 42 e/a destroyed in the air and numerous targets destroyed or damaged on the ground or at sea. The cost of pioneering this new form of warfare was

Object ID	Title	Author	Summary
			high, some 40-odd pilots and aircrew being KIA from NAG 90's assigned units, VF(N)-90 and VT(N)-90. BATMEN is a marvelous, insightful and well-illustrated account of NAG 90 in action. Along with utilizing various official records and reminiscences from NAG 90 vets, MacGlashing offers his own, personal memories of wartime life on board Enterprise. Published by Phalanx Publishing in 1995, BATMEN s is long out of print but worth tracking down. In a scant 48 pages, it tells the story of some outstanding airmen engaging in deadly combat while literally 'writing the book' on that form of warfare." (from Amazon.com)
2004.305.017	Story of the PBY Catalina, The	Wagner, Ray	Consolidated PBY Catalina patrol flying boat.
2004.305.019	Pacific War Diary 1942 - 1945 : The Secret Diary of an American Sailor	Fahey, James J.	The great merit of Mr, Fahey's diary is that it gives the bluejacket's point of view about the naval war in the Pacific, with all its glory and horror, achievement and boredom; it tells how sailors felt going into battle, their opinions of their officers, their hunger off Okinawa when the long logistics line grew thin, and their fortitude in meeting the menace of the Kamikaze Corps.
2004.305.020	Torpedoes in the Gulf : Galveston and the U-boats, 1942 - 1943	Wiggins, Melanie	A story of the submarine warfare in the Gulf of Mexico during World War II. Between 1942 and 1943, twenty four German Submarines entered the Gulf of Mexico and attacked American and Allied ships, sinking fifty-six merchant ships and damaging fourteen more. Although responses were initially chaotic, Americans soon established a defense system that could cope with the threat. By late 1943, the German submarine offensive had ended in frustration and failure.
2004.305.022	Torpedoman	Smith, Ron	The history of WWII has

Object ID	Title	Author	Summary
			been told from many perspectives, but there are still many stories that have never been told. One of the greatest of these is the story of the US Submarine Service. They established a record unequalled by any military service in history. They destroyed 65% of all the Japanese ships sunk by all allied forces with less than 2% of the US Navy's resources.
2004.305.023	Battleship Musashi : The Making and Sinking of the World's Biggest Battleship	Yoshimura, Akira	The authors reconstruction of the birth of the Musashi portrays a nation preparing for total war. Under these extreme conditions, courage, genius, and integrity coexisted with brutality, folly, and paranoia. During the more than four years it took to build and outfit it, shipyard engineers and their Navy mentors were faced with seemingly insurmountable technical problems and plagued by natural calamities and the constant fear of espionage. The solutions they found to each successive crisis were sometimes brilliant, sometimes absurd. Battleship Musashi is a tribute to the men who achieved this engineering marvel and a testament to the excesses of bureaucratic militarism.
2004.305.024	Raft Book: Lore of the Sea and Sky, The	Gatty, Harold	This book has been written for those who, without previous experience in navigation and without navigating instruments, find themselves in small craft in the open sea and who have to make their way to land.
2004.305.026	World War II: A Photographic Record of the War in the Pacific from Pearl Harbor to V-J Day	Martin, Ralph G.	This is the account of the war we won in the Pacific. But it is not a book about victory, or heroes, or glorious conquest. The men you will see are ordinary men -- leathernecks, dogfaces, swabbies on the flat-tops, the battlewagons, the tin cans. Do not expect them to be pretty. Their eyes are tired, their bodies worn and ragged, their faces etched with the marks of loneliness, fear, monotony and death. Here, in photos and text, is the war they fought. This is how it was on shell-torn Guadalcanal, slogging through the jungles

Object ID	Title	Author	Summary
			of New Guinea, on the carriers in the Coral Sea, in the bombers over enemy targets, on the dead volcanic ash of Iwo Jima. These are the words of the men who were there -- simple and unforgettable. And these are the pictures, which speak for themselves.
2004.305.028	U.S. Navy in Action: A Heroic Account Of The Greatest Naval Fighting Force The World Has Ever Known, The	Clagett, John	The compelling accounts of courageous and heartbreaking actions, from the shores of the United States to the shores of Asia, Africa, and Europe. A vital record of the trials and accomplishments of American Naval Men.
2004.305.029	Midway : The Battle that Doomed Japan; The Japanese Navy's Story	Fuchida, Mitsuo	The battle of Midway was a tragic defeat for Japan. The Japanese Combined Fleet, placing its faith in "quality rather than quantity" had long trained and prepared to defeat a numerically superior enemy. Yet at Midway a stronger Japanese force went down to defeat before a weaker enemy.
2004.305.031	Derailing the Tokyo Express: The Naval Battles for the Solomon Islands that Sealed Japan's Fate	Coombe, Jack D.	Buoyant after their stunning victory at Pearl Harbor, the Japanese warlords spread the tentacles of their conquests to form an impregnable ring around the Japanese Empire. Their plan to defeat the remnants of the American fleet and surround and isolate Australia included occupation of the Solomon Islands in the South Pacific in May, 1942, an action challenged by the landing of American forces on Guadalcanal on August 8, 1942. The Japanese acted swiftly to reinforce their troops by launching the "Tokyo Express" - a series of supply runs by Imperial Navy destroyers on waterways leading to Guadalcanal. This book contends that the defeat of the Japanese in the Solomons, not the Battle of Midway, was the turning point of the war in the Pacific.
2004.305.032	Great Admirals of World War II, The - Vol. I : The Americans	Pfannes, Charles E.	Naval biographies of American Fleet Admirals Ernest King, Chester Nimitz, William Halsey, as well as American Admirals Raymond Spruance, Richmond Kelly Turner, and

			Thomas Kinkaid.
2004.305.033	War of the Gun Boats, The	Cooper, Bryan	The closest fought sea battles of the Second World War were those of the "little ships," the highly maneuverable motor torpedo boats, known as PT-Boats. Too small and numerous to be given the dignity of individual vessel names, they were instead known by their numbers painted in the side of the wooden hull. The PT's fought in every major theatre of war, in the English Channel and the North Sea, off Burma and Malaya, and across the Pacific islands to the final liberation of the Philippines. This book is the true story of the American PT's in World War II, the small vessels that used surprise as their advantage to raid harbors, drop secret agents on enemy shores, and to capture and board enemy merchant ships like buccaneers of old. "The Battle of the Torpedo Boats" captures all the drama and excitement of a conflict of the small against the gigantic and all the anguish and glory of a world caught in the throes of a world war. Paperback edition. 296 pages, 35 black and white photos, 10 maps and an index. (from submarinebooks.com)
2004.305.035	Battle of Savo, The	Smith, Stanley E.	The hour by hour drama of a tragic defeat our Navy wouldn't admit. The Japanese task force under Admiral Gunichi Mikawa, Japanese Imperial Navy, steamed toward its target: the Allied cruiser group gathered off Savo Island, near Guadalcanal. This book details the incredible confusion and horror that made the Battle of Savo a low point in American naval history.
2004.305.036	Clear the Decks	Gallery, Daniel V.	Although the author was involved in the serious business of fighting a war, he was able to appreciate the humor involved in the people and circumstances that took place. He does a very good job of giving a humorous account of his naval career.

Object ID	Title	Author	Summary
2004.305.038	Operation Bismarck Sea	Cortesi, Lawrence	"OPERATION BISMARCK SEA is the first of Lawrence Cortesi's books that I recall reading. Cortesi published two or three dozen books about various World War II battles back during the 1970s and 1980s, but I have been unable to find out much about him or about the books beyond their titles. In fact, I had the (perhaps mistaken) impression that at least some of his works were war novels rather than histories. OPERATION BISMARCK SEA is definitely a history, but hardly definitive. On the upside, Cortesi writes in a very fluid style that pulls the reader quickly through the narrative. The book doesn't take long to read, and the author effectively fashions the facts into a suspenseful story. That's also part of the downside. Cortesi's novelistic approach oversimplifies the story and exaggerates its significance for dramatic effect. The Battle of the Bismarck Sea in March 1943 was an important engagement, but I question whether a Japanese victory here (i.e., the Japanese convoy from Rabaul to Lae making it through largely unscathed) would have yielded the dire consequences that Cortesi suggests would have occurred in the New Guinea campaign in the spring of 1943. At this point in the war, the defeats at Guadalcanal and Papua had left Japan on the defensive in the South Pacific. Would the transfer of 7,000 troops to Lae in March 1943 have put them on the offensive again? Possible but not probable. Although Cortesi lists an impressive array of sources (including some Japanese documents and interviews), there are no source notes in the book, so the reader can't pinpoint where the author came up with certain claims and figures. His versions of some

Object ID	Title	Author	Summary
			of the basic facts of the Bismarck Sea battle are in conflict with other authoritative accounts (e.g., Samuel Eliot Morison's HISTORY OF UNITED STATES NAVAL OPERATIONS IN WWII, and Craven and Cates' THE UNITED STATES ARMY AIR FORCES IN WORLD WAR II). Cortesi acknowledges that his figures on Japanese ship and troop numbers vary but insists that certain official reports substantiate them. For example, he cites 22 vessels in the convoy, apparently basing this figure on wartime reports from Allied headquarters. Most postwar accounts list eight Japanese transports and eight destroyers in the convoy; all but four destroyers were sunk by Allied action. Cortesi also claims that two of the Japanese ships were light cruisers, including TENRYU, which most other sources list as having been sunk several weeks before the Bismarck Sea battle. Cortesi states that, since the Japanese convoy commander, Admiral Masatomi Kimura, "always" used a cruiser as his flagship, his flagship in this operation must have been a cruiser. By all other accounts and descriptions, the ship in question, SHIRAYUKI, was a FUBUKI-class destroyer. This kind of cavalier research calls into question many of Cortesi's other claims and conclusions regarding the Pacific War. He exaggerates the effectiveness of the B-17 Flying Fortress in slowing Japanese offensives in the early months of the war, then blames Japanese over-caution (rather than the sacrificial efforts of the U.S. Navy and Marine Corps) for their defeat in the Guadalcanal campaign. Cortesi also minimizes the Australian contribution to the Bismarck Sea victory. (No Australian sources are listed.) One also must question the veracity of the numerous conversations that Cortesi relates in the book --

Object ID	Title	Author	Summary
			there's no indication that these are based on reliable records, transcripts, or interviews. Some of the radio chatter he cites sounds artificial and stereotypical, and I have to wonder what else in this book was fabricated (even if based on fact) in order to inject more color and excitement into the narrative. I have yet to read Lex McAuley's BATTLE OF THE BISMARCK SEA (1991), and it doesn't sound like the ideal account of this important battle, but it does sound more credible than OPERATION BISMARCK SEA. Based on this book, I will approach Cortesi's other war books with great caution." (from Amazon.com)
2004.305.040	On Yankee Station : The Naval Air War over Vietnam	Nichols, John B.	Combining vivid personal narrative with historical and operational analyses, On Yankee Station takes a candid look at U.S. naval airpower in the Vietnam War. Coauthors John Nichols, a fighter pilot in the war, and Barrett Tillman, an award-winning aviation historian, make full use of their extensive knowledge of the subject to detail the ways in which airpower was employed in the years prior to the fall of Saigon. Confronting the conventional belief that airpower failed in Vietnam, they show that when applied correctly, airpower was effective, but because it was often misunderstood and misapplied, the end results were catastrophic. Their book offers a compelling view of what it was like to fly from Yankee Station between 1964 and 1973 and provides important lessons for future conflicts. At the same time, it adds important facts to the permanent war record. Appendixes provide helpful statistical data on carrier deployments, combat sorties, and aircraft losses. A new foreword by Stephen Coonts has been added to this

Object ID	Title	Author	Summary
			paperback edition of a book first published in 1987. "Invaluable reading for all concerned with the role of naval aviation, both during the Vietnam War and in our nation's future." - Sen. John McCain "A blistering indictment of the politicians who squandered lives and treasure on a war they lacked wisdom to win or abandon, and a long-overdue tribute to the courage and determination of the airmen who fought there." -Stephen Coonts, author of Flight of the Intruder "Reading 'On Yankee Station' is much better than having 'been there.' Readers will understand the war and our nation's future." -Robert Shaw, author of Fighter Combat "A major addition to serious literature on the war and a fine collaboration between a high-time F-8 pilot and MiG killer, and a highly respected aviation historian. . . . A must read." - Naval Aviation "A very attractive book with excellent maps and tactical diagrams, and appendixes that include a good chronology and a fine statistical summary of air-to-air results." - Hook (from back cover)
2004.305.041	United States Navy Song Book	Bureau of Naval Personnel	This is an original WWI United States Navy Song Book illustrated with several woodblock engravings by noted artist John Held Jr. This is an oblong softcover booklet format of 98 pages plus the covers measuring about 5.5" x 4". The title page reads: NAVY SONG BOOK - For free distribution to all Officers and Men of the Navy - Issued by the Navy Department Commission on Training Camp Activities and compiled with the

Object ID	Title	Author	Summary
			assistance of the National Committee on Army and Navy Camp Music - Washington: 1919 This book includes dozens of songs popular during the First World War period ranging from patriotic and traditional songs to spirituals, marches and more. This song book was illustrated by John Held Jr. early in his career and before he became one of the most widely recognized and prolific magazine illustrators of the 1920s and 1930s. I count 16 engravings by Held in this book all of which are signed either J. Held or J.H. Held's archtypical flapper illustrations and the covers he did for Life, Vanity Fair and other magazines helped to define the 1920s. Held's woodcut cartoons of the style in this Navy Song Book became a mainstay of the New Yorker Magazine during the 1920s. Held did intelligence work for the US Navy in South America during WWI. The book also includes three pages with photos including one of the battleship USS Pennsylvania. (from ebay.com)
2004.305.042	Bay of Pigs : The Untold Story	Wyden, Peter	(from back cover:) For the first time, eyewitnesses tell the complete inside story of the CIA's mismanaged and private war to overthrow Fidel Castro. Based on painstaking research and personal interviews with combatants on both sides — including Fidel Castro and Richard Bissell, former CIA Deputy Director — Bay of Pigs uncovers previously secret information and re-creates the events that led up to the confrontation. Revealed here for the first time: • How United States destroyers, with their hull numbers painted out, led the

Object ID	Title	Author	Summary
			Cuban invasion. On the last day of the battle, two of them were shelled 2,000 yards off Cuban shores — an event that almost triggered World War III. • How CIA officers — after discarding all personal identification and effects — flew combat missions over Cuba in planes marked with faked insignias of Castro's forces. • How the CIA lied to President Kennedy, claiming that the invasion was worth the gamble, when logistics experts of the Joint Chiefs of Staff considered victory "marginal without resistance, but impossible with it."
2004.305.045	War Machines Sea	Perlmutter, Tom (ed)	This is a story that begins with boats made from papyrus and ends - if there can be said to be an end in this saga of the sea - with Polaris and today's nuclear powered ships. Here, in words and pictures, is the evolving story of thousands of years of development in man's mastery of nautical warfare. This book deals with those naval developments that changed the course of history. The moments of breakthrough in man's search for new techniques, new methods of waging war at sea, are isolated and analysed. This superbly illustrated book presents a visual catalogue in words and pictures of the world's sea weaponry - with examples of their effectiveness in the key battles of history - from the days of Egypt's Pharaohs to the naval engagements of World War II. (from dust jacket flap)
2004.305.047	Warships	Willmott, H. P.	The exciting story of modern warships and the fluctuating battle for sea power, as waged by all seafaring nations in the period since 1860 — when the Warrior, the world's first iron warship, was launched before an awestruck world. This

Object ID	Title	Author	Summary
			book is superbly illustrated throughout with specially commissioned color artwork and diagrams, maps and numerous contemporary photographs. (from dust jacket flap)
2004.305.048	Jane's Fighting Ships - 1906/7	Jane, Fred T.	(from dust jacket flaps:) A collectors' item and reference tool Like other editions of "Jane's Fighting Ships" successfully reprinted by Arco, this is both a collectors' item and a reference tool. Here we see the steady growth that had been taking place in the world's navies, including that of the United States, as well as a dramatic close-up on actions in the Russian/Japanese War. Pictures, dimensions, tonnages, armament details, are here for scholar or enthusiast with all their implications for the violent history-to come.
2004.305.049	America's Navy : Now and a Century Ago: A Pictorial Calendar for 1983	Stillwell, Paul	Spiral-bound 1983 desk calendar containing many photographs of United States naval vessels and operations, both old and new.
2004.305.051	United States PT-Boats of World War II in Action	Johnson, Frank D.	This book is a history of the development, production and major combat deployments of United States Navy motor torpedo boats during World War Two. It details the highlights of the most notable combat operations. PT boats were a viable defensive weapons concept in the pre-radar era of 1937. They were even more deadly in the later stages of the war when radar became standard equipment aboard PT Boats.
2004.305.053	Secret Missions : The Story of an Intelligence Officer	Zacharias, Ellis M.	This memoir recounts the author's nearly forty years of service in naval intelligence, beginning in 1908. One of the first to venture into the realm of psychological warfare, Ellis Zacharias was awarded the Legion of Merit with two gold stars for his contributions. Among the highlights of his impressive career was the

Object ID	Title	Author	Summary
			role he played in convincing the Japanese to accept surrender in 1945, a subject he deals with in fascinating detail in this book. Zacharias gives readers access to rare psychological profiles that he prepared for the Office of Naval Intelligence on leading political and military figures in Japan. His book also recounts his exploits as a young naval attaché with the U.S. Embassy in Tokyo in the early 1920s. In the early months of the war readers join him in the thick of combat in the Pacific, first aboard a cruiser under his command and later in a battleship. Of particular interest are descriptions of his one-man radio broadcasts beamed at Japan between V-E and V-J days that received kudos from Adm. Ernest J. King for helping bring about the surrender.
2004.305.055	Pick Out the Biggest	Morris, Frank D.	In twenty-seven minutes, the Boise had taken on six enemy ships north of Guadalcanal--two of them heavier than herself--and all six were now at the bottom of the sea. The Boise was a Brooklyn-class cruiser built in the middle 1930's.
2004.305.056	Descent into Darkness : Pearl Harbor, 1941 : A Navy Diver's Memoir	Raymer, Edward C.	Contents: San Diego, CA -- USS Nevada -- USS Utah -- USS Arizona -- USS California -- USS West Virginia -- USS Oklahoma -- South Pacific Theater of War -- Return to the Oklahoma Epilogue
2004.305.058	Uniforms & Insignia of the Navies of World War II	US Naval Intelligence	This unique work, now issued publicly for the first time, describes in detail, and with hundreds of color illustrations, the uniforms of the eleven combatant navies in World War II together with those of four neutral nations. "Joint Army and Navy Publication Number One (JAN1)," prepared by the US intelligence services, was the most comprehensive intelligence manual on military uniform to have been produced during World War II, and has become a much prized and extremely rare publication.

Object ID	Title	Author	Summary
			"Uniforms & Insignia of the Navies of World War II" is a facsimile reprint of the original plates of all the combatant, plus a selection of the neutral, navies. With its aim of instant recognition in mind, the book's ninety-six color plates with hundreds of smaller illustrations show the uniforms in minute detail together with their insignia of rank and specialty, and smaller detail of headgear, buttons etc. The navies of Britain and her colonies and dominions (twelve plates), the United States (nineteen plates) are represented and a further twenty-six plates cover the navies of Russia, France, Greece, the Netherlands and Brazil: twenty-three plates are devoted to the navies of the Axis powers, Germany, Japan and Italy, thus providing overall wide coverage of the naval forces actively involved in the war. For the navies of the neutral countries, two or three color plates are provided for Portugal, Spain, Sweden and Turkey, and six plates for Argentina. The noted militaria historian Andrew Mollo, author of ten books on military uniform, has contributed a valuable introduction to "Uniforms & Insignia of the Navies of World War II:" it is an indispensable work of reference on the development, styles and details of naval attire and accoutrements. Andrew Mollo is one of the world's leading experts on military uniforms, and the author of fifteen books. He was technical advisor and consultant on a number of epic films such as "Dr. Zhivago," "The Spy Who Came in from the Cold" and, most recently, "The Keep." At present he is working as a Production Designer in cinema and television while continuing his interest in military uniforms. He lives in London with his

2004.305.059	Flight of the Avenger : George Bush at War	Hyams, Joe	Hyams (Zen in the Martial Arts) recounts Bush's experiences as a WW II Navy pilot and provides the first detailed account of his heroism on September 2, 1944, when he carried out a dive-bombing mission over Chichi Jima Island after his Grumman Avenger was set afire by anti-aircraft shells. This makes for absorbing reading, especially the description of the race to rescue Bush as the tide drew his raft closer to the island. Hyams has uncovered documentary evidence in Japan indicating that Bush would have been tortured and executed on Chichi Jima had he been captured that day. There is another element to the book that is different in character and unexpected: With the cooperation of President Bush and the First Lady, Hyams reconstructs the story of their wartime romance, secret engagement and marriage on January 6, 1945. They met in 1941 when George was 17 and Barbara was 16. "She radiated joy and warmth," recalls the President. Mrs. Bush says of her husband: "He was the most attractive man. . . . I could hardly breathe when he was in the room." From Publishers Weekly Copyright 1991 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title.\ Product Description An account of Bush's life from 1941 to 1944 describes his experiences as a fighter bomber over the Pacific and his courtship with wife Barbara. (from Amazon.com)
2004.305.060	Bless 'em All : The	Hayes, Robert W.	Bless 'Em All is a book about

Object ID	Title	Author	Summary
	Adventures of a Navy 'Black Cat' Squadron in World War II		the veterans of VPB-34, a Navy Black Cat squadron that flew the "tough old birds" officially known as PBY Catalinas in the Southwest Pacific in 1944. It is the story of one man's war adventure. With lively humor, Pilot Bob Hayes, Lt(jg) (ret) tells of his southwest Pacific experience, from his debarking a transport ship at Samarai, New Guinea in February 1944 to his debarking a jeep carrier at San Diego some 11 months later.
2004.305.061	Terrible Hours, The	Maas, Peter	Amazon.com Review May 23, 1939. Television was being advertised for the first time to American consumers. Europe was on the brink of war as Hitler and Mussolini signed an alliance in Berlin. These were the days before sonar and before the discovery of nuclear power revolutionized submarine design. Dependent on battery power, submarines were actually surface ships that "occasionally dipped beneath the waves." If a sub went down, "every man on board was doomed. It was accepted that there would be no deliverance." Swede Momsen was, according to master storyteller Peter Maas, the "greatest submariner the Navy ever had," and he was determined to beat those odds. Momsen spent his career trying to save the lives of trapped submariners, despite an indifferent Navy bureaucracy that thwarted and belittled his efforts at every turn. Every way of saving a sailor entombed in a sub--"smoke bombs, telephone marker buoys, new deep-sea diving techniques, escape hatches, artificial lungs, a great pear-shaped rescue chamber--was either a direct result of Momsen's inventive derring-do, or of value only because of it." Yet on the day the Squalus sank, none of Momsen's inventions had been used in an actual submarine disaster. In The Terrible Hours, Maas reconstructs the harrowing 39

Object ID	Title	Author	Summary
			hours between the disappearance of the submarine Squalus during a test dive off the New England coast and the eventual rescue of 33 crew members trapped in the vessel 250 feet beneath the sea. It's also the story of Momsen's triumph. Under the worst possible circumstances, Momsen led a successful mission and helped change the future of undersea lifesaving. Not only has Maas written a carefully researched and suspenseful tribute to a true hero, in the process he has salvaged a long-forgotten, riveting piece of American history. --Svenja Soldovieri --This text refers to an out of print or unavailable edition of this title. From Publishers Weekly Maas, best known for his chronicling of the urban underworld (Underboss, Serpico, etc.), takes readers underwater for a thrilling account of the world's first rescue of a submarine. Before WWII, submariners were second-class citizens. Worse, until Charles "Swede" Momsen came along, it was standard procedure to treat downed subs as irretrievable. Fortunately for 33 men aboard the Squalus, Momsen had developed and tested pioneering rescue equipment (often at the risk of his own life) and was ready with his crew when the sub sank to a depth of 243 feet off Portsmouth, N.H., on May 23, 1939. While the captain of the Squalus kept the air slightly toxic so that his crew stayed drowsy and therefore docile, Momsen lowered his huge pear-shaped diving bell until it made contact with the sub's deck, then began to bring the men up in groups. Bad weather threatened, and then, on the last ascent, the cable tangled, and the final group of men had to be lowered to the ocean floor again and there await repairs. To the amazement of the surface crew, who had telephone contact with the occupants of the bell,

Object ID	Title	Author	Summary
			they maintained morale by singing "Old MacDonald Had a Farm." Unfortunately, 26 men had been drowned in the first few minutes of the sinking, and their bodies were not retrieved until the Squalus was recovered 113 days after the mishap. Maas anchors the gripping story in Momsen, whom he portrays as a larger-than-life hero, a brainy, brave iconoclast of the kind one associates with action movies. It's a white-knuckler of a read it's not for the claustrophobic. (Sept.) Copyright 1999 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. 2004.305.062	Last Cruise : The Story of the Sinking of the Submarine, U.S.S. Cochino, The	Lederer, William J.	USS Cochino (SS-345), a Balao-class submarine, was the only ship of the United States Navy to be named for the cochino, a triggerfish found in the Atlantic. Her keel was laid down by Electric Boat Company of Groton, Connecticut. She was launched on 20 April 1945 sponsored by Mrs. M.E. Serat, and commissioned on 25 August 1945 with Commander W.A. Stevenson in command. File:Submarine USS Cochino SS -345 c. 1946.jpg USS Cochino shown at pierside, location unknown, c. 1946. Cochino joined the U.S Atlantic Fleet, cruising East Coast and Caribbean Sea waters from her home port of Key West, Florida. On 18 July 1949, she put to sea for a cruise to Britain, and arctic operations. Her group ran through a violent polar gale off Norway, and the joltings received by Cochino played their part on 25 August in causing an electrical fire and battery explosion, followed by the generation of both hydrogen and chlorine gases. Defying the most unfavorable possible weather conditions, Rear Admiral (then Captain) Rafael Celestino Benítez

Object ID	Title	Author	Summary
			(1917–1999), commander of Cochino, and his men fought for 14 hours to save the submarine, displaying seamanship and courage. But a second battery explosion on 26 August made "Abandon Ship" the only possible order, and Cochino sank. Tusk's valiant crew rescued all of Cochino's men except for Robert Wellington Philo, a civilian engineer. Six sailors from Tusk were lost during the rescue. (from Wikipedia)
2004.305.064	Okinawa : The Last Battle of World War II	Leckie, Robert	From Publishers Weekly Military historian Leckie covers the fierce battle between American and Japanese troops for the island of Okinawa throughout the spring of 1945. Copyright 1996 Reed Business Information, Inc. From Library Journal On this 50th anniversary of the battle of Okinawa (April to June 1945), we can expect an avalanche of titles about this last major battle of World War II. Okinawa was an epic amphibious-air-sea-land battle the likes of which may never be seen again. The conflict raged for 83 days; 13,000 Americans and 100,000 Japanese perished. Kamikazes sank 34 and damaged 361 U.S. vessels. Both Astor and Leckie are experienced military historians who tell their stories in the words of participants. Astor interviewed numerous veterans and compiled a masterful account of the battle as seen through the eyes of both American and Japanese survivors. He explores the history, training, and morale of the army and marine divisions and demonstrates why each was bound to succeed or fail. On the other hand, Leckie has written a "Monarch Notes" version of the battle that tells us nothing new. For the best history of the Okinawa campaign, readers should consider James and William Belote's Typhoon of Steel: The Battle for Okinawa (1970).?Stanley Itkin,

2004.305.066	American Sea Power Since 1775	Westcott, Allan (ed)	An account of American Sea Power Since 1775 through the War of 1812, The Civil War, War with Spain, WWI & WWII with photographs, drawings, summaries, and bibliography.
2004.305.069	World's Worst Warships, The	Preston, Antony	(from usni.org:) Although the title is deliberately provocative, this is a serious study that sheds light on how some warships came to be tainted by bad reputations. The author, one of Great Britain's most noted warship experts, profiles vessels that achieved notoriety due to outlandish design or appearance and others that were lost in dramatic actions or by accidents. Also covered are warships that never endeared themselves to operators, and, as a consequence, suffered prejudice against their design. The author contends that few ships are incompetently designed but rather victims of flawed operational concepts, over-ambitious specifications, poorly designed weapons systems, or financial stringency. Among ships included in the book are the Russian Popoffkas; the French battleship Brennus; the British vessels Captain, Sheffield, and Invincible; the U.S. monitors Katahdin and Vesuvius; and the Japanese light cruiser Mogami. This new perspective on naval design will appeal to everyone interested in how a ship's form fits its function for better or worse.

2004.305.071	Lost Ships of Guadalcanal, The	Ballard, Robert D.	Dozens of battered warships lie beneath the constricted waters off Guadalcanal, justifying the macabre moniker of Iron Bottom Sound. Unseen for 50 years, this submarine battlefield received its first visitor in 1992, aquanaut Robert Ballard. The twisted, encrusted shapes he saw are here spread out with the same lavish pictorial formula used in his enormously popular albums on the Titanic and the Bismarck. Prewar photos of battleships in dress regalia contrast graphically with eerie paintings and photos of shell and torpedo strikes that destroyed them and their crews. Now--as in the moment of foundering during the half dozen sharp, short naval battles around the island--guns aim askew, fatal holes gape wide, and turret plates peel back. The Titanic and the Bismarck--both on maiden voyages--sailed to the deep with ill-fated majesty. But Ballard treats these unheralded ships--American, Australian, and Japanese--with the same technical accuracy and awesome reverence. The author's name alone should trigger demand. Where will Ballard dive next? Jutland? Trafalgar? Gilbert Taylor From Booklist Product Description A chronicle of the search for the ships sunk during the Battle of Guadalcanal integrates a first-person narrative of the expedition with photographs of ships from both sides lost in the battle. TV tie-in. 150,000 first printing. \$150,000 ad/promo. Tour. (from Amazon.com)
2004.305.072	Badges and Insignia of World	Rosignoli, Guido	Badges and Insignia of World

Object ID	Title	Author	Summary
	War II : Air Force, Naval, Marine		War II Air Force, Naval and Marine Services of the world with 2500 color illustrations, a factual informative text, historical background of the badges and insignias of these modern fighting services. One book in a series which includes tanks, armored fighting vehicles, fighters and bombers and airliners from 1919 to present.
2004.305.075	Trapped at Pearl Harbor : Escape from Battleship Oklahoma	Young, Stephen Bower	A seaman assigned to gunnery duty, the author and the other men of turret #4 tried to man their battle stations as the Oklahoma was hit by five torpedoes and began to sink. They were ordered to remain below in the turret, and were trapped when the ship overturned, despite last-minute efforts to abandon ship. He recounts the violence of the capsizing, which killed and injured many men, and the survivors' frantic search for an escape route.
2004.305.076	Story of Our Navy, The	Stevens, William O.	The Story of Our Navy, 1914, 1918, New Edition with illustrations and maps, chronology, and history of the Navy and battles from the American Revolution, the War of 1812, the American Civil War and the World War.
2004.305.078	No Easy Days : The Incredible Drama of Naval Aviation	Keeney, Douglas	This book is a pictorial presentation of mishaps in carrier flight operations. The picture history includes carrier types such as the straight-deck designs of World War II vintage, and several of the modern angled-deck versions. Aircraft types include the TBM Avenger, the AD Skyraider, the F9F Panther, the F-14 Tomcat, the F4U Corsair, F6F hellcat, and many more. Pages 36-37 show photos of the USS Midway damage after the collision with the Panamanian freighter, the Cactus. Pages 98-99 show a 1984 ramp strike by an A-7E Corsair attempting to recover on USS Midway. There is also a video in our collection with the same title "No Easy Days."
2004.305.079	Glimpse of Hell : The	Thompson, Charles C.	Amazon.com Review

Object ID	Title	Author	Summary
	Explosion on the USS Iowa and its Cover-up, A		On April 19, 1989, Turret Two aboard the recommissioned battleship USS Iowa exploded, killing 47 men. In A Glimpse of Hell, former naval officer, newspaper reporter, and 60 Minutes producer Charles Thompson has written an authoritative exposé of the United States Navy high command's consistent efforts to manipulate the evidence of that disaster and slander deceased seaman Clayton Hartwig. The Iowa investigation is contextualized by Thompson's startling insights into the moral universe of the navy's masters, a cabal so protective of their own jobs that they prepared press releases indicating that an out-of-control Tomahawk missile launched from the Iowa was actually a part of a federal and military crackdown on an illicit marijuana field in Alabama. Unlike the Tomahawk debacle, the falsehoods embroidered into the investigation of the Turret Two disaster did become public, as naval officials accepted a noticeably botched report from investigators who "lost" two 2,700-pound projectiles and consistently claimed, with no foundation, that Hartwig, killed in the explosion, was a murderous and suicidal psychopath who blew up the turret in revenge for a thwarted homosexual affair. Two years later, they were forced to admit that they had no clear and convincing evidence linking Hartwig to the explosion and apologized to his surviving family members. (The family later initiated a \$12 million defamation lawsuit against the U.S. Navy.) As active duty officers rebuffed his own investigation, Thompson found that many personnel, including captains and admirals, were willing to talk when their careers were no longer on the line. A Glimpse of Hell assiduously follows the Iowa story with a dedication that honors the dead and their

Object ID	Title	Author	Summary
			families, as one journalist does more to expose the careerism and sexual preoccupations of ranking naval officers--and their consequences--than any government investigative agency. --James Highfill From Publishers Weekly The U.S. Navy received a barrage of bad publicity after the infamous 1989 explosion that killed 47 sailors and the even more disgraceful coverup that followed. If even half of what Thompson alleges is true, the coverup was the end of a long line of blunders and lies involving the Iowa, which Thompson calls "a 59,000-ton accident looking for a place to happen." Though Thompson makes it clear that lax safety and poor training most likely caused the explosion, the navy chose to pin the blame on second-class gunner's mate Clayton Hartwig. For starters, he was rumored to be gay although the navy never proved that. Also, his family tried to go after the \$50,000 life insurance policy that he'd left to a shipmate. But mostly, it seems, it was easier for the navy to blame an enlisted man than to admit that the accident could have been avoided altogether were it not for a deadly combination of arrogance, ignorance and carelessness both aboard the ship and among navy higher-ups in Washington and Norfolk, Va. A former naval officer who produced several stories about the explosion and coverup for 60 Minutes, Thompson has no ax to grind against the navy as an institution. In fact, he clearly loves the navy at its best. He writes with careful attention to detail (and a familiarity with sometimes dizzying military acronyms) and a slow, burning rage at how investigators willfully distorted the truth, misled the public and set out to destroy the reputation of a sailor seemingly all so that the navy could cover its own brass. 			(from Amazon.com)
2004.305.080	U.S. Navy War Photographs : Pearl Harbor to Tokyo Bay	Steichen, Edward (ed)	Right after the attack on Pearl Harbor until the Japanese surrender in Tokyo Bay, Capt. Edward Steichen, USNR, and his expert staff photographed every aspect of Navy action in the Pacific. They cover the actions of Navy, Marine, and Coast Guard officers and men on ships, in planes, in bombings of Japanese ships, in receiving kamikaze attackers, in land action on Iwo Jima, Leyte, Guadalcanal and elsewhere, along with photos of officers and crew at work aboard ship.
2004.305.081	Unsung Sailors : The Naval Armed Guard in World War II	Gleichenauf, Justin F.	Nearly 145,000 Americans served in the U.S. Naval Armed Guard in World War II protecting merchant ships and their precious cargo in the deadly Murmansk Run, The U-boat infested waters of the Atlantic, the fiercely contested Mediterranean, and the hazardous Pacific and Indian Oceans. The author effectively combines a lively firsthand account of seagoing action around the globe with historical analysis to present a complete picture of life aboard an astounding variety of merchant vessels, including the famed Liberty Ships.
2004.305.083	Devil Boats: The PT War Against Japan	Breuer, William B.	The PT Boats and their heroic crews performed deeds that almost seem impossible, deeds demanding incredible skills and courage: pitting their plywood craft against the force of the angry sea, or the might of a steel ship hundreds of times their own size. From start to finish this book is a saga of constant action; of death, destruction and eventual triumph.
2004.305.089	Double-Edged Secrets : U. S. Naval Intelligence Operations in the Pacific during World War II	Holmes, Wilfred Jay	Captain W. J. Holmes, USN (Retired) was one of the men whose wisdom and quick thinking materially shortened the struggle for the Pacific, thus saving thousands of lives on both sides of the war. Double-Edged Secrets is the story of his intelligence service from June 1941 until the end of the war.

Object ID	Title	Author	Summary
			It is the first account of these critical events to benefit from the recently liberalized American security regulations.
2004.305.090	Eyewitness to World War II: The Best of American Heritage	Sears, Stephen W. (ed)	The author read through hundreds of past issues of 'American Heritage' to select the most compelling stories of World War II. The result of his search is a uniquely moving and valuable anthology--a series of personal histories that, marshalled together, become an intimate history of the Second World War.
2004.305.091	Aces Against Japan : The American Aces Speak, Volume I	Hammel, Eric M.	The author brings us first-person accounts from forty of the American fighter aces who blasted their way across the skies of the Pacific and East Asia from December 7, 1941, until the final air battles over Japan itself in August 1945.
2004.305.092	Aces Against Japan II : The American Aces Speak, Volume II	Hammel, Eric M.	An engrossing new collection of thirty-eight first-person accounts by American World War II fighter aces. Coupled with a clear overview of America's far-flung air war against Japan and a clear appreciation of the burgeoning industrial might backing the American war effort, the author's detailed interviews bring forth the most thrilling in-the-cockpit experiences that World War II's fabled Army, Navy, Marine, and Flying Tiger aces have chosen to tell.
2004.305.094	War at Sea: Pearl Harbor to Midway	Greene, Jack	Contents: Prelude to Pearl Harbor -- The Japanese Situation -- The American Situation -- The Commonwealth Situation -- The War in the Pacific -- Air Raid Pearl Harbor -- The Fall of the Philippines -- The Malayan Campaign -- The Fall of Guam, Rabaul and Wake -- The Fall of the Indies -- Burma and the Indian Ocean Raid -- The Early Carrier Raids -- The Battle of the Coral Sea -- Midway, the Turning Point

Object ID	Title	Author	Summary
			every aspect of the war, and gives a better impression of what naval combat was really like than any number of written accounts.
2004.305.096	Air War Pacific : Fight for Supremacy in the Far East : 1937 to 1945	Campbell, Christopher	Beginning with an absorbing account of the growth of naval air power in both the United States and Japan during the interwar years, continuing through the fierce combat over China and Manchuria between the Japanese, Chinese and toward 1937, Soviet air forces, this book covers in detail the wartime battlefield across the skies. The main focus of the narrative, however, is the struggle for supremacy between the United States and Japan in World War II, depicting in vivid detail the surprise attack on Pearl Harbor, the brilliant early successes of Japanese naval aircraft and the turning of the tide after 1942's Battle of Midway.
2004.305.097	Hell-Bent for Leather: The Saga of the A-2 and G-1 Flight Jackets	Nelson, Derek	Leather flight jackets have an unmistakable aura of romance and adventure. The most legendary of these, the Air Force's A-2 and the Navy's G-1, evoke these feelings like no other garments in history. As much a part of our aviation heritage as the P-51 Mustang and F4U Corsair, these venerable jackets are the prize possessions of veterans, and modern replicas are the hot fashion item of today. Although the A-2 lasted as standard issue only a dozen years, its classic styling made it an instant and enduring success. It was worn by Air Force fighter and bomber crews alike, from early legends like the Flying Tigers and Doolittle's Raiders to postwar heroes [sic] like Chuck Yeager while breaking the sound barrier. Thousands of A-2s returned from war on the backs of mustered-out aviators to become sought-after fashion items and treasured family heirlooms. Today, nearly fifty years after it was canceled by Gen. "Hap" Arnold, it is more

Object ID	Title	Author	Summary
			popular than ever. The Air Force has reissued it and millions of replica A-2s are sold every year in the United States and around the world. Not to be outdone by the Air Corps, the Navy designed their own leather flight jacket: the G-1. Although it was not as popular with civilians as the A-2, the G-1 had a much longer service life-issued almost continuously from the late 1930s to today-and is a tailhooker's most prized possession, next to his wings of gold. Nothing reeks of adventure like a pity Navy flight jacket, festooned with patches recording its owner's career, its mouton collar sun-bleached to the color of honey. These jackets first gained fame as the preferred jackets of Flying Tiger legends R. T. Smith and "Tex" Hill. That tradition continued through WWII, Korea and Vietnam. Today, the G-1 is the jacket of the Navy's TOPGUNS. (from dust jacket flap)
2004.305.098	Victory at Sea	Salomon, Henry	From the Mediterranean to the Coral Sea, from the North Atlantic to Tokyo Bay, Allied naval action played a decisive part in the winning of WWII. Here, adapted by the late Henry Salomon and by Richard Hanser from their celebrated TV series, is the full picture-and-text story of this sweeping "Victory at Sea"
2004.305.099	Sole Survivors of the Sea	Wise, James E.	Stories of sole survivors who survived the perils of the sea. Most occurred during World War II when navies and merchant fleets of many nations, friend and enemy, roamed the seas of the world. Many involved submarines, especially German U-Boats.
2004.305.101	Sea Power in American History	Krafft, Herman F. (Herman Frederick)	A history of American sea power from the British rule, the American revolution and up until and through world war I. Includes discussions of the defeat of the British sea power, Paul Jones, the rise of

Object ID	Title	Author	Summary
			commercial sea power in America during the Napoleonic Wars, the War of 1812, sea power on the Great Lakes, the Civil War including the Monitor, the Confederate Navy, Farragut, Mahan, the Panama Canal and WWI.
2004.305.103	Baa Baa Black Sheep	Boyington, Gregory "Pappy"	Told in his own earthy prose, here is the true story of America's most unconventional war hero, the hard-drinking, Japanese-taunting, hell-for-leather Marine ace of the Solomons--who took a group of "misfits" and built them into one of the great flying units of World War II--who personally shot down 26 Japanese planes to win the Congressional Medal of Honor and the Navy Cross. Here is also the story of a hero's fall from grace--of "Pappy" Boyington's post-war tailspin into acute alcoholism, and his long painful struggle for rehabilitation.
2004.305.105	Coral Comes High	Hunt, George Pinney	The First Marine Division attacked the Japanese held island of Peleliu in the Palau Islands and engaged an estimated 10,000 Japanese in one of the fiercest struggles of the war. This division consisted of three infantry regiments, the First, the Fifth, and the Seventh and other attached units and regiments. This is the story of the First regiment, and the author and what happened to them during a grim action of forty-eight hours' duration.
2004.305.106	U.S. Marine Air Wings, The	Padden, Ian	THE FIGHTING ELITE AMERICA'S GREAT MILITARY UNITS Here is the magnificent series that brings you into the world of America's most courageous and spectacular combat forces-the Fighting Elite. Each book is an exciting account of a particular military unit-its origins and training programs, its weaponry and deployment-and lets you relive its most famous battles in tales of war and valor that will live forever. U.S. MARINE AIR WINGS

Object ID	Title	Author	Summary
			AIR-TO-GROUND Born in World War I and tempered in immortal battles in Guadalcanal, Korea, Vietnam, and Grenada, the Marine Air Wing was originally created to provide air support for the ground troops, but now they encompass a greater variety of services than any other airborne-0 outfit. Told by a master chronicler of war, here is their story. Based in part on the diaries of Alfred Austell Cunningham, the father of Marine aviation, and the battle logs maintained by the pilots themselves, this exciting account describes the weapons and aircraft used by the Marine Air Wing, from helicopters and supersonic fighters to heat-seeking missiles. Above all, this is a story of valor and of the men who carry the Marines motto, SEMPER FIDELES, into the skies. (from back cover)
2004.305.107	McC Campbell's Heroes : The Story of the U. S. Navy's Most Celebrated Carrier Fighters of the Pacific War	Hoyt, Edwin P.	Another in a series by Mr. Hoyt on the events in the PTO. This one focuses on Capt. David McC Campbell and the men of the "Fabled Fifteen" (Air Group 15) who can boast 26 aces, sank or damaged 58 warships (including four Japanese carriers), for a total of 560,000 tons of enemy shipping. They destroyed almost 700 Japanese aircraft, half of them in the air. (from www.ww2aircraft.net)
2004.305.109	Heroes: U. S. Marine Corps Medal of Honor Winners	Cerasini, Marc A.	The United States Marine Corps Medal of Honor, awarded for outstanding courage and sacrifice in combat, is the greatest honor a marine can hope to attain. In over two hundred years of Marine Corps existence, only 293 marines have received this honor. These are their stories. From the American Revolution to the Persian Gulf, this comprehensive book features detailed information on 293 Marine Corps Medal of

Object ID	Title	Author	Summary
			Honor winners, with 150 in-depth accounts of those who demonstrated the courage and determination which are the cornerstones of the United States Marine Corps-in a compelling chronicle of those who have truly earned the rank of "heroes." --This text refers to an out of print or unavailable edition of this title. About the Author During his twenty-year career, Marc Cerasini has worked as a magazine editor and writer, a consultant, and a screenwriter, and has written more than forty books. He wrote an analysis of Tom Clancy's fiction for The Tom Clancy Companion. He has also written for The Briefing Room, a website and forum for authors of military fiction and nonfiction, techno-thrillers, and espionage novels. --This text refers to an out of print or unavailable edition of this title. (from Amazon.com)

2004.305.110	Ironworks: The Story of Grumman and its Aircraft	Treadwell, Terry C.	Member Lawrence Hahn (#0660) would like to recommend a book he recently read. "Ironworks," by Terry C. Treadwell. As the name would imply, the subject of this book is Grumman. Mr. Treadwell has written an excellent and incredibly detailed treatment of the Grumman Corporation and its airplanes (and other products into the space age.) Separate chapters about the different models of aircraft built include descriptions of the differences between dash numbers and even the different versions of power plants used. Anyone who ever worked at Grumman will be fascinated by Mr. Treadwell's work and some of the anecdotes about the personalities that made Grumman the wonderful company, which it was and will continue to be in the memories of those who even had the pleasure of working there. (As Mr. Hahn did for 35 years.) (from

2004.305.111	SBD Dauntless Units of World War 2	Tillman, Barrett	Unquestionably the most successful dive-bomber ever to see frontline service with any air arm, the Douglas SBD Dauntless was the scourge of the Japanese Imperial Fleet in the crucial years of the Pacific War.
2004.305.112	Helldiver Units of World War 2	Tillman, Barrett	The most numerous Allied dive-bomber of WWII, the Curtiss Helldiver endured a prolonged gestation period to mature into one of the most effective aircraft of its type to see service in the Pacific theatre of war.
2004.305.113	George Bush : His World War II Years	Stinnett, Robert B.	September 1944: perched on the wing of his stricken torpedo bomber, 3,000 feet above a Pacific Ocean teeming with hostile ships, Ensign George Bush prepares to leap into destiny. One yank of his rip cord later, he is prey to a Japanese armada, intent on his capture & interrogation. The story is true. A patriotic young man volunteers for hazardous assignment, knocks out enemy war ships, & collects a pile of medals. His inspiration is his fiance, Barbara, for whom he names his plane. Discover for yourself the gallantry, conflict, & drama that molded our former President in a fascinating & insightful recollection. Over 100 photos. (from Amazon.com)
2004.305.115	Electronics Today and Tomorrow	Mills, John	This book tells how electronics behave, and how their modes of behavior are utilized in such important present-day equipment as the electric photometer, the "walkie-talkie," and television apparatus. (from back cover)
2004.305.123	History of Marine Corps Aviation in World War II	Sherrod, Robert Lee	Basic material for this book is several hundred war diaries and historical reports of the squadrons, groups, wings, and other units in Marine aviation. More than 50 operations reports and action reports have been consulted and the author

Object ID	Title	Author	Summary
			interviewed about 250 Marine aviators, including several among the 100 who have since lost their lives in Korea.
2004.305.124	U.S. Navy Fighter Squadrons in World War II	Tillman, Barrett	This chronology of VF squadrons describes their history, deployments, battle highlights, commanders, aces, losses and aircraft. Twenty five appendices supply further information on shoot down claims, biographies of twelve famous aces, a list of 371 Naval fighter aces, aces in a day, top scoring squadrons, etc.
2004.305.125	Flying Leathernecks in World War II	Doll, Thomas E.	(Foreword:) Midway, Guadalcanal, Vella Lavella; names of places that before World War II few people knew existed. But in the years from 1941 to 1945 these remote islands became well known to almost every American old enough to comprehend the world around him. To those of us who served on these and the many others of islands in the Pacific, their names will not be forgotten nor the events that took place on these small but important landmarks. This pictorial review of World War II United States Marine Corps aircraft will remind those of us that flew some of these aircraft in combat of events which not only affected our personal lives but may also have influenced the course of the war. The photographs of the aircraft on Guadalcanal's Henderson Field will bring to mind special memories for we who served there; the primitive living_ and working conditions; the dust; the mud and the almost constant harassment by the enemy in the early days of our presence on the island. This was Guadalcanal. Munda, Tarawa, Bougainville, Espiritu Santo, Peleliu, Iwo Jima, Okinawa; each a name, each a different place, each a poignant recollection. The photographs within this

Object ID	Title	Author	Summary
			book will give us all a nostalgic glimpse of an important time in our lives through the aircraft we flew and depended upon for our very existence. Although directed primarily toward the World War II naval aviation enthusiast, all who are interested in aviation will find this book both interesting and informative. This collection of photographs depicts a critical era in the history of United States Marine Corps aviation and that of our country. Major General Marion E Carl, USMC June 1970
2004.305.128	No Higher Honor : The U. S. S. Yorktown at the Battle of Midway	Nesmith, Jeff	The story of the USS Yorktown's participation at the Battle of Midway on June 4-6, 1942.
2004.305.129	Condition Red : Destroyer Action in the South Pacific	Bell, Frederick Jackson	Destroyer life in the South Pacific, with details of routine and action. Here, with plenty of information, the contributions of all parts of the ship's personnel are introduced: damage control, navigation, rescue, submarine attack, gunnery, feeding, etc., the experiences of front line, "sheep dog," maneuver, screen assignments, the minutiae of daily and battle life. First the Boise: then command of the G, and from July '42 plenty activity of interest to the marine-minded. (Taken from the Virginia Kirkus)
2004.305.130	Savo : The Incredible Naval Debacle off Guadalcanal	Newcomb, Richard F.	Attacked by an inferior Japanese Naval Force, the U.S. Navy lost four heavy cruisers in forty minutes in the darkness of Savo Bay on August 9, 1942--just eight months and two days after Pearl Harbor. This was the shocking start of one of the most humiliating sea defeats of World War II. How did it happen? Who was responsible for this startling naval reverse just as our reconquest of the Pacific was getting under way. These questions became part of the controversy that raged throughout the war and ultimately became the subject of the Hepburn Report, a

Object ID	Title	Author	Summary
			naval inquiry that was never made public.
2004.305.131	One Tough Marine: The Autobiography of First Sergeant Donald N. Hamblen, USMC	Hamblen, Donald N.	From Publishers Weekly During a parachute-training jump at Camp Pendleton, Calif., in 1962, Marine Sergeant Hamblen became entangled in high-tension wires; though he survived electrocution, Hamblen's left leg had to be amputated. Facing a medical discharge and the end of a career he loved, he resolved to overcome his handicap and rehabilitate himself back to active duty. The story of how he managed to pass the demanding Physical Readiness Test, which finishes with a punishing three-mile run, is searing. Returning to full-duty status in 1963, Hamblen became the first Marine to be sent into combat wearing a prosthesis. He served 30 consecutive months in Vietnam as a reconnaissance specialist and adviser, taking part in more than 80 missions, half of them inside North Vietnam. Hamblen retired in 1970 after 20 years of service, and is now a professional hunting guide. His involving autobiography, written with Norton (Force Recon Diary , 1970), also includes a fine account of his experiences as a rifleman and sniper during the Korean War. An inspiring story of general interest. Photos. Copyright 1993 Reed Business Information, Inc. --This text refers to the Hardcover edition. From Library Journal In 1962, during a routine reconnaissance jump, Staff Sergeant Hamblen's parachute was blown off course and into high tension lines at Camp Pendleton. He never lost consciousness, and doctors were amazed that he survived. Five days later his leg was amputated below the knee. Hamblen immediately set out to prove to everyone that he could stay in the Marines. In 1965, he volunteered for service in Vietnam, training teams of Vietnamese for clandestine missions. He served for 30

Object ID	Title	Author	Summary
			months and was shot twice in North Vietnam. As far as is known, he is the only Marine to have gone into combat with a prosthesis; by his extraordinary example, he served as an inspiration to other badly wounded soldiers in hospitals. He demonstrated his courage, spirit, and self-determination to overcome all obstacles. Recommended for Vietnam War collections. - Michael Coleman, Regional Lib. for the Blind and Physically Handicapped, Montgomery, Ala. Copyright 1993 Reed Business Information, Inc. --This text refers to the Hardcover edition. (from Amazon.com)

2004.305.135	Guidebook for Marines	Smith, Robert W. (ed.)	Preface and Acknowledgments: This fourteenth revision of the original "Guidebook for Marines" provides a convenient, up-to-date source of basic military information. It is listed as a reference for essential subjects in Marine Corps Order 1510.2 (series), "Individual Training of Enlisted Marines." The Guidebook staff solicited comments and recommendations for changes from the staff at Headquarters, Marine Corps and from all major Marine field commands. This input resulted in some significant alterations and additions to the previous edition, e.g., larger size, side opening; four totally new chapters — "What is the Corps?" "Law of War," "Physical Fitness"; and "Marksmanship"; new layout; many new graphics; complete review and updating for factual accuracy. Many suggestions from the field have been incorporated in order to make this revision the most complete and current reference of basic information available to the Marine. We thank all those who contributed to its production.

Object ID	Title	Author	Summary
			The Guidebook staff: LtCol Robert W. Smith, USMC (Ret.), Editor. Jon D. Dodd, Art Director. Tina M. Gibbs, Assistant Art Director. Judy Jarman, Editorial Assistant. Louis R. Lowery, Photographic Editor. John DeGrasse, Artist. The Guidebook is an evolving document. Things change constantly within the Marine Corps, and so should the Guidebook. This is the first major revision in five years. That's too long an interval. We'd like to revise it more often, and solicit your comments and suggestions for future changes. After all, it's your guidebook. Quantico, Virginia 1 October 1979 G. L. BARTLETT Brigadier General, U. S. Marine Corps (Ret.) Executive Director Marine Corps Association
2004.305.136	Marine's Handbook, The	Brown, L. A.	FOREWORD This Handbook has been prepared by an officer skilled in his profession and thoroughly conversant with the subjects herein treated. Some years ago, when Marine Corps Headquarters issued Marine Corps Order No. 41, which set certain standards for noncommissioned officers and privates of the Marine Corps, Major Luther A. Brown, with commendable zeal and initiative, prepared a series of questions and answers covering all requirements, for the instruction of the men of his detachment at the Naval Operating Base, Norfolk, Virginia. His work was immediately recognized for its excellence, and received the commendation of Marine Corps Headquarters. Since that time, The Marine's Handbook has been modified and improved to meet service standards. It is not only useful for instruction during school

Object ID	Title	Author	Summary
			periods, but permits anyone, by individual study to gain first hand knowledge of basic principles that enlisted men should know. The Marine's Handbook should be of particular value to officers and men of the Marine Corps Reserve, whose time for drill and instruction is limited. By practical drill and instruction, coupled with conscientious study, all concerned can meet a high standard of knowledge and efficiency in the subjects herein treated. W. P. UPSHUR Major General, U. S. Marine Corps
2004.305.137	Motorist Handbook (U.S. Naval Base, Subic Bay, Republic of the Philippines)	Safety Division, Base Industrial Relations Office	Catalog of safe driving practices.
2004.305.140	Watch Officer's Guide - 1955 : A Handbook for All Deck Watch Officers	Noel, John V.	(from dust jacket flap:) Ensign Charles E. Hovey, USN, published his "Watch Officer's Manual" in January, 1911. It was the first book of its kind in the American Navy although there had long been counterparts in the British Navy. In September of the same year he was killed in action leading a landing party ashore against outlaw Moros in the Philippines. He was cited for conspicuous gallantry in action by a General Order of the Secretary of the Navy and a few years later a destroyer was named for him. The old four-piper USS HOVEY is gone but this small volume is a more lasting memorial to a promising young officer. In 1917 the Manual was revised and enlarged by Lt. Solomon Endel, USN. This second edition, published by the U. S. Naval Institute, was the last to carry Hovey's name. Shortly after World War I, the Naval Institute acquired all rights from the Hovey estate. Commander W. S. Farber, USN, in his extensive revision of 1930 for the Naval Institute, changed the name of the third

Object ID	Title	Author	Summary
			edition to "Watch Officer's Guide." This was done to avoid confusion with the various Navy Department bureau manuals. Cdr. Farber's edition incorporated the most extensive changes in both format and in content and was the forerunner of the book in its modern form. In 1935 Captain Russell Willson again revised the "Guide," bringing out the fourth edition. This version, while extensively rewritten, followed the format and contents of the third edition. The Navy was beginning its great expansion and the "Watch Officer's Guide" by Captain Willson became an important training aid for all junior officers. In 1949 Captain F. D. McCorkle, USN, Head of the Department of Seamanship and Navigation, instigated the current revision with the aim of including all the changes and new wrinkles resulting from the techniques and equipment developed during World War II.
2004.305.143	Aerial Navigation	Lyon, Thoburn C.	Aerial Navigation, Cartographic Engineer, Thoburn c. Lyon, U. S. Coast and Geodetic Survey, 1942 Table of Contents includes Elementary Principles of Navigation, Piloting, The Triangle of Velocities, Chart Reading Parts 1 & 2, and Celestial Navigation. A map in back of book and The "Avigator" which is a simple navigation calculating device is enclosed in an envelope.
2004.305.144	Handbook for Quartermasters	Office of the Quartermaster General	Ready reference publication for members of the U.S. Army Quartermasters Corps which covers in a practical way the day to day workings of the corps. Prepared under the direction of the Quatermaster General.
2004.305.147	Bluejackets' Manual, 1946	United States Naval Institute	From the days of oars and coal-fired engines to the computerized era of the twenty-first century, The Bluejacket's Manual has been an essential part of the American Sailor's sea bag for more than one hundred years, serving as an

Object ID	Title	Author	Summary
			introduction to the Navy for new recruits and as a reference book for Sailors of all ranks. Written by a Sailor whose decades of naval service included sea duty in patrol craft, destroyers, and aircraft carriers, as both an officer and a white hat, this newest edition has been overhauled to reflect the current state of the ever-evolving U.S. Navy, adding such things as camouflage uniforms, new ratings, and the Navy Professional Reading Program. Primarily intended to serve Bluejackets, the 24th Edition of this standard guide to the U.S. Navy will also be welcomed by potential recruits, Navy buffs, and a growing number of Bluejacket's Manual collectors. (from Amazon.com; for 24th edition)
2004.305.153	Last Stand of the Tin Can Sailors, The	Hornfischer, James D.	"This will be a fight against overwhelming odds from which survival cannot be expected. We will do what damage we can." With these words, Lt. Commander Robert W. Copeland addressed the crew of the destroyer escort USS Samuel B. Roberts on the morning of October 25, 1944, off the Philippine island of Samar. All that stood between the Japanese Navy and Douglas MacArthur's vulnerable invasion force were the Roberts and the other small ships of a tiny American flotilla poised to charge into history.
2004.307.003	History of the U.S. Navy, Vol. 2 : 1942-1991	Love, Robert W.	(from abebooks.com) In this comprehensive, well-researched history, Love departs from conventional approaches and presents the Navy as the power behind U.S. foreign policy. Continuing where he left off in Volume 1 naval historian Love chronicles the history of the U.S. Navy from America's entry into World War II to Desert Storm. Love, who teaches at the U.S. Naval Academy, presents the stories of naval engagements, policies, and personalities in a detailed yet succinct format, which

Object ID	Title	Author	Summary
			makes this book interesting and easy to read. Each chapter covers a specific timeframe of naval history or stage of development of the navy. A glossary explaining naval terms and ship and aircraft types--as well as further information on operations mentioned in the book only by code name--would have made the book more understandable to the general reader. Libraries possessing Volume 1 will need to purchase this volume to complete the set; at the same time, the book can stand by itself for those libraries requiring coverage of this subject and timeframe. With the U.S. Navy making more than its share of headlines lately, this magisterial history of the service, from Pearl Harbor to the Persian Gulf, is both timely and valuable. Love covers in vast detail not only combat (his account of Vietnam operations is especially noteworthy) but also interservice rivalries, technological developments, new weapons, and the influence of all of these on tactics, strategy, and doctrine. And he notes influential personalities both in and out of the navy.
2004.307.004	Chronology of the Cold War at Sea 1945 - 1991	Polmar, Norman	Chronology of the Cold War at Sea provides a day-to-day look at the maritime scene during the 45 years of East-West confrontation, crisis, and --- at times --- conflict. This book examines the navies, ships, aircraft, and men and women of the Cold War. See back cover of book for excerpts from entries on the US aircraft carrier Midway (CVB 41) - Sept. 10, 1945 to Sept. 11, 1991
2004.307.005	Pilots, Man Your Planes! The History of Naval Aviation	Morrison, Wilbur H.	This book covers the entire history of naval aviation. It does not rely on archival material. It is basically about the men and women who developed naval aviation. The author's interviews with naval aviators high and low form the backbone of the text.
2004.307.006	CV : Carrier Aviation	Garrison, Peter	Stand by! Cat two! All F-14s will be going to military

Object ID	Title	Author	Summary
			power off cat two. Cat four, four eleven, stand by! Four eleven airborne! One sixteen airborne! Three zero zero airborne! The airplanes follow one another into the air at intervals, like bullets from some slow-firing gun. A fascinating book to the uninitiated civilian and to the naval aviator as we the book is an understandable primer on the complexities of operating 35-ton aircraft from a short steel deck at sea. To the latter, CV puts carrier operations in a new perspective -- and almost poetic. This is an absolutely marvelous volume, the perfect gift for any to understand and appreciate modern carrier operations. (from back cover)
2004.307.007	Spy Book: The Encyclopedia of Espionage	Polmar, Norman	Norman Polmar and Thomas Allen describe espionage as the world's second-oldest profession, right behind prostitution. They say the two trades share much of the same allure: "Money, secrecy, sex, great public interest, and people's reputations--or lack thereof--are involved in both professions." Spies are probably the objects of greater curiosity, given their proximity to the corridors of power. And now Polmar and Allen have come up with a compendium that informs on the informers, from "A-2" (the intelligence staff of the U.S. Army Air Corps) to "Zelle, Margaretha" (Mata Hari's real name). More than 2,000 entries deliver the scoop on agencies, operations, jargon, technology, and even such fictional figures as James Bond. --This text refers to an out of print or unavailable edition of this title. From School Library Journal Grade 7 Up. An alphabetically arranged encyclopedia, ranging from Biblical incidences of spying to circumstances surrounding Boris Yeltsin's reelection in 1996. Interesting details about television and

Object ID	Title	Author	Summary
			literary spies are included. The text is clear, and the authors' conclusions are well documented. A system of stars and small capitals indicate master entries and cross-references, respectively. The icons are better suited to a multimedia reference tool where one could more easily move through the maze of interactive text. There is an index of personalities, but no subject index. Entries on fictional spies are strictly alphabetical, so James Bond is under J and Maxwell Smart is under M. Dull, black-and-white photographs are sprinkled throughout. Mark Lloyd's <i>The Guinness Book of Espionage</i> (Da Capo, 1994) is not as comprehensive, but its topical organization makes it a more accessible book for beginning students of espionage and more useful for assignments. Visually appealing and easier to read, H. Keith Melton's <i>The Ultimate Spy Book</i> (DK, 1996) and Richard Platt's <i>Spy</i> (Knopf, 1996) are also better introductory works. Nevertheless, <i>Spy Book</i> is a solid reference source with detailed coverage for readers who are already captivated by the subject. Margaret Tice, Brooklyn Public Library Copyright 1997 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. (from Amazon.com:)
2004.307.008	Naval Aviation Guide, The	Knott, Richard C. (ed)	Every major facet of naval aviation is covered in what was designed to be a concise, useful tool of the naval aviation professional.
2004.307.010	Russia, America and The Cold War, 1949 - 1991	McCauley, Martin	Following on from McCauley's bestselling <i>Origins of the Cold War</i>, this book looks at the years from 1949 to 1991. * The Cold War is increasingly offered as a second/third year option as history courses become more focused on the twentieth century

Object ID	Title	Author	Summary
2004.307.012	Vietnam : The Early Decisions	Gardner, Lloyd C.	* Also useful for students of politics and international relations * This is a completely to date survey of the subject * Includes chronology, list of treaties and summits between the superpowers and who's who. Review '...succinct pocket-book guide to the Cold War.' 'There are many things in this book to applaud.' '...reflective and relevant introduction to the Cold War.' "Journal of Contemporary European Studies, December 2004" --This text refers to an alternate Paperback edition. (from Amazon.com)
			Haunting questions remain about our involvement in Vietnam. Perhaps the most persistent of these is whether President Kennedy would have ended American involvement in Vietnam if he had lived. For many Americans, Oliver Stone's film JFK left no doubt that before his assassination Kennedy had determined to quit Vietnam. Yet the historical record offers a more complex answer. In this fresh look at the archival evidence, noted scholars take up the challenge to provide us with their conclusions about the early decisions that put the United States on the path to the greatest American tragedy since the Civil War. The tensions and turmoil that accompanied those decisions reveal the American presidency at the center of a storm of conflicting advice. The book is divided into four sections. Parts one and two delve into the political and military contexts of the early decisions. Part three raises the intriguing questions of Kennedy's and Johnson's roles in the conflict, particularly the thorny issue of whether Kennedy did, in fact, intend to withdraw from Vietnam and whether Johnson reversed

Object ID	Title	Author	Summary
			that policy. Part four reveals an uncanny parallel between early Soviet policy toward Hanoi and U.S. policy toward Saigon. (from Amazon.com)
2004.307.013	Naval Air War in Vietnam, The	Mersky, Peter B.	Full account of naval aviation in action in Vietnam. Over 300 photos, plus maps and drawings; air-sea rescue operations; extensive coverage of the role of marine aviation, and the evolution of new tactics; carrier operations; the important contributions of reconnaissance missions; the "war-within-a-war" of electronic warfare and counter measure; the A-1 Skyraider, last of the prop era fighters, holding its own against modern jets, even bagging a couple of MiGs.
2004.307.014	United States Navy and the Vietnam Conflict, The, Vol. 2 : From Military Assistance to Combat 1959 - 1965	Marolda, Edward J.	This second volume of the official history of the Vietnam War treats the period between 1959 and 1965, when the Navy's longstanding military assistance efforts to equip and train the South Vietnamese Navy began to be accomplished by unilateral operations in Southeast Asia on the part of U.S. naval forces. In addition to devoting attention to the war in the South and North Vietnam, this work details the Navy's actions in Laos, since developments in that country directly related to the defense of America's South Vietnamese allies.
2004.307.016	Postwar Naval Revolution, The	Friedman, Norman	The Author: A naval journal reviewing one of his books recently described Norman Friedman as 'fast establishing himself as America's leading naval writer' on the strength of his previous six major works. There are many who would agree, but would base this assessment on the quality rather than the number of his books, since he has a distinct talent for explaining complex technology to the layman, without trivializing or generalizing the issues. He is currently an independent defence analyst, specializing in the technical and strategic aspects of naval

Object ID	Title	Author	Summary
			policy; his work includes both an understanding of current technology and a profound appreciation of history and its application to the present. Apart from numerous articles and research papers, he has published three 'Design and Development' titles (on battleships, on modern surface warships, and on submarines), CARRIER AIR POWER, NAVAL RADAR, US NAVAL WEAPONS and a series of highly detailed monographs on American warships, of which US CRUISERS and US BATTLESHIPS are the most recent. All successfully combine history and technical analysis, and all have proved popular with layman and specialist alike. Cover Illustration: An artist's impression by Peter Hogan of the British 1953 Sin-armed Cruiser/Destroyer design. By courtesy of MOD Central Graphics Pool (Navy) (from dust jacket flap)
2004.307.017	Vietnam : The War in the Air	Francillon, René J.	Contains the history of the Vietnam air war from 1945 to 1975 with a focus on the 1960s-1975. Has information on the air forces of countries such as North Vietnam, South Vietnam, France, United States, Australia, and others. Also has sections on abbreviations, project and operation code names, aircraft losses by various causes, and aircraft types of the South East Asia Wars.
2004.307.018	Ironclaw : A Navy Carrier Pilot's War Experience	Baldwin, Sherman	The author is just out of flight school when he is assigned to Air Wing Five's EA-6B Prowler squadron on the USS Midway. As the pilot of an electronic warfare plane, capable of firing anti-radiation missiles (ARM), Baldwin takes the reader from the heaving flight deck of the USS Midway to the flak filled skies over Iraq. He uses call signs when referring to his

Object ID	Title	Author	Summary
			fellow pilots to maintain a sense of the reader is there too--in the night sky, in the ready room receiving the next mission assignment, and on the deck ready to launch or recover. The tension of combat is counterbalanced by the camaraderie of his squadron mates. Ironclaw refers to the Squadron's call sign. Former USS Midway crew member.
2004.307.020	Midway Magic : An Oral History of America's Legendary Aircraft Carrier	McGaugh, Scott	Throughout its 47-year career, the USS Midway sailed at the center of almost every international crisis and conflict in the latter half of the 20th century. Its crew set new standards of naval aviation. A captured German V-2 rocket was launched off the carrier in 1947, marking the dawn of naval missile warfare. Midway taught the Navy how to fly among the icebergs during sub-Arctic winter air operations off the coast of Greenland. Time and again, Midway rescued thousands of refugees on its humanitarian missions. During an odyssey that spanned the end of World War II, the Korean and Vietnam Wars, the Cold War, detente, and even Desert Storm, Midway answered every call, both military and peacekeeping. Based on more than 300 interviews with Midway sailors who served aboard America's longest serving carrier between 1945 and 1992, readers of Midway Magic join the crew, experiencing these historic accomplishments alongside the men who were there. --This text refers to an out of print or unavailable edition of this title. About the Author Scott McGaugh is a professional writer and graduate of Arizona State University. A former newspaper publisher in Durango, Colorado and accredited public relations professional, McGaugh has co-owned several leading San Diego public relations and advertising agencies. Since 1996, Scott McGaugh played

Object ID	Title	Author	Summary
			an active role in the campaign to bring the USS Midway to San Diego as a permanent museum. A San Diego native, McGaugh's writing has been published in more than 150 newspapers and magazines, and he is a highly sought speaker and university guest lecturer. MIDWAY MAGIC is the first of several books planned by Scott McGaugh. --This text refers to an out of print or unavailable edition of this title. (from Amazon.com)
2004.308.002	Warbirds of the Sea : A History of Aircraft Carriers & Carrier-Based Aircraft	Musciano, Walter A.	This book combines the history of shipborne aircraft with that of aircraft carriers in a narrative that covers every facet of shipboard naval aviation. Midway class carriers are discussed on pages 328-330. 404 and 473.
2004.308.003	American Steel Navy : A Photographic History of the U. S. Navy from the Introduction of the Steel Hull in 1883 to the Cruise of the Great White Fleet	Alden, John Doughty	This classic study tracks the development of the modern U.S. Navy from its first steel ships to its emergence as a mature fighting force known as the Great White Fleet. First published in 1972, the book continues to be in demand because of its outstanding photographic coverage of the ships and men of the early modern Navy and the author's thorough coverage of the Navy's transition from wood and sail to steel and steam. John D. Alden, a retired U.S. Navy commander and World War II veteran, has written five books and numerous articles for the U.S. Naval Institute. (from usni.org)
2004.308.004	U.S. Naval Aviation	Goodspeed, M. Hill (ed)	Review Anyone who turns the pages of this book will understand why those Navy Wings of Gold are held so sacred. -- Captain Eugene A. Cernan, U.S. Navy (Ret.), Astronaut, Apollo XVII Beautifully crafted prose and photographs . . . A wonderful visit for every American into the unique role that naval aviation has played. --

Object ID	Title	Author	Summary
			Senator John Glenn, Astronaut, Mercury 7, and Marine Corps aviator The authors . . . have captured the very essence of the Navy's magnificent air arm. A must-read for aviation enthusiasts and historians. -- MCPON-5 Billy C. Sanders, U.S. Navy (Ret.), Master Chief Petty Officer of the Navy The spirit of naval aviation is superbly captured in this absolutely wonderful coffee table book. My memories came flooding back! -- President George H.W. Bush --This text refers to an out of print or unavailable edition of this title.
2004.308.005	Aircraft Carriers	Green, Michael	Even for nonmilitary buffs, the power and massive lines of aircraft carriers inspire awe. Now readers can get a close-up look at these behemoths in this lavishly illustrated volume. It tells the story of the development of these immense vessels, describes their technological and military history, and profiles the carriers-and the planes that fly from them -that roam the oceans today. With more than 150 black-and-white and color pictures, including images of early prototypes, this is an invaluable reference. About the Author Michael and Gladys Green are freelance writers, researchers, and photographers who specialize in military, transportation, and law enforcement subjects, with over 50 books to their credit. Their previous works include Hummer, Tiger Tanks, SWAT Teams, Patton's Tank Drive, MacArthur in the Pacific, Motorcycle Police, Bomb Squads, and Jaguar Sports Cars. In addition, Michael Green has written numerous articles for a wide variety of military-related national and international magazines. They live in the

Object ID	Title	Author	Summary
			San Francisco Bay Area. ----- Great Pictures, Inaccurate History, April 15, 2005 Reviewer: Steve Allen (Taylorsville, UT United States) This book has a lot of great pictures, but there is no excuse for sloppy errors like this one: On p22, it states the USS Lexington (CV2) underwent an extensive upgrade in 1943-1944. On p23, it correctly states that CV2 went down in the Battle of the Coral Sea in 1942. They later correctly state that the Essex class carrier scheduled to be named Cabot was renamed Lexington (CV16), commissioned in 1943. The writer must have seen a picture of CV16 from 1944, seen that it looked different than CV2 and written that it was upgraded. Bad job. Go ahead and get the book if you want the pictures, but find another title as a companion to get accurate history.

2004.308.006	Secret Aircraft Designs of the Third Reich	Myhra, David	(from schifferbooks.com:) In Secret Aircraft Designs of the Third Reich aircraft biographer David Myhra gives the reader much more than pictures of proposed German aircraft projects, although this work is richly illustrated by state-of-the-art digital images by Mario Merino. The total number of German projects is in excess of 400. Blohm und Voss tops the list with over 200 project designs. The reader is introduced to the men behind these proposed aircraft. One will discover Wolderman Voight's frustration with his Me P.1101 and why it simply would not jell. The reader will learn why Dr. Gthert of Gotha lobbied the RLM to take his Go P.60 designs and scrap the Horten Ho 229. We see why critics of design genius

Object ID	Title	Author	Summary
			Alexander Lippisch said that he was a man who had a new design almost every day but fails to put most of them into the air. Myhra describes the shameful handling of Hugo Junkers, the father of German aviation, by the Gestapo. It was Junkers who said that "ideas for advanced aircraft projects were about as cheap as blueberries. To an idea must be added materials, resources, and time." And time in all the secret projects was short, very short. Although over 400 aircraft projects were on the drawing board when the war in Europe ended in May 1945, only a handful were in the prototype stage. This outstanding book also offers a superb collection of photographs of scale models from contributors throughout the world, and digital images by Mario Merino and Andreas Ott that offer a one-of-a-kind look at secret German designs.
2004.308.009	Navy Medicine's Trial by Fire : December 7th, 1941	United States. Navy.	How medical personnel lived through the attack on Pearl Harbor, and how Navy medicine dealt with the casualties on that day "which will live in infamy." Jan Herman also oversaw six videos in a series "Navy Medicine at War" about naval medicine during World War II: 1) Navy Medicine's Trial by Fire : December 7th, 1941, 2) Navy Medicine at Normandy: D-Day: June 6, 1944, 3) Guests of the Emperor, 4) Battle Station Sick Bay, 5) Stepping Stones to Tokyo, and 6) Final Victory. 2004.310.001	Storm over Iraq : Air Power and the Gulf War	Hallion, Richard P.	Although it had its share of land and sea engagements, the Persian Gulf War of 1990-91 was preeminently an aerial conflict, one in which the Allied forces were able to put into practice an evolving theory of warcraft that favored the destruction of things over people and the control rather than the conquest of an enemy power. From a technological standpoint, writes U.S. Air Force historian Richard Hallion, the Allied forces were inordinately successful. He traces the history of air-combat techniques employed in battle over Iraq, analyzes the weaponry used (including the remarkable F117A stealth fighter), and points out the shortcomings in the Allies' performance, notably in combat search and rescue. From Publishers Weekly Hallion, a former professor at the Army War College, argues persuasively that the Gulf war confirmed a major transformation in the nature of combat: the dominance of air power. Tracing the history of air power through its effective application in WW II and its misuse in Vietnam, he discusses the development of superfighters and air-to-air missiles in the post-Vietnam decade, analyzes the impact of the Army's AirLand Battle doctrine, then explains why the Air Force's 1990 white paper Global Reach-Global Power provoked an intense debate between air-power modernists and seapower traditionalists. Finally, he describes the

Object ID	Title	Author	Summary
			whirlwind of destruction sent forth by U.S. air contingents during Desert Storm, leaving no doubt that on those rare occasions when American ground forces made contact with the Iraqi army, the U.S. weapon was almost invariably an air weapon: plane, helicopter or missile. Groundforce traditionalists and advocates of naval power-projection will take issue with Hallion's work, but he demonstrates authoritatively that air power was the decisive factor in the Gulf war. Illustrated. Copyright 1992 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. (from Amazon.com)
2004.310.002	At War in the Gulf: A Chronology	Blair, Arthur H.	Review "Colonel Art Blair has written a fascinating chronology covering the Iraqi invasion of Kuwait, Desert Shield, Desert Storm and the Coalition victory. At War in the Gulf is immensely interesting and will serve as the seminal piece for those who seek an accurate, balanced view of this important, historical event. I strongly recommend it as `must reading" for serious students of foreign affairs and defense issues."--Lt. Gen. Lloyd R. Leavitt, USAF (Ret.) (Lt. Gen. Lloyd R. Leavitt, USAF (Ret.)) About the Author Arthur H. Blair, Colonel United States Army (Ret), graduated from the U.S. Military Academy before beginning his career in the service. He earned masters degrees in civil engineering from the California Institute of Technology and literature from the University of Pennsylvania and the Ph.D. in British and American literature from the University of North Carolina at Chapel Hill. He has taught at Texas A&M University, the Citadel and the U.S. Military Academy. (from Amazon.com)

Object ID	Title	Author	Summary
2004.310.003	Shield and Sword : The United States Navy and the Persian Gulf War	Marolda, Edward J.	Though not so well known as the land and air campaigns, the campaign at sea in the 1991 Gulf War was vital in subduing Saddam Hussein's invasion forces and driving them out of Kuwait. U.S. Navy surface ships and submarines launched hundreds of cruise missile attacks against Iraqi targets throughout the war, and carriers sent air strikes deep into enemy territory. The battleships Missouri and Wisconsin bombarded hostile targets while U.S. sailors joined U.S. Army and Royal Navy helicopter crews in additional actions. SEAL missions, global sealift actions, mine countermeasures, and operations in support of the economic embargo were still more contributing factors to the complex joint warfare effort. Details of these naval operations are thoroughly documented and analyzed in this authoritative study, conducted by the Naval Historical Center and published in limited numbers in 1999. It is based on previously classified action and lessons-learned reports, interviews with participants, and studies conducted by the Center for Naval Analyses and the Department of Defense. The book includes candid evaluations of leadership effectiveness, interservice relations, and methods of command and control. It also analyses the effectiveness of various weapons and sensors, including the Tomahawk land-attack missile, the EA-6B Prowler electronic warfare aircraft, the Aegis battle management system, and unmanned aerial vehicles. Winner of the Navy League's Theodore and Franklin D. Roosevelt Naval History Prize and favorably reviewed by military scholars and foreign affairs journals, this credible historical account captures the drama as well as the detail of a modern victory at sea. Edward J. Marolda is the

Object ID	Title	Author	Summary
			senior historian and chief of the Histories and Archives Division at the Naval Historical Center in Washington, DC. He is also the coauthor of The U.S. Navy in the Korean War. (from usni.org:)
2004.310.004	Fury of Desert Storm: The Air Campaign, The	Kinzey, Bert	The tools of war used by allied aircraft in the 1991 attack on Iraq. During the air campaign of Operation Desert Storm, the only thing more incessant than the bombing was the technically inaccurate reporting by the news media. This unfortunate dissemination of erroneous information led to misconceptions about what was happening in the most unique chapter in the history of aerial combat. Here, for the first time, is an accurate, close-up, and detailed look at the high-tech warfare played out in the skies over Iraq and Kuwait. Using terminology anyone can understand, aviation writer Bert Kinzey explains the concepts and strategies that were used to plan and execute the most successful air campaign in history. Kinzey provides a wealth of information, including: + How the air campaign was actually planned and carried out + All of the major types of aircraft used by the U. S. Air Force, Navy, Marines, and Army + Aircraft armament, with a detailed look at the missiles and precision-guided munitions or "smart bombs" that were used with such effectiveness + The Tomahawk, or TLAM cruise missile + Each of the eight aircraft carriers that participated in Operation Desert Shield and Desert Storm + The tactics used to find and destroy the Scud missiles + The air-to-air victories by the coalition aircraft (including a complete list of confirmed kills) + Why the Iraqi Air Force "ran for the border" instead of

Object ID	Title	Author	Summary
			posing a threat to coalition forces + Why the news media made so many technical mistakes while trying to report on the war effort + The real reason why the B-1 bomber and other combat aircraft were not used in Operation Desert Storm "The Fury of Desert Storm: The Air Campaign" also contains scores of photographs taken in the Persian Gulf area during the hostilities. Most of these have never been published before. Lists, charts, and appendices provide data about every aspect of the air war that defeated Iraq's military, and an informative narrative explains the tactical, operational, and technical facets of the air campaign. About the Author Bert Kinzey, director of TAB's Detail & Scale and Colors & Markings Series, is an award-winning author and photographer and licensed pilot. Commissioned as a second lieutenant in the U.S. Army in 1968, Kinzey served for eight years as an officer, during which he commanded a Hawk guided missile battery in Korea and later taught classes in air power, the Soviet air threat, and air defense suppression at the Army's Air Defense School at Fort Bliss, Texas. In 1976, he resigned to take a job as a civilian with the Department of the Army, where he served for four years as a subject matter expert in military air power and was responsible for the development of the Army's new program on aircraft identification, the first such program in the world to feature dynamic simulation. 2004.310.007	Cold War : An Illustrated History, 1945 - 1991	Isaacs, Jeremy	mothballed Navy ships. Amazon.com Review Beautifully designed and illustrated with hundreds of photographs, this companion volume to the CNN documentary series begins with the roots of the cold war: the military intervention by six nations (including the United States) in the Bolshevik's 1917 Russian Revolution. The book then takes on the cold war proper, from the post-WWII rise of the Iron Curtain to the collapse of the Berlin Wall and the Soviet government in the early '90s. "For forty-five years," the authors write, "the peoples of the world held their breath," through missile crises, policies of "mutual assured destruction," the Vietnam War, and the uneasy steps toward détente and full peace highlighted by Richard Nixon's meetings with Brezhnev and by Mikhail Gorbachev's meetings with Ronald Reagan and George Bush. Special sections highlight the role of spies in the cold war, as well as the films and literature of the era. This is a copiously detailed account of the major historical force of the latter half of the 20th century that would make an excellent reference book for any household. --This text refers to an out of print or unavailable edition of this title. From Booklist Libraries that see heavy demand for tie-in volumes when PBS and BBC historical documentaries hit the air should expect interest in this lavishly illustrated history of the cold war, which accompanies a 24-episode series that CNN will broadcast this fall. The British producers are credited as the book's authors; they acknowledge the aid of "an international panel of distinguished historians." The text incorporates some recent scholarship based on newly available Soviet and U.S. documents; it opens with a description of the U.S.S.R.'s

Object ID	Title	Author	Summary
			history from 1917 to 1945, then traces the sources and consequences of East-West confrontation from the late 1940s through the fall of the Berlin Wall. The hundreds of photos and other illustrations will bring back vivid memories for those who lived through those decades, but the volume may be most valuable for readers too young to remember armed struggles in Berlin, Korea, Cuba, and Vietnam or catchphrases like Iron Curtain, de tente, and mutually assured destruction. Mary Carroll --This text refers to an out of print or unavailable edition of this title. (from Amazon.com)
2004.310.010	Cold War : A History, The	Walker, Martin	From Publishers Weekly Walker, Washington bureau chief for Britain's Guardian , here traces the course of the Cold War from Yalta in 1945 through the Korean War, the Kennedy-Khrushchev confrontations, Vietnam, the "New Cold War" during the Reagan administration, the advent of glasnost and perestroika under Gorbachev and the "year of miracles" (1989) which brought down the Berlin Wall. The author is concerned with demonstrating, first, that the superpowers found limited responses to crises (the Berlin blockade and airlift didn't grow into a direct military confrontation; the Korean War didn't spread throughout Asia) and, second, how the stability resulting from the Cold War balance of power set the stage for a new international economic system. This cogent reevaluation of the Cold War as a form of economic competition argues that its end marked a shift away from the geo-strategic toward the geo-economic and an accelerated expansion of world trade. Copyright 1994 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. From Library Journal

Object ID	Title	Author	Summary
			With the Cold War over, a spate of books are beginning to appear trying to explain what it all meant. Like Edward Pessen's recent <i>Losing Our Souls: The American Experience in the Cold War</i> or H.W. Brands's <i>The Devil We Knew: Americans and the Cold War</i> (both LJ 11/1/93), Walker, U.S. bureau chief for London's the Guardian, goes over familiar ground, treading the same turf diplomatic historians have charted for the past 20 years. For an experienced journalist, Walker's prose is restrained and sometimes tedious. His most interesting point is his comparison of the last years of Brezhnev's rule with that of George Bush's presidency, arguing that both administrations dealt feebly with domestic issues, much to the detriment of their respective populations. For Walker, America's challenge will be how it can best fight the new war for control of the global economy. For general collections and for those emphasizing contemporary history and politics. We Now Know: Rethinking Cold War History Gaddis, John Lewis

Amazon.com Review
Was the Cold War inevitable? Was there an international communist conspiracy? Did Castro and Khrushchev beat Kennedy in the Cuban missile crisis? After combing through a mass of declassified and previously unavailable documentation to reconsider the collision of the American and Soviet empires, Yale professor Gaddis replies in the affirmative. Given Josef Stalin's convictions, the Cold War was inescapable: it is the choices that each side made that prove fruitful for historical research, and not the mere fact of the

Object ID	Title	Author	Summary
			war, as Gaddis neatly demonstrates. The American empire--Gaddis's term--prevailed because, he says, "democracy proved superior to autocracy in maintaining coalitions," and not necessarily because of any technological or economic advantage. Gaddis dispels several misconceptions and urges that students of Cold War history should foremost "retain the capacity to be surprised." --This text refers to an out of print or unavailable edition of this title. From Booklist "We" refers to "historians" of the cold war, and Gaddis has been one of the most notable. In this work, he synthesizes the recent scholarship growing out of the partial opening of Soviet archives relating to the cold war, up through the 1962 Cuban missile crisis. Gaddis' nuanced summary clarifies the hitherto knottiest problems of interpretation: divining Stalin's motives in communizing Eastern Europe; his role in starting the Korean War; and Khrushchev's bombastic gyrations of policy. To explain the origin of it all, Gaddis resurrects two indispensable factors: Stalin's suspicious, tyrannical personality and the Leninist ideology. Whatever the Americans did to make the cold war happen, Gaddis argues that the Soviet dictator's aims (and mistakes in pursuing them) virtually guaranteed a face-off. Nuclear weapons just ensured that the rigidity would endure until the fundamental of Stalinist rule, coercion, was repudiated. A magisterial overview that clarifies all issues of the cold war's origins. Gilbert Taylor -- This text refers to an out of print or unavailable edition of this title. (from Amazon.com)
2004.310.012	K-19 : the Widowmaker : The Secret Story of the Soviet Nuclear Submarine	Huchthausen, Peter	From Publishers Weekly A companion to the feature film of the same name, K-19: The Widowmaker tells the hair-raising story of the Soviet

Object ID	Title	Author	Summary
			submarine that nearly caused a nuclear meltdown in 1961. The sub developed a leak as it was heading toward the North Atlantic, and only the ingenious efforts of the crew eight of whom died within days from radiation poisoning staved off a global disaster. Author Peter Huchthausen, a retired U.S. Navy captain and former naval attach, in Moscow (as well as a technical adviser on the film), recounts the fateful events and also describes the making of the film. Copyright 2002 Cahners Business Information, Inc. -- This text refers to an alternate Paperback edition. From Booklist This book recaps the near-meltdown of a nuclear reactor in 1961 aboard the first Soviet ballistic missile boat, the K-19. The captain, Nikolai Zateyev, wrote a memoir of his career, which is extensively excerpted here and gives a glimpse into the Soviet nuclear navy and the shoddily constructed ships that Zateyev was given to command; a defective seal nearly sank the K-19 on a shakedown cruise. Worse was to come, with sufficient radioactive drama to inspire a forthcoming film (with the same title) starring Zateyev look-alike Harrison Ford. After the accident was contained by the certain-death heroics of men who repaired the reactor, Zateyev found the culprit in the near cataclysm: incompetent welding. Not that the knowledge improved safety: author Huchthausen, a retired U.S. Navy expert on submarines, embeds Zateyev's tale of woe within the context of a series of submarine accidents culminating in the Kursk sinking of 2000. A likely lure for maritime mavens. Gilbert Taylor Copyright © American Library Association. All rights reserved --This text refers to an alternate Paperback edition. (from Amazon.com)

2004.310.013	U.S. Marine Corps Aviation : 1912 to the Present	Mersky, Peter B.	In this first history of Marine Corps aviation, the author tells about the pilots who carried on the Marine Corps tradition of "first to fight" from Henderson Field on Guadalcanal, the Chosin Reservoir in Korea, and the ships in the Persian Gulf. Aircraft of the Marine Corps are illustrated in this story, from the very earliest days to the present, with more than 270 rarely seen photographs and the author's own drawings.
2004.310.014	Military Justice Under the Uniform Code	Snedeker, James	This book is broken down into two parts: Background of US Military Justice and Military Justice under Uniform code.
2004.310.015	Target is Destroyed:' What Really Happened to Flight 007 and What America Knew About It, "The"	Hersh, Seymour M.	From Library Journal The Soviet destruction in September 1983 of 269 people aboard Korean Air Lines Flight 007 was one of the most upsetting crises of the Cold War era. The U.S. and Soviet regimes immediately blamed one another for the disaster; but, as Hersh powerfully argues, responsibility went far beyond ordinary governmental decision making and into the murky sphere of superpower intelligence calculations and confusion. He asserts that the catastrophe followed more from Soviet ignorance than viciousness, and that the whole episode demonstrates how the superpowers are more interested in gaining political advantage than the truest understanding of events. Hersh cannot provide a final recounting of this complex crisis. But he does show how one critical thinker can provide a more believable reconstruction of events than can any self-interested governmental regime. 2004.310.016	Wild Blue : The Men and Boys Who Flew the B-24s Over	Ambrose, Stephen E.	The very young men who flew the B-24's over Germany in

Object ID	Title	Author	Summary
	Germany, The		World War II against terrible odds were yet another exceptional band of brothers, and in <i>The Wild Blue</i> , the author recounts their extraordinary brand of heroism, skill, daring, and comradeship with the same vivid detail and affection. The author describes how the Army Air Forces recruited, trained, and then chose those few who would undertake the most demanding and dangerous jobs in the war. These are the boys--turned pilots, bombardiers, navigators, and gunners of the B-24s--who suffered over 50 percent casualties.
2004.310.017	Japan's Secret War	Wilcox, Robert K.	From Library Journal Though the United States's use of atomic weapons against Japan has been the subject of much recent debate, Wilcox here contends that the Japanese had successfully assembled and tested its own nuclear device in August 1945 for use in the war. This updated edition includes new information that claims the Japanese spent much more on its atomic program than originally thought. This remains "a story of moral and historical significance" (LJ 3/1/85). Copyright 1995 Reed Business Information, Inc. (from Amazon.com)
2004.310.019	German Secret Weapons of the Second World War: The Missiles, Rockets, Weapons and New Technology of the Third Reich	Hogg, Ian V.	The phrase "German secret weapons" immediately conjures up images of the V-1 and V-2 missiles that bombarded London in 1944. But what of the V-3 and V-4? What of Schmetterling, the Rochling shell, the Kurt bomb, and the Hs293? These, and many other devices, were all part of the German secret armory but are relatively unknown, except to a handful of specialists. The sheer magnitude of the secret weapon projects of the Third Reich is revealed in this comprehensive study, written by one of the world's great experts on weaponry, which captures both the reality behind the weapons actually produced and the intentions behind projects

Object ID	Title	Author	Summary
			still in their infancy when the war ended. Comparisons with Allied projects are also drawn. About the Author Ian V. Hogg is a respected authority on all aspects of weaponry and is the author of numerous books, including "German Artillery of World War II" (185367480X) and "The World's Sniping Rifles" (1853673080). 			heavily-armed fighters could pack armament including six wing-mounted .50 caliber machine guns, 20mm cannons, wing-mounted rockets and a bomb rack. Later, remote-controlled versions of the aircraft were used to test atomic bomb blasts and as flying bombs. This book takes a detailed look at the F6F Hellcat. (from squadronsignalpublications.com)
2004.311.001	F-4 Phantom : Guardian of the Free World	Shaw, Robbie	(from the Introduction:) Beauty is in the eye of the beholder, so the saying goes. It's ugly — yet beautiful! I am sure I am speaking for a multitude of people when I describe the McDonnell-Douglas F-4 Phantom as just that. The Phantom II, to give it its correct company designation, was developed as a long range all-weather fighter for the US Navy, and first flew as long ago as 27 May 1958. First deliveries of the F-4A were to the Naval Air Test Center (NATC) at Patuxent River, who conducted carrier suitability trials aboard the USS Independence in February 1960. The first batch of production aircraft for squadron service, designated F-4B, were delivered to Miramar for VF-121, the US Navy training squadron for the Phantom units operating with the Pacific Fleet. VF-101 at Oceana quickly followed suit for the Atlantic Fleet. In 1961 the first operational tours at sea were carried out by VF-74 on the USS Saratoga and VF-114 on the USS Kittyhawk. The following year the US Marine Corps formed their first Phantom squadron, VMFA-314, at El Toro, soon to be followed by VMFA-531 at Beaufort on the East coast.
2004.311.002	Vought A-7 Corsair II	Dorr, Robert F.	This is the first major work to be devoted to Vought's hard-hitting A-7 Corsair II attack jet. Despite an enviable combat

Object ID	Title	Author	Summary
			record in Vietnam, the ultimate accolade of being selected by the US Navy and the Air Force, the subsonic A-7 has somehow been side-stepped by writers and publishers. Author Robert Dorr has written a penetrating, absorbing, and highly detailed 200 page record of the SLUF's story, a career highlighted by the airplane's involvement in Vietnam, the Iranian hostage crisis, the invasion of Grenada, and yet more combat in Lebanon. The text also includes a revealing account of the genesis and scope of the Corsair programme, a full description of every variant (including rebuilds and conversions), and the Corsair in service with Navy, Air Force, and Air National Guard squadrons. Illustrated with over 160 BW photographs and 12 photographs in full colour. The text contains approximately 50,000 words; a glossary, comprehensive appendices and an index are included.

			military aircraft. From the Publisher Sunbelt publishes books about adventures in the natural history and cultural heritage of the Californias; we see Warbird Watcher's Guide to the Southern California Skies as an extension of this publishing mission. Styled like a field guide to bird identification—features in common include identification markings and physical specifications—this guidebook is a tool to understanding the vital role of military aviation in our region. Information on the history and capabilities of each aircraft evokes the adventure and thrill of hearing the rumble of classic warbirds, the roar of modern jets, and the nightly news reports of squadrons that are fighting along distant frontiers of freedom. As a Vietnam-era Naval aviator, I jumped at the opportunity to publish Warbird Watcher's Guide. Over the course of its production, the book was a catalyst to my recalling many grand memories of younger days: seeing waves of P-51 Mustangs returning from training flights, serving with high school buddies in the USAF Ground Observer Corps; air control duty aboard John S. McCain; T-28 carrier qualification aboard the old Lexington; flying search and rescue missions from our home ship Hornet; serving with hello detachments aboard ships with historic names like Kitty Hawk, Constellation, Oriskany, Forrestal, and Enterprise. The warbirds selected for this field guide are those which may currently be seen in the skies of southern California. As with their natural counterparts, some are solitary and rarely spotted, while others may fly in flocks and be commonly seen. Each has been or is a significant player in the stirring adventure story of the military forces who are dedicated to the defense

Object ID	Title	Author	Summary
			of our land and way of life. We hope that Warbird Watcher's Guide will help you, the reader, to gain the knowledge that will enable you to participate in this adventure with more understanding and enjoyment. --Lowell Lindsay, Publisher (from Amazon.com)
2004.312.002	San Diego Specters : Ghosts, Poltergeists, and Phantasmic Tales	Lamb, John J.	Only the most authentic and plausible ghostly tales are included in this entertaining investigation into famous and obscure haunted sites throughout San Diego County. Included are fresh witness accounts combined with genuine historical research about some celebrated haunted places. Applying his street cop's pragmatism to the stories, the author also debunks ghost stories that do not pass investigative muster. USS Bennington referenced on page 153, USS Cyane referenced on page 153, USMC referenced on pages 2 & 102, USN referenced on pages 96 & 154
2004.312.003	San Diego Legends	Innis, Jack Scheffler	Review "Innis has done the near-impossible, turning local history into a can't-put-it-down epic...proof there's more to San Diego than Zoo." -- Peter Rowe, San Diego Union-Tribune, July, 2004 ...remarkable tales—furthering understanding of how this region was developed and settled...a book you'll want to have and share." -- The San Diego Log, July, 2004 Product Description This book brings together for the first time the many extraordinary accounts of famous and infamous people, places, and events in San Diego's past. From Father Junípero Serra and Pedro Fages, to modern stars of stage and screen, you'll meet the pioneers, plunderers and performers who once called this city home. Many people and events have "made headlines" in the San Diego papers—

Object ID	Title	Author	Summary
			from the rise and fall of C. Arnholt Smith to the Heaven's Gate suicides—and this book reveals the stories behind the news stories. There are fascinating historic tidbits, including a "nudist invasion" that wreaked havoc at the 1935 California-Pacific Exposition, the 1852 murder of the city's first mayor, and a dramatic shootout at Campo's Gaskill Store. Tales from all over the county are here, from the San Pasqual Battlefield to downtown's former Harlem of the West to the would-be route of the "Impossible Railroad." The author also brings together for the first time a dozen tales from local Indian tribes—including an ancient Kumeyaay creation legend! (from Amazon.com) Pages 141-144 discusses the Imperial Beach Submarine.
2004.313.001	Hitler's Naval War	Bekker, Cajus	A saga of incredible victories and equally amazing failures, of brave men and gallant ships on both sides--of the last great sea war in all it horror and glory.
2004.313.002	World's Fighting Planes, The	Green, William	INTRODUCTION: Technological development in military aviation is today advancing at a pace infinitely greater than that precipitated by the Second World War, an impetus initially given by international tensions and, of late, accelerated in the West by evidence that Russia is fast overhauling the technological lead for so long held by the Western nations. This critical phase in military aviation, when the Soviet Union is nearing technical parity with the U.S.A. and other Western aircraft-manufacturing countries, has resulted in profound disquiet in view of Russia's known quantitative superiority, serving to increase the tempo of warplane development and calling for a reassessment of the abilities of combat aircraft only lately placed in service with the Western air forces.

Object ID	Title	Author	Summary
			These factors have played important roles in changing the military aviation picture in the two years that have elapsed since the first edition of The WOrld's Fighting Planes was compiled. A multitude of new combat aircraft have made their début in prototype form, been placed in production and, in some cases, entered service. Others have been extensively developed to improve their performances or adapted to fulfill a variety of new roles, and the need for an up-to-date reference manual, describing and illustrating all these significant developments but not neglecting the more elderly warplanes that still give staunch service, has led to the preparation of this entirely revised edition. Not unnaturally, pride of place is given to the first-line combat aircraft and new prototypes which illustrate the changing operational fashions and indicate the shape of the machines which will be standing at squadron dispersal points a half-decade hence. At first sight the title of this book, The World's Fighting Planes, may appear misleading, for within its pages are to be found training and transport aircraft and helicopters which strictly speaking are not "fighting" planes. However, in an emergency, improvisation and adaptation may transform the most inoffensive little liaison monoplane into a missile-launching tank-buster. Not so many years ago North American Texan basic trainers were rendering invaluable service in Korea as light attack and spotter aircraft, while, as these words are written, Morane-Saulnier Alcyon and S.I.P.A. S.12 trainers, with rocket rails and bomb shackles underwing, are attacking Fellagha strongpoints in Algeria. The following pages indicate several new trends such as the lightweight fighter-bomber, and the first of this coming

Object ID	Title	Author	Summary
			generation are typified by the Fiat G.91, the Folland Gnat, and Dassault's Etendard and Mirage. A reawakening of interest in mixed-power interceptors, combining both turbojet and rocket, can be seen in Sud-Est Aviation's Durandal and, competing for French Defence Ministry orders, the SO-9050 Trident II. The increasing emphasis being placed on all-weather capabilities in fighters is indicated by the recent transformation of the Douglas F4D-1 Skyray day interceptor into the F5D-1 Skylancer all-weather fighter, but the long-prophesied replacement of cannon armament by all-missile armament has yet to transpire, few of the latest generation of fighters relying solely on air-to-air missiles to bring down their opponents. In fact, the gun may well take on a new lease of life with the development of the multi-barrel 20-mm. T-171 and 30-mm. T-212 "Gatling" type cannon by General Electric. In the bomber field, the mammoth Boeing Stratofortress and the Ilyushin and Tupolev heavy bombers almost certainly indicate that the upper limit in bomber sizes has at last been reached. The latter type, dubbed Bear by the West, appears to approach very closely to that old bomber designer's pipe dream of combining extreme range and loading-carrying ability with high performance. Security restrictions prevailing at the time of closing for press have prevented the inclusion of the Republic F-105B Thunderchief fighter-bomber, the prototype of which has been flying since October 22, 1955, and the external appearances of several Russian warplanes, such as Beriev's BE-6 long-range maritime reconnaissance flying boat (code-named "Madge" in the West), the turboprop-driven anti-submarine aircraft, the twin-jet close-support aircraft and transonic light bomber (the latter code-named

Object ID	Title	Author	Summary
			Blowlamp), seen by Western delegates to Russia who visited the Kubinko fighter base in June, are still so uncertain as to preclude their inclusion in this volume. Each of twenty-one countries' nationally-produced military aircraft are dealt with in turn and in the alphabetical order of their manufacturers' names. The sole exception to this rule is the U.S.S.R. whose aircraft are listed in the alphabetical order of the code-names applied to them by the Western forces. In the case of an aircraft that has been licence—built by a particular country and which serves with its air force yet is no longer used by the country in which it originated (e.g., the He 111H-16 of German origin has been built under licence in Spain as the C.A.S.A. 2.111-D) it appears among the aircraft of the country by most recently manufactured. But in the case of an aircraft that has been licence-built in more than one country since it ceased to be produced in the country of its origin (e.g., the Fieseler Fi 156C Storch which has been built in France as the Morane-Saulnier M.S.500 Criquet and in Czechoslovakia as the Mraz Cap) it is included among the aircraft of the country by whom it was initially produced. We wish to stress that no information contained in "The World's Fighting Planes" relating to British combat aircraft currently included on the official "Initial" and "Part Publication" Lists, other than that made publicly available, has been obtained from official sources. All approximate performance figures quoted for such aircraft should be considered as estimates for the general guidance of readers and representing personal research and assessment based on publishable facts and reasonable conjecture. London, October 1956

2004.313.004	Yesterday's San Diego	Morgan, Neil Bowen	A pictorial history of San Diego from the time that Juan Rodriguez Cabrillo sailed into the area in 1542 through the 1950s. Included are a few of the developments of the U.S. Navy in San Diego.
2004.313.007	Wings at the Ready : 75 Years of the Naval Air Reserve	Shipman, Richard	A tribute to the men and women of the U.S. Naval Air Reserve, this handsome volume commemorates the organization's proud 75-year history of dedicated service to the nation. Written by a naval reserve aviator and filled with 300 top-quality photographs--60 in color--it is the only book to focus solely on the critical air component of the reserves.
2004.313.010	Combat Fleets of the World - 1980/81 : Their Ships, Aircraft, and Armament	Labayle Couhat, Jean (ed)	Internationally acknowledged as the best one-volume reference to the world's naval and paranaul forces, this popular Naval Institute guide is both comprehensive and affordable. Updated biennially since 1976, it has come to be relied on for all-inclusive, accurate, and up-to-date data on the ships, navies, coast guards, and naval aviation arms of more than 180 countries and territories. Large fleets and small maritime forces get equally thorough treatment as evidenced in this new edition, which highlights major and even minor developments that could have an impact on the world scene. A thorough indexing of material and a logical ship-typing system make the book easy to use and allow for quick comparisons between fleets. The guide continues to present timely, authoritative information supported by more than four thousand illustrations from correspondents throughout the world. From giant aircraft carriers and ballistic missile submarines to tugboats and launches, the characteristics and capabilities of ships large and small are reliably recorded. Complete descriptions of naval aircraft, weapons, weapon systems, and sensors are also provided along with useful

Object ID	Title	Author	Summary
2004.313.013	Command at Sea	Mack, William P.	commentary on organization, personnel strengths, and bases. (from usni.org:) (for 5th edition:) Long considered the bible of commanding officers at sea, this classic guide covers virtually every subject of relevance to the command of a U.S. Navy ship. The first revision in fifteen years, the fifth edition represents a major update in material--from assuming command and relations with the crew to fleet operations and combat. Among the issues addressed are the many aspects of seagoing command practice and maritime operations that have changed as a result of lessons learned from operations in the Persian Gulf, Bosnia, and Haiti. Changes in the Unified Command Plan are indicated by shifts in the commanding officer's chain of command and geographic and functional responsibilities of the CINCs. This new edition also reflects the current emphasis on joint and combined operations and its resulting impact on command operations. Additionally, the book covers the dramatic downsizing of the fleet, the inclusion of women on warships, and the significant changes that have occurred in maintenance support and practices, forward deployed support, and afloat logistics. The domination of automatic data processing on daily routines is discussed along with important changes in communications. A large selection of new photographs and many useful appendixes are included in this revision. No officer either presently in command or contemplating a future shipboard command assignment can afford to be without such an informative, up-to-date guide.

2004.313.020	Ships of the United States Navy and Their Sponsors, 1924-1950	Somerville, Keith Frazier	PREFACE: VOLUME III of "Ships of the United States Navy and Their Sponsors" contains a listing of over 4,000 combatant ships and their sponsors. It covers a period of twenty-seven years of unprecedented shipbuilding — the greatest in world history — prior to, during, and since World War II. Between July 1, 1940, and August 31, 1945, a total of 1,209 principal combatant ships were completed, including battleships; carriers, cruisers, destroyers, and submarines. In the same period almost 90,000 other vessels and landing craft were built or acquired, including about 4,157 landing ships, about 800 mine-warfare vessels, and about 1,700 patrol vessels, in addition to auxiliaries and landing craft of various types. This volume deals only with combatant ships. Auxiliary* ships, which of course are of vital importance to the fleets, are not included for the reason that only Sponsors of fighting ships are eligible for membership in the "Society of Sponsors of the United States Navy." Even some combatant ships are omitted, they having no known sponsors or having been "acquired"; that is, bought, and not built primarily for our Navy. Data for biographical sketches of men for whom ships have been named were compiled from transcripts of their service records supplied from the files of the Bureau of Naval Personnel. With admirals and the like, the transcripts ran from two to five pages; with those heroic youngsters who gave their lives in World War II, there was little to go on save

Object ID	Title	Author	Summary
			their citations. In no cases are the biographical sketches intended to be full life stories of achievements or services. Owing to the great number of biographies recorded it has been necessary to make them brief. The mere fact that persons were considered brave enough, or important enough, to have had ships in the United States Navy named for them, is proof positive that they deserve pages of mention as well as the deep appreciation of their country, for whom, in so many cases, they gave their lives. * A few auxiliary ships are included in this book, as their Sponsors became members of the Society before a definite ruling was made on this question.
2004.313.021	Beans, Bullets, and Black Oil	Carter, Worrall Reed	Text covers the logistic services supplied to US naval forces in the operating areas in the Pacific, 1941-1945. It is largely an account of services rendered by means of floating facilities and of the support of the fleet into the far reaches of the Pacific in its campaign against the Japanese.

2004.313.033	Heavy Weather Guide	Harding, Edwin T.	"Sailors have always respected the power of the ocean especially in heavy seas. Although Navy ships are made to withstand a certain degree of bad weather, they are not indestructible. Weather-related incidents have caused massive destruction and loss of life all throughout recorded history. The Navy's experience with weather-related incidents is as old as the service itself. Probably the first ship lost to weather was Continental sloop Saratoga off the Bahamas with all her crew on 18 March 1781. Although most associate bad weather with open seas, it can strike anywhere. From 1810-1813, the Navy lost three gunboats in the Chesapeake Bay and a schooner in Lake Ontario. Once ships began to sail on the open seas more frequently, storms became especially dangerous. Sailors would not know a storm was upon them until it appeared on the horizon, and by then it was often too late. In September 1854, brig Porpoise was lost with at least 62 Sailors somewhere between Formosa and China due to a typhoon. During a powerful storm on 15-16 March 1889 in Apia, Samoa, the Navy lost three ships Trenton, Vandalia, and Nipsic by huge destructive waves called tsunamis. On 29 August 1916, armored cruiser Memphis was hit by a series of

Object ID	Title	Author	Summary
			reportedly 75 feet high tidal waves in the harbor of Santo Domingo, Dominican Republic, which wrecked the ship and killed 43 Sailors. "

2004.313.044	Naval Institute Guide to World Naval Weapons Systems, The - 1994 Update	Friedman, Norman	(for 5th/2006 edition:) Long recognized as the most comprehensive reference work available on the subject, this guide remains the only complete reference to the weapons currently in service in ships, submarines, and naval aircraft around the world. It is the only book of its type to explain the transformation of the U.S. Navy into a network-centric force, a transformation that has had immense

Object ID	Title	Author	Summary
			consequences for choices of tactics, weapons, services, and the systems coordinating them. This guide also offers unparalleled coverage of the weapons, sensors, and command systems of the world's navies, both those the U.S. Navy works with and those it may have to fight. Written by one of the world's leading naval analysts, the book describes the weapons and systems in detail and examines the crucial relationship between them. Completely rewritten and newly illustrated, this edition makes a special effort to provide a clear and precise account of how weapon technology has changed to meet the new tactical and strategic challenges facing international naval forces today. Cutting-edge information is found throughout, enhanced by many new and rarely seen photographs and drawings. For example, this volume offers an unusually full account of the ""system of systems"" under development by the U.S. Navy and the other services to fight future limited regional wars. That initiative includes the changing role of space resources as they affect war on, over, and under the sea. This edition also benefits from the flood of material from Russia, whose weapons and systems are now owned and operated by numerous countries and are likely to be sold to many more. The guide provides uniquely detailed coverage of weapons developed and deployed in the Far East, an area that promises to be the liveliest scene of naval action in the future. Extensive sections are devoted to explaining the intricate workings of sensors and command systems. No other book, or even set of books, offers this sort of material in such accessible form. Its detail and completeness are backed by the authority of a long-established professional

Object ID	Title	Author	Summary
			expert. For the most complete and up-to-date information about weapons in every navy in the world, this is the essential resource—a work that, in effect, can serve as a textbook of modern naval technology. Norman Friedman is the author of dozens of books, including <i>Terrorism, Afghanistan, and America's New Way of War</i> and <i>Seapower as Strategy: Navies and National Interest</i>. A resident of New York, he lectures around the world on naval and related military topics and contributes a monthly column analyzing world naval developments for <i>Proceedings</i> magazine. 2004.313.045	Ship Identification, Part One : Merchant Ships	Talbot-Booth, E. C. (Eric Charles)	The prime object of this book is recognition or identification of merchant (cargo) ships from all over the world. Pt. 1. Merchant Ships, Engines Amidships
2004.313.048	Submarines of the Imperial Japanese Navy	Carpenter, Dorr	(from dust jacket flap:) The Imperial Japanese Navy had a large, modern, and well-trained submarine force at the beginning t World War II that inflicted severe damage on several major Allied warships, including the sinking of two U.S. aircraft carriers. Its submarines launched aircraft to bomb the continental United States and used deck guns to bombard the American coast. Yet, as the war progressed, its undersea campaign fell far short of expectations, and the overall Japanese submarine effort was judged a failure. This book provides a review of the development, operations, and losses of the Japanese submarine force, from the acquisition of its first undersea craft, during the Russo-Japanese War of 1904-1905 to the surrender of the surviving submarines after the atomic bombings of August 1945. The first part of the book describes the strategic concepts and operations of the submarine force. Included are

Object ID	Title	Author	Summary
			discussions of fleet, midget, and aircraft-carrying submarine operations, as well as the use of "kaiten" human torpedoes and transport submarines of the Navy and Army. There is also a discussion of the coordination of German and Italian submarine operations with the Japanese undersea force, the only example of Axis military forces working together in the war. An evaluation of the entire Japanese submarine effort follows. The second part of the book provides a listing of all submarines acquired by the Imperial Japanese Navy, with their characteristics and details of their losses or disposition. All the various designations of each submarine are given, since some boats had as many as four. German and Italian submarines that flew the Rising Sun ensign are also listed. Separate chapters are devoted to specialized attack craft, Japanese torpedoes, and submarine carriers and tenders. Jacket photos: Clockwise from upper left: The 1-68 (later 1-168) on sea trials in March 1934 (Kazutishi Hando); Lieutenant Commander Masao Kimura at the periscope of the RO-50; an E14Y1 floatplane about to be launched-from the submarine 1-29 (Ships of the World); conning tower of the aircraft-carrying submarine 1-402 (U.S. Navy); and the Type A midget submarine HA-36 (K. R. MacPherson).
2004.313.050	United States Naval History : A Bibliography	Lynch, Barbara A. (ed)	This edition incorporates more than 450 titles chosen from the large body of naval historical literature published since the bibliography's sixth edition appeared in 1972. In addition to updating this list of significant works in the field of naval history, our compilers added new editions of previously cited books and, in a few cases, key titles omitted from the earlier version.

