2005.319.129	US Naval Air Station, Norfolk, VA - 1952	None Stated	Naval Air Station, Norfolk, VA with Frontispiece Collage and pic of Naval Air Station Barracks U-16. Captain John D. Lamade, Force Training Officer; Vice Admiral John J. Ballentine; Captain Fitzhugh Lee, Commanding Officer; and G. M. Clifford, Executive Officer. History - the station lies on the port of Hampton Roads and is the greatest military concentration in the world being one of the strongest forces for national security. NAS patrols the seas for our nation and allies. From 1910 to 1952 naval history has been made here. Experimentals flights, including lighter-than-air, and tests and instructions in navigation, gunnery exercises and aerial bombing continued after the Armistice of November 11, 1918 with the curtailing of aviation activities. 1923 project of setting up an arresting device to train pilots for deck landings materialized under Captain Washington Irving Chambers, USN. the USS Langley, a converted collier, was used for landings. The international Schneider Cup air races could be seen from there in 1926. By the attack on Pearl Harbor the station was partially completed with new land plane field, hangars, sea plane operation base, new barracks, A&R, and supply facilities. Famous air groups from the Wasp, Ranger, Yorktown and the Hornet had trained at Norfolk. Rosters of photos included in different departments.

			US Navy with letter from Louis Richardson Vail, Captain, Commanding stating that the mission is to train officers and men for duty on the Merchant Vessel Fleet which has required changes during the past three years that the enemy has changed its methods of attack and we have developed new ways of defeating those attacks. The school at Shelton is the oldest and largest established in October 1941 training thousands to protect merchant shipping ships including cargo carriers, tankers and troop ships. they are a fight branch of the navy.
2005.319.135	Composite Squadron Sixty-Three Cruise Book, August 1944 - October 1945	Anderson, Norman J. (ed)	Cruise Book for Composite Squadron Sixty-Three (VC-63) covering the period from August 1944 to October 1945 aboard the Casablanca class escort carrier USS Natoma Bay (CVE-62). (USS Kitkun Bay (CVE-71) also mentioned.). Contains the Pilot's Psalm, author unknown. The Lord is my pilot, I shall not crash. He maketh me to fly in clear skies. He leadeth me down to smooth landings; he keepeth my charts. He guideth me through the pathless skies for His name's sake. Yea, though I fly through the storms and the tempest of life, I shall dread no danger, for Thou art near me. Thy love and Thy care, they protect me. Thou preparest an airport before me in the homeland of eternity. Thou emblazoneth the skies with Thy Beauty; my plane, flies gracefully. Surely sunlight and starlight shall favor me on the flight I take, and I will abide in the presence of my G-d forever.
2005.319.136	US Naval Auxiliary Air Station, Cabaniss Field, Corpus Christi, TX - 1954	None Stated	Yearbook for 1954 of the US Naval Auxiliary Air Station at Cabaniss Field, Corpus Christi, Texas. FOREWARD: To All Hands at NAAS Cabaniss Field In great measure the reason we have Naval Aviation as we know it today is because of the vision and untiring efforts of those early pioneers in Naval Aviation.

Object ID	Title	Author	Summary
			Commander Cabaniss, the 36th Naval Aviator, was one of those early pioneers who had the vision to see the part Naval Aviation must play in order for the Navy to fulfill its mission; and one of those who dedicated his life toward that end. I think it very appropriate that a station whose mission it is to train new Naval Aviators should carry the name of such an individual and I'm very proud to serve at that station and to have a part in that work. Therefore, I sincerely hope that as you view this book, both now and in the future, it will revive pleasant memories of your tour of duty at Cabaniss and also make you proud that you, too, have the opportunity to contribute to the tradition of Naval Aviation. Very sincerely, E. R. EASTWOLD Captain, U. S. Navy Commanding Officer

2005.319.137	US Naval Air Station, Memphis, TN - 1955	None Stated	Navy Memphis, 1955, Rear Admiral Wendell Gray Switzer, Chief of Naval Air Technical Training; Captain Joseph C. Clifton, Commanding Officer, Naval Air Station Memphis; Captain G. R. Luker, Commanding Officer, Naval Air Technical Training Center; Commander Roger D. Hutchins, Commanding Officer, Naval Air Reserve Training Unit; and Captain H. L. Weaver, Commanding Officer, U. S. Naval Hospital. Photos of aircraft SNB and SNJ; FH-I Jet aircraft; buildings for training, the hospital, etc., It was first established in Chicago in 1942, moved to Pensacola then to Memphis in 1946. The Naval Air Station is the "housekeeping" and support activity for the Headquarters of the Chief of Naval Air Technical Training, the Training Center, and the Air Reserve Training Unit. It provides house and messing facilities for all

2005.319.214	USS Cambria (APA-36) - Mediterranean Memories - 1951-52	Gaudio, D. R.	A pictorial of the USS Cambria (APA-36) "Mediterranean Memories" Cambria was built by the Western Pipe and Steel Company at South San Francisco, CA. Completed in May 1943 as a US Maritime Commission type for the Moore McCormack Steamship Company. After the war Cambria was transferred from the Pacific Amphibious Force to the Atlantic and the US Navy resumed command of the ship in 1946. Cambria was recommissioned at Norfolk Naval Shipyard, Portsmouth, Virginia. Cambria is an ocean-going troopship adapted to transporting invasion forces ashore in their own fleet of landing craft. During their Mediterranean cruise from 2 September 1951 to 29 January 1952, she made ports of call at Oran, Algeria; Puerto Suedo, Sardinia; Naples, Italy; Valletta, Malta; Augusta Bay and Syracuse, Sicily; Golfe Juan, French Riviera; Suda Bay and Eraklion Bay, Crete; and Phaleron Bay, Greece. Photos throughout the book depict operations aboard ship and ashore.
2005.319.215	USS Butte (AE-27) - 1972-73	Dacey, F. L.	A pictorial of the USS Butte (AE-27) Kilauea-class ammunition ship. (Lonely Bull). One of the Navy's newest ammunition ships, her mission is to deliver missiles and ammunition to the fleet at sea, providing bombs, projectiles , missiles, torpedoes, mines and other expendable ordnance required by the Navy's combatant ships. She utilizes the newest transfer system, STREAM, which uses a ram tension wire enabling replenishment to two ships at the same time. During her January 1973 to July 1973 deployment from Norfolk, she traversed the Panama Canal

Object ID	Title	Author	Summary
			ups and downs in the personal life of the "Rippers." From birth at Quonset Point, Rhode Island, through days of adolescence and of coddling in Atlantic City and in the Hawaiian Islands, our conduct compared favorably with that of any other fighter outfit. We worked and played, our days of training were accomplished, and our manifest destiny was upon us. As Lt. Cmdr. "Butch" O'Hare's fighters, we, in November 1943, boarded the USS ENTERPRISE and steamed out of Pearl Harbor to receive our baptism of flak in the invasion of the Gilbert Islands. FIGHTING TWO's rapier sweeps cut an uninterrupted swathe from Makin to Manila, with pause enroute only long enough to transfer to the USS HORNET and to become its first fighter squadron. The Marshalls, Palau, Truk, Ponape, Hollandia on New Guinea, the Marianas, Bonin-Kazans, and Dutch East Indies — each in its turn was swept aside, until one day we reached Manila. Our deliverance was at hand — Air Group Eleven was standing by at Manus Island, waiting to relieve us. Our dreams — and how we dreamed! — of Los Angeles, San Diego, Chicago, and the "Great White Way" of Li'l Ol' New York at last came true. On November 6, 1944, we arrived back in the good old USA, after 17 months of exciting, intimate adventures — the subject of this odyssey. LT. THOMAS L. MORRISSEY A.C.I. Officer, Fighting Squadron Two.

2005.320.001	King James Version Bible	King James	Hymns, New Testament, Psalms
2005.320.004	History of The American Sailing Navy, The	Chapelle, Howard Irving	This is the most comprehensive book ever to be published on the sailing men-of-war of the United States Navy. The sailing-ship era of our Navy was highly picturesque and most important. It was an era that saw the founding of the United States, its development as a naval and maritime power. The book presents a full story of the building of our sailing Navy from Colonial Times to the time of the last all-sailing man-of-war, built just prior to the Civil War. In this parade of ships pass those of glorious name, Constitution, Hancock, Confederacy, Washington, President, Essex and Constellation as well as other, smaller, nonetheless important sailing men-of-war.

Object ID	Title	Author	Summary
2005.320.006	U.S. Atlantic Fleet Regulations - 1946	USN Atlantic Fleet	1. The United States Atlantic Fleet Regulations, 1946, promulgated herein and effective upon receipt, supersede United States Atlantic Fleet Regulations, 1945, which shall be destroyed by burning without report. 2. It has been the aim, in preparing these Fleet Regulations, to restrict the contents to those matters which are of concern to the Fleet as a whole and to avoid the repetition of matters duly covered in Navy Regulations, except where interpretations or amplification has been deemed necessary. JONAS H. INGRAM, Admiral, U. S. Navy, Commander in Chief, United States Atlantic Fleet.
2005.320.007	Bluejackets' Manual, 1904	McLean, Ridley	From the days of oars and coal-fired engines to the computerized era of the twenty-first century, The Bluejacket's Manual has been an essential part of the American Sailor's sea bag for more than one hundred years, serving as an introduction to the Navy for new recruits and as a reference book for Sailors of all ranks. Primarily intended to serve Bluejackets, this book will also be welcomed by potential recruits, Navy buffs, and a growing number of Bluejacket's Manual collectors. (from www.usni.org)

			Typhoon Charlotte.
2006.113.004	Fighter : A History of Fighter Aircraft	Cooper, Bryan	FIGHTER is the third in a series of authoritative illustrated studies of war machines and equipment, designed to be easily comprehensible to layman and expert alike. Attractively presented and lucidly written they combine a wealth of information with striking visual clarity. The first title to be published in the series was Tank: A History of the Armoured Fighting Vehicle by Kenneth Macksey and John Batchelor; the second was Artillery by Ian Hogg and John Batchelor. Next will be Bomber. (from back cover)
2006.113.005	Campaign for Guadalcanal, The	Coggins, Jack	The first in a new series of books recreating the most famous battles of all time, The Campaign for Guadalcanal is an in-depth account of the crucial struggle that marked the turning point of WWII in the Pacific. Before it was over upwards of 26,000 men died there, and the many rusting hulls of sunken ships gave the once peaceful waters of the landing beaches a new name -- Ironbottom Sound.
2006.113.006	Airwar, Vols. 3-4 : Outraged Skies/Wings of Fire	Jablonski, Edward	From the hard-fought air, land and sea struggle for Guadalcanal that marked the first step on the road back from Pearl Harbor through the three long years of island-hopping that set the stage for the final American victory. Outraged Skies traces the early development of the air war in the Pacific. The concluding volume of "Airwar" Chronicles the last days of the Third Reich and the collapse of the Japanese Empire. This book is two volumes of a four volume set. Titles of these two are : Outraged Skies and Wings of Fire.
2006.113.007	Airwar, Vols. 1-2 : Terror from the Skies/Tragic Victories	Jablonski, Edward	Illustrated history of air power in WW II. Volumes 1 and 2 of 4 volume set. Covers start of WW II through late 1943.
2006.113.010	Iranian Rescue Mission,	Ryan, Paul B.	The unfortunate Operation

Object ID	Title	Author	Summary
	The : Why It Failed		"Eagle Claw" in April 1980 remains a vivid example of what kind mistakes should someone avoid in planning and executing a commando raid. The US war machine took many things (like helicopter serviceability) for granted, it made terrible mistakes regarding the inter-service security measures and failed to take into account the serious meteorological conditions of the central Iranian deserts. The result was utter failure, the loss of eight aircraft and eight lives, but the problems encountered, although doomed the Carter administration helped the USA to shape a better relation between the government and the military in 1986. Paul Ryan gives many details of the operation "Eagle Claw" and explains in great length the reasons behind every decision taken. He also unfolds the operation itself and presents the interesting findings of the Holloway committee after the failure. (from Amazon.com)
2006.113.011	Naval Aviator's Guide, The	Cagle, Malcolm W.	A guide for the young naval aviator making the transition from his training command to his first fleet assignment.
2006.113.012	Tonkin Gulf Yacht Club : U.S. Carrier Operations off Vietnam	Francillon, René J.	The crews of the U S carriers and air wings deployed off Vietnam dubbed themselves the "Tonkin Gulf Yacht Club," and this book by a renowned aviation historian fully documents their record in that war in South East Asia. Beginning with an overview of carrier operations from 1964 until 1973. the book then details the experience of USS Coral Sea, the carrier that spent the most time in action. This approach permits the reader to understand the wider historical context of the war, while appreciating exactly how the naval air war seemed to those most closely involved. Tabular information includes listings of carriers. their air

			wings/air groups, combat aircraft inventories, monthly activity levels. monthly sorties. and much additional information that is new to published works. The reference value of the book is further enhanced by extensive appendices detailing the combat roles of every attack and antisubmarine warfare carrier. Dates of deployments, composition of air wings, and air combat victories and losses, with the names of the air crews. are all listed. Finally, an aircraft appendix covers relevant fixed-wing aircraft and helicopters, including which units operated them, from which carriers, and during which period. (from dust jacket back)
2006.113.013	Breakout : The Chosin Reservoir Campaign	Russ, Martin	On General Douglas MacArthur's orders, a force of 12,000 U.S. Marines were marching north to the Yalu river in late November 1950. These three regiments of the 1st Marine Division--strung out along eighty miles of a narrow mountain road--soon found themselves completely surrounded by 60,000 Chinese soldiers. Despite being given up for lost by the military brass, the 1st Marine Division fought its way out of the frozen mountains, miraculously taking their dead and wounded with them as they ran the gauntlet of unceasing Chinese attacks. This is the gripping story that Martin Russ tells in his extraordinary book. Breakout is an unforgettable portrayal of the terror and courage of men as they face sudden death, making the bloody battles of the Korean hills and valleys come alive as they never have before. Publication Date: May 1, 2000 Amazon.com Review Martin Russ's controversial book Breakout: The Chosin Reservoir Campaign, Korea 1950 tells the riveting story of how 12,000 Army personnel

Object ID	Title	Author	Summary
			and Marines fought their way out of an encirclement by more than 60,000 Chinese soldiers. A Marine wounded in combat during the Korean War, Russ writes with a passion for the men who endured freezing temperatures and scaled treacherous mountains while continuing to strike the enemy as they advanced toward safety. While many accounts of modern war bog readers down in a morass of military and administrative details, Russ's history so clearly distinguishes the various units, locations, and personalities that shaped the campaign that it could easily be compared with the finest novels of battle, including Michael Shaara's <i>The Killer Angels</i>. Expertly moving between American, Chinese, and Korean points of view, Russ argues that the Marines were trapped at Chosin because of the arrogance of Douglas MacArthur, the incompetence of the U.S. Army, and the disciplined planning of the Chinese generals. Celebrated for his brilliant war memoir, <i>The Last Parallel</i>, Russ has provoked criticism for his tendency in <i>Breakout</i> to disparage the U.S. Army. However, his quotations of numerous dispatches showing Marine commanders' concern about advancing into the Chosin area, as well as his consistent portrayal of Army officers' ineptitude, lend credence to his argument that it was the particular esprit de corps of the Marines that prevented the disintegration of American forces in the freezing wastes of North Korea. --James Highfill -- This text refers to the Hardcover edition. From Publishers Weekly In the annals of American heroic stands against long odds, Chosin Reservoir stands with the Alamo and Bataan with the bonus of a happy ending. Russ (<i>The Last Parallel</i>) has written the definitive account of the

Object ID	Title	Author	Summary
			1st Marine Division's epic breakout from the Chosin Reservoir in the winter of 1950. Outnumbered, unsupported and isolated in the depths of winter, 12,000 Marines, surrounded by 60,000 Chinese soldiers, cut their way out of encirclement and fought a path to the sea, bringing out most of their wounded and many of their dead with them. Small wonder, then, that Chosin Reservoir is celebrated as a victory by the Corps. Russ weaves the Marines' stories into a compelling tapestry of understated heroism, showing how the 1st Marine Division owed much to officers and senior NCOs with combat experience in WWII and the force of character to lead teenage riflemen from the front. Cohesion, as well as courage and tactical skill, brought the Marines out of Chosin. Time and again, those whom Russ interviewed stress the overriding importance of not letting down other Marines, no matter the cost. Russ relies heavily and appropriately on the accounts of Marines who fought at Chosin. The result is that there is a lot of detail, a lot of close-up recollections of localized battle, but Russ does an admirable job, when necessary, of panning back to give readers a picture of the whole campaign. 2006.302.002	RF-8 Crusader Units over Cuba and Vietnam	Mersky, Peter B.	(from ospreypublishing.com:) About this book Although the Crusader was built first and foremost as a Navy interceptor, as has often been the tradition with US fighters, a photo-reconnaissance variant was also produced by Vought. The photo-bird's first operational test came in the autumn of 1962 when its overflights of Cuba alerted the world to the likely presence of medium-range ballistic missiles on the Caribbean island. The recce Crusader's next action came during the long years of the Vietnam War. This volume is the second of two in the Combat Aircraft series devoted to the Crusader, the first title (again by Peter Mersky) having covered the F-8 fighter variants, and their MiG-killing exploits, during the Vietnam War. Contents * Introduction * Cuban Crisis * Early Operations in

2006.302.006	Bombs, Torpedoes and Kamikazes	Lambert, John W.	All pictures show scenes of air action with captions that, as nearly as possible, identify the date, locale, and describe the event or subject. In every case they show real battle action that occurred between 1941 and 1945. They graphically portray the many facets of aerial combat in World War II.
2006.302.007	Low Level Attack : The Pacific	Lambert, John W.	A-20s and B-25s over New Guinea. Evolution of the Strafers. AAF Fighters The Navy Afloat and Ashore The Lone Rangers
2006.302.010	God Was at Midway : The Sinking of the USS Yorktown (CV-5) and the Battles of the Coral Sea and Midway	Linzey, Stanford E.	The book is a personal account of one young sailor at the Battle of the Coral Sea and later the Battle of Midway. The USS Yorktown (CV-5) was damaged at the Battle of the Coral Sea, hurriedly repaired so that she was able to participate in the Battle of Midway, where she was further damaged and sunk on June 4, 1942. "We were only three miles from land--straight down! And that is where our great aircraft carrier still rests today as a tomb for some 400 hundred of our friends whose lives so suddenly ended on that tragic day." This account is "not so much a war story as a personal testimony of the goodness and grace of God."
2006.302.011	Pushing the Envelope : The Career of Fighter Ace and	Carl, Marion E.	From Publishers Weekly Carl's life story is the stuff of

Object ID	Title	Author	Summary
	Test Pilot Marion Carl		film scripts and TV miniseries. At Midway and Guadalcanal he became the first Marine ace of WW II. He was a test pilot in the pioneer days of jet aviation, flying early versions of almost every model of fighter adopted by the U.S. armed forces and flew clandestine reconnaissance missions over China in the 1950s. More than a pilot with the "right stuff," Carl, as a brigadier general, commanded the first Marines to land in Vietnam; in 1973 he retired as Inspector General of the Marine Corps. Unfortunately, Carl's cursory, lifeless narrative reads like a collection of after-action reports. Even the collaboration of Tillman, a leading aviation writer, fails to give Carl's career its appropriately dramatic impact. Photos not seen by PW. Copyright 1994 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. From Kirkus Reviews A blunt, spare autobiography from a past president of the American Fighter Aces Association. Carl neither minces nor wastes words in recalling a distinguished career as a US Marine Corps aviator, which began immediately after his 1938 graduation from Oregon State and ended 35 years later when he retired with the rank of major general. Having earned his wings in 1939, the author (now 78) was an early- bird arrival in WW II's Pacific theater. Flying F4F Wildcats in the unfriendly skies above Midway and Guadalcanal, he downed 16 Japanese planes. Sent stateside to be showcased as the USMC's first ace, Carl wooed and won his wife (then a Powers model). He survived a second tour in the Solomons, adding two more kills to his victory total, and ended the war as a test pilot. Adapting easily to the jet age, the author set a variety of altitude and speed records that (though long since broken) attest to his willingness to push the envelope, i.e., take

Object ID	Title	Author	Summary
			experimental aircraft (and, it would seem, his own convictions) to, even beyond, their theoretical limits. He led photoreconnaissance flights over Red China in the mid-1950s and logged more than 100 missions in Vietnam. In the course of his lengthy service, Carl met and took the measure of many notables. While he remembers Joe Foss, Melvin Laird, Charles Lindbergh, and a host of lesser lights with fondness, the author has precious little use for Greg (Pappy) Boyington (of Black Sheep Squadron fame), Jacqueline Cochrane, LBJ, Ted Kennedy, Robert McNamara, and John Wayne. In a series of parting shots, moreover, he offers considered, if politically incorrect, pronouncements on gun control, the handling of the Tailhook sex scandal, women in combat, and other touchy issues. The dead-honest memoir of an accomplished military professional. The forthright text has 13 contemporary photos. -- Copyright ©1994, Kirkus Associates, LP. 			Mixson in particular. Includes a picture of Cdr Riley Mixson with his A-7B while serving as XO of VA-215 Barn Owls. (from ospreypublishing.com:) About this book Arriving on station with the USS Ranger (CVA-61) in early December 1967, the first Corsair II squadron became operational immediately and sustained its first combat loss three weeks later. This book tells how the A-7 soon proved its worth supporting ground operations in South Vietnam. As it continued to serve in the ground support role, the navy swiftly introduced the A-7E which soon ran into difficulties with supply lines - perhaps on account of what many perceived to have been a rushed introduction to service. Once these teething problems were resolved, the A-7E became the primary air-to-ground aircraft of the fleet. Contents The A-7 · Introduction to Combat, 1967-1968 · Mid-War Slowdown, 1969-1970 · Linebackers and Other Sportsmen, 1971-1975 Paperback; September 2004; 96 pages; ISBN: 9781841767314

2006.302.014	Hellcat Aces of World War 2	Tillman, Barrett	(from ospreypublishing.com:) About this book Grumman's successor to the pugnacious Wildcat, the Hellcat embodied many of the lessons learnt by F4F pilots in the opening months of the Pacific war. Introduced to the fleet in January 1943, and blooded in combat against the Japanese by VF-5 seven months later, the F6F served as the principal US Navy fighter on board carrier decks until VJ-Day. Despite its lethality in the air when ranged against the best Japanese fighters, it still retained docile handling qualities around the carrier deck. Pilots flying the Hellcat claimed nearly 5000

2006.302.015	Shattered Sword : The Japanese Story of the Battle of Midway	Parshall, Jonathan	Making extensive use of untapped Japanese primary sources, including Imperial Navy operational records never before used by Western authors, the authors reconstruct the actual sequence of the critical events of June 4, 1992, looking afresh at the decisions of the U.S. and Japanese Commanders, and placing them within the seldom-understood context of the Imperial Navy's doctrine and technology. This book is a substantive contribution to our understanding of the Battle of Midway.
2006.302.016	Corsair Aces of WWII	Styling, Mark	The speed with which the Corsair was rushed into service as a land-based fighter obliged the pilots to learn on the job. The aircraft soon proved to be superior to the Japanese Zero and played a major part in the destruction of Japan's elite air forces in the South Pacific. Later, in an effort to counter the Kamikaze threat, the Corsair was once again hurriedly pressed into service; this time in its originally intended role as a shipboard fighter. This versatile aircraft saw service with the US Navy and Marines, the British Fleet Air Arm and the RNZAF. Most of the 4FU pilots who recount their experiences within these pages considered it to be the best all-round fighter in the Pacific theatre. (from ospreypublishing.com;) Contents

2006.302.017	Wings of Gold	Dorr, Robert	Every young boy wants to be a fighter pilot. Some want more. They want to be a Navy fighter pilot. Navy pilots are one step above, supermen who launch their F-14 Tomcats off the pitching deck of the Enterprise to go hunt MiGs. Years go by, eyes go bad and most of those boys grow up to be lawyers, construction workers or accountants. (from back cover:) Before you can strap into that Tomcat, you've got to earn your wings, Navy wings of gold. If you've ever wondered if you had the right stuff to be one of these supermen, this book is for you.
2006.302.018	Japanese aircraft : code names & designations	Mikesh, Robert C.	From ABDUL to ZEKE, this handbook covers all Allied designations for Japanese Navy/Army aircraft of WWII. Each aircraft is presented alphabetically according to its code name, and is also cross-referenced to its official (long) designations and project (short) designations. (from schifferbooks.com)
2006.302.019	Aces 3	Patton, W. Wayne	Chronicles the exploits of dozens of fighter pilots from around the world dating from WW I to the Vietnam era. Includes full color profiles, and B&W drawings. 64 pgs. Includes: NORTH AMERICAN P-51-D-20 MUSTANG; LOCKHEED P-38J-15 LIGHTNINGVOUGHT F4U-1A CORSAIR; FM-2 WILDCAT; F6F-5

2006.302.022	Wildcat Aces of World War 2	Tillman, Barrett	(from ospreypublishing.com:) About this book Arguably the most important piston-engined single-seat fighter design ever to see service with the US Navy and Marine Corps, the aesthetically inelegant F4F Wildcat achieved much acclaim during its bloody frontline career. Thrown into combat at Coral Sea, Midway and Guadalcanal, the handful of Wildcat units of the Navy and Marine Corps took on large numbers of fighters and bombers and came out victorious. On the European front, the Royal Navy's Fleet Air Arm also put the fighter to effective use from escort carriers, protecting Atlantic convoys from Luftwaffe attacks. Contents * Pre-War Naval Aviation and Early Campaigns * Midway * Guadalcanal * On the Offensive * Torch and Leader * The Eastern Wildcat * Fleet Air Arm * Training * Victory Credits and Wildcat Evaluation * Appendices Paperback; April 1995; 100 pages; ISBN: 9781855324862

2006.302.026	Illustrated History of McDonnell Douglas Aircraft : From Cloudster to Boeing, The	Badrocke, Mike	(from back cover:) In 1920, Donald Douglas was advised that if he was really serious about getting into the plane game, he should team up with a man called Bill Boeing in Seattle, who seemed to know what he was doing. Mr Douglas wasn't convinced and struck out alone. 77 years

Object ID	Title	Author	Summary
			later, the massive empire that he had helped to build was taken over by Boeing in the biggest deal in aviation history. In the meantime, McDonnell Douglas would produce several of the most important military and commercial aircraft ever to fly: and some of the best-loved, not least the immortal DC-3. Following the spectacular success of the daring, stressed-skin twin-engine DC-1, the company would build 40,000 aircraft in WWII, and from there - the Skyhawk, DC-4 to 10, Globemasters, Cargomaster, Voodoo, Eagle, Phantom, Hornet - what a history, what a company. With close technical analysis from Bill Gunston and artist Mike Badrocke's meticulous cutaway drawings, presented to best effect on fold-out pages, this volume tells the complete story of one of the few truly great aircraft builders.

2006.302.029	US Naval Aviation - 1946-1999	Bowman, Martin W.	This book presents a pictorial account of the changing role of US naval aircraft since the end of the Second World War. Focusing on the aircraft and the personnel who fly and

Object ID	Title	Author	Summary
			service them, the book features a huge range of different aircraft types--from the FD-2 Phantom (the first US pure jet to land aboard an aircraft carrier) to the F-14 Tomcat and F/a-18 Horent. The book contains more than 200 phtogrpahs from official US Navy archives and private
2006.302.031	Wings of Neptune : The Story of Naval Aviation	Macintyre, Donald G. F. W	The author tells of the creation of the greatest striking force in the history of naval warfare--the United States Carrier fleet and of the consequent turning of the tide at Midway and in the Coral Sea. He tells the early story of the development of air defense in the first World War.
2006.302.032	Curtiss SB2C Helldiver	Smith, Peter C.	The massive Curtiss SB2C Helldiver was designed to replace the ageing Douglas SBD Dauntless and became the most famous monoplane dive-bomber built by the company. The first large order for the USN was placed on 19 Nov 1940, three weeks before the ill-fated prototype first flew. Serious problems and subsequent design changes delayed the project, and deliveries began only in Dec 1942. The type did not reach operational effectiveness until Nov 1943, with its debut against the Japanese base of Rabaul in the south Pacific. Includes: Stillborn: The Australian Experience -- Strangled: The British Experience The Helldiver in the Fleet Air Arm -- The Philippine Sea -- Leyte Gulf South China Sea to Iwo Jima -- Okinawa -- End of the Road: Japan Flying the Helldiver: The American Experience A War of Attrition: The French Experience.
2006.302.033	Doolittle Raid 1942, The : America's First Strike back at Japan	Chun, Clayton K. S.	(from ospreypublishing.com:) In early 1942, the strategic situation was bleak for the United States. She had been in continual retreat since Pearl Harbor, surrendering major areas such as the Philippines,

Object ID	Title	Author	Summary
			and was preparing for the worst in Hawaii and on the West Coast. The Japanese, on the other hand, had secured a well-defended perimeter, and was set for further expansion. Something needed to happen quickly and be of considerable impact—and the combined-arms, April 1942 Doolittle Raid on Japan was a way to achieve this. This book examines the planning, execution, and aftermath of this innovative, daring and risky attack, which would show that the Japanese navy and air forces were anything but invincible.
2006.302.034	Pearl Harbor 1941 - The Day of Infamy	Smith, Carl	There are five editions of this book as of March 2021: July 1999, August 1999, April 2000, September 2001, and February 2004. We have one copy of the 1999 and two copies of the 2001. December 7, 1941 was one of the single most decisive days of World War II - the day that brought the USA into the fight. Six Japanese aircraft carriers disgorged their full complements in two waves on the superior US Pacific Fleet as it lay slumbering in Pearl Harbor. Depending on opposing viewpoints, the attack was either a brilliant maneuver of audacious strategy, or a piece of unparalleled villainy and deception by a supposedly friendly power. This revised edition, containing the latest research on the events of December 7, 1941, reveals several previously unknown aspects of the attack and dispels key myths that have been built up around the fateful day - a day, Franklin Delano Roosevelt declared, that would live in infamy. Contents * Introduction * Opposing Commanders * Chronology * The Japanese Plan * The First Wave * The Second Wave * Aftermath

Object ID	Title	Author	Summary
			* Further Reading * Visiting Pearl Harbor * Appendices * Index Paperback; September 2001; 96 pages; ISBN: 9781841763903 (from ospreypublishing.com:)
2006.302.035	To Be A U.S. Naval Aviator	Stout, Jay A.	Fly along with the next generation of highly motivated naval aviators for primary flight instruction in T-34Cs, T-37Bx, and T-6As, then move on to more dynamic and stressful training in helicopters, jets, and multi-engine turboprops. learn to hover a TH-57, and how to make a challenging all-weather approach to a ship. Practice engine-out emergencies, or patrol low over the Gulf of Mexico aboard the twin-engine T-44. Become schooled in dropping bombs, and train for air-to-air combat where you'll learn when to strike and when to disengage to fight another day.
2006.302.036	Battle of the Coral Sea	Henry, Chris	The Battle of the Coral Sea is still in some ways overshadowed by the major encounters that punctuate the Pacific War such as the Midway, which took place immediately afterward and has been endlessly studied. Yet the Coral Sea is probably the more interesting of the two as it illustrates what happens when two roughly equal sides with similar technology fought a battle for which there was no known precedent.
2006.302.037	Launch the Intruders : A Naval Attack Squadron in the Vietnam War, 1972	Reardon, Carol	Contents: F troop -- Temporary additional duty -- Would you believe? -- A piece of cake -- Into the badlands -- A very real life indeed -- On a treadmill -- Got an ace hit -- Peace is at hand -- Lord, guard and guide the men who fly -- Oh, Christmas tree, oh, Christmas tree.
2006.302.038	Above an Angry Sea : United States Navy B-24 Liberator and PB4Y-2 Privateer Operations in the Pacific, October 1944-August 1945	Carey, Alan C.	(from schifferbooks.com:) Above an Angry Sea chronicles USN B-24 Liberator (PB4Y-1) and PB4Y-2 Privateer operations in the Pacific. The author's previous book, We

Object ID	Title	Author	Summary
			Flew Alone, discussed the Navy's use of the B-24 Liberator from February 1943 to September 1944. He now examines in dramatic detail the use of the B-24 and PB4Y-2 during the last eleven months of the war against Japan. The author has collected personal stories, over 200 photographs, a tabulation of all aerial kills credited to PB4Y patrol plane commanders, a roster of all personnel killed in action or in the line of duty, individual squadron records, and a list of all known B-24 Liberators and PB4Y-2 Privateers assigned to the Pacific between 1943 and 1945.
2006.302.039	CVX : A Smart Carrier for the New Era	Davis, Jacquelyn K.	Security planning for new uncertainties -- Smart carrier for the RMA world -- New operational concepts and employment considerations -- Forward engagement after the Cold War -- Navy operational synergies and joint planning -- Integrated independence of operations -- Leveraging technology for CVX -- Why CVX? Why now?
2006.302.040	Battle of Leyte Gulf, The : The Last Fleet Action	Willmott, H. P.	The battle of Leyte Gulf was the greatest naval battle in modern history. This book is a detailed and comprehensive account of the fighting from both sides on 24-25 October 1944. It provides the context of the battle, most obviously in terms of Japanese calculations and the search for "a fitting place to die", as well as a comprehensive discussion of the event leading up to and following the battle.
2006.302.041	O-1 Bird Dog in Action	Adcock, Al	Chosen by the U.S. Army in 1950 to replace its aging fleet of L-4 and L-5 aircraft, the Cessna L-19/O-1 Bird Dog (sometimes birddog) was the first all-metal high-wing aircraft to serve the Army. Over 3,000 of these aircraft were built in 5 different models, also serving the U.S. Navy, Marine Corps, and Air Force in the liaison, training, and observation roles, with many supplied to foreign nations. More than 100

Object ID	Title	Author	Summary
			photos, 10 color profiles, black-and-white line drawings, color covers. 50 pages, soft cover, landscape format. Originally published 1988. During Operation Frequent Wind, a Cessna O-1 Bird Dog flew over the USS Midway on 30 April 1975 and dropped a note. Eventually the plane landed on the Midway and a South Vietnamese Air Force officer and his wife and 5 children landed on the Midway. There is an exhibit of this on the Hangar Bay.
2006.302.042	Marine Dive-Bomber Pilot at Guadalcanal, A.	McEniry, John Howard	This book chronicles the wartime experiences of the author, who served as a Marine Corps pilot in the South Pacific during World War II. Colonel McEniry describes in this book the organization and deployment of a Marine dive-bombing squadron in the early days of the war and follows the squadrons into actions in November and December of 1942, including the battle of Guadalcanal.
2006.302.043	T-28 Trojan in action	Adcock, Al	Developed as a replacement for the U.S. Air Force's legendary T-6 Texan, the T-28 proved to be as versatile, serving both the USAF and U.S. Navy in the primary, basic, advanced, instrument, and carrier qualification training roles for 30 years, and, rebuilt with strengthened wings, serving as a counter-insurgency aircraft in Southeast Asia, Africa, and Central and South America. More than 100 photos, 10 color profiles, black-and-white line drawings, 50 pages, Originally published 1989. Al Adcock; Don Greer; Joe Sewell. SS1089 \$12.95 (from squadronsignalpublications.com)
2006.302.044	Carrier Victory : The Air War in the Pacific	Lindley, John M.	When Japan bombed Pearl Harbor, it was history's biggest surprise attack, and it began an entirely new kind of war--one on which naval battles would

Object ID	Title	Author	Summary
			be fought from the air instead of of the surface of the sea. The Japanese had struck the first blow, and for a time they seemed unstoppable. But the Americans learned quickly. Aircraft Carriers were the backbone of the Navy now, and in May 1942 , in the Battle of the Coral Sea, American flyers operating from flattops halted Japan's march of conquest. It was the first naval battle ever in which the opposing ships never sighted each other. Meanwhile there had been a daring and morale-boosting air raid on Tokyo, carried out by ordinarily land-based bombers operating from a carrier. U.S. Carrier forces sank more than 3 million tons of Japanese merchant shipping. Carrier forces hit the Japanese Navy the knockout blows. They made the great island invasions possible.
2006.302.045	Imperial Japanese Navy Aircraft Carriers 1921-45	Stille, Mark	The Imperial Japanese Navy was a pioneer in naval aviation, having commissioned the world's first built-from-the-keel-up carrier, the Hosho. Throughout the 1920s and 1930s, the IJN experimented with its carriers, perfecting their design and construction. As a result, by the time Japan entered WWII and attacked the US at Pearl Harbor in 1941, it possessed a fantastically effective naval aviation force. This book covers the design, development, and operation of IJN aircraft carriers built prior to and during WWII. Pearl Harbor, Midway, and the battle of the Coral Sea -- the first carrier vs carrier battle -- are all discussed.
2006.302.047	USS Ranger : The Navy's First Flattop From Keel to Mast, 1934-46	Cressman, Robert J.	USS Ranger (CV-4) was the US Navy's first aircraft carrier to be built as such from the keep up. Ranger helped maintain the FDR administration's Good Neighbor Policy, served as a platform for the development of new methods for the operation of carriers and carrier aircraft, continued the Navy's work in cold-weather flight operations, pioneered director-controlled antiaircraft fire, and trained

Object ID	Title	Author	Summary
			many naval aviators. During WWII, Ranger occupied center stage in Operation Torch (against the Vichy French positions in North Africa in 1942) and in Operation Leader (against German shipping in 1943), the Navy's only carrier operation above the Arctic Circle during the war. Cressman combines exhaustive research in official records and numerous never-before-seen photographs to examine the human side of life on board an aircraft carrier.
2006.302.048	Grumman Aircraft Since 1929	Francillon, René J.	Although Grumman does not rank among the oldest United States aircraft manufacturers, having been founded in 1929, within a decade it was playing a vital role in supplying outstanding naval aircraft, and during the Second World War some 40 percent of the Royal Navy's carrier-based aircraft were also supplied by Grumman. In its early period Grumman produced a series of high-performance biplanes with retractable undercarriages but soon progressed to monoplanes, with the Wildcat, Hellcat and Avenger making important contributions to the Allied cause — particularly in the Atlantic and Pacific theatres. After the war Grumman further enhanced its position with naval jet fighters such as the Panther and Cougar. In more recent years the company has produced aeroplanes for almost every navy task requiring fixed-wing aeroplanes. In parallel with its high-performance naval aircraft Grumman developed its range of amphibious flying-boats, the Widgeon, Goose, Mallard and Albatross, which have seen worldwide civil and military service. For the business world Grumman produced the propeller-turbine Gulfstream

Object ID	Title	Author	Summary
			and its jet-powered successors, while its Ag-Cat biplanes have filled an agricultural role. Rene J Francillon's book traces the development and service histories of all Grumman's aircraft from the earliest FF and SF biplanes up to today's F-14 Tomcat and the experimental X-29 with its forward-swept wing. A wide range of Grumman design projects is included. Production lists and hundreds of photographs and drawings complete this outstanding review of one of the world's great aircraft manufacturers and its products. Cover illustration: An original painting by Dugald Cameron of Grumman TBF-1s of VT-8 US Navy before the Battle of Midway in June 1942. (from dust jacket flap)
2006.302.049	Hook Down, Wheels Down	United States. Navy Department	This is an exciting history of U.S. carrier aviation at its best. It begins with the first aircraft carrier, the Langley, and then shows battles of Midway and Coral Sea. It also shows hot naval air action off the Coast of Korea during the early years of the Korean War. Interviews with famous retired naval aviators bring personal insight to this historical presentation. You'll see SB-2C's, TB2-2's, F-6, F-4, F, F-4 11, Corsairs, lots more naval planes, great footage, mostly color, except for the older pre-World War II films. Classic pieces of naval aviation history, e.g. B25 launches, Lexington carrier sinking, Kamikaze suicide raids. Color, narrated, 58 min.
2006.302.050	Douglas SBD Dauntless	Smith, Peter C.	Despite its slow speed, the Douglas SBD Dauntless was referred to by its crews as Slow But Deadly - such was its accuracy as a dive-bomber causing considerable damage to the Japanese fleet. This is an illustrated guide to the aircraft and its gallant crews.

2006.302.052	21st Century Complete Guide to U.S. Navy Aircraft Carriers	Navy Department	NOTE: This appears to be data harvested from military sites on the internet. There are 5 very short .mov files, but only one will open in Windows 7. This incredible CD-ROM provides a comprehensive guide to aircraft carriers operated by the U.S. Navy. Today's Nimitz-class nuclear-powered carriers are known as the powerhouse of the Navy fleet, over 1000 feet long and carrying about 85 aircraft. They are the largest warships in the world. Forward presence by U.S. Navy aircraft battle groups helps protect our overseas interests as well as encouraging peace and stability around the globe. Nuclear Aircraft Carriers support and operate aircraft to engage in attacks on targets afloat and ashore which threaten our use of the sea and to engage in sustained operations in support of other forces. Every aspect of the carrier and the aircraft is covered in this detailed material, which is heavily illustrated with color photographs, drawings, tables, and charts. Nimitz class carriers are the USS Nimitz (CVN 68), San Diego, CA; USS Dwight D. Eisenhower (CVN 69), Newport News, VA; USS Carl Vinson (CVN 70), Bremerton, WA; USS Theodore Roosevelt (CVN 71), Norfolk, VA; USS Abraham Lincoln (CVN 72), Everett, WA; USS George Washington (CVN 73), Norfolk, VA; USS John C. Stennis (CVN 74), San Diego, CA; USS Harry S. Truman (CVN 75), Norfolk, VA; USS Ronald Reagan (CVN 76) (under construction; George H.W. Bush (CVN 77) (under construction). Earlier carriers still in active status: USS Enterprise, USS John F. Kennedy; USS Constellation; USS Kitty Hawk.

Object ID	Title	Author	Summary
			Topics covered include: * History of the Aircraft Carrier, beginning with the USS Langley (CV-1) * List of All U.S. Navy Carriers * Space recovery for the early American space program splashdowns * The Forrestal Fire, 1967 - Heroes on the Deck * F/A-18 Hornet, F/A-14 Tomcat, EA-6B Prowler, S-3 Viking * Phalanx Close-in Weapons System * Commander, Naval Air Force, US Atlantic Fleet and Pacific Fleet * Carrier Air Wings * Photographs of the ongoing construction of the USS RONALD REAGAN at Newport News, VA - the ninth Nimitz class nuclear carrier, leading to the last Nimitz class (USS George HW Bush) and the next generation known as CVNX-1. The Carrier Replacement Program provides for the new construction of aircraft carriers. Currently, there are twelve active carriers in the Navy's fleet. Eight of these are Nimitz class carriers. An additional Nimitz class carrier is currently under construction, the USS Reagan (CVN-76), and will deliver in March 2003 to replace the Constellation (CV-64) which will retire in FY 2003. The last Nimitz Class carrier, CVN-77, was awarded to Newport News Shipbuilding in January 2001 and is scheduled to deliver in March 2008. CVN-77 will also serve as the "bridge" platform for technologies that will enable the Navy to transition from the Nimitz class to the next generation aircraft carrier (CVNX). CVN-77 will include new technologies such as an integrated topside island which includes a new multi-function radar, new propulsion plant monitoring improvements, and manpower reduction initiatives. Over 10,000 pages are reproduced using Adobe

2006.302.063	Vietnam Experience, A : Ten Years of Reflection	Stockdale, James B.	Vice Admiral James Bond Stockdale (December 23, 1923 – July 5, 2005) was one of the most highly decorated officers in the history of the United States Navy. Stockdale led aerial attacks from the carrier USS Ticonderoga (CVA-14) during the 1964 Gulf of Tonkin Incident. On his next deployment, while Commander of Carrier Air Wing 16 aboard the carrier USS Oriskany (CV-34), he was shot down over enemy territory on September 9, 1965. Stockdale was the highest-ranking naval officer held as a prisoner of war in Vietnam. He was awarded 26 personal combat decorations, including the Medal of Honor and four Silver Stars. During the late 1970s, he served as President of the Naval War College. (from Wikipedia)
2006.302.064	Walk Around A-4 Skyhawk	Drendel, Lou	Introduction: "Scooter," "Ford," "Tinker Toy," "Bantam Bomber," "Heinemann's Hot Rod." All were nicknames for the Douglas A-4 Skyhawk. But an even more appropriate appellation, bestowed by Skyhawk pilots, is "The Ferrari Of Airplanes." The A-4 Skyhawk is one of the most successful modern combat aircraft ever built. The Skyhawk If ^ou howl production run spanned 25 years, during which 2,960 were built and operated by the U.S. Navy and Marines as well as the Air Forces of Australia, New Zealand, Israel, Malaysia, Argentina, Singapore, Brazil, Indonesia, and Kuwait. The Skyhawk was conceived during a time of burgeoning carrier jet operations. Unlike many of its contemporaries, it was designed from the outset as a lightweight attack aircraft. (The Skyhawk was developed in tandem with the A-3

Object ID	Title	Author	Summary
			Skywarrior, a twin-engine bomber with a maximum take-off weight of 82,500 pounds compared to the A-4B's maximum of 22,500 pounds.) In the early 1950s, most of the Navy's carriers were of World War II vintage, and smaller, lighter, more maneuverable aircraft were an absolute operational necessity. In January 1952, Ed Heinemann, chief engineer of the Douglas El Segundo Division, met with Rear Admiral Apollo Soucek, representing the Chief of the Naval Bureau of Aeronautics (BuAer). Heinemann proposed a new, lightweight, jet-powered attack airplane. On 12 June 1952, BuAer issued a contract for the prototype, specifying a maximum speed of 500 mph, a 460-mile operating radius, a 2,000-pound bomb capacity, and a maximum cost of \$1 million per aircraft. The XA-4D-1 beat the speed requirement by a wide margin, and the first 500 production aircraft were produced at a cost of \$860,000 each. Review of the basic design resulted in a further order for 19 A-4s in October 1952. Naval aircraft designations prior to 1962 included references to the mission and manufacturer. Thus the Skyhawk was designated A4D-1: A (attack) 4 (fourth aircraft from this manufacturer under the new designator) D (Douglas) -1 (first example of the type.) After 1962, the designators were simplified, and the A4D-1 became the A-4A, the A4D-2 became the A-4B, and the A4D-2N became the A-4C. The latter was designed with minimal all-weather equipment, including an autopilot, all-attitude gyro system, low altitude bombing system, terrain clearance radar, and angle of attack indexer. From 1969 to 1972, 100 A-4Cs were upgraded to A-4L configuration for Naval Air

			The A4D-5, later designated A-4E, was equipped with the lighter, more powerful Pratt & Whitney J52-P6A engine. It had a redesigned fuselage center section and inlet ducting, two additional wing hard points, and upgrades to the navigation and weapons systems. The A-4F added nose wheel steering, wing lift spoilers, and the Escapac 1-C3 ejection seat. The humpback avionics pod of the A-4F was eventually retrofitted to all A-4Es, and 100 of the A-4Fs were retrofitted with the more powerful J52-P408 engine, becoming "Super Foxes," and 18 of these became the eventual mount of the Blue Angels. Two-seat Skyhawks were built beginning in 1964. Designed as trainers, they were ultimately used in a wide variety of missions, including forward air controller (FAC), utility, and aggressor missions. TA-4E, F, and J versions were built.
			Front Cover: VA-46 pilot Lt. Cmdr. John S. McCain III stands in front of his assigned A-4E Skyhawk, BuNo 149996/AA-416, aboard USS Forrestal in July 1967. The son and grandson of career Navy officers, Lt. Cmdr. McCain was shot down over North Vietnam and spent six years as a prisoner of war. He was later elected to the United States Senate from Arizona. The Skyhawk was destroyed in the Forrestal fire of July 29, 1967.

2006.302.067	Battle of Midway	None Stated	The Battle of Midway (Romaji: Middowe Kaisen) is widely regarded as the most important naval battle of the Pacific Campaign of World War II. Between 4 and 7 June 1942, only six months after Japan's attack on Pearl Harbor, and one month after the Battle of the Coral Sea, the United States Navy decisively defeated an Imperial Japanese Navy (IJN) attack against Midway Atoll, inflicting irreparable damage on the Japanese fleet. Military historian John Keegan has called it "the most stunning and decisive blow in the history of naval warfare." The Japanese operation, like the earlier attack on Pearl Harbor, sought to eliminate the United States as a strategic power in the Pacific, thereby giving Japan a free hand in establishing its Greater East Asia Co-Prosperity Sphere. The Japanese hoped that another demoralizing defeat would force the U.S. to capitulate in the Pacific War. The Japanese plan was to lure the United States' aircraft carriers into a trap. The Japanese also intended to occupy Midway as part of an

Object ID	Title	Author	Summary
			overall plan to extend their defensive perimeter in response to the Doolittle Raid. This operation was also considered preparatory for further attacks against Fiji and Samoa. The plan was handicapped by faulty Japanese assumptions of the American reaction and poor initial dispositions. Most significantly, American codebreakers were able to determine the date and location of the attack, enabling the forewarned U.S. Navy to set up an ambush of its own. Four Japanese aircraft carriers and a heavy cruiser were sunk for a cost of one American aircraft carrier and a destroyer. After Midway, and the exhausting attrition of the Solomon Islands campaign, Japan's shipbuilding and pilot training programs were unable to keep pace in replacing their losses while the U.S. steadily increased its output in both areas. (from Wikipedia)

2006.302.071	US Naval Aviator - 1941-45	Hargis, Robert	(from ospreypublishing.com:) About this book The US naval aviator of World War II played a pivotal part in the winning of the war. From the warm waters of the Pacific to the icy conditions of the Bering Sea (including the battle of Midway) , the Naval aviator was on hand to fight the enemy in any and all conditions. Between 1940 and 1942 the

Object ID	Title	Author	Summary
			training of the naval aviator lasted eleven months, divided into five separate and distinct phases. From phase one, known as the Elimination or E base for short, through to final assignment to a carrier based squadron, the training was demanding and unrelenting. This title examines the life and experiences of the US Naval Aviator in all three types of carrier squadron - fighters (VF), dive-bombers (VB) and the torpedo squadrons (VT). From recruitment to battle, the detail of what it was like to fly and fight for the US Navy is brought vividly to life. 2006.302.076	Air War Over Southeast Asia : A Pictorial Record Vol. 1 1962-1966	Drendel, Lou	Foreword: It is now some years since South Vietnam ceased to exist as a political entity. As those final, agonizing days of April, 1975 recede from memory, it has become fashionable to refer to the Vietnam War as the war that

Object ID	Title	Author	Summary
			we lost. That is a bitter choice of words, and one which is much too simplistic in view of the complex nature of our involvement in Indochina. Complex as the Vietnam War may have been, it was not unique in history, and the chronicles of war are filled with admonitions from some of the most famous warriors of the past which might have been written to fit our Vietnam experience. The Vietnam War is often referred to as a "political war", with the imlineation that the motives for involvement were unusual, or that the rules for fighting it were different. Karl von Clausewitz, in his famous treatise "On War" said; "War is nothing more than the continuation of politics by other means." The leadership on both sides of the Vietnam War understood this well. In the final analysis, it was their success....and failure....in rallying their respective constituencies to their policies that determined the outcome. Sallust, the Roman Historian and Pro-Consul to Julius Ceasar, in his Ilistory of the Jurgurthine Wars, said; It is always easy to begin a war, but 1a y difficult to stop one, since its beginning and end are not under the con-of the same man. Anyone, even a coward, can commence a war, but it be brought to an end only with the consent of the victors. The foreign policy architects of the Johnson Administration might not been students of Roman History, but they should hardly have failed to noted these famous remarks by one of the greatest Americans of the tieth Century. General Douglas MacArthur, in an address to the can Legion in 1952, had said; ...and in the formulation of such it is well that we understand that battles are not won by arms alone. must exist above all else a spiritual impulse — a will

Object ID	Title	Author	Summary
			to victory. This only be if the soldier feels his sacrifice is to preserve the highest moral And we should understand that once war is forced upon us, there is other alternative than to apply every available means to bring it to a swift War's very objective is victory — not prolonged indecision. In war, in-there can be no substitute for victory. Though our involvement in Vietnam was for the noblest of causes — to freedom for a nation that was threatened by a totalitarian state — the commitment to that cause was poorly — and in some cases, less than completely honestly articulated. While Lyndon Johnson was promising the American people that he would never send American boys to fight the battles of Asian boys, (during the Presidential Election campaign of 1964) plans were being made to do just that. When American boys did begin to fight and die in Vietnam, it didn't take long for cynicism about the war to spread. An oft-repeated joke of 1965 went; "They told me if I voted for Goldwater, we would get into a war. They were right. I did, and we are!" Archidamus III, the King of Sparta in the third century, B.C., said; War cannot be put on a certain allowance. Lyndon Johnson and Robert MacNamara presumed to know better. Ignoring the wisdom of the ancients, and the advice of contemporaries alike, they spent billions of dollars and thousands of lives on a gradual escalation of the war which only succeeded in convincing the enemy that we lacked the national will to use the full measure of our power. Homer, in the Odyssey said; It is not right to exult over slain men. But when political equivocation denied the military the opportunity to end the war quickly, but still

Object ID	Title	Author	Summary
			insisted on demonstrations of a gradual progress towards victory, the barbaric fraud of the body count became the scoreboard of the Vietnam war. Cicero said; The laws are silent in time of war. But American lawmakers effectively ended the Vietnam War by cutting the feet out from under the South Vietnamese when they were facing their greatest challenge. By refusing aid during the final cataclysmic communist assault in the spring of 1975, the United States Congress made evident their willingness to abandon South Vietnam. The politics of the Vietnam War had been handled as shabbily at the end as they were at the beginning. In these pictorial histories of the air war over Southeast Asia during the sixties and seventies, the people, the tactics, and the technology of that war will be emphasized. It will become evident that the fact that we lost the Vietnam War had little to do with our capacity to fight that war. Nor did we lose because of a lack of commitment by the troops, particularly in the early stages of the war, when President Kennedy's pledge to bear any burden, meet any hardship, support any friend and oppose any foe to assure the survival and success of liberty was still inspiration enough for those who would pay the ultimate price. It is my profound hope that these volumes will honor those who served honorably, for so little acclaim. But perhaps more importantly, they will help us to heed the words of George Santayana, who said; Those who cannot remember the past are condemned to repeat it. 2006.302.081	Forgotten Fighters and Experimental Aircraft - USN 1918-1941	Bowers, Peter M.	(from back cover:) ISBN 0-668-02404-6 Peter M. Bowers, 52, has been an aviation enthusiast since before Lindbergh flew the Atlantic in 1927. His collection of aeronautical documents was started in 1928, and now numbers in the thousands. While a student at the Boeing School of Aeronautics in 1940 he started an airplane photo negative collection that is now one of the largest in the world, containing nearly 50,000 individually-filed negatives. From 1942-1947, Pete Bowers served in the Army Air Force as an Engineering and Technical Intelligence Officer. He has been employed at the Boeing Company as an engineer since 1947. He learned to fly in 1948 and has accumulated more than 3,500 hours and several advanced pilot ratings. His first article was published in 1938 in a model airplane magazine. From that time on, the Bowers byline has become familiar on historical, technical and sport flying subjects in countless magazines as well as several complete books. In addition to writing and flying, he is active in many national organizations, including the American Aviation Historical Society, the Society of World War One Aero Historians and the Aviation/Space Writers Association. This volume is but the first Mr. Bowers has in preparation in the FORGOTTEN FIGHTERS series. The next will be a companion to this one, covering the lesser-known and experimental aircraft of the

2006.302.082	F/A-18 Hornet	Gunston, Bill	(from dust jacket flap:) Outwardly the F/A-18 programme is a straightforward and successful one: some journalists have even written as if the Hornet is the greatest fighter there has ever been - which it possibly is. Under the surface one finds many unusual features. The Hornet had its genesis in the Northrop YF-17, a lightweight land-based fighter. In turning it into the F/A-18, a carrier-based multi-role aircraft, almost every structural part was changed and the result is a larger aircraft, with different engines, totally new capabilities and more than doubled gross weight. Yet the casual observer, walking round the two aircraft, might be forgiven for saying their outward appearance looked almost identical. Behind this lies much argument, and indeed acrimony. How did a Northrop

Object ID	Title	Author	Summary
			aeroplane turn into a McDonnell Douglas aeroplane? Which company invented the Hornet? These may seem pointless and rather futile questions, but the author has served as an expert witness in one of the biggest industrial lawsuits in history, which so far has had curiously little exposure in the normally alert US media, and which was triggered off by the inadequacy of the deal the two companies actually struck. Fortunately they still, in between briefing the lawyers, continued
2006.302.083	F-18 Hornet : Multi-Mission Warplane	Shaw, Robbie	(from the Introduction:) The origins of the McDonnell-Douglas F/A-18 Hornet date back to the mid-1960s and the Northrop P530 Cobra lightweight fighter project, which eventually became the YF-17, and ultimately lost to the F-16 in the contest to provide the USAF with a new generation lightweight fighter. For Northrop this was a serious blow: not only did the company lose out on providing the USAF with well over 1,000 aircraft, but follow-on orders for a number of European NATO air forces planning to replace their ageing [sic] F-104 Starfighters also went to the General Dynamics product.
2006.302.084	Fighter Tactics and Strategy 1914-1970	Sims, Edward H.	Traces the development of the tactics and strategy of aerial combat through two world wars, the Korean conflict and the war in Vietnam; the pilots; and their aircraft.
2006.302.085	Attack Aircraft	Braybrook, Roy	"Attack Aircraft" takes a close look at the light and agile aircraft, including helicopters, dedicated to use in ground attack, close support, strike and anti-ship operations. It serves as a companion volume to "Supersonic Fighter Aircraft" and "Military Training Aircraft of Today" also by Roy Braybrook. An introductory chapter places the aircraft type in historical perspective and shows how

Object ID	Title	Author	Summary
			the tactical attack mission has been carried out from the beginnings of aviation history. Remaining chapters discuss today's attack aircraft internationally according to the various categories to which they belong, both operationally and as regards powerplant, turboprops as well as jets being covered. The categories include close support aircraft from the Rockwell OV-10 Bronco to BAe Hawk 200; ground attack aircraft such as the Douglas A-4 Skyhawk and the Sukhoi Su-17 Fitter, and including dual-role aircraft like the Dassault Mirage F1; and strike aircraft such as the Panavia Tornado, Saab-Scania AJ37 Viggen and General Dynamics F-111. Not forgotten are naval attack aircraft, and attack helicopters including the Huey Cobra, Agusta A.129 and Westland Lynx and the Russian Mi-24 Hind and Mi-38 Havoc. The author has described the technological development of each category including reference to weapons fit and has striven to show the problems involved in the design, selection and deployment of the aircraft in this increasingly important area of operations. Roy Braybrook graduated from Manchester University in 1954 and, having ambitions to design fighters, went to Hawker Aircraft as a post-graduate apprentice on a two-year course. After an interruption due to National Service (during which he spent most of his time on loan to the RAE at Farnborough) Roy returned to Kingston to become a senior project engineer in the HAL Project Office working under Sir Sydney Camm on the preliminary design of V/STOL combat aircraft, fighters and military trainers.

Object ID	Title	Author	Summary
			In 1968 he became head of sales support activities at Kingston, representing the design department in world-wide marketing efforts with the Harrier and, later, the Hawk, and then, when Hawkers became part of BAe under nationalisation, he was appointed technical marketing adviser to the Kingston-Brough Division. Roy Braybrook resigned in 1980 to become a freelance aviation writer and consultant, specialising in combat aircraft, V/STOL and trainers. He represents a number of overseas aviation and defence magazines in this country and writes one or two books each year. Front cover: One of the development batch of Italo—Brazilian AMX attack aircraft, illustrating the excellent field of view from the cockpit. (AMX International) Back cover: The BK 177 A-3M is a projected version of the MBB-Kawasaki multi-role helicopter, with 12.7mm chin turret, eight Hot—2 ATGWs and mast- and roof-mounted sights. 2006.302.089	Grumman F6F Hellcat	Zbiegniewski, Andre R.	"In this release, Kagero examines the operational history of the US Navy's air superiority aircraft during WW2, the Grumman F6F Hellcat. Published in both Polish and English, the author walks the reader through the initial design of the fighter through the highlights of its operational history, but starts off with VF-11's experiences just to get your interest. The coverage includes: Sundowners F6Fs; Nuts and Bolts; Great Balls of Fire Over Land & Sea; Zero's Worst Nightmare; Mount Fuji in Sight; British Hellcats; Camouflage & Markings. In addition to the operational history of the aircraft, the title has line drawings of the F6F in 1/48 and 1/72 as well as a nice color photo walk around. Coverage of this part ends with some excellent color profiles of the aircraft. (from ebookee.org)

2006.302.093	Naval Aviation Early 1950s	Traditions Military Videos	This dvd was purchased at www.militaryvideo.com. It contains two United States Navy Training films. The first is titled "CIC Communications in Air Intercept Control." It was produced by Wilding Picture Productions, Inc. in 1950. The second was titled "Recognition of Jet Aircraft," United States Navy Training Film MN 6898, 1951. It was produced by the U.S. Naval Photographic Center. There are four planes in the Recognition film: F9F Panther, F2H Banshee, F3D Skynight, and the F7U Cutlass. According to militaryvideos.com website, a third film is titled The Plane Captain. The focus is on the duties of the plane captain and his relationship with the pilot. It features the AD-2 Skyraider, and includes excellent details of the aircraft. However, our dvd does not have this segment.

2006.302.096	Navy Air Colors : United States Navy, Marine Corps, and Coast Guard Aircraft Camouflage and Markings Vol. 1, 1911 - 1945	Doll, Thomas E.	INTRODUCTION: Of all the facets of aviation history; painting schemes, national insignia, organizational markings, unit badges, and personal emblems are the most difficult to document. Specifications, Technical Orders, Letters, and Memoranda are basic sources of data. Photographs and personal recollections, while mostly supportive, are often contradictory and/or misleading, if not viewed as variations to the norm. Implementation of official directives issued by the Bureau of Aeronautics and Fleet and Force Commanders could take months to become effective. Unit custom and/or command prerogatives resulted in variations that were sometimes major in scope. Many of these will be noted in the text and photographically. From the procurement of its first aircraft in 1911, through World War One, Navy and

Object ID	Title	Author	Summary
			Marine Corps aviation was almost entirely coast based. Seaplanes (695) and flying boats (1,170) far outnumbered the 242 landplanes on hand on 11 November 1918. In general, color was basic and markings were simple. The slow but steady growth between the two World Wars took landplanes to sea aboard aircraft carriers and placed float planes on all battleships and cruisers. Continuing organizational changes were a natural result, with corresponding changes in color and markings. The tremendous expansion during World War Two brought major changes in painting schemes and for a time, a near disappearance of unit markings. In consideration of these variables, therefore, the authors have attempted to describe the evolution of the color schemes and markings carried by aircraft and airships of the United States Navy, Marine Corps, and Coast Guard from 1911 through 1945. In so doing, every effort has been made to correlate the "official" with the "visual" record and to resolve the many ambiguities thereby disclosed. 2006.302.098	Golden Age Remembered, The: U.S. Naval Aviation, 1919-1941	Wooldridge, E. T. (ed)	The book is divided into three parts: 1) Prelude to the Golden Age, 2) The Roaring Twenties, and 3) Expansion and Approach to War. The author provides an introduction to the three parts, but the 16 chapters are written by different individuals including: Vice Adm. Alfred M Pride, Capt. Tommy Tomlinson, and Admirals Jimmy Thach and Thomas Moorer.
2006.302.099	Midway and Guadalcanal	McGowen, Tom	Details the World War II battles between the Americans and the Japanese at the Pacific islands of Midway and Guadalcanal.
2006.302.100	Stand Well Clear : More Adventures in Military Aviation	Tooker, D. K.	Once again mixing the tragic with the hilarious, the dead serious with the absurd, D.K. Tooker portrays the daily drama of naval aviation in this his second collection of true stories. He writes a fine yarn about what happens when planes collide, gas gauges show empty, airfields are closed, or the right training manual hasn't yet been written. Tooker's fledgling aviators are funny and his seasoned fliers inspiring. People who fly will see themselves in these young heroes and hellions who flew for the U.S. Navy and Marines in Korea and Vietnam and Afghanistan. Everyone else

Object ID	Title	Author	Summary
			will enjoy sharing in unforgettable experiences, framed in history, that happen only to pilots. Among the most memorable stories is the recounting of a large air raid at Sinuiju, North Korea, when Tooker himself learned he was not bulletproof. D.K. Tooker, Lt. Col., USMC (Ret.), has flown more than seven thousand hours in Corsairs, supersonic jets, helicopters, and light planes. He is the author of The Second Luckiest Pilot and has written for Reader's Digest and numerous other magazines.
2006.302.101	Where Sea Meets the Sky	Agostinelli, Giampaolo	A photographic book as well, is based on the most modern US carrier during the maiden cruise, a baptism of fire in the hottest corner of the heart. A combination of torrid hot and cold blood of the pilots of the Carrier Air Wing Three deployed on the magnificent USS Harry S. Truman. PHO011000 Includes : Tom Cat Mig Killers (from Amazon.com)
2006.302.102	Flying Fleets : A Graphic History of U. S. Naval Aviation	Johnston, S. Paul	This book deals entirely with aviation activities in the US Navy. The US Army Air Corps plays an equally important role in the preservation of the fence lines that encircle areas vital to US interests in the Western Hemisphere. Neither could do its job without the other. The closest possible co-operation and co-ordination exists between the tactical and technical branches of the two Services.
2006.302.104	Blue Devils, The : US Navy & Marine Corps Aces of World War II	Styling, Mark	When America was plunged into war in the wake of the surprise attack on Pearl Harbor on 12-7-41, the first aircraft to take the fight to the Japanese were manned by naval aviators flying from Pacific Fleet aircraft carriers that had miraculously escaped the carnage in Hawaii. Escorting bombers attacking the Imperial Japanese Navy, a handful of

Object ID	Title	Author	Summary
			Wildcats succeeded in fending off attacks by the superior A6M Zero-sen fighter. This pugnacious Grumman fighter held the line in the Pacific until the arrival of better aircraft in the shape of the Corsair and Hellcat during 1943. Both types duly proved more than a match for their Japanese counterparts to the point where the Hellcat was dubbed the "ace maker".
2006.302.105	Last Chapter	Pyle, Ernie	Ernie Pyle was attached to the Navy early in 1945. In the Marianas first and then living with the boys who flew the B-29s over the Japanese homeland. Pyle was experiencing a side of war that was new to him. Next he joined an aircraft carrier on the invasion fo Okinawa. He made the landing with the marines and saw Okinawa secured. Then his luck ran out. A Japanese bullet killed Ernie Pyle on April 17th, 1945 on Ie Shima.
2006.302.107	Rise and Fall of the Aircraft Carrier, The	Ireland, Bernard	Man's greatest ingenuities, it is said, are dedicated to the arts of war. Through the ages, each new weapon is created as the ultimately unassailable one... until it is superseded. "The Rise and Fall of the Aircraft Carrier" traces the history of one such weapon from the early days when men and machines hurled themselves from temporary structures on the topsides of warships through to the toppling of the carrier from her proud position by the advent of the nuclear submarine. These "mobile airbases" have had a rich history and Bernard Ireland's text brings alive their achievements in the twentieth century. In the 1920s, the major fleets embarked on carrier construction at a rapid pace. Then, with hostilities, the carrier emerged as 'Queen of the Board' — moving at will to strike the enemy fleet at its base; to counter the hated U-boat — or to prove itself in

Object ID	Title	Author	Summary
			the massed attacks of the Pacific battles. Pearl Harbor, Coral Sea, Midway and Leyte showed it to be a weapon of infinite flexibility. This well—researched book brings the story up to the modern day with the passing of the great strike carrier moving a step nearer. Today, it is undergoing a radical metamorphosis. The new breed is likely to be a missile—armed warship with flight deck and hangar. Carefully chosen photographs, illustrations and maps, plus an authoritative text make "The Rise and Fall of the Aircraft Carrier" a fascinating account of a weapon which has left its mark on naval history. Front Cover: A symbolic view of the last of Britain's fleet carriers, 'Ark Royal' which retired at the end of 1978. 2006.302.108	NATOPS Flight Manual Navy Model A-1H and A-1J Aircraft	Chief of Naval Operations	The Douglas A-1 Skyraider (formerly AD) was an American single-seat attack aircraft that saw service between the late 1940s and early 1980s. It became a piston-powered, propeller-driven anachronism in the jet age, and was nicknamed "Spad", after a French World War I fighter. The Skyraider had a remarkably long and successful career,

Object ID	Title	Author	Summary
			even inspiring its straight-winged, slow-flying, jet-powered successor, the A-10 Thunderbolt II. It was operated by the United States Navy (USN), the U.S. Marine Corps (USMC) and the United States Air Force (USAF), and also saw service with the British Royal Navy, the French Air Force, the Air Force of the Republic of Vietnam (VNAF), and others. AD-6 (A-1H): Single-seat attack aircraft with three dive brakes, centerline station stressed for 3,500 lb (1,600 kg) of ordnance, 30 in (760 mm) in diameter, combination 14/30 in (360/760 mm) bomb ejector and low/high altitude bomb director; 713 built. AD-7 (A-1J): The final production model, powered by a R-3350-26WB engine, with structural improvements to increase wing fatigue life; 72 built. (from Wikipedia) Supersedes NAVWEPS 01-40ALF-1 dated 1 January 1961 changed 15 January 1964, and the NATOPS Manual dated 17 March 1964. (handwritten on CDs:) "A-1H/J Skyraider NATOPS manual, part 1 of 2" and "A-1H/J Skyraider NATOPS manual, part 2 of 2"
2006.302.109	Vought F4U Corsair	Bowman, Martin W.	The gull-winged F4U Corsair was one of the best American fighter aircraft of World War II. It's gull wing design provided clearance for the huge propeller used on this great airplane. It was flown by Navy and Marine fighters with great success against the Japanese. About the Author Martin W Bowman has been a regular contributor for many years to Flight International, Rolls Royce magazine and Aeroplane Monthly. He has written over 40 aviation

Object ID	Title	Author	Summary
			books and Vought F4U Corsair is his eighth in the Crowood Aviation Series. (from Amazon.com)
2006.302.110	F/A-18 Hornet	Braybrook, Roy	The US Navy has always demanded a lot from its aircraft due to the unique environment in which they operate. The cold steel of a carrier deck has separated exceptional designs from average ones in a clinical, yet effective way. One aircraft that has clearly made the cut is the McDonnell Douglas F/A-18 Hornet, a true all-rounder in both the fighter and the attack stakes. The "son" of the Northrop YF-17 Cobra, the Hornet grew both in weight and capability after being ordered by the Navy to replace the venerable Vought A-7 Corsair II. Now an integral part of the modern carrier air wing, the F/A-18 has dramatically increased the capabilities of fighter and attack squadrons already embarked aboard the Navy's 15-strong carrier fleet. Not all Hornets spotted in American skies are Navy property though, the "flying leathernecks" of the US Marine Corps having received their first F/A-18s at virtually the same time as the "blue water" force. Over a dozen USMC squadrons are now equipped with the versatile Hornet. Traveling further afield, Canada, Australia, Spain and South Korea have all chosen the F/A-18 to fulfill the fighter/attack requirements of their respective air forces past the year 2000. "F/A-18 Hornet" takes you aboard ship with a frontline Navy squadron as they patrol the barren expanses of the Atlantic, or takes you on a scrub skimming attack sortie over the parched wastelands of the "outback" with the Royal Australian Air Force. With 120 photographs

2006.302.112	Elite of the Fleet, The : A Guide to the Embroidered Emblems Worn by Naval Aviators, 1927 to present - Vol. 1	Morgan, J. L. Pete	"Much of the American public first gave serious notice to naval aviation following the highly successful cinematic release of Top Gun in 1986. In reality, of course, naval aviators had already been playing a starring role of their own in faraway battle zones for decades. One major contributing factor to this sustained display of performance throughout the world is the strong unit identity cherished by navy fliers. Pete Morgan's new book, The Elite of the Fleet, Volume 1, is a dazzling photographic chronicle of the unit patches that symbolize aviation. While not claiming to be the mythical 'complete' guide to aviation patches, The Elite does show over 800 of them, magnificently photographed in full color. Carefully organized by type of unit, the 90 color pages average about 9 patches each. Whether you're an aviator, collector or historian, you'll find The Elite of the Fleet, Volume 1, to be a great reference and an absorbing pageturner." J. McPherson • Lancer Militaria (from dust jacket flap)
2006.302.113	MiG Killers of Yankee Station	O'Connor, Mike	The story of the United States Navy's "Top Guns" in combat during the Vietnam War, MiG Killers of Yankee Station recounts each and every air battle in which a Navy pilot from an aircraft carriers assigned to Yankee Station in South China Sea downed a MiG of the North Vietnamese air force. Meticulously and splendidly illustrated with over 370 black and white and color images, MiG Killers is an album

2006.302.114	U.S. Marine Corps Aviation Unit Insignia, 1941-1946	Millstein, Jeff	(from http://www.turnerpublishing.com.) Category: Veteran's Books Marine Corps History Description: Uniformity instills group pride when Marines are in dress uniforms. Similarly, the display of squadron insignias instill unit identification which supplements their pride in the Corps. The results is one proud Marine! More than a hundred full color insignias from 1941-1946, along with their history, the insignia's artist, unit nicknames and dates of activation. Plus full color and black and white photographs of the men who served in these units. Author Jeff Millstein has spent an exhaustive amount of time perfecting this outstanding edition suitable for the toughest Marine and the most experienced collector. 128 pages, 8 1/2" x 11" Hardbound
2006.302.115	Wings for the Navy : A History of the Naval Aircraft Factory, 1917-1956	Trimble, William F.	One of the largest naval aviation installations in the US, the Naval Aircraft Factory (NAF) in Philadelphia was a major player in the development of naval flight from World War I until well into the jet age. In this book, the author traces the NAF's unique history as the only government-owned and -operated aircraft production facility in the country. He fully assesses its help in the development of long-range flying boats for World War I, catapults and arresting gear between the wars, and pilotless aircraft and guided missiles during and after World War II.

2006.302.117	Cactus Air Force, The : The Story of the Handful of Fliers Who Saved Guadalcanal	Miller, Thomas G.	"Cactus" was the U.S. Navy code name for the Guadalcanal operation. There, for the first time, the Americans invaded a Japanese-held island and for four bloody months balked repeated Japanese attempts to drive them out. the key to American success was the Cactus Air Force.
2006.302.118	History of United States Naval Aviation	Turnbull, Archibald D.	This books is a plain-spoken story--based on official sources--of how a handful of devoted young men fought a long and wearisome war against those who thought of the plane as an interloper, a preposterous challenger of the power of the great warship. It tells how the the crusade was fought on every front, how the battle against technical obstacles was as hardly won as that over the minds of many in places of high authority. There are fascinating glimpses of the early days of flying, of men in box kites and flying crates, of the dirigibles and balloons, of the first carriers and catapults, of the bombing by hand, and the flights that went wrong. Twenty five pictures of early planes. Four pictures of early carriers and a seaplane.
2006.302.119	US Navy : West Coast Warriors	Hall, George	The heart of the Navy's air combat evaluation programme on the West Coast beats at Point Mugu 40 miles north of Los Angeles. Here Navy test pilots, including VX-4 'Evaluators' and VX-5 'Vampires', wring the bugs out of each new generation of fleet warplanes, marrying them to new weapons systems under the perfect conditions of a fully-instrumented 35,000-square mile range facility. The Tomcats and Hornets stalk 'smart drones' . . . and wired-up Sabres and Phantoms, flown by shirtsleeve pilots on the deck through the responses of 'Ensign Nolo' in the cockpit - and Nolo doesn't always lose! Apart from the colourful denizens of the Pacific

Object ID	Title	Author	Summary
			Missile Test Center, respected aviation photographer GEORGE HALL and his colleagues have captured a fascinating gallery of other Navy types in and around Mugu, which is home to more than 20 Reserve units operating increasingly sophisticated inventory. Here are Hornets of VFA-305 'Lobos', alongside the extraordinary ski-equipped LC-130R Herks of the Antarctic support squadron; Orion patrol ships of VP-65 `Tridents', and the Navy's latest combat support HH-60 choppers of HCS-5 `Firehawks' fresh from the Gulf; and a wide range of other residents and `drop-ins', from ANG C-130s to Corsair taxis and Gulf-proven A-6 'mud-movers'. His book takes you from the computer centers, out onto the ramp, and up into the busy skies for Colour, Data and Detail. Published in the USA by Specialty Press UK price £9.95 US price \$17.95 Printed in Singapore by Craft Print Pte Ltd Also known as Pt. Mugu

2006.302.120	Grumman A-6 Intruder	Dorr, Robert F.	Following a rainstorm into Hanoi with a full load of bombs, or delivering a precision-guided message to Colonel Khaddafl in the dead of night, the Grumman A-6 Intruder is a unique warplane with a special story. Nearly thirty years old now, the Intruder remains the only carrier-based attack aircraft which can penetrate an enemy's defences and strike his heartland in the worst of weather, in the black of darkness. The EA-6B Prowler carries out a difficult mission of equal importance, confounding an enemy's radars and jamming his communications. Robert F Dorr's saga of the trials and triumphs of the A-6 Intruder and EA-6B Prowler reveals new secrets about this

Object ID	Title	Author	Summary
			well-known but little-understood aircraft. The author pored through historical records at the Grumman plant to learn how Larry Mead and his design team created the Intruder, then went to the test centre at Patuxent and to the carrier America to learn how men fly it Intruder and Prowler pilots, crew members and maintenance people contributed their stories to this history. The military enthusiast will find that the Intruder doesn't just fly, it also fights. The full story of the Intruder and Prowler in combat is covered in this comprehensive account of a mighty Grumman aircraft in peace and war. Illustrated with approximately 160 black and white photographs (many previously unpublished), and 12 photographs in full colour, GRUMMAN A-6 INTRUDER contains nearly 50,000 words of text. A glossary, appendices and an index are also included. (from back cover)
2006.302.121	Grumman F-14 Tomcat : Bye-Bye Baby....!	Parsons, Dave	For thirty-five years of active naval service, the Grumman F-14 Tomcat has served as the foremost air superiority fighter of the cold war with continuing service as a fighter-bomber in the Gulf Wars. It is this service and the two hundred thousand sailors, both pilots and "ground" crew, who served in F-14 squadrons with the Tomcat over the years. This book is a grand remembrance of this great aircraft by those who flew it. Hundred of pilots have included their favorite stories of the missions and plane that brought them home. Two hundred exceptional color photographs show the F-14 on the deck, in the air and over the sea.

2006.302.123	Aircraft Carriers	Ireland, Bernard	Full title: Aircraft carriers : an illustrated history of aircraft carriers of the world, from Zeppelin and seaplane carriers to V/STOL and nuclear-powered carriers, featuring over 170 aircraft carriers with 500 identification photographs (from Amazon.com:) A comprehensive country by country visual directory of all the major aircraft carriers, with an informative and expert text describing the construction, appearance, function and history. About the Author Bernard Ireland has a lifelong interest in naval history and development, having spent 30 years in ship research for the Admiralty in the Royal Naval

Object ID	Title	Author	Summary
			Scientific Service. He has also worked as an illustrator for the shipping industry, producing artist's impressions and technical cutaways for companies such as Canadian Pacific and Blue Star Lines, and has produced illustrations for the Port of London Monthly and technical posters for the Science Museum, South Kensington. He is the author of over 25 specialist naval books, together with major partworks and journals on the history of ships.
2006.302.124	Douglas AD Skyraider	Smith, Peter C.	Douglas AD Skyraider tells the remarkable story of a remarkable aeroplane. This big piston-engined dive-bomber was designed at the end of WWII and saw service in Korea and Vietnam where its capabilities became legendary. Its rugged construction and load-carrying capabilities made it ideal for a wide variety of tasks and ensured its longevity.
2006.302.125	United States Combat Aircrew Survival Equipment : World War II to the Present : A Reference Guide for Collectors	Breuninger, Michael S.	(from schifferbooks.com:) A detailed study of United States Air Force, Army, Army Air Force, Navy, and Marine Corps aircrew survival equipment. Items covered are: survival vests, leggings, and chaps, life preservers, survival (ejection) seat and back pad kits, personal survival kits and first aid kits, etc. Tag and label information is provided for each item.
2006.302.126	WWII : US Navy & Japanese combat planes	Christy, Joe (ed)	WWII in the Pacific revolutionized all the rules of sea warfare. The old sea dogs that had dominated US Navy planning for 150 years were forced to admit that the day of the battleship had ended...the aircraft carrier became new queens of the oceans. From the morning of Pearl Harbor, it was clear that control of the sea belonged to whomever dominated the air above it. If you are interested in aviation or military history, this exciting volume gives you an authentic, hard-hitting account of WWII

			Pacific Theater aircraft, the tactics they employed, and all about the men who flew the combat missions --- in the words of the aces themselves!
2006.302.127	Markings of the Aces, Part 2 : US Navy	Hill, Richard	Markings of the Aces. Airplanes include : F6F-3; HELLCAT; TBM-3E; F4U-4; WILDCAT; CORSAIR; HELLDIVER;
2006.302.128	Blue Steel : The US Navy Reserve	Hall, George	Contains chapters on the following airplanes: F-14 Tomcat -- F/A-18 Hornet -- A-7E Corsair -- A-6E Intruder -- EA-6B Prowler -- E-2C Hawkeye -- P-3C Orion -- SH-3H Sea King and HH-60H Seahawk -- C-9B Skytrain II -- KA-3B Skywarrior and A-4F Skyhawk.
2006.302.129	Grumman Biplane Fighters in Action	Dann, Richard S.	Grumman pursuit (fighter) biplanes
2006.302.130	Walk Around EA-6B Prowler	Michaels, Joe	The need for Electronic Warfare aircraft developed after WWII with the rapid development and proliferation of sophisticated guided weapons. The EA-6A was put into service in the 1960s, and served in Vietnam, but, it was clear the EA-6A was only a stopgap, and that a greatly expanded version was needed. This resulted in the EA-6B, which entered service in 1971. This title gives inside and out coverage of fuselage, wings, tail, cockpits, engines, landing gear, and more. Illustrated with over 83 b/w and 118 color photos, 12 color drawings, 5 b/w drawings. Michaels; 80 pages. SS5535 \$16.95 (from squadronsignalpublications.com)
2006.302.131	Aircraft of the US Navy - Air Forces of the World, Vol. 1	None Stated	Aircraft covered: Vought F-8 Crusader, McDonnell Douglas F-4 Phantom II, Grumman F-14 Tomcat, McDonnell Douglas A-4 Skyhawk, Grumman A-6 Intruder, Vought A-7 Corsair II, North American RA-5 Vigilante, Grumman S-2 Tracker, E-1 Tracer, C-1 Trader, Lockheed S-3A Viking, Lockheed P-3 Orion,

2006.302.132	V-2 Ballistic Missile - 1942-52	Zaloga, Steven J.	(from ospreypublishing.com:) About this book The German A-4 ballistic missile, better known by its propaganda name of V-2, was the world's first successful ballistic missile, breaking through the atmosphere to reach its target quicker. It was a forerunner of Cold War ballistic missiles and its combat use in 1944-45 set the pattern for the use of Scud ballistic missiles in recent decades. The V-2 offensive lasted from September 1944 until March 1945 with over 3,000 rockets being launched. This book examines the combat record of the V-2 in World War II, with a special focus on how a German missile battalion actually prepared and fired its missiles. Contents Introduction · Design and Development · Operation History · Variants · Colour plate commentary Paperback; August 2003; 48 pages; ISBN: 9781841765419
2006.302.133	Walk Around F6F Hellcat	Dann, Richard S.	The F6F Hellcat was the US Navy's primary fighter during late WW II. It shot down more Japanese aircraft than any other fighter. This volume gives a pilot's eye view of the Hellcat covering details seldom seen in other publications. 80 pages, 40 in color, over 200 photos. SS5509 \$16.95 (from squadronsignalpublications.com)

2006.302.134	History of Naval Aviation, The	United States. Naval Photographic Center.	High-flying video about the first 50 years of naval aviation. Meet some of aviation's pioneers and learn the history of flight through the eyes of the brave men who lived and made it! Included is actual footage of the Wright Brothers' first public test flights at Ft. Meyers in 1908 and rousing filmed accounts of World War I and World War II air battles fought over the Atlantic and South Pacific. Learn the ways in which airplane designs changed through trial and error to streamline efficiency--making room for the fighting and rescue aircraft flying the skies today!
2006.302.135	Battle of Midway : The Battle That Turned the Tide of The Pacific War	Smith, Peter C.	For six staggeringly successful months the Imperial Japanese Navy had swept all before it, her ships and aircraft devastating American and British resistance. The Japanese, led by Admirals Yamamoto and Nagumo, seemed invincible. Until Midway. If the Japanese could take the tiny atoll of Midway, the Pacific would be theirs. So, on the 4th of June, began the most decisive sea and air battle of the second World War.
2006.302.136	Midway	Bicheno, Hugh	In May-June 1942, Admiral Yamamoto, architect of the attack on Pearl Harbor, implemented a plan for the Imperial Japanese Navy to seize the Island of Midway and thus lure the U.S. Navy into a decisive carrier battle. Their plan was a disaster and their defeat altered once and for all the balance of power in the Pacific. The author explains the cultural reasons behind the disastrous Japanese strategy, and tells the story of the battle which finally put a halt to their advance across the Pacific
2006.302.137	Victory at Midway	Coale, Griffith Baily	On August 8, 1941, Coale received a commission as a Lieutenant Commander in the Naval Reserve working as a Combat Artist for the Office of Public Affairs. He was assigned to Pearl Harbor where he saw the wreckage and did a series of illustrations based

			upon the reports of eye-witnesses. While at Pearl Harbor, he saw troops training for the invasion of Miday. He asked permission to visit Midway on June 2nd and arrived there on the morning of June 7th. "Sketching all day and fascinated in the evening by listening to first hand experiences from many different sectors of the battle, the five days on Midway flew by with the speed of a skimming sea bird."
2006.302.138	Miracle At Midway	Mercer, Charles	Recreates the naval battle between Japanese and American forces which was the decisive factor in the Pacific theater during World War II.
2006.302.139	Eject! : The Complete History of US Aircraft Escape Systems	Tuttle, Jim	Parachutes -- Basic ejection seats -- Early U.S. manual ejection seats -- Unusual escape methods -- Automatic ejection seats -- Ingenuity and valor: the perfect ejection -- Downward ejection seats -- Multi-mode escape systems -- Jettisonable noses -- Semi-ejection seats -- Special aircraft ejection seats -- Supersonic fighter challenges -- Encapsulated ejection seats -- Crew escape modules -- Ejection seats by manufacturer -- The future: save the entire aircraft?
2006.302.140	Battle of Midway, The	Werstein, Irving	Here is a straightforward report of those tense days of June 4-7, 1942, with the United States Pacific Fleet almost hopelessly outnumbered by the enemy in strength, numbers, and experience. This is the story of the grave errors men can make in war because they are human, and of the heights of courage men can achieve. The Battle of Midway changed naval warfare, and the authors' presentation of the battle, from the Japanese viewpoint as well as from the American, makes a story that leaves the reader breathless and awed.
2006.302.141	Midway 1942	Grove, Philip D.	The Battle of Midway was one of the most famous naval encounters in history. Midway was decisive because it witnessed a clash of two fleets in the center of the Pacific in

Object ID	Title	Author	Summary
			June 1942 the outcome of which was to change not merely the course of the Pacific War, but also technology, naval warfare in general and, politically both America and the Pacific Ocean.
2006.302.143	US Navy Carrier Air Groups, Pacific, 1941-45	Francillon, René J.	This book traces the combat histories of the US Navy carrier air groups that operated in the Pacific Theatre of World War 2. Major aircraft types are all covered, and their missions are detailed. Aircraft markings and aircrew uniforms are shown in full colour illustrations. BIOGRAPHICAL NOTE Michael Roffe is a talented illustrator of military subjects who has worked for Osprey for many years. (from https://ospreypublishing.com/us-navy-carrier-air-groups-pb) OSPREY/AIRWAR (is) A series of books written and illustrated by leading military aviation specialists, building into a connected history of the operations of the world's major combat air forces - the men, the missions, the machines, the marking. For full list of titles, see last page of text. Avec annotations en francais sur les planches en couleur Mit Aufzeichnungen auf deutsch uber die Farbtafeln ISBN 0 85045 291 0 (from back cover)
2006.302.144	Vietnam Air Warfare - The Story of the Aircraft, the Battles, and the Pilots Who Fought	Dorr, Robert F. (ed)	To the pilot sitting hot, sweating, and uncomfortable in the cramped cockpit of a warplane over Vietnam, it was simple. Controversy was left behind on the ground and now it was a matter of battling against an elusive and deadly enemy. Bravery, fighting skill, and the quality of his warplane were paramount. It was all that stood between victory or death.