2004.313.062	Naval Institute Historical Atlas of the U.S. Navy, The	Symonds, Craig L.	(from usni.org:) From the Battle of Flamborough Head during the American Revolution to the naval air wars over Vietnam and Kuwait, this historical atlas charts the course of the U.S. Navy across its entire history. Laid out here are the frigate duels of the War of 1812, the confrontation of ironclads during the Civil War, the World War II carrier battles in the Pacific, and the amphibious landings in Korea. Depicted also are campaigns, operations, and interwar interventions--like the cruise of the Susquehanna, Perry's mission to Japan, the Cuban Missile Crisis, and Desert Storm--all helping to make this cartographic portrait of U.S. naval actions understandable at a glance. The maps in this large-format, high quality book are presented in full color and show the deployment of ships, their tracks, and even some shore activity. Each map has facing text that describes the action and its political, economic, and strategic significance. The atlas is organized chronologically into ten eras with each section preceded by a thoughtful essay about that historical period and accompanied by relevant illustrations of ships, battles, and portraits of significant individuals. Winner of the 1996 John Lyman Book Award, this handy and attractive reference will be treasured by everyone who enjoys reading American maritime history. Students, scholars, and old salts alike will appreciate the bird's eye view of how the Navy's fortunes have

2004.313.075	Gold Book of Naval Aviation 1985, The	Cagle, Malcolm W. (ed)	A collection of articles about Naval aviation written by high ranking navy personnel. Page 187 begins a description of Carrier Forces of the US Navy. All commissioned carriers are listed with a short description and a list of their squadrons with squadron patches in color. The USS Midway is on page 194-195.
2004.313.076	Jane's Dictionary of Naval Terms	Palmer, Joseph	Jane's Dictionary of Naval Terms is one of a series of three dictionaries covering the fields of naval, military and aerospace terms designed to provide a easy to use and single reference source for English-language naval terms in use throughout the Nato countries. It is arranged alphabetically, is cross-referenced and contains in an appendix of comprehensive list of acronyms and abbreviations. Commander Palmer served in the Royal navy from 1926 - 1962 and after wartime destroyer command he graduated of the Royal Naval Staff College, served on directing staff of Royal Air Force Staff College and is editor of NAVY International magazine and writes on maritime affairs.
2004.313.077	Observer's World Aircraft Directory, The	Green, William	First time a book of this nature and is the first complete, compact and up-to-date guide to the entire world of aviation to be published. A valuable reference for all Military, Naval, Air Force, Government Departments, Air Force Personnel, Civil Aviation Establishments, Technicians, Designers, Observer Corps, Cadets, Students, Air Scouts, Journalists and aircraft enthusiasts with a convenient record of world aviation. This encyclopaedic directory ranges over the whole aviation scene detailing virtually every aircraft with photographic illustrations. More than 500 types of general aircraft and a series of directories and glossaries with 90 Air Forces of the world, 300 airlines with statistical information, types of aircraft used, routes, addresses etc.

Object ID	Title	Author	Summary
			International Civil aircraft markings and aeronautical terms, engine terms, data of all types of engines, air-launched missiles with technical information and terminology, air records now available in this form. Over 800 illustrations, text of 200,000 words in a single volume that is a rapid source of the latest developments in one reference. This publication is an essential complement to the annual Observer's Book of Aircraft.
2004.313.078	Noted American Carriers and Cruisers of World War II	Freeman, Robert H.	This book contains a detail account of each cruisers and carriers involved in the World War II. Each detail account has the followings: The commission year of each vessels, which battles that each vessel were involved in, and how many battle stars and/or other awards each vessel received for their participation in the World War II.
2004.313.079	Guide to Far Eastern Navies	Blechman, Barry M. (ed)	Here is the first comprehensive study of East Asian navies to appear in any language since the end of World War II. "Guide to Far Eastern Navies" provides a comprehensive and authoritative description the navies of China, Japan, Taiwan, the Philippines, and North and South Korea. It carefully details the characteristics, weapons, and detection systems of the ships and aircraft of these navies and defines their relationship to the Soviet Pacific Fleet and to the U.S. Seventh Fleet. "Guide to Far Eastern Navies" goes far beyond the traditional snapshot approach common to most warship directories. It begins with seven original essays, each written by a recognized specialist on Eastern sea power. Their objective and authoritative assessments of the development, present status, and future prospects of the navies in their areas of expertise provide this book with an unprecedented perspective. Readers will learn not only about the composition of the

Object ID	Title	Author	Summary
			Far Eastern navies, but also about the quality of each force, its strengths and weaknesses, its peacetime role in support of foreign policy, its potential wartime roles, and the ways in which each is likely to develop in the future. The second part of the book presents photographs and line drawings plus descriptive data for each class of ship and type of aircraft currently serving in the fleets of East Asia. The years remaining in this century may well present political events filled with drama and surprise. This is particularly true with regard to East Asia, a region where the interests of the United States and the Soviet Union often clash with each other and with the interests of the two regional powers, China and Japan. By skillfully combining photographs and statistics and interpretive essays, the editors of "Guide to Far Eastern Navies" have prepared a compelling document rich enough in detail and insight to serve naval buffs, Asian specialists, China watchers, and students of international politics for years to come. Barry Blechman, senior editor of "Far Eastern Navies," is Assistant Director of the U. S. Arms Control & Disarmament Agency. His co-editor, Robert P. Berman, is a member of the Brookings Institution's Defense Analysis Staff and author of a recent book on the Soviet air forces. 2004.313.080	Marine : A Guided Tour of a Marine Expeditionary Unit	Clancy, Tom	From Library Journal In the tradition of novelist Clancy's previous nonfiction works, such as <i>Fighter Wing</i> (Berkley, 1995), comes an in-

Object ID	Title	Author	Summary
			depth look at the United States Marine Corps (USMC). Clancy presents an insider's look at the most hallowed branch of the U.S. armed forces and those who serve on the front lines. First he offers an interview with Gen. Charles "Chuck" Cruller, 31st commandant of the Marine Corps. Clancy's main focus, however, is the Marine Expeditionary Unit-Special Operations Capable, or MEU (SOC). Currently, the USMC maintains seven MEU (SOC)s: three on each coast and one in Okinawa. Two or three of these units are deployed aboard ship into forward areas at any one time. These rapid-response units patrol a dangerous world while waiting for the president of the United States to get a "911" call for armed intervention. Clancy also offers a fascinating look at Marine Corps recruitment and training. Highly recommended for all libraries. Michael Coleman, Regional Lib. for Blind & Physically Handicapped, Montgomery Copyright 1996 Reed Business Information, Inc. From Booklist Since Clancy's fictional hero Jack Ryan began his career as a marine officer, few fans will be surprised that his creator now turns his attention to the corps and treats an aspect of it as effectively as he did the subjects of his three previous nonfiction military studies: Submarine (1993), Armored Cav (1994), and Fighter Wing (1995). After summarizing the marines' history, unique ethos, and weaponry--both specialized and borrowed, including the formidable ships of the amphibious navy--Clancy focuses on "the most `Marine' unit left in the Corps today," a Marine Expeditionary Unit--Special Operations Capable. Such a unit is one of the corps' and the country's seaborne emergency response teams, each with infantry, armor, air, and logistical components

Object ID	Title	Author	Summary
			adding up to about 2,000 men and each able to carry out an astonishing variety of war-fighting and peacekeeping activities. Clancy amasses the information, writes clearly, provides an invaluable bibliography, and generally takes the lay reader where it would be very difficult to go without Clancy's guidance. Highly recommended. Roland Green (from Amazon.com)
2004.313.081	Ships of the Navy, 1775-1969	Bauer, K. Jack (Karl Jack)	A single source for detailed information on the 10,000 vessels from George Washington's time to the present (1970) of the United States Navy. This four part volume attempts to fill the gaps in finding information in one source. Research often included many different views and conflicts arising with the criteria for selection is the first genealogy and second inherent validity of the source. The book attempts to blend both utility and practicality of the vessels as to sections on construction, purchase, capture, type and chronology. Parts include Old Navy (prior to 1881) and New Navy (since 1882) of sailing, steam, or armored vessels to aircraft carriers and torpedo boats, destroyers, escorts, and submarines. Standard abbreviations and symbols, abbreviations for shipbuilders and machinery manufacturers, parts 1-4, listing vessels, armed merchantmen, captured warships taken into service, and large revenue cutters taken into navy service are the mail part of the book. A Bibliography and Index of ships from 1776 - 1970 complete the volume.
2004.313.082	Submarines, Submariners, Submarining : A Checklist of Submarine Books in the English Language, Principally of the Twentieth Century, Arranged by Author, Title, and Subject	Anderson, Frank J.	The purpose of the bibliographer has been to list and describe, in one handy volume, all known books about submarines which have been published in the English language. Includes an appendix of books about submarines in foreign languages.

2004.313.092	Naval, Marine, and Air Force Uniforms of World War 2	Mollo, Andrew	Naval, Marine, and Air Force Uniforms of World War 2 is a companion volume to Army Uniforms of World War 2 with over 230 regulation and modified uniforms of the ;Allied and Axis powers as well as minor combatants and are described with full color pictures. The author explains how to identify the national origin of similar naval uniforms by noting features on hats, scarves, and cap ribbons and how they are tied. Contents includes uniform notes and countries from Belgium to China, Denmark, France, Germany, Great Britain, Japan and the United States to name a few. Color plates and notes and a bibliography are included.
2004.313.093	Uniforms of the American Revolution in color	Mollo, John	The newest volume in the Macmillan Color Series and at the time of the bicentennial of the Declaration of Independence of 1776 with 220 full-color illustrations covering the principal army and navel uniforms of the American, British, German and French armies and plates of Indian dress providing a unique survey of one of the great epochs of military history. Portraits, lists of equipment issued to the Continental Army, advertisements for deserters in contemporary American newspapers and latest research contributed to the book. Early paintings, drawings, and prints are used and uniforms are arranged by campaigns with flag, headdress and weapon detail.
2004.313.094	Complete Guide to All United States Military Medals 1939 to Present, A	Foster, Frank	From Booklist Color photographs of U.S. military medals and ribbons from World War II through the "100-hour liberation of Kuwait" for all services, including the Coast Guard and Merchant Marine, are provided here. Medals are shown complete with ribbons, beginning with the Medal of Honor and including 23 separate

Object ID	Title	Author	Summary
			categories, such as personal decorations, special service, service medals, and meritorious awards. A section devoted to medals or metal devices worn on service ribbons increases the reference value of the work, since information on these attachments is not readily located in other standard sources. Display of medals and ribbons on and off the person receives much attention, with easily followed instructions on the correct order of precedence for ribbons of all service units. Users will appreciate having the color pictures of awards on one page and boxed information about them on the facing page. Not included in the work is information on designers, the history of each award, the authority for awards, the information on the reverse side, and full descriptions of the obverse side, a real need since actual-size photographs do not always make this clear. The primary purpose of this inexpensive work is to help users identify medals quickly and understand how to display them. It complements more comprehensive works on the subject: U.S. Army Heraldic Crests: A Complete Illustrated History of Authorized Distinctive Unit Insignia by Barry Jason Stein (Univ. of South Carolina, 1993); the highly interesting work by Philip K. Robles, United States Military Medals and Ribbons (Tuttle, 1971); and a work concerned with cloth insignia, American Badges and Insignia, by Evans E. Kerrigan (Viking, 1967). (from Amazon.com)
2004.313.095	Big Red : Three Months on Board a Trident Nuclear Submarine	Waller, Douglas C.	The Cold War may be over, but nuclear submarines still lurk beneath the sea. Taller in length than the Washington Monument, wider at its center than a three-lane highway, the 18,750-ton Trident nuclear submarine, with 24

Object ID	Title	Author	Summary
			strategic missiles and more than 120 nuclear warheads, is the most complex war machine the U.S. Navy has ever produced. This \$1.8 billion marvel can sail deep beneath the ocean, undetected by enemies, for months. Douglas C. Waller -- bestselling author of The Commandos and veteran Time magazine correspondent -- penetrates the silent, secret world of nuclear subs, taking you on a tension-packed three-month patrol under the Atlantic Ocean inside the USS Nebraska, fondly nicknamed Big Red. In chilling detail, witnessed through the eyes of the men on board and told in their own words, Big Red reveals the top-secret procedures for starting World War III, including secret codes, elaborate fail-safe mechanisms, and highly classified battle tactics for nuclear combat. --This text refers to an out of print or unavailable edition of this title. About the Author Douglas C. Waller is a correspondent for the Time magazine. Previously, he was a defense and foreign policy correspondent for the Newsweek. He has also served on the legislative staffs of Senator William Proxmire and Congressman Edward J. Markey. He is the author of five previous books on foreign policy and defense, including The Commandos: The Inside Story of America's Secret Soldiers and Air Warriors: The Inside Story of the Making of a Navy Pilot. He lives in Annandale, Virginia, with his wife and three children. --This text refers to an out of print or unavailable edition of this title. (from Amazon.com)

This recognition by the President in the name of the Congress may only be accorded an individual who "distinguished himself

Object ID	Title	Author	Summary
			conspicuously by gallantry and intrepidity at the risk of his life above and beyond the call of duty." Vietnam recipients awarded since the formation of the Senate Committee on Veterans' Affairs was established and this publication is prepared by the Committee which records the names and deeds of those outstanding and brave individuals who have been recognized for their acts of heroism. Over 100 servicemen are chronicled alphabetically in this volume with a Preface by Vance Hartke, Chairman, Committee on Veterans' Affairs, U. S. Senate
2004.313.097	Record of Medals of Honor Issued to the Officers and Enlisted Men of the United States Navy, Marine Corps and Coast Guard, 1862-1923	United States. Bureau of Naval Personnel	Record of Medals of Honor issued to the Officers and Enlisted Men of the United States Navy, Marine Corps, and Coast Guard, 1862-1923, Department of the Navy Bureau of Navigation, Washington Government Printing Office 1924 and From Phil. D. Swing Representative in Congress 11th District California. The book contains a Roll of Honor page, Medal of Honor page, Extracts From the Statutes Authorizing the Issue of Medals of Honor page, alphabetical listing of Roll of Honor recipients, Addendum July 1, 1932, and a typewritten addendum dated May 3, 1934.
2004.313.098	Medal of Honor Recipients, 1863-1978	United States. Congress. Senate. Committee on Veterans' Affairs.	Medal of Honor Recipients 1863-1978 prepared by the Committee on Veterans' Affairs U. S. Senate February 14, 1979 96th Congress 1st Session Senate Committee Print No. 3. This volume includes all recipients in all branches of the service--Army, Navy, Marine Corps, Air Force, and Coast Guard. It does not include the 910 names that were stricken as the Army Medal of Honor Board on February 15, 1917, under authority of section 122 of the Army Reorganization Act of June 3, 1916 ruled that these individuals had not performed acts of sufficient merit to earn the award. An alphabetical list and a state list and war, campaign, conflict, or era list

Object ID	Title	Author	Summary
2004.313.099	Heraldry & Regalia of War	Fitzsimons, Bernard (ed)	is stated in the Contents. The cross section of uniforms, medals and insignia contained in this book can be regarded as something more than a collection of colourful devices and complex diagrams. They provide a link between the purely functional need for immediate identification and the inborn need of man to dress himself for the occasion. A selection of the propaganda of the World Wars is also included, to illustrate the special role of the heraldry and regalia of war in uniting a whole nation in a common cause. "First published in Purnell's history of the World Wars."
2004.313.100	Encyclopedia of Military History, The, From 3500 B.C. to the Present	Dupuy, Richard Ernest	In writing this book, the authors have had 2 general purposes in mind: to present to both scholar and general reader a comprehensive survey of the history of war and of military affairs in the world throughout recorded human experience; and to provide a reliable, relatively complete, and authoritative reference work covering the entire sweep of world military history.
2004.313.102	Medal of Honor, 1861-1949, the Navy.	The Navy	Record of Medals of Honor issued to the Officers and Enlisted Men of the United States Navy, Marine Corps, and Coast Guard - 1862-1923 Department of the Navy, Bureau of Navigation, Washington Government Printing Office 1924 W. R. Shoemaker, Chief of Bureau and donated: From Phil. D. Swing, Representative in Congress 11th District California. Roll of Honor page, Medal of Honor page, Extracts From the Statutes Authorizing The Issue of Medals of Honor, Alphabetical List of the Recipients, Addendum with recipients names, and one typewritten addendum dated May 3, 1934.
2004.313.103	Military Law	Byrne, Edward M.	This third edition of Military Law provides a complete overview of the U. S. system of military justice — a system

Object ID	Title	Author	Summary
			designed not only -to maintain peace and tranquility, as is civil law, but also to promote good order, high morale, and discipline within the military organization. The various chapters cover each step of the legal system, from the investigation of an offense to the final appeal. Technical information is provided on every facet of military justice. Each chapter is followed by actual court cases that show how the particular principles discussed have been implemented in practice. Many cases demonstrate the response of the military justice system to changing social mores; others show the evolution of the codes themselves. The classic decisions of the Somers mutiny and the Dreyfus case are presented in detail, as is the William F. Calley case of the Vietnam era. Finally, each chapter contains self-quizzes that help the student evaluate his understanding of the different concepts and their applications. Updated and expanded appendices include comprehensive forms and guides to specifications used by the Army, Air Force, Navy, Coast Guard, and Marine Corps, and the complete text of the Uniform Code of Military Justice (UCMJ). An extensive index and Table of Cases make the book easy to use by lawyer and student alike. Though it is primarily designed to be an introductory text for students of military law, the book is so arranged that it can be used as a basic reference, not only by the legal officers of all the services, but also by commanding officers, executive officers, military investigators, law-enforcement personnel, summary court-martial officers, Article 32 investigating officers, legal clerks, court reporters, and trial and defense counsels.

Object ID	Title	Author	Summary
			The broad range of the book also makes it a comprehensive guide for civilian and military readers who are not attorneys, and for civilian lawyers who need a basic reference work on military justice. (from dust jacket flap)

Object ID	Title	Author	Summary
			military historian and author of Disaster at D-Day, Gettysburg: An Alternate History, and The Great Patriotic War. As the name implies, his book is a dictionary of quotations from military commanders across 4000 years. Over 800 military commanders are represented by 5,943 quotations, which are themselves listed under 480 subject headings covering just about every aspect of military life, from "Ability & Action" to "Wounds & Youth." The book contains a good bibliography, an index to well-known quotations, and a biographical index. The published volume will also contain an index of great battles and an index of great commanders. Similar in size and scope to standard reference books like Bartlett's Quotations or the Oxford Book of Quotations, this dictionary is recommended for both public and academic libraries and will certainly appeal to subject specialists or military speakers. DMark Ellis, Albany State Univ., GA Copyright 2000 Reed Business Information, Inc. Product Description 8 x 10 The distilled wisdom of soldiers across the ages, in one volume 5,943 quotations by more than 800 military figures All aspects of military experience from 2000 BC to the present day Peter Tsouras brings 4000 years of military history to life through the words of more than 800 soldiers, commanders, military theorists, and commentators on war. Diverse personalities-Napoleon, Ataturk, 'Che' Guevara, Rommel, Julius Caesar, Wellington, Crazy Horse, Wallenstein, T.E. Lawrence, Saladin, Eisenhower and many more-sit side by side as a result of their participation in battle across the ages. Their memorable sayings present incomparable insights into the realities of war and are broken down into more than 480 categories and subjects for easy access. The quotes, drawn

			from direct experience and close observation, cover such areas as the art of war, courage, danger, failure, leadership, luck, military intelligence, tactics, training, guerrilla warfare, and victory. The editor, Peter G. Tsouras, is a senior analyst at the U.S. Army National Ground Intelligence Center. His other books include Disaster at D-Day, Gettysburg: An Alternate History, and The Great Patriotic War. (from Amazon.com)
2004.313.109	Dictionary of Military Terms	Bowyer, Richard	Over 6,000 entries provide up-to-date coverage of British, American, and international military vocabulary.
2004.313.110	Dictionary of Military Abbreviations	Polmar, Norman	From Booklist: This is a new listing of military abbreviations, acronyms, and initialisms compiled by staff associated with the U.S. Naval Institute. Most of the abbreviations are in current use. The listing is divided into six sections: "Military Abbreviations" (which takes up more than three-quarters of the book), "Aircraft Designations," "Aviation Unit Designations," "Military Ranks," "Missile and Rocket Designations," and "Ship Designations." This organization helps those associated with one service to more easily identify terms used by other services. Chapters concerned with designations include brief explanations for letter designation schemes, most often associated with weapons. Tables are included that outline the designation systems. The stated purpose of the dictionary is to assist U.S. military officers to better communicate and coordinate military activities with other branches of the armed services. This selective dictionary of abbreviations complements a more comprehensive work, Dictionary of Military, Defense Contractor and Troop Slang Acronyms (ABC-Clio, 1990), by Philip C. Gutzman. Gutzman contains 32,000 entries; this

Object ID	Title	Author	Summary
			new dictionary, an estimated 6,000. Gutzman is intended for military contractors, the new dictionary for military officers. The Naval Institute Press promises updated editions of the dictionary, an important consideration for libraries that do not have ready access to government publications that include these terms. (from Amazon.com)
2004.313.111	World Military Leaders	Dupuy, Trevor Nevitt (ed)	Biographical information on world leaders at the time of publication.
2004.313.112	Bibliography of the United States Navy and the Conflict in Southeast Asia, 1950-1975	Marolda, Edward J.	This bibliography revises and updates "A Select Bibliography of the United States Navy and the Southeast Asian Conflict, 1950-1975." The greater number of titles cited in the new edition reflects the outpouring of books and articles on the Vietnam War since 1983. In addition, because of the growing attention to the role of women in war, the current edition of the bibliography presents a new subject category entitled Navy women.
2004.313.113	Blacks in the American Armed Forces, 1776-1983	Davis, Lenwood G.	This is not a comprehensive nor definitive work about Blacks in the American Armed Forces, but rather the intent of the book is to present an overview of Black participation that relates to significant periods in United States military history. Chapter headings include: American Revolution, War of 1812, Civil War, American West, Spanish-American War, World War I, World War II, Korean War, Vietnam War, Post-Vietnam Era. Appendices include: Black American Generals and Flag Officers, Ships Named After Black Americans and Black Institutions, Black Soldiers in Films, and Documents of World War I.

Ten years

Object ID	Title	Author	Summary
			ago, with World War II, Korea and Vietnam still sharp memories, James Charlton collected words of wisdom about the work of war, usually wise, often witty, all honoring the men and women who do that work. Although this new and expanded edition of The Military Quotation Book was readied for production before U.S. Fighters were once more front-page news, it comes at a more than appropriate time. There are over 1,200 quotations, more than twice as many as previously. We hear from the generals and admirals of the past and present, from American presidents as well as from those at the bottom of the roster -- ordinary enlisted men and women from every branch. Civilians have their varying says as well. This gem of a book is a kaleidoscope of points of view, and every one hits its mark. For everyone who has his or her own take on the military, for history buffs, speechmakers, veterans and those serving now, The Military Quotation Book is a loaded canon of memorable expressions. (from Amazon.com; for 1990 edition)

2004.313.120	United States Submarines	Hinkle, David Randall (ed)	The submarine, first introduced to America's fleet in 1900, is today a 300-foot-long, 30-foot-wide vessel filled with some of the world's most sophisticated technology and courageous, skilled, all-volunteer personnel. In each submarine, over 100 crew members work together for months at a time to protect U.S. interests around the world. Written by an outstanding team, United States Submarines contains essays on submarine history and today's submariners, focusing not only on the subs, torpedoes, and related technologies but especially on the people who make it all work. Full-color and vintage photography, portraits, recruiting posters, and historically inspired paintings complement the riveting text.

Object ID	Title	Author	Summary
			Review A must read for anyone who has an interest in submarines or their history. -- Admiral Frank B. Kelso II, Former Chief of Naval Operations A remarkably comprehensive and beautifully illustrated history of the first 100 years of U.S. submarines. -- Admiral Carlisle Trost, 23rd Chief of Naval Operations Every submariner should have a personal copy. No matter how many times you review it, you will find new items. -- Commander E.P. Wilkinson, First Commanding Officer, USS Nautilus Records in clear prose and stunning photographs the triumphs and tragedies of the first hundred years of United States submarines. -- Vice Admiral George P. 2004.313.122	Remember the Maine	Mason, Gregory	USS Maine (ACR-1) was the United States Navy's second commissioned battleship and the first U.S. Navy ship to be named after the state of Maine. The Maine is best known for her catastrophic loss in Havana harbor on the evening of 15 February 1898. Sent to protect U.S. interests during the Cuban revolt against Spain, she exploded suddenly without warning and sank quickly, killing nearly three quarters of her crew. The cause and responsibility for her sinking remained unclear after a board of inquiry. Nevertheless, popular opinion in the U.S., fanned by inflammatory

Object ID	Title	Author	Summary
			articles printed in the "Yellow Press" by William Randolph Hearst and Joseph Pulitzer, blamed Spain. The phrase "Remember the Maine, to Hell with Spain!" became a rallying cry for action, which came with the Spanish–American War later that year. While the sinking of the Maine was not a direct cause for action, it served as a catalyst, accelerating the approach to a diplomatic impasse between the U.S. and Spain. The cause of the Maine's sinking remains the subject of speculation. Suggestions have included an undetected fire in one of her coal bunkers, a naval mine and her deliberate sinking to drive the U.S. into a war with Spain. (from Wikipedia)
2004.313.123	Civil War at Sea, The, Vol. 3 : Final Effort	Jones, Virgil Carrington	The CIVIL WAR AT SEA , Volume Three/The Final Effort is the final in Jone's definitive history of naval operations during the Civil War beginning with the South's premonition of disaster in July, 1863 when the Union closed the Mississippi River and split the Confederacy in two and ends with the sailing of the C.S.S. Shenandoah to England six months after Lee's surrender. The Northern battle in Texas, Sabine Pass and Red River with the capture of the U.S.S. Water Witch and sinking of the C.S.S. Alabama are recreated. The book contains black and white photographs and drawings.

Destroyers, originally called torpedo-boat destroyers in

Object ID	Title	Author	Summary
			1892, evolved from the response of navies to the threat posed by the torpedo boat. Growing from earlier defensive developments, the torpedo boat destroyer (TBD) first appeared as a distinct class of warship when HMS Havock and HMS Hornet were commissioned into the Royal Navy in 1894. By the time of the Russo-Japanese War in 1904, TBDs were "large, swift, and powerfully armed torpedo boats designed to destroy other torpedo boats." Although the term destroyer had been used interchangeably with the terms "TBD" and "torpedo boat destroyer" by navies since 1892, the term torpedo boat destroyer had been generally shortened to simply "destroyer" by nearly all navies by the First World War. Prior to World War II, destroyers were light vessels with little endurance for unattended ocean operations; typically a number of destroyers and a single destroyer tender operated together. After the war, the advent of the guided missile allowed destroyers to take on the surface combatant roles previously filled by battleships and cruisers. This resulted in larger and more powerful destroyers more capable of independent operation. At the beginning of the 21st century, destroyers are the heaviest surface combatant ships in general use, with only three nations (the United States, Russia, and Peru) operating the heavier class cruisers and none operating battleships or true battlecruisers. Modern destroyers, also known as guided missile destroyers, are equivalent in tonnage but vastly superior in firepower to cruisers of the World War II era, capable of carrying nuclear missiles. Guided missile destroyers such as the Arleigh Burke class are actually larger and more heavily armed than most previous ships classified as guided missile

			cruisers, due to their massive size at 510 feet (160 m) long, displacement (9200 tons) and armament of over 90 missiles. (from Wikipedia)
2004.313.133	Convoy	Middlebrook, Martin	Middlebrook follows the Battle of the Atlantic from the perspective of two convoys eastbound from the U.S. in 1942.
2004.313.134	Daybreak for Our Carrier	Miller, Max	A detailed record of the day-to-day living and human reactions of a considerable body of men in the whole course of one operation against the enemy. Nor, more important, a record which is the work of officers who gathered their material on regular duty, not merely as correspondents or assigned observers.
2004.313.141	Naval Warfare in the Baltic, 1939-1945	Koburger, Charles W.	Chronicle of the Baltic naval operations in World War II that attempts to include the contributions of the smaller navies of Finland, Sweden and Denmark while balancing the impact of the larger navies of Russia, Germany and England.
2004.313.142	Destroyer Squadron 23	Jones, Ken	The account of an exceptional leader, Arleigh Burke, and Destroyer Squadron 23, the unit he commanded in the Pacific in World War II.
2004.313.146	Naval Air War, The, 1939-1945	Miller, Nathan	This a reprint of the 1980 edition which includes minor changes. This book traces the rise of carrier-based air forces from defensive escort duty in the North Atlantic to the climactic duels in the Pacific that forever changed the nature of sea power. It covers Allied and Axis operations in all theaters.
2004.313.148	Fighter Squadron at Guadalcanal	Brand, Max	An account of the 212th Marine Fighter Squadron's operations at Guadalcanal in 1942. A treasure trove of personal and historical detail of the pilots and ground crews of the 212th, as well as with Marine infantrymen and Navy Personnel. Stories of thrilling, yet deadly, air-to-air combat are recounted in the words of the men who were there--who

Object ID	Title	Author	Summary
2004.313.155	Dauntless Helldivers : A Dive-Bomber Pilot's Epic Story of the Carrier Battles	Buell, Harold L.	also share their innermost thought about fear, courage, and their resolve to defeat the The author piloted dive-bombers in the Pacific campaigns of WW II, participating in most of the major naval-air battles: Coral Sea, Midway, Eastern Solomons, Philippine Sea. Besides flying from the decks of the carriers Yorktown , Saratoga , Enterprise and Hornet , he saw much action during a wild four-week sojourn with the Marines' "Cactus Air Force" on Guadalcanal. Buell is refreshingly self-revealing, admitting his doubts and fears, his passionate desire to become "a killer angel, an avenging force," and incidentally giving frequent credit to his personal guardian angel. The engaging memoir recounts one Navy pilot's experiences waging war in a now-extinct manner, i.e., dive-bombing, and conveys in vivid detail what the crucial carrier war was all about. Photos. Copyright 1991 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. - From Publishers Weekly From Library Journal Commander Buell's remembrance of the actions in the South Pacific flying dive bombers from carriers (and for three weeks from Guadalcanal's runways, still under fire from determined Japanese defenders) is personal and immediate even after almost a half century. He adds to his own memoirs and diary entries several accounts from fellow fliers to make a vivid history of that continual series of sea battles that was the Pacific War. Buell's view from the cockpit of a Dauntless is that of the average pilot, and from that perspective he gives us a sense of the urgent and frightening assault of events from the Coral Sea until the invasion of the Philippines. A rare combination of personal recollections and overall

2004.313.157	Air Assault from the Sea	Allen, Patrick	(from usni.org:) This lavishly illustrated photo tribute captures the international scope of modern day American and European amphibious helicopter operations. The oversized, full-color format and lively narrative draw the reader onto the ships and into the air of the versatile amphibious fleet. The HMS Ocean and the U.S. Navy's Wasp-class LHD USS Bataan, as well as the Dutch Rotterdam are just a few of the new helicopter assault ships covered together with a fleet of new and modernized helicopters. In addition, the author includes chapters on the joint US-UK exercise Bright Star 99, the MV-22 Osprey, RAF Chinooks, and U.S. Marines. Whether engaged in full conventional assault operations or peacekeeping/humanitarian support, helicopter amphibious forces provide an increasingly important role in today's uncertain strategic environment, as this book clearly indicates. A chronicle of their contributions, including photographs of troops and ships on exercises from nearly every NATO force, the book will be a welcome addition to the modern warfare bookshelf.
2004.313.158	US Navy	Humble, Richard	(from dust jacket flap:) In the 1980s, American warships span the world as elements of the greatest instrument of naval

2004.313.159	American Flying Boat: An Illustrated History, The	Knott, Richard C.	supremacy in history. Yet two centuries ago, the American "Founding Fathers" were unable to prevent their enemies from landing troops on American soil. The story of the expansion of the U.S. Navy is unique in western naval history because it begins with the birth of a modern nation. Richard Humble's fascinating story opens with the American War of Independence and the organization of maritime forces into an accountable navy fighting against the British. It describes how from the Revolutionary War to the more sophisticated role of peacekeeping in Beirut and as a part of NATO, the history of the U.S. Navy is an example of the enduring value of sea-power. Each chapter is richly illustrated with color photographs, charts and diagrams and the informative text makes this book an exciting documentation of the world's
			"An absorbing slice of aviation history." - Admiral Thomas H. Moorer, USN (Ret.) "Far and away the best and most thoroughly researched book I have seen on the American flying boat. The author knows his subject well." - Walter Hinton, pilot of NC-4, which made the first flight across the Atlantic The colorful story of the American flying boat constitutes one of the unique chapters of American aviation history. Although it no longer plays a significant role in modern aviation, the flying boat left behind a legacy of accomplishments and contributions probably unmatched by any other aircraft type. Captain Knott has written a fast-paced comprehensive history of this distinctive aircraft. As

Object ID	Title	Author	Summary
			a consequence of the many roles played by the American flying boat, its history is also the saga of the world's first scheduled airline, the first American aircraft to be used extensively in combat, the first flight across the Atlantic, the first great passenger airliner, and the largest aircraft ever built. But The American Flying Boat is much more than a catalog of noteworthy records and significant aviation firsts. It is replete with descriptions, rare photographs, and line drawings of every major American flying boat type produced, including a considerable amount of material on the more obscure models like the Sperry Amphibian, the never-completed Navy Giant Boat of 1920-21, the Tandem Fighter, and Fairchild's Jungle Clipper. Through his meticulous research, Captain Knott has collected a treasury of facts, anecdotes and heroes. Here is the flying boat America with its imperturbable copilot/mechanic who could keep the aircraft aloft for hours on end by climbing out on the wings to service the engines in flight. Here is the story of the Aeromarine Highball Express flights, and A.T.O's Big Fish aircraft, which carried thirsty Americans to Havana and the Bahamas to circumvent Prohibition. Here are the colorful war exploits of the Navy's Black Cats, and the sheer immensity of Howard Hughes' controversial wooden Hercules. Here are the boats that went with Byrd and MacMillen to the Arctic, with Archbold to New Guinea, with Pan American to South America, Europe, and the Orient, and with the U.S. Navy to every corner of the earth. This is a book both for those who have nostalgic memories of the great boats, and for those whose age allows only fascination with their legends. It is a tribute not only to the

2004.313.163	Type VII U-boat, The	Westwood, David	(from usni.org;) First launched in 1936, the Type VII U-boat was the mainstay of the German campaign against Allied supply lines during the Battle of the Atlantic. With more than six hundred of the type constructed, it has come to be considered the most successful submarine design of all time. This newly revised edition offers a full description of the submarine, including the many variations and improvements introduced during its long service career, a pictorial section that emphasizes close-up and on-board photographs, and 135 line drawings. The perspective and three-view drawings give every detail of the boat—general arrangements, hull construction, machinery, superstructure, rig, armament, fire controls, and fittings—with in-depth descriptive keys. Such a serious evaluation of the submarine's design and construction provides ship buffs, historians, and modelmakers with an insight into the technicalities of an important ship type.

2004.313.169	Capital Navy : The Men, Ships and Operations of the James River Squadron	Coski, John M.	his valuable service to the Navy in part. Capital Navy is the first book to examine the importance of Confederate naval operations on the James River, and their significant (and yet largely ignored) impact on the war in Virginia. Dr. Coski's study explores virtually every aspect of the Confederate naval presence, from the early war construction of the ironclad behemoths to the under appreciated wooden ships that fought alongside their more famous iron-plated sister ships-- and every engagement and action in between. Coski's research is grounded in primary sources, including diaries, letters, journals, log books, and official records. His deep research allows him to paint a lively portrait of the men and ships that plied the twisting, muddy coils of the James River. His descriptions of the many fascinating personalities involved in this drama are richly drawn and deeply crafted, as are his renditions of the naval engagements (including Drewry's Bluff and Trent's Reach). It is impossible to fully understand how and why the war unfolded as it did in Virginia (and indeed, the Eastern Theater) without reading this book. (from Amazon.com)

2004.313.173	Triumph in the Desert: The Challenge, the Fighting, the Legacy	David, Peter	"The people--those of America and those of the international coalition to liberate Kuwait--are what our victory was all about....Here on these pages are immortalized the images and the words of their heroic achievements." -FROM THE FOREWORD BY General Colin L. Powell, CHAIRMAN OF THE JOINT CHIEFS OF STAFF When Saddam Hussein sent hundreds of tanks streaming across Iraq's southern border into Kuwait on August 2, 1990, he thought no one would do anything about it. "Yours is a society that cannot lose 10,000 dead in one battle," he had said contemptuously to the American ambassador in Baghdad a few weeks earlier. And he had a vast war machine to back him up--an army of a million men, the biggest air force in the Middle East, a lethal storehouse of chemical weapons. But he way wrong. By the time the Gulf crisis was over, more than 800,000 troops and a 'fierce array of air power and naval forces had been deployed by a great

Object ID	Title	Author	Summary
			international alliance led by the United States. Saddam's military installations had been pulverized, and his army had fled from Kuwait in tatters. Triumph in the Desert commemorates the allied victory and the liberation of Kuwait from the terror of the Iraqi occupation. Nearly 200 photographs from the world's best photojournalists vividly portray the spectacular air war, the valor and dogged efforts of the ground troops, the skill of the naval support units. Peter David, the international editor of the London Economist, provides an insightful chronicle of the war and what led up to it, and there are firsthand accounts from reporters in the field, as well as a profile of General "Stormin' Norman" Schwarzkopf, and a four-page computer graphics depiction of the 100-hour Kuwaiti assault by the allies.
2004.313.174	Naval Leadership in Korea: The First Six Months	Buell, Thomas B.	United States Navy and the Korean War. 2nd in a study in the Naval Historical Center's new series commemorating the 50th Anniversary of the Korean War. This monograph illuminates the role of the Navy's top flag officers in Washington, in the Pacific area, and in the Korean theater of operations before and during the first chaotic six months of war. (from Amazon.com)
2004.313.175	Assault from the Sea: The Amphibious Landing at Inchon	Utz, Curtis A.	(Foreword:) This is the second study in the Naval Historical Center's monograph series, entitled "The U.S. Navy in the Modern World." The purpose of the series is to bring to the attention of today's naval personnel and other readers the contributions of the naval service to the nation, in war and peace, since 1945. During the Cold War, the Navy helped resist Communist aggression, deter nuclear and conventional attack on the United States, protect American trade at sea and ashore, strengthen

Object ID	Title	Author	Summary
			regional alliances and foster the growth of democratic and free market institutions worldwide. The strength and overseas presence of the U.S. fleet often resolved crises without the use of force. But when force was necessary, the Navy fought hard and well. In light of the Navy's current emphasis on littoral operations, I believe that <i>Assault from the Sea: The Amphibious Landing at Inchon</i>, by Curtis A. Utz of our Contemporary History Branch, is an appropriate title for the series' second work. His monograph demonstrates how the Navy's veteran leadership, flexible organization, versatile ships and aircraft and great mobility gave the theater commander, General of the Army Douglas A. MacArthur, the ability to launch a devastating offensive against the North Korean invaders of South Korea. In addition to the efforts of Mr. Utz, many others were involved in the production of this work. This project was skillfully supervised by Dr. Edward J. Marolda, who heads the Contemporary History Branch. As always, Dr. William S. Dudley, the center's Senior Historian, provided invaluable advice. I also wish to thank Professor Roger Dingman of the University of Southern California, a distinguished authority on the Korean War; and Brigadier General Edwin H. Simmons, USMC (Ret.), Director of Marine Corps History and Museums and an Inchon veteran, for their helpful comments and observations. The views expressed are those of Mr. Utz alone and not those of the Department of the Navy or any other agency of the U.S. government. Dean C. Allard

	Vietnam by a Founding Member of the Elite Navy SEALs		through jungle and swamp with his custom-made shotgun, "Sweetheart." Staying alert to trip wires, punji pits, and booby traps, Watson unfailingly guided his men--without ever losing one --through three Vietnam tours as Chief of SEAL Team Two's sixth platoon and commanded teams of amphibious fighters as they carried out intricate ambushes, disrupted vital enemy supply routes, interrogated prisoners, trained guerrillas, designed and enacted daring parakeet ops, and liberated POW camps.
2004.313.178	Sandino Affair, The	Macaulay, Neill	Augusto Nicolás Calderón Sandino (May 18, 1895 – February 21, 1934) was a Nicaraguan revolutionary and leader of a rebellion against the U.S. military occupation of Nicaragua between 1927 and 1933. He was labeled a bandit by the United States government, and his exploits made him a hero throughout much of Latin America, where he became a symbol of resistance to United States domination. Drawing units of the United States Marine Corps into an undeclared guerrilla war, his guerrilla organization suffered many defeats, but he successfully evaded capture. United States troops withdrew from the country after overseeing the inauguration of President Juan Bautista Sacasa. Sandino was assassinated in 1934 by Gen. Anastasio Somoza García, who went on to seize power in a coup d'état two years later, establishing a family dynasty that would rule Nicaragua for over 40 years. Sandino's legacy was claimed by the Sandinista National Liberation Front (FSLN), which overthrew the Somoza government in 1979. 2004.313.186	Oxford Companion to American Military History, The	Chambers, John Whiteclay (ed)	well as a List of Charts. With more than 1,100 entries written by some 500 distinguished contributors, The Oxford Companion to American Military History is "the most comprehensive treatment of American military history ever compiled" (Parameters: U.S. Army War College Quarterly) and an "easy-to-browse, well-organized work" (The Washington Post). Here is a gold mine of information on American military history, exploring battles and soldiers, ships and weapons, services and doctrines--as well as the social and cultural impact of the U.S. military at home and around the world. The Oxford Companion to American Military History boasts over 1,100 entries written by some 500 distinguished contributors. Readers will find Stephen E. Ambrose writing on the D-Day landing, James M. McPherson on the battle of Antietam, John Keegan on the changing experience of combat, Jean Bethke Elshtain on Jane Addams, Mark A. Noll on religion and war, and Robert M. Utley on Sitting Bull. Ranging from brief factual pieces to extensive essays, the entries examine every major war from the Revolution to the Persian Gulf; important battles from Bunker Hill, to the Alamo, Gettysburg, Little Bighorn, Normandy, and Khe Sanh; and military leaders from Washington to Grant, Lee, Eisenhower, MacArthur, Westmoreland, and Schwarzkopf. Moreover, the Companion goes well beyond the usual "drum and trumpet" coverage to examine a wide range of subjects you might not expect to find. There are entries on relevant acts of Congress and on diplomatic policies such as the Monroe Doctrine and the Marshall Plan; on peace and

2004.313.193	Soviet Military Power 1983	U. S. Dept. of Defense	Soviet Military Power was a Public Diplomacy publication of the United States Department of Defense, which provided an estimate of the military strategy and capabilities of the Soviet Union during the final years of the Cold War, ostensibly to alert the U.S. public to the significant military capabilities of the Soviet Armed Forces. First published in early October, 1981, it became an annual publication from 1983 until the collapse of the Soviet Union in 1991. Already in draft as the Soviet Union collapsed, the 1991 version was retitled "Military Forces in Transition". In addition to the majority English version, Soviet Military Power was translated, printed, and disseminated in a variety of languages, including German, French, Japanese, Italian and Spanish. (from Wikipedia.org)
2004.313.194	Soviet Military Power 1984	U. S. 2004.313.198	Wings of the Navy : Flying Allied Carrier Aircraft of World War Two	Brown, Eric Melrose	Carrier aircraft, since their beginning, have been a very special kind of machine and demanded something equally special of the men who flew them. Eric 'Winkle' Brown was one such, a pilot who has enjoyed one of the most extraordinary careers in flying. He was the first naval officer to head the elite Aerodynamics Flight at Farnborough. "Wings of the Navy"

Object ID	Title	Author	Summary
			recounts Eric Brown's cockpit experiences testing British and American carrier aircraft. Carrier operations are potentially the harshest and most dangerous test aircraft and pilot can face. Landing on the pitching, bucking deck of a carrier or catapulted over a plunging bow, shipboard aircraft had to be exceptional. Their real characters have been forgotten and distorted over the passage of time; now this book places on record the flying characteristics, good, bad and indifferent, of aircraft as varied as the Fairey Swordfish and Grumman Hellcat. Sixteen types are covered, each illustrated with cutaways, cockpit details and many photographs. (from dust jacket flap) Edited by William Green and Gordon Swanborough ; illustrated with cutaway and cockpit interior drawings by John Weal and Aviagraphica ; general arrangement drawings by Dennis Punnett.

			control systems, and the institutional steps taken to professionalize the surface warfare community. Publication Date: April 3, 1996 (from Amazon.com)
2004.313.208	Naval Officer's Guide, The	Mack, William P.	A collection of information and advice for officers in the U.S. Navy intended to serve primarily as a resource from their preparation for commissioning through their years as junior officers.
2004.313.209	Around the World with the U. S. Navy : A Reporter's Travels	Peniston, Bradley	Today's navy looks very different from the navy of a few years ago. The end of the Cold War and the fleet drawdown have resulted in more missions — and less of nearly everything else. In travels that took him around the globe, "Navy Times" reporter Bradley Peniston sought out the ships, aircraft, bases, and people of this new navy. His on-the-scene report provides an authoritative and provocative portrait of a forward-deployed fleet. From the open ocean to claustrophobic northern seas to calm blue Mediterranean waters, Peniston tells what it's like to serve in the American navy at the turn of the millennium. Hitching rides in military aircraft, he flew sixty-five thousand miles to report from scores of locations. He visited war zones in the Persian Gulf and the Adriatic Sea, and observed naval exercises throughout Europe, Asia, and Latin America. This book captures the triumph, frustration, excitement, and boredom of life in the modern navy. Vivid eyewitness accounts describe the navy at work: hunting submarines above the Arctic Circle, flying over the white-hot Persian Gulf, racing with special boat squadrons off San Diego, prowling in an attack submarine, driving ships off Chile, and painting an orphanage in Romania.

Object ID	Title	Author	Summary
			Along the way, officers and crews explain what they like and dislike about the navy and their jobs. Their candid wit and wisdom reveals what it's like to be "out there." A respected young journalist, Peniston provides facts, figures, and jargon-free descriptions of naval tasks and techniques. Accessible to general readers yet illuminating for naval professionals, this unforgettable navy cruise-book serves as an invaluable snapshot of the sea service in transition. Jacket design: Brian Barth (from dust jacket flap)
2004.313.210	Rise of American Naval Power,1776-1918, The	Sprout, Harold Hance	Sea Power and American Independence (1776-1783). Strategic lessons of the War of 1812. Mahan Triumphant: The Naval policy of Theodore Roosevelt. Europe at Ware: Neutrality and Preparedness (1914 - 1917).
2004.313.211	USN : Naval Operations in the '80s	Skinner, Michael	War on the High Seas Are the Russians threats or targets? Is the battleship really viable? Will the supercarrier survive the cruise missile? Are U.S. "boomers" still invulnerable on their deepwater stations? "USN" tackles these questions by taking you inside the fleet - into the heart of a giant Trident sub, into the fire control center of a battleship as it unleashes its nine-ton broadside, into the control room of an Aegis cruiser as it directs the air defense of the battle group, into the air as the carrier launches the awesome power of an Alfa Strike. (from back cover)
2004.313.212	Soviet Navy, The : Strengths and Liabilities	Watson, Bruce W.	The Soviet Navy (Russian: Voenno-morskoj flot SSSR,

Object ID	Title	Author	Summary
			literally "Military Maritime Fleet of the USSR") was the naval arm of the Soviet Armed Forces. Often referred to as the Red Fleet, the Soviet Navy would have played an instrumental role in a Warsaw Pact war with NATO, where it would have attempted to prevent naval convoys from bringing reinforcements across the Atlantic Ocean from North America to Western Europe. The Soviet Navy was divided into four major fleets: the Northern, Pacific, Black Sea, and Baltic Fleets; under separate command was the Leningrad Naval Base. The Caspian Flotilla was a smaller force operating in the land-locked Caspian Sea. The 5th Operational Squadron in the Mediterranean drew its units from the Black Sea, Baltic, and Northern Fleets; the Indian Ocean Squadron primarily from the Pacific Fleet. Other components included Naval Aviation, Naval Infantry (the Soviet equivalent of marines), and Coastal Artillery. (from Wikipedia)
2004.313.216	Sea Power and Its Meaning	Clark, Joseph James	The Watts Sea Power Library, Sea Power and Its Meaning, Admiral J. J. Clark, USN and Captain Dwight H. Barnes, USNR with Contents, 14 Chapters and Index. 2004.313.218	Introduction of the Ironclad Warship, The	Baxter, James Phinney	An ironclad was a steam-propelled warship in the early part of the second half of the 19th century, protected by iron or steel armor plates. The ironclad was developed as a result of the vulnerability of wooden warships to explosive or incendiary shells. The first

Object ID	Title	Author	Summary
			ironclad battleship, La Gloire, was launched by the French Navy in November 1859. The British Admiralty had been considering armored warships since 1856 and prepared a draft design for an armored corvette in 1857; however, in early 1859 the Royal Navy started building two iron-hulled armored frigates, and by 1861 had made the decision to move to an all-armored battle fleet. After the first clashes of ironclads (both with wooden ships and with one another) took place during the American Civil War, it became clear that the ironclad had replaced the unarmored ship of the line as the most powerful warship afloat. This type of ship would come to be very successful in the American Civil War. Ironclads were designed for several roles, including as high seas battleships, coastal defense ships, and long-range cruisers. The rapid evolution of warship design in the late 19th century transformed the ironclad from a wooden-hulled vessel that carried sails to supplement its steam engines into the steel-built, turreted battleships and cruisers familiar in the 20th century. This change was pushed forward by the development of heavier naval guns (the ironclads of the 1880s carried some of the heaviest guns ever mounted at sea), more sophisticated steam engines, and advances in metallurgy which made steel shipbuilding possible. The rapid pace of change in the ironclad period meant that many ships were obsolete as soon as they were complete, and that naval tactics were in a state of flux. Many ironclads were built to make use of the ram or the torpedo, which a number of naval designers considered the crucial weapons of naval combat. There is no clear end to the ironclad period, but towards the end of the 1890s the term ironclad

			updated coverage of the buoyage system and the Rules of the Road, which have changed substantially since the first edition was published in 1981.
2004.313.238	Polar Operations	MacDonald, Edwin A.	Since Captain James Cook's circumnavigation of the Antarctic continent nearly two hundred years ago, the frozen regions of the earth have excited man's imagination and stimulated his urge to probe the unknown. Our needs now and for the future are directing ever greater attention to the scientific, strategic, and commercial potential of these forbidding areas, and the ranks of those whose professions take them to the high latitudes are constantly expanding. For these men, "Polar Operations" provides the first thorough, practical explanation of the technology and techniques of sailing and surviving in polar waters. Captain MacDonald covers a broad range of topics vital to success and survival in Arctic and Antarctic operations such as the polar environment, design criteria for icebreakers, icebreaking techniques, and the special problems of navigation and piloting near the earth's poles. (from dust jacket flap)
2004.313.239	School of the Ship - Prepared for the Use of the Midshipmen at the U. S. Naval Academy	Grant, Albert Weston	PREFACE: I have freely quoted from essays written by many Naval Officers, and have changed the text of their articles to suit the purpose of this book. It is intended that the subjects mentioned shall be supplemented, not only by instruction given in the section room, but by practical work on the tactical game board, and studied in connection with the fleet drill and signal books. I have to thank Lieut.-Commanders H. G. Gates and Yates Stirling, Jr., U. S. Navy, for kind assistance in the

2004.313.240	ASW Versus Submarine Technology Battle	Gerken, Louis	preparation of the manuscript. Respectfully, A. W. GRANT, Commander, U. S. Navy. PREFACE TO SECOND EDITION: No material changes or additions have been made ,in this edition except the elimination of any reference to steaming data, which is considered outside the scope of this book. Many suggestions concerning the subject-matter have been received and considered, but as this volume is prepared solely for the use of students at the Naval Academy, I see no reason for enlarging it. Respectfully, A. W. GRANT, Captain, U. S. Navy. SEPTEMBER 1 1910.
			Anti-submarine warfare (ASW, or in older form A/S) is a branch of naval warfare that uses surface warships, aircraft, or other submarines to find, track and deter, damage or destroy enemy submarines. Like many forms of warfare, successful anti-submarine warfare depends on a mix of sensor and weapon technology, training, experience and luck. Sophisticated sonar equipment for first detecting, then classifying, locating and tracking the target submarine is a key element of ASW. To destroy submarines both the torpedo and mine are used, launched from air, surface and underwater platforms. Other means of destruction have been used in the past but are now obsolete. ASW also involves protecting friendly ships. (from Wikipedia)

Object ID	Title	Author	Summary
			the obscurity of an unwanted army post in Maryland, mirrors the growth of higher education in America as well as the policies of the navy and nation it exists to serve. But this is a full-bodied history — a living story peopled with the naval cadets, professors, coaches, midshipmen, and superintendents who have contributed to the mighty mosaic of naval service at Annapolis. Its legendary cast includes George Dewey '58, the victor of the Battle of Manila Bay; Alfred Thayer Mahan, '59, the philosopher of sea power (and the only midshipman ever to pass through the academy without being a plebe); Chester VV. Nimitz, '05, commander in chief of the U.S. Pacific Fleet, the mightiest armada in history; as well as the sports heroes of the 1960s, Joe Bellino and Roger Suubach. Arleigh Burke, a future chief of naval operations is here, causing pandemonium by scooting through a women's dressing room on Ladies' Day at the pool. Here is Philo N. McGiffin, the wild man of the Class of 1882, whose exploits with cannon balls and midnight salutes live on in lusty legend . . . and here is Jimmy Carter, '47, the only Naval Academy graduate ever to become commander in chief. The author, a member of the academy's faculty, had access to previously unpublished materials in the U.S.N.A. archives and spent hundreds of hours conducting personal interviews and corresponding with former superintendents and alumni. Many rare photographs complement the carefully researched and highly readable text. This fast-paced history takes the Naval Academy from the days of mutiny, duels, the Spirits Club, a fixed curriculum, and hazing to Rhodes scholars, elective majors, more than 500 academic courses, and female midshipmen. It is a continuing saga of pride, patriotism,

			challenge, change, tradition, mischief, nostalgia, and excellence. Thousands of people have helped to write this story. Jacket photograph courtesy of Photo Lab, U.S. Naval Academy" (from dust jacket flap)
2004.313.248	Annapolis Story, The : The Blue and Gold	Ilyinsky, Paul	(from dust jacket flap:) The United States Naval Academy is more than just another college. And this book is more than just another pretty book about Annapolis. It's about the school and the Naval base, about the young men who go there -- and why they go there in this day and age of the volunteer military. It is also about why there is a Naval Academy at all and how it got the way it is, with few clues about where it's going. It tells you more than just a catalog (which it is not) and more than just a college yearbook (which, in a way, it is - only it's a yearbook for all years) . It is more than a collection of beautiful photographs, and more than a mere essay on "Annapolis today." If you went there, or have a son who goes there (or who might someday attend the Academy), you need this book. You need it, in fact, you were ever in the Navy, or ever even considered Annapolis as a college. You also need it if you have more than a passing interest in the United State's present and future ability to defend itself and provide men capable of leading men and mastering the machines men have come so to depend on.

2004.313.257	United States Navy, The : A History	Alden, Carroll Storrs	The compressed story of the US Navy from the War of Independence through 1943 and World War II.
2004.313.260	Command Under Sail : Makers of the American Naval Tradition, 1775-1850	Bradford, James C.	This book covers the period of US history from 1775 to 1850 and it's primary subject centers about 12 officers of the US Navy. Each one of these individuals were the ones that laid the very foundation of what the US Navy is today. The most interesting thing about the book is that there are 12 separate authors, not one. In addition, at the conclusion of each chapter (which covers the life of each separate officer) there is a rather healthy listing of additional references. The beauty of the book is that each naval officer, who is a hero in the best of naval traditions, is described with all the laurels and warts of a human being. Their professional knowledge, attitudes towards their fellow officers and the men that served under them, their skill as diplomats and their families is very well described. For those who have either served a career in the nations sea going service or are just plain history buffs, the investment in this book is worth while. A splendid addition to any ones library. Richard Detjen USNA, Class 1958. (from Amazon.com)
2004.313.262	Military and Naval Recognition Book	Bunkley, Joel William	The Military and Naval Recognition Book, A Handbook on the Organization, Uniforms and Insignia of Rank of the World's Armed Forces; Etiquette and Customs of the American Services with complete description and colored plates of U. 2004.313.265	Naval Profession, The	Calvert, James F.	The Naval Profession, revised Edition, Vice Admiral James Calvert U. S. N. with Preface to Revised Edition, Preface, Contents , Eight Chapters, Appendix, Bibliography, Index about What is the Navy? since America has grown and changed profoundly during the six years since the first edition some having been a decline in popular enthusiasm for service in the Armed Forces. The author believes the opportunity is greatest for those young men choosing a naval career as the United States is in a new phase of evolution as a World Power will a marked increased reliance on sea power. The book describes all aspects of the naval officer's life, variety of work, education available, traditions and opportunities for advancement plus the important and often demanding responsibilities of the naval officer's family. The book provides invaluable practical guidance.
2004.313.266	We Build, We Fight! : The Story of the Seabees	Cave, Hugh B. (Hugh Barnett)	Fighting men do not move alone; supplies and equipment must move with them, often so swiftly that the builders of airfields and advance bases are themselves thrust into the breaking wave of attack. Thus, the Second World War has produced a king of fighting man hitherto unknown--the Fighting Builder, or Seabees.
2004.313.268	American Naval Heritage, The	Coletta, Paolo Enrico	The American Naval Heritage, Third Edition, American naval heritage in brief, US Naval History, 28 Chapters, from the Long Ships, Wars, and Nuclear Weapons and SALT. A Notable Books section and Index with Black and White drawings and photographs.

Object ID	Title	Author	Summary
2004.313.269	Navy Woman's Handbook	Collins, Clella Reeves	Navy Woman's Handbook by Clella Reeves Collins (Mrs. Carter Collins) with Preface (the life of a Navy wife...); Part I, Chapters I - XVII; Part II Chapters XVIII - XXI; Vital Information, Appendix - Directory of Legal Aid Organizations. Topics include putting affairs in order, when separation comes, the will, life insurance, social security, death benefit, pensions, moving, income tax, mail, communications, women's property rights, rights of a widow, homesteads, deeds, automobiles, navy wife's responsibilities and relief organizations, the chaplain, to name a few.
2004.313.270	Navy Men	Connolly, James B. (James Brendan)	NAVY MEN by James B. conolly; Illustrations by Henry O'Connor Forward by J. B. c Contents include 33 Chapters describing a series of incidents about the US Navy largely based on fact covering the period from 1898 -1918.
2004.313.271	Naval Officer's Manual, The	Cope, Harley Francis	"The officer of the Army, Navy or Air Forces, whether Regular or Reserve, must adopt an entirely new approach to the requirements of his commission. The passage of the National Security Act of 1947 means far more than the mere establishment of a separate Air Force and the appointment of a Secretary of Defense. It means unity of action of forces whether they engage the enemy on land, in the air, or on or under the seas. Our legislators intended henceforth any nation which forces war upon this country will face the coordinated might of our armed forces. Theirs is the responsibility for making possible a strength sufficient for our national security. The need for such a concept of unity may have been the greatest lesson World War II. The naval officer must go farther in his thinking than merely to accept this new condition; he must embrace it."
2004.313.276	Jack Tars and Commodores : The American Navy, 1783-1815	Fowler, William M.	Jack Tars & Commodores: The American Navy, 1783-1815

Object ID	Title	Author	Summary
			is the sequel to the author's <i>Rebels Under Sail</i> and is an account of the development of the US Navy from the end of the Revolutionary War to the capitulation of Algiers in 1815. It is devoted to naval operations covering the Quasi War with France, Barbary Wars, and the War of 1812. The author provides a sound evaluation of the labors of the Secretary of the Navy William Jones to direct his small navy where it was most against the powerful British Navy during the War of 1812. This was a turbulent period in the new American republic fighting wars against the Barbary States, France, and Great Britain for the second time. It is a book with meticulous research and a flowing narrative.
2004.313.277	Clear for Action : The Photographic Story of Modern Naval Combat, 1898-1964	Hailey, Foster	Within the years of modern naval warfare, 1898-1964, <i>Clear for Action</i> covers every battle of importance, every new development in ships, submarines, tactics, and armament; the remarkable photographic narrative includes many pictures published for the first time in America. In addition to the more than 400 superb photographs, there are charts, logs, diagrams, and accurate statistics, including diagrams showing exactly what happens when a ship is hit from the surface, from underwater, or from the air.
2004.313.278	Can Do! : The Story of the Seabees	Huie, William Bradford	Lt. Huie is to be complimented on the work which he has performed in setting forth the accomplishments and ideals of the Seabees and the spirit by which they are animated.
2004.313.280	Welcome Aboard : A Service Manual for the Naval Officer's Wife	Johnson, Florence Ridgely	A primer in Navy life for a naval officer's wife newly entering the service.
2004.313.282	Knight's Modern Seamanship	Knight, Austin Melvin	A guide for those who follow the sea as a profession, for sport, or for relaxation. In print since 1901 and updated and expanded to meet recent developments. Chapters include Ships and Boats; Shiphandling; Oceanography and the Weather; and Rules

2004.313.309	History of Naval Tactics from 1530 to 1930: The Evolution of Tactical Maxims, A	Robison, Samuel Shelburne	INTRODUCTION: It has been said that we are the sum of all who have gone before. The past carries through to the present. Unconsciously through association with seniors, and consciously by study, observation, and experience we assimilate, and are influenced by the tactics evolved and practiced in the navies of earlier days. They form the background of naval knowledge, and are properly a strong, though not a governing factor, in directing the trend of naval tactical thought. The written record of naval tactics is fairly complete from the time of the practical disappearance of the galley from naval warfare up to the present. Sails for fighting ships date from many centuries B.C.; but fighting under sail was practically unknown until cannon were mounted where oars had been. With cannon came fighting at a distance as contrasted with fighting hand to hand. During the three centuries following the last great battle under oars, fighting under sail became almost as standardized as fighting under oars had been since the dawn of history. Then, in the short space of twenty years sails gave place to steam, wood to metal, oak to armor, and smooth bores to rifled cannon. The rostrum, or beaked prow, of the ancients was revived in the ram. The ram dominated naval construction, and to a large extent naval tactics, for forty years.

Object ID	Title	Author	Summary
			The battle between guns and armor began — and still continues. To the gun have been added new weapons - mines and torpedoes from beneath the waves; bombs from the air above.
			Because the offensive and defensive qualities of men-of-war are relative and not absolute, tactical maxims which are valid at one period may have to be discarded at another; and always sound tactics must be based on the quality of the weapons employed and of the structures which carry them.
			To bring together under one cover for convenient comparison and study the naval tactics of four centuries is the object of this work.
			In its essential form it dates from September, 1933. As stated in the Supplementary Chapter (LIII), press of other matters prevented completion of the final draft until the end of 1940, by which time a second world war had been raging for more than a year.
			The Supplementary Chapter is largely the contribution of Captain W. J. Ruble, U. S. Navy.
2004.313.311	WAVES: The Story of the Girls in Blue, The	Ross, Nancy Wilson	On July 30, 1942, the WAVES became a World War II division of the U.S. Navy, and consisted entirely of women. The name was the acronym for "Women Accepted for Volunteer Emergency Service" (as well as an allusion to ocean waves). The word "emergency" implied that the acceptance of women was due to the unusual circumstances of World War II, and at the end of the war the women would not be allowed to continue in Navy careers. Their official name was the U.S. Naval Reserve (Women's Reserve), but the nickname of the WAVES stuck. (from Wikipedia)

2004.313.322	Brigade in Review: A Year at the U.S. Naval Academy, The	Stewart, Robert	This beautiful photographic journal of a year at the United States Naval Academy captures the demanding yet rewarding life of midshipmen, from their first hours as raw plebes to their commissioning as naval officers. Much more than just a picture book of the academy facilities, "The Brigade in Review" reveals the true nature of life at one of America's great institutions. The mission of the Naval Academy is to develop midshipmen morally, mentally, and physically, and to instill in them the highest ideals of duty, honor, and loyalty. This book gives readers an inside glimpse of the hardships, rewards, and highlights of academy life. From the rigors of Plebe Summer to the exaltation of

Object ID	Title	Author	Summary
			Commissioning Week, from inspections inside "Mother B" to the antics at the Army-Navy games, the real academy experience is captured in full color. Detailed captions and anecdotal quotes enhance these candid portrayals. But a midshipman's training does not stop at the end of a rigorous academic year. To round out the picture of what it means to attend the U.S. Naval Academy, Robert Stewart followed members of the brigade into the summer's professional-development programs, including aviation, submarine, and Marine Corps training, surface ship indoctrination, and leadership exercises. This colorful chronicle of daily life at the academy makes an ideal gift for alumni, friends and relatives of midshipmen, as well as other enthusiasts. Front and back cover photos by Robert Stewart ©1993 Front cover The brigade commander prepares to lead the brigade of midshipmen from Bancroft Hall to the parade field. During formal dress parades, the brigade demonstrates the manual of arms, then marches in review before the Naval Academy superintendent and commandant and their guests. Back cover: Midshipmen paint Tecumseh, the Indian figurehead that faces Bancroft Hall and Tecumseh Court, several times during the year to commemorate special events like Homecoming, the Army-Navy football game, and Commissioning Week. (from dust jacket flap)
2004.313.323	Landing-Force Manual, United States Navy, 1927	Navy Department, Bureau of Navigation	In the attempt to harmonize Army and Navy methods this book is based on the organization, drill and combat principles of the Army. This

			revision has brought it into line with present U.S. Army Training Regulations. Part I contains drill regulations for preliminary training of officers and men. Part II contains the organization of the landing Force. Part III contains the combat principles of the Infantry and machine gun units adopted from U.S. Army training regulations.
2004.313.324	Aircraft Carrier	Winston, Robert Alexander	The purpose of this book is to sketch the development of the aircraft carrier up to the entry of the United States into the War for Survival, to show how our aircraft carriers were employed in the early phases of that conflict and, in particular, to show the kind of men who manned these ships and made them into such formidable naval weapons that they changed the course of history in less than half a year.
2004.313.325	Monitor and the Merrimac: Both Sides of the Story, The	Worden, John Lorimer	The Battle of Hampton Roads, often referred to as either the Battle of the Monitor and Merrimack (or Merrimac) or the Battle of Ironclads, was the most noted and arguably most important naval battle of the American Civil War from the standpoint of the development of navies. It was fought over two days, March 8–9, 1862, in Hampton Roads, a roadstead in Virginia where the Elizabeth and Nansemond Rivers meet the James River just before it enters Chesapeake Bay. The battle was a part of the effort of the Confederacy to break the Union blockade, which had cut off Virginia's largest cities, Norfolk and Richmond, from international trade. (from Wikipedia)
2004.313.326	Naval Warfare	Navy Department, Office of the Chief of Naval Operations	FOREWORD Naval doctrine is the foundation upon which our tactics, techniques, and procedures are built. It articulates operational concepts that govern the employment of naval forces at all levels. A product of more than 218 years of U.S. Navy

Object ID	Title	Author	Summary
			and Marine Corps experience in warfighting, it incorporates the lessons of history, learned in both the flush of success and the bitterness of failure. This publication outlines the principles upon which we organize, train, equip, and employ naval forces. It explains how naval forces attain both enduring and evolving national objectives, emphasizing our participation in joint and multinational operations. It presents broad guidance for the total Navy and Marine Corps team, active and reserve. Every naval professional must understand its contents. C. E. MUNDY, JR. General, U. S. Marine Corps Commandant of the Marine Corps F. B. KELSO, II Admiral, U. S. Navy Chief of Naval Operations

2004.313.327	Naval Intelligence	Navy Department, Office of the Chief of Naval Operations	FOREWORD As in the past, naval intelligence is on watch today, supporting U.S. Navy and Marine Corps forces deployed around the world. Naval intelligence provides vital threat information on the location, disposition, capabilities, and intentions of our adversaries—actual and potential. It supports directly the naval commander's requirements for planning and executing combat operations. When applied effectively, naval intelligence focuses the commander's effort for decisive action against the enemy. It reduces risk to friendly forces and supports all levels of naval, joint or multinational operations, in peace and war. Naval Doctrine Publication (NDP) 2, Naval Intelligence, is the second in a series of six capstone documents that articulate naval doctrine and provide the foundation for the development of tactics, techniques and procedures.

2004.313.329	Joint Warfare of the US Armed Forces	Joint Chiefs of Staff	MESSAGE FROM THE CHAIRMAN Joint Warfare is Team Warfare When a team takes to the field, individual specialists come together to achieve a team win. All players try to do their very best because every other player, the team, and the home town are counting on them to win. So it is when the Armed Forces of the United States go to war. We must win every time. Every soldier must take the battlefield believing his or her unit is the best in the world. Every pilot must take off believing there is no one better in the sky. Every sailor standing watch must believe there is no better ship at sea. Every Marine must hit the beach believing that there are no better infantrymen in the world. But they all must also believe that they are part of a team, a joint team, that fights together to win. This is our history, this is our tradition, this is our future. COLIN L. POWELL Chairman Joint Chiefs of Staff
2004.313.330	Historical Manuscripts in the	Emery, George W.	The Navy Department

Object ID	Title	Author	Summary
	Navy Department Library : A Catalog		Library built the collection described in this bibliography over a period of many years. These historical manuscripts deal primarily with U.S. naval operations and policy and include information on the outlook and activities of a number of the Navy's past leaders. In terms of chronology, the collection predominantly covers the 19th century, although materials from the 18th and 20th
2004.313.331	First Class : Women Join the Ranks at the Naval Academy	Disher, Sharon Hanley	In the summer of 1976, Disher was among the 81 women who were the first females to enter the hallowed U.S. Naval Academy. Disher stuck out the tough regimen and graduated with her class, then served in the Navy Civil Engineer Corps. Here, she recounts what it was like for that first group of Naval Academy women: "I write this book to document history," she states. Following the group on a near-daily basis, Disher reports not her own experience but that of two classmates, Sarah Becker and Kate Brigman. The women endure the predictable embarrassments and goofs at the hands of an institution unaccustomed to having females in its midst. They must announce their bra sizes to attendants passing out military-issue everything. They must march and run while wearing three-inch heels, and must endure the taunts of male classmates furious at having their bastion invaded. Eventually, Becker begins an illicit relationship with an upperclassman that could jeopardize their fledgling Navy careers. Rather than examine why two young people would place themselves at such risk, however, and what that meant regarding Becker's role as a pioneering female, Disher reports the affair in bodice-ripping detail: "He stood beside her, slim, tanned and shirtless.... She tried not to stare at the soft, thin line of hair growing from his belly button to the top of his fly...." The adventures of

Object ID	Title	Author	Summary
			Brigman are accorded similar treatment. Neither of these women will feel repercussions from appearing in Disher's narrative, however. It turns out that Becker is a pseudonym, and Brigman is a composite character. This is a disappointing work, with too much adolescent fantasy romance mixed into its history. - From Publishers Weekly Copyright 1998 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. From Booklist In 1976, Disher was among the first female midshipmen at the U.S. Naval Academy. After graduating in 1980, she served on active duty with the Civil Engineer Corps for 10 years. She does not blow her own horn nearly as much as many will think she could, considering how much ignorance, opposition, and outright harassment she and the other women faced at Annapolis while simultaneously wrestling the normal problems of late adolescence with much less help than later generations take for granted. She survived, though, and remains committed to the navy and to expanding women's roles in it. Her book tends to support the navy's image as the most conservative service on issues of women in uniform. But it also shows that support for Disher and other women came from surprisingly many and odd places, and it affords a fascinating perspective on an aggressively all-male institution engaged in gender integration. Roland Green --This text refers to an out of print or unavailable edition of this title. (from Amazon.com)
2004.313.332	Spirited Years : A History of the Antebellum Naval Academy, The	Todorich, Charles	The antebellum years of the U.S. Naval Academy - the period from its founding in 1845 to 1861 when it moved to Newport, Rhode Island, for the duration of the Civil War - were spirited ones. They were

Object ID	Title	Author	Summary
			years filled with such legendary figures as George Bancroft, the forceful and politically wise secretary of the navy who managed to establish the school in spite of resistance from Congress, and Franklin Buchanan, the vigorous but stern disciplinarian who served as the first superintendent, and such rowdy midshipmen as-well, their names are best forgotten though their outrageous antics will live on forever. During these early years, the school made great strides toward becoming the respected military institution it is today. In less than a decade it developed from a mere finishing school for veteran sailors into a full four-year program, complete with summer cruises. The voyage to that end, however, was anything but smooth. As the author is quick to point out, rebellious midshipmen often stood in the way of efforts to graduate educated officers and gentlemen. This, then, is the story of the Academy's early struggles to establish itself. It is a serious study, the result of a historian's extensive use of primary sources to reveal information that has never before been published. At the same time, it is a highly amusing book that offers an account of life at the Academy only touched upon previously. With wry and engaging good humor, Charles Todorich describes the attempts of early superintendents to train midshipmen known for their disregard for regulations. Prone to drunkenness, duelling, fighting, vandalizing, and worse, these boisterous young men were a difficult lot to handle. Their exploits provide an entertaining counterpoint to the author's underlying analysis of the Academy's educational policies. Todorich, a graduate of the Academy and a former

Object ID	Title	Author	Summary
			history instructor there, delves into the goals of an Academy education as well as the ideals and attitudes of its midshipmen as no one else has. His book is also the first to seriously address claims by other writers that the officers were navalists first and nationalists second and that the Academy was not in the mainstream of the nineteenth-century system of education in America. From the lively escapades of the midshipmen, to the frustrations of the various superintendents, to the drama of the move from Annapolis to Newport at the outbreak of war, <i>The Spirited Years</i> is a story of human interest that will appeal to a wide audience. About the Author: Charles Todorich is a 1970 graduate of the U.S. Naval Academy where he majored in history and later served as a history instructor. He holds a law degree from the University of Maine and a master's degree in American history from the University of Maryland. After graduating from the Academy, Todorich attended flight school and went on to serve as a navigator and tactical coordinator aboard P-3 aircraft in deployments to Europe and the Far East, including Vietnam. Now a civilian, he is director of public and government affairs for the Maine Chamber of Commerce in Portland where he lives with his wife and two children. <i>The Spirited Years</i> is Todorich's first book. Naval Institute Press Annapolis, Maryland 21402 (from dust jacket flaps)
2004.313.333	Serving Proudly: A History of Women in the U.S. Navy	Godson, Susan H.	(from usni.org:) As women go to sea and take to the skies in ever-increasing

Object ID	Title	Author	Summary
			numbers in the modern U. S. Navy, the contributions of those pioneers who led the way loom larger than ever. This is the first scholarly history to cover comprehensively the full spectrum of women in the Navy, including the Navy Nurse Corps, the early Yeoman (F) program, the WAVES, and the ultimate integration of women into the operational Navy. Commissioned to write this monumental work by the Naval Historical Center, Susan Godson took full advantage of the Navy's massive documentary archives to reinforce what she learned through dozens of interviews. She recounts not only what these adventuresome women did, but why they did it. Included are the little-known exploits of the first documented Navy "nurses," Mary Allen and Mary Marshall, who in the spring of 1813 ran a British blockade in the frigate United States; the legendary Lucy Brewer, who served on "Old Ironsides;" and Loretta Perfectus Walsh, the first of thousands of Yeomen who served in World War I. The author paints a distressing but inspiring picture of the many obstacles faced and conquered by the women who dared to challenge not only the status quo but the formidable barriers created by the myopic, sometimes hostile, vision of their many opponents of both sexes. This timely account traces the long struggle from serving in "women's-work" jobs to command billets--a narrative of triumphs and failures, joy and frustration, service and sacrifice. From a hospital ship in the Civil War to combatants in the Cold War and beyond, women have left their mark in "this man's Navy," and this is their story.

Rockwell : The Heritage of North American

Yenne, Bill

Rockwell International is a multi—billion dollar, multi-industry corporation employing over 100,000 people at more

Object ID	Title	Author	Summary
			than 100 facilities in two dozen countries worldwide. It is one of the world`s industrial giants, but it is also one of the most important companies in the history of aviation. Rockwell International today carries on the legacy of North American Aviation, a company which. between 1934 and 1967, built more military aircraft than any other plane-maker in United States history — including 41,000 during World War II alone. Among these were the B-25 Mitchell, the airplane that Doolittle used to bomb Tokyo; the AT-6 Texan, the most important trainer of all time and the P-51 Mustang, the greatest piston-engined fighter in history. After World War II, North American took the lead in high performance jet aircraft with the development of the F-86 Sabre Jet, the first fighter to break the sound barrier (some people say the first aircraft of any type) and the plane with more aerial combat victories than all other jet fighters combined. North American and Rockwell have also played an essential role in the American space program, having been responsible for the Apollo spacecraft that took man to the moon and the Space Shuttle Orbiting Vehicle that made manned spaceflight routine. Indeed, Rockwell built the manned spacecraft which have carried all but five of the more than one hundred Americans to fly in space. The story of North American and Rockwell is one of the most exciting chapters in aerospace history and it is vividly brought to life in these colorful pages. With over 250 photographs, diagrams and cutaway drawings. (from dust jacket flap)

2004.313.348	Most Fortunate Ship, A : A Narrative History of Old Ironsides	Martin, Tyrone G.	Amazon.com Review Considered a definitive account when first published in 1980, A Most Fortunate Ship is now available in a revised edition to commemorate the bicentennial anniversary of the USS Constitution, America's most famous naval vessel. The warship earned the nickname "Old Ironsides" because of its apparent invincibility fighting enemy ships such as the HMS Guerriere, the HMS Java, and ships sailed by the Barbary pirates. The prose is good, but the graphics are even better: beautiful illustrations dot these pages, as do rare photographs and helpful battle diagrams. Tyrone Martin's depiction of everyday life in the early 19th-century American navy is especially interesting. --This text refers to an out of print or unavailable edition of this title. Product Description Called a definitive account when first published in 1980 and the winner of several book awards, this revised and expanded edition is available now for the first time in paperback. Tyrone G. Martin, the author, was captain of the USS Constitution during the

Object ID	Title	Author	Summary
			nation's bicentennial celebrations. After decades of research and study, Martin was able to confirm that the innovative diagonal riders which ensured the frigate's long life were present at the ship's launching. He also provides details about the famous ship's participation in battles that have long been ignored or glossed over in official reports. Pictorial battle diagrams are included. The book not only tells Constitution's complete story, but also presents a picture of life in the U.S. Navy during the nineteenth century--its proud moments as well as its concerns, attitudes, and tensions. Fascinating details are presented on the organization, care, feeding, and disciplining of the crew, and on events that involved such famous names in early American naval history as Edward Preble and Stephen Decatur. Just as previous editions were sought-after as sources of pleasure and information, this new edition will appeal to everyone who enjoys a good sea story and to serious students and sailing ship buffs seeking a reliable reference. 440 pages. 47 photographs. 7 line drawings. 5 maps. Notes. Glossary. Bibliography. Index. Paperback. 7 x 10 inches.
2004.313.349	World War II Warships	Lyon, David J.	From the armored might of the battleship to the deadly power of the submarine, "World War II Warships" surveys the major vessels used in combat by the principal navies of the Second World War. Seapower, one of the most traditional weapons of strategy, was remorselessly affected by twentieth century technology during these years, as the navies of the world adapted to attack from the air and the invention of radar. This detailed but clear account describes how they responded to the challenge, and discusses and evaluates the ships which saw action — the brilliant but flawed German designs, the

Object ID	Title	Author	Summary
			extraordinary and original Japanese ships, the classical, austere British warships, the ill-fated French and Italian vessels and the often underestimated US fleet. The development, construction and fighting role of over 50 of these warships — cruisers, battleships, aircraft carriers, destroyers and submarines — are individually described and placed within the context of their class. Each vessel is accompanied by a full technical specification with detailed color drawings and contemporary photographs of the ship in action. Cover: A 'South Dakota' class battleship off Okinawa (US Navy) (from dust jacket flap)
2004.313.350	U.S. Armored Cruisers : A Design and Operational History	Musicant, Ivan	This beautifully illustrated, large-format book is the first to deal solely with U.S. armored cruisers, those handsome but expensive ships that had such a significant effect on American naval policy at the turn of the century. With rare photographs and specially commissioned drawings, it offers a comprehensive design history of the twelve armored cruisers built between 1888 and 1910. Unlike most such histories, which tend to study vessels in a vacuum, this book places the cruiser in a matrix of technological, naval, and world events. It also adds an interesting human dimension to the story of the armored cruiser's development. To present a complete and accurate picture of each of the warships in the armored cruiser program, author Ivan Musicant has done a remarkable job of pulling together widely scattered sources of information. Beginning with the New York and Brooklyn, both of which saw action in the Battle of Santiago, and followed by the six

Object ID	Title	Author	Summary
			Pennsylvanias and four Tennessees, he provides numerous details, which include dimensions, speed, endurance, armament, machinery, N, protection, and modifications, and an operational history of each type.
			Using memoirs and other personal documents of the men directly involved, Musicant gives engaging accounts of the ships' careers and of the times in which they operated. Anecdotes of life on board the cruisers and a lively description of the Spanish-American War further widen the book's appeal.
			Warship enthusiasts and naval historians will turn to U.S. Armored Cruisers both for its superb nuts-and-bolts ship descriptions and for its overall appraisal of the ship type that eventually led to the development of the battle cruiser.

2004.313.353	Privateers & Volunteers : Men and Women of our Reserve Naval Forces, 1766 to 1866, The	Stivers, Reuben Elmore	FOREWARD: An institutionalized reserve of trained sailors for the U. S. Navy has existed less than 60 years. It was preceded by uniformed, state-sponsored naval militia units started during the administrations of Grover Cleveland and Benjamin Harrison. The members of these units were rifle-carrying "sailor-soldiers" who were expected only to defend the coastline of the state in which they were enrolled. Their military organization was similar to that of the state-owned army militia units which later became the National Guard. With the advent of the Spanish-American War, the government nevertheless supported the Navy's emphatic contention

Object ID	Title	Author	Summary
			that these naval militiamen should serve at sea. Accordingly, the few thousand militiamen then enrolled were given leave by the governors of their states in order that they might enlist in the Navy for "the duration" or one year. Most of them, of course, served less than four months on active duty. Those who found they liked the Navy and the sea, and didn't get too violently seasick, returned to service with their respective state organizations. So surprisingly successful was this experiment by the Navy, however, that planners in the Navy Department began to clamor for a separate naval reserve under the direct and continuous control of the federal government. For many reasons, most of which were valid enough at the time, it took another two decades to sell this idea to the Congress. It was finally accomplished after war broke out in Europe and in time for tens of thousands of men proudly to write the letters USNR after their names during World War I— and ever since. That part of the story of our Naval Reserve—from the 1880s to the 1970s—is generally familiar to many history-minded Americans. What is considerably less well known is that long before the days of the all-steam "New Navy" of battleships and cruisers, our country certainly was benefited, if not actually saved, by seagoing men who were naval reservists in everything but name, uniform, and institution.
2004.313.355	Battleships of World War I : An Illustrated Encyclopedia of the Battleships of all Nations, 1914-1918	Preston, Antony	A battleship is a large armored warship with a main battery consisting of heavy caliber guns. Battleships are larger, with better arms and armor, than cruisers and destroyers. As the largest armed ships in a fleet, battleships were used to attain command of the sea and represented the apex of a nation's naval power from about 1875 up until World War II.

Object ID	Title	Author	Summary
			With the rise of air power, guided missiles, and guided bombs, large guns were no longer deemed necessary to establish naval superiority and as a result battleships faded from use. Battleship design evolved to incorporate and adapt technological advances to maintain an edge. The word battleship was coined around 1794 and is a contraction of the phrase line-of-battle ship, the dominant wooden warship during the Age of Sail. The term came into formal use in the late 1880s to describe a type of ironclad warship, now referred to by historians as pre-dreadnought battleships. In 1906, the commissioning of HMS Dreadnought heralded a revolution in battleship design. Following battleship designs, influenced by HMS Dreadnought, were referred to as "dreadnoughts". Battleships were a symbol of naval dominance and national might, and for decades the battleship was a major factor in both diplomacy and military strategy. The global arms race in battleship construction began in Europe, following the 1890 publication of Alfred Thayer Mahan's "The Influence of Sea Power Upon History, 1660–1783." This arms race culminated at the decisive Battle of Tsushima between Japan and Russia in 1905, the outcome of which significantly influenced the design of the British HMS Dreadnought. The launch of the Dreadnought commenced a new naval arms race, which was widely considered to have been an indirect cause of World War I. The value of the battleship has been questioned, even during the period of their prominence. In spite of the immense resources spent on battleships, there were few pitched battleship clashes. Even with their enormous firepower and

Object ID	Title	Author	Summary
			protection, battleships were increasingly vulnerable to much smaller, cheaper ordnance and craft: initially the torpedo and the naval mine. (from Wikipedia)
2004.313.357	Command at Sea	Stavridis, James	Long considered the bible of commanding officers at sea, this classic guide covers virtually every subject of relevance to the command of a U.S. Navy ship. The first revision in fifteen years, the fifth edition represents a major update in material--from assuming command and relations with the crew to fleet operations and combat. Among the issues addressed are the many aspects of seagoing command practice and maritime operations that have changed as a result of lessons learned from operations in the Persian Gulf, Bosnia, and Haiti. Changes in the Unified Command Plan are indicated by shifts in the commanding officer's chain of command and geographic and functional responsibilities of the CINCs. This new edition also reflects the current emphasis on joint and combined operations and its resulting impact on command operations. Additionally, the book covers the dramatic downsizing of the fleet, the inclusion of women on warships, and the significant changes that have occurred in maintenance support and practices, forward deployed support, and afloat logistics. The domination of automatic data processing on daily routines is discussed along with important changes in communications. A large selection of new photographs and many useful appendixes are included in this revision. No officer either presently in command or contemplating a future shipboard command assignment can afford to be without such an informative, up-to-date guide.

2004.313.358	Ship Organization and Personnel	None Stated	(from usni.org) Foreword: The Fundamentals of Naval Science series is designed to introduce the student to the basic knowledge required of a naval officer. The midshipman and the officer candidate can learn many of the things they must know about their profession from these books. The junior officer may use these volumes to guide him in performing his duties aboard ship. These books were developed with the help of the faculties of each major naval officer training program; namely, the U.S. Naval Academy, Officer Candidate School, and Naval Reserve Officer Training Corps. The result of this extensive cooperation between the Navy's professional society and the Navy's academic institutions for training officers is the creation for the first time of a Navy-wide standard source of information, with which every officer coming into the Service will become familiar, and which can form part of each officer's basic professional library. Keep them within easy reach... they will serve you well. JAMES CALVERT Vice Admiral, U.S. Navy
2004.313.360	Battleships and Battle Cruisers, 1905-1970	Breyer, Siegfried	Comprehensive and definitive work contains descriptions of all ships representative of their kinds which were started by all maritime nations during the period covered, irrespective of whether they were taken into service, remained uncompleted, or only reached the drawing board stage. with 922 side elevations, deck plans, cross sections, and detail sketches, including an introduction: Historical development of the capital ship. Translated from the German by Alfred Kurti.

2004.313.363	Tailhook Report : Official Inquiry into the Events of Tailhook '91, The	United States Department of Defense, Office of the Inspector General	The Tailhook scandal refers to a series of incidents where more than 100 U.S. Navy and United States Marine Corps aviation officers were alleged to have sexually assaulted at least 83 women and 7 men, or otherwise engaged in "improper and indecent" conduct at the Las Vegas Hilton in Las Vegas, Nevada. The events took place at the 35th Annual Tailhook Association Symposium from September 8–12, 1991. The term can also refer to the resulting investigations conducted by the Department of the Navy and the Inspector General of the Department of Defense. As a result of the subsequent investigations, a number of officers were formally disciplined or refused advancement in rank. Controversially, military officers and observers have alleged that flag officers attending the symposium were not held accountable for knowingly allowing the behavior in question to occur. Military critics claimed that the scandal highlighted a hostile attitude in US military culture towards women in the areas of sexual harassment, sexual assault, and equal treatment of women in career advancement and opportunity. Object ID	Title	Author	Summary
			compiled by Rear Admiral U.S.N., Ret Joseph Bryan Icenhower as part of the Watts Seapower Library with an Introduction about the men who courageously competed in gallant warfare and with an excerpt honoring Comdr. Lawson P. Ramage who received the Congressional Medal of Honor for his service on the USS Parche July 1944. 15 Chapters about U.S. and German subs and U-boats from the sinking of the Yorktown at Midway, to the Takao in Singapore Harbor, War Patrol Life of German U-505 by Hans J. Decker; to other authors Dan Gallery, Harald Busch, Richard Baxter, Editors of Navy Times, W. G. Carr, J. Valerio Borghese, WM C. Chandliss, Wm R. Anderson, Clay Blair Jr. who lived through these heroics on both sides of the war concluding with an Index.
2004.313.365	Fighting Under the Sea	Macintyre, Donald G. F. W.	Fighting Under the Sea, the story of submarines through WWII and the heroic men who fought in them underseas with 12 Chapters from the Pioneers, ocean-going Submarines, Horton in the Baltic, the Seawolf of the Atlantic, Skagerrak and the Straits, Malta Flotilla, Rommel, Mediterranean, Medal of Honour and success in Japanese Waters with black & white photographs during WWII describing when submarines first became fighting fleets during the early 20th century. Submarines services had a great influence on the outcome of two World Wars for both the allies and the German U-boats.
2004.313.366	Atomic Submarines	Polmar, Norman	(from dust jacket flap:) ATOMIC submarines - capable of remaining completely submerged for months at a time, able to travel for years without refueling, and armed with nuclear-tipped long range missiles that can be aimed with deadly accuracy -are one of the most powerful deterrents to nuclear warfare in the explosive age in which we live. Other

Object ID	Title	Author	Summary
			atomic submarines - fast, agile hunter-killer craft - are in turn a prime defense against an enemy's submarines. This exciting book tells the story of these submarines. It is highlighted by almost 100 illustrations, some never before published, which dramatically picture the evolution that has made submarines underwater vehicles rather than surface craft which could remain submerged only for a few hours or at most a few days. Atomic Submarines tells of the men and events that produced these craft - of the early inventors and naval officers, some shortsighted, others years ahead of their time; of aggressive German submarine operations in two world wars; of tenacious American naval officers who fought post-war apathy; of imaginative designers and builders; and of the daring commanders and crews of these revolutionary craft who proved the submarine was a weapon to be reckoned with. The author follows the first atomic subs Nautilus, Skate, Sargo and Seadragon, on their epic voyages under the Arctic ice pack to the North Pole, and the remarkable underwater, around-the-world cruise of the Triton. He describes the frustrations and technical breakthroughs in the Polaris submarine missile program and the hopes for nuclear-powered merchant submarines in the future. Reading this authoritative book, you will appreciate the time, energy and lives that went into building - and destroying - submarines. Here too, is the story of men who worked for days and nights, without rest, to surmount the overwhelming problems involved in designing and building these submarines; and of other men who worked for hours with their bare

Object ID	Title	Author	Summary
			hands, in below-freezing temperatures, to keep these submarines operating so they could carry out their spectacular assignments. Atomic Submarines is the important and vital story of the craft and men that, at this very moment, are influencing our lives and the future of the world. Completely up-to-date 1964 revised printing. Appendixes include: Dimensions and particulars of atomic submarines. Names of atomic submarine commanders. Atomic submarine builders, sponsors and commission dates.
2004.313.367	Pictorial History of Oceanographic Submersibles, A	Sweeney, James B.	History of submersibles. Topics include: Pictorial representation of early Submersibles; Submarines; Beginning of Oceanography; Manned Submersibles for Nonmilitary Use; Undersea Habitats and Saturation Diving.
2004.313.368	Subs and submariners	Whitehouse, Arthur George Joseph	Subs and Submariners dedicated to the officers and men of U> S> Skipjack (SSN 585) who on September 30, 1959 took the author many fathoms deep in the North Atlantic and elected him an honorary member of ship's company. Introduction by the author and nine chapters about cause and effect, the submarine goes to war, u-boats and Q-boats, historical events, battles in the North Atlantic, Pearl Harbor, raids and rewards with the conclusion, glossary, bibliography, and Index with black and white photographs.
2004.313.369	Squadrons of the Sea	Whitehouse, Arthur George Joseph	This is a story of the historic naval-air conflicts as they were fought between 1939-45. It is a general history of aircraft carriers, written and presented in a form designed to appeal chiefly to the non-Navy reader or general public. It is the authors intent to clarify the role of the naval carrier by presenting its history, and relating the story of it triumphs and sacrifices in a manner

Object ID	Title	Author	Summary
			comprehensive to the lay reader.
2004.313.372	Vengeance in the Depths : The Nuclear Submarine	Steele, George P.	Today, on this earth, there exist spaceships such as men have dreamed of for generations. Perfectly balanced against the forces of gravity, these underwater space craft, or submarines, powered by nuclear reactors are the masters of our watery "inner space." Like outer-spaceships of the future, modern submarines are totally isolated from their environment, yet they can communicate with their bases. The depths of the sea are not man's natural habitat. The weight of the water presses down on the submerged submarine with terrific force. A rupture of the hull would bring swift death.
2004.313.373	Rendezvous at Midway : U.S.S. Yorktown and the Japanese Carrier Fleet	Frank, Pat	This is the story of the birth, life, and death of a fighting ship, the U.S.S. Yorktown, much of it told in the words of the men who served in her, and of their enemy counterparts. In the Battle of Midway, fought entirely with aircraft, Yorktown's pilots destroyed a greatly superior Japanese battle fleet, crippled the Japanese Navy, and ended the threat of invasion in the Pacific.
2004.313.374	Two-Block Fox : The Rise of the Aircraft Carrier, 1911-1929	Melhorn, Charles M.	This study examines the means by which the carrier came into its own, from a crude beginning in 1911, through the years of opposition from within an economy minded Congress, the Army Air Service, and the Navy itself, to its first great tactical triumph in 1929.
2004.313.376	Age of the Battleship, 1890-1922, The	Harris, Brayton	The Age Of The Battleship 1890-192 The Watts Histories of the United States Navy by Lt. Cmdr, U. S. N. R. Brayton Harris with 16 Chapters about the new navy, the american revolution to the Spanish-American War, both world wars with Index and black and white photographs.

			1920s and 1930s limited the number of battleships but did not end the evolution of design. Both the Allies and the Axis Powers deployed battleships of old construction and new during World War II. The value of the battleship has been questioned, even during the period of their prominence. In spite of the immense resources spent on battleships, there were few pitched battleship clashes. Even with their enormous firepower and protection, battleships were increasingly vulnerable to much smaller, cheaper ordnance and craft: initially the torpedo and the naval mine, and later aircraft and the guided missile. The growing range of naval engagements led to the aircraft carrier replacing the battleship as the leading capital ship during World War II, with the last battleship to be launched being HMS Vanguard in 1944. Battleships were retained by the United States Navy into the Cold War only for fire support purposes. The last US battleships, USS Wisconsin and USS Missouri, were decommissioned in 1991 and 1992, and finally stricken from the U.S. Naval Vessel Register in 2006 and 1995, respectively. (from Wikipedia)
2004.313.380	They Fought Under the Sea : The Saga of the Submarine	Navy Times	This is a story of the depths of the sea, of the men who conquered it and of the navies they forged with which to make of these depths a watery battlefield. It is a chronicle of deeds and of the vessels in which these deeds were accomplished. While its intent is to record the alpha of submarining, the testament of the omega must remain -- we hope -- the task of a future historian.
2004.313.382	American Battleships, 1886-1923 : Predreadnought Design and Construction	Reilly, John C.	(from dust jacket flap:) Here for the first time is a comprehensive analysis of American predreadnought battleships. These first-

Object ID	Title	Author	Summary
			generation capital ships were completed for the United States Navy during the 1890s and early 1900s, the formative years of what was to be one of the most powerful navies of the twentieth century. Because the battleship was once considered the principal ship of any major navy, an accurate appraisal of these ships is essential to an understanding of the military power of the United States during this period and of their effect on the conduct of America's foreign policy. This book provides more than an informative introduction to an historic line of great ships in that it includes specific detail on physical and tactical characteristics such as dimensions, speed, endurance, armament, and protection for each of the twenty-seven ships in the ten classes of predreadnought construction. The text includes a thorough account of how these ships were funded, designed, built, and modified during their years of service. The authors have extensively researched the files of the original Bureau of Construction and Repair not only for their wealth of technical data, but also for the many rare photographs and drawings that so amply supplement the text. Many of these remarkable illustrations have never before been published. Following a brief introduction that broadly defines the historical context in which the predreadnought warship was developed, the book begins with an analysis of the first American battleships, the Maine and the Texas. What follows provides complete data on those great ships that bridged the gap between the ironclads of the nineteenth century and the massive dreadnoughts of the twentieth. While much has been written about the activity of these ships, which included the voyage of

Object ID	Title	Author	Summary
			the "Great White Fleet" from 1907 to 1909, little attention has been focused on the ships themselves. John Reilly and Robert Scheina have provided naval historians and warship enthusiasts with a reliable guide to the design of these ships. American Battleships 1886-1923 will long be regarded as the primary source for data on a critical period in the history of warship construction and development. About the Authors John C. Reilly, Jr., received his master's degree from the Catholic University of America in 1966. After setting up a technical and historical library for Coast Guard Headquarters, he joined the staff of the Naval Historical Center in 1967 and is presently a historian in the Center's Ships' Histories Branch. He has written a number of articles for military and historical periodicals; with Robert Scheina he assisted Rear Admiral Ernest M. Eller, USN (Ret.), in writing the article "Naval Ships and Craft" for the current edition of Encyclopedia Britannica. He has also written articles on naval ordnance and anti-submarine warfare for the McGraw-Hill Encyclopedia of Science and Technology; his most recent work, published by the Naval Historical Center, is "The Bronze Gun of Leutze Park," a discussion of early smoothbore ordnance. Robert L. Scheina has authored numerous articles for leading international maritime journals including the Naval Institute Proceedings, Marine-Rundschau, Navy International and Surveyor. He and John Reilly co-authored with Rear Admiral Ernest M. Eller, USN (Ret.), the "Naval Craft" entry for the Encyclopedia Britannica, 15th edition. Doctor Scheina received his doctorate from the Catholic University of America in 1976. He served as an, historian with the Naval

2004.313.383	American Battleship at Peace and War, An : The U.S.S. Tennessee	Utley, Jonathan G.	The USS Tennessee was no ordinary ship. When she set sail in 1920, she was touted as the most powerful ship in the world. Massive steel armor more than a foot thick and a dozen 14-inch guns made her a match for anything afloat. When Tennessee went to war in 1941, she was already obsolete. Yet she survived the attack on Pearl Harbor and saw action in battles that became legendary : Tarawa, Kwajalein, Eniwetok, Saipan, Surigao Strait, Iwo Jima, and Okinawa. She was one of only two battleships to earn a Naval Unit Citation for action during World War II.
2004.313.385	Principles and Problems of Naval Leadership	Bureau of Naval Personnel	Principles and Problems of Naval Leadership, NAVPERS 1959 with Preface states that the naval officer is a leader responsible for directing the human effort of organization for property and lives and is a planner, industrialist, comptroller diplomat and manager as well as a student with opportunities and varied experience. The Introduction states the book is an attempt for the naval officer to learn to synthesize psychology, human relations and management, morals and ethics in the Navy context. There are 14 Chapters with the Case of the.....dealing with various circumstances and outcomes. There are Appendixes, Bibliography and Index to Cases and Principles and a General Index.
2004.313.386	Silent Service : U.S. Submarines in World War II, The	Lowder, Hughston E.	An alphabetical list of submarines with an Introduction by the author and a quote by Lt. Cdr. Dudley W.

Object ID	Title	Author	Summary
			"Mush" Morton, U. S. S. Wahoo (SS-238), 1942-1043 followed with a Bibliography and the list and descriptions of the submarines in World War II. It is a detailed presentation with the operations of each submarine from launching to final disposition (7 December 1941 thru 15 August 1945) describing patrols, sinking enemy ships, bombarding shore installations, lay mine fields, land guerillas in enemy held territory, rescuing downed aviators from the ocean, as well as suffering retaliatory depth charges and bomb attacks by enemy destroyers and aircraft. The Appendix contains specifications of submarines in service including dimensions, displacement, diving test depth, armament, power plant and other information. Losses and fatalities are included. The author participated in seven submarine war patrols in the Pacific, is the editor of Polaris magazine and other nonfiction books
2004.313.387	Silent War : A History of Western Naval Intelligence, The	Deacon, Richard	Silent War with Contents, Illustrations, Black and White Photographs, Notes, Bibliography, Acknowledgements and Index about WW II, Submarines, Communications, Admiral Hall, Germany, Pearl Harbor, the Cold War Spy-Ships, Ocean surveillance and Glimpse into the 1980's.
2004.313.388	Genius of Naval Warfare, The - II Tactics	Daveluy, René	PREFACE TO THE SECOND EDITION: No sooner has a book been finished and published than the author perceives that he has forgotten to emphasize certain points; that he has left others obscure. And he is disconsolate. Yielding to this feeling, we have taken advantage of this second edition to develop further some of the chapters. We have likewise utilized the recent war to strengthen then our arguments. But nothing has been changed of the original text; the Russo-Japanese conflict could not alter the

2004.313.391	Sailors and Scholars : The Centennial History of the U.S. Naval War College	Hattendorf, John B.	Sailors and Scholars with frontispiece of Rear Admiral Stephen B. Luce, 1827-1917, founder and first president of the Naval War College. Painting by Frederic P. Vinton, 1900, in the Naval War College. Contents includes the list of illustrations, President's Foreword, Author's Preface, 12 Chapters, Appendix A, and Index. President's Foreword for the Centennial 1884-1984 by James E. Service, Rear Admiral, U. S. Navy, President. On October 6, 1884 William E. Chandler, Secretary of the Navy founded the Naval War College by General Order which stated that it was established for an advanced course of professional study for naval officers and to be known as the Naval War College. It is the oldest continuing institution of its kind detailing the first hundred years and its controversies and arguments, differences of opinion and issues for which a military education has demands on the limited amount of student time. There are 67 photographs about significant events and changes during the 100 years.
2004.313.393	Dreadnought to Polaris : Maritime Strategy since Mahan	Hyatt, A. M. J.	Dreadnought to Polaris with the Editor's Introduction regarding naval history and scholars. Contents include 9 Chapters and References referencing Admiral A. T. Mahan stating that historians generally have been unfamiliar with the conditions of the sea without special interest or knowledge and that maritime strength has been overlooked. Chapters deal with papers written about the strategic problems on a global scale with insight into the problems of maritime strategy by the Conference on Strategic Studies with the History department of the University of Western Ontario and the Canadian Institute of International Affairs.

Object ID	Title	Author	Summary
2004.313.395	Battleships : United States Battleships, 1935-1992	Garzke, William H.	Part of a three-volume set on the world's battleships, this book provides a comprehensive history of all U.S. Navy battleships and battlecruisers built, designed, or projected built since the early 1930s. It covers their design and construction, operational careers, and eventual disposition. Complete plans are presented for many classes as well as extensive technical data covering their characteristics and performance, information that is sometimes hard to find and often contradictory. The operational careers of the ships are chronicled in detail. Incidents that challenged a ship's design adequacy, particularly from the standpoint of damage resistance, are discussed. Originally published in 1976 with the subtitle U.S. Battleships in World War II, the book has undergone significant revision. Not only has it been brought up to date with the addition of a new chapter covering the Iowa-class reactivation through 1992, but the book now includes revelations uncovered in newly accessible material. The authors offer a complete description and analysis of the tragic turret explosion aboard the USS Iowa in April 1989, with conclusions that differ from those widely reported by the media and from those officially presented by the Navy. In an appendix, they bring to light for the first time the full extent of President Franklin D. Roosevelt's involvement in the shaping of the U.S. fleet and credit him with influencing the design, construction, and deployment of battleships and battlecruisers built during his administration. For example, they cite Roosevelt as the individual responsible for the speed and endurance of the Iowa - class battleships and the design and construction of the Alaska-

Object ID	Title	Author	Summary
			class battlecruisers and for controlling the number, general characteristics, gunnery, and antiaircraft armament of other classes as well. In addition, this massive work now offers information about the secret development of accurate long-range major- caliber gunfire control in the period before World War II, the proposed conversion of the Iowa and Alaska ships to aircraft carriers, and the twin-skeg problems encountered by battleships. Ship histories have been updated to include details about the service of the four reactivated Iowa battleships and their recent retirements. With these changes and additions, U.S. Battleships is without question the most timely and comprehensive reference available on the ships that were once regarded as the ultimate naval weapon - ships that influenced foreign policy and naval strategy and captured the imagination of people throughout the world. The book is an indispensable source of information for naval historians, ship buffs, model makers, and others who even now, more than forty years after the last battleship was built, are fascinated by the majestic warships. Cover Design: Miriam Recio Front photo: The Iowa fires a 16-in and 5-in salvo. (USS Iowa) Back illustrations: The Massachusetts (Thomas G. Webb)
2004.313.396	Find and Destroy : Antisubmarine Warfare in World War I	Messimer, Dwight R.	WWI was the crucible of antisubmarine warfare (ASW), and the years of trial and error between 1914 and 1918 gave rise to the weapons and tactics used by today's ASW forces. With this study, the author examines the weapons, tactics, and organization of all the belligerents during the war, viewing them within the context of political,

2004.313.397	Cruisers	Preston, Antony	Cruisers, although they have fought in every major naval action of the twentieth century, have always been a difficult type of ship to categorize. They fill the gap between battleships and destroyers. In the eighteenth century the term 'cruizer' was applied to any warship on detached duty. The independent mission remained one of the cruiser's tasks and the German Panzerschiff or pocket battleship of World War II was in fact an armored cruiser intended for commerce raiding. The Panzerschiff met its match at the Battle of the River Plate, when the Admiral Graf Spee was convincingly defeated by the British cruisers Exeter, Ajax and Achilles. The cruiser also took its place in the battlefleet. Admiral Beatty's battlecruisers opened the fighting at Jutland in 1916 and suffered appalling losses. In World War II the cruiser Prinz Eugen opened the action with HMS Hood and her shells may have caused the explosion which destroyed the British battlecruiser. The naval battles off Guadalcanal in the Pacific saw American cruisers fighting their Japanese counterparts for control of this strategically-important island. In the years following World War II the

Object ID	Title	Author	Summary
			cruiser rapidly declined in importance, but with the introduction of the guided missile the cruiser has regained its place in the world's major navies. Antony Preston, one of Britain's most respected naval historians, unravels the complex history of the cruiser. His text is complemented by numerous photographs and maps. "Cruisers" is a book that will appeal to every naval war buff. (from dust jacket flap)
2004.313.398	U.S. Marine Corps : An Illustrated History, The	Bartlett, Merrill L.	(from usni.org:) The proud and the few come to life in words and images in this new history of the U. S. Marine Corps. Based on extensive research and filled with more than two hundred illustrations, the book provides a comprehensive warts-and-all study and a celebration of the exploits of a colorfully unique armed service. A retired Marine lieutenant colonel and a well-known scholar--both accomplished authors and former history professors at the U.S. Naval Academy--have teamed up to create this carefully balanced account. The work covers in detail not only the epic battles of the world wars and harrowing struggles in Vietnam and Korea, but the formative years of the eighteenth and nineteenth centuries. Readers will find thrilling tales of the Continental Marines fighting for American independence and a revealing account of the interactions of the USMC and CSMC during the Civil War as well as the awe-inspiring, bloody struggle for Iwo Jima and the legendary fighting withdrawal in Korea at Chosin. Many of the personalities presented are familiar--among them Chesty Puller, Smedley Butler, and Archibald Henderson--but

Object ID	Title	Author	Summary
			new names, faces, and deeds emerge as the authors probe deeply into Marine history. A few classic photographs are included, but many illustrations appear for the first time or are reprinted from seldom-seen nineteenth-century sources. While avoiding the sensationalistic, the images often capture the true horrors of war in stark detail. Historians and Leathernecks alike will find much to savor in this lively,
2004.313.402	Take Her Deep! : A Submarine Against Japan in World War II	Galantin, I. J.	TAKE HER DEEP! A Submarine Against Japan in World War II with Author's Note, Illustrations & Photographs in black and white, an introduction by Edward L. Beach, noted author and Silent Service veteran; Appendix I and II with letter from James Forrestal, Secretary of the Navy. On August 12, 1943, on Midway Island, Lt. Cmdr. I. J. "Pete" Galantin was in command of the fleet submarine U. S. S. Halibut already a veteran of five combat patrols against the Empire of Japan. Galantin and officers and crew spent fourteen months attacking Japan's navy and merchant marine. After many battles, depth charges, repairs the badly damaged sub made way for Saipan. It was Halibut's last mission; she was sent home for good. Decorations were awarded to those on board and the ship given the prized Navy Unit Commendation. Pete Galantin rose to become a four-star admiral in the United States Navy and was encouraged by shipmates to write their story.
2004.313.405	Wahoo : The Patrols of America's Most Famous World War II Submarine	O'Kane, Richard H.	Worthy of 7 Stars November 30, 2005 By Steve Dietrich VINE™ VOICE O'Kane fills this fantastic book with a great account of courage, leadership and seamanship. It is easy to get wrapped up in this as a "war book" since it goes to the top of the class. However, rather than repeat what other fine reviews have noted I would also expand the book to a classic on leadership.

Object ID	Title	Author	Summary
			O'Kane is onboard with legendary Skipper Mush Morton. I run into a lot of people in business who complain about the challenge of motivating both their company personnel and their suppliers/customers. What greater motivational challenge than to take a group of young sailors on a 12,000 mile cruise, packed like sardines in a tube and surrounded by people attempting (far too often with success) kill you. His and his fellow officer's leadership kept the boat on the offense, with the crew believing in the mission and their fellow sailors. There's enough detail to get out a plotting board (or at least arrange the cocktail almonds) to duplicate the seamanship involved in putting the submarine in the middle of enemy convoys on a dark night at the right place to fire at several targets. I have a strong feeling that in today's society we tend to confuse heroism with victims. True heroes are those who understand the risks they are taking and yet continue their mission despite the risks. For O'Kane and the crew it is a story of functioning as true heroes for months on end. UPDATE : This fall (2006) the Navy confirmed that the sunken submarine located recently in the Sea of Japan was in fact the Wahoo. After 50 years the final resting place of Morton and the crew has been located. 25 of 25 people found the review helpful 16 of 16 people found the following review helpful How the Silent Service came to wage "Unrestricted Warfare" July 5, 2001 By A Customer

Object ID	Title	Author	Summary
			Submariners accounted for less than 2% of the entire U. S. Navy in World War Two - but they accounted for 60% of Japanese merchant marine losses and 30% of Japanese navy losses. After the war, Japanese officials conceded that the virtual strangulation of the Japanese home islands - largely by the U.S. submarine force - was the primary cause for the defeat of the Japanese military. How this victory was won is told in microcosm by Dick O'Kane's fine book on USS WAHOO (SS238). O'Kane served as Executive Officer on WAHOO for every patrol but its last - and went onto to command his own boat, the legendary USS TANG (SS306) - which was also one of the most successful submarines of the war. After the attack on Pearl Harbor, the only effective offensive weapon available in the Pacific was the submarine, and the U.S. immediately commenced unrestricted submarine warfare. Unfortunately, the submarine force - like the rest of the Allied world - was not quite ready from the start to take on this new challenge. Boats immediately deployed long distances to take the war to Japan, but the results were mixed. Pre-war tactics - largely based upon remaining undetected as forward elements of battleship-based fleet movements - were of very limited value in independent, forward deployed operations against the Japanese. WAHOO's first patrols reflected this defect - the CO was unwilling and untrained to engage in aggressive actions to find and pursue (for the most part in surface transit) and engage in risk taking to ensure the destruction of high value Japanese targets. It was only with the insertion of younger officers - WAHOO's LCDR "Mush" Morton was among those that showed the way early on, revolutionizing the

Object ID	Title	Author	Summary
			submarine force and its tactics - that significant victories were realized. The courage of these crews - sailing alone thousands of miles from base to engage the enemy in their home waters - cannot be denied. Their intelligence, innovation, hard work and persistence should also be credited. The challenges that were overcome were intimidating - one of the greatest being the U. S. Navy's own Ordnance Bureau. The gross deficiencies in the quality and effectiveness of the U.S. Navy's torpedoes in World War Two were criminal. The WAHOO deployed in the Sea of Japan - on their penultimate patrol - and every warshot fired was a dud. The Navy Bureau's response was to deflect blame on to the boats for poor shooting - an unconscionable act of cowardice, when the facts were that torpedoes had never been tested to accurately judge their performance in realistic scenarios. Improvements were made, but the U. S. Navy Bureau of Ordnance never delivered an effective weapon to the U.S. Navy submarine force in World War Two. O'Kane's "WAHOO" reads like a thrilling novel of fiction - but in fact documents the emergence of the dominant force in winning the war in the Pacific against Japan. The price paid was high. 22% of submariners never returned from patrol - the highest rate of attrition of any arm of any service in the U.S. military in World War Two. The WAHOO never returned from their seventh patrol - assumed sunk by aircraft after another successful series of raids in the Sea of Japan. We are fortunate that these men were willing to sacrifice all and volunteer to take the war to the Japanese - and fortunate that Dick O'Kane has documented the valor of the submarine force forever in this fine volume. O'Kane also wrote of USS TANG in his book "Clear the Bridge!", another book well worth the read.