Object ID	Title	Author	Summary
			And in that cauldron of combat, great men and great aircraft became legends. Robin Olds led his men to triumph over North Vietnam's MiGs. Younger men, like Randy Cunningham and Willie Driscoll, put skill and superior training to devastating effect as they flew their F-4 Phantoms over Hanoi to become the first aces of the war. Against the North, giant Boeing B-52 bombers pulverized the Ho Chi Minh Trail and Hanoi, alongside fighter-bombers like the F-105 Thunderchief, the A-4 Skyhawk, and the A-6 Intruder. RF-101 Voodoo reconnaissance planes made daring low-level forays, while Phantoms and F-8 Crusaders flew from land bases and carriers. In the South, it was different. Vietnam saw the first large-scale use of helicopters in combat, flying troops into battle and rescuing downed pilots. Tactical jets unloaded millions of pounds of ordnance against Viet Cong positions. Aging propeller-driven fighters and bombers, like the awesome AC-130 Spectre gunship, flew a counterinsurgency war. "Vietnam Air Warfare" documents this most fascinating period in the history of military aviation, a struggle which defined and shaped today's aerial combat. Profusely illustrated with photographs, three-view color technical drawings, and profiles, "Vietnam Air Warfare" presents a complete picture of a quarter of a century of aerial combat in Southeast Asia. (from dust jacket flap)
2006.302.145	Battle Off Midway Island	Taylor, Theodore	An account of the June, 1942, air battle between American and Japanese forces which proved a decisive defeat for the Japanese and the turning point of the war in the Pacific.
2006.302.146	Battle of Midway, The	Healy, Mark	This is a reprint of

Object ID	Title	Author	Summary
			2005.302.198 with two additional pages on Wargaming but no index. The earlier book has an index. This book discussed the Japanese mind-set as to their failure to give the United States the credit to resist their advances. It tells of the failure of intelligence to warn the Japanese of the United States opposition to their plans. It compares those plans together with opposing Commanders, Naval air arms and describes the battle and the aftermath. Midway 1942 Also published as Campaign 30 Midway 1942.

2006.303.014	Air Combat II, Vol. 2 : Vietnam : Combat from the Cockpit	Friedman, Adam	Through riveting, action-packed battle footage and compelling narration, Air Combat II explores the astonishing events that depict America's first century in the skies. Combining archival and original footage, history comes alive through the feats of those whose exploits in the air changed the way wars are fought from WWI to Desert Storm. This 13-part series is hosted by Monte Markham. The air war over Vietnam saw a whole new range of planes come into their own. The F-4 Phantom became the first plane to be utilized by the Navy, Air Force and Marines. The behemoth B-52 ran long-range, high-altitude bombing runs that would have been impossible in WWII or Korea. COMBAT FROM THE COCKPIT allows you to experience the conflict through the eyes of those who fought it. (from slipcase rear)

2006.303.016	Three Wars of the Battleship Missouri	History Channel (Television network)	Join us for a review of the incredible 51-year career of BB-63 the battleship Missouri which fought in WWII the Korean War and Desert Storm. The crew that served on her last voyage could have been grandchildren of the men who fought on her first. Though this behemoth should have been a relic after WWII she was continually upgraded making her a formidable first-line warrior to her final day in commission. Launched in 1944 she was the last battleship built and the last in service. But her most enduring image came in 1945 when the Allies accepted Japan's surrender on her deck in Tokyo Bay. Now a national monument in Pearl Harbor preserving the details of that historic day we step aboard with some of the great men who served in her during the long career of this icon of U.S. naval history. DVD Release Date: October 28, 2008 Originally broadcast on the History Channel in 2004. (from Amazon.com)
2006.303.018	Navy Air Combat	Dickstein, Joseph	On MIG Combat Air Patrol, two Navy F-14 Tomcat Interceptors fly protectively along with a pair of F/A-18 Hornets. The Tomcats' radar scans for enemy MIGs fighters while the Hornets are laden with "smart laser-guided bombs." Their target--a chemical weapons missile site. Suddenly, warning alarms sound off as fast moving incoming blips fill the Tomcats' radar screen. The F-14s dive at supersonic speeds firing heat-seeking sidewinder missiles

Object ID	Title	Author	Summary
			which quickly terminate the MIGS while the Hornets launch their smart bombs at the enemy. Onboard video monitors confirm their targets destruction. The modern jet has produced two new Navy MIG killers--the F-14 Tomcat and the F/A-18 Hornet. Together with the A-6 Intruder, they form an invincible fighting team able to attack at any time, in any weather, against any enemy. Ground targets are helpless once they are "locked-in" by the Navy weapons systems. In dogfights with MIGs commanded by Libya's Muammar el-Quaddafi and by Iraq's Saddam Hussein, Naval air power outflew and destroyed the hostile fighters which foolishly chose to challenge its domain.
2006.303.019	Submarine I-52 : Search for WWII gold	Stouffer, Mark (dir)	When it sank in the deep Atlantic during World War II, the Japanese submarine I-52 went to the bottom with over 100 lives...and a cargo that included two tons of gold. Now, a military veteran-turned-adventurer bucks the odds on a long-shot mission to solve a tantalizing mystery more than 50 years old, as he embarks on a deep-sea search for a lost submarine and its cargo of gold.

			largest organized resistance to incarceration, leading to the largest trial for draft resistance in U.S. history. Prosecuted as criminals, Japanese American leaders and veterans ostracized them as traitors. The resisters served two years in prison, and for the next 50 were written out of the official history of Japanese America.
2006.303.028	Reaching for the Skies, vol. 4 : Victory Over the Sea	Vaughn, Robert	This is one volume out of a 12 volume set. This volume tells the unique chapter in the history of flight that few could have foreseen: the marriage of air and sea power. Unforgettable scenes of the Japanese attack on Pearl harbor offer graphic examples of this powerful combination. It started with the first launch of an aircraft from a ship by the U.S. navy in 1910. A look at the British innovations such as the steam-operated catapult and angled deck shows how larger, more powerful jets were put aboard the aircraft carrier. And perhaps the greatest testament to this victory is today's nuclear carrier, a "city afloat" that virtually rules the sea. Then entire set includes: [1] Quest for speed--[2] Fighters--[3] Pioneers--[4] Victory over the sea--[5] Trailblazers--[6] The birth of air combat--[7] Giants of the air. [8] Vertical flight--[9] Bombers--[10] The adventure of flight--[11] Rivals over the atlantic--[12] Lighter than air.
2006.303.029	USS Midway	Stahl, Norman	The Midway matched the Missouri in longevity, achieving a staggering 47 years in service. Launched just too late to fight in WWII, she didn't have to wait long for prolonged battle action, and ultimately outdid many of the WWII carriers in fighting service. The Midway was involved in the air offensive off Vietnam beginning in 1963, accounting for some of the first MiGs downed by the U.S. She would become a mainstay in the offshore carrier force designated Yankee Station, flying numberless sorties into

Object ID	Title	Author	Summary
			the heart of the North Vietnamese missile and MiG defenses. Her rescue missions to snatch away downed flyers were legend. The Midway was a stabilizing force in the seas off Arabia during the many crises in the area. And in the first Gulf War, the old veteran was right in the middle of the action. The Midway is still afloat as a battle museum at San Diego, California. (from store.aetv.com)
2006.303.030	USS Midway (CVA-41) - Western Pacific Cruise - 1958-1959	May, Larry (ed)	A pictorial account of the life aboard USS Midway from the time of her recommissioning at Bremerton, WA in 1957 through the end of her WESTPAC cruise of 1958-59. Includes workups in southern California, and calls at Long Beach and San Francisco prior to deployment from her new homeport of Alameda on 16 August 1958.. Deployment port visits included Pearl Harbor, Subic Bay, Buckner Bay, Yokosuka, Hong Kong and Manila. Midway returned to Alameda on 8 March 1959. 2006.303.036	Warplanes of the Future	Gunston, Bill	The stealth warplanes of tomorrow have arrived! The very latest technology in combat aircraft design is explained clearly and vividly in this magnificent book. "Tomorrow's airplane today!" That's the proud boast of at least one warplane builder extolling the virtues of his latest state-of-the art fighter, one that's already flying and attracting buyers. But what sort of warplanes will pilots of tomorrow really be steering across the skies? Will they have wings swept almost impossibly forward, or which slew diagonally in flight? Will they have engines that can thrust up and down as well as forward (and maybe backward)? Will they be "invisible" to enemy sensors? Will they be armed with lightweight high-powered lasers? Will there be combat helicopters that become fixed-wing aircraft in mid-air? Will there be huge bombers or spyplanes that can take off from a runway on Earth and zoom off into space or be anywhere else on the planet in just ninety minutes? Research is going on into all these matters and many more right now, and internationally respected author Bill Gunston has produced a brilliant assessment of the problems and many of the solutions, presenting the facts and

			spicing them with authoritative comment, picking his way carefully through the pie-in-the-sky sales patter and the inevitable shrouds of secrecy. The result is the most original aviation book for decades, a refreshing and thought-provoking volume which will still be acknowledged in years to come as a magnificent work of reference. The text is crammed with technical data, and makes fascinating reading. It is beautifully illustrated with superb, full-colour three-view artworks, and many artists' impressions from aircraft designers and air force planners throughout the world, besides several rare and dramatic colour photographs of the most-developed warplanes in test flights. In addition, there are almost a hundred detailed line drawings and diagrams prepared to show clearly the amazing shapes and styles of the aerospace industry's masterpieces that could be flying off the drawing boards in the years to come. 2006.303.038	Time of the Aces : Marine Pilots in the Solomons, 1942-44	Mersky, Peter B.	The morale of the men of the 1st Marine Division on Guadalcanal soared dramatically in the late afternoon of 20 August 1942. That was when 19 Grumann F4F Wildcats of Captain John L. Smith's Marine Fighter Squadron (VMF) 223 and 12 Douglas Dauntless SBDs of Major Richard C. Mangrum's Marine Scout-Bomber Squadron (VMSB) 232 landed on yet-uncompleted Henderson Field. Ever since the assault

2006.303.039	Corsairs to Panthers	Condon, John P.	The first major surprise of the post World War II years came into play when in late June 1950, the United States found itself responding in crisis fashion to the North Korean invasion of the new republic of South Korea, just four years and nine months after VJ-Day. The nation became involved in Korea as a result of the Cairo and Yalta conferences in which the United States and the Soviet Union agreed to the concept of a free and independent post-war Korea. Included in the agreement was a joint occupation of the country by the two powers, with the Soviets north of the 38th Parallel and the United States south. The concept of the occupation had a general objective of settling down Korea for a period so that it could learn to govern itself as a nation after many decades of Japanese rule. As the United States was painfully learning, however, it soon became apparent that what the Soviets said was one thing and what they intended was quite another with respect to a free, independent, and democratic Korea. When in 1948, they refused to participate in elections, supervised by the United Nations to form the first National Assembly, the hopes for a united Korea died. The Soviets formed a separate Communist state in their sector, the People's Democratic

Object ID	Title	Author	Summary
			Republic of Korea. With the elections completed for the National Assembly in the south, the Republic of Korea (ROK) was established and the United States trusteeship in the country came to an end. On 25 June 1950, the North Koreans attacked with nine well-equipped infantry divisions, spearheaded by one armored division equipped with Soviet-built T-34 tanks. The Republic of Korea's army had been in existence for just about a year and could only oppose the invasion with four lightly equipped divisions and one additional regiment. Needless to say, although there were some spirited but isolated small unit defensive actions, the Republic's forces were no match for the invaders. The North Koreans reached out with rapidly advancing armored columns, moving almost at will during the first four days. Seoul fell on 28 June, and at that time, the ROK army had 34,000 troops Missing, although many of them later returned to their units. With the capture of Seoul, the invaders halted to regroup and those ROK forces, which were still intact, fell back through Suwon to set up some form of new defensive positions. The South Korean government had displaced to Taejon well to the south when the fall of Seoul became imminent. This state of near collapse was the basic situation faced by the United States and the United Nations in the opening week of the war. It was the... 2006.303.041	Battle of the Barricades : U.S. Marines in the Recapture of Seoul	Alexander, Joseph H.	Late on the afternoon of 24 September 1950, Captain Robert H. Barrow's Company A, 1st Battalion, 1st Marines, secured the military crest of Hill 79 in the southwest corner of Seoul, the enemy-occupied capital of the Republic of South Korea. This momentous day for Barrow and his men began with a nerve-wracking crossing of the Han River in open-hatched DUKWs, the ubiquitous amphibious trucks of World War II. Debarkation on the north shore had been followed by an unorthodox passage of lines "on the fly" of the regiment's lead battalion and the subsequent high-tempo attack on Hill 79. Now the rifle company assumed defensive positions on the objective, the men gazing in awe at the capital city arrayed to their north and east, sprawling virtually to the horizon. Thousands of North

Object ID	Title	Author	Summary
			Korean Peoples' Army (NKPA) troops lay waiting for them behind barricades or among countless courtyards and rooftops. Tens of thousands of civilians still clung to life in the battered city. The Marines were a very long way from the barren beaches of Tarawa or Peleliu. Even smoking Inchon, their amphibious objective 10 days earlier seemed far distant. Seoul would represent the largest objective the Marines ever assailed. Earlier that day Colonel Lewis B. "Chesty" Puller, commanding the 1st Marines, issued a folded American flag to be raised on the regiment's first objective within the city limits. Barrow's battalion commander gave him the honor as the point company in the assault. The time was right. Barrow's men attached the national colors to a pole and raised them proudly on a rooftop on Hill 79. Life magazine photographer David Douglas Duncan, himself a Marine combat veteran, captured the moment on film. The photograph proved unremarkable — Hill 79 was no Mount Suribachi — but it reflected an indelible moment in Marine Corps history. Seven weeks earlier the 1st Marine Division was a division in name only. This afternoon a rifle company from that hastily reconstituted division had seized the first hill within occupied Seoul while all three regiments converged inexorably on the capital's rambling perimeter. Barrow's flag-raising initiative enraged the neighboring 5th Marines, still slugging its way through the last of the bitterly defended ridges protecting the city's northwest approaches. Chang Dok Palace, the Republic of Korea's government center, lay within the 5th Marines' assigned zone. There, the 5th Marines insisted, should be the

Object ID	Title	Author	Summary
			rightful place for the triumphant flag-raising. Barrow brushed aside the complaints. "Putting the flag on a bamboo pole over a peasant's house on the edge of Seoul does not constitute retaking the city," he said. Whether premature or appropriate, the flag raising on Hill 79 was an exuberant boost to morale at a good time. Chang Dok Palace lay just two miles north of Barrow's current position, but getting there in force would take the Marines three more days of extremely hard fighting. By the night of 19 September Major General Oliver P. Smith, commanding the 1st Marine Division, had grounds for caution. ON THE COVER: Bitter fighting, house-to-house, with every alleyway, every storefront window being a deadly hazard to the Marines recapturing Seoul. 2006.303.055	History of Marine Fighter Attack Squadron 115	Chapin, John C.	FOREWORD: This history traces more than 40 years of active service by Marine Fighter Attack Squadron 115. Since its commissioning in July 1943, the squadron has evolved from a group of wartime beginners in SNJ-4 planes to today's front-line professionals in their F/A-18 Hornets. These decades have seen VMFA-115 on active service in the Southwest Pacific, the Philippines, China, Japan, Okinawa, Taiwan, Western Europe, the Caribbean, the Mediterranean, and on both coasts of the United States. Data for the history were drawn principally from primary sources: command diaries and chronologies; muster rolls; published historical works; and recollections of the Marines involved. Captain John C. Chapin earned a bachelor of arts degree with honors in history from Yale University in 1942 and was commissioned later that year. He served as a rifle platoon leader in the 24th Marines, 4th Marine Division, and was

			Forces Staff College in January 1975, he was assigned to the History and Museums Division.
			Major Sambito has been a major contributor to the series of squadron histories. He was also the author of "A History of Marine Fighter Attack Squadron 312" and "A History of Marine Attack Squadron 311" and assisted in the editing of "A History of Marine Attack Squadron 223."
			The History and Museums Division welcomes any comments on the narrative and additional information or illustrations which might enhance a future, much expanded treatment of Marine Fighter Attack Squadron 232's history.
			E. H. SIMMONS Brigadier General, U. S. Marine Corps (Ret.) Director of Marine Corps History and Museums
			Reviewed and approved: 15 June 1978

2006.303.057	History of Marine Attack Squadron 223	Sambito, William J.	From the Preface: "The history of Marine Fighter Attack Squadron 232 is a narrative account of the 'Red Devil' squadron in action since its beginning in 1925. The brief history shows the early structure of the squadron from its fledgling start as VF-3M when it was flying primitive VE-7s to the present day VMFA-232 flying Phantom F4-Js. It outlines in chronological order the battles undertaken during World War II and Vietnam and tells briefly of the pilots and crewmen and the hardships they endured to carry out their missions. Marine Attack Squadron 232 is steeped in tradition and continually holds its standards high. It is hoped that this brief history adequately sketches the story and prompts others to contribute their insights, remembrances, records, photographs, and other

Object ID	Title	Author	Summary
			memorabilia so that the complete history may someday be written."
2006.303.058	History of Marine Fighter Attack Squadron 323	Pitzl, Gerald R.	Foreword: This publication traces the history of Marine Fighter Attack Squadron 323 from its commissioning in 1943 through warfare in the Pacific in World War II, three years of combat action in the Korean War, intensive involvement in Vietnam, and a number of significant peacetime accomplishments during the 1980s. The history was prepared from command diaries and chronologies, published works covering the major periods of conflict, and personal papers, letters, and the recollections of Marines who were personally involved. The author, Colonel Gerald R. Pitzl, received his bachelor of science, master of arts, and doctor of philosophy degrees from the University of Minnesota. He has more than 30 years of service in the Marine Corps Reserve, including eight years of extended active duty. Colonel Pitzl has served three tours of duty overseas, including a ten-month assignment to the Force Logistics Command, Da Nang, Republic of Vietnam, during 1969 and 1970. The History and Museums Division welcomes any comments on the narrative and readers are encouraged to submit additional information or illustrations which might enhance a subsequent edition. E. H. SIMMONS Brigadier General, U.S. Marine Corps (Ret.) Director of Marine Corps History and Museums (from

2006.303.059	History of Marine Fighter Attack Squadron 312	Sambito, William J.	FOREWORD: Marine Fighter Attack Squadron 312, the Checkerboard squadron, enjoys a fine reputation among Marine aviators. This volume, one of a new series of brief histories on famous aviation squadrons, is offered as a tribute to the pilots and crewmen who have contributed so significantly to Marine aviation. The author, Major William J. Sambito, earned his Bachelor of Arts degree in psychology from Colby College, Maine, and is an experienced helicopter pilot who served with HMM - 262 and -165 during the Vietnam War. After attending the Armed Forces Staff College, he was assigned in January 1975 to the History and Museums Division. It is hoped that each of the brief accounts in this series will awaken a new interest in unit history and inspire Marines to retain important materials and record events of historical significance. The Command Chronologies prepared semiannually are excellent vehicles for the accomplishment of this. Important source documents and narrative accounts should be included in them to ensure that the entire story is told. E. H. SIMMONS Brigadier General, U. S. Marine Corps (Ret.) Director of Marine Corps History and Museums Reviewed and approved: 15 June 1978 (from

2006.303.082	Men of the Fighting Lady	Marton, Andrew	"Men of the Fighting Lady" is a 1954 Korean War drama film starring Van Johnson, Walter Pidgeon, Keenan Wynn, and directed by Andrew Marton. The screenplay was written by Harry A. Burns. The original music score was composed by Miklós Rózsa. Synopsis The film was based on the novels "The Case of the Blinded Pilot" by Cmdr. Harry A. Burns and James A. Michener's "The Forgotten Heroes of Korea" and details life aboard the aircraft carrier USS Oriskany. The film's high point is the factually depicted scene where Thayer (Johnson) talks in a blinded Navy F9F Panther pilot (played by Dewey Martin) for a landing. (from Wikipedia)
2006.303.083	USS Intrepid - The Story of the "Fighting I"	The History Channel	USS Intrepid (CV/CVA/CVS-11), also known as The Fighting "I", is one of 24 Essex-class aircraft carriers built during World War II for the United States Navy. She is the fourth US Navy ship to bear the name. Commissioned in August 1943, Intrepid participated in several campaigns in the Pacific Theater of Operations, most notably the Battle of Leyte Gulf. Decommissioned shortly after the end of the war, she was modernized and recommissioned in the early 1950s as an attack carrier (CVA), and then eventually

Object ID	Title	Author	Summary
			became an antisubmarine carrier (CVS). In her second career, she served mainly in the Atlantic, but also participated in the Vietnam War. Her notable achievements include being the recovery ship for a Mercury and a Gemini space mission. Because of her prominent role in battle, she was nicknamed "the Fighting I", while her often ill-luck and the time spent in dry dock for repairs earned her the nickname "the Dry I". Decommissioned in 1974, in 1982 Intrepid became the foundation of the Intrepid Sea-Air-Space Museum in New York City. (from Wikipedia)
2006.303.084	Pacific Ghosts, Vol. 1 : Pearl Harbor Half Century Retrospective	Taylan, Justin R.	Undisturbed wrecks of World War II warbirds on CD-ROM. Compatible with Windows and Mac. Over 200 photographs including P-38, B-17, F-4F, A-20, A6M Zero, G4M Betty, Ki-43 Oscar, SBD Dauntless, D3A Val, J1N1 Irving, Ki-48 Lily, Ki-49 Helen . Over 80 minutes of narration with historian and author Michael J. Claringbould.
2006.303.085	Big Aircraft Carrier	VanDerKloot, William	This kid's-eye tour of the largest ship in the U.S. Navy invites the viewer into a small airplane on land, takes them on a brief flight, through a landing on the U.S.S. Nimitz and through takeoff again. Along the way, there's a tour of the ship--the largest afloat on earth--from hospital to barbershop to library. Viewers get to watch future pilots go through water-survival training, parachute-landing practice, and escape from a dunker--a cage that simulates a helicopter crashed into the water. Much of the 40-minute tour is ideal for kids, such as the fact that the naval personnel wear different-colored shirts that identify their jobs--yellow shirts direct the planes, purple shirts refuel, etc. The video simplifies more difficult information by comparing it to what kids know: the aircraft carrier weighs more than 15,000

Object ID	Title	Author	Summary
			school buses. While most of the aircraft carrier's 6,000 residents appear to be male, both a male pilot and a female pilot talk about their job on camera, giving girls a nice incentive to watch. --Kimberly Heinrichs (from Amazon.com)
2006.303.090	Monitors of the U.S. Navy, 1861-1937	Webber, Richard H.	A monitor was a class of relatively small warship which was neither fast nor strongly armoured but carried disproportionately large guns. They were used by some navies from the 1860s until the end of World War II, and saw their final use by the United States Navy during the Vietnam War. The monitors of the 19th century were turreted ironclad warships inspired by the original USS Monitor; as well as coastal ships which closely followed her design. The term "monitor" also encompassed more flexible breastwork monitors, and was sometimes used as a generic term for any turreted ship. (from Wikipedia)
2006.303.091	NATOPS Flight Manual Navy Model T-34B Aircraft	Chief of Naval Operations	Provides standardized training and flight procedures for the Navy model T-34B aircraft. ===== The Beechcraft T-34 Mentor is a propeller-driven, single-engined, military trainer aircraft derived from the Beechcraft Model 35 Bonanza. The earlier versions of the T-34, dating from around the late 1940s to the 1950s, were piston-engined. These were eventually succeeded by the upgraded T-34C Turbo-Mentor, powered by a turboprop engine. The T-34 remains in service more than six decades after it was first designed. (from Wikipedia)

2006.303.101	Naval Aviation 1943	United States Naval Institute	PREFACE: Aviation is changing constantly and rapidly, and no text book could pretend to keep up to date with its progress. A student of aviation must keep his mind open for the advent of new inventions and tactical applications which constantly are appearing. The importance of naval aviation has been impressed upon all during the current battles of the present war. Its worth has been demonstrated over and over again, and its success has resulted from a practical application which has taken advantage of the striking power inherent in aircraft. Naval Aviation, 1943, has been prepared by the Training Division of the Bureau of Aeronautics, Navy Department, at the request of the Department of Seamanship and Navigation, U. S. Naval Academy, to replace Naval Aviation, 1934 (Warlick and Grant). J. S. McCAIN Rear Admiral, U.S.N. Chief of Bureau of Aeronautics June, 1943

Object ID	Title	Author	Summary
			look at, perform superbly-if at times idiosyncratically- and have contributed importantly to the exciting history of aviation. Author James Gilbert, who knows them intimately, here presents their fascinating biographies-illustrating them with memorable pictures from international archives, as well as with his own excellent aerial photography. James Gilbert was born at Croydon in 1935 under the traffic pattern of what was then London's principal airport. In World War II, when the bombing of London became intense, he was sent to the countryside, like thousands of other English children, and has memories of Battle of Britain air combat raging in the skies over Sussex. At seventeen he learned to fly in a Tiger Moth on a scholarship from the Royal Air Force. He since has acquired twelve hundred hours of pilot time in more than a-hundred different kinds of aircraft, including many of THE GREAT PLANES. He was runner-up in Britain's national aerobatics championship in 1964, and now lives in New York, where he is a contributing editor of Flying magazine. 2006.303.104	USA Military Powers	Peacock, Lindsay T.	The US Armed Forces are the most powerful on Earth, their equipment is the finest, and their worldwide presence paramount to international order. The Navy patrols the oceans deploying its might from above and beneath the waves. Giant carrier groups, each with their own multi-role air force, sail the seas providing a flexible yet resolute iron fist that can bear on to any quarter of the globe. The submarine force patrols the depths: the hunter-killers shadowing the fleets of potential enemies, the missile subs silently hidden -- always ready to launch their deadly nuclear loads. The Air Force dominates the skies, able to establish authority over every continent of the globe and far into space. Flying the world's finest aircraft, this highly professional force maintains supreme standards, from dogfighting through low-level strike to massive airborne assault. The Army and Marine Corps are tasked with the landpower dimension of America's foreign policy. Ready and able to halt aggression and intervene where necessary, brave men and

			women frequently face awesome, tough and often grim assignments.
			These are the organizations that form the most potent force on Earth. This volume describes and vividly illustrates their roles and vast array of equipment.
			This volume contains descriptions and illustrations of many of the weapons in the inventory of the American armed forces, including:
			USS Nimitz, the world's largest and most powerful warship, whose aircraft can attack in all weathers and can outgun many of the world's air forces
			USS New Jersey, a battleship of World War II vintage but even more effective today, retaining her giant guns and adding sophisticated missile systems
			The 'Ohio' class submarines, each armed with their 24 devastating Trident ballistic missiles, sail silently and deep, deterring aggression from the Soviets
			Grumman E-2 Hawkeye, shipborne AWCAS aircraft; overseeing the fleet, it directs the battle and gives the US Navy a considerable advantage over any attacker
			M1 Abrams Main Battle Tank, one of the most mobile MBTs in the field today; gas turbine power makes it exceptionally fast
			Hughes AH-64 Apache, the world's most advanced attack helicopter with state-of-the-art laser-controlled weapons systems
			Pershing 2 battlefield support missile, super-accurate, super-deadly; arguably the most important single weapon in the world
			Lockheed SR-71 Blackbird,

Object ID	Title	Author	Summary
			the fastest and highest warplane in the sky -- uncatchable, it spies on the enemy and collects invaluable information with unequalled swiftness, scope and accuracy Cruise missiles, computer-controlled flying-bombs which significantly add to the vast array of terrifying weapons that keep World War III from ever breaking out The Military Press Distributed by Crown Publishers, Inc. One Park Avenue New York, NY 10016 Printed in Italy (from dust jacket flaps)
2006.303.105	World War II : A 50th Anniversary History	Associated Press	Most historians zero in on 1939 as the actual beginning of WWII, the most destructive conflict in modern human history. America was aware in 1939 that it would be drawn into the conflict. President Roosevelt expressed the feeling: "Let no one imagine that America will escape, that it may expect mercy, that this Western Hemisphere will not be attacked." Nearly 200 Associated Press correspondents covered the war; some lost their lives, or were injured or shattered by exposure and illness. Through many of their words and pictures, this book recalls and commemorates the war that changed the shape and future of the world.
2006.303.108	Desert Storm : The War in the Persian Gulf	Friedrich, Otto	Desert Storm -- the U.S. attack plan that grew out of the defensive Desert Shield -- sounded at first like some kind of advertising slogan. It soon became an unforgettable part of the language, perhaps the most famous name for a military campaign since Operation Overlord marked the landing of Allied forces in Normandy on D-day, 1944. Its own name was not the only term that Desert Storm added to the language. Patriot and Tomahawk and

Object ID	Title	Author	Summary
			Scud also became household words, along with smart bombs and yellow ribbons, and new characters like Saddam Hussein and H. Norman Schwarzkopf. The new names symbolized many new things brought to American life by the recent war against Iraqi aggression. It brought Americans a new sense of what they can accomplish in the world, and a new sense of who they are. It made them joyous and made them proud. This was the first war ever to be reported live on satellite TV, and so millions of Americans watched as it happened -- watched Patriot missiles soar up into the sky to destroy incoming Scuds, watched jets roar off to wage the most intensive air war in history, watched the first allied troops entering liberated Kuwait. But such images soon fade in the memory, as do the spoken improvisations of TV broadcasters. Newspapers and magazines last longer, but they too reflect the haste of overnight deadlines. Only now that the war in the Persian Gulf has been won it is possible to put this historic event in historic perspective, from start to finish. TIME magazine assigned some two dozen of its best correspondents -- and as many photographers -- to cover every aspect of the war, in Baghdad, Cairo, Jerusalem, Saudi Arabia, Kuwait, London, Washington and elsewhere. From their voluminous reports, thoroughly revised and updated, 15 TIME writers have put together the first complete book on Desert Storm, not only the dramatic details of what happened but their assessment of why it happened. How and why President Bush decided to intervene. How General Schwarzkopf devised the victorious strategy. How high-tech weaponry changed the future of warfare. How the Israelis were persuaded not to retaliate against Scud attacks. And how the American

Elements of the 11th Panzer Division on April 9 through Nis in Yugoslavia with General Ewald von Kleist...140 miles to Belgrade in four days.
2006.303.120	New Order, The	Time-Life Editors	This volume of the set dealt with the internal social programs of the Third Reich. Propaganda, The Hitler Youth, labor and party organization, and other internal groups and people. As with all of these volumes there is a stunning amount of quality photo-journalism. Explanations of the various programs are accompanied by images and documantation of emblems, badges, knives, posters, flags and other accessories used by the Nazi's to surround the German people with a new culture and secure their loyalty by the preceptions they maintained and dogma they preached. It also shows that these groups and the power structure of the Third Reich were very innefficient and had to rely on coercion and deciet to maintain their strength. A few things of interest:

Object ID	Title	Author	Summary
			The initial design and production of Volkswagons was prompted by a Nazi program that allowed workers to make payments out of each check to add to a stamp book towards getting a car. Combined with the construction of the Autobahn and other freeways, it was supposed to give the German people the highest numbers of cars per capita, and make them "free" to go anywhere. Instead, the cars were diverted to military use as staff cars when the war began. The change in the educational standards under the Third Reich emphasized physical achievement over traditional study, and was so damaging to the learning of students that most entering college were not qualified and were placed in remedial courses for up to two years. If old admissions standards had been maintained the college enrollment would have been barely half their capacity. Hitler, as a way of balancing the power of those below him, would create multiple organizations that did almost the same thing. Anytime he felt someone was gaining greater influence, he would simply create a new group or organization and promote someone to head that would be able to draw away some of the power and authority. Even Goebbels was restrained in this way, as other groups shared censorship and propaganda duties that partially mirrored his own. (Customer review from Amazon.com)
2006.303.121	United States Navy and The Vietnam Conflict, The, : Vol. 1: The Setting of the Stage to 1959	Hooper, Edwin Bickford	This volume, the first of a planned series on the United States Navy and the Vietnam conflict, has a two-fold purpose. First of all, it is intended to provide historical background for the period up to 1959 that will assist readers

Object ID	Title	Author	Summary
			in understanding naval roles in that conflict, how these roles evolved, their relationship to other forms of power and influence employed in the prolonged and complex struggle, strategic considerations, and the impact of naval power on the course of history associated with the conflict. Secondly, it is intended to trace the story of Vietnam-related actions of the United States Navy through the initial period of American military aid and the first five years that followed the French-Viet Mihn War.

2006.303.127	Command in War	Van Creveld, Martin	In the first book to deal specifically with the nature of command, Martin van Creveld traces the development of command from ancient Greece to Vietnam, treating historically the variety of problems involved in decision making, communication, weaponry, and logistics. The book demonstrates how command has worked in key battles -- including Napoleon's victory at Jena, Moltke's Koniggratz campaign, the 1973 Arab-Israeli war, and U.S. actions in Vietnam -- and discusses the search for certainty in command -- certainty about the intentions of the enemy, the environment of battle, and the character of one's own forces. "I can think of few books on military subjects of greater originality and importance than Martin van Creveld's scholarly and fascinating dissertation on command in war ... The subject is examined in depth, supported by a wide historical base, with a perceptive, unprejudiced eye, and the result expressed in clear prose of high literary merit." - Michael Carver, Royal United Services Institute for Defence

Object ID	Title	Author	Summary
			Studies "One of the finest and most perceptive military historians writing in English today ... Van Creveld has marshaled more than enough historical evidence -- and with great depth and richness -- to support his conclusions." - Armed Forces and Society "One cannot but admire the author's excellent discussion of how modern technology has complicated command and the processes of command; of the interaction of this complication with the political complexities of Vietnam; and of the uses and limitations of systems analysis in general, and in Vietnam in particular." - The Washington Times Martin van Creveld is Visiting Professor at The National War College. He has written several books, including "Supplying War: Logistics from Wallenstein to Patton" and "Hitler's Strategy 1940-1941: The Balkan Clue." Harvard University Press Cambridge, Massachusetts and London, England (from back cover)
2006.303.128	Planning the American Air War: Four Men and Nine Days in 1941: An Inside Narrative	Gaston, James C.	Even if it hadn't been used, the United States' air war plan for World War II would have been uniquely significant. It marked the first time that airmen in the Army Air Forces were permitted to do their own planning; thus it was a crucially important step in their move toward independence. But plans don't write themselves, and the planning process, rather than the finished document is the focal point of this study. Hal George, Ken Walker, Laurence Kuter, and Haywood Hansell were the four men who were the planners of the United States' air war plan for World War II.
2006.303.129	Eagle's Talons, The : The American Experience at War	Drew, Dennis M.	FOREWARD: Americans have traditionally viewed war as

Object ID	Title	Author	Summary
			an aberration in the normal course of events. Although paying lip service to the Clausewitzian dictum that war and politics are two parts of a tightly knit whole, we have traditionally waged wars as great crusades divorced from political realities. Thus we have been nonplussed in the last half of the twentieth century by our involvement in limited wars waged for limited objectives. America's responsibilities as a superpower with worldwide interests forced upon us the unpleasant notion of using our armed forces as practical instruments of political policy. The reality of this notion has been difficult for many Americans to understand and accept. Col Dennis M. Drew and Dr Donald M. Snow have performed a significant service by producing a volume that places the American experience at war in its proper political context. Going further, they have also placed the American experience in a technological context and analyzed how political and technological factors influenced the conduct of American wars. In addition, they have combined all of these factors and analyzed their influences on the outcomes of our wars, what Sir Basil Liddell Hart called "the better state of peace," which is the fundamental objective of warfare. One can find a number of military, political, and technological histories that address the American experience at war. However, I know of no other single volume that addresses all of these aspects in such a concise and readable fashion. But Eagle's Talons is much more than just a history of the American experience. If gaining insights about where we are going requires an understanding of where we have been, Colonel Drew and Dr Snow provide a

2006.303.132	Implementing Joint Vision 2010 : A Revolution in Military Affairs for Strategic Air Campaigns	Warner, Christopher G.	Implementation of the CJCS's Joint Vision 2010 and the United States Air Force's Global Engagement will lead to a strategic air campaign revolution in military affairs. The strategic air campaign of 2010 is one in which national military power is used to achieve national objectives

Object ID	Title	Author	Summary
			across the spectrum of conflict. A strategic air campaign can perform worldwide mobility to deter aggression or win battles and wars with application of combat power. These future air campaigns should achieve strategic objectives that prevent crisis escalation, enhance deterrence, or support other nonmilitary national objectives with timely delivery of logistical resources and people worldwide. The synthesis of today's airpower doctrine; tomorrow's dominant battle-space knowledge; JV2010 operational-concepts development; rapid and effective command, control, communications, computers, and intelligence; high-penetration, low-observable aircraft employing precision weapons, rapidly, disproportionately, and against parallel target sets; and strategic airlift providing critical resources and supporting worldwide mobility will give the joint force commander and the US military significant long-range strategic air power capabilities to achieve national security objectives. As we complete this synthesis, the United States will experience a strategic air campaign revolution in military affairs.
2006.303.133	Insurgency in the Modern World	O'Neill, Bard E. (ed)	While all instances of insurgency have elements in common, the circumstances that precipitate them and the forms they take vary immensely. The editors of this book synthesize the literature on insurgency to provide an analytical framework that outlines categories of insurgent movements (secessionist, revolutionary, restorational, reactionary, conservative, and reformist), strategies (Maoist, Cuban, and urban), and factors that can have a major bearing on the outcome of insurgent conflicts. Case studies on Thailand, Oman, Angola, Guatemala, Uruguay, Iraq, the PLO, and Northern Ireland are then examined systematically

2006.303.134	Command Concepts : A Theory Derived From the Practice of Command and Control	Builder, Carl H.	The qualities of commanders and their ideas are more important to a general theory of command and control than are the technical and architectural qualities of their computers and communications systems. This theory separates the art of command and control (C2) from the hardware and software systems that support C2. It centers on the idea of a command concept, a commander's vision of a military operation that informs the making of command decisions during that operation. The theory suggests that the essential communications up and down the chain of command can (and should) be limited to disseminating, verifying, or modifying command concepts. The theory also suggests, as an extreme case, that an ideal command concept is one that is so prescient, sound, and fully conveyed to subordinates that it would allow the commander to leave the battlefield before the battle commences, with no adverse effect upon the outcome. This report advances a theory about military
2006.303.135	Heart of the Storm	Reynolds, Richard T.	Airmen all over the world felt relief and exhilaration as the war in the Gulf reached its dramatic conclusion on 28 February 1991. Many nonairmen, of course, experienced those emotions as well-but for a variety of different reasons. Airmen, long uneasy about the lingering inconclusiveness of past applications of their form of military power, now had what they believed to be an example of air power decisiveness so indisputably successful as to close the case forever. Within the United States Air Force, among those who thought about the uses of air power, there were two basic groups of

Object ID	Title	Author	Summary
			airmen. The first-smaller and less influential-held to the views of early air pioneers in their belief that air power was best applied in a comprehensive, unitary way to achieve strategic results. The second-much more dominant-had come to think of air power in its tactical applications as a supportive element of a larger surface (land or maritime) campaign.
2006.303.145	Navy Humor and So Forth...	Smith, Allan E.	Collection of true or purported to be true humorous stories of Military Folks.
2006.303.146	Chopper Pilots is the Craziest Peoples	Bergsma, Earl R.	Back in the days of the pre-television and pre-helicopters, the weekly newsreel at the local Bijou always had a comedy skit narrated by Lew Lehr. It was titled 'Monkeys is the Craziest Peoples' and it depicted the antics of monkeys and chimpanzees. Mr. Lehr had never met a helicopter pilot, they didn't exist then; but if he had, he probably would have agreed that 'Chopper Pilots is the Craziest Peoples'
2006.303.147	Marine Corps Aviation Association - 2003 Membership Directory	Marine Corps Aviation Association	A membership directory of the Marine Corps Aviation Association. It is a listing of members and their addresses. There is a chart at the back that lists members by state.
2006.303.148	Basic Military Requirements	Bureau of Naval Personnel	Rate Training Manual for Basic Military Requirements
2006.303.151	Jane's Encyclopedia of Aviation	Taylor, Michael John Haddrick (ed)	Material culled from all of Jane's manuals from 1909 to the present features vital statistics to more than five thousand air and space craft, including records, specs, aircraft function, and photographs. (from Amazon.com)
2006.303.152	Aircraft of World War II	Chant, Christopher	Provides a brief overview of 300 aircraft each with a full-color artwork. Full dimensions, weights, armament and powerplant details are given along with development history and career in full. V/STOL Challenge : A Success Story by Ryan

Ryan Aeronautical Co.

On April 11, 1957 at Edwards AFB, California, a delta wing jet aircraft hovered motionless above the runway on an invisible tail of hot jet exhaust, pointed its nose arrogantly at the sky and became the world's first jet vertical take-off and landing airplane. Although there is no date, we believe this brochure was produced around 1962.

The first publicly disclosed flight of the Ryan-Air Force X-13 Vertijet was the climax of ten years of engineering design and development. It heralded the birth of a new generation of manned aircraft. In 125 flights in the historic test program, the X-13 astonished military and civilian observers and opened the age of VTOL (vertical take-off and landing) aircraft.

Today, less than a decade later, the U. S. Army XV-5A has begun flight tests at Edwards to demonstrate the vertical Jake-off, hovering and conventional flight characteristics of fan-in-wing type aircraft. The outcome of the exhaustive flight test

Object ID	Title	Author	Summary
			program is expected to have a significant impact on V/STOL progress just as the X-13 did in 1957. NEW V/STOL EFFICIENCY Using no more power or fuel than for conventional flight, the XV-5A is designed to take-off straight up, dart away at high subsonic speeds, then return to hover and land in an area no bigger than the confines of a tennis court.
2006.303.154	Classics - US Aircraft of WW II	Meyer, Mark	Metal sculptures in a hangar, kinetic works of art in flight, the U.S. fighters and bombers of World War II captivate us as much today as they did 40 years ago when a golden age of aeronautical engineering and production launched tens of thousands of them into the skies of Europe and the Pacific. Today's classics, they are rare vestiges of a proud heritage. TIME Magazine photographer Mark Meyer has captured the essence of these machines in his photographs for the book, CLASSICS. His images suggest the elusive metamorphosis of airframe to artwork, and, short of your actually hearing the explosions of engines rattling to life, or feeling the tug of g-forces on your face in a turn, enable you to experience the joy of flying in these wonderful aircraft. Complementing Meyer's photography is an eloquent introduction written by Walter J. Boyne, retired director of the National Air and Space Museum in Washington, D.C., who discusses the development and preservation of classic U.S. warbirds of World War II. CLASSICS includes interviews with a number of pilots who flew aircraft during the war. Their accounts of pilot training, the often primitive conditions of base camps, the black humor of war and the grim, desperate valor of aerial warfare are spell-binding.

Object ID	Title	Author	Summary
			There is also a powerful selection of archival photographs gathered from public and private collections of WWII photography. Reprinted using laser technology and high-quality duotone printing, these images include remarkable combat scenes, enhanced by selections from news accounts, public documents, and personal diaries. CLASSICS closes with a useful reference section that includes manufacturer dimensions, weight, engine, ceiling, range, and armament specifications, along with brief aircraft histories, three-view line drawings, and photograph identifications for 27 different aircraft types. Signatures of the greatness of American technology veterans of the sound and fury of the skies of a world at war these aircraft are some of the most beautiful art America has produced, full of the power of the human mind and the grace of the indomitable human spirit. (from dust jacket flap)
2006.303.155	This Is Your Navy : An Information History	Roscoe, Theodore	Enlarged version of a manual on naval history prepared by the Bureau of Personnel during World War II.
2006.303.156	Principles of Naval Engineering	Bureau of Naval Personnel	Designed as a classroom text for NROTC and OCS students to provide an introduction to the theory and design of engineering machinery and equipment aboard ship. Details of operation, maintenance and repair are not included in this text.
2006.303.157	Report of the Task Force on the Administration of Military Justice in the Armed Forces, Vol. II	Dept. of Defense	Watershed documentation of the effort of the U.S. military to come to grips with and address racial discrimination within the armed forces in the early 1970's.

			subordinates and seniors, their own career prospects in the Navy, and essential information related to the career patterns and development of their assigned enlisted personnel.
2006.303.159	Shaping the General Purpose Navy of the Eighties : Issues for Fiscal Years 1981-1985	Congressional Budget Office	Examines the trade-off between quality and quantity in a choice between adding a smaller number of highly capable but expensive warships to the Navy in the early 1980's or a large number of relatively less capable but less expensive warships.
2006.303.160	Sea Legs : A Handbook for the Navy Wife	Navy Wifeline Association	A first source that gives direction to that illusive piece of information on the Navy and of interest to Navy wives.
2006.303.161	Landing-Force Manual U.S. Navy	Navy Department	Organizational bible for the USMC.
2006.303.162	Three Wars of the Battleship Missouri	Lou Reda Productions	Join us for a review of the incredible 51-year career of BB-63 the battleship Missouri which fought in WWII the Korean War and Desert Storm. The crew that served on her last voyage could have been grandchildren of the men who fought on her first. Though this behemoth should have been a relic after WWII she was continually upgraded making her a formidable first-line warrior to her final day in commission. Launched in 1944 she was the last battleship built and the last in service. But her most enduring image came in 1945 when the Allies accepted Japan's surrender on her deck in Tokyo Bay. Now a national monument in Pearl Harbor preserving the details of that historic day we step aboard with some of the great men who served in her during the long career of this icon of U.S. naval history. DVD Release Date: October 28, 2008 (from Amazon.com)
2006.303.163	D-Days in the Pacific, Disc 1	Lou Reda Productions	This is Disc 1 of a two disc series. This disc includes: Death at the tideline -- about amphibious operations including the one at

			Guadalcanal Closing the jaws -- Nimitz and MacArthur have the enemy on the run The final graveyard -- more battles in the Pacific. Disc 2 which we don't have has the following: The bloody hills of Peleliu -- Biography: Admiral Chester Nimitz -- Biography: General Douglas MacArthur.
2006.303.164	History Channel Tribute to WWII Veterans (for the Smithsonian)	Lou Reda Productions	It is believed that this video was produced for the Smithsonian WWII Reunion, May 27-30, 2004. Produced in part by the Smithsonian Institution's Center for Folklife and Cultural Heritage and the American Battle Monuments Commission. The video shows scenes from World War II. The title on the video is "History Channel Tribute to WWII Veterans (for the Smithsonian)."
2006.303.165	Flag Raisers of Iwo Jima, The	Lou Reda Productions	This short DVD shows scenes from the battle and from the flag raising on Iwo Jim. Several people give personal narratives. This is one part of the video "American's Unsung Heroes of World War II."
2006.303.166	Rescue, The	Lou Reda Productions	Based on the book by Steven Trent Smith, The Rescue. The documentary is about the rescue of Americans missionaries trapped in the Philippines after the Japanese invaded: Paul and Clara Lindstrom and their four children. It also involves Japanese secret documents known as "Z Plan" that were recovered by pro-American guerillas. The submarine, the USS Crevalle, picked up 40 civilians and the Z plan in May of 1944, and took them 1500 miles to Australia. From Wikipedia: The Crevalle rescued 40 refugees here, including 28 women and children, and 4 men who had survived the Bataan Death March and made their escape. She also took off the family of an American missionary, who having seen his family to safety, returned ashore at the last

Object ID	Title	Author	Summary
			minute to continue his ministry among the guerrillas. Along with her passengers, Crevalle recovered a group of important documents (the Japanese "Z plan"), and transferred all she could spare in the way of supplies to the guerrillas. In May 1944, while returning with her passengers to Darwin, Crevalle was spotted by a Japanese convoy on the third day of the journey. With four working torpedoes Capt. Walker maneuvered to attack, but was severely depth-charged by a Japanese bomber, a special ordeal for the passengers. The periscopes and radar were knocked out. They were landed safely at Darwin 19 May, 8 days after leaving the Philippines. Crevalle sailed on to refit at Fremantle. This DVD has been reissued as WWII Sub Rescue.

2006.306.010	SBD Dauntless in Action	Stern, Robert Cecil	Douglas SBD Dauntless dive bomber. Small but fact-filled handbook that combines the historical significance of the SBD Dauntless, with photos and line drawings that trace the armament and design development from the early XBT models through the later SBD 5/6 models. Color drawings show the diverse markings for different SBD squadrons and the carriers and airbases from which they flew. Book is filled with action pictures.
2006.306.013	PBY Catalina in Action	Scarborough, W. E.	Consolidated PBY Catalina patrol flying boat
2006.306.014	F4U Corsair in Action	Sullivan, Jim	Bringing to mind the exploits of "Pappy" Boyington and his "Blacksheep Squadron" and Tommy Blackburn with the "Jolly Rogers," the Corsair is among the most formidable U.S. fighters of World War II. The F4U maintained a kill ratio of 11:1 according to the United States Navy and went on to serve American forces in Korea, holding its own in the early years of the jet age. The Corsair was first conceived as a high-speed, high-altitude fighter for the Navy in 1938 when Chance Vought's design team drew up plans for a fighter with a 1,800 h.p. engine and a huge 13-foot propeller. The Corsair's famous inverted gull wing design was introduced to allow prop clearance. Handling problems delayed the aircraft's deployment aboard carriers, but Marine Corps pilots quickly took to the powerful, rugged fighter and VMF-124, the first Marine squadron to fly the Corsair in combat, also produced the first Corsair air ace, Kenneth A. Walsh, by the summer of 1943. A total of 12,571 Corsairs were built

Object ID	Title	Author	Summary
			between 1940 and 1952, most of them by Vought, but hundreds by Goodyear and Brewster as those companies' assembly lines had to be pressed into service to meet soaring demand for the remarkable aircraft. Jim Sullivan's exhaustive volume surveys the history of the Corsair from its first prototype to the restored warbirds that have continued to delight air show audiences down to the present day. 2006.307.012	East of Eaton : The Story of the China Lake Propulsion Laboratories	None Stated	As inferred by the name, this video portrays a brief 38 minute summary of the 50 year history of the China Lake Propulsion Laboratory from its origin to about 1995. The China Lake Propulsion Laboratory was started in 1945, during World War II, in support of the rocket propulsion efforts by the California Institute of Technology which were initiated at Eaton Canyon for the Navy. This integrated the rocket development effort with the test effort on the China Lake desert. The China Lake Pilot Plant was started as an experimental development laboratory and a pilot production facility to develop the propulsion systems for the early aircraft rockets. The early rockets used gun powder for propellant, but soon transitioned to the use of nitroglycerin-nitrocellulose double base propellants for propulsion. These early development efforts are portrayed as well as subsequent development of high performance more environmentally friendly cast propellants. Also presented are the liquid propellant rocket development activities including the soft landing vehicle (SLV) which

Object ID	Title	Author	Summary
			was an effort to take advantage of the throttling capabilities offered by liquid propellants. The energetic material and pyrotechnic development efforts and facilities are shown. This includes warhead developments such as that for early missiles and most recently the warhead for the Tomahawk missile that meets Navy goals for explosive units that are benign to outside stimuli. There was also a highly classified, closely related, but separate facility, the Salt Wells Pilot Plant. This was built by the Atomic Energy Commission Manhattan Project to support the development and manufacture of non-nuclear explosive components for the early atomic bombs. Later, after the AEC left, it was integrated with the China Lake Pilot Plant into one facility.
2006.307.013	Flying Machines, The	Balnicke, Janelle	The selection of short documentaries produced by the Smithsonian Institution uses its collections as subject material. The documentaries work surprisingly well. At first, one is put off by the glossy video image and the seemingly limited scope of the production, but the programs are crammed with information and tempered by pleasant, neighborly interviews with museum staff members and scientists. The knowledge provided ranges from basic scientific concepts to intriguing trivia. The six discs are all formatted in CAV. The utility of the standard play encoding is questionable. Because of the videotape source material, still images involving movement are blurry. The picture transfers range from super sharp (National Zoo and Insects) to mildly blurry (Gems and Minerals). Generally they are fine and support the viewing of minute details on a number of varied objects. The sound is in decent shape, and there is usually a pleasant background score.

Object ID	Title	Author	Summary
			Most of the programs last about an hour. It is also worth noting that the programs seem to contain a hidden agenda, emphasizing and selling the Smithsonian as an active participant in world research programs, combating the Institution's common image as "the nation's attic." The producers do an exceptional job of labeling all the aircraft appearing in old film clips on Flying Machines, subtitled Preserving the Machines That Enabled Us to Fly . The program gives a rich, thumbnail history of flight, and also details how the Smithsonian is actively preserving aircraft. The show is loaded with great photos and clips, making the presence of the CAV encoding the most advantageous in the series. (LaserDisc Review from http://www.dvdlaser.com)
2006.307.014	Aircraft Carrier	Rossiter, Mike	NOVA experiences the relentless, round-the-clock life aboard the US Navy aircraft carrier, Independence-where every day is a constant drill of launching and landing aircraft atop a floating city of 5,000 people. The action includes Top Gun mock combat exercises and live-ammunition patrols over Iraq. Original broadcast date: 04/19/94 Topic: technology/weapons & warfare
2006.307.015	Disguises of War	None Stated	NOVA takes the wraps off the art of deception in war—from simple camouflage to the expensive, radar-evading technology embodied in the Stealth bomber. Original broadcast date: 02/06/90 Topic: technology/weapons & warfare
2006.307.016	War Machines of Tomorrow	Klein, Larry	NOVA travels to the testing ranges and training grounds for a leaner, meaner and more effective United States

Object ID	Title	Author	Summary
			military force that can fight and win on almost any battlefield in the world. One innovation in the works: super-accurate "brilliant" weapons, designed as successors to the smart munitions used in the Gulf War. Original broadcast date: 02/20/96 Topic: technology/weapons & warfare
2006.307.017	Top Gun and Beyond	None Stated	Today's sophisticated fighter jets can almost fly themselves, but well-trained pilots are still needed to win air battles. NOVA looks at how planes and pilots are adapting to high technology. Original broadcast date: 01/19/88 Topic: technology/aeronautics & flight
2006.307.018	Codebreakers	Johnson, Brian	NOVA delves into the history of secret communications and the people who wrack their brains to decipher them. The program probes the most celebrated of all cryptographic coups: the breaking of the World War II codes used by Japan and Germany and how codebreaking helped shorten the war. Original broadcast date: 01/18/94 Topic: technology/weapons & warfare
2006.307.019	Battle Alert in the Gulf	None Stated	At the height of tensions in the Middle East, the United States placed a huge armada at ground zero in the Persian Gulf. This strategic move was without precedent during peace time operations—a big stick waved at a defiant Saddam Hussein. In an ironic twist of timing, at the center of this massive military force was the Navy's oldest and most celebrated aircraft carrier, the USS Independence, on her final voyage, and the newest, the highly sophisticated nuclear powered aircraft carrier, the USS John C. Stennis, on her maiden voyage. Join NOVA as it moves with exclusive access throughout the fleet, from

			carriers and cruisers to submarines and jet fighters. Follow the strategy makers, fighter pilots, Aegis cruiser captains and fast attack submarine crews as they contend with a hostile Iraq and a new battlefield. NOVA examines up-close a new and powerful technology, tasked with a new assignment, a Blue Water force designed for global confrontation in a post-Cold War scenario. Has US war capability and technology kept pace with a changing battlefield? Original broadcast date: 02/23/99 Topic: technology/weapons & warfare
2006.307.020	Pearl Harbor : Surprise and Remembrance	Johnson, Tom	The shock of what happened on December 7, 1941 has made Pearl Harbor a synonym for deceit and unpreparedness. Produced for the 50th anniversary, this examination of events shows the attack could have been foreseen -- the US and Japan had been on a collision course for years. A minute-by-minute account, on both sides of the Pacific, leading up to the surprise attack that Sunday morning. Narrator: Jason Robards Running Time: 88 minutes
2006.307.021	Echoes of War	None Stated	The atomic bomb might have ended World War II, but radar was the quiet miracle that won battles. NOVA tells the little-known wartime history of radar. Original broadcast date: 10/24/89 Topic: technology/weapons & warfare
2006.307.022	USS Wisconsin: The Last Battleship/Battleship Texas: The Lone Star Ship	None Stated	USS Wisconsin: The Last Battleship This program chronicles the USS Wisconsin, defining its place in history and profiling the men who went to war on its decks. It includes archival footage of the USS Wisconsin in action. Viewers discover why this ship, now retired from

Object ID	Title	Author	Summary
			active service, is the most unique battleship in the world, and witness the world's only 16-inch guns. Finally, sailors from three wars reminisce about their wartime experiences. Battleship Texas: The Lone Star Ship (2001) More than 120 ships entered service into the United States Navy during the beginning of the 20th century. Only one survived to the end. This forty-six minute long documentary explores the famous and news-making history of the USS Texas, BB-35, the very last surviving Dreadnought-style ship in the entire world and the only ship left to have actively served in both world wars. The program begins with the construction of the famed ship, named for the great state of Texas, and her commission in 1914. The story continues as the new ship, barely finished, was sent to Mexico to stop a terrorist uprising. Interviews with military historians give insight to her incredible engineering attributes such as being the first battleship class with 14" guns - the largest guns in the world at time of completion; being the first battleship class in the US Navy to carry radar; being the flagship of the Northern Attack Group during the North African landings in 1942. Moving through her exploits in World War I, this action-packed documentary moves into even more incredible tales of heroism as we explore the battleship's involvement in World War II. In addition to emotion-filled interviews by veterans who served aboard her, telling of nightmarish kamikaze attacks and watching the heroic raising of the US flag on top of Mt. Suribachi on Iwo Jima in 1945, this documentary also contains journalistic gold - a candid talk with legendary reporter and war correspondent, Walter Cronkite, who was assigned to the Texas in 1942

Object ID	Title	Author	Summary
			to cover the action in North Africa in his very first ground action war correspondence. The program ends with the decommission of the mighty battleship in 1948, when she was transported to a small town outside Houston, Texas, to begin her second career as a museum and memorial to the men and women who served this country in the name of freedom. Summary written by Doug Murray (skypup@flash.net)
2006.307.023	Spy Machines	None Stated	On the 25th anniversary of the Cuban missile crisis, NOVA investigates the spy planes and satellites that played a critical role in history and influence arms control today. Original broadcast date: 10/13/87 Topic: technology/weapons & warfare
2006.307.024	Satellite Sky, The	Stone, Robert	Few events shocked America more than the news in 1957 that Russia had launched the first satellite. It was an assault on our national pride, even a threat to national security. Using news reels, commercials, television shows, government films, and science fiction movies, the film presents a uniquely impressionistic history of the early years of the Space Race.
2006.307.025	Submarines, Secrets & Spies	Buckner, Noel	At the height of the Cold War, US subs gathered secrets that neither spies nor satellites could expose. Until recently, almost nobody knew the hidden history of their tragedies and triumphs. As the US strove for supremacy in the Cold War, it pushed submarine technology to its limits. Breakthroughs led to unparalleled triumphs of espionage. And, missteps cost hundreds their lives. With recently declassified film, NOVA lifts the veil on tragic and mysterious submarine accidents and their high-risk spy missions that helped win the Cold War. Along with celebrated oceanographer and explorer, Robert Ballard

Object ID	Title	Author	Summary
			(discoverer of the Titanic), NOVA goes in search of clues to two tragedies of the Cold War, the wrecks of the nuclear submarines Thresher and Scorpion. Recently declassified footage gives a unique glimpse of the wrecks and a chance to investigate the catastrophic accidents that overtook these subs and their crew. Original broadcast date: 01/19/99 Topic: technology/weapons & warfare
2006.307.026	Remember Pearl Harbor	None Stated	The program is an oral history of the attack by the Japanese on Pearl Harbor in December of 1941. The narration mixes some basic facts and some well-chosen analytical insights with personal reminiscences from survivors and from the correspondence of those who have not survived. To make the program marketable, Norman Schwarzkopf appears briefly to give his opinion on the strategies used by the Japanese, and a number of actors, such as Dustin Hoffman and Jack Lemmon, read some of the reminiscences in voice-over. David Byrne has done the musical score. More information about the political climate which led to the attack might have been included, but for an hour program the documentary covers a lot of ground. Anecdotal references prevent a detailed summary of the scope of the attack, but a sense of the mood before, during and after is very clearly conveyed. The most interesting sequence concerns the first American pilots to die from friendly fire. Returning airborne to the base after the attack had passed, they were victims of the hysteria that it had ignited. One also gets a good sense of why the attack on Pearl Harbor seems so unique as a human disaster, at least in American terms. Because it was a military location, the victims formed an unusually comprehensive cross-section of all America, and so

Object ID	Title	Author	Summary
			the attack on a territorial outpost really struck at the heart of the United States. Rare documentary footage sometimes appears in slow motion, but the transfer of the film to disc appears to make no further distortion on the original source material. The monaural sound is fine. (LaserDisc Review from DVDLaser.com)
2006.307.027	War From the Air	None Stated	NOVA explores how science and technology play a major role in the design of weapons of war and the development of strategies for their use. Original broadcast date: 01/05/75 Topic: technology/weapons & warfare

Object ID	Title	Author	Summary
	Navy at China Lake (Part 1 of 2)		A History of the Navy at China Lake A 3-HOUR VIDEO PRODUCTION celebrating the 50th anniversary of the Navy's premier weapons research, development, test, and evaluation establishment, Secret City traces the history of China Lake from the 1943 founding of the Naval Ordnance Test Station through peace and war and through parties and politics. The China Lake Museum Foundation is making this excellent production available to the public. SECRET CITY COMBINES actual laboratory, test range, and combat footage and photos--some never before released to the public--with over 50 interviews of noted China Lakers and a wealth of historical documentation to tell the story of this huge Navy base in the middle of the desert--its laboratories and ranges, its on-board community, its unparalleled accomplishments, its unique heritage. PART I OF SECRET CITY centers on the WWII establishment of NOTS, its early growth, its involvement in the Manhattan Project, and the building of a full-scale military-civilian community far from any metropolitan center. Early rocket programs, such as Tiny Tim, and the foundations of the China Lake philosophy are highlighted, as is the Korean War crash rocket program Project Ram. Part I also includes the fascinating history of the surrounding area, from the early Shoshone inhabitants to the coming of the Navy, and of the outside-the-gate communities of Ridgecrest and Inyokern.

2006.307.043	Spies that Fly	Klein, Larry	In the air war in Afghanistan, a 50-foot-wingspan plane known as the Predator flew high over Taliban positions, enabling U.S. commanders to direct lethal fire with pinpoint accuracy. What's different about Predator is that it flies by remote control, with no pilot on board to get in harm's way. In the wake of its success, the military is developing an incredible range of "smart" robotic planes, from tiny flyers that can fit in a pocket to soaring jets that fly halfway around the world. The next generation of pilotless planes will be capable of far more than aerial spying and in time may revolutionize the way we fight all future wars. In "Spies That Fly," NOVA presents the latest hot designs - including those from footage freshly released by the Pentagon - and reveals some newly declassified chapters from the exciting history of airborne spying. Original broadcast date: 1/7/2003 (Companion Website: http://www.pbs.org/wgbh/nova/spiesfly/)
2006.307.044	Search for Battleship Bismarck	None Stated	The battleship Bismarck, the pride of the Nazi navy, was thought, like the ill-fated Titanic, to be unsinkable. When it left port in May 1941, even the formidable British navy professed to be nervous, and the rallying cry "Sink the Bismarck!" was born.

Object ID	Title	Author	Summary
			Amazingly, just two weeks into its maiden voyage, the Bismarck was spotted, torpedoed, and sunk by the British in the North Atlantic, an almost unbelievable turn of events--as crucial a turning point in World War II for the Germans, according to one survivor interviewed in this video, as Pearl Harbor was for the Americans. In 1989 Dr. Bob Ballard, the man who discovered the Titanic, and a crew painstakingly searched a 100-square-mile area off France, and after some heartbreaking near misses, ultimately found the remains of the once-glorious ship. The video cuts effectively between historic footage, interviews with British and German survivors, and scenes from the Ballard expedition, expertly woven together to paint a complete portrait of the sinking and its aftermath. Fans of Titanic and World War II buffs especially will be fascinated. --Anne Hurley Product Description "Sink the Bismarck" was the cry as British forces searched the Atlantic for the German navy's most powerful vessel. The pursuit ended on May 27, 1941, in a battle that plunged the Bismarck into waters nearly three miles deep, taking with it more than 2,000 lives. Almost half a century later, explorer and scientist Dr. Robert D. Ballard, who discovered the sunken S.S. Titanic, searched the Atlantic for the infamous Bismarck. On June 8, 1989, he located the sunken ship, 600 miles off the coast of France. National Geographic looks back at the first - and last - mission of the Bismarck and talks with survivors of the notorious World War II battle. Then, in its climactic chapter, SEARCH FOR THE BATTLESHIP BISMARCK reveals exclusive footage of this remarkable undersea exploration. (from Amazon.com)

2006.307.069	Warships of the Second World War	Fitzsimons, Bernard (ed)	Whereas the ar of 1914-1918 had made coear the effectiveness of naval blockade in limiting an industrial nation's capacity to wage total war, what could be only dimly foreseen in 1939 was the crucial role of the aircraft and the submarine in the new naval strategy. This book traces the development of naval warfare from 1939, when the outbreak of war found both sides largely unprepared.
2006.307.070	Submarines Since 1919	Preston, Antony	About this Book : In both the First and Second World Wars, the submarine came close to winning a decisive victory. Twice, it almost succeeded in cutting off Britain's supply routes and completely crippling the Allied war effort in Europe. Today, however, those achievements pale in comparison with the almost limitless power of the ICBM-armed nuclear submarine. In this book we take up the story of the submarine at the end of the First World War, when it had uncontestably claimed a major place in the arsenal of any military-minded nation. We trace its development in the inter-war period, its vital role in all the major theatres of the Second World War. And, through Antony Preston's readable and authoritative text, and John Batchelor's magnificent illustrations we follow the story up to the present day.

2006.307.077	A-6 Intruder	Sayenga, Kurt	This tape provides a lively and informative overview of the various planes employed by the United States and its coalition allies during the 1991 Gulf War, focusing on how particular tasks in the air campaign were fulfilled by specialized planes. The video examines the tactical application of such planes as the European Tornado bomber, whose low-level tactics made its pilots especially vulnerable; the American A-6 Intruder, a fighter-bomber that first flew in the early 1960s, and which evolved from flying with "vacuum tubes to microcircuits"; the F-16 Falcon, a sleek fighter that became the U.S. Air Force's workhorse in the Gulf; and the A-10 Warthog, a plane possessing no glamour that proved lethal as a "tank-killer." Relying on interviews

Object ID	Title	Author	Summary
			with pilots, this video provides a wealth of detail about the various planes, from their inception on the drawing board to their deployments in the Gulf, and it's a treat for those who are fascinated by the technical aspect of jets. However, it also makes a responsible effort to portray the air campaign in the Gulf as a deadly and dangerous business, not the clean "Nintendo war" some observers thought it to be. For instance, there is a segment on the controversial air attacks on the Iraqi column retreating from Kuwait in the final hours of the war. Footage of jets streaking through brilliant blue skies is balanced with some thoughtful mention that these sleek and beautiful machines are also very deadly weapons. --Robert J. McNamara (from Amazon.com)
2006.307.079	Pearl Harbor, Vol. 1 : Tora, Tora, Verklan, Laura (writer, director) Tora : The Real Story of Pearl Harbor		Three volume set. Volume 1--sets the stage for the attack and shows scenes from the attack, Volume 2--aftermath of the attack, and Volume 3--chronicles the life of Admiral Chester Nimitz , (from Amazon.com:) This History Channel production provides an in-depth look at the Japanese attack on the American Pacific fleet in Pearl Harbor on the fateful day of December 7, 1941. The documentary begins by providing a background to the eventual conflict in the Pacific, noting how Japan had been waging a war of conquest in China since the early 1930s. As a power struggle with the U.S. loomed on the horizon, the Japanese built a formidable navy marked by an innovative utilization of carrier-based aircraft. Special attention is given to Admiral Yamamoto, who had studied at Harvard and admired America but vigorously planned the assault on America's naval might. The attack on the morning of

Object ID	Title	Author	Summary
			December 7 is explained tactically, and films shot at Pearl Harbor during the Sunday morning air raid, including shots of the massive explosion triggered by a bomb hit on the battleship USS Arizona, provide dramatic proof of how devastating the attack was. Personal stories of the battle are recalled in interviews with veterans from both sides. Various revisionist theories about how America had warning of the attack and sacrificed Pearl Harbor are quickly dismissed, and a closing segment focuses on Japanese and American veterans who have reconciled at a reunion (and some American vets who would have no part of that). An additional documentary provides a biography of Admiral Chester Nimitz, who rebuilt the U.S. Pacific fleet following Pearl Harbor, and a bonus program features brief biographies of other American commanders in the Pacific. --Robert J. McNamara ----- " He held the Navy together while America struggled to rebound from Pearl Harbor. His strategies eventually led the U.S. to victory in the greatest conflict in history. When the United States was plunged into World War II, a courageous and resourceful leader was needed to take command of the Navy in the Pacific. He had to weld a shattered fleet into a hard-hitting force the most devastating naval power in history. The man chosen for the job was Admiral Chester Nimitz. From his childhood in Fredericksburg, Virginia to the moment when he signed the Japanese Surrender he had helped bring about, BIOGRAPHY chronicles the life of this fabled admiral. Military experts explore his brilliant strategies and great victories, while friends, family and colleagues recall the man behind the uniform. This is the stirring story of a man who

2006.307.085	F/A-18 Blue Angels	Sakamoto, Kunihiro	Popular worldwide, the U.S. Navy flight demonstration team, known as the "Blue Angels" awes air-show audiences with thrilling aerobatics and virtuoso flying. Expert pilots, drawn from the elite ranks of Naval Aviation, fly the Navy's F/A-18 Fighter, an aircraft that blends incredible power with precise and dynamic handling. The show is a rousing demonstration of discipline and skill. From the crisp drill of the pilots climbing aboard their planes, through the precision taxi and send-off by the ground team, everything is choreographed to thrill. (from Amazon.com)
2006.307.086	Lost at Sea: The Search for Longitude	Jones, Peter	It was one of humankind's most epic quests - a technical problem so complex that it challenged the best minds of its time, a problem so important that the nation that solved it would rule the economy of the world. The problem was navigation by sea—how to know where you were when you sailed beyond the sight of land - establishing your longitude. While the gentry of the 18th Century looked to the stars for the answer, an English clockmaker, John Harrison, toiled for decades to solve the problem. His elegant solution made him an unlikely hero and remains the basis for the most modern forms of navigation in the world today. This film will be both a celebration of Harrison's invention and an adventure story. An expedition on a period sailing vessel as it sails the open sea will demonstrate the life and

Feature Film USS Caine - destroyer/mine sweeper Humphrey Bogart, Jose Ferrer, Van Johnson, Fred MacMurray
2006.307.089	Apollo 13: To the Edge and Back	Buckner, Noel	Produced a year before Ron Howard's film of the doomed space mission hit Hollywood, To the Edge and Back brings the real faces of the Apollo 13 saga to the forefront. Astronauts Jim Lovell and Fred Haise talk about the flight (Jack Swigert died in 1982) while the technicians, including mission operations director Chris Kraft and flight director Gene Kranz, recall the moon shot and the near-fatal explosion. It's still hard to make the story fill an hour, so there's time to examine the space race in general and show previous missions. The "showing" part is the program's weakness. Ron Howard used no real footage in his film, which was smart since there really isn't a lot of interesting footage, just the usual launch and TV transmissions. Simple

Object ID	Title	Author	Summary
			computer animations fill in the gaps, yet even the money shot--a still picture of the damaged spacecraft--is not shown. Still, this is a key document for those digging to see the "real" behind the story. It works as a wonderful "extra" to the Oscar-winning Hollywood film. --Doug Thomas Product Description "I could see a gaseous substance escaping... That's when it definitely occurred to me that we were in deep trouble... Very shortly, we'd be completely out of oxygen. These were the thoughts of James Lovell and the rest of the crew of Apollo 13 as they heard the ominous explosion that robbed them of most of their oxygen, food and water - 200,000 miles from Earth. Apollo 13: To the Edge and Back tells the gripping, true story of the catastrophic flight of the Apollo 13 and the heroic struggle to bring the astronauts back alive. With first-hand accounts from the pilots, their families, and the people of mission control, it documents a thrilling struggle against time and all odds and serves as a reminder that, in the words of James Lovell, "We do not realize what we have on Earth until we leave it." (from Amazon.com)
2006.307.090	Flying Machines, The	Balnicke, Janelle	(LaserDisc Review from http://www.dvdlaser.com:) The selection of short documentaries produced by the Smithsonian Institution uses its collections as subject material. The documentaries work surprisingly well. At first, one is put off by the glossy video image and the seemingly limited scope of the production, but the programs are crammed with information and tempered by pleasant, neighborly interviews with museum staff members and scientists. The knowledge provided ranges from basic scientific concepts

Object ID	Title	Author	Summary
			to intriguing trivia. The six discs are all formatted in CAV. The utility of the standard play encoding is questionable. Because of the videotape source material, still images involving movement are blurry. The picture transfers range from super sharp (National Zoo and Insects) to mildly blurry (Gems and Minerals). Generally they are fine and support the viewing of minute details on a number of varied objects. The sound is in decent shape, and there is usually a pleasant background score. Most of the programs last about an hour. It is also worth noting that the programs seem to contain a hidden agenda, emphasizing and selling the Smithsonian as an active participant in world research programs, combating the Institution's common image as "the nation's attic." The producers do an exceptional job of labeling all the aircraft appearing in old film clips on Flying Machines, subtitled Preserving the Machines That Enabled Us to Fly . The program gives a rich, thumbnail history of flight, and also details how the Smithsonian is actively preserving aircraft. The show is loaded with great photos and clips, making the presence of the CAV encoding the most advantageous in the series.
2006.307.091	USS LSM-LSMR Association Request for Money and Volunteers	Illsley, Rolf	This is a DVD copy of VHS 2006.307.034. This video was produced for the annual reunion of the USS LSM-LSMR Association to be held in San Diego, CA in 1997. The video opens with scenes from a LSM ship. Then a narrator talks about the history of the first reunion in 1989 in Norfolk, VA, the history of LSMs after World War II, and the attempts to get a LSM to restore. The end requests people to send money and to volunteer their time to restore the LSM-45. (from

2006.308.003	McDonnell Douglas Aircraft Since 1920, Volume I	Francillon, René J.	On its first publication in 1979 this book was acclaimed as an important contribution to aviation history and one of the most comprehensive of all the Putnam manufacturers series. It has been out of print for nearly four years, during which time McDonnell Douglas has continued to produce large numbers of aircraft and has also acquired Hughes' aviation interests. Consequently the revisions and additions necessary to bring the book right up to date resulted in a work beyond the scope of a single volume, so it has been divided into two parts. This, the first volume, covers the history of Douglas and its associate companies, and details all of its aircraft up to the 1967 merger with McDonnell. The division comes with the DC-9 80 series, which is mentioned briefly, but full coverage is given in Volume II as the MD-80, along with the whole DC-10/MD-11 programme. The second volume — currently in preparation — will cover all McDonnell aircraft, all the aircraft of the newly acquired Hughes company, post-1967 MDC products, and the contributions of McDonnell Douglas to missile and space activities. Opportunity has been taken in both parts to incorporate the latest information, to add and substitute new 3-view drawings and photographs, and to correct the few errors which a work of this magnitude inevitably

2006.308.004	McDonnell Douglas Aircraft Since 1920, Volume II	Francillon, René J.	A lot has happened in the aviation world since this book was published in 1990. McDonnell Douglas which was formed with a merger of McDonnell and Douglas companies in 1967 was itself bought out by rival Boeing. This is a book for serious aviation buffs. Facts, data, statistics abound about every plane, helicopter or airliner built by MD from 1920-1990. The DC-3, Phantom II, Skyhawk and Harrier are just a few. Of course, there is a short history of the founding of each company and the key designers & engineers. Clear B&W photos (although small) and line drawings help the reader see each plane. It's a shame the aircraft industry has shrunk so much. Only two companies remain - Boeing & Lockheed. This book captures a day when there were many more brilliant designs, rapid growth in aviation technology, quicker design to development times. Very good reference book for anything ever made by McDonnell or Douglas. (from Amazon.com)
2006.309.001	NC-4, The : The First Transatlantic Flight	None Stated	This has been scanned and a digital version is available under Library 1 Onedrive\Emanuals. The NC-4 was a Curtiss NC flying boat which was designed by Glenn Curtiss and his team, and manufactured by Curtiss Aeroplane and Motor Company. In May 1919, the NC-4 became the first aircraft to fly across the Atlantic Ocean, starting in the United States

Object ID	Title	Author	Summary
			and making the crossing as far as Lisbon, Portugal, in 19 days. This included time for numerous repairs and for crewmen's rest, with stops along the way in Nova Scotia, Newfoundland, and twice in the Azores Islands. Then its flight from the Azores to Lisbon completed the first transatlantic flight between North America and Europe, and two more flights from Lisbon to northeastern Spain to Plymouth, England, completed the first flight between North America and Great Britain. The accomplishment of the naval aviators of the NC-4 was somewhat eclipsed in minds of the public by the first nonstop transatlantic flight, which took 15 hours and 57 min and was made by the Royal Air Force pilots John Alcock and Arthur Whitten Brown, two weeks later. A pictorial summary of the USS Midway crew on a deployment from Alameda NAS to the western Pacific with the Seventh Fleet from 8 November 1963 to 26 May 1964 with CAW -2 consisting of VF-21, VF-24, VA-22, VA-23, VA-25, VAH-8, VAW-11, and VFP-63 embarked aboard. Port visits included Hawaii; Subic Bay, The Republic of the Philippines; Hong Kong; and Sasebo, Beppu, Iwakuni, and Yokosuka, Japan.
2006.315.001	Winning Edge: Naval Technology in Action, 1939-1945, The	Poolman, Kenneth	In this surprisingly lively approach to recording the impact of technology on the war at sea, Kenneth Poolman follows comprehensive

Object ID	Title	Author	Summary
			descriptions of each new technical development with dramatic examples of its use in action. To combat the savage campaign mounted by German submarines and surface raiders to keep vital supplies from the Allies, Allied navies deployed new weapons like ASDIC (sonar), RDF (radar), high frequency direction-finding, forward-firing mortars, and rocket projectiles, all thoroughly examined by the author along with the U-boats' use of acoustic torpedoes, Schnorkel tubes to breathe underwater, radio-controlled missiles, and supersonic undersea detectors in a war that became a conflict of technologies. This book also covers the use of radar in the Pacific against the Japanese "long lance" torpedoes and shows how U.S. submarines overcame their own faulty torpedoes to decimate enemy shipping, and how carrier airpower, controlled by multichannel high-frequency radio, dominated surface actions. He details the development and use of sensitive listening stations that relayed enemy messages to cryptographers. The special amphibious craft that put troops ashore in all theaters are included in the book as well.
2006.315.002	Grumman Story, The	Thruelsen, Richard	The Grumman Aircraft Engineering Corporation, later Grumman Aerospace Corporation, was a leading 20th century U.S. producer of military and civilian aircraft. Founded on December 6, 1929, by Leroy Grumman with Jake Swirbul and William Schwendler, its independent existence ended in 1994 when it was acquired by Northrop Corporation to form Northrop Grumman. (from Wikipedia)
2006.315.003	Tail End Charlies!	Erickson, Roy D. "Eric"	(from http://www.turnerpublishing .)

Object ID	Title	Author	Summary
			com:) Category: Air Force History Description: This stirring story of WWII Navy fighter pilots has a cockpit-seat perspective, written by former LTJG Roy D. "Eric" Erickson, who flew from the USS Intrepid. The title refers to both his position within a formation - the last in a formation of four planes - and the place in history occupied by him and his squadron mates - flying against the Japanese at the end of the war. Illustrated with numerous photos and maps. Indexed. 160 pages, 8 1/2" x 11" Hardbound
2006.315.004	Historic Naval Aircraft: From the Pages of Naval History Magazine	Polmar, Norman	(from Amazon.com:) Review "...every naval aviator will want to have and read from cover to cover." -- John Lehman, former secretary of the Navy "Photos accompany rich history on each aircraft type. A 'must' for the in-depth military, aviation, or specialty naval library." -- LIBRARY BOOKWATCH --This text refers to the Hardcover edition. Product Description Norman Polmar's book is a behind-the-scenes look at thirty-two important U.S. Navy and Marine Corps aircraft. These entries are based on the author's "Historic Aircraft" column, appearing in Naval History. The aircraft selected, some famous and others virtually unknown, represent a mix of types: fighters, dive-bombers, patrol planes, transports, trainers, and helicopters, including the Pitcairn XOP-1 autogiro, the first rotary-wing aircraft to be operated by the Navy and Marines. They span the period from the Vought VE-7, the first type to take off from the Navy's first carrier, the USS Langley, in 1922, through the Grumman A-6 Intruder, which flew in the Vietnam and Persian Gulf

Object ID	Title	Author	Summary
			Wars before being retired from service in 1996. Prominently featured also are the classic aircraft that the Navy and Marines flew to victory in World War II. Combining technical detail with the human dramas of flight and aerial combat, Polmar makes each historic aircraft literally fly off the pages. This book is a must-have for every aviation enthusiast.
2006.315.005	Aerodynamics for Naval Aviators	Hurt, Hugh H.	Presents the elements of the applied aerodynamics and aerodynamical engineering which relate directly to the problems of flying operations. We have another copy filed as NAVAIR 00-80T-80, 1965.
2006.315.006	Weekend Warriors	Cooper, Paul L.	Review . . .Cooper's narrative gives a different viewpoint from many accounts of action during the war. Weekend Warriors makes a contribution to the growing literature on the Korean conflict, which hopefully will eventually shed its sad moniker as "America's forgotten war." -- Naval Aviation News, December 1997 Product Description Winston Churchill called them "twice a citizen" -- the military Reservists. This account of their contribution in the Korean War is written from a citizen/sailor viewpoint. Reserve fighter squadron VF-871 from Naval Air Station Oakland, California, is followed from the author's call to active duty in July 1950 and his preparation and service in Korea aboard the aircraft carrier Princeton, to his release to inactive duty in September 1951. Cooper candidly evaluates the squadron's performance based on the quality and depth of training and notes the continuing drama surrounding the 38th Parallel. "A formal peace treaty has never been signed and the two sides remain technically at war. The beat goes on." (from Amazon.com)

Object ID	Title	Author	Summary
2006.315.007	Fire in the Sky : The Air War in the South Pacific	Bergerud, Eric M.	Utilizing primary sources and scores of interviews with surviving veterans of all ranks and duties, the author recreates the fabric of the air war as it was fought in the South Pacific. He explores the technology and tactics, the three-dimensional battlefield , and the leadership, living conditions, medical challenges, and morale of the combatants. The reader will have a thorough understanding of how air power functioned in World War II from the level of command to the point of fire in air-to-air combat. Despite operating under primitive conditions in a largely unknown and malignant physical environment, both sides employed the most sophisticated technology available at the time in a strategically crucial war of aerial attrition.
2006.315.008	All the Factors of Victory : Admiral Joseph Mason Reeves and the Origins of Carrier Airpower	Wildenberg, Thomas	Spans naval developments from the Spanish-American War through World War II Addresses the development of carrier tactics in the U.S. Navy between the world wars Adm. Joseph Mason Reeves (1872–1948) took command of the U.S. Navy's nascent carrier arm during a critical period, transforming it from a small auxiliary command in support of the battle line into a powerful strike force. Until the carrier commanders of World War II proved their mettle, Reeves's expertise in the use of the aircraft carrier in naval tactics was unequaled. All the Factors of Victory is the first full-length biography of this eminent naval officer. Publication Date: May 1, 2003 About the Author Thomas Wildenberg held consecutive appointments to the Ramsey Fellowship in Naval Aviation History at the National Air and Space Museum in Washington, D.C. He is the author of <i>Destined for Glory</i>:

2006.315.009	Sea Battles in Close-up : World War 2, Vol. 2	Grove, Eric	The Tale of a series of sea battles of World War II, including Narvik, Crete, Malta, Java Sea and Sirte. It includes the attack on the Tripitz and the engagements at Leyte Gulf and Philippine Sea.
2006.315.010	Above and Beyond	Weiland, Charles Patrick	This is the World War II memoir of Charles Patrick Weiland, a South Dakota farm boy who decided in 1940 to join the Marines and see the world.
2006.315.011	Eagle Against the Sun : The American War with Japan	Spector, Ronald H.	Spector vividly recreates the major battles, little-known campaigns, and unfamiliar events of this brutal 44 month struggle. He reveals that the US had secret plans to wage unrestricted submarine warfare against Japan months before Pearl Harbor and demonstrates that MacArthur and his commanders ignored important intercepts of Japanese messages that would have saved thousands of lives in Papua and Leyte. He skillfully takes the reader from top-secret strategy meetings in Washington, London, and Tokyo to distant beaches and remote Asian jungles with battle-weary GIs.
2006.315.012	Captain Hook : A Pilot's Tragedy and Triumph in the Vietnam War	Foster, Wynn F.	On 23 July 1966 Wynn Foster was flying his 163rd combat mission of the Vietnam War when antiaircraft artillery hit his A-4 Skyhawk and severed his right arm at the elbow. Bleeding profusely, his still-gloved hand lying on the starboard console, Foster flew his plane out over the Tonkin Gulf and ejected. As recounted for the first time in this book, Foster's story of his injury and rescue is spellbinding. But Captain Hook is more than a description of an air casualty. It is an honest insider's look at naval aviation during the early Vietnam War years. Foster tells of his experiences in 1965-66

Object ID	Title	Author	Summary
			as executive officer and commanding officer of VA-163, stationed aboard the USS Oriskany, including the shoot down of James Stockdale's A-4. Describing the people he worked with and led, he details their frustrations and despair as well as their moments of joy and camaraderie. Foster also provides an incisive evaluation of the medical care he received after his own ordeal, and explains how his aggressive response to his life-altering injury threw him into conflict with his care providers and officers and bureaucrats in the Navy's hierarchy. Confident that he could continue to be of service to the Navy, he embarked on a long legal battle to remain on active duty, finally winning the right to complete his naval career. Promoted to captain and awarded the call sign "Captain Hook," he made two subsequent deployments to the Western Pacific. Foster's case is important because he was willing to test society's preconceptions about the handicapped, and because he was willing to test his own limits. His ultimate success provides an uplifting ending to a fascinating story and stands as a testament to the indomitability of a positive, never-say-die spirit. Cover photos: U.S. Navy Jacket design: Pamela Lewis Schnitter (from dust jacket flap)

2006.315.013	Corsair : The F4U in World War II and Korea	Tillman, Barrett	This is the remarkable story of a plane which became a legend---a sleek aircraft with bent wings which was a day fighter and a night fighter, a dive bomber and a reconnaissance plane, and which flew both land-based and carrier-based missions. This fast-paced history of the Corsair begins with the nerve-wracking test flights of the prototype in 1940 and concludes with the

2006.315.014	Heroes of Our Time : 239 Men of the Vietnam War Awarded the Medal of Honor, 1964-1972	Jordan, Kenneth N. Sr.	Honduras F4Us which were still active 38 years later. (from schifferbooks.com:) Heroes of Our Time contains all 239 Medal of Honor citations such as this excerpt: ...His rifle ammunition expended, he seized two grenades and, in an act of unsurpassed heroism, charged toward the entrenched enemy weapon. Hit again in the leg, this time with a tracer round which set fire to his clothing, Sgt. Robinson ripped the burning clothing from his body and staggered indomitably through the enemy fire, now solely concentrated on him, to within grenade range of the enemy position. Sustaining two additional chest wounds, he marshalled his fleeting physical strength and hurled the two grenades, thus destroying the enemy position, as he fell dead upon the battlefield... Along with the citations are newspaper accounts of various battles. Heroes of Our Time is a look at the courage of American soldiers in Vietnam.
2006.315.015	In Bitter Tempest : The Biography of Admiral Frank Jack Fletcher	Regan, Stephen D.	Think of World War II naval commanders in the Pacific and certain names come to mind: Chester Nimitz, Raymond Spruance, William "Bull" Halsey. Their accomplishments have been well documented by historians and filmmakers. Yet there is another, more controversial commander among their ranks who has been largely overlooked - until now. In Bitter Tempest tells the story of Admiral Frank Jack Fletcher, who led U.S. forces at Wake, Coral Sea, Guadalcanal, and the Eastern Solomons. It is the first book to be written specifically to give Fletcher's perspective, using previously unreviewed personal papers along with numerous naval documents and records, some of which were formerly classified material. Fletcher's time at sea during World War II is set forth in vivid detail, from exciting victories to communications foul-ups to the tragic sinking

Object ID	Title	Author	Summary
			of his command vessel, the U.S.S. Yorktown. Did Fletcher make errors in judgment, as some of his critics have claimed, or was he primarily a victim of internal politics within the military? This volume helps clarify the issue. The biography chronicles Fletcher's life as a loyal career naval officer, starting with his childhood as scion of a locally prominent family in Marshalltown, Iowa, and including his attendance at the U.S. Naval Academy, where Nimitz, Spruance, and Halsey were among his classmates; his exemplary service at Vera Cruz and in World War I; and his assignments in Asia and in Washington, D.C., throughout the 1920s and 1930s, which allowed him to see firsthand the rise of Japan that brought the nation into World War II. The author also offers insights into the wartime U.S.-Russia Lend-Lease program in which Fletcher played unheralded but important roles as diplomat and supervisor. As Commander of North Pacific Forces, Fletcher efficiently ran army, navy, and army-airforce operations against the Japanese, while training Russian forces to take over U.S. ships. Japanese forces in the northern islands of Japan surrende [sic] Publication Date: January 1994

2006.315.016	On Course to Desert Storm : The United States Navy and the Persian Gulf	Palmer, Michael A.	EXECUTIVE SUMMARY: THE ROLE OF THE NAVY - This report highlights the role of the U.S. Navy in conjunction with the nation's other maritime forces--the Marine Corps and Coast Guard--in DESERT SHIELD/STORM. But neither of those operations could have been accomplished without the full participation of all services. Each service brought its strengths and special operational capabilities to bear as the situation required. The result was the most complex, fast-moving, successful, major joint power projection

Object ID	Title	Author	Summary
			operation in history. The six ships of the Middle East Force were on station in the Persian Gulf when the President decided to deploy additional forces to Southwest Asia beginning 7 August. The Independence battle group had steamed into strike range in the North Arabian Sea, and the Eisenhower battle group was transiting the Suez Canal to the Red Sea within strike range of Iraq. When United Nations sanctions were imposed, the U.S. Navy immediately commenced interception operations against ships headed to and from Iraq and Kuwait. We may never learn the extent to which on-scene naval forces influenced Saddam Hussein to stop short of invading Saudi Arabia. We do know that the sustainable combat capability and control of the sea provided by those naval forces afforded protection for the introduction of ground and air forces arriving in theater in response to deployment orders. The Navy's ability to control the seas was taken for granted, as it has been since 1945. That control makes it possible for us to deliver our troops and supplies safely to any area of conflict. The maritime superiority which enabled our victory was made possible by earlier sound investments in people, ships, aircraft and weapons systems. DESERT SHIELD/ STORM demonstrated again that sea control is fundamental to successful power projection. Because naval forces were on station and ready, we were never seriously challenged, and sea control was assured from the outset. Maritime superiority and forward deployment gave us another edge in DESERT SHIELD/ STORM. Only a nation possessing both unquestioned control of the

Object ID	Title	Author	Summary
			seas and significant experience operating in forward areas in close cooperation with the naval forces of our coalition partners could have provided the leadership for 23 nations whose naval forces participated. The ability of the U.S. Navy to operate effectively with so many other navies did not come quickly or easily. It was built over forty years of close cooperation with the navies of NATO and other allies. Familiarity with the geography and local navies was gained through a continuous presence in the Gulf since 1949. During the Persian Gulf "Tanker War" of 1987-88, the U.S. vividly demonstrated its military and political staying power to even the most skeptical critics within the Arab world. Operation EARNEST WILL laid the foundation for DESERT SHIELD/STORM. Multinational naval cooperation was demonstrated in many warfare areas but was most evident in the maritime interception campaign. Maritime interception was an important military and political tool from the outset. Enforcement of the U.N. sanctions weakened Iraqi forces prior to the conflict and imposed a heavy burden on Iraq's economy. Through April 1991, over 9200 merchant ships had been challenged, more than 1200 boarded for inspection, and at least 67 diverted for carrying prohibited cargo. Countless ships were deterred from on-loading Iraqi oil and other products for export. Iraq's GNP was reduced by half. The impact of the embargo was clearly felt by Iraqi soldiers in the trenches. The eroding effect on their morale and will to fight undoubtedly saved many coalition lives. The maritime interception effort continued even after cessation of offensive operations as a guarantee of Iraq's compliance with U.N. resolutions.