Object ID	Title	Author	Summary
			10 of 10 people found the following review helpful This book is outstanding January 22, 1999 By A Customer There are already tremendous reviews for Admiral O'Kane's other book, Clear the Bridge, in which he recounts the exploits of U.S.S. Tang. I was surprised not to see more comments of this book, in which Adm. O'Kane describes Wahoo, a sub of great importance and his time serving as Exec for her skipper, Dudley Morton, a true hero of WWII. I had been fascinated by both these submarines since I was a kid and I was highly pleased to discover this book even though it was some years since it was written. In addition to providing a riveting look at Wahoo's exploits in the war and at Cdr. Morton's superb method of command, the book addresses the subject of defective U.S. torpedoes and their possible role in Wahoo's end. In Clear the Bridge, the author describes how he and his crew on Tang tried to identify and correct torpedo problems while on combat patrol. Clearly these problems may have had severe consequences for Wahoo. How our submarine forces overcame the defective torpedo problem while waging the war against Japan must be one of the great stories of WWII. Great book. (from Amazon.com)

2004.313.407	Viking of Assault: Admiral John Lesslie Hall, Jr., and Amphibious Warfare	Godson, Susan H.	The tour of duty with Admiral Hall is the book that needs to be written. Surely the ultimate record of this war seen in the broad tapestry of history will show the advancements in the doctrine of assault on foreign shores, as well as the tactical commander of the largest armadas in history --- Gela, Salerno, Normandy.
2004.313.409	Quarterdeck and Bridge: Two Centuries of American Naval Leaders	Bradford, James C.	Bradford (history, Texas A & M Univ.) offers a collection of essays by historians and military writers reflecting on

Object ID	Title	Author	Summary
			the careers of 20 prominent American naval leaders. The essays review the careers of admirals from Esek Hopkins to David Dixon Porter to Chester Nimitz to Elmo Zumwalt. Instead of reviewing their careers from a historical perspective, the writers look at the leadership and philosophical aspects and show how these men shaped and influence the direction of the navy. For example, due to his strong determination, Rickover brought the navy into the nuclear age, while Zumwalt used his famous "Z-grams" to improve the life and morale of the navy's enlisted personnel. While this book might be out of place in a general-interest library, it could be an important addition to libraries dealing with military science and leadership or libraries with strong leadership and management collections. Terry L. Wirick, Erie Cty. Lib. System, Pa. Copyright 1997 Reed Business Information, Inc. (from Amazon.com)
2004.313.410	United States Naval Academy : The First Hundred Years	Crane, John de Murinelly Cirne	United States Naval Academy the First Hundred Years by John Crane and Lt. James F. Kieley, USNR with acknowledgments, forward by Harry S. Truman, President, a Chronology, Contents with five narratives, over 300 illustrations in color and black and white and is dedicated to the Midshipmen of the United States Navy. The book is a memorial to those graduates such as King, Nimitz, and Halsey and over 18,560 others since its founding in the spirit of American traditions.
2004.313.412	Naval Customs, Traditions and Usage	Lovette, Leland Pearson	Since 1934, this book has been the standard reference for the meaning of nautical words and expressions, the origin of naval customs, and a source of ready access to much information formerly unwritten on military and naval etiquette. The first edition was the result of long and meticulous

Object ID	Title	Author	Summary
			research. Subsequent editions have been thoroughly revised and augmented by much new material, the result of continuing research and the first-hand observations of the author during his thirty years of active naval service. Hanson W. Baldwin, the distinguished military-naval correspondent of "The New York Times" (himself a Naval Academy graduate), says of Naval Customs: "The range of this book is as sweeping as the sea itself. Pre-eminently a book for the Navy and those who love the Navy, it is nevertheless a volume so varied in its subject matter, so interesting in its treatment, that no one who has felt the surge of blue water can afford to be without it." The cockade hat illustrating the dust jacket is from the uniform of George E. Dewey, the hero of Manila Bay. The unique rank of Admiral of the Navy was established solely for him, and abolished on his death. "Cocked hats" were a traditional part of the full-dress uniform worn by officers of the U. S. Navy from 1797 until World War II. Admiral Dewey's uniform is displayed in the U. S. Naval Academy Museum, Annapolis, Maryland. JACKET AND COVER DESIGN BY MELBOURNE SMITH

Object ID	Title	Author	Summary
2004.313.423	Pueblo Incident: A Spy Ship and the Failure of American Foreign Policy, The	Lerner, Mitchell B.	From Publishers Weekly The January 1968 North Korean seizure of the intelligence-collecting ship USS Pueblo came close to sparking a second Korean War. Lerner, an assistant professor of history, synthesizes newly available documents and a large number of participant interviews to attribute the crisis to the Johnson administration's unsophisticated interpretation of contemporary international relations as bipolar global rivalry between the U.S. and the Soviet Union. Sending the Pueblo to monitor electronic communications and naval activity off North Korea's coast was regarded as a routine mission in the general context of the Cold War. The ship, its crew and captain were poorly prepared for any unexpected occurrences, able neither to resist nor escape the North Korean gunboats. Johnson and his advisers processed the seizure as having been orchestrated by the Soviet Union. U.S. responses focused on Moscow and on international agencies like the Red Cross and the World Court. Lerner, however, offers extensive documentary evidence that the U.S.S.R. was not involved in the Pueblo's seizure. Instead, he makes a convincing case that North Korea acted on its own and for domestic reasons. Kim II Sung, according to Lerner, was increasingly committed to structuring North Korea around the ideological principle of <i>juche</i>, or "self-identity." <i>Juche</i> required the Democratic Peoples Republic of Korea to act in all areas without regard for external influence. Even in its early stages, attempts to apply the concept had generated economic shortages and political dissent sufficient to impel Kim to assert "self-identity" in another way: seizing a ship whose presence, even in international waters, was in any case provocative. American efforts to resolve

Object ID	Title	Author	Summary
			the crisis, pointed as they were in the wrong direction, only exacerbated it. In the absence of North Korean documents, Lerner's argument cannot be regarded as definitively proven, but expect it to get serious (if quiet) play among historians and policy makers. Copyright 2002 Cahners Business Information, Inc. -- This text refers to the Hardcover edition. From Library Journal The title of this study by Lerner (history, Ohio State Univ.) refers to the capture of the intelligence gathering ship, the U.S.S. Pueblo, by the North Koreans in January 1968. The Pueblo was nothing more than a made-over cargo vessel with the addition of an electronic shack for eavesdropping. It was prone to steering loss and engine failure, and its crew and captain were new and untrained. Unarmed except for two machine guns and some small arms, the ship was in no condition to attempt an intelligence mission off the North Korean coast. Unfortunately for the captain and crew, that is exactly where they were captured. Lerner does an excellent job of detailing the crew's torture and imprisonment for almost a year. He draws on interviews with those involved, as well as recently released documents relating to the Johnson administration, to show how badly the administration handled foreign policy challenges during the 1960s. This excellent read sheds light on the incident, which is still debated in some circles today. Recommended for both public and academic libraries. Mark Ellis, Albany State Univ. Lib., GA Copyright 2002 Cahners Business Information, Inc. -- This text refers to the Hardcover edition. (from Amazon.com)

2004.313.425	Dragon's Breath : Hurricane at Sea, The	Dawes, Robert A. Jr.	Over the centuries thousands of ships have been lost to

Object ID	Title	Author	Summary
			violent storms at sea, but the story of the USS Warrington is like no other. The destroyer's loss in the Atlantic in September 1944 is one of the few cases in which there were enough survivors to re-create a complete picture of what happened. This book recounts the experiences of the Warrington's sixty-eight survivors, who spent some forty hours in the water. It is based on their testimony before a Court of Inquiry and on the author's own firsthand experience with the ship and its crew — Cdr. Robert Dawes was her captain until fourteen days before she sank. The story that emerges is one of heroism and neglect. Dissecting the reasons for the disaster, Commander Dawes shows that the ship's loss was the result of a series of mistakes that should never have happened, and he cites compelling and disturbing evidence. Some fourteen weather warnings were ignored, for example, vividly demonstrating the fact that the finest system of weather advisories in the world is useless if warnings are not heeded. Neglected maintenance and repair caused machines to break down. Long months of unrelieved, mind-numbing operations had taken their toll on the men. Their story shows clearly that the heroism of the American sailor is not confined to battle situations. The author questions the Court of Inquiry's harsh treatment of some of the survivors and the court's failure to recognize the heroism of several crew members while criticizing other actions that had no bearing on the Warrington's loss. This book is the result of years of research. Commander Dawes, with the help of the sister of one of the men lost, began gathering information from Navy records and correspondence with the

2004.313.431	Bluejackets' Manual, 1998	Cutler, Thomas J.	From the days of oars and coal-fired engines to the computerized era of the twenty-first century, The Bluejacket's Manual has been an essential part of the American Sailor's sea bag for more than one hundred years, serving as an introduction to the Navy for new recruits and as a reference book for Sailors of all ranks. Written by a Sailor whose decades of naval service included sea duty in patrol craft, destroyers, and aircraft carriers, as both an officer and a white hat, this newest edition has been overhauled to reflect the current state of the ever-evolving U.S. Navy, adding such things as camouflage uniforms, new ratings, and the Navy Professional Reading Program. Primarily intended to serve Bluejackets, the (22nd) edition of this standard guide to the U.S. Navy will also be welcomed by potential recruits, Navy buffs, and a growing number of Bluejacket's Manual collectors.

2004.313.432	Proudly We Served : The Men of the USS Mason	Kelly, Mary Pat	The African-American crew of the USS Mason made history by escorting six convoys across the Atlantic, performing all the duties of seamanship needed to take a warship into combat. This is the story of their experiences as part of the U.S. Navy's tentative moves toward racial integration in the enlisted ranks during the war
2004.313.434	Neptunus Rex : Naval Stories of the Normandy Invasion, June 6, 1944: Voices of the Navy Memorial	Prados, Edward F.	The most fundamental yet least studied aspect of the Normandy Invasion is the naval portion of Overlord: Operation Neptune. The great gray fleet massed off the shores of Normandy was essential to the success of the invasion. Tens of thousands of sailors manned the myriad ships and other water-borne craft that were inextricably bound up in all aspects of the assault. Told largely in the words of the sailors and coastguardsmen who participated, the reader is able to view Operation Neptune from all perspectives. Of particular importance are the heretofore unheralded stores of the Naval Beach Battalions, which accomplished everything from patching up the wounded to directing naval gunfire from the warships steaming offshore

2004.313.450	USS Essex, The : And the Birth of the American Navy	Robotti, Frances Diane	The USS Essex, a thirty-two gun frigate built in 1799 by the merchants of Salem, was known around the world for her speed and graceful lines, achieving a brilliant series of dramatic firsts for the young American Navy. She became the first U.S. war ship to round the Cape of Good Hope into the Indian Ocean. Thirteen years later, the Essex became the first American man-of-war to round the Horn into the Pacific, where her crew fought-and lost-one of the bloodiest sea battles in U.S. History. A list of her commanders-Edward Preble, William Bainbridge, James Barron, and David Porter-reads like a who's who of the early American Navy. David Farragut served as a midshipman before achieving fame as the first rear admiral of the US Navy. The Essex's most important role, however was in promoting and protecting the interests of the United States throughout the world. By the late 1790s, the young country was emerging from its colonial dependence on Europe into a global commercial presence and a budding world power in its own right. Its future growth depended on international trade, and that trade depended, in turn, on unimpeded access to the sea. The history of the Essex is both a stirring nautical adventure and an engaging look at an important turning point in the history of the young American nation. Publication Date: June 1999 (from Amazon.com) Contents: Essex and the young American Navy -- Salem builds a frigate --

2004.313.451	Submarine Warfare : Today and Tomorrow	Moore, John Evelyn	Submarine Warfare offers a reassessment of underwater warfare in today's world by authors who are acknowledged to be foremost experts on submarines. With the Soviet Union having taken a quantum leap forward and leaving the West trailing behind this book shows how the Soviet Union has a clear policy for its submarine fleet with questions about the West's capabilities and weapons performance, the men, and equipment and questions as to whether it serves our needs without bankrupting other areas of defense. Illustrated with black & white drawings and photographs, Foreword, 12 Chapters ranging from Inner Space to Soviet Developments to the Underwater Way Ahead, Notes, Glossary of Acronyms, Acknowledgements and Index. Capt. Moore retired from the Royal Navy is also the editor of Jane's Fighting Ships and has had seven submarine commands, served on naval staffs in England and NATO.
2004.313.452	Tactical and Strategic Antisubmarine Warfare	Tsipis, Kosta	a Stockholm International Peace Research Institute monograph which is a study in ASW technology covering the problems of underwater acoustics, submarine acoustical detection systems and their platforms, tactical ASW, and stability. Appendixes contain full account of ASW equipment and developments in countries that provide them.

			Generation or Two Ago compiled from many sources with assistance and a Foreword from Adm. Sir Denis Boyd , K. C. B., C. B. E., D. S. C. with illustrations by Capt. Jack Broome. With 30 chapters, acknowledgements, recording the fun, feeling and traditions of the Royal Navy.
2004.313.457	Stealth at Sea : The History of the Submarine	Van der Vat, Dan	Stealth At Sea by acclaimed military historian telling the story of a weapon that played crucial parts in world wars and in the cold war: the submarine. The submarine has become militarily significant even more than battleships, aircraft carriers, bombers and land-based missiles. With a Preface, Prologue 1465 - 1900, Inventions and Devices to the Epilogue of the Nuclear Age. An Appendix: Submarines in Service, Bibliography, Index, and black & white photographs and illustrations.
2004.313.458	Submarines Under Ice : The U.S. Navy's Polar Operations	Williams, Marion D.	From Booklist Williams, whose 30-year navy career began in 1927 and included submarine service, opens a modest but valuable history of early U.S. polar submarine operations with the trouble-plagued, pioneering 1931 voyage of Sir Hubert Wilkins' U.S. Navy^surplus Nautilus. He discusses the little-known polar voyages by conventional submarines in the first decade after World War II before arriving at the famous nuclear-powered Nautilus, her famous first voyage to the North Pole, and the almost equally well known surfacing at that pole of the USS Skate. He also covers less famous voyages and the first under-ice maneuvers by Sargo and Seadragon. Williams' plain writing, based on thorough research that includes interviews with many now-departed navy participants, leaves one hoping only that the eventual declassification of Cold War documents will permit a similar study of submarine operations in the polar regions after 1962.

			Roland Green (from Amazon.com)
2004.313.459	Illustrated History of the Submarine, The	Horton, Edward	The story of submarines is much more than a record of warfare. It is the chronicle of brave and visionary men who risked their lives and their fortunes to prove "the impossible", to demonstrate that ships could move through the water as well as on the water. And, paradoxically, this most formidable of weapons has now emerged in an unlikely role. The nuclear submarine, armed with missiles and patrolling the seas undetected, is the ultimate deterrent to global war.
2004.313.460	Nautilus : The Story of Man Under the Sea	Davies, Roy	The book... starts out with a brief overview of the Soviet development of the nuclear submarine after World War 2 and their race with the US design teams. The next chapter discusses ancient designs and then John Holland's first submarine, which was funded by an Irish "Anti-England" group in the US. The book covers WW1 and WW2 submarine battles, famous ships with quotes from men who served on them, the US and Soviet cold war submarine warfare strategies, clandestine activities and design techniques. It also covers the deep sea unmanned submersibles such as "Alvin" and the recovery of the hydrogen bomb off of the coast of Spain in the 1960's and the discovery of such wrecks as the "Titanic" and the "Lusitania". Overall, its a very thorough overview of the history of submarines and a good introduction to the world of submarine warfare. Plenty of charts and pictures to assist in understanding the text. There is only one instance of profanity and that's a result of a direct textual representation of the crew's dialogue while searching for the H-bomb - navigating shifting currents, poor visibility, cramped quarters, and long

2004.313.461	Carrier : A Guided Tour of an Aircraft Carrier	Clancy, Tom	They are floating cities with crews of thousands. They are the linchpins of any military strategy, for they provide what has become the key to every battle fought since World War I: air superiority. The mere presence of a U.S. naval carrier in a region is an automatic display of strength that sends a message no potential enemy can ignore. Now, Tom Clancy welcomes you aboard for a detailed look at how these floating behemoths function. With his trademark style and eye for detail, Clancy brings you naval combat strategy like no one else can. Carrier includes: * Takeoffs and landings: flying into the danger zone * The aircraft onboard: their range, their power, their weaponry * The role of the carrier in modern naval warfare * Exclusive photographs, illustrations and diagrams Plus: An interview with the U.S. Navy's Chief of Naval Operations, Admiral Jay Johnson (from Amazon.com)
2004.313.463	Dark Sky, Black Sea : Aircraft Carrier Night and All-Weather Operations	Brown, Charles H	Brown was a US Navy pilot involved in night flying from carriers for many years. He traces the history of the practice from the early experiments in the 1920s through the wars that followed to the naval air combat during the war against Iraq when night flying was common. He looks at how changes in (from Amazon.com)

2004.313.469	U.S. Marine Corps Story, The	Moskin, J. Robert	The story of the United States Marine Corps spans more than 210 years. J. Robert Moskin has researched this book for over thirty years. In addition to studying thousands of documents in archives and libraries, he interviewed numerous Marines at Headquarters, from coast to coast and overseas. It is the story, he says, "of men in battle - the story of individual courage - of men who risked everything to do what, had to done." Although no Marine ever started a war, the Marines have been ready when called. The author has updated this edition to include the tales of Lebanon and Grenada and bring the Marine Corps story into the late eighties. It is a fascinating story because it mirrors the entire violent sweep of American history. It is also a story that a Marine can read pride and reexperience the esprit of the Corps and the special code of comradeship that drives the Marine Corps whenever this country calls. "The ideal gift for anyone who has served or is serving in the Marines, their relatives and their friends..." - The New York Times Book Review "The best written story of the Corps that I have read..." -General Wallace M. Greene Former Commandant, USMC "It is a hell of a piece of work.'" - Leon Uris "Marine Corps veterans will love it!" - Newsday J. Robert Moskin is an historian and an award-winning journalist. Formerly the Foreign Editor and member

This book received the Distinguished Service Award of the Marine Corps Combat Correspondents Association.
2004.313.470	Guardians of the Sea : History of the United States Coast Guard, 1915 to the Present	Johnson, Robert Erwin	I wish I had found this book when I made my decision to join the Coast Guard. It answers a wide range of questions on everything from why Coast Guard vessels are called "cutters" to why members of the service wear the present-day blue uniform. From the first chapter, concerning the formation of the Coast Guard through the merger of the Revenue Cutter Service and the Life Saving Service, to the final chapter describing the rescue of 319 passengers from the burning liner Prinsendam in 1979, this book holds the reader's attention throughout. It also deals with the mistakes as well, such as the Simas Kudirka incident, in which a Lithuaninan seaman tryig to defect was allowed to be taken back to his ship, and the collisions which sank the cutters Cuyahoga and Blackthorn. Anyone considering joining the service, or anyone who just wants to know more about our smallest branch of the armed forces, should read this book. It has helped me to understand more about the work I do in the Coast Guard than any other source of information. (from Amazon.com)
2004.313.471	Warriors : The United States Marines	Von Hassell, Agostino	Warriors: The United States Marines "dedicated to the marines and sailors killed in Beirut, Lebanon, 1982-1984 with color and black & white photographs. Since its founding by the Continental

2004.313.496	Naval Ordnance and Gunnery	Bureau of Naval Personnel	A basic textbook on the subject of naval weapons and their control prepared primarily as a classroom text for midshipment at the U.S Naval Academy and in the Naval Reserve Officers Training Corps. It is a limited treatment of fundamental concepts and principles of ordnance with enough data on typical weapons and control systems for the purposes of the training programs for which it was intended.
2004.313.498	Air Power : Key to Survival	De Seversky, Alexander Procofieff	(from the Publisher's Foreward:) Before you have read the first half-dozen pages of this book, you will find Major de Seversky advocating a bold doctrine: that the key to our national security and long-term peace is predominant and overwhelming air power. We (the publishers) believe that this new volume, like its predecessor, VICTORY THROUGH AIR POWER, will be both vigorously attacked and highly praised. Those who disagree with author will wonder how a patriotic American in his right mind can advocate so dangerous a course as committing our country to the development of overwhelming air power at the expense of land and sea forces. Such critics may well ask, "What if we proceed on course and then at a critical point in history find that these ideas are disastrously WRONG?" Those who agree with the author will, with equal cogency, ask: "What if we do not adopt de Seversky's ideas and then at a critical point in history find he was RIGHT?"
2004.313.499	Five Down and Glory	Gurney, Gene	Detailed record of the battles of every American fighter ace.
2004.313.500	Flying Boats & Amphibians	Oliver, David	David Oliver's book is a must

Object ID	Title	Author	Summary
	since 1945		-read for all lovers of flying boats and amphibians. He covers several different types, some seldom written about in other books - like the Grumman Albatross and the Short Solent. The author brings many interesting anecdotes, as well as hundreds of color and B/w photos. The only minus would be that it's too short. A Volume II would be greatly appreciated! (from Amazon.com)
2004.313.501	Navy Wings	Miller, Harold B.	This is an observation from the historical viewpoints of World War II pilots and how they conduct themselves during the war periods. The action taken by them at those time may seem just, but from this book you can easily detected some errors from their take on various actions they have taken at that time as all were taken for the good of the nation.
2004.313.502	Wings for the Fleet : A Narrative of Naval Aviation's Early Development, 1910-1916	Van Deurs, George	Admiral van Deurs tells the history of the first 7 years of naval aviation--from the landing of Eugene Ely on the deck of the USS Pennsylvania in San Francisco Bay to the entry of the US into World War I.
2004.313.503	Military Aircraft Pilot Reports	None Stated	(from back cover:) Climb into the cockpits of today's most exciting military aircraft! Read all about the most interesting military aircraft today with these firsthand reports from America's best aviation writers. Stuffed with more than 20 recent "Pilot Report" columns from Aviation Week & Space Technology magazine, this abundantly illustrated guide gives you detailed data on the flight capabilities of aircraft such as: + Northrop Grumman B-2 Stealth bomber + McDonnell-Douglas F/A-18 + Rockwell International B-1 bomber + McDonnell-Douglas C-17 + NF-16D Vista + Lockheed SR-71 + McDonnell-Douglas T-45

Object ID	Title	Author	Summary
			The authors recount their experiences at the controls, provide selected specifications tables and photographs, and include a brief history of each plane and its manufacturer. Regardless of which type of military aircraft piques your interest-bombers, fighter/attack planes, cargo/transport planes, special purpose, or trainer planes -this book has the information you crave. Includes : McDonnell Douglas F/A-18 Hornet McDonnell Douglas T-45 Goshawk McDonnell Douglas AV-8 Harrier Beech T-34 Mentor
2004.313.504	Introduction to Naval Architecture	Comstock, John Paul	This book is substantially the course in theoretical naval architecture given to the hull drawing apprentices at the shipyard of the Newport News Shipbuilding and Dry Dock Company. Its purpose is to acquaint the student with the fundamentals of theoretical naval architecture, and to explain how they are interrelated and how they are progressively applied in the design of a ship.
2004.313.506	Shipfitter's Manual	Crivelli, Albert F.	This book is written primarily for the benefit of student shipfitters. Its purpose is to provide the groundwork upon which a student may build. Includes shipbuilding terms, materials used in ship construction, principal structural members of a ship, mold loft, shop layout of equipment and machine and hand tools, phases of shipfitting, structural shop personnel, shop safety, hull structural plan reading, electric arc welding.
2004.313.508	Naval Radar	Friedman, Norman	Covers the theory, function and performance of Radar. Contains a catalog of Naval Radar from the United States, Soviet Union, Great Britain, Germany, Japan, Italy, The Netherlands, and France. Includes an appendix on radar operation during World War II.

Object ID	Title	Author	Summary
2004.313.509	U.S. Battleships : An Illustrated Design History	Friedman, Norman	This series offers detailed descriptions of the evolution of all classes of the principal U.S. combatant types. Each volume is fully illustrated with deck plans, outboard profiles, sketches from major design studies, and numerous detailed photographs. The appendixes contain a wealth of information on ship characteristics and equipment. Related Items: Battleships: United States Battleships
2004.313.512	Story of the Ship, The	Gibson, Charles Edmund	the Story of the Ship in the Life of Science Library with 25 Chapters from the Pharaohs, Crete, Greeks, Egypt, Navigations, Gunpowder, Cannon, Steam, America, crossing the ocean, armor plating, new engines, modern mercantile marine and the future with appendixes, glossary, recommended reading, index and black & white photographs and illustrations.
2004.313.513	Encyclopedia of Knots and Fancy Rope Work	Graumont, Raoul	Encyclopedia of Knots and Fancy Rope Work with frontispiece picture of a Rope Anchor, Fourth Ed. with poem The Ropewalk by Longfellow and black & white illustrations, notes on the history of knots and rope making and XII Chapters on rope work, knotting ropeknots, splicing, coxcombing, turk's heads, braiding ornamental knotting, macrame tatting, fringe, needle-0work and splicing wire rope with appendix, terminology , glossary, index, and appendix index. This monumental work describes 3, 6668 knots with 350 full-page photographic plates and drawings.
2004.313.514	American Ship Types : A Review of the Work, characteristics, and Construction of Ship Types Peculiar to the Waters of the North American Continent	Hardy, A. C. (Alfred Cecil)	This books is about domestic ships. Topics include: Outline geographical survey; Greck Lakes and Inland waterways; Survey of American ship types; All types of coastwise shipping; U. S. Bay and sound shipping; Mass transportation of humanity; U. S. railroads as

			shipowners; Four big groups of ferryboats; Towboats for various duties; River pushboats and packet boats; Transportation of freight cars; Great Lakes and canal freighters; Great Lakes passenger traffic; Three big groups of dredges; and Light vessels and light tenders.
2004.313.516	Handbook of Ship Calculations, Construction and Operation	Hughes, Charles Haynes	A reference book for naval architects, marine engineers, ship and engine draftsmen, deck officers, and others engaged in the building and operating of ships. Topics include: weights, measures and formulas; strength of materials; shipbuilding materials; ship calculations; hull construction; machinery; electricity; heating, ventilation, refrigeration, air conditioning, bilge, ballast, sanitary, and fire protection systems; ship equipment, and ship operation.
2004.313.517	Ship Structure and Blueprint Reading	Heed, H. L.	The purpose of this book is to teach the men who are building ships how to read prints. Topics include materials of ship construction, elements of mechanical drawing, plates and shapes, welding and riveting, combinations of structures of steel, ship layout, ship's drawings, ship types and arrangement, appendages, ventilation, machinery, piping, lines of a ship. Blueprint abbreviations, and shipbuilding glossary.
2004.313.518	Naval Engineer's Guide	Jolliff, James V.	This book concentrates on lessons learned from experience, including helpful hints concerning routine maintenance and repair, overhauls, refresher training, damage and casualty control, administration, and a multitude of other subjects which daily confront the shipboard engineer. Chapters include: Major Equipment in Marine Power Plants; Engineering Department Organization and Administration; Management; The Engineering Department Duty Officer in Port; The Engineering Officer of the Watch Underway; Casualty

			Control; Special Evolutions; Fuel and Water; Trials and Exercises; Shipboard Maintenance and Repair; Shipyard Overhaul; Damage Control; and Speciment Questions for the Shipboard Engineer. Appendixes include: Boiler Care and Maintenance; Sample Forms; Summary of Feedwater Tests; Extracts from DDC reports; and Engineering Symbols. Includes a list of abbreviations, a glossary , an index, and recommended reading.
2004.313.519	Story of Old Ironsides, The	Knipe, Emilie Benson	USS Constitution is a wooden-hulled, three-masted heavy frigate of the United States Navy. Named by President George Washington after the Constitution of the United States of America, she is the world's oldest commissioned naval vessel afloat. Launched in 1797, Constitution was one of six original frigates authorized for construction by the Naval Act of 1794 and the third constructed. Joshua Humphreys designed the frigates to be the young Navy's capital ships, and so Constitution and her sisters were larger and more heavily armed and built than standard frigates of the period. Built in Boston, Massachusetts, at Edmund Hartt's shipyard, her first duties with the newly formed United States Navy were to provide protection for American merchant shipping during the Quasi-War with France and to defeat the Barbary pirates in the First Barbary War. (from Wikipedia)
2004.313.520	Naval Architecture as Art and Science	Liljegren, C. O.	The author believes the Froude-Taylor theories of resistance are inadequate. With the assistance of model experimenters all over the world, the author has been able to develop new theories and new formulas for resistance culminating in the Differential Calculus method of solving the problem of ships' Optimum form, proportions, and dimensions, whether for investment as in a merchant

			ship, or for efficiency as in a warship or a yacht
2004.313.521	Basic Design of Ships, The	Manning, George Charles	This book is a treatise on the fundamental principles and processes involved in the preliminary design of commercial and military vessels for the use of naval architects and ship designers. Topics include: historical background in ship design, basic ship design, estimate of displacement, estimate of principal dimensions and coefficients, delineation of lines, general arrangement plans, weight and strength calculations, hull systems and fittings.
2004.313.522	Grey Seas Under, The	Mowat, Farley	In Grey Seas Under, Farley Mowat writes about the salvage carried out by the SS Foundation Franklin. From 1930 until her final voyage in 1948, the tug's dangerous job was to rescue sinking ships, first searching for them in perilous waters and then bringing them back to shore. Foundation Franklin and her crew saved hundreds of vessels and thousands of lives as they patrolled the North Atlantic, including waters patrolled by U-boats in wartime.
2004.313.523	Principles of Naval Architecture, Vol. 1 : Written by a Group of Authorities	Rossell, Henry Eastin (ed)	The purpose of this work is to cover ...the field of naval architecture in one text. Topics include: Geometry of the ship by W. Selkirk Owen; Freeboard, Tonnage and Capacity by Harold F. Norton; Transverse stability by S. A. Vincent; Longitudinal stability and trim by John F. Macmillan; Subdivision of ships by John F. Macmillan and John P. Comstock; Strength of ships by David Arnott; and Launching by Henry H. W. Keith.
2004.313.524	Ships That Have Made History	Robinson, Gregory	Chapters include: A fourteenth century ship; The Santa Maria and the squadron of Columbus; the Spanish treasure frigate; The Golden Hind, Sir Francis Drake's profitable voyage; The Revenge, Sir Richard Grenville's last fight; The Susan Constant, Captain John Smith's ship which carried the first

			completely changed the capabilities of the old style naval vessel.
2004.313.532	Grim Reapers, The	Johnston, Stanley	With this book the author adds another vivid chapter to his reporting of the war in the Pacific--from the Coral Sea through our victorious conquest of Guadalcanal. Here we see the war from the cockpits of Fighter Squadron VF-10, graphically nicknamed the Grim Reapers, who were attached to the aircraft carrier U.S.S. Enterprise. VF-10 was formed and commanded by Lieutenant Commander James H. Flatley, veteran of the Coral Sea campaign. Included in the squadron were seasoned fighters from the Lexington and Yorktown, as well as raw recruits, just out of training school. The whole intricate picture of our tactics and strategy in the Pacific comes into clear focus as the author weaves a chronological account of our naval engagements into his dramatic story of the Reapers.
2004.313.534	Carrier Combat	Mears, Frederick	The author was a group of young naval aviators who were waiting at the San Diego naval Air Station for an opportunity to qualify for carrier duty when Pearl Harbor was bombed. He qualified on the brand new carrier Hornet when she reached the West Coast, and was attached as a spare pilot to Torpedo Squadron 8 when that gallant outfit made its suicidal attack on the Japanese fleet at Midway. He stayed on Guadalcanal until all the planes of his squadron had been destroyed by Japanese naval gunfire; got back to San Francisco on the first anniversary of Pearl Harbor, and wrote this book before his return to action which cost him his life.
2004.313.535	Blue Ghost, The; a Photographic Log and Personal Narrative of the Aircraft Carrier U.S.S. Lexington in Combat Operation.	Steichen, Edward	The Blue Ghost was what the Japanese called the aircraft carrier USS Lexington. This is the authors "photographic log and personal narrative" of his stay on the big ship during

			part of her spectacular career.
2004.313.536	Wildcats Over Casablanca	Wordell, M. T. (Malcolm Taber)	An account of the early stages of the battle for North Africa as it appeared to a squadron of American airmen, whose Grumman Wildcats were on one of the carriers. Their stories were told to Keith Ayling, who has based this book on their experiences.
2004.313.540	Navy At War, The : Paintings and Drawings By Combat Artists	Baldwin, Hanson Weightman	The collection of paintings and drawing by Navy Combat Artists gives a vivid and accurate picture of the Navy at war
2004.313.541	My Life to the Destroyers	Abercrombie, L. A. (Laurence Allen)	The item of particular importance about Captain Abercrombie's narrative is that it pictures how we learn to fight a war while actually fighting it, the whole story from the furious and almost formless anger of Pearl harbor down to the day when 'all the Japs were dead" and all their bombers down off the coast of Guadalcanal, where we won our first great offensive campaign.
2004.313.542	MacArthur's Amphibious Navy : Seventh Amphibious Force Operations, 1943-1945	Barbey, Daniel E.	With their awkward landing vessels the men of the Seventh Amphibious force, largely reserve officers and inexperienced sailors, changed the pace of the war in the Southwest Pacific. They by-passed Japanese strongholds to pour enormous numbers of troops, guns, ammunition, and supplies onto beaches where the enemy least expected them. In lightning assaults these men spearheaded General MacArthur's surprising thrust along the New Guinea coast and up the Philippine archipelago.
2004.313.543	U.S. Naval Logistics in the Second World War	Ballantine, Duncan Smith	The subject matter of this book deals with that limbo between the factory and the beachhead in which economic and military considerations are inextricably woven together. It is this link function between purely economic and purely military effort which in the past has been the greatest blindspot of both the civilian and the professional naval officer.
2004.313.547	H. M. U-boat	Drummond, John D. (John	H. M. U-Boat with

			public and private production programs? Military, naval, and business historians and not addressed the area where national interest and private profit intersect. This book discusses that issue. There is a Postscript, Appendix, Notes, Bibliography, and Index and tables.
2004.313.557	Fighting Ships	Hough, Richard Alexander	Fighting Ships in Three Parts, 18 Chapters, Colour Plates of 58 Illustrations in full colour and over 140 in black and white. It is the history of the fighting ship from early origins of the primitive Nile craft of 3000B.C. to the modern American nuclear-powered aircraft carrier.
2004.313.558	American Submarine, The	Polmar, Norman	(from dust jacket flap:) The submarine is truly an American phenomenon, if not invention. Originally conceived for use by the weaker side against a stronger naval power, American revolutionaries brought the submarine into practical use in the war for independence, the war between the states, and in the Irish cause against Great Britain. This involved the inventive geniuses of David Bushnell, Robert Fulton, John Holland, and later Simon Lake. Today, the U.S. submarine fleet has become an instrument to be used to defend the free use of the seas alongside that of its European allies. The result has been the creation of nuclear, deep-diving& anti-submarine attack boats, which can easily girdle the globe, and fleet ballistic missile submarines that provide the most survivable component of American nuclear deterrent. This second edition is up-to-date, with a photograph of Admiral H.G. Rickover's last official appearance as head of the Navy's nuclear propulsion program, and internal and external views of the USS Ohio, the lead submarine of the long-delayed Trident class. Mr. Polmar, author of two

Object ID	Title	Author	Summary
			previous books and several studies of submarines as well as a biography of Admiral H.G. Rickover, presents an extensively illustrated overview of American submarines: their designs, characteristics, and operations. The pictures and drawings used to illustrate the book form a rare collection in themselves of the history of American submarines.
2004.313.559	Building American Submarines, 1914-1940	Weir, Gary E.	(Contributions to Naval History...No.3) Building American Submarines 1914-194 - with Foreword, Acknowledgments, Introduction by the author, and 6 chapters beginning with Points of Departure, 1880-1916, Questions of Strategy and Design to Training, etc and Conclusions with Appendixes of Chronology and Submarine Characteristics and Construction Schedules, Abbreviations, Notes, Bibliography and Index. In this volume the author assess the Navy's efforts between 1914-1940 to develop effective submarines along with private industry from the First World War to the Second with replacements of the fleet submarine. It discusses private industry, the designs and construction process and submarine suppliers allowing the Navy to acquire high-quality submarines to undertake prolonged and effective operations. It talks about the goals and evolution of the American submarine industry..
2004.313.561	Submarine : A Guided Tour Inside a Nuclear Warship	Clancy, Tom	Never before seen by the general public: a rare glimpse inside a Los Angeles-class (SSN-688) nuclear submarine ... with Tom Clancy as your guide. Only the author of The Hunt for Red October could capture the reality of life aboard a nuclear submarine. Only a writer of Mr. Clancy's magnitude could obtain security clearance for information, diagrams, and photographs never before available to the public. Now, for the first time, every civilian can enter this

			top secret world and experience the drama and excitement of this stunning technological achievement.... the weapons, the procedures, the people themselves... the startling facts behind the fiction that made Tom Clancy a #1 bestseller. Submarine includes: * Exclusive photographs, illustration, and diagrams * Mock war scenarios and weapons launch procedures * An inside look at life on board, from captain to crew, from training exercises to operations * The fascinating history and evolution of submarines PLUS: Tom Clancy's controversial views on submariner tactics and training methods. --This text refers to an out of print or unavailable edition of this title. From Library Journal Best-selling author Clancy's first nonfiction book is a thorough, highly detailed examination of the technology employed by U.S. nuclear attack submarines. After months of lobbying, Clancy was granted security clearance by the navy to board and photograph the nuclear powered USS Miami. Every inch of this state-of-the-art vessel is covered, from the hull, control room, and engine room nuclear reactors to the communications/electronic warfare space and torpedo bays. Clancy shows readers how all the components are made and how they work. Also included is the fascinating history and evolution of submarines and an inside look at life on board, from captain to crew. Much of the information here has only recently been declassified, and Clancy's insightful views on the future of this type of warship in the post-Cold War era are interesting as well. Recommended.

Naval Ordnance Laboratory, Retired 1956 with Foreword by Ralph Decker Bennet, Ph. D. Director of Research of the Martin Company and former Director of Research 1940-54 stating that this volume is devoted to the history and use by the U. S. Navy's use of the submarine mine as a weapon. There are XVI Chapters beginning with The "Battle Of The Kegs: January 1778, by the Honorable Francis Hopkinson, a signer of the Declaration of Independence; Mines, philosophy, 1780-1860, the U. S. Civil War, the development of mines to 1914, WWI, WWII, growth of Mine Warfare, design, production, problems and how mines were used. Bibliography, Index, and black & white Illustrations.
2004.313.576	Mines, Minelayers and Minelaying	Cowie, J. S.	Mines, Minelayers and Minelaying by Captain J. S. Cowie, C. B. E.. Royal Navy with Foreword by Admiral Sir Robert Burnett, K. C. B., K. B. E., D. S. O. Rear-Admiral, Minelayers, Nov 1940-Feb 1942 with preface about the part mines have played progressively with illustrations in text, plates, maps, and X chapters with the introductory and early developments from 11585 - 1865, WWI, II, international law and with an appendix regarding mathematical chances of a ship striking a mine, principal British Minelayers in WWI, and II ending with references, and an index.
2004.313.578	Submarine at War, The	Low, A. M.	The Submarine at War by Professor A. M. Low with a Foreword by Admiral William V. ;Pratt, U.

Object ID	Title	Author	Summary
			S. N. retired with Introduction and XVI Chapters from the beginnings of the submarine, Robert Fulton American Civil War, science of the submarine, men in the trade, safety, tragedies, WWI to present war, anti-submarine measures, guns and q-boats, submarine combat, cargo submarine and the future with Conclusion and Black & White Photographs.
2004.313.579	Historic Submarines	Lipscomb, F. W.	Historic Submarines by F. W. Lipscombe illustrated by Malcolm McGregor is the first major illustrated study of the evolution of the naval submarine from the 16th Century to the present day. Described are the major developments in submarine history, the construction of the first operational craft by Dutch chemist Cornelius Van Drebbel, the first mechanically powered submarine, the periscope, the use of steam and internal combustion engines for surface propulsion, and the electric batter for subsurface power, development of the locomotive torpedo, recent applications of nuclear power and the building of the first true submarine one that need never surface. There are 16 Color Plates accurately drawn and illuminated with their technical significance in submarine construction. The plates are supplemented by diagrams and photographs, illustrating vessels from 1620 - 1901.
2004.313.580	Undersea Vehicles and Habitats	Ross, Frank Xavier	Undersea Vehicles and Habitats ,the peaceful uses of the ocean with Introduction about submersibles, diving chambers, and manned ocean-floor stations with five Chapters on Diving History, Science, Work Submersibles, Ocean Habitats, Diving Chambers, and the 21st C and a glossary of Oceanographic Terms, Suggested Further reading, and Index with black l& white Photographs and Drawings.
2004.313.581	Lonely Sky, The	Bridgeman, William	As good as it gets, October 28, 2011 By Old Dog Beautifully written,

Object ID	Title	Author	Summary
			extraordinarily revealing, articulated with grace and reserve seldom evident in modern historical writing. This man was competent, thoughtful, intelligent, and a restless explorer. No phony bravado - his fear and stress is palpable and ever present, as is his courage and ability to submerge both to his considerable intellect. This was the right man, in the right place, at the right time. I can't imagine any written vehicle that could bring a reader closer to the reality of this kind of flying, this kind of leading-edge, high risk, meaningful endeavor. You wake up with this man, in the small hours, sleep ended by the screaming whistle of a rocket plane being fueled; the immediacy of the task (and the threat) before you is as real as the written word can make it. Superb writing! This book holds its own with any historical narrative, in any arena; if you must limit your comparisons to aviation volumes, then consider it in the same class as Ernest Gann's "Fate Is The Hunter" or John Hersey's "The War Lover." I believe Mr. Bridgeman married his co/ghost writer, Jacqueline Hazard, after the book was published. He was killed in a seaplane crash at Catalina Island. Lonely Sky, August 20, 2009 By J. P. Kempsey (Leeds England) I was originally given a paper back copy of this book many years ago - due to returning to it many times it was falling apart. William Bridgeman wrote in a very plain laymans language about his experiences of both the war and flying as an airline/test pilot after, which is why I find this book so enjoyable to come back to and replace with a hardback copy which should last my lifetime. Just a pity that Bridgeman

Object ID	Title	Author	Summary
			died so young even though he was doing what he enjoyed doing. John Kempsey Leeds, England
			One of the Best Aviation Books Around, December 28, 2006 By Fledgling The perfect compliment to "The Right Stuff", it is a realistic look at what it takes to be a test pilot. Bridgeman doesn't discuss the hero pilot angle, but does talk about the hard work, the struggle to understand and apply new engineering concepts, and the fear and tension that goes along with a test program. Very educational for any aviator or history buff.
			Bil Bridgeman died in the late 60's flying a Gruman flying boat.
			Autobiography of a rocket plane pilot, July 19, 1997 By A Customer Bill Bridgeman was the first man to fly at Mach 2 in the Douglas Skyrocket. This is a factual, exciting story, told by a humble, quiet hero. A contemporary of Chuck Yeager, Bridgeman is a rare commodity - an aviation hero who credits luck and teamwork over ego and bravado. This book gives us a peak into that exciting time 50 years ago when heros dropped from the belly of bombers to reach the edges of space
2004.313.582	War Wings : Fighting Planes of the American and British Air Forces	Cooke, David C.	A complete record - in both text and picture - of the fighting planes of the Democracies. (from Internet photos of dust jacket) An illustrated handbook concerning American and British fighting planes. (from foreignaffairs.com)
2004.313.583	All About Aircraft	Desoutter, Denis Marcel	Preface: Aviation has become a major industry and an important part of lives. It dominates military affairs, and it enjoys

Object ID	Title	Author	Summary
			the preferred place in personal travel. Before long it will hold a significant place in mercantile freight carrying. In the British economy it holds a position of prime importance as one of the foremost exporting industries. Although from time to time aviation makes news, only isolated facets of it normally reach the eye of the public. It is the purpose of this book to fill in the background in a way that will be of value to any general reader who seriously wants to gain an understanding of this rapidly expanding human activity. At the same time an attempt has been made to give an idea of the wide industrial ramifications of aviation and to shows how many special activities it embraces, each of which offers the opportunity for an absorbing and rewarding life's work. In this way it is hoped- that more young people may be turned to thoughts of an aviation career. It is a field where the work always has the interest and stimulus of fresh ideas and of new problems to be solved, so that it is free of the repetitive monotony of so many other modern careers. Becuase it is intended for the general reader the book has been kept as simple as possible. A few formulae have been included, but only of the simplest kind and solely for the purpose of illustrating some point or other. This is not a text book, nor is it intended to be a course of instruction in any branch of aeronautics. It is a pleasure to be able to record my indebtedness to various friends who have been kind enough to lend their aid in one form or another. My thanks are due to Mr L. E. Bradford for his work in preparing the drawings, especially the three-view drawings of Chapter 21. My thanks are also due to the editor of Aviation Age

Object ID	Title	Author	Summary
			magazine of New York for permission to reproduce the half-tone pictures of Russian aircraft on pages 452 to 457. My thanks are due, too, to the editor of The Aeraplane for permission to reproduce the picture of the de Havilland Drover (page 399), to the Office Nationale d'Etudes et Recherches Aéronautiques for permission to reproduce the photograph on page 276 and to the many aircraft and aero-engine manufacturers at home and abroad who are always so ready to help. Last but not least, my thanks are due to my own editor, the editor of Aeronautics magazine, for permission to use certain illustrations. To make too long a list of those to whom I am indebted would result in none being read, so I will omit here those whose courtesy is acknowledged elsewhere, either in captions or in text.

2004.313.587	Naval Aviation : A Text Book for the Instruction of Midshipmen in the Department of Seamanship, U.S. Naval Academy	Grant, V. F. (ed)	PREFACE TO FIRST EDITION: Much of interest has been written on the subject of Naval Aviation — its problems, its policy, its strategy, and its tactics. The object has been to assemble into one volume that portion of this material of interest to the midshipman and to the naval officer afloat, that it may be readily available. Everything of a technical nature has been purposely excluded. In collecting the data the compiler has made full use of lectures before the War College, of published articles, and of the Pensacola, Manual. Generous assistance has been given by the Bureau of Aeronautics and the Army Air Service. To those who have thus liberally given their assistance the compiler wishes to express his appreciation. WILLIAM W. WARLICK. Annapolis, Md. 15 December, 1924. PREFACE TO REVISED EDITION: The science of aviation is advancing at such a rapid rate that any aviation textbook is hardly off the press before it is out of date. In this revision, therefore, besides excluding as much technical matter as possible, effort has been made to handle the

Object ID	Title	Author	Summary
			subject matter in such general terms that what is said will hold as true two years hence as today. The reviser freely admits wholesale plagiarism from all sources available, but unproved opinions have been avoided. Appreciation is expressed to Rear Admiral W. A. Moffett, U. S. Navy, and officers of the Bureau of Aeronautics for valuable assistance. V. F. GRANT. Annapolis, Md.
2004.313.588	Naval Aviation : A Textbook for Midshipmen, 1934	United States Naval Academy	Naval Aviation, A Textbook for Midshipmen 1934 with Frontispiece of U. S. Naval Academy is a brief elementary textbook on naval aviation for information and instruction of midshipmen. It is based on various Navy Department publications and Naval Aviation. Photographs by Bureau of Aeronautics and the book was prepared by officers of VN Squadron 8D5 stationed at the Naval Academy.

2004.313.594	To Join With the Eagles : Curtiss -Wright aircraft, 1903-1965	Rubenstein, Murray	collections recording five thousand years of man's struggles to conquer the air. TO JOIN WITH THE EAGLES is a history of the aircraft designed and built by the most important figures in the history of American aviation, Wilbur and Orville Wright and Glenn Curtiss, and of the company formed in their names and based on their achievements. Between them, the Curtiss and Wright organizations garnered more "firsts" and world records than any two other companies in the history of aviation. The first manned flight in a heavier-than-air machine was, of course, credited to the Wrights. Curtiss, more the mechanic and tinkerer, gathered honors in early races and in the invention of the "hydroaeroplane." The Wrights were the first to use a catapult device to launch an aircraft, yet it was a Curtiss aircraft that was first launched from a ship's deck. But instead of a spirit of co-operation, there developed a bitter rivalry and open hatred between the inventors. It is ironic that the two companies merged in 1929, after their namesakes had left them. Although largely inactive today in the field of aviation, the Curtiss-Wright Aeronautical Corporation occupies a unique position in the history and development of flight. TO JOIN WITH THE EAGLES is a profusely illustrated history of every airplane produced by Curtiss-Wright. It includes over 300 never-before-published photographs from the Curtiss-Wright archives and traces in both photographs and text the remarkable accomplishments of the early aviation pioneers and the Curtiss-Wright Aeronautical Corporation. Among the famous aircraft covered in this book, in addition to the very first planes to fly (and not to fly) at Kitty

Object ID	Title	Author	Summary
			Hawk, and Glenn Curtiss's first flying machines, are the NC-4, the first airplane to fly across the Atlantic, the Curtiss Jenny of barn-storming fame, the famous Curtiss Hawk racers and fighters of the twenties, and the famous P-40 of Flying Tigers fame and the C-46 Commando transport. Including full details of the development and exploits of these and other legendary Curtiss-Wright aircraft, TO JOIN WITH THE EAGLES provides an in-depth look at one of the most colorful pages in aviation history. Murray Rubenstein, who has been a consultant to the Ministry of Defense of the Government of Israel, worked as an aeronautical engineer for Curtiss-Wright for three years, which provided him with access to the never-before-published photographs and documents in the Curtiss-Wright archives. He and his co-author, Richard Goldman, a practicing trial attorney, are presently at work compiling a number of new aviation books. (from dust jacket flaps)
2004.313.595	Turbojet Fundamentals	Morgan, Howard E.	Here is an easy-to-understand introduction to turbojet operation. In brief, concise style it provides a basic treatment of the elemental theory and operating principles of the turbojet engine. Turbojet Fundamentals can be followed easily by anyone with a background in high-school mathematics. It requires no previous engineering or technical training. It is designed to help those planning their futures in the booming field of turbojet commercial aviation. The book begins with the basic symbol designations of a turbojet engine, and progresses into jet theory using simple mathematics to acquaint the reader with the application involved. A step-by-step discussion of the turbojet

Object ID	Title	Author	Summary
			section is presented, and some operational problems of the components are described to provide a more complete picture of how thrust is accomplished. The phenomena of compressor stall and its effect on turbojet-engine operation are thoroughly explained. Turbojet Fundamentals is available for the first time to the general public with this edition. It was originally prepared by Douglas Aircraft, Inc., for training use by their own personnel. Graphs and illustrations are used throughout to bring out major points. A glossary of commonly used technical terms appears at the end of the book. HOWARD E. MORGAN has spent twenty-five years in aviation; during this time he has taught at the high-school and junior college levels as well as in the armed forces. As Training Coordinator for the Testing Division of Douglas Aircraft, Mr. Morgan handled training of personnel on new aircraft and engines. He has also prepared DC-8 training for the various airlines. Jacket design by Abner Graboff (from dust jacket flaps)
2004.313.596	U.S.S. Seawolf, Submarine Raider of the Pacific	Frank, Gerold	USS Seawolf (SS-197), a Sargo-class submarine, was the second submarine of the United States Navy named for the seawolf. Her keel was laid down on 27 September 1938 by the Portsmouth Navy Yard in Kittery, Maine. She was launched on 15 August 1939 sponsored by Mrs. Edward C. Kalbfus and commissioned on 1 December 1939, Lieutenant Frederick B. Warder (Class of 1925) in command. (from Wikipedia)
2004.313.598	Far Shore, The	Ellsberg, Edward	You will first meet Admiral (then Captain) Ellsberg

Object ID	Title	Author	Summary
			assigned to the English Channel area where the great artificial harbor is waiting to be towed on D-Day to the Far Shore of Omaha Beach. You will discover, with him, the terrifying miscalculation that might have wrecked the entire undertaking and will admire Ellsberg's persistence in correcting the error through the intervention of the highest British authority. The great climax to the story is the Channel crossing on D-Day, with its tragic mistakes, its unparalleled heroism, its heart-breaking near defeat by the sudden storm and the ultimate landing and defeat of the Nazi defenders.
2004.313.599	Blue Skies and Blood : The Battle of the Coral Sea	Hoyt, Edwin P.	The Battle of the Coral Sea occupies a unique niche in history. In these warm and distant waters for the first time the airplane afloat and not the big gun delivered the offensive blows on each side. Mighty fleets bitterly contested control of the sea far out of sight of their commanders. The wings in the sky brought new powers. It was an new era in naval warfare. The author skilfully unfolds the struggle in the Coral Sea through the lives and words of participants.
2004.313.601	Ship to Remember, A : The Saga of the Hornet	Griffin, Alexander R.	In the one short year of life allotted to it, the carrier Hornet placed itself in the illustrious company of such ships as the Constitution, the Merrimac, the Monitor, Admiral Dewey's Olympia, and the iron-clad Oregon. Untried and still on her shake-down cruise, the Hornet was plunged into the Battle of the Pacific with orders to defend by attack while the main power of the Pacific fleet was being resurrected from Pearl Harbor. How she did it is attested by her casualty lists at Midway, her raids on Japanese supply lines, her breathless ferrying job to within 800 miles of Japan with Doolittle's bombers. She left the wreckage of 18 enemy ships and countless enemy planes

Object ID	Title	Author	Summary
			behind her in the course of her short career. Alexander R. Griffin tells this throbbing story with restraint and true affection. It is an adventure narrative that out-thrills fiction. (from dust jacket flap)
2004.313.604	Battle Report, Vol. 6 : The War in Korea	Karig, Walter	Volume VI in the six-volume Battle Report series. A popular, non-technical story of the Navy's combat operations in the Korean War, related as far as possible in the words of the men who participated in the action described
2004.313.606	Hellcats of the Sea	Lockwood, Charles A.	Hellcats of the Sea with Foreword by C. W. Nimitz, fleet Admiral, US Navy 1955 with 32 chapters, epilogue, and sailing lists of the Wahoo and Hellcats, and Japanese-English Glossary and black & white photographs.
2004.313.607	Brave Ships of World War II	Leeming, Joseph	A factual account of the British and American ships in action that runs from the sinking of the Graf Spee in December, 1939 to the day-after Christmas in 1943 when the Scharn-horst was sunk in the Arcric Sea,
2004.313.613	End of the Imperial Japanese Navy, The	Ito, Masanori	The author has told the full story of World War II in the Pacific from the enemy point of view The fascination of this account is due partly to its revelation of the very different view of events and facts held by the enemy during the course of the war, and partly to the illuminating--and to western eyes, often incredible--analysis of the Japanese heart and mind.
2004.313.619	To Foreign Shores : U.S. Amphibious Operations in World War II	Lorelli, John A.	This is the first single source to cover the entire development of US Army, Navy, and Marine corps amphibious operations during World War II. This account describes the whole spectrum of modern seaborne assaults. It covers ships and landing craft, ship-to-shore movement, command relationships, air and gunfire support, mine countermeasures, salvage. and much more.
2004.313.620	Battle of the Atlantic, The	Macintyre, Donald G. F. W.	The story of how the

Object ID	Title	Author	Summary
			Germans were defeated in the Atlantic is a complicated and exciting one which Captain Donald Macintyre, is well qualified to tell. Not only does he analyse the strategic issues, above all the importance of the convoy system and of continuous air-cover, he also describes the battle from the viewpoint of the participants themselves. The strategic and tactical aspects of the battle are clarified by the specially prepared maps and diagrams.
2004.313.623	Savo : The Incredible Naval Debacle off Guadalcanal	Newcomb, Richard F.	On loan to Karl ????
2004.313.624	Allied Submarines of World War Two	Poolman, Kenneth	The author lends the empathetic touch of an old mariner to the story of the underwater warfare waged by the Allies on a brave and persistent Axis enemy. Germany used the submarine weapon well in both wars, but it was the Allies who realized its deadly potential to the full. The author relates the historical evolution of the innovative submarine and proceeds to examine, in detail, the Allied war effort as it was undertaken via the respective submarine fleets. He looks at the principal theatres of action in the Atlantic and Pacific Oceans, in the Mediterranean Sea and in lesser waters too; he also discusses the relatively minor Allied fleets, to provide, in total, a fully comprehensive treatment to a neglected topic.
2004.313.625	Naval War Against Hitler, The	Macintyre, Donald G. F. W.	Study of the war at sea in the Mediterranean, Atlantic and Arctic theaters during World War II.
2004.313.626	Sink 'Em All : Submarine Warfare in the Pacific	Lockwood, Charles A.	Narrative account of U.S. submarine operations in the Pacific during World War II provided by the submarine force commander in that period. Forward by Fleet Admiral Chester A. Nimitz. No illustrations. 416 pages, includes index.
2004.313.627	Through Hell and Deep Water : The Stirring Story of the Navy's Deadly Submarine, the U. S. S. Harder, Under the Command of Sam Dealey, Destroyer Killer!	Lockwood, Charles A.	Account of the U.S submarine, USS Harder (SS-257) with the most kills in the Pacific during World War II and it's commanding officer. Co-

Object ID	Title	Author	Summary
			authored by the submarine's commander, Samuel David Dealey.
2004.313.628	Assault From the Sea	Maund, Loben Edward Harold	The purpose of the book is to show how the knowledge and equipment were gradually collected to conduct a landing operation; the welding of Staffs of the three services into one Staff. Then, the knowlege of equipment and technique that is new, and understanding of how the detailed planning for such an operation should be undertaken. It is an account of personl experiences in the assault from the sea.
2004.313.629	Monsarrat At Sea	Monsarrat, Nicholas	The longest love, the longest hate.--Three corvettes: H.M. corvette. East coast corvette. Corvette command.--I was there. --A ship to remember.--"H.M.S. Marlborough will enter harbour."--It was cruel.--The ship that died of shame.
2004.313.631	Graf Spee : The Life and Death of a Raider	Pope, Dudley	The author traced the rebirth of the German Navy after its defeat in the First World War, and the intentions of that great strategist who planned its growth, Grand Admiral Raeder. The battle of the River Plate took place between the Ajax, Achilles, and the Exeter (all British naval vessels, smaller than the Graf Spee.) This book gives a complete story of the battle, and of the events leading up to it. It discusses the mystery of why the Graf Spee did not follow up its victory over the Exeter with further attacks on the Ajax and Achilles.
2004.313.632	Now Hear This! : Histories of U.S. Ships in World War II	Motley, John J.	This book gives a history of many of the individual ships which comprised the US Fleet in World War II; the ones which received Presidential Unit Citations and Navy Unit Commendations. There is also a complete list of US Naval vessels of all types lost during war, including the location and date of loss. Finally, there is a chronology of US Naval action throughout the War.
2004.313.633	Fightin'est Ship, The : The Story of the Cruiser "Helena"	Morris, C. G. (Colton G.)	The war record of the U.S.S. Helena in the first year and a

Object ID	Title	Author	Summary
			half of the Pacific conflict--from Pearl Harbor to her death in a surface engagement in Kula Gulf, Solomon Islands--earned for this gallant light cruiser the United States Navy's tribute as "the fightin'est ship that ever scoured the seas" and reserved for her a special niche in American naval traditions.
2004.313.634	Channel Dash : The Fantastic Story of the German Battle Fleet's Escape Through the English Channel in Broad Daylight	Robertson, Terence	The sweeping story of the air and sea engagement that began on February 12, 1942 when the three German war ships, together with their escorts, under a protective "umbrella" of aircraft from Luftwaffe bases in France, made an escape from Brest up the English Channel toward the Straits of Dover, taking the British by surprise. The escape was made in broad daylight.
2004.313.635	Navy's War, The	Pratt, Fletcher	Factual account of all the major engagements fought by the United States Navy since Pearl Harbor. Partial contents: Campaign in the Java sea; the first great raids; Campaign in the Coral Sea: The mysteries of Midway; Submarines Pacific; Caribbean command; Memorial of the Wasp; The Solomons campaign.
2004.313.639	War at Sea, 1939-1945, Volume III - The Offensive, Part II, 1st June 1944 - 14th August 1945, The	Roskill, Stephen Wentworth	In this second part of volume 3, the great seaborne offensives which was enabled by Britains maritime power rose to a climax in all theatres of the war. It opens with the invasion of Normandy. It covers the war in the Pacific, and the destruction of the Japanese fleet. The allied Navies supported the armies and dealt with all the enemy's varied attempts to interfere with the flow of reinforcements and supplies. By the end of 1944, Britain almost undisputed control of the Mediterranean, and the landings in the south of France in August of that year were the last major combined operation in the theatre. British Pacific Fleet joined with American forces for an assault on Okinawa and the final blows against Japan. After describing the final operations, the surrender of the last enemy

Object ID	Title	Author	Summary
			and the recovery of the vast territories lost in 1942, the author devotes his final chapter to an examination of the lessons to be learned from war in which maritime power exerted such profound influence.
2004.313.640	Operation Neptune	Schofield, Brian Betham	Operation Neptune was the codeword for the naval side of the 'Overlord' plan for the landings in Normandy and covered a vast multitude of tasks from beach reconnaissance, minesweeping, shore bombardment and the organisation of loading, assembly and disembarkation through to such novel tasks as the positioning of the Mulberry artificial harbours and the laying of the Pluto pipeline.
2004.313.641	Rescue Ships, The	Schofield, Brian Betham	Hospital ships could not accompany convoys. The solution was Rescue ships, Mercant Navy vessels of about 1,500 gross tons, mostly from coastal trade. Their low free-board enabled them to get men more easily over the side. They could steam at 11 or 12 knots and so work astern of a convoy and regain stations afterwards. These small ships were commanded and manned by Merchant Navy personnel; each carried a naval medical officer and a sick-berth attendant, and was fitted with a hospital and operating theatre. They escorted 757 convoys and rescued 4,194 survivors.
2004.313.644	Silversides	Trumbull, Robert	USS Silversides (SS/AGSS-236) is a Gato-class submarine, the first ship of the United States Navy to be named for the silversides, a small fish marked with a silvery stripe along each side of its body. Her keel was laid down on 4 November 1940 by the Mare Island Navy Yard in Vallejo, California. She was launched on 26 August 1941 (sponsored by Mrs. Elizabeth H. Hogan), and commissioned on 15 December 1941, with Lieutenant Commander Creed C. Burlingame (Class of 1927) in command.

			(from Wikipedia)
2004.313.647	Memoirs: Ten Years and Twenty Days	Dönitz, Karl	The author discusses the U-boat campaign and its planning, the Norwegian campaign, the controversial sinking of the Laconai, and the equally controversial role of America before it entered the war, the Normandy invasion and the July bomb plot, and his becoming Hitler's successor. He also discusses his meetings and arguments with Hitler, and adds a penetrating analysis of Hitler's role, and the German Navy's performance in World War II.
2004.313.648	Abandon Ship! The Saga of the U.S.S. Indianapolis, the Navy's Greatest Sea Disaster	Newcomb, Richard F.	(from Amazon.com:) The story of the destruction of the heavy cruiser USS Indianapolis, which sank in only 12 minutes after being hit by a torpedo fired by a Japanese submarine, and of the subsequent punishment of the ship's captain, Charles Butler McVay III, charged that he failed to issue a timely warning to abandon his fast-sinking ship, was the subject of this 1958 book by Associated Press editor Richard F. Newcomb (Iwo Jima, etc.), which spent 18 weeks on bestseller lists.
2004.313.650	Decision at Leyte	Falk, Stanley Lawrence	Illustrations & maps -- The Western Pacific -- The Philippine Islands -- Leyte -- The Beachhead Area -- North Central Leyte -- Northern Leyte -- Admiral William F. Halsey; V-Adm. Jesse B. Oldendorf, Battleship Squadron One; Major Gen. Verne Mudge, Gen. Douglas MacArthur; Lt. Gen. R. K. Sutherland, Gen. Walter Krueger, Lt. Gen. G. C. 2004.313.651	Killing Ground on Okinawa: The Battle for Sugar Loaf Hill	Hallas, James H.	On May 12, 1945, the 6th Marine Division was nearing Naha, capital of Okinawa. To the division's front lay a low, loaf-shaped hill. It looked no different from other hills

Object ID	Title	Author	Summary
			seized with relative ease over the past few days. But this hill, soon to be dubbed "Sugar Loaf," was very different indeed. Part of a complex of three hills, Sugar Loaf formed the western anchor of General Mitsuru Ushijima's Shuri Line, which stretched from coast to coast across the island.
2004.313.652	Battle of Leyte Gulf, The : The Death Knell of the Japanese Fleet	Hoyt, Edwin P.	How a would-be American defeat turned slowly but inexorably into a full-fledged Japanese disaster is the substance of this engrossing book. Using Japanese as well as American eye-witness accounts, quoting admirals, commanders, and enlisted men, the author has woven together the many threads of an immense naval confrontation, a 3 day series of bloody and devastating encounters that has since been described in the history books as "the last great sea battle of WWII."
2004.313.653	Silent Running : My Years on a World War II Attack Submarine	Calvert, James F.	In this personal account, an authentic American hero relives the perils and triumphs of eight harrowing patrols aboard one of America's most successful World War II submarines, the USS Jack. Courageous deeds and terror-filled moments--as well as the endless hard work of maintaining and operating a combat sub--are vividly recalled in James Calvert's candid portrait.
2004.313.654	Pacific War 1941-1945, The	Costello, John	The Pacific War embraces both the grand strategy of the war and the actions on land, at sea, and in the air. It chronicles the maneuvers in Tokyo and Washington, London and Moscow, Sydney and Singapore (and the fatal miscalculations in Pearl Harbor and the Philippines), as well as the moments of terror and courage of individual soldiers, sailors, and airmen on both sides throughout the war. This account is written for those for whom the war is part of their actual experience and for a whole new generation that has only a partial grasp of this tragic conflict. In the

Object ID	Title	Author	Summary
			concluding section of the book, an "After-Action Report," the author reveals that the real decision to go to war was made, effectively, by the US and Britain on Nov. 26, 1941, not by the Japanese on Dec. 7. Only in this book will be found a full account of how hitherto secret intelligence failed through misinterpretation at Pearl Harbor and the Philippines and why Douglas MacArthur was instrumental in reversing 20 years of carefully constructed defensive strategy in the months before Pearl Harbor.
2004.313.655	Magnificent Fight : The Battle for Wake Island, A	Cressman, Robert J.	Describes the attack by the Japanese on an advanced American base that was key to the US Navy's strategy to the Pacific. It describes how the Wake garrison survived the daily bombings and repulsed the first Japanese attempt to take the atoll. This is the first American study of Wake's defense to use extensive Japanese materials to identify the enemy order of battle and the roles each unit played in the drama.
2004.313.656	Japanese at Leyte Gulf : The Sho Operation, The	Field, James A.	This book tells the complete Japanese account of the Sho Operation, placed in its proper context against the larger background of Japan's war and of Japanese intelligence of U.S. plans.
2004.313.657	From Omaha to Okinawa : The Story of the Seabees	Huie, William Bradford	The author continues the saga of the combat trained civilian plumbers, carpenters, heavy equipment operators, wharf builders, and civil engineers who served in the US Navy Construction Battalions.
2004.313.658	Never in Doubt : Remembering Iwo Jima	Kessler, Lynn S. (ed)	Survivors of one of the fiercest battles of the war in the Pacific tell their dramatic stories in this collection of oral histories. Veterans from all the services -- Marine Corps, Navy, Coast Guard, Army and Army Air Corps -- are represented, everyone from infantrymen, machine gunners and engineers to medics, airmen and coxswains. Their descriptions of events add new

2004.313.665	Secret Raiders, The : The Story of the German Armed Merchant Raiders in the Second World War	Woodward, David	The Raiders sailed the seas of the world; they operated in the Arctic, in the Antarctic, in the Atlantic, the Pacific and the Indian Ocean. Between 1940 and 1943 there were at sea a total of nine German armed merchant raiders (converted freighters), and between them they sank more than 130 Allied or neutral merchant vessels, totalling over 850,000 tons. The Germans undertook rearmament by focusing on establishing an organization in neutral ports which would, in time of war, be able to buy supplies locally, load them on board German merchant ships and get those ships to sea

Object ID	Title	Author	Summary
			through a possible enemy blockade in order to revictual raiders which had broken out from home waters. In addition it was to be the duty of these branches of the organisation , called by the Germans 'Etappen', to provide any commercial or shipping intelligence which might be of value either to raiders or to the German naval staff.
2004.313.666	83 Days : The Survival of Seaman Izzi	Murphy, Mark	Eighty-three days after their ship was sunk in the South Atlantic young Basil Izzi, a second class seaman of the United States navy, and his two surviving companions, were picked up by a PC boat from the frail raft to which they had clung during those long weeks. Two others had succumbed to thirst and starvation. This story of their experiences is told largely in izzi's own words.
2004.313.667	Squadrons Up! A Firsthand Story of the R. A. F.	Monks, Noel	A first person account of the R.A.F. told by the author, a war correspondent from the London "Daily Mail"/
2004.313.668	Robinson Crusoe, USN; The Adventures of George R. Tweed, RM1c, on Jap-held Guam	Tweed, George Ray	Tweed was one of six American navy enlisted men who fled to the bush rather than surrender when the Japanese pounced on unfortified Guam at the start of the undeclared war. Before the first year was over all of the other five had been found and killed by the Japanese, but Tweed managed to elude the enemy for the two and one-half years until an American armada was ready to retake the Marianas isle.
2004.313.672	Marine Aviation in the Philippines	Boggs, Charles W.	Marine Aviation in the Philippines is the ninth in a series of operational monographs, based on official sources and documented in detail. Partial list of contents: 1st Marine Aircraft Wing on Bougainville; Landings at Peleliu and Morotai; Plans for Leyte Assault; Japanese Plans for Defense of the Philippines; Battle for Leyte Gulf; Tacloban Airdrome, Leyte; MacArthur and Halsey request Marine Squadrons; Convoy Strikes - 7 Dec., 11-12 December;

2004.313.674	Sailors to the End : The Deadly Fire on the USS Forrestal and the Heroes Who Fought It	Freeman, Gregory A.	The aircraft carrier USS Forrestal was preparing to launch attacks into North Vietnam when one of its jets accidentally fired a rocket into an aircraft occupied by pilot John McCain. A huge fire ensued, and McCain barely escaped before a 1,000-pound bomb on his plane exploded, causing a chain reaction with other bombs on surrounding planes. The crew struggled for days to extinguish the fires, but, in the end, the tragedy took the lives of 134 men. For thirty-five years, the terrible loss of life has been blamed on the sailors themselves, but this meticulously documented history shows that they were truly the victims and heroes. About the Author Gregory A. Freeman is the author of Lay This Body Down: The 1921 Murders of Eleven Plantation Slaves. An award-winning journalist with twenty years' experience, he lives in Atlanta, Georgia.

2004.313.675	Heart of a Man, The	Elkins, Frank Callihan	This is Lieutenant Frank Elkins's personal diary of his experiences as an A-4 pilot in the Vietnam War. When he was shot down in 1966, the diary was sent directly to his wife, Marilyn. It chronicles the early air war and portrays everyday life aboard an aircraft carrier. Today it stands as a powerful commentary on modern aerial warfare and its impact on the men who wage it. Marilyn Elkins explains, "Frank went off to war seeking adventure, glory, and honor, but he soon learned that such abstracts have concrete costs. His diary is an intimate account of his coming to terms with his own foibles, with his beginning sense of agitation about the war, with the horror of friends dying, and with his own fear of death." Lucid and moving, Elkins's conversations with himself make insightful reading and add to our understanding of the psychological effects of war. His diary reveals a man who loves flying, his family, his country, and his life, and yet risks that life daily to prove something to himself. The joys, sorrows, fears, and passions that Frank Elkins recorded so candidly tell us what combat is really like and allow us to experience the heightened consciousness it provides. The diary offers eloquent proof that the language of the heart endures. In 1990 Frank's remains finally were identified and returned to the United States. The recounting of that event, treated in Marilyn's epilogue, and an introduction by Admiral Lawrence bring the diary into focus and up to date for this new edition of The Heart of a Man. Its timely revival, after nearly twenty years, helps us understand the cost of war,

2004.313.677	Fire on the Hangar Deck : Ordeal of the Oriskany	Foster, Wynn F.	Ever since man first ventured to sea, fire has been his worst enemy. No less so on the modern aircraft carrier where high explosives, volatile fuels, and flaming engines are often mixed with sailors working long hours under arduous conditions. In 1966, this hazardous situation led to a catastrophe costing the lives of 44 men, injuring hundreds more, and doing millions of dollars of damage. USS Oriskany, a twenty-one-year-old Essex-class carrier, was conducting combat flight operations in the Gulf of Tonkin when a night illumination flare ignited on her hangar deck and instantly transformed her into a flaming holocaust. Wynn Foster, an attack pilot who flew missions from Oriskany until just before the tragedy, has recreated the tragic story of this terrible fire. He draws on firsthand knowledge of the ship, extensive research, and in-depth interviews with survivors. The result is a gripping account that vividly describes efforts to combat a situation that was out of control from the beginning. It is a story of disappointing errors, impressive professionalism, dark tragedy, breathtaking heroism, and lessons to be learned. In the ongoing tradition of the Naval Institute's open forum, Foster explores the preventable causes of the fire and assesses the Navy's handling of the aftermath. He reinforces current concerns about high-tempo operations conducted with dwindling resources and

2004.313.707	Admiral Dewey and the Manila Campaign	Sargent, Nathan	The Manila campaign was a sequel to the first naval engagement of the war. On 1 May 1898 a small American squadron under CDR George Dewey completely destroyed a Spanish naval force in Manila Bay. These events were later reproduced in the movie 13 Going on 30. To take the city of Manila, Dewey needed ground forces; he therefore sent a request to Washington for 5,000 troops. Meanwhile he blockaded the port and encouraged Filipino insurgents, led by Emilio Aguinaldo, whom Dewey had brought from exile in China, to besiege the city pending the arrival of American troops. Aguinaldo, who had previously led an insurrection against Spanish rule, hoped for recognition of his Philippine Republic. While waiting the arrival of ground forces, Dewey was faced with delicate diplomatic problems as English, German, and French naval forces arrived, ostensibly to protect their nationals in the islands, but also to be on hand to pick up any loose territory in case the United States decided against taking control after the collapse of Spanish power. (from Wikipedia)
2004.313.708	Admiral Dewey at Manila	Stickney, Joseph L.	George Dewey (December 26, 1837 – January 16, 1917) was an admiral of the United States Navy. He is best known for his victory at the Battle of Manila Bay during the Spanish-American War. He was also the only person in the history of the United States to have attained the rank of Admiral of the Navy, the most senior rank in the United States Navy. (from Wikipedia)

2004.313.727	Glenn Curtiss : Pioneer of Naval Aviation	Hatch, Alden	Glenn Hammond Curtiss (May 21, 1878 – July 23, 1930) was an American aviation pioneer and a founder of the U.S. aircraft industry. He began his career as a bicycle then motorcycle builder and racer, later also manufacturing engines for airships as early as 1906. In 1908 Curtiss joined the Aerial Experiment Association (AEA), a pioneering research group founded by Alexander Graham Bell at Beinn Bhreagh, Nova Scotia to build flying machines. Curtiss rose to fame by making the first officially witnessed flight in North America, winning a race at the world's first international air meet in France, and making the first long-distance flight in the United States. His contributions in designing and building aircraft led to the formation of the Curtiss Aeroplane and Motor Company, now part of Curtiss-Wright Corporation. His company built aircraft for the U.S. Army and Navy, and during the years leading up to World War I, his experiments

2004.313.730	David Glasgow Farragut, Vol. 1	Lewis, Charles Lee	From Farragut's birth to the Civil War August 23, 1998 By A Customer Using sources ranging from official documents and ship's logs to personal letters and the Farragut family bible, Lewis presents the fascinating true story of David Glasgow Farragut. An officer in the U.S. Navy at the age of 11, he was prizemaster of a captured British whaling ship (and required to put down a mutiny by her former Captain) at age 12! Described by his Commanding Officer as "Seven pounds of uniform and seventy pounds of fight!", he travels the world, learns several languages and grows to be the officer who is arguably the best American Naval Officer ever, later to become our first Admiral .

Object ID	Title	Author	Summary
			His life is an example of heroism and bravery told with amazing detail and wonderfully dramatic action. It is compelling and edifying reading. His epic Civil War battles are to be read in Volume II.

			An excellent review of an excellent man. Historically accurate and using sources ranging from official records and ships logs to personal letters and the Farragut family Bible. The first of a two volume set, this volume depicts the life of Farragut from birth to the beginning of the Civil War. A Naval Officer at the age of 11, his Commanding Officer remarked that he was seven pounds of uniform and seventy pounds of fight. He was made a prizemaster of a captured whaling ship, in the war of 1812, at the age of twelve. This is not dry historical subject, but a fascinating account of a truly heroic man. Read this book! The examples of character and heroism in Farragut's life can give us all standards, stories, and examples to live up to.
2004.313.731	David Glasgow Farragut, Vol. 2	Lewis, Charles Lee	David Glasgow Farragut (July 5, 1801 – August 14, 1870) was a flag officer of the United States Navy during the American Civil War. He was the first rear admiral, vice admiral, and admiral in the United States Navy. He is remembered in popular culture for his order at the Battle of Mobile Bay, usually paraphrased: "Damn the torpedoes, full speed ahead!" by U.S. Navy tradition. (from Wikipedia)

2004.313.734	Nelson and his Captains	Fitchett, William Henry	Horatio Nelson, 1st Viscount Nelson, 1st Duke of Bronté, KB (29 September 1758 – 21 October 1805) was a flag officer famous for his service in the Royal Navy, particularly during the Napoleonic Wars. He was noted for his inspirational leadership and superb grasp of strategy and unconventional tactics, which resulted in a number of decisive naval victories. He was wounded several times in combat, losing one arm and the sight in one eye. Of his several victories, the best known and most notable was the Battle of Trafalgar in 1805, during which he was shot and killed. Nelson was born into a moderately prosperous Norfolk family and joined the navy through the influence of his uncle, Maurice Suckling. He rose rapidly through the ranks and served with leading naval commanders of the period before obtaining his own

Object ID	Title	Author	Summary
			command in 1778. He developed a reputation in the service through his personal valour and firm grasp of tactics but suffered periods of illness and unemployment after the end of the American War of Independence. The outbreak of the French Revolutionary Wars allowed Nelson to return to service, where he was particularly active in the Mediterranean. He fought in several minor engagements off Toulon and was important in the capture of Corsica and subsequent diplomatic duties with the Italian states. In 1797, he distinguished himself while in command of HMS Captain at the Battle of Cape St Vincent. Shortly after the battle, Nelson took part in the Battle of Santa Cruz de Tenerife, where his attack was defeated and he was badly wounded, losing his right arm, and was forced to return to England to recuperate. The following year, he won a decisive victory over the French at the Battle of the Nile and remained in the Mediterranean to support the Kingdom of Naples against a French invasion. In 1801, he was dispatched to the Baltic and won another victory, this time over the Danes at the Battle of Copenhagen. He subsequently commanded the blockade of the French and Spanish fleets at Toulon and, after their escape, chased them to the West Indies and back but failed to bring them to battle. After a brief return to England, he took over the Cádiz blockade in 1805. On 21 October 1805, the Franco-Spanish fleet came out of port, and Nelson's fleet engaged them at the Battle of Trafalgar. The battle was Britain's greatest naval victory, but during the action Nelson was fatally wounded by a French sniper. His body was brought back to England where he was accorded a state funeral. Nelson's death at Trafalgar secured his position as one of

2004.313.746	Navy Diver : The Incredible	Karneke, Joseph Sidney	The experiences of a career

Object ID	Title	Author	Summary
	Undersea Adventures of a Master Diver		navy diver, including one of the first dives to inspect damage after the Japanese attack on Pearl Harbor. As a diver Karneke participated in the salvaging of sunken ships. An important find was the "Nachi Papers" which contained complete information on Japan's war plans against the West. In 1946 at Bikini atomic tests, Karneke and his Navy divers bore the burden of assessing the underwater results of the blast experiments. He aided in restoring Pacific islands to safely as the Navy set about locating and blowing up thousands of tons of explosives left unused and afloat in Pacific Waters. In Korea there was the defusing of enemy mines and bombs, and post-Korea he became a specialist in the use of underwater nuclear devices.
2004.313.750	Navy Maverick Uriah Phillips Levy	Fitzpatrick, Donovan	Uriah Phillips Levy (April 22, 1792 – March 26, 1862) was the first Jewish Commodore of the United States Navy, a veteran of the War of 1812 and a major philanthropist. At the time, Commodore was the highest rank obtainable in the U.S. Navy and would be roughly equivalent to the modern-day rank of Admiral. During his tenure, he was instrumental in helping to end the Navy's practice of flogging, and prevailed against the antisemitic bigotry he faced among his fellow naval officers. In 1834 Levy purchased and began the restoration of Thomas Jefferson's estate, Monticello, near Charlottesville, Virginia. His donation of it to the United States Congress in 1862 was rejected due to the wartime crisis. In 1879 his nephew Jefferson Monroe Levy bought out other heirs and contracted for renewed restoration and preservation of the property. Their work and private money preserved it for the American people. In 1923 Monticello was purchased by the Thomas Jefferson Foundation and adapted as a house museum.

			arms race in the 1890s, which included the United States. His ideas still permeate the U.S. Navy Doctrine. Several ships have been named USS Mahan, including the lead vessel of a class of destroyers. (from Wikipedia)
2004.313.755	Matthew Fontaine Maury, The Pathfinder of the Seas	Lewis, Charles Lee	Matthew Fontaine Maury (January 14, 1806 – February 1, 1873), United States Navy was an American astronomer, historian, oceanographer, meteorologist, cartographer, author, geologist, and educator. He was nicknamed "Pathfinder of the Seas" and "Father of Modern Oceanography and Naval Meteorology" and later, "Scientist of the Seas," due to the publication of his extensive works in his books, especially Physical Geography of the Sea (1855), the first extensive and comprehensive book on oceanography to be published. Maury made many important new contributions to charting winds and ocean currents, including ocean lanes for passing ships at sea. In 1825 at age 19, Maury joined the United States Navy as a midshipman on board the frigate USS Brandywine. Almost immediately he began to study the seas and record methods of navigation. When a leg injury left him unfit for sea duty, Maury devoted his time to the study of navigation, meteorology, winds, and currents. He became Superintendent of the U.S. Naval Observatory and head of the Depot of Charts and Instruments. Here, Maury studied thousands of ships' logs and charts. He published the Wind and Current Chart of the North Atlantic, which showed sailors how to use the ocean's currents and winds to their advantage and drastically reduced the length of ocean voyages. Maury's uniform system of recording

Object ID	Title	Author	Summary
			oceanographic data was adopted by navies and merchant marines around the world and was used to develop charts for all the major trade routes. With the outbreak of the Civil War, Maury, a Virginian, resigned his commission as a U. S. Navy commander and joined the Confederacy. He spent the war in the South, as well as abroad in Great Britain, Ireland, and France. He helped acquire a ship (CSS Georgia) for the Confederacy while also advocating stopping the war in America among several European Nations. Following the war, Maury accepted a teaching position at the Virginia Military Institute in Lexington, Virginia. He died at his V.M.I. home in Lexington in 1873 after completing an exhausting state-to-state lecture tour on National and International weather forecasting on land. He had also completed his book on his Geological Survey of Virginia and a New series of Geography for young people. (from Wikipedia)

McGrew, Jr. I was advised to read this book in 1955 before I was to be interviewed by Radm. Hyman Rickover. It is a great book about his interview techniques and helped me in preparing for my interview by him on a Saturday morning in 1956. I subsequently served on two nuclear submarines and had the opportunity to meet him a number of times on those submarines. (from Amazon.com)
2004.313.764	Sons of Gunboats	Sawyer, Frederick Lewis	FOREWORD: "The wedding guest sat on a stone; He could not choose but hear; And thus spake an that ancient man; The bright—eyed mariner." Words live while deeds die. More than four decades have passed since the United States awoke one morning to find a strange baby on its doorstep — the Philippine Islands, unwanted, but an inescapable responsibility. The spoils of the Spanish-American War and treaty payments included some fifteen small gunboats which the Spanish had built to control

Object ID	Title	Author	Summary
			Philippine waters. Aguinaldo and his followers had endeavored to induce the Americans to abandon the Islands in the vain hope that they could establish an independent republic. Failing in this, the insurgent forces broke the truce by crossing our Army lines and thus began the Philippine war February 4, 1900. The former Spanish gunboats were incorporated in the U. S. Navy and were invaluable in aiding the campaign for suppressing the insurrection. They could go wherever there was two fathoms of water, establish a tight blockade, and as troop transports, cooperated with the Army whenever possible in engagements which took place along the coast. As nearly all garrison towns were located along the shore these engagements were very frequent. A list of these gunboats follows: U.S.S. Albay, Basco, Callao, Calamianes, Guardoqui, Leyte, Maneleno, Mindoro, Marriveles, Pampanga, Panay, Paragua, Quiros, Samar, Villalobos, and Urdaneta. Of the above the Quiros and Villalobos were 350 tons. The Basco, Guardoqui, and Urdaneta were armed patrol vessels somewhat smaller than P.T. boats, of about 50 tons. The remaining gunboats were approximately 200 tons, all were built of iron, with twin screws and steamed eight to ten knots. They were manned by the captain, who was usually a lieutenant or junior lieutenant, one or two midshipmen, and a crew of about thirty-five petty officers and men. From these "captains" there sprang up an organization whimsically called "The Ancient and Honorable Sons of Gunboats" which was afterwards given semi-official recognition and commemorated in a medal designed by our marine artist Henry Reuterdahl. The Sons of Gunboats required for membership a service in actual war of at least one-half year and, as I recall, the

Object ID	Title	Author	Summary
			number of officers eligible totalled only about fifty. During many years and on numerous occasions various "Sons of Gunboats" have bewailed the failure of someone else to record the unique and bizarre operations of these small men-of-war, but no member seemed willing to sheathe his sword and grasp the mightier pen. For many years the Navy has had the good fortune to have as head of Naval Records and Library, Captain Dudley W. Knox, U. S. Navy (Retired), a writer of much merit, who has pursued — nay, persecuted — the author to undertake this task, and with so much persistence that it seems easier to attempt the burden than to continue to evade the task. However, the difficulties of accomplishing a history, due to meager or inaccessible data are so great that a compromise treaty has been made. A personal narrative while commanding the U.S.S. Panay, principally the writer's own experiences, will be undertaken. Thus the reader may simply multiply this story by fifteen and thus obtain a reasonably accurate idea of this unique gunboat warfare.
2004.313.765	Memoirs of Thomas O. Selfridge, Jr.	Selfridge, Thomas Oliver	Memoirs of Thomas O. Selfridge, Jr., Rear Admiral, U. S. N. with an Introduction by Captain Dudley W. Knox, U. S. N. with Frontispiece of Rear-Admiral Thomas O. Selfridge, Jr., as Commander-in-Chief, U. S. European Squadron. Illustrations and Maps in black & white, and XXIV Chapters about the Warships of the American Civil from the Eve of War to the Last Days on the Cumberland and Merrimac, the Monitor vs. Merrimac, Vicksburg, Red River, and the Mississippi.
2004.313.767	Admiral Sims and the Modern American Navy	Morison, Elting Elmore	William Sowden Sims (October 15, 1858 – September 25, 1936) was an admiral in the United States Navy who sought during the late 19th and early 20th centuries to modernize the

Object ID	Title	Author	Summary
			Navy. During World War I he commanded all United States naval forces operating in Europe. He also served twice as president of the Naval War College. (from Wikipedia)
2004.313.768	Women of the Sea	Snow, Edward Rowe	Stories of a number of women of the sea, such as Hannah Burgess who navigated her husband's clipper safely to port after his death, the widowed Hsi Kai Ching who took command of her husband's pirate fleet, and the author's mother who knew aship as her only home for her first 20 years.
2004.313.769	Sea Duty : The Memoirs of a Fighting Admiral	Stirling, Yates	Sea Duty by Yates Stirling, Rear Admiral, U. S. N. (Ret.) with Decorations by Mabel A. Buell, and Frontispiece of Rear Admiral Yates Stirling From the portrait by Mabel A. Buell. Black and White Photographs. XIX Chapters from his commissioning to the war with Spain, Philippine Insurrection, River Warfare, the War College, Submarines, France, the Yangtze Patrol, Washington, the Japanese, the Massie case, his last Command, etc with black & white photographs.
2004.313.770	Famous Aviators of World War II	Sweeney, James B.	Aviators covered in this book are Claire L. Chennault, James H. Doolittle, Curtus E. LeMay, Emmett O'Donnell, Jr. and Carl Spaatz.

Object ID	Title	Author	Summary
			with his role as a consultant on the nuclear power program. 13 photos. From Booklist The latest volume by this outstanding American naval writer is both a collection of essays and the closest thing to autobiography Captain Beach is likely ever to give us. He writes with his usual freshness, grace, compassion, and well-informed opinions on his own life, his father's career, Admiral Rickover (who was indispensable to the nuclear propulsion program but impossible to deal with on the personal level) and the intrigues that cost him his promotion to rear admiral, and the role of the U.S. Navy in the twenty-first century, concerning which he also suggests reforms. Along the way, he tells anecdotes about his marriage of more than 50 years, his wartime service, the origins of several of his novels and of the characters in them, and the complexities of having the nuclear submarine Nautilus christened by Mamie Eisenhower. If this should be Beach's last book, it fittingly concludes his career as writer and seafarer. We can most sincerely say, "Sailor, rest your oar." Roland Green (from Amazon.com)

2004.313.775	Admiral, The	Healy, Laurin Hall	George Dewey (December 26, 1837 – January 16, 1917) was an admiral of the United States Navy. He is best known for his victory at the Battle of Manila Bay during the Spanish-American War. He was also the only person in the history of the United States to have attained the rank of Admiral of the Navy, the most senior rank in the United States Navy. (from Wikipedia)
2004.313.776	Anchors in the Sky : Spuds Ellyson, The First Naval Aviator	Van Deurs, George	Theodore Gordon Ellyson, USN (27 February 1885 - 27 February 1928), nicknamed "Spuds", was the first United States Navy officer designated as an aviator ("Naval Aviator No. 1"). Ellyson served in the experimental development of aviation in the years before and after World War I. He also spent several years before the war as part of the Navy's new submarine service. A recipient of the Navy Cross for his aviation service in World War I, Ellyson died in 1928 when his aircraft crashed over the Chesapeake Bay. (from Wikipedia)
2004.313.777	Damn The Torpedoes! : The Story of America's First Admiral : David Glasgow Farragut	Martin, Christopher	David Glasgow Farragut (July 5, 1801 – August 14, 1870) was a flag officer of the United States Navy during the American Civil War. He was the first rear admiral, vice admiral, and admiral in the United States Navy.[1][2] He is remembered in popular culture for his order at the Battle of Mobile Bay, usually paraphrased: "Damn the torpedoes, full speed ahead!" by U.S. Navy tradition. (from Wikipedia)
2004.313.778	Admiral's Daughter, The	Fyodorova, Victoria	When the young Russian actress found the American father she had never known, it seemed like the happy ending to a Hollywood scenario, THE LOVE THAT CONQUERED THE KREMLIN and

Object ID	Title	Author	Summary
			ADMIRAL MEETS LOVE CHILD blazed the headlines in thousands of newspapers around the world. But the full story, as Victoria Fyodorova tells it, is far more complex.
2004.313.779	Submarine Admiral : From Battlewagons to Ballistic Missiles	Galantin, I. J.	From Publishers Weekly: In this memoir of his 41-year military career, from midshipman to four-star rank, mostly in the submarine service, Galantin provides an authoritative overview of the evolution of the sub and its role in the U.S. Navy. A distinguished combat veteran of WWII, he saw postwar service as head of the Navy Department's submarine branch; and, as director of the Navy's Special Projects Office, he had a leading role in developing the Polaris missile system for subs. Galantin recalls the loss of the Thresher at sea in 1963 and explains how that tragedy?and the mystery of its cause?led to a comprehensive examination of submarine design, construction and operation. Long involved in high-level planning and policy-making in the Pentagon, he gives a good account of how the Navy met the Soviet challenge at sea as well as the submarine's role in the post-Cold War era. Our nuclear subs, he argues, remain the chief deterrent to global strategic aggression. His Pentagon insider's view includes much interesting information about intra-Navy and interservice turf wars. Galantin retired in 1970. Photos not seen by PW. Copyright 1995 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. From Booklist: Galantin has already written in detail of his distinguished World War II career in the Pacific, commanding the submarine Halibut, in Take Her Deep! (1987). Now, he covers his whole naval career, from entering Annapolis in 1929 through retirement as a four-star admiral in 1970. In so doing,

Object ID	Title	Author	Summary
			he presents both a gripping panorama of the navy's transformation over two generations and three wars (plus the cold war) and a record of his personal role in the process. The pleasures and burdens of command, the never -dull task of dealing with Admiral Rickover, an insider's account of the development of the ballistic missile submarine, and a lifelong love affair with submarines all figure in his readable, literate, insightful prose. Both as a primary source for the modern U.S. Navy and as a sheer delight for naval buffs' casual reading, highly recommended. Roland Green -- This text refers to an out of print or unavailable edition of this title. (from Amazon.com)
2004.313.780	Admiral Dan Gallery : The Life and Wit of a Navy Original	Gilliland, C. Herbert	In his foreword to this biography about a great friend, Herman Wouk describes the book as "the unadorned truth about . . . a decidedly human gentleman with human failings, more than balanced by rare willpower, brainpower, and humor." A maverick with less than reverential views of the navy that was his life for more than forty years, Gallery was a man of strong character and sharp wit who never shied from controversies and who became known as a formidable opponent. Through the years he repeatedly took courageous public stands on matters of naval policy, including the "Revolt of the Admirals," that nearly cost him his career. Gallery is best known for his dramatic capture of a German submarine (U-505) on the high seas, the first such taking of an enemy vessel since the War of 1812, and for his forceful support of aircraft carriers after the war. He also is known for his success as a writer, and the best of his work makes up a significant part of this book-- excerpts from magazine articles, short stories, and

Object ID	Title	Author	Summary
			letters that are incorporated into this biography by two English professors who vividly portray the highly original man behind the deeds and the writings. Readers will learn about each stage of Gallery's life, from his days at the Naval Academy when he called the Secretary of the Navy's son a draft dodger--and then knocked him out--to his humorous stories about navy life and his final essays and books on such controversial subjects as the Pueblo incident. They will also come to appreciate his public relations successes in getting U-505 moved to Chicago, in sponsoring baseball competitions, and in establishing the navy's steel band. From Booklist Almost as entertaining as its subject, this is the story of a true twentieth-century navy original, Rear Admiral Daniel V. Gallery. Mixing conventional biographical narrative with excerpts from Gallery's abundant writings, fictional and nonfictional, the book makes it abundantly clear that, although capturing the German U-505 in 1944 and lobbying to have it preserved in Chicago in 1954 were the admiral's finest achievements, they weren't the only ones. Gallery was an Olympic wrestler; an early naval aviator; a charismatic and effective commander of units of many sizes, including a carrier task group; a gifted writer, especially of humor; and a stormy petrel on behalf of his beloved navy and, particularly, its carriers--and the foreword by novelist Herman Wouk, Gallery's friend, cites a few additional dimensions. A welcome portrait of a man who added much to the effectiveness of the U.S. Navy and to the amount of fun in the cosmos. Roland Green (from Amazon.com)

Object ID	Title	Author	Summary
2004.313.782	Different Kind of Victory, A : A Biography of Admiral Thomas C. Hart	Leutze, James	A Different Kind of Victory is - as far as I have been able to ascertain - the only biography of ADM Hart, CinC Asiatic Fleet at the start of WWII. Kept on past retirement age because of the high regard he was held in, he was then brusquely relieved of command when it became clear his task was impossible. The desire to not have an American associated with another defeat so closely following Pearl Harbor led Washington to consent to his replacement as ABDA naval commander by a Dutch admiral, who then threw away all of Hart's remaining forces. Based heavily on Hart's own monumental diaries, author Leutze manages to salvage Hart's reputation, which had been damaged by politicians and rival US commanders like MacArthur. If any criticism of Leutze can be made, it is that his study is too reliant on Hart's diaries. That does not detract from the achievement the author has made, contributing a well-written study of one of WWII's most misunderstood and maligned naval officers. (from Amazon.com)
2004.313.783	She's Just Another Navy Pilot : An Aviator's Sea Journal	Hirschman, Loree Draude	When the USS Abraham Lincoln left San Diego in April, 1995 for a 6 month deployment in the Persian Gulf, it was the first Pacific fleet ship to go to sea with female combat pilots. This is the story of one of those pilots, a 27 year old navy lieutenant and the only female pilot in the carrier's S-3B Viking antisubmarine warfare squadron. She describes the historic cruise with rare candor and balance.
2004.313.784	I Was There : The Personal Story of the Chief of Staff to Presidents Roosevelt and Truman	Leahy, William D.	The personal story of the chief of staff to Presidents Roosevelt and Truman, based on his notes and diaries made at the time. It is a valuable addition to the mosaic of reminiscence out of which future historians will construct a picture of Franklin D. Roosevelt and of the Second World War. The frank comments on the men he

			worked and associated with, from Stalin and Molotov to Churchill and de Gaulle, are vivid.
2004.313.785	Fleet Admiral King, A Naval Record	King, Ernest Joseph	A naval record like no other. November 18, 2010 By Alan Edward Creager First published in 1952, the memoirs of Fleet Admiral Ernest J. King is entitled "Fleet Admiral King: A Naval Record". It is a simple, matter-of-fact book with a simple, matter-of-fact title. Now, the book is over 500 pages long and entails the career of a United States Navy Fleet Admiral, so don't expect it to be the shortest or easiest thing in the world to read. Fleet Admiral King wrote his book in a very interesting fashion - for one thing, he worked with another Navy officer who helped him put the book together, and for another, he wrote it from a third-person perspective. So far as I was able to see, Fleet Admiral King never said "I did this or that" he always wrote "Admiral King did this or that". Unusual manner of writing for any type of memoir, but there's nothing wrong with that. Grand Admiral Doenitz, in his memoir "Ten Years and Twenty Days" writes in a very similar fashion, though he writes in first-person instead of the third-person perspective King chose in this book. To his credit, King makes no effort to excuse anything he did or said, nor does he make any attempt to make himself look good. All he does is tell his story, confident that his record will speak for itself. Fleet Admiral Ernest J. King was never a popular man - next to him, controversial men like Patton had a far better chance of winning a popularity contest - but he was also extremely intelligent and dedicated to the US Navy. He was there when the United States and the Navy needed him, and he deserves to be remembered as one of the greatest American admirals

Object ID	Title	Author	Summary
			ever. I believe King to be one of the greatest admirals, period. In researching the great generals and admirals of history, more especially their personal memoirs, you would do well to include "Fleet Admiral King: A Naval Record". 2 of 2 people found the review helpful Fleet Admiral King April 26, 2010 By Augustus F. Grable A well rounded biography written by Fleet Admiral Ernest J. King with the help of Walter Whitehill. This is a very good recollection of King's Life from growing up in Lorain, Ohio through his training at the Naval Academy in Annapolis, Maryland, up through World War 2. A very good first hand account of all of his exploits from his first encounters with battle during the Spanish-American war off the island of Cuba, thru the war with Mexico, WW1 the WW2. This is a very good biograhly and was used as the basis for the later biography of King by Thomas Buell. (from Amazon.com)
2004.313.786	Ensign O'Toole and Me	Lederer, William J.	The author of All the Ship's at Sea rides again - up the Yangtze, down the China Sea, into the Pentagon, and roughshod through the Admiral's mess. A new and hilarious, and partly serious, skirmish and love affair with the US Navy by William J. Lederer.
2004.313.787	Life and Letters of Rear Admiral Stephen B. Luce, U.S. Navy, Founder of the Naval War College	Gleaves, Albert	Stephen Bleecker Luce (25 March 1827 – 28 July 1917) was a U.S. Navy admiral. He was the founder and first president of the Naval War College, between 1884 and 1886. (from Wikipedia)

Object ID	Title	Author	Summary
			journals of a man who, as a midshipman, served on wooden sailing vessels and, as an admiral, lived to see the dawn of the atomic age.
2004.313.789	Battleship Sailor	Mason, Theodore C.	Memoir of radioman Mason aboard USS California during the attack on Pearl Harbor. Also provides a social and cultural view of his life in the Navy.
2004.313.790	John McCain : An American Odyssey	Timberg, Robert	(from Amazon.com:) If, as you're reading John McCain: An American Odyssey, you feel a sense of déjà vu, don't be alarmed--you may very well have read this book before. Robert Timberg has extracted from his 1995 book The Nightingale's Song, which dealt with several Naval Academy graduates who went on to serve in Vietnam, those passages that involved Senator John McCain, a candidate for the Republican nomination in the 2000 presidential elections. To this Timberg has added some new, updated material. Roughly half of this story is covered in McCain's own memoir, Faith of My Fathers, including McCain's early military career and an internment in a North Vietnamese POW camp that lasted nearly six years. But it's presented here from an objective, journalistic perspective (and Timberg's own stint at Annapolis informs the sections on the Naval Academy immeasurably). But there's also strong material on McCain's political career, from his first campaigns in Arizona through the dark days of his involvement in the "Keating Five" scandal of the early '90s up to his role in 1999 as a critic of American involvement in the NATO attack on Serbia (which, McCain said, wasn't strong enough). --This text refers to an alternate Paperback edition. From Booklist To buy or not to buy: that is the question. Librarians may recall Timberg's The Nightingale's Song (1995), which took a

Object ID	Title	Author	Summary
			nuanced look at the U.S. Naval Academy and its role in American life by examining the careers of five graduates: McCain; Iran-contra figures Oliver North, John Poindexter, and Bud McFarlane; and novelist and former navy secretary James Webb. In this volume, the author draws on his earlier McCain research but adds "new chapters on McCain's boyhood and youth, on the Keating Five scandal, and on the years since that ordeal ended," as well as a recast Prologue and a new Epilogue. Timberg, himself an Academy graduate, was White House correspondent for the Baltimore Sun during the Reagan administration; he is now deputy chief of that paper's Washington bureau. Where interest in the Arizona senator's presidential candidacy is strong, this focused volume may be popular, especially because McCain's own recent work (Faith of My Fathers) covers only the military careers of the senator and his father and grandfather. Mary Carroll --This text refers to an alternate Paperback edition.
2004.313.791	Admiral William A. Moffett : Architect of Naval Aviation	Trimble, William F.	In this informative biography, Trimble (Wings for the Navy , Naval Inst. Pr., 1990) describes the trials and tribulations of the man who became the first head of the navy's Bureau of Aeronautics in the 1920s. Moffett (1896-1933) was deeply involved in the design and implementation of the navy's new light airship and aircraft carrier programs. His love of the airship and his feeling that it could be an effective weapons system led to his untimely death in the crash of the airship Akron. One of the more interesting aspects of this book is the running battle between Moffett and Gen. Billy Mitchell to see what service, navy or army, would be in control of the navy's aircraft. This is a fascinating look at the father of naval aviation. Strongly recommended for

Object ID	Title	Author	Summary
			any aviation and/or naval history collections. - Terry Wirick, Erie Cty. Lib. System, Pa. Copyright 1993 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. (from Amazon.com:) From Library Journal From Booklist Adm. William A. Moffett has a stronger claim than any other man to being the father of U.S. naval aviation. As the culmination of a naval career that began in the 1890s, he became chief of the Bureau of Aviation in 1921 and remained in that post until his death in the 1933 crash of the dirigible Akron. During those 12 years, he presided over the development of the first U.S. aircraft carriers, regularized aircraft procurement, fought many a bloody bureaucratic battle in defense of naval aviators' careers, and generally proved himself both an innovative leader and an effective politician. In U.S. naval history, perhaps only Adm. Hyman G. Rickover played as decisive a role as Moffett did in the development of new weaponry. Unlike submarine mastermind Rickover, however, Moffett has hitherto lacked a full-scale biography. That lack is met by this superior naval history. Roland Green --This text refers to an out of print or unavailable edition of this title.
2004.313.793	Recollections of a Naval Officer, 1841-1865	Parker, William Harwar	An engaging memoir of a naval officer who went south to fight for the Confederacy. (from usni.org)

Promoted as the second man to the rank of admiral, after his adoptive brother David G. Farragut, Porter helped improve the Navy as the Superintendent of the US Naval Academy after significant service in the American Civil War. He began naval service as a midshipman at the age of 10 under his father, Commodore David Porter, on the frigate USS John Adams. For the remainder of his life, he was associated with the sea. Porter served in the Mexican War in the attack on the fort at Vera Cruz. At the outbreak of the Civil War, he was part of a plan to hold Fort Pickens, near Pensacola, Florida, for the Union; its execution disrupted the effort to relieve the garrison at Fort Sumter, leading to its fall. Porter commanded an independent flotilla of mortar boats at the capture of New Orleans. Later, he was advanced to the rank of (acting) rear admiral in command of the Mississippi River Squadron, which cooperated with the army under Major General Ulysses S. Grant in the Vicksburg campaign. After the fall of Vicksburg, he led the naval forces in the difficult Red River Campaign in Louisiana. Late in 1864, Porter was transferred from the interior to the

Object ID	Title	Author	Summary
			Atlantic coast, where he led the Navy in the joint assaults on Fort Fisher, the final significant naval action of the war. Porter worked to raise the standards of the US Navy in the position of superintendent of the Naval Academy when it was restored to Annapolis. He initiated reforms in the curriculum to increase professionalism. In the early days of President Grant's administration, Porter was de facto Secretary of the Navy. When his adoptive brother David G. Farragut was advanced from rank of vice-admiral to admiral, Porter took his previous position; likewise, when Farragut died, Porter became the second man to hold the newly created rank of admiral. He gathered a corps of like-minded officers devoted to naval reform. Porter's administration of the Navy Department aroused powerful opposition by some in Congress, who forced the Secretary of the Navy Adolph E. Borie to resign. His replacement, George Robeson, curtailed Porter's power and eased him into semi-retirement. (from Wikipedia)
2004.313.797	Rickover	Polmar, Norman	(from Amazon.com:) Hyman G. Rickover was not long removed from his Jewish roots in Poland when he graduated from the U.S. Naval Academy in 1922. After a respectable career spent mostly in unglamorous submarine and engineering billets, he took command of the U.S. Navy's nuclear propulsion program and revived his career, being retired—involuntarily—some thirty years later in early 1982. He was not only the architect of the nuclear Navy but also its builder. In the process, he erected a network of power and influence that rivaled those who were elected to high office and that protected him from them

Object ID	Title	Author	Summary
			when his controversial methods became objectionable or, as critics would suggest, undermined the nation's vital interests. Authors Norman Polmar and Thomas B. Allen, whose full-length biography of Rickover (in manuscript in 1981) was consulted by the Reagan Administration during the decision to remove him from active duty, are eminently qualified to write an essential treatment on the controversial genius of Admiral Rickover. From the Publisher Military Profiles are essential treatments of the lives of significant historical figures. Each book includes the details that one finds in a full-length biography and addresses a theme that explains which aspects of a subject's character, background, or behaviour makes him or her worthy of our attention today.

2004.313.798	Edward Preble : A Naval Biography, 1761-1807	McKee, Christopher	"Christopher McKee's book on Edward Preble is an excellent biography—thorough, perceptive, and judicious—which casts fresh light on a controversial period in American naval and political history." Dumas Malone Commodore Edward Preble is remembered chiefly for his heroic and inspiring -leadership of the third U.S. squadron during the Tripolitan War—including the destruction of the Philadelphia in the harbor of Tripoli and a series of attacks on the city during August and September 1804. His sea career spanned a quarter of a century and illuminates several facets of the naval, economic, and diplomatic history of the United States. Equally important, the life of Edward Preble provides a case study in the genesis of the professional officer corps of the U.S. Navy. Preble's naval career began in the Massachusetts state navy, and Professor McKee's narrative of his service

Object ID	Title	Author	Summary
			aboard the famous frigate Protector and the equally memorable sloop Winthrop provides the best history to date of this little-known aspect of the American Revolution. From 1783 to 1798 Preble participated, as captain and supercargo of merchant ships, in the explosive development of American commerce that saw U.S. merchantmen carrying the flag to ports in every part of the world. But, with the establishment of the U.S. Navy in the 1790s, Preble returned to his first love—naval service—of which he said he was "particularly fond." In 1803, when President Thomas Jefferson was seeking a leader who could bring the inconclusive naval war with Tripoli to an acceptable end, Preble came from comparative obscurity to synthesize the talents of a corps of outstanding young officers—popularly known as "Preble's boys"—many of whom went on to distinguished naval careers themselves. In carrying out Jefferson's resolve, Preble demonstrated that, despite monumental handicaps, objectives could be at least partially won and honor wholly sustained. Professor McKee discovered that the latter years of Preble's life could be understood only after a thorough examination of Jeffersonian naval policy, particularly the Jefferson administration's objectives and strategy in the Tripolitan War. As a consequence, Edward Preble is the first major published study of Jefferson's naval policy—including the controversial gunboat program in which Edward Preble played a key role. Heretofore American histories of the Tripolitan War have been one-sided. Little or nothing has been said about Tripolitan activities or attitudes. As the author has stated in his

			Preface: "To obtain the view from the Pasha's Castle, considerable use has been made of the dispatches of Bonaventure Beaussier, the French consul at Tripoli. The attitude of cultural and moral superiority over opponents that has influenced American histories of certain U.S. wars—particularly the Indian Wars, the Mexican War, the Spanish-American War, and the Barbary Wars—is overdue for retirement. Every effort has been made to understand Yusuf Caramanli and his ministers, and to present them as subtle and skillful representatives of a different, but by no means inferior, culture." Christopher McKee is Associate Professor and Librarian at Grinnell College, Grinnell, Iowa. He was formerly a member of the faculty at Washington and Lee University and at Southern Illinois University.