Object ID	Title	Author	Summary
			The contribution of strategic sealift was one of the major success stories of DESERT SHIELD/ STORM. Sealift investments of the 1980s paid great dividends. The early force arrival dates achieved by maritime prepositioning and fast sealift ships met or exceeded our most optimistic projections. Military Sealift Command (MSC) controlled ships delivered 3.4 million tons of cargo and 6.8 million tons of fuels--much of it moved half-way around the world. Over 90% of all cargo was transported into theater via sealift; more than 95% will return the same way. The five month build-up period during DESERT SHIELD allowed the Navy to overcome obstacles and build teamwork with the other services and our coalition partners required to meet the challenges which arose during combat. Once unleashed, a massive joint and combined force acted in unison to quickly eject Iraqi forces from Kuwait. Naval forces played an essential role. For example, about one third of all strike sorties were flown by Navy and Marine Corps aircraft. Six aircraft carrier battle groups and two battleships were simultaneously engaged. Cruisers, destroyers,battleships and submarines launched a combined total of 288 Tomahawk cruise missiles from the Red Sea and Persian Gulf against heavily defended key Iraqi facilities. About 85% of those missiles hit their targets with pin point accuracy, contributing to the early neutralization of Iraqi air defenses and reducing the risks for American aircrews. Naval forces literally eliminated the Iraqi Navy and projected power ashore. Surface combatants, helicopters, carrier-based aircraft, land-based P-3s, and our multinational naval partners all contributed to the

Object ID	Title	Author	Summary
			destruction of more than 100 Iraqi vessels. Amphibious forces conducted an impressive series of raids, feints and rehearsals which highlighted their exceptional responsiveness and flexibility and paved the way for a most successful deception operation. DESERT STORM once again illustrated the challenge of mine countermeasures, especially in a confined area like the Northern Persian Gulf. Finding and neutralizing mines is difficult under any circumstances. We cannot always afford to allow minelaying in international waters to go unopposed as we did in this case. There is no capability, either existing or projected, which could quickly neutralize over 1000 mines once laid. The U. S. Navy must possess the best mine countermeasures capability available. (from http://www.history.navy.mil/wars/dstorm/dsexec.htm)

2006.315.034	United States Naval Fighters of World War II in Action	O'Leary, Michael	A story of the war at sea in the vast Pacific theater. it appears paradoxical that some of the greatest sea battles of all time should have been contested not by a direct confrontation of the heavy ordnance of capital ships but by naval aviators in action often hundreds of miles from their carrier bases. This book vividly recalls the saga of these Naval and Marine airmen and the great machines they flew in the war that in daily encounters with the enemy promised less than an even chance of survival. The author made a penetrating technical analysis of such famous types as Corsair, Hellcat, Wildcat, Tigercat, and Bearcat. Even the Brewster Buffalo described by the author as an "unmitigated disaster" assumes the aura of the plucky fighter equal in spirit if not in construction and performance to the challenge of the air.

2006.315.037	Paddles! : The Foibles and Finesse of One WWII Landing Signal Officer	Harper, John A.	This autobiographical account of one young naval officer's brief World War II career as a carrier Landing Signal Officer details incidents and anecdotes, from the hilarious to the harrowing, drawn from the author's extemporaneous log, maintained during the advance of the Central Pacific fast carrier force toward the Empire of Japan, 1943-1945.
2006.315.038	Joint Air Operations : Pursuit of Unity in Command and Control, 1942-1991	Winnefeld, James A.	With the current downsizing of the U.S. military putting a premium on joint response to threats, this landmark study of joint U.S. air operations over the past fifty years provides timely information on a topic of vital concern. The most comprehensive single-volume discussion available, it examines six major air campaigns—Midway, the Solomon Islands, Korea, Vietnam, El Dorado Canyon (Libya), and Desert Storm—in a search for lessons learned that might be applied in the planning and organizing of future joint operations. The focus of the book is on the differences — at times bitter acrimony — among the services on the control and employment of theater air forces. With each service having an "air force" of its own, each with a distinctive doctrine, the study confirms that their views are often diametrically opposite and that joint doctrine has been slow to evolve. The authors, RAND Corporation analysts, are refreshingly objective and clear in addressing the problems and issues that continue to hamper effective joint air operations but point to the progress shown in Desert Storm, as indicated by their interviews with some fifty airmen, planners, and major commanders of the operation. Their recommendations for the future take advantage of the diversity inherent in U.S. air power while minimizing sources of disharmony.

Object ID	Title	Author	Summary
			Based on a RAND study published in 1991, this book has been expanded and revised to appeal to a broader audience and promises to stimulate discussion and debate on how to optimize the effectiveness of Us S. forces facing cuts in funding. It is must reading not only for military professionals but for military history enthusiasts and everyone interested in the nature of America's future air battles. (from dust jacket flap)
2006.315.039	Schirra's Space	Schirra, Wally	"Wally Schirra was born to a stunt pilot father and a wing—walking mother. From them he inherited his love for flying and his extraordinary skill at it, and they also blessed him with his irrepressible ebullience. They should not be blamed, however, for his equally irrepressible penchant for the pun, no matter how outrageous. Fortunately for humankind this tendency is not genetic by nature." - Walter Cronkite Since the early days of America's space program, when Cold War competition and the spirit of the New Frontier created a fever pitch of excitement about the conquest of space, the history of space research in the United States has been absorbing and controversial. In the wake of the Challenger disaster, many Americans have questioned NASA's direction and motives, but about one thing we remain certain: the astronauts who manned the first spacecrafts, [sic] who exhibited the "right stuff" as they confronted the dangerous and unknown, carved for themselves a unique place in history. The Mercury, Gemini and Apollo programs presented us with events that are benchmarks in the collective experience of America. "5chirra's Space" is the autobiography of the only

Object ID	Title	Author	Summary
			man to participate in all three of those pioneering programs. As a member of the crucial Gemini program, he became the first man to rendezvous with another space vehicle. Known for his practical jokes and operational expertise, he exemplified as well as anyone the daring, dramatic character of this new breed. In this revealing book, Schirra takes us into the inner sanctum of the early space program. He talks about the incredible competition at every stage of the process and the sometimes manic stunts of himself and his colleagues during training. He also offers an assessment of NASA's recent history that is sure to spark controversy, suggesting that the agency has moved away from the principles that led to its success. Irreverent, provocative, full of entertaining anecdotes, "Schirra's Space" is a chronicle of an important era in American history by one of the era's main protagonists. Richard N. Billings was a staff writer for Life magazine when Project Mercury got underway. Assigned to cover the program for a full year, he got to know the original seven well and helped ghostwrite the personal stories of the astronauts and their wives that appeared in Life. Since 1979 he has been a free-lance writer. He is the author of "The Plot to Kill the President" and "Sara and Gerald." 2006.315.048	Low Level Liberators : The Story of Patrol Bombing Squadron 104 in the South Pacific during World War II	Stevens, Paul F.	Signed by author The story of the U.S. Navy's utilization of the B-24 aircraft for long-range search and offensive armed-reconnaissance mission during World War II has not been fully told. For the employment of the B-24 Liberator in this role, it was redesignated a PB4Y-1 and painted Navy Blue. The airplane served the long range search role very very well. This book is a record of achievements rather than a scholarly report of history.
2006.315.049	Flattop : The Action-Packed Story of U.S. Aircraft Carriers, Past and Present	Gallagher, Barrett	Barrett Gallagher started this story of the American aircraft carrier during World War II when he was given orders by CNO to go aboard any ship or station in the Pacific to contribute to the photographic redord of the Navy at war. Lieutenant Gallagher found the carrier such a fascinating subject that for many years after his assignment for the Navy was completed, he continued

Object ID	Title	Author	Summary
			to take pictures of them. This colorful story of the carrier in action and the changes in design and operation that led to the emergence of the new Forrestal class and Enterprise, then under construction is told primarily in black and white photographs with minimal text.
2006.315.050	Whistling Death: The Test Pilot's Story of the F4U Corsair	Guyton, Boone T.	Whistling Death is the true story, by the test pilot, of the rush to produce the F4U Corsair, the Navy fighter that brought America air superiority over the Japanese Zero in World War II. Here is the crash program - complete with crash landings - powered by the dedicated men and women of the home front who designed and built this revolutionary, tide-turning airplane. Boone T. Guyton, an experimental test pilot at Chance Vought during and after World War II, flew 105 types of aircraft in 45 years as a pilot.
2006.315.051	Dauntless Dive Bomber of World War Two, The	Tillman, Barrett	A history of the Douglas dauntless dive bomber during World War II. Considered obsolete at the beginning of the war, it was the only carrier based-aircraft still in service as the war ended that was active when Pearl Harbor was bombed.
2006.315.052	Naval Air War, The, 1939-1945	Miller, Nathan	This is the history of naval air forces in action across the seas of the world and how they helped to determine the outcome of World War II. Descriptions of famous aircraft in combat, the daring actions of heroes, explanations of the development of the fast carriers, light carriers, and jeep carriers and their uses; the great sea battles and the national aims or strategies which caused them.
2006.315.056	Wildcat in WWII, The	Tillman, Barrett	• With a Foreword by Marion Carl, an ace with 16-1/2 victories in the Wildcat. • 113 photographs on quality stock. • Exploits of the British version, the Martlet. • Full appendices including data on both Navy and Marine Wildcat aces.

Object ID	Title	Author	Summary
2006.315.059	From the Cockpit : Coming of Age in the Korean War	Atkinson, Tex	An autobiography of a naval aviator who flew over 100 combat missions in the Korean War. Tex Atkinson flew F4U Corsairs and AD Skyraiders. He served on the USS Princeton and USS Boxer. An important contribution to the history of naval aviation with detailed and often chilling accounts of combat flying during the Korean War and of straight-deck carrier operations during that time. Includes excellent descriptions of the flying characteristics (and hazards) of the Corsair and Skyraider. Also a very human story with accounts of the author's growing up years in Hillsboro, Texas and his attendance at Southwestern University. There is an interesting account of a Willie Nelson concert to benefit the restoration of the Hill County courthouse which burned to the ground and was completely rebuilt to look like the original. Book includes two photo sections (32 pages total) of excellent personal and naval aviation photography. This is a much expanded and much higher quality edition than the paperback edition published by Publish America. DO NOT CONFUSE THE TWO. There is little comparison. Review "Tex Atkinson writes from the heart. It's like being enveloped in a wonderful spell. ...a must read - highly recommended!" -- Joe Weber, New York Times best-selling author and former Marine carrier pilot Tex writes from the heart. A must read. Highly recommended -- Joe Weber, New York Times best-selling author (from Amazon.com)

2006.315.064	Navies in the Nuclear Age : Warships since 1945	Gardiner, Robert (ed)	First published in Great Britain 1993 by Conway Maritime Press. Aircraft carriers -- Major surface combatants -- Submarines -- Mine countermeasures vessels -- Fast attack craft -- Amphibious forces -- Naval auxiliaries -- Nuclear weapons and navies -- Anti-submarine warfare and weapons -- Weapon systems for air defence and surface warfare - - Naval radars and command systems -- Naval electronic warfare.
2006.315.065	Pearl Harbor Recalled	Freeman, Tom	Drawing on eyewitness accounts, research, and archaeological evidence, a maritime artist presents paintings that offer a chronological graphic interpretation of the Japanese attack on Pearl Harbor.
2006.315.066	US Carriers at War	Kilduff, Peter	Exploits of U.S. aircraft carriers in World War II. Extensively illustrated with b&w photos, at least one per page. Pacific Ocean maps across end pages.
2006.315.067	Japanese Naval Vessels at the End of WWII	Fukui, Shizuo	This is a detailed study of the ships surrendered by Japan at the end of World War II.
2006.315.068	Wings	Meyer, Mark (photographer)	One of two volumes in a box set along with "The Cutting Edge" by C. J. "Heater" Heatley.
2006.315.069	Cutting Edge, The	Heatley, C. J. (Charles James)	Photographer and F-14 pilot C. J. Heater Heatley III's new book captures the sights and sensations of naval aviation in photographs as unusual as the perspective from which they were taken. Shot from the cockpit of an F-14 and the flight deck of a carrier by a pilot with more than 4000 flight hours and 600 carrier landings to his credit, this unique collection of full-color images allows even those who have never flown an aircraft to experience the drama, excitement, and sophistication of modern naval aviation.
2006.315.070	Crusader! : Last of the Gunfighters	Gillcrist, Paul T.	(from schifferbooks.com:) Once known as the "Last of the Gunfighters", the Vought F-8 Crusader has since become a legend in the histories of the

Object ID	Title	Author	Summary
			U.S. and French navies, as well as a scourge in the skies over North Vietnam in the late 1960s! CRUSADER! is a vital oral history of one of the most controversial fighter planes in carrier aviation. A key to the authenticity of this story are the author's personal interviews with sixteen of the seventeen living Crusader pilots who became MiG killers in the Vietnam air war. His analysis of their aerial engagements over North Vietnam from 1965 to 1973 contains some startling surprises, as well as a validation of many of the tactical lessons learned from World War II and Korea. CRUSADER! also contains personal accounts by F-8 speed record holders such as U.S. Marine Corps Major (now Senator) John Glenn and Captains Bob Dose and "Duke" Windsor. Other aviation records held by the Crusader, (not so enviable) are told, in anecdotal form, for the first time by the author, an F-8 driver and participant in some of them! Colorful, and sometimes humorous, accounts of events involving the F-8 and "Crusader Drivers" abound in this chronicle of carrier aviation covering the three decades when this remarkable airplane was an important element of the U.S. Navy's carrier strike forces. Rear Admiral Paul T. Gillcrist commanded a fleet Crusader squadron, then a carrier air wing and finally, as a flag officer, became wing commander for all Pacific Fleet fighter squadrons. During his fleet squadron command he completed three carrier deployments to the Tonkin Gulf and flew 167 combat missions in the Crusader for which he was awarded seventeen combat decorations. The author of FEET WET, Reflections of a Carrier Pilot (1990) and TOMCAT, The Grumman F-14 Story (1994), Admiral Gillcrist is well qualified to write the story of the Crusader!
2006.315.072	Air Power at Sea, 1939-45	Winton, John	Air Power at Sea by John

Object ID	Title	Author	Summary
			Winton author of other books - Freedom's Battle, The Forgotten Fleet, and novels such as We Joined the Navy. The front cover shows a spitfire taking off from H. M. S. Furious, 1943 and back cover shows picture of a Kamikaze attack on the battleship Missouri. In 1939 it wasn't known what aircraft would do in the coming world war at sea. This book examines the influence of air power with successes and failures over the span of WWII at sea from carriers to air strikes against the enemy.

2006.315.085	Air Navigation - Nautical Astronomy and Celestial Navigation - part 7	Bureau of Aeronautics	Part 7 of the Air Navigation series prepared to meet the special needs of the U.S. Navy's Aviation Training Program in World War II. From the Introduction - "Thousands and thousands of years before the invention of the aeroplane or any of our modern tools of war, men watched and studied the heavenly bodies that moved

Object ID	Title	Author	Summary
			day and night across the celestial sphere. It is astonishing how extensively such observations were made by all primitive peoples and how carefully they were preserved. The reason, of course, was that what they observed and recorded was of vital importance to our original ancestors. By studying the heavens they learned how to keep time and maintain a calendar, when to sow their crops or change their grazing grounds. Those people who lived on the plains or by the sea learned how to use the stars to guide them on journeys and voyages. In fact, if you see service in the western Pacific or the Mediterranean, you will discover that a Melanesian or an Arab as long as he can see the stars at night, is never lost at sea or on the desert. In this manual, you will learn how modern astronomers have tabulated the necessary data on the heavenly bodies and how the ancient lore to read from the stars has been streamlined to guide you i the modern art of
2006.315.086	CV NATOPS Manual - 1985	Chief of Naval Operations	CV NATOPS MANUAL - publication supersedes CV NAVTOPS MANUAL DATED 1 August 2982. This publication is required for official use or for administrative or operational purposes only. Distribution limited to U. S. government agencies. This program is a positive approach toward improving combat readiness and achieving a substantial reduction in the aircraft accident rate and is based on professional knowledge and experience, provides the basis for development of an efficient and sound operational procedure. It is to aid the commanding officer in increasing the unit's combat potential without reducing command prestige or responsibility. This manual standardized ground and flight procedures but does not include tactical doctrine. Compliance with stipulated manual

2006.315.089	F/A-18 Hornet Multi-Mission Radar	Hughes Aircraft Co.	This is a promotional brochure put out by Hughes describing the AN/APG-65 radar which Hughes was building for the F/A-18 Hornet. Beautiful illustrations on many pages.
2006.315.090	F/A-18 Hornet Strike Fighter	McDonnell Aircraft Co.	This appears to be a promotional brochure put out by McDonnell Aircraft Co. The McDonnell Douglas (now Boeing) F/A-18 Hornet is a twin-engine supersonic, all-weather carrier-capable multirole fighter jet, designed to dogfight and attack ground targets (F/A for Fighter/Attack). Designed by McDonnell Douglas and Northrop, the F/A-18 was derived from the latter's YF-17 in the 1970s for use by the United States Navy and Marine Corps. The Hornet is also used by the air forces of several other nations. It has been the aerial demonstration aircraft for the U.S. Navy's Flight Demonstration Squadron, the Blue Angels, since 1986. The F/A-18 has a top speed of Mach 1.8. It can carry a wide variety of bombs and missiles, including air-to-air and air-to-ground, supplemented by the 20 mm M61 Vulcan cannon. It is powered by two General Electric F404 turbofan engines, which give the aircraft a high thrust-to-weight ratio. The

Object ID	Title	Author	Summary
			F/A-18 has excellent aerodynamic characteristics, primarily attributed to its leading edge extensions (LEX). The fighter's primary missions are fighter escort, fleet air defense, Suppression of Enemy Air Defenses (SEAD), air interdiction, close air support and aerial reconnaissance. Its versatility and reliability have proven it to be a valuable carrier asset, though it has been criticized for its lack of range and payload compared to its earlier contemporaries, such as the Grumman F-14 Tomcat in the fighter and strike fighter role, and the Grumman A-6 Intruder and LTV A-7 Corsair II in the attack role. The F/A-18 Hornet provided the baseline design for the Boeing F/A-18E/F Super Hornet, a larger, evolutionary redesign of the F/A-18. Compared to the Hornet, the Super Hornet is larger, heavier and has improved range and payload. The F/A-18E/F was originally proposed as an alternative to an all-new aircraft to replace existing dedicated attack aircraft such as the A-6. The larger variant was also directed to replace the aging F-14 Tomcat, thus serving a complementary role with Hornets in the U.S. Navy, and serving a wider range of roles including refueling tanker. The Boeing EA-18G Growler electronic jamming platform was also developed from the F/A-18E/F Super Hornet. (from Wikipedia)

2006.315.092	Carrier Fighters, Vol. I	Mizrahi, J. V.	Carrier Fighters Vol. 1 with paintings by Art Lochte, Three Views by Richard Groh, Graphic Design by Tony Enyedy. The History of naval fighter aircraft with a review of the carriers they flew from beginning with the carrier Langley commissioned in 1922 with planes that converted such as Vought VE-7, Sopwith Camels, Thomas-Morse scouts, etc. all biplanes.
2006.315.093	Carrier Fighters, Vol. II	Mizrahi, J. V.	Carrier Fighters vol II - "wars of the future are fought with the weaponry of the past"...In the opening months of WWII when the United States lacked modern aircraft. Aircraft included are F4F-Grumman Wildcat, Mitsubishi Zero Japanese fighter, F4U wildcat and F4U Corsair.
2006.316.001	On Watch : A Memoir	Zumwalt, Elmo R.	From the book jacket: This book is the story of high policy and politics in the Nixon administration, told by a man destined to become a major American statesman. Admiral Elmo R. Zumwalt, Jr., was appointed Chief of Naval Operations in 1970, the youngest ever. In four short years he transformed the navy, setting its course for a generation. His famous Z-grams upset hallowed prejudice by integrating the navy, upgrading the status of its women, and eliminating the Navy's demeaning "Mickey Mouse" regulations of dress, behavior, and family life. Simultaneously Admiral Zumwalt reshaped the physical navy with an imaginative mix of low- and high-cost ships appropriate to the U. S. Navy's strategic role for the rest of this century.
2006.316.002	Japan at War : An Oral History	Cook, Haruko Taya	A work of oral history that captures the remarkable story of ordinary Japanese people

Object ID	Title	Author	Summary
			during World War II. The authors take us from the Japanese attacks on China in the 1930's to the Japanese homefront during the inhuman raids on Tokyo, Hiroshima and Nagasaki, offering the first glimpses of how this century's most violent conflict affected the lives of the Japanese population.
2006.316.003	Why the Allies Won	Overy, Richard	1942 -- Germany controls almost the entire resources of continental Europe and is poised to move into the Middle East. Japan has wiped out the western colonial presence in East Asia in a couple of months and is threatening northern India and Australia. The Soviet Union has lost the heart of its industry, and the US is not yet armed. In Overy's incisive analysis, we see exactly how the Allies regained military superiority and why they were able to do it. Includes information on Stalingrad and Kursk.
2006.316.004	South To Java	Mack, William P.	Picture yourself as one of 120 men aboard a rusty, aging four-stack destroyer, hurriedly built for service in 1918, but now, badly in need of an overhaul, put in the blazing South Pacific and steaming toward the deadly Battle of the Java Sea---one of the big, bad ones where the US sacrificed a small fleet and the Japanese picked it off, ship by ship. The USS O'Leary (DD-200) is fictitious; there never was a destroyer with the hull number 200. But the O'Leary is true to her type---1100 tons, slightly over 300 feet long, with twelve 21" torpedo tubes in open mounts, some 3" and 4" hand-loaded guns, a couple of machine guns, oil fueled, 4 boilers, and capable of 35 knots. She's old, but she's tough as nails.
2006.316.005	Sea Services in the Korean War - 1950-53	None Stated	This CD contains the complete text of the official USN and USMC histories of the conflict plus The Sea War in Korea by Malcolm W. Cagle and Frank A. Manson, originally published by the Naval

Object ID	Title	Author	Summary
			Institute Press in 1957 - 7 vol. in all. Also included are 280 photographs, 185 maps, and several essays written specifically for this commemorative CD. Together, these elements tell the story of the USN, USMC, and Coast Guard in the first major conflict of the Cold War.
2006.318.001	Taps for Saratoga	Hawaiian Divers	The Saratoga (CV-3) was commissioned in 1927 and saw action during World War II. The first part of this video is a 3 -minute slide show of the ship with pictures and dates of all her captains. There is also an explanation of Operation Crossroads, nuclear tests in the Bikini Atoll to test the effects of atomic bombs on ships, where the Saratoga was sunk, 25 July 1946. The remainder of the video shows divers exploring the wrecked ship.
2006.319.001	Red Army Resurgent	Shaw, John	Second of three books covering the Eastern front. The full set includes: Russia Besieged Red Army Resurgent The Soviet Juggernaut This volume overviews the conflict as Russia begins to defeat the Germans. Included is the usual Time-Life collection of hundreds of photographs (many in color), illustrations, and maps that supplement clear and interesting narratives. (Customer review from Amazon.com)
2006.319.002	Mediterranean, The	Whipple, A. B. C. (Addison Beecher Colvin)	The Battle of the Mediterranean was the name given to the naval campaign fought in the Mediterranean Sea during World War II, from 10 June 1940-2 May 1945. For the most part, the campaign was fought between the Italian Royal Navy (Regia Marina), supported by other Axis naval and air forces, and the British Royal Navy, supported by other Allied naval forces, such as Australia, Netherlands, Poland and Greece. U.S. naval and air units joined the Allied side in

Object ID	Title	Author	Summary
			1942. Each side had three overall goals in this battle. The first was to attack the supply lines of the other side. The second was to keep open the supply lines to their own armies in North Africa. The third was to destroy the ability of the opposing navy to wage war at sea. Outside of the Pacific, the Mediterranean saw the largest conventional naval warfare during the war. In particular, Allied forces struggled to supply and retain the key naval and air base of Malta. (from Wikipedia)
2006.319.003	Nazis, The	Herzstein, Robert Edwin	The Nazis, with cover photo of Hitler at an assembly in Brunswick October 18, 1931. Six Chapters beginning with the New Men of Power, the SS, Plunder, Final Solution and Enslavement of the Army. Picture Essays.
2006.319.004	Liberation	Blumenson, Martin	Liberation with cover photo of French policemen trying to hold back hordes of exuberant Parisians filling streets and crowded into balconies, rooftops as General Charles de Gaulle formally ended four years of German occupation with a victory parade along the Champs -Elysees on the 26th of August, 1944! Russia Besieged with cover photo of a Russian cavalry column in the snow near Moscow to defend the city in a time when weather immobilized mechanized vehicles. 200,000 strong cavalry. Six Chapters with the Siege of Leningrad. in June 1941 the super-blitzkrieg code-named Barbarossa sent the German Army advancing into Russian in areas from the Arctic to the Black Sea. Picture Essays also of the Last Blitzkrieg, to liberation.
2006.319.007	Blitzkrieg	Wernick, Robert	Blitzkrieg with cover photo of German infantrymen under shellfire during the blitzkrieg after they entered France. Six Chapters including the invasion of Poland to Finland and Hitler's strategy for seizing Western Europe to War Clouds Over America. German Novelists, Playwrights, scientists, scholars, architects, artists to name a few came to the U. S. mostly before the war began. Albert Einstein, Hannah Arendt, James Frank, Franz Werfel, Andre Maurois to name a few who knew they would have to leave sooner or later.
2006.319.008	Battle of the Atlantic, The	Pitt, Barrie	The Battle of the Atlantic was the longest continuous military campaign in World War II, running from 1939 to the defeat of Germany in 1945. At its core was the Allied naval blockade of Germany, announced the day after the declaration of war, and Germany's subsequent counter-blockade. It was at its height from mid-1940 through to the end of 1943. The Battle of the Atlantic pitted U-boats and other warships of the Kriegsmarine (German Navy) and aircraft of the Luftwaffe (German Air Force) against Allied merchant shipping. The convoys, coming mainly from North America and mainly going to the United Kingdom and the Soviet Union, were protected for the most part by the British and Canadian navies and air forces. These forces

2006.319.012	Italy At War	Adams, Henry	In 1939, Italy occupied Albania, a de facto protectorate for decades, and entered World War II in June 1940 on the side of the Axis powers. Mussolini, wanting a quick victory like Hitler's Blitzkriegs in Poland and France, invaded Greece in October 1940, but was forced to accept a humiliating stalemate after a few months. At the same time, Italy, after initially conquering British Somalia and parts of Egypt, saw an allied counter-attack lead to the loss of all possessions in the Horn of Africa and in North Africa. Italy was then invaded by the Allies in July 1943, leading to the collapse of the Fascist regime and the fall of Mussolini. In September 1943, Italy surrendered. The country remained a battlefield for the rest of the war, as the allies were moving up from the south as the north was the base for

Object ID	Title	Author	Summary
			loyalist Italian fascist and German Nazi forces, fought also by the Italian resistance movement. The hostilities ended on 2 May 1945. Nearly half a million Italians (including civilians) died in the conflict, and the Italian economy had been all but destroyed; per capita income in 1944 was at its lowest point since the beginning of the 20th century. (from Wikipedia)
2006.319.013	Japan At War	Time Life Editors	The early 20th century saw a brief period of "Taisho democracy" overshadowed by increasing expansionism and militarization. World War I enabled Japan, on the side of the victorious Allies, to widen its influence and territorial holdings. It continued its expansionist policy by occupying Manchuria in 1931; as a result of international condemnation of this occupation, Japan resigned from the League of Nations two years later. In 1936, Japan signed the Anti-Comintern Pact with Nazi Germany, and the 1940 Tripartite Pact made it one of the Axis Powers. In 1941, Japan negotiated the Soviet–Japanese Neutrality Pact. The Empire of Japan invaded other parts of China in 1937, precipitating the Second Sino-Japanese War (1937–1945). In 1940, the Empire then invaded French Indochina, after which the United States placed an oil embargo on Japan. On 7 December 1941, Japan attacked the US naval base at Pearl Harbor and declared war, bringing the US into World War II. After the Soviet invasion of Manchuria and the atomic bombings of Hiroshima and Nagasaki in 1945, Japan agreed to an unconditional surrender on 15 August. The war cost Japan and the rest of the Greater East Asia Co-Prosperity Sphere millions of lives and left much of the nation's industry and infrastructure destroyed.

Object ID	Title	Author	Summary
			The Allies (led by the US) repatriated millions of ethnic Japanese from colonies and military camps throughout Asia, largely eliminating the Japanese empire and restoring the independence of its conquered territories. The Allies also convened the International Military Tribunal for the Far East on 3 May 1946 to prosecute some Japanese leaders for war crimes. However, the bacteriological research units and members of the imperial family involved in the war were exonerated from criminal prosecutions by the Supreme Allied Commander despite calls for trials for both groups. (from Wikipedia)
2006.319.014	Prisoners of War	Bailey, Ronald H.	Prisoners of War with cover photo "Guarded by a few GI's, Germans march into captivity past and American mobile anti-aircraft unit near Limburg, 20 miles east of the Rhine in central Germany. There prisoners who were among the 800 taken by the U. S. First Army in March 1945 & joined the 500,000 who had already surrendered to Americans that year". Six Chapters - 15 million men and some women on all Fronts had become Prisoners of War. For the first time in history the treatment of military prisoners was governed (at least on paper) by an extensive body of international rules embodied in the Geneva Convention signed July 1929 by 47 nations by all WWII belligerents except the U. S. S. R.(p.9) The International Red Cross had it beginnings in the plight of wounded men following the battle of Solferino in 1859 between the Austrians and the French. The three major powers - Japan, the Soviet Union and Germany- ignored its provisions. Others chapters include the Death Railway, the Eastern Front and Picture Essays - the Far East; Prisoners of the Reich.

Object ID	Title	Author	Summary
			collection of A-3 photos assembled by Ed Mullin. Many of these are copyrighted and should not be used without express consent of the photographer. There are photos of the A-3 with Midway markings, and there are photos of groups of people--perhaps reunions--but there are no identifications. The Douglas A-3 Skywarrior was originally designed as a strategic bomber for the United States Navy and was among the longest serving carrier-based jet aircraft in history. It entered service in the mid-1950s and was retired in 1991. For many years after its introduction, it was also the heaviest aircraft to enter operational status operating from an aircraft carrier, earning it the unofficial nickname "The Whale". Its primary function for much of its later service life was as an electronic warfare platform, tactical air reconnaissance platform, and high capacity aerial refueling tanker.
2006.321.002	Electronics Technician 3	Bureau of Naval Personnel	This book was replaced by NAVPERS 1088 (2006.321.003) . This book is written as an aid in preparation for promotion to Electronics Technician 3. Contents include: Introduction to radio; current and voltage; resistance; resistances in radio circuit; induction; inductive reactance; inductances in radio; the condenser; radio condensers; the time constant; resonance; filters; schematic diagrams; the diode; power supplies; more power supplies; oscilloscopes; remote control systems quiz; radio symbols; qualifications for advancement in rating.
2006.321.003	Electronics Technician 3	Bureau of Naval Personnel	Rate training manual for Electronics Technician 3. This included Restricted Security Information at one time. This replaces NAVPERS 10145. Contents include: Introduction to electronics technician 3; electricity and circuits; current and resistance; inductance and inductive circuits;

Samples of computed data forms with brief explanations for selected items.
2006.322.001	Midway Memories : The Official Photo Collection of the San Diego Aircraft Carrier Museum	McGaugh, Scott	A unique photo essay of the 47-year odyssey of the historic aircraft carrier USS Midway. More than 225,000 men served aboard the longest-serving carrier in U.S. Navy history. More than 200 never-before published photos taken by Midway sailors are featured. Midway Memories is a unique insight into a floating city at sea--population: 4,500--sailing at the tip of America's sword. About the Author Scott McGaugh also is the author of Midway Magic, the first book to chronicle the unmatched 47-year odyssey of the aircraft carrier USS Midway. He interviewed more than 300 Midway sailors and beginning in 1996 played a leading role in getting the USS Midway to San Diego, Calif. in 2003. Scott McGaugh became the marketing director for the Midway when it opened as a naval aviation museum in 2004. In two short years, the Midway Museum became the most-visited historic naval ship museum in the continental

2006.322.002	Quiet Hero, The, The Untold Medal of Honor Story of George E. Wahlen at the Battle for Iwo Jima	Toyn, Gary W.	George E. Wahlen was decorated with the Medal of Honor after his heroic efforts saved countless lives at the battle for Iwo Jima. Witnesses of his heroics remain dumbfounded he survived. After over 60 years of silence, his story is finally told.
2006.323.001	Pearl Harbor	Arroyo, Ernest	(From Amazon) Through striking photographs, this large format chronicle--which features nearly 200 dramatic archival images--captures the shock, the horror, the destruction of December 7, 1941, the fateful day Japan launched its surprise attack on Pearl Harbor. With an introduction that describes the events that led up to the assault, extensive captions offering detailed explanations of each phase of the battle, and sidebars commemorating those whose courage will never be forgotten, this is truly a thoughtful tribute as well as an outstanding pictorial re-creation of this earth-shattering event.
2006.323.002	Visual Dictionary of Flight	Midgley, Ruth (ed)	Text and labeled illustrations depict a variety of historic and modern aircraft and their components, as well as aviation-related equipment. Contents -- Balloons and Airships -- Pioneers of Flight -- Early Monoplanes Biplanes and Triplanes -- WWI Aircraft -- Early Cockpits and Instruments Seaplanes and Flying Boats -- Early Passenger Aircraft -- WWII Aircraft Early Piston Aircraft Engines -- Modern Piston Aircraft Engines -- Wings -- Fuselage Landing Gear -- Modern Jetliners -- Modern Cockpits -- Supersonic Jetliners -- Jet Engines Modern Military Aircraft -- Helicopters -- Helicopter Technology -- Light Aircraft Gliders, Hang Gliders, and Ultralights -- Navigation -- Safety and Survival -- VTOL

Object ID	Title	Author	Summary
2006.323.003	Thunder in the Heavens : Classic American Aircraft of WWII	Bowman, Martin W.	Aircraft "If I were to give you one factor as the leading one that led to your victory, I would give you the air force." Japan's Admiral Nagano offered this opinion to his American interrogators in 1946; it was one held not by him alone, for in Germany two years earlier the famous Luftwaffe ace Gen. Adolf Galland had written of the United States' long-range escort fighters: "The standard of the Americans is extraordinarily high . . . things have gone so far that the danger of a collapse of our arm exists." Without doubt, air superiority was a crucial factor to the outcome of World War II. Skilled American pilots were able to achieve this thanks to the capabilities of such aircraft as the B-17, B-24 and B-29, of which nearly 35,000 were built; the medium bombers, such as the B-25 Mitchell; and the many types of fighter, including the P-51 Mustang and the F4F Wildcat - a host of variants which brought the overall American contribution to Allied air power to over 200,000. Of this massive total hardly any remain today; there is, for example, only one airworthy B-24 out of more than 18,000 built. Thus equipped, the 8th, 15th and 20th air forces alone flew more than 500,000 sorties and dropped over 1,200,000 tons of bombs. There was, of course, a price to be paid and tens of thousands of brave young Americans made the ultimate sacrifice; many others survived the experience and continue to share their memories with us today. "Thunder in the Heavens" features 14 preserved classic American combat aircraft. The "Big Friends", the heavy bombers that

Object ID	Title	Author	Summary
			prosecuted the strategic and tactical campaigns in the European and Pacific theatres; the "Little Friends", the fighter escorts that provided protection and, when numbers permitted, sought out and destroyed the enemy defensive fighters; the medium bombers which, among other roles, gave tactical support "low and below" to the crucial land campaigns; and the carrier aircraft "flying from the flat tops" that totally decimated the Japanese. Accompanying the pictures throughout are the words, memories and experiences of the air force combatants, helping to convey the reality of the air war and bringing these aircraft to life as surely as they once used the aircraft to secure victory. (from dust jacket flap)
2006.323.004	World's Military Aircraft	Gunston, Bill	The World's Military Aircraft is superbly illustrated by top aviation artists and packed with facts and figures carefully researched for 40 different aircraft types which have seen service in the air forces of NATO and Warsaw pact. With 550 color scale drawings showing markings in a variety of schemes. It is a concise history of each aircraft with technical information.
2006.323.005	Two Centuries of Warfare	Chant, Christopher	Two Centuries of Warfare with Introduction by author(s) and beginning with the Nile in 1798, Trafalgar, 1805, on to the Civil War, WWI First Marne, Midway, 1942, to Yalu River, 1952 to Six Day War, 1967 to name a few with Index.
2006.323.008	Pictorial History of the Korean War	MacArthur, Douglas	The story of the Korean Conflict as told by General MacArthur, Supreme Commander of the United Nations Forces in Korea in his periodic reports to the Security Council of the United Nations makes up the text of this volume. Slight editorial changes have been made in the text to maintain continuity of narrative.

2006.323.013	Ships and Aircraft of the U.S. Fleet - 1987	Polmar, Norman	This completely revised edition of Norman Polmar's highly regarded triennial guide presents a comprehensive description of the Reagan administration's 600-ship Navy of the late 1980s. It includes not only the Navy's ships, submarines, and aircraft, but its people, organizations, weapons, and electronics as well. Detailing the considerable changes that have occurred in the past few years as new ships join the fleet, this fourteenth edition fully examines the buildup spurred by the aggressive John Lehman, secretary of the navy from 1981 to 1987. Complete information is provided on the four Iowa-class battleships added to the fleet, along with the new 95,000-ton nuclear carriers and a flotilla of amphibious, mine, and auxiliary ships still on the building ways. The book also examines two ship designs now under construction, the ARLEIGH BURKE-class missile destroyers and the SEAWOLF-class attack submarines, and the heated controversies surrounding these designs and their building programs. Indeed, this is the only reference available that provides extensive discussions of all new-construction programs as well as the existing fleet. To give continuity to the early editions of this volume, edited by the late James C. Fahey, special tables list all combat ships built for the U.S. Navy since

Object ID	Title	Author	Summary
2006.323.014	Great Battles of World War II	Hansen, Ole Steen	World War II. Other unique features of this book include full descriptions of the Navy's administrative and operational organizations. The detailed examinations found here of the Navy's new sealift programs, Fleet Marine Force, naval weapons, electronics, and aircraft are not available in any other naval reference volume. In his incisive analysis of the state of the fleet, Polmar suggests that a variety of political actions could quickly reduce the size and capabilities of the U.S. Navy, and he predicts some probably lean years ahead in the Navy's budget. He also cites some recent technical failures that may affect the future of the fleet. Supporting the text are several hundred photographs and drawings, many published here for the first time, that give general identification views of ships and aircraft and show close-ups of electronic equipment and weapons. Front jacket photos: From top, IOWA (BB 61), L.& L. Van Ginderen; CH-53E helicopter, W.D. Griffin; and the superstructures of the GOLDSBOROUGH (DDG 20) (left) and the BENJAMIN STODDERT (DDG 22), Giorgio Arra. Back jacket photo: STURGEON (SSN 637), Giorgio Arra. (from dust jacket flap)
			Great Battles of WWII examines the political descision, military strategy, and human cost of the war's bloodiest battles. Begun in Europe in 1939 in response to Hitler's invasion of Poland, the war soon escalated into a truly global conflict. Battle of Britain -- El Alamein -- Turning points: the Pacific -

2006.323.015	Duel For the Sky : Fighter Planes and Fighting Pilots of World War II	Mason, Herbert Molloy, Jr.	Saga of the fighter pilot, a new breed of soldier who emerged in WWII to play a decisive role in the outcome of the war. Vividly described are the skill and courage of the men who participated in deadly air duels fought in the Spanish Civil War, the Blitz of Poland, Norway and France and the Battle of Britain. The exploits of the Desert Air Force, American Volunteers of the famed Eagle Squadrons of the R.A.F, and the struggles of the night-fighter pilots are all recounted in graphic detail in this important book.
2006.323.017	Modern Jet Aircraft	Taylor, Michael John Haddrick	Modern jet aircraft, both civil and military, have brought about radical changes in our concept of business and leisure travel and in the tactics and strategy of aerial warfare. The author's lavishly illustrated book describes and analyzes those aircraft which are in service today and explains their developmental history and the impact which they have had.
2006.323.018	World's Great Bombers, The	Chant, Christopher	The World's Great Bombers describes the development of the bomber throughout the twentieth century, exploring the background and service record of the world's most important bomber types. Magnificently illustrated throughout with photographs and full-color artworks, The World's Great Bombers details the development, unique features and operational capabilities of the major bomber types. Each artwork is accompanied by the relevant technical specifications for the aircraft, including armament, powerplant performance and dimensions. The book provides a mass of information on one of the most decisive weapons of the twentieth century, together with a highly readable yet authoritative text.

Object ID	Title	Author	Summary
			Red Flag is a unique event: part wargame, stress test, team sport, readiness drill, laboratory experiment, dress rehearsal, and fighter pilot convention. It is the world's most complex and realistic aerial combat training exercise. Author Michael Skinner and photographer George Hall attended Red Flag and here give a detailed, close-up look at a world seen before only by participants. Red Flag is about Nellis AFB, the Tactical Air Command's largest base. It is about the struggle of visionary Air Force officers to establish realistic air combat training. It is about the Aggressors, elite American pilots trained and equipped to fly and fight like Russians. But mostly, it is about the Players -- Sierra Hotel pilots all -- and their whirlwind introduction to flying on the edge. (from back cover)
2006.323.031	Naval Aircraft 1914-1939	Casey, Louis S.	About this book: In 1914 the ultimate expression of naval power was the battleship. Already however, eight years after the Wright brothers first flight, courageous and daring' pioneers in America and Great Britain had made the first landings on warships at sea. Naval warfare had been expanded into a third dimension and naval flying took off with the outbreak of war. Shipborne fighters and Zeppelins duelled over the North Sea. Torpedo-bombers went into action, like the submarine, threatening the supremacy of the big-gun ship. By 1918 true aircraft carriers were in service and special classes of aircraft were being designed to equip them. This is the story of naval aircraft from the beginning to the outbreak of the Second World War — from Eugene Ely's first flight from the USS Birmingham in 1910 to the

Object ID	Title	Author	Summary
			dive-bombers of 1939 designed to crack open a battleship. John Batchelor's illustrations show off the highly colourful machines to perfection and Lou Casey of the Smithsonian Institution provides a fully researched and authoritative account of the development of carrier aircraft.
2006.323.032	Red Navy at Sea : Soviet Naval Operations on the High Seas, 1956-1980	Watson, Bruce W.	This is the only book to offer a detailed chronology of modern Soviet naval operations set within the framework of long range Soviet foreign and domestic policy. This context is important because it puts the navy in its proper place as a significant cog in the gigantic machinery of Soviet 'grand strategy'. Commander Watson argues that the Soviet Navy's physical configuration, strategy, and operations reflect a long-term upgrading pattern, designed to create an equal-partner status in the total balance of Soviet military forces.

			the surface, and under the surface, raged for more than 3 long years and did not really end until D-Day.
2006.323.037	Great War at Sea, 1914-1918	Hough, Richard Alexander	The contest between the German and British navies during WWI was the greatest naval conflict in history. The author's vivid rendering of this sea war brings each battle to life, from the initial confrontations to Germany's capitulation at the end of 1918. A fight for supremacy over the seas, the war pitted the British Royal Navy, which had ruled virtually uncontested for 100 years, against the German Kriegsmarine, whose submarines and floating mines put England's forces severely to the test. The author describes the climactic 1916 Battle of Jutland, as well as major and minor battles fought in the Falklands, the North Sea, and the Dardanelles. Anglo-German Battleship Race - - Churchill at the Admiralty -- Acceleration Towards War -- War and Early Mixed Fortunes - - Mediterranean Misfortunes Tragedy in the Pacific -- Trouble in the Admiralty, Triumph in The South Atlantic First Clash of the Dreadnoughts - - The Dardanelles Fiasco and its Consequences -- The Undersea War -- The Search for Decisive Action Jutland -- Battle-Cruises Action, Battle Fleets in Action, Retrospection Deafeat of the U-Boat, surrender, and scuttle
2006.323.039	Revolutionary War; America's Fight for Freedom	McDowell, Bart	The American Revolutionary War (1775–1783), the American War of Independence, or simply the Revolutionary War in America, began as a war between the Kingdom of Great Britain and the new United States of America, but gradually expanded to a global war between Britain on one side and the United States, France, Netherlands and Spain on the other. The main result was an American victory, with mixed results for the other powers.

2006.323.041	Guide to the Soviet Navy - 1986	Polmar, Norman	This reference work provides accurate, up-to-date data on ship and aircraft specifications, performance, weapons and electronics, and analysis of current changes and trends in Soviet naval strategy, leadership, operations, and training. Considering the drastic changes in the Soviet naval forces in the midst of perestroika, this fifth edition is the most comprehensive review and analysis available of the modern Soviet fleet - its ships, aircraft, weapons, electronics, bases, shipyards, personnel, and leadership - and provides coverage of the fleet reductions made since 1988. It contains technical data on every combat and support ship of the Soviets including specialized merchant ships that support military activities. Award-winning author and military analyst, Norman Polmar, discusses the navy's force reductions in detail and shows that although the Soviet Navy has diminished in size, its capabilities in virtually all combat areas - antisurface, antisubmarine and antiair warfare, plus theatre tactical nuclear weapons, chemical operations, mine warfare, and intelligence collection - have actually been improved. Essays on the Soviet Navy's missions, tactics operations, exercises,

Object ID	Title	Author	Summary
			training, and fleet development explore the true impact of fleet reductions and policy adjustments not only on Soviet naval forces, but also on Warsaw Pact co-ordination. Among the subjects covered are the impact of the disappearance by 1989 of the remaining Sverdlovclass cruisers and the scrapping of 30 submarines. Descriptions of the two new 65,000-ton Thilisi-class aircraft carriers and the Ul'yanovsk, a 75,000-ton full-deck carrier, are provided, as are the improvements in Soviet submarines, reported to have "closed the gap" between Soviet and US undersea capabilities. Appendices include the Soviet navy's order of battle since 1945, naval leaders, and naval ship transfers to nations throughout the world. The author has also written "Submarines of the Russian and Soviet Navies" and "The Ships and Aircrafts of the US Fleet". (from Amazon.com for 1991 edition)
2006.323.042	War of 1812, The	Horsman, Reginald	The War of 1812 was a military conflict fought between the forces of the United States of America and those of the British Empire. The Americans declared war in 1812 for several reasons, including trade restrictions brought about by Britain's ongoing war with France, the impressment of American merchant sailors into the Royal Navy, British support of American Indian tribes against American expansion, outrage over insults to national honour after humiliations on the high seas, and possible American desire to annex Canada. Tied down in Europe until 1814, the British at first used defensive strategy, repelling multiple American invasions of the provinces of Upper and Lower Canada. However, the Americans gained control over Lake Erie in 1813, seized parts of western Ontario, and ended the prospect of an Indian confederacy and an

Object ID	Title	Author	Summary
			independent Indian state in the Midwest under British sponsorship. In the Southwest, General Andrew Jackson destroyed the military strength of the Creek nation at the Battle of Horseshoe Bend in 1814. With the defeat of Napoleon in 1814 on April 6, the British adopted a more aggressive strategy, sending in three large invasion armies. The British victory at the Battle of Bladensburg in August 1814 allowed them to capture and burn Washington, D.C. American victories in September 1814 and January 1815 repulsed all three British invasions in New York, Baltimore and New Orleans. (from Wikipedia)

2006.323.059	Old Ironsides - US Frigate Constitution - An Essay in Sketches	Roach, John Charles	Imagine this ship 150 years ago, heeled over and running free with great clouds of sail booming in the breeze, her bow knifing the North Atlantic swells, throwing sheets of spray alonger her spar deck. Today the black-hulled, 2,250 Ton USS Constitution stands alone at Pier One in the Boston Naval Shipyard, a mile from where she was launched over 150 years ago
2006.323.060	Last Battle, The : The Mayaguez Incident and the End of the Vietnam War	Wetterhahn, Ralph	On May 12, 1975, just days after the American Embassy in Saigon was evacuated, Khmer Rouge forces seized the SS Mayaguez. Three days later, President Ford launched a military raid to rescue the crew of the merchant ship. But as the attack began on Koh Tang Island, the hostages were being released from an entirely different location. Incomplete intelligence reports had unwittingly sent the marines into a bloodbath. In the ensuing chaos many soldiers died, and three machine gunners were mistakenly left behind as they steadfastly defended the American retreat. In this remarkable book, journalist and Vietnam veteran Ralph Wetterhahn recreates the story of the Mayaguez incident and poignantly reveals, for the first time, the harrowing fate of the three young marines who were forgotten by their comrades, indeed by their country. The Last Battle is a riveting narrative of combat, courage, and governmental blunders that serves as a metaphor for the entire Vietnam War. Publication Date: May 7, 2002 (from Amazon.com)

Object ID	Title	Author	Summary
			bright white memorial for the U.S.S. Arizona, which appears to be anchored in the blue-gray water of Pearl Harbor. If you look closely, you can make out the ghostly shape of the sunken battleship beneath the memorial and a shimmering trail of oil that some say is the tears of the 1,177 crewmen who died here on December 7, 1941. Anyone who can stand on the site, as I have, and not shed a tear of his own is not human. For a generation of Americans who lived through World War II, the slogan "Remember Pearl Harbor" has always been more than a battle cry. Like a newsreel flickering in their memories, it marks a turning point in their lives—the day they knew that a son or husband would go to war, that a wedding would be put off, that for the first time a sister or mother would take a job in a factory. Even today many still get goose bumps recalling the moment they heard the news. "It was Sunday afternoon. I was listening to the radio. The announcer broke in with a bulletin." The world would never be the same. Now, six decades later, memories have faded. Old animosities have been put aside. Some would choose to forget the horrors of that war. For many Younger Americans the sacrifices of that Sunday in Hawaii may seem as distant as the Civil War. For them, remembering Pearl Harbor has turned into a challenge to not let the lessons of their parents and grandparents slip away. This book offers a new look at the events of Pearl Harbor, drawing upon information from not only NATIONAL GEOGRAPHIC magazine but also Society books, websites, and television films. You can decide for yourself how best to remember the day in your home. For me, I think that Tom Allen, a frequent contributor

2006.323.077	Howard Hughes Flying Boat, The	Schwartz, Milton L.	Howard Robard Hughes, Jr. (December 24, 1905 – April 5, 1976) was an American business magnate, investor, aviator, engineer, film producer, director, and philanthropist. He was one of the wealthiest people in the world. He gained prominence from the late 1920s as a maverick film producer, making big-budget and often-controversial films like <i>The Racket</i> (1928), <i>Hell's Angels</i> (1930), <i>Scarface</i> (1932), and <i>The Outlaw</i> (1943). Hughes was one of the most influential aviators in history; he set multiple world air-speed records, built the Hughes H-1 Racer and H-4 "Hercules" (better known to history as the "Spruce Goose" aircraft), and acquired and expanded Trans World Airlines which would later on merge with American Airlines. Hughes is also remembered for his eccentric behavior and reclusive lifestyle in later life, caused in part by a worsening obsessive–compulsive disorder and chronic pain. His legacy is maintained through the Howard Hughes Medical Institute. (from Wikipedia)

Object ID	Title	Author	Summary
			describing more than 100 military aircraft from all over the world, including helicopters. One page is devoted to each aircraft, with 2 color pictures and lots of information. The planes are arranged in alphabetical order of the names of the manufacturers, regardless of country of origin. Books this size are supposed to be visual guides, the kind you want to take with you to air shows. I feel that the planes should be grouped by shape and size, so that you can compare similar planes easily. In this book, if you want to compare F14 and F15, you have to look under Northrop Grumman for F14 and Boeing for F15. With so many books on aircraft out there, you probably can buy a better book than this. However, in view of the low prices, especially for used copies, I recommend it for casual readers. (from Amazon.com)
2006.323.089	Combined Operations: The Official Story of the Commandos	Saunders, Hilary St. George	Story of the accomplishments of those picked men from the Royal Navy, the British Army, and the Royal Air Force, who work with US Rangers and others of the United Nations in what is know officially as Combined Operations --- or, more popularly, the Cammandos. The complete story of the Commandos since the very beginning of their activities, commencing with the experimental attacks on Norwegian islands and proceeding with more ambitious attempts on the Continent. Highly dramatic accounts of the assault on southern Italy, the evacuation of Crete, the defeat of the French in Syria, the daring penetration of the enemy's line in Libya --- culminating in the suspenseful stalking of Rommel's headquarters -- the assault on St. Nazaire, the capture of Madagascar, the Dieppe raid, the invasion of North Africa.

2006.323.095	Weapons and Warfare - The Illustrated Encyclopedia of 20th Century - 1	Fitzsimons, Bernard (ed)	INTRODUCTION: Any profound understanding of the wars which have shaped our world depends on an understanding of the weapons with which they were fought. In these volumes, details of all the weapons of our century are gathered together in a single work. The facts and information packed into these magnificent volumes could only be duplicated in a library of reference works, and even then, so thorough has been the work of the contributors that new facts are constantly being brought to light, new theories advanced and old myths exploded. COVERAGE: Almost any weapon used in substantial

Object ID	Title	Author	Summary
			numbers by regular armed forces during this century will be found in these pages. In addition, weapons which have had an impact on the development of modern armaments without actually seeing service, and even some projects which were never realized but are notable for their influence on subsequent developments, will be included. Entries will be illustrated wherever possible, with photographs, diagrams and color illustrations combining to provide a complete picture of modern weaponry in all its forms. WARSHIPS: Ships appear under name, capital ships having their own entries where possible and smaller warships being discussed in classes under the name ship of the class. The Bismarck, for example, will have its own entry, but the cruisers Juneau, San Diego and San Juan are accounted for under the Atlanta class. AIRCRAFT: Military aircraft of all types are included, tactical transports and trainers as well as bombers and fighters. For the most part they appear under their official name -- P-51 will be cross-referenced to Mustang - - or designation where no official name was assigned. Soviet aircraft are entered under their NATO code names (those in service since 1954); numbered types appear under the manufacturers. Again, cross-indexing by manufacturer and service designation will ensure that any plane can be located with maximum ease. TANKS AND APCs: The main mobile combat weapons will appear under their official name designations -- PzKPFW 1, T-34, Churchill and so on. SMALL ARMS: Small arms of all types appear in the A-Z listed under manufacturer's (Browning, Mauser) or

Object ID	Title	Author	Summary
			designer's (Nambu, Degtyarev) name, or under the official service name (Bren, AAT-52) where this is better known. MISSILES: Missiles of all types are covered, from giant multi-stage ICBMs to the smallest man-portable antitank rocket launcher. Again, they appear under their official names, or designations where they are not named, with Soviet missiles under their NATO code names. ARTILLERY: A special artillery section will cover all the main ordnance used by the major powers during this century. Starting with German light flak, taper-bore antitank, mountain and infantry guns, it will continue through medium and heavy flak, PAK and field artillery, recoilless, railway, coastal guns, ammunition and naval ordnance, providing a complete survey of 20th century artillery. In addition, individual weapons of particular note-the German "Bruno" railway guns, for example, will have their own, more detailed entries in the main A-Z section of the work. CONTRIBUTORS: Authority and readability are the keynotes of the encyclopedia. All entries and specifications are checked by a panel of consultants who have been chosen for their long involvement in, practical experience of, and, above all, enthusiasm for, their particular subject. The contributors, too, are enthusiasts to a man. Many have devoted a large part of their lives to the study of their field, and their combined knowledge and experience has added immensely to the information we present here.
2006.323.096	Weapons and Warfare - The Illustrated Encyclopedia of 20th Century - 2	Fitzsimons, Bernard (ed)	INTRODUCTION: This volume continues to present a spectacular array of modern military hardware, covering the whole spectrum and the

Object ID	Title	Author	Summary
			entire span of 20th Century development. One of the most fascinating aspects of this work is the way the individual entries gradually build up into an interrelated pattern. Anyone intrigued by the Air Force's new A-10 featured in Volume One, will find here a detailed analysis of the GAU-8 Avenger Cannon around which the A-10 was designed. As well as a photograph of the gun and diagrams of the shells, there is a spectacular sequence of photographs showing the weapon's formidable tank bursting power as an M48 is reduced to rubble. As the Encyclopedia builds up, the pattern will gradually become complete, so that the weapons carried by any ship or aircraft will be discussed in greater detail under their own headings. Another part of the pattern is the way in which the development of particular classes of weapon can be traced. In Volume One, for example, we saw the German wartime A-4 (or V-2) and the projected A-9/A-10 two-stage missile designed to bombard the Eastern Seaboard of the United States. Volume Two features the Atlas, the first multistage ICBM to become operational in the United States, and future entries will bring the story right up to date. Occasionally, too, we will present general entries: In Volume Two we have one on armored personnel carriers (APCs). This entry follows the development of the APC from the German and American half-tracks of World War II to the widely used and highly sophisticated APCs and MICVs (mechanized infantry combat vehicles) of today-including a cutaway drawing of the standard Soviet BTR-60.

Object ID	Title	Author	Summary
			In addition, the Artillery Review continues with German light antitank, medium flak, field and recoilless guns. The medium flak section should be of particular interest, since it features the 8.8-CM flak guns -- the famed '88.' The recoilless guns, too, are noteworthy, since the German weapons of this type were the first to be used in World War II, during the great German paratroop attack on Crete.
2006.323.097	Weapons and Warfare - The Illustrated Encyclopedia of 20th Century - 3	Fitzsimons, Bernard (ed)	INTRODUCTION: The weapons covered in Volume 3 again form an extremely varied collection. Every type of weapon is represented and virtually the entire range of 20th-Century development is covered. Submarines, for example, often dismissed as rather uninteresting "gray metal cigars," were a new addition to most navies at the start of the century and, for the most part, were regarded as useless novelties. Although Sergeant Ezra Lee, in David Bushnell's Turtle, had come within an ace of sinking the British flagship in the Hudson River in 1776, it was not until the First World War that the submarine came to be a useful weapon of war. In this Volume we show, in color cutaway and line detail, two representatives of the first stage of modern submarine development. The British and Norwegian "B" Classes were both based on the ideas of John P. Holland, one of the great pioneers of submarines. As well as a color cutaway of the British boat, an interesting sidelight is a drawing -- taken from the official plans -- of one of the vessels converted to a surface patrol boat. And it is fascinating to note that although the Norwegian vessels built in the early 1920s were virtually the final stage in the evolution of Holland's ideas, they embodied many of the features to be found in the most

Object ID	Title	Author	Summary
			modern submarines -- of which the Barbel and the Benjamin Franklin (also included here) -- are typical examples. And, as an example of the "half-way" stage in development, the Balao Class -- one of the largest classes of submarines ever built -- is here too. As well as having a fine war record in the Pacific, the Balao Class provided the first submarines ever equipped to launch guided missiles. In 1947-48, the Carbonero and Cusk, were fitted with hangars and launching ramps for the Republic JB-2 Loon copy of the German V-1. Tests were completed successfully, as shown in our photographs, and formed the first step in the progression toward the Poseidon submarines of the 1970s. Another weapon unique to the 20th Century is the Bomber. When war broke out in France in 1914, aircraft were barely capable of lifting bombs, let alone providing a useful offensive capability. Yet today, strategic bombers, along with nuclear Submarines and land-based ICBMs, are part of the front line of national defense. In the pages of this Volume a selection of aircraft illustrate the full range of bomber development. The British B. E. Series of the First World War were some of the earliest bomber types, while the Curtis B2, Douglas B-7 and B-18, and the Boeing B-9, along with the Japanese Navy bombers, demonstrate the progress made between the World Wars. The Convair B-36, designed to bomb German-occupied Europe from bases in the United States, was the first truly intercontinental bomber; the Ilyushin Il-28 Beagle was the first Soviet jet bomber; and the story is completed by the Rockwell B-1 -- illustrated by superbly detailed plans -- and the Tupolev Backfire, the

Object ID	Title	Author	Summary
			latest U.S. and Soviet bombers. As well as describing the technical aspects of these aircraft, the author offers an informed assessment of the role of the manned bomber in general, and the B-1 and the Backfire in particular, in future national defense. The Artillery Section, too, covers a broad range of hardware. German heavy flak, heavy antitank, and medium field guns are described and illustrated, along with perhaps the most awesome artillery types -- the mighty Rail Guns. These huge guns were so complex and their stories are so interesting that most will be discussed under their own names. The survey included here, however, covers all the main types of German Rail Gun, including the phenomenal Paris Gun, built to bombard Paris in 1917 with the incredible range of 70 miles.
2006.323.098	Weapons and Warfare - The Illustrated Encyclopedia of 20th Century - 4	Fitzsimons, Bernard (ed)	Weapons and Warfare, Volume 4, Introduction, features some well-known names such as Messerschmitt who contribution to Germany's Second World War arsenal Bismarck, battleship, of which Germany was limited to 35 percent of British naval strength, max 34,000 tons per ship per the Anglo-German Naval Treaty 1935. Bofors and Breda names with 40-mm antiaircraft guns in service worldwide since early 1930's, and Breda weapons produced for the Italian army in the 1920's and 30's. Guns, planes, ships, and artillery tanks are represented in black & white and color photographs and drawings.

			the London naval treaty of 1936. Emphasis was on speed and range rather than armament. This volume included the British Invincible, and German Junkers aircraft; the Jeep; the Soviet Kalashnikov and other small arms.
2006.323.109	Weapons and Warfare - The Illustrated Encyclopedia of 20th Century - 15	Fitzsimons, Bernard (ed)	Weapons and Warfare - Volume 15 - "O God of battles, steel my soldiers' hearts; Possess them not with fear; take from them now The sense of reckoning, if the opposed numbers Pluck their hearts from them." - Shakespeare, King Henry V, Act IV, Scene 1. Karl - Krivak The first great naval battle of the 20th century was fought between Japan and Russia at Tsushima in May 1905. The Russians were defeated and it was observed that new warship design was needed which inspired a new program of naval construction. Intriguing aspects of the Soviet Navy is the number of innovative designs produced and the great age to which many of its ships have served. The armored gunboat Khrabry completed in 1896 served during WWI and was sunk in 1942, was raised and used as a training ship until after 1945. The world's first submarine minelayer the Krab was still under construction until after the revolution of 1917. The four traditional Russian fleets played a prominent role in the Northern, Baltic and Pacific. The Krasni Kavkaz and Krasni Krim completed in 1932 and 1928 served in WWII lasted until the 1970's. The longevity of Soviet warships can be explained by repeated destruction of her dockyards during WWII in which innovations and a new emphasis on Soviet Naval power expanding role in world affairs, coupled with the need to start largely from scratch in building up the postwar navy. Kola Class frigates of the 50's, Koma class Missile patrol boats and Osa and Stenka Classes

			were built. Armament became surface-to-air missiles, guided-missile destroyers in the 1960's and other heavy antiaircraft and antisubmarine armament as well.
2006.323.110	Weapons and Warfare - The Illustrated Encyclopedia of 20th Century - 16	Fitzsimons, Bernard (ed)	INTRODUCTION: The fascinating mixture of the familiar and the unusual, the conventional and the radically different, is continued in Volume 16 of "The Illustrated Encyclopedia of 20th Century Weapons and Warfare." The German Krummlauf (curved path) barrel attachment for firing around corners was developed for tank crews needing a close-range defensive weapon, and infantry wanting to be able to shoot from a concealed position. Although the device worked accurately up to a range of 200 meters, only small numbers were made and the idea has not been pursued since the Second World War. Another barrel attachment, the Littlejohn adapter, was a tapered extension for the 2-pdr antitank gun, designed to increase muzzle velocity by squeezing a special tungsten-cored shot. Unfortunately, the device was only perfected after the 2-pdr had become obsolete as an antitank weapon, and while it was issued to armored cars which mounted the weapon, the crews were understandably reluctant to change the adapter every time they wanted to use a different type of shell. Instead, they used the special ammunition with the ordinary barrel and claimed it to be just as effective. In the field of small arms, two of the most successful weapons of the century are covered. The Luger (or, correctly, Parabellum), one of the best known of all pistols, has seen widespread use since the Swiss army first adopted it in 1900, and has continued in production ever since. The British Lee-

Object ID	Title	Author	Summary
			Enfield rifle series, derived from the nineteenth-century Lee-Metford, has a history spanning almost the whole life of the modern military rifle. It, too, has been in service almost throughout the century, the first having been issued in 1902. The Lewis machine gun has had a shorter career, though many were brought out of storage and used during the Second World War. It was, however, the first successful light machine gun to be used in large numbers, and, but for the enterprise of its inventor, might never have been used. Colonel Isaac N. Lewis developed the design before the First World War, but failed to raise any official interest in the United States. Consequently, he set up his own factory in Belgium, and at the outbreak of war, found his gun adopted by both the British and Belgian armies. The Lewis was particularly noted for being one of the machine guns carried by the first combat aircraft, and was the standard British free-mounted machine gun for many years. Among the aircraft to carry the Lewis was the Packard-Le Pere LUSAC-11, the only American combat aircraft to see service during the First World War. Only small numbers were built, and only two reached France before the Armistice, but it was the first sign of the US Armed Forces' recovery from the apathy towards air power which had resulted in the Army Signal Corps possessing only 55 serviceable aircraft in April 1917. Some unconventional naval weapons are also covered in Volume 16. The German Linse was a remote-controlled motorboat, loaded with explosives and intended to be steered into the side of an enemy warship. Although it is not known how many were built, the Linse is credited with sinking a British destroyer

Object ID	Title	Author	Summary
			and a trawler. The Republic JB-2 Loon, a direct copy of the German FZG-76, or V-1, flying bomb, was the first guided missile to be launched from a submarine. It also came close to being used in action: a few days before the Japanese surrender in 1945, an escort carrier embarked with a battery of Loons to be used in bombardment of the Japanese mainland. But the war was over before it could be used. One of the few authentic secret weapons of the war was the Japanese Long Lance torpedo, a massive 24-inch diameter weapon with a range of over 20 miles -- twice that of the standard torpedoes of other navies. In fact, many of the Long Lance's victims were convinced they had been mined, not suspecting that a torpedo could have been launched against them from such a great distance.
2006.323.111	Weapons and Warfare - The Illustrated Encyclopedia of 20th Century - 17	Fitzsimons, Bernard (ed)	INTRODUCTION: Hiram Maxim was a prolific inventor who produced, among other things, a steam-driven airplane which actually managed to leave the ground. He is remembered today, though, almost entirely for his machine gun, which is among the diverse entries in Volume 17 of The Illustrated Encyclopedia of 20th Century ,reapons and Warfare. The world's first automatic machine gun, the Maxim was perfected in the 1880s, and was so successful that in the First World War it was the standard machine gun of both Britain and Germany, as well as Russia. The British .303-in. Vickers incorporated some modifications to the mechanism and was used both as a water-cooled ground gun, initially alongside the original Maxim, and as an aircooled aircraft gun. Other models, in larger calibers, were produced for specialized roles; the German MG08, in 7.92-mm caliber, almost identical but with a heavier

Object ID	Title	Author	Summary
			mounting, was developed into the Spandau and Parabellum aircraft guns; and the Russian version, again, was distinguished primarily by its wheeled carriage. The Vickers and the Russian Maxim remained in service until the Second World War and beyond. Germany, on the other hand, had been disarmed and prevented from developing new armaments by the Treaty of Versailles, a fact which was to prove something of a blessing in disguise. The disadvantage of having existing stocks of weapons confiscated and new production forbidden was overcome by clandestine development, and was compensated for by the opportunity it provided for both tactical and technological rethinking: while the Allies were lumbered with obsolescent equipment, the German army was forced to start again from scratch. In terms of machine guns this meant a new approach to tactics, with the automatic weapon becoming the focus of the infantry squad rather than merely a back-up to the infantrymen's rifles. Consequently, the old distinction between heavy and light machine guns was abandoned, and in its place came the general purpose MG34, which combined the light weight needed in an infantry weapon with the ability to lay down sustained fire in the defensive role. The MG34 was so effective that it remained in production until the end of the Second World War, and during that conflict was probably used in greater numbers than any other gun. The tortuous development of this weapon, involving a Rheinmettal design engineered and produced by Swiss and Austrian subsidiaries, is described in our account of the small arms produced by Mauser.

Object ID	Title	Author	Summary
			And Mauser machine-gun development did not stop there: By 1941 the MG34 had been redesigned to produce the MG42, one of the best machine guns ever produced and the basis for many postwar weapons, including the M60, standard CS machine gun since the late 1950s. Another area of research ostensibly closed to Germany during the 1920s was that of military aircraft. The success of German designers in overcoming this obstacle is highlighted by the products of the Messerschmitt company. These included the Me 163 rocket-powered interceptor, and the Me 262, the only jet fighter to make a real impact on aerial warfare up to 1945 (the British Gloster Meteor did enter service before the end of the war, but in spite of notable success in dealing with the FZG-76, or V-1, flying bomb, did not appear in sufficient numbers to have a real impact). Less successful, though just as ambitious in their own way were the Me 264 "Amerika-Bomber" intended to make unrefuelled round-trip bombing expeditions from Europe to the United States, and the Me 321 assault glider and Me 323 six-engined transport, both appropriately dubbed Gigant. These would have proved formidable vehicles for the planned airborne assault on Britain but were wasted instead on more mundane transport duties.
2006.323.112	Weapons and Warfare - The Illustrated Encyclopedia of 20th Century - 18	Fitzsimons, Bernard (ed)	INTRODUCTION: Among the subjects covered in Volume 18 of The Illustrated Encyclopedia of 20th Century Weapons and Warfare, Mines are one of the cheapest and most effective forms of defense both on land and at sea, and their employment and clearing is one of the most sophisticated forms of modern warfare. The origin of the term was

Object ID	Title	Author	Summary
			literal -- tunnels dug under enemy fortifications in order to undermine them, and later to blow them up with explosives. More recently it has come to mean an explosive device, usually concealed below the surface, used on land against either armored or personnel vehicles and at sea against shipping. Mines of both types have played a significant part in twentieth-century warfare. In recent years, naval mines in particular have grown in sophistication. The US Captor (capsule torpedo) mine, for example, consists of a container housing a homing torpedo: sonar equipment can detect submarines or active sonar emissions, whereupon a release mechanism is activated and the torpedo is released to home on its target. Moreover, many modern mines can be laid before they are needed and subsequently activated at will. One of the most successful series of modern combat aircraft has been the Mirages produced by the French company founded by Marcel Dassault. During the 1930s as Marcel Bloch, Dassault had produced a variety of aircraft for the French air force. After his release from Buchenwald concentration camp in 1946, he adopted the name Dassault from his French Resistance days, and embarked almost immediately on the construction of the MD 450 Ouragan, France's first jet fighter of indigenous design. The Ouragan was followed by the Mystere series and the Etendard before design of the delta-wing Mirage I was begun in the mid-1950s. Several marks of Mirage have followed, including fighter, reconnaissance and strategic bomber versions, the latest and most spectacular being the Mirage 4000, a twin-engined long-range fighter unique among modern military aircraft in being built purely as a private venture at a cost

Object ID	Title	Author	Summary
			which few national governments would even contemplate. Returning to the Second World War, some of the best known as well as some of the more unusual military aircraft are covered in Volume 18. The North American B-25 Mitchell was built in larger numbers than any other US twin-engined bomber and operated on virtually every front with every post-1940 Allied air force. The same company's P-51 Mustang was one of the outstanding fighters of the war, one of its greatest attributes being a range up to seven times that of contemporary British fighters which enabled it to escort bomber formations from bases in Britain all the way to targets in Germany. The versatile De Havilland Mosquito, meanwhile, had such phenomenal speed for a bomber that it could dispense with fighter escorts, its speed being enough to keep it out of trouble. The attrition of the Luftwaffe caused by the newly available Mustang escorts, and the wholesale destruction of German cities and industrial targets which resulted from the increased effectiveness of the bombing raids, forced the Luftwaffe to adopt desperate defensive measures. One of these was in the form of the Bachem Ba 349 Natter, the most revolutionary piloted aircraft of the Second World War. The Natter was a small wooden aircraft with a rocket motor in the rear fuselage and 24 rockets in the nose. After being launched vertically from guide rails, it was intended to climb steeply above a bomber formation and make a single unpowered glide attack, firing the nose rockets. After the attack, the pilot was supposed to bale [sic] out while the tail and motor were retrieved by parachute. Fortunately for Allied bomber crews, the Natter failed to become operational

			before Germany was overrun.
2006.323.113	Weapons and Warfare - The Illustrated Encyclopedia of 20th Century - 19	Fitzsimons, Bernard (ed)	INTRODUCTION: Although the German army of the 1920s was forbidden tanks by the Treaty of Versailles, experiments with armored vehicles, many of them dummy superstructures mounted on automobile or even tricycle chassis, were carried out, and various prototype tanks, usually described as "agricultural tractors," were produced. By 1933 the design of the Panzerkampfwagen I was finalized, and in the following year the first examples were issued to the newly formed armored regiments. During the 1930s, the Blitzkrieg tactics that were to conquer almost the whole of western Europe in 1940 were refined, and the tools of the Blitzkrieg, the Panzerkampfwagen (literally, armored battle vehicles) are among the entries in Volume 19 of The Illustrated Encyclopedia of 20th Century Weapons and Warfare. As the first German tanks (not counting the A7V of the First World War) the Panzerkampfwagen I and II, were lightly armored to withstand rifle and machine-gun fire. Their armament was not particularly heavy -- two machine guns on the Panzer I, a machine gun and a 20-mm cannon on the II. Progressive development saw dramatic increases in armament, however, and by the end of the Second World War the tank had evolved into a massive, heavily armed and thickly armored vehicle far removed from its prewar ancestors. The medium Panzerkampfwagen III introduced a 50-mm gun and slightly heavier armor, while the heavy Panzerkampfwagen IV started with a short 75-mm gun and a 15-mm armor base. This was protection against small-arms fire and shell splinters but little more. Later

Object ID	Title	Author	Summary
			models, however, introduced a long, high-velocity 75-mm weapon and increased the armor base to 80 mm. The Germans, meanwhile, had invaded Russia, where they were shocked by the appearance of the Soviet T-34, which was far superior in armament and protection to the German tanks. They responded with the Panzerkampfwagen V, or Panther, which incorporated many of the features of the T-34, notably the sloped frontal armor. One of the reasons for the rapid up-armorings of German tanks was the increase in potency of antitank weapons -- not only artillery pieces, which showed a dramatic improvement in accuracy and hitting power, but also individual antitank weapons. During the 1930s, the standard infantry antitank weapon was the antitank rifle. The German Panzerbuchse were typical of this type of weapon -- very high-powered rifles effective against only the lightest of armor at extremely close range. The greatest breakthrough in the antitank field was the hollow-charge, or shaped-charge warhead, which did not depend on speed of delivery for its effect, but worked on quite different principles. Essentially, the hollow-charge shell is just that: The forward part of the warhead is hollowed out and backed by a metal plate; on striking the target the explosive is detonated and focused into a jet capable of penetrating the thickest armor. One of the first individual antitank weapons to use the new device was the British Piat, a spigot mortar launching a small hollow-charge bomb. The German Panzerfaust was a recoilless launcher, the prototype being single-shot disposable weapons, the later models being able to be

Object ID	Title	Author	Summary
			reused. Finally, the Panzerschreck was a rocket launcher based on the US Bazooka. All these weapons had an effective range of around 100 yards, and about the only protection available to tanks was wire mesh skirts which detonated the charge at
2006.323.114	Weapons and Warfare - The Illustrated Encyclopedia of 20th Century - 20	Fitzsimons, Bernard (ed)	INTRODUCTION: A number of the entries in Volume 20 of The Illustrated Encyclopedia of 20th Century Weapons and Warfare highlight the extent to which missiles have been adapted to an ever-increasing variety of roles with an enormous range of destructive power. The first large-scale use of missiles, both guided and unguided, was made during the Second World War, when Germany in particular produced a number of types, among them the A-4, the first strategic missile. More limited in their capabilities, but probably of more immediate use, were such weapons as Puppchen, an antitank rocket launcher using the same shell as the portable Panzerschreck but with a more powerful motor. A development of this weapon which incorporated the recoilless principle, may well have formed the basis for the Soviet RPG series of rocket launchers. A more ambitious surface-to-surface missile was Rheinbote, which had an impressive range of 135 miles, but carried a warhead of such limited effectiveness that its development must be considered a waste of resources. More useful was R4M, a fin-stabilized rocket for air-to-air use: The Me 262 jet interceptor could carry up to 48 R4Ms, and a single hit was enough to destroy a heavy bomber. The addition of guidance systems obviously enhances a missile's effectiveness, but they were in their infancy during the war. One promising surface-

Object ID	Title	Author	Summary
			to-air missile was the radio-controlled Rheintochter, but changes in the requirements and reallocation of resources led to its abandonment after promising trials. Since the war, the power of missiles has increased beyond recognition. The first Western submarine-launched ballistic missile, Polaris, introduced a new dimension to warfare with its ability to be launched from anywhere below the world's oceans, and with a range of almost 3000 miles. Its successor, Poseidon, added to these capabilities by carrying up to 14 independently targetable warheads. Other submarine-launched strategic missiles included in Volume 20 are Regulus I and II, intended for use against point targets, the latter having an accuracy of better than one mile at the extreme of its 1000-mile maximum range. Moving down the scale, the French Pluton is a battlefield support missile fired from mobile launchers and carrying a nuclear warhead over a range of up to 75 miles -- an alarming increase in destructive power compared with Rheinbote. Surface-to-air missiles include the Swedish RBS70, with a proximity-fused warhead containing about 2000 metal balls which are exploded in all directions; the British Rapier, with its small semi-armor-piercing warhead, which needs a direct hit but still manages a 70% kill probability; the US Redeye, a shoulder-launched fire-and-forget missile for use against low-flying targets; and the Franco-German Roland, a vehicle-mounted system. The threat of surface-to-air missiles (SAMS) has led to the production of the US Quail, a decoy carried by bombers in order to mislead enemy SAMS; more commonly, air-

Object ID	Title	Author	Summary
			launched missiles are used for attacking aerial or ground targets. Into the former category come such weapons as the Swedish RB04 and RB05 antiship weapons. Air-to-air missiles (AAMS) enable targets to be engaged at far greater ranges than is possible with guns. The French R.511 and its successor R.530, for example, have a range of 11 miles, while such AAMS as the British Red Top add the ability to engage targets behind,
2006.323.115	Weapons and Warfare - The Illustrated Encyclopedia of 20th Century - 21	Fitzsimons, Bernard (ed)	INTRODUCTION: Volume 21 of The Illustrated Encyclopedia of 20th Century Weapons and Warfare features, among the usual variety of modern military hardware, a number of the products of the Sikorsky company, one of the world's leading producers of helicopters. Igor Sikorsky was, of course, one of the pioneers of aviation, having produced the world's first four-engined airplane in 1913 and the enormous Ilya Mourometz strategic bomber in the following year. After his emigration to the United States he was also responsible for the Pan American Clippers, pioneer flying boats of the 1930s. His first military helicopter to be built in quantity was the R-5; the second was the S-55, which remained in production for more than ten years and was built under license in Britain, Japan, and France. After the S-55 came the S-56, originally an assault transport for the US Marines, and numerous other designs, of which the best-known is probably the S-61 Sea King, used in numerous military roles since 1961. The Sea King served in a number of countries and was built under license by Agusta in Italy, Westland in Britain, Mitsubishi in Japan, and the United Aircraft corporation of Canada. Remotely piloted vehicles, or RPVs, have often used rotary wings to provide lift, though

Object ID	Title	Author	Summary
			the peculiar control problems of this means of flight have led to such programs as the DASH unmanned antisubmarine helicopter being abandoned. Simpler remotely controlled aircraft, however, have found a number of military applications, particularly in roles where the risk of casualty is high. One obvious function for which they are eminently suited is acting as aerial targets, either for straightforward target practice or as decoys for enemy missiles; others include battlefield or photographic reconnaissance, pathfinding and electronic countermeasures. More conventional aircraft featured in Volume 21 include the Lockheed F-80 Shooting Star, the second jet aircraft to fly in the United States and one of the USAF's first jet fighters; the North American F-86 Sabre, first American supersonic fighter and hero of the first large-scale jet-against-jet combat over Korea; the Douglas A-1 Skyraider, first aircraft produced to meet the US Navy's new attack role after the Second World War, and the McDonnell Douglas A-4 Skyraider, one of the most successful of all combat aircraft and still in production after nearly 30 years. Land warfare is represented in the form of the M4 Sherman, one of the most widely used tanks of the Second World War - and after -- of which almost 50,000 were built. A more recent family of fighting vehicles is the British Scorpion series, which includes the light tank, Scimitar armored reconnaissance vehicle and Striker guided-missile launcher, as well as APC, command post, ambulance and armored recovery vehicles all built on the same basic hull and suspension, and planned from the start as a family -- in contrast to the usual procedure which sees specialized conversions improvised as

			the need arises. Finally, at sea, Volume 21's coverage ranges from the Schnellboote -- better known as "E-Boats" -- of the Second World War and the Soviet "Shershen" class fast patrol boats of the 1960s to the German battlecruiser Scharnhorst. The Scharnhorst one of the capital ships which posed a constant threat to Allied shipping during the war, actually achieved very little because their movements were restricted by fear of their loss.
2006.323.116	Weapons and Warfare - The Illustrated Encyclopedia of 20th Century - 22	Fitzsimons, Bernard (ed)	INTRODUCTION: Volume 22 of The Illustrated Encyclopedia of 20th Century Weapons and Warfare spans the whole range of military aviation, from First World War biplanes to jet-powered interceptors and strategic bombers, and includes a number of types which were among the first and best of their kind. The French Spad series of biplane fighters, many of which equipped American Expeditionary Force squadrons in 1917-18, were among the finest of their day, while the Supermarine Spitfire was one of the first classic monoplane fighters. Derived from the 1931 Schneider trophy-winning S.6B seaplane, the fastest aircraft of its time, the Spitfire will always recall the desperate days of the Battle of Britain, but it went on to be developed through a whole series of models. It was the only Allied fighter to remain in production throughout the Second World War, and was a remarkable testimony to the soundness of the original design. The advent of jet propulsion enabled a new order of performance. The Douglas F4D Skyray incorporated another innovation, the delta wing, the first such aircraft to be built in the United States, while the USAF's first all-weather interceptor, the Lockheed F-

Object ID	Title	Author	Summary
			94 Starfire, had an unusual history of development. It developed from the F-80 Shooting Star via the T-33 trainer in one of the rare instances of a two-seat conversion having better performance than the original single-seat fighter. Another extreme of aerodynamic design is represented by the same company's F-104 Starfighter -- "the missile with a man in it" -- which combined a needle-like fuselage with wings of the smallest possible area to achieve its outstanding performance. Bombers, too, are well represented, from the German Staaken R heavy bomber series of the First World War, via the Boeing B-29 Superfortress, the most advanced bomber of the Second World War. Boeing continued their tradition of heavy bomber design with one of the first generation of US jet bombers, the B-47 Stratojet, one of the few truly revolutionary airplanes, incorporating not only jet propulsion but also swept wings. And the B-52 Stratofortress, whose basic design was worked out in the space of a long weekend in a hotel room in Chicago. The Stratofortress was originally intended to serve for just five years; remarkably, it is still in service more than 25 years after its first flight. It has been adapted to new roles never envisaged when it was designed, and, following the cancellation of the Rockwell B-1, may well serve until the end of the century. One type which also deserves a mention is the Ilyushin Il-2 Sturmovik, a specialized Soviet ground attack machine built in greater numbers than any other Soviet aircraft and so effective that it became known to German tank crews as the Black Death. On land, Volume 22 deals

			with small arms from the Smith & Wesson and Springfield companies, the Steyr and Solothurn subsidiaries of Rheinmettal, used for design and production of new weapons during Germany's period of clandestine rearmament, the Sten submachine gun, and the remarkable designs of Eugene Stoner, who suffered the irony of having his new 5.56-mm weapon system turned down in favor of the M16, which itself stemmed from one of his
2006.323.117	Weapons and Warfare - The Illustrated Encyclopedia of 20th Century - 23	Fitzsimons, Bernard (ed)	INTRODUCTION: Although the Italian Vilar Perosa is widely held to be the first ever submachine gun, on the grounds that it was the first automatic weapon to fire pistol-caliber ammunition; its absurdly high rate of fire, which emptied its 25 -round magazine in less than one second, meant that it was actually used as a twin-barrelled light machine gun. Its shortcomings, though, were overwhelming. The Thompson, on the other hand, is rightly renowned as one of the most reliable and effective weapons of its type ever produced, and after a long period of rejection by military authorities -- contrasting with its enthusiastic adoption by gangsters -- it came into its own during the Second World War, when some 1,750,000 were produced. A more recent submachine gun which enjoys a similarly high reputation is the Israeli Uzi, while the Vickers machine gun, developed from the original Maxim, was another outstandingly reliable automatic weapon. In spite of the notable small arms mentioned above, naval warfare is predominant in Volume 23 of The Illustrated Encyclopedia of 20th Century Weapons and Warfare. Not only the first part of our coverage of Naval Ordnance, which outlines some of the particular problems and requirements of ships' guns and begins a survey of the principle weapons used in the

Object ID	Title	Author	Summary
			various calibers, but also Torpedoes, a different type of naval weapon, and the vessels with which they are often most commonly associated, the German U-Boats of the two World Wars, are included here. The perfection of the Whitehead torpedo in the 1880s was one of the main spurs to the development of the submarine which until then had been hamstrung by the lack of a suitable weapon. Germany was among the last countries to display any interest in the new weapon, but made up rapidly for lost time. During the First World War the U-boats' campaign against merchant shipping came within an ace of winning the war. This campaign was repeated during the Second World War, and again came close to success. Of course, just as the torpedo is not used exclusively by submarines, submarines are not just torpedo carriers. Germany evolved minelaying and transport U-boats, and the profusion of different types of torpedoes, including sophisticated homing types, have been carried by ships and aircraft. Statistics can often be misleading, if not actually meaningless, but the bare figures describing the exploits of the Republic P-47 Thunderbolt are nothing less than awe-inspiring. In Europe alone, in less than a year, Thunderbolts are credited with dropping 119,748 tons of bombs, firing 135,000,000 rounds of .5-in ammunition, and launching 60,000 rockets; in the process they destroyed no less than 86,000 rail cars and 9000 locomotives, as well as 68,000 motor vehicles and 6000 armored vehicles. The "Thunder" series of fighter-bombers begun by the P-47 has been continued by the F-84 Thunderjet and its F-8F [sic] Thunderstreak and RF-84F

Object ID	Title	Author	Summary
			Thunderflash photo-reconnaissance derivative and the F-105 Thunderchief. Finally, some notable products of the North American aircraft company are included in Volume 23. The T-6 Texan and its many variants, including the British Harvard, were responsible for training the vast majority of Allied pilots during the Second World War a reminder of the often neglected part played by trainers. North American went on to produce the replacement for the Texan, in the shape of the T-28 Trojan; a more novel means of replacing a successful aircraft was applied in the case of the successor to the P-51 Mustang to produce the F-82 Twin Mustang, a name which succinctly sums up the technique of combining two Mustang fuselages.