2004.313.801	Dark Waters : An insider's account of the NR-1, the Cold War's undercover nuclear sub	Vyborny, Lee	From Publishers Weekly A former crewmember and a journalist join forces to tell the absorbing tale of the deepest secret weapon in the U.S. Navy's submarine force, the deep-diving nuclear submarine NR-1. A brainchild of the brilliant and controlling Admiral Rickover, even her construction involved a host of technical problems. When she finally went to sea in 1970, her crew of 12 (including the senior author) found her slow, almost unnavigable on the surface, and facing previously unsuspected threats, such as undersea tsunamis when she operated at her designed depth of 3,000 feet. They and their successors helped place underwater sonar devices, retrieve lost F-14's with secret Phoenix missiles aboard, and perform many other missions that are only hinted at in the book. They had to survive bad food, accommodations that were anything but ergonomic, a reactor that worked most (but not all) of the time and the persistent curiosity of the Soviet Bloc. The Soviet Bloc is gone, of course, and likewise Admiral Rickover, but the NR-1 sails on, the U. S. Navy's oldest operational submarine. Her career was not declassified in time for Blind Man's Bluff, but fans of the earlier book will

Object ID	Title	Author	Summary
			devour this one with enthusiasm. Copyright 2003 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. From Booklist In the manner of Sontag and others' Blind Man's Bluff (1998) , this history of the U.S. Navy's smallest nuclear submarine, the NR-1, is a now-it-can-be-told volume. Conceived by Admiral Hyman Rickover and constructed in the face of his quirks and quiddities by Electric Boat, the premier U.S. submarine builder, the NR (Naval Reactor) was, when launched in 1969, the deepest-diving vessel in the world--also cramped, slow, and rather less than seaworthy. Despite those limitations and such events as battery fires and reactor failures, she became the world's pioneer long-range deep submersible, placing sonar arrays off the Azores, studying Russian minefields in the Mediterranean, and finding sunken F-14s and Phoenix missiles off Norway. With scientists aboard, she aided pioneering underwater archaeology, and throughout all her risings and diversings, her dozen handpicked officers and men enjoyed an esprit de corps that shines from these pages (Vyborny was one of the NR-1's original crew). A useful addition to modern naval history and pure candy for submarine buffs. Roland Green Copyright © American Library Association. 2004.313.802	Flags at Sea	Wilson, Timothy	This is a revised edition of a popular history, first published in 1986, of the flags flown at sea during the Age of Sail. Beautifully illustrated with more than one hundred thirty photographs--seventy-four in color--it features the flags flown by the principal naval powers

Object ID	Title	Author	Summary
			--Great Britain, France, the Netherlands, Spain, and the United States. The clear narrative unravels myths and misunderstandings about where, when, and why certain flags--like the piratical "Jolly Roger"--were flown. It also tackles such complicated issues as signaling in peace and war. Contemporary flag charts and specially commissioned drawings provide the degree of detail necessary for modelmakers, artists, and historians. The remarkable amount of information presented on the all-important functions of identification and signaling at sea makes an important contribution to the literature. (from Amazon.com)
2004.313.803	Autobiography of Rear Admiral Charles Wilkes	Wilkes, Charles	Charles Wilkes (April 3, 1798 – February 8, 1877) was an American naval officer and explorer. He led the United States Exploring Expedition, 1838-1842 and commanded the ship in the Trent Affair during the American Civil War (1861–1865). Although credited with several "firsts", his behavior led to two convictions at court-martial. (from Wikipedia)
2004.313.804	Reluctant Admiral, The :Yamamoto and the Imperial Navy	Agawa, Hiroyuki	This is the story of both an individual and an organization. The organization is the Imperial Navy, whose gentlemanly traditions and international outlook contrasted strongly with those of the army. Based on interviews with people who knew him well, private and intimate correspondence, and secret

Object ID	Title	Author	Summary
			and official documents, it is -- as the New Yorker said -- a "brilliant" book. ===== Review "Candid! fascinating! amusing! and thorough."--Capt. Roger Pineau -- Capt. Roger Pineau "One of the most comprehensive and enlightening biographies available of a wartime leader."-- New York Times -- New York Times "The most penetrating study of Yamamoto that has ever appeared."--David Kahn, author of The Codebreakers -- David Kahn "Yamamoto was, in my view, the greatest admiral since Lord Nelson."--William Manchester, author of American Caesar -- William Manchester ===== 25 of 27 people found the following review helpful Subarashii June 12, 2001 By Karin Paris This was a wonderful book which went into alot of detail about the life of Admiral Isoroku Yamamoto. He was a much more complex person than most people think. He was no ranting imperialistic flunky. In fact, he held most of those types in contempt. So much so, that he had to maintain constant vigilance because of death threats. However, he did his duty, as he was ordered to do, even though he knew the futility of it. He was also totally against the building of the Yamato and Musashi battleships. Utter "folly" he called them and a waste of time and money. He truly believed that the future of war would be aviation. He was proved right. Its really too bad that he was killed, he would have been of great benefit to the restructuring of the new Japanese government. Anyone interested in a more "personal" look of one of the greatest Admirals

Object ID	Title	Author	Summary
			in the world, will love this book, like I did. 15 of 16 people found the following review helpful Excellent study of a complex character December 27, 2002 By Harry Pandolfino This is an excellent study of a complex and contradictory man. Understandably vilified in the heat of war, a more interesting image has appeared over time. One cannot help but admire the daring and gambler quality of a man ordered to start a war he did not agree with and risked his life to prevent. Yamamoto certainly deserves to be remembered as a grand naval commander. It's unlikely any more authoritative work will ever emerge as the author when directly to people who knew Yamamoto in life 22 of 28 people found the following review helpful Yamamoto, the Admiral, the womanizer. July 31, 2001 By C. H Mitchum Admiral Yamamoto did not want to go to war with the United States; a naval war he felt could be sustained for at most 18 months. But go to war he did and it cost him his life. This is an easy to read history of Yamamoto's life, rich in personal details. He turns out to have been an avid womanizer, with one and perhaps two mistresses throughout most of his career. A man who lost interest in his marriage fairly early and was merely a financial contributor for most of his married life. Most of the personal correspondence quoted and many of his poems were written to his number one mistress, with nothing of substance regarding his wife and children. Yamamoto seems to have come up with the strategy for the attack on Pearl Harbor, but the detailed tactical planning was the work of his staff.

Object ID	Title	Author	Summary
			Somehow the debacle of Midway, which occurred under his command and which was planned by his staff, did not result in his immediate replacement. This apparently was due to the Imperial Japanese Forces being in full denial mode and not wanting to high light the disaster by removing the hero of Pearl Harbor.
			Yamamoto seems to have been something of a figurehead for most of his career after Pearl harbor and until his death. This could be misleading since the author focuses so much of his attention on Yamamoto's personal life and not so much on his naval leadership.
			It is particularly interesting to learn that with the many signs pointing to the fact that the Japanese codes had been broken, they denied this possibility and continued to send the "coded" messages which resulted in Yamamoto's plane being shot down by United States P-38s. There is an excellent book on that subject, "Get Yamamoto" but it seems to be out of print ...
2004.313.806	Trafalgar; the Nelson Touch	Howarth, David Armine	The Battle of Trafalgar (21 October 1805) was a naval engagement fought by the British Royal Navy against the combined fleets of the French Navy and Spanish Navy, during the War of the Third Coalition (August–December 1805) of the Napoleonic Wars (1803–1815). The battle was the most decisive British naval victory of the war. Twenty-seven British ships of the line led by Admiral Lord Nelson aboard HMS Victory defeated thirty-three French and Spanish ships of the line under French Admiral Pierre-Charles Villeneuve off the south-west coast of Spain, just west of Cape Trafalgar. The Franco-Spanish fleet lost twenty-two ships, without a

Object ID	Title	Author	Summary
			single British vessel being lost. The British victory spectacularly confirmed the naval supremacy that Britain had established during the previous century and was achieved in part through Nelson's departure from the prevailing naval tactical orthodoxy, which involved engaging an enemy fleet in a single line of battle parallel to the enemy to facilitate signalling in battle and disengagement, and to maximise fields of fire and target areas. Nelson instead divided his smaller force into two columns directed perpendicularly against the larger enemy fleet, with decisive results. Nelson was mortally wounded during the battle, becoming one of Britain's greatest war heroes. The commander of the joint French and Spanish forces, Admiral Villeneuve, was captured along with his ship Bucentaure. Spanish Admiral Federico Gravina escaped with the remnant of the fleet and succumbed months later to wounds sustained during the battle. (from Wikipedia)
2004.313.807	Guide to the Military History of the World War, A, 1914-1918	Frothingham, Thomas Goddard	An attempt has here been made to give the grand tactics of The World War in a brief form, to avoid being turned aside by details, and to provide a knowledge of the war that will afford a sound basis for reading and studying the campaigns.

			citizens of neutral America and the howl of indignation which followed this cold-blooded atrocity resounded throught the world.
2004.313.820	Naval History of World War I, A	Halpern, Paul G.	This book offers for the first time a balanced history of the naval war as a whole covering all participants in all major theaters. The author takes takes the reader beyond just those WWI operations staged on the North Sea to include the Italians and Austrians in the Adriatic; the Russians, Germans, and Turks in the Baltic and Black Seas; and the French and British in the Mediterranean. Important riverine engagements -- notably those on the Danube -- also are included,along with major colonial campaigns such as Mesopotamia and the Dardanelles. The role of neutral sea powers, such as the Swedes in the Baltic and the Dutch in the East Indies, is examined from the perspective of how their neutrality affected naval activity. Also discussed is the part played by the US Navy and the often overlooked, but far from negligible, role of the Japanese navy. The latter is viewed in the context of the opening months of the war and in the Mediterranean during the height of the submarine crisis of 1917. Includes : Naval Balance in 1914 -- Northern Waters: The First Six Months The Mediterranean: 1914-1915 -- Sweeping the Seas The Oversea Campaigns -- The Adriatic -- The Baltic -- The Black Sea The Danube -- From Dreadnoughts to Submarines: 1915-1916 The Submarine Crisis: 1917 -- The Mediterranean: 1915-1918 1918: The Submarine Threat Contained.

Object ID	Title	Author	Summary
			when the US was a participant in the first World War, six German submarines destroyed 197,761 tons of shipping in American waters, laid mines in Chesapeake and Delaware Bays, cut cables in New York Harbor, sank a tug and four barges off Provincetown and spread a real havoc among the fishing fleets out from New England ports. In 1916 the undersea merchant craft Deutschland made 2 trips across the Atlantic and the U-53 arrived in Newport Harbor for a pleasant visit of courtesy. Later the Deutschland was to come back to American waters as the U-155 and to sink 7 ships. But the U-53 sank 5 ships off Nantucket the day after the submarine left Newport, 2 of them less than 3 miles from Nantucket Lighthship. Includes : U-53 -- U-151 -- U-156 -- U-140 -- U-117 -- U-155 -- U-152 - - U-139
2004.313.823	Sea Warfare	Kipling, Rudyard	Contents: The fringes of the fleet Tales of "The Trade" Destroyers at Jutland
2004.313.824	Submarine War, The	Masters, David	One of the most inspiring phases of the sea war was the way in which British merchant seamen faced the attacks of German submarines and prevented Great Britain from being starved into surrender. Germany recognized that if the seamen of England refused to sail, she had the British Empire in her grasp, so the German submarines made war on them without mercy to achieve the aim of the German naval command. English sailors were true to type. They stood fast, and their refusal to be intimidated gave the Royal Navy a chance to overcome the submarine menace.

2004.313.826	Maverick Navy	Moffat, Alexander White	Maverick Navy is an engaging account of a US Naval Reserve Officer's adventures while in command of a subchaser in WWI. Alexander W. Mffat was quickly catapulted, in 1917,

Object ID	Title	Author	Summary
			into the real Navy. His command was a sub-chaser -- a small, almost experimental vessel, newly devised to meet a new menace. She was US Sub-Chaser No. 143. First crossing the Atlantic in the winter of 1917-1918, having to follow other ships in the convoy to which she was assigned because no one aboard had any knowledge of navigation, S. C. No. 143 ultimately served, in a squadron operating out of Plymouth, England, to keep the sea lanes off southern Britain free of enemy intrusion.
2004.313.827	Lusitania, The	Simpson, Colin	On May 7, 1915, the German U-boat 20 torpedoed and sank the unarmed passenger liner Lusitania off the Old Head of Kinsale on the southwest coast of Ireland, killing some 1200 men, women, and children, many of them Americans. The world raged at the barbarity of the Kaiser and the German people, and the act did much to precipitate the later entrance of the US into WWI.
2004.313.828	Victory at Sea, The	Sims, William S.	This is an account of the U.S. naval effort during World War I. This book won the 1921 Pulitzer Prize for History. Contents: When Germany Was winning the War -- Return of the Mayflower -- Adoption of the Convoy -- American Destroyers in Action - - Decoying Submarines to Destruction American College Boys and Subchasers -- The London Flagship Submarine against Submarine -- American Mine Barrage in the North Sea German Submarines Visit the American Coast -- Fighting Submarines from the Air Navy Fighting on the Land -- Transporting two million American soldiers to France
2004.313.829	Battle of the Falkland Islands, The	Spencer-Cooper, Henry Edmund Harvey	Part 1 deals briefly with the movements of British and German warships, and includes the duel fought by the Carmania, and the action that took place off Coronel.

Object ID	Title	Author	Summary
			Part 2 describes the Falkland Islands battle itself, and the subsequent fate of the German cruiser Dresden. Part 3 contains the official dispatches bearing on these exploits.
2004.313.830	Take Her Down	Thompson, Terry Brewster	The first successful submersible was invented by Bushnell, well over a century ago, and perfected by Holland in the mauve decade. Bushnell's invention was nothing more than a large cask with a crude ballast pump and a propeller driven by a hand crank. Holland turned Bushnell's barrel on its side, elongated it into a cigar-shaped hull of heavy steel and utilized power to drive the pumps and propeller. Every submersible since built has been basically of this type, including the USS L-9. It is of this small submarine and her people that Commander Thompson tells in Take Her Down. He tells what happens to Americans inside a long cylindrical steel shell during a war.

Chandler and Introduction, Bibliography, Acknowledgment, and Index. War Maps is a guide to the major actions of WWII with details of land, sea, and air confrontations displaying deployment of men and equipment in battles with development of the war from September 1939 to Hiroshima and Nagasaki. There is text chronicling the states of each confrontation illuminated with more than 200 maps and illustrations.
2004.313.846	Death of the Tirpitz, The	Kennedy, Ludovic Henry Coverley	This is a gripping account of one of the dramatic Allied victories of World War II, the sinking of the German battleship, Tirpitz, in a Norwegian Fjord on 11 November 1944. This is the first book to reveal how essential were the "Ultra" signals--German intelligence messages swiftly decrypted by top-secret team of British code breakers--to Allied surprise attacks on the ship The author vividly recounts the short, unsuccessful career of the Tirpitz: her commissioning, her captain and crew, her few skirmishes and long inactivity and the ultimate destruction.
2004.313.847	U.S. Submarines in World War II	Kimmet, Larry	An illustrated history of U.S. submarine operations in the Pacific during World War II.
2004.313.849	Left to Die : The Tragedy of the USS Juneau	Kurzman, Dan	The first full accounting of the sinking of the USS Juneau in WW II, the stranding of the survivors and subsequent blunders and cover-up of the incident by the military.
2004.313.851	Now Hear This : The Memoir of a Junior Naval Officer in the Great Pacific War	Leach, Douglas Edward	Leach, history professor emeritus at Vanderbilt, served as an antisubmarine officer aboard a Navy destroyer for some 90 weeks during World War II. Although the "Lucky Elden" steamed more than 100,000 miles in two oceans, earning five battle stars, the

Object ID	Title	Author	Summary
			crew never saw an enemy ship or plane and was never damaged by enemy fire. Professor Leach has produced a detailed and perceptive memoir of his own experience in that conflict.
2004.313.855	Sea Power in Conflict	Schubert, Paul	The first half of the book is a study of navies in general, and the elements which make up "the new sea power." The second half is devoted to the naval history of the present war to the attack on Pearl Harbor.
2004.313.858	Eyewitness to Infamy	Travers, Paul J.	Oral history of the brutal attack on Pearl Harbor, 7 December 1941. The narratives cover the full range of military activity on the island, along battleship row and around the harbor, while portraying the human side of the event. Battleship Row -- USS Neosho -- USS Maryland -- USS Oklahoma -- USS Tennessee -- USS Arizona -- USS Vestal -- USS Nevada The Navy Yard -- USS Shaw -- USS Oglala -- USS Helena -- USS Rigel -- USS Cummings -- USS Honolulu -- USS Tautog -- USS Pelias Around the Harbor -- USS Solace -- USS Phoenix -- USS Dobbin -- USS Worden -- USS MacDonough -- USS Selfridge - - USS Utah -- USS Curtiss.
2004.313.859	Singapore : The Japanese Version	Tsuji, Masanobu	Dec. 7, 1941: Japan bombs Pearl Harbor, invades Malaya; WWII explodes in the Pacific....Feb. 14, 1942: Singapore, the supposedly impregnable key to Southeast Asia, surrenders unconditionally to the Japanese forces. The Malayan campaign has been completed in a little over 2 months. This book was published in Japan in 1951 to refute Churchill's account of the fall of Singapore in his Second World War.
2004.313.861	Corregidor : The Saga of a Fortress	Belote, James H.	After the fall of Bataan in April, 1942, Japanese heavy artillery hidden on the peninsula began a massive bombardment of the island fortress only 2 miles away -- the last obstacle to Japan's timetable for conquest of the southwest Pacific. Corregidor's lonely defenders

Object ID	Title	Author	Summary
			endured this pounding for almost a month and braced themselves for the inevitable amphibious assault. On the night of May 5 it came, and for over 12 hours The Rock's garrison fought the enemy to a standstill. The recapture of the island in 1945 was equally hard fought. Ignoring dangerously high winds, American paratroopers surprised the Japanese garrison with a daring drop on Corregidor's highest point, thus sealing the fate of the defenders on lower ground.
2004.313.862	Challenge for the Pacific : Guadalcanal, the Turning Point of the War	Leckie, Robert	Detailed, dramatic narrative of a crucial turning point: the bloody hundred-day Battle of Guadalcanal, which not only changed the whole course of action in the Pacific but also vitally affected the entire outcome of the war.
2004.313.865	History of the Navy of the United States of America	Cooper, James Fenimore	History of The Navy of the United States of America by J. Fenimore Cooper Continued to 1860 From the Author's Manuscripts, and other Authentic Sources, Three Volumes In One, 1866 Previous 1846 with Frontispiece of engraving of Cooper by J. C. Butre. XXV Chapters with Preface by the Author, Cooperstown 1846. And Preface to the Continuation, Cooperstown, Sept., 1853. Contents to Vol. I includes Chapters I - XXV beginning with the Expedition to Plymouth in the May Flower, to Captain Kidd, Shipping in 1750 in different ports; Privateers and the First naval action of the Revolution; Paul Jones; Commodore Sir Peter Parker attacks Charleston; the British and the Randolph and the loss of the Cabot; to Alliance with France; to the Mediterranean; Tripoli; with battles, etc. Pages 13 - 276; End of Vol. I with Appendix A. CONTENTS TO VOL. II. Chapters I - XXVI Naval History of the U. S. starting with Tripoli ending with Appendix to Volume II. pages numbered 8-248. THE NAVY From 1815 to

2004.313.869	Weather for the Mariner	Kotsch, William J.	The date on this book - over twenty years ago - on a technical subject immediately suggests that it probably is dated and has been superseded by better books. I took a chance and bought it anyway. It still is in print from the Naval Institute Press and that Press didn't seem to have anything comparable in print. Am I ever glad that I did. There are many books on understanding weather at sea but none as informative as this one. The discussions of clouds, low and high pressure systems, convection, wind shear, and even hurricanes are as thorough as you will find. Pressure differences and Coriolis force - force due to the earth's spinning on its axis - are fundamental building blocks for the book's explanation of weather. If you want to understand the weather and will be using that knowledge at sea, this is a great book. This book provides explanations of why weather develops, why the trade winds blow the way that they do and what to look for in weather developments. For example, Kotsch explains why daily showers happen

Object ID	Title	Author	Summary
			over land during the day in areas such as Atlanta and why similar showers happen at night in areas such as the Virgin Islands. While not exactly earth shattering, I had noticed this big difference and wondered why it was different. Kotsch explains why you can use ocean swells to see where low pressure systems are, why wind direction changes over the course of the year in low-latitude areas such as the Virgin Islands and much more. The book was written as a textbook for use at the Naval Academy. You might be concerned that the book presupposes that the reader knows physics, but it does not. I unfortunately have forgotten the physics that I learned in high school, so I would have noticed if Kotsch took a lot of physics for granted. A major hole that I noticed because of the book's age is the discussion of how information about weather is acquired. Satellites are of course more important than in the 1980s and the system of bouys used to track the weather is much more extensive than in the 1980s. These deficiencies are not in terms of the understanding of weather though and are not a large part of the book. Perhaps the major deficiency for understanding the weather is the tentative discussion of hurricanes - they are much better understood now. No doubt a meteorologist could find more deficiencies, but I have not noticed errors that affect my practical understanding of the weather. As you can tell, I recommend this book very highly. It may not be the book for you though. If you are looking for rules of thumb to memorize about the weather, you will not like this book. Also, if you are looking for a simple overview, this is not the book for you. An

Object ID	Title	Author	Summary
			overview of the basics that was informative for me was Weather at Sea by David Houghton. (from Amazon.com)
2004.313.870	Up Ship!	Rosendahl, Charles Emery	The author presents fundamental facts and figures, diluted with a bit of personal experiences, about American airship efforts. The library also has Up Ship! - U.S. Navy Rigid Airships 1919-1935 by Douglas H. Robinson and Charles L. Keller, published in 1982. (2004.313.877).
2004.313.871	Planes Without Pilots	Siuru, William D.	The future of unmanned aircraft in military and civilian applications... by the author of "Future Flight" Remotely piloted vehicles (RPV's), drones, and unmanned aerial vehicles (UAVs) have been used for decades as military training targets, reconnaissance tools, and in the testing of new aeronautical concepts. Now with shrinking budgets, reductions in the number of draft age youth, and political opposition to large-scale troop commitments, many military leaders believe UAVs can satisfy the nation's need for less expensive weaponry that requires less direct human participation in armed conflict. "Planes without Pilots: Advances in Unmanned Flight" gives you a broad overview of current UAV research and the many ways this technology is being used in the development of a variety of applications: "Smart" weapons Space probes Unmanned attack aircraft Advanced aerial sensors Weather reporting Atmosphere sampling ... and much more. Author Bill Siuru also describes how specific advances in microelectronics, robotics, and optics have made recent UAV breakthroughs possible, and

Object ID	Title	Author	Summary
			he speculates on the direction of future UAV experimentation. Whether you're an aviation buff aerospace historian, radio control model fan, or just plain curious, with "Planes without Pilots: Advances in Unmanned Flight" you'll gain a better understanding of UAVs - among the most exciting and important aircraft in today's skies. About the Author A retired U.S. Air Force colonel, Bill Siuru holds a Ph.D. in mechanical engineering from Arizona State University and an M.S. in aeronautical engineering from the Air Force Institute of Technology. He is currently a senior research associate at the University of (text covered up by bar code sticker). (from back cover)

2004.313.872	Complete Book of Helicopters, The	Ahnstrom, D. N.	This new, revised edition of "The Complete Book of Helicopters" tells the whole story of helicopters, from the first cumbersome experimental flying machines to today's jet-engined rotor craft. With their unique ability to hover in the air, to take off and land vertically, and to fly in any direction, helicopters are more and more being relied on in emergencies - plucking stranded mountain climbers from inaccessible peaks, retrieving satellites, descending where no other vehicle could go to rescue the wounded from the battlefield. All these and many other vital missions are told about and dramatically illustrated by one of America's foremost experts on aircraft of every kind, D. N. Ahnstrom, author of "The Complete Book of Jets and Rockets." The helicopter first began as an idea in the minds of Western men when they got hold of a curious Chinese toy, then grew into the

Object ID	Title	Author	Summary
			cumbersome, nightmarish contraptions of the long experimental period. After that came the first awkward "flights" (when they all held their breath and ducked), and finally today's fabulous performances and spectacular engineering achievements made by such firms as Sikorsky, Bell, Boeing, and Kaman. According to the experts, this is only the beginning for the machine that some have called "man's most exciting invention." The story of the helicopter belongs to men of all countries and all ages. It is an exciting story of courageous human effort directed toward the fulfillment of man's stubborn wish to fly like a bird. D. N. Ahnstrom now brings this story up to the minute with a comprehensive and authoritative report on the helicopter as it comes of age. NEW AND REVISED EDITION WITH OVER 200 ILLUSTRATIONS ABOUT THE AUTHOR D. N. AHNSTROM is an affiliate of the American Helicopter Society, the American Institute of Aeronautics and Astronautics, and a member of the Aviation/Space Writers Association and of the Aircraft Owners and Pilots Association. Formerly the Managing Editor of "Skyways," a technical trade-publication, the author is now Director and Editor of Publications and Education for the Flight Safety Foundation, an organization devoted to increasing the safety of all aviation flight and ground operations.
2004.313.873	Helicopter Pilot Reports	None Stated	Helicopter Pilot Reports , Aviation Week & Space Technology Magazine with Introduction and Chapter 1 Military, and Chapter 2 Commercial and Index.

Object ID	Title	Author	Summary
			Black & white photographs. The helicopter evaluations in the book were flown by Aviation Week pilot/editors. The are from operational military or general aviation backgrounds. Donald Fink and David Brown, private pilots, flying fixed-wing aircraft and helicopters. Pilot Robert Ropelewski earned his wings in the Marine Corps and flew helicopters on combat missions in Vietnam and Nicholas Kernstock, U. S. Army Helicopter Pilot. Included are UNC-GE Ultra Huey; Robinson R44; Marine/Bell AH-1W; Apache; MD Explorer; Boeing 360; Agusta A129; Hughes 500D, and Boeing/Sikorsky Fantail
2004.313.874	Vertical Flight : the age of the helicopter	Boyne, Walter J. (ed)	(from the Preface:) The history of any technology is best told by those pioneers who endured the hardships, blind alleys, and failures of the early days and emerged triumphant. Many of the articles in this book are first-person accounts by the pioneers who developed the helicopter. They take you through its growth from a vibrating, underpowered curiosity to the irreplaceable adjunct to aviation that it is today. In 1942 the Sikorsky XR-4 was flown from the Sikorsky plant in Connecticut to Wright Field, Ohio, a distance of 761 miles, in five days. Forty years later, two young men from Texas flew a Bell LongRanger around the world, a distance of 24,754 miles, in just under thirty days, an average of more than 800 miles a day. Improvements of the same magnitude were made in speed, altitude, and payload (described by one pioneer in an early helicopter as "two oral messages") and in the critical area of reliability. While today we accept the helicopter and its capabilities as part of our everyday life, this was not always the case. We

			hope you will find it rewarding to see not only where we have been but, more important, where we are going. WALTER J. BOYNE, Director National Air and Space Museum DONALD S. LOPEZ, Deputy Director National Air and Space Museum
2004.313.875	Complete Book of Model Aircraft, Spacecraft and Rockets, The	Hertz, Louis Heilbroner	The Complete Book of MODEL AIRCRAFT SPACECRAFT AND ROCKETS with frontispiece picture by Hobby industry Association of America, Inc. with Introduction , 9 Chapters, Appendixes I - III and Index. Black & White Photographs and Chapters about Non-flying Modes, Flying Models, Control-Line Models, Internal Combustion reciprocating Engines, Model Aeronautics, Solid Fuel-Rockets, Radio Control and the Story of Model Aircraft and Appendixes on Associations, licensing and Literature on Hobby.
2004.313.876	Field Guide to Airplanes of North America, A	Montgomery, M. R.	This is the first true field guide to airplanes. It will enable you to identify virtually any plane in North America, in the air or on the ground. With its companion volume, "A Field Guide to Sailboats of North America," it extends the principles of the famed Peterson Identification System to the manmade world. "A Field Guide to Airplanes of North America" features: - o Over 500 planes - every production model, civilian and military of any vintage, that you are likely to see in North America. - o Beautiful, accurate illustrations showing planes from the side and from below; arrows and detailed drawings pinpoint the differences between similar models. - o A clear, succinct description of each plane, including statistical information,

Object ID	Title	Author	Summary
			history and a list of important field marks that distinguish one plane from another. o Planes grouped, by visual similarity for ease of identification; endpaper charts tell where to find each group in the book. M. R. Montgomery is a writer for the Boston Globe and Gerald Foster is an artist and architect. Both live in Lincoln, Massachusetts, under the southwest flight path of Hanscom Field. (from back cover)
2004.313.877	Up Ship! : U.S. Navy Rigid Airships 1919-1935	Robinson, Douglas Hill	The library also has an earlier history, Up Ship! by Charles E. Rosendahl, published in 1931 (2004.313.870). In the period from 1910-1940 when the airplane was an undeveloped wood and fabric affair, short on endurance and load-carrying capacity, the rigid airship reigned as the conqueror of the oceans and "the battleship of the skies." Germany built over 100 for World War I. Though the airship's military career has ended, the history of the airship is worth telling because of its historical significance and because of the industries that it helped create: duralumin, helium gas, specialized power plants, and synthetic gas-proof materials. One hundred and five officers and men of the U.S. Navy perished in the accidents that ended the careers of the ZR 2 (R 38), Shenandoah, Akron, and Macon.
2004.313.878	Airship Saga	Ventry, Arthur Frederick	Airship Saga, The history of airships seen through the eyes of the men who designed, built and flew them with frontispiece picture of the first British rigid airship, the Mayfly. Preface by the author, Acknowledgements, and Introduction, Airships versus Prejudice; Airship Theory, Zeppelins and other Early Airships; and the British Rigid Airships. The next section is Great Britain: The Airship Service, with the beginnings,

Manned Orbital Space Flight, February 20, 1962, Manned Spacecraft Center National Aeronautics and Space Administration with Foreword, 13 Chapters, Appendixes A-D with black & white photographs and drawings.
2004.313.884	Apollo : The Epic Journey to the Moon	Reynolds, David West	(from Amazon.com:) From Library Journal Among the many books written on the history of the Apollo program, this one, by classical archaeologist Reynolds, stands out. The author of six previous books, including Star Wars: The Visual Dictionary, Reynolds looks back on the history of Apollo from the perspective of the 21st century. NASA, despite its success, was not the flawless government agency many believed it to be, and the lunar astronauts themselves were not simply one-dimensional heroes but complex human beings with failings. Nevertheless, America won the race to the moon, and this book re-creates the drama the whole world experienced over 30 years ago. The well-written text is accompanied

Object ID	Title	Author	Summary
			by numerous photos and drawings much more so than most other works on Apollo history. The author's explanations of complex technological matters are easy to understand, and readers will appreciate the small details he recounts, such as how astronauts repaired a fender on the lunar rover with duct tape. Recommended for all libraries. Jeffrey Beall, Univ. of Colorado Lib., Denver Copyright 2002 Cahners Business Information, Inc. From Booklist This title is definitely one of the best books written about Apollo in recent years. An exuberantly visual treatment of the Saturn/Apollo combination and its specific missions, the work also rues the fact that the Apollo program was rushed to meet JFK's deadline, and didn't fully realize the dreams of Werner von Braun and other 1950s space dreamers whose visions were captured in the paintings of Chesley Bonestell. These form several of a train of full-page sidebars that dominate this book, a design element that invites browsing. Almost every major component of the Apollo complex is displayed, from the ground installations, to the titanic first stage, up to the moonwalker's spacesuit. Standing out among these layouts are those devoted to the most daring and scientifically significant missions, Apollo 15 and 17. Using a panoramic photographic mosaic of those two landing sites amid mountains, Reynolds forcefully impresses the otherworldliness of the moon. In the windup, Reynolds shows von Braun's plan and illustrations for scaling up Apollo into a space station, moon bases, and expeditions to Mars. Instead, following the Skylab interlude, Apollo was turned over to scrap dealers and museum curators. Reynolds' work will attract throngs of readers. Gilbert Taylor Copyright © American

2004.314.019	Aviation : The Pioneer Years	Mackworth-Praed, Ben	187 An illustrated history of airplanes from the days of the early aviators through the beginning of World War II. Discusses the pilots, their uniforms, famous planes, blimps, insignias, air races and circuses, passenger service, and many other related topics. Includes: Origins - pre-1843 Flying machines 1843-1900 Airship and the Aeroplane 1900-1914 Aircraft at War 1914-1918 Post War Years 1919-1938
2004.314.022	Rockets and Jets	Zim, Herbert Spencer	FOREWORD The difficulty in telling the story of rockets and jet propulsion is at the past abounds in meager reports of secret experiments; the resent is cloaked in military secrecy; and the future is an area of ague speculation. Yet here is the story of an idea that is revolutionizing warfare and which may have an even greater effect on future transportation and communication. Since 1940, interest in rockets and jet propulsion has doubled and redoubled. Some of our best scientists have turned their attention the solution of many problems that became critical almost overnight. The development of rockets and jet devices has been based n a wealth of scientific data from fields such as physics, mathematics, chemistry, astronomy, and meteorology. Progress during the past five years has been tremendous. Once again it has been made through co-operative scientific effort. My own files of material, reflecting a long interest in this fascinating subject, gave me some of the data for this book, but more came from men who have carefully gathered and preserved many of the facts about early rocket experiments. G. Edward Pendray, secretary and one of the founders of

2004.314.026	Spitfire	Vader, John	Spitfires have hit the ground, touched the sea, bashed through trees, cut telegraph and high tension wires, collided in the air, been shot to pieces, had rudders and parts of wings fall off and have yet made safe landings, with or without wheels. The Navy version of the Spitfire was the Seafire. (from back cover)
2004.314.027	Story of Flight, The	Settle, Mary Lee	For ages and ages men watched the birds wheel and fly through the air. It took men many days to walk through the woods. But the birds could fly quickly over the trees. Men could not see beyond the next hill. But the birds could look down on the hills and fields. People dreamed of flying. They began to make up stories about men who could fly.
2004.314.028	1939-1945 War Planes	Kershaw, Andrew (ed)	Air power dominated the Second World War. By 1945, the 'flying kites' of 1914-18 had been developed into formidable weapons of war packed with electronic equipment; they were capable of delivering a shattering blow against any enemy on land, at sea; or in the air. These six years from 1939 were to see the passing of the Gloster Gladiator bi-plane, and the advent of the world's first jet fighters; of the gigantic B-29 Superfortresses; and of the rocket technology of the German V-1s and V-2s. The story of the war planes of the Second World War is one of staggering technical progress; and of the courage and daring of those

Object ID	Title	Author	Summary
			who flew these planes. This book covers the development of both Allied and Axis aircraft in the years to 1945, and in various first-hand accounts of missions, vividly conveys the spirit of those battles that were fought thousands of feet above the earth. 			battles were fought; the behind the scenes story of how the bomber was engineered for combat.
2004.315.004	Climax at Midway	Tuleja, Thaddeus V.	The Battle of Midway, fought on 4-6 June, 1942 remains the most dramatic and decisive engagement of the entire Pacific struggle. It is the event which marked the turning point in the fortunes of both antagonists in the war--the end of Japan's offensive action at sea and the beginning of America's steadily accelerating march to victory. This is the story of that battle.
2004.315.006	Day of Infamy	Lord, Walter	The human drama of the great attack: the spies behind it; the pilots on the Japanese aircraft carriers; the crews on the stricken warships; the men at the airfields and bases; the Japanese pilot who captured an island single-handedly when he could not get back to his carrier; the generals, the sailors, the housewives and children responding to the attack with anger, numbness and magnificent courage.
2004.315.008	Guadalcanal : Starvation Island	Hammel, Eric	Contents: The Guadalcanal campaign lasted six months, involved nearly one million men and stopped Japanese expansion in the Pacific. First in a series of independent books by Eric Hammel focusing on Guadalcanal.
2004.315.010	Closing the Circle: War in the Pacific, 1945	Hoyt, Edwin P.	Hoyt's final chapter on one of the most profound and pivotal events of the 20th century -- America's involvement in the Pacific War 1941-45. Closing the Circle concludes the epic chronicle begun in Storm Over the Gilberts (2004.315.269) and continued in To the Marianas (2004.315.035). This final volume covers the last 60 days of action in the Pacific Theater. Hoyt charts not only the operations of the Third Fleet as it surges toward Japan's doorstep, but the political machinations of the Allies' Potsdam Conference and the desperate buildup orchestrated by the Japanese Imperial General Staff to defend its

Object ID	Title	Author	Summary
2004.315.011	Last Cruise of the Emden, The	Hoyt, Edwin P.	homeland from invasion. The Last Cruise of the Emden is the true story of one of the most extraordinary and little-known escapades of WWI. On 8-2-14, the Emden, a German light cruiser, was steaming peacefully off the China coast when over its wireless came the message that the German Empire was at war. The ship was made ready for action. Sailing to the Indian Ocean under orders, the Emden sank some 20 merchant vessels - most of them British -- a Russian cruiser, and a French destroyer. ... With the loss of only 10 men, they had sailed halfway around the world, fought battles on land and sea, and undergone nearly 6 months of hardships to fight again for Kaiser and country. This gripping story of their adventures, brilliantly reported by E. P. Hoyt, is a tribute to their uncommon spirit and will to win in the face of unbelievable odds.
2004.315.012	U-boat Wars, The	Hoyt, Edwin P.	The author has drawn on German, British, and American naval archives to tell the extraordinary story of the U-boat wars and counterwar of the Allies that finally overcame the Nazi threat. It is a story of formidable personalities, struggles between merchant captains, destroyer captains, and U-boat commanders warring against one another. In the end British perseverance and American productivity overcame German aggression and technological skill, but it was an outcome by no means foreordained.
2004.315.013	U-boats Offshore: When Hitler Struck America	Hoyt, Edwin P.	We very nearly lost World War II. Not at Pearl Harbor nor in the land battles of Europe, but on our own doorstep. This is the story of what happened in the early days of the war when Nazi U-boats were sent against the East Coast of America. At the beginning we hadn't a single patrol vessel that could outrun a submarine on the surface, nor enough patrol vessels of any

Object ID	Title	Author	Summary
			kind to escort a convoy, and no aircraft capable of long range patrol. This is how a defense was assembled, how that defense worked, and how it finally drove the U-boats from American shores by the autumn of 1943, never to return again.
2004.315.014	Chronology of the War at Sea, 1939-1945, vol. 1 : 1939-1942	Rohwer, Jürgen	This book embodies all the major events, together with details of the war at sea in all the oceans of the world. Events are placed in their tactical or operational context and are in chronological form. The work also lists the activities of over 8000 warships and the names of over 3000 persons.
2004.315.015	Chronology of the War at Sea, 1939-1945, vol. 2 : 1943-1945	Rohwer, Jürgen	This book embodies all the major events, together with details of the war at sea in all oceans of the world. Events are placed in their tactical or operational context and are in chronological form. The work lists the activities of over 8000 warships and the names of over 3000 persons. It conveys a detailed picture of the conduct of the war at sea in all its aspects; clearly showing the success or failure attending the various modes of naval warfare as practiced by the participating forces.
2004.315.016	Infamy : Pearl Harbor and Its Aftermath	Toland, John	Within weeks after Pearl Harbor, FDR had appointed a blue-ribbon committee, headed by Supreme Court Justice Owen Roberts, to look into the events leading up to the Japanese attack. Its judgment placed the blame on the Hawaiian commanders, General Short and Admiral Kimmel, in spite of much contradictory evidence. Infamy is the 10th investigation, a fascinating and disturbing chronicle that raises and answers important questions.
2004.315.017	But Not in Shame: The Six Months After Pearl Harbor	Toland, John	What were the events which determined the Pearl Harbor catastrophe? What were the last few days on Wake Island like? What really occurred on the infamous Bataan Death March and why did it happen? How did MacArthur make his dramatic escape from

Object ID	Title	Author	Summary
			Corregidor? And what is the story behind the greatest capitulation in American history, General Wainwright's forced surrender of the Philippines? Here are the personal narratives of men like Navy Lt. Champlin, who on his own initiative destroyed the great oil reserves at Manila. Of Yates McDaniel, the last correspondent out of Singapore. Of the Dutch Admiral Helfrich, who was determined to fight to the end in Java against all odds. Of the Japanese officer whose all-too-human decision during the Battle of Midway contributed to an American victory.
2004.315.018	Big E : The Story of the USS Enterprise	Stafford, Edward Peary	The heroic saga of the greatest and best-loved, fighting ship in history, the USS Enterprise took part in almost every major Pacific battle--twenty out of a possible twenty-two. Her battle stars cover the Pacific. This book is more than an account of her battles. It also tells the stories of her brave and competent men who served her both on board and in the air; for they were the source of her unique spirit.
2004.315.019	Little Ship, Big War : The Saga of DE343	Stafford, Edward Peary	This is a true story of men against the sea. It is a day to day account of the ship in which they sailed--the destroyer escort Abercrombie--from the time her keel was laid in Orange, Texas, through the Battle of the Philippine Sea, to picket duty against kamikazes during the invasion of Okinawa, to battle action in the Sea of Japan, the signing of the peace treaty in Tokyo Harbor and eventual decommissioning in San Francisco.
2004.315.020	Subchaser	Stafford, Edward Peary	The tiny wooden sub-chasers were the stepchildren of the fleet, manned mostly by inexperienced reservists, they remained unknown to all but the men who served in them. Yet, these 110-foot warships performed vital chores for the navy everywhere there was action in World War II. They led landing crafts right up to

Object ID	Title	Author	Summary
			the assault beaches, protected them from enemy fire, fought off air attacks, swept for mines, laid down smoke screens, and patrolled the seas for killer submarines--with none of the comforts of the larger ships they assisted. This is the story of one such doughty little ship, subchaser 692, and the thirty earnest young men who made up her crew.
2004.315.021	Admiral Kimmel's Story	Kimmel, Husband Edward	This book by Admiral Kimmel is the final word that sets the story in the perspective of history. Kimmel tells us what it was like to be left holding the bag in a most vulnerable position. Kimmel sticks to his own end of the story. He tells us about the material he was denied, the warning messages he didn't get. He impugns no motives, he makes no deductions from unproved hypotheses. But the book is sufficient to nail down the inescapable point: the blame for the loss of the Pacific fleet battleships rests squarely on Washington, not on the men at Pearl.
2004.315.023	Jutland	Macintyre, Donald G. F. W.	Jutland to the British, Skagge Rak to the Germans; both harsh names suited to the massive clash of arms which took place in June 1916 in the grey wastes of the North Sea. It brought together the two greatest fleets of dreadnoughts ever assembled in a fight such as the world had never seen nor would see again.
2004.315.024	Narvik	Macintyre, Donald G. F. W.	Narvik is a detailed examination of the whole Norwegian campaign with particular emphasis on the efforts of both the Germans and the British to place troops in and secure the strategically important little town of Narvik in northern Norway. The contest --- eventually won by the Germans --- involved both sides in furious action on land and sea and in the air, and Captain Macintyre considers each of these in fascinating detail.

	War II		history of the Gumman F6F, the most important Allied aircraft in the Pacific during 1943-44.
2004.315.026	Harrier	Sweetman, Bill	The McDonnell Douglas (merged with Boeing in 1997) AV-8B Harrier II is a second-generation vertical/short takeoff and landing (V/STOL) ground-attack aircraft. An Anglo-American development of the British Hawker Siddeley Harrier, the Harrier II is the final member of the Harrier family that started with the Hawker Siddeley P.1127 in the early 1960s. The AV-8B is primarily used for light attack or multi-role missions, and is typically operated from small aircraft carriers, large amphibious assault ships and simple forward operating bases. The AV-8B is used by the United States Marine Corps (USMC), Spanish Navy and Italian Navy. A variant of the AV-8B, the British Aerospace Harrier II was developed for the British military. The TAV-8B is a dedicated two-seat trainer version. The Harrier II and other models of the Harrier family have been called "Jump Jets". The AV-8B was extensively redesigned by McDonnell Douglas from the earlier AV-8A/C Harrier. It has a new wing, an elevated cockpit, a redesigned fuselage, and other structural and aerodynamic refinements. The number of hardpoints was increased from five to seven. Later upgrades, which resulted in the AV-8B(NA) and AV-8B Harrier II Plus, added radar and night-attack capabilities. British Aerospace joined the improved Harrier project as partner in 1981. Since corporate mergers in the 1990s, Boeing and BAE Systems have jointly supported the program. AV-8Bs have participated in numerous conflicts, providing close air support for ground troops and performing armed reconnaissance, proving

Object ID	Title	Author	Summary
			themselves versatile assets. US Army General Norman Schwarzkopf named the USMC Harrier as one of the seven most important weapons of the Gulf War. The aircraft took part in combat during the Iraq War beginning in 2003. The Harrier II has served in Operation Enduring Freedom in Afghanistan since 2001, and was used in Operation Odyssey Dawn in Libya in 2011. Italian and Spanish Harrier IIs participated in overseas conflicts, in conjunction with NATO coalitions. American and Italian AV-8Bs are expected to be replaced by the Lockheed Martin F-35B Lightning II. (from Wikipedia)
2004.315.027	Phantom	Sweetman, Bill	The McDonnell Douglas F-4 Phantom II is a tandem, two-seat, twin-engine, all-weather, long-range supersonic jet interceptor fighter/fighter-bomber originally developed for the United States Navy by McDonnell Aircraft. It first entered service in 1960 with the U.S. Navy. Proving highly adaptable, it was also adopted by the U.S. Marine Corps and the U.S. Air Force, and by the mid-1960s had become a major part of their respective air wings. The Phantom is a large fighter with a top speed of over Mach 2.2. It can carry over 18,000 pounds (8,400 kg) of weapons on nine external hardpoints, including air-to-air missiles, air-to-ground missiles, and various bombs. The F-4, like other interceptors of its time, was designed without an internal cannon. Later models incorporated a M61 Vulcan rotary cannon. Beginning in 1959 it set 15 world records for in-flight performance, including an absolute speed record, and an absolute altitude record. The F-4 was used extensively during the Vietnam War, serving as the principal air superiority fighter for both

Object ID	Title	Author	Summary
			the Navy and Air Force, as well as being important in the ground -attack and reconnaissance roles by the close of U.S. involvement in the war. The Phantom has the distinction of being the last U.S. fighter flown to attain ace status in the 20th century. During the Vietnam War the USAF had one pilot and two weapon systems officers (WSOs), and the US Navy one pilot and one radar intercept officer (RIO), achieve five aerial kills against other enemy fighter aircraft and become aces in air-to-air combat. The F-4 continued to form a major part of U.S. military air power throughout the 1970s and 1980s, being gradually replaced by more modern aircraft such as the F-15 Eagle and F-16 in the U.S. Air Force; the Grumman F-14 Tomcat and F/A-18 Hornet in the U.S. Navy; and the F/A-18 in the U.S. Marine Corps. The F-4 Phantom II remained in use by the U.S. in the reconnaissance and Wild Weasel (suppression of enemy air defenses) roles in the 1991 Gulf War, finally leaving service in 1996. It was also the only aircraft used by both U.S. flight demonstration teams: the USAF Thunderbirds (F-4E) and the US Navy Blue Angels (F-4J). The F-4 was also operated by the armed forces of 11 other nations. Israeli Phantoms saw extensive combat in several Arab–Israeli conflicts, while Iran used its large fleet of Phantoms in the Iran–Iraq War. Phantoms remain in front line service with seven countries, and in use as an unmanned target in the U.S. Air Force. Phantom production ran from 1958 to 1981, with a total of 5,195 built, making it the most numerous American supersonic military aircraft. (from Wikipedia)
2004.315.028	US Navy in World War Two, 1941-1942, The	Stern, Robert Cecil	Introduction: The US Navy found itself in a shooting war rather abruptly on the

Object ID	Title	Author	Summary
			morning of 7 December 1941. This story, however, begins well before that, as the United States edged ever closer to involvement in the crucial Battle of the Atlantic. Unwilling to stand by and watch Great Britain succumb to the U-boat threat, yet politically restrained from declaring war, President Franklin D. Roosevelt instituted a 'short of war' policy designed gradually to increase US involvement without unduly alarming the isolationist majority in America. The Japanese attack on Pearl Harbor instantly solved his political problems, but created the worst kind of military nightmare. The US faced a two-front conflict spread over more than half the globe. At first, the only force available to fight that war was the Navy, damaged but not crippled, obliged to carry on the fight with the resources available. This volume is the first in a planned multi-volume series dealing with the US Navy in the Second World War. It covers the prewar 'short of war' period, the Pearl Harbor attack, the early war involvement in the Atlantic and the crucial South and Central Pacific campaigns that concluded with the Battles of the Coral Sea and Midway. This is a period of slightly less than a year, from late June 1941, when 'FDR' declared an 'Unlimited National Emergency' and took over the task of escorting convoys between the US and Iceland, to early June 1942. It will mention climates and locales as diverse as Reykjavik and Bora Bora. The task of compiling a photographic essay covering this fascinating period is almost as complex and interesting as the story itself. In general, naval warfare is harder to document pictorially than war on the ground or in the air, since actions are much more likely to take place in poor visibility or at night (in fact, one of the

Object ID	Title	Author	Summary
			most decisive campaigns of the war, the battle for the mastery of the waters around Guadalcanal, took place almost exclusively at night), and participants are often spread out over vast areas of water and air, mere specks on the horizon at best. Add to this an administrative quirk that put the vast bulk of the photographic resources in the hands of BuAer (the Navy's Bureau of Aeronautics) at the beginning of the war, and it is surprising that there emerged a rich and complete photographic archive. The author wishes to acknowledge the help of those people without whom he never would have been able to find his way through this maze of archives and collections. These include Chuck Haberlein and his staff at the Naval Historical Center, Bob Cressman (who among his other accomplishments is Carrier Editor of The Hook), the helpful folk at the Air Force's Magazine and Book Division and the research staff at the Smithsonian Institution's Air and Space Museum, particularly my friend Dana Bell. Without them and many others, this book could never have come to pass. Robert C. Stern
2004.315.029	F-14 Tomcat	Reed, Arthur	"The most potent air superiority fighter in the Western armory", this is the view of Arthur Reed, air correspondent of the London "Times," and author of this book of the Grumman F-14 Tomcat now operational with the United States Navy and the Imperial Iranian Air Force. The claim is justified by the fact that the Tomcat has demonstrated, through its on-board Hughes AWG-9 weapons system, its ability to pick up and track up to 24 incoming enemy aircraft or missiles at distances approaching 200 miles, to inform the two-man crew which six of the 24

Object ID	Title	Author	Summary
			constitute the greatest threat, work out for them which of the three types of missiles carried is best to use, and then tell them exactly when to fire. The Hughes Phoenix missile gives the Tomcat its Sunday punch, in effect, six small fighters to each F-14, each with a mind of its own, able to catch and knock down incoming threats whether they're flying at sea level or at 100,000 feet, subsonically or at Mach 5.5. Add to this a completely automatic swinging wing and superb dogfighting ability, and the most potent fighter claim can be seen to be no empty one. Ironically, this excellence only came about as a result of the collapse of a previous project, the F-111B, and its pursuit went close to bankrupting the company perfecting it. The F-14 line is due to go on to the year 2000, and at this stage it is difficult to see what will follow it. Arthur Reed's "F-14 Tomcat" gives a fascinating account in words and pictures of the evolution of an outstanding modern weapons system. Cover: Wheels, flaps and hook down, and with its variable-geometry wing in the maximum-lift position, an F-14 Tomcat of VF—32 Swordsmen squadron United States Navy comes in for a landing./Grumman (from dust jacket flap)

2004.315.030	Harrier	Mason, Francis K.	The history of the Harrier — the world's first successful jet V/STOL aircraft -- is as remarkable as the aeroplane itself. Perhaps most remarkable of all, as this book clearly shows, is the fact that the project even survived in the face of official hostility, lack of political and professional backbone, and sheer ignorance. McDonnell Douglas merged with Boeing in 1997.

Object ID	Title	Author	Summary
			After the end of the Second World War, the vulnerability of airfields to missile attack became increasingly obvious, while in more recent years the viability of the large fleet aircraft carrier has also been seriously questioned. In both contexts, the availability of a V/STOL combat aircraft, capable operating from small ships or clearings in forests, makes obvious sense. Yet it was to be many years before the validity of the concept gained Service acceptance. In this authoritative study, Francis K. Mason — himself a former Hawker senior projects designer — describes early post-war experiments with vertical take-off aircraft and the political climate in which Hawk persevered with their P 1127 design in the face of official apathy. An often unappreciated fact which the author is at pains to point out is that it was only thanks to substantial American funding that the Bristol vectored-thrust Pegasus turbofan was brought to fruition, for without this engine there might have been no Harrier. Indeed, American support for the project has always been enthusiastic continues today with the joint Anglo-American development and construction the advanced AV-8B, which seems likely gain acceptance as the next V/STOL combat aircraft by the two nations. This book traces every stage of the Harrier's evolution, flight trials and operational success with the Royal Air Force, Royal Navy and United States Marine Corps. It discusses the problems inherent in V/STOL operations and not only provides a detailed description of the Harrier's structure, but also a complete list of every aircraft built to date, with brief histories of each. Well illustrated with superb photographs and the author's own painstakingly researched drawings and tone

			and campaigns. The foci are the British-German and the United States-Japanese confrontations at sea.
2004.315.042	Luciano Project : The Secret Wartime Collaboration of the Mafia and the U.S. Navy, The	Campbell, Rodney	It the desperate winter of 1942. Twenty one United States and Allied ships are torpedoed off East Coast ports in January, Twenty-seven in February, Fifty in March. The S.S.Normandie, luxury liner converted to troopship--able to outrun the fastest U-boat--inexplicably bursts into flames and capsizes at her Hudson River pier. Rumors of Axis spies and saboteurs flood the New York waterfront. These grim historical facts set the stage for one of the strangest episodes of World War II--the astonishing, true story of the secret collaboration of United States Naval Intelligence and key leaders of the Mafia to seal up the Port of New York from Nazi infiltration.
2004.315.043	Different Kind of War: The Unknown Story of the Combined Guerrilla Forces Created in China by the U.S. Navy and the Chinese During World War II, A	Miles, Milton E.	This is a first hand story of a previously unknown episode in the history of World War II. The high-level Sino-American Cooperative Organization (SACO) was formed by Miles and the powerful General Tai Lee, the secretive, anti-Western head of China's vast military intelligence organization. This organization set up the training, equipping, and operating of guerrilla troops against the Japanese occupation forces in China.
2004.315.044	Tin Can Sailor : Life Aboard the USS Sterett, 1939-1945	Calhoun, C. Raymond	The story of the USS Sterett and some of the officers and men who served aboard her, from shakedown to decommissioning. A detailed report of her operations during World War II, including her part in the Third Battle of Savo Island in the waters of Iron Bottom Sound.
2004.315.045	Pacific War : World War II and the Japanese, 1931-1945, The	Ienaga, Saburo	The Pacific War is the most important critical Japanese book on WWII to appear in English. Saburo Ienaga, one of Japan's leading intellectuals, brings to this awesome conflict a perspective rarely encountered by Americans.

Object ID	Title	Author	Summary
			The result is a deeply moving and memorable portrayal of how and why Japan waged war from 1931 to 1945, and what life was like for the Japanese people in a society engaged in total war.
2004.315.047	Okinawa: The Great Island Battle	Frank, Benis M.	Only 350 miles from Japan itself, the island of Okinawa became a huge fortress where the Japanese would try to stop the Allied advance. If Okinawa fell, the Home Islands would be next. Hence the American landing on Easter Sunday 1945 touched off the bloodiest of all the battles in the Pacific War. Before it was over, more than 50,000 U.S. soldiers, sailors, airmen and marines had become casualties.
2004.315.048	War Fish	Grider, George	War Fish is a story of the service that sank more than half the tonnage destroyed in the Pacific in World War II--the U. S. Navy's submarines. The author, veteran of five submarines and nine patrols, tells of this heroic service as he lived it, and of the mystery, romance and loneliness that bound together the men who were responsible for it.
2004.315.049	Fading Victory : The Diary of Admiral Matome Ugaki, 1941-1945	Ugaki, Matome	This book is a candid and personal account of World War II by a major Japanese military leader. Revealing of the Japanese military mind and analytical about Japan's conduct of the war, Ugaki's diary begins in October 1941 and includes detailed entries covering virtually every day of the war in the Pacific.
2004.315.050	Operation Iceberg: The Invasion and Conquest of Okinawa in World War II	Astor, Gerald	Here is a unique recreation of one of the century's most decisive battles -- the terrible, four-month conflict that preceded by a scant eight weeks the Japanese surrender on V-J Day. Operation Iceberg, as it was known, saw the fiercest attacks of kamikazes in the entire Pacific Theater of War. The U.S. fleet suffered 34 ships sunk, 368 damaged, 5,000 sailors killed and 5,000 more wounded. Before it was over 7,700 American soldiers were killed and 31,800 were

Object ID	Title	Author	Summary
			wounded until the Japanese, with a garrison of 100,000, finally surrendered.
2004.315.051	Halsey's Typhoons	Adamson, Hans Christian	On Dec. 11, 1944, Admiral William F. "Bull" Halsey led his mighty Third Fleet of carriers, battleships, cruisers, and destroyers out of Ulithi Lagoon to spread his "big blue blanket" of carrier planes over northern Luzon in support of General MacArthur's drive to recover the Philippines from the Japanese. On Dec. 17, a typhoon struck. Within a few hours, 780 lives were lost, 3 destroyers had turned turtle and gone to the bottom, and other ships, large and small, were mauled beyond belief. In June, 1945, the fleet was operating against southern Japan and Okinawa and suffering painful losses of men and ships in nearly constant Kamikaze attacks. On June 4, the fleet steamed east to run into another typhoon. Luckily, because of lessons learned in the December typhoon, only 6 lives were lost, with 36 ships damaged and 76 planes destroyed.
2004.315.052	Mosquito Fleet, The : The History or the PT Boat in World War II	Keating, Bern	This book provides a complete, historically accurate account of United States PT boats in World War II.
2004.315.053	Admiral's Wolf Pack, The	Noli, Jean	The German U-boats of World War II were an incredibly deadly and effective force, bent on destroying Allied arms and supplies before they could reach the battlefields. This is a remarkable history of the German U-boat, that draws heavily on Kriegsmarine combat records, and on interviews with those who served aboard the "Grey Wolves". This book gives a broad picture of Allied and German naval tactics n the Battle of the Atlantic--and offers a startling inside view of the special horrors and dangers of submarine warfare.
2004.315.054	Decision at Sea : The Convoy Escorts	Kemp, Peter	The fate of the nations at war hung on the convoy escorts, the shepards who guarded the precious cargoes on their

Object ID	Title	Author	Summary
			journeys across waters where U-boats lurked and surface raiders might suddenly appear. German aircraft, battle cruisers, submarine wolfpacks--all had to be beaten off and mastered.
2004.315.056	USS Arizona, The : The Ship, the Men, the Pearl Harbor Attack, and the Symbol that Aroused America	Jasper, Joy Waldron	The bombing of the battleship Arizona by the Japanese in Pearl Harbor on Dec. 7, 1941; Eyewitness accounts of the bombing and sinking. The compelling history of the USS Arizona before, during and after the attack.
2004.315.057	Undersea Victory: The Influence of Submarine Operations on the War in the Pacific	Holmes, Wilfred Jay	Undersea Victory by W. J. Holmes, U. S. N. served in the 1920's and during WWII as Combat Intelligence Officer on Admiral Nimitz's staff. with Special Procedures Used In The Index and Glossary, Foreword, Acknowledgments, XXVII Chapters including officers, submarines, battle locations, and dates from 1941-1945. Bibliography, Index, and Glossary. Black & White Drawings of Maps.
2004.315.058	War against Japan, The	Hunter, Kenneth E.	The photographs have been especially selected to show important terrain features, types of equipment and weapons, living and weather conditions, military operations, and matters of human interest. The reader gains an appreciation not only of the terrain upon which actions were fought, but also of its influence on the capabilities and limitations of weapons in the hands of both our troops and those of the enemy. This book deals with the Pacific Theater of Operations and is divided into six sections: (1) The Allied Defensive; (2) The Strategic Defensive and Tactical Offensive; (3) The Offensive-1944; (4) The Final Phase; (5) The China-Burma-India Theater; and (6) The Collapse of Japan and the End of the War in the Pacific.
2004.315.059	Underwater War, 1939-1945, The	Compton-Hall, Richard	Underwater War by Commander Richard Compton-Hall, MBE< RN (ret.) artwork by John Batchelor with Title page photograph of HMS Taku, and Contents page photograph of Type VHC U-boat at

Object ID	Title	Author	Summary
			surrender May 1945. Crew of U-826 alongside. 18 Chapters, Footnotes, and Index. Battles, Mechanics, Life Below, Communications, Underwater Weapons, Attack, the Mediterranean, United Kingdom, the Atlantic, Indian Ocean, Pacific and Soviet Submarines.
2004.315.061	French Navy in World War II, The	Auphan, Paul	This book is the 9th volume in the US Naval Institute's series of historical studies covering WWII naval operations from all sides - enemy as well as American and Allied
2004.315.062	Guadalcanal Remembered	Merillat, Herbert Christian Laing	A candid, searching look at one of the modern world's crucial battles. Derived from day-to-day notes taken during the bitter air-sea-ground struggle between the Japanese and Americans for the hotly contested island. Includes a well-documented inquiry into commander's decisions.
2004.315.063	Battle for Guadalcanal, The	Griffith, Samuel B.	Contents: Aug. 7, 1942 Guadalcanal assault, land fighting, defense of Henderson Field airstrip, naval engagements, first World War II defeat of a Japanese army which subsequently abandoned the island.
2004.315.064	Tarawa: A Battle Report	Werstein, Irving	Contents: Betio -- November, 1943 Operation Galvanie -- November, 1943 Betio -- Saturday, Nov. 20, 1943 The Death Struggle -- Sunday, Nov 21 -- Tuesday, Nov 23, 1943
2004.315.065	Hold the Marianas : The Japanese Defense of the Mariana Islands	Denfeld, D. Colt	"Hold the Marianas" is the first English language account of the World War II battle of the Marianas from the Japanese perspective. Employing diaries, messages, and oral histories in the English, Japanese and Korean languages, the author demonstrates that the Japanese commanders were their own worst enemy. Despite the importance of the Marianas to the home islands, they were slowly reinforced and defended at the beach line, a terrible choice.

Object ID	Title	Author	Summary
2004.315.066	White Ensign : The British Navy at War, 1939-1945	Roskill, Stephen Wentworth	An account of the British effort in the war at sea 1939-45, A tale of endurance in the face of disaster, of patience in adversity, and of persistence in the pursuit of victory recounted honesty towards own mistakes and fairness towards the late enemies.
2004.315.067	Coral and Brass	Smith, Holland McTyeire	The story about a Man, a Corps, and a War. A personalized account of over forty years in the service of his country , culminating in the greatest war in our history. (from dust jacket:) "Howlin' Mad" Smith's Own Story of the Marines in the Pacific
2004.315.068	Decision at Trafalgar	Pope, Dudley	The Battle of Trafalgar (21 October 1805) was a naval engagement fought by the British Royal Navy against the combined fleets of the French Navy and Spanish Navy, during the War of the Third Coalition (August–December 1805) of the Napoleonic Wars (1803–1815). The battle was the most decisive British naval victory of the war. Twenty-seven British ships of the line led by Admiral Lord Nelson aboard HMS Victory defeated thirty-three French and Spanish ships of the line under French Admiral Pierre-Charles Villeneuve off the south-west coast of Spain, just west of Cape Trafalgar. The Franco-Spanish fleet lost twenty-two ships, without a single British vessel being lost. The British victory spectacularly confirmed the naval supremacy that Britain had established during the previous century and was achieved in part through Nelson's departure from the prevailing naval tactical orthodoxy, which involved engaging an enemy fleet in a single line of battle parallel to the enemy to facilitate signalling in battle and disengagement, and to maximise fields of fire and target areas. Nelson instead divided his smaller force into

Object ID	Title	Author	Summary
			two columns directed perpendicularly against the larger enemy fleet, with decisive results. Nelson was mortally wounded during the battle, becoming one of Britain's greatest war heroes. The commander of the joint French and Spanish forces, Admiral Villeneuve, was captured along with his ship Bucentaure. Spanish Admiral Federico Gravina escaped with the remnant of the fleet and succumbed months later to wounds sustained during the battle. (from Wikipedia)
2004.315.069	Destruction of the Bismarck, The	Bercuson, David J.	The authors uncovered much new information on the Bismark, including a close examination of classified British and United States diplomatic files, only recently opened, revealing secret diplomatic maneuverings between Churchill and Roosevelt. This new information allowed them to tell the full story of the Bismark for the first time, from key strategic decisions of the national leaders, to the gripping hour-by-hour account of the battle.
2004.315.070	U-boat Adventures: Firsthand Accounts from World War II	Wiggins, Melanie	Twenty-one U-boat veterans tell their stories in this collection of their experiences. While many books have been written about the U-boat war, this is one of the few that focuses on the lives of the submariners, and rarer still is its concentration on the crewmen rather than the officers. The author interviewed seventeen men of the enlisted ranks, along with five commanders, to take readers into the terrifying world of underwater warfare, where every single crewman made a crucial difference in the fate of the boat.
2004.315.072	Special Valor : The U.S. Marines and the Pacific War, A	Wheeler, Richard	The first comprehensive general history of the role played by the Marine Corps in this campaign, covering all the battles in which the Marines

Object ID	Title	Author	Summary
			fought. Wake Island -- Guadalcanal -- stopped the Japanese advance toward Australia and gave America and its allies control of the strategically important Solomon Islands. Follows the slow, painful, island-by-island counterattack toward the Japanese homeland during which the Marines created new legends at such faraway places as Bougainville, Saipan, Tarawa, Guam, Iwo Jima and Okinawa. Holding off Japanese assault waves at Guadalcanal's Heartbreak Ridge, storming across the coral reefs off the atoll of Tarawa, blasting out stubborn defenders in the caves of Guam, struggling over Iwo's lava-covered and heavily shelled surface and up the slopes of its lofty Mount Suribachi to raise the Stars and Stripes, and pressing forward over Okinawa's heavily defended moonscape. Stories of the Marine combat pilots operating both from aircraft carriers and captured or rapidly constructed island airstrips.
2004.315.073	Under the Southern Cross: A Petty Officer's Chronicle of the USS Octans, Banana Boat become World War II Supply Ship for the Southern Pacific Fleet	Oliver, Kenneth G.	The author uses the ship's deck log and muster rolls, records from the National Archives and the US Navy, remembrances of fellow crew members, and his own memory to chronicle the ship's service as a part of the Seventh Fleet that carried supplies to General MacArthur and his troops as they leap-frogged through the Pacific from their base in Australia to the Philippines.
2004.315.074	Pirate of Tobruk : A Sailor's Life on the Seven Seas, 1916-1948	Palmer, Alfred Brian	Rarely has such a wealth of personal and professional maritime experiences been included in a single memoir. The authors swashbuckling life at sea covered the first half of the twentieth century, spanning the ages of sail and steam.
2004.315.075	Germany's High Sea Fleet in the World War	Scheer, Reinhard	Contents -- Part I -- The first 2 years of the war to the Battle of Skagerrak Part II -- From the Battle of the Skagerrak to the Unrestricted U-boat Warfare Part III -- The U-boat

			Campaign
2004.315.078	Sea Hawks, The : With the PT Boats at War	Hoagland, Edgar D.	This book tells of the Authors remarkable experiences during the war. It is noteworthy for its concreteness and specificity. It illuminates for the reader how the PT boats and their plucky crews battled the Japanese, what life was like with the boats, as well as details about the boats themselves, their weapons, and tactics.
2004.315.079	Sea Wolves: The Story of German U-boats at War, The	Frank, Wolfgang	A complete story of the German U-Boat effort: the antecedents of the "submersible," the campaigns of World War I, the secret rebuilding of the Flotilla under Admiral Donitz in 1935, and finally the "Golden Age" of the U-boat in World War II.
2004.315.080	Boarding Party : The Last Action of the Calcutta Light Horse	Leasor, James	In late 1942, when Allied fortunes stood at their lowest, German U-boats unexpectedly began to decimate shipping in the Indian Ocean. In 1 month alone they sank 46 ships, a total of 250,000 tons. These U-boats were being guided to their targets by a secret transmitter aboard a German ship, which had sought shelter in the neutral harbor in the Portuguese colony of Goa 400 miles south of Bombay. In Calcutta 1400 miles away, some civilian merchants, bankers, solicitors and accountants belonged to a part-time territorial unit, The Calcutta Light Horse. The date for this strange and desperate assault was March 9, 1943. What happened when 18 middle-aged civilians formed their own boarding party -- and the astonishing results that followed -- makes this one of the strangest, funniest and most exciting stories of war in the East.
2004.315.083	Encounter! Combat History of USS Tinosa	Watrous, Allen E.	USS Tinosa (SS-283), a Gato-class submarine, was the first ship of the United States Navy to be named for the tinosa, a poisonous, black, tropical fish. The first Tinosa (SS-283) was laid down on 21 February 1942 at Vallejo, California, by the Mare Island Navy Yard; launched on 7 October 1942;

			sponsored by Mrs. William E. Molloy; and commissioned on 15 January 1943, Lt. Comdr. Lawrence Randall Daspit in command. (from Wikipedia)
2004.315.084	Battle of the Bismarck Sea	McAulay, Lex	In the Battle of the Bismarck Sea, the author provides the first complete account of the destruction of the crucial Japanese reinforcement convoy to Lae, New Guinea, on 2-4 March 1943, a pivotal battle in the South West Pacific that has been neglected by historians. Unable to depend on ground or surface-naval forces, which had been wiped out by previous Japanese attacks, the Royal Australian Air Force and the United States 5th Air Force banded together to overcome incredible odds.
2004.315.085	Belly of the Beast : A POW's Inspiring True Story of Faith, Courage, and Survival Aboard the Infamous WWII Japanese Hell Ship Oryoku Maru	Pearson, Judith	On December 13, 1944, POW Estel Myers was herded aboard the Japanese prison ship Oryoku Maru with more than 1600 other American captives. They were bound for Japan. Suffocation, malnutrition, disease, dehydration, infestation, madness, and simple despair claimed the lives of more than three-quarters of those who boarded 'the beast'. Myers survived.
2004.315.086	Battle of the Atlantic, The	Pitt, Barrie	With the daring torpedo attack of the German submarine, the U-47, Hitler's Navy opened the Battle of the Atlantic--one of the fiercest, and in many ways the most crucial of all the armed confrontations of the Second World War. The four-year struggle at sea is vividly chronicled and illustrated. This book relates the early days of surface warfare, and scuttling of Germany's famous "pocket battleship" the Graf Spee, and the sinking of the royal Navy's pride, the battle cruiser Hood. Not until a year after the U.S. came in to War did Allied ship launchings finally overtake sinkings.
2004.315.087	Mediterranean, The	Whipple, Addison Beecher Colvin	The Battle of the Mediterranean was the name given to the naval campaign fought in the

Object ID	Title	Author	Summary
			Mediterranean Sea during World War II, from 10 June 1940-2 May 1945. For the most part, the campaign was fought between the Italian Royal Navy (Regia Marina), supported by other Axis naval and air forces, and the British Royal Navy, supported by other Allied naval forces, such as Australia, Netherlands, Poland and Greece. U.S. naval and air units joined the Allied side in 1942. Each side had three overall goals in this battle. The first was to attack the supply lines of the other side. The second was to keep open the supply lines to their own armies in North Africa. The third was to destroy the ability of the opposing navy to wage war at sea. Outside of the Pacific, the Mediterranean saw the largest conventional naval warfare during the war. In particular, Allied forces struggled to supply and retain the key naval and air base of Malta. (from Wikipedia)
2004.315.089	Italian Navy in World War II, The	Bragadin, Marc'Antonio	At time of printing this book constitutes the only complete, authoritative, albeit streamlined, history of the Italian Navy in World War II. The Author's history of the Italian Navy's activities in the Mediterranean, the Black Sea, and on the high seas between 1939 and 1945 presents a picture that never before has been available to English-speaking readers unversed in Italian.
2004.315.090	German Navy in World War II, The	Von der Porten, Edward P.	This book presents an accurate, clear, and vivid picture of German naval strategy. In this dramatic and perceptive account of a vital phase of World War II, the aurthor traces the development of the new navy during the prewar years, describing the secret building programs that contravened the Treaty of Versailles and the struggles over policy that determined the size and

Object ID	Title	Author	Summary
			composition of the new Fleet when war broke out. The important strategic and tactical decisions of the war, and the thinking behind them, are clearly revealed.
2004.315.091	Semper Fi, Mac : Living Memories of the U.S. Marines in World War II	Berry, Henry	This is a book about Marines --- the tough, battle-trained troops that stormed the beaches of Bougainville, Tarawa, Saipan, Iwo Jima, Okinawa --- in some of the bitterest and bloodiest fighting of WWII. Here some of the survivors, from the perspective of time and age, recreate in more than 100 interviews a personalized microcosm of the Pacific War experience --- the camaraderie, the women, the loneliness, the fear --- and the profound emotional as well as spiritual rewards. "There is no such thing as an ex-Marine..." This soldier's -eye portrait of the Marine engagements in the Pacific vividly bears out the truism through the filter of memory and recollection.
2004.315.093	Brave Ship, Brave Men	Lott, Arnold S.	from United States Chronology : "United States naval vessels damaged, Okinawa area: Light minelayer Aaron Ward (DM34), by suicide plane." This is the story of the men and the ship as told by the officers and men who served aboard her. The kamikaze struck the ship in the early evening hours of May 3, 1945, inflicting severe damage. They managed to return the ship to the United States with only one engine.
2004.315.094	Destruction of Convoy PQ.17, The	Irving, David John Cawdell	A description of the hour-by-hour, blow-by-blow account of the catastrophic encounter of the Convoy PQ.17 and the mighty German battleship 'Tipitz'. Rich in detail, it describes the emotions and actions-heroic and cowardly-of the Allied sailors, fighting desperately against overwhelming odds, and the magnitude of their prize.
2004.315.095	Tin Can Man	Jernigan, Emory J.	The author recreates life during World War II as seen through the eyes of young sailors aboard the USS Saufley, one or the

Object ID	Title	Author	Summary
			most highly decorated destroyers of the war. The reader is taken on a first-person tour of duty in the "Old Navy"--from enlistment in Florida. to "boot camp" in Norfolk, to a first tour aboard the battleship USS Washington, through the early months of the sea war in the Atlantic, to the Saufley, to the Pacific, to the end of the war.
2004.315.096	Samurai!	Sakai, Saburo	The personal story of Japan's greatest living fighter pilot.
2004.315.097	Death of a Navy : Japanese Naval Action in World War II	d'Albas, Andrieu	This is the battle story of Japan's Imperial Navy from a few days prior to Pearl Harbor to the surrender. It is based on Japanese documents, on conversations with ranking officers of the Imperial Navy, and on reminiscences of Japanese seamen.
2004.315.098	By Sea and By Stealth	Wilkinson, Burke	This book tells of some of the most striking and brilliant surprise attacks by sea made during the war. Some of these celebrated attacks have been described by the author in full and accurate detail for the first time. The individual exploits carry their own compulsion as tales of great courage and daring always do, but more than that they show the valuable lessons learned and the future hazards we may face from these bold and venturesome tactics.
2004.315.099	Pocket Battleship : The Story of the Admiral Scheer	Krancke, Theodor	The Scheer's activity was the embodiment of a British nightmare--a battleship which broke through into the North Atlantic and fell upon the lightly defended convoys upon which England depended. She sank 152,000 tons of Allied shipping and in on particular action in which she was engaged helped to write an imperishable chapter in the history of the British at Sea--the story as seen by the Germans, of the unforgettable action of the auxiliary cruiser Jervis Bay and her gallant crew. The Scheer also carried out successful operations from the equator to the Arctic circle, before she was sunk in Kiel harbor.

Object ID	Title	Author	Summary
2004.315.100	One of Our Submarines	Young, Edward Preston	Though this book is centered on the wartime life of the author, it is about the people and events encountered along the way. This book gives some idea of what the author and others like him had to face in transforming themselves from amateurs into equals and, at times, the superiors of the professionals.
2004.315.102	Long Pursuit, The : The Pursuit of Admiral Von Spee	Hough, Richard Alexander	In this narrative of action and high suspense Richard Hough for the first time tells the full story of the now-legendary sea chase that doomed Germany's East Asiatic Squadron in the early days of WWI.
2004.315.103	Seekrieg, Der : The German Navy's Story, 1939-1945	Ruge, Friedrich	Admiral Ruge traces Germany's rise to a seapower early in the twentieth century, the effect on German naval strength of the Treaty of Versailles, the subsequent entry into World war II, by a Navy which was not ready for war; and how professional naval officers, hampered at times by a land-minded dictator, nevertheless completed daring and startlingly successful operations which caused great anxiety in both Britain and the United States.
2004.315.104	Submarine!	Beach, Edward Latimer	THE WAR BENEATH THE WAVES - For the World War II submariner, every day was a life-or-death trial: going to sea for months at a time; existing in dank, claustrophobic conditions; enduring long stretches of monotonous silence punctuated by adrenaline-spiked episodes of paralyzing fear and victorious elation. It was a duty few men could handle -- and even fewer would survive. This is the true story of those brave men who served and too often died under the ocean surface, written by a man who was there. Edward L. Beach masterfully weaves his gripping experiences aboard the USS Trigger with those of other boats fighting the war in the Pacific. Part action-packed combat chronicle, part testament to the courageous

			sacrifices made by those who never came back, this is a compelling eyewitness account of the war as few have seen it. (from Amazon.com)
2004.315.105	Will Not We Fear : The Story of His Majesty's Submarine "Seal" and of Lieutenant-Commander Rupert Lonsdale	Warren, Charles Esme Thornton	H.M. Submarine SEAL was involved in a difficult and dangerous mine-laying mission in the Straits of Kattegat during the Second World War. As the Seal neared her target area, she found German trawlers sweeping the shallow channel through which she had to pass. Through a series of misadventures, the Seal was lodged on the sea bed and would not budge. The Captain, Lonsdale, called on the crew to join him in prayer. From that moment onwards the story of the Seal and the sixty men trapped inside developed in a manner which has no parallel in naval submarine history.
2004.315.106	War and Peace in the Nuclear Age	Newhouse, John	From Publishers Weekly: "Focusing largely on the American presidency, this comprehensive review of the nuclear age chronicles the effect of nuclear weapons on relations between allies and potential adversaries," reported PW. Copyright 1990 Reed Business Information, Inc. From Library Journal: This companion to a public television series with the same title by New Yorker writer Newhouse is a history of nuclear diplomacy, from the origins of the Manhattan Project to 1988. The bipolar relationship between the United States and the Soviet Union forms the core of the discussion. He gives considerable attention to intra-U.S. political struggles affecting nuclear armaments and, where information is available, he parallels conflict within the Kremlin. The narrative, although buttressed with notes, is written for a popular audience. The author has made some errors, albeit harmless ones. In treating the successive U.S.

2004.315.110	High-tech Warfare : Air, Land & Sea	Jackson, Robert	If you want to know how a Patriot missile locks itself onto a collision course with an incoming Scud, or if you want to know how the pilot of a "jump and shoot" Harrier jet controls both offensive and defensive systems, this is where you'll look to learn. The high-technology principles of many systems are clearly presented in a wealth of detailed text and action photographs, with graphics that make complex concepts easy to understand and appreciate. There is also a forward look to weapons technology of the future.
2004.315.111	Malta Convoy	Shankland, Peter	The need for supplies on Malta was so great during the desperate summer of 1942 that without them surrender was inevitable. Operation Pedestal is of special interest to Americans since the spotlight was on the SS Ohio, a fast US tanker made available to the British by the US Government. This modern armada consisted of 2 battleships, 4 aircraft carriers, 12 cruisers, and 40 destroyers deployed to escort and protect 14 merchant ships. Ranged against them were 21 enemy submarines, 23 E-boats, and 540 aircraft.
2004.315.112	To Sea in Haste	Carr, Roland T.	A compelling saga of the danger, the boredom, the humor, and the poignant loneliness of life on a convoy escort in perilous times. (from front cover) "You have taken your war service aboard the doughty corvette HASTE and brought it alive with your amazing memory of even the slightest details.... Your description of the storms, yes hurricanes at

Object ID	Title	Author	Summary
			sea, and the brutal punishment which they inflicted on officers, crew and ship alike, were most graphic. Your vivid account of the mass nausea is so accurate you may have sympathetic reactions from among your readers.... You have created a living entity in the HASTE." —A. Burks Summers Former Ambassador to Luxembourg "The backbone of a ship is, of course, its crew — people like the author and his shipmates — whose character and personal feelings are so well revealed by this interesting and often humorous account of demanding life aboard an escort ship.... Getting to love a ship and the men aboard is something we've all heard about; this book gives understanding of it."" —K.K. Cowart Vice Admiral U.S. Coast Guard, Retired (from back cover)
2004.315.113	Requiem for a Fleet: The U.S. Navy at Guadalcanal, August 1942-February 1943	Freeman, Robert H.	Contents: Welcome Aboard -- 7-8 August 1942, The Invasion -- August 9, The Battle of Savo Island -- The Remainder of August 1942, The Battle of the Eastern Solomons -- Sept. 1942 -- October 11-12, The Battle of Cape Esperance -- October 15-16 -- War Neurotics -- Oct. 16 - Nov. 7, The Battle of the Santa Cruz Islands -- Nov. 12-15, The Naval Battle of Guadalcanal -- Nov. 30, The Battle of Tassafaronga -- PT-boats -- 9 Dec. 1942 - 11 Feb. 1943, The Battle of Rennell Island -- Summation, Navy Medical Corps -- A Sampler of Casualties and Awards -- Troopship and Cargoship Casualties -- Ships, Casualties, and Sources
2004.315.115	Ordeal by Sea : The Tragedy of the U. S. S. Indianapolis	Helm, Thomas	This book tell the tale of the warship, the Indianapolis. It gives a short history of its early years, from the construction to launching. It's fast journey from San Francisco to a the small island of Tinian where it delivered the atomic bomb to

Object ID	Title	Author	Summary
			be dropped on Japan. From Tinian the ship went to Guam where it received orders to Leyte in the Philippines. It was on this journey that she struck by an enemy submarine. The ship was sunk and the remaining crew was left in the water. It was five days before it was realized that the U.S.S. Indianapolis was missing. The author continues the tale of the ordeals suffered by the survivors and the subsequent rescues of those who survived. He continues the story with the fate of the survivors, including the court-martial of the captain.
2004.315.116	Ship with Two Captains, The	Robertson, Terence	The submarine Seraph's hush-hush exploits in the Mediterranean during World War II ranged from spiriting Giraud away from France to launching the Man Who Never Was. The submarine had two captains--one British and one American. She flew the flags of both nations. The Seraph's first exploit was the secret landing of General Mark Clark in North Africa, prior to the invasion.
2004.315.118	Ships of the Esso Fleet in World War II	Standard Oil Company	This book has the record of 135 ocean tankers of the Standard Oil Co. and the Panama Transport Co. during World War II. Here is told the part which those ships played in carrying vital war materiel to every theater of Allied operation, from the industrial fronts at home to the fighting fronts abroad. The tankers carried not only oil and oil products, but on special deck structures, they carried important loads of other fighting equipment--planes, PT boats, and landing crafts, tanks and trucks. They carried heroes, too, and skill, and courage beyond the call of duty.

2004.315.121	Prelude to Pearl Harbor :	Stanley, Roy M.	recorded in this volume. The Second Sino-Japanese War (July 7, 1937 – September 2, 1945), called so after the First Sino-Japanese War of 1894–95, was a military conflict fought primarily between the Republic of China and the Empire of Japan. From 1937 to 1941, China fought Japan with some economic help from Germany (see Sino-German cooperation), the Soviet Union (1937–1940) and the United States (see American Volunteer Group). After the Japanese attack on Pearl Harbor (1941), the war merged into the greater conflict of World War II as a major front of what is broadly known as the Pacific War. The Second Sino-Japanese War was the largest Asian war in the 20th century. It also made up more than 50% of the casualties in the Pacific War if the 1937–1941 period is taken into account. Although the two countries had fought intermittently since 1931, total war started in earnest in 1937 and ended only with the surrender of Japan in 1945. The war was the result of a decades-long Japanese imperialist policy aiming to dominate China politically and militarily and to secure its vast raw material reserves and other economic resources, particularly food and labour. Before 1937, China and Japan fought in small, localized engagements, so-called "incidents". In 1931, the Japanese invasion of Manchuria by Japan's Kwantung Army followed the Mukden Incident. The last of these incidents was the Marco Polo Bridge Incident of 1937, marking the beginning of total war between the two countries. Initially the Japanese scored major victories in Shanghai, and by the end of 1937 captured the Chinese capital of Nanking. After failing to stop the Japanese in Wuhan, the Chinese central government moved to

2004.315.128	Thresher Disaster : The Most Tragic Dive in Submarine History, The	Bentley, John	The second USS Thresher (SSN-593) was the lead boat of her class of nuclear-powered attack submarines in the United States Navy. Her loss at sea during deep-diving tests in 1963 is often considered a watershed event in the implementation of the rigorous submarine safety program SUBSAFE. The contract to build Thresher was awarded to Portsmouth Naval Shipyard on 15 January 1958, and her keel was laid on 28 May 1958. She was launched on 9 July 1960, was sponsored by Mrs. Frederick B. Warder (wife of the famous Pacific War skipper), and was commissioned on 3 August 1961, Commander Dean L. Axene commanding. In 1963 the submarine sank off the coast of Cape Cod, Massachusetts, with no survivors. (from Wikipedia)
2004.315.129	Steam and Gas Turbines for Marine Propulsion	Saarlal, Maida	This book is partly a revision of a series of books published by the United States Naval Institute since 1946: Naval Turbines, Naval Auxiliary Machinery, and Descriptive Analysis of Naval Turbine Propulsion Plants. Partly it is a new book, describing the introduction of the gas turbine in marine power plants and providing a common and comparative treatment of steam and gas turbines used in both commercial and naval ships. Emphasis has been placed on understanding the basic principles of the turbine as a propulsive device. This book is intended mainly for those who are interested in finding out how and why turbines operate and are more concerned with their operation than their design.
2004.315.130	Engineering for the Officer of the Deck	Felger, Daniel G.	This is a textbook for the naval officer who has to qualify as officer of the deck. From a discussion of the main steam cycle, the author proceeds to a description of the equipment and the processes involved in such a cycle. Subsequent

2004.315.150	Shield of the Republic : The U.S. Navy in an era of Cold War and Violent Peace - Vol. 1	Isenberg, Michael T.	Written with the sweep of Samuel Eliot Morison, Shield of the Republic is a majestically presented account of post-WWII naval history from the surrender of the Japanese to the Cuban Missile Crisis. Vol. 1.
2004.315.151	Leverage of Sea Power : The Strategic Advantage of Navies in War, The	Gray, Colin S.	The Leverage of Sea Power: The Strategic Advantage of Navies in War by Colin S. Gray, Prologue, 10 Chapters, Notes, Bibliography, Acknowledgments, and Index. Eminent defense analyst and theorist Colin S. Gray reveals sea power to be the great enabling agent in conflicts on land as well as sea. As far back as ancient times, the Spartans acquired a fleet, landlocked Germany had no mastery of the sea, and the Allies connected by sea were able to score victories and as recent as Desert Storm. Black & white illustrations and strategic theory the author shows how sea power when integrated with land and air power increases the combatant's opportunities.
2004.315.152	Naval Engineering and American Seapower	King, Randolph W.	Naval Engineering and American Seapower by Randolph w. King with Preface by the author, Acknowledgments, and 12 Chapters, and Appendix A on Chronology of Naval Engineering, Appendix B on Naval Engineering Trends, and Appendix C on Sources, Glossary and Abbreviations, Notes on Authors, Naval Engineering Bibliography and Index. Over 100 line drawings & photographs in black & white. Fifteen authors contribute their expertise to detail a century of change in maritime technology which include Michael E. Vlahos; John D. Alden, John Fee, Prescott Palmer to name a few
2004.315.154	United States Navy, The	Navy Department, Naval History Division	Introduction The sea seems to breed freedom. The United States, born of the sea, became the

Object ID	Title	Author	Summary
			promised land of liberty and hope of oppressed men everywhere nearly two centuries ago when the 13 colonies won independence. Today, grown great on the spirit of liberty in a world in tumult, she stands more than ever as a shining beacon to yearning hearts everywhere. By the sea America was discovered; by the sea the colonies won independence; by the sea the United States today and its allies can preserve freedom against worldwide communistic conspiracy—but only if they keep strong on it. In this brief brochure we have tried to show something of the highlights of what the sea has meant to the United States and freedom. From the beginning of the Revolutionary War, as shown in our series Naval Documents of the American Revolution, action afloat played a giant role in sustaining the struggle for independence and ultimately deciding it. Without the gallant and dedicated efforts ashore, the colonies of course could not have won independence, but George Washington himself put events in true perspective. Sound maritime strategist, for years he sought the effective aid of the French Fleet in combined operations. Finally he gained it with the divinely directed victory of the French Fleet under Admiral Comte de Grasse over the British off the Chesapeake Capes 5 September 1781. Cut off from the life giving sea, Lord Cornwallis had to surrender to Washington's American-French Army. The Father of our country wrote to de Grasse : "Your Excellency will have observed that whatever efforts are made by the land Armies, the Navy must have the casting vote in the present contest." As our summary account shows, these words were true then, have remained true ever

Object ID	Title	Author	Summary
			since, and, if possible, have even more important meaning today than ever before. The exploding industrial scientific revolution has brought sea-based forces awesome new strength, capabilities, responsibilities. This is true from the depths of the ocean with the Polaris submarine, and its long sea reach inland against tyranny, to exploration into the seas of space. This brochure represents the efforts of all hands in this Division taking time from pressing daily duties to contribute. I want to especially mention Rear Admiral F. Kent Loomis, Captain Roy C. Smith, III, Dr. William J. Morgan, Commander Clayton F. Johnson, Commander Victor J. Robison, Dr. Dean C. Allard, Jr., Commander Henry A. Vadnais, Jr., USNR, Mr. Robert L. Scheina, and Mr. Don R. Martin. It is our hope that readers of this short account of the seas influence in the United States' destiny will come to understand something of what John Paul Jones meant when he said: "Without a Respectable Navy—Alas America!" It is also our hope that readers will perceive that though the Navy has the faults as well as the virtues of all citizens of the United States, in balance it stands on the side of George Washington carrying on the spirit of his magnificent words to the Continental Convention in 1787: "Let us raise a standard to which the wise and honest can repair; the event is in the hands of God." E. M. ELLER, R Adm. COVER: "The most bold and daring act of the age."—Horatio Nelson. Showing great courage and skill, Stephen Decatur

			destroyed captured Philadelphia right under a hundred enemy guns. See page 9.
2004.315.155	Riverine Warfare : The U.S. Navy's Operations on Inland Waters	Navy Department, Naval History Division	INTRODUCTION Seapower's first advantage to the United States is that it keeps the enemy's main forces overseas. It controls the oceans for our use, denies them to the foe, and makes his coasts the frontier of war rather than those of America. Nor does seapower stop at the hostile coastline; it projects the Nation's total power in a resistless tide inland beyond the coast. The long arm of sea-power reaches inland with guns, with planes, with missiles like Polaris, and wherever water will float a boat. These complement and facilitate other national power projected ashore by the sea. In our lifetimes we have repeatedly had dramatic examples of the benefits this power brings to America—during World War II, Korea, and now Vietnam where marines and sailors fight ashore, Seabees who build or fight, the large Army and Air Force components all depend upon the logistic support as well as the shield and striking might of the U.S. Navy. Operations inland on restricted waters have come to be called "riverine warfare." Here fighting craft, tailored as necessary to the environment, bring combined operations the unique advantages of power based afloatgreater mobility, ease of concentration, swift shift of objectives, speed, flexibility, versatility, and surprise. If water permits, large ships like cruisers and destroyers blast aside opposition. For shallower depths many types of small warcraft are developed to fit the need. We have seen this occur through United States history since riverine operations on small or large scale have

Object ID	Title	Author	Summary
			entered into most of the limited or World Wars that seem the fate of man. In these, through riverine operations as well as on the oceans, the U.S. Navy has well served our Nation's destiny and the hope of freedom to come for all men. Many revolutions in the past century and a half have steadily increased the advantages of sea based, compared to land based, national power. This trend has greatly increased the influence of the powerful fleets on the oceans. It has similarly affected riverine warfare. Consequently naval units of many types play an increasing role in the watery maze of South Vietnam. We best serve the present and future when we understand the past. So it has seemed appropriate to prepare this brief survey of riverine warfare which has helped shape United States history from the struggle for freedom in the American Revolution to the struggle for freedom against tyranny of communism in this second half of the 20th century. In most of the projects of this office many dedicated people contribute. This account does not vary from the pattern. During periods of temporary active duty with us Lieutenant Commander R. K. Pierce, USNR, a zealous able worker who is dedicating his life to the ministry, developed a basic long narrative and from it a shorter one. This has been modified and added to by several of us in the office including Dr. W. J. Morgan, Dr. Dean C. Allard, Captain W. R. Deloach, USN, and Commander Earl Mann, USN. General supervision of the project and handling the numerous details of publication have been carried out with the usual efficiency in Dr. Morgan's section. No man can know what the

Object ID	Title	Author	Summary
			outcome of the Vietnamese war will be. But if we continue with integrity, courage, and fortitude we will win. We must win for we fight for a great cause. None has expressed this better than Lieutenant William Roark, USN. Shortly before he flew from his carrier the last time, to be lost in combat over North Vietnam, he wrote these words of deep moral conviction and courage to his wife — words all Americans should read and heed: "I don't want my sons to fight a war I should have fought. I wish more Americans felt that way. I'm not a 'warmonger' it will be me who gets shot at. But it's blind and foolish not to have the courage of your convictions. I will not live under a totalitarian society and I don't want you to, either. I believe in God and will resist any force that attempts to remove God from society, no matter what the name. This is what we all must do if we believe in what the Founding Fathers stood for." E. M. ELLER Rear Admiral, USN (Retired) Director of Naval History Cover shows U.S. Navy riverine operations separated in time by a century — the Civil War and Vietnam.

2004.315.156	United States Navy: Keeping the Peace, The	Navy Department, Naval History Division	From the nation's earliest days, showing the flag has contributed effectively to keeping the peace. In the early 1820's, Commodore John Rodgers flew his flag in U.S.S. North Carolina, at right, while commanding the American squadron in the Mediterranean Sea; in 1907-1908 the Great White Fleet, below, circled the globe at the direction of President Theodore Roosevelt; and today's versatile warships, bottom, continue to serve in the tradition of the "gray diplomats."

2004.315.157	Naval Orientation	Bureau of Naval Personnel	(from inside front cover) PREFACE: Naval Orientation has been prepared mainly for use in officer training programs. It is a source of useful information, however, for every member of the Department of the Navy and the U. S. Coast Guard. The text provides valuable background information for all hands and introduces personnel to Navy life and the rules, customs, and traditions that govern it. This text was prepared by the Training Publications Division, Naval Personnel Program Support Activity, Washington, D. C., for the Bureau of Naval Personnel.
2004.315.158	Sailor : Vintage Photos of a Masculine Icon	Bentley, Kevin	From his trademark white cap to his bell-bottom pants, the sailor has a prominent place in our common imaginations, an icon of virility, adventure, and romance. Sailor gathers from private collections 150 never-before-published snapshots and portraits spanning more than a century of maritime experience and masculine camaraderie. The photographs in this book provide intimate glimpses of this larger-than-life figure, showing us sailors at sea and at play--swabbing the deck, manning the guns, swimming and boxing, "jumping the line" in the traditional virgin-equator-crossing hazing, roaming foreign ports and red-light districts, wrestling and butting heads in photo-booths, puffing cigars, and hoisting beers. In shots that are arresting and utterly unique we see a deadpan sailor in a grass skirt; one sailor straddling a palm tree and another a torpedo; three swabbies dangling head and shoulders from the barrels of the ship's big guns; and a mob of sailors astride tiny burros. For lovers of old photographs and serious collectors, for those with nostalgic memories of Navy days, and for anyone who has ever daydreamed of a sailor's life on the high seas--

2004.315.159	U.S. Naval Developments	Breemer, Jan S.	U.S. Naval Developments by Jan S. Breemer, consultant and military author, defense analyst and social scientist published in the Naval War College Review, Proceedings, and Sea Power. Foreword by Norman Polmar with Six Chapters, Appendixes A-D Notes & Index. Black & White illustrations and photographs and written as an up-to-date description of the U. S. Navy. Major questions include strategy, force composition, ship design, procurement and interpretative and analytical work with facts on ships, aircraft, weapons, and sensors.
2004.315.160	Wreck of the Memphis, The	Beach, Edward Latimer	The original name of the ship was USS Tennessee (ACR-10). It was renamed USS Memphis in 1916. The legendary Memphis was one of the largest battle cruisers ever built by the US Navy. In August of 1916, the cruiser was utterly demolished in one of the most grotesque tragedies ever recorded in naval history. Now, Capt. Edward L. Beach, Jr. tells the full story of the Memphis, of the man who commanded her - his father, Capt. Edward L. Beach, Sr. - and of the court-martial which shattered a brilliant naval career.
2004.315.162	Bucher : My Story	Bucher, Lloyd M.	A true account of the capture of the Pueblo November 21, 1998 By Richard E. Armstrong Commander Bucher's story will probably be debated for many years to come, as it has been in many places where military men congregate. The book reveals how the U S Government let its men down and left the crew of the Pueblo out there without any help or so-called back-up plan. It reveals just how isolated and

Object ID	Title	Author	Summary
			ignorant the North Korean Communists were, and probably still are. The book is very well written and it is hard to put down. It shows just how brutal a people can be, and how a good sense of humor can get you through it. Bucher's vivid descriptions have been verified by members of the crew. It also shows how terribly the U S Government turned its back on the crewmembers by not issuing the men any POW medals as we were "technically not at war with the North Koreans." (They were issued medals 20 years later.) Probably the best book on the subject, and has several humorous places which makes it fun to read as well. Highly recommended for scholars of Naval History and Psychology. The fact remains that all but one crewmember came back alive, which Commander Bucher was given little or no credit, except from John H. Chaffee, then Sect'y of the Navy who said "These men have suffered enough." when refering to a court martial and board of inquiry. The book makes one think twice about how big people in high places are watching out for themselves and not the commands they are supposed to be in charge of. Reading the book does not reveal any bitterness from the author or his crew, but a sincerely deep sense of terrible disappointment of its superiors all the way up the chain of command. A real eye-opener! 29 of 30 people found the review helpful 4 of 4 people found the following review helpful No way to know... January 21, 2008 By Fiddle-Faddle One of the reviewers said Ed Murphy Jr.'s account was "sour grapes" at best. I don't know if that's true; some bitterness seems to be there, of course, since Pete Bucher, at length, seems to go out of his way to

Object ID	Title	Author	Summary
			paint the man a villian, as he does to Gene Lacy. But who had command of the ship? not Murphy or Lacy, and Murphy provides alternative actions that Bucher could have made before the first SO1 could have come on the scene to intimidate Pueblo. He could have, like the USS Banner before him, broken off contact and headed farther out to sea, instead of hoisting provocative communications flags that, in essence, thumbed his nose at the PRKs. Murphy also presents compelling evidence about who "broke" the Code of Conduct first, making it tough for the rest of the crew to tow the line. It was Bucher. In fact, the PRK's used Bucher's confession on tape repeatedly to get others to open up, since it was more difficult to hold back since the captain had broken. Bucher accused Murphy of having broken first and Murphy gives good reasons in his book to prove why the accusation was not true. I believe just about any man can be broken; that is not the point. But Bucher has a bad habit of pointing fingers everywhere but in the mirror. Bucher also had more than one opportunity to stow destruct devices aboard Pueblo that could have facilitated destruction of pubs and equipment. The Navy offered Thermit on one occasion and Murphy found dynamite. They sailed without either. Bucher's actions aside, I must fault the Navy for not having fitted these men or their "tub" well enough for such a sensitive mission. They were outfitted badly, trained inadequately, crewmen poorly chosen and requests were denied that could have remedied these shortcomings. Also, why were so many unnecessary classified pubs forced on the Pueblo? Now we know that in conjunction with the Navy turncoat, Edwin Walker, who gave the USSR sensitive

Object ID	Title	Author	Summary
			info, the intel pirated from the Pueblo damaged our national security more than is commonly known. I saw this account as a self-serving attempt by the captain to find scapegoats. It's hard to find scapegoats when all underlings can do is suggest actions to be taken. It's the captain that gives orders. He has to live with them. There was no mutiny, he wasn't bound by crewmembers and thrown in the hold. He was on the bridge, giving (or not giving) commands. It's a well written book, with the expected humor of the captain, and I suggest this be read, but in conjunction with Murphy's book, "Second in Command". Trevor Armbrister has written a thick, well researched book, "A Matter of Accountability" that goes right up the chain of command, above both Bucher and Murphy, showing that the whole AGER program was ill-conceived. Schumacher also wrote a book, "Bridge of No Return", and a book was written the some members of the crew, "The Last Voyage". I found Murphy's book to be the best written, more compelling version, when I compare it to Bucher's, with lots more facts and logic. The truth, I'm sure, is somewhere between the two accounts, but after having read both and other accounts, Murphy's rings more true to this reviewer. 3 of 3 people found the following review helpful Excellent account of the Pueblo incident November 9, 2006 By Mark Erickson I found this book an excellent account of the Pueblo incident, and hard to put down. I worked for the Navy as a civilian, and various Intelligence agencies for more than twenty five years. I've always had a fascination with the U.S.S. Pueblo and

Object ID	Title	Author	Summary
			what happened while the crew was being tortured and starved in North Korea. It accurately portrays what happens when the U.S. Government hangs you out to dry during an Intel. operation that goes sideways. The X.O., Edward R. Murphy, is an interesting study and his follow up book blasting Bucher is sour grapes at best. Commander Bucher brought all the men back with the exception of Fireman Duane D. Hodges, who was destroying classified documents when he was killed. I'm sure the loved ones of the men who returned would take exception to Lt. Murphy's account. A cautionary tale for anyone aspiring to a career in the intelligence gathering field.
2004.315.164	U.S. Navy in the 1990s, The : Alternatives for Action	George, James L.	THE WORLD HAS entered the new post-Cold War era. If history is any guide, it could well be another interwar period requiring constant vigilance. The recent 1991 Iraq crisis illustrates this ongoing need. Lest anyone forget, Alexis de Tocqueville made his famous prediction of an eventual U.S.-Russian competition some eighty years before there was a Soviet Union. As during all such postwar eras, however, the military has fallen on harder times, sustaining major cutbacks and decreased budgets. Although all the services have problems, the Navy appears to be in particular trouble. Indeed, the word "disarray" seems to be the favorite term used by reporters and analysts describing current Navy plans. An active-duty admiral, in a rare outburst of candor, even described his own programs as in a "complex dilemma" and a "modernization crisis." (from preface)
2004.315.166	History of the French Navy, A: From its Beginnings to the Present Day	Jenkins, Ernest Harold	This is the first History of the French Navy to be published in English. Though the many works on British naval affairs are often concerned with the French, whether as enemies

Object ID	Title	Author	Summary
			or as allies, their reader does not look at things from the French side, nor do these works consider the French service as a whole. Moreover, it was not only with Britain that the French Navy was concerned. It had to deal with other maritime powers, such as Spain and the Dutch, and to play its part in its country's colonial expansion. All these things, together with naval administration, have been covered by the author, who is both an Oxford honours graduate in history and a former reservist naval officer. The French Navy, in the sense of a force of ships specially designed for war, dates from the time of Richelieu, though the earliest reference in the book is to a battle in 1217. Starting with its tentative beginnings, the author takes the reader through its triumphs, its defeats and its difficulties. Many famous battles are described. and the careers of many famous men, both sailors and administrators, delineated. The story is taken to the end of the Second World War, while an appendix covers the post-war years and brings the story into the nuclear age. There are brief estimates of leading admirals, and the text is enhanced by several maps and diagrammatic plans of battles, as well as by sixteen pages of plates. This enormously scholarly and detailed (yet very readable) work has no competitors. It will prove an invaluable source of reference for historians and naval enthusiasts, and for all students of French history. (from dust jacket flap)

2004.315.170	Teddy Roosevelt's Great White Fleet	Reckner, James R.	Drawing on previously untapped sources, naval historian James Reckner provides a complete picture of the fleet that thrust the United States into the ranks of great world naval powers. His fresh interpretations of the fleet's historic 1907-09 world cruise, which won him the 1989 Roosevelt Naval History Prize, allow today's readers to fully appreciate the significance of the famous fleet that set sail during Teddy Roosevelt's second term as president. Reckner recreates the colorful pageantry of the event--sixteen U.S. battleships on a fourteen-month voyage around the world--that drew thousands of sightseers at every port of call, but his main emphasis is on the cruise's long-range impact on the Navy. He shows how the cruise revealed the fleet's shortcomings and forced the naval establishment to acknowledge the faults and make concessions that eventually led to permanent benefits. About the Author James R. Reckner, Lt. Commander, USN (Ret.), teaches military history and directs the Vietnam Center at Texas Tech University in Lubbock, Texas. (from Amazon.com)

2004.315.177	To Use the Sea: Readings in Seapower and Maritime Affairs	Rouse, Francis Clare	To gain an understanding of the world in which we live, the geopolitical factors that shape a nation's policy-especially its foreign policy-must be carefully studied and assimilated. The United States must import vast amounts of strategic materials necessary for its survival, yet few Americans are concerned about or even realize the extent to which this country depends upon the sea. Because of our geographic isolation, our unimpeded use of the sea is not optional-it is an absolute necessity. Any attempt to disrupt or inhibit free passage over the oceans must be regarded as a potential threat to our national interests and to the peace and stability of the world community. In strategic policy, U.S. thinking has been dominated by the theories of Alfred Thayer Mahan for over half a century. The USSR on the other hand has based its doctrine on Clausewitzian concepts of a "continental" or land strategy. As indicated by the growing Soviet fleet, these traditional doctrinal concepts appear to be changing. This publication is a compilation of articles and

			maps originally published in United States Naval Institute Proceedings, Naval Review, the Naval War College Review and Sea Power. It represents a cross-section of recent views on the subjects of sea-power and maritime affairs and is intended as a source book for a seminar-style analysis and study of these areas. We hope it will be of value to instructors and students alike. Lieutenant Commander F. C. Rouse, USN, Editor (from Introduction)
2004.315.180	Weapon Systems of the United States Navy - 1975	Navy Department, Office of Information	Presents, in unclassified form, a series of fact sheets on significant Navy weapons systems in five general categories: ships systems, aircraft systems, missiles system, other ordnance systems and electronics systems.
2004.315.183	Pueblo Incident, The	Gallery, Daniel V.	The Pueblo Incident August 17, 2007 By Ervin Parker The USS PUEBLO, which was captured by the North Koreans on January 23, 1968 was attacked by North Korean naval vessels and MiG jets. One man was killed and several were wounded. The Eighty-two surviving crew members were captured and held prisoner for 11 months -- was the first U.S. Navy ship to be hi-jacked on the high seas by a foreign military force in over 150 years. To date, the capture has resulted in no reprisals against the North Koreans; no military action was taken at the time, or at any later date. This lack of military response guarantees the Pueblo's place in history as a watershed event in our national conscience. JANUARY 23, 1968 - A SHAMEFUL MILESTONE IN THE DECLINE AND FALL OF THE UNITED STATES" -- Rear Admiral Daniel V. Gallery, USN (Ret.) In this hard-hitting, controversial book, Dan

Object ID	Title	Author	Summary
			Gallery says what he thinks about the incident in which the U.S.S. Pueblo was boarded, captured and surrendered--the only incident of its kind in the United States Navy since the early days of sail. He examines the whole sorry affair beginning with the ship's mission and ending with the Navy's Court of Inquiry and the public's reaction to it. His targets include Commander Bucher, the Naval high command and the Pentagon. "His critics will accuse him of being pure Hawk," says the Boston Globe, "but his theme is much larger and deeper." 3 of 3 people found the review helpful (from Amazon.com)

2004.315.190	Tattered Ensign	Jennings, John	USS Constitution is a wooden-hulled, three-masted heavy frigate of the United States Navy. Named by President George Washington after the Constitution of the United States of America, she is the world's oldest commissioned naval vessel afloat. Launched in 1797, Constitution was one of six original frigates authorized for construction by the Naval Act of 1794 and the third constructed. Joshua Humphreys designed the frigates to be the young Navy's capital ships, and so Constitution and her sisters were larger and more heavily armed and built than standard frigates of the period. Built in Boston, Massachusetts, at

Object ID	Title	Author	Summary
			Edmund Hartt's shipyard, her first duties with the newly formed United States Navy were to provide protection for American merchant shipping during the Quasi-War with France and to defeat the Barbary pirates in the First Barbary War. Constitution is most famous for her actions during the War of 1812 against Great Britain, when she captured numerous merchant ships and defeated five British warships: HMS Guerriere, Java, Pictou, Cyane and Levant. The battle with Guerriere earned her the nickname of "Old Ironsides" and public adoration that has repeatedly saved her from scrapping. She continued to actively serve the nation as flagship in the Mediterranean and African squadrons, and circled the world in the 1840s. During the American Civil War she served as a training ship for the United States Naval Academy and carried artwork and industrial displays to the Paris Exposition of 1878. Retired from active service in 1881, she served as a receiving ship until designated a museum ship in 1907. In 1931 she started a three-year, 90-port tour of the nation, and in 1997 she finally sailed again under her own power for her 200th birthday. (from Wikipedia)

2004.315.193	Salvo! : Classic Naval Gun Actions	Edwards, Bernard	Since a simple cannon was first mounted on sailing ships and the warship was thus born, it has had but one principal resolve: to engage and destroy the enemy in action. This is the theme of this new study -- the hard-fought ship-to-ship battles where the gun was all-important, and where salvo after salvo were fired by the protagonists at all ranges from maximum elevation and distance to virtual open sights point-blank actions. Writing with years of experience of sea life, the author vividly

The captain and crew of the S-Five submarine learned this

Object ID	Title	Author	Summary
			gloomy fact the hard way in 1920, when they tested their new boat's ability to "crash dive"--submerge as quickly as possible--and sank straight to the bottom of the ocean. A faulty induction valve had flooded, leaving 40 men stranded at a depth of 180 feet, about 50 miles off the coast of Cape May, New Jersey. Everything seemed to go wrong: the drive motors failed, the main lighting circuits went dead, and their oxygen began to run thin. Nobody knew their location and they had no means of calling for help. All they had was their own ingenuity and the remarkable leader Lt. Commander Savvy Cooke. The story of how they managed--just barely--to escape an underwater tomb will appeal to fans of Peter Maas's <i>The Terrible Hours</i> (though it's worth noting that the technology behind the 1939 <i>Squalus</i> rescue wasn't available to the men trapped in the <i>S-Five</i>) and <i>Blind Man's Bluff</i> by Sherry Sontag and Christopher Drew. --John J. Miller --This text refers to the Hardcover edition. From Booklist In 1920 U.S.S. <i>S-5</i>, practicing crash dives off the Atlantic coast, sank due to a combination of negligence and poor mechanical design. Fortunately, it went down in relatively shallow water. Unfortunately, the compressed air remaining in the vessel was sufficient to raise only the submarine's stern to the surface. The crew then began a daylong struggle to endure foul air and unnaturally tilted quarters until they could cut a hole in the exposed stern. From there they signaled a passing ship, whose engineers cut another hole through which the crew was rescued. <i>S-5</i> is still where it sank, but her ingenious captain, aptly nicknamed "Savvy," went on to acquire four stars, a rating this book also deserves. The nightmares inflicted on her crew by the "latest thing in

2004.315.219	History of the Women Marines, A, 1946-1977	Stremlow, Mary V.	Foreword Despite the acknowledged contribution made by the 20,000 women Reservists who served in the Marine Corps during World War II, there was no thought in 1946 of maintaining women on active duty or, for that matter, even in the Reserve forces. This volume recounts the events that brought about the change in thinking on the part of Marines, both men and women, that led to the integration of women into the Corps, to the point where they now constitute eight percent of our strength. The project was the idea of Brigadier General Margaret A. Brewer, who, in 1975, as the last Director of Women Marines, noted that the phasing out of women-only organizations marked the start of a new era for women in the Corps, and the end of an old one. Further, she rightly reasoned that the increased assimilation of women would make the historical trail of women in Marine Corps difficult to follow. The story is drawn from official reports, documents, personal interviews, and transcribed reminiscences collected by the author and preserved by the Oral History and Archives Sections of the History and Museums Division. The pattern set during World War II of calling women Reservists "WRs" was followed after the passage of the Women's Armed Services Integration Act in 1948 by referring to the women as "Women Marines," or more often as "WMs." In the mid-1970s there was a mood to erase all appearances of a separate organization for women in the Marine Corps and an effort was made to refer to

Object ID	Title	Author	Summary
			the women simply as Marines. When it was necessary to distinguish between the sexes, the noun "woman" with a lower case "w" was used as an adjective. Thus, throughout the text the terms "WR" and "WM" are used only when dictated by the context. The comment edition of this manuscript was read by many Marines, men and women, who were directly associated with the events. All but one of the former Directors of Women Marines contributed to the work and reviewed the manuscript draft. Unfortunately, Colonel Katherine A. Towle was too ill to participate. The author, Colonel Mary V. StremLOW, now a retired Reservist, has a bachelor of science degree from New York State University College at Buffalo. She counts three other women Marines in her family—two aunts, Corporal Rose M. Nigro and Master Sergeant Petrina C. Nigro, who served as WRs in World War II, and her sister, retired Major Carol Vertalino Diliberto. Colonel StremLOW came to the History and Museums Division in 1976 with experience as a company commander; S-3; executive officer of Woman Recruit Training Battalion, Parris Island; instructor-instructor of Women Reserve Platoon, 2d Infantry Battalion, Boston; instructor at the Woman Officer School, Quantico; and woman officer selection officer for the 1st Marine Corps District. In the interests of accuracy and objectivity, the History and Museums Division welcomes comments on this history from interested individuals. E. H. SIMMONS Brigadier General, U.S. Marine Corps (Ret.) Director of Marine Corps History and Museums

It is the story of toil in the raising of S-51 and experiences of the divers in a campaign lasting months while raising the sub and bringing back bodies. Glossary of terms.
2004.315.228	PT 109 : John F. Kennedy in World War II	Donovan, Robert J.	"To me, it has always been one of the great war stories of all time."--Senator Edward M. Kennedy In the early morning darkness of August 2, 1943, in the waters of Blackett Strait in the Solomon Islands, the Japanese destroyer Amagiri sliced an American PT boat in two, leaving its crew for dead in a flaming sea. Over the next three days, the boat's skipper, a boyish lieutenant from Boston named John Fitzgerald Kennedy, repeatedly risked his life in an effort to summon help until he finally secured his crew's rescue. First published to wide critical acclaim in 1961, Robert Donovan's timeless classic tells the complete, harrowing story of PT 109 and her crew. This 40th anniversary edition includes a foreword from Daniel Schorr, a preface by the author recounting the circumstances of the book's creation, and an afterword by

2004.315.234	Fast Movers : America's Jet Pilots and the Vietnam Experience	Sherwood, John Darrell	The story of the air war in Vietnam is really story of the "fast movers", men who flew the jet fighters and fought in the MiG and SAM infested skies of North Vietnam. In this book, the author John Sherwood, an official historian with the U.S. Navy, draws on more than 300 revealing interviews with these courageous pilots and crews, offering an in-the-cockpit perspective on the Vietnam experience never before possible. He profiles fourteen aviators, including such MiG killers as Robin Olds, Steve Ritchie, and John "Pirate" Nichols, and captures the heroism and sacrifice of this truly elite group of air warriors. From flying through walls of flak in Operation Rolling Thunder to how it feels to shoot down a MiG to the crushing ordeal of capture and imprisonment in the infamous "Hanoi Hilton," every aspect of air combat in Vietnam comes powerfully to life. Fast Movers celebrates these men and their aircraft, chronicling an aspect of the Vietnam conflict too long overlooked. From Publishers Weekly A staff historian for the U.S. Navy, Sherwood (Officers in Flight Suits) offers this compelling presentation of America's fighter pilots of the Vietnam era. His study, though based heavily on interviews with and narratives of just 14 pilots, is by no means impressionistic. It is a presentation of personalities and mentalities in a military community that is becoming increasingly a band apart from the rest of the armed forces as well as from civilian society. Sherwood effectively conveys a central part of his subjects' Vietnam experience:

Object ID	Title	Author	Summary
			frustration at not being allowed to wage all-out war. He describes in detail such fierce but futile campaigns as Rolling Thunder and Commando Hunt, which, Sherwood writes, "[f]or its technological wizardry... had little impact on the Communists' ability to wage war." Stress was a constant companion for the pilots. But few resigned their commissions or turned in their wings. Not everyone met the standards, and Sherwood is blunt in naming names. Nor was there a common pattern of behavior. Some fighter pilots were like Robin Olds, leader of one of the top-ranked F-4 wing, larger-than-life figures, charismatic iconoclasts. Others, like navy commander Roger Sheets, took pride in their professionalism. But all fighter pilots describe their common ground: the shared knowledge that they would do almost anything to help each other in need, manifested in high-risk rescue missions and again in the POW camps. It was the final element that cemented a community of warriors fighting what many saw as a senseless war. (Feb.) Copyright 1999 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. From Library Journal From 1965 through 1973, while U.S. and Vietnamese forces in the South dealt with an elusive enemy on the ground, Marine, Navy, and Air Force pilots were pressing a grim series of attacks meant to force the enemy into peace talks. In this kind of warfare, "going Downtown" meant risking life on every mission against the most concentrated antiaircraft fire ever seen. The stories of several of the outstanding pilots of these campaigns, taken from both their recollections and transcripts of their on-site air-to-air conversations, generate a vivid sense of the sort of action they saw and the work they were asked to do. Sherwood, a historian at the Naval

Lane, Sacramento, CA Copyright 2000 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. (from Amazon.com)
2004.315.235	Flying Black Ponies : The Navy's Close Air Support Squadron in Vietnam	Lavell, Kit	The tragic, the comic, the terrifying, the poignant are all part of the story of the Black Pony pilots who distinguished themselves in the Mekong Delta during the Vietnam War. Flying their turboprop Broncos "down and dirty, low and slow," they killed more of the enemy and saved more allied lives with close-air support than all the other naval squadrons combined during the three years they saw action. Author Kit Lavell was part of this squadron of "black sheep" given a chance to make something of themselves flying these dangerous missions. The U.S. Navy's only land-based attack squadron, Light Attack Squadron Four (VAL-4) flew support missions for the counter insurgency forces, SEALs, and allied units in borrowed, propeller-driven OV-10s. For fixed-wing aircraft they were dangerous, unorthodox missions, a fact readers quickly come to appreciate. (from usni.org:) Kit Lavell flew 243 missions with the Black Ponies and earned the Distinguished Flying Cross. He is now a screenwriter and playwright, living in California.
2004.315.236	Thoughts of a Philosophical Fighter Pilot	Stockdale, James B.	From August 1959 to march 1960, LCDR James B. "Jim" Stockdale was Executive Officer (XO) of fighter squadron VF-24 on the USS Midway.