2006.323.118	Weapons and Warfare - The Illustrated Encyclopedia of 20th Century - 24	Fitzsimons, Bernard (ed)	INTRODUCTION: The concluding volume of The Illustrated Encyclopedia of 20th Century Weapons and Warfare is dominated by the index, which highlights the staggering profusion of hardware which has been produced in less than a hundred years and, unfortunately, has been used in almost as many wars. Well over 4000 destroyers, for example, have been built, spanning the development of this type of warship from the original concept of a torpedo boat destroyer, intended to combat the threat of fast, light vessels to the modern guided-missile version, itself the equal in firepower of a First World War cruiser squadron. Again, while the submarine was little more than a novelty in 1900, some 1500 submarines are included in that section of the index, whereas the battleship, linchpin of naval power in the early years of this century, has gradually faded away, relinquishing its position to the aircraft carrier and the

Object ID	Title	Author	Summary
			ICBM armed submarine. Aircraft and guided missiles are, of course, children of the twentieth century. The first powered, controlled flight was not made until 1903, and it is astonishing to reflect on the capabilities conferred on aircraft in the few decades since then. Fighters fly at more than twice the speed of sound, vertical takeoff aircraft can remain motionless in mid-air and fly sideways and backwards, strategic bombers and transports carry phenomenal weights over equally phenomenal distances, and airliner fuselages packed with electronics can survey vast tracts of the globe and provide airborne command posts capable of directing a world-wide war. And while the principle of rocket-powered flight has been known for centuries, the twentieth century has seen the evolution of whole new technologies, so that lasers, infrared, radar, radio, and television have all been applied to the guidance of missiles, the largest of which deliver nuclear warheads of unimaginable power to targets thousands of miles away. Through all this the individual soldier has remained, though his small arms have grown enormously in sophistication and the transport and artillery support provided have made even greater progress. Other new types of weapon are still in their infancy. Killer satellites, raising the prospect of battles fought outside the earth's atmosphere, laser weapons and so-called "neutron bombs," which reduce the blast of an atomic explosion while enhancing the destructive radiation are all the subject of research, while it is impossible to know what other lines of investigation are being pursued in secret.

Object ID	Title	Author	Summary
			One lesson becomes clear, however, from the study of the weapons of the twentieth century. No one in the year 1900 could have predicted the variety of weaponry that would be available even during the Second World War, let alone in the years since then, and while the production of a new weapon can now take anywhere up to a decade or more, speculation about the future of weapons and warfare can hardly be anything but futile.
2006.323.120	Target Pearl Harbor	Stone, Scott C. S.	The Pearl Harbor story for young readers
2006.323.121	Story of World War II, The	Leckie, Robert	"The greatest war in history began at dawn of 9-1-39. On that day Germany invaded neighboring Poland, attacking without warning and with such shattering power and speed that the world gasped to see how easily the first step in Adolf Hitler's plan for world conquest was being carried out." So begins the exciting narrative account of WWII. From the Nazi blitzkrieg invasion of Poland to the final hard-fought defeat of Japan, the book covers the events, places, and personalities whose names will forever stand out in the annals of military history: Tobruk, Pearl Harbor, Bataan, Casablanca, Guadalcanal, Anzio, Stalingrad, Iwo Jima, Hiroshima; MacArthur, Eisenhower, Nimitz, Halsey, Patton, Rommel, Montgomery, Churchill, Hitler - to mention only a few.

			jet age. This particular volume covers the span of history and myth from around 11 BC up to and through the Wright brothers successful achievement of powered flight in the early 1900s. In the process, it discusses such diverse flying objects, and hoped-for flying objects, as kites; balloons; manned and unmanned gliders; tower jumpers paraphernalia; parachutes; and finally powered craft, both successful and unsuccessful. In reading the book, I was astonished to see how many misguided men seemingly had more guts than brains and attempted flight with no preparation and little or no understanding of what they were about to do. I was also surprised to find that, with so many attempts over such a long period of time, so little was learned by those who followed concerning the elements and requirements of flight, either powered or otherwise. Take, for example, the efforts of Robert Cocking who, in 1837, fashioned a parachute of his own design. He and his chute were hoisted aloft beneath a hot air balloon and released at about 5,000 feet. The parachute then collapsed carrying Cocking to his death. Academically speaking, it seems that it would have been much more prudent to have tested the parachute before the actual attempt. And the same might be said of Franz Reichelt who stepped off the Eiffel Tower, planning to glide safely to the earth below. His vertical glide lasted a scant five seconds. It seems that the Wright brothers were the first would-be aviators in history to attempt to learn everything they could from previous attempts, to test that knowledge in practice, and to understand the need, not only to get into the air, but to be able to control their craft once it was aloft. They were also prudent

Object ID	Title	Author	Summary
			enough to pursue their goal in a systematic, step-by-step, manner, learning and testing as they went. Starting from scratch, with little formal education, no basic knowledge of flight, and no outside funding, they succeeded where all others before them had failed. They simply applied what might now be termed the scientific method, and, with a measure of courage and a great deal of brain power, were able to achieve what many thought to be impossible. (Customer review from Amazon.com)
2006.323.176	Flying the Mail	Jackson, Donald Dale	Recounts the adventures of such early aviation pioneers as Charles Lindbergh and Antoine de Saint-Exupery, who risked their lives to deliver the mail.
2006.323.179	Aeronauts, The	Jackson, Donald Dale	Chronicles the history of ballooning from the eighteenth through the twentieth centuries, describing the principles of balloon flight and looking at the uses of balloons for travel, warfare, and recreation
2006.323.180	Airline Builders, The	Allen, Oliver E.	Details the founding and early years of America's major airlines. It contains a wealth of information on the personalities, struggles, competition, and even the airplanes that constituted these new giants of transportation. A surprising fact was that the airline routes were really established by the U.S. Postmaster General, when airmail accounted for more revenue to the airlines than passenger fares.
2006.323.181	Jet Age, The	Serling, Robert J.	This book tells the story of the transitional years, between the end of the large piston engined airliners, and the introduction of the 1st jet powered ones, in the 1940's and 1950's. This era is still influential to all of us, because, without it occurring, we could still be in a time when airline passenger service would be the territory of only the wealthy, as it was from the 20's until the mid 50's. Jets introduced speed, efficiency,

2006.323.190	Aircraft of World War II	Gunston, Bill	Aircraft of World War 2 with Introduction, 40 different aircraft types all of which played a significant part in the war. Fighters such as the Spitfire, Hurricane, Mustang, Messerschmitt Bf109, Zero, Fw190, and classic bombers, the Lancaster, Flying Fortress, Liberator, Heinkel He111, and transports such as the Ju52 and C-47 to name a few. There are 208 pages of 600 full-color scale drawings with camouflaged markings on aircraft with five-view drawings of each type.
2006.323.191	Illustrated Encyclopedia of the World's Modern Military Aircraft, The	Gunston, Bill	The speed of the development of military aircraft over the past seventy-five years, and the complexity of the systems now in use, can justly claim to be among the most staggering of Man's technological

Object ID	Title	Author	Summary
			achievements. From relatively crude beginnings, military aircraft have evolved into perhaps the most lethal yet beautiful machines in the world. This superb, colourful encyclopedia offers the reader in-depth studies and data for all the major combat aircraft in service today and vividly conveys the excitement aroused by these high performance, highly potent aircraft. Bill Gunston, an internationally respected authority, has written penetrating and readable analyses of the design, development and capabilities of each aircraft and its variants. His text is complemented by a multitude of photographs, detailed cutaway drawings, colour profiles and precisely drawn three-view diagrams. Every entry is illustrated and the large number of full colour action photographs - over 300 in all - make this the most visually impressive book on the subject ever to appear. The aircraft are conveniently sectionalised into major roles so that the warplanes of one nation can easily be compared with those of actual or potential adversaries. Not so long ago it was predicted that military aircraft would soon 'all look alike'. How far this judgement is at variance with the truth will soon become apparent to anyone merely glancing through the 256 pages of this absorbing and magnificently produced volume. (from dust jacket flap)

2006.323.224	Green Wave and the Navy : The History of the USS Benfold (DDG-65), The	Edgar, Danny K.	(Reader Review)April 24, 2000 By Ella Dillon History, romance, patriotism, courage, tragedy, respect, honor, admiration, appreciation and gratitude; all of these are found in this 512 page book. The life and heroic death of Edward C. Benfold, a 21 year old Navy corpsman assigned to the 1st Marine Division in Korea is reconstructed 47 years after his death from historical records, letters, newspaper clippings, military citations and in the words of his widow and son. During the 1950's Charlton Comics, no longer in business published a comic book called "War Heroes". Included in the book is the original comic strip about Benfold's heroism. A Naval destroyer, USS BENFOLD (DDG-65) was named in Edward's honor. Petty Officer Danny K. Edgar, co-author of this book is in charge of all food preparation aboard the ship. A Memorial in his honor, constructed by high school seniors sits on the lawn of the high school from which Benfold graduated in 1949. The speaker at the dedication ceremony was the first Commander of the ship. Present at that dedication, July 4, 1994 was one of the Marines he saved on that fateful day. A friendship has evolved between the town of Audubon, New Jersey, where Edward grew up and the BENFOLD, every Commanding Officer and members of the crew have visited this small community. Residents correspond and send gifts. The ship has in return sent gifts pertaining to the ship. Craig Burgess, retired

Object ID	Title	Author	Summary
			educator and poet and lifelong resident of Audubon is co-author. He has visited the ship every year on the anniversary of it's commissioning. Included in the book are letters from officers and crew of the ship expressing affection for the town and appreciation for the friendship. This is a beautiful story of heroism and patriotism, and a High School that is making the headlines in a positive way. Good kids who still have respect for those who have gone on before. It is heart warming and inspiring. This book is the most important thing I have ever been a part of. I am extremely honored to have had a hand in the birth of such a beautiful story. It cleanses the palate after reading about Littleton. It's like a breath of fresh, clean air. (from Amazon.com)
2006.323.225	With Marine Forces Afloat in Desert Shield and Desert Storm	Brown, Ronald J.	Foreword - This monograph presents a preliminary account of operations by the embarked Marine units under the operational control of the Commander, Naval Forces, Central Command, in the Persian Gulf from August 1990 to May 1991. It tells the story of the 4th and 5th Marine Expeditionary Brigades (MEBs) and the 13th and 11th Marine Expeditionary Units (MEUs) which comprised the Marine Forces Afloat during Operations Desert Shield and Desert Storm. The term "Marine Forces Afloat" was chosen carefully because although each of these units served in the same theater of operations, they remained separate entities capable of rapidly integrating into a single force or breaking away to conduct independent operations as the situation required. The Marine Forces Afloat came into existence early in

Object ID	Title	Author	Summary
			Operation Desert Shield when the seaborne 4th MEB joined the forward-deployed 13th Marine Expeditionary Unit (Special Operations Capable) in the North Arabian Sea in mid-September. These Marines were later joined by the 5th Marine Expeditionary Brigade during what would eventually become the longest continuous shipboard deployment by a brigade-sized force in Marine Corps history. For those Marines, the major events of Desert Shield were a series of large amphibious exercises, maritime interdiction operations, and a daring evacuation of the American Embassy at Mogadishu, Somalia. During Operation Desert Storm the U.S. amphibious threat created a strategic distraction that kept Saddam Hussein's attention focused away from the main attack; Marine Aircraft Group 40 flew the first-ever fixed-wing combat strike off an amphibious assault ship; the 13th MEU made two landings; the 4th MEB conducted amphibious demonstrations off the coast of Kuwait; and the 5th MEB participated in ground combat ashore. On its way home the 5th MEB joined Operation Sea Angel, the international humanitarian effort to assist Bangladesh in dealing with the devastation of Cyclone Marian. This work is one in a series of monographs written by members of Mobilization Training Unit (Historical) DC-7 who deployed to the Persian Gulf. The MTU is a Reserve unit composed of artists, historians, and museum specialists who support the activities of the History and Museums Division in peacetime and stand ready to deploy at a moment's notice in times of crisis. Members of the MTU have covered Operations Desert Shield and Desert

			Storm (Persian Gull), Provide Comfort (Northern Iraq), Restore Hope (Somalia), Restore Democracy (Haiti), and Deny Flight (Bosnia) .
			While writing this monograph Lieutenant Colonel Ronald J. Brown was the commanding officer of Mobilization Training Unit (Historical) DC-7. During active service from 1968 to 1971 he was an infantry officer and served with five different Marine divisions including a combat tour in the Republic of Vietnam. Over the next two decades his travels as a Reserve historian took him to every major Marine base in the United States, and overseas to Europe, the Mediterranean, the Far East, and the Persian Gulf region. During Operation Desert Shield he was called to active duty and became Deputy Command Historian, I Marine Expeditionary Force. Rather than return to the United States at the end of Operation Desert Storm, Lieutenant Colonel Brown volunteered to serve in northern Iraq as the Marine component historian for Combined Task Force Provide Comfort. In civilian life he was a high school history teacher and athletics coach in the Detroit area until his retirement in 1994, and he continues to be an active high school football coach. Lieutenant Colonel Brown has been a frequent contributor to professional journals and is the author of two History and Museums Division monographs, A Brief History of the 14th Marines and Humanitarian Operations in Northern Iraq, 1991: With Marines in Operation Provide Comfort. In the pursuit of accuracy and objectivity, History and

			Gettysburg. Generals such as Longstreet, Hunt, Alexander are noted and Colonel John Singleton Mosby. Vicksburg Campaign and battles of Port Hudson, Murfreesboro, Chickamauga, Chattanooga and others are included.
2006.323.260	Battles and Leaders of the Civil War - Volume IV - Retreat with Honor	Johnson, Robert Underwood (ed)	Battles and Leaders of the Civil War, Volume IV with Frontispiece "On the Confederate Line of Battle "With Fate Against them." from painting by Gilbert Gaul. Retreat With Honor - events that led to the end of the war with description of the land and sea operations in Battle of Charleston. Grant's Wilderness Campaign, Sherman's march to Atlanta and the final actions in Arkansas, Missouri, and Tennessee are depicted. Lee's surrender at Appomattox Court House, Va.
2006.323.261	Submarines	Preston, Antony	SUBMARINES in ten chapters and Index with the history of Ezra Lee pedalling underwater in the Turtle on a September night in 1776 to attack a British warship in New York Harbor. The beginnings of what would lead to submarine warfare. 200 years later the Trident was launched and submarines became a part of military history worldwide as well as world and Arctic exploration.
2006.323.262	Battleships	Preston, Antony	This lavishly illustrated book offers a concise history of the battleship from the end of the Age of Sail to the Iowa Class. Focusing on the world wars has been common in such books; this one also covers the pre-Dreadnaught era, and does it well. There are ample photos of the ships themselves, of scale models, and line drawings. The text was written by a lover of the big ships, as is evident in the section on H.M.S. Vanguard, the last British battleship, described as, "a magnificent sea boat," that handled beautifully, without the lumbering movements of less aquadynamic vessels. ----- In this book by and

			acclaimed author and historian, we have the complete story of those iron and steel ships which replaced the wooden vessels of the Nelsonian age. Commencing with the ironclad "La Gloire" and ending with the USS New Jersey, we are taken on a thrilling ride of freakish ships, the first arms race, the Dreadnought, the end of European naval domination of the high seas and beyond. From the Japanese victory at Tsushima, the inconclusive Battle of Jutland in WW1 to Midway and Leyte Gulf in WW2, we find the even mightier ships - such as Hood, Bismarck, Tirpitz and Yamato disappearing from the face of the earth one by one. In this book we are able to relive some of the greatest-ever naval encounters. (customer reviews from Amazon.com)
2006.323.263	Aircraft Carriers	Preston, Antony	The aircraft carrier is the archetypal weapon of the twentieth century. Born in World War I it became the most significant weapon during the Pacific campaign in World War II. Today it is still a powerful tool in the hands of both the American and Soviet navies. The history of the "Aircraft Carriers" describes not only their use throughout many conflicts. Technical descriptions of the development of the planes and the ships themselves are illustrated through cut-away diagrams and line drawings. The aircraft carriers, the men who fought on them, the planes that flew from them and the battles in which they fought are brilliantly described by Britain's foremost naval historian, Antony Preston, author of numerous works such as "Destroyers," "U-Boats," "Navies of World War II" and "Navies of the American Revolution." With over 300 photographs in colour and black and white, together with drawings, charts and maps, the history of the "Aircraft

			Carriers" should prove to be a collector's item for all naval buffs and students of war at sea in the twentieth century for many years to come. Antony Preston was born in England in 1938. Educated at King Edward VII School and the University of Witwatersrand, Johannesburg, South Africa he returned to England to become a Research Assistant in charge of Admiralty records at the National Maritime Museum, Greenwich. He has written "Send a Gunboat," "V and W Destroyers," "Battleships of World War I," "Submarines," "Navies of the American Revolution," "An Illustrated History of the Navies of World War II," "Destroyers" and "U-Boats" and was co—translator of the "Warships of the Japanese Navy 1868-1945." He is a regular contributor to leading naval historical journals, and for years was an editor of the "Warship Profile" series. A consultant to a number of publishing groups in naval and historical affairs, he is the editor of the naval history quarterly "Warship" and was deputy editor of "Navy International" until his recent appointment as naval editor of "Defence" magazine. He is regarded as one of the world's leading authorities on navies, ships and war at sea. (from dust jacket flaps)

2006.323.280	Battling for Saipan	O'Brien, Francis A.	When V Amphibious Corps were preparing for the invasion of the Marianas Islands -- Saipan, Guam, and Tinian -- they were expecting a relatively easy flight. The Japanese appeared to be on the run. As D day for Saipan loomed (the first of the three islands scheduled for conquest), V Corps planners felt safe in allocating a single army division as corps reserve for the conquest. As Lt. Col.

2006.326.001	Raging Sea, The : The Powerful Account of the Worst Tsunami in U.S. History	Powers, Dennis M.	From Publishers Weekly Citadel sped up production on this account of the most devastating tidal wave to hit the continental U.S. in response to the recent tsunami; originally scheduled to be published in April, the book should be in stores this month. It's a gripping narrative: lawyer and amateur tsunami scholar Powers describes how, in 1964, four successive waves spawned by an Alaskan earthquake struck Crescent City, Calif., a lumber and fishing town near the Oregon border, flooding the low-lying areas and killing 11 people (four children also drowned on the beach to the north). Broadcast warnings came too late to be useful, but earlier, less destructive waves raised an alarm that prompted many people to head for high ground before the later, more damaging onslaughts. Powers interviewed survivors whose stories read like good action fiction, such as septuagenarian Mabel Miller's memories of surviving the night trapped in her ruined house. Less fortunate was Air Force Sgt. Don McClure, who saved a friend at the cost of his own life, or Gary Clawson, who saw his fiancée and half his family drown when raging waters capsized a boat in which they were trying to escape blazing oil tanks. Powers points out the town never quite recovered from the destruction wrought by the tsunami, although this was in part due to the decline of the fishing and logging industries. This is a very readable narrative, and interest in tsunamis is no doubt at an all-time high. But compared to 2004's tsunami, 1964's tidal

2006.326.008	Oceanography and Seamanship	Van Dorn, William G.	This is a book about boats and the sea by a long-time sailor who has spent more than a quarter-century as a research oceanographer. It explains in practical terms what the ocean is really like, why boats behave as they do, and what measures are open to the average skipper to make his voyages safer and more comfortable. Dealing first with oceanography, the author discusses the origin and nature of the oceans, meteorology, ocean circulation, principles of wave motion, and ocean waves. Then turning to the boats that sail the seas, he provides information about their dynamics with comments on stability, resistance. and propulsion, as well as ship motions in a seaway. He closes with chapters on practical seamanship and emergency procedures. Illustrated with nearly 200 drawings and 30 photographs, this magnificent book is a rare instance where the long tradition of seamanship, that tends to resist change, is examined in the light of the new and rapidly growing science of oceanography. 			Examine how our relationships with the sea have shaped the fate of nations.
			Learn how navies have evolved and how they fit into today's geopolitical environment.
			Experience life aboard seafaring vessels.
			(from front & back covers)
2006.326.015	Annapolis Book of Seamanship, The	Rousmaniere, John	(from Amazon.com:) First launched in 1983, Annapolis remains the sailor's bible, a comprehensive chapter and verse guide to all aspects of seamanship from the simplest ABC's to the most advanced skills and latest electronics. And while much of the original edition has been left in dry dock to make way for the many changes on the water since 1983 --like multihull vessels, satellite tracking, and the reality that while all ships remain "she," there is no longer the assumption that it's a "he" at the helm--Rousmaniere still emphasizes what he's stressed from the first tack: the importance of mastering sailing's fundamentals. This means knowing every inch of your boat and how to handle her, understanding the importance of safety on the seas and preparing for all emergencies, reading the weather, learning to navigate, knowing essential boat maintenance, and being aware of the traditions every sailor steps into whenever he or she sticks feet in a pair of topsiders. Clearly organized and presented, cleanly and smoothly written (given how much technical information he presents, Rousmaniere's prose is blessedly jargon-free), and thoroughly illustrated with photos and drawings, Annapolis is as essential as a good

Object ID	Title	Author	Summary
			wind, perhaps the one volume no sailor should leave port without. --Jeff Silverman Review Yachting magazine A volume that any sailor or would-be sailor simply must own. American Sailing Association The beauty of the book is that it is both a superb reference manual, which any sailor -- regardless of experience -- will want to own, and a readable, practical introduction to sailing for the beginner, A joy to behold. The most complete and best reference book on the sport that has ever been available. Chuck Hawley West Marine Products The Annapolis Book of Seamanship is thorough, well written, and nicely illustrated. Not just a repeat of tired old sailing methods of thirty years ago, it integrates the classic techniques (storm tactics, navigation) with the modern (Crew Overboard Recovery, modern anchors, and electronics). I highly recommend this book and encourage anyone to buy it if they want to improve their sailing skills. Sail magazine The Annapolis Book of Seamanship is about practically everything that has to do with sailing and sailboats. Yachting magazine [Rousmaniere's] chapters on sail trim and weather, in particular, are the best that I can recall reading. Sea magazine The piloting part is unusually thorough and understandable and could serve as a text all by itself. The individual chapters on sailing in heavy weather and handling emergencies are recommended reading for all who sail. Great Lakes Sailing Scanner magazine If you buy one book on sailing this year, this is the one of get.

2006.333.003	Airman	Naval Education and Training Command	PREFACE: This Rate Training Manual and Nonresident Career Course (RTM/NRCC) form a self-study package which will enable ambitious Airman Apprentices of the Navy and Naval Reserve to help themselves fulfill the requirements of the Airman rate. Designed for individual study rather than formal classroom instruction, the RTM provides subject matter that relates directly to the occupational standards for Airman. The NRCC provides the usual method for satisfying the requirements for completing the RTM. The set of assignments in the NRCC includes learning objectives and supporting items designed to lead students through the RTM. The occupational standards used as minimum guidelines in the preparation of this manual are to be found in the Manual of Navy Enlisted Manpower and Personnel Classifications and Occupational Standards, NAVPERS 18068-D. This Rate Training Manual was prepared by the Naval Education and Training Program Development Center, Pensacola, Florida, for the Chief of Naval Education and Training. Technical review of the manuscript provided by personnel in NATTC, NAS Memphis, Millington, Tennessee; NATTC, NAS Lakehurst, New Jersey; the

2006.333.010	Weapons Systems Fundamentals - Vol. 1	Commander, Naval Ordnance Systems Command	Weapons systems Fundamentals, Basic Weapons systems Components Volume 1 with Preface - in past years a broad technical insight into the field of naval weapons could

Object ID	Title	Author	Summary
			be obtained by making a detailed study of the weapons themselves as the increasing number and complexity of weapons and systems has now made it impractical to learn general concepts by such a method. This publication introduces and explains the fundamental principles of weapons and systems in a unique manner, that is the "hardware" approach and the need to memorize facts about specific equipment are abandoned in favor of treating the necessary reasoning processes. Through mastery of basic principles and concepts presented in this book are useful for analyzing and understanding present-day weapon systems. The method used is to approach the mathematics by first equipping the reader to understand what lies behind the equations insuring a common-sense viewpoint and clear physical comprehension. This material should prove to be useful as a reference on weapons systems fundamental for the entire naval establishment both afloat and ashore and for those responsible for the operation and maintenance of modern integrated weapons systems. Seven Chapters with Introduction and Sections on systems, analysis, stabilization, principles, etc from dials to gyros.
2006.333.011	Weapons Systems Fundamentals - Vol. 2	Commander, Naval Ordnance Systems Command	Weapons Systems Fundamentals - Volume 2 - Analysis of Weapons - in Seven Chapters from Basic Mechanisms of Computers to Radar, Sonar, Gyros, and system requirements, Tasks, and Operational Phases, and Weapons System Design and Development.
2006.333.018	Invergordon Mutiny, The : A Narrative History of the Last Great Mutiny in the Royal Navy and How it Forced Britain off the Gold Standard in 1931	Ereira, Alan	The Invergordon Mutiny with line drawing on inside front cover of Cromarty Firth Anchorage Wednesday 16th Sept. 1931. The date for the Royal Navy's biggest modern mutiny. On arrival at Invergordon the sailors

Object ID	Title	Author	Summary
			discovered the scale of the newly formed National Government cuts such the emergency budget, means tests, cutting unemployments benefits and reducing public sector pay resulting in a co-ordinated ship to ship 'strike' quickly achieving its objective. The Navy badly shaken, and Britain's financial credit seriously damaged forcing the country off the Gold Standard. The strike or "unrest" was hushed up and no Courts-Martial or commission of Inquiry followed.
2006.333.020	Marine Engines and Equipment	United States Power Squadrons Engine Maintenance Committee	This book is about caring for a small boat's engine. It is intended to adhere closely to the knowledge and practices required to conduct small boat engine and equipment "first aid."
2006.334.001	USS Midway (CVA-41) - Mediterranean Cruise - 1954	D'Argenio, Raymond M. (ed.)	A pictorial account of the deployment of the USS Midway to the Mediterranean Sea in 1954. The ship departed Norfolk on 4 January and returned to Norfolk on 4 August. Port calls included: Gibraltar; Algiers, Algeria; Augusta, Sicily, Italy; Taranto, Italy; Salonika, Greece; Athens, Greece; Cannes, France; Marseilles, France; Barcelona, Spain; Genoa, Italy; Livorno, Italy; Palermo, Sicily, Italy; Naples, Italy; and Tangier, Morocco. CAG-6 was the embarked airwing and consisted of: VF-31 (F2H-2), VF-33 (F9F-6), VF-73 (F9F-6), VA-25 (AD-6/AD-4B), VC-12 Det. 35 (AD-4W) , VC-3 Det. 35 (AD-3Q/4NL), VC-62 Det. 35 (F2H-2P), VC-5 Det. 35 (AJ-1), and HU-2 Det. 35 (HUP-2).
2006.335.002	Flying the World's Great Aircraft	Robinson, Anthony (ed)	Flying the World's Great Aircraft with Introduction by Jeffrey Quill OBE, AFC . This book captures the fascination of flight in the words of the pilots themselves. The "stick and string" of biplanes of WWI to General Ira Eaker's practice combats in the Boeing P26 in the 1930's to RAF pilots and Vietnam.
2006.335.003	Combat: The Great American Warplanes	Wilson, Jim	Popular Mechanics has been the leading authority on how the

Object ID	Title	Author	Summary
			world works for nearly a century, and now the magazine's unparalleled experts are turning their attention to the skies. Here are 40 warplanes, from classic models right up to the present, all selected for their technological innovation, combat performance, and notable contributions to military flight. They're identified by major categories--bombers, fighters, attack planes, helicopters--with the inside story on what made each famous. In addition to more than 150 photographs, intricate color and black-and-white cutaway illustrations offer up-close glimpses of what's "under the hood." Along with the images, explanations delve into the history and evolution of each type; boxed sidebars provide vital statistics about designation, wingspan, weight, speed, range, and more. Bonus: the most accurate and detailed cutaway of the famed B-2 Stealth Bomber ever published! Publication Date: December 31, 2001 About the Author As science editor of Popular Mechanics, Jim Wilson directs the magazine's coverage of aviation, aerospace, and military news. He has written extensively about combat aircraft for assignments that have taken him from the flight decks of Navy carriers to the cockpits of Air Force fighters. (from Amazon.com)
2006.335.005	Taking Care of Business... USS Midway CV-41 - 1976	Wong, Gordon (ed.)	Pictorial account of the activities of the USS Midway over an undetermined period that covered events in 1975 to sometime in the first half of 1976. 16 pages of photos are devoted to Operation Frequent Wind during the fall of Saigon in 1975. Port visits in the period included Singapore, Pusan, Karachi, Hong Kong and Subic Bay.
2006.336.001	Leading the Way: How Vietnam Veterans Rebuilt the U.S.	Santoli, Al	"Compelling, at times sad, at times energizing, always

Object ID	Title	Author	Summary
	Military: An Oral History		thought-provoking, there is no book like it regarding the essential nature of the U.S. military leadership." JOHN DEL VECCHIO Author of THE THIRTEENTH VALLEY LEADING THE WAY is a historic record of the rebuilding and reenergizing of America's armed forces, as told by 56 combat veterans who helped to bring it about. They bring to life the most critical moments they experienced in combat, from the Central Highlands of Vietnam to the air-strips of Panama and the deserts of Kuwait and Somalia. But just as riveting as their battle stories are their behind-the-scenes accounts of how confidence, discipline, and integrity were restored to the military after Vietnam by the work and example of its leaders. . . which led to the victory of Desert Storm. Publication Date: September 14, 1993 Editorial Reviews From Publishers Weekly Santoli (Everything We Had) traveled to military bases and headquarters around the country interviewing career personnel who served during the troubled Vietnam years and the postwar period when morale plummeted in all branches of the service. The first half of the book makes for disturbing reading as veterans recall the racial tensions, drug abuse and antiauthoritarianism that crippled the spirit of the U.S. military establishment in the '60s and '70s; but the second half, dealing with the mechanics of reenergizing the forces and the successful operations in Grenada, Panama and the Persian Gulf, is upbeat. Participants in this oral history that will primarily interest advocates of maintaining a strong military include the

Object ID	Title	Author	Summary
			present Chairman of the Joint Chiefs of Staff, Gen. Colin Powell; the former commandant of the Marine Corps, Al Gray; Navy SEAL commander Timothy Holden; Colonel Barbara Smith, chief nurse of Central Command; and Marine tanker Gunnery Sergeant James Graham. Photos. Copyright 1993 Reed Business Information, Inc. From Library Journal The observations of 56 military leaders from sergeants to the Chairman of the Joint Chiefs of Staff comprise the raw material for an understanding of how the Vietnam experience has radically changed the current state of our military. Compiled by Santoli (Everything We Had , LJ 4/15/81), they tell us how the echoes of Vietnam made the operations in Grenada, Panama, and, finally (in a sizable section of vivid recollections), the Gulf War so clearly effective. These perceptive observations produce a look into the modern U.S. military's adaptable and result-driven philosophy, which is a couple of decades late in coming. This book is good both for its insight into current thinking in the command sector and for its descriptions of what the Gulf War was like, in the air and on the ground. Recommended for public libraries. - Mel D. Lane, Sacramento, Cal. Copyright 1993 Reed Business Information, Inc. (from Amazon.com)

2006.336.002	Information Warfare : Chaos on the Electronic Superhighway	Schwartau, Winn	Will the electronic superhighway open the doors to an electronic cold war, or will it be the dawn of an information revolution? This book examines both these possibilities in a serious and inviting manner, outlining almost every kind of information disaster imaginable, and asserting that it is a simple matter of awareness and attention that can be our

Object ID	Title	Author	Summary
			salvation.
			Publication Date: May 1994
			Editorial Reviews
			From Publishers Weekly Hackers who break into companies' computers, steal or scramble data and plant "viruses" are only the most publicized threat to electronic security, according to this shocking and eye-opening report. It shows that the computer systems and information highways of U.S. businesses, government and the military are surprisingly vulnerable to theft, data manipulation and sabotage by "information warriors" such as corporate employees, business competitors, organized crime, drug cartels, terrorists, law enforcement officials, insurance companies and others. Schwartau, an information security specialist, tells of electromagnetic eavesdroppers who use a modified TV set to pick up computer screens' emissions; HERF (high-energy radio frequency) guns that can zap an entire computer network; and microchip manufacturers who insert cloned or counterfeit chips so that complex equipment will eventually crash. He outlines a national information policy (which he was asked to present to the Clinton administration), a blueprint to safeguard electronic privacy. Schwartau closes with a practical chapter for individuals or companies seeking to ward off snoops and electronic troublemakers. Copyright 1994 Reed Business Information, Inc.
			From Library Journal Lyon (sociology, Queen's Univ., Ontario) has written a detailed, scholarly work on the use of technology for surveillance. He describes our present culture as the "surveillance society," reminding us that explicit details of our personal lives are gathered, stored, sorted,

Object ID	Title	Author	Summary
			retrieved, and processed every day among the massive computer databases of large corporations and government departments. But surveillance, as explored by Lyon, is not overwhelmingly negative in its effects. Nor does he conclude that surveillance is inherently evil. Citing the efforts of the Computer Professionals for Social Responsibility, Lyon instead encourages public awareness of surveillance issues. He lauds mobilized efforts to restrict inappropriate use of electronic surveillance and to block attempts to make personal information publicly available. A noteworthy study of an important issue, this is intended for informed readers. A general audience will find Schwartau's Information Warfare more appealing. Schwartau, an expert on information security and electronic privacy, presents an overview of "information warfare," a conflict in which electronic information is a vital asset and a strategic target for conquest or destruction. Showing that the essence of our individual and corporate selves is being distributed across thousands of computer databases over which we have little or no control, Schwartau paints a grim picture of what could happen if the very records that define us become subject to malicious modification, theft, unauthorized disclosure, or outright destruction. Personal, corporate, and global information warfare currently costs the United States hundreds of billions of dollars a year. Schwartau describes almost every kind of information disaster imaginable and compels us to establish a National Information Policy to serve as the foundation for our future: a constitution for Cyberspace. This book presents disturbing answers to some simple questions about our personal and national stake in the Global Network. Highly recommended for public and

2006.336.003	War and Anti-War: Survival at the Dawn of the 21st Century	Toffler, Alvin	War and Anti-War by Alvin & Heidi Toffler with Introduction about wars and anti-wars to come and is for the Bosnian child whose has been injured by explosives and for all the innocents who have and will be killed for reasons not understood. It is a book about peace. 25 Chapters in Six Parts beginning with Conflict to the last part about Peace. With acknowledgments, Notes, Bibliography & Index.
2006.336.004	America's First Eagles : The Official History of the US Air Service, A. E. F. (1917-1918)	Thayer, Lucien H.	This book deals with the early behind-the-scenes organization of the air service and the very important contribution to that successful effort by such unsung staff officers as Carberry, Dodd, Van Horn and Bolling.. There are detailed accounts about WWI flying, of the work of the observation and bombing squadrons, the balloon companies and their personnel, and the American pilots and observers who served in British, French and Italian commands.
2006.336.005	Defense of Japan - Response to a New Era	Usui, Hideo	Foreword: The Defense Agency has annually published a white paper on the defense of Japan since 1976 so that Japanese citizens may have proper understanding of fundamental issues relating to national defense. This is the 22nd white paper. I think that publishing a defense white paper every year is proof of the transparency of our national defense policy and is of great significance in that it helps to enhance other countries' trust in and understanding of our country. Although the end of the Cold War put an end to the structure of military confrontation between the East and the West, there still persist factors of opacity and uncertainty, and various efforts are being

Object ID	Title	Author	Summary
			made to further stabilize international relations. Under such international circumstances, Japan, in the past one year since the last white paper was published, formed the new National Defense Program Outline and reconfirmed the importance of the Japan-U.S. alliance as stated in the Japan-U.S. Joint Declaration on Security. The past year can be described as a period for the Defense Agency and the Self—Defense Forces to launch a new step forward. Through such work, we have reaffirmed the necessity of mounting defense efforts to protect our country's peace and security. The Defense Agency thinks that it is important for Japan, with the support and understanding of its people to contribute to the peace and stability of international society while ensuring our country's security by upgrading, maintaining and operating our defense capabilities in accordance with the new National Defense Program Outline, as well as the Japan—U.S. security framework. The agency also believes that Japan has to continue earnest efforts to solve problems concerning U.S. Forces in Japan (USFJ) facilities and areas in Okinawa Prefecture. I sincerely hope that as many individuals as possible read this white paper and that it helps to increase their understanding of the various problems related to the defense of Japan. -Hideo Usui, Minister of State and Director General of the Defense Agency

2006.336.007	Enhancing Air Power's Contribution Against Light Infantry Targets	Vick, Alan	In reviewing the history of the USAF in lesser conflicts, the authors of this report were struck by two facts: (1) The USAF has faced light infantry opponents (or light forces) many times over the years and (2) it is increasingly being called upon to detect and engage such forces (e.g., in Somalia and Bosnia). Despite the salience of this target set, light forces have received little attention from the USAF or

Object ID	Title	Author	Summary
			aerospace community since the end of the Vietnam War. Although R&D has not been directed at this specific problem, the project team believed that many of the sensor programs designed to detect critical mobile targets or armor could be applied to infantry also. Major advances in detector material design and fabrication, combined with 30 years of progress in the computer field, suggested to the authors that, if it desired, the USAF could make a great leap forward in offensive capabilities against light infantry by applying technologies already developed for these other purposes. The objective of this effort was to explore the signatures and vulnerabilities of adversary light forces, to identify promising sensor and weapon technologies applicable to this target set, and to develop new concepts of operation (OPCONs) that would bring together sensors, weapons, aircraft, and tactics to defeat this opponent. This report presents the results of that effort, including 12 such OPCONs. It should be of interest to USAF personnel in operations, plans, intelligence, and acquisition billets. It also may interest Army, Navy, and Marine aviators, the Special Operations community, and scientists at DoD laboratories. (from rand.org)

2006.336.008	Conduct of the Persian Gulf War	Dept. of Defense	"For Those Who Were There" - Final Report To Congress - April 1992 - includes an Overview, Preface, A Not On Preparation Of The Title V Report and Chapters including: I, The Invasion of Kuwait; II The Response to Aggression; III The Military Option- Operation Desert Shield; IV Maritime Interception Operations; V Transition To The Offensive; VI The Air Campaign; VII The Maritime Campaign; VIII The Ground Campaign and Appendices

Object ID	Title	Author	Summary
2006.336.009	League of Airmen, A : US Air Power in the Gulf War	Winnefeld, James A.	and Glossary all with summaries, conclusions, and observations with photographs. A comprehensive and objective account of the contributions and limitations of air power in the Persian Gulf War with the authors analysis challenges some widely held beliefs. They maintain that the war did not demonstrate that a strategic air campaign guarantees victory, but rather that air power, skillfully employed under the right conditions, can neutralize, if not completely destroy, a modern army in the field. The prowess of well-trained and motivated airmen and their support crews in using maturing technology. The mass of available of air power allowed it to be used inefficiently at times to cater to the doctrinal preferences of the various services. The authors place the Persian Gulf air war in perspective by examining and evaluating the air campaign making it clear that for the first time in modern combat, air power was the equal partner of land and sea power that led to victory. Chapters discuss the setting, deployment, planning;, command, control, organization, operations, tactics, information acquisition and management, logistics, air combat system performance, and air power performance, assessment of air power's role, and statistical data on Desert and Desert Storm with a bibliography, about the authors, and Index as well as photographs.
2006.337.001	Biplanes, Triplanes and Seaplanes	Sharpe, Michael	From the dawn of aviation until the end of World War II--the "golden age" of flight--these 300 influential multi-wing aircraft ruled the skies. Among the classics of the pioneering years and beyond: the Sopwith Camel, the Red Baron's Fokker Triplane, the Fairey Swordfish, and the Consolidated Catalina, as well as popular civil aircraft like the Tiger Moth and Supermarine S.5.

			propulsion equipment with increased emphasis on steam generation units. Note "Replacing the [author's] text Naval boilers, revised 1956, published by the U. S. Naval
2006.338.005	Descriptive Analysis of Naval Turbine Propulsion Plants	Payne, C. N. (Charles Norville)	Naval Academy midshipman textbook. From the preface "The purpose of this publication is three-fold: first, to provide the basis for the study of a naval steam propulsion plant which will utilize the student's knowledge of the basic principles of thermodynamics and fluid mechanics; second, to re-orient the instruction or Midshipmen in order to emphasize the reasons for the use of each component in the propulsion plant, and to investigate, at least briefly, how the component performs its function; and third to modernize the instruction of Midshipmen through the study of machinery components in use in the latest ships."
2006.339.001	USS Midway (CV-41) - Fortieth Anniversary 1945-1985 - The Magic Goes On - 1984-85	Williamson, Willie (ed.)	A pictorial account of an approximate 2-year period in Midway's forward deployed life. It covers the 28 December 1983 to 23 May 1984 deployment to the Western Pacific--Indian Ocean and Persian Gulf; the 15 October 1984 to 12 December 1984 deployment to the Western Pacific, and the history of the Midway until she went in to drydock in March of 1985.. Midway was at this time homeported in Yokosuka, Japan. During the 5 month cruise (11984-85), Midway spent 111 continuous days at sea (on Gonzo Station) and steamed over 63,000 miles. Conducting almost 9,800 hours of flight operations, she launched and recovered over 5,300 aircraft, breaking the all-time record for the first quarter in any year of her history. Ports visits included Sasebo, Subic Bay, Manila, Pattaya Beach, and Singapore. A visit to Perth was cancelled to take up a USS Kitty Hawk commitment in the Indian Ocean. Carrier Air Wing Five (CVG-5) was embarked.