Object ID	Title	Author	Summary
			Vice Admiral Stockdale was on active duty in the navy for thirty-seven years. As a fighter pilot operating from an aircraft carrier, he was shot down over North Vietnam in 1965. As the senior naval officer among the prisoners of war in Hanoi for seven and a half years, he was tortured fifteen times, put in leg irons for two years, and confined in solitary for four years. This experience was the crucible for his philosophical thought on issues of character, leadership, integrity, personal and public virtue, and ethics. Much of his philosophy is drawn from the Stoic philosophers, especially Epictetus, whom he had read before his capture. The selections in this volume converge around the central theme of how man can rise with dignity to prevail in the face of adversity - lessons just as valid for the challenges of present-day life as they were for the author's Vietnam experience. (from books.google.com)
2004.315.237	Sea Raiders of the American Revolution : The Continental Navy in European Waters	Bowen-Hassell, E. Gordon	The Navy of the United States, like the nation itself, was born in the midst of the bloody conflict for independence known as the American Revolution. The Continental Navy, as it was called then, shaped and was shaped by this difficult struggle for freedom that lasted from 1775 to 1783. During the war, the sailors of the young navy, seamen and officers alike, established the proud traditions of honor, courage, and commitment shared by today's servicemen in the United States Navy. It is important for the American people, especially those who wear the uniform, to understand the significant role that the Continental Navy played in the nation's beginnings. This book is about three captains of the Continental Navy: Lambert Wickes, Gustavus Conyngham, and

Object ID	Title	Author	Summary
			John Paul Jones. In recounting the stories of their lives and examining the roles they played in the Navy's early years, it highlights the difficult circumstances that each man faced operating in seas dominated by the British Navy and emphasizes that the outcome of the American War for Independence was far from certain. The book also illustrates the humanity of these Revolutionary War heroes, revealing their weaknesses as well as their strengths. They exhibited frustration, pettiness, and egotism as well as courage, initiative, and sound judgment. Like naval leaders today, these Continental Navy officers faced tough choices and were forced to live with the consequences, for good or ill. Their lives and choices had an important influence on the course of the war and on the character of the naval service. (from Amazon.com)

He ended Tecumseh's plans for an Indian Confederation and blocked Britain blocking the united States in its westward march. Perry turned certain defeat into a monumental victory. The book is written from primary and secondary sources with one black &
2004.315.240	To the Shores of Tripoli : The Birth of the U.S. Navy and Marines	Whipple, A. B. C. (Addison Beecher Colvin)	To The Shores Of Tripoli : The ;Birth of the U. S. Navy and Marines with Preface and Acknowledgments by the Author; IV Parts, Epilogue, Appendix A, Appendix B, Notes, Bibliography, & Index. Map drawings on inside covers. For centuries the Barbary Coast nations of Tripoli, Tunis, Algeria, and Morocco had been terrorizing merchant shippers, capturing and looting vessels, imprisoning crews for ransom and the infant United States also threatened by the Barbary pirates, President Thomas Jefferson faced a major U. s. foreign policy challenge. Trading arms for hostages was finally met with his decision to send a squadron of warships to the Mediterranean while congress was in recess prompting the first major U. s. debate on the war-making powers of the president. Congress voted for the president to use force if necessary. Known as the Barbary War Americans from the disbanded Continental Navy established the new U. S. Navy and Marine Corps. The result was a blockade of Tripoli and a ground war of marines leading a coalition of Christians and Arabs to invade Tripoli.
2004.315.241	Age of Fighting Sail, The	Forester, C. S. (Cecil Scott)	Age of Fighting Sail: The Story of the Naval War of 1812 by C. S. Forester, Edited by Lewis

Object ID	Title	Author	Summary
			Gannett in the Mainstream Of America Series. XXII Chapters, Index and world and U. S. maps on inside covers. The young United States had three brilliant commanders, ;Rodgers, Decatur and hull commanding the ;Constitution and the President and other fleet ships busy harassing the British until a United States Navy could be build. Ship designer, Joshua Humphreys, builder of frigates was limited to building such ships which outmaneuvered the British Men 'O War ships with staggering blows to them in the War of 1812.
2004.315.242	Prisoner of War : Six Years in Hanoi	McGrath, John M.	During the era of the unpopular Vietnamese conflict few issues united the American people as did the emotion-laden problem of the POWs and MIAs. When the peace treaties were signed and the POWs finally returned to American soil, the nation was collectively exalted by their safe return. One of the returned men was LCDR John McGrath, a young Navy pilot who was captured in June of 1967. As a former POW, McGrath believes that the story of life in the prison camps must be told, both for the sake of history and to disprove forever the claims of the Communist government that the captured men were treated humanely, and in accordance with the provisions of the Geneva Convention. A self-taught artist, McGrath vividly presents in words and many pen and ink drawings, a simple straightforward tale of survival, of years of suffering, and the human will to endure. The starkness of the drawings underscores a remarkable chronicle of lives constantly in peril. almost unimaginable in civilised times. "The book cannot be adequately described — it has to be seen and read. It is superb. Some philanthropist, we hope, will buy a copy for every American library. Do yourself a favor — buy yourself a copy, and another one for a friend.'

Object ID	Title	Author	Summary
2004.315.253	Duel Between the First Ironclads	Davis, William C.	One was called "a tin can on a shingle"; the other, "a half-submerged crocodile." Yet, on a March day in 1862 in Hampton Roads, Virginia, after a five-hour duel, the U.S.S. Monitor and the C.S.S. Virginia (formerly the U.S.S. Merrimack) were to change the course of not only the Civil War but also naval warfare forever. Using letters, diaries, and memoirs of men who lived through the epic battle of the Monitor and the Merrimack and of those who witnessed it from afar, William C. Davis documents and analyzes this famous confrontation of the first two modern warships. The result is a full-scale history that is as exciting as a novel. Besides a thorough discussion of the designs of each ship, Davis portrays come of the men involved in the building and operation of America's first ironclads-John Ericsson, supreme egoist and engineering genius who designed the Monitor; John Brooke, designer of the Virginia; John Worden, the well-loved captain of the Monitor; Captain Franklin Buchanan of the Virginia; and a host of other men on both Union and Confederate sides whose contributions make this history as much a story of men as of ships and war. William C. Davis is the editor of Civil War Times Illustrated and the author of Breckinridge: Statesman, Soldier, Symbol ; The Battle of New Market; Battle at Bull Run; and The Orphan Brigade. (from Amazon.com)

2004.315.257	Dönitz, The Last Führer : Portrait of a Nazi War Leader	Padfield, Peter	Karl Dönitz (16 September 1891 – 24 December 1980) was a German naval commander during World War II. He started his career in the German Navy (Kaiserliche Marine, or "Imperial Navy") before World War I. In 1918, while he was in command of UB-68, the submarine was sunk by British forces and Dönitz was taken prisoner. While in a prisoner of war camp, he formulated what he later called Rudeltaktik ("pack tactic", commonly called "wolfpack"). At the start of World War II, he was the senior submarine officer in the German Navy. In January 1943, Dönitz achieved the rank of

Object ID	Title	Author	Summary
			Großadmiral (Grand Admiral) and replaced Grand Admiral Erich Raeder as Commander-in-Chief of the German Navy (Oberbefehlshaber der Kriegsmarine). On 30 April 1945, after the death of Adolf Hitler and in accordance with Hitler's last will and testament, Dönitz was named Hitler's successor as Staatsoberhaupt (Head of State), with the title of Reichspräsident (President) and Supreme Commander of the Armed Forces. On 7 May 1945, he ordered Alfred Jodl to sign the German instruments of surrender in Rheims, France. Dönitz remained as head of the Flensburg Government, as it became known, until it was dissolved by the Allied powers on 23 May. (from Wikipedia)
2004.315.258	James Forrestal : A Study of Personality, Politics, and Policy	Rogow, Arnold A.	James Vincent Forrestal (February 15, 1892 – May 22, 1949) was the last Cabinet-level United States Secretary of the Navy and the first United States Secretary of Defense. Forrestal was a supporter of naval battle groups centered on aircraft carriers. In 1954, the world's first supercarrier was named USS Forrestal in his honor, as is the headquarters of the United States Department of Energy. He is also the namesake of the Forrestal Lecture Series at the United States Naval Academy, which brings prominent military and civilian leaders to speak to the Brigade of Midshipmen, and of the James Forrestal Campus of Princeton University in Plainsboro Township, New Jersey. Forrestal observed a famously punishing work schedule in the last years of his life, and rumors had circulated in the press as to his health. President Truman's decision to dismiss him as Secretary of Defense on March 31, 1949 is said to have caused him to suffer a "nervous breakdown", a charge denied

Object ID	Title	Author	Summary
			by Forrestal's brother. Forrestal was hospitalized on April 2, 1949. On May 22, 1949 he was found dead on the roof of a covered walkway below the window of a kitchen across the hall from his 16th floor room at the National Naval Medical Center (NNMC, commonly known as the Bethesda Naval Hospital), a bathrobe sash knotted tightly around his neck. This happened on the day Forrestal was to be discharged from the hospital. The news media reported that he had committed suicide, and the local coroner and U.S. Navy officials agreed. The circumstances of the death were reviewed, however, by a committee convened by Rear Admiral Morton D. Willcuts, the head of NNMC (1948–1951). The committee released only a brief list of conclusions several months after it had completed its work. The conclusions noted only that Forrestal "died following a fall" and that the fall caused his death. The board did not speculate as to what might have caused the fall. The committee's full report was not released until 2004. In a review of the board's evidence and findings—solicited by the Navy and kept secret with the report until 2004—Chairman of the American Psychiatric Association Dr. Winfred Overholser concluded that Forrestal "came to his death by suicide while in a state of mental depression," but the report's own conclusions were seen to have been accurately reported 55 years earlier, that is simply that Forrestal died from the fall. Debate over the exact circumstances of Forrestal's unusual death continues today, with some critics citing the U.S. government's withholding of the official report and autopsy results as well as possible signs of struggle in evidence photos as indicating foul play. (from Wikipedia)

The authors describe in detail O'Hare's awe-inspiring feats of aerial combat and his key role in developing tactics such as the Thach Weave and the night-fighting techniques that helped defeat the Japanese.
2004.315.261	Admiral Togo	Blond, Georges	Fleet Admiral Marquis (koshaku?) Togo Heihachiro, OM, GCVO (27 January 1848 – 30 May 1934) was a Fleet Admiral in the Imperial Japanese Navy and one of Japan's greatest naval heroes. He was termed by Western journalists as "the Nelson of the East", after Horatio Nelson, the British admiral who defeated the French at Trafalgar. (from Wikipedia)
2004.315.272	Submarines	Preston, Antony	From the book jacket, "As in the history of flying, there were hundreds of experiments laughable failures, near-misses and awkward successes in the development of submarines. Only after the invention of the torpedo and the achievement of diesel-electric propulsion did they become lethal weapons. Anthony Preston describes how German U-boats terrorized the Atlantic in both World Wars and how the US destroyed

Object ID	Title	Author	Summary
			Japanese shipping in the Pacific in World War II--the most devastating and prolonged naval campaign in history. When the war ended, the submarine took on a dramatic role in US national defense through the nuclear program, culminating in the historic cruises of the nuclear submarines beneath the North Pole. Lavishly illustrated with over 200 photographs and technical drawings in black and white as well as color, Submarines is an invaluable addition to the library of every naval enthusiast."
2004.315.274	Midget Submarines	Kemp, Paul	From the introduction--"Midget submarines--the term is used in its widest sense and include human torpedoes, semi-submersibles and midget submarines proper--are a subject of compelling interest. On the morning of 1 November 1918, two Italian officers swimming along side a torpedo-like craft called Mignatta, penetrated the Austrian harbor at Pola and attached a mine to the hull of the Austrian flagship Virbus Unitis. At 0620 the charge detonated with a 'dull roar' and the mighty battleship with her armament of twelve 12in guns rolled over and sank. This was the first successful attack by a midget submarine and although the sinking of the Virbus Unitis came too late to have any affect on the war, Austria having already requested an armistice, the daring raid was to be the inspiration for further development in this field."
2004.315.275	First, the Few, the Forgotten, The : Navy and Marine Corps Women in World War I	Ebbert, Jean	Tells the story of the women who served in the military during WWI. Effectively shattering the misconception that the role of women in the war was limited to nursing, the authors recount that from 1917 to 1920, some 12,000 enlisted women served in the US Naval Reserve and 305 in the USMC Reserve. Explores a surprising variety of military duties carried out by women, including a number of

			of the "voice from the bottom of the sea." Thus, as one of the few submarine captains to survive, I have taken up my pen to try to record something of the unknown hardships and successes of our submarines
2004.315.292	U.S. Marines in Vietnam : The Landing and the Build Up, 1965	Shulimson, Jack	From the Foreword - "This is the second volume in a series of nine chronological histories being prepared by the Marine Corps History and Museum Division to cover the entire span of Marine Corps involvement in the Vietnam War. This volume details that Marine activities during 1965, the year the war escalated and major American combat units were committed to the conflict. The narrative traces the landing of the nearly 5,000 man 9th Marine Expeditionary Brigade and its transformation into the III Marine Amphibious Force, which by the end of the year contained over 38,000 Marines. During this period, the Marines established three enclaves in South Vietnam's northern most corps area, I Corps, and their mission expanded from defense of Da Nang Airbase to a balanced strategy involving base defense, offensive operations, and pacification. This volume continues to treat the activities of Marine advisors to the South Vietnamese armed forces, but in less detail than its predecessor volume, U.S. Marines in Vietnam, 1954-1965; The Advisory and Combat Assistance Era."
2004.315.293	U.S. Marines in Vietnam : An Expanding War, 1966	Shulimson, Jack	From the Foreword -- "This is the third volume in a planned 10-volume operational and chronological series covering the Marine Corps' participation in the Vietnam War. A separate topical series will complement the operational histories. This particular volume details the buildup in 1966 of the III Marine Amphibious Force in South Vietnam's northernmost corps area, I Corps, and the accelerated tempo of fighting during the year. The result was an 'expanding war.' The III Marine Amphibious Force

Object ID	Title	Author	Summary
			had established three enclaves in I Corps, during 1965. Employing what they believed was a balanced strategy--base defense, offensive operations, and pacification--the Marines planned to consolidate their base areas in 1966. At the beginning of 1966, the 1st Marine Division reinforced the 3rd Marine Division and the 1st Marine Aircraft Wing in Vietnam. By the end of the year, the III Marine Amphibious Force had nearly doubled in size. Two separate events, however, were to dash the high hopes held by the Marines in 1966. An internal political crisis in the spring halted the Marine pacification campaign south of the large Da Nang Airbase. In July, the North Vietnamese Army launched an incursion through the Demilitarized Zone and Marines went north to counter the thrust. By December 1966, Marine units were stretched thin along the 265 mile length of I Corps. As one Marine commander observed, 'too much real estate--do not have enough men.'"
2004.315.294	U.S. Marines in Vietnam : Fighting the North Vietnamese, 1967	Telfer, Gary L.	From the Foreword -- "This is the fourth volume in a planned10-volume operational and chronological series covering the Marine Corps' participation in the Vietnam War. A separate topical series will complement the operational histories. This volume details the change in focus of the III Marine Amphibious Force (III MAF), which fought in the South Vietnam's northernmost corps area, I Corps. III MAF, faced with a continued threat in 1967 of North Vietnamese large unit entry across the Demilitarized Zone separating the two Vietnams, turned over th Chu Lai enclave to the U.S. Army's Task Force Oregon and shifted the bulk of its forces--and its attention--northward. Throughout the year, the 3d Marine Division fought a conventional large-unit war

Object ID	Title	Author	Summary
			against the North Vietnamese Army (NVA) near the demilitarized zone. The 1st Marine Division, concentrated in Thua Thien and Quang Nam provinces, continued both offensive and pacification operations. Its enemy ranged from small group of Viet Cong guerillas in hamlets and villages up to formations as large as the 2d NVA Division. The 1st Marine Aircraft Wing provided air support to both divisions, as well as Army and allied units in I Corps. The Force Logistic Command amalgamated from all marine logistics organizations in Viet Nam, served all major Marine Commands."

From the Foreword --"This is the sixth volume in a planned nine-volume operational and chronological series covering the Marine Corps' participation in the Vietnam War. A separate topical series will complement the operational histories. This volume details the change in United States policy for the Vietnam War. After a thorough review, President Richard M. Nixon adopted a policy of seeking to end United States military involvement in Vietnam either through negotiations or, failing that, turning the combat role over to the South Vietnamese. It was this decision that began the Vietnamization of the war in the summer of 1969 and which soon greatly reduce and then end the Marine Corps' combat role in the war."
2004.315.298	Illustrated Encyclopedia of the Strategy, Tactics, and Weapons of Russian Military Power	Menaul, Stewart	From the Introduction - "The USSR does not seek parity; it seeks, in the long term, absolute military superiority--in other words, a permanent imbalance of power. If the Soviet Union were to state such a policy in public the West would obviously react by raising its guard and rearming properly, which would halt the imbalancing process which the Kremlin is aiming for. The deeds of the Soviet Union speak louder than any words,

Contents include Rise of Soviet Communism -- Expansion of the Red Army -- Organization of Soviet Forces -- Soviet Global Policy in Peace and War -- Defence of Soviet Airspace -- Modern Soviet Air Force -- Soviet Aircraft -- Modern Soviet Navy -- Soviet Warships -- Modern Soviet Ground Forces -- Army Weapons -- Soviet Strategic Rocket Forces -- Soviet Missiles -- Forces of the Warsaw Pact -- Uniforms of the Soviet Armed Forces -- Index to Modern Soviet Weapon Systems
2004.315.299	Nuclear Weapons Fact Book	Campbell, Christopher	From the Introduction -- "This is a book of information and not of opinion. Its subject matter is weapons of mass destruction, the plans for their use, the strategy behind those plans and the means of carrying them out. That is an agenda which stirs the most fundamental of feelings and sets passionate pens to paper --but not here. By its nature it is concerned only marginally with the effects of nuclear weapons on life and the things that support life. Nor is it concerned in any degree with attempts to survive the impact of the megatons by digging holes or seeking places of safety. It is in fact made up of dispassionate commentary on weapons systems and the command structures that seek to control them. The diagrams that explain how a given weapon works are drawn from material provided by manufacturers and project-system offices and have the same detachment as their originals. If such clinical analysis of a subject like this is repellent to some, it should be made clear that it is only by entering the culture of the technology, however reluctantly, that the politics of nuclear weapons be understood, because the technologists so often lead the policy makers by the nose."
2004.315.300	American Badges and Insignia	Kerrigan, Evans E.	From the Preface "Military insignia fall into several

			classes. Devices that reveal a man's personal heroism are known as decorations; his participation in specific campaigns is signified by his medals. These subjects are covered in my book American War Medals and Decorations, and so we will not deal with them in this work. Here we deal with aviation badges, marksmanship badges, and the like, signifying a man's personal attainments. This book describes the individual insignia affixed to a uniform or headgear to show branch of service, shoulder patches to denote army corps or division; ranks and ratings of the services and regimental crests or the Army and qualification
2004.315.301	Naval & Maritime History : An Annotated Bibliography	Albion, Robert Greenhalgh	An Annotated Bibliography includes Reference Works, Merchantmen and Warships, Captains and Crews, Maritime Science, Commerce and Navies. Works are categorized by 1) shallow or superceded, 2) the most useful, and 3) the most substantial and useful.
2004.315.302	U.S. Naval History Sources in the United States	Allard, Dean C.	This publication seeks to aid students of naval history by identifying manuscript, archival, and other special collections deposited in more than 250 American archives and libraries.
2004.315.303	Shipboard Damage Control	Bissell, Allen M.	"Shipboard Damage Control" is offered as a guide for division officers of the fleet and as a text for officer candidates and midshipmen who want to gain a basic understanding of all aspects of shipboard damage control. It explains the principles of stability, organizational concepts and practices, furnishes an introduction to equipment, and discusses the advantages and disadvantages of computer support in damage control. Although the book is primarily intended for those concerned with damage control in naval ships, much that it contains will be useful to merchant mariners as well.

Object ID	Title	Author	Summary
			Most division officers soon discover that their knowledge of damage control is not sufficient to carry their divisions through operational readiness evaluations or refresher training without long practice sessions and the implementation of a detailed training program. Moreover, the rapid turnover of personnel compounds the training requirement and forces the creation of a damage-control training pipeline. In short, damage control offers a continuing challenge to the officer and his men. As naval vessels become more complex, the environment in which damage control must be practiced requires greater knowledge and more training on the part of the practitioner. The presence of nuclear material, exotic rocket propellants, pyrotechnics, high explosives, fuel, flammable petroleum products, and ammunition, all in close proximity to high voltages, magnetic fields, radio and radar beams, and other hazards, constrain the organization of damage control. These limitations reduce the freedom available in controlling damage. Thus, the actions taken by a scene leader and his damage-control party must reflect their understanding of the consequences of their actions and must not create additional damage or complications. The only way to ensure that appropriate actions will be taken is to ensure that every man in the damage-control organization is properly trained. It is for just this reason that "Shipboard Damage Control" has been written. (from dust jacket flap)
2004.315.304	Heroes, U.S. Marine Corps, 1861-1955; Armed Forces Awards, Flags	Blakeney, Jane	From the Introduction and Acknowledgements - "I am not gifted with the pen, and therefore, I will not attempt to write a story about our great heroes and leaders, but I will

			endeavor to record in the pages of this book, which I hope will prove of great value as an accurate ready reference, the names of the Marine Corps decorated personnel with the exception of those who have been awarded the Bronze Star, the Air Medal, the Purple Heart, and Letters of Commendation with authority to wear the Commendation Ribbon and Metal Pendant. Such lists may appear in a later publication. This book should also fulfill a long felt need for compiled honors, conferred upon Marine Corps organizations, as well as accurate information on Flags, Streamers, Silver Bands, Marksmanship Awards, and other wanted items of military and National interest."
2004.315.305	Naval Officer's Uniform Guide, The	Castano, J. B.	In 1776, the officers serving in the Continental frigate "Providence" addressed themselves to their skipper, Captain Abraham Whipple, requesting "that a proper Navy uniform be procured" so that "all may have an opportunity to appear alike as brothers united in one cause." This request led to the first uniform authorizations in the United States Navy. This illustrated reference handbook is a comprehensive guide to all aspects of the male and woman officer's wardrobe. Covering such subjects as formal and dinner dress uniforms, tropical uniforms and service dress uniforms, the Guide also contains hard-to-find information on insignia, badges, name tags and aiguillettes, the customs and traditions associated with the sword, ribbons and attachments and the proper wearing of large and miniature medals. Interesting descriptions of the historical background surrounding particular uniform items as well as cogent advice on the care and maintenance of the uniform make this a unique compendium.

2004.315.307	Submarines of the World	Miller, David	From the Introduction - "The submarine is one of the most important strategic and tactical weapons of the 20th Century, and this importance will increase yet further in the 21st Century. The tiny, creaking, leaking and unsafe 'submarine-boats' of the 1890s, displacing under two hundred tons and carrying a handful of men and a few torpedoes have grown into massive, sophisticated and deadly weapons systems, displacing as much as 26,000 tons, carrying a crew of over a hundred and armed with missiles which can destroy vast areas of the Earth. Every day hundreds of submarines are patrolling the oceans of the world. Many of them are on routine training, but some of them are armed with strategic missiles and for them every patrol is fully operational as if they were at war. The surface of the ocean is hostile enough on occasion, but the depths are always hostile to man. Yet, for many centuries man has dreamed of penetrating the depths of the oceans and now this dream has become possible. This book describes some of the milestones on that journey."
2004.315.308	Sea Battles: A Reference Guide	Sanderson, Michael W. B.	This is a concise account of the principal sea battles of history, taking us through some 2000 years from the Graeco-Persian Wars in 499-488 BC to the end of WWII. There are accounts of over 250 battles arranged in alphabetical order and placed in the context of the wars to which they belong and other engagements during the same

2004.315.319	Encyclopedia of the World's Warships, The : A Technical Directory of Major Fighting Ships from 1900 to the Present Day	Lyon, Hugh	This book provides a wealth of detail informations on 200 + warships from American nuclear aircraft carrier to the smallest submarines in World War II. It contains data of tables of its ships and sister ships of its class; and also analyzed its roles in the warfare it partakes in, with its performances, service records, etc.
2004.315.320	Guinness Book of Ships and Shipping Facts & Feats, The	Hartman, Tom	Confronted with a task which had no well-defined boundaries, the author's general brief was to put in anything which he thought might settle an argument about ships. Inevitable it can be said that the result is both selective and subjective, but nevertheless it is hoped that the answer to most of the questions anyone might reasonably ask about ships will be found herein. Pages 125-129 have firsts for aircraft carriers. The books also includes a history of ships, ships in war facts about ships including submarines, torpedoes, torpedo boats, hospital ships, and troop ships.
2004.315.321	Warships Associated with World War II in the Pacific : National Historic Landmark Theme Study	Butowsky, Harry A.	This book contains studies of more than 40 surviving warship and merchantmen dating back to World War II. It contains B&W photos of the ships, maps, charts of each participating in the battles that these ship partakes. It's broken down into two important sections: One. The warship design developments. The design evolved from each hard lessons that each warship encounters during the war against the Japanese. These warship designs evolved as they fought during those times which included the aircraft carriers, battleships, cruisers, destroyers, submarines, minesweepers, and a number of Liberty Ships as well as the PT Boats. Two. The battles in the Pacific Oceans with the German Submarines threat.

2004.315.323	Historic Ships of the World	Heine, William C.	This book describes and pictures vessels from all over the world which have been saved from the ravages of time and man, and restored and preserved as living histories of the sea and of wars at sea.
2004.315.325	Warships of the Royal Navy	Moore, John Evelyn	This comprehensive guide to the ships of the Royal Navy covers all Britain's major warships deployed throughout the world as well as support ships and smaller craft without which a modern navy could not operate. The book includes deterrent and other nuclear powered submarines, aircraft carriers, highly specialised guided missile ships, fast frigates, mine warfare forces, hovercraft, tankers, support ships and tugs. A description of each class is given with notes on any variations on individual ships, together with full particulars of displacement, dimensions, armaments, and propelling machinery. At the back of the book will be found a comprehensive glossary of the more important weapons and equipment to be seen on board the Royal Navy's major warships. This glossary is complemented by a number of annotated photographs showing the disposition of these items. Although the Royal Navy is no longer a major sea power, it still has an important role to play and its many fine ships comprise a powerful fighting force. Warships of the Royal Navy reflects the massive changes that have occurred since the Second World War and the technological innovations in marine architecture and engineering which have taken place over the last thirty years. (from dust jacket flap)
2004.315.326	Submarines in Color	Gunston, Bill	Chapters include: Development of Submarine Technology; Color Plates of Submarines; Early Submarines; Submarine Development 1918-1945; The Modern Era; Some Typical A/S (Anti-Submarine) Weapons

2004.315.328	Aircraft of the World, The	Green, William	A collection of pictures (10 on each page) of every kind of aircraft you can think of. Along with each picture you will find a brief history of the craft and the date it was built as well as technical data and very often diagrams of the frontal, side-on, and underside views of the plane.
2004.315.329	World's Fighting Planes, The	Green, William	The purpose of this book is to bring the audiences in awareness of the aircraft during that period of time in its appearances and performances during the Post World War II. To mentioned some of the aircrafts: Variable-geometry General Dynamics F-111, piston-engined Douglas Skyraider, SAAB-37 Viggen, VFW 1262, Ling-Temco Vought A-7, and Lockheed's notorious U-2. This book included B&W photos of the aircrafts and drawings. These drawings was to revealed to the reader that its more effectively to shown the visual comparsion of its character to the aircraft as the reader flipped through the book will find. Includes: Cold War fighter aircraft - Post World War II
2004.315.330	American Combat Planes	Wagner, Ray	Over 1400 photos of American combat planes from the biplanes of 1908 to sleek supersonics fighter jets of the eighties. Gives the readers a sense of completeness of the combat aircrafts of our times for those aircraft fans or just those who wants to know about the combat aircrafts. In naming a few: F-86 Sabre, P-51 Mustang, SR-71 Blackbird, and lockheed P-38M, etc.
2004.315.332	German Warships of the Second World War	Lenton, H. T.	(from dust jacket flap:) No study of Second World War naval history is possible without comprehensive details of the warships of the navies that participated. But for a complete appreciation the

Object ID	Title	Author	Summary
2004.315.333	Soviet Warships of the Second World War	Meister, Jurg	unfulfilled and projected programmes are equally important in illustrating the immense effort needed to secure victory at sea. In "German Warships of the Second World War" are details of the entire German wartime fleet, from well-known Battleships like the "Bismark" [sic] and "Tirpitz" right through to the numerous auxiliary units without which no fleet could operate. The submarine section is similarly complete and lists those designs studied and put into production up to the outbreak, and during the early stages of the war, as well as the many experimental types, few of which were ever built. This extremely well illustrated book draws on material contained in the popular "Navies of the Second World War" series. Greatly revised and containing much new material this book is an important addition to the documentation of Hitler's navy.
			(from dust jacket flaps:)
			The real strength of the Soviet Navy during the Second World War has always been an enigma. Apart from some successes achieved by submarines and smaller surface craft, the Baltic, Black Sea, Arctic and Pacific Fleets had little to show to justify their existence and losses. Just how strong was the Soviet Navy? And why did it largely fail operationally? The Soviet authorities are still reluctant to release complete and accurate details of their wartime Navy, least of all its losses. However, after many years of painstaking research, Jürg Meister has succeeded in compiling an accurate and almost complete record of Soviet naval strength and losses during the Second World War. This work is therefore a very valuable contribution to the history of

Object ID	Title	Author	Summary
			naval warfare. Although the first part of this book draws on some material first published in the popular 'Navies of the Second World War' pocket reference book series, the facts have been completely revised in the light of the latest available information. But it is the second major part dealing with submarines, motor torpedo boats, naval auxiliaries, support craft, and lake and river flotillas that really characterizes the Soviet Navy of that period. In 1939 the Soviet Union possessed more submarines and MTBs than any other power and, with few exceptions, these were also the only active Soviet seagoing forces during the hostilities, but their losses were high in relation to results achieved. Of particular interest are the various lake and river flotillas. Starting with a number of largely obsolete craft, Russian ingenuity and gift for improvisation created a unique and efficient 'tactical navy' which participated effectively in many important operations. This highly detailed account of Soviet naval power during the Second World War contains a wealth of information about all classes of Soviet warships, from uncompleted and largely unknown capital ships to the smallest river craft; its value is enhanced by the inclusion of many rare photographs and the most accurate line drawings available. Swiss-born Jürg Meister is an internationally acknowledged expert on Soviet naval affairs; he has written several books and many articles on the subject. Front: The battleship Sevastopol in a Black Sea port in 1943. (USSR) Back (top): Type 1124 armoured motor gunboats of the Volga Flotilla in 1944.

2004.315.350	Conway's All The World's Fighting Ships - 1906-1921	Gardiner, Robert (ed.)	This series contains complete listings of the world's combat ships from the first ironclad to the powerful battleships of World War II to the changes in the world's navies as a result of the collapse of the world's Warsaw Pact. (from Google Books)
2004.315.354	Conway's All The World's Fighting Ships - 1922-1946	Chesneau, Roger (ed)	Conway's All the World's Fighting Ships 1922-1946 is the third in a series of 4 books which, as the title suggests, lists all the worlds fighting ships built during the period in question. Initially, these were post-WW1 years in which some countries favoured disarmament whilst others harboured expansionist plans. This was also a time when the Aircraft Carrier would totally eclipse the mighty Battleship as "King of the Seas." Eventually, the advent of WW2 and the way in which the USA entered that war added a whole new dimension to warship design and production. Conway Maritime Press are well known for their factual books on ships - especially warships, in which they provide the finest technical documentation. "All the World's Fighting Ships 1922-1946" is hard-back measuring 12½" x 8¾" with 456 pages of detailed and factual information. After a brief foreword and an explanation of abbreviations used, the navies of the world are listed by country in order of their size and importance at the beginning of the period in question - i.e. Great Britain and Empire Forces, USA, Japan, Germany, etc and continuing right down to the world's smallest navies from the Middle East, Far East and Latin America. Each country's ships are then displayed by "class" commencing with the largest capital ships and progressing all the way down to the smallest

Object ID	Title	Author	Summary
			torpedo boats (or whatever) with the oldest vessels mentioned first. For each class there is one or more of those profile line drawings which have become Conway's trademark. These are followed by all the usual technical details such as; Displacement, dimensions, machinery, armour, armament and complement followed by the names of each ship within that class - it's builder, date laid down, date completed and fate. These are accompanied by a very "readable" text from which we learn of the political intrigue of the day, variations between vessels, refits, new equipment, whatever defects or other problems beset either the class or a specific ship and a short résumé of the fate of each vessel. Altogether, the book is well illustrated with an excellent selection of historic black and white original photographs throughout with at least one picture on almost every page. (from Amazon.com)

The Spanish War, An American Epic -1898 with Chronology pg. 11, Introduction, Eighteen Chapters, and Epilogue: The Wake of the Maine with black and white photographs pg. 151-158; and Maps. February 15, 1898 the U. S. battleship Maine was ripped in half by an explosion in Havana harbor with the loss of 266 lives which led to war with Spain nine weeks later. After three months, America possessed the area from the Caribbean to the far Pacific. This narrative history reveals the U. S. covert intelligence network in Cuba during the war and evidence of the mysterious mission of the Maine shedding light on this misunderstood war. Photographs include General Maximo Gomez, Cuban insurgent leader; General Antonio Maceo, Jose Marti, and William Randolph Hearst, the Maine entering Havana harbor 25 January 1898, Capt. Charles D. Sigsbee, the wreckage of the Maine to name a few.

2004.317.004	Jane's World Aircraft Recognition Handbook - 1982	Wood, Derek	This new edition of the immensely successful Jane's World Aircraft Recognition Handbook has been completely updated to include the 40 or more significant types that have made their first flights during the last four years. Retaining the ingenious system of classification and instant-reference symbols, the Handbook now features information-packed cutaway drawings, a section on the Sillograph training aid, and a selection of new drawings from eminent aviation artist John Blake. The result is an even better version of the aircraft-recognition manual that was so eagerly received by individuals and organisations worldwide when it was first published four years ago. Author Derek Wood is a world authority on the techniques of aircraft recognition. An aviation and defence writer for nearly 30 years, he has been London editor of Interavia since 1953 and air correspondent of the Daily Telegraph since 1961. Originator and co-author of The Narrow Margin, the classic history of Battle of Britain, he has also written Project Cancelled, Attack Warning Red (the history of Britain's Royal Observer Corps, in which he has served for over 30 years) and Target England. (from back cover)
2004.317.005	Fight's On! Airborne with the Aggressors	Laming, Tim	(from zenithpress.com:) An in-depth review of today's target and aggressor aircraft. This plane-by-plane review profiles today's front-line fighters in full-color photography and includes a detailed text describing the aircraft and its current training role. Witness their day-to-day training in simulated real wartime scenarios. Sftbd., 9x 10 1/2, 112 pgs., 131 color ill.

Object ID	Title	Author	Summary
2004.317.006	Military Aircraft of the World	Taylor, John William Ransom	Military Aircraft of the World with black & white & color photographs and the only book covering all significant military aeroplanes in a comprehensive and compact form. 300 different types are described and illustrated some with three-view silhouettes. It covers maritime and photographic reconnaissance aircraft, strategic and tactical transports, helicopters, trainers, observation and communications aircraft. Latest Russian designs and America's new swing-wing supersonic strategic bomber, F-14, F-15 fighters and up-to-date and accurate information.
2004.317.007	Pearl Harbor and Hawaii : A Military History	Army Times	From Amazon. This is an account of the events leading to the attack on Pearl Harbor, the bombing itself and its aftermath. By the editors of the Army Times Publishing Company.
2004.317.008	Iwo	Wheeler, Richard	On the morning of February 19, 1945, a tiny island lying midway between the Marianas and the Japanese mainland became the scene of one of history's bloodiest battles and one of the most important American victories of World War II. Iwo is a searing and unique account of that battle, told from the perspective of both the gallant U.S. Marines who invaded the island and the brave Japanese soldiers who defended it.
2004.317.009	Iwo Jima : Legacy of Valor	Ross, Bill D.	February 19, 1945: The day on which, on a seemingly impregnable flyspeck Pacific island, some 75,000 United States Marines began their thirty-six-day assault against Japanese forces defending to the last man the front door to their homeland. Iwo Jima chronicles that deadly combat - a combat the likes of which mankind will probably never witness again. ... Iwo Jima is a brutal book ...
2004.317.010	Marine Air : First to Fight	Trotti, John	When the United States Marines mount an assault, they use an incredible mix of fixed-and rotary-wing aircraft-16

Object ID	Title	Author	Summary
			types including the new F/A-18 Hornet, the VTOL Harrier, the Cobra attack helicopter, and "goody-laden" ECM/ELINT planes. Ex-Marine F-4 Phantom pilot John Trotti and photographer George Hall show what it's like to be a member of the USMC's elite air team. In what can truly be called a first-hand look, the reader straps into each Marine aircraft and flies a typical mission. B&W and color photos.
2004.317.012	Steel Ships and Iron Men : A Tribute to World War II Fighting Ships and the Men Who Served on Them	Roberts, Bruce	Walk up the gangway and on deck for a uniquely personal remembrance of World War II, the ships that sailed every ocean, and the men who fought aboard them. More than thirty floating war memorials--Battleships, carriers, destroyers, PT boats, and submarines are open to the public. All are moving monuments to unforgettable times.
2004.317.013	Encyclopedia of Sea Warfare: From the First Ironclads to the Present Day, The	Parsons, Iain (ed)	The Encyclopedia of Sea Warfare covers the dramatic events of naval history during the period of the most rapid developments. It deals with tactics and weapons, development of warships and the first historic battle between the ironclads during the American Civil war to technology of today. It gives insight into strategic planning and historical implications of battles and wars fought at sea into the nuclear age and tells the story of the men who endured and their bravery. Black & white & color photographs and illustrations of warships, maps of battles, and actions pictures.
2004.317.015	Ships at War	Hornsey, Patricia E. (ed)	Ships At War - about the great battles and ships with black & white & color photographs from air attacks, sea battles such as Jutland and Pearl Harbor. WWI to WWII. The Russo-Japanese War, the Falklands, Dardanelles, U-Boats, Baltic Force, Dunkirk, the Bismark, Malta, Midway, and Leyte to name a few.
2004.317.016	Pearl Harbor	Barker, A. J.	From an Amazon Customer Review: "This is a valuable,

Object ID	Title	Author	Summary
			concise look at Pearl Harbor. Author A. J. Barker shows the preparations, naval capabilities, strategies and tactics in describing this attack. Readers learn why Japan chose this foolhardy course - which they capably executed on Dec. 7, 1941. We also learn why the U.S. navy was caught napping - despite warnings from having sunk a Japanese mini-sub hours before the assault, plus U.S. radar picking up the approaching attack aircraft. Barker also shows the battle in its tragic detail, from the sinking of the Arizona (with high casualties), to the near-destruction of U.S. airfields, to the absence of the U.S. Carrier fleet. The author avoids the questionable conspiracy theories that President Roosevelt knew this attack was coming (Roosevelt did suspect Japan would strike in Southeast Asia), but we see how one naval officer predicted Japan's attack at Pearl Harbor for Nov. 30 - one week early."
2004.317.017	U.S. Air Power	Yenne, Bill	Tomcats. Warthogs. Aardvarks. These aircraft do it all: fighting, bombing, refueling, reconnaissance. Each serves a different and vital function in supporting and maintaining America's defensive readiness. U.S. AIR POWER catches the speed and power of the world's most sophisticated military jets and the agility and adaptability of our hard-working helicopters. Bill Yenne, author of many aviation books, provides captivating histories and vibrant descriptions of America's hard-fighting birds. Dramatic, full-color photographs by aviation photographer George Hall show these aircraft at every angle. Strap into the cockpit: Feel the afterburners kick in as you shoot through the sky or swoop low to the ground on attack or rescue runs. If fighter jets catch your fancy, soar with the F-14 Tomcat,

Object ID	Title	Author	Summary
			the biggest, fastest fighter in the air. See the F-5 Tiger II, the "enemy" jet in Top Gun training exercises; take off with the awesome F-16 Fighting Falcon, the "Electric Jet"; size up the F-15 Eagle, which flies cat-and-mouse games with Soviet bombers over the Arctic, and many more. Attack jets support land troops during battle, flying low and fast on missions to knock out enemy positions. The A-4 Skyhawk packs maximum punch in minimum size. The AV-8B Harrier II jumps like a helicopter, flies like a jet, and proved its mettle in the hard-fought Falklands War. The ground-pounding A-10 Thunderbolt "Warthog" takes the worst the enemy can dish out and hits back with a 30-millimeter cannon. The A-6 Intruder and A-7 Corsair II pick up where others in this arsenal leave off. Bombers carry the war to the enemy's home front. Among others, you'll meet the B-52 Stratofortress, a proven workhorse that continually flies nuclear readiness missions. For quick strikes, the FB-111 Aardvark attacks with precision and silence, earning it the nickname "whispering death." And get the latest scoop on the "secret" B-2 "Stealth" bomber, including the last word on specifications and capabilities. Reconnaissance planes assess enemy targets before and after raids, and electronic warfare aircraft provide essential information on enemy troop movements. Count among these the SR-71 Blackbird, which set a world speed record without even trying, and the E-3 Sentry, a computer-laden eye in the sky with an incredible rotating radar dome. Air Force transports carry troops and materiel throughout the world for the armed forces. You'll meet a fascinating

Object ID	Title	Author	Summary
			array, including the C-130, which can deliver the goods through blizzards or ground fire with equal ease, and the C-5, which dwarfs other planes and is so huge you could play a full-court basketball game inside its cargo bay. Of course, no plane goes anywhere for long without refueling. Aerial tankers such as the KC-135 Stratotanker and KC-10 Extender can refuel any plane in America's flying fleet under any circumstance. Utility and attack helicopters contribute agility and immediate air support to embattled troops. This stable of helicopters — including the UH-1 Huey, which did it all in Vietnam, and the AH-64 Apache, a tough fighter that lives up to its name — is imperative for a fast, mobile Army. Supersonic vertical climbs, gut-wrenching three G turns, spine-chilling take-offs — you'll experience it all through vital statistics and scores of colorful photos. U.S. AIR POWER is your ticket to an up-close look at the action and excitement of America's flying forces. (from dust jacket flap)

2004.317.019	Combat Aircraft of World War Two	Weal, Elke C.	"Combat Aircraft of World War Two" encompasses even more than its title suggests. In addition to lighter and bomber aircraft, it includes many transport, reconnaissance, liaison and other support aircraft that played such an integral — but relatively little-recorded - part in air warfare. The book is arranged by the twenty-five countries of manufacture. (See back cover for complete listing.) Within each country, information is organized by manufacturer and model. For each aircraft there is a data listing covering details of -

Object ID	Title	Author	Summary
			- power plant - performance (including maximum speed, climb and ceiling) - weights and dimensions - armament and crew - air force division in which it served - variants (including modifications, rearmaments, licensed builders, etc.) - production figures - general remarks - design and service career. "Combat Aircraft of World War Two" also includes carefully selected Orders of Battle, enabling readers to compare the strengths of opposing air forces at specific times during the course of the war, plus a Glossary, which includes comparative unit organizations for the major air powers. Compiled from official sources and private archives, information in this book has been checked and authenticated by a team of aviation experts under the direction of J. M. Bruce, Keeper of Aircraft and Aviation Records at the Royal Air Force Museum, Hendon. ELKE C. WEAL, compiler of basic data JOHN A. WEAL, artist, renowned for his illustrations in "Aviation International" RICHARD BARKER, line drawing illustrator and Librarian of the RAF Museum (from dust jacket flap)
2004.317.020	Jet Fighters	Taylor, Michael John Haddrick	From the Messerschmitt Me 262 of 1944 to the Mach 3 Lockheed YF-12, jet fighters have been at the forefront of aviation technology. Although both Germany and Britain produced operational jet fighters in WWII, it was not until the Korean War that jet met jet in combat. The battles over the Yalu River between Sabre and MiG-15, have

Object ID	Title	Author	Summary
			been followed by bitterly fought encounters between Phantoms and MiG-21s over North Vietnam and Sinai. It is not only in combat that jet fighters have hit the headlines though. The series of crashes which dogged West Germany's Lockheed Starfighters and the defection of a top secret Soviet MiG-25 Foxbat interceptor to Japan both received widespread publicity. Includes: Contents -- Against the Odds -- The First Jet Fighters --- Farewell The Piston Strange Shapes in the Sky -- Air Power at Sea --- Century Fighters --- Into the 80s
2004.317.023	Reader's Digest Illustrated Story of World War II	Reader's Digest Association	Contents -- Pearl Harbor Tyranny on the March -- Hitler's Seizure of Europe - Mein Kampf (excerpts) Against Long Odds -- Flying Tigers - Miracle of Dunkirk, Winston Churchill, Battle of Britain, Sinking of the Bismarck, Gallant Defense of the Philippines, Douglas MacArthur, Death March from Bataan, Doolittle Bombs Tokyo, Battle of the Coral Sea, Story of Dieppe On the Island Road to Tokyo -- Midway: Turning Point in the Pacific, Action at Guadalcanal, Fighting Back in New Guinea, Tarawa Thrust and Counterthrust -- Germans Invade Russia, Erwin Rommel - The Desert Fox -- Bernard Law Montgomery, Dwight D. 2004.317.024	Seizing the Enigma	Kahn, David	Polish, British, and American cryptologists struggled feverishly to break the German u-boat codes that were helping Nazi submarine wolfpacks tear at the Allied lifeline between Britain and America. This book tells the action-packed story of how captures at sea enabled the Allies to crack these codes and prevail in the perilous game of hide-and-seek above and below the waves.
2004.317.026	Lightning Bugs and Other Reconnaissance Drones	Wagner, William	Gathering intelligence remains one of the airplane's most significant and fascinating functions. In World War I, the first military use of aircraft was in gathering information behind enemy lines on troop dispositions and in serving as forward artillery observation posts. More than six decades later the intelligence-gathering function of the airplane remained essentially the same but the technique had undergone dramatic sophistication. In the early 1960s technicians took the pilot out of the plane's cockpit, put him on the ground at an electronic black box and had him 'fly' spy missions by remotely controlling a pilotless jet airplane. Because of this advanced technique, formerly dangerous intelligence-gathering flights in hostile areas were possible without risking the lives of pilots or the loss of extremely costly manned aircraft. This then is the story of 'Lightning Bugs' and other Ryan reconnaissance drones and the contributions they made in combat in Southeast Asia. What made it possible was the can-do attitude of a small band of dedicated military and civilian technicians and the use of red-tape-cutting

Object ID	Title	Author	Summary
			techniques in response to significant international events. It's a fascinating story of QRC - quick reaction capability - which is invaluable in time of war. In addition to basic daytime aerial photo reconnaissance of `enemy' territory, the 'Lightning Bug' missions were expanded to include electronic intelligence (Elint), communications intelligence (Comint), night photo, chaff dispensing and leaflet distribution. Paralleling these wartime missions were state-side demonstrations of surface-to-surface weapons delivery, simulated air-to-air combat 'dog-fights,' and air-to-surface weapons delivery for the suppression of defense installations. The original reconnaissance missions and the additional demonstrated capabilities of unmanned aircraft were all designed to minimize the exposure of American pilots to unacceptable risks. The manuscript was written as the war in Vietnam was drawing to a troubled close but is only now being published because of years-long delay due to security and policy considerations. (from dust jacket flap:)

2004.317.031	Secrets of Inchon : The Untold Story of the Most Daring Covert Mission of the Korean War	Clark, Eugene Franklin	Amazon.com Review If Korea is America's forgotten war, Eugene Franklin Clark is certainly one of that war's least-known heroes. The Secrets of Inchon is his first-person account--written in 1953 and long forgotten in a safety deposit box--of his terrifying fortnight on a small island in North Korean-occupied Inchon harbor. Douglas MacArthur's planned invasion was as fraught with peril as it was daring.

Object ID	Title	Author	Summary
			The port, with 29-foot tides, was, at their ebb, protected by a mud-flat moat 6,000 yards wide in places. Without elaborate, accurate, first-hand information--which Clark was ordered to supply--about mines, fortifications, sea floor gradients, troop distribution, and other matters large and small, the operation (Clark likens it to a "fly deliberately planning to invade a spider's web") could easily have become "an American Dunkerque." Clark's reconnaissance included hand-to-hand gunfights, rugged interrogations, night forays in small junks, constant vigilance, exhaustingly long hours, and the cooperation of anti-Communist Koreans. The Secrets of Inchon is a commendable tale of an unfathomably obscure and daring military episode. --H. O'Billovich --This text refers to an out of print or unavailable edition of this title. From Publishers Weekly Prolific historian Fleming (The Officers' Wives, etc.) was researching an article on Inchon when he interviewed the widow of Clark, a naval officer on General MacArthur's intelligence staff who died in 1998, about his role in intelligence gathering for the amphibious landing at Inchon Harbor an operation that turned the tide of the Korean War. She in turn produced the manuscript of this book from a safe deposit box, and the result is this workmanlike yet compelling memoir, written in the early '50s, soon after Clark's return. Clark volunteered for a mission that eventually included a naval skirmish between Korean junks, a commando raid on a communist-held island to capture prisoners and free imprisoned civilians, an infantry engagement with communist infiltrators, and Clark's takeover of a harbor lighthouse to light the fleet's way for the eventual invasion. Sympathetic observations on

Object ID	Title	Author	Summary
			Korean culture are augmented by misconceptions, and extensive descriptions of tactics and reconstructed dialogue can be wearing. Yet this is a self-effacing account that openly acknowledges mistakes and misgivings, and Clark, who studied law at Princeton, learned Japanese and was eventually awarded the Silver Star, an oak leaf cluster and the Navy Cross, has considerable powers of observation that are apparent throughout. The use of "covert" in the subtitle is a bit puzzling, since the North Koreans were aware of Clark's presence in Inchon Harbor the entire time he was there, but this is a solid memoir of an important Korean War battle. 2004.317.032	Nelson the Commander	Bennett, Geoffrey Martin	Horatio Nelson, 1st Viscount Nelson, 1st Duke of Bronté, KB (29 September 1758 – 21 October 1805) was a flag officer famous for his service in the Royal Navy, particularly during the Napoleonic Wars. He was noted for his inspirational leadership and superb grasp of strategy and unconventional tactics, which resulted in a number of decisive naval victories. He was wounded several times in combat, losing one arm and the sight in one eye. Of his several victories, the best known and most notable was the Battle of Trafalgar in 1805, during which he was shot and killed. Nelson was born into a moderately prosperous Norfolk family and joined the navy through the influence of his uncle, Maurice Suckling. He rose rapidly through the ranks and served with leading naval commanders of the period before obtaining his own command in 1778. He developed a reputation in the

Object ID	Title	Author	Summary
			service through his personal valour and firm grasp of tactics but suffered periods of illness and unemployment after the end of the American War of Independence. The outbreak of the French Revolutionary Wars allowed Nelson to return to service, where he was particularly active in the Mediterranean. He fought in several minor engagements off Toulon and was important in the capture of Corsica and subsequent diplomatic duties with the Italian states. In 1797, he distinguished himself while in command of HMS Captain at the Battle of Cape St Vincent. Shortly after the battle, Nelson took part in the Battle of Santa Cruz de Tenerife, where his attack was defeated and he was badly wounded, losing his right arm, and was forced to return to England to recuperate. The following year, he won a decisive victory over the French at the Battle of the Nile and remained in the Mediterranean to support the Kingdom of Naples against a French invasion. In 1801, he was dispatched to the Baltic and won another victory, this time over the Danes at the Battle of Copenhagen. He subsequently commanded the blockade of the French and Spanish fleets at Toulon and, after their escape, chased them to the West Indies and back but failed to bring them to battle. After a brief return to England, he took over the Cádiz blockade in 1805. On 21 October 1805, the Franco-Spanish fleet came out of port, and Nelson's fleet engaged them at the Battle of Trafalgar. The battle was Britain's greatest naval victory, but during the action Nelson was fatally wounded by a French sniper. His body was brought back to England where he was accorded a state funeral. Nelson's death at Trafalgar secured his position as one of Britain's most heroic figures. Numerous monuments,

2004.317.033	Modern Fighter Aircraft	Flack, Jeremy	A fascinating display of the world's most formidable fighting machines, "Modern Fighter Aircraft" contains nearly 300 full-color photographs of the very latest fighter aircraft and combat helicopters. Many of the acknowledged classics also appear in this stunning volume, alongside unique photography from the Gulf War. (from back cover)
2004.317.034	History of Combat Aircraft, A	Ellis, Chris	The story of military aviation - of combat aircraft - is almost entirely one of the present century and this authoritative book traces that story from the very beginnings of aviation, , when man first took himself into the air for warlike reasons. The First World War gave flying a tremendous impetus, and progress in that period was incredibly swift as the slow and cumbersome early aircraft were superseded by the comparatively fast and deadly Albatross, Fokker; Sopwith and Spad fighters, bombers such as the Handle Page, Caprice and Gotha and other equally advanced machines. Military aviation between the two World Wars - a time which saw slow progress in some respects but brought the end of the biplane era and the introduction of the faster and more efficient monopolies to the air forces of the world - is fully covered. The outstanding machines of the Second World War are described, together with many of the lesser aircraft, while the jet age from the first German and British fighters to supersonic multi-purpose aircraft is discussed. "A History of Combat Aircraft" is illustrated with over 300

2004.317.038	Warships & Sea Battles of World War I	Fitzsimons, Bernard (ed)	On Nov. 21,1918, the German High Seas Fleet steamed out into the North Sea to surrender to the greatest naval force ever assembled: the British Grand Fleet, a single great column of warships 370 strong. Seven months later, most of the German ships were at the bottom of Scapa Flow, scuttled by their own crews. It was a sad end to a proud fleet. Hampered by the Kaiser's desire to maintain a 'fleet in being' it had never been in a position to challenge the numerically superior British fleet. At the same time, the great British dreadnoughts, each capable of sailing several thousand miles without refueling, had found half of the North Sea, and a third of the east coast, outside their effective zone of operation, because of an underrated new weapon -- the submarine. Here we present the story, authoritatively written and superbly illustrated, of the First World War at sea: of the mighty ships, the battles they fought, and the unrelenting struggle against the submarine. Includes: Balance of Naval Power, August 1914 -- Heligoland, The First Sea Battle Revenge at Sea: Coronel and the Falklands -- The Cruise of the Emden Dogger Bank: Clash of the Battle Cruisers -- Naval War in the Mediterranean Warships at the Dardanelles Underwater War: Techniques and Developments -- Jutland The Channel War -- The Submarine War: First Round to Germany Q-Ships: Killers in Disguise The Submarine War: A U-Boat Commander's View U-Boats: The Tide Turns -- The Otranto Barrage The Last Sortie of the High Seas Fleet

2004.317.044	American Heritage Picture History of World War II, The	Sulzberger, Cyrus Leo	From the Intro--"It began after years of screaming threats and menacing troop movements and desperate grasping for peace at almost any price. It began at a time when most Europeans had resigned themselves to its coming and most Americans seemed to agree that the best thing their country could do would be stay out of it. 'Let Europe stew in its own juices,' many people were saying. but this world war was not to be primarily a European conflict, like the one before it. This time virtually the whole world would be at war. Once started, it would quickly become the worst war in history. It lasted only six years, which is not long as history goes, but it produced the biggest armies, the longest battle lines, the most devastating weapons of any war; it inflicted more suffering, it destroyed more and cost more than nay other war. It put some seventy million people in uniform and killed perhaps as many as thirty-five million, including millions who were never in uniform; for it was also a war the slaughtered a great deal more indiscriminately than any war before it." Contents include: Introduction--March to the Abyss--Blitzkrieg--England Alone--Arsenal of Democracy--Japan Strikes--War at Sea--The War in Russia--Politics of World War--Counter Attack in the Pacific--Italy--Over Here--The Air War--The Home Fronts--Assault on Fortress Europe--Closing in on Japan--Smashing of the Third Reich--End of the Rising Sun--The Legacy.

2004.320.007	Official Chronology of the U.S. Navy in World War II, The	Cressman, Robert J.	ORDER NUMBER - NF15 - \$12.95 Ten years after the close of World War II, the U.S. Navy published a chronology of its operations in the war. Now long out of print, the work focused on what were then defined as critical and decisive events. It ignored a multitude of combat actions as well as the loss or damage of many types of U.S. ships and craft -- particularly auxiliaries, amphibious ships, and district craft -- and entirely omitted the U.S. submarine campaign against Japanese shipping. Now this greatly expanded and updated study ... goes far beyond the original work ...
2004.320.008	MiG Master : The Story of the F-8 Crusader	Tillman, Barrett	(from dust jacket flap:) Foreword by Vice Admiral James B. Stockdale, U.S. Navy (Ret.) Described as a "thoroughbred" worthy of all the care it demanded, the Chance Vought F-8 Crusader served as one of the most capable and long-lived aircraft in naval aviation history. It was designed as an air superiority fighter, a "gunfighter" armed with four 20-mm cannon rather than air-to-air missiles. Eventually the Navy adapted the Crusader to carry many other kinds of armament. It also served in other roles such as photo recce, strike, and experimental. Known for its speed, the Crusader was the first production aircraft to exceed 1000 mph in level flight. Future astronaut and senator John Glenn flew the F-8 in "Project Bullet," setting a world record for crossing North America in three hours and twenty-three minutes. The F-8 compiled a distinguished combat record in Vietnam, scoring the highest kill ratio of any U.S. fighter in the war. According to one pilot, "Every F-8 jock I knew had

Object ID	Title	Author	Summary
			one big ambition. We all wanted to bag five MiGs with our 20-millimeters, never firing a missile, then go back to Miramar and lord it over the F-4 drivers." The Crusader continues to serve today as a photo reconnaissance aircraft in the U.S. Navy, and as a fighter in the French and Philippine navies. Featured are: • a design and construction history of the F-8 • F-8 armaments • Vietnam operations, including a chapter devoted to MiG battles • extensive appendices that furnish details of F-8 deployments, pilots, and engineering • over 70 photos Barrett Tillman is a noted writer on naval aviation. His previous books include "biographies" of the Dauntless, Hellcat, Corsair, and Avenger.

2004.321.007	Revolt of the Admirals : The Fight for Naval Aviation	Barlow, Jeffrey G.	The Fight for Naval Aviation, 1945-1950 January 14, 2001 By Elizabeth R. Hatcher The subtitle of Barlow's book says it all. Post-World-War-II Baby Boomers may not know that--while they were in strollers--the seamlessly integrated sea-air fighting capacity taken for granted today in America's military nearly died on the drawing boards over five decades ago. The politicians representing the war-weary American people were naive to events presaging war in Korea and unable to foresee the kind of military the nation would need in the yet-unnamed Cold War. Ignoring military science, intent on gratifying the voters by slashing postwar military budgets, some in the Truman administration and in Congress raced to eliminate what they saw as duplication of functions in the Armed Services. Empire builders in the nascent Air Force saw their chance to propagate the simplistic notion that all military flying should be under their charge. It was even buzzed about Washington that the country might get the cheapest military of all if Army, Navy and Air Force were merged into a single service; and that atom bombs had made carriers & their planes obsolete. Barlow's carefully-researched & clearly-written book tells--with thrills & chills worthy of a spy novel--the story of how the politicians' ignorance & the generals' grandstanding came within a whisker of wrecking American naval aviation forever. In telling this important story--an object lesson to this day--Barlow has done the writer of these comments a favor: he has given meaning & substance to the dim memories of someone who watched it happen as a child. My dad was one of the Navy's first aeronautical

Object ID	Title	Author	Summary
			engineering duty officers. In the time covered by Barlow's book, he was in the guts of the Navy's research & development, working on technical adaptations such as the angled deck, the steam catapult, and the mirror landing system--developments that would make carrier-based flight under jet power feasible. Meantime, I was tasked with learning manners, which I tried to do during my parents' "at-homes" [Navy lingo for cocktail parties], by shaking hands with the likes of "Admiral [Arleigh] Burke" and "Mr. [Dan] Kimball." At one of these, I got the idea of offering for sale, to guests of this ilk, the miscellaneous bottle caps and wine stoppers that were accumulating behind the bar, much to my wondering eyes. My parents concluded I had a lot to learn about manners. I remember my dad's voice late one afternoon, a few minutes after he arrived home from the Navy Department, saying to my mom, "Dear, Jim Forrestal's dead." I remember their indignation over the morning papers as they read about the cancellation of the aircraft carrier "United States." I remember my mom's resentment that in those years Dad was usually doing two jobs for the price of one. Indeed, by May 1949, he was both Director of the Guided Missiles Division and Deputy Chief for Research & Development in the Bureau of Aeronautics. Thank you, Jeffrey Barlow: in recounting this crisis in American military history, you have also enabled one woman to identify her childhood. 6 of 7 people found the review helpful (from Amazon.com)

2004.321.012	Flying the Edge : The Making of Navy Test Pilots	Wilson, George C.	Flying the Edge is Washington Post correspondent George C. Wilson's dramatic firsthand account of a year spent "inching into the unknown" with the 100th test-pilot class at the Naval Air Test Center in Patuxent River, Maryland. Based on hours of test flights in a variety of aircraft and interviews with scores of naval and civilian test pilots and engineers at Pax River, it provides a very personal inside look at the challenges and dangers facing naval test pilots in the 1990s. The book is inscribed to Riley Mixson from the author. On page 199 there is a description of a Grumman F9F-5 Panther crash on the Midway by test pilot George C. Duncan.
2004.321.013	High Seas: The Naval Passage to an Uncharted World	Owens, William A.	Breaking with tradition, Admiral William Owens--vice chairman of the Joint Chiefs of Staff and one of the nation's foremost strategic thinkers--prescribes new roles and missions and revolutionary new ships and aircraft needed for a new Navy, and lets readers in on their planning. (from usni.org)
2004.321.014	Fleet Tactics : Theory and Practice	Hughes, Wayne P.	Filled with new and original thought, this landmark book is intended to stimulate renewed debate on fleet battle tactics, a subject scarcely addressed in unclassified literature since the beginning of this century.
2004.321.015	First to Fight: An Inside View of the U.S. Marine Corps	Krulak, Victor H.	Deftly blending history with autobiography, action with analysis, the legendary Marine general Victor "Brute" Krulak offers here a riveting insider's chronicle of U.S. Marines--their fights on the battlefield and off, and their extraordinary esprit de corps. He not only takes a close look at the Marine experience during World War II, Korea, and Vietnam--wars in which Krulak was himself a participant--but also examines the foundation on which the Corps is built. In doing so, he

Object ID	Title	Author	Summary
			helps answer the question of what it means to be a Marine and how the Corps has maintained such a consistently outstanding reputation. First to Fight has been included on the Marine Corps's recommended reading list for many years. Review First to Fight makes for wonderful reading. It is fast paced; often stirring; always informed, interesting, and enlightening. Marines will zip through it, delight in it, and wish it was far longer. -- Marine Corps Gazette A fascinating combination of memoir and study of the U.S. Marine Corps. -- Booklist General Krulak's skills as a journalist enhance the telling of his tales surrounding the Corps's history...his personal recollections add immeasurably to the book's quality. -- National Defense (from Amazon.com)
2004.321.016	Scream of Eagles : The Creation of Top Gun and the U.S. Air Victory in Vietnam	Wilcox, Robert K.	Scream of Eagles is the first true-life account of the Navy's fighter pilots in Vietnam--and how the creation of the Navy's Top Gun fighter pilot school helped to forge a dramatic victory in the Vietnam air war. It is, in large measure, a story told through the words of the Top Gun pilots themselves. The book is inscribed to an Admiral (possibly Riley Mixson who donated the book) from Captain Robert L. McLane who was retiring as commanding officer of the Navy Fighter Weapons School, NAS Miramar.
2004.321.017	Old Man's Trail, The	Campbell, Tom	This work of fiction is told from the point of view of a group of teenaged Vietnamese boys as they travel down the Ho Chi Minh Trail.
2004.321.018	United States Navy Aircraft Since 1911	Swanborough, Gordon	The core of the book describes more than 140 significant aircraft types, and each is illustrated with at least one photograph and a three-view

Object ID	Title	Author	Summary
			line drawing. Also, included in the description are the squadrons that flew the plane. A section is devoted to those aircraft procured for service but of less significance, while appendices cover foreign aircraft, gliders, balloons, and airships. There is a comprehensive index. Several pages are devoted to aircraft designations, aircraft colouring (coloring) , and markings of US Naval Aircraft. Library also has 1st and 2nd editions.
2004.321.020	Illustrated History of Seaplanes and Flying Boats, An	Allward, Maurice	Inscribed to Riley Mixson from Jan Norris. In this heavily illustrated book, Maurice Allward records the history or a unique period in the story of aviation. For a brief period of forty years, the flying boat and its smaller counter-part, the float plane, were a familiar sight of the flying scene. Without the need for runways, the great flying boats pioneered the air routes of the world in peace, and roved the oceans protecting shipping in time of war. It was a float plane, the famous Supermarine S6Bm which won the Schneider Trophy outright for Britain and proved to be the test-bed for the magnificent Spitfire of World War II. Maurice Allward, himself a pioneer in this era, tells the story with great enthusiasm and illustrates the test with many rare photographs.
2004.321.021	CV : Carrier Aviation	Garrison, Peter	Stand by! Cat two! All F-14s will be going to military power off cat two. Cat four, four eleven, stand by! Four eleven airborne! One sixteen airborne! Three zero zero airborne! The airplanes follow one another into the air at intervals, like bullets from some slow-firing gun. A fascinating book to the uninitiated civilian and to the naval aviator as we the book is an understandable primer on the complexities of operating 35-ton aircraft from a short steel deck at sea. To the latter, CV puts carrier operations in a

Object ID	Title	Author	Summary
			new perspective -- and almost poetic. This is an absolutely marvelous volume, the perfect gift for any to understand and appreciate modern carrier operations. (from back cover)
2004.321.022	Maritime Strategy, Geopolitics, and the Defense of the West	Gray, Colin S.	Maritime Strategy, Geopolitics, and the Defense of the West is a timely and hard-hitting examination of American national security policy and Western defense strategy. Colin S. Gray illustrates the landpower-seapower contest that underlies the Soviet-American postwar rivalry, and posits a geopolitical analysis of the current defense debate between advocates of "maritime strategy" and supporters of a "coalition defense." The result is a stimulating evaluation of contemporary strategic choices in the tradition of such geopolitical theorists as Halford Mackinder and Nicholas Spykman. Gray acknowledges the renaissance in maritime strategy that has characterized the doctrine and force planning of the US Navy in the 1980s. He argues that maritime and continental strategies are complementary rather than competitive, and that all Western conventional military options depend upon a sufficient strategic nuclear counterdeterrent. The author maintains that the United States, as the leader of a multilateral maritime alliance, must secure working command of the world's oceans in order to prosecute any feasible allied defense design on land. Western preponderance at sea, with the attendant ability to maneuver military power at times and in places of Western choosing, should be considered the key to a successful Western defense posture. Gray also emphasizes that seapower can be decisive only in conjunction with continental defense, applied

Object ID	Title	Author	Summary
			for the distraction and attrition of the main strength of a landpower enemy. Maritime Strategy, Geopolitics, and the Defense of the West clarifies the essential issues driving various defense strategies in recent years. Overall, the author provides a geopolitical frame of reference for a disciplined consideration of US and allied defense policy tailored to the realities of the late 1980s. ABOUT THE AUTHOR Dr. Colin S. Gray studied at the universities of Manchester and Oxford, and has taught at various universities in the United Kingdom and Canada. He was Assistant Director of the International Institute for Strategic Studies, and was Director of National Security Studies at the Hudson Institute. Since 1981 Dr. Gray has been President of the National Institute for Public Policy in Fairfax, Virginia. His publications include: Strategic Studies and Public Policy: The American Experience (1982); American Military Space Policy (1983); and Nuclear Strategy and National Style (1986). Dr. Gray recently concluded a major study of Geopolitics, Strategic Culture, and National Security, and is currently working on studies of strategy and the relationship between seapower and landpower. NATIONAL STRATEGY INFORMATION CENTER, INC., 150 E. 58TH ST., NEW YORK, NY 10155 (from back cover)
2004.321.031	Cutting Edge, The	Heatley, C. J. (Charles James)	Photographer and F-14 pilot C. J. Heater Heatley III's new book captures the sights and sensations of naval aviation in photographs as unusual as the perspective from which they were taken. Shot from the cockpit of an F-14 and the flight deck of a carrier by a

Object ID	Title	Author	Summary
			pilot with more than 4000 flight hours and 600 carrier landings to his credit, this unique collection of full-color images allows even those who have never flown an aircraft to experience the drama, excitement, and sophistication of modern naval aviation. This books was presented to Rear Admiral Riley D. Mixson, Director, Air Warfare, presented by N88 staff 16 November 1993. It is signed by 19 of his staff members.
2004.321.054	Midway Magic - 1999	San Diego Aircraft Carrier Museum	Promotional video for the proposed San Diego Aircraft Carrier Museum aboard the USS Midway (CV-41); an earlier version (1998) was narrated by Cliff Robertson. No credit is given for the narrator of this version. Shows historical stills in both color and black and white of the USS Midway and San Diego. Shows artist conception of the Midway Museum including tour stops and expected highlights of the museum. Shows simulated Navy Pier view of Midway at Harbor Drive. Includes Midway Magic contact information. Shows computer simulation of views from the Sprague Memorial, the Aircraft Carrier Memorial, and the Embarcadero.
2004.321.154	Naval Aviation 1911-1986 : A Pictorial Study	Russell, Sandy (ed)	This books is not intended to be an in-depth treatment of Naval Aviation history, but rather a short visual monograph designed to capture the essence. There are several good pictures of women in the Navy: photo of a Wave tearing down an aircraft engine, first female Naval Aviator, Barbara Ann Allen, a woman preflighting a helicopter, and the first woman graduate of the U.S. Naval Test Pilot School. P. 60 has a picture of the first black Naval Aviator, Jesse L. Brown. P. 70 has a picture of pilots who scored the first MiG kills in Vietnam (from the Midway). Also on P. 70 is a picture of the V/STOL making its first carrier landings aboard the Bennington off San Diego.

Object ID	Title	Author	Summary
2004.321.155	Kaman : Our Early Years	Kaman, Charles H.	The book is inscribed to Riley Mixson from Charlie Kaman, the author. This book describes the first 40 years of Kaman Corporation.
2004.321.157	How OSD Uses Cost Performance Data	Abba, Wayne	This video is a presentation by Wane Abba to the Executive Council of McDonnell Douglas Aircraft. It was given on 21 August 1992. Mr. Abba was employed at the Office of the Under Secretary for Defense. His responsibility was to implement Cost Schedule Control System Criteria (CSCSC or sometimes referred to as CS squared). Today the term is Earned Value Management System (EVMS). In the presentation, Mr. Abba explains how CSCSC data is used by senior management at the Department of Defense (DOD).
2004.321.158	T45TS - T-45 Training System	Boeing Aircraft Company	This appears to be a promotional video from the manufacturer of the training system. The T45TS training system covers five components: the T-45 Goshawk aircraft, flight simulators, computer-assisted instructional programs, a training system, and a logistics support package. The T-45A Goshawk built by McDonnell Douglas (now Boeing) is a tandem-seat, carrier capable, jet trainer whose mission is to train Navy and Marine Corps pilots. The T-45A aircraft, the Navy version of the British Aerospace Hawk aircraft, is used for intermediate and advanced portions of the Navy/Marine Corps pilot training program for jet carrier aviation and tactical strike missions. The T-45A has replaced the T-2 Buckeye trainer and the TA-4 trainer with an integrated training system that includes the T-45A Goshawk aircraft, operations and instrument fighter simulators, academics, and training integration system. There are two versions of T-45 aircraft currently in operational use at this time, the T-45A

Object ID	Title	Author	Summary
			and T-45C derivatives. The T-45A, which became operational in 1991, contains an analog design cockpit while the new T-45C (began delivery in December 1997) is built around a new digital "glass cockpit" design.
2004.321.159	USS Midway Museum - KFMB News - 7 Nov 1995	KFMB. San Diego.	A DVD copy is available 2004.321.178. This video is a recording of the 11-7-95 - 6:30 p.m. News from KFMB. It was provided by News Monitoring Services and cannot be used for commercial purposes. The subject of a Midway Museum is introduced by Hal Clement. Alan Uke speaks about bringing the Midway to San Diego. He hopes the museum can be opened by 1998. There is a painting of the Midway behind Uke. There is video of people visiting the Midway, video of the decommissioning, and video of one of the elevators going up. Several tourists are asked about the museum, and all the responses are positive as is the entire news segment.
2004.321.160	Midway Magic - 1998	San Diego Aircraft Carrier Museum	A DVD copy of this video is available 2004.321.179. Promotional video for the proposed San Diego Aircraft Carrier Museum aboard the USS Midway (CV-41); this version narrated by Cliff Robertson; no website address given. Shows historical stills in both color and black and white of the USS Midway and San Diego. Shows the Star of India under sail, Sea World and the Zoo. Shows artist conception of the Midway Museum including tour stops and expected highlights of the museum. Shows simulated Navy Pier view of Midway at Harbor Drive. Dated July 4, 1998. Includes Midway Magic contact information. Shows computer simulation of views from the street from North Harbor Dr., South Harbor Drive, and Broadway.
2004.321.161	Lady Lex	None Stated	
2004.321.162	United States. Navy. Light Attack Squadron 22 (VA-22)	None Stated	Change of Command for the VA-22, Fighting Redcocks,

Object ID	Title	Author	Summary
	- Change of Command - 9 August 1990		Lemoore, CA; 9 August 1990, RADM Riley D. Mixson Guest Speaker. The video appears to be recorded on a hand held camera as there is a lot of motion. The picture quality is not good, but the audio is very good. Unfortunately, there are several areas where the video/audio are lost. Outgoing CO of the Redcocks, CDR Dale M. Doorly introduces the guest speak, RADM Riley "Hawk" Mixson who is currently commander carrier group two aboard the USS John F. Kennedy. Mixson's remarks include the need for a strong military. Mixson presents Doorly with an award for outstanding leadership of the squadron. Doorly speaks of some of the history of the Redcocks. He reads his orders, then his successor, CDR G. Robert Darwin reads his orders. There are some scenes of guests in the hanger. Also, a final scene of a plane assigned to VF-114 with an aardvark and USS Lincoln on it.
2004.321.163	USS Kitty Hawk (CV-63) '71 : VA-195 Dambusters	None Stated	A DVD copy is available at 2004.321.181. This is a poor quality video--at times it is jerky. The color during the bombing scenes are washed out. It appears to be an amateur video taken of VA-195, the Dambusters on the December 70 -June 1971 Vietnam cruise aboard the USS Kitty Hawk, CV -63. The sound is good. The video has a label with the name and address of John Blandford of Redondo Beach, CA. Segments include: 1) Planes landing and taking off of the Kitty Hawk. Sound track is Neil Diamond's Skybird. 2) Scenes on flight deck, sailor sunbathing, LCDR Mike Boston, LT. Don Beus, at 4:32 a pilot comically trying to get

Object ID	Title	Author	Summary
			into the cockpit, at about 6:00, LCDR Riley Mixson--all are with VA-195 Dambusters--other pilots were hard to identify. Plane side numbers include 410, 407, 605, 214, and 411. 3) At about 9:40 cat shots 4) At about 11:56 aerial shots of A-7 planes and some bombing runs. Sound track is Cat Steven's Peace Train 5) Riley Mixson speaking?? at about 17:00 then more bombing 6) At about 23:00 Lt. Bob Carsten in side number 411. Sound track Credence Clearwater Revival's Feelin Blue 7) At about 25 side number 412. Sound track Neil Diamond's Cracklin Rosie. 8) At about 26 LCDR Mike Boston in side number 407.
2004.321.165	USS Midway (CV-41) - Change of Command - 10 April 1987	USS Midway	A DVD copy is at 2004.321.183. This video donated by Riley Mixson who was Captain of the Midway 1985-1987. It includes: Change of Command, Brief inspection of MARDET, Farewell party at Atsugi O'Club. The video was shot on 10 April 1987 and begins with the Change of Command. There are scenes of Hangar Bay One, MARDET color guard presents and retires colors, and Chaplain CDR P. Murphey gives the convocation and benediction. Capt. Riley D. Mixson the outgoing captain introduces RADM Dennis M. Brooks, CARGRU 5, Combat for 7th Fleet. Adm. Brooks awarded Capt. Mixson the Legion of Merit (his second) with Gold Star. There were comments by Mixson (in really bad Japanese). Incoming Capt. Richard A. Wilson reads his orders. AVCM R. L. Eisen CMC presented commissioning pennant to Capt. Mixson. Another segment shows the arrival of principals and wives by Captain's ladder and a brief inspection of MARDET. There is a parade of colors, and "Kimigaio" (the unofficial Japanese National Anthem).

Object ID	Title	Author	Summary
			View of assembled officers & wives " one lady politely yawning." The last segment shows the "Farewell" (Hail and Farwell) at Atsugi O'Club with "various skits." One skit is of a "Russian Spy" with irreverent portrayal of shipboard life, commented on by two "Russian" spies, Ivan and Boris. Longer Summary: There are three segments to this video. First is the Change of Command beginning with the Parade of Colors. The video is has wavy lines, but the audio is very good. The second part is the Change of Command with the entry of Mrs. Mixson, Mrs. Wilson, Capt. Wilson, Capt. Mixson, and RADM Brooks. The audio on this segment is not very good, and the video is mostly of the people in the audience. The third part is of the dinner entertainment. Part 1: Begins with the Parade of Colors, the national anthem of Japan and the national anthem of the United States, and the Invocation by Chaplain Murphey. Capt. Mixson welcomes guests (including a phrase in Japanese) then introduces the men on the platform and the main speaker, his boss, RADM Dennis M. Brooks, Commander of Battle Force 7th Fleet, Carrier Strike Force 7th Fleet and Carrier Group 5. Brooks told a joke about a Captain of an aircraft carrier and a Seaman of the Coast Guard. He gave a short history of the USS Chesapeake and James Barron. He praised Capt. Mixson's accomplishments citing his overseeing the modifications to the ship for the Hornets and the Midway having the highest retention rate of all carriers in the Pacific fleet. Brooks closed with a poem from Edna St. Vincent Millay "Make Bright the Arrows.

Object ID	Title	Author	Summary
			At about 30 min, Brooks presents Mixson with the Legion of Merit with gold star for his command of the Midway. At about :32 Mixson speaks. He speaks Japanese at least four times. At about :44 Mixson closes. He is presented with the pennant that flew over the Midway during his command by Master Chief Petty Officer AVCM R. L. Eisen. Captain Mixson reads his orders, then Captain Wilson reads his orders and gives a very short speech. Benediction by Chaplain Murphey at about :48. Part 2: At about :51 the video shows the Captains and their wives arriving, and parts of the Change of Command. Part 3: At about 1:12 a skit is shown. This is obviously after a dinner. The skit ends around 1:34, and Capt. and Mrs. Mixson go onstage to receive gifts.
2004.321.166	USS Midway (CV-41) - Captains Calls - 1985 v.2	USS Midway	A DVD copy of this video is available. This video donated by Riley Mixson who was Captain of the Midway 1985-1987. It includes: Change of Command, Engineering Tours and Supply tours. Captains call 1 - Included are Change of Command 22 June 1985 - Captain Pat Kober (Harry P. Kober) to Staff of CincPacFlt in Hawaii. Captain Kober awarded Legion of Merit--he praises XOs C. Flack Logan and WTT Hood. Capt. Kober introduces Capt. Riley Mixson at Captains call. Mixson gives his bio: light attack pilot (A-4, A-7), two cruises in Vietnam; praises Midway performance and high first impression of crew. Change of Command in

Object ID	Title	Author	Summary
	Command 27 Jun 91		Command 27 June 91. RADM Riley Mixson is relieved by RADM James A. Lair. The ceremony took place on the USS America (CV-66). The National Anthem is sung by Capt. Don Schramm who served as the Midway's AIMD officer in 1985. VADM John Kenneth Ready, commander, Navy Air Force, U.S. Atlantic Fleet gave a speech. He praises the US Navy and RADM Mixson for their actions in the Persian Gulf War. He gives many statistics. Adm. Ready then presents Mixson with the Distinguished Service Medal for his achievements as Commander of Carrier Group Two (COMCARGRU-2) during the Persian Gulf War. RADM Mixson speaks for about 11 minutes about the Persian Gulf War and then reads his orders. RADM James A. Lair (Jim Lair) then reads his orders and gives a short speech. Lair recognizes specific sailors and airmen for their role in the Gulf War. RADM Mixson says the video is dedicated to his mother who could not be present at the ceremony. Captain Don Schramm then sings This is My Country. There is a very short prayer and the Navy Hymn.

Shows historical stills in both color and black and white of the USS Midway and San Diego. Shows the Star of India under sail, Sea World and the Zoo. Shows artist conception of the Midway Museum including tour stops and expected highlights of the museum. Shows simulated Navy Pier view of Midway at Harbor Drive. Dated July 4, 1998. Includes Midway Magic contact information. Shows computer simulation of views from the street from North Harbor Dr., South Harbor Drive, and Broadway.
2004.321.180	United States. Navy. Carrier Group Two - Change of Command 27 Jun 91	None Stated	This is a DVD copy of the vhs. Comgru Two Change of Command 27 June 91. RADM Riley Mixson is relieved by RADM James A. Lair. The ceremony took place on the USS America (CV-66). The National Anthem is sung by Capt. Don Schramm who served as the Midway's AIMD officer in 1985. VADM John Kenneth Ready, commander, Navy Air Force, U.S. Atlantic Fleet gave a speech. He praises the US Navy and RADM Mixson for their actions in the Persian Gulf War. He gives many statistics. Adm. Ready then presents Mixson with the Distinguished Service Medal for his achievements as Commander of Carrier Group Two (COMCARGRU-2) during the Persian Gulf War. RADM Mixson speaks for about 11 minutes about the Persian Gulf War and then reads his orders. RADM James A. Lair (Jim Lair) then reads his orders and gives a short speech. Lair recognizes specific sailors and airmen for their role in the Gulf War. RADM Mixson says the video is dedicated to his mother who could not be present at

Object ID	Title	Author	Summary
			the ceremony. Captain Don Schramm then sings This is My Country. There is a very short prayer and the Navy Hymn.
2004.321.181	USS Kitty Hawk (CV-63) '71 : VA-195 Dambusters	None Stated	This is a DVD copy of a poor quality video--at times it is jerky. The color during the bombing scenes is washed out. It appears to be an amateur video taken of VA-195, the Dambusters on the December 70 -June 1971 Vietnam cruise aboard the USS Kitty Hawk, CV -63. The sound is good. The video has a label with the name and address of John Blandford of Redondo Beach, CA. Segments include: 1) Planes landing and taking off of the Kitty Hawk. Sound track is Neil Diamond's Skybird. 2) Scenes on flight deck, sailor sunbathing, LCDR Mike Boston, LT. Don Beus, at 4:32 a pilot comically trying to get into the cockpit, at about 6:00, LCDR Riley Mixson--all are with VA-195 Dambusters--other pilots were hard to identify. Plane side numbers include 410, 407, 605, 214, and 411. 3) At about 9:40 cat shots 4) At about 11:56 aerial shots of A-7 planes and some bombing runs. Sound track is Cat Steven's Peace Train 5) Riley Mixson speaking?? at about 17:00 then more bombing 6) At about 23:00 Lt. Bob Carsten in side number 411. Sound track Credence Clearwater Revival's Fellin Blue 7) At about 25 side number 412. Sound track Neil Diamond's Cracklin Rosie. 8) At about 26 LCDR Mike Boston in side number 407.
2004.321.182	United States. Navy. Light Attack Squadron 22 (VA-22) - Change of Command - 9 August 1990	None Stated	This is a DVD copy of VHS 2004.321.162. Change of Command for the VA-22, Fighting Redcocks, Lemoore, CA; 9 August 1990, RADM Riley D. Mixson Guest Speaker. The video appears to be recorded on a hand held

Object ID	Title	Author	Summary
			camera as there is a lot of motion. The picture quality is not good, but the audio is very good. Unfortunately, there are several areas where the video/audio are lost.
			Outgoing CO of the Redcocks, CDR Dale M. Doorly introduces the guest speak, RADM Riley "Hawk" Mixson who is currently commander carrier group two aboard the USS John F. Kennedy. Mixson's remarks include the need for a strong military.
			Mixson presents Doorly with an award for outstanding leadership of the squadron.
			Doorly speaks of some of the history of the Redcocks. He reads his orders, then his successor, CDR G. Robert Darwin reads his orders.
			There are some scenes of guests in the hanger. Also, a final scene of a plane assigned to VF-114 with an aardvark and USS Lincoln on it.
2004.321.183	USS Midway (CV-41) - Change of Command - 10 April 1987	USS Midway	This is a DVD copy of 2004.321.165. This video donated by Riley Mixson who was Captain of the Midway 1985-1987. It includes: Change of Command, Brief inspection of MARDET, Farewell party at Atsugi O'Club. The video was shot on 10 April 1987 and begins with the Change of Command. There are scenes of Hangar Bay One, MARDET color guard presents and retires colors, and Chaplain CDR P. Murphey gives the convocation and benediction. Capt. Riley D. Mixson the outgoing captain introduces RADM Dennis M. Brooks, CARGRU 5, Combat for 7th Fleet. Adm. Brooks awarded Capt. Mixson the Legion of Merit (his second) with Gold Star. There were comments by Mixson (in really bad Japanese). Incoming Capt. Richard A. Wilson reads his orders. AVCM R. L. Eisen

Object ID	Title	Author	Summary
			CMC presented commissioning pennant to Capt. Mixson. Another segment shows the arrival of principals and wives by Captain's ladder and a brief inspection of MARDET. There is a parade of colors, and "Kimigaio" (the unofficial Japanese National Anthem). View of assembled officers & wives " one lady politely yawning." The last segment shows the "Farewell" (Hail and Farwell) at Atsugi O'Club with "various skits." One skit is of a "Russian Spy" with irreverent portrayal of shipboard life, commented on by two "Russian" spies, Ivan and Boris. Longer Summary: There are three segments to this video. First is the Change of Command beginning with the Parade of Colors. The video is has wavy lines, but the audio is very good. The second part is the Change of Command with the entry of Mrs. Mixson, Mrs. Wilson, Capt. Wilson, Capt. Mixson, and RADM Brooks. The audio on this segment is not very good, and the video is mostly of the people in the audience. The third part is of the dinner entertainment. Part 1: Begins with the Parade of Colors, the national anthem of Japan and the national anthem of the United States, and the Invocation by Chaplain Murphey. Capt. Mixson welcomes guests (including a phrase in Japanese) then introduces the men on the platform and the main speaker, his boss, RADM Dennis M. Brooks, Commander of Battle Force 7th Fleet, Carrier Strike Force 7th Fleet and Carrier Group 5. Brooks told a joke about a Captain of an aircraft carrier and a Seaman of the Coast Guard. He gave a short history of the USS Chesapeake and James Barron. He praised Capt. Mixson's accomplishments

Object ID	Title	Author	Summary
			citing his overseeing the modifications to the ship for the Hornets and the Midway having the highest retention rate of all carriers in the Pacific fleet. Brooks closed with a poem from Edna St. Vincent Millay "Make Bright the Arrows. At about 30 min, Brooks presents Mixson with the Legion of Merit with gold star for his command of the Midway. At about :32 Mixson speaks. He speaks Japanese at least four times. At about :44 Mixson closes. He is presented with the pennant that flew over the Midway during his command by Master Chief Petty Officer AVCM R. L. Eisen. Captain Mixson reads his orders, then Captain Wilson reads his orders and gives a very short speech. Benediction by Chaplain Murphey at about :48. Part 2: At about :51 the video shows the Captains and their wives arriving, and parts of the Change of Command. Part 3: At about 1:12 a skit is shown. This is obviously after a dinner. The skit ends around 1:34, and Capt. and Mrs. Mixson go onstage to receive gifts.

2004.323.008	Carrier : A Guided Tour of an Aircraft Carrier	Clancy, Tom	They are floating cities with crews of thousands. They are the linchpins of any military strategy, for they provide what has become the key to every battle fought since World War I: air superiority. The mere presence of a U.S. naval carrier in a region is an automatic display of strength that sends a message no potential enemy can ignore. Now, Tom Clancy welcomes you aboard for a detailed look at how these floating behemoths function. With his trademark style and eye for detail, Clancy brings you naval combat strategy like no one else can. Carrier includes: * Takeoffs and landings: flying into the danger zone * The aircraft onboard: their range, their power, their weaponry * The role of the carrier in modern naval warfare * Exclusive photographs, illustrations and diagrams Plus: An interview with the U.S. Navy's Chief of Naval Operations, Admiral Jay Johnson (from Amazon.com)

Object ID	Title	Author	Summary
2004.323.009	First Hellcat Ace, The	McWhorter, Hamilton III	Mac McWhorter was a naval aviation cadet undergoing training when Pearl Harbor was attacked. After earning his wings IN 1942 he was trained as a fighter pilot in the F-4F Wildcat and then later to the Grumman F6F Wildcat--the fighter the US Navy would use to crush Japanese air power during the long offensive from the Southwest Pacific to the shores of Japan. From mid 1943, he was constantly engaged in the unforgiving and deadly aerial warfare that characterized the battles against Imperial Japan. His fifth aerial victory, in November 1943 off Tarawa Atoll, made him the first ace in the Hellcat, and seven subsequent victories ensured his place in the annals of air-to-air combat.
2004.323.010	Jane's War at Sea	Ireland, Bernard	"Jane's Fighting Ships" has been published annually since 1897. To mark the centenary of this title, this edition reviews the full range of technological developments charted in the pages of this publication, from the beginning of the 20th century, when Britain was the world's greatest naval power, through the World Wars and into the long era of American maritime supremacy. It also reveals the latest ideas in warship construction: radical designs which may make many of today's warships as obsolete as the Victorian Royal Navy's battleships originally described by "Fighting Ships" founder, Fred T. Jane. Publication Date: November 7, 1997 (from Amazon.com)
2004.323.011	Battle of Midway, The	McGowen, Tom	A short photographic tale of the Battle of Midway. Admiral Nimitz said, "Midway was the most crucial battle of the Pacific War, the engagement that made everything else possible".
2004.323.012	Flight : 100 Years of Aviation	Grant, R. G.	From the early pioneers to the latest spaceflight technology, this groundbreaking book

Object ID	Title	Author	Summary
			charts the inspirational story behind humankind's conquest of the skies. In the 100 years since the Wright brothers' first powered flight, aviation has witnessed many memorable events. From record-breaking flights and aerial warfare, to advances in aircraft design and the race for space, Flight covers the most memorable moments in the history of aviation. Describing the feats of the brave men and women who piloted the early flying machines, to the pioneers of long-distance flight and the test pilots who ushered in the jet age, Flight is a gripping narrative of humankind's quest to conquer the skies and explore space. Loaded with spectacular full-color photographs, dramatic first-hand accounts, and fact-filled profiles on a huge range of aircraft, this is an enthralling account of a century of innovation and adventure. Publication Date: September 1, 2002
2004.323.014	Whistling Death: The Test Pilot's Story of the F4U Corsair	Guyton, Boone T.	(from schifferbooks.com:) Whistling Death is the true story, by the test pilot, of the rush to produce the F4U Corsair, the Navy fighter that brought America air superiority over the Japanese Zero in World War II. Here is the crash program - complete with crash landings - powered by the dedicated men and women of the home front who designed and built this revolutionary, tide-turning airplane. Boone T. Guyton, an experimental test pilot at Chance Vought during and after World War II, flew 105 types of aircraft in 45 years as a pilot.
2004.323.015	Vulture's Row : Thirty Years in Naval Aviation	Gillcrist, Paul T.	This book is a series of true stories about U.S. Navy carrier aviation from the perspective of the author, a Navy pilot who spent thirty-three years directly involved in that profession. The thread of stories follows the author's career in chronological sequence, in

2004.323.016	Vietnam War, 1956-1975, The	Wiest, Andrew A.	various venues throughout the Navy. (from ospreypublishing.com:) About this book The Vietnam War was arguably the most important event, or series of events, of the American Century. America entered the brutal conflict certain of its Cold War doctrines and certain of its moral mission to save the world from the advance of communism. As this book explains, however, the war was not at all what the United States expected. Outnumbered and outgunned the North Vietnamese and Viet Cong forces resorted to a guerrilla war based on the theories of Mao Zedong of China. This was war reduced to its most basic level - find the enemy and kill him. Contents Introduction · Chronology · Background to war: The Cold War · Warring sides: Superpower versus guerrilla forces · Outbreak: An undeclared war · The fighting: Battles of attrition · Portrait of a soldier: John Young · The world around war: A nation divided · Portrait of a civilian: Kim Herzinger · How the war ended: US withdrawal · Conclusion and consequences: Legacies of victory and defeat Paperback; November 2002; 96 pages; ISBN: 9781841764191
2004.323.017	Gulf War 1991, The	Finlan, Alastair	(from ospreypublishing.com:) About this book The Gulf War of 1991 heralded a new type of warfare that was characterised by astonishing speed and high technology with remarkably low numbers of casualties amongst the coalition forces. Just under a million coalition personnel were deployed to the Gulf region to face a variety of threats from extreme temperatures to weapons of mass destruction (biological, chemical and

Object ID	Title	Author	Summary
			suspected nuclear) and a formidable Iraqi occupation force. This book assesses the defensive Operation Desert Shield (the build up of coalition forces) and the offensive Operation Desert Storm (the liberation of Kuwait) as well as the key personalities on both sides. Contents Introduction · Chronology · Background to war: The origins of the Gulf War· Warring sides: Iraq and the coalition forces · Outbreak: Saddam invades Kuwait · The fighting · Portrait of a soldier: Lieutenant Alex Vernon, 24th Infantry Division (Mechanised)· The world around war · Portrait of a civilian: Dina's story · How the war ended · Conclusion and consequences: Casualties · Further reading · Index Paperback; May 2003; 96 pages; ISBN: 9781841765747

2004.323.018	Aircraft Carriers	Green, Michael	Even for nonmilitary buffs, the power and massive lines of aircraft carriers inspire awe. Now readers can get a close-up look at these behemoths in this lavishly illustrated volume. It tells the story of the development of these immense vessels, describes their technological and military history, and profiles the carriers-and the planes that fly from them-that roam the oceans today. With more than 150 black-and-white and color pictures, including images of early prototypes, this is an invaluable reference. About the Author Michael and Gladys Green are freelance writers, researchers, and photographers who specialize in military, transportation, and law enforcement subjects, with over 50 books to their credit. Their previous works include Hummer, Tiger Tanks, SWAT Teams, Patton's Tank Drive, MacArthur in the Pacific, Motorcycle Police, Bomb

2004.323.028	Air War in the Gulf 1991	Chant, Christopher	In August 1990 Saddam Hussein's Iraqi forces invaded and occupied the small Arab state of Kuwait. This book analyses the ensuing Gulf War (16 January - 28 February 1991) - a war fought to expel Iraq and restore Kuwaiti independence if not, as one British MP tartly observed, to defend democracy. The allies under General Schwarzkopf launched five weeks of air attacks, deploying 1,800 technologically highly advanced aircraft from the US, British, French and Saudi air forces. Many of these machines, including the British Tornados and US F-117A Stealth fighters, had never before engaged in combat, and their combined assault, watched by millions on TV, combined impressive accuracy with firepower to which the Iraqi forces had no answer. Contents * Iraq's invasion of Kuwait * UN Coalition and pre-war developments * High-tech Air War * Analysis * Aftermath Paperback; September 2001; 96 pages; ISBN: 9781841762951 (from ospreypublishing.com)
2004.323.029	US Navy F-4 Phantom II Mig Killers 1965-1970	Elward, Brad A.	(from ospreypublishing.com:) About this book For every American fighter pilot involved in the Vietnam War, the ultimate goal was to 'kill a MiG'. In eight years of conflict 43 Vietnamese Peoples Air Force aircraft were claimed by US Navy and US Marine Corps Phantom II crews, and one single ace crew

Object ID	Title	Author	Summary
			produced. Navy Phantom IIs scored the first kills of the Vietnam War, in April 1965, as well as scoring the last in January 1973. This volume charts the successes of the navy fighter crews as they encountered 'MiGs, Missiles and AAA' over the jungles of North Vietnam. Summary by Marty Vehanen: Front Cover: On 17 June 1965, US Navy F-4Bs from VF-21 succeeded in shooting down the first MIGs to be officially credited to American pilots in the Vietnam War. Six Phantom IIs had launched from USS Midway (CVA-41) on a TARCAP (Combat Air Patrol over the Target Area) mission as part of a 14-aircraft strike package of A-4 Skyhawks and F-4Bs sent to bomb the Thanh Hoa bridge – a key strategic target for the duration of the Rolling Thunder campaign. The two Phantom IIs best placed to intercept Vietnamese fighters were 'Sundowner 101' and '102' (BuNos. 151488 and 152217), flown by VF-21's CO, CDR Leo Page, with Lt. John C. Smith as his Radar Intercept Officer (RIO), and Lt Jack E D Batson and RIO LCDR Robert Doremus, respectively. The pilot of Sundowner 102 describes the intercept, attack, and downing of the MIG in detail. About half of the missions that were being flown at this time were Rolling Thunder strikes. Briefing was in the Air Intelligence Center as usual about two hours before launch. The aircraft were launched, made a running rendezvous with the KA-3 tankers about 75 miles from the ship, and proceeded to their search area in the vicinity of Ninh Dinh, northwest of Thanh Hoa. Using their powerful radar to look northward for targets, they listened to the strike group arrive on target, carry out their mission, and depart. The author describes in detail the intercept, attack and downing of the MIG. When they were below bingo

Object ID	Title	Author	Summary
			fuel, they headed back to Midway. Along the way, they were offered refueling, but declined. The pilot (CDR Lou Page) was escorted up to the Flag Bridge where he was congratulated by Secretary of the Navy Nietze. The first two F-4 kills of the war were a proud moment for the Navy, although they tended to prolong the thought that the Phantom II could be successfully employed against the MIG without dogfighting. The incident, after all, was a classic non-maneuvering intercept for which the Demon and early Phantom crews had trained. As a postscript to this action, Lt Dave Batson was finally awarded a second MIG kill from this engagement some 32 years later following the declassification of document relating to the 17 June shoot down. Shortly after the engagement the two VF-21 crews had heard that only one of the four MIGs they had encountered had returned to base. The official documentation, and the backing of Batson's second kill theory by his then Carrier Air Group (CAG) CO, CDR Bob Moore, was enough for the third MIG to be officially destroyed. Several pages in this article illustrate the pilots, planes, landings, and aircrews

2004.323.030	F-8 Crusader Units of the Vietnam War	Mersky, Peter B.	(from ospreypublishing.com:) About this book Known to its pilots as the 'last of the gunfighters' due to its quartet of Colt-Browning Mk 12 20 mm cannon, the F-8 Crusader was numerically the most popular fighter in the US Navy at the start of America's involvement in the Vietnam conflict in 1964 – some 482 F-8C/D/Es equipped 17 frontline units. It enjoyed great success against North Vietnamese Mig-17s and Mig-21s during the Rolling Thunder campaign of 1965-68, officially downing 18 jets, which represented 53 per cent of all Mig claims lodged

Contents * First Engagement * Setting Things Up * Making a War * Action in the Tonkin Gulf * War Begins in Ernest * MiG Killers * Assessing the Enemy * Beyond the MiGs * 'Leatherneck' Crusaders, 1965-68 * Final Word Paperback; August 1998; 116 pages; ISBN: 9781855327245
			(from ospreypublishing.com:) About this book In 1941 the US Navy had 17 battleships - of which eight would be knocked out on the first day of the war - four aircraft carriers, and about 340,000 men including reservists. Pearl Harbor so weakened it that it was unable to prevent the Japanese capture of the Philippines and a vast sweep of Pacific islands. By 1945 it was the strongest navy the world had ever seen, with nearly 100 carriers, 41,000 aircraft and 3.3 million men; the unrivaled master of air-sea and amphibious operations, it was poised to invade Japan's home islands after reducing her fleet to scrap and her Pacific empire to impotence and starvation. This extraordinary story is illustrated here with dramatic photos, and nine meticulous colour plates showing a wide range of USN uniforms. Contents Uniforms: blues, whites, dungarees, khakis, greyly, flying greens; foul weather, flight deck crew, aircrew, Coast Guard, WAVES, frogmen, SeaBees, Hospital Corpsmen - Insignia: rank rating, service, cuff, medals - The Crew: recruitment, training, pay, food, life on board, duties, battle stations, medical, shore leave

2004.323.032	Air Forces Monthly Book of the F/A-18 Hornet, The	Senior, Tim	The F/A-18 Hornet has been in service over 20 years and has developed into an effective multi -role combat aircraft. With its array of weapon options, the Hornet is capable of engaging targets on land, sea and in the air and its ability to 'swing-role' from one target to another is impressive. The Hornet is in service with many air arms worldwide in both carrier-based and land-based variants. (from Amazon.co.uk)
2004.324.061	Four Stack APDs: The Famed Green Dragons	Clark, Curt	If there ever has been such a thing in the history of the United States Navy as a typical American class of ship, the flush -deck destroyers of World War One come closest to filling the bill. They made their appearance in every part of the world between the years 1917 and 1947, their distinctive silhouette unmistakably proclaiming them "made in America". These ships performed in an extraordinary variety of roles during their long and useful collective life.
2004.327.004	Liberation of the Philippines: Luzon, Mindanao, the Visayas, 1944-1945, The	Morison, Samuel Eliot	In order to liberate the Philippines, a series of amphibious operations took place on the islands and shores of Mindoro, Lingayen Bay, Palawan, Panay, Negros, Cebu, Corregidor, and Mindanao. The carrier actions supporting these operations are told in detail. In this period of the war (the winter of 1944-1945) the Japanese Kamikaze Corps arose as an effective threat, taking a terrific toll of ships and sailors' lives. Here, too, is Admiral Halsey's famous raid of Task Force 38 in the South China Sea, ranging from Formosa to Indochina. The author also tells the story of the frightful typhoon of 18 December, 1944, in which three ships went down and over eight hundred lives

2004.331.003	Black Aces High: The Story of a Modern Fighter Squadron at War	Wilcox, Robert K.	In 1999, when Serbia attacked the small country of Kosovo, the USS Roosevelt was steaming through the Mediterranean. In a matter of days, thirty pilots-veterans and rookies alike-were about to become the lethal tip of a fast, furious, high-tech knife. And the Black Aces Squadron VF-41-a team of mechanics, technicians, electronic warfare specialists-would plunge their weapon into the heart of the enemy... This extraordinary book takes us into the world of Naval aviation in action: the training, launching, dog-fighting and the feeling of a multi-million dollar F-14A Tomcat pushed literally to its breaking point. From a harrowing account of a pilot's ejection from an exploding plane to the deadly cat-and-mouse games the F-14s played with deadly enemy forces on the ground, BLACK ACES HIGH straps us into the cockpit, hurtles us through SAM-laced night skies, and goes behind the scenes to meet the flesh-and-blood men and women whose skill and courage reinvented warfare-just when we needed it most... Publication Date: March 2, 2004 (from Amazon.com)
2004.331.004	First Blue : The Story of World War II Ace Butch Voris and	Wilcox, Robert K.	The Remarkable Story of a True Hero of American Aviation

Object ID	Title	Author	Summary
	the Creation of the Blue Angels		The U.S. Navy's Blue Angels are the most famous flight demonstration team in the world. While millions of aviation enthusiasts see their shows every year, the story of the man who formed the squadron has never been told. He is Roy Marlin "Butch" Voris, a World War II Ace and one of only two aviators ever to command the Blue Angels twice. First Blue details the epic journey of an unassuming man whose strong character and desire to fly launched him into a life of drama, heroism, and accomplishment unique in his field. Because he wanted to serve his country during World War II, a young Butch Voris found himself flying fighter planes as part of the pitifully prepared and outmanned front in the early stages of the Pacific theater. He was nearly killed there but went on to be a leader in one of the most fearsome naval air squadrons in the Pacific. As a pilot, Butch is unquestionably in the same class as more recognized aviator heroes such as Chuck Yeager and Pappy Boyington. While his World War II experience alone could comprise a book, Butch may be best known for his efforts in the creation of the naval air demonstration team, the Blue Angels. After the war, Voris was personally chosen by Admiral Nimitz to start the Blue Angels and to lead them, first in prop planes and later in jets. The story of his efforts is as exciting as it is inspirational, and it's told here in meticulous detail and with great humor. Today the Blue Angels still follow traditions established by Butch. Butch's involvement in military flight didn't end with the Blue Angels; he became a major player in the development of the F-14 Tomcat and NASA's

2004.332.003	Ship to Shore : A Dictionary of Everyday Words and Phrases Derived from the Sea	Jeans, Peter D.	Ship to Shore: A dictionary of everyday words and phrases derived from the sea by Peter D. Jeans Illustrated by Ross H. Shardlow with Preface by the Author, Acknowledgments, Introduction. Black & white drawings and drawing of a ship on front & back cover with nautical terminology. Photos on back jacket of author and illustrator. This authoritative work is the story of seafaring men and their influence on the English language from Nantucket whalers to Elizabethan sea dogs, the grizzled fishermen of Nova Scotia, to crews of clipper ships including Captain Cook, Sir Francis Drake, John Paul Jones to name a few. Words, sayings, and idiomatic expressions are explained in alphabetical order.
2004.332.007	Navigation Dictionary	US Naval Oceanographic Office	PREFACE: Navigation is essentially an applied science and touches many other fields, borrowing copiously from their terminology. If terms relating primarily to such branches of science such as astronomy, cartography, electronics, mathematics, meteorology, oceanography, surveying, etc, are found in these pages, it is because the navigator's sphere of interest, overlap these fields. An attempt has been made to define such terms in the language and from the viewpoint of the navigator. Only those meanings more or less directly applied to navigation have been included.

The book covers all types of aircraft, engines, fuel systems, electrical, propulsion, instruments, navigation, meteorology, airways, aerodynamics, flight, arms and armament, accessory equipment, and materials and processes.
2004.332.015	Chronology of World Aviation, A	Gurney, Gene	In a single volume, this comprehensive and highly readable chronology of aviation traces the history of man's attempts to conquer the atmosphere and to explore the awesome expanse of space beyond. Each step in aviation's growth is covered - from balloons to the latest supersonic aircraft. The dramatic development of rockets and missiles is followed from the initial experiments conducted before World War II to the present-day programs for exploring the moon and the planets. Here, in one concise treatment, can be found all the important developments in the fields of aviation and space exploration. Each dynamic event is listed in the order in which it occurred; each is accurately and completely described; each great breakthrough in aeronautics and space appears with all essential names, dates, and places.

Object ID	Title	Author	Summary
			"A Chronology of World Aviation" belongs in the library of everyone interested in aviation and space exploration. Extremely valuable as a reference work, it provides a unique summary of developments in the aerospace field. As the reader turns the pages of this Chronology, he will see how each discovery, invention, and outstanding flight laid the groundwork for still greater achievements, and how the citizens of many countries contributed to them. Lt. Col. GENE GURNEY, of Toledo, Ohio, has completed twenty years of active duty with the U.S. Air Force. He began his military career at the age of nineteen when, during World War II, he became a pilot and flew B-24 Liberator bombers. After the war he served as an Air Force counter-intelligence agent in Europe and the Near East. During a tour of duty at the Pentagon he completed work for a degree at the University of Maryland by attending night classes. He then returned to the cockpit, flying with the Strategic Air Command (SAC). He was the first SAC combat crew member to fly the giant jet KC-135 tanker. Now a command pilot and still actively flying, he is a public information officer on the staff of the Secretary of the Air Force. (from dust jacket flaps)

Object ID	Title	Author	Summary
			subject: airplane types, manufacturers, instruments, navigation, aeronautical design, civil aviation, airlines, military aviation, combat aces, pioneer pilots, famous designers, technical concepts and terms, and significant events in the development of aviation. The "Encyclopedia of Aviation" has all the details about performance, models, and design feature that the aviation amateur and the specialist will want to know. The weapon systems and air battles of military flying are here, along with aviation records, racing pilots, epoch-making flights, and famous individual aircraft. In major articles on fundamental subjects such as aerodynamics, jet engines, navigation, radar, radio, sailplanes, supersonic flight, and wings the encyclopedia also provides the necessary background for any nonspecialist who wants to know what the technical side of aviation is all about. The material is arranged alphabetically with extensive cross-references, and there is a comprehensive index. The short but remarkable history of aviation has generated scores of books about specific aspects of aviation, and the popularity of these books testifies not only to the sustained interest in the field, but equally well to the need for a true "Encyclopedia of Aviation." 2004.332.019	Helicopters and Other Rotorcraft Since 1907	Munson, Kenneth	"These little handbooks - indispensable to the buff or the researcher - represent a pocket encyclopedia of the principal military aircraft of the world, complete with colored plates and brief but comprehensive descriptions." - The New York Times "Helicopters and Other Rotorcraft Since 1907" is an illustrated encyclopedia of rotorcraft from the first primitive, exploratory machines to the latest, fastest helicopters in world-wide service today. From France's pioneer Breguet-Richet Gyroplane No.1 of 1907 to America's Sikorsky VS-300, the first fully practical helicopter, to the wide variety of models developed and flown in the 1960s—ranging in size from West Germany's diminutive thirteen-foot Wagner Sky-Trac 3 to the gigantic Russian Mil Mi-6 of Aeroflot, which can carry over one hundred people—the principal rotorcraft developed and flown in the 20th century are illustrated in full color and described in detail in this new volume of "The Pocket Encyclopedia of World Aircraft in Color." Eighty-two representative rotorcraft developed by the U.S., Britain, France, the U.S.S.R., Italy, the Netherlands, Denmark, Germany, West Germany, and Spain are displayed in their major aspects -side elevation, plan view from above, and plan view from below—in drawings that combine maximum visual appeal with essential details of construction. The accompanying captions specify important details such as the date of each plane's first appearance, physical

Object ID	Title	Author	Summary
			specifications, take-off weight, speed, operational ceiling, and range. (continued on back flap) (continued from front flap) The accompanying text, fully describing each craft's development and service career, rounds out this unique pocket introduction to "the toy that grew up," the versatile aircraft which today is both the principal workhorse of the war in Vietnam and the all-purpose flying wonder of the private and commercial worlds. Kenneth Munson, who has specialized for many years in the study of military aircraft, is the author of many aviation books, and has further volumes in preparation within this series. The principal artist, John Wood, who works with the British Interplanetary Society, has illustrated many of the standard works on aircraft. Additional volumes in The Pocket Encyclopedia of World Aircraft in Color series: Fighters: Attack and Training Aircraft, 1914-1919 Bombers: Patrol and Reconnaissance Aircraft, 1914-1919 Civil Airliners Since 1946 Private Aircraft Since 1946 Fighters (World War II and after) Bombers (World War II and after)) Pioneer Aircraft 1903-1914 Manned Spacecraft THE MACMILLAN COMPANY 866 Third Avenue NEW YORK, N.Y. 10022 Printed in The Netherlands (from dust jacket flaps)

2004.332.020	Helicopters and VTOL Aircraft	Taylor, John William Ransom	One day almost all aircraft will have the ability to take off and land vertically, for this is the key to safer flying. No longer will pilots have to grope their

Object ID	Title	Author	Summary
			way down in bad weather, with their aircraft hurtling towards an invisible runway at racing car speed. The two-mile runways that scar the countryside will no longer be needed, and every little town will be able to afford its own airport. The birth of the practical VTOL airplane is therefore one of the great milestones in aviation progress, comparable with the perfection of the Wright biplane and of Whittle's first jet engine. This is the only book on the market that gives details of all the vertical take-off aircraft and helicopters under development, in production and in service today. Quite apart from its value as a reference work, it will be an historical document in years to come, when the old dream of safe, practical and economical vertical flight has become an everyday reality. (from dust jacket flap)

2004.332.021	US War Birds from World War 1 to Vietnam	Munson, Kenneth	This book brings together the best US military material from the fourteen volume Pocket Encyclopaedia of World Aircraft in Color published by Blandford Press between 1966 and 1977. This series enjoyed immense popularity and success -well over 1,000,000 copies were sold in nine languages. The selection in this book starts with the primitive and ends with the sophisticated, missile, armed, radar guided, nuclear weapon carrying aircraft of today. Any selection for a volume of this size must necessarily be an arbitrary one. It is hoped however that this book will provide a 'ready reckoner' for the aviation enthusiast, and that the marking and camouflage schemes, many infrequently illustrated in color, will provide inspiration for the aircraft modeller. Several aircraft are presented in periods of service or in the markings of services which may appear unfamiliar,

Object ID	Title	Author	Summary
			but it is hoped that this will lend depth to the perspective. The color plates are arranged in approximate chronological order of the aircraft's first entry into service. The 'split' plan view depicts the markings appearing above and below either the port side or the starboard side of the aircraft, according to the aspect shown in the side elevation. It should not be assumed however that the unseen portion of the plan view is necessarily a 'mirror image' of the half portrayed: for example, on post 1941 aircraft, national insignia normally appear only on the port upper and starboard lower wing surfaces. Neither should it be assumed that all color plates necessarily show either a standard color scheme or a pristine, ex-works finish; indeed, the intention has been to illustrate a wide variety of finishes, from ex-works to much -weathered aircraft. The specifications relate to the specific machine illustrated, and may not necessarily apply in all details to the type or sub-type in general. This volume is drawn from the highly authoritative "Pocket Encyclopedia of World Aircraft in Color". There are over 150 famous combat aircraft featured in full color with concise technical details of each plane. Many of these planes are rarely illustrated in color and each entry shows a side view and a 'split' plan with the exact camouflage and markings of a representative example. There are also some in-depth profiles on the most memorable combat planes and the squadrons and aircrew who flew them into immortality. This section contains many black and white photographs of the actual combat aircraft as they went to war. The full range of military aircraft is represented

Object ID	Title	Author	Summary
			including Flying Boats and Seaplanes, Helicopters, Transport Aircraft, Spotter Planes and these are spread across the three major services. Kenneth Munson is the author of some 40 books on aviation, John Wood is well known by aviation and military enthusiasts for his quality artwork. Jacket Illustrations Front: The F-16A Fighting Falcons in display guise. Back: Front gunner of a Martin B-26 with full belt of 0.30 in ammunition. ISBN 185079 029 9 New Orchard Editions Robert Rogers House New Orchard Poole Dorset UK Distribution in the United States by Sterling Publishing Company, New York. (from dust jacket flaps)

2004.332.022	Aircraft Encyclopedia, The	Braybrook, Roy	(from Amazon.com:) From School Library Journal Gr 7 Up The title "encyclopedia" suggests a definitive, comprehensive work; however, this is not the case. It is difficult, to say the least, to examine and document the aircraft of today in 188 pages. More appropriately, Aircraft Encyclopedia is an excellent guide, a valuable introductory source. The book is organized into four chapters: rise of aviation, military aircraft, civilian aircraft, and a reference section (glossary, index, abbreviations, record breakers, museums in Europe and the U.S.). There is an abundance of colorful illustrations, each accompanied by a brief description of the aircraft. The pictures and diagrams certainly elucidate the text. This entertaining study

Object ID	Title	Author	Summary
			will be enjoyed by aviation enthusiasts of all ages. L. R. Little, Houston Secondary School, B.C., Canada Copyright 1986 Cahners Business Information, Inc. --This text refers to the Paperback edition.
2004.332.026	World Encyclopaedia of Aircraft Manufacturers: From the Pioneers to the Present Day	Gunston, Bill	It's a fair bet that few will ever have heard of ¾ of the more than 3,000 companies featured in this book. Expert aviation writer Bill Gunston has crammed into one book the stories not only of the famous manufacturers but also of the backyard enthusiasts, and the once-famous companies of long ago.
2004.332.028	Language of World War II, The : Abbreviations, Captions, Quotations, Slogans, Titles and Other Terms and Phrases	Taylor, Anna Marjorie	The Language of World War II compiled by A. Marjorie Taylor, Head, Literature Division Rochester Public Library Revised and Enlarged Edition. 2004.332.029	American Heroes of the War in the Air	Mingos, Howard	Contains pictures and descriptions of the heroes and the awards that they earned in the air war during the Second World War. The narrative and pictures are broken down by areas beginning with Pearl Harbor. and continuing with The Philipines and Java; Marshall and Gilbert Islands, (the first offensive); The First Raid on Japan; The Battle of the Coral Sea; The Battle of Midway; The Campaign in the North Pacific; The Fight for Island Air Bases; American Wings over Asia; North Africa and the Mediterranean; The Air Campaign Against Germany; and Our World-Wide Lines of Supply.
2004.332.030	Persian Gulf War Almanac	Summers, Harry G.	From Library Journal: Because the 1991 War for Kuwait (erroneously dubbed the Gulf War) ended too quickly, it will probably never receive the scholarly attention that other conflicts garner. The politics

Object ID	Title	Author	Summary
			of the Gulf is too complex, perhaps even too foreign, for most observers, and the reasons for our intervention too pragmatic to deserve the kind of attention that ideologically motivated conflicts receive. These two titles provide detailed information on key questions, although Summers's emphasis is on military issues. Their purpose is to encapsulate?in short paragraphs arranged in an A-to-Z format?whatever data are available on the subject. Unfortunately, the results aren't always reliable. Both Grossman (The ABC-Clio Companion to the Environmental Movement, LJ 3/15/95) and military analyst Summers (Korean War Almanac, LJ 2/15/90) provide references, but they rely heavily on nonscholarly sources, and the information they offer is sometimes inaccurate or simplistic. For example, Grossman writes that Iraqi Deputy Prime Minister Tariq Aziz was born "to a Christian Chaldean Arab family of the Alawite faith," a statement that simply boggles the mind. Alawi Muslims are in fact part of an offshoot sect of Shia Islam. Although there may be some ties with Christianity, they are cultural, not religious, in nature and substance. Aziz, certainly a key player in the war, receives no entry in Summers. In another example, the controversy over war casualties is not properly covered. Both volumes report official U.S. figures (9000 Iraqi soldiers dead) although Summers's discussion is superior since it provides arguments on both sides. Both volumes provide numerous photographs, even if most are of weapons systems, and there is an abundance of portraits. Even CNN's Christianne (Christine in Grossman!) Amanpour makes it. There are some valuable appendixes?Grossman lists 92 useful documents under one cover, ranging from key executive orders to David Frost's March 27, 1991

Object ID	Title	Author	Summary
			interview with General Schwarzkopf, and Summers offers a brief historical background?but even these must be examined with care. Both books include chronologies, but the emphasis is on weapons, the theater of operations, and coalition forces. While both volumes are comprehensive enough and might be useful in public libraries, they offer little more than scripted entries for serious scholars. [For another view of Grossman's book, see "Best Reference Sources of 1995," LJ 4/15/96, p. 38-42.?Ed.]?Joseph A. Kechichian, Rand Corp., Santa Monica, Cal. -?Joseph A. Kechichian, Rand Corp., Santa Monica, Cal. Copyright 1996 Reed Business Information, Inc. From Booklist: This almanac brings together the major details on a war that lasted less than 100 days. Background to the conflict is provided in several essays that discuss the historical and geographic realities of the area. A retired military officer, Summers is also the author of Facts On File's Korean War Almanac (1990) and Vietnam War Almanac (1985). A chronology with day-by-day entries starts on February 19, 1990, with Iraq's additional reparations claims in the Iran-Iraq War, and ends with Iraq's surrender at the end of the ground war on March 5, 1991. The main body of the work is in dictionary arrangement and is illustrated with 20 maps and charts and 68 black-and-white photographs. Maps include information on topics such as the "Iraqi Defense in Depth." Several tables supply interesting details. For instance, one shows air-to-air victories, detailing the date, shooter aircraft, type downed, and weapon used; another lists the coalition-force countries with the type and number of aircraft furnished to the war effort.

Object ID	Title	Author	Summary
			The 200 entries cover military units, key battles, issues, people, and weapons. Some of the essays are controversial. For example, Casualties discusses the inaccuracies of casualty reports from Iraq, where the number of casualties cited ranged from 100,000 killed to as few as 1,500. Other entries are technical in nature, such as HMMWV (High-Mobility Multipurpose Wheeled Vehicle). There are also political entries such as Iraqgate and biographies that treat the military leaders of the campaign. Each entry has see also references, as well as suggestions for further reading. A 400-item bibliography of both monographs and periodical articles is followed by subject and armaments indexes. Persian Gulf War Almanac is recommended to libraries of all sizes for its detailed chronology of the war, its extensive topical essays, and valuable bibliographies. (from Amazon.com)

Object ID	Title	Author	Summary
			From Booklist: Grossman, the author of ABC-Clío companions to the civil rights and environmental movements, has compiled a useful encyclopedia, replete with biographies of major figures, a good selection of statistics, relevant documents, military slang, and a glossary of Arabic words. Weapons and weapon systems receive careful attention, accounting for a major share of the alphabetical entries. The biographies of Middle East leaders and background on their political parties and nations are helpful. Maps and hundreds of black-and-white photographs add value to the text. Most entries include a brief bibliography; these are gathered together in a major bibliography with a separate section for official U.S. publications. An appendix includes reprints of statements issued by the U.N., speeches by President Bush and Saddam Hussein, as well as interviews, testimony, and letters. These documents could serve as teaching aids in the use of primary-source materials. Users will be disappointed not to find an extended essay-length discussion of the air, sea, and land war or of Iraq's invasion of Kuwait. Grossman's attitude toward the war is presented in an introductory statement: "the United States went to war to smash the death machine that this country and its Western allies had helped Saddam assemble in the first place." Again, various points of view could be handled better in essay-length discussions contained in the body of the work. Persian Gulf War Almanac [RBB My 1 95] does have lengthy topical essays, but it lacks the more than 100 pages of documents found in this new encyclopedia.

2004.332.055	Naval Institute Guide to World Military Aviation, The - 1995	Francillon, René J.	This edition covers the organization and orders of battle for the world's 169 air forces, including navy, army and paramilitary aviation services. It also describes in detail all currently operational military aircraft, with information on type, manufacturer, program history, weaponry, equipment and variants. Finally, there are facts about the major air bases of the world, including geographical co-ordinates and runway orientation, lengths and widths. (from Amazon.com)
2004.332.056	Naval Institute Guide to World Military Aviation, The - 1997-1998	Francillon, René J.	This second edition covers the organization and orders of battle for the world's 169 air forces, including navy, army and paramilitary aviation services. It also describes in detail all currently operational military aircraft, with information on type, manufacturer, program history, weaponry, equipment and variants. Finally, there are facts about the major air bases of the world, including geographical co-ordinates and runway orientation, lengths and widths. (from Amazon.com)
2004.332.057	Jane's All the World's Aircraft - 1930	Jane, Fred T.	Jane's All the World's Aircraft is an aviation annual publication founded by Fred T. Jane in 1909. It is published by Jane's Information Group. Jane's All the World's Aircraft has chronicled a century of ever-accelerating aviation progress and recorded the particulars of an unprecedented number of

Object ID	Title	Author	Summary
			flying machines, using the widest possible interpretation of that phrase, in the most minute detail. Six editors have had the privilege of commenting upon the significant aircraft and events of manned flight since the first edition appeared in November 1909 as All the World's Airships (which was then a generic term for any machine that flew). This first publication was seen as being ahead of its time but even the skeletal book showed the strength of Fred T Jane's standardised approach to data collection. The first edition even carried a pre-addressed return proforma for aviation pioneers to supply the details of new machines. Besides listing the different types of aircraft by nationality, the first issues covered aerial societies, journals and flying grounds and cost just 21 shillings (£1.05). Jane himself had a desire to fly and he was nearly killed doing so in 1909 whilst attempting a flight on Dartmoor. His aircraft caught fire, but he merely commented that it would be one less machine to include in his forthcoming work. As with Jane's Fighting Ships, Jane received extensive help from enthusiasts worldwide, including Louis Blériot, A.V. Roe and Prince Heinrich of Prussia. Jane censored the 1914 issue, which was published just after the outbreak of the First World War, blacking out whole sections describing British equipment and organisation. He noted in it that, for all practical purposes, aircraft have no more to do with peace than submarines. The work's accuracy helped morale by dispelling alarmist rumours about imminent German air raids, showing that the Germans did not possess anything but the smallest fleet of airships. Respect for the accuracy of Jane's All the World's Aircraft

Object ID	Title	Author	Summary
			transcended political enmities. Cold War notwithstanding, Soviet authorities supplied Jane's with information. Such was the technical reference book's reputation that Argentina even provided details of its aircraft during the Falkland's Conflict in 1982. Altogether, there have been only 97 editions, mainly due to disruptions during the two World Wars. 2009 was the 100th Year of Jane's All the World's Aircraft. From Wikipedia, the free encyclopedia
2004.332.058	Seabees "Can Do!"	Dougherty, John E.	The history of the construction battalions, an organization, that was called into being to meet new needs for construction on a permanent basis. 2004.332.059	Military Balance, The, 1980-81	International Institute for Strategic Studies	"The Military Balance 1980-81" is the latest quantitative assessment of the military power and defence expenditure of countries throughout the world, examining the facts of military power as they exist today. Countries are grouped in geographical regions, and each section is introduced with a description of multilateral pacts, bilateral pacts and military aid agreements. The entry for each country is laid out in a standard form to enable easy comparison; information includes defence expenditure, G.N.P., manpower (active forces), equipment and strength of military formations. Additional information, set out in tabular form, compares nuclear delivery vehicles and static measurements of the strategic nuclear balance,

2004.332.078	Illustrated History of Aircraft	Mondey, David (ed)	POWERED FLIGHT is less than a century old, but its effect on the history of the world has been immeasurable. Aviation has caused wars to be won and lost, while the advent of jet travel has created the reality of the 'global village'. "The Illustrated History of Aircraft" is a comprehensive history of aviation, linking together the economic, technical and social factors which have borne its development. This is brought to life in all its excitement and splendour. Full colour illustrations re-create the past as vividly as they reflect the present. Chapters on the work of the pioneers of powered flight, the achievements of the first men and women to cross the oceans by air; the part played by air power in two world wars and its present role in the modern maintenance of a balance of power between the nations; and on the commercial airliners which have brought the peoples of the world within reach of each other combine to make the "Illustrated History of Aircraft" an invaluable

2004.332.082	History of Our Navy From its Origin to the End of the War with Spain, The, Vol. 5	Spears, John Randoph	The History of Our Navy 1775-1898 by John R. Spears with more than five hundred illustrations, maps and diagrams in five Volumes, Volume V, with Frontispiece of Rear Admiral George Dewey. In XXVII Chapters with Index, List of Illustrations in black & white with Photographs and Index.
2004.332.083	U.S. Navy, 1890 - 1990 : One Hundred Years of Sea Power, The	Baer, George W.	"This is dearly one of the two or three most important works in American naval history published in the last decade; it has the potential to become a classic in the field. Well researched and carefully nuanced, it provides a distinctive perspective on the evolving historical relationship between national interest and national politics on the one hand and naval power on the other. Not only is this a significant contribution to scholarship—one that will critically influence how historians and political scientists think about American naval power—it is an enormously readable work. Baer writes beautifully, and he has organized his material effectively. The book is fully accessible to anyone interested in naval history." — Edward Rhodes, Rutgers University This powerfully argued, objective history of the modern U.S. Navy explains how the Navy defined its purpose in the century after 1890. It relates in detail how the Navy formed and reformed its doctrine of naval force and operations around a concept articulated by Captain Alfred Thayer Mahan—a concept of offensive sea control by a battleship fleet, and, new to America, the need to build and maintain an offensive battle fleet in peacetime.

Object ID	Title	Author	Summary
			However, there were many years, notably in the 1920's and after World War II, when there was no enemy at sea, when the country turned inward, when the Navy could not count on support for an expensive peacetime (continued on back flap) (continued from front flap) battle fleet. After 1945, especially, the inappropriateness of Mahanian principles strained a service that had taken them for granted, as did the centralization of the military establishment and the introduction of new weapons. What, then, did the Navy do? It shrewdly adapted old ideas to new technology. To reclaim its position in a general war, and avoid being transformed into a mere transport service, the Navy (with the Marine Corps) proved it was capable of power projection onto the land through seaborne bombers armed with nuclear weapons and by building a ballistic missile-launching submarine force. The growth of a Soviet sea force in the 1970's and 1980's revived the moribund sea power doctrine, but the Navy's bid for strategic leadership failed in the face of the war-avoidance policy of the Cold War. With the dissolution of the Soviet Union, the Navy finally retired Mahan's doctrine that the defeat of the enemy fleet was the Navy's primary objective. Having proven itself in the course of the century as ever adaptable, the service moved back from sea control to a doctrine of expeditionary littoral warfare. This volume, then, is a history of how a war-fighting organization responded—in doctrine, strategy, operations, preparedness, self-awareness, and force structure—to radical changes in political circumstance, technological

			atomic bombing and was aboard the Missouri at the surrender ceremonies.
2004.332.102	Pacific Carrier : The Saga of the USS Yorktown (CV-10) in WWII	Kitchen, Reuben P.	The Essex-class USS Yorktown CV-10 is a storied ship that carried the war to Japan after the first Yorktown CV-5 was lost at Midway. This is a classic tale of the fighting lady and how her magnificent crew served their country in WWII, the Korean War, Vietnam, and the Apollo recovery program.
2004.332.104	Maneuvering Board Manual	Navy Hydrographic Office	Primarily for the purpose of furnishing officers of the U.S. Navy a printed publication to which ready reference can be made for aid in the solution of tactical problems.
2004.332.105	Japanese Air Terms Vol. 1: Japanese - English	Boyce, A. R.	Japanese/English
2004.332.106	Duel for the Sky	Shores, Christopher	World War II was full of battles which were unparalleled because of their dash, drama and danger - and none more so than in the air. DUEL FOR THE SKY recreates ten of the greatest air battles of this war - carefully chosen not only because of their particular significance as such, but also to provide as wide a variety of air forces and aircraft types employed, tactics involved and background terrain. From Blitzkrieg in Poland and the Battle of Britain to the Marianas 'Turkey-shoot', Christopher Shores draws on immense archives of material to provide a wealth of technical and background data: and has unearthed some surprising new facts and photographs. To complement the text, ten superb paintings have been specially commissioned from Terry Hadler to evoke the atmosphere of these crucial battles - but at the same time no detail has been left out. Giving a fascinating and unforgettable insight into the war, DUEL FOR THE SKY is invaluable to historian, general reader and modeller alike.

2004.332.109	British Battleships, 'Warrior' 1860 to 'Vanguard' 1950: A History of Design, Construction, and Armament	Parkes, Oscar	(from dust jacket flap:) Oscar Parkes's monumental study of the British battleship was first published in 1957, but has long been out of print. A new generation of naval historians having grown up in the years that have elapsed, it was felt that it should once again be made available. Although the big-gun capital ship is now a thing of the past and the command of the seas has assumed an altogether different aspect in the world political scene, the great armoured ships of the line still fire the imagination and seize the technical interest of all sea-loving men. The history they have written in battle, the influence they have wielded in international affairs in peace and war, and the fascinating study of the development of their design assure them a permanent place in the history of our island race. It was said when Dr Parkes's book was published that no such history had ever before been attempted and this is as true today. It remains the final word on the subject, a book that can never be superceded. The sources from which it is drawn are principally the Official Returns, Admiralty Ships Covers, Progress Books and the personal notes and confidences of a number of Directors of Naval Construction. The large number of photographs came from the author's collection amassed over the years; the ships' plans have never before been equalled; throughout, previously unpublished

2004.332.121	U.S. Naval Aviation in the Pacific	Chief of Naval Operations	The purpose of this review, which was prepared by

Object ID	Title	Author	Summary
			officers on duty in the Operational Division, including Air Combat Intelligence officers with extensive service in the Pacific, is to analyze the relation between air and sea power. It is based upon the experience of naval aviation in the war against Japan as recorded in the files of the Navy Department. Reports of the United States Strategic Bombing Survey have also been consulted and the chart of the progress of the war has been taken from one of them.
2004.332.122	U.S. Naval Aviation in the Pacific	Chief of Naval Operations	From the Preface--"The purpose of this review, which was prepared by officers on duty in the Operation Division, including Air Combat Intelligence officers with extensive service in the Pacific, is to analyze the relation between air and sea power. It is based upon the experience of naval aviation in the war against Japan as recorded in the files of the Navy Department. Reports of the United States Strategic Bombing Survey has also been consulted and the chart of the progress of the war has been taken from one of them. The danger inherent in any report confined to one aspect of the war is that it may mislead the reader into forgetting that the conflict was won by a combination of ground, naval, and air forces, each of which carried its share of the common burden. All operated within the framework of strategic plans, and it is the aim of this analysis to show how naval aviation fulfilled its part of those plans."
2004.332.123	San Diego's Navy : An Illustrated History	Linder, Bruce	Traces the history of the Navy in San Diego from 1846 into the 1990's in a generously illustrated book.
2004.332.124	Fundamentals of Naval Tactics, The	Bernotti, Romeo	FOREWORD: This work is a systematic codification in treatise form of the mathematical principles of Naval Tactics. The author is the instructor in the Art of Naval War at the Royal Italian Naval Academy, and his name is

Object ID	Title	Author	Summary
			well known as the writer of a number of excellent articles of much original thought on naval tactics in the Revista Marittima. He is therefore well fitted for the task of reducing to the consecutive order and logical sequence, so necessary to the student, tactical principles and theorems. Tactics is an ever changing art; for while its scientific principles do not change, its rules necessarily change with changing conditions. No books on tactics will ever solve the problem finally, because the problem is forever changing; but if its methods are correct, these will ever be of value. Even if we do not agree with all the views of the author and of the other of his distinguished compatriots whose views he has here embodied, the work would be of value as expressing the Italian point of view; and Italy stands in the first rank of naval thought. As the title indicates, the book deals chiefly with the fundamentals, and approaches the subject more particularly from the mathematical side. W. McCARTY LITTLE, Captain, U. S. Navy. U. S. NAVAL WAR College NEWPORT, R. I., April 3, 1911.

2004.332.126	Genius of Naval Warfare I : Strategy, The	Daveluy, René	FOREWORD: When, some ten years ago, I decided to give

Object ID	Title	Author	Summary
			to the public a popular presentation of naval questions, I had formed a plan all more extensive from the fact that it still existed only in my imagination. I proposed to divide: my work into three distinct parts: "Strategy, Tactics, Organization." These three parts were to form a whole under the title: "The Genius of Naval Warfare." It did not take long for me to perceive that I had undertaken a task beyond my strength, and that a very long time would elapse before I should be capable of realizing my program; moreover, the title I had chosen seemed to me to be pretentious, although it exactly expressed my idea. I therefore renounced the composition of a complete work and limited my pretensions to bringing out separate studies, without connecting them by a general title. Under these conditions "A Study of Naval Combat" was published in 1902, followed by "A Study of Naval Strategy" in 1905. These two works were the first two parts of my original design. As for the third part, it was sacrificed to the publication of "The Struggle for Command of the Sea;" and since then I have not had time to bring it out. A new edition of the two studies that have already appeared having become necessary, I decided to take up again my first project, inclusive of its general title, which I hope will be more readily pardoned for the ten years that have passed. I therefore offer to-day to the criticism of my comrades Volume I of "The Genius of Naval Warfare: Strategy," which is merely a revision of "A Study of Naval Strategy." It is very rare for authors not

Object ID	Title	Author	Summary
			to have something to add to their works, and I have not escaped the common law. I have therefore seized the opportunity to reconstruct or develop some chapters. In others I have merely made trifling corrections; but my readers will thank me for having abbreviated. Volume II, Tactics, is about to appear and will be the new edition of "A Study Of Naval Combat." Finally, I hope very soon to complete "Organization," which will form Volume III of "The Genius of Naval Warfare." R. DAVELUY. Contre—Torpilleur "Faucon," La Tude, Crete, July, 1909.
2004.332.130	Eighty Knots to Mach 2: Forty-five Years in the Cockpit	Linnekin, Richard	A Navy pilot's view of the nine aircraft he flew over a 45-year period: N2S Stearman, SNJ Texan, F6F Hellcat, F8F Bearcat, F4U Corsair, F9F Panther, F9F-6/8T Cougar, AD Skyraider, and the F8U Crusader.
2004.332.131	Independence Light Aircraft Carriers, The	Faltum, Andrew	Author covers the Independence class light carriers that operated during World War II, along with technical data on the Saipan class of carriers that served after World War II. Former USS Midway crew member.

Silent War : The Cold War Battle Craven, John Pina
Beneath the Sea, The

(from Amazon.com:)

In October 1962, the United States government demanded that the Soviet Union remove long-range tactical missiles that it had positioned in Cuba, a short flight from targets like Washington and New York. After nearly a week's wait, during which the world braced for nuclear war, the Soviet government finally relented. It did so, in part, because its capitalist foe had one weapon that it then did not: 10 dozen submarine-mounted nuclear missiles that could be fired from beneath the waves and reach targets inside the Soviet Union within a matter of minutes.

Object ID	Title	Author	Summary
			In The Silent War, John Craven, an architect of the Polaris missile program, writes that the episode offered unambiguous proof of the value of "a strong silent deterrent" and of the importance of a superb submarine force in preserving the balance of power. In this memoir, he recounts the evolution of the Polaris weapons system during the cold war. Along the way, he reveals little-known incidents of espionage and saber rattling that will give readers pause to wonder how war was avoided for all those years. A bonus for Tom Clancy fans (who are likely to enjoy his book in any event) is Craven's sketchy but fascinating tale of a real hunt for a lost Soviet submarine that took place during his tenure as well as his accessible but nonetheless detailed account of the advanced military technology he helped bring into being. --Gregory McNamee --This text refers to an out of print or unavailable edition of this title. From Publishers Weekly In May 1968, submarine specialist John Craven, then chief scientist of the navy's special projects office, had just crossed into Virginia from Washington, D.C., on his way home from work when he heard an alarming news report on the radio. The USS Scorpion, a submarine, was missing in the ocean with 99 men on board. On hearing the news, Craven writes, "I immediately turned my car around and headed for the war room of the Pentagon." Amazingly, the loss of the Scorpion coincided with the disappearance of a Soviet submarine. How Craven spearheaded the search for the two ships a search that inspired The Hunt for Red October is the centerpiece of this fascinating series of set pieces that delve into the life-and-death mechanics of Cold War-era submarine service. Craven, who had previously been known as the head of the

Object ID	Title	Author	Summary
			Polaris sub-based missile program, has surfaced mysteriously in the press over the years, most recently in the critically acclaimed Blind Man's Bluff: The Untold Story of American Submarine Espionage; here, he is forthright about much of his background and activities. Anecdote-based chapters include descriptions of repairs to a newly launched USS Nautilus, rough briefings to the press and to the chain of command on Polaris, diving into the transoceanic cable-tapping Man-in-the-Sea program and much more. Craven quotes Byron, Verne and others with feeling throughout, and his explanations of the complicated physics related to his various projects are clear if sometimes still classified making this is a distinctively well-crafted intelligence-community memoir. (Apr. 4) Forecast: As Russo-American relations over espionage heat up, this book should find a general audience primed for a re-examination of the intricacies of the Cold War. While not quite Red October, it should reach beyond the buff market. Copyright 2001 Cahners Business Information, Inc. --This text refers to an out of print or unavailable edition of this title.
2004.332.138	Submarine Book, The	Lawliss, Chuck	A concise, readable and fully-illustrated account of how the modern submarine fleets came to be, from the very first underwater vessel that crossed the Thames in 1620, to the ultra-computerized nuclear submarine that functions as the strategic linchpin for most of today's advanced navies. 2004.332.151	Footprints on the Moon	Associated Press	After centuries of superstition and ignorance, man looked up to the crescent moon and realized it was within his grasp. How did it happen? It started with a little thing. The world's two most powerful nations were facing each other on a hundred subtle battlefields when the one that everyone deemed less ingenious and knowledgeable and powerful suddenly hurled into space the first man-made satellite, weighing only 184 pounds. The other great power, America, and its young President, took up the challenge. A dozen years and 25 billion dollars later, their acceptance, stemming from the appearance of a tiny sputnik, would yield man's finest hour. Two men walked the lunar surface and others would follow. And all of man's past explorations, all of his attainments, seemed frail. For the first time his foot left prints on another heavenly body. And this was only the beginning. "Footprints on the Moon" is the story of how man forged the weapons to free himself from the bonds that hold him to his native planet. In it the events of the past decade flick by like a master countdown for the day and hour and second of the final shot. These were moments that we lived sporadically, forgetfully, with our mind distracted by other pressing matters. Now, we have here the inside story of how America won its race to the moon, the story of the men who died and the other men who sweated to make man's greatest enterprise succeed. And it is the story of the promise the effort holds — the promise that men may at last know where the earth, moon and sun began, and where life began, and

Object ID	Title	Author	Summary
			where it exists, and whether man is unique in the universe. The success of the astronauts has been more than a national victory. It is a victory for all mankind, and no other moment will seem as big until man reaches beyond the moon for other planets, other stars. THE AUTHOR John Barbour is one of the most knowledgeable reporters who have covered America's space efforts through the years, and one of the best writers. An Associated Press staff member now based in New York, he traveled extensively for several months while doing additional research for the book, as did the photo editor, AP's Sandy Colton. (from dust jacket flap)
2004.332.152	Entering Space : An Astronaut's Odyssey	Allen, Joseph P.	Inspiring November 8, 2005 By A. Stewart The detail and insight astronaut Joseph Allen provides almost gives you the sensation that you're floating beside the astronauts on the shuttle, but he never dives too deep into minute technical details that would make the journey dull or boring. However, the photos are the book's real centerpiece; it features over 200 large, full-color photographs that document spaceflight from Project Mercury to the Space Shuttle. 2 of 2 people found the review helpful (from Amazon.com)

2004.332.167	U.S. Navy Bureau of Ordnance in World War II	Rowland, Buford	From the Foreword. "After the close of World War I, work was begun on a volume covering the activities of the Bureau during the war period. Published under the title, Navy Ordnance Activities, World War, 1917-1918, this volume proved of great assistance to Bureau officials in the interwar years. Because of the much greater complexity and scope of Bureau activities during World War II, work on a comparable record was initiated while the war was in progress. The objective was to make readily available a realistic account of what was done in naval ordnance and how it was done. The present volume therefore records the problems faced by the Bureau, its accomplishments and its failures. Any treatise which attempted to cover all the ramifications of the Bureau would run into several volumes and by sheer bulk repel reader interest. For this reason, a good deal of relevant, but not-to-important material has been eliminated from this volume."
2004.332.169	United States Navy and Marine Corps Bases, Domestic	Coletta, Paolo Enrico (ed)	From the Preface: "This book provides entries in alphabetical order on U.S. domestic bases...By definition a domestic base is incorporated within the fifty states of the United States. The term excludes bases in such overseas territories as Puerto Rico, Guam, and the Virgin Islands; bases located in those areas are covered in the companion work. An attempt has been made herein to include histories of all important and historically significant naval

Object ID	Title	Author	Summary
			and Marine Corps bases and facilities, extant and extinct. No claim is made that the list is all-inclusive, however, and some very minor support establishments have been excluded. Moreover, the length and detail about a base vary because some have good command histories and full reports, while other do not...."
2004.332.170	United States Navy and Marine Corps Bases, Overseas	Coletta, Paolo Enrico (ed)	From the Preface: "There is a vital distinction between 'hard' bases, that is, those under American control, such as Roosevelt Road, Puerto Rico and 'soft' bases, those under which sovereignty lies with the host country. Rota, Spain is a good example of the latter. .. This book provides entries, in alphabetical order, on overseas U.S. naval and Marine Corps bases and facilities. U.S. domestic bases are covered in a companion volume... By definition, domestic bases include those located in the fifty states of the United States, but exclude those located in Puerto Rico, The Virgin Islands, and Guam. The latter appear in this book. For the purposes of this book an overseas base is defined as a geographic area that permits overflight rights, port visits, and the use of offshore anchorages. 'Strategic access' as to markets, raw materials, and media outlets may or may not obtain."

2004.332.190	Ships and Aircraft of the U. S. Fleet	Rowe, John S.	In this ninth edition of Ships and Aircraft of the U.S. Fleet, the essential format with

Object ID	Title	Author	Summary
			which users of the earlier editions have become familiar over a period of 32 years remains intact. Each type of ship (carriers, battleships, cruisers, and so on) is taken in turn. Tables, marked off between heavy bold rules, give such essential information on each class of ship as displacement, dimensions, and weapons. Below the main tables, marked off with a double rule, each ship in a class is named, along with information which applies to that ship alone, such as . her hull number, where she was built, and her present status. When tabular heads are the same for successive tables, the heads are not repeated. Instead, a broken rule shows the continuation of heads from the table above. The class name is set off with quotation marks when the name ship does not exist. Additional information not susceptible to tabulation follows each class treatment. Unlike previous editions of "Ships and Aircraft," the photographs are grouped by ship type for ease of comparison. The date in the caption indicates the date the photograph was made. Aircraft and weapons are presented in similar fashion. Of particular interest are the lists showing the enormous numbers of ships sold, given away, sunk as targets, or scrapped since 1965 when the eighth edition of this work was published. The final pages of the book are devoted to changes which occurred from the time the tables were set in type to 1 September 1971. A key to the abbreviations and symbols used in Ships and Aircraft is also located there. Naval Institute Press

2004.332.201	Combat Fleets of the World - 1978/79 : Their Ships, Aircraft, and Armament	Labayle Couhat, Jean (ed)	Internationally acknowledged as the best one-volume reference to the world's naval and paranaval forces, this popular Naval Institute guide is both comprehensive and affordable. Updated biennially since 1976, it has come to be relied on for all-inclusive, accurate, and up-to-date data on the ships, navies, coast guards, and naval aviation arms of more than 180 countries and territories. Large fleets and small maritime forces get equally thorough treatment as evidenced in this new edition, which highlights major and even minor developments that could have an impact on the world scene. A thorough indexing of material and a logical ship-typing system make the book easy to use and allow for quick comparisons between fleets. The guide continues to present timely, authoritative information supported by more than four thousand illustrations from correspondents throughout the world. From giant aircraft carriers and ballistic missile submarines to tugboats and launches, the characteristics and capabilities of ships large and small are reliably recorded. Complete descriptions of naval aircraft, weapons, weapon systems, and sensors are also provided along with useful commentary on organization, personnel strengths, and bases.
2004.332.204	Naval Institute Guide to Combat Fleets of the World - 2000-2001 : Their Ships, Aircraft, and Systems	Baker, A. D. (ed)	We also have a digital copy located in CD. (from usni.org:) (for 15th/2007 edition:) Internationally acknowledged as the best one-volume reference to the world's naval and paranaval forces, this popular Naval Institute guide is both comprehensive and affordable. Updated biennially since 1976, it has come to be relied on for all-inclusive, accurate, and up-to-date data on the ships, navies, coast guards, and naval aviation arms of more than 180 countries and

2004.332.206	Jane's All the World's Aircraft - 1941	Bridgman, Leonard (ed)	Jane's All the World's Aircraft is an aviation annual publication founded by Fred T. Jane in 1909. It is published by Jane's Information Group. Jane's All the World's Aircraft has chronicled a century of ever-accelerating aviation progress and recorded the particulars of an unprecedented number of flying machines, using the widest possible interpretation of that phrase, in the most minute detail. Six editors have had the privilege of commenting upon the significant aircraft and events of manned flight since the first edition appeared in November 1909 as All the World's Airships (which was then a generic term for any machine that flew). This first publication was seen as being ahead of its time but even the skeletal book showed the strength of Fred T Jane's standardised approach to data collection. The first edition even carried a pre-addressed

			return proforma for aviation pioneers to supply the details of new machines. Besides listing the different types of aircraft by nationality, the first issues covered aerial societies, journals and flying grounds and cost just 21 shillings (£1.05). Jane himself had a desire to fly and he was nearly killed doing so in 1909 whilst attempting a flight on Dartmoor. His aircraft caught fire, but he merely commented that it would be one less machine to include in his forthcoming work. As with Jane's Fighting Ships, Jane received extensive help from enthusiasts worldwide, including Louis Blériot, A.V. Roe and Prince Heinrich of Prussia. Jane censored the 1914 issue, which was published just after the outbreak of the First World War, blacking out whole sections describing British equipment and organisation. He noted in it that, for all practical purposes, aircraft have no more to do with peace than submarines. The work's accuracy helped morale by dispelling alarmist rumours about imminent German air raids, showing that the Germans did not possess anything but the smallest fleet of airships. Respect for the accuracy of Jane's All the World's Aircraft transcended political enmities. Cold War notwithstanding, Soviet authorities supplied Jane's with information. Such was the technical reference book's reputation that Argentina even provided details of its aircraft during the Falkland's Conflict in 1982. Altogether, there have been only 97 editions, mainly due to disruptions during the two World Wars. 2009 was the 100th Year of Jane's All the World's Aircraft. From Wikipedia, the free encyclopedia

This first publication was seen as being ahead of its time but even the skeletal book showed the strength of Fred T Jane's standardised approach to data collection. The first edition even carried a pre-addressed return proforma for aviation pioneers to supply the details of new machines. Besides listing the different types of aircraft by nationality, the first issues covered aerial societies, journals and flying grounds and cost just 21 shillings (£1.05). Jane himself had a desire to fly and he was nearly killed doing so in 1909 whilst attempting a flight on Dartmoor. His aircraft caught fire, but he merely commented that it would be one less machine to include in his forthcoming work. As with Jane's Fighting Ships, Jane received extensive help from enthusiasts worldwide, including Louis Blériot, A.V. Roe and Prince Heinrich of Prussia. Jane censored the 1914 issue, which was published just after the outbreak of the First World War, blacking out whole sections describing British equipment and organisation. He noted in it that, for all

			practical purposes, aircraft have no more to do with peace than submarines. The work's accuracy helped morale by dispelling alarmist rumours about imminent German air raids, showing that the Germans did not possess anything but the smallest fleet of airships. Respect for the accuracy of Jane's All the World's Aircraft transcended political enmities. Cold War notwithstanding, Soviet authorities supplied Jane's with information. Such was the technical reference book's reputation that Argentina even provided details of its aircraft during the Falkland's Conflict in 1982. Altogether, there have been only 97 editions, mainly due to disruptions during the two World Wars. 2009 was the 100th Year of Jane's All the World's Aircraft. From Wikipedia, the free encyclopedia

2004.332.218	Jane's All the World's Aircraft - 1969-70	Taylor, John W. R. (ed)	Jane's All the World's Aircraft is an aviation annual publication founded by Fred T. Jane in 1909. It is published by Jane's Information Group. Jane's All the World's Aircraft has chronicled a century of ever-accelerating aviation progress and recorded the particulars of an unprecedented number of flying machines, using the widest possible interpretation of that phrase, in the most minute detail. Six editors have had the privilege of commenting upon the significant aircraft and events of manned flight since the first edition appeared in November 1909 as All the World's Airships (which was then a generic term for any machine that flew). This first publication was seen as being ahead of its time but even the skeletal book showed the strength of Fred T Jane's standardised approach to data collection. The work's accuracy helped morale by dispelling alarmist rumours about imminent German air raids, showing that the Germans did not possess anything but the smallest fleet of airships. Respect for the accuracy of Jane's All the World's Aircraft transcended political enmities. Cold War notwithstanding, Soviet authorities supplied Jane's with information. Such was the technical reference book's reputation that Argentina even provided details of its aircraft during the Falkland's Conflict in 1982. Altogether, there have been only 97 editions, mainly due to disruptions during the two World Wars. 2009 was the 100th Year of Jane's All the World's Aircraft. From Wikipedia, the free encyclopedia

2004.332.252	Victory at High Tide : The Inchon-Seoul Campaign	Heinl, Robert Debs	One hundred and eighteen years before Communist divisions invaded the Republic of Korea, Karl von Clausewitz wrote, "A swift and vigorous transition to attack -- the flashing sword of vengeance -- is the most brilliant point of the defensive." Such a transition was the Inchon-Seoul campaign of September 1950, in which the U. S. Navy and Marine Corps turned Communist aggression into defeat and liberated

Object ID	Title	Author	Summary
			South Korea. Brilliantly set forth in this book is the step-by-step planning and execution of a great amphibious invasion -- infused by the strategic vision and courage of Douglas MacArthur and made possible by American naval power and command of the sea. Despite unparalleled natural obstacles, fierce enemies, doubt and indecision in Washington, and postdemobilization inertia following World War II, Inchon was captured and Seoul liberated within a fortnight in what has been called "a Twentieth-Century Cannae." Besides its carefully documented strategic and tactical insights, "Victory at High Tide" analyzes the effects of ill-digested Armed Forces unification on the Korean War and, using hitherto undisclosed sources, provides sharply etched, revealing views of Douglas MacArthur and other U. S. military leaders. In the general paucity of literature on the Korean War, "Victory at High Tide" fills a large gap and defines, as has never been done before, the significance -- both military and political -- of one of America's greatest victories. Illustrated with 32 pages of photographs and 16 maps and charts JACKET ILLUSTRATION BY CHARLES AND CUFFARI (from dust jacket flap)

Assault on the Liberty : The True Story of the Israeli Attack on an American Intelligence Ship

Ennes, James M.

USS Liberty (AGTR-5) was a Belmont-class technical research ship that was attacked by Israel Defense Forces (IDF) during the 1967 Six-Day War.

The USS Liberty incident was an attack on a United States Navy technical research ship, USS Liberty, by Israeli Air Force jet fighter aircraft and Israeli Navy torpedo boats,

Object ID	Title	Author	Summary
			on June 8, 1967, during the Six-Day War. The combined air and sea attack killed 34 crew members (naval officers, seamen, two Marines, and one civilian), wounded 170 crew members, and severely damaged the ship. At the time, the ship was in international waters north of the Sinai Peninsula, about 25.5 nmi (29.3 mi; 47.2 km) northwest from the Egyptian city of Arish. Both the Israeli and U.S. governments conducted inquiries and issued reports that concluded the attack was a mistake due to Israeli confusion about the identity of the USS Liberty, though others, including many of the ship's survivors that could be located four decades later, have rejected these conclusions and maintain that the attack was deliberate. In May 1968, the Israeli government paid US\$3,323,500 (US\$22.2 million in 2012) as full payment to the families of the 34 men killed in the attack. In March 1969, Israel paid a further \$3,566,457 in compensation to the men who had been wounded. On 18 December 1980, it agreed to pay \$6 million as settlement for the final U.S. bill of \$17,132,709 for material damage to the Liberty itself plus 13 years' interest. (from Wikipedia)

2004.332.303	Jane's Avionics - 1994-95	Brinkman, David MBE (ed)	"Jane's Avionics" contains detailed information on airborne electronic equipment for both military and civil aircraft, ensuring you stay up-to-date with the latest technological developments and new products. In-depth descriptions of fundamental technologies, including data link, radar, electro-optic systems and helmet-mounted displays provide an invaluable aid to making critical procurement, training and commercial decisions. Each entry is arranged by country of manufacture and contains information on function, development history, technical description, specifications, status and contractor. Colour images enhance assimilation and comparison of important display layouts, both individually and within the flight deck/cockpit environment. Comprehensive equipment and manufacturer indices enable rapid data search and browsing of related entries. (from Amazon.com)

2004.332.322	Jane's Fighting Ships - 1914	Jane, Fred T.	(from dust jacket flap:) A collectors' item and reference tool This is a facsimile reproduction of seventeenth issue of Jane's. The 1914 issue is an obvious choice for reprinting: here are drawn up the navies that were to change the course of history and themselves be changed out of recognition. 1914 was perhaps the heyday of the dreadnought and the battleship. As yet unmenaced by the aeroplane and the submarine, they were at once the supreme military deterrent, and a demonstration of the wealth and prestige of the countries that built them. The dreadnought was imitated throughout the world, and possibly contributed directly to the conflict that was shortly to engulf civilization. As one turns the pages, these mighty leviathans loom even larger through the magnifying glass of history. The "Barham" and the "Queen Elizabeth," "von der

Object ID	Title	Author	Summary
			Tann" and "Derflinger," the "Viribus Unitis" of the Austro-Hungarian navy, all look like dinosaurs surviving from a darker age. The writing, even then, was on the wall. All the first-class powers were developing submarines; the French navy even had a primitive aircraft carrier. But still the battleship dominated, for Jutland, Dogger Bank and the Coronels were in the future. Perhaps a lesson or two had been learnt from the Russo-Japanese War, but the old order stood firm and the mighty fleets catalogued here were still the major index of world prestige. There might have been something wrong with these blood and iron ships, but in 1914 it lay unrevealed. All old "Janes" are scarce; many people will be pleased to purchase an early edition at only a fraction of the current second-hand price. Jacket illustration: Viribus Unitis
2004.332.323	Jane's Fighting Ships - 1905/6	Jane, Fred T.	(from dust jacket flap:) Possibly the most interesting aspect of this, the eighth issue of Jane's, are the articles by combatants in the Russo-Japanese War, supplemented by a special series of photographs showing the ships destroyed and the extent of the damage suffered by others. There is a summary of naval actions during the war and notes on relevant strategy and tactics. Also included are revised rules of Jane's "Naval War Games." A prospectus on this and other Jane's Reprints is available on request.
2004.332.324	Jane's All the World's Fighting Ships - 1898	Jane, Fred T.	(from dust jacket flap:) A collectors' item and reference tool This is a facsimile edition of the first issue of "Jane's Fighting

Object ID	Title	Author	Summary
			Ships." Like other editions recently successfully reprinted by Arco, it is both a collectors' piece and a reference tool. It has the added interest of being the first attempt to bring to public notice a full account of the world's navies. Pictures, dimensions, tonnages, armament details are here for scholar or enthusiast with all their implications for the history we ourselves have lived.
2004.332.327	Brassey's Naval Annual 1945	Thursfield, Henry George (ed)	"Brassey" for 1945 was compiled while the war in Europe was in full blast , and though it appeared fairly certain that victory in the West would be achieved before the year was out, none could have asserted with confidence just when the end would come.
2004.332.328	Jane's Fighting Ships - 1937	McMurtrie, Francis E. (ed)	This book offers a glimpse of the latest developments within the Soviet Navy that is large, effective and still developing rapidly.

2004.332.401	Admiral of the Ocean Sea : A Life of Christopher Columbus	Morison, Samuel Eliot	Christopher Columbus (Spanish: Cristóbal Colón; before 31 October 1451 – 20 May 1506) was an explorer, colonizer, and navigator, born in the Republic of Genoa, in what is today northwestern Italy. Under the auspices of the Catholic Monarchs of Spain, he completed four voyages across the Atlantic Ocean that led to general European awareness of the American continents. Those voyages, and his efforts to establish permanent settlements in the island of Hispaniola, initiated the process of Spanish colonization, which foreshadowed the general European colonization of what became known as the "New World". 2004.332.443	Basic Military Requirements	Bureau of Naval Personnel	From the Preface "This book is a self-study training course covering the military requirements for men and women in the pay grades of E-2 and E-3 of the U.S. Navy and Naval Reserve. The military subjects with which the student must be familiar are outlined officially in the Manual of Qualifications for Advancement in Rating, NavPers 18068B. Before beginning to study for advancement, the student should check the Quals Manual for the latest changes. This text covers the military requirements for the paygrades concerned, but it is only an introductory training course and should be used in conjunction with other manuals and forms of instruction. The subject matter is general in nature and applies to all ratings."
2004.332.452	Cruisers : An Illustrated History 1880-1980	Preston, Antony	Cruisers have always been a difficult type of ship to categorize. Naval historian Antony Preston defines the cruiser as the smallest ocean-going warship but the largest which could be built in numbers. The term originated in the eighteenth century when a 'cruizer' was any warship on detached duty. Over the years, some cruisers became almost as large as battleships to protect merchant shipping, while others, developed for scouting duties, were no bigger than destroyers. In 1922 an international treaty defined two separate categories: a 10,000-ton (maximum) 'heavy' cruiser armed with eight-inch guns

Object ID	Title	Author	Summary
			and a 'light' cruiser which could equal the heavy cruiser in tonnage but had guns no larger than six inches. The Germans departed from this definition with their 'panzerschiff' concept. These pocket battleships were in fact armoured cruisers whose primary function was commerce raiding. The Deutschland, (later called the Lützow,) Admiral Graf Spee and Admiral Hipper did not live up to the German Navy's hopes and claims. The myth of the 'panzerschiff' was finally demolished at the Battle of the River Plate when the Graf Spee did not have the speed to outrun the British cruisers Exeter, Ajax and Achilles. Cruisers had a good record in World War II. The cruiser Prinz Eugen scored the first hits on the HMS Hood in May 1941 and started the fire which may have caused her to blow up. Three days later it was a shell from HMS Dorsetshire which knocked out the Bismarck's fire control just as the Norfolk did to the Scharnhorst in December 1943. In the Pacific, American heavy cruisers gained the upper hand against the Kirishima during the naval battles off Guadalcanal and wore down the Japanese attempt to recapture the island. The advent of carriers and the development of naval aviation called for a new theory of sea warfare in which the cruiser seemed to have no place. Few navies continued to build cruisers in the ten years following World War II but now a new category has been revived. There has always been a need for destroyer-type intermediate ships, which are not too expensive to build. Thus a new generation of missile-armed cruisers have come into being. The need for an independent cruiser to back up the capital ships remains. Antony Preston succinctly untangles the complexities of

Object ID	Title	Author	Summary
			defining this hybrid ship and describes its importance in the context of naval history. He traces the different theories of the cruiser's role and the different types of cruisers built as well as giving a glimpse of life on board. The lively text is supplemented by technical illustrations, maps and numerous rare and unusual photographs. (from dust jacket flap)
2004.332.454	Jackrabbits to Jets : The History of Naval Air Station, North Island, San Diego, California	Sudsbury, Elretta	Naval Air Station North Island or NAS North Island (IATA: NZY, ICAO: KNZY, FAA LID: NZY) is located at the north end of the Coronado peninsula on San Diego Bay and is the home port of several aircraft carriers of the United States Navy. It is part of the largest aerospace-industrial complex in the United States Navy, Naval Base Coronado in San Diego County, California. (from Wikipedia)
2004.332.457	Air War Over Korea	Jackson, Robert	On June 25th 1950, eight North Korean divisions stormed across the 38th Parallel into the Republic of South Korea and sparked off a bitter, bloody conflict that was to last three years; a conflict that was the first real trial of strength between the opposing ideologies of communism and democracy. In many ways, Korea was like no other war of the twentieth century. It was a war that saw the use of air power on a massive scale as east and west hurled their latest military aircraft into the arena; a war that found American Sabres and Soviet MiGs locked in a deadly thrust of combat close to the speed of sound six miles above the Yalu River, while elderly piston-engined Mustangs braved the nightmare meshes of enemy flak to fly in continual support of United Nations ground forces. Above all, the Air War over Korea is a story of men and

Object ID	Title	Author	Summary
			courage -- of World War II veterans, many of them already aces, volunteering for combat duty in the cockpit of a jet and proving their worth day after day in the stratosphere against the cream of Russia's fighter planes. It is the story of the men who flew the United Nations' "workhorses" -- the Thunderjets, Shooting Stars, Panthers, Corsairs and Skyraiders, the B-29 crews who sacrificed themselves in MiG Alley during the first year of the war, and of the Meteor pilots of No. 77 Squadron RAAF, whose first encounters with the MIG-15 proved disastrous. It is a story of individuality -- of cold, ruthless skill that turned fighter pilots into jet aces. (from dust jacket flap)

2004.332.459

Stealth : Deception, Evasion, and Concealment in the Air Richardson, Doug

Aircraft that no radar can find, that no missile can strike—it sounds like science fiction, but it is fast becoming a reality.

Stealth, the most complete book yet produced on today's hottest aviation and military topic, describes the aircraft and the technology behind the most significant developments in aerial warfare since the jet engine and atomic weapons. It penetrates the cloud of secrecy, disinformation, and speculation to provide a detailed survey of the ingredients of this top-secret technology, its current uses, and its influence on the tactics of the 21st century.

Basic stealth principles are revealed, including the careful design of the shape, size, and camouflage colors of the next generation of warplanes. More sophisticated techniques are examined, including the use of new radar-absorbing materials, the control of heat and sound emissions, the use of sophisticated electronic warfare systems, and the development of new operating tactics.

Object ID	Title	Author	Summary
			In addition, author Doug Richardson considers the effects that stealth technology will have on future combat operations, setting it in the context of modern warfare and showing how stealth aircraft will navigate, detect targets, fight and survive in the high-intensity conflicts of tomorrow. Richardson also reveals some of the methods that will be used to counter the dramatic advantages of stealth technology and how the never-ending battle of measure and countermeasure will continue. America's stealth bomber, the B-2, carries a high price tag per aircraft, at a time when hard choices must be made about defense spending. To make an informed decision, the public needs the facts, not the hype and the mumbo-jumbo. No one with any serious interest in aviation or modern warfare can afford to ignore this book. DOUG RICHARDSON is a defense journalist specializing in the fields of aviation, guided missiles, and electronics. He was formerly defense editor of Flight International, editor of Military Technology and Economics, and editor of Defense Materiel. He has written several books, including The Illustrated Guide to Electronic Warfare, The AH-64 Fact-File, The F-16 Fact-File, and An Illustrated Survey of the West's Modern Fighters. He has also contributed to The Intelligence War and Advanced Technology Warfare. Jacket design by Peter A. Davis Front jacket illustration by Stephen Seymour Back jacket photograph courtesy Northrop Corporation (from dust jacket flaps) Includes: Advanced Tactical Aircraft (ATA)

2004.332.460	Uniform for the United States Navy	United States. Navy Dept.	This books lists what each rank in the Navy should wear for different occasions. It mostly contains colored reproductions of Navy insignia (sleeves, belt collar, etc), but not any images of full dress uniforms.
2004.332.461	Seachest, The - 1960 - Class 47	Lucas, J. R. (ed)	The year book of the United States Naval School, Officer Candidate Naval Schools Command, Newport, Rhode Island. During the 16 week course, the Class 47 future officers were schooled in engineering, navagation, operations and weapons as well as well as other duties.
2004.332.462	Seachest, The - 1959 - Class 42	Weldon, Tom (ed)	The year book of the United States Naval School, Officer Candidate Naval Schools Command, Newport, Rhode Island.
2004.332.463	U.S. NMCB-FIVE - 1971-1972	McGougan, Mike (ed)	Pictorial description of United States Naval Mobile construction Battalion Five, U-S -Pacific Fleet-Seabees. Show pre deployment training at Port Hueneme and San Diego. Book covers work performed in Okinawa, Philippines, Taiwan, China Lake (CA), and Thailand.
2004.332.464	Oak Leaf - 1958	None Stated	Oak Leaf is the yearbook of the U. S. Navy Supply Corps School, Athens, Georgia. A history of the school is listed on page 150. After six months the men of companies i through w and a through d are graduates and leave the college skilled in the science of supply, educated in the rudiments of Naval leadership and ready for sea.
2004.332.465	Naval Station Puget Sound of Sand Point	United States. Navy. Morale, Welfare and Recreation Department.	This book is a pictorial history of the United States Naval Station, Puget Sound, Sand Point Way, Seattle, WA. spanning from its inception in 1920 to the Fall of 1995 when it ceased operation.
2004.332.466	Naval Ships Technical Manual, Chapter 9000, General	Naval Ships Systems Command	An index to of NAVSHIPS tech manual 9000 series publications.
2004.332.467	Naval Ships Technical	Naval Ships Systems Command	Basic regulations pertaining

Object ID	Title	Author	Summary
	Manual, Chapter 9002, Administration of Funds		to the administration of funds appropriate for programs assigned to the Naval Ships System Command.
2004.332.468	Naval Ships Technical Manual, Chapter 9006, Submarines	Naval Ships Systems Command	Terminology, systems and equipment, inspection, maintenance, operation and other information unique to submarines.
2004.332.469	Naval Ships Technical Manual, Chapter 9006 - Amendment 1, Section VIII, Submarines Antennas and Masts	Naval Ships Systems Command	Installation, safety precautions and maintenance of submarine Antennas and Masts.
2004.332.470	Naval Ships Technical Manual, Chapter 9030, Readiness and Care of Vessels in Inactive Status.	Naval Ships Systems Command	General instructions, Dehumidification, Cathodic protection, preservation by solvent Cutback Corrosion Preventive and return to Active Status of Vessels.
2004.332.471	Naval Ships Technical Manual, Chapter 9070, Docking Instructions and Routine work in Drydock.	Naval Ships Systems Command	General instructions, Docking procedures , precautions for ships in Dry-Dock, work on ships in Dry-Dock and Undocking procedure.
2004.332.472	Naval Ships Technical Manual, Chapter 9090, Locking Procedures and Torque Wrenches for Threaded Fasteners.	Naval Ships Systems Command	Use of lock nuts, lock bolts, lock washers, set screws, tablocks, lock pins, safety wiring, staking, the selection of the thread locking coatings and torquing.
2004.332.473	Naval Ships Technical Manual, Chapter 9150, Gasoline (Aviation and Automotive) and JP-5 Fuel Systems	Naval Ships Systems Command	General and precautionary, gasoline stowage and gasoline tankers.
2004.332.474	Naval Ships Technical Manual, Chapter 9190, Preservation of Ships in Service (Paints and Cathodic Protection).	Naval Ships Systems Command	General Information, Surface Preparation, Methods of Application, Detail Painting Requirements, Procedures, Boats and Small Craft, Special Items of Shipboard Equipment, Materials, Coating Performance, Reconditioning of Flooding Equipment and Cathodic Protection.
2004.332.475	Naval Ships Technical Manual, Chapter 9210,Hydraulic Equipment.	Naval Ships Systems Command	General, Pumps, Motors and Actuators, Pipe, Tubing,Hoses and Fittings, Valves, Fluids, Reservoirs, Heat Exchanges and Accumulators, Filters and Strainers, Maintenance- Contamination, Cleaning and Preservation and Packings Gaskets and Seals.
2004.332.476	Naval Ships Technical Manual, Chapter 9230, Industrial Gases; Generating Handling and Storage.	Naval Ships Systems Command	Gases, compressed and liquefied, Gas cylinders and Valves, Cryogenic liquid storage, Cryogenic Charging

Object ID	Title	Author	Summary
			Systems, Gas generating Equipment, Liquid and Gaseous Oxygen-Personnel Protection and Safety Precautions and Shipboard Gas Piping Systems (Reserved)
2004.332.477	Naval Ships Technical Manual, Chapter 9331, Life Preserves, Use and Periodic Testing of.	Naval Ships Systems Command	Inherently Buoyant Life-Preserves and Inflatable Life Preserves.
2004.332.478	Naval Ships Technical Manual, Chapter 9332 : Sanitation, Living, Berthing, Medical and Dental Equipment	Naval Ships Systems Command	Sanitation, Ships Cleaning Equipment, Spaces for the Storage, Preparation, and Service of Food, Waste Disposal, Disease Vector and Pest Control, Bedding, Medical and Dental Appliances and Furnitures. Naval Ships Technical Manual, Chapter 9332 : Sanitation, Living, Berthing, Medical and Dental Equipment (superseding previous chapters 9330 (except life preserves) 9360, and 9370).
2004.332.479	Naval Ships Technical Manual, Chapter 9411, Propulsion Turbines (Steam)	Naval Ships Systems Command	General Information, Turbine Description, Operation, Casualty Control (and Safety Precautions) , Operations Limits and Precautions, Maintenance, Tests, Inspections, Records and Reports, Ship Notes and Repair Procedures and Preservations, Inspection and Return-to-service Procedures.
2004.332.480	Naval Ships Technical Manual, Chapter 9412 Diesel Engines (Propulsion and General Purpose)	Naval Ships Systems Command	General, Operation, Operating Limitations, Submarine Propelling Plants, Maintenance, Rust Prevention, Diesel Fuel Oil, Diesel Engine Lubricating Oils, Filters and Strainers, Cooling Water Systems, Spare Parts and Allowance Lists, Records and Safety Precautions.
2004.332.481	Naval Ships Technical Manual, Chapter 9416 Gas Turbines.	Naval Ships Systems Command	General Information, Operation, Operating Limitations, Maintenance, Engine Replacement, Fuel Oils, Lubricating Systems, Filters and Strainers, Factors Affecting Loading of Engines, Spare Parts and Allowance Lists, Safety Precautions and Preparation for Shipment.
2004.332.482	Naval Ships Technical Manual, Chapter 9460 Condensers and Air Ejectors.	Naval Ships Systems Command	General Information, Operation, Care, Repair, Safety Precautions for Condensers and Air Ejectors.
2004.332.483	Naval Ships Technical	Naval Ships Systems Command	Reciprocating Pumps,

Object ID	Title	Author	Summary
	Manual, Chapter 9930 Fire Fighting - Ship		Fire Fighting Equipment, Protective Equipment, Fire Fighting and Fire Hazards.
2004.332.505	Naval Ships Technical Manual, Chapter 9940 Salvage Section I Submarine Safety Escape and Rescue Devices	Naval Ships Systems Command	Conditions attendant on submarine sinkings, collective escape (Rescue chamber), collective escape (DSRV), individual escape and Escape training.
2005.112.001	Magic of Flight, The	MacGillivray, Greg (director, producer)	Relive the historical first flight of the Wright Brothers in 1903, and see a variety of modern aircraft, the people who fly them and the human potential of training and performance. "Originally created for exhibition in IMAX® theaters"--Container.
2005.112.003	Gulfstream IV	Gulfstream Aerospace Corporation	This video contains two sales presentations: one given to the Navy League which runs 11 minutes and another one on the Gulfstream IV flight deck of the future which runs 7 1/2 minutes.
2005.112.004	Exploitation and Expansion of the Maritime Strategy in the 100th Congress	Association of Naval Aviation	President Reagan, in submitting the FY-88 Budget to the Congress, decided to include two new "Improved Nimitz" aircraft carriers. This was not anticipated by many members of the Congress, and the task of convincing them of the strategic and economic value of the decision fell to Rear Admiral Edward J. "Ned" Hogan, the Navy's Chief of Legislative Affairs. At the April 29, 1987 meeting of the ANA (Association of Naval Aviation) Washington-Anacostia Squadron, Admiral Hogan explained both the carrier acquisition program and his considerations in approaching Congress.
2005.112.006	Project February - A Report on Naval Aviation in the Year 2010	Association of Naval Aviation, Inc.	In February, 1988, a group of twelve highly experienced Navy and Marine Corps officers were ordered to convene a Study Group in Washington for the purpose of developing a picture of naval Aviation in the year 2010 and to report their results to OP-05 and the DCS/Air. Their job was to envision nay and Marine Corps warfighting requirements, identify the aircraft, weapons

Object ID	Title	Author	Summary
			systems and manpower needed to meet those requirements, and to do so with realistic cost expectations. Project February as it was named, was a success and has subsequently guided planning for the future structure and equipment for Naval Aviation. This is an unclassified report of the "Project February" study results as authorized by VADM Robert F. Dunn, USN, Assistant Chief of Naval Operations for Air Warfare (OP-05) and presented by his Special Assistant for Air Warfare Plans and Analysis (OP-05W), Mr. Bruce Powers. For additional information on the study, see the winter '88 edition of ANA's magazine, Wings of Gold.
2005.112.007	Weaponry and Explosives Laboratories Documented During "Defensive Shield"	Israel Defense Forces. Spokesperson's Unit	One of the goals of Israel's Defensive Shield operation in 2002 was to locate and destroy weapons and explosives laboratories. Defensive Shield was sparked by a suicide bombing at Passover in 2002. The film shows soldiers of the Israel Defense Forces finding and destroying weapons and explosives found at Arafat's Compound, Salfit, Bethlehem, Nablus, Church of the Nativity, Ramallah, Qalqilya, Tulkarem, and Jenin between 30 March 2002 and 8 April 2002. The film is in Hebrew with English subtitles.
2005.112.008	ANA 1992 - The Blue Angels (F/A-18)	Northrup	Promotional music video produced by Northrop of the Blue Angels (in McDonnell Douglas F/A-18 Hornets) set to the Moody Blues' "Your Wildest Dreams."
2005.112.010	Rockwell-MBB X-31 - Pilot Groves	None Stated	This video shows pilot groves for the flight of the Rockwell-Messerschmitt-Bölkow-Blohm X-31 Rockwell-MBB-X-31 (flight # 1-166), Ops # 9762, BuNo. 164584 on 28 September 1993. DVD copy at 2005.112.014.
2005.112.011	To Fly, Hairy Old Days, Air Power at Sea, Sea Legs	None Stated	(from imax.com (RE: "To Fly!")) A stunning overview of transportation and flight in America. TO FLY! presents

Object ID	Title	Author	Summary
			an emotional and visual experience as audiences float over the Vermont countryside and Niagara Falls in a balloon, thrill to the spirit of flying from wild barnstorming to the precision of the Blue Angels, and explore the beauties of flight with a cross-country cruise, hang-gliding in Hawaii and a rocket lift-off. Produced and distributed by MacGillivray Freeman Films. Produced and directed by Greg MacGillivray and Jim Freeman for Francis Thompson Inc. and the National Air and Space Museum, Washington, D.C. A Francis Thompson Inc. production, sponsored by Conoco Inc., a Dupont Company.
2005.112.012	National Museum of Naval Aviation	White, Bob	From the first plane to cross the Atlantic to the first man on the moon, naval flyers have led the quest to expand our horizons. Experience the colorful history of these daring aviators and see the machines that made it all possible. Enjoy historical footage from WWI, WWII and the famous USS Yorktown. Then go behind the scenes with the daredevil Blue Angels --it's a ride you'll never forget. (From the box).
2005.112.013	CNN Coverage of Persian Gulf War, 1991	None Stated	Segments on this video include: President H. W. Bush at a press conference discussing the war; a press conference with Secretary of Defense Dick Cheney with Chairman of the Joint Chiefs of Staff, Colin Powell discussing the first day of the war; several minutes that were filmed from planes showing bomb strikes; CNN reporters discussing the war; an Iraqi television clip; and an EU meeting about the French Peace Plan. Most of these videos are available on youtube.com. The tape has a complete CNN basketball game between the San Antonio Spurs and the New Jersey Nets, and also includes CNN entertainment with Mary Hart and John Tesh.
2005.112.014	Rockwell-MBB X-31 - Pilot	None Stated	This is a dvd copy of vhs

	Groves		2005.112.010. This video shows pilot groves for the flight of the Rockwell-Messerschmitt-Bölkow-Blohm X-31 Rockwell-MBB-X-31 (flight # 1-166), Ops # 9762, BuNo. 164584 on 28 September 1993.
2005.118.001	Watch Officer's Guide - 1979 : A Handbook for All Deck Watch Officers	United States Naval Institute	Watch Officer's Guide, 1979, United States Naval Institute.
2005.118.024	First and the Last , The	Galland, Adolf	A first person account of flying with the Luftwaffe during World War II. Includes information : Galland, Adolf, 1912-Germany. Luftwaffe--Biography. World War, 1939-1945--Aerial operations, German. World War, 1939-1945--Personal narratives, German. World War, 1939-1945--Germany. Fighter pilots--Germany--Biography. Generals--Germany--Biography. Channel Dash
2005.118.026	Destroyer Operations in World War II	Roscoe, Theodore	From the Battle of the Atlantic to the bloody shores of Okinawa - American destroyers waged war in the greatest sea battles of naval history. Hunting down enemy subs... battling dive bombers... escorting convoys... running blockades... spearheading amphibious invasions. The front-line destroyers of the U.S. Carrier Task Force became the mightiest offensive weapon of WW II. This is the true story of those fighting ships and the destroyermen who manned them through costly defeats to final victory - a powerful narrative of war at sea as lived on board Americas invincible TIN CANS. "True stories of World War II that make fiction pale by comparison!"-Associated Press (from back cover of paperback edition of "Tin Cans")
2005.119.001	USS Midway CVB 41 Mediterranean Cruise 1952	Fox, Duane C. (ed)	Pictorial account of the 126-day deployment of USS Midway

Object ID	Title	Author	Summary
			(CVB-41) to the Mediterranean Sea in 1952. The ship departed Norfolk, VA on 12 January and returned to Norfolk on 5 May. Port visits included Gibraltar, Augusta, Naples, La Spezia, Genoa, Palermo, Gulf Juan, Suda Bay, Athens and Palma.
2005.119.002	USS Midway (CV-41) - Mediterranean Cruise - 1953	Hague, R. B. (ed.)	Pictorial account of USS Midway 170-day Mediterranean cruise From December 1952 to May 1953, of which 65 days were spent in various ports. The ship departed from and returned to Norfolk, VA. Post calls included Gibralter, The French Riviera, Marseilles, Barcelona, Algiers, Augusta, Taranto, Naples, Genoa, LaSpezia, Rhodes, Salamonia, Palma and Oran. Significant operations included participation in NATO exercise Rendezvous in March.
2005.123.009	USS Midway Attack Squadron VA-25 Vietnam War - 1965	Ettinger, Harry Edwin (ed)	USS Midway Attack Squadron VA-25, Vietnam War - 1965 (This binder incorporates in one binder all the materials formerly listed as 2005.123.009, 2005.123.010 and 2005.123.011) This is a collection of papers assembled by Harry Edwin Ettinger, Jr. who was CO of VA-25 (Fist of the Fleet) aboard the USS Midway in 1965. They were flying A-1 Skyraiders (nicknamed SPADs). Most of the correspondence deals with 1) shooting down of MiG by squadron on 26 June 1965, 2) squadron winning Battle Efficiency Award, 3) rescue of fighter pilot LTJG Jon Harris on 20 September 1965 from USS Independence, 4) rescue of fighter pilot LTJG Grant R. Townsend 28 July 1965, and 5) recommendations for awards. Ettinger was awarded the Distinguished Flying Cross for his actions on 28 July 1965 and another one for his actions on 20 September 1965. Included in this folder are: 1. Communications to and from the Midway

Object ID	Title	Author	Summary
			2. Communication from Midway to CTF 77 and others with statistics on 1965 Midway's combat cruise with Air Wing Two (CAW-2) : 146 days of combat operations in the South China Sea which included 107 days on Yankee Station and 39 days on Dixie Station; 14,503 sorties; 16 million pounds of ordnance dropped; three Migs destroyed; 13,536 carrier landings made; 17 aircraft lost over enemy territory; 13 shipmates killed in action and four missing in action. 3. Rescue of LTJG Harris includes: Combat Rescue Report of HC-1 and VA-25; picture of HC-1 crew (with names) with Harris on USS Galveston; Notes from Harris, audio tape of Harris rescue 4. Copy of article about VA-25 from Midway West, October 1965 5. History of VA-25 after WWII to six deployments with USS Midway to Westpac and the end of propeller aircraft 6 April 1968 6. Memo to CAG-2 regarding PT Boat Strike 29 April and 25 May 1965
2005.127.001	USS Midway 1963-1964	Romano, Jerry (ed)	USS Midway (CVB/CVA/CV-41) aircraft carrier; lead ship of the class. A pictorial summary of the USS Midway crew on a deployment from Alameda NAS to the western Pacific with the Seventh Fleet from 8 November 1963 to 26 May 1964 with CAW -2 consisting of VF-21, VF-24, VA-22, VA-23, VA-25, VAH-8, VAW-11, and VFP-63 embarked aboard. Port visits included Hawaii; Subic Bay, The Republic of the Philippines; Hong Kong; and Sasebo, Beppu, Iwakuni, and Yokosuka, Japan.
2005.128.001	USS Midway (CV-41) - Mediterranean Cruise - 1953	Hague, R. B. (ed.)	Pictorial account of USS Midway 170-day Mediterranean cruise From December 1952 to May 1953, of which 65 days were spent in various ports. The ship departed from and returned to Norfolk, VA. Post calls

			included Gibraltar, The French Riviera, Marseilles, Barcelona, Algiers, Augusta, Taranto, Naples, Genoa, LaSpezia, Rhodes, Salamonia, Palma and Oran. Significant operations included participation in NATO exercise Rendezvous in March.
2005.128.002	USS Midway CVB 41 Mediterranean Cruise 1952	Fox, Duane C. (ed)	Pictorial account of the 126-day deployment of USS Midway (CVB-41) to the Mediterranean Sea in 1952. The ship departed Norfolk, VA on 12 January and returned to Norfolk on 5 May. Port visits included Gibraltar, Augusta, Naples, La Spezia, Genoa, Palermo, Gulf Juan, Suda Bay, Athens and Palma.
2005.137.001	USS Midway CVA-41, Ship's Log, October-December, 1953	USS Midway	Logbook, USS Midway CVA-41, Ship's Log 1October to 31 December 1953 and Officers Roster of same period 1953. We usually call these Deck Logs rather than Logbook or Ship's Log. This copy was found in the print shop and returned to us on 5/30/2024. It was listed as missing. Phil updated it to okay, and Bonnie moved it to the Library and changed the home location.
2005.149.003	Rules and Regulations for Licensing and certificating of Merchant Marine Personnel	U.S. Coast Guard	Rules to be complied with by members of the U.S. Merchant Marine and to be administered and enforced by the U.S. Coast Guard on behalf of the U.S. Treasury Department. Major sections headings are: Basis and Purpose of the Regulations; General Requirements for All Deck and Engineering Officer Licenses; Professional Requirements for Deck Officer Licenses (Inspected Vessels); Professional Requirements for Engineering officer Licenses (Inspected Vessels); Licensing of Officers for Uninspected Vessels; Motorboat Operators' Licenses; and Registration of Staff Officers.
2005.151.001	Flying Missile - Story of V-2 Rocket Launch from Midway	None Stated	Operation Sandy was the codename for the post-World War II launch of a captured V-2 rocket from the deck of the United States Navy aircraft carrier USS Midway on September 6, 1947. It marked the first launch of a large

Object ID	Title	Author	Summary
			rocket, and the only time for a V-2, from a ship at sea.[1] Operation Pushover was a follow-up test in late 1949 to assess the danger to a carrier from a V-2 explosion. (from Wikipedia)
2005.161.006	Armed Forces Officer, the	Department of Defense	Book, "The Armed Forces Officer" 1950
2005.163.001	USS Midway (CVA-41) - World Cruise - 1954-55	Patureau, Alan C. (ed.)	Pictorial account of the world cruise of USS Midway in 1954-55, conducted as Midway was changing homeports from Norfolk, VA to the west coast of the U. S. The ship departed Norfolk 27 December 1954 and transited to the Pacific via the Cape of Good Hope. She operated in the western Pacific with the U.S. Seventh Fleet, conducting the Formosa Straits patrol and other fleet exercises and maneuvers in the South China Sea. She arrived at her new homeport of Alameda, CA on 14 July 1955. She remained there for only a week before proceeding north for a major overhaul at Bremerton, WA which commenced on 3 August 1955. Port calls during her deployment included Mayport, Capetown, Colombo, Manila, Hong Kong, Yokosuka and Pearl Harbor.
2005.164.001	Naval Aviation - Take Off and Landings	None Stated	A DVD copy of this video is available 2005.164.011. This is a short video with a music background that shows take offs and landings from an aircraft carrier. There is a short clip that shows the Ouija board, and some scenes of air operations at night. The planes that we identified are in the order they appear on the film are: F/A-18 Hornet F-14 Tomcat S-3A Viking F/A-18 Hornet C-2A Greyhound S-3A Viking F/A-18 Hornet S-3A Viking F-14 Tomcat EA-6B Prowler F/A-18 Hornet E-2C Hawkeye F-14 Tomcat

2005.171.008	North American NA-16/AT-6/SNJ	Hagedorn, Dan	The NA-16 was the brainchild of J. H. "Dutch" Kindelberger, J. L. Atwood and H. R. Raynor, based on a crude sketch which NAA described as "A historical document in the annals of North American." Kindelberger and Atwood left Douglas to join NAA in July, 1934, and the NA-16 is reputed to have been designed and built in something like 9 weeks, so the first flight on 4-1-35 with Eddie Allen at the controls at Dundalk gives some measure of the gestation period of the design. The

			original, open-cockpit NA-16 was not the configuration tested in the Basic Trainer Competition at Wright Field. The official Air Corps Engineering Section Memorandum Report, dated 5-27-35 definitely describes the aircraft with the "cockpit cabins closed."
2005.171.009	Maneuvering Board Manual 1969	USN	Book, Maneuvering Board Manual 1969, US Naval Oceanographic Office
2005.171.010	Douglas A-1 Skyraider	Davis, Larry	The A-1 had a lot of names over the years...some unofficial, some not -- and some that were not complimentary. In 1945, it was introduced as the Dauntless II; in 1946 it was renamed the Skyraider. To its crew though, it was the Able Dog, Spad, Queen, Big Iron Bird, Flying Dump Truck, or simply the AD. Its missions were as varied as its nicknames. A-1s flew as dive bombers, torpedo bombers, airborne early warning craft, flying ambulances, aerial tankers, and search-and-rescue support. While this propeller-driven aircraft may appear to have been an anomaly in the jet age, the A-1 proved to be an effective and versatile platform well into the 1970s. It even served in Vietnam, scoring victories over North Vietnamese MiGs. Includes: Vietnam MiG kills Dive and Torpedo Versions Tech Manual Drawings Battle Damage Photos Gun and Ordnance Loadings Cockpit and Crew Stations

2005.256.026	All-Weather Fight Manual	Office of Naval Operations	From the Foreword "The All-Weather Flight Manual has been prepared under the direction of the Deputy Chief of Naval Operations (Air) by representatives of Air Force, Atlantic Fleet; Air Force, Pacific Fleet; Naval Air Training Command; and the Fleet Logistic Air Wings. Need for service-wide distribution of available information concerning instrument flight and all-weather operations has been apparent for the purpose of standardization of procedures and of disseminating information available only through extensive search and study. An effort has been made to place under one cover sufficient information to provide the pilot with the means to achieve well-rounded proficiency in this field. The JRB/SNB is the standard instrument training aircraft, and basic work has been outlined with this in mind. Chapters have been arranged to provide the officer in charge of instrument training with an orderly outline useful in conducting ground training. Patrol squadrons and other units not using the JRB/SNB will find most of the material adaptable to their use... Part 1 of the manual includes that information considered necessary for a complete basic course in instruments. Part 2 is a brief aerological review--the minimum required by a naval aviator. Part 3 is a summary of information which will acquaint the pilot with all-weather techniques. Certain phrases

Object ID	Title	Author	Summary
			of all-weather flying lend themselves to differences of opinion and varying techniques. An attempt has been made to present the best, or a working example, of information which is not classified. The publication is produced in loose-leaf form in order that new developments and important corrections may be issued as required..."

This unique book results from combined effort and inspiration of more than 30 of the world's outstanding aviation technical and other specialists. This book has produced a record of human flight from the bird-men to the supersonic aircraft and space vehicles.
2005.301.001	Embarcadero	Dillon, Richard H.	Embarcadero - Being a Chronicle of True Sea Adventures from the Port of San Francisco with foreword by William Hogan in XIII Chapters beginning with The Odyssey of Bernard Gilboy who sailed seven thousand miles from San Francisco alone in 162 days to Australia departing August 18, 1882. Chapters continue with other great adventures from ;San Francisco's Own Pirate to Bully Waterman, Clipper Skippers, to Wells Fargo's Gold Boat, Abandon Ship, and Shanghai Days in San Francisco. William Hogan, Book Editor for the San Francisco Chronicle, and devotee of Western Americana in particular San Francisco's colorful history.
2005.301.002	Naval Warfare: An Illustrated History	Humble, Richard	The clash of nations on the high seas has had a profound effect on world history. Ever since the first hand-to-hand galley battles of classical times, states have relied for their survival and prosperity on the strength of their sea power. Each new advance in technology has, in time, produced a countermeasure, and, as the balance tipped this way and that, the deadly efficiency of today's missile-armed navies has evolved. But ships and weapons alone are not the whole story. The men who sailed the ships, laid the strategy and manned the guns have just as important a place in history. This book tells the story of steadily

Object ID	Title	Author	Summary
			advancing technology proving itself against a background of human heroism and tragedy. "Naval Warfare" is divided into six parts, each dealing with a particular era of naval history. The introductions to each part give an in-depth account of the new technology of that age, and the resultant innovations in naval tactics and strategy. There are separate sections on every major naval campaign from the sea battles of ancient Greece and Rome, through Lepanto and Trafalgar, right up to the present day, including the recent war in the Falklands. The most important naval commanders, from Drake and Hawkins to Nelson, Beatty and Donitz, are also featured separately, together with accounts of their most famous battles. The book is illustrated with over 430 photographs, many in color, as well as several maps and diagrams. It is quite simply the most comprehensive account of this fascinating subject available. With a Foreword by Peter Kemp, former head of the Royal Naval Historical Branch Front cover photograph: HMS Ark Royal (Ajax News and Feature Service/Ajax News Photos) Back cover: Naval warfare in the Middle Ages (Bibliotheque Nationale, Paris) (from dust jacket flap)
2005.301.003	Glory Road; The Bloody Route from Fredericksburg to Gettysburg	Catton, Bruce	This book follows the Army of the Potomac from the Battle of Fredericksburg in the fall of 1862 through the Battle of Chancellorsville in the spring of 1863 and culminates in the decisive Battle of Gettysburg in July 1863. Catton focuses on the individual experiences of soldiers (volunteers, enlistees and bountymen), as well as the three Union Generals (Burnside, Hooker, and Meade.) He brings to life many

Object ID	Title	Author	Summary
			previously unknown people such as the soldier who invented 'Taps', a private who captured a Confederate General, and a laundress who brought hot coffee and hardtack to the solders on the firing line.
2005.301.004	Naval Warfare Under Oars, 4th to 16th Centuries : A Study of Strategy, Tactics and Ship Design	Rodgers, William Ledyard	This book is a classic study of naval strategy and fleet tactics in the days of rowing ships and is acknowledged to be the best book ever written on the subject. With its companion volume, Greek and Roman Naval Warfare, it offers a thorough examination of the principles of early naval warfare, principles that have remained valid from ancient times onward despite dramatic changes in weaponry and ship design.
2005.301.005	Thunder of the Guns : A Century of Battleships, The	Macintyre, Donald G. F. W.	With the advent of the ICBM and the atomic-powered submarine, the long reign of the battleship has been brought to a close. For a hundred years ironclad, steam-driven battleships ruled the seas as the hard core, the line of battle, of the navies of the world. Their design, gun-power, thickness of armor and speed were all matters of intense rivalry amongst the nations which aspired to be rated first-class naval powers. Though strictly utilitarian of purpose, they acquired in their later days a majestic beauty and an air of irresistible power which made a profound impression on their beholders. To those who served in them they became imbued with personalities of their own. Here is an account of the development of these great ships from the ironclad frigates of the early nineteenth century to the huge monsters of yesterday, and a description of some of the great battles in which they fought. Captain Macintyre brings to this absorbing book all his expert knowledge and love of the mightiest ships the world has ever known. He is also the

			author of "Jutland" and "U-Boat Killer." (from dust jacket flap)
2005.301.006	Anatomy of Nelson's Ships, The	Longridge, C. Nepean (Charles Nepean)	Longridge's desire to build a three-decker ship model of Nelson's flagship Victory as she was at Trafalgar was the impetus for this book. "Although this book is mainly concerned with the model I built of the Victory, the methods described for the construction are equally applicable to other ships of the period, and I imagine that many who read this book will do so with the idea of building a model of a three-decker, but not everybody will want to build a Victory. A list of ships that fought at Trafalgar is therefore appended. A wide choice is available. In a book this size it would be impossible to give the dimensions and details of each class of ship; but anyone who, for instance, has a preference for building a 74-gun ship such as the Vanguard, Nelson's flagship at the battle of the Nile, will I hope, find in these pages much information to assist him. Having chosen his ship, the builder must decide upon the scale. Several considerations come into this question. Ship drawings in general, that is the body, profile or sheer and half-breadth plans are usually drawn in quarter-inch scale--that is a quarter an inch on the drawing represents one foot of the actual ship. The dimensions of a quarter scale model can therefore be taken directly off the drawings, which is an advantage. The majority of the ships in museums are on the quarter-inch scale..."
2005.301.007	Frederick the Great on the Art of War	Luvaas, Jay	From the Preface--"Frederick the Great's Instructions for His Generals has long held a deserved place among military classics... Regarded as a precious legacy by German soldiers of a later generation, the book was published in various editions in France and England. Yet Frederick's later writings are virtually

Object ID	Title	Author	Summary
			unknown except to those who have access to the collected Oeuvres published over a century ago in Germany and the subsequent German translation, the Werke, that appeared shortly before the First World War. It is in the essays written before and after the Seven Year's Wars the Frederick's mature thoughts on war are to be found. These are the observations of a general far wiser and more experienced than was the author or the more renowned Instructions, which, after all was written during the first phase of a long and colorful military career."
2005.301.008	World War II at Sea: A Bibliography of Sources in English, 1874-1989	Smith, Myron J. Jr.	From the Introduction, "Covering the period 1974 through late Spring 1989, the 3,600 citations in this supplement allow us to point out English-language coverage of sea service materials appearing in a variety of sources, especially periodicals, which were in their infancy at the time the base volumes were finished. Among the newer journals examined here are Naval History, Warship, Warship International, Wings, Air-power, and Sea Classics; among the new emphases within the literature is, for example, the whole matter of ULTRA. Additionally, this volume backtracks to include enumeration of a number of titles omitted for one reason or another in the original outing, with special attention paid to non-American English-language book titles."
2005.301.009	Day of Infamy	Lord, Walter	The story of the attack on Pearl Habor on December 7, 1941 by the Combined Fleet of the Imperial Japanese Navy.
2005.301.010	Brave Men	Pyle, Ernie	Ernie Pyle's first person account of his experiences in Sicily (June-September 1943), Italy (December 1943-April 1944), and France (June-September 1944) is dedicated to the dead of those battles. The title for the book is based on an anecdote from his book Here is Your War. "I heard of a high British officer who went over

Object ID	Title	Author	Summary
			the battlefield just after the action was over. American boys were still lying dead in their foxholes, their rifles still grasped in firing positions in their dead hands. And the veteran English soldier remarked time and again in a sort of hush eulogy spoken only to himself, 'Brave men. Brave men!' "
2005.301.011	Silent Victory : The U.S. Submarine War Against Japan, Vol. 1	Blair, Clay	Clay Blair saw service on the fleet submarine Guardfish in World War II and later wrote for Time and Life magazines before becoming editor-in-chief of The Saturday Evening Post. The author of several other popular books on submarines, he died in 1998. 40 of 41 people found the following review helpful Back in print, this classic account of WWII subs triumphs... November 25, 2003 By Alex Diaz-Granados One of the deadliest weapons used in naval warfare during the two World Wars was the submarine. In the Atlantic, Germany's U-boats did extensive damage to Allied shipping and twice threatened to starve Britain. In the Pacific, the Japanese submarine force, tied to a rigid doctrine of stalking enemy capital ships, scored a few outstanding kills of carriers and the USS Indianapolis but did little to harm Allied cargo ships. In Clay Blair, Jr.'s Silent Victory: The U.S. Submarine War against Japan, reissued by the U.S. Naval Institute (the same publishing company to release a Tom Clancy novel) after several decades of being out of print, is a fascinating and detailed look at the officers, sailors and submarines of the Silent Service and their nearly four-year-long campaign against Japan's Imperial Navy and her Merchant Fleet. Blair, himself a former submariner, pulls no punches

Object ID	Title	Author	Summary
			and details the many difficulties faced by the American submarine force. Sub skippers who in peacetime were among the best often failed the test of battle. The S-class boats were too slow, had fewer torpedo tubes than the newer T and Gato-class fleet boats. Like Japan's submarine force, targeting priority was on capital fleet units (battleships, carriers and cruisers). Worst of all, the Mark XIV torpedo, the Navy's wonder weapon, proved to be less than wonderful until Admiral Charles Lockwood, Commander, Submarines, Pacific Fleet (ComSubPac) and other officers fixed several defects in the arming mechanism. But once the Navy fixes most of its personnel- and torpedo-related problems and unleashes the Silent Service against Japanese merchant shipping, the efforts of admirals such as Lockwood, Ralph Christie, James Fife, Robert English (Lockwood's predecessor as ComSubPac before his death in a plane crash) and Richard Voge pay off as hundreds of Japanese freighters, troop transports and, more critically, tankers go to the bottom of the Pacific, crippling the island Empire's ability to sustain its war effort. In conjunction with the loss of island territories to the Allied soldiers and Marines advancing from several directions and the bombing campaign that got underway in 1944, the submarine force had placed a stranglehold on Japan's economy, doing to the Japanese what the Germans had failed to do to Britain. Highly detailed and full of colorful characters and suspense-filled descriptions of undersea warfare, Silent Victory is a must-read for any buffs of naval warfare and World War II history. Interestingly, this book was cited as one of the sources of information for MicroProse's classic World War II

2005.301.012	John Paul Jones : A Sailor's Biography	Morison, Samuel Eliot	Written by the renowned naval historian Samuel Eliot Morison, this Pulitzer prize-winning book is widely recognized as the only authoritative, modern biography of the naval officer frequently referred to as the father of the U.S. Navy. It vividly portrays the illustrious career of John Paul Jones, from his early training at sea in the British West Indian merchant trade to his exploits in the newly independent American navy and his appointment as an admiral in the Russian navy and command of a squadron in the Black Sea. With compelling detail and remarkable insight, the dramatic narrative captures Jones's tenacity and fierce dedication and loyalty to his men and country, despite ill treatment and only begrudged recognition from his superiors. Jones's incredible victories at sea form an important part of the book. Morison's description of the battle between Jones's Bonhomme Richard and HMS Serapis is considered one of the most vivid accounts of a naval battle in the English language. (from Amazon.com)
2005.301.013	Fatal Shore, The	Hughes, Robert	Robert Hughes writes about Australia's often over-looked convict origins. His research demonstrates that the convicts, often thought not to have a voice, actually did leave a record through letters, memoirs, dispositions and petitions. The first convict ship landed in Botany Bay in 1788 and the last convict ship arrived in 1868. This story traces how those convicts found a home in Australia, moved from being Government men (prisoners) to assuming a role in free society. It also discusses how Australia moved on from pretending that this part of its origins never existed to figuring out how to embrace it as part of its national heritage. Much of his

2005.301.014	From a Small Naval Observatory	Thomas, Walter R.	research is based upon original source documents. No one without a sense of humor should be assigned to Washington, D.C., for duty. Humor, in the maelstrom of government, really should be as available by prescription as some of the more powerful yet less effective sedatives. Humor can prevent madness. Sedation can only delay it. - Captain Walter "R" Thomas, U.S. Navy During the process of gaining clearance for this book, Captain Thomas received a phone call from a Pentagon office one day and was asked, "Are you on active duty?" Captain Thomas said, "Yes." After a short, but meaningful, pause the caller then asked, "Are you planning to retire soon?" This book evokes official questions like these. It paints a spectrum of Navy programs and official practices in controversial colors, and often touches bureaucracy in its tender spots. But the chapters are also splashed with wit, humor, and occasional satire which make them highly enjoyable as well. And the book is not only pertinent to the Navy; every military service and government agency will find its bitter roots in the author's prose garden. Captain Thomas said he hoped the book "might give today's leaders a good view of chaos so that tomorrow's leaders could control it!" This book provides-a great vantage point. Captain Thomas entered the Navy at Pensacola, Florida, in 1948 as one of the Navy's "Flying Midshipmen." While assigned to various squadrons, he flew many different types of aircraft, including seaplanes and helicopters. He has also served tours as a ship's company officer on several aircraft carriers. His shore

2005.301.019	First Across! The U. S. Navy's Transatlantic Flight of 1919	Smith, Richard K.	"First Across" is the exciting story of the first transatlantic flight. The flight, made in 1919, took a six-man crew nearly three weeks to complete. Several million people will fly the Atlantic this year, and every plane in those busy air corridors — whether a Vickers VC-10, Ilyushin II. 62, or Boeing 747 — flies under a system of radio communications, weather intelligence, and air-sea

Object ID	Title	Author	Summary
			rescue that is a legacy of the U. S. Navy's 1919 flight operation which culminated in the transatlantic success of the NC-4. This book describes in detail the entire operation, the planning, the men and their aircraft, the primitive radio communication and method of air navigation. Man had been flying for less than two decades when the London Daily Mail offered a £10,000 prize for the first plane to cross the Atlantic. Government planes were excluded from the competition but the U. S. Navy was in a unique position to win the honor if not the prize. Before the end of the First World War the Navy had requested an aircraft which would meet the twofold wartime requirement for long-endurance antisubmarine warfare patrol planes with a capacity for transatlantic crossings to relieve a critical shortage of merchant ships. The Daily Mail prize started a flurry of trans-Atlantic competition and though the Navy's planes came too late for the war they did arrive in time for the race. Three big Navy Curtiss flying boats were prepared for the flight and took off from Newfoundland, but due to engine trouble and bad weather two landed at sea in the vicinity of the Azores and were not able to take off again. All hands survived but both planes were lost. The NC-4, on 27 May 1919, after what seemed interminable delays, completed the long, twenty-day up-and-down-and-up-again flight to Portugal. The author points out the remarkable fact that man's use of power and transportation has undergone a new stage of development every half

Object ID	Title	Author	Summary
			century: 1769, steam power harnessed; 1819, steam power used in a ship crossing the Atlantic; 1869, steam-powered transportation connected both coasts of the U.S.; 1919, men flew between the continents; 1969, the first men landed on the moon. Of these developments, it was the NC-4 flight which "makes aircraft the first universal means of transportation and . . . opens a new era of civilization. . . ." Here, for the first time, are the complete details of how the U. S. Navy, as a result of efforts to meet a novel requirement of antisubmarine warfare coincidentally opened up a new era in world aviation. In "First Across," Richard K. Smith has used photographs, cartoons, and even advertisements of the era to help evoke that spring of 1919, an important moment in the history of transportation and civilization. Richard K. Smith holds the Bachelor of Science and Master of Arts degrees from the University of Illinois, and in 1966 received his Ph.D. in history from the University of Chicago. He has served as historian of the Smithsonian Institution's National Air and Space Museum and is presently on the staff of the Milton S. Eisenhower Library at Johns Hopkins University. Chapter 1 beginning January 7, 1883 Dublin where he was born but although born in Ireland he says he is a Scot. Continuing with his Naval Career to World War II.
2005.301.022	Flags at Sea	Wilson, Timothy	This is a revised edition of a popular history, first published in 1986, of the flags flown at sea during the Age of Sail. Beautifully illustrated with more than one hundred thirty photographs--seventy-four in color--it features the flags flown by the principal naval powers--Great Britain, France, the Netherlands, Spain, and the United States. The clear narrative unravels myths and misunderstandings about where, when, and why certain flags--like the piratical "Jolly Roger"--were flown. It also tackles such complicated issues as signaling in peace and war. Contemporary flag charts and specially commissioned drawings provide the degree of detail necessary for modelmakers, artists, and historians. The remarkable amount of information presented on the all-important functions of identification and signaling at sea makes an important contribution to the literature. -- This text refers to an alternate Paperback edition. 2005.301.023	Armada	Padfield, Peter	First Published: 1988 Type of Work: History

Object ID	Title	Author	Summary
			Time of Work: The 1580's Setting: Western Europe, the English Channel, and England Characters: Elizabeth I, Sir Francis Drake, Sir John Hawkins, Charles Howard, Second Baron Howard of Effingham, Philip II, Don Alonzo Pérez De Guzmán, Alexander Farnese, Duke of Parma Genres: Nonfiction, History Subjects: England or English people, War, Ships, Sailing or sailors, Sixteenth century, Warships, Western Europe or western Europeans, Spain or Spanish people, Navies, Spanish Armada Locales: Europe, England Any historical event is an impossibly complex topic; assessing the forces that "produce" a specific occurrence is largely a matter of exclusion as much as inclusion. When the scope of the event is enormously large itself, when the import of the occurrence is such that it holds a place in almost every historical survey offered to students from elementary school through college, the event tends to take on a life, and its effects a standardized assessment, of its own. Such is the case with the defeat, in the year 1588, of the Spanish Armada. Excepting 1492 and 1776, perhaps no... (The entire page is 1461 words.) (from enotes.com)

2005.301.029	Fighting Ships of World War II	Westwood, J. N.	This book presents the celebrated ships of World War II, detailing both their wartime careers and their design features. In addition it describes the evolution between the wars of the various ship types: how their designers sought to make compromises to satisfy the requirements of fighting qualities, sea-going capability, expense and those of the different naval treaties.
2005.301.030	Silent Victory : The U.S. Submarine War Against Japan, Vol. 2	Blair, Clay	Clay Blair saw service on the fleet submarine Guardfish in World War II and later wrote for Time and Life magazines before becoming editor-in-chief of The Saturday Evening Post. The author of several other popular books on submarines, he died in 1998. 40 of 41 people found the following review helpful Back in print, this classic account of WWII subs triumphs... November 25, 2003 By Alex Diaz-Granados One of the deadliest weapons used in naval warfare during the two World Wars was the submarine. In the Atlantic, Germany's U-boats did extensive damage to Allied shipping and twice threatened to starve Britain. In the Pacific, the Japanese submarine force, tied to a rigid doctrine of stalking enemy capital ships, scored a few outstanding kills of carriers and the USS Indianapolis but did little to harm Allied cargo ships. In Clay Blair, Jr.'s Silent Victory: The U.S. Submarine War against Japan, reissued by the U.S. Naval Institute (the same publishing company to release a Tom Clancy novel) after several decades of being out of print, is a fascinating and detailed look at the officers, sailors and submarines of the Silent Service and their nearly four-year-long campaign against Japan's Imperial Navy and her Merchant Fleet.

Object ID	Title	Author	Summary
			Blair, himself a former submariner, pulls no punches and details the many difficulties faced by the American submarine force. Sub skippers who in peacetime were among the best often failed the test of battle. The S-class boats were too slow, had fewer torpedo tubes than the newer T and Gato-class fleet boats. Like Japan's submarine force, targeting priority was on capital fleet units (battleships, carriers and cruisers). Worst of all, the Mark XIV torpedo, the Navy's wonder weapon, proved to be less than wonderful until Admiral Charles Lockwood, Commander, Submarines, Pacific Fleet (ComSubPac) and other officers fixed several defects in the arming mechanism. But once the Navy fixes most of its personnel- and torpedo-related problems and unleashes the Silent Service against Japanese merchant shipping, the efforts of admirals such as Lockwood, Ralph Christie, James Fife, Robert English (Lockwood's predecessor as ComSubPac before his death in a plane crash) and Richard Voge pay off as hundreds of Japanese freighters, troop transports and, more critically, tankers go to the bottom of the Pacific, crippling the island Empire's ability to sustain its war effort. In conjunction with the loss of island territories to the Allied soldiers and Marines advancing from several directions and the bombing campaign that got underway in 1944, the submarine force had placed a stranglehold on Japan's economy, doing to the Japanese what the Germans had failed to do to Britain. Highly detailed and full of colorful characters and suspense-filled descriptions of undersea warfare, Silent Victory is a must-read for any buffs of naval warfare and World War II history. Interestingly, this book was cited as one of the

2005.301.033	Nothing Too Daring : A Biography of Commodore David Porter, 1780-1843	Long, David Foster	"A retrospect of the history of my life seems a highly-coloured romance, which I should be very loth to live over again ..." Thus wrote Commodore David Porter to his foster-son, David Glasgow Farragut, in 1835, looking back on a turbulent, controversial, and often influential 28-year career in the United States Navy. Porter made history when he took the Essex into the Pacific and crippled the British whaling industry in the War of 1812. He was the first to suggest that the U.S. Navy force open Japan. He was also court-martialed and convicted on charges arising out of his unauthorized invasion of Spanish Puerto Rico. He later sought to reverse his fortunes in the Mexican Navy, and

Object ID	Title	Author	Summary
			consistently suffered chaos in his personal and financial affairs. As the first U.S. chargé d'affaires in Constantinople he established direct diplomatic relations between the U.S. and the Ottoman Empire. Porter was on terms of intimacy, either friendly or hostile, with Presidents Madison, Monroe, John Quincy Adams, and Andrew Jackson; with Clay, Lafayette, Irving, Santa Anna, Sultan Mahmud II, Decatur, Wilkinson, and a host of lesser but important lights. He was courageous, passionate, intelligent, far-sighted, dedicated, and generous. Yet he was at the same time impulsive, avaricious, hot-tempered, conceited, sometimes vicious, and finally paranoiac. "Nothing Too Daring" is the first objective, thoroughly-researched biography of one of America's most colorful naval officers. (from dust jacket flap)

2005.301.034	Oxford Illustrated History of the Royal Navy, The	Hill, J. R. (ed)	Page 427 discusses the angled deck, the mirror sight, and the steam catapult on an aircraft carrier. Page 419 talks about flight deck operations on a carrier. This book presents a total history of the Royal Navy by drawing on the specialist knowledge of 14 expert contributors. Accounts are given of major actions and campaigns--such as the defeat of the Spanish Armada, the Anglo-Dutch Wars of the seventeenth century, Trafalgar, the battle of Jutland, the Atlantic Campaign of 1939045, and the Falklands conflict. Emphasis is also placed on a range of other naval functions, from navigational advances, surveying, and constructional developments to disaster relief and the suppression of the slave trade. The range of personalities is equally diverse, from great national heroes like Drake and Nelson, to administrators

			of France and Spain, but also that of a complex campaign of which Trafalgar was the climax. It shows that the protagonists were not Admirals Villeneuve and Nelson, but Napoleon and the British naval tradition. (from Amazon.com)
2005.301.049	Thirty Seconds Over Tokyo	Lawson, Ted W.	AMERICA STRIKES BACK! After Pearl Harbor, America seemed to have lost the war before it had begun. Allied forces were being beaten across the Pacific by the Japanese military juggernaut, and morale was at the breaking point. America desperately needed to strike back at the enemy. For this, a corps of heroic volunteer fliers led by Lt. Col. James H. Doolittle began training to attack the very heart of the Japanese Empire -- Tokyo. To succeed, the "Tokyo Raiders" would have to launch sixteen fully loaded B-25 twin-engine medium bombers off the deck of the aircraft carrier Hornet -- something never done before -- and land at airfields in China. Through courage and luck, the raid itself went flawlessly. But bad weather, lack of fuel, and darkness worked against many of the pilots -- and for many, escaping China proved even more perilous than the mission.... This gripping eyewitness account -- hailed as "the most stirring story of individual heroism that [the war] has so far produced" (The New York Times) -- is one of the most daring missions in military aviation history: the legendary Doolittle Raid. INCLUDES HISTORIC PHOTOS - SOME NEVER BEFORE PUBLISHED Editorial Reviews From Library Journal The publisher inaugurates its "Aviation Classics" series with this 1943 narrative of Jimmy

Object ID	Title	Author	Summary
			Doolittle's raid on Japan in answer to Pearl Harbor, which Lawson experienced firsthand as a bomber pilot. This edition has twice as many photos as the original, as well as a new introduction by series editor and military historian Peter B. Mersky. Copyright 2002 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title.
			About the Author Ted W. Lawson (1917-1992) was a native of California. He joined the Army Air Corps while working for Douglas Aircraft Company in Santa Monica and received his wings in November 1940. After the attack on Pearl Harbor, he volunteered for a secret mission that evolved into the raid on Tokyo in April 1942. Random House published his account of the raid, <i>Thirty Seconds Over Tokyo</i>, in 1943. Lawson subsequently served as technical advisor to MGM during the making of the popular wartime movie based on his book. After retiring from military service in 1945, he reentered private industry and worked on several projects that involved aircraft and space programs.
			Peter B. Mersky is series editor for Brassey's Aviation Classics. He has written or co-authored a dozen books, including <i>A History of Marine Corps Aviation</i>, some 100 magazine articles on U.S. Navy and Marine Corps aviation, and hundreds of book reviews. He is retired from both the U.S. Naval Reserve and Approach, the Navy and Marine Corps aviation safety magazine, for which he served as editor. He is currently preparing a volume on carrier warfare for Brassey's series of combat readers. He lives in Alexandria, Va. --This text refers to the Hardcover edition. (from Amazon.com)

Object ID	Title	Author	Summary
2005.301.050	Grand Strategy : Principles and Practices	Collins, John M.	. . . this is the only book on grand strategy. Liddell Hart's classic "Strategy" contains a seven-page chapter on the subject. Most texts ignore it entirely. . . . this is the only book that surveys the full scope of U.S. defense strategy in a way that correlates national security interests, objectives, policies, and concepts with national power- and strategic constraints. ... the glossary of strategic terminology is the most complete one available. It includes many entries that are in common use, but have never been formally defined. . . . the Vietnam case study is unique. No one else has reviewed that conflict in an integrated strategic context that takes cognizance of fundamentals. (from back cover)
2005.301.051	Convoy : Merchant Sailors at War, 1939-1945	Kaplan, Philip	The men of the American, British, and Canadian merchant marine are the forgotten heroes of the long and costly Battle of the Atlantic. From their first casualty in September 1939 to the last on VE Day in May 1945, nearly 50,000 men of the Allied merchant service lost their lives to Axis torpedoes, bombs, and guns. This stunning portrait, first published in 1998, pays tribute to their all-important role. In both words and pictures, the book calls attention to the men who won this victory. Rare photographs, paintings, and memorabilia convey an impression of the dangers faced by the seamen in the stormy North Atlantic, the ice-fields of North Cape and the Barents Sea, and the vast expanses of the Pacific. The text draws on unpublished memoirs of the men who sailed in the convoys, including those who survived days adrift in lifeboats and

Object ID	Title	Author	Summary
			faced U-boat torpedoes and Luftwaffe bombs. Convoys were the lifeline of the Allied war effort, and this account is an evocative and moving reminder of just how much we owe the ordinary seaman. Amazon.com Review An often overlooked aspect of World War II was the battle waged night and day by those who served not on warships, but on merchant ships pressed into wartime duty. Convoy: Merchant Sailors at War puts a sharp focus on merchant sailors from the British Merchant Navy, the American Merchant Marine, and the Canadian Merchant Navy, and through copious use of photographs, paintings, wartime posters, and maps, tells the story of the merchantmen who fought the epic Battle of the Atlantic. The survival of the Allies depended on supplies flowing from North America to Europe; the desperation of the early years of the war, and the story of how the tide was slowly turned, is well presented in the book. As the coauthors are both British, the book tends to focus on English sailors, but the personal accounts of veterans of wartime merchant service transcends national boundaries. Life onboard the ships is well documented, and of particular interest is a photographic tour of the Jeremiah O'Brien, an American Liberty Ship which has been restored to its wartime condition. The text is organized thematically, dealing with particular classes of ships as well as with particular aspects (such as the role of air cover) of the Allied campaign to sweep the oceans of the dreaded U-boats. --Robert McNamara --This text refers to the Hardcover edition.
2005.301.052	Great Battles of the Royal Navy : As Commemorated in the Gunroom, Britannia Royal Naval College, Dartmouth	Grove, Eric (ed)	Designed as a tribute to the traditions of the British Navy, this volume traces over 1000 years of seafaring history. Each chapter relates a specific sea battle and is illustrated with

Object ID	Title	Author	Summary
			archive photographs, engravings, prints and paintings from leading collections, depicting the actions and personalities involved. Dedicated battle maps also accompany each chapter. -- This text refers to an out of print or unavailable edition of this title. (from Amazon.com)
2005.301.053	Pearl Harbor : December 7, 1941 : America's Darkest Day	Wels, Susan	Unlike any other book, Pearl Harbor brings together in one magnificent edition the rich history, real-life stories, harrowing drama, and appalling tragedy of the Japanese attack on the United States' premier Pacific naval base. With a foreword by Senator Daniel K. Inouye and an introduction by preeminent military historian Sir John Keegan, Pearl Harbor imparts the rich historical background of the initial days of the Second World War, the dramatic events of the attack, and the enduring legacy of this wartime disaster. Pearl Harbor features over 200 archival photographs from American and Japanese sources, previously unpublished artifacts, military art rendered from eye-witness accounts of the attack, and full-color battle maps and diagrams. Publication Date: May 1, 2001 (from Amazon.com)
2005.301.054	European Discovery of America, The : The Northern Voyages	Morison, Samuel Eliot	The author presents in these pages a comprehensive and readable account of all known voyages across the North Atlantic to the New World prior to 1600, and of the intrepid mariners, and the adventurers who sent them forth. The roll call includes all the great explorers: Leif Ericsson, John Cabot, Verrazzano, Gomez, Jacques Cartier, martin Frobisher, John Davis, Sir Walter Raleigh and his kinsmen Grenville and Gilbert, and a full gathering of their competitors.
2005.301.055	Seven Sisters, The : The Great Oil Companies and the World They Shaped	Sampson, Anthony	A history of Exxon, Gulf, Texaco, Mobil, Socal, B.P., and Shell : five huge American

Object ID	Title	Author	Summary
			companies, one British company, and one Anglo-Dutch concern have dominated the world of oil for most of the century.
2005.301.056	Great Iron Ship, The	Dugan, James	This is a history of the Great Eastern steamship, the largest ship ever built when she was launched in 1858. She was designed to carry 4,000 passengers and was 693 feet long.

2005.301.058	Glory and the Dream, The : A Narrative History of America, 1932-1972	Manchester, William Raymond	This book is a history of the United States from 1932-1972. It encompasses politics, military history, economies, the lively arts, science, fashion, fads, social change, sexual mores, communications, graffiti-- everything and anything indigenous that can be captured in print.
2005.301.059	Portrait of Lord Nelson, A	Warner, Oliver	A Portrait of Lord Nelson with Frontispiece of Captain Horatio Nelson, R. N. by J. F. Rigaud, R. a. 1777-1781 with San Juan, Nicaragua fort in the background. XII Chapters beginning with Legacy and naval service to Trafalgar, epilogue and Appendix of portraits and Index. Illustrations, Letter & Signatures, Battle Plans and Nelson's Ranks are included.
2005.301.060	Sinai Victory	Marshall, S. L. A. (Samuel Lyman Atwood)	Sinai Victory by s. L. A. Marshall, Military Critic, The Detroit News, Brigadier General, USAR Maps & Drawings by H. Garver Miller, ORO with Preface by the author regarding the maps and spelling of place names in the Middle East. 17 Chapters with III Appendixes on Training, the Air Battle and Outline and chronology with Index and list of maps on pg. 9
2005.301.061	Life of Nelson, The	Southey, Robert	INTRODUCTION WHEN ROBERT SOUTHEY heard that Nelson had been killed at the Battle of Trafalgar in 1805, he shared at once England's grief and pride. To his brother Thomas, then a

Object ID	Title	Author	Summary
			lieutenant in the Royal Navy, he wrote, You will have heard of Nelson's most glorious death. The feeling it occasions is highly honourable to the country. He leaves a name above all former admirals with, perhaps, the single exception of Blake. . . . We ought to name the two best ships in the navy from these men. At that time — only three weeks after Nelson's death — Southey was willing to let the recent hero share the laurel with the earlier epitome of naval courage. After four years, however, during which Napoleon Bonaparte continued to march across Europe, but one hero remained uppermost in Southey's mind: "We want a Nelson in the army." with an introduction and notes by R.D. Madison.