Object ID	Title	Author	Summary
			Onboard for the 1983-84 deployment were: VF-161 (F-4S), VF-151 (F-4S), VA-93 (A-7E), VA-56 (A-7E), VA-115 (A-6E and KA-6D), VAW-115 (E-2B), VMFP-3 Det.B (RF-4B), VAQ-136 (EA-6B), and HC-1 Det.2 (SH-3G). Onboard for the October - December deployment were: VF-161 (F-4S), VF-151 (F-4S), VA-93 (A-7E), VA-56 (A-7E), VA-115 (A-6E and KA-6D), VAW-115 (E-2B), VAQ-136 (EA-6B), and HS-12 (SH-3H). 2006.340.001	Hull Department Bills -- USS Midway - CVB-41 - Register #1	None Stated	USS Midway Engineering Department damage control instructions dated 1950
2006.341.002	Mission : Seventy-two - USS Midway (CVA-41) - 1972-73	Doweary, M. M. (ed.)	A pictorial account of the western Pacific deployment of USS Midway in 1972/73. The ship departed Alameda 10 APR 72 and returned to Alameda 3 March 1973, 1 week short of an 11-month deployment. Not only was it a long deployment, Midway was deployed 7 weeks ahead of schedule with less than one week's notice. Significant operations included 9 periods of line operations off Vietnam in support of the Vietnam War. Port calls included Pearl Harbor, Subic Bay (multiple), Hong Kong and Singapore. Bob Hope performed on Midway with his troop on 27 December in Singapore. The show was taped and broadcast on U. S. national television on 17 January 1973 as the Bob Hope Christmas Special. CVW-5 was embarked. The airwing consisted of VF-151 (F-4B), VF-161 (F-4B), VA-56 (A-7B), VA-93 (A-7B), VA-115 (A-6A and KA-6D), VAQ-130 Det 2 (EKA-3B), VFP-63 Det 3 (RF-8G), VAW-115 (E-2B), HC-1 Det 2 (SH-3G), and HC-7 Det 110 (HH-3A).

2006.349.001	Encyclopedia of Aircraft of WWII	Eden, Paul (ed)	The back cover states "Three-view artworks and annotations outline the powerplant, performance, weight, dimensions, and armament of every aircraft featured, with all measurements given in metric and imperial." This is not true! The weight and dimensions are missing for almost every aircraft except Supermarine

Object ID	Title	Author	Summary
			Spitfire. Some information regarding the powerplant, performance, and armament are in the reading paragraphs. Not a big deal if you have another book with these kind of information such as 'Aircraft of World War II(300 of the world's greatest aircraft 1939-45)' by Chris Chant or The Encyclopedia of Military Aircraft by Robert Jackson which I recommend. Most planes have high quality beautiful three-view artwork. Some planes such as P-47, P-38 and Corsair have only side-view artwork(s). There are many nice color and black&white pictures for each plane. Tons of detail information about developmental history, operation history, variants, foreign operators, and comparsion. 512 pages total. Emphasis are given to the utmost famous planes. This book blows away other similar books. For example, the Messerschmitt bf 109 section is 23 pages long with 74 pictures and 6 side-view artworks. Awesome three-view artworks for model E-4, G-6, and K-4. Tons of quality informative text. Overall an awesome book with some statistic flaws. A must have book for World War II aircraft fans! I bought this book(2006 reprint) from the bargain section of a Borders retail for ten bucks. Patchwork Collection of WWII Aircraft Profiles! January 24, 2009 By Michael OConnor You have to give England's Aerospace Publishing firm credit - no other publisher gets more mileage from its material than Aerospace. They're past masters at recycling/repackaging data and illustrations from books and magazines they've previously published. Case in point: THE ENCYCLOPEDIA OF

Object ID	Title	Author	Summary
			AIRCRAFT OF WORLD WAR II, published in 2004 by Amber Books (i.e. Aerospace Publishing). THE ENCYCLOPEDIA OF AIRCRAFT OF WORLD WAR II is a door-stopper of a book; 512 pages crammed with narrative and 1,500+ photographs, profiles, three-views and artwork. Although the title implies comprehensive coverage of all WWII aircraft, the book's back cover blurb more accurately states it's a "guide to the best-known aircraft of World War II." By my count, the book covers 93 aircraft beginning with the Aichi Val and ending with the Yakovlev 3/9. Most aircraft get a two-page spread with 6-8 photos and/or artwork. Some aircraft - the P-51, B-17, Spitfire, etc. - merit greater coverage. The Spitfire section, for example, runs to 36 pages! Being an import, you can pick up a copy of THE ENCYCLOPEDIA OF AIRCRAFT OF WORLD WAR II for around \$10.00. Considering the wealth of material you get, it's a bargain. However, paging through the book will bring a sense of literary deja vu (i.e. Where have I read this before? I know I've seen those profiles elsewhere!). Check out various Aerospace Publishing books and magazines (WINGS OF FAME, WORLD AIR POWER JOURNAL, HISTORY OF U.S. NAVAL AIR POWER, etc.) and you'll find some of the very same material. Likewise there are lots of aircraft left out of the book. Coverage of the French Air Force is almost non-existent. The Italian Air Force is poorly covered and so on. When the price tag is \$10.00 and you're getting 1,500 pix/artwork though, does any of that matter??? Despite its cobbled-together nature, you can't beat THE

Object ID	Title	Author	Summary
			ENCYCLOPEDIA OF AIRCRAFT OF WORLD WAR II. The information is solid and and can be pretty extensive as regards the P-51, Hurricane, Spit, B-17, Stuka, etc. The artwork by John Weal, Iain Wylie, Keith Fretwell, etc. is top-notch. So reach for a ten spot and indulge yourself! Recommended. (from Amazon.com)

2007.002.005	USS Midway (CVA-41) - World Cruise - 1954-55	Patureau, Alan C. (ed.)	Pictorial account of the world cruise of USS Midway in 1954-55, conducted as Midway was changing homeports from Norfolk, VA to the west coast of the U. S. The ship departed Norfolk 27 December 1954 and transited to the Pacific via the Cape of Good Hope. She operated in the western Pacific with the U.S. Seventh Fleet, conducting the Formosa Straits patrol and other fleet exercises and maneuvers in the South China Sea. She arrived at her new homeport of Alameda, CA on 14 July 1955. She remained there for only a week before proceeding north for a major overhaul at Bremerton, WA which commenced on 3 August 1955. Port calls during her deployment included Mayport, Capetown, Colombo, Manila, Hong Kong, Yokosuka and Pearl Harbor.

Object ID	Title	Author	Summary
2007.034.002	Final Countdown, The	Taylor, Don	United States Navy and for use at the Hospital Corps schools. Set in 1980, the supercarrier USS Nimitz (CVN 68) takes on a civilian observer, Warren Lasky (Martin Sheen) during a training mission in the Pacific Ocean. Out in the Pacific, the ship encounters a strange storm-like vortex which disappears after the ship passes through it. Initially unsure of what has happened, they eventually realize that they have been transported back in time to December 6th, 1941, just one day before the Japanese attack on Pearl Harbor. The commander of the Nimitz, Captain Yelland (Kirk Douglas), has the dilemma of deciding whether to use the full power of Nimitz to destroy the Japanese fleet and alter the course of history, or to stand by and allow history to proceed as "normal." After some intense debates on-board, the captain settles the dispute by "going by the book": to defend America "past, present, and future" if attacked, and otherwise, to obey the orders of the then-current Commander-in-Chief, Franklin D. Roosevelt. (from en.Wikipedia.org)
2007.034.003	Top Gun	Scott, Tony	Top Gun is a 1986 American action film directed by Tony Scott, and produced by Don Simpson and Jerry Bruckheimer, in association with the Paramount Pictures company. The screenplay was written by Jim Cash and Jack Epps, Jr., and was inspired by the article "Top Guns" written by Ehud Yonay for California magazine. The film stars Tom Cruise, Kelly McGillis, Val Kilmer, Anthony Edwards, and Tom Skerritt. Cruise plays Lieutenant Pete "Maverick" Mitchell, a young Naval aviator aboard the aircraft carrier USS Enterprise. He and his Radar Intercept Officer (RIO) Nick "Goose" Bradshaw (Edwards) are given the chance to train

Object ID	Title	Author	Summary
			at the Navy's Fighter Weapons School. The film depicts Maverick's progress through the training, his romance with a female instructor (McGillis), and his overcoming a crisis of confidence following a fatal training accident. (from en.wikipedia.org)
2007.034.004	Crimson Tide	Scott, Tony	Crimson Tide is a 1995 submarine film directed by Tony Scott, produced by Don Simpson and Jerry Bruckheimer, and written by Michael Schiffer and Richard P. Henrick. It takes place during a period of political turmoil in the Russian Federation, in which ultranationalists threaten to launch nuclear missiles at the United States and Japan. It focuses on a clash of wills between the seasoned commanding officer (played by Gene Hackman) and the executive officer (played by Denzel Washington) of a nuclear missile submarine, arising from conflicting interpretations of an order to launch their missiles. The film was scored by Hans Zimmer, who won a Grammy Award for the main theme, which makes heavy use of synthesizers in place of traditional orchestral instruments. (from en.wikipedia.org)
2007.041.007	Cover UP : Attack on the USS Liberty	None Stated	On June 8, 1967, during the Six Day War, the intelligence ship USS Liberty was attacked off the Sinai Peninsula. The unprovoked assault came first from jets, then torpedo boats, all of which were unmarked. Virtually unique among such cases, the incident has never been formally investigated by Congress. HISTORY UNDERCOVER® goes where the government won't with this unblinking look at the event that strained US-Israeli relations. We'll hear from survivors of the attack about what it was like onboard the

Object ID	Title	Author	Summary
			Liberty, and the disbelief the crew felt when they realized that their anonymous assailants were their alleged allies. We'll look for signs of a cover-up in a thorough analysis of the public statements made by both the US and Israeli governments. And we'll examine the leading theories put forth to explain the motive behind the attack, and the reasons why the United States chose not to pursue the incident, despite the loss of 34 lives. This is the definitive examination of the Israeli sneak attack on the USS Liberty. (from http://store.aetv.com/)

2007.301.007	Air War Grenada	Harding, Stephen	PREFACE: Operation URGENT FURY, the October 1983 U.S. and Caribbean forces invasion of the island of Grenada, was a campaign whose origins, conduct and ultimate outcome were greatly influenced by the capabilities of modern military aircraft. This fact becomes self-evident when one considers the following points. First, the construction on Grenada of a runway capable of accommodating the latest Soviet-built reconnaissance and strike aircraft, aircraft capable of dominating the air and sea lanes of the entire Caribbean basin, was of very real concern to the United States government long before the political events on the island jeopardized the safety of the resident American citizens. Second, the vast majority of American and Caribbean Peacekeeping Force troops, equipment and supplies landed on Grenada during the course of URGENT FURY

Object ID	Title	Author	Summary
			arrived by air. And, third, the ultimate success of the operation was, from the beginning, entirely dependent on the ability of U.S. military aircraft to transport, supply and protect those forces landed on Grenada in spite of initially intense anti-aircraft fire, inadequate facilities and the strain of almost continual operations. This volume is not meant to be an exhaustive military history of Operation URGENT FURY, nor is it intended as an examination of U.S. foreign policy as practiced in the Caribbean basin. As its title indicates, this book is a pictorial record of the activities of Air Force, Navy, Marine and Army aviators and aircraft engaged in the initial assault on Grenada. The bulk of the information cited in this work was drawn from published accounts of the operation. However, much information regarding the planning and conduct of URGENT FURY remains classified for security reasons, and certain aspects of this account are therefore unavoidably vague. In those cases the author has relied upon informed supposition to flesh out this account of the most successful combat use of American air-power since the end of the Vietnam War. Stephen Harding

2007.301.008	Air War Over the Gulf	Micheletti, Eric	From the back cover--"This book, packed with colour photographs supported by a clear explanatory text, illustrates and describes the aircraft, the missions, the tactics and the 'smart' weapons responsible for this remarkable achievement: the F-4 Wild Weasel, A-6 Intruder, A-7 Corsair, OV-10 Bronco and B-52 Stratofortress, in the latest versions of designs proven over Vietnam; F-14 Tomcat, F-15 Eagle, F-16 Fighting Falcon, F/A-18Hornet, mainstays of the USAF and USN fight/attack

2007.301.020	Aircraft Structures	Peery, David J.	Aircraft Structures by David J. Peery, Ph.D. Prof. and Head Dept of Aeronautical Engineering The Pennsylvania State College, First Ed. with Preface by the Author Aug. 1949, and 18 Chapters, Appendix and Index. The classical methods of analysis for heavy structures are considered as well as methods with application to lightweight structures. this book attempts to emphasize basic structural theory and applicably to design requirements and materials. This theory is supplemented by the design engineer to detail design specifications and material properties to a particular airplane.
2007.301.022	U.S. Fighters : Army - Air Force 1925 - 1980s	Jones, Lloyd S.	This describes Air Force and Army planes from 1925 to 1980s.
2007.301.023	Digest for Small Aircraft Pilots	Federal Aviation Administration	Guide to FAA regulations for pilots of small aircraft.
2007.301.024	Analysis and Design of Airplane Structures	Bruhn, Elmer Franklin	This is a textbook on airplane structural analysis. Major sections are: General theory of stress and strain calculation; column theory. Summary of information the buckling and ultimate strength of thin sheet units; Practical applications to airplane structural analysis and design, and the Loads on the airplane.
2007.301.025	AN/ANS-28 Navigational Computer Set	Chief of the Bureau of Naval Weapons	Course notes and technical specification manuals for the AN/ASN-28 navigational computer set used on the Navy WF-2 aircraft. Contains NAVWEPS 01-85WAA-2-8 and NAVWEPS 05-20AAA-2.
2007.301.028	History and Evolution of Anchors	Moriarty, James R.	From the authors introduction: The following article is an attempt to bring together a brief discussion of our own findings on the subject of anchors. It is written in the hope that it will prove to be of service to the reader as an initial point of reference on this subject.

2007.301.074	Hook Down, Wheels Down	United States. Navy Department	This is an exciting history of U.S. carrier aviation at its best. It begins with the first aircraft carrier, the Langley, and then shows battles of Midway and Coral Sea. It also shows hot naval air action off the Coast of Korea during the early years of the Korean War. Interviews with famous retired naval aviators bring personal insight to this historical presentation. You'll see SB-2C's, TB2-2's, F-6, F-4, F, F-4 11, Corsairs, lots more naval planes, great footage, mostly color, except for the older pre-World War II films. Classic pieces of naval aviation history, e.g. B25 launches, Lexington carrier sinking, Kamikaze suicide raids. Color, narrated, 58 min.
2007.301.075	History of Flight, The : Man's Unending Quest for Higher, Farther and Faster Flight.	United States. National Aeronautics and Space Administration	Features two 30-minute NASA programs on the history of powered flight. Man's Grasp Should Exceed His Reach is narrated by Burgess Meredith. Golden Days of Flight is an interview with aviation pioneer and historian Paul Garber. Garber was involved in aviation from the early 1900's and relates personal experiences with other pioneers such as Orville Wright, Charles Lindbergh, Glenn Curtiss, Amelia Earhart, Howard Hughes, and others. Includes Aviation History and Aviation Pioneers.
2007.301.076	Rule of the Nautical Road, The	Farwell, Raymond F.	Primer on Marine collision law for students at Naval Academy and Naval ROTC colleges. A primary text for those seeking an in-depth knowledge of laws governing navigational requirements levied on ships in international waters and the inland waterways of the United States.
2007.301.077	Transformation of American Air Power, The	Lambeth, Benjamin S.	Since the unprecedentedly effective performance of the allied air campaign against Iraq during Operation Desert

Object ID	Title	Author	Summary
			Storm, the role of American air power in future wars has become a topic of often heated public debate. In this balanced appraisal of air power's newly realized strengths in joint warfare, the author, a defense analyst and civilian pilot who has flown in most of the equipment described in this book, explores the extent to which the US can now rely on air- delivered precision weapons in lieu of ground forces to achieve strategic objectives and minimize American casualties.
2007.301.078	Case Studies in Strategic Bombardment	Hall, R. Cargill (ed)	This volume, one in a series of case studies that addresses air power missions, provides an in-depth analysis of the evolution of strategic bombardment from WWI through the Gulf War. The transition from stick and wire aircraft on range-limited forays into enemy territory, dropping hand- held ordnance on visible targets, to air refuelable stealthy aircraft mounting precision guided munitions capable of penetrating hardened concrete hangars is described by 8 internationally recognized military historians.
2007.301.079	U.S. Space Gear: Outfitting the Astronaut	Kozloski, Lillian D.	A fascinating study of spacesuits from the early days of development to the current shuttle suits. Beyond answering basic questions (How do astronauts use the bathroom in a spacesuit?), the book provides a wealth of detail on a slightly obscure but amazingly complex subject --- Editorial Review -- Tampa Tribune-Times, March 27, 1994 Astronomy, July 1994 Lillian Kozloski has put together a pictorial history of American spacesuit evolution...Space buffs will find this book both entertaining and informative (from Amazon.com)

2007.302.007	U.S. Navy Floatplanes of World War II in Action	Adcock, Al	Before the advent of radar and other electronic devices aboard warships, the jobs of seeking out the enemy and spotting naval gunfire fell to the floatplane scouts. These small 1- and 2-seat catapult-launched aircraft served aboard US Navy ships as the eyes of the fleet until mid-1949. Most battleships carried up to 4 floatplanes; cruisers with aircraft hangars could accommodate as many as 8 aircraft; destroyers, when applicable, were limited to only 1 floatplane. Curtiss-Wright was the designer of 3 of the 4 types of scout planes that served aboard US warships in WWII, a tribute to the American aviation pioneer and father of the US floatplane, Glenn Curtiss. Chance-Vought and the Naval Aircraft Factory also produced floatplanes that served the US Navy in WWII. All get detailed coverage in this volume. Illustrated with more than 106 photographs, 13 full-color paintings, plus detailed line drawings, 56 pages. SS1203 \$14.95 (from squadronsignalpublications.com)

Object ID	Title	Author	Summary
2007.302.008	Modern Military Aircraft Anatomy : Technical Drawings of 118 Aircraft, 1945 to the Present Day	Eden, Paul (ed)	With the aid of 118 extraordinarily detailed and accurate line drawings, this shows how a wide selection of post-1945 aircraft are put together --- inside and out. Each line drawing is annotated with an exhaustive key, labeling everything from the nosewheel to the anti-collision lights, and is complemented by color photographs with extended captions. Includes: Technical Drawings of 118 aircraft 1945 to the present day Includes full-color artworks of key aircraft Up to 200 design elements clearly annotated on each aircraft Full specifications for each aircraft include dimensions, powerplant, weight, performance, and armament Provides a comprehensive reference guide to modern military aviation
2007.302.009	Flattop Fighting in World War II : The Battles Between American and Japanese Aircraft Carriers	Degan, Patrick	"Outstanding summary of the war in the Pacific...captures attention and is hard to put down... strongly recommended" - Editorial Review -- Catholic Library World Book Description -- World War II's naval battles between the United States and Japan have been the subject of many books, popular movies, and documentaries, but the very important story of the fighting between United States and Japanese aircraft carriers is often lost in broader discussions of the Pacific naval war. The subject of this book is the naval war against Japan , 1941-1945. The entire focus is on clash between the U.S. Pacific Fleet and the Imperial Japanese Navy in the course of four years of warfare. It is the story of the great clash between great fleets, of struggle against lopsided odds, of the introduction of new technologies and the evolution of a whole new paradigm of at-sea warfare and the horrendous cost imposed by admirals who failed to make the conceptual leap soon enough and sent

Object ID	Title	Author	Summary
			seamen to the deaths by the hundreds and even thousands as the result. This work concentrates exclusively on the fighting between the American and Japanese aircraft carriers, examining how strategies were planned and carried out on both sides. Presented are the stories of the USS Hornet, which launched the B-25s of James Doolittle's daring raid of Tokyo in 1942; the USS Yorktown, which suffered fierce attacks during the Battle of Midway; the USS Lexington, which refueled and rearmed Hellcats during the Great Marianas Turkey Shoot; the USS Enterprise, the leader of a motley assortment of cruisers and destroyers left to hold a very precarious line in the campaign for Guadalcanal; and the Japanese battleship Yamato, sacrificed for a suicide mission against 900 aircraft bombers. About the Author Patrick Degan is a writer and researcher from New Orleans, Louisiana. (from Amazon.com)
2007.302.010	World Naval Aviation	Beaver, Paul	This reference work examines developments in naval and maritime aviation around the world. The focus is on identifying the embarked and land-based assets used in 88 countries with coastlines to protect and economic interests to safeguard. Each country's entry details the organizations flying, naval or maritime aircraft, with information on command structures, air-capable ships, shore bases, recent operations, typical deployments as well as the assets available and the weapon systems they carry. Publication Date: April 1989 (from Amazon.com)

			around the world. It entered U.S. service in 1942, and first saw action during the Battle of Midway. Despite losing five of the six Avengers on its debut, it survived in service to become one of the outstanding torpedo bombers of World War II. Greatly modified after the war, it remained in use until the 1960s. (from Wikipedia)
2007.302.028	H-34 Choctaw in Action	Lundh, Lennart	
2007.302.029	Essex Aircraft Carriers, The	Faltum, Andrew	A fine book, but the description is a bit misleading May 4, 2004 By M. Flegal VINE™ VOICE Let me start off by saying that this is indeed a fine book. However, it's not really a technical history of the Essex class carriers. Sure, it spends a chapter or two describing the design genesis for the ship but that is not the bulk of the book. The bulk of the book is a synopsis of every major and most minor actions that involved Essex-class fleet carriers from WW2 to Vietnam. As such, much of the book is only somewhat related to the Essex carriers and describes the actions that they served in. This is not a criticism, as this stuff is very well done, but rather an observation. While there are photos, there aren't a lot of them and the drawings are few and somewhat simplified. If you're looking for model reference, this isn't the book for you. My one real criticism of the book is that it is too short. There are small sections or even paragraphs that dropped tantalizing tidbits of information that I would have loved to see covered at length. There's a paragraph that describes the shakedown process of the carriers in a sheltered and mined deep water bay. This is a subject that there is almost no reference on and I would have loved to see more on it. There are several sections like that where I grow really interested and then it's over

Object ID	Title	Author	Summary
			in a few lines. All that said, if you want a book that covers all of the facets of the Essex class, from development to service, to modifications, to a list of all of the carriers built; this is your book. (from Amazon.com) Former USS Midway crew member.

2007.302.034	Warships : Pearl Harbor to Midway : The Aircraft Carrier War 1941-1942	Periscope Film	The devastating sneak attack on Pearl Harbor crippled America's vaunted battleship fleet, but left the US Navy's aircraft carriers untouched. Thus the burden of victory fell to the crews of the flattops. April 1942 - USS Hornet/Gen. Jimmy Doolittle's B-25s/Tokyo. May 1942 - USS Yorktown & Lexington at Coral Sea. June 1942 - USS Yorktown, Hornet & Enterprise smashing the Japanese fleet at Midway.
2007.302.035	Warships : The Fighting Ladies : Yorktown and Hornet : The Aircraft Carrier War 1942-1944	Periscope Film	Featured on this DVD are four rare films made by and for the Navy. They include "Life and Death of the USS Hornet," profiling the carrier which struck Japan in 1942 and fought at Midway, but was sunk a short time later at Santa Cruz. Also featured is "The Fighting Lady," a stunning color film about the Essex-class USS Yorktown, "Brought to Action" showing the victory at Leyte, and a short about the assault on Truk in 1944.
2007.302.036	Warships : Leyte Gulf to Tokyo Bay : The Aircraft Carrier War 1944-1945	Periscope Film	Featured on this DVD are seven rare films showcasing America's carrier fleet during the critical final months of WWII. This includes a rare full color film about the Franklin and the "fleet that came to stay." Some films are silent newsreels with intertitles and music soundtracks. Includes: Your ship in action -- Saga of the USS Franklin -- The fleet that came to stay -- Carrier operations -- Sea power in the Pacific -- Japan surrenders -- Back to civilian life.
2007.302.037	U.S. Navy Adversary Aircraft	Kinzey, Bert	INTRODUCTION: To aviation enthusiasts, the U.S. Navy adversary aircraft and their counterparts in the Air Force's aggressor squadrons have been a high-interest topic since the very beginning of their use during the Vietnam War. Their mission of providing dissimilar air combat maneuvering (DACM) training for combat pilots has captivated the interest and imagination of anyone who kept up with U.S. military aviation to any extent at all.

Object ID	Title	Author	Summary
			Now, thanks to the most popular movie of 1986, almost everyone is at least aware of the existence of the Navy Fighter Weapons School, better known as TOP GUN. To a lesser degree, several years ago a TV movie entitled, "Red Flag-The Ultimate Game," introduced the public to the Air Force's aggressor squadrons. While both movies were produced for entertainment with the usual Hollywood glamor and bravado, they did acquaint the public with these special units and their unusual mission of flying Soviet tactic in "MiG simulators" against our pilots in order to provide them with the most realistic air combat training possible. The air war over Vietnam had proved that actual combat was no place to learn how to fight the enemy. In order to provide this training, both the Navy and the Air Force had to come up with aircraft in the U.S. inventory that closely approximated the size and flight characteristics of the Soviet fighters. These "MiG simulators" would then be flown using Soviet tactics to provide a realistic adversary or aggressor against which our combat pilots could train in the art of DACM. The Air Force first used the T-38 Talon, and now uses the F-5E Tiger II in this mission. These aircraft approximate the MiG-21 Flshbed and MiG-23 Flogger fighters produced by the Soviet Union. The Navy has used a wider variety of aircraft to simulate threat aircraft. Both single and two-seat A-4 Sky-hawks, and T-2 Buckeye trainers, have been used to simulate the threat from older subsonic fighters, primarily the MiG-17. It may seem that these aircraft would be no match for a Mach 2+ fighter, but they are far more maneuverable than contemporary U.S. fighters, and most air combat maneuvering (ACM) occurs at

Object ID	Title	Author	Summary
			subsonic speeds. Like the Air Force, the Navy has used the T-38 and the F-5E, as well as the two-seat F-5F in the adversary role. One unit, VF-43, has obtained Kfir's from Israel, and with the U.S. designation F-21, has made the only use of a foreign fighter to simulate threat aircraft. As this is written, the first production F-16N for the Navy has just made its first flight, and photographs of this aircraft in flight appear at the center and bottom of page 5. By the time this book is published the F-16N will have entered service with TOP GUN, and will soon be sent to other Navy units that have an adversary mission. One of the most interesting aspects of these adversary and aggressor units in both the Navy and Air Force is the unusual camouflage paint schemes in which the aircraft have been painted. These camouflage patterns range from the bland to the colorful, and from the simple to the elaborate. They represent a real departure from the typical U.S. military paint schemes, and this accounts for much of their popularity. These unusual adversary paint schemes on Navy aircraft are the subject of this book. Today adversary training in the Navy is provided by the Navy Fighter Weapons School and four Adversary Commands. NFWS provides the "graduate level" course, and is the ultimate authority on the subject. But the number of aviators that can attend TOP GUN's training is limited, so the Adversary Commands provide DACM and ground school training on the threat to fighter and attack/strike-fighter squadrons for both fleets. These commands include VF-43 and VF-45 on the Atlantic coast, and VF-126, and VA-127 on the Pacific coast. All of these units are included on the following pages, as is VF101/171KW,

Object ID	Title	Author	Summary
			which was decommissioned on May 1,1984. Sixty-five color photographs and over 220 black and white photographs have been carefully chosen to show as many of these often unique schemes more extensively than ever before. Close-ups show details of squadron and special markings. A short unit history begins the coverage of each unit. All of this combines to provide the most complete look at Navy adversary colors and markings...
2007.302.038	US Navy Hornet Units of Operation Iraqi Freedom - Part One	Holmes, Tony	The F/A-18 Hornet in its various guises was the 'universal soldier' of OIF, with around 250 seeing combat. Flown by various squadrons and groups, the Hornet attacked a range of targets including tanks of the various Iraqi Republican Guard units and government buildings housing elements of the Baath party regime. Apart from its ability to drop precision munitions such as laser-guided bombs, the Hornet was also capable of launching anti-radar missiles and acting as an aerial tanker and reconnaissance platform for other strike types. This book explores the Hornet's versatility which has enhanced its reputation as one of the world's leading strike-fighter aircraft. Contents * Prelude to War * Shock and Awe * War at Sea * Super Hornet Paperback; July 2004; 96 pages; ISBN: 9781841768014 (from ospreypublishing.com)
2007.302.039	US Navy Hornet Units of Operation Iraqi Freedom - Part Two	Holmes, Tony	This book explores the role of the US Navy Hornet units in the northern Iraqi campaign. These units were the first Navy Reserve unit to be mobilized since the Korean War, and their attacks were launched from carriers off the coast of Turkey. The conflict for these squadrons was very different from the campaign fought in southern Iraq: they worked almost

2007.302.050	Color Schemes and Markings US Navy Aircraft 1911-1950	Kilgrain, Bill C.	INTRODUCTION: This book has been planned with the modeler in mind, and it is hoped that this work will ease the modeler's dilemma as to accurate color schemes and markings for U.S. Navy aircraft. The text is laid out chronologically within sections which correspond to the finishing steps on a model, ie. standard finish, standard markings, unit markings, and

Object ID	Title	Author	Summary
			special markings. This was done so the modeler could decide on a specific period or battle to represent and then finish his model in stages by referring to the appropriate sections in the book. In all illustrations the basic color scheme of the aircraft is indicated by grey tones, while most markings are shown in color. The drawings are accurate in all respects except one...the style of lettering and numbers used are not of the U.S. military type. tetra-see lettering was used for reasons of speed, uniformity of size and shape, and for general neatness of the drawings. The Carrier Aircraft Assignment tables for World War II cover only a few specific battles because of the amount of space required to go into greater detail during this period. The comments in this section on the role of various units applies to that group, ie. TG 58.4, which it follows. This was included, along with information on carrier losses and damage, to add a brief operational history to this section. The photographs have been specially selected to illustrate the changes in naval aircraft markings through the years, and also to show a good variety of the aircraft used during the 1911 - 1950 period. When looking at black and white photos the reader should bear in mind that Orthochromatic film, used until the late 1920's, makes red appear dark and blue much lighter. Panchromatic film, adopted in the late 1920's made blue appear darker than red... especially if a filter was used. The designations CV-9, CVE-27, etc. indicate aircraft carrier class and the ship's hull number. Below are listed, and explained, the carrier class letters used throughout this book in conjunction with carrier

Object ID	Title	Author	Summary
			names. CV Heavy (Fleet) Carrier CVL Light Carrier CVG Carrier Air Group CVLG Carrier Air Group CVB Large (Battle) Carrier CVE Escort (Jeep) Carrier CVBG Carrier Air Group CVEG Carrier Air Group ACV early Escort Carrier designation Hopefully the modeler will find it less frustrating to complete an accurately finished aircraft with the aid of this book. It is also hoped that this book will find a place on the aviation historian's 'bookshelf' because of the markings and photos
2007.302.051	F4U Corsair in Color	Sullivan, Jim	Chance Vought F4U Corsair fighter plane
2007.302.052	Marine Fighting Squadron One-Twenty-One (VMF-121)	Doll, Thomas E.	This book was made possible through the hard work and dedication of the men who lived it. They put their lives on the line pursuing an inherently dangerous profession made even more hazardous by the Japanese attack on Pearl Harbor of 7 December 1941. Although this work concerns the WWII activities of Marine Fighting Squadron One-Twenty-One, it could be the story of any WWII Marine Corps fighter squadron. Includes 28 color illustrations of planes flown by the squadron--mostly Corsairs and Wildcats
2007.302.053	US Navy Fighters - Second World War	Masahiko, Takeda (ed)	US Navy Fighters WWII - Aircraft covered include the F2A Buffalo, F4F Wildcat, F6F Hellcat, F4U Corsair, F7F Tigercat, F5F Skyrocket, F8F Bearcat, SB2C Hell Diver, SBD Dauntless, TBD Devastator, SB2U Vindicator, TBF(M) Avenger and Experimental/Prototype Fighter aircraft.

2007.302.081	US Navy and Marine Corps Tail Codes	Kasulka, Duane A.	The usage of the following Navy and Marine Corps identification system traces its origin to October 1944 when permission was granted for tactical commanders to add identification aids to airplanes.' No standardization of designs was selected until January 1945 when a set of twenty-seven geometric patterns were assigned to carriers.' At the close of the Second World War the "geometric" symbols were to be replaced by a series of single and double identification letters. Identification tail codes for all Navy, Marine Corps Reserve, and Training Command aircraft became official on November 7, 1946.³ This was followed a few months later by a directive which established the location of identification letters to be placed on both sides of the vertical tail and on the wings. These locations remained as such today and have resulted in the term "tail letters" or "tail codes." The tail codes were again changed a few years later in an effort to simplify and expand the system. The current tail codes were last changed in 1956/57 for squadrons that had codes, and in 1963 for carrier wings. This study generally

Object ID	Title	Author	Summary
			encompasses only those units in active service from January 1971 to the present; the Reserve Unit information is current from 1969. In view of the large amount of change currently taking place in the Navy and Marine Corps it appeared desirable at this time to pause and provide data on tail codes before all identification is lost in limbo.4. The primary objective has been to list all known units and their usage of tail codes by the various commands. The assignment of tail codes is established by the Chief of Naval Operations. Basically tail codes appear to be of three general types, individual squadron tail codes; wing and group tail codes; and air station tail codes. The first section described here covers the Fleet Marine Force (FMF) and Marine Corps support units, and the Marine Corps Reserves. The second section lists the aircraft carriers, carrier air wings or groups and carrier squadrons. The third section covers the naval shore-based units. A subsequent last section deals with the Naval Training Command units. In addition to the listing of units and tail codes, the types of aircraft have been included, with known squadron nicknames. The usage of nicknames has no official sanction but are selected by the individual squadrons, and are often changed to reflect new missions, locations and aircraft types. Updating of the study will be necessary at a later date, of course, and persons with information to supplement future documentation are urged to contact the Author for Research Project 7119. (See Research Projects Section).
2007.302.082	US Navy and Marine Corps A-4 Skyhawk Units of the	Mersky, Peter B.	While Phantom II crews sporadically battled North

Object ID	Title	Author	Summary
	Vietnam War		Vietnamese MiGs, A-4 pilots hurled themselves daily at heavily defended targets up and down the southeast Asian peninsula, often paying a heavy price in lives and aircraft. Although other books on the Skyhawk have appeared over the years, they have usually described the jet's overall career. This volume focuses exclusively on the A-4's most intense period of action in Vietnam and Laos.
2007.302.083	Carrier Battles : Command Decision in Harm's Way	Smith, Douglas V.	In Carrier Battles, Douglas Smith studies the fateful decisions made by commanders in analyzing the largest naval campaign the world has ever known. It looks at the 5 carrier battles of WWII -- Coral Sea, Midway, the Eastern Solomons, Santa Cruz, and the Philippine Sea -- and evaluates the primary commanders to determine the extent to which their inter-war education at the US Naval Academy and Naval War College translated into their decision processes.
2007.302.084	America's Navy and Marine Corps Airplanes - Post-WWI to the Present	Dean, Francis H.	A detailed pictorial review of USN & USMC airplanes from the end of WWI to the present day. All mission types are covered, including fighters, scout dive and torpedo bombers, patrol planes, utility planes and trainers. Many variants of basic types are shown with photos and data from informative captions. The photo coverage is excellent, with many never before published pictures of Navy types.
2007.302.085	Gray Ghosts : U.S. Navy and Marine Corps F-4 Phantoms	Davies, Peter E.	Includes contributions from over 100 aircrew and maintainers involved in the Phantom program from early days through the reserve squadrons. Personal accounts of more than a dozen MIG killers.
2007.302.086	Aircraft Carriers : A History of Carrier Aviation and Its Influence on World Events, Vol 1, 1909 - 1945	Polmar, Norman	This book might be checked out to Karl Zingheim on 1/13/2011. Volume I of two providing the definitive history of world aircraft carrier development and operations. This book emphasizes carrier actions

Object ID	Title	Author	Summary
			from World War I through Japanese strikes against China in the 1930's to World War II.
2007.302.087	My Carrier War : The Life and Times of a Naval Aviator in WWII	Berg, Norman E.	From his days as a naval aviation cadet aboard the "Yellow Peril" biplane trainers, to his first bombing runs on Guadalcanal, to his life aboard n aircraft carrier in the South Pacific, the author offers an exciting, fast-paced narrative filled with humor and meticulous detail. Much more than a simple WWII memoir, this story goes beyond the action of battle to explore the author's innermost conflicts and chronicles one young couple's wartime struggle to balance love, duty and commitment.
2007.302.088	Fighting Lady, The : An American Carrier in Action	Steichen, Edward (dir)	We have two other DVD copies and one VHS copy. Even though William Wyler is listed on the cover as the director, he is not mentioned in the credits. The credits lists CMDR Edward J. Steichen as the supervisor. Narrated by Lieut. Robert Taylor, USNR, and photographed in zones of combat by the U. S. Navy. The film follows one of the many new aircraft carriers built since pearl harbor, known as The Fighting Lady in honor of all American carriers, as it goes into action against the Japanese in the Pacific Ocean in 1942. (The ship used was the USS Yorktown CV-10). See the ship and its pilots undergo their baptism of fire, attacking the Japanese base on Marcus Island, and gain in experience and confidence with each new battle--Kwajalein, Truk, and The Marianas Turkey Shoot. Won an Academy Awards, 1945: Best documentary feature.
2007.302.089	First Flattops : The First U.S. Aircraft Carriers, CV-1 to CV-4, Disc 1	Gray, Mark	2-DVD set chronicles the history of U.S. carrier airpower through the first four carriers, the experimental Langley, huge sisters Lexington and Saratoga, and the smaller Ranger. Contents: Disc 1. Main program. First flattops : CV-1 to CV-4 : the birth of naval aviation -- Early U.S. naval

Object ID	Title	Author	Summary
			aviation. Fleet ho! (1932) -- Sea Hawks/Launch of Ranger/Macon airship (1933) -- Early naval aviation : "Navy flies forward" -- U.S.S. 2007.302.090	Grumman F-14 Tomcat	Richardson, Doug	The Grumman F-14 Tomcat is arguably the finest air superiority fighter in the world. The author personally interviewed the Tomcat's designer, Mike Pelehach, and their wide-ranging dialogue

Object ID	Title	Author	Summary
			has revealed a significant amount of hitherto unpublished facets about the airplane's aerodynamic character, its weapons system concept, and its validity in the air combat scenarios of the 1990s.
2007.302.091	Battle of Midway : Victory in the Pacific	Hough, Richard Alexander	The battle of Midway was the greatest naval victory in American history. The heavily armed air base more than a thousand miles northwest of Honolulu was of great strategic importance, for between Midway and Tokyo there was nothing but empty ocean. Midway was the island the allies could not afford to lose; the American forces defending it dealt the "invincible" Japanese a crushing defeat --- one that turned the tide of WWII in the Pacific.
2007.302.092	U.S. Naval Aviation Flying Clothing and Gear	Warner, Jeff	Covers every aspect of U.S. naval aviation-related uniforms of World War II. NOW IN THREE RING BINDER
2007.302.093	Curtiss Fighter Aircraft : A Photographic History 1917-1948	Dean, Francis H.	A comprehensive study of the classic Curtiss airplanes using previously unpublished documents and including previously unpublished photographs.
2007.302.094	Signal Charley, Flaps, Wheels, Hook Down : Vivid Recollections of Harry D. Hamilton	Hamilton, Harry D.	Recollections of the author about his time in or working for the Navy as an NROTC midshipman, pilot, meteorologist, and finally as a civilian in the timeframe 1951 to 1997. Includes transition from straight to angled deck carrier landings, hydraulic to steam catapults, etc. Table of Contents: 1. Midshipman Third Class cruise -- 2. Midshipman Second Class cruise -- 3. Midshipman First Class cruise -- 4. Commission -- basic flight training -- 5. Advanced flight training -- 6. VAW-11 -- Pre-deployment -- 7. VAW-11cross-country flights -- 8. Survival school & escape and evasion -- 9. Carrier operations & deployment -- 10. VAW-11 -- Post-deployment -- 11. Naval Postgraduate School -- 12. FWC/JTWC Guam -- 13.

2007.302.095	Aviation in San Diego	Pescador, Katrina	For nearly a century, San Diego has been a hub of aviation development, air power, and flying adventure. The city's ideal weather and protected bay allowed San Diego to have an aviation history unrivaled by any local community. From the pioneering days of Glenn Curtiss and naval aviation at North Island to the present cutting-edge aerospace technology, Aviation in San Diego captures it all. With many never-before-published photographs, Aviation in San Diego documents the people and events that made San Diego's aviation heritage unique. From Ryan to Consolidated, Curtiss to Lindbergh, and everything in between, Aviation in San Diego is the preeminent photographic record of flight in "America's Finest City." History of flight San Diego Air and Space Museum Experimental, lighter-than-air craft to modern commercial, military and private air machines
2007.302.097	San Diego's North Island, 1911-1941	Pescador, Katrina	The history of San Diego's North Island from an aviation perspective,from 1911 to 1941. Features unique photographs from the San Diego Air and Space Museum.
2007.302.098	Navy in San Diego, The	Linder, Bruce	Traces the 150-year history of the U.S. Navy's association with the city of San Diego beginning with the capture of the city by the Navy on the first day of the Mexican War. Includes a collection of vintage photography, many never previously published.
2007.302.099	Carrier Lexington	Power, Hugh Irvin	Through beautiful photography, detailed floor plans, and illuminating text, this volume takes the reader on a guided

Object ID	Title	Author	Summary
			tour of Lexington and traces the ship's role in the fascinating history of US Naval aviation and the emergence of the aircraft carrier as the high seas' most fearsome weapon.
2007.302.101	Last Epic Naval Battle, The : Voices from Leyte Gulf	Sears, David	In the words of the men who were there, are dramatic accounts of what really happened at Leyte. Though often overshadowed by other Pacific War engagements, such as Midway or Guadalcanal, the Battle of Leyte Gulf was, and remains, the largest battle in the history of naval warfare. Cutler, Thomas J. (Foreword)
2007.302.102	Midway Inquest : Why the Japanese Lost the Battle of Midway	Isom, Dallas Woodbury	Although there are a number of excellent accounts of the battle, none satisfactorily explain why the Japanese lost, given their overwhelming advantage in firepower. While it is well known that the Japanese were unable to launch an immediate attack because they were in the process of changing armament on their planes from torpedoes to land bombs for a second strike on Midway Island, none of the published accounts of the battle give firm explanations for why the rearming operation could not have been reversed, and an attack launched before the American dive bombers arrived. Based on extensive research in Japanese primary records, Japanese literature on the battle, and interviews with over two dozen Japanese veterans from the carrier air groups, this book solves the mystery at last.
2007.302.105	Clashes : Air Combat Over North Vietnam 1965-1972	Michel, Marshal L. III	Exhaustive coverage describes and analyzes both Air Force and Navy engagements with North Vietnamese MiGs but also includes discussions of the SAM threat and U.S. countermeasures, laser-guided bombs, and U.S. attempts to counter the MiG threat with a variety of technological equipment. Accessible yet professional, the book is filled with valuable lessons learned that are as valid today as they were in the 1960s and 1970s. Some 15 photos and 45

2007.302.107	Black Shoe Carrier Admiral : Frank Jack Fletcher at Coral Sea, Midway, and Guadalcanal	Lundstrom, John B.	An abundance of new evidence demanded this reevaluation of Frank Jack Fletcher, the "black shoe" admiral who won his battles at sea but lost the war of public opinion. A surface warrior -- in contrast to a "brown shoe" naval aviator -- Fletcher led the carrier forces that won against all odds at Coral Sea, Midway, and the Eastern Solomons. These and other early carrier victories decided the Pacific War not only because they inflicted crippling losses but also because they denied Japan key strategic positions in the region. Despite these successes, by 1950 Fletcher had become one of the most controversial figures in U.S. naval history and was portrayed as a timid bungler who failed to relieve Wake Island in December 1941 and who deliberately abandoned the Marines at Guadalcanal.
2007.302.108	Sinking the Rising Sun : Dog Fighting & Dive Bombing in World War II : A Navy Fighter Pilot's Story	Davis, William E.	Gives an ace fighter pilot's view of World War II--including the sinking of the last