2005.301.062	Rickover Effect , The : How One Man Made a Difference	Rockwell, Theodore	As Technical Director, Rockwell worked alongside the legendary Admiral Rickover for the first 15 years, creating the nuclear navy, then the world's first commercial atomic power station. Rickover was both admired and hated as he forcibly reformed both bureaucracies and industries to harness the fearsome atom. From Publishers Weekly Rockwell, Rickover's former technical director, has written a notable, anecdote-rich biography of the controversial "father of the nuclear navy." In 1951 Hyman G. Rickover (1900-1986), then an obscure captain in the navy's Bureau of Ships, set himself the task of creating an atomic submarine. Four-and-a-half years later, USS Nautilus, the world's first nuclear sub, joined the fleet. In lay language, Rockwell explains how he accomplished this amazing feat. For one thing, Rickover gave new meaning to the concept of industrial quality control. Rockwell also makes clear

Object ID	Title	Author	Summary
			why his former boss was widely hated and feared, and provides examples of his unique ability to infuriate as well as inspire. Most prominently, Rockwell demonstrates Rickover's genius for getting things done. Finally, he relates the strange story of Rickover's enforced retirement in 1982 at the instigation of Navy Secretary John Lehman, who accused him of accepting favors from contractors. If this fine biography has a flaw, it is the author's failure to explain adequately why Lehman was so implacably hostile to the man who immeasurably strengthened the United States Navy. Illustrations. Copyright 1992 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. (from Amazon.com)
2005.301.063	American Way of War, The : A History of United States Military Strategy and Policy	Weigley, Russell Frank	Beginning with the American Revolution, Weigley examines the development of American military strategy and tactics, both in theory and practice, integrating the concept of strategy as a political, economic, diplomatic, and psychological means for attaining war aims with the actual application of strategic thought in war.
2005.301.064	Soldier	Herbert, Anthony B.	This book is an important American saga. With the candor, humor, and gusto characteristic of the man, it combines the drama of an adventurous life--in riveting descriptions of military combat, in unique conveyance of the fraternal spirit that binds together professional mean at arms--with the surmounting moral dilemmas of our day.
2005.301.065	Heart of Oak : A Survey of British Sea Power in the Georgian Era	Marcus, Geoffrey Jules	Heart of Oak in 20 Chapters beginning with wooden walls (ships), sailors, dangers of the sea, letters, story and song. References and Notes, Bibliography, Glossary and Index. 1714 - 1830 was the greatest period of the sailing Navy of Britain. this book deals with the aspects of Britain's

			naval strength, materials and ship-building, strategical and tactical skill, seamanship navigation personnel, officer and seamen, commerce, sea power and songs.
2005.301.066	Admiral of the Ocean Sea : A Life of Christopher Columbus	Morison, Samuel Eliot	Christopher Columbus (Spanish: Cristóbal Colón; before 31 October 1451 – 20 May 1506) was an explorer, colonizer, and navigator, born in the Republic of Genoa, in what is today northwestern Italy. Under the auspices of the Catholic Monarchs of Spain, he completed four voyages across the Atlantic Ocean that led to general European awareness of the American continents. Those voyages, and his efforts to establish permanent settlements in the island of Hispaniola, initiated the process of Spanish colonization, which foreshadowed the general European colonization of what became known as the "New World". (from Wikipedia)
2005.301.067	Naval Aristocracy, The : The Golden Age of Annapolis and the Emergence of Modern American Navalism	Karsten, Peter	Modern American navalism developed in the mid-nineteenth century (the "Golden Age of Annapolis") out of the affluent, Episcopalian milieu of the typical naval officer. Its ruling principles were the notion that the navy's first duty was to protect U.S. business interests abroad, an intense loyalty to naval manners and mores, and the desire for Anglo-American cooperation. These traditions survived into the twentieth century, by which time navalists had acquired, or developed as the logical product of their ideological system, a number of remarkable publicists, of whom Captain Alfred Thayer Mahan was the principal spokesman. "Anything that helps commerce helps the Navy; anything that helps the Navy helps commerce; and whatever helps both helps the country," Admiral W. S. Benson once told a convention of the National Rivers and Harbors Congress. Men such as he, Mahan, and

Object ID	Title	Author	Summary
			their respective messmates, are presented by Professor Karsten as "tragic examples of professional men whose every thought and action tended to reinforce, rather than challenge, their attitude toward life. They grew in only one direction, while the world was growing in many." Professor Karsten, himself a former naval officer, has relied on numerous biographical sources on hundreds of naval officers to provide much of the information in this brilliant narrative. Frequently confronted with the lives of men whose self-revelations were issued with the greatest reluctance, he has nonetheless succeeded in extracting a remarkable and revelatory composite portrait of the naval establishment past and, persistently, present. PETER KARSTEN is Assistant Professor of History at the University of Pittsburgh. 2005.301.070	U.S. Navy, The : A History	Miller, Nathan	As readable as fiction, as timely as today's headlines, this authoritative, concise history of the U.S. Navy traces the development of American seapower from the raggle-taggle Continental Navy of 1775 to current efforts to deploy strategic and tactical naval innovations for the twenty-first century. Originally published in 1977 and revised and updated twice, this book has come to be recognized as the standard history of the Navy, treasured by midshipmen at the Naval Academy and valued by general readers looking for a brief but inclusive study. In telling the story of the Navy, author Nathan Miller describes not only its ships and weapons but the role played by its men and women in the creation and protection of the United States. This new third edition includes enhanced coverage of the Marine Corps. (from Amazon.com)

2005.301.077	Warships & Sea Battles of World War I	Fitzsimons, Bernard (ed)	On Nov. 21,1918, the German High Seas Fleet steamed out into the North Sea to surrender to the greatest naval force ever assembled: the British Grand Fleet, a single great column of warships 370 strong. Seven months later, most of the German ships were at the bottom of Scapa Flow, scuttled by their own crews. It was a sad end to a proud fleet. Hampered by the Kaiser's desire to maintain a 'fleet in being' it had never been in a position to challenge the numerically superior British fleet. At the same time, the great British dreadnoughts, each capable of sailing several thousand miles without refueling, had found half of the North Sea, and a third of the east coast, outside their effective zone of operation, because of an underrated new weapon -- the submarine. Here we present the story, authoritatively written and superbly illustrated, of the First World War at sea: of the mighty ships, the battles they fought, and the unrelenting struggle against the submarine. Includes: Balance of Naval Power, August 1914 -- Heligoland, The First Sea Battle Revenge at Sea: Coronel and the Falklands -- The Cruise of the Emden Dogger Bank: Clash of the Battle Cruisers -- Naval War in the Mediterranean Warships at the Dardanelles Underwater War: Techniques and Developments -- Jutland The Channel War -- The Submarine War: First Round to Germany Q-Ships: Killers in Disguise The Submarine War: A U-Boat Commander's View U-Boats: The Tide Turns -- The Otranto Barrage The Last Sortie of the High Seas Fleet

			being taken over by buyers owing to absence of charters. New nations have joined in the game regardless of economic conditions and have still further added to the redundancy." Drawings have been divided into four sections , single funnelled ships, two-funnelled ships, three -funnelled ships, and funnels aft. There are also views from different distances, hull forms; castle, island, and superstructure; bows or stems, sterns and king posts. There are also hints on estimation of age, colouring of merchant ships and flags, tonnage, and data beneath ship drawings.
2005.302.001	Carrier War	Jewett, Roger	After the longest string of battles in naval history, the US Navy had moved from the burning agony of Pearl Harbor to the final mighty thrust into the home waters of Japan, where it defeated the fanatical Japanese fleet despite the devastaing weapon of destruction, the kamikaze. But now, with WWII behind them, the US Navy was once again galvanized into action by the demolishing rage of the North Korean People's Army. This is the stirring saga of epic fury at sea and in the sky as the flames of combat marked the climax of one giant conflict and ignited a violent new struggle against a relentless new foe.
2005.302.002	Carrier Battle Group	Tomajczyk, Stephen F.	Aircraft carriers are the mightiest class of U.S. Navy vessels. But most people don't realize that in addition to transporting an awesome air arsenal, each of these ocean-going cities prowls the high seas with an entourage of up to 15 additional vessels. In the event of hostilities, these "carrier battle groups" allow nothing to violate their personal space-areas often measured in hundreds of square miles. The individual roles of nuclear submarines, the cruisers that coordinate carrier-based air power, the aircraft themselves, anti-submarine vessels and, of course, the carriers are all discussed and depicted in

Object ID	Title	Author	Summary
			exclusive action photography. In addition, author Steve Tomajczyk addresses criticisms of carriers as wasteful and outmoded; explains how a carrier battle group-the U.S. Navy's most powerful operating unit-defends itself from attacks; and compares the firepower wielded by a typical carrier battle group to that of potential adversaries. (from Amazon.com)

	Scooters and Whales		three attack planes: the A-1 Skyraider (Spads); the A-4 Skyhawk (Scooters); and the A-3 Skywarrior (Whales). The book is intended to record some of the camouflage schemes and markings, when bright splashes of colour had not yet been displaced by effective, but oh so dull, Tactical Paint Schemes, and to provide a colourful look at three of the greatest aircraft designed by the one man who has often been called Mr. Naval Aviation, Edward H. Heinemann.
2005.302.018	Navy Air : 75 Years of U.S. Naval Aviation	Andrews, Peter	NAVY AIR with cover picture of USS Kitty Hawk in the Pacific on Maneuvers. Foreword by John Lehman, the Secretary of the Navy 8 May 1986. "Sailors in the Sky" Lt. George C. Sweet, USN had been looking to the 1908 Air Trials at Fort Myer, Virginia and was to accompany Orville Wright on test run and was to become the first naval officer to fly in an airplane! He instead let an Army host, Lt. Thomas Selfridge, take his place. Unfortunately, the plane crashed and Wright was severely injured and Selfridge died later of his injuries. That ended the Trials and Sweet looked past the wreckage to see great opportunities for aerial reconnaissance and the tracking of artillery fire, and that planes would be important to the Navy.
2005.302.019	McDonnell F-4 Phantom, The	Dorr, Robert F.	(from back cover:) The definitive work on the design, development, and combat use of the famous McDonnell F-4 Phantom. The F-4 Phantom was the biggest, fastest, most expensive and - some say - ugliest fighter of its time. During the 1960s, when still in its youth, the Phantom set more speed and altitude records than any other aircraft-it was the standard against which every other jet fighter was measured. Now, Robert Dorr has assembled the whole story of the F-4,

Object ID	Title	Author	Summary
			complete with dozens of detailed photographs of actual jets and many personal interviews with Phantom pilots. The author follows the F-4 through three decades of service, tracing the origins, development, and use of this remarkable airplane. He covers the jet's early designs and flight tests and recounts its distinguished service with the U.S. Marine Corps, Air Force, Navy, and Air National Guard. You'll read of the fighter's multiple roles in the Vietnam War-originally conceived strictly as a ground-attack plane, the F-4 evolved into an excellent fleet defense interceptor and tactical reconnaissance craft. Dorr even interviews Brigadier General Robin Olds, the man who planned and led the wildly successful Operation Bolo in 1967. The Phantom remains in service with the U.S. Air Force Reserve, Air National Guard, and the air forces of twelve other nations. Dorr takes an indepth [sic] look at these modern Phantoms-including the super-secret F-4ES "Peace Jack"-with first-hand accounts from Iran, Korea, and Japan. In the appendices you'll find a comprehensive list of every unit to operate the F-4. The F-4 Phantom was an important aircraft-far ahead of its time and essential to its era. This definitive book is a must for serious aviation enthusiasts, and for every Phantom crewmember-past and present-around the world. Robert Dorr is a career diplomat currently working as an intelligence analyst in Washington D.C. He has written twelve books and numerous magazine articles, primarily on USAF aircraft (the F-4 being his favorite).

2005.302.022	Seventh Fleet Super Carriers : US Naval Air Power in the Pacific	Holmes, Tony	Colored pictures on almost every page show the planes and the people on the flight deck of aircraft carriers of the Seventh Fleet. Chapters include: 1) Flight deck, 2) The supreme team: Hawkeye and Tomcat, 3) Bomb trucks, 4) Sub smashers, 5) Hornets at Atsugi, and 6) Beam weapons. The majority of photographs in this books were taken onboard the USS Enterprise (CVN-65), the USS Carl Vinson (CVN-70), and the USS Ranger (CV-61).
2005.302.023	First Team and the Guadalcanal Campaign, The : Naval Fighter Combat from August to November 1942	Lundstrom, John B.	A fascinating chronicle of the carrier-based air battles that turned the tide of the war in the Pacific. The author draws from a decade of research to present a thoroughly detailed and scrupulously accurate account of naval air combat in the arduous Guadalcanal campaign. Picking up the story after Midway, this book describes in rich detail the actual planes and pilots pitted in battles of rarely matched ferocity.

2005.302.030	Into the Jet Age: Conflict and Change in Naval Aviation, 1945-1975: An Oral History	Wooldridge, E. T. (ed)	This book is a collection of chapters written by high ranking naval officers about the history of naval aviation from the end of World War II to 1975. Each chapter has a B&W picture of the author and a short biography. Chapter authors include: Vice Adm. Gerald E. Miller, Rear Adm. Francis D. Foley, Capt. Gerald G. O'Rourke, Capt. Arthur R. Hawkins, Adm. James S. Russell, Vice Adm. Robert B. Pirie, Vice Adm. Thomas F. Connolly, Vice Adm. Kent L. Lee, Vice Adm. Gerald F. Bogan, Adm. Charles Donald Griffin, Adm. George W. Anderson, Adm. Arleigh A. Burke, Adm. John S. Thach, Adm. John J. Hyland, Vice Adm. William P. Lawrence. Appendices include: A) Naval Aviation and Organization: 1945-1975, B) Glossary of Terms and Abbreviations, and C) Selected Bibliography.
2005.302.031	Air Power at Sea : 1945 to Today	Winton, John	Here with the help of over 100 action photographs and basing his research on interviews with people who have experienced these operations first-hand, the author examines the enormous changes which have overtaken the world's flying navies: the coming of jet fighters and nuclear-powered carriers, the spectacular success of the helicopter, the development of the 'jump jet' from 'Flying Bedstead' to Sea Harrier, the arrival of the missile in air combat, and the use of new devices, such as the steam catapult, the angled flight deck, the mirror landing aid and the ejector seat.
2005.302.032	Shades of Blue : US Naval Air Power Since 1941	Bowman, Martin W.	(from Amazon.com:)

Object ID	Title	Author	Summary
			To protect commercial, political, and social interests on every continent, the U.S. relies heavily on its fleet of massive aircraft carriers and the squadrons of spectacular aircraft aboard each. In fact, a single Nimitz-class nuclear-powered carrier packs a bigger punch than the combined air, sea, and land forces of most countries. This book examines the dramatic developments that have taken place in U.S. Naval aviation.
2005.302.033	Combat Carriers : Flying Action on Carriers at Sea	Holmes, Tony	Photos and drawings Carriers and carrier aircraft - from World War II to the present. US British and Japanese aircraft carriers - World War II.
2005.302.034	A-7 Corsair II	Holder, William G.	(from back cover:) Nicknamed "SLUF" (for Slow Little Ugly Fellow) and derided as "a giant step backward in speed capabilities," the A-7 Corsair II has received more than its share of verbal jabs. Its ungainly appearance and sluggish pace notwithstanding, the A-7 has performed the job for which it was designed better than possibly any other airplane in military history — delivering heavier payloads and absorbing more battle damage than any of its counterparts. Its success with the U.S. Navy and Air Force in Southeast Asia proved that when the situation calls for a tough attack aircraft, slower is often better. Aero Series, Volume 39, A-7 Corsair II tells the complete story of the reliable A-7, from its inception in the mid-1960s to its present use by the Air National Guard and foreign air forces. Author William Holder covers the aircraft's specifications, developmental phases, modifications, and combat history in Vietnam, Libya, and other conflicts. He also describes the technical factors — including the sophisticated avionics and

Object ID	Title	Author	Summary
			state-of-the-art weapons delivery systems -- that accounted for the A-7's remarkable combat survivability. And you'll get a look at the future of the aircraft - -- with special emphasis on the highly advanced A-7E. William Holder is a freelance writer and USAF aerospace engineer at Wright-Patterson Air Force Base in Ohio. He is the author of TAB/Aero's B-1 Bomber -- 2nd Edition (Book No. 20616), Boeing B-52 Stratofortress -- 2nd Edition (Book No. 20615), and Convair F-106 "Delta Dart" (Book No. 20600).

2005.302.045	F/A-18 Hornet	Davis, Greg	McDonnell Douglas (Boeing) F/A-18 Hornet fighter/attack jet
2005.302.046	F/A-18 Hornet in Action	Drendel, Lou	"In Action" books are books that trace the development of a single type of aircraft (etc) from prototype to the final production variant. The F/A-18 Hornet has become the most common aircraft on the decks of US aircraft carriers in the history of naval aviation. While the Super Hornet is a distant relation of the A-D Hornets, they all trace their roots to the loser of the lightweight fighter competition of the early 1970s, the Northrop YF-17. However, the Navy had a requirement for a lightweight fighter to replace the A-7 and F-4 and the US Congress dictated that the Navy choose one of the lightweight fighter contenders as its new fighter/attack aircraft. The twin-engine YF-17 had a definite advantage in this competition; on 2 May 1975, the Navy announced the MDD/Northrop design as the winner. The new lightweight

2005.302.064	F4F Wildcat in Action	Dann, Richard S.	Richard Dann's latest contribution to the history of Grumman aircraft takes the form of an "in action" on the F4F. Rich covered the Wildcat previously in a Walk-Around, but this new book is by no means a rehash of his older work. The Wildcat's ancestry stems

Object ID	Title	Author	Summary
			from the Grumman G-16/XF4F-1, a never-built biplane that was to have replaced the F3F carrier fighter. The introduction provides a photo of the FF-1 fighter, another of an F3F-3, and a side drawing of the G-16/XF4F-1. In response to Brwester's F2A Buffalo, Grumman used the G-16 as the basis for a monoplane fighter, the G-18/XF4F-2. Rich provides us with three images of the prototype, two side views, and overhead drawings of the wings. The XF4F-2 lost out to the Buffalo, but Grumman continued to refine the Wildcat, and produced the XF4F-3 from the remains of the crashed -2 prototype. There are two images of this aircraft and three sideview drawings shaowing the aircraft's various onfigurations. The F4F-3 was the first production Wildcat, and Rich includes a dozen -3 images. There were some differences between the -3 subtypes, and these are illustrated by a series of drawings, helpfully labeled with the appropriate BuNos. There is also a large 3-view. Three of the photos are detail shots, showing the wheel bay, gun bay, and the Fairchild F-56 camera. The XF4F-6 had single-stage supercharged engine, and this model is represented by a photo and frontal drawings showing the deletion of the intercoolers. The -6 led to the F4F-3A, three images of which are included. One of these is a detail shot showing the supercharger installation. The first of the photo-recon Wildcats was the F4F-3P, and this is represented by one image. There are two photos of the later long-range F4F-7, as well as a side-view drawings and an overhead drawing of the wings.

Object ID	Title	Author	Summary
			An interesting subject for a kitbash would be the F4F-3S "Wildcatfish" floatplane fighter, a single prototype of which was built. There are three -3S photos, one showing the aircraft with the vertical fin under the rear fuselage, which was found to be necessary to maintain directional stability. There is a single photo of the XF4F-5 prototype, and three side-view drawings. The next major production version was the F4F-4, and there are 23 photos of this mark. Notable are four cockpit shots, an aircraft with duplex flaps, another making a JATO takeoff, a Wildcat with extended wingtips, and another with breakaway wingtips as on the F8F. Wildcat production at Grumman was finished out by the XF4F-8 lightweight version - Rich includes two overall shots of this model, a closeup of the powerplant installation, and an overhead drawing of the wing. Production of the Wildcat shifted to the Eastern Aircraft Division of GM, as Grumman prepared to embark on the F6F program. The FM-1 was the Eastern equivalent to the F4F-4 - there are five photos of this model and one drawing of the wing. The most produced Wildcat was the FM-2, which stemmed from the XF4F-8. There are thirteen images, a side-view drawing, a large 3-view drawing, an overhead drawing of the wing, and a drawing of a 5" HVAR rocket. There are two images of the first G-36A, an export version intended for France before that country fell to the Germans. There is a side-view drawing and a drawing of the wing as well. The Royal Navy's Fleet

Object ID	Title	Author	Summary
			Air Arm would be the major export user of the F4F, and there are five photos of the Martlet Mk. I, a side view drawing, and a wing drawing. The Martlet II is covered by two side drawings, a wing drawing, and five photos. The history of the Martlet III variant is certainly convoluted, and Rich notes that he may not be 100% right on all the particulars. This does not degrade from the coverage of this model, as there are five photos, a side drawing, and two drawings showing the different windshields seen on this model. The Mk.V was an F4F-3B equivalent, and is represented by a side drawing and two photos. The Martlet/Wildcat V was an FM-1 for the FAA; there are two photographs, an overhead drawing of the wing, and a drawing of the 58-gallon drop tank. And finally, the Wildcat Mk. VI was a UK version of the FM-2; there are two photos and a side-view drawing. In the center of the book are ten color side views, including: *BuNo 1844 1st production Wildcat, with cowl-mounted guns *F4F-3 VF-72 prewar colors *Martlet II No.805 squadron *F4F-4 of John Thach *Martlet Mk.V from HMS Searcher *F4F-3P of VMO-251 *Martlet Mk.IV from HMS Biter (Ju290 killer) *FM-2 from VC-36 *FM-2 from VC-79 *FM-2 in silver lacquer advanced training scheme Recommended. A very detailed rundown on all Wildcat subtypes, with some excellent detail references. Add in the coverage of the oddball models, and you've got a must-have. (from cs.finescale.com)

2005.302.073	AD Skyraider : In Detail & Scale	Kinzey, Bert	(from squadronsignalpublications.com:) All new book covering the development of the Douglas A-1 Skyraider from the prototype to the final production variants. Contains dozens of detailed photos in both color and B&W - engines, cockpits, airframe, landing gear, weapons, and more. 8 pages of color. 80 pgs. SS8271 \$14.95
2005.302.074	Skyraider	Dorr, Robert F.	It wheezed. It coughed smoke. It dripped oil. It was nerve-rackingly difficult to fly — even for the band of mavericks who piloted the Douglas A-1 Skyraider into battle. The machine they dubbed the Flying Dumptruck was a piston-engine plane fighting a jet-age war. With its huge four-bladed propeller out front and a tail wheel out back it seemed to harken back to an earlier war. But in Vietnam it was the right weapon at the right time. Robert F. Dorr is a leading writer on US military aviation, specializing in the US Air Force and the Southeast Asia war. (from back cover)
2005.302.075	Douglas A-1 Skyraider	Davis, Larry	The A-1 had a lot of names over the years...some unofficial, some not -- and some that were not complimentary. In 1945, it was introduced as the Dauntless II; in 1946 it was renamed the Skyraider. To its crew though, it was the Able Dog, Spad, Queen, Big Iron Bird, Flying Dump Truck, or simply the AD. Its missions were as varied as its nicknames. A-1s flew as

Object ID	Title	Author	Summary
			dive bombers, torpedo bombers, airborne early warning craft, flying ambulances, aerial tankers, and search-and-rescue support. While this propeller-driven aircraft may appear to have been an anomaly in the jet age, the A-1 proved to be an effective and versatile platform well into the 1970s. It even served in Vietnam, scoring victories over North Vietnamese MiGs.
2005.302.076	Grumman A-6 Intruder	Jenkins, Dennis R.	The A-6 ran counter to most aircraft of its era. Bigger, faster, and higher were the buzz-words of the day -- the Intruder was none of these things. Slow. Ugly. The Intruder would never win a beauty contest, but was capable of lifting a substantial amount of ordnance and delivering it onto its target, day and night, in virtually any weather. As an attack aircraft it served in two major conflicts, several minor skirmishes, and was the mainstay of the carrier attack force for almost 30 years. It had a remarkably short gestation period, and an even quicker retirement.
2005.302.077	Vought F4U Corsair	Tillman, Barrett	Sleek and clean: the Corsair was loaded with power and potential. On 10-1-40, the prototype made 404 mph in a straight line between Stratford and Hartford. In doing so, the Corsair probably became the first US production aircraft capable of the then-magic 400 mph mark in level flight, possibly excepting Lockheed's twin-engine XP-38 Lightning. The Double Wasp got its name from its configuration: 2 banks of 9 cylinders each, based upon previous Pratt & Whitney designs such as the R-2180 and the dead-end R-2600. The R-2800 entered production in 1940, becoming the firm's first engine to exceed 100 horsepower per cylinder. Includes: The famous "Cranked" wing British and French Versions F2G - The Ultimate Corsair Korean Combat Models

2005.302.079	Douglas A-1 Skyraider : A Photo Chronicle	Johnsen, Frederick A.	For so many years, the Douglas Skyraider was simply there. The legends of its prowess began to accumulate. Company publicists didn't miss a chance to show the Skyraider could carry more ordnance than a B-17 heavy bomber of WWII. Single-engine, prop-driven Skyraiders were given the pivotal task of carrying nuclear weapons. Lugging a special fuel store with a trailing hose, Skyraiders could refuel fleet jets. Bulky radars and electronics systems could be nested in the metamorphosing fuselage of the Able Dog (as we all knew the letters AD really stood for). In far-off South Vietnam in the very early 1960s, coups and counter-coups were executed and thwarted with the aid of menacing Skyraiders.
2005.302.080	A-3 Skywarrior in Action	Sullivan, Jim	Douglas A3D/A-3 Skywarrior attack jet
2005.302.081	Douglas A-1 Skyraider	Dorr, Robert F.	Under normal circumstances, any aircraft which had to be planned in detail in under 24 hours would hardly be expected to fly at all, much less fulfil torpedo and dive bomber roles for the US Navy. But the aircraft designed by Ed Heinemann, Leo Devlin and Gene Root amid a pile of discarded coffee cups during an all-night stint at the Statler Hotel in Washington, DC in June 1944 became one of the most adaptable combat aircraft in history, and one which simply refused to grow obsolete. It first flew as the XBT2D Dauntless II from Mines Field (now Los Angeles International Airport) on 11 March 1945. Author Robert F Dorr, who needs no introduction to devotees of the Osprey Air Combat series, describes the development and combat

Object ID	Title	Author	Summary
			career of every member of the Skyraider family. Using personal accounts, he puts the reader in the cockpit during ground attack missions in South-East Asia, including heroic SANDY rescue operations to extract downed airmen in Vietnam and Laos. Its employment by the South Vietnamese Air Force (VNAF), airborne early warning (AEW) and electronic warfare (EW) missions are also featured. DOUGLAS A-1 SKYRAIDER is illustrated with over 160 black and white photographs (the vast majority previously unpublished), and 12 rare photographs in full colour. The text contains approximately 50,000 words; appendices and an index are included.

2005.302.084	F/A-18 Hornet : A Navy Success Story	Jenkins, Dennis R.	The first Navy air carrier profile in the Series, this book tells a particularly interesting tale. Traded off by the Air Force, the F/A 18 became the Navy's primary strike aircraft, claiming the only two Navy air-to-air kills in Desert Storm. All the tech details, specs and illustrations standard to the series are featured. Of special note are the F/A 18's custom-developed Hornet weapons systems, including laser-guided weapons and sophisticated electronic countermeasures. The Hornet's significant export success is profiled as well: Canada, Switzerland, Australia, Spain, Malaysia Our military aircraft series presents authoritative, interesting treatments of aircraft technology that spans the history and future of military aviation. The series is headed by Walter J. Boyne, an internationally renown aviation expert and author with an esteemed former military career. The authors contracted to series are also recognized experts and authors. The books themselves are superior in look as well as content. Quality products inside-out! From the Back Cover From Air Force lightweight to Navy champion--the F/A-18 Hornet is a versatile fighting force to be reckoned with!Responsible for the Navy's only two air-to-air kills during Desert Storm and the much-feared stinger in the Navy's aircraft carrier strike force, the F/A-18 Hornet has an ugly duckling history. Born as Northrop's YF-17, the design

Object ID	Title	Author	Summary
			went head to head with General Dynamics' F-16 for the Air Force's lightweight fighter contract -- and lost. This intriguing, fact- and photo-packed book, written by veteran aviation author and engineer Dennis R. Jenkins, brings readers a stop-action look at the F/A-18 Hornet's metamorphosis from an also-ran into a military, technical, and economic triumph. Boeing F/A-18 Hornet takes you inside the cockpit for never-to-be-forgotten takeoffs, landings, and missions on the great floating airfields that are naval aircraft carriers. But even more revealingly, it places you beside the engineers, pilots, and Navy brass who turned an awkward orphan into a combat winner. Replete with never-before-revealed technical details and performance appraisals, this in-depth history of the F/A-18 Hornet closely examines the sophisticated electronic countermeasures and weapons-delivery avionics that have made this versatile warplane a hit, not just with the Navy but with foreign purchasers from Canada to Malaysia. Precise, incisive, and authoritative, Dennis R. Jenkin's Boeing F/A-18 Hornet is one of the most exciting tours of an in-service combat plane ever penned--and a valuable addition to any collection of military or aviation lore. Boeing F/A-18 Hornet features: More than 170 illustrations and photos revealing intimate details of F/A-18 Hornet systems and construction Expert analysis of high-tech defensive and offensive systems including laser-guided weaponry Previews of Super Hornets just now entering service A detailed account of changes that transformed the F/A-18

Object ID	Title	Author	Summary
			from an Air Force reject into a Navy star Each volume in the Walter J. Boyne Military Aircraft Series provides an extensively illustrated look at America's top combat aircraft, from pre-WWII to conflicts yet to come. Internationally renowned, Walter J. Boyne is a former USAF Command Pilot and the number one aviation author. He is also past Director of the Smithsonian Institution's National Air & Space Museum and co-founder of Wingspan Air & Space Channel, the first cable television channel devoted exclusively to aerospace subjects. Representing the leading edge of the Navy's combat strike force, the multipurpose F/A-18 Hornet stands poised on decks of aircraft carriers around the world, ready to execute U.S. military policy swiftly and decisively. Outfitted with the most sophisticated electronic offensive and defensive weaponry yet devised, this potent and versatile warplane is a visible symbol of U.S. combat strength. But it wasn't always so. The F/A-18's phenomenal success story began with a tale of hard luck. Beaten out by General Dynamics' F-16 for the Air Force's lucrative lightweight fighter contract, the Hornet (then Northrop's YF-17) might have languished--had not an executive had the bright idea of marketing it to the Navy. The Hornet's troubles were not over when the Navy chose the new plane to replace its older F-4 Phantoms. Simply put, the F/A-18 Hornet's capabilities were not up to snuff. The rapid and determined development of new weapons-delivery avionics for the Hornet comprises one of the most fascinating and exciting highlights in this now super-capable aircraft's tale. More agile than most planes, engineered with the durability needed to survive carrier landings, the F/A-18 Hornet

Object ID	Title	Author	Summary
			has even enjoyed a surprising popularity in the export market, attracting seven foreign governments as purchasers, in an arena generally dominated by Air Force models. In this technically detailed history, noted aviation writer and engineer Dennis R. Jenkins takes readers closer to the F/A-18 Hornet than anyone other than its designers and crew have ever been. You'll find a full exploration of the cutting-edge electronic systems that guide and protect the Hornet, and make it such a fearsome antagonist; see the integration of these highly advanced weapons systems; and embark on a knowledgeable tour of the developmental design of this astounding powerhouse of military muscle. All in all, this book delivers one of the most compelling and complete portraits of a new war machine ever written. What's more, you'll also get an exclusive look--limited only by national security considerations--of advanced F-18 Hornet models now in development. The first volume in the prestigious Walter J. Boyne Military Aircraft Series to honor a Navy warplane, this expert history and technical overview delivers to the F/A-18 Hornet the respect that is its due. --This text refers to an out of print or unavailable edition of this title. 2005.302.093	Douglas Skyraider	Jackson, B. R.	This is the story of the greatest carrier airplane in the history of modern naval air warfare. Here, in exacting detail, for the first time in any publication, its entire production and operational history is told. Originally designed by Douglas Aircraft Corp. to replace the SBD's of early WWII fame in

Object ID	Title	Author	Summary
			the Pacific, the Skyraider unfortunately did not emerge operationally until WWII was past history. Necessarily then, from an economic and political standpoint, the testing and proving period was fraught with modifications and changes. Nevertheless the final testing period was completed with the delivery of AD-2's to the Navy early in 1948.
2005.302.094	F9F Cougar : In Detail & Scale : Grumman's First Swept Wing Fighter	Kinzey, Bert	Grumman F9F Cougar fighter jet
2005.302.095	Skyraider : The Douglas A-1 "Flying Dump Truck"	Rausa, Rosario	"... The story of an basic American military aircraft from its conception in June 1944 by Douglas Aircraft designer Ed Heinemann, to its initial launch nine months later. It was continuously employed by the U.S. Navy and Air Force during Korea and Vietnam. This sturdy, stubby, prop-driven attack plane was a true aeronautical workhorse and called a "flying dump truck" because of its enormous capacity for ordnance to be delivered to the assigned target. Not only did the American armed forces rely on the A-1 but so did allied forces including the British, French, and Swedish. Navy Captain Rosario Rausa brings a special expertise to his aviation history of this remarkable plane from its beginnings down to its last mission (shooting down MiG jets over Vietnam)." (from Amazon.com)
2005.302.096	Colors & Markings of the A-6 Intruder, Part 1: U.S. Navy Bomber & Tanker Versions	Kinzey, Bert	Grumman A-6 Intruder attack jet
2005.302.097	Colors & Markings of the F-14 Tomcat Part 1 : Atlantic Coast Markings, The First Ten Years 1974-1984	Kinzey, Bert	INTRODUCTION As the second title in the new Colors & Markings Series, this book covers the popular F-14 Tomcat. The scope of this publication is limited to the Atlantic coast squadrons. These include the Navy's operational combat squadrons, land based at Oceana Naval Air Station, Virginia. Also on the Atlantic Coast is the Naval Air Test

Object ID	Title	Author	Summary
			Center, located at Patuxent River, Maryland. Tomcats operated by this facility are likewise included. Finally, Grumman's plant at Bethpage, New York, also qualifies to be included here. The prototypes first flew from Grumman's runways on Long Island, so the markings of the prototypes are covered along with the Navy's operational squadrons. A future title in this series will cover the Pacific coast squadrons, to include VX-4. Ten years of markings are covered on these pages, and it seems appropriate to publish this book at this time. VF-74 and VF-103 have just completed transitioning to the F-14 from the F-4 Phantom, thus completing the changeover to the Tomcat by all fighter squadrons based at Oceana. As this book goes to press, these last two squadrons to receive the F-14, are embarked on their first extended deployment aboard the USS Saratoga, CV-60. Each Atlantic coast squadron is presented in numerical order. The book concludes with the aircraft based at Patuxent River and the prototypes. The color section also covers each squadron in numerical order. In both sections, units that were among the first to receive the Tomcat are given the most space. This is because they have used more variations of the markings than the newer F-14 squadrons. Newer units, like VF-74 and VF-103, that have only carried one or two sets of markings, accordingly require and receive less space. There are only thirteen squadrons of Tomcats based at Oceana, plus the NATC at Patuxent River. This is relatively few when compared to the number of F-106 squadrons covered in Volume 1. Yet it is amazing how many variations of markings some of these units have used. These

Object ID	Title	Author	Summary
			are presented on the following pages, and the captions point out the changes in markings carried by each unit. A special attempt has been made to give the dates the photographs were taken, so that the chronology of the markings can be understood.
2005.302.098	Carrier Air Operations Since 1945	Beaver, Paul	Introduction: The aircraft carrier, the floating airfield of the Pacific War, was the undisputed capital ship of the immediate post-war era and was unrivalled until the emergence of the nuclear-powered submarine in the late 1960s. Today, the carrier is expensive to operate and thought by some to be very vulnerable to enemy action. Events in the South Atlantic during the late spring of 1982 proved that organic air cover is indispensable to the modern battle commander. The photographs in this book have been chosen to illustrate the various aspects of aircraft carrier operations on the flight deck, as well as to provide the reader with a view of the changing pattern of carrier aircraft. Although the carrier-borne aircraft has changed since 1945, the basic types will still be recognizable to a naval flyer of that period. The grouping of the photographs is by navies, large and small, with due account being taken of the other books in the Warbirds series. Readers may feel, therefore, that the Argentines British, American and Soviet naval air arms have not been covered in full, but a complete account of carrier flying was not the purpose of this book. Paul Beaver, 1983 2. The carrier Karel Doorman underwent major reconstruction during her 20 years with the Royal Netherlands Navy, including the provision of modern aids in 1955-8 and again in 1965-6. This picture of a Sea Hawk undergoing

Object ID	Title	Author	Summary
			maintenance was taken just prior to that conversion; also on deck are an Avenger and the 'plane-guard S-55. Karel Doorman was eventually sold to Argentina (and renamed 25 De Mayo) after a major fire onboard in 1968. (AMH 59229 AVD)
2005.302.100	Boeing Aircraft since 1916	Bowers, Peter M.	This book lives up to the high standards of the famous UK-based Putnam aeronautical series of the 60s-80s. Peter M. Bowers was America's leading aircraft historian and enthusiast. (He even designed a popular homebuilt aircraft in addition to his writing and photography efforts) He was an engineer at Boeing for decades and brings his first hand knowledge...and access to their files...to this book along with photos from his amazing personal collection of aviation photos. Unlike many other Boeing-themed books out there, Bowers gives you chapters on what was going on at the firm (examples being sections on pre-war, WWII, and postwar operations along with the decision to get into the jetliner race) as well as detailed chapters on specific aircraft types. Those sections are backed up with quality three-view drawings, statistics and constructor/serial numbers and registrations. In short, everything is here. As you'll note from the copyright date, the book ends after the introduction of the 757 and 767 series, so you won't find details on the 777 series or the upcoming 787. Sadly Mr. Bowers has passed away, but I hope the publisher can find an author to revise and update this book in the future. (from Amazon.com)
2005.302.101	A-6 Intruder : In Detail & Scale, Part 1	Kinzey, Bert	Bomber & Tanker Versions of the Grumman A-6 Intruder attack jet (NOTE: Scannable copy in Pederson binder 2019.343.135.)

Object ID	Title	Author	Summary
2005.302.102	Air War Over the Pacific	Stern, Robert Cecil	Introduction: As suggested by the title of this work, the photo essay that follows is intended to depict the appearance and activities of US naval aircraft during the Second World War. This should by no means be taken as an attempt to describe the entirety of the Allied air war against Japan: that effort can readily be divided into four widely separated theatres of operation, and three of these – China–Burma–India, the South-West Pacific and the Aleutians – were almost exclusively land-based campaigns employing very few naval aircraft and so receive very little attention in these pages. It is on the remaining theatre that this book concentrates. The Central Pacific campaign of the US Pacific Fleet can be roughly divided into three phases (reflected in the organization of this book): early raids and battles in the South and Central Pacific from Pearl Harbor to Midway (December 1941–June 1942); the battle for the Solomons and Rabaul (August 1942–August 1945); and the 'island-hopping' campaign across the Central Pacific (October 1943–August 1945). Not surprisingly, photographic coverage of the first phase and the early parts of the second is somewhat sparse, but once the tide of the war turned more resources were lavished on recording the details of life on board the aircraft carriers and around the island airstrips from which naval aircraft flew. The result was a happy abundance of excellent photography of the Wildcats and Corsairs, the 'Beasts' and the 'Turkeys' that are the subject of this book. A note on aircraft camouflage colours is probably in order. The colour photos reproduced in this book are reasonably accurate in their portrayal of US Navy aircraft camouflage but, given the effects of forty years on original Second World

Object ID	Title	Author	Summary
			War-vintage colour material, some verbal description of the colours might also be useful. The basic US Navy camouflage colours were Insignia White, Light Gray, Sea Gray (sometimes called Blue Gray), Intermediate Blue and Sea Blue, all except Insignia White being shades of grey with varying amounts of blue mixed in. Unlike the ship camouflage colours with similar names used at the time, these paints had no red tint: Light Gray was a pale pure cool grey; Sea Gray was a medium blue-grey; Intermediate Blue was nearly identical in value to Sea Gray but was slightly blue; and Sea Blue was a dark blue-grey. All of these shades were available in gloss or non-specular (matt) finishes, with the glossy versions often looking like very different colours. Some description of the organization of naval aircraft units might help an understanding of the story. The basic unit was the squadron, designated by the letter 'V' and followed by one or more mission codes and a squadron number; hence VF-20 was the 20th Fighter Squadron. Other common mission codes were 'B', 'S', 'T', 'P' and 'C', standing for Bomber, Scout, Torpedo, Patrol and Composite missions respectively. An 'M' in the sequence indicated a Marine Squadron, VMSB-211, for example, being a Marine scout bomber squadron. Squadrons were organized into Carrier Air Groups (CVGs) for duty on aircraft carriers, and it was common for an air group's squadrons to be raised simultaneously and share the group's sequence number. The composition of a CVG varied considerably throughout the war, but a typical later war unit was CVG-9 on Yorktown in March 1945 which comprised VF-9, VB-9, VBF-9 and VT-9. Land-based Marine squadrons were organized into Marine Air Wings (MAWS).

			I would like to thank a number of people and organizations without whose help these photographs could never have been collected. These include Mike Hatfield of Vought Aircraft, Harry Gann of Douglas Aircraft and the patient staffs at the US National Archives and the Defense Audiovisual Agency. In particular, I would like to express profound gratitude to Dana Bell of the Smithsonian Institution and Stan Piet who assisted in tracking down the ever-elusive contemporary colour photographs. Robert C. Stern
2005.302.103	Air War Over Vietnam : Two "Warbirds Illustrated" Books in One Volume	Bell, Dana	(contains Warbird (sic) 10 (Volume I) and Warbirds 14 (Vol. 2))
2005.302.104	Grumman A-6 Intruder Prowler	Thornborough, Anthony M.	The A-6 Intruder's career has been a relatively low-key affair so far. In Vietnam it was the MiG-killing fighter jocks who grabbed the headlines, and the Intruder was criticised for its slow speed, high unit cost and systems unreliability. Nevertheless, the aircraft and its crews were able to outwit the most formidable anti-aircraft defence network ever confronted and to attack the most difficult targets in all weather conditions, and by 1973 had accumulated 35,000 combat missions. More recently A-6s have introduced the Harpoon missile to combat by sinking two Libyan patrol craft, following this up with raids on military installations in response to the Berlin discotheque bombing. Unequivocally the A-6 has revolutionised the naval attack business. Add to this the EA-6A/B electronic warfare developments, the KA-6D tanker models and the Marine Corps' close air support A-6Es, and one sees that the A-6 Intruder/Prowler family has been crucial in the development of modern

Object ID	Title	Author	Summary
			carrier air power. The latest in the highly successful 'Modern Combat Aircraft' series, Grumman A-6 Intruder/Prow/er is the first detailed work on the type, and is assembled exclusively from primary sources. It is certain to find its way on to the bookshelves of most aviation enthusiasts. (from dust jacket flap)
2005.302.106	Airplanes and Helicopters of the U.S. Navy	Delear, Frank J.	Here is the story of U.S. Naval Aviation - its beginnings, growth, achievements, and the current array of aircraft which make up one of our nation's first lines of defense. Text and photographs cover the history of U.S. Naval aircraft, including the lighter-than-air dirigibles and blimps as well as many of the early planes, but mainly concentrating on today's aircraft which range from helicopters to supersonic jets. Featured are all the widely varying types required to help safeguard America's global security - aircraft designed for fighting, attack, reconnaissance, search, patrol, transport, rescue, and training. There is an authoritative look into the future, too, at some of the new technology and new craft now coming into use, along with the increasing problems faced by the Navy in carrying out its responsibilities in a world threatened by nuclear weapons. FRANK J. DELEAR, whose career in aviation public relations spanned more than three decades before his retirement in 1977, was earlier a newspaperman, working as a sportswriter, reporter, feature writer, and aviation editor. Born in Boston, Mr. Delear was educated in the public schools of Quincy, Massachusetts, and was graduated from Boston College in 1936 with a B.A. degree. He became interested in aviation as a youngster, working at an airport near his

Object ID	Title	Author	Summary
			home in Quincy. He is the author of "Famous First Flights Across the Atlantic," "Igor Sikorsky: His Three Careers in Aviation," "Helicopters and Airplanes of the U.S. Army," "The New World of Helicopters," and many magazine and newspaper articles on aviation. Mr. Delear is a member of the Aviation/Space Writers Association, the Twelve O'Clock Scholars of Cape Cod, and a charter member and officer of the Professional Writers of Cape Cod. He lives in Centerville on the Cape with his wife Marion. Jacket photographs: F -14 Tomcat, courtesy of Grumman Corporation (front). SH-60B Seahawk, courtesy of Sikorsky Aircraft (back). (from dust jacket flaps)
2005.302.107	Nuclear Weapons and Aircraft Carriers : How the Bomb Saved Naval Aviation	Miller, Jerry	Rapid demobilization after WWII eliminated many aircraft carriers, and most policy makers believed that the future wars would be fought with nuclear weapons delivered by land-based aircraft, a method patented by the new Air Force. During the so-called "Revolt of the Admirals" respected naval leaders lobbied for the Navy's role in the new era. Arthur Radford and Arleigh Burke risked their careers to speak out in support of enabling aircraft carriers to transport, target, and deliver nuclear weapons. The author demonstrates the success of the Navy's nuclear vision, which saved the aircraft carrier from extinction, and argues that the Navy's hard-won nuclear capability played a significant role in ending the Cold War.
2005.302.108	Ship Strike Pacific	Bruning, John R.	The aerial anti-shipping campaigns between Allied and Japanese forces in the Pacific theater were pivotal in the outcome of World War II. This book examines some of the most important air-sea actions of World War II.

2005.302.113	A-6 Intruder : Carrier-borne Bomber	Dorr, Robert F.	INTRODUCTION When test pilot Robert Smyth took the Grumman Intruder on its maiden flight on 19 April 1960, he was flying an aircraft which looked, to many, like a holdover from the past rather than the wave of the future. The Intruder was slow. It was shaped like a tadpole. Fighter pilots joked that the blueprints had been reversed: the pointed end was not at the front. Other jet warplanes, notably the F-4 Phantom, busily amassed speed and altitude records in the early 1960s, while the Intruder could not even nudge through the sound barrier. All it could do was carry a lot of bombs and deliver them with painstaking accuracy. In the three decades since its first flight, the Grumman A-6 Intruder has confounded its critics and altered warfare. Part of the reason is the man in the right-hand seat, the only flight crewman in American uniform called a bombardier-navigator - or BN. Using the 'black box' gadgetry of a navigation bombing system called DIANE (digital integrated attack and navigation equipment), pilot and BN can take the Intruder against a target in the dead of night and the worst of weather. The epoch-making significance of the Intruder: it can hit that target with exquisite precision with neither crew member ever seeing it. DIANE was not always a lady, and when VA-75 'Sunday Punchers' introduced the Intruder to Vietnam in 1965, equipment problems were endemic. But by 1966 (and with due respect to the USAF's

Object ID	Title	Author	Summary
			`Ryans Raiders' in their F-105Fs) , the Intruder was the only warplane that could strike targets in North Vietnam at night in bad weather. A-6B and A-6C variants were created for special uses. The KA-6D tanker performed a different but vital role. In recent years, the A-6E TRAM Intruder (target recognition and attack, multi-sensor) proved itself in combat in the Lebanon and Libya, and against Iranian vessels in the Persian Gulf. During the Reagan years, the Intruder community flourished because Secretary of the Navy John Lehmann, a Naval Reserve A-6E BN, was a vocal proponent of the aircraft. The re-engined, redesigned A-6F Intruder of 1988 was one of the finest attack aircraft in the world. For a time it seemed that the A-6F would dominate carrier warfare in the 1990s and into the new century. Instead, the US Navy has decided to leapfrog the A-6F (and the more modest, short-lived A-6G, which never flew) and to equip its future medium attack squadrons with the General Dynamics A-12A Avenger II. Production of the A-6F was cancelled, abruptly, in an election year (1988). The hi-tech, semi 'stealth' A-12A may prove to be as much a quantum leap as the Intruder was. Intruder crews will want to be convinced. On the pages which follow, the reader will be able to look at the career of the Intruder from its inception to the present day. The author is responsible for any errors in this volume, but many others deserve credit. This volume is dedicated to David Anderton, who taught most of us most of what we know, and who was a fixture with Grumman's Horizons magazine. The Grumman History Centre's Lois Lovisolo and Peter Kirkup helped greatly with research, expertise, and

Object ID	Title	Author	Summary
			Japanese bombing attack at Pearl Harbor on the morning of 7 December 1941, the United States of America entered the Second World War. Although the distant rumblings of war had been heard months earlier, the U.S. military was not fully prepared for combat on a worldwide scale. Our military aircraft were relatively few in numbers and consisted of trainers, transports, scouts, fighters and bombers. Many of these were obsolete when compared to the performance of the Mitsubishi Zero that formed the backbone of the Japanese Empire's aerial assault. Fortunately for the United States, the few aircraft carriers we had in the Pacific at the time of the Pearl Harbor attack were at sea and sustained no damage as a result of the Japanese aerial assault. The USS ENTERPRISE was enroute back to Pearl and its air group suffered limited losses of SDBs and F4Fs as they arrived in the midst of the enemy air raid. This fact alone allowed the U. S. to preserve enough Naval air power to rebuild and reorganize. Starting the day after Pearl Harbor, a rapidly accelerated buildup of men and material began, which did not let up or level off until near the war's end in September of 1945. This book pictorially depicts this rapid development and the scope of aircraft utilized by the United States Navy and Marine Corps from 1941 thru 1945. The Second World War saw many aircraft types used, including the star performers, the F6F Hellcat and the F4U Corsair. These fighters, however, were just two of the types used by the Navy and Marines. Other aircraft, although lesser known, provided vital service that was essential to the ultimate result of the war effort. Victory was attained by the combined results of all aircraft types such as trainers, flying

Object ID	Title	Author	Summary
			ambulances, cargo haulers, scouting planes, target tows, fighters and bombers. There were long-range patrol aircraft that flew for countless monotonous hours to keep the sea lanes open and relatively free of enemy subs. The photo reconnaissance aircraft braved danger daily to bring back vital photographic information for upcoming raids as well as post strike photographs to determine the damage done by these strikes. Under primitive conditions, many of the land-based pilots lived and flew from airstrips that were not much more than muddy fields. As the war progressed, conditions under which both men and machines were forced to operate improved, thanks to the arrival of the Navy Seabee and Army construction teams. Muddy strips became operational airfields and living conditions were upgraded from tents to Quonset huts. Aircraft maintenance personnel were considerably better housed and equipped to keep the aircraft
2005.302.120	Aircraft Carriers of the World, 1914 to the Present : An Illustrated Encyclopedia	Chesneau, Roger	The first comprehensive reference work to detail in one volume - with data, line drawings and photographs - the 360 carries designed or projected by the world navies.
2005.302.122	Carrier : Fortress at Sea	Discovery Channel Multimedia	This is a 1996 for windows version 3.1 or higher. All the action takes place on the USS Carl Vinson. Launching from Discovery Channel's highest-rated TV documentary, Carrier: Fortress at sea, this CD-ROM provides you with hours of firsthand exploration, taking you where only the Navy has gone before. Discover everything you ever wanted to know about aircraft carriers --- and more. Explore the ship, learn how it works and visit with crew members both on- and off-duty. 			collection of aeronautical documents was started in 1928, and now numbers in the thousands. While a student at the Boeing School of Aeronautics in 1940 he started an airplane photo negative collection that is now one of the largest in the world, containing nearly 50,000 individually-filed negatives. From 1942-1947, Pete Bowers served in the Army Air Force as an Engineering and Technical Intelligence Officer. He has been employed at the Boeing Company as an engineer since 1947. He learned to fly in 1948 and has accumulated more than 3,500 hours and several advanced pilot ratings. His first article was published in 1938 in a model airplane magazine. From that time on, the Bowers byline has become familiar on historical, technical and sport flying subjects in countless magazines as well as several complete books. In addition to writing and flying, he is active in many national organizations, including the American Aviation Historical Society, the Society of World War One Aero Historians and the Aviation/Space Writers Association. This volume is but the first Mr. Bowers has in preparation in the FORGOTTEN FIGHTERS series. The next will be a companion to this one, covering the lesser-known and experimental aircraft of the

2005.302.171	Nimitz Class Supercarrier, How They Work	Cowin, Hugh	The Nimitz-class supercarriers are a class of ten nuclear-powered aircraft carriers in service with the United States

Object ID	Title	Author	Summary
			Navy. The lead ship of the class is named for World War II Pacific fleet commander Chester W. Nimitz, who was the Navy's last fleet admiral. With an overall length of 1,092 ft (333 m) and full-load displacements of over 100,000 long tons, they are the largest capital ships in the world. Instead of the gas turbines or diesel-electric systems used for propulsion on many modern warships, the carriers use two A4W pressurized water reactors which drive four propeller shafts and can produce a maximum speed of over 30 knots (56 km/h) and maximum power of around 260,000 shp (190 MW). As a result of the use of nuclear power, the ships are capable of operating for over 20 years without refueling and are predicted to have a service life of over 50 years. They are categorized as nuclear-powered aircraft carriers and are numbered with consecutive hull numbers between CVN-68 and CVN-77. All ten carriers were constructed by Newport News Shipbuilding Company in Virginia. USS Nimitz, the lead ship of the class, was commissioned on 3 May 1975, and USS George H.W. Bush, the tenth and last of the class, was commissioned on 10 January 2009. Since the 1970s, Nimitz-class carriers have participated in many conflicts and operations across the world, including Operation Eagle Claw in Iran, the Gulf War, and more recently in Iraq and Afghanistan. The angled flight decks of the carriers use a CATOBAR arrangement to operate aircraft, with steam catapults and arrestor wires for launch and recovery. As well as speeding up flight deck operations, this allows for a much wider variety of aircraft than with the STOVL arrangement used on smaller carriers. An embarked carrier air wing consisting of up to

Object ID	Title	Author	Summary
			around 90 aircraft is normally deployed on board. After the retirement of the F-14 Tomcat, the air wings' strike fighters are primarily F/A-18E/F Super Hornets and F/A-18C Hornets. In addition to their aircraft, the vessels carry short-range defensive weaponry for anti-aircraft warfare and missile defense. (from Wikipedia)

2005.302.174	Lake Michigan's Aircraft Carriers	Somers, Paul M.	Lake Michigan's Aircraft Carriers is the story of the USS Wolverine and the USS Sable, two Great Lakes excursion ships converted for use as aircraft carrier training during World War II. Through the duration of the war, the United States Navy qualified 17,800 pilots for aircraft carrier operation. Training the pilots on either the Atlantic or the Pacific Ocean would have exposed the training ships to the danger of submarine attack, while requiring the escort of fighting ships that were needed elsewhere. It would also have involved arming and armoring the ships used for training. Commander R.F. Whitehead came up with an idea that solved all of these problems. He suggested doing the training on the protected waters of the Great Lakes. The USS Wolverine and the USS Sable were chosen and thus became the only fresh water, paddle-wheeled, coal-fired aircraft carriers in the history of the world. Author Paul M. Somers shares his collection of vintage photos and a lifetime of research to detail the history of these two great vessels-from

Object ID	Title	Author	Summary
			their life as cruise ships to their contributions to the war effort and then to their eventual scrapping. About the Author Mr. Somers, a native of Chicago, grew up as a witness to these aircraft carriers on Lake Michigan. This book is a result of his continuing interest in those ships. Somers is also the author of Illinois Central Streamliners 1936-1946. (from Amazon.com)

One MIG got slow in

Object ID	Title	Author	Summary
			front of one of the Spad's 20mm cannon. Additional illustrations of an F-4B of VF-161 flown by Pat Arwood and Taco Bell on their MIG killing mission of 18 May 1972. (18 May 1972, MIG-19, F-4B, VF-161, CVW-5, CVA-41, A/C No. NF-110, BuNo 153068, Lt. Henry "Bart" Bartholomay, Lt. Oran Brown); (Mig- 19, F-4B, VF-161, CVW-5, CVA-41, A/C No. NF-105, BuNo 153915, Lt. Pat Arwood, Lt. Mike "Taco" Bell). This article is narrated by "Taco" Bell. The Midway had been sent to WestPac seven weeks early for this cruise. The ship was steaming for their Pre-ORI drill when they were recalled to port and given short notice to get ready to pull out. On 18 May, the Midway launched three Alpha Strikes into North Vietnam. Bell flew with the CAG on the first one, leading a strike up into Hon Gai. Lt. Bell describes this strike operation in detail. Sometime between the bombing halt of 1968, and the renewed campaign against North Vietnam in 1962, a major television network aired a special report on the North Vietnamese Air Force on its nightly news program. The reporter built up the North Vietnamese Air Force as "a force to be reckoned with", indicating that if the United States ever decided to go back "Up North" they would run into stiff opposition. (23 May, 1972, 2 Mig-17s, F-4B, VF-161, CVW-5, CVA-41, A/C No. NF-100, BuNo 153020, LCDR Ronald "Mugs" McKeown, Lt. Jack Enschede); Mugs McKeown was asked if he had seen the news program and did he think that the North Vietnamese were as tough as the reporter made them out to be? McKeown's response was "If they want to get me, they better bring a hundred!" His response was a manifestation of a growing confidence in the abilities of Navy fighter pilots in general.

2005.302.191	Official Monogram US Navy & Marine Corps Aircraft Color Guide, The, Vol. 3, 1950-1959	Elliott, John M.	This is one of a four volume set that is indispensable for anyone who is interested in modeling aircraft of the U.S. Navy or Marine Corps, or anyone interested in seeing the finest photographs ever put together of naval aircraft to the date of publication. The author is a career Marine Corps veteran, and made it his formidable task to organize mounds of data regarding the subject for future generations. Included are the standards for painting and marking naval aircraft into the 1990's and his interpretation for how well they were or were not carried out. The photographs were carefully chosen to illustrate the text and are of superior quality in their reproduction. There are also many beautiful color illustrations painted for these volumes that often have humorous aspects in them that only enhance one's overall enjoyment of the book. You will find all types of naval aircraft here from fighters to floatplanes, transports and lighter than air craft. To top it all off, there are paint chips in the back of each volume that were produced with the greatest of care from original examples. This particular volume is interesting because of its coverage of the period of the transition from internal combustion engines to jets. (Customer review from Amazon.com)

2005.302.196	Destined for Glory : Dive Bombing, Midway, and the Evolution of Carrier Airpower	Wildenberg, Thomas	The author demonstrates in this book that the key ingredient to the navy's success at the Battle of Midway was the planning and training devoted to the tactic of dive bombing over the previous 17 years. Examining how political, economic, technical, and operational factors influenced the development of carrier airpower between 1925-1942, he shows why dive bombing became the navy's weapon of choice--why it was emphasized over all other methods of aerial warfare and finally brought to bear to stop the Japanese advance. He also pays tribute to the select group of naval aviators and senior leaders whose insights and determination drove the evolution of carrier tactics in this formative period. Signed by the author on the title page. Extensive Notes and Bibliography.

2005.302.198	Midway 1942 : Turning-Point in the Pacific	Healy, Mark	There is another edition in this series, Campaign 226 written by Mark Stille and published in 2010. (objectid 2010.302.148) A Chronology from the Prelude to Opposing plans, opposing Commanders, opposing Naval Air Arms and then the Battle of Midway. The author discusses the Japanese view of the United States as weak, decadent and

Object ID	Title	Author	Summary
			effete. They underestimated the United States ability to respond to their attack. The notion that the United States Fleet would put to sea only subsequent to the invasion and occupation of Midway was an article of faith.
2005.302.199	Glorious Page in Our History, Adm. Chester Nimitz, 1942 : The Battle of Midway, 4-6 June 1942	Cressman, Robert	A Pictorial history of the Battle of Midway, and includes a section on what occurred on Midway prior to 1935. It includes what occurred between the coming of Pan American Airways and incipient Navy interest in the mid-1930s and the start of World War II. Likewise, Midway's first battle with the Japanese, on 7 December 1941, is given its proper place.
2005.302.200	Sikorsky H-34 : An Illustrated History	Lundh, Lennart	(from schifferbooks.com:) Originally designed in 1952 as an anti-submarine warfare platform for the U.S. Navy, almost two-thousand Sikorsky H-34s have served on every continent with the armed forces of twenty-five countries - from combat in Algeria, the Dominican Republic, Nicaragua, and throughout southeast Asia, to saving flood victims, recovering astronauts, fighting fires, and carrying presidents, military H-34s have met every challenge handed them. With continuing post-military service, the number of countries which the H-34 has called home has swelled to nearly fifty. Revitalized with turbine engines, it has yet to fade from sight. Whether lifting construction material or supporting police departments, the "DC-3 of helicopters" will still be flying on its fiftieth anniversary. The most detailed account of the H-34 to appear, Lennart Lundh's Sikorsky H-34 reflects over a decade of research. It takes the reader through the H-34 from nose to tail, and across its service from Argentina to Vietnam. Few of the photographs have been published before, and many

2005.302.212	TBF/TBM Avenger Units of WWII	Tillman, Barrett	(from ospreypublishing.com:) About this book As its name suggests, the Avenger meted out severe retribution on the Japanese in the Pacific, participating in every major engagement through to VJ-Day. As a key weapon of war, the Avenger was so highly valued by the US Navy that its demand for the aircraft soon outstripped Grumman's production capacity, so General Motors [GM] was contracted to build the near identical TBM from September 1942 onwards. Over 1000 Avengers also saw action with the Fleet Air Arm in both the Atlantic and the Pacific through to VJ-Day, and two squadrons of RNZAF TBDs fought alongside American Avengers on Bougainville in 1944. Contents * Avenger * Guadalcanal and the Solomons * Central Pacific Campaigns * To Japan * Sub Hunter * Royal Navy and RNZAF * Assessment * Appendices Paperback; October 1999; 100 pages; ISBN: 9781855329027
2005.302.213	US Navy F-4 Phantom II MiG Killers - 1972-73	Elward, Brad A.	The second of two books on the Navy's Phantom II MiG killers of the Vietnam War, this book covers the numerous actions fought out over North Vietnam during the Linebacker I and II operations of 1972-73. No fewer than 17 MiGs were downed during this period, five of them by the Navy's sole

Object ID	Title	Author	Summary
			aces of the conflict, Lts Randy Cunningham and Willie Driscoll of VF-96. Drawing on primary sources such as surviving Phantom II aircrew and official navy documentation, the author has assembled the most precise appraisal of fighter operations involving US Navy Phantom II units and those elusive MiGs ever seen in print. (from ospreypublishing.com) Marty Vehanen Summary: Although the intensity of the aerial action of 10 May 1972 would never again be repeated, two more engagements later that month would result in a further four Mig kills for Navy F-4s. Two of these victories occurred on 18 May during a large Alpha strike on the Hiaphong highway and rail bridge. The MiGCAP support for the strike consisted of two F-4Bs from VF-161, embarked in USS Midway (CVA-41). These aircraft were crewed by Lts Henry A "Bart" Bartholomay and Oran R Brown in the lead jet (BuNo 153068, call sign "Rock River 110") and Lts Patrick E "Pat" Arwood and James M "Taco" Bell flying wing (in BuNo 153915), call sign "Rock River 105"). The strike force was made up of eleven A-7Bs, four F-4Bs and three A-6As, all with mixed bomb loads, plus the normal supporting aircraft. During their ingress, RIO Bell busied himself studying the radar scope, looking for signs of a contact. But as soon as they received a 'bogey' call from Red Crown, Bell pulled his head out of the cockpit and started looking for Migs outside. The author describes the engagement in detail. The Red Baron evaluators were critical of the engagement, noting that Bartholomay and Arwood had 'violated basic, combat-spread principles when they separated for one-on-one attacks. The absence of other threats in the area allowed

Object ID	Title	Author	Summary
			their split section to operate successfully. This may well have been factored into the moment by the crews, who knew the situation in the air. Bartholomay credited the success of his mission to the training he had received at Topgun, and the influence the school had had on overall fleet tactics. Five days later, on 23 May, another crew from VF-161 tallied two more Migs. This time the Phantom IIs were part of a MiGCAP force supporting an Alpha strike sent to bomb a petroleum storage area to the northeast of Haiphong. The lead for the MiGCAP was flown by LCDR Ronald E 'Mugs' McKeown and Lt John C 'Jack' Enschede (in BuNo 153020, call sign 'Rock River 100') with Lt Mike Rabb and Lt(jg) Ken Crandell on their wing. The author describes this engagement in detail. On 12 January 1973, the Navy claimed its 57th and last MiG of the war when two F-4Bs from VF-161 engaged and shot down a MiG-17 over the Gulf of Tonkin, some 55 miles southeast of Haiphong. At about 1330 hrs, Lt Victor T. Kovaleski and his RIO, Lt(jg) James A Wise, were flying a routine fleet-defence BARCAP mission (in BuNo 153045), call sign 'Rock River 102') from the Midway when they were directed by Red Crown to intercept an unknown contact. The author describes this engagement in detail. Red Baron's review of the engagement concluded, 'Good flight discipline, excellent control by Red Crown and missiles that performed properly, all combined to achieve this clean kill – the last kill in the Southeast Asian air war. Illustrations show 'Rock River 101' in full afterburner prior to taking a 'cat shot' in 1972; VF-161 posing for a cruisebook shot in April 1972; VF-161 Ready Room door aboard USS Midway CVA-41; 'Rock River 102' resting on the Miramar ramp in the spring of 1973; A picture of NF-110

			and NF-105, VF-161, USS Midway, 18 May 1972; A picture of NF-100 and NF-102, VF-161, USS Midway, 12 January 1973 and 23 May 1972.
2005.302.214	US Navy Aircraft Carriers 1922-45 : Prewar Classes	Stille, Mark	The USS Langley, the first American aircraft carrier, entered service in 1922. Despite being converted into an aircraft tender, it was the first step in a new direction for the US Navy and naval warfare. This book covers the design, development and operation of USN aircraft carriers built prior to World War II, including their aircraft and weaponry. It also explains their various successes and losses such as the first carrier vs carrier battle at Midway; the battle of the Coral Sea; the battle of the Philippine Sea; and the Operation Torch landings.
2005.302.215	RA-5C Vigilante Units in Combat	Powell, Robert R. "Boom"	Developed from the A-5 nuclear bomber and used in a reconnaissance role, the RA-5C Vigilante was the largest and fastest aeroplane ever to operate from the deck of an aircraft carrier. During the Vietnam War it sustained the highest loss ratio of any American aircraft in that conflict. This volume includes compelling accounts of combat missions over key communist targets, where crews dodged Surface-to-Air Missiles (SAMs) and anti-aircraft fire to secure all-important mission photographs. Written by a Vigilante combat veteran this book is crammed full of action-packed first-hand accounts.
2005.302.216	Warplanes of the Fleet	Donald, David (ed)	Fielding one of the world's largest and most potent air forces, the US Navy operates a plethora of warplanes from the decks of its carriers - from state-of-the-art fighters, electronic jammers and surveillance platforms to training, tanking, rescue and on-board delivery assets. Warplanes of the Fleet examines the Navy's 10 carrier-based aircraft (including helicopters) in extraordinary detail, describing their development, avionics, weapon systems, missions, and unit

2005.303.010	Fly Navy : Naval Aviators and Carrier Aviation : A History	Kaplan, Philip	Author describes the first ramshackle seaplane carriers built during immediately prior to the advent of World War I all the way through the nuclear powered supercarriers. He describes the planes that have flown on these carriers, from the Swordfish biplanes that devastated the Italian fleet at Taranto, the Hellcats that swept the Japanese from the skies of the Pacific, and the Hornets, Hawkeyes, and Sea Harriers of today.	
2005.303.015	American Secretaries of the Navy, vol. 1 - 1775-1913	Coletta, Paolo Enrico (ed)	PREFACE: This study presumes to be neither a text nor an operational history of the United States Navy. Rather it seeks to bring into proper perspective the men and measures responsible for the administration of the Navy, for making it or keeping it an adequate instrument of	

Object ID	Title	Author	Summary
			national power. It deals with more than the decisions and efforts that provided the men and materials needed to win battles and wars, for during most of its history the United States Navy has been at peace. It encompasses all the myriad factors that compose "sea power." Since the Navy often worked with the land and air forces, its relations to the other military arms are considered. Since the Navy is but one recipient of budgeted funds, military-civilian relations are not overlooked. And since the Navy has been a decisive factor in the formulation of American foreign policy or in turn has been greatly affected by such formulation on the strictly diplomatic level, its impact upon foreign policy and the impact upon it of foreign policy naturally play a large part in its development. While a basic outline is followed by each author, no attempt has been made to restrict the story to the outline or to deny the writer free use of his treatment and style. All deal with at least the following topics: 1) a short biographical sketch of each secretary, including his political career, if any, and the reasons for his appointment; 2) problems facing the secretary when he assumed office; 3) the degree of success in his resolution of problems; 4) administrative competence and plans for departmental reorganization, if he had any; 5) the influence of domestic policy, foreign policy, strategy, and tactics on naval administration; and 6) a summary of achievements in both operational and administrative fields. Vol 1 -

Object ID	Title	Author	Summary
			Furys), VA23 (FJ-4B Furys), VF-24 (F8U/F-8 Crusaders), VA-25 (AD/A-1 Skyraiders), and VAH-8 (A3D/A-3 Skywarriors) embarked aboard. Port calls included Pearl Harbor, Guam, Subic Bay, Buckner Bay, Yokosuka, Kobe, Sasebo and Hong Kong. Good pics of heavy seas in Typhoon Charlotte.
2005.303.018	U.S. Light Carriers in Action	Smith, Michael C	A light aircraft carrier is an aircraft carrier that is smaller than the standard carriers of a navy. The precise definition of the type varies by country; light carriers typically have a complement of aircraft only ½ to 2/3 the size of a full-sized or "fleet" carrier. (from en.wikipedia.org)
2005.303.019	Jane's Pocket Book of Submarine Development	Moore, John E. (ed)	During the 75 years that submarines have become operational their true function has been very largely misunderstood by both the general public and the naval staffs of the fleets to which they have belonged. Since 1901 the home of the British submarines, HMS Dolphin, has had as its motto "Venio non Videor" - "I come unseen". It is this very attribute which is too often forgotten and the submarine has frequently been regarded as a surface vessel with the capability to dive. It is the aim of this book to describe the slow and sometimes faltering advance of this particular type of warship.
2005.303.020	Boneyard Badges : Aircraft and Emblems at Davis-Monthan AFB	Chinnery, Philip	Retirement home for supersonic fighters, prop-powered transports, tank-busters and almost every type of aeroplane that has served in the world's most powerful air force. Review: The Quality Has Slipped - August 15, 2001 By BookGuy Philip D. Chinnery has written at least 4 books on Davis-Monthan AFB (a.k.a. "The Boneyard"). Unfortunately, this is the weakest effort. Don't get me wrong. It's still a solid 4-Stars worth of

Object ID	Title	Author	Summary
			textual/pictorial entertainment. If you're an aviation enthusiast you'll be enjoying the photos of individual aircraft very much. My gripe with the book is the premise for its existence: That we'd be treated to both aircraft and the emblems that adorn them; maybe splashy nose art, and perhaps treated with a wonderful, historical viewpoint. Alas, I was disappointed. The photos are very good, and you'll see aircraft galore, but to try and create the theme that this is all about aircraft emblems is pushing it. It feels like Chinnery spent a week or two photographing the emblems available at the AFB over those couple weeks, and little else was done photo-research-wise. Even some pre-storage aircraft tail graffiti [though nicely done] made it into this book. You'll see some nose art, but a great deal of what passes as "emblems" are really just "unit badges" and "tail markings". Nothing to get excited about in either of those arenas either. Get this book for the [exceptional] photography of the aircraft themselves--that's the book's great strength--but pass on it if you want a historical perspective and photo essay on nose art, or if you want a historical perspective on unit badges. It just doesn't make that cut. (from Amazon.com)
2005.303.021	Air Operations in Naval Warfare : Reading Supplement	United States Naval Academy	This pamphlet is designed for midshipmen of the first class at the U. S. Naval Academy for their course, "Air Operations in Naval Warfare." As a reading supplement it will support the course in Air Operations and will provide material for discussion in the classroom, for further development of the midshipmen's logical thought processes, and for a better understanding of sea power and the important part which air weapons systems must play in the accomplishment of the over-all mission of the Navy. This pamphlet will help the

Object ID	Title	Author	Summary
			midshipmen bridge the gap between the study of air operations in naval warfare in the Department of Aviation and the study of sea power in the Department of English, History, and Government at the U. S. Naval Academy. Because this pamphlet is specifically designed for a midshipman's course, the articles are listed in the order of most probable use in the classroom and will be assigned to supplement the basic text for the course. The opinions or assertions in the articles are the private ones of the writers and are not to be construed as official or reflecting the views of the Navy Department, the U. S. Naval Academy, the U. S. Naval Institute, or the editor. It is impossible to cover in one small book the total spectrum of opinions which pertain to the study of air operations in naval warfare. It is hoped that this reading supplement will induce the future naval officer to expand his study in this field so that he will have a broader basic foundation in the reasoning behind aviation and air weapons systems and, hence, a better appreciation of sea power. The reader's attention is called to the evident variation in style between the various articles in this collection. This variation stems from the fact that the articles are taken from a number of different publications, many of them Service publications with a style of writing names and ranks and of abbreviations and word compounding peculiar to the Service involved. For instance, the abbreviations and punctuation for articles from Marine Corps Gazette are distinctly different from those used in articles from the U. S. Naval Institute Proceedings, which magazine goes not only to members of the Naval Service but also to many,

			many thousands of civilians who are vitally interested in the Navy and naval affairs yet who are not familiar with the style of official Navy correspondence and official Navy publications. WALTER C. BLATTMANN Commander, U. S. Navy Editor (from Preface)
2005.303.023	New Naval Phraseology in English, French, Spanish, Italian, German, Portuguese	US Naval Academy. Dept. of Foreign Languages	The increasing importance of aviation and submarines during the Second World War and numerous changes in the terminology used in various branches of naval science have made it desirable to publish a New Naval Phraseology. It is hoped that the present volume not only will prove valuable to the instruction of Midshipmen at the Naval Academy but will also meet the needs of the naval service in helping Officers of the Fleet in foreign waters adequately to meet situations in which they may be required to use the foreign language. Covers English, French, Spanish, Italian and German.
2005.303.025	History of Sea Power, A	Stevens, William Oliver	Naval history is more than a sequence of battles. Sea power has always been a vital force in the rise and fall of nations and in the evolution of civilization. It is this significance, this larger, related point of view, which the authors have tried to make clear in recounting the story of the sea. Includes: Beginnings of Navies -- Athens as a Sea Power: Persian War, Peloponnesian War -- Sea Power of Rome: Punic Wars, Imperial Navy -- Navies of the Middle Ages: Eastern Empire, Venice and the Turk -- Opening the Ocean Routes: Portugal and the New Route to India; Spain and the New World -- Sea Power in the North: Holland's struggle for independence -- England and the Armada -- Rise of English Sea Power: Wars with the Dutch; Wars with France to the French Revolution -- Napoleonic Wars: First of June and Camperdown; Rise of Nelson; Trafalgar and

2005.303.027	Naval Customs, Traditions and Usage	Lovette, Leland Pearson	Naval Customs, Traditions and Usage Lt. Cmdr Leland P. Lovette US Navy with Frontispiece copied of The Naval Monument published in 1816. Preface by the author and in Parts I - IV with Appendixes A . Lucky Bag of Facts and Tradition; B. Notes on Precedence - K. The Laws of the Navy by Captain Hopwood., R. N. Bibliography & Index.
2005.303.031	All-Weather Flight Manual	Chief of Naval Operations Aviation Training Division	"The key to all-weather flying is pilot proficiency, and the key to pilot proficiency is effective training and practice. In this training, you will find that simulated flight trainers can help you tremendously because they let you practice the procedures you want under ideal conditions without the distractions and dangers of actual flight. This does not mean that the simulated flight trainers are unrealistic. On the contrary, they are so realistic that sometimes students forget they are in a trainer and break in a cold sweat at the supposed imminent danger of a crash..." Contents include Basic Instruments--All-Weather Flight Operations--Aerology
2005.303.032	Aircraft Weapons Systems Cleaning and Corrosion Control Organizational and Intermediate	Naval Air Systems Command	Prevention and repair of corrosion damage to equipment on land and sea.
2005.303.035	Arming the Eagle : A History of U.S. Weapons Acquisition Since 1775	Jones, Wilbur D.	In a series of probing essays covering various periods in America's military history, this official history tells the story of how United States weapons were developed and produced, what notable managers and organizations were involved, and which weapons from those periods had a significant impact on America's wars. Publication Date: November 15, 1999 (from Amazon.com)

Object ID	Title	Author	Summary
2005.303.036	Aircraft of the National Air and Space Museum, Smithsonian Institution	Oakes, Claudia M.	(from the Introduction:) The National Aeronautical Collection, probably the best such collection in the world, includes some two hundred seventy-five aircraft, running the gamut from the tiny Crosley Flying Flea to the huge Boeing 707 prototype; from early Lilienthal and Wright brothers gliders to the modern McDonnell Phantom and Lockheed Starfighter; from the one-of-a-kind Hughes H-1 racer to the everyday Cessnas, Beechcraft, and Pipers. Autogiros, balloons, helicopters, gliders, sailplanes, and almost every other variety of aircraft are represented. This catalog contains a brief descriptive article, by staff members, about each of the sixty-four aircraft on display in the National Air and Space Museum at its opening on July 4, 1976. The aircraft are exhibited in fourteen galleries, each with a distinct theme, and the articles conform to this arrangement. A guide to gallery locations is included in this catalog (inside front and back covers). The remainder of the collection is either in storage or on loan to other air museums. A listing of these aircraft and their locations may be found at the end of this catalog. The staff of the Aeronautics Department and I hope you will find this catalog a useful reference during your visits to the National Air and Space Museum and for many years to come. Donald S. Lopez Assistant Director Aeronautics
2005.303.037	USS Ronald Reagan CVN 76 Commemorative Program	USS Ronald Reagan Host Committee	This brochure commemorates the USS Ronald Reagan (CVN-76) arriving at its homeport of San Diego for the first time on July 23, 2004. The Reagan is a Nimitz-class nuclear-powered aircraft carrier.

Object ID	Title	Author	Summary
2005.303.039	Sky Warriors : American Combat Aircraft of the '90s	Chant, Christopher	The air arms of the United States Military form the most potent combined air force in the world, capable of defending the skies of the free world, engaging and destroying any hostile threat. The USAF has bases in every part of the globe, and these are supplemented by the Navy's fleet of floating airfields, the aircraft carriers. The Army and Marine Corps play a vital role in support of any troops they have in action in ground operations, as witnessed by the world in 1991 in the Gulf. This superbly illustrated volume describes each aircraft in current service and their specific operational roles with the four services: how the crews of these high-technology systems train for their respective missions, such as air defense, strike, or reconnaissance, what weapons and equipment they use, and how these already advanced systems are updated with the introduction of even newer technology to counter ever-changing threats. This book provides a running commentary on the modern military aircraft of the United States. Data panels provide aircraft specifications for the most important types, and full color photographs illustrate each aircraft. CHRISTOPHER CHANT is a successful writer on modern military matters, and has a substantial number of authoritative titles to his credit. He is also a specialist military editor well known for his ability to ensure accuracy while improving the literary qualities of the edited work. He was born in Cheshire in December 1945 but spent his childhood in East Africa, where his father was an officer of the colonial service. He returned to the UK for his education, undertaken at The King's School, Canterbury

Object ID	Title	Author	Summary
			(1959-1964) and at Oriel College, Oxford (1964-1968). Military matters, and especially aviation, have long been a passion, and after taking his degree in Literae Humaniores at Oxford, he moved to London as an assistant editor on the Purnell partworks History of the Second World War (1968-1969) and History of the First World War (1969-1972). With the completion of the latter partwork he moved to Orbis Publishing as editor of the partwork World War II (1972-1974), and with the conclusion of this publication he decided to become a freelance writer and editor. Living first in London, and then in Lincolnshire after his marriage in 1978, he has written extensively on military and aviation subjects, with more than 50 books now to his credit, including War In the Air and Air Forces of the World. (from dust jacket flaps) USS Midway photographs: A-7Es on flight deck, page 41 (!); E-2C & F/A-18A formation flying, page 71.
2005.303.040	Illustrated Encyclopedia of Helicopters	Apostolo, Giorgio	One of the Most Reliable Sources on Aviation History. April 24, 2010 By Zane R. Nobbs Simply a great reference book! Lots of illustrations with color plates, three-view drawings, technical specifications, performance data and a brief history of each aircraft. It is divided up into historical sections and covers virtually every nation that has build a helicopter, auto-gyro or VTOL aircraft. I use it for model building, model making and for our new model kit lines. The drawings are accurate and are a great source to confirm or dispute model kits and preparation for making them. I have yet to find a better source as this for helicopters and VTOL craft. Of the highest quality as only Italy can produce!

2005.303.049	F-14 Tomcat	Reed, Arthur	"The most potent air superiority fighter in the Western armory", this is the view of Arthur Reed, air correspondent of the London "Times," and author of this book of the Grumman F-14 Tomcat now operational with the United States Navy and the Imperial Iranian Air Force. The claim is justified by the fact that the Tomcat has demonstrated, through its on-board Hughes AWG-9 weapons system, its ability to pick up and track up to 24 incoming enemy aircraft or missiles at distances approaching 200 miles, to inform the two-man crew which six of the 24 constitute the greatest threat, work out for them which of the three types of missiles carried is best to use, and then tell them exactly when to fire. The Hughes Phoenix missile gives the Tomcat its Sunday punch, in effect, six small fighters to each F-14, each with a mind of its own, able to catch and knock down incoming threats whether they're flying at sea level or at 100,000 feet, subsonically or at Mach 5.5. Add to this a completely automatic swinging wing and superb dogfighting ability, and the most potent fighter claim

Object ID	Title	Author	Summary
			can be seen to be no empty one. Ironically, this excellence only came about as a result of the collapse of a previous project, the F-111B, and its pursuit went close to bankrupting the company perfecting it. The F-14 line is due to go on to the year 2000, and at this stage it is difficult to see what will follow it. Arthur Reed's "F-14 Tomcat" gives a fascinating account in words and pictures of the evolution of an outstanding modern weapons system. Cover: Wheels, flaps and hook down, and with its variable-geometry wing in the maximum-lift position, an F-14 Tomcat of VF—32 Swordsmen squadron United States Navy comes in for a landing./Grumman (from dust jacket flap)
2005.303.077	NATOPS Flight Manual Navy Models A-7C, A7E Aircraft	Chief of Naval Operations	From the foreword. "This manual contains ground and flight procedures for A-7C and A-7E aircraft. BuNo. 156734 through 156800, except BuNo. 156752 and 156754 are A-7C or TA-7C aircraft with TF30-P-408 engines. BuNo. 156752, 156754, and 156801 and subsequent are A-7E aircraft with TF41-A-2 engines. Differences between A-7C and A-7E are reflected by the engine designation or by Bureau serial number."
2005.303.078	American Secretaries of the Navy, vol. 2 - 1913-1972	Coletta, Paolo Enrico (ed)	PREFACE: This study presumes to be neither a text nor an operational history of the United States Navy. Rather it seeks to bring into proper perspective the men and measures responsible for the administration of the Navy, for making it or keeping it an adequate instrument of national power. It deals with more than the decisions and efforts that provided the men and materials needed to win battles and wars, for during most of its history the United States Navy has been at peace. It encompasses all the myriad factors that

Object ID	Title	Author	Summary
			compose "sea power." Since the Navy often worked with the land and air forces, its relations to the other military arms are considered. Since the Navy is but one recipient of budgeted funds, military-civilian relations are not overlooked. And since the Navy has been a decisive factor in the formulation of American foreign policy or in turn has been greatly affected by such formulation on the strictly diplomatic level, its impact upon foreign policy and the impact upon it of foreign policy naturally play a large part in its development. While a basic outline is followed by each author, no attempt has been made to restrict the story to the outline or to deny the writer free use of his treatment and style. All deal with at least the following topics: 1) a short biographical sketch of each secretary, including his political career, if any, and the reasons for his appointment; 2) problems facing the secretary when he assumed office; 3) the degree of success in his resolution of problems; 4) administrative competence and plans for departmental reorganization, if he had any; 5) the influence of domestic policy, foreign policy, strategy, and tactics on naval administration; and 6) a summary of achievements in both operational and administrative fields. Vol 1 - 1775-1913, Vol. 2 - 1913-1972

2005.304.002	Douglas D-558-2 Skyrocket	Libis, Scott	(from ginterbooks.com:) "Comic book stuff" was the typical response one would draw in 1938 when the subject of rocket propulsion came up. To most, the subject of rocket power conjured up images of Buck Rogers and the Saturday afternoon matinee. Rocketry was the flight of fantasy science fiction writers used to transport their audiences to new worlds. But it was also during this time that visionaries like Dr. Robert Goddard and Dr. Theodor

Object ID	Title	Author	Summary
2005.304.003	Douglas D-558-1 Skystreak	Libis, Scott	Von Karman worked developing their theories of rocket science. The D-558 program was a Douglas Aircraft Company contract with the U.S. Navy and NACA (National Advisory Committee for Aeronautics), intended to produce an aircraft for the purpose of exploring transonic and supersonic flight. 88 PAGES, 147 B&W PHOTOS, AND 35 DRAWINGS ORDER NUMBER - NF57
			(from ginterbooks.com:) "Crimson test Tube", "Supersonic Test Tube" and "Flying Stove Pipe" were just some of the nicknames bestowed upon the D-558-1 over the years. Skystreak was the popular name given by the Douglas Aircraft Company. The Skystreak, sponsored by the U.S. Navy and NACA, was charged with exploring flight in the transonic region. Aircraft manufacturers had been making aircraft for some time capable of reaching the onset of transonic flight, where a phenomenon known as compressibility lay waiting. This aircraft is currently on display at the Naval Aviation Museum at NAS Pensacola, Florida. 65 PAGES, 3 COLOR & 95 B&W PHOTOS, 19 DRAWINGS, 2 PAGES OF MODEL REVIEWS AND 5 PAGES OF FLIGHT LOGS ORDER NUMBER - NF56 \$15.95
2005.304.004	Chance Vought V-173 & XF5U-1 Flying Pancakes	Ginter, Steve	The "Flying Pancake", "Flying Flapjack", "Flying Saucer", and "Zimmer's Skimmer" were all names used to describe Charles H. Zimmerman's unorthodox V-173 and XF5U-1 aircraft. Two other descriptions: the world's fastest and slowest-flying

Object ID	Title	Author	Summary
			airplane and the world's first vertical takeoff and landing airplane, might have been used to describe the XF5U1 that was built but never flown. Zimmerman's brainchild was designed to do just that, but was never given the chance.... --Art Schoeni 32 PAGES, 57-B&W PHOTOS, 9-PAGES DRAWINGS ORDER NUMBER - NF21 - \$7.95
2005.304.005	Curtiss XBT2C-1 Bomber/Torpedo Aircraft Prototype	Kowalski, Bob	(from ginterbooks.com:) This is the fifth book in the series of World War II aircraft designed under the Navy's Bomber Torpedo requirements. The other books are Naval Fighters #24 Martin AM-1/1Q Mauler, #30 Douglas XSB2D/BTD-1 Destroyer, #36 Douglas XTB2D Skypirate and #48 Kaiser Fleetwings XBTK-1. In the eyes of the editor, the Curtiss XBT2C-1 was an attractive aircraft in flight. But these good looks masked the true identity. 73 PAGES, 116 B&W PHOTOS, 48 PAGES DRAWINGS AND TABLES, History of the squadrons and the foreign countries that flew them. A great resource for modelers who are detail oriented, and for those who want to know what's "under the skin" of an aircraft. ORDER NF62 \$17.95
2005.304.006	Lockheed XFV-1 VTOL Fighter	Ginter, Steve	(from ginterbooks.com:) The vulnerability of fixed bases is what has made the U.S. Navy's carrier task force the politician's tool of choice to solve peacekeeping issues into the 1990's. However, the U.S. Navy's firsthand experiences with Japan's Kamikaze taught them the vulnerability of their great mobile peacekeepers, the carrier. Because of this

Object ID	Title	Author	Summary
			experience, the Navy felt that the only way to protect any naval presence in enemy waters was to equip all ships with a VTOL fighter. --Steve Ginter LOC catalogs this as Verically Rising Aircraft. 32 PAGES, 60-B&W PHOTOS, 3-VIEW DRAWINGS
2005.304.007	Convair XFY-1 Pogo	Coleman, James F.	(from ginterbooks.com:) In 1947, both the U.S. Air Force and the U.S. Navy sponsored VTOL design studies called project Hummingbird. The rapid development of increasingly powerful powerplants had reached the point where a true VTOL aircraft was in the realm of possibility. The U.S. Navy's firsthand experiences with Japan's Kamikaze taught them the vulnerability of their great mobile peacekeepers, the carrier. Because of this experience the Navy felt that the only way to protect any naval presence in enemy waters was to equip all ships with a VTOL fighter.... --Steve Ginter 32 PAGES, 62-B&W PHOTOS, 3-VIEW DRAWINGS ORDER NUMBER NF27 - \$7.95
2005.304.008	Douglas XSB2D-1 & BTD-1 Destroyer	Kowalski, Bob	(from ginterbooks.com:) Bob Kowalski continues the saga of the bomber Torpedo (BT) program and the similar Scout Bomber (SB) program with the obscure story of the Douglas XSB2D-1 and BTD-1 "Destroyer". The United States was still at peace when the Navy issued a requirement for a design to serve with the fleet as both a successor to the SBD, which would be nearing obsolescence, and as a possible replacement

Object ID	Title	Author	Summary
			for the SB2C, which was undergoing what can charitably be called a prolonged proportional development period. To meet this requirement, two prototypes of the SXB2D-1 were ordered by the Navy on 30 June 1941.... --Steve Ginter 48 PAGES, 75-B&W PHOTO, 15-PAGES DRAWINGS ORDER NUMBER - NF30 - \$10.95
2005.304.009	Douglas XTB2D-1 Skypirate	Kowalski, Bob	Bob Kowalski continues the saga of the Bomber Torpedo (BT) program and the similar Scout Bomber (SB) program with the obscure story of the Douglas XTB2D-1 "SkyPirate". The story started in Naval Fighters #24, Martin AM-1/-1Q Mauler and continued with Naval Fighters #30, Douglas XSB2D-1 and BTC-1 "Destroyer". --Steve Ginter 48 PAGES, 69-B&W PHOTOS, 17-PAGES DRAWINGS ORDER NUMBER - NF36 - \$10.95 (from ginterbooks.com)
2005.304.010	Grumman's Mach-2 International F11F-1F Supertiger	Meyer, Corwin	The J79 powered Mach 2 Supertiger derivative of the F-11F was developed into a world class performer and was marketed as such. It impressed the foreign aviators who tested it so much that it became their first choice. That is until the political-financial giant known as Lockheed wielded its weight world wide. Lockheed's F-104 eventually dominated world sales, but was never a safe and sane choice as history would prove. (from ginterbooks.com:) --Steve Ginter 48 PAGES, 78-B&W PHOTOS, 1-PAGES DRAWINGS, 8-PROFILES ORDER NUMBER - NF44 -

Object ID	Title	Author	Summary
			\$10.95
2005.304.011	Kaiser Fleetwings XBTK-1	Kowalski, Bob	(from ginterbooks.com:) The Kaiser Fleetwings XBTK-1 was initially designed to meet a 1943 Navy requirement for a "single-seat carrier based high performance dive bomber." As was the normal war-time practice, design studies were requested from companies without a major production model and, with the Navy's acceptance of the proposal from the Fleetwings company, the design was designated XBK-1..... --Bob Kowalski Also designed to be a torpedo bomber. Only five were made, and only two flew.
2005.304.012	Grumman XF5F-1 & XP-50 Skyrocket	Lucabaugh, David	(from ginterbooks.com:) The Skyrocket story was originally published in the American Aviation Historical Society (AAHS) Journal in 1989. All of the comic book reading public during the 1940's followed the adventures of "Blackhawk" and his mighty men as they conquered the world of evil. Those of us with a mindbent toward things aeronautical knew that it was not "Superman" or "Batman" who held the keys to a crime-free society, bring on "Blackhawk." Dressed in daring dark uniforms, the dashing figures of this 1940's version of the "A-Team" were mounted on the very latest of aircraft. Through the paint brush the artist portrayed an entire squadron of snub-nosed twin engine fighters which those of us old enough to remember know that only a single actual aircraft existed for the artist to illustrate, the Grumman XF5F-1 Skyrocket. --Steve Ginter 32 PAGES, 83-B&W PHOTOS, 5-PAGES DRAWINGS INCLUDING 3-VIEWS

Object ID	Title	Author	Summary
2005.304.013	Grumman Swing-Wing XF10F-1 Jaguar	Meyer, Corwin	ORDER NUMBER - NF31 - \$7.95
			(from ginterbooks.com:) The unusual and innovative swing-wing Jaguar program ended up being a one airplane project even though during its development, orders were placed for one hundred and twelve aircraft. That ship, BuNo 124435, would only be flown by one pilot, Corwin "Corky" Meyer. When the program concluded in 1953 after over a year of flight testing, the flight test example 124435 along with the number two ship 124436, which was some 90% complete, were shipped to the Naval Air Material Center, Philadelphia, for use in testing barriers and barricades. The static test article, which was some 60% complete, was shipped to the Aberdeen Proving Ground in Maryland for use as a target. --Steve Ginter 32 PAGES, 53-B&W PHOTOS, CUTAWAY DRAWINGS, 3-VIEW DRAWINGS ORDER NUMBER - NF26 - \$7.95
2005.304.014	Douglas F3D Skyknight : Includes Data on the Swept-winged F3D-3 and the F6D-1 Missileer	Ginter, Steve	(from ginterbooks.com:) The first prototype was trucked from El Segundo to Murdoc Dry Lake (Edwards AFB). Its design had been refined into a bulbous shape which gave rise to the nickname "Willy the Whale". While the Air Force held discussions on the A-3's and its possible use, the Naval Air Test Center, Patuxent River, MD and MCAS El Toro were conducting simulated night interceptions in which the XF3D-1 repeatedly intercepted and destroyed single-seat jet fighters above 40,000 ft.--Steve Ginter 80 PAGES, 150-B&W PHOTOS, COLOR COVER, 15-PROFILES, 15-PAGES DRAWINGS

Object ID	Title	Author	Summary
			ORDER NUMBER - NF04 - \$14.95 Data on the swept-winged F3D-3 and the F6D-1 Millileer
2005.304.015	Grumman F11F Tiger	Meyer, Corwin	(from ginterbooks.com:) The full story of the Grumman Tiger and Super Tiger has only been told in part by non-Grumman aviation buffs and historians who wrote from second or third-hand information. Although it is over forty years later, this compendium has been written and documented by the principal Grumman and Blue Angel actors who participated in the development of those fine aircraft that came upon the scene at a very difficult but interesting era for both Grumman and the Navy. --Corwin "Corky" Meyer 144 PAGES, 290-B&W PHOTOS, 16-PROFILES , 34-PAGES DRAWINGS WITH PHOTO OF THE BLUE ANGELS F11F ORDER NUMBER - NF40 - \$22.95
2005.304.016	Chance Vought F7U Cutlass : XF7U-1, F7U-1, F7U-3, 3M, and 3P	Ginter, Steve	The Chance Vought F7U Cutlass was the most radical fighter design ever to achieve fleet service. At the aircraft's unveiling, the press was so stunned by its unusual appearance that the plane was given such nicknames as bat-like, dart-like, praying mantis, preying petrodactyl, giant arrowhead and flying wing. The bold design of the Cutlass gave the Navy a pioneer airframe which was to test and develop many systems that are still in use today.... (from ginterbooks.com:) --Steve Ginter 104 PAGES, 231-B&W PHOTOS, 16-PROFILES, 16-PAGES DRAWINGS

Object ID	Title	Author	Summary
			ORDER NUMBER - NF06 - \$17.95
2005.304.017	Vought's F-8 Crusader Part One : Pace, Steve Development and Testing, Foreign Users, and F8U-3		The F-8 has been one of the rare aircraft in aviation history to have been a success from the start, void of teething problems, and to excel at its designed mission until retirement. Over its 31 years of operations, many names and phrases have been used to describe this incredible aircraft. The best phrase used was the "Last Gunfighter" or the "Last of the "Gunfighters". This phrase sums up the F-8's reason for success..... --Steve Ginter 112 PAGES, 239-B&W PHOTOS, 15-COLOR PHOTOS, 25-PAGES DRAWINGS (from ginterbooks.com:)
2005.304.018	Vought's F-8 Crusader Part Two : Navy and Marine RF-8 Photo-recon Squadrons	Ginter, Steve	Naval Fighters Number Seventeen covers the Navy and Marine RF-8 photo Crusader squadrons. This book differs from previous books in that the aircraft's development and testing was covered in Part One (NF-16) of the four-part F-8 series. This book provides brief squadron histories and extensive color and markings for the RF-8 squadrons.... --Steve Ginter 64 PAGES, 197-B&W PHOTOS (from ginterbooks.com)
2005.304.019	Vought's F-8 Crusader Part Three : Marine Fighter Squadrons	Ginter, Steve	This book provides brief squadron histories and extensive color markings for Marine F-8 Fighter squadrons. Marine fighter squadrons used the following models: F8U-1 (F-8A) , F8U-1E (F-8B), F8U-2 (F-8C), F-8U-2N (F-8D), F8U-2NE(F-8E), F-8H, F-8K, and F-8L. --Steve Ginter 64 PAGES, 157-B&W PHOTO

			December, ADM John S. McCain released the proposal to nine manufacturers, including Ryan. The Ryan proposal was accepted and a contract for three prototypes and one static test article was placed on 11 February 1943..... --Steve Ginter 72 PAGES, ACCIDENT HISTORIES, 130-B&W PHOTOS, 23-PAGES DRAWINGS ORDER NUMBER NF28 - \$14.95 (from ginterbooks.com)
2005.304.024	North American FJ-1 Fury	Ginter, Steve	It was 1944, and a new age in aviation was dawning in the European skies, the jet age. As more German jets appeared in combat, it became a foregone conclusion that Japan would be producing them too. These facts prompted the Navy to issue a requirement for carrier jet fighters. In late 1944 BuAer sent requests to several manufacturers for jet proposals. From all the proposals submitted, BuAer technical desk chose three designs to be developed. This is the story of one of the three: The FJ-1 Fury. (from ginterbooks.com:) --Steve Ginter
2005.304.025	North American FJ-4/4B Fury	Ginter, Steve	(from ginterbooks.com:) North American's Frank Compton started preliminary design work on the FJ-4 in February 1953, four months prior to the first flight of the prototype FJ-3. Experience with early FJ-2's showed the need to dramatically increase the nimble fighter's endurance, while good flying qualities suggested the design would be suitable for a stable fighter-bomber. It was also evident that the inherent stretch needed to develop the Fury/Sabre series into a contender in the supersonic fighter arena did

Object ID	Title	Author	Summary
			not exist. To this end, Frank Compton's team developed an entirely new aircraft based on the sound design principles used in the FJ-2/3. The result was the FJ-4/4B series, which retained the family resemblance and flying qualities and added the range needed to be successful as an interim attach aircraft, a metamorphosis much like that of the A-7 attack aircraft being developed from the sound engineering found on the F-8 Crusader. --Steve Ginter 104 PAGES, 231-B&W PHOTOS, 15-PAGES DRAWINGS
2005.304.026	Chance Vought F6U Pirate	Koehnen, Richard	It was 1944, and a new age in aviation was dawning in the European skies, the jet age. As more German jets appeared in combat, it became a foregone conclusion that Japan would be producing them too. These facts prompted the Navy to issue a requirement for carrier jet fighters. In late 1944 BuAer sent requests to several manufacturers for jet proposals. From all the proposals submitted, BuAer technical desk chose three designs to be developed. This is the story of one of the three: The Chance Vought F6U Pirate. --Steve Ginter 32 PAGES, 50-B&W PHOTOS, 16-COLOR PHOTOS, 13-DRAWINGS INCLUDING THE SWEPT-WING PROPOSAL ORDER NUMBER - NF09 - 7.95 (from ginterbooks.com)
2005.304.027	McDonnell F3H Demon	Ginter, Steve	(from ginterbooks.com:) The McDonnell F3H Demon is probably the least remembered modern Naval fighter, even though it was our first true all-weather missile fighter. When the weather prevented the agile F8U, F4D and F11F from

Object ID	Title	Author	Summary
			flying the Demon could still be launched. A glamorous plane the Demon was not, primarily due to its lack of performance. The F3H remained underpowered throughout its career, so much so that it was tagged by fleet pilots as the "lead sled." 150 pages, 21 color photos, 243 black and white photos, 35 drawings (2 in 1/72 scale), a model review, Naval Air Station, Ship and Squadron histories plus photos and drawing of the F3H-G /H Phantom. ORDER NUMBER - NF12 \$29.95
2005.304.028	Douglas F4D Skyray	Williams, Nick	The Skyray is another one of those aircraft that were designed, developed, tested and forced into operations during the turbulent early 1950's when it seemed possible to build any type of combat aircraft from the weird to the wonderful. Some of these aircraft were to have very positive benefits from the innovative designs and new systems tried. At the same time, these aircraft often would have some very unforgiving or dangerous flying characteristics, which never were fully overcome. The Skyray fell into this category too, as many of its design parameters fell into the range of the unknown. This was a common occurrence during this timeframe as manufacturers were pushing technology beyond its established limits. --Steve Ginter (from ginterbooks.com:) 188 PAGES, 388-B&W PHOTOS, 28-COLOR PHOTOS, 13-PAGES DRAWINGS
2005.304.029	Douglas F5D-1 Skylancer	Ginter, Steve	The Douglas F5D-1 Skylancer was a progressive development of the F4D-1 Skyray. Many people believe that the Skylancer was a faster and better choice than its competitor, the Vought F8U Crusader. They believe that it

			had inherently better stretch potential to the point where it could have out-performed the F-4 Phantom if the J-79 engine had been installed as envisioned by Ed Heinemann.....(from ginterbooks.com) --Steve Ginter 48 PAGES, 85-B&W PHOTOS, 17-PAGES DRAWINGS ORDER NUMBER - NF35 - \$10.95
2005.304.030	Grumman Navy F-111B Swing Wing	Thomason, Tommy H.	In 1960, both the U.S. Air Force and the U.S. Navy were developing requirements for new fighters. The Air Force was planning to replace the F-105 with a long-range, low-level supersonic, all-weather Tactical Strike Fighter to be operated from unpaved runways of 3,000 feet or less in length and capable to transatlantic ferry without refueling. The Navy needed an all-weather, carrier-based Fleet Defense Fighter with a big radar and six long-range air-to-air missiles. In 1961, these similar "Fighter" requirements were merged by the Secretary of Defense into one program, TFX, to save development costs and operating costs..... --Tommy Thomason 80 PAGES, 186-B&W PHOTOS, 18-PAGES DRAWINGS 3-PAGES ON THE EF-111A ORDER NUMBER - NF41 - \$15.95 (from ginterbooks.com)
2005.304.031	Grumman AF Guardian	Kowalski, Robert J.	(from ginterbooks.com:) In 1953, the mainstay of carrier-based anti-submarine warfare (ASW) forces in the Navy were represented by a pair of Grumman AF-2W and AF-2S Guardians flying as a hunter-killer team and operating from an escort carrier of the Commencement Bay(CVE-105) class. The Guardian's

			wingspan of 60 feet, length of 43 feet 5 inches and height of 16 feet 7 inches, made it the largest single-engine piston-driven airplane ever to operate from an aircraft carrier..... --Robert J. Kowalski 80 PAGES, 128-B&W PHOTOS, 8-COLOR PHOTOS, 22-PAGES DRAWINGS ORDER NUMBER - NF20 - \$14.95
2005.304.032	North American AJ Savage	Ginter, Steve	(from ginterbooks.com:) The North American AJ "Savage" came into being as a direct result of the greatest Navy and Government controversy since Billy Mitchell and the Battleships. This controversy was over the future Nuclear strike capabilities of the Navy, if any. --Steve Ginter 128 PAGES, 237-B&W PHOTOS, 21-PAGES DRAWINGS ORDER NUMBER - NF22 - \$19.95
2005.304.033	Martin AM-1/1-Q Mauler	Kowalski, Bob	The Martin AM Mauler (originally BTM) was a shipboard attack aircraft of the United States Navy. Designed during World War II, the Mauler encountered production delays and did not enter service until March 1948. A total of 151 aircraft were built, remaining in front line service only until 1950, when the Navy standardized on the smaller and simpler Douglas AD Skyraider. Maulers remained in reserve squadrons until 1953. In service the Mauler earned the nickname "Able Mable" because of its remarkable load carrying ability, once lifting a 14,179 lb useful load, including 10,689 lbs of ordnance, easily the heaviest load ever carried by a single-engine piston-powered aircraft. From Wikipedia.

Object ID	Title	Author	Summary
2005.304.034	XTBU-1 & TBY-2 Sea Wolf	Ginter, Steve	In 1939 with war on the horizon, the U.S. Navy's Bureau of Aeronautics sent the aviation industry a request for proposal for a new torpedo-bomber (VTB). The competition was won by Grumman with its XTBF-1 proposal. Known as the Avenger, two XTBF-1 prototypes were ordered in the spring of 1940. Vought also had a promising proposal and was awarded a contract for one XTBU-1 prototype..... (from ginterbooks.com:) --Steve Ginter 88 PAGES, 133-B&W PHOTOS, 36-PAGES DRAWINGS ORDER NUMBER - NF33 - \$15.95
2005.304.035	Douglas Skyshark A2D Turbo-prop Attack	Markgraf, Gerry	(from ginterbooks.com:) During the late 1940's and early 1950's, the Navy would try just about anything to increase the performance and capability of its aircraft. They would test the Hi-Bred Allison XT-40 not only in the A2D, but also in the XA2J-1, and several others. Even though all of the XT-40 programs were eventually ended in cancellation, the lessons learned by Allison allowed them to build the reliable powerplants still being used on Grumman E-2/C-2 and Lockheed P-3 and C-130 aircraft. --Steve Ginter 80 PAGES, 101-B&W PHOTOS, 40-PAGES DRAWINGS
2005.304.036	Douglas A-4A/B Skyhawk in Navy Service	Ginter, Steve	(from ginterbooks.com:) "Heinemann's Hot Rod", "Tinker Toy", "Bantam Bomber", all nicknames for the embodiment of simplicity and design efficiency in the best attack aircraft ever (author's opinion). Read all about its development, components, testing

The Navy volume contains 61 pages of development, aircraft description details and drawings, that pertain to Marine A-4A/Bs. Although much fewer Marine squadrons were equipped with the A-4A/Bs than Navy squadrons, the type still saw extensive usage by fourteen active duty Marine squadrons. The aircraft were ultimately assigned to fourteen Navy and Marine reserve bases. 72 PAGES, 3 COLOR & 169 B&W PHOTOS, HISTORY FOR 14 USMC SQUADRONS AND 13 RESERVE BASE WITH PATCHES, PERFORMANCE SUMMARY AND 2 PAGES OF MODEL REVIEWS. ORDER NUMBER - NF50 \$15.95
2005.304.038	Douglas A-4E/F Skyhawk in Navy Service	Ginter, Steve	The A-4 Skyhawk was the workhorse of the Vietnam War. It flew more strike missions than any other Navy aircraft and its losses in combat amounted to 37% of all Navy combat losses. The Navy lost 195 A-4s out of 530 total losses. The next highest losses were in the F-4 community with 75. A-4 losses, especially in the A-4E, were so heavy at times that squadrons had to re-equip with older A-4C's as there weren't

Object ID	Title	Author	Summary
2005.304.039	Douglas A-4E/F Skyhawk in Marine Service	Ginter, Steve	enough A-4 E's to fill the squadrons. This small, nimble, rugged, and dependable bomber was the perfect surgical weapon for the day war over Vietnam. In fact, the A-4E/F with is five pylons could carry more than twice the tonnage of bombs that a B-17 or a B-24 could drop on Germany. (from ginterbooks.com:) This book is dedicated to the memory of Harry S. Gann. 168 PAGES, 13 COLOR & 330 B&W PHOTOS, 51 PAGES OF DRAWINGS PLUS SQUADRON PATCHES AND HISTORY FOR 41 SQUADRONS ORDER NUMBER - NF51 \$22.95
			(from ginterbooks.com:) Douglas A-4 E/F Skyhawks in Marine Service is the companion volume to Naval Fighters Number Fifty-One. Douglas A-4 E/F Skyhawks In Navy Service. The Navy volume contains 41 pages of development, aircraft description details and drawings, as well as 19 pages of armament details and drawings that pertain to Marine A-4E/Fs. Although fewer Marine squadrons were equipped with the A-4 E/Fs than Navy squadrons, the type still saw extensive usage in Vietnam. The close air support that these aircraft provided to our deployed troops were invaluable and saved countless American lives. 64 PAGES, 13 COLOR & 200 B&W PHOTOS, HISTORY FOR 15 SQUADRONS WITH PATCHES, AND 6 PAGES OF MODEL REVIEWS. ORDER NUMBER - NF52 \$15.95
2005.304.040	McDonnell Douglas A-4M Skyhawk	Ginter, Steve	(from ginterbooks.com:)

Object ID	Title	Author	Summary
			The last version of the Skyhawk series to be built, the A-4M Skyhawk II, was obviously the most capable. While the original Skyhawks were designed as a lightweight delivery platform for nuclear weapons, the "Mighty Mikes" were refined into the ultimate close air support weapon to protect the "Mud Marines." With the Hughes Angie Rate bombing System installed it was arguably the world's best close air support jet aircraft ever built.
			Ironically, the A-4M was the only Skyhawk version, other than the A-4A, to not see combat. The A-4M first entered service in 1971 as the Vietnam War was grinding to a halt and left front line service in February 1990 prior to the Gulf War. However, foreign versions of the A-4M did see combat in the Middle East. These were the Israeli A-4Ns and the Kuwaiti A-4Kus. Marine A-4Ms stayed forward-deployed in Japan throughout their active service life in readiness for a war that never was.
			--Steve Ginter
			120 PAGES, 246 B&W PHOTOS, 10 COLOR PHOTOS ON BACK PAGE, 35 PAGES DRAWINGS, 3 PAGES OF MODEL REVIEWS, PLUS SQUADRON PATCHES, HISTORY OF THE SQUADRONS AND THE FOREIGN COUNTRIES THAT FLEW THEM.

2005.304.060	Grumman F9F-6/7/8 Cougar Part One : Design, Testing, Structures and Blue Angels	Ginter, Steve	The contract for the new Grumman Cougar (G-93) was signed on March 2, 1951. The first flight of the XF9F-6 Cougar was on September 20, 1951. When Grumman and the Navy first discussed the Panther, both parties had privy to the Navy Technical Team findings in German WW-II research immediately after the war and the fact that many of the top German fighter designers had "migrated" to our new enemy, Russia. This information put firm emphasis on the greater critical Mach number with the swept wing over a convention straight-wing fighter for both the U.S. and the USSR. 89 pages, colored front and back cover, over 144 B&W photos, 21 photos of the Blue Angels, 32 pages of diagrams and scale drawings, 12 pages of cockpit photos and 6 pages of model reviews. ORDER NUMBER - NF66 \$19.95 (from ginterbooks.com)
2005.304.061	Grumman F9F-6P/8P Photo-Cougar	Ginter, Steve	(from ginterbooks.com:) Next to the helicopter the photo aircraft are among the less glamorous aircraft abroad ship but are some of the most important because with out

Object ID	Title	Author	Summary
			them the ship would be blind. F9F-6P/8P photo Cougar replaced the F9F-5P photo Panther in two Navy and 2 USMC squadrons in the 1954. It was replaced in 1956 by the more capable F9F-8P photo cougar of witch 100 aircraft were built. F9F-8P's were replaced by the supersonic F8U-1P photo Crusader starting in 1958 with the last F9F-8P retiring from the fleet in early 1961. Two Navy squadrons provided 3-aircraft detachments to both the Atlantic and the Pacific Fleet Carriers. 82 pages, colored front and back cover, over 169 B&W photos, 14 pages of diagrams and scale drawings, 6 pages of cockpit photos, photos of the Navy and USMC Squadron who trained, flew and deployed with the F9F-6P/8P and 1 pages of model reviews. ORDER NUMBER - NF67 \$19.95
2005.305.001	Aircraft of World War II	Sharpe, Mike	(from Amazon.com:) Ninety of the most influential fighters and bombers that fought in the European and Pacific theaters between 1939 and 1945 are profiled with archival photos; design, development, and service histories; and full specifications tables listing manufacturer, years of service, weight, maximum speed, ceiling, range, and exhaustive armament details.
2005.305.154	Warships of the Great Lakes, 1754-1834	Malcomson, Robert	The age of fighting sail is usually perceived as a battle for the ocean between European powers, but between 1754 and 1834 there was also a massive shipbuilding effort on both sides of the Great Lakes. These great expanses of fresh water saw the construction of warships that ranged from simple rowing gunboats to gigantic three-deckers that could have held their own in Nelson's line of battle. This book presents the history of

Object ID	Title	Author	Summary
			the freshwater navies developed by the French, British, and Americans as they struggled to control the wilderness frontier. It covers the ships' designs, building logistics, skilled laborers, and armaments to reveal a story of human ingenuity and success against all odds. Some of the frigates were pre-fabricated in Great Britain, dismantled, and laboriously hauled in pieces up the St. Lawrence for reconstruction on Lake Ontario. The richly illustrated volume contains original drafts and contemporary paintings that bring this little-known shipbuilding story to life for age-of-sail enthusiasts. From the Publisher Winner of the 2001 North American Society for Oceanic History, John Lyman Book Award in the category of Canadian Naval and Maritime History (from Amazon.com)

2005.306.002	Hull Department Bills --- U. S. S. None Stated Midway - CVB 41		USS Midway (CVB/CVA/CV-41) was an aircraft carrier of the United States Navy, the lead ship of her class, and the first to be commissioned after the end of World War II. Active in the Vietnam War and in Operation Desert Storm, she is currently a museum ship at the USS Midway Museum, in San Diego, California. She is the only remaining US aircraft carrier of the World War II era that is not an Essex-class aircraft carrier. When she was completed in 1945, she was the first US warship that was unable to utilize the Panama Canal due to her size. Midway was laid down 27 October 1943 by Newport News Shipbuilding Co., Newport News, Virginia. Her revolutionary hull design was based on what would have been the Montana-class battleship and gave her superior maneuverability over all previous carriers. She was

			America, with assignment of blame for what the author calls an "Atlantic Pearl Harbor."
2005.309.001	USN Aircraft Carrier Air Units, Vol. 1, 1946-1956	Kasulka, Duane A.	In the immediate post war years the United States Navy was dominated by problems of demobilization, an uneasy international situation, and a re-organization. Demobilization was rapid with the number of aircraft carriers in service reduced from 109 in 1945 to twenty-five a year later, and by the middle of 1950 to nine. The unsettled international situation in vastly separated areas of the world resulted in the formation of Carrier Task Groups to operate in the North Atlantic, Mediterranean and the Western Pacific, providing tangible evidence of America's presence and support for their Allies and the Free World. The first of the international crises was quick in coming as President Truman dispatched US Naval forces to Turkey in March of 1946, responding to a massive build-up of Soviet forces along the Turkish border. The next major US foreign policy test came when French, British, and American air forces provided a massive airlift into the city of Berlin, breaking the Soviet surface blockade of the former German capitol. In some respects this period was almost a repeat of the post World War I twenties. Political clamoring for both a separate air force and a merger of all the military services, was satisfied, to a greater or lesser degree, with the creation of the Department of Defense (DOD) in 1947, which combined the three services (the Air Force, Army and Navy) under a single Secretary of Defense. In the Fleet itself, the main problems were the transition to a severely lower force level, the incorporation of World War II combat experience, and the introduction of new weapons and technology. Jet aircraft, guided missiles and nuclear

Object ID	Title	Author	Summary
			weapons, all required great adjustments in plans, organization and tactic. The re-organization created by the DOD and the forced agreements among the three services of their respective missions and roles, coupled with a decreasing military budget quickly flared into open dispute as the services fought each other for a larger share of the limited peacetime funds. This increasing interservice fighting had the underlying effect of stifling naval aviation. This became obvious in 1949 when the Secretary of Defense cancelled the Navy's new super aircraft carrier UNITED STATES which had already been funded and agreed to by the President. This high handed cut at naval aviation forced the Navy to fight both the Air Force and the politicians who charged 'duplication', claiming that Navies had become obsolete and that the aircraft carrier was both too vulnerable and too expensive! The result was an ultimatum placed on the Navy by Congress to develop a nuclear capability without new and larger aircraft carriers or face extinction.
2005.309.002	USN Aircraft Carrier Air Units, Vol. 2, 1957-1963	Kasulka, Duane A.	By mid 1950 the United States Navy was faced with an increasingly uneasy international cold war and the possibility of a nuclear war. The Korean War had demonstrated the importance of conventional weapons, but US military policy was centered around the thesis that there would be no major conflict without the use of nuclear weapons. The US Navy achieved true strategic capability with the arrival of the first of the new super carriers, USS FORRESTAL (CVA-59) in 1955. This was the first post war built carrier and had the capability of operating nuclear armed jet aircraft. Four sister ships were authorized at the rate of approximately one per year. Navy plans were to eventually have twelve of these new

Object ID	Title	Author	Summary
			FORRESTAL class carriers with the possibility of nuclear propulsion on later versions. Along with the three MIDWAY class carriers, the Fleet would have fifteen attack carriers. In 1956 the French and British and Israelis carried out a military intervention in Egypt in order to keep the Suez Canal open. The Cold War had been heated up by the Soviet-bloc with near flood level arms shipments into the Middle East to further their repeatedly stated objective of global conquest. There had been an aborted military coup in Jordan that was inspired by the newly formed United Arab Republic (UAR) made up of Egypt and Syria. The Sixth Fleet was called in for a show of force during April to discourage the UAR from armed intervention in Jordan. Armed rebellion followed in Lebanon in May. In July a bloody coup in Iraq killed the pro-western king. Lebanon, fearing a communist inspired revolution requested US help on the 15th of May. The only available force was portions of the Sixth Fleet which sent Marines ashore the next day with eleven aircraft as air cover! In just over a week 350 aircraft aboard five US carriers were available and by October the situation had stabilized and US forces were withdrawn. On 25 August 1958 the Nationalist Chinese off shore Islands of Quemoy came under an artillery attack from Communist China. This time the Seventh Fleet was placed on alert and ordered to prepare for major operations against Communist China. Additional carriers were called in to patrol the Formosa Straits and escort Nationalist Chinese supply ships to and from the islands being shelled. The Fleet buildup plus that of USAF and USMC convinced the Communists that the US commitment was real and the shelling was quickly reduced.

Object ID	Title	Author	Summary
			August of 1960 saw the missile rattling of Russia's Premier Khrushchev in response to the United State's and United Nation's intervention in the Congo strife. Again the Fleet was called on to move forces into both the Mediterranean and the Pacific. Three CVAs were provided in both locations. To maintain six aircraft carriers continually on station required eighteen, but the Navy was able to briefly scrape together only sixteen carriers with the arrival of the KITTYHAWK (CVA-63) in April 1961, the CONSTELLATION (CVA-64) in October, the nuclear powered ENTERPRISE (CVAN-65) in November, and by retaining older ESSEX carriers.
2005.309.003	USN Aircraft Carrier Air Units, Vol. 3, 1964-1973	Kasulka, Duane A.	The Vietnam War saw a heavy commitment of US Navy carrier aviation, both in the South and in the bombing campaigns against North Vietnam. American combat involvement in Southeast Asia began on 2 August 1964 when North Vietnamese torpedo boats attacked US surface ships operating within international waters in the Gulf of Tonkin. As in the Korean War, carrier aviation was quickly called on to support our allies in South Vietnam. The lack of international support for the French at Dien Bien Phu in May of 1954, and their own populist clamoring for withdrawal, gave North Vietnam to the Communists. Twenty years later public clamor in the United States, coupled with a war that was run by politicians and the press, would give up South Vietnam to Communist rule. South Vietnam had enjoyed a short lived peace during the early 1950s. During this time the communists regrouped and began organizing their guerrilla forces in the South. During the late 50s South Vietnam, Laos, and Cambodia all began

Object ID	Title	Author	Summary
			seeing increasing insurgent activity. Throughout this period carriers of the US 7th Fleet maintained a presence in the South China Sea. After the attack on the destroyers USS MADDOX and USS TURNER JOY in August of 1964, the US began supplying South Vietnam with limited numbers of advisors, equipment, and provided aerial reconnaissance to monitor communist activities. Gradually carrier strength in the Gulf rose to three attack and one anti-submarine carrier on station. On 7 February 1965 the guerrillas (now known as the Viet Cong) attacked US advisors at Pleiku, South Vietnam, killing nine and wounding one hundred. The US retaliated against North Vietnam and this was followed by another attack by the Viet Cong. Again US carrier aircraft were directed to retaliate and ninety-nine aircraft headed towards North Vietnam. This cycle of attack and retaliation continued and by June of 1965 the Navy was supporting five CVAs off the coast of Vietnam. While the war escalated in Vietnam, the communists in North Korea became bold and seized the intelligence ship, USS PUEBLO on 22 January 1968, while it was operating in international waters off Korea. A carrier Task Force was ordered into the area and in the US, Naval Air Reserve carrier squadrons were activated. Finally the crew was released but by then the long expected communist offensive in

2005.309.006	Magnificent Mitscher, The	Taylor, Theodore	The airplanes follow one another into the air at intervals, like bullets from some slow-firing gun.
			A fascinating book to the uninitiated civilian and to the naval aviator as we the book is an understandable primer on the complexities of operating 35-ton aircraft from a short steel deck at sea. To the latter, CV puts carrier operations in a new perspective -- and almost poetic. This is an absolutely marvelous volume, the perfect gift for any to understand and appreciate modern carrier operations.
			(from back cover)
2005.309.006	Magnificent Mitscher, The	Taylor, Theodore	(from Amazon.com:) Originally published in 1954. Air Admiral Marc Mitscher, who led the U.S. attack across the Pacific, is a legend in military circles for developing an entirely new concept of war at sea. His skills as a carrier tactician and genius for leading men rank him with the best World War II combat commanders, yet because he shunned publicity and destroyed his private papers shortly before his death in 1947, his accomplishments are not widely known. Mitscher's sound decisions and successful tactics helped create the greatest striking weapon in history—the carrier force that could put up a thousand planes in half an hour, the task force that sank a thousand ships and destroyed the Japanese air force, the fleet that opened a direct route to Japan. Written by a former naval officer and well-known journalist, this book tells the full story of this pioneer of naval aviation and his innovations. Theodore Taylor traces the aviator's brilliant career from its beginnings in 1916, when Mitscher became one of the Navy first pilots. When first published in 1954, it was hailed as a first-class

			biography that set down the major role played by the admiral in developing the Navy's air program, and is also credited with providing a lively and detailed history of the progress of naval aviation. The author accomplishes all this with compassion, humor, and deep respect for his subject. About the Author Theodore Taylor, a merchant mariner during most of World War II, had become a naval officer by war's end, serving in the Pacific. He is the author of more than thirty books, both fiction and nonfiction, and a resident of Laguna Beach, California
2005.309.007	McC Campbell's Heroes : The Story of the U.S. Navy's Most Celebrated Carrier Fighters of the Pacific War	Hoyt, Edwin P.	Led by Captain David McC Campbell, the daring fighter pilots of the "Fabled Fifteen" spearheaded the American drive to regain control of the Pacific in World War II. This stirring history tells why Air Group Fifteen was one of the most highly decorated air groups of the war, participating in the action at Marcus and Wake Islands, the Marianas, Iwo Jima, Formosa, and Okinawa as well as the two major air/sea battles in the Philipines and Leyte Gulf.
2005.309.008	Carrier Admiral	Clark, Joseph James	Admiral Clark reviews the history of the aircraft carrier as a weapon and writes from his own experience of its use in the Atlantic, the Pacific in WWII, in Korea, in Vietnam, and its potential for the future.
2005.309.009	I Was Chaplain on the Franklin	O'Callahan, Joseph Timothy	This is a personal story of the time the author was stationed aboard the Franklin from March the 3rd to April the 3rd. and then the journey back to New York City. He tells of his interaction with the crew and officers during the battle and later during the struggle to keep the Franklin afloat.
2005.309.010	Feet Wet : Reflections of a Carrier Pilot	Gillcrist, Paul T.	CVB-41 mentioned on pages 138-140. Ramp strike on Midway discussed on pages 180-187. "Paul Gillcrist was a navy carrier pilot for almost thirty years, from the early

Object ID	Title	Author	Summary
			days, of flying propeller planes from straight deck carriers, to the days of high-tech, lethal "teen" jets and supercarriers. In his remarkable career - from "nugget", to competent jet aviator, to test pilot, to Vietnam fighter pilot, to air wing commander, to head of "Fightertown, USA," Gillcrist flew the F-8 Crusader, F-4 Phantom, F-14 Tomcat, and a myriad of other tactical aircraft. He took part in the Navy's transition to jet aircraft, when accident rates were high and many feared that jets would not be able to operate in the harsh, demanding environment of "blue water ops." Gillcrist saw the introduction of critical innovations - the angled deck, steam catapult, optical landing system - that saved carrier jet aviation from extinction. Few aviators have had such varied and fascinating experiences, and few could write about them with such eloquence. Available now in a new hard cover reprint edition, Feet Wet (aviator talk for reaching the safety of water) is a chronicle of adventure, heroism, courage, and humor, with some of the most exciting passages ever written on flying. From his magical first flight - the sheer exstasy of being airborne, to the heart-pounding excitement of his first night "trap," the terror of ejecting from a test plane spinning out of control, to dodging SAMs and jousting with MiGs over Hanoi - Gillcrist takes the reader into his world and vividly conveys what all pilots live for - the tremendous "high" of all-out flying. As part of his absorbing stories. Gillcrist shares technical information on carrier aviation; the reader sees, step-by-step, how an airplane is launched, and then trapped again on a small deck aboard a moving ship - this, the most difficult feat in aviation. Paul gillcrist retired in 1985 after a 33-year career as a naval aviator. He commanded a fighter squadron, a carrier air wing, a major jet base, and as

Object ID	Title	Author	Summary
			a flag officer, the Pacific Fleet fighter wing. He flew 167 combat missions in three Vietnam combat deployments, for which he was awarded seventeen combat decorations. Paul Gillcrist is also the author of Tomcat! The Grumman F-14 Story, Crusader! Last of the Gunfighters, and Vulture's Row: Thirty Years in Naval Aviation." (from schifferbooks.com)
2005.309.011	Jolly Rogers, The : The Story of Tom Blackburn and Navy Fighting Squadron VF-17	Blackburn, Tom	This is the true story of one of the Navy's foremost fighter squadrons, VF-17 and its charismatic commander, fighter ace John Thomas "Tommy" Blackburn, in action against the Japanese in the Solomon and Bismarck islands during World War II.
2005.309.014	Pawns of War : The Loss of the USS Langley and the USS Pecos	Messimer, Dwight R.	Account of the sinking of the USS Langley, the pick up of survivors by the USS Pecos, and subsequent sinking of the Pecos. Book club edition;
2005.309.015	Lexington Goes Down, The : The Last Seven Hours of A Fighting Lady	Hoehling, A. A. (Adolph A.)	This book is more than the tragedy of a fallen behemoth. Rather it is the story of man's indomitable spirit pitted against overwhelming odds. To effect such a canvas, the actions and thoughts of individual crew members during the crisis have been recorded. Survivors have been interviewed and naval authorities consulted.
2005.309.016	Queen of the Flat-tops : The U.S.S. Lexington and the Coral Sea Battle	Johnston, Stanley	The story of American ships and planes and fighting men who overwhelmingly avenged Pearl Harbor. Subtitle: The U.S.S. Lexington and the Coral Sea Battle. A stirring recounting of the Lex's career in which you will relive her great victories and her final fight as part of the first battle fought between carriers during WW II.
2005.309.017	From Sail to Saratoga : A Naval Autobiography	Zogbaum, Rufus Fairchild	Rufus Fairchild Zogbaum (August 28, 1849 – October 22, 1925) is primarily known as an illustrator for late 19th century news magazines, but he was also a journalist and author. His works were regularly featured in Harper's Weekly magazine. Zogbaum specialized in

Object ID	Title	Author	Summary
			several areas of illustration. During his lifetime, his drawings and paintings of horses and military themes (U.S. Army and Navy) were almost as well known as Remington's, although he was older than Remington and his works had actually influenced the younger artist. As did Remington, during the Spanish-American War, Zogbaum served as an on-the-scene artist-correspondent. His 1897 book, <i>All Hands: Pictures of Life in the United States Navy</i>, is a collector's item featuring 36 full page illustrations. A mural by him is located in the Howard M. Metzenbaum U.S. Courthouse in Cleveland, Ohio.
2005.309.018	Ship That Held the Line, The : The U.S.S. Hornet and the First Year of the Pacific War	Rose, Lisle Abbott	This book tells how the Hornet was molded into a deadly weapon of war, how the ship was fought and ultimately lost, and what it was like to live and fight aboard her at a time when the fate of the United States depended on the Navy's minute carrier fleet. The author recreates the first desperate years of the war in the Pacific, through the experiences of the ship's crew and the aviators who flew from her decks. As one of the few fleet aircraft carriers in the world, the Hornet--and her contemporaries in the U.S. and Japanese navies--shaped the brief golden age of carrier warfare and defined carrier doctrine down to this day.
2005.309.019	Ship to Remember, A : The Saga of the Hornet	Griffin, Alexander R.	Untried and still on her shake-down cruise, the Hornet was plunged into the Battle of the Pacific with orders to defend by attack while the main power of the Pacific fleet was being resurrected from Pearl Harbor. How she did it is attested by her casualty lists at Midway. her raids on Japanese supply lines, her breathless ferrying job to within 800 miles of Japan with Doolittle's bombers. She left the wreckage of 18 enemy ships and countless enemy planes behind her in the course of

Object ID	Title	Author	Summary
			her short career.
2005.309.020	Well Done! : An Aircraft Carrier in Battle Action	Markey, Morris	The author, aboard the Essex, describes the actions --air strikes as seen from the Ship and from her planes; land fighting in Saipan's thick underbrush; and defense against enemy planes as they sought to destroy the Ship. But, mainly this book is about the men aboard the ship and flying the planes.
2005.309.022	Then There was One : The U. S. S. Enterprise and the First Year of War	Burns, Eugene	Story of the USS Enterprise CV6, from the beginning of World War II through the Solomons and Marshall Island campaigns. ===== (from Amazon.com:) With the war in the Pacific well into its new, offensive phase, the best carrier story of the war can now be told. It is the story of the Enterprise, one of the Navy's greatest fighting ships, the first carrier to receive the rarely awarded Presidential Citation. Of the seven first-line U.S. carriers when war began, four were sunk in the first year of war, another saw action in non-Pacific waters during the period involved, and another was out of action at the decisive moment. Then there was one - the Enterprise. Virtually alone, it held the long, thin Pacific line against overwhelming odds Then There Was One is a story of men - like Admiral "Bill" Halsey, who rode the Big E as his flagship; Air Group Commander McClusky who helped win the Battle of Midway; Commander Turner Caldwell whose decision to take eleven Enterprise planes to Guadalcanal helped determine the fate of the Solomons; young Lieutenant "Birney" Strong who fulfilled a life's ambition and scratched one Jap flattop; Ensign Neal Scott whose dying letter to his parents is one of the most moving documents of the war - of these man and many others. It is a story of battles - from

Object ID	Title	Author	Summary
			that first Sunday morning when the Enterprise was returning to Pearl Harbor as the Japs were attacking it, right down through every major carrier action, save one, with the Big E writing one of the grandest record-breaking pages in naval history: 29 Jap ships sunk and 185 Jap planes destroyed. It is a story of courage and heroism in the face of two of the heaviest air attacks ever launched against any American ship by the enemy. This is the carrier story long awaited by those who have followed our progress in the Pacific. For those who have not, it will be an exciting and inspiring eye-opener. This is it - the grand, glorious, and victorious first year of the U.S.S. Enterprise.
2005.309.023	Aircraft Carrier Intrepid, The	Roberts, John Arthur	The Essex-class aircraft carriers are famous for their effectiveness and reliability as warships and the mammoth construction programs they initiated. Built in 1941, the Intrepid (CV11) was one of the class of twenty-four vessels constructed during and immediately after World War II. Carrying ninety aircraft each, they formed the main air strength and striking power of the U.S. Pacific Fleet against the Japanese from 1943 to 1945. Written by well-known warship historian John Roberts, this classic reference on this classic ship features the extensive diagrams and photographs that this series has become justly famous for. It also offers an authoritative description of the concepts, design, modifications, and operational history of the Intrepid and a new large-scale fold-out plan.
2005.309.024	USS Hornet : Pictorial History	Self, Chuck	Category: US Navy History Description: A pictorial history by Naval Historian Chuck Self. In color and black and white, hundreds of photographs combine to document the Hornet's historic path through

Object ID	Title	Author	Summary
			World War II, Korea, and the Apollo missions of America's space program, all leading to the restoration movement and conversion of the Hornet into a Naval Museum. This excellent volume of pictorial history needs to be in every Navy collector's library. 256 pages, 8 1/2" x 11" Hardbound (from turnerpublishing.com)
2005.309.025	USS Intrepid (CV 11)	Sumrall, Robert F.	Complete history of the USS Intrepid (CV-11) from keel-laying to museum ship with brief histories on other ships named Intrepid, aircraft carriers in general, and the Essex-class.
2005.309.027	USS Essex CV/CVA/CVS-9	St. John, Philip A.	Category: Veteran's Books US Navy History Description: The "Fightin'est Ship in the Fleet," was more than just a nickname; it was an honor that the carrier repeatedly earned during her long and faithful service. This edition follows the history of the ship as it enters into battle until the time that the ship is decommissioned. This book includes numerous pictures, along with veterans biographies. 104 pages, 9" x 12" Hardbound with dustjacket (from turnerpublishing.com)
2005.309.028	Essex-Class Carriers	Raven, Alan	According to the book jacket--this illustrated book offers the most detailed presentation of Essex-class aircraft carriers ever published. The 150 line drawings show general arrangements, rig configurations, deck fittings and equipment, weapons, antennas, camouflage schemes, internal layouts, and the differences between the various carriers.
2005.309.031	USS Saratoga CV-3 : An Illustrated History of the Legendary Aircraft Carrier, 1927-1946	Fry, John	Originally laid down as one of six giant battle cruisers, the Saratoga survived the 1922 Washington Disarmament Treaty's cutting torch through her conversion to a new and

Object ID	Title	Author	Summary
			seemingly benign type of vessel-the aircraft carrier. She reported for duty off Long Beach, CA in 1927 and for the next twelve years trained the men who would eventually fight World War II. One of only three carriers on duty at the outset of World War II, Saratoga, at one point, was the sole American carrier available to Naval Aviation. She suffered two torpedo attacks and a horrifying kamikaze attack, and was reported sunk many times by the Japanese. Refitted as a night-attack carrier, then relegated to the role of training carrier, Saratoga survived the war only to be sacrificed in the atomic bomb tests at Bikini Atoll in 1946. No carrier, or ship, played a greater role in developing the men and tactics that became the massive force that United States Naval Aviation. (from schifferbooks.com:)
2005.309.032	Lady Lex and the Blue Ghost, The: A Pictorial History of the USS Lexingtons CV-2 and CV-16	Ewing, Steve	Title on cover is "Lady Lex and the Blue Ghost" (from pictorialhistoriespublishing.com:) The New Yorktown (CV-10) in the Pacific War - The epic story of the aircraft carrier which dominated the greatest sea war of all time as told by the men who sailed and fought on her.
2005.309.033	Lexington Class Carriers, The	Stern, Robert Cecil	If a weapon system can be defined as a combination of sub-systems that , working together, allow attacks against a target at a chosen time and place, then the Lexington and Saratoga carriers represented an early example of the concept. They contained within their hulls a myriad of interacting constituents designed to move the ships within the range of an enemy, to sense his presence, to strike at his assets or to defend against his retaliation. In this studied account of a class of aircraft carrier, Rob Stern deliberately chooses to approach his subject from the

Object ID	Title	Author	Summary
			viewpoint offered by this definition, by assessing the class as a weapons system. Because their careers spanned the critical early years of carrier development, and as they served as a test bed for evolving technologies, it is possible to obtain from their evaluation the story of the birth and growth of the theories and practices that made the aircraft carrier such a dominant vessel in the major navies of the world.
2005.309.034	Miracle at Midway	Prange, Gordon William	The Battle of Midway Island was the turning point for naval dominance in the Pacific Theater. In June of 1942, seven months avter Pearl Habor, Admiral Yamamoto prepared his large and powerful fleet to do battle with an inferior United States force under the command of Admiral Chester Nimitz. There was no apparent reason to believe, given the superiority of Japanese forces, that the outcome would not be as crushing, in its way, as the loss of American forces at Pearl Harbor. The Japanse intelligence code was broken and Nimitz set in motion the flexible and operational tactics to win the Battle of Midway.
2005.309.036	Sailors to the End : The Deadly Fire on the USS Forrestal and the Heroes Who Fought It	Freeman, Gregory A.	The aircraft carrier USS Forrestal was preparing to launch attacks into North Vietnam when one of its jets accidentally fired a rocket into an aircraft occupied by pilot John McCain. A huge fire ensued, and McCain barely escaped before a 1,000-pound bomb on his plane exploded, causing a chain reaction with other bombs on surrounding planes. The crew struggled for days to extinguish the fires, but, in the end, the tragedy took the lives of 134 men. For thirty-five years, the terrible loss of life has been blamed on the sailors themselves, but this meticulously documented history shows that they were truly the victims and heroes. About the Author

			Gregory A. Freeman is the author of Lay This Body Down: The 1921 Murders of Eleven Plantation Slaves. An award-winning journalist with twenty years' experience, he lives in Atlanta, Georgia. (from Amazon.com:)
2005.309.038	Titans of the Seas : The Development and Operations of Japanese and American Carrier Task Forces During World War II	Belote, James H.	Titans of the Seas describes the development and operations of the greatest innovation in naval warfare since WWI --- the aircraft carrier task force that extended the range and effectiveness of naval power beyond anything known before. The authors trace the development of the carrier and carrier aircraft and naval strategy between the two world wars. They describe the ultimate example of carrier warfare --- the surprise attack on Pearl Harbor --- and the subsequent Japanese sweep of the southwest Pacific and Indian Ocean. Follows the course of the carrier war in the Pacific through the battles of the Coral Sea, Santa Cruz, Eastern Solomons, Midway, and the climactic Battle of the Philippine Sea in June 1944 --- the battle that virtually destroyed Japanese carrier power and sealed the fate of the war.
2005.309.039	Helldiver Squadron : The Story of Carrier Bombing Squadron 17 with Task Force 58	Olds, Robert	"Helldiver" was the name given to one of the Navy's most widely used dive bombers in World War II. This is the story of the first Helldiver Squadron to do battle with the Japanese. Taking off from the aircraft carrier Bunker Hill, Squadron 17's hardhitting dive-bomber pilots and gunners saw their bombs burst and tracer bullets glare from Rabaul to Tarawa to the Marianas. The Bunker Hill was one of the ships in famed navy Task Force 58, and Helldiver Squadron is the dramatic and detailed account of life aboard a famous combat carrier--the authentic atmosphere and spirit which prevail aboard a flat-top, in the ready rooms, on the flight

			deck, and in the air.
2005.309.040	U.S. Navy Fighter Squadrons in World War II	Tillman, Barrett	This chronology of VF squadrons describes their history, deployments, battle highlights, commanders, aces, losses and aircraft. Twenty five appendices supply further information on shoot down claims, biographies of twelve famous aces, a list of 371 Naval fighter aces, aces in a day, top scoring squadrons, etc.
2005.309.041	Aircraft Carriers in Peace and War	Skiera, Joseph A.	Few chapters in United States naval history fill more dramatic pages than those devoted to carrier aviation. From yesteryear's weird-looking experimental craft have developed today's supercarriers — pride of our modern nuclear fleet. Here is the story of the pioneer carriers — the Langley, Lexington, and Saratoga; the evolution of the catapult; the first heroic attack on the Japanese mainland by planes launched from the Hornet; the saga of carrier feats in the battles of Midway, the Coral Sea, and the Atlantic; the ordeal of the Franklin; the tale of the most famous carrier of all - the Big "E"; the story of how Captain Thach's "phantom carrier" harassed the North Koreans; and the dramatic use of carriers in the 1962 Cuban crisis. These and many more — the very "cream" of carrier aviation writing — have been selected by Joseph A. Skiera for this new volume in the Watts Aerospace Library. Jacket photos Official U.S. Navy Photos. Jacket photos: (top) Eugene Ely landing on deck of USS Pennsylvania; (bottom) USS Saratoga catapults two fighters simultaneously, off Guantanamo Bay, Cuba. THE WATTS SEAPOWER LIBRARY

Object ID	Title	Author	Summary
			The overall purpose and scope of the Seapower Library is to depict to readers both in and out of the naval service the aims, objectives, history, and operating techniques of the United States Navy, as well as the high caliber of the officers and men who man its ships, aircraft, and shore installations. Authors of the volumes comprising the Library are either active duty or reserve naval officers, retired officers, or highly qualified civilians who are experts in their particular subjects. (from dust jacket flaps)
2005.309.042	U.S. Navy Aircraft, 1921-1941; U.S. Marine Corps Aircraft, 1914-1959	Larkins, William T.	Combination of two classic books in one volume. Includes photos of each aircraft type, dispositions within the fleet, characteristics, performance, etc. First published in 1959 and 1961, and long out of print, these two volumes have become classics eagerly sought in the rare-book market by aviation buffs worldwide. The books are arranged chronologically, and feature an aircraft assignment table for each year indicating which aircraft and which squadrons were assigned to specific locations.
2005.309.043	United States Navy Aircraft Since 1911	Swanborough, Gordon	Library also has 3rd ed.
2005.309.044	Naval Aviation Guide, The	Burgess, Richard R. (ed)	Essential reading for those earning their wings of gold as well as a convenient reference source for old hands and a useful introduction for those considering a career in naval aviation. Every major facet of naval aviation is treated here, from its origins and development to its organizational relationships and working parts, including Navy, Marine Corps, Coast Guard and Reserve aviation.
2005.309.045	Aircraft Carrier : The Majestic Weapon	Macintyre, Donald G. F. W.	Looked at from any standpoint, the unavoidable conclusion emerges that the aircraft carrier was a vital component in the vast array of battle machines with which both sides fought the war. The carrier emerged

Object ID	Title	Author	Summary
			as the crucial element in the composition of the fighting forces, particularly where the United States was concerned. The attack on Pearl Harbor was launched from carriers, and from that moment on they continued to appear in the starring role as the vital battles at sea were played out.
2005.309.047	Squadrons of the Sea	Whitehouse, Arthur George Joseph	This is a story of the historic naval-air conflicts as they were fought between 1939-45. It is a general history of aircraft carriers, written and presented in a form designed to appeal chiefly to the non-Navy reader or general public. It is the authors intent to clarify the role of the naval carrier by presenting its history, and relating the story of its triumphs and sacrifices in a manner comprehensive to the lay reader.
2005.309.048	Two-Block Fox : The Rise of the Aircraft Carrier, 1911-1929	Melhorn, Charles M.	This study examines the means by which the carrier came into its own, from a crude beginning in 1911, through the years of opposition from within an economy minded Congress, the Army Air Service, and the Navy itself, to its first great tactical triumph in 1929.
2005.309.054	US Carriers at War	Kilduff, Peter	Exploits of U.S. aircraft carriers in World War II. Extensively illustrated with b&w photos, at least one per page. Pacific Ocean maps across end pages. Some of the greatest exploits of US Navy aircraft carriers operations--in both the Atlantic and Pacific--are told in this book. It portrays a personal account and from official documentation the stories of courage in the face of adversity and triumph after struggle that marked the air operations from the flight decks of US Navy aircraft carriers at war.
2005.309.056	United States Naval Aviation 1910-1995	Grossnick, Roy A.	Also available online at: http://www.history.navy.mil/branches/usna1910.htm . This fourth edition is a chronology that is designed to provide naval personnel, historians and aviation enthusiasts with a general background on Naval Aviation history. Rather than

Object ID	Title	Author	Summary
			providing a detailed treatise on particular subjects or actions, it highlights the significant events and developments that shaped Naval Aviation. All aspects of Naval Aviation, including operational activities, technical developments and administrative changes are covered. There is a glossary and 34 appendices. The USS Midway is listed on 44 pages according to the index. Appendix 31 is a list of early helicopter pilots. Appendix 1 - History of Naval Aviator and Naval Aviation Appendix 2 - Aviation Pilot Designations and Numbers, the Training of Naval Aviators and the Number Trained (Designated) Appendix 2 - Aviation commands Appendix 3 - Aviation ships Appendix 4 - Aircraft on hand Appendix 5 - Aircraft designations and popular names Appendix 6 - Combat aircraft procured Appendix 7 - Transport and training aircraft Appendix 8 - Naval helicopters Appendix 9 - Bureau (Serial) numbers of naval aircraft Appendix 10 - Aviation personnel on active duty Appendix 11 - Navy and Marine Corps Air Stations and Fields Named for naval Aviators and Others Appendix 12 - Ships named for naval aviators Appendix 13 - Medal of Honor awards in naval aviation Appendix 14 - Aviation ratings Appendix 15 - Evolution of Carrier Air Groups and Wings Appendix 16 - U.S. Navy and Marine Corps Squadron Designations and Abbreviations Appendix 17 - The Navy in space Appendix 18 - Honorary Naval Aviator Designations Appendix 19 - Naval Aviation Hall of Honor Appendix 20 - Evolution of Naval Wings (Breast Insignia) Appendix 21 - List of Naval Aviation drones and missiles Appendix 22 - U.S. Navy and

			Marine Corps Aces Appendix 23 - Visual identification system for naval aircraft (Tail Codes) Appendix 24 - Current squadron lineage list Appendix 25 - Carrier, Carrier based squadrons and on-carrier based squadron deployments during the Korean War Appendix 26 - Carrier, Carrier based squadrons and non-carrier based squadron deployments to Vietnam Appendix 27 - Grenada combat operations (25 October-2 November 1983) Appendix 28 - Carrier Squadrons and non-carrier based squadrons involved in 1986 Libyan Operations (24 March-15 April 1986) Appendix 29 - Naval Aviation Units Involved in the Persian Gulf War (16 January-27 February 1991) Appendix 30 - List of Early Naval Jet Pilots Appendix 31 - List of Early Helicopter Pilots Appendix 32 - Gray Eagle Award Appendix 33 - List of navy and marine Corps Shoot Downs since 1950 Appendix 34 - Cold War incidents involving U.S. Navy aircraft
2005.309.057	Dictionary of American Naval Aviation Squadrons, Vol. 1 : The History of VA, VAH, VAK, VAL, VAP, and VFA Squadrons	Grossnick, Roy A.	This first volume covers the attack and strike fighter squadron communities and includes VA (attack), VAH (heavy attack), VAK (tactical aerial refueling), VAL (light attack), VAP (heavy photographic), and VFA (strike fighter). This volume is also available online at: http://www.history.navy.mil/branches/dictvol1.htm. Vol. 2 which covers patrol squadrons is available online at: http://www.history.navy.mil/branches/dictvol2.htm.
2005.309.059	Carrier Air Group Commanders : The Men and Their Machines	Lawson, Robert L.	(from schifferbooks.com:) The study of the U.S. Navy's air group and air wing commanders is a study of carrier aviation itself. This detailed volume presents a

Object ID	Title	Author	Summary
			history of the establishment of the carrier air group commander billet and the attendant formal air groups. The book is divided into four sections: Section One "A Historical Overview," presents an overview of naval aviation history from 1898 to 1922, when the U.S. Navy commissioned its first aircraft carrier USS Langley (CV-1), with its wood-and-fabric biplanes. The pages next describe carrier aviation from Langley to the 90,000-ton supercarriers of today with their supersonic jets. This section also contains air group organization charts showing their development over the years. Section Two "Evolving the System," discusses the genesis and evolution of the air group/wing commander billet, as well as the development of the organizations they commanded. It contains biographical sketches of the first CAGs and their wing commander predecessors. Section Three "The Men," profiles more than forty of the Navy's more notable CAGs by use of their personal reminiscences and anecdotes. Their stories give the reader a feel for the responsibilities, joys and sorrows that accompany the assumption of the title: CAG. Additionally, the profiles give an insider's view of the U.S. Navy's combat operation tactics from World War II to Desert Storm. The book's final section "The Machines," contains a chronological selection of photographs and some profile drawings of the aircraft flown by wing commanders from 1931 to the present. Heavy emphasis has been given to provide as many high-quality color photographs as were possible to locate. This section should have great appeal to both historian and enthusiast in its coverage as it not only graphically presents the aircraft flown, but also covers the evolution of carrier aviation itself. An appendix listing

Object ID	Title	Author	Summary
			every known CAG and dates of his command concludes the book. lation of this data to exist. Carrier Air Group Commanders: The Men and Their Machines is an important historical document that will serve both as a reference work and enjoyable reading for many years.
2005.309.060	Tonkin Gulf Yacht Club : U.S. Carrier Operations off Vietnam	Francillon, René J.	The crews of the U S carriers and air wings deployed off Vietnam dubbed themselves the "Tonkin Gulf Yacht Club," and this book by a renowned aviation historian fully documents their record in that war in South East Asia. Beginning with an overview of carrier operations from 1964 until 1973. the book then details the experience of USS Coral Sea, the carrier that spent the most time in action.
2005.309.061	Carrier Air Power	Friedman, Norman	Aircraft Carrier Design - The Shipboard Airplane since 1918 - Strike Warfare - Fleet Air Defense - The Future of the Aircraft Carrier The aircraft carrier is nowadays the most obvious, most expensive and most politically controversial instrument of naval power. Since World War II, carrier development has been so hectic that only one country, the United States, has been able to withstand the technological and financial pressures of operating a sizeable carrier fleet. But this has not always been so, and Carrier Air Power relates the whole history of ship-based aircraft and their employment. It is a penetrating analysis of the very special requirements of carrier design and the operational roles both of the ships and of their aircraft. It details the complex contemporary carrier functions - strike, anti-submarine warfare and fleet air defense - and describes how and why these functions evolved. US, British, Japanese and French doctrine is discussed, and the author also deals with the carrier arms of

Object ID	Title	Author	Summary
			the smaller navies, together with the ill-fated German and Italian designs. The current debate surrounding the US 'super-carrier' is highlighted and a glimpse into the future, with V/STOL aircraft and all that they imply, is provided. (from dust jacket back)
2005.309.063	Aircraft Carriers of the U.S. Navy	Terzibaschitsch, Stefan	Pictorial representation of Aircraft carriers 1920-1950 Aircraft carriers after 1950 Data on fire control weapon systems, surface/air search radars, homing beacons, shipboard aircraft, IFF systems, ECM/ECCM antennas, ASW systems, and Satellite communications
2005.309.064	United States Navy Camouflage of the WW2 Era, part 2 : Fleet Carriers	Sowinski, Larry	This volume covers only those U.S. wartime fleet carriers which were camouflaged in dazzle patterns. Therefore, LEXINGTON (CV-16), LANGLEY (CVL-27) and CABOT (CVL-28) are not included. All three of these ships fought the war in Measure 21, solid navy blue. LEXINGTON was painted into Ms12 at the end of the war (see page 64). The fourteen ESSEX class "dazzle" carriers dominate this book the same way they dominated the entire U.S. carrier fleet. We would've liked to have included much more on each ship, but we have already stretched these pages beyond reason.
2005.309.065	Carrier Wars : Naval Aviation from World War II to the Persian Gulf	Hoyt, Edwin P.	Here is the story of the dramatic role played by aircraft carriers in historic battles and maneuvers from the start of World War II to current encounters in the Persian Gulf. Spanning fifty years, this colorful chronicle is drawn from a wealth of previously untapped sources -- including accounts from American, European, and Japanese archives. Fast-paced battle stories -- recreating behind-the-scenes actions as well as gripping combat sequences -- are highlighted by sharp

Object ID	Title	Author	Summary
			eyewitness accounts.
			Noted military historian Edwin P. Hoyt describes the naval preparations that set the stage for World War II; how Japan's early lead in carrier strategy was undermined as early as Pearl Harbor, subsequently at Midway, and finally by inferior pilot training and manufacturing capacity; how the undervalued escort carrier sealed the fate of the German U-boat, how the powerful American fleet was nearly undone by the desperately heroic kamikazes; and how carrier warfare has evolved in recent decades, contributing to engagements in Korea, Indochina, the Falklands, and the Middle East.
			Here, brought vividly to life, are the triumphs and tragedies of important battles, the strategies of admirals both great and weak, the politics that so often charted battle plans, and the valiant efforts of sailors and pilots aboard these historic vessels. Once again, Edwin Hoyt achieves a vital and perceptive work of popular history.
			Edwin P. Hoyt has had a long and varied career as a journalist and historian. In the 1940s, he was a news editor for the United States Office of War Information, a member of their psychological warfare team, and a foreign correspondent for the Denver Post. The author has also been a reporter for the San Francisco Chronicle, a producer-editor-writer for CBS-TV News, and assistant publisher of American Heritage. He currently divides his time between London and Asia, writing and developing films. Among Hoyt's previous books are The Rise of the Chinese Republic, The GI's War, Hitler's War, America's Wars and Military Excursions, and Japan's War.

2005.309.066	Combat Command : The American Aircraft Carriers in the Pacific War	Sherman, Frederick C.	This book is essentially an account of the Navy's efforts in the Pacific during World War II. Starting with Pearl Harbor, in chronological order, chapter by chapter, it unfolds the principal naval campaigns in the Pacific. (from Preface by W.F. Halsey). Whereas this work features the story of our aircraft carriers in the Pacific, it is not only a personal memoir, but a study of the Pacific war as a whole. The author has sought to present facts accurately, to interpret them, to analyse the record, to give proper emphasis, and to fit them together so as to provide the reader with a clear and comprehensive picture of the war.
2005.309.067	Naval Air War in Vietnam, The	Mersky, Peter B.	Full account of naval aviation in action in Vietnam. Full account of naval aviation in action in Vietnam. Over 300 photos, plus maps and drawings; air-sea rescue operations; extensive coverage of the role of marine aviation, and the evolution of new tactics; carrier operations; the important contributions of reconnaissance missions; the "war-within-a-war" of electronic warfare and counter measure; the A-1 Skyraider, last of the prop era fighters, holding its own against modern jets, even bagging a couple of MiGs.
2005.309.068	Admiral John H. Towers : The Struggle for Naval Air Supremacy	Reynolds, Clark G.	Reynolds provides a thorough and complete biography of a man who made major contributions to the Allied success in the Second World War. Towers, an early advocate of air power, struggled for recognition and promotion between the wars. His administrative ability during the war was largely responsible

Object ID	Title	Author	Summary
			for the fact that the right aircraft were produced and delivered. This book is not about tactics. The market is flooded with books about the battles. This is a book which describes the nuts and bolts of putting airpower to work. Well researched, thoroughly documented, entirely typical of Dr. Reynolds. (from Amazon.com)
2005.309.069	From Frigates to Flat-tops : The Story of the Life and Achievements of Rear Admiral William Adger Moffett, U.S.N., "The Father of Naval Aviation"	Arpee, Edward	William Adger Moffett (October 31, 1869 – April 4, 1933) was an American admiral and Medal of Honor recipient known as the architect of naval aviation in the United States Navy. 2005.309.071	Fox Two	Cunningham, Randy	I am a fighter pilot by heart, and I love turning and twisting through the skies in search of a good fight. But this is more than a story of aerial combat. It is a story of a ship, USS Constitution, and the men who sailed her, their feelings, thoughts and actions during the Vietnam conflict. Fox Two describes many of our air-to-air combats, recorded as they happened. We didn't win them all, but lessons learned and some of the restrictions that we had to live with - and in some cases die with - should be known by every American so that your sons will not pay the same price as did many of our men in a war we weren't allowed to win.... From 1965 through 1971 the US Navy scored 29 kills with Sidewinders. During the time period of this book, Navy pilots were credited with 23 Sidewinder kills and one Sparrow kill. All five of my victories were made with the Sidewinder, making Lieutenant (jg) Bill Driscoll and me the first US aces of the Vietnam War. Thus the Title, Fox Two. --- excerpts from book's Preface Randy "Duke" Cunningham (from Amazon.com)
2005.309.072	Master of Sea Power : A Biography of Fleet Admiral Ernest J. King	Buell, Thomas B.	Fleet Admiral Ernest Joseph King (23 November 1878 – 25 June 1956) was Commander in Chief, United States Fleet and Chief of Naval Operations (COMINCH-CNO) during World War II. As

Object ID	Title	Author	Summary
			COMINCH, he directed the United States Navy's operations, planning, and administration and was a member of the Joint Chiefs of Staff. He was the U.S. Navy's second most senior officer after Fleet Admiral William D. Leahy, and the second admiral to be promoted to five star rank. As COMINCH, he served under Secretary of the Navy Frank Knox and later under James Forrestal.
2005.309.073	Wings and Warriors : My Life as a Naval Aviator	Engen, Donald Davenport	(from Amazon.com:) In this account of his first twenty-five years as a naval aviator, Engen vividly recalls the slow start, heroics, and hardships of the golden age of jet airplane development. Flying from bases and carriers throughout the world, Engen and his fellow pilots achieved new heights, speeds, and distances in death-defying tests that epitomized a period of exhilarating experimentation. From The Washington Post "Engen had a remarkable military career, and his book-part autobiography, part historical narrative of his first twenty-five years as a naval aviator, gives the reader a fascinating glimpse into the development of the Navy's aviation capabilities during the latter half of the twentieth century."
2005.309.074	Fighting Squadron : A Fighter Pilot's First-Hand Account	Winston, Robert Alexander	This is a reprint of Fighting Squadron : A Sequel to Dive Bomber. The author relates the thrill-packed story of his famous fighter unit. A writer turned fighter pilot, the author weaves his story of daring and luck with consummate skill. It begins with the formation and training of the squadron and ends a year later when the author leaves the aircraft carrier U.S.S. Cabot and heads home an ace.
2005.309.075	Call Sign Revlon : The Life and Death of Navy Fighter Pilot Kara Hultgreen	Spears, Sally	In October 1994 Navy Lt. Kara Hultgreen died when her F-14 fighter jet crashed into the ocean during an attempt to

Object ID	Title	Author	Summary
			land aboard an aircraft carrier. As the first woman to fly the high-powered Tomcat in a fighter squadron, Hultgreen was already a visible figure in the debate over whether women should serve in combat, and her death only intensified that debate. After her crash, sources within the Navy released documents to show that Hultgreen was an unqualified pilot who got through training because she was a woman. Hultgreen's supporters countered that the documents were incomplete and grossly misleading. Four years after the tragic mishap, Hultgreen's mother, a member of the Defense Advisory Committee on Women in the Services, presents this work not as a tool of persuasion, but as the biography of a young pioneer. In many ways, it is a deeply engaging portrait. Drawing extensively from her daughter's letters and diaries, Spears shows the intense motivation and high energy of a young woman whose life was geared toward her childhood dream of becoming an astronaut. A swaggering hell-raiser with a wicked sense of humor, Hultgreen pummeled her drunken assailant when groped at Tailhook. But Spears also includes considerable fluff: one chapter titled "Pamela" seems designed to settle a score with a friend who inexplicably dropped Hultgreen when her career declined. Ultimately, the most interesting chapters are those addressing the question of whether Hultgreen was truly qualified to be flying the F-14. With more substantive reporting, Spear might have offered a persuasive case on her daughter's behalf. 29 illustrations. - From Publishers Weekly Copyright 1998 Reed Business Information, Inc. From Booklist Eyebrows skeptically raised at the prospect of a biography of the late navy pilot Kara Hultgreen written by her

Object ID	Title	Author	Summary
			mother will quickly lower as their possessors read this absorbing, powerful, occasionally infuriating book. Spears is honest about her role in the breakup of her own marriage, which, together with her access to her daughter's personal correspondence, inspires trust in her efforts to humanize Lieutenant Hultgreen, which nearly all of the media coverage of her fatal accident failed to do. Hultgreen emerges as assertive, competitive, and even aggressive, with above-average flying competence that, however, could not overcome a perennial and lethal technical problem in the F-14A she was flying. In short, she possessed a classic fighter pilot's personality, which military and militant misogynists would have us believe was misplaced in a woman's body. The book finally conjures the feeling that Hultgreen's death was the loss of a good officer, a lady, and a superior person. Thanks to Spears for writing and to Naval Institute for publishing this unequivocally pro-woman book. Roland Green (from Amazon.com)
2005.309.076	Bluejacket Admiral : The Navy Career of Chick Hayward	Hayward, John T.	(from usni.org:) Vice Adm. John T. "Chick" Hayward's long and colorful career spanned the decades from naval aviation's infancy to the dawn of the jet age. He was one of those rare people who was eminently successful yet humanly colorful, a high school dropout who became a nuclear physicist. The story of his role in the development of the atomic bomb and his interaction with the other Los Alamos scientists is justification enough for a biography, but Hayward's contributions to the twentieth-century U.S. Navy go significantly beyond that period. Hayward saw combat in World War II and participated in the Korean War and Cuban missile crisis, and helped make many of the decisions that

Object ID	Title	Author	Summary
			shaped the present-day navy. From his service as an enlisted man to his rise to a flag officer, Hayward experienced life as a "powder monkey" on a battleship, a president of the Naval War College, a founder of the Lawrence Livermore Laboratory, a key player in getting nuclear weapons to sea, and an early developer of cruise missiles. An avid supporter of naval aviation, he amassed more pilot hours than any other flag officer and was one of the navy's first jet-qualified pilots. Hayward's longtime friend C.W. Borklund developed this autobiography from the admiral's 300-page diary. It captures the spirit as well as the facts of Hayward's history-making career, focusing on his involvement in events that had a major impact on politics, military policies, and plans. Highly personalized and sometimes opinionated, the memoir provides a great deal of insight and food for thought about today's navy.
2005.309.077	Sole Survivor : The Battle of Midway and its Effects on His Life	Gay, George H.	The author states that in spite of the all the studies that have been done on the Battle of Midway, there are omissions and misunderstandings - even some downright false statements - about the events involving his unit, Torpedo Squadron Eight. This is the story of the author's military career, before, during and after the battle of Midway.
2005.309.078	Saga of Smokey Stover, The	Stover, Elisha Terrill	This book was written from the Author's diary with additions made by co-author Clark Reynolds. Smokey had become a Navy pilot, had fought in many air battles, and had been featured in the documentary motion picture "The Fighting Lady", the epic film about his ship, the new Yorktown. But he had been shot down and lost. That was in 1944. The story begins with his dreams, first jotted down in a gripper-edge steno notebook pad, probably in August 1939, on

She lived up to her namesake displaying the fortitude of courage that makes her a "Statesman of the Sea." Come relive the story of the ship that wouldn't die through the memories of the men that served aboard her. Personal biographies, ships roster, and priceless documents make this a must for WWII history buffs everywhere. 2nd Edition, 160 pages, 9" x 12" (from turnerpublishing.com)
2005.309.083	USS America : In Detail & Scale : CVA-66, CV-66	Kinzey, Bert	USS America (CVA/CV-66) Kitty Hawk-class supercarrier
2005.309.084	Supercarrier : An Inside Account of Life Aboard the World's Most Powerful Ship, the USS John F. Kennedy	Wilson, George C.	When the USS John F. Kennedy departed Norfolk, Virginia, in the fall of 1983 for a seven-month deployment, among its crew was Washington Post defense correspondent George C. Wilson. In a Navy first, Wilson had been granted carte blanche access to life aboard the world's most powerful ship, a floating city of 5,000. "Supercarrier" is Wilson's account of that long, grueling tour, of the lives of the sailors, from the boiler tenders to the skipper, of this particular exercise that eventually led to the embattled coast of Lebanon. It is a book like no other on America's Navy. Through his firsthand observations, Wilson reveals the inner lives of today's fighting men. We relive the danger, the wild shore leaves, the tension of the launches and the landings, the loneliness, the broken marriages, the flight-deck hands' nineteen—hour days in the dangerous wash of the jet fighter, and the painstaking decision-making of the men on the bridge. Wilson also discusses how

Object ID	Title	Author	Summary
			these immense, \$3-1/2 billion vessels function and their role as the linchpin in American response to hot spots around the globe. His description of the Kennedy's planes' attacks on Lebanese missile sites, which cost the life of one pilot, the capture of another, is a classic on the complexities of military actions in the twilight zone between war and peace. Wilson's strongest conclusion: Today's Navy is the best educated, best motivated ever, but our sailors are worked too hard, for too little in return. He also discusses the vulnerability of supercarriers to Soviet missiles, one of the great continuing debates of our time, with billions of dollars and national security at stake. This fascinating account of life aboard a supercarrier is more than just a tale of life at sea. The author raises key questions — both of the role of the great carriers and the ways the Navy uses its fighting men, with implications for important changes in national policy. The chief defense correspondent for The Washington Post, George C. Wilson is also the author of "Army in Anguish" and co-author of "The Bridge of No Return: The Ordeal of the U.S.S. Pueblo." Jacket photographs courtesy of the U.S. Navy Jacket design Janet Tingey (from dust jacket flaps) "George Wilson's 'Supercarrier' has done for the modern military at sea what Herman Melville did for whaling in 'Moby Dick.' 'Supercarrier' is an intimate human study — not of this 83,000-ton machine, but of the real people inside it. Wilson did not stay on the dock to write it. He sailed with the men and officers for the full seven

Object ID	Title	Author	Summary
			months of the Kennedy's deployment; experienced the agony of separation; flew with the aviators in their planes; consoled with lonely sailors in the firerooms below the waterline; celebrated the freedom of liberty in foreign ports with the fliers; sweated out their return from bombing raids; and went to the funerals for some of them on the ship. 'Supercarrier' is a must read for anyone, especially military leaders in Washington who want to understand what we are asking our servicemen to do in the modern defense posture of half-war, half-peace. This is a powerful, honest story of brave men at sea." —Bob Woodward, author of "Wired" and co-author of "All the President's Men" (from dust jacket back)
2005.309.085	Carrier Down : The Sinking of the U.S.S. Princeton (CVL-23)	Bradshaw, Thomas I.	After a bomb was dropped on the Princeton, fires and explosions raged aboard. Its fire-fighting systems were immediately destroyed, and other ships had to come alongside to provide water hoses. Finally, a tremendous explosion rocked the Princeton, ripping off her stern and moving the Cruiser U.S.S. Birmingham more than fifteen feet sideways through the water, raking her with chunks of steel, shrapnel and other debris. Carrier Down is the story of the Princeton and the valiant efforts to save her and her crew.
2005.309.087	Franklin Comes Home, The	Hoehling, A. A. (Adolph A.)	This is the story of the most decorated warship in US naval history --- the aircraft carrier Franklin, which survived an air attack that should have proved fatal. For their bravery, the crew received more medals and commendations than any crew had from a single action. 132 pages, includes index. B/W photos. Paperback. Reprint of 1974 hard cover book. Bar code label on back cover.

2005.309.101	Commissioning of the USS Abraham Lincoln (CVN-72), November 11, 1989, Norfolk, Virginia	USS Abraham Lincoln	(CV/CVA/CVS-47, AVT-11) Essex-class aircraft carrier.
			Ports visited included: Pearl Harbor, Yokosuka, Manila, Hong Kong.
			Squadrons included: HU-1 VC-3 VF-92 VC-35 VC-11 VC-61 VF-51 VF-53 VF-54 CAG-5
			USS Abraham Lincoln (CVN-72), is the fifth Nimitz-class supercarrier in the United States Navy. It is the second Navy ship named after former president Abraham Lincoln. Her home port is Everett, Washington, and she is a member of the United States Pacific Fleet. She is administratively responsible to Commander, Naval Air Forces Pacific, and, operationally, she is currently the flagship of Carrier Strike Group Nine.

2005.309.103	50 Years of Naval Aviation	Koehler, O. A.	USS Midway is listed on page 6 as the V-2 rocket launched from its deck on September 6, 1947 was designed, constructed, and tested at NAF. This is a Commemoration Program brochure for the Open House, July 29-30, 1967 celebrating 50 years of the Naval Air Engineering Center which started in 1917, became the Naval Air Material Center in 1943, and was finally named the Naval Air Engineering Center in 1962. This brochure presents only a very brief history of the Naval Air Engineering Center. Added are some facts and figures that we trust will be found interesting to most readers. Analogies and predictions for the future were contributed by some of our more imaginative engineering experts. The Naval Aircraft Factory was established in 1917. In 1943 it was merged in to the new Naval Air Material Center. In 1962 this name was changed to the Naval Air Engineering Center. The Naval Aircraft Factory was born when the airplane was still an infant. Fascination for the aviation buff abounds in the history of the Factory as a pioneer in the artistry of flight. Here is a quote from a speech by Rear Admiral Donald Royce in 1946: "The record set up by the NAF in the manufacturing of twin-engine flying boats during the First World War is still one that has never been equaled. After the war the NAF proceeded to diversify at a rapid rate. It went into the manufacture of various types of aircraft, experimental installations and alterations, aircraft equipment and parts, and aircraft overhaul. The NAF could claim, with justice, to have done a greater variety of aircraft work than any other aircraft organization in the

Object ID	Title	Author	Summary
			country, or in the world."
			It would be difficult to record in its entirety the amazing tale of the part that this Center has played in the advancement of Naval Aviation.
			We can almost see the ghosts of Byrd, King, Mitscher, Halsey, and a host of others who have passed this way.
2005.309.104	US Navy Carrier Aircraft Colours : Units, Colours, Markings, and Operations during World War 2	Thomas, Geoff	This book will enable the historian or modeller to decipher the symbols used by units of the US Navy, to identify units, aircraft carriers and even the actual battles being fought when the photographs were being taken. In addition, this book provides a concise history of the US Navy's air war at sea and also includes details of the Task Forces in the Pacific.
2005.309.105	USS Langley CV-1 AV-3 - America's First Aircraft Carrier	St. Pierre, Paul A.	USS Langley (CV-1/AV-3) was the United States Navy's first aircraft carrier, converted in 1920 from the collier USS Jupiter (AC-3), and also the U.S. Navy's first electrically propelled ship. Conversion of another collier was planned but canceled when the Washington Naval Treaty required the cancellation of the partially built battlecruisers Lexington and Saratoga, freeing up their hulls for conversion to the aircraft carriers CV-2 and CV-3. Langley was named after Samuel Pierpont Langley, an American aviation pioneer. Following another conversion, to a seaplane tender, Langley fought in World War II. On 27 February 1942, she was attacked by dive bombers[10]of the Japanese 21st and 23rd Naval Air Flotillas and so badly damaged that she had to be scuttled by her escorts. (from Wikipedia)
2005.309.106	Lex and Sara -- CV-2 and CV-3	Anderson, Richard M.	The Lexington class aircraft carriers were the first operational aircraft carriers in the United States Navy. (USS Langley was a strictly developmental ship.) There

Object ID	Title	Author	Summary
			were two ships in the class: USS Lexington (CV-2) and USS Saratoga (CV-3). The Lexington-class carriers were constructed on hulls originally laid down as battlecruisers after World War I. But under the Washington Naval Treaty of 1922, all U.S. battleship and battlecruiser construction was cancelled. However, the Treaty allowed two of the unfinished ships to be converted to carriers. They proved extremely successful as carriers, supporting wide-scale operations. Experience with the Lexington class convinced the Navy of the value of large carriers. The Lexington class carriers were the largest aircraft carriers in the fleet until the Midway-class carriers were completed. The class served in World War II, seeing action in many battles. Though Lexington was lost in the first carrier battle (Coral Sea), Saratoga served to the end of the war. (from Wikipedia)
2005.309.107	USS Wasp CV-7 "Stinger" -- Special Edition -- Feb. 1, 1988	Watson, Norman R. CONTENTS 1 The Nazi wonderbird 18 2 A proving ground in MiG Alley 45 3 The Strategic Air Command: bombers for peace 77 4 The war of a million sorties 103 5 Duels over the desert 135 Acknowledgments 172 Bibliography 172 Picture credits 173 Index 173 A new era of combat On August 27, 1939, just four days before the outbreak of World War II, a slender, unconventional research airplane designated the Heinkel 178 took off from Marienhe Airfield in Germany to make the first successful flight of a turbojet aircraft. The event, although hardly noticed at the time, marked the dawn of a new age in aerial warfare. It was a revolution created basically by two men -- Frank Whittle of Great Britain and Hans von Ohain of Germany. Their radical theories regarding aircraft propulsion stirred little interest at first, but war inevitably prompted a reassessment. By 1944, Germany, desperate for a means of halting the Allied bombing offensive, had a dazzling operational jet in the Messerschmitt 262 (right). And Great Britain, the United States and Japan each developed and flew jet fighters before the War ended. Although the first fighting jets had little effect on the outcome of that conflict, their appearance set the stage for future generations of jet warplanes -- aircraft that would play a vital role in determining the fate of contending nations. The dramatic views on these and the following pages, painted by some of the world's leading aviation artists,

2005.313.003	Helicopters, The	Young, Warren R.	Part of the Epic of Flight series. It traces the history of helicopters from its beginning as a toy (a period that lasted for a centuries) to the realities of vertical flight. It includes the work of early helicopter pioneers, Louie Breguet of France and Igor Sikorsky of Russia. The helicopter proved useful for both war time and peace time concerns. Contents: Turning fantasy into reality -- The amazing autogiro -- The dream comes true -- The chopper comes of age -- Helicopter War.
2005.313.004	Giant Airships, The	Botting, Douglas	Part of the Epic of Flight series. In the early days, "the best hope for controlled flight was a motorized, steerable balloon, the dirigible." Design, power and material problems prevented the dirigible from achieving the hoped for progress. Count Ferdinand von Zeppelin's idea to steer away from the "balloon-like envelope shaped primarily by the pressure of the gas that filled it. to a permanent rigid hull of vast size and thus vast lifting power" introduced the age of the commercial giant airship. Improvements in airplanes and some notable crashes of the dirigibles marked the end of the brief giant air ship era.
2005.313.005	Explorers, The	Jackson, Donald Dale	Part of the Epic of Flight series. Flight allowed humans to explore more the Arctic and Antarctic than was ever possible by ship or dogsled. "Whether that force was ambition, intellectual curiosity, or financial gain--or a combination of factors--the supreme triumph of these indomitable aviators, who portraits appear on the following pages, were a deep feeling of accomplishment." Contents: The race to the top of the world -- Pioneering the great circle route -- To the end of south -- The world's wildest yonders -- Vaulting the

2005.313.008	Luftwaffe, The	Time-Life Books	CONTENTS 1 A blitzkrieg from the sky 15 2 Two victorious aerial assaults 43 3 A surprise for Goring's eagles 77 4 The Luftwaffe spread thin 107 5 The air war over Germany 141 Acknowledgments 172 Bibliography 172 Picture credits 172 Index 173 Forging the world's mightiest air force In March 1935, only two years after he came to power in Germany, Adolf Hitler openly defied the Treaty of Versailles imposed on his country at the end of World War I and announced a massive program of rearmament. The plan called for a Reichsluftwaffe, a national air force whose squadrons, as Nazi propagandists said, would put a "steel roof over Germany" and "darken out the sun." At the time, the nation's frontline air strength

Object ID	Title	Author	Summary
			amounted to a mere three squadrons of fighters and five of bombers -- all forbidden under the Treaty. But Hitler missed no opportunity to endow his nascent air arm with an aura of pride and power. In carefully arranged ceremonies, he gave Luftwaffe units names redolent of past glories; the first such event (right) took place on March 14, 1935, when he dubbed a fighter squadron Jagdgeschwader Richthofen after Germany's top World War I ace. And during the gaudy displays of military might staged at Nuremberg each year after that, he saw to it that squadrons of planes blazoned with black crosses thundered overhead. The chief purpose of these spectacles was simply to awe other countries, but the Luftwaffe was in fact becoming a mighty force. Its commander, Hermann Goring, with vital aid from his efficient production chief Erhard Milch, performed prodigies to make the Reich's air fleets truly potent. The output of Germany's aircraft industry shot upward from a few hundred planes a year to thousands. Simultaneously, new combat machines replaced obsolete models, until virtually all of the Luftwaffe's fighters and bombers were swift monoplanes of all-metal construction. By 1939, when Hitler set into motion his schemes for European conquest, the Luftwaffe boasted more than 4,000 frontline combat aircraft, making it the most formidable air force in the world.

			Acknowledgments 187 Bibliography 187 Picture credits 188 Index 189 Cavalry's leap to the skies "War in the air," trumpeted a poster for Britain's Royal Flying Corps, "recalls the olden times, when knights rode forth to battle and won honor and glory by their deeds of personal heroism." The fledgling military air services of World War I had no trouble finding volunteers for a life that promised "romance, action, adventure, and opportunities for glorious achievement." Many recruits were cavalymen who had seen their traditional role as the swash-bucklers of war usurped almost overnight by the airmen in their outlandish but far-ranging new flying machines. The glamorized promise of the poster did not entirely misrepresent the lot of the World War I aviator. He flew into battle high above the barbed wire and boredom, the mud and mass death of the ground war below. On occasion his plane, like the arms of the medieval knights, carried the blessing of the clergy; his chances for "deeds of heroism" were many and his feats were glorified proportionately far beyond those of his comrades in the trenches. But, like them, he died -- his job ironically made more deadly by that same search for glory. Honors accrued to a pilot in proportion to how many of his kind in enemy uniform he shot down. What began as a chivalrous adventure became an increasingly lethal and unglamorous enterprise, with little mercy shown for an overmatched or disabled foe. Before the Great War ended, one much-decorated knight of the air declared that, if anything, he felt like a "hired assassin."

2005.317.002	Defenders, The : A Comprehensive Guide to the Warplanes of the USA	Marshall, Chris (ed)	THE DEFENDERS is an instant reference to the aircraft that equip the air forces of the worLd's most powerful nation. All machines are examined, from the largest bombers to basic trainers. For a book of such size, a fantastic amount of information is packed in. Besides a text

Object ID	Title	Author	Summary
			that gives a brief history of the type, each entry includes a color artwork of the aircraft under discussion, a three—view of the machine, the insignia of the nations that use it (for many of these craft have been sold abroad) and a map showing where it is deployed. In addition, there are always two photographs illustrating different aspects of the aircraft being dealt with. A special feature is the bar running down the side of the page, giving details of role, performance, weaponry and avionics. This enables the buff to make instant comparisons between one machine and another. The book is introduced by an overview of the worldwide commitments of the US air forces, the roles that different types of aircraft have been designed to fulfill and the place of aircraft development and manufacturing within United States defense policy, showing where the various companies fit in and how they have developed their programs of manufacturing and research. Altogether, this compact volume is a mine of useful, comprehensive information that provides easy reference from one type to another. It will become a standard work for all who have an interest in the subject. THE DEFENDERS has been produced by the same team of illustrators, authors and editors that devised the highly successful title THE WORLD'S GREAT ATTACK AIRCRAFT. Among the more than 120 aircraft covered in THE DEFENDERS: A-10 Thunderbolt AH-1 HueyCobra B-1B B-52 CH—47 Chinook

Object ID	Title	Author	Summary
			1969, the world stood still as man landed and walked on the moon. Tens of millions watched it happen, on blurry black and white television, beamed back a quarter million miles across the heavens. For the first time in human history, all mankind could observe a profound discovery as it happened. A generation later, in July of 1999, a two-hour NOVA special television event will mark the 30th anniversary of the greatest science and engineering adventure of all time—going behind the scenes to tell the stories the astronauts and the unsung heroes of lunar exploration—the scientists and engineers who made it happen. When President John F. Kennedy pledged to put a man on the moon by the end of the 60s, not a single person in the nascent US space agency had a clue as to how this would be accomplished. After all, it was April, 1961, just two weeks after an American flew into space for the first time. Everything was unknown and in debate—how would they get there? And how to return? The technologies—for propulsion, navigation, and life support—had yet to be invented and tested. At the time, no computers, batteries, communication, let alone rockets or spacecraft capable of the mission were on the drawing boards. The task seemed endless, even impossible. Then, before the plans were barely outlined, the President was dead, leaving the mission to continue. The task was daunting. NOVA's TO THE MOON is a celebration of that remarkable achievement and an exploration of the future of space technology. Original broadcast date: 07/13/1999 Topic: astronomy/space exploration

2005.318.006	Ice Station Zebra	Sturges, John (director)	Ice Station Zebra, treacherously perched at the top of the world, silently guards a secret that will change the balance of world power forever. America's only hope rests with the speed and courage of the fighting men in the nuclear sub Tigerfish. (from WorldCat)
2005.318.007	Tokyo Raiders, The	Panter, Rich	Relive the preparation and execution of a daring plan by Jimmy Doolittle and his B-325 (sic) (should be B-25 bombers) crews as they retaliated after the devastating blow at Pearl Harbor. Watch a never-before-attempted plan to launch an attack from an aircraft carrier, using medium bombers of the Army Air Corps. The odds against success for such a venture were staggering, yet the advisors concluded it could be done. During this extraordinary raid on Tokyo, all of the crews, with one exception, were forced to bail out or crash land. Despite the losses, the raid gave Americans a badly needed morale boost in one of the darkest hours of the war. The bravery and heroism of Doolittle's Raiders continue to inspire Americans today. (from etvstore.org)
2005.319.001	Clash of Fleets, The; The Stories of Ten Great Sea Battles	Gibson, Charles Edmund	The sea battles described in this book were all fought between fleets of ships. Unfortunately Man has indulged in his love for fighting so many times in the past 4,000 years that there have been literally many thousands of fleet actions. Those selected here have been chosen because they illustrate how the tactics of naval warfare have changed as men's ability to improve their ships and their weapons have changed; but they have one, unchanging factor in common: that the purpose of sea warfare has always been to command the sea, so that the enemy is denied its use, whereas one's own ships can sail where they like upon it. Includes : The Battle with

2005.319.004	Complete Encyclopedia of Battleships, The: A Technical Directory of Capital Ships from 1860 to the Present Day	Gibbons, Tony	This books includes more than 1,000 illustrations, comprising superb color and black and white warship profiles, technical diagrams, scale drawings, and rare historical photographs. There are 324 ship classes covered.
2005.319.005	Battleship Design and Development, 1905-1945	Friedman, Norman	Many books have been devoted to the history or technical details of battleships, but this is the first layman's guide to the design process, the factors which governed the development of capital ships, and the reasons why battleships were built in a particular way. In chapters on the Hull and Seagoing Performance, Armour, Armament, and Machinery, the author outlines the essential compromises and conflicting requirements facing battleship designers. Most navies had

Object ID	Title	Author	Summary
			good security reasons for withholding correct details of their ships but with the simple rules expounded in this book the reader will be able to identify misleading data in published figures, and to understand the emphasis - on speed, protection or fire-power - in any design. All examples quoted are drawn from real ships, and in passing the author reveals many little-known facts about the world's battleships, such as why the first German dreadnoughts nearly capsized, the real armour details for the lowas, and the reasons for the King George Vs' 14 inch guns. Over 250 illustrations - photos, plans and diagrams - and complete accurate tabular data on all significant battleship classes complete a book that is required reading for anyone seeking a deeper understanding of the most impressive warships in history. (from dust jacket back)
2005.319.006	Battleships 1856-1977	Preston, Antony	Gives a history of battleships beginning with the ironclads and going through World War II.

			Islands, one of Belleau Wood's Grumman F6F "Hellcat" fighters crash-landed on the carrier's deck. In late October 1944, Belleau Wood participated in the Battle of Leyte. Wake Island; Makin, Kwajalein; Taroa; Truk, Saipan, Tinian; Emirau, Western Carolines; New Guinea, Eastern Carolines; Marianas, Bonins; Pearl Harbor; Guam; Palau, Philippines, Celebes, Morotai; Ulithi; Kyushu, Okinawa. Japan. Iwo Jima, Chichi Jima. Air Groups 24, 30, 31, 21. Contains rare color photos. End of the Cruise Belleau Wood was decommissioned in San Francisco 31-JAN-1946

2005.319.028	USS Antietam (CVA-36) - Historical Cruise 1952-53	Spada, F. (ed)	This is a pictorial account of the evaluation cruise of USS Antietam (CVA-36) to England to demonstrate the first canted deck (which the British called the angled deck) aircraft carrier in 1953. In September 1952 the canted deck installation was commenced and on 5 January 1953 the ship sailed from New York Harbor to commence experimental operations. The experimental operations included: Phase I, initial evaluation by a group of experienced pilots from the naval Air Test Center, Patuxent River, Maryland; Phase II, air group training for Carrier Air Group Eight (CAG-8), which consisted mostly of pilots completely inexperienced in the jet aircraft they were flying; Phase III, post-shakedown repairs; and Phase IV, fullscale operations with fleet units embarked. Ports of call and items of interest: Captain S. G. Mitchell was the skipper of the first canted carrier, and also the first pilot to land on a canted flight deck--there is a picture of this event--he was flying an SNJ; deck log verse; Guantanamo Bay, Cuba; Haiti; VIPs included Senator Estes Kefauver and Admirals Ballentine, McCormick, Gardner, Doyle, Warder, and Brig Gen Hass; England; pictures of Queen Elizabeth;

Many hand drawn cartoons are featured throughout called the Columbus Comics.
2005.319.039	USS Macon CA-132 - 1954	Scott, John A. (ed)	Pictorial account of the USS Macon (CA-132) on her Mediterranean cruise. 7 September 1954 to 8 December 1954. For some reason, 1955 is on the spine. USS Macon (CA-132) Baltimore-class heavy cruiser. From the intro: "Meet the Macon--17,000 tons of might, designed to defend our nation's heritages--a true victor in war, guardian in peace. Meet the Macon--the USS Macon (CA-132), dedicated to the rights of free men and the provisions of the Charter of the United Nations--an invulnerable floating fortress, which carries out the mission of the United States Navy in every respect and upholds the proud traditions of that service." "On April 12, 1950, the Macon was placed in the hand of the dehumidifiers and she joined the inactive 'mothball fleet' at Philadelphia." Two years later when the Korean conflict broke out, she was retrofitted for active service. "In February 1951, Macon became the

Object ID	Title	Author	Summary
			flagship of Rear Admiral W. S. Parsons, USN, Commander Cruiser Division Six. Captain J.A. Winfrey, USN , relieved Captain Long of the Macon's command at Norfolk, Va, September 1, 1951, and set sail for the Mediterranean Sea on September 6, 1951 for duty with the United States Sixth Fleet. It is that six month our of duty we remember with this book."
2005.319.040	USS Missouri (BB-63) - 1985-86	USS Missouri. Public Affairs Office.	Pictorial account of the deployment of the USS Missouri, BB-63 to the Western Pacific after rebuilding and recommissioning in Long Beach, CA. Ports of call and items of interest : Four months later Missouri departed from her new home port of Long Beach for an around-the-world cruise, visiting Pearl Harbor Hawaii; Sydney, Hobart, and Perth, Australia; Diego Garcia; the Suez Canal; Istanbul, Turkey; Naples, Italy; Rota, Spain; Lisbon, Portugal; and the Panama Canal. Missouri became the first American battleship to circumnavigate the globe since Theodore Roosevelt's "Great White Fleet" 80 years before – a fleet which included the first battleship named USS Missouri (BB-11). Secretary of Defense Caspar W. Weinberger spoke in honor of the ceremony. Also present at the recommissioning ceremony was Missouri governor John Ashcroft, U.S. Senator Pete Wilson, Secretary of the Navy John Lehman, San Francisco mayor Dianne Feinstein, and Margaret Truman.
2005.319.041	USS Tennessee (BB-43) - 1941-1945	Bellatti, "Chum" (ed.)	A pictorial account of the USS Tennessee (BB-43) battleship's activities during and following World War II. The war diary contains a personal narrative and many photos of the attack on Pearl Harbor and continues with photos and information on various operations the ship was a part of throughout the war. Various cartoons and drawn illustrations are also printed within the book.

Object ID	Title	Author	Summary
2005.319.042	USS Texas (BB-35) - The U.S.S Texas - In World War II - 1941-1945	None Stated	A pictorial review of the accomplishments of the thirty-one year old battleship, published for the officers and men who served her during the Second World War. Contains various photos to include Kamikaze attacks, bombardment of Iwo Jima and Omaha beach, damage sustained during battle, Japanese and German POW's and various other wartime activities.
2005.319.043	USS Mobile CL-63 - The Story of a Ship, and the Men Who Fought Her - World War II action - 1943-45	Toombs, W.E.	Pictorial account of the USS Mobile (CL-63), a Cleveland-class light cruiser from 1943-1945 during World War II. She was commissioned in 1943 on the East Coast, came through the canal, and was assigned to the Pacific. She returned to San Diego 2 December 1945. Ports of call, enemy action and items of interest: pictures of Nagasaki and Pearl Harbor devastation; Leyte Gulf; Okinawa; IE Shima Landings; 5 pages of pictures when assigned to fast carrier task groups; 2 pages of pictures at Ulithi showing Mississinewa, a tanker hit by torpedoes--the Mobile helped sink the sub and is the only ship of her class which shares credit for the destruction of Japanese submarine; Battle for Leyte Gulf; Formosa; the Bonins and Iwo Jima; Chichi Jima; Marianas; Marshall and Gilbert.
2005.319.044	USS Newport News (CA-148) - Mediterranean Cruise, 1954	Brown, H.S. (ed)	USS Newport News (CA-148) Des Moines-class heavy cruiser. Contents:: I - Cruise, II- Ship, III- Flag. IV- Divisions. Ports of call included Gibraltar; Lisbon, Portugal; Naples, Italy; Istanbul, Turkey; Athens, Greece; Villefranche, France; Genoa, Italy; Valencia, Spain; Palma Italy, and Tangier Morocco. One of several Mediterranean cruises, the USS Newport News made annually between 1950 and 1961.
2005.319.045	USS Saint Paul CA-73 - Korean Cruise III - 1953	Pearson, Alan E.	USS Saint Paul (CA-73) Baltimore-class cruiser. From the foreword--"This books tells, in words and pictures, the story of fifteen hundred men and their ship during seven

Object ID	Title	Author	Summary
			months in the Korean Theater. This story does not have to with just fighting a war. We have tried to make the book show the many kinds of men and jobs it took to run this ship. But the book is not all about work. We hope you will find plenty about how we played, and played hard, when we got the chance. All in all, it is the story of a ship performing a mission." "In those seven months from March to September 1953, the men of the SAINT PAUL added many new pages to an already proven war record. In World War II, the ship was on hand to send the last round of the war plunging into the Japanese home islands. The ship marked the termination of hostilities in Korea by sending the last round prior to the armistice into Red territory."
2005.319.046	USS Saint Paul CA-73 - 1950-51	Wickham, F. H. LCDR USN (Ed.)	A pictorial account of the 1950 - 1951 WESTPAC cruise of the USS Saint Paul (CA-73) Baltimore-class heavy cruiser in support of combat operations in Korea. Ports visited included Hong Kong, Yokosuka, Japan and Sasebo, Japan. Included are photos of Boxing, Baseball, Basketball and Wrestling matches with the crews Chinese/Taiwanese counterparts in addition to combat mission photos, UNREP pictures and supply transfer, Combat wounded US Sailors, Rescuing a downed pilot, North Korean POW's, Ships personnel visiting the "Front Lines", Firing missions and various other war-time mission photos. There is also a short story about the "Incident of Fusshi-To" where the ship discovered 45 malnourished orphans on an evacuated island and proceeded to deliver aid in the form of food, clothing, blankets, money, soap and building repairs.
2005.319.047	USS Saint Paul CA-73 - 1966	Alvis, R. W. CPL (Ed.)	A pictorial account of the 1966 WESTPAC cruise of the USS Saint Paul (CA-73) Baltimore-class cruiser in support of combat operations in Vietnam. Ports of call included Japan, Subic Bay and Hong Kong.

Object ID	Title	Author	Summary
			Photos of UNREP, Holiday routine, Variety Show, Shore bombardment, Boxing, Steel beach picnic, Ships band, Blood donations, Dependents cruise, and daily life are included.
2005.319.048	USS Wichita (CA-45) - History	Hyde, W. C. LTJG. USN (ed.)	A pictorial account of the history of the USS Wichita (CA-45) heavy cruiser during and after World War II. A wide range of photographs are printed in the book, to include sea-to-shore bombardment, life aboard the vessel, liberating prisoners of war, purple heart presentations, inspecting atomic bomb damage at Nagasaki and many other events which occurred during the ships combat service.
2005.319.049	USS Worcester CL-144 - Far East - 1957	Lottman, Staurt J. (ed)	USS Worcester (CL-144) light cruiser. From the Capt Russel O. Williams USN, Commanding intro, "Our cruise in the Far East, April to October (1957) is over. It was a long cruise but a happy one. We visited many foreign lands, enjoyed liberty in many ports, but above all we carried out our mission and served as ambassadors of good will of the United States. We treasure our memories of this cruise and the performance of our outstanding crew. But memories are short lived at best. This book was compiled so that you and I would have a permanent record of those memories and of the fine shipmates who maintained and enhanced the reputation of the "Wandering Wo." Ship's Schedule--Long Beach--Hawaii--Kobe--Yokosuka--Shimoda--Okinawa--Nagasaki--Yokosuka--Sasebo--Yokosuka--Hong Kong--Manilla--Subic Bay--Hong Kong--Hakodate--Yokohama--Yokosuka--Kobe--Long Beach
2005.319.050	USS Worcester CL-144 - Med Cruise 1953-54	None Stated	USS Worcester (CL-144) light cruiser. According

Object ID	Title	Author	Summary
			to the History of the USS Worcester, this was the 5th Mediterranean Cruise. Ports included Bergen, Norway, Copenhagen, Spain, Portugal, France, Greece, Sardinia, the Riviera, Crete, Italy, and Istanbul
2005.319.051	USS Pittsburgh (CA-72) - Down to the Sea Again - 1951-52	Flanigan, G.M. (ed)	USS Pittsburgh (CA-72) Baltimore-class heavy cruiser. From the history, "On February 1952, after a brief period of yard availability in Norfolk, the PITTSBURGH sailed to the Mediterranean to join the Sixth Fleet, readingh Gibraltar ten days later. She participated in Operation GRAND SLAM, a joint fleet exercise involving ships of the navies of Great Britain, France, Italy and the United States. The operation was eminently successful and demonstrated conclusively the skill and cooperation of the combined navies. Her Mediterranean assignment was by no means all work for the PITTSBURGH. She visited La Spezia, Italy; Syracuse, Sicily, St. Jean, France, Suda Bay, Crete, Athens, Greece; Istanbul, Turkey; and Algiers, Algeria. In each of these ports, the men of the PITTSBURGH were afforded a priceless opportunity to observe the culture and customs of foreign lands."
2005.319.053	USS Washington BB-56 - 1941-46	Baker, R.W.	A pictorial history of the USS Washington (BB-56), North Carolina-class battleship from 1941 - 1946. Hundreds of black & white photos of battle action, splashing Kamikazis, the USS Bunker Hill, Intrepid, and Franklin in flames, etc. Very little text. Usual "candid" photos, no list of crew.;
2005.319.054	USS Alabama BB-60 - 1942-44	None Stated	The 1942-1944 war diary of the USS Alabama (BB-60), South Dakota-class battleship. Hundreds of black & white photos of battle action, splashing Kamikazes, etc. Very little text. Includes group photos and identification of crew members together with a map of its travels.
2005.319.055	USS Pennsylvania BB-38 -	Hawkins, George W. (ed.)	A pictorial account of the war

Object ID	Title	Author	Summary
	War History [1942-1945]		history of the USS Pennsylvania (BB-38). Contains a map of the ship's travels, ports of call, operation bases, and battle actions. Also has a list of the ship's commanding officers and executive officers from 1941-1946; a chronology of the ship from 1912-1946; group pictures and a list of the crew; and a list of the personnel who died on board. Also included in a plastic sleeve is a copy of a three letter by Rear Admiral R. H. Jackson giving a FIRST HAND ACCOUNT OF THE ATTACK ON PEARL HARBOR on 7 December 1941 together with a list of the men who died aboard the USS Curtiss during that attack. The ship was used as an atom bomb target in 1946.
2005.319.056	USS Arkansas BB-33 - Pacific War Diary	Wilson, H.A.	A pictorial account of the USS Arkansas (BB-33) Wyoming-class battleship Pacific War Diary. Departed from Portland, Maine on 11 November 1944 and returned to Seattle, WA on 15 October 1945. Includes the Arkansas log from 25 January 1910 to 15 October 1945; 2 pages of Kamikaze pictures; 2 pages of sea plane pictures; group pictures and a list of the crew.
2005.319.057	USS Manchester CL-83 - 1950-51 Pacific Diary	Straubel (ed.)	Pictorial account of the deployment of USS Manchester (CL-83) Cleveland-class light cruiser to Korea and its combat missions. Departed San Francisco on 1 August 1950 and returned San Francisco 15 June 1951. Ports of call: Pearl Harbor, Tokyo, Sasebo, Keelung, and Hong Kong. Items of interest: 2 pages of helicopter pictures, many pictures of engagement in the Korean War, 1 page of celebrity pictures and list of celebrities including Marilyn Monroe, Marion Davies, and Monica Lewis; complete list of crew with group pictures
2005.319.058	USS Manchester CL-83 - Pacific Diary II - 1951-52	Strauble & Ruggles (eds.)	Pictorial account of the deployment of USS Manchester (CL-83) Cleveland-class light cruiser to Korea and its

Object ID	Title	Author	Summary
			combat missions with Fast Carrier TF 77. Departed Long Beach on 5 November 1951 and returned after 1 March 1952. Ports of call: Pearl Harbor, Pusan, and Tokyo. Items of interest: 2 pages of unidentified celebrities; 6 pages of helicopter photos; 6 pages of visit to Japan; visit of Secretary of the Navy Dan Kimball and Mrs. Mathew B. Ridgway; complete list of crew with group pictures
2005.319.059	USS Alaska CB-1 - 1944-45	Kovalsky, Francis (ed)	USS Alaska (CB-1) large cruiser first of the Alaska Class large cruisers. From the first page of text after the opening photo, "USS Alaska (C.B.1) 'Memories' 17 June 1944-18 December 1945." Book includes photos and details of the Alaska's commissioning on 17 June 1944--her keel was laid ten days after Pearl Harbor on December 17, 1941. Book also traces her shakedown cruise, subsequent changes and additions, and transit from Philadelphia Navy Yard to Hunter's Pt, San Francisco in November-December 1944. Captain Kenneth H. Noble took command on 21 January 1945. On 28 January 1945, the Alaska set sea for the Western Pacific where she joined up with Task Group 59.5 in Ulithi Atoll. The Alaska went on her first combat sortie on 10 February, 1945 and made her first contact with the enemy on 18 March 1945. The next day the USS Franklin was hit. She was in combat from 28 January until 13 June, when she returned to Leyte. The rest of the book includes photos of the crew and ship's activities.
2005.319.060	USS Saint Paul (CA-73) - Korean Cruise II - 1951-1952	Pearson, Alan E. YN3 (ed.)	A pictorial account of the USS Saint Paul (CA-73) Baltimore-class heavy cruiser's second Korea Conflict tour, 5 November 1951 - 24 June 1952. Contains various photos and cartoons depicting life aboard the ship during the Korean conflict. Including ships operations, rescuing a downed Corsair pilot, Taking North Korean prisoners, Underway replenishment, taking on

Object ID	Title	Author	Summary
			combat wounded, burial at sea and various other photographs documenting the time period.
2005.319.061	USS Canberra (CAG-2) - 1960	None Stated	USS Canberra (CA-70/CAG-2) Baltimore class cruiser/Boston class guided missile cruiser. "On March 3rd, 1960, the USS CANBERRA sailed from Norfolk, Virginia to be away for a period of nearly eight months. For many this was cause for considerable consternation. Fortunately there were ample rewards. After a short stop at Guantanamo Bay, Cuba, transited the Panama Canal and stopped at San Diego to pick up more personnel. Then the ship commenced sailing westward 'round the world. With visits to such exotic places as Hawaii, Australia, Japan, Hong Kong, India and the Riviera, Florence, Rome and the Olympics, Naples, Athens, and Istanbul, CANBERRA enjoyed a tour of fabulous and historic lands such as most Americans will hear of but never in their lives see. Cities with such sonorous names as Moji and Karachi, Cochin and Cannes, Livorno and Fiumicino, Aden and Beppu, Yokosuka and Capri rose out of darkness or mist. Each port was a new world. The cruise was tours of the area, old world and new, great buys of every conceivable kind, foreign languages reminiscent of Babel, breath-taking views of Versuvius and Fuji, Sorrento and the Parthenon and Suribachi; an education, memories and a long pensive look at the world; a hand across the sea."
2005.319.062	USS Toledo CA-133 - 1949-50	Bjorge, James R. (ed)	USS Toledo (CA-133) Baltimore -class heavy cruiser Nice hand drawn map on inset. Cruise book Ah-So? The story of a cruise to the Western Pacific 14-OCT-1949 to 12-JUN -1950
2005.319.063	USS Macon CA-132 - 1951-52	Scott, John A. (ed)	USS Macon (CA-132) Baltimore -class heavy cruiser Contains roster of Officers and Crew complete with home addresses. Dedicated in Memoriam of Ensign Haney

Object ID	Title	Author	Summary
			Hubbard Daniell. Contains photos of a Sweetheart contest of Crew's sweeties. Many pictures of beautiful ports of call on this Mediterranean Cruise years 1951-1952 dates are left out.
2005.319.064	USS Pensacola CA-24 - 1929-46	None Stated	USS Pensacola (CL/CA-24), lead ship Pensacola-class heavy cruisers nicknamed the Grey Ghost. Page 23 shows a great photo of the Yorktown listing as she is sinking with carriers circling until all the survivors were picked up. Great shot of Iwo Jima smoking after it was taken. Also included is a loose-leaf history of the Pensacola from a 2016.303 donation.
2005.319.065	USS Toledo CA-133 - 1949	Kint, J. Richard (ed)	USS Toledo (CA-133) Baltimore-class heavy cruiser World cruise crossed the line 11-AUG-1949 1949 NROTC Senior-Sophomore Summer Cruises 16-JUN-1949 to 27-JUL-1949 and 2-AUG-1949 to 13-SEP-1949. Contains a great picture of Alcatraz Island. Predominantly pictures covering the two cruises of the Senior-Sophomores.
2005.319.066	USS Miami CL-89 - The Story	None Stated	USS Miami (CL-89) Cleveland-class light cruiser. Great shots of a Japanese bomber dropping a bomb on the ship and the ship retaliating. Christmas on the ship December 1945 after the war. Candid shots of a crew that fought in WWII.
2005.319.067	USS Pasadena CL-65 - History	None Stated	USS Pasadena (CL-65) Cleveland-class light cruiser contains photos of aircraft recovery and aircraft wrecked in typhoons. Photos of near misses by Kamikaze pilots and recovered shrapnel from explosions.
2005.319.068	USS Vicksburg CL-86 - War Cruise	None Stated	USS Vicksburg (CL-86) Cleveland-class light cruiser. This book chronicles the WWII cruise of this ship. Great shots of refueling on a bumpy sea and shots of the OSU2 Kingfisher landing in the sea along side the ship.
2005.319.069	USS Des Moines CA-134 - 1955	Godschalk, D.R. (ed)	USS Des Moines (CA-134), lead ship Des Moines-class heavy cruisers

Object ID	Title	Author	Summary
			This book is in the format of a Calendar where a Seaman could write a note on each day. I believed it belonged to Chaplain Wylie R. Bryant USN. Book lists all the cruises during 1954. Candid shots of ports of call. The goal of this book is to picture in usable form, some of the times and places of a year's cruising. Book has page listing the ports of call during the Mediterranean cruise.
2005.319.070	USS Mobile CL-63 - The Mighty Mo - 1942-44	None Stated	Pictorial account of the USS Mobile (CL-63), Cleveland-class light cruiser from its launching in 1942 through action in the Pacific during World War II. Contains a history of the ship; pictures of first raid, first night attack and first bombardment; pictures of VIPs Mary Elliot, Frances Fay, Rosita Moreno and Ray Milland;
2005.319.071	USS Mississippi BB-41 - 1941-45	Porter, William, Carroll, Kent J.	The 1941-1945 war record of the USS Mississippi (BB-41), New Mexico-class battleship. Includes the routes from 7 Dec 1941 to 12 Oct 1945; a list of the battle casualties; a list of the commanding officers from 1918 - 1947; hundreds of black & white photos of battle action, splashing Kamikazes, etc. Includes group photos and identification of crew members together with a map of its travels.
2005.319.072	USS Iowa BB-61 - 1955	Campbell, D.B. (ed)	USS Iowa (BB-61), lead ship Iowa-class battleships This was a Mediterranean cruise but very little information is given. There are no specific dates mentioned and little said about what they were doing. Lots of Ports of Call pictures, very candid shots.
2005.319.073	USS Birmingham (CL-62) - 1943-45	None Stated	USS Birmingham (CL-62) Cleveland class light cruiser Contains diary of the Quartermaster. Great photos of the nautical charts. Photo and story of a Yorktown pilot being picked up.
2005.319.074	USS Columbia CL-56 - 1942-45	Fischer, LTJG (ed)	USS Columbia (CL-56) Cleveland-class light cruiser. This was a WWII Cruise in

Object ID	Title	Author	Summary
			which 77 men lost their lives onboard, book lists the name of the men lost. There were 338 men wounded and 6 missing. Ship saw combat from November 1943 through May 22, 1945. Ship shot down 11 enemy aircraft. Participated in Operation Iceberg, Love Day and Zero Hour. Recounts how they prepared Japanese mainland for D-Day. Great fighting footage. Footage of a 'Fo'c'sle (Forecastle) open air, not enclosed. Photo of the Emperor's Palace. Photo of where 'Tokyo Rose poured out lies' the building of the radio station.
2005.319.075	USS Helena CA-75 - Crew's Book - 1952	Schaefer, E. (ed)	USS Helena (CA-75) Baltimore-class heavy cruiser The Helena Crew's Book 1952. Small paperback book chock full of crew photos. Great shots of North Korea's failed attempts at railroading. Photos of a pilot who was shot down behind enemy lines, rescued by the ship's 'Last Chance Taxi' helicopter.
2005.319.076	USS Helena CA-75 - 1954	Grose, R.H. (ed)	USS Helena (CA-75) Baltimore-class heavy cruiser Has cleverly hand drawn ship's schematic on the inset, adorable. Little is said about the cruise. I find no cruise dates. There are great photos of the Crews in their spaces and also hand drawn illustrations of the rates. Ports of call Japan, Korea, Philipines.
2005.319.077	USS Wisconsin (BB-64) - Midshipman Practice Squadron Cruise - 1953	None Stated	USS Wisconsin (BB-64) Iowa-class battleship. Very small. Located inside front cover of Wisconsin 1953-54 cruise book. Is in a page size plastic sheet Midshipman Practice Squadron 1953 Cruise Brazil, Trinidad and Cuba. Each page is printed in English and Portuguese USS Wisconsin was the built as the biggest battleship in the world at a cost of over \$100 Million in 1941 that is \$1,677,482,269.50 in 2016
2005.319.078	USS Wisconsin BB-64 - 1943-47	Meachem, L.W. (ed)	USS Wisconsin (BB-64) Iowa-class battleship Book contains an original

Object ID	Title	Author	Summary
			USS Wisconsin Ship's Laundry List with at note at bottom: The laundering of woolen, silk or dyed goods will be at the owner's risk. Also contains an original Ship's newspaper and a Plan of the Day. Plan of the day from 1-MAY-1947 includes the movie show that night Frozen Ghost with Lon Chaney.
2005.319.079	USS Massachusetts BB-59 - April 42-Aug. 45	None Stated	USS Massachusetts (BB-59) South Dakota-class battleship The USS Massachusetts affectionately called 'Mighty Mamie'. The ship cost more than \$75 million in 1939 that is \$1.2 Billion in 2016. On 6-FEB-1943 Mighty Mamie left Portland, Maine and passed through Panama Canal and proceeded to Noumea, New Caledonia and then off to war in the Pacific. This battleship in my opinion did a great job of destroying the enemy in Kamaishi.
2005.319.080	USS New York BB-34 - The History	None Stated	USS New York (BB-34), lead ship New York-class battleships. At the time of the book's publication this was the oldest battle ship in the fleet, list of various 'Face lifts' done during it's time 1911-1945. Photo of King George V on deck. The longer history of the USS New York show 18 awards won by the crew. During WWII the USS New York steamed 123,867 miles and consumed 22,367,996 gallons of fuel. On April 14th, 1945 a Kamikaze plane attacked the New York destroying a plane on the catapult. In 1941 the New York participated in a Neutrality Cruise in the Atlantic enforcing the country's neutrality prior to the bombing of Pearl Harbor. Great photos of the OSU2 Kingfisher. Photo of the Japanese surrender document and ceremony.
2005.319.081	USS Maryland BB-46 - 1941-1945	None Stated	USS Maryland (BB-46) Colorado-class battleship Page one gives the statistics of the ship such as miles steamed and ammunition fired, there were 53 killed and 69 injured during its tenure. Page 6 lists the men killed in action page

Object ID	Title	Author	Summary
			7 lists it commanding officers. The Maryland was damaged in a Kamikaze Attack.
2005.319.083	USS Colorado BB-45 - 1942-46	Lusk, Robert S. (ed)	USS Colorado (BB-45), lead ship Colorado-class battleships Great photos of Japan after the war. Photo of the Emperors's Palace. Excellent photos and stories chronically the war with Japan.. Funny cartoons hand drawn on the inset with a hand drawn map.
2005.319.084	USS North Carolina (BB-55) - The Showboat [1941-45]	None Stated	USS North Carolina (BB-55), lead ship North Carolina-class battleships Nicknamed The Showboat. This book lays out when the ship was built and commissioned and has many photos chronically the war but does not give specifics the information could have been classified at the time of printing.
2005.319.085	USS Fargo CL-106 - Med Cruise - 1949	Webster, Harvey O. (ed)	USS Fargo (CL-106), lead ship Fargo-class light cruisers Mediterranean Cruise departed Newport, RI on 28-FEB-1949, passing through Greece, Italy, France, Algiers, Gibraltar, Sicily and Turkey returning to Newport, RI on 28-SEP-1949 This was to be the last voyage the Fargo made and a Decommissioning write up is included in this book page 111
2005.319.086	USS Huntington CL-107 - 1948	Rauch, Charles F	USS Huntington (CL-107) Fargo-class light cruiser Ship departed Newport, RI on 1-JUN-1948 and sailed to Suda Bay, Crete, from there they visited Greece, Turkey, Malta, Libya, Kenya, Argentina, Brazil and the West Indies before returning to Philadelphia, PA on 8-DEC-1948. This Mediterranean cruise covered 28,507 miles. Inset contains a great map of the travels. Features a photo of Juan Peron the former President of Argentina and husband to 'Evita'.
2005.319.087	USS Helena CA-75 - 1959-60	Swanson, Dave (ed)	USS Helena (CA-75) Baltimore-class heavy cruiser. Photos of Portland, OR Rose Festival
2005.319.088	USS Wisconsin BB-64 - 1951-52 Anniversary Edition	None Stated	USS Wisconsin (BB-64) Iowa-class battleship 1951-52 Anniversary Edition. Far

Object ID	Title	Author	Summary
2005.319.089	USS Wisconsin (BB-64) - Crossing the Line - 6-19-53	None Stated	East cruise USS Wisconsin (BB-64) Iowa-class battleship Very small booklet focusing on Crossing the Line on 11-JUL-1953. Lists all the men that participated and a cast of characters for the ceremonies.
2005.319.090	US Naval Supply Depot, New Orleans, LA 1945	None Stated	Includes a brief summary of the history of the US Navy from 1775 to 1944; a large number of WWII action pictures; photos of the supply depot; and individual identified photos of the depot personnel. Very little text.
2005.319.091	United States Submarines	Barnes, Robert Hatfield	The beginning of submersibles to WWII Includes Submarine roll of Honor WWI & WWII
2005.319.092	USS Bremerton CA-130 - 1953	Adams, Walter D.	USS Bremerton (CA-130) Baltimore-class heavy cruiser Page 11 features a picture of a drone, relevant for mention because personal drones are popular today. Photos of signing of the Korean Armistice.
2005.319.093	USS Briareus AR-12 - 1953	None Stated	USS Briareus (AR-12) Delta-class repair ship Book contains a letter from Albert Love Enterprises and an envelope addressed to USS R.H. McCard DD-822
2005.319.095	Cubi Point, Philippine Islands - Mobile Construction US Naval Battalion 1954	None Stated	US Naval Mobile Construction Battalion No 2 - SEABEES with Foreword by Commanding Officer Victor G. Stevens, Executive Officer Lt. Thomas J. McGhee with Listings of A Company; H company; B, C , D with platoons and roster.Included is First Project, Concrete Batch Plant, Navy Exchange, Camp Area, Mt. Martin, Water Supply, Midway Island Project with 150 men July and January, U. S. O. Shows, and a list of officers and crew in the back.
2005.319.096	US Naval Air Station, Lakehurst, NJ - 1957	None Stated	US Naval Air Station, Lakehurst, NJ - 1957 with History & Mission. It is the oldest and largest lighter-than-air base in the U.S. covering an area of 11 1/2 square miles. Prior to 1916 it was used as an ammunition proving ground

Object ID	Title	Author	Summary
			for the Imperial Russian Government.. The Eddystone Chemical Co. leased the area for an experimental firing range. U. S. Army bought the territory adding more acreage naming it Camp Hendricks. Navy established present Air Station in 1921. WWII expansion and the Chief of Naval Airship Training & Experimentation's office was established as well as the headquarters for the Commander Fleet Airships, Atlantic. 1958 the Naval Ship Installations Test Facility will commence testing of experimental catapult and arresting gear machinery to be used on aircraft carriers. NAS Lakehurst provides station facilities and logistic support for: Three fleet squadrons, Naval air Reserve Training Unit, naval Air Technical Training Unit, Naval Air Test Facility (ship Installations); O & R Dept. conducts all of the Navy's airship and repair. AT&D Dept conducts experimental projects pertaining to LTA developments and tests new airships to meet contract specifications. NAS provides logistic support for transport squadrons based at McGuire AFB and is a BU-AER airship component storage pool, airship acceptance delivery point; primary aviation supply point and helium storage and distribution center. Location scenes, letters, Departments with pictures of personnel & duties included.
2005.319.097	US Naval Air Station, Whidbey Island - 1954	None Stated	US Naval Air Station, Whidbey Island, 1954 largest in the Pacific Northwest and second largest in the continental United States. Commanded by Capt. George Dufek, USN the shore station command is under the administrative cognizance of the Commandant of the 13th Naval District. Personnel assigned normally have completed a tour of sea duty and are stationed here for shore duty. Primary mission is the support of fleet aircraft units

Object ID	Title	Author	Summary
			temporarily assigned to the station. The station provided working space, operational facilities, special tools and maintenance equipment. Mess, recreational, medical, dental spiritual guidance, transportation and housing facilities are provided. Photographs and pictures of personnel and departments listed.
2005.319.099	US Naval Receiving Station, Norfolk, VA, Vol. 7 - 1945	None Stated	Includes a brief summary of the history of the US Navy from 1775 to 1944; a large number of WWII action pictures; photos of the US Naval Receiving Station at Norfolk, Virginia; and individual identified photos of the station personnel. Very little text. Pages 77-91 are photos of the Transient Personnel. According to Dean L. Mawdsley's book, 19 volumes of this book was issued--each with different rosters and photographs of transient Personnel.
2005.319.100	Puget Sound Naval Shipyard	None Stated	Puget Sound Naval Shipyard, E. W. Rear Admiral, U. S. N. Commander. History - 1841 Lt. Charles Wilkes of the U. S. Navy surveyed Puget Sound and urged its acquisition describing it "as the best harbor north of San Francisco". 1867 Board of Army engineers surveyed suggested that a Naval Station and Drydock be immediately established on the shores of Lake Washington. 1896 construction of the drydock and opening ceremonies April 1896. 1914 Naval Torpedo Station , Keyport, established for storage, modification, repair and resting of torpedoes. Piers constructed to accommodate the large aircraft carriers, Lexington and Saratoga.
2005.319.101	USS Consolation (AH-15) - 1954 -1955	Howard, W.R. (ed)	USS Consolation (AH-15) Haven -class hospital ship. Pages 38-40 have a list of ship's roster. The Consolation participated in the Korean conflict, was known to have a Female medical officer on board, had a blood bank as standard equipment,

Object ID	Title	Author	Summary
			had a helicopter flight deck installed to received battlefield casualties onboard and had a Korean baby born aboard. "Service is our motto" states a plaque on board.
2005.319.102	United States Naval Aviation in Review - 1911-1951	Bureau of Aeronautics	This was published in conjunction with an Exhibition at the Truxtun-Decatur Naval Museum in Washington, DC. Pages 26-27 list the physical exhibits. Cover Illustration - Escort carriers, hastily built in World War II transported aircraft, searched for submarines, and supported troop landings. Foreword by A. M. Pride, Rear Admiral, USN, Chief, Bureau of Aeronautics. Frontispiece of No. 103. Lockheed P2V's are patrol aircraft designed especially for antisubmarine warfare. Pg. 1 Pensacola, Fla., January 11, 1914 and unknown hand wrote the first entry in a log book. The Navy was returning to its old yard, abandoned, and a turn of history was about to revive it. The Secretary of the Navy decided that the science of aerial navigation had reached a point where aircraft must form a large part of our naval force for offensive and defensive operations. The announcement of January 10, 1914 marked the close of one era and the beginning of another. Rear Adm. Bradley A. Fiske recalled that the new form of military just struggling with progressive thinkers. Early naval aviation with the Ely landing on the Pennsylvania January 1911 in San Francisco Bay to the H-16 Navy bomber used in WWI in North Sea area, Balloons, and Essex and Independence-class carriers making up the fast carrier task forces. WWII aviation with the F7U Cutlass. Includes other aircraft and list of physical exhibits and documents and combat art.
2005.319.103	U.S. Fleet Post Office - SF, CA	Thomas, Martha Piper (ed)	Prior to WWII, "the U.S. Navy received mail direct from civilian post offices. Locations of stations remained permanent and presented no problem as to mail delivery since it was

Object ID	Title	Author	Summary
			directed to the city and state where each particular naval station was located. In the case of ships and aviation units which were afloat, other arrangements were required. The procedure followed proved most successful and simple in operation. This consisted of direct negotiations between the commanding officer and the postmaster. Ship's mail was sent to the city where it spent most the time in port . . . in care of the postmaster of that city. The postmaster in turn would have the mail delivered to a designated office on the dock where the ship's mail clerk picked up the mail. Before a cruise the post master was advised of the schedule and mail was forwarded accordingly. To expedite mail delivery, personnel usually advised their correspondents of the ship's movements and mail was addressed to port cities in care of the postmaster. After Pearl Harbor, when wartime secrecy shrouded the movements of ships, it became necessary to have a central distribution point. Two main Navy post offices were established... one in San Francisco, California and one in New York City.... In this manner, the locations of ships and stations remained unknown to all with the exception of those charged with routing the mail.'
2005.319.104	United States Naval Aviation 1910-60	Van Wyen, Adrian O.	The 1910-1995, is available online at: http://www.history.navy.mil/branches/usna1910.htm. Published to mark the golden anniversary year of naval aviation. A chronology of naval aviation prepared to show significant events in its growth and development in the belief that the growth in knowledge it engenders will be of assistance of solving the problems of today and an inspiration in the world of tomorrow.
2005.319.105	Cruiser Division 14, 1949	None Stated	"Beginning the first of April, 1946, the Naval Training Station at Newport, Rhode

Object ID	Title	Author	Summary
			Island inaugurated a program unprecedented in the annals of United States naval history. Nearly 2000 commissioned officers, Ensigns (D) L U.S.N. R. stowed themselves and their sixty tons of luggage in barracks and began looking for the chow line... This program was unique, not because they were going on a cruise, nor because they were from widely separated points. That procedures had become routine during the war, and midshipmen have gone on training cruises since the days of one J. P. Jones. The unusual feature of the situation resulted from the fact the never before had so large a group of commissioned officers descended upon a training station and said "When do we eat?" Naval Reserve officers graduating from training "from the middle of February to the last of March" were sent on a "three months cruise to round out their training and to inject a little salt into their backgrounds. The Naval Training Station, Newport was selected as the assembly point and the Cruiser Division Fourteen (the new designation of battle-scarred Cruiser Division Twelve) was detailed as the unit under command of Rear Admiral Ralph S. Riggs, USN." The cruise included stops in New London, Newport, Bermuda, Newport, Casco Bay, Charleston, New York, Halifax, Quebec, and Philadelphia.
2005.319.106	USS Madison - DD-425 - There Was a Ship - The Unofficial Story	None Stated	USS Madison (DD-424) Benson-class destroyer Unofficial story of the destroyer USS Madison written and illustrated by some of her officers. This book contains no photographs only hand drawn illustrations by some of the crew. It does list the ribbons and stripes won for combat during WWII.
2005.319.107	Navy League of the United States Golden Anniversary Dinner, 1902-1952 :	Navy League of the United States. New York Council	The Navy League's purpose is to keep the American people informed about the Navy.

Object ID	Title	Author	Summary
	Program. October 27, 1952, Hotel Astor, New York / New		This book is the program from a Navy League dinner in 1951. Included in the book are: foreword by William F. Halsey, Fleet Admiral; list of guest speakers; pictures of admirals; Chapter 1, Today; Chapter 2, Yesterday; Chapter 3, Tomorrow; pictures of Admirals of the Navy; chapters on the United States marines; naval aviation; women's auxiliary; missions of the Navy; followed by many full page advertisements.
2005.319.108	USS Burdo - APD-133 - 1953	None Stated	USS Burdo (APD-133) Crosley-class high speed transport Very small book with few pages. There is a page that proves the ports of call on the Mediterranean Cruise. Having left 9-Jan-1953 from Norfolk, VA they were enroute to Oran, Algeria until 20-Jan-1953. Returning they steamed from the Mediterranean leaving 9May -1953 reaching Little Creek, VA on 20-May-1953
2005.319.109	USS Burton Island - AGB-1 - Arctic '52	None Stated	USS Burton Island (AGB-1/AG-88) Wind-class icebreaker North Atlantic Cruise including Seattle, Puget Sound, Kodiak, Alaska through the Unimak Pass to Nome, Alaska. Great photos of the ship plowing through ice. No dates are mentioned or listed.
2005.319.110	USS Bremerton - CA-130 - 1957 -58	Belville, L.S. (ed)	USS Bremerton (CA-130) Baltimore-class heavy cruiser the 'Ambassador" a year in the life of the United States ship Bremerton. Captain Richard S. Craighill commanding officer. Exceptionally candid photos and beautiful color photos very rare for these books before the 1970s
2005.319.112	Naval Landing Force Equipment Depot, Norfolk, VA	None Stated	From a letter signed by H.C. Laird, Captain, USN (Ret)--"The Amphibious Force, early in this war, set up a storage and repair shop for small landing boats, designated as the Naval Landing Force Equipment Depot. It started in Building 138 at the Naval Operating Base, but as boats poured in from many shipyards, more and more space was needed so the Navy bought the "Ford Plant"

Object ID	Title	Author	Summary
			in Newton Park, Norfolk, and the activity moved there in January, 1943. Through the diligent work of all hands, the Naval Landing Force Equipment Depot has grown in united, organized purpose and effort toward three main objectives: (1) The sending out of boats in the best possible condition. (2) The training of men to run the engines and to be able to make emergency repairs when overseas. (3) The reconditioning and salvage of boats returned from Invasion Coasts. In serving the Amphibious Forces, we are serving the Nation. Each small detail of equipment issued from this Depot is important, for upon these boats and this equipment depend the live of men--some of them our former shipmates, now fighting fronts...."
2005.319.113	USS Bremerton - CA-130 - 1952 - The Call of Duty	Austin, A. P. (ed)	USS Bremerton (CA-130) Baltimore-class heavy cruiser Great hand drawn illustrations. History of Squantum Naval Air Station. Pictures of the leadership, department heads and officers, montage photos and then the crew by departments. Includes Coast Guard and Marine detachments and the Naval Auxiliary Air Facility, Ayer, Massachusetts.
2005.319.118	First to Fight	McCahill, William P.	First to Fight was written not as a comprehensive history nor as a play by play account of Marine action in WWII. The author set out to write a readable and interesting, popular yet factual story of the Corps. Wake, the Philippines, Midway and Guadalcanal were emphasized. The lore of yesterday receives its proper attention and the 167 year history of the Corps is compactly telescoped for the reader today. This is a story of Captain McCahill as an officer candidate in February 1941. He has served at Quantico, Washington and San Diego. At all 3 posts of duty he had ample opportunity to observe and record Marine history in the making.
2005.319.119	Argentia - Sentinel of the North Atlantic - History of Task Force 24	United States. Naval Facility, Argentia, Newfoundland	"This volume is dedicated primarily to those officer and men of the allied countries who gave their lives in the protection and preservation of the shores in and around the Argentia

Object ID	Title	Author	Summary
			area, and other personnel who were based on the Avalan Peninsula, who so unstintingly, frequently under most trying conditions, contributed to the safe conduct of ship, supplies, and personnel, so necessary to the successful completion of the European War." Book is dedicated to the Late Vice Admiral A.L. Bristol, USN, First Commander, Task Force 24, U.S. Atlantic Fleet. Book also includes the history of the base in Argentia, Newfoundland beginning with the US Marine occupation on January 25, 1941 and ending with the first Peacetime Navy Day celebration on October 27, 1945 Task Force 24 was closely identified with the Argentia
2005.319.120	Composite Squadron Ninety-Four [1944-45]	Collier, Richard (ed.)	Pictorial account of the activities of VC-94 from its commissioning at Sand Point, WA on 29 February 1944 through combat operations in the Pacific Ocean while operating off of USS Shamrock Bay (CVE -84) until its return to San Diego on 14 June 1945. Principle operations included Lingayen Gulf, Iwo Jima and Okinawa. Mostly B&W photos with captions. Included are: This pictorial record of their achievement is sincerely dedicated to our Captain, Lt. Comdr. James F. Patterson, who is reported as Missing in action, and to these other officers and men who have given their lives for their country (nine names). 1. Large photos of Lieut. Comdr. James F. Patterson 2. Photos of Those Who will not return 3. Large photo of Burial at Sea - E. M. Langley AMM2/C 4. Introduction 5. As we left Pearl - group picture with CO (acting) and XO 6. Buzz Boys 7. Group photo and three individual photos 8. Four pages of individual photos - six to a page

Object ID	Title	Author	Summary
			9. Torpeckers 10. Group photo and three individual photos 11. Two pages of individual photos - six to a page 12. Co-Pilots - six photos 13. Large photo of Ready Room 14. Seven pages of enlisted personnel 15. Large photo of N.A.S. Shamrock Maru (USS Shamrock Bay, CVE-84) 16. Large photo of flight deck with waves coming over the bow, caption is "Up Periscope" 17. Two pages of Roster of Officers and Men of VC-94 with their Leave Addresses 26. Back cover includes Thanks to those responsible for the book
2005.319.121	Deck School Log of the Naval Auxiliary Reserve	Byrne, William J. (ed)	A volume commemorating the achievements of the Deck Officers of the Naval Auxiliary Reserve in the World War. This short account of the activities of the Dekc Officers of the Naval Auxilary Reserve in the World War does not purport to be a dry recounting of facts, ponderously arranged in chronological order or written for historical purposes. Neither is it possible to relate in detail the countless brave and heroic acts performed by the invidiual members of our organization. Instead this volume is in the nature of word pictures, classifying the progressive stages of training at Pelham and on the sea and depicting scenes familiar and common to all.
2005.319.123	Patrol Squadron Eight Sixty	Whitmer, Don R. (ed)	Cruise book (though no ships

Object ID	Title	Author	Summary
	One - The Cruise		involved, if any, are named) for Patrol Squadron Eight Sixty One (VP-861) which flew Lockheed P2V Neptunes out of their base at Naval Air Station Jacksonville, Florida. Describes operations between September 1950 and November 1951.
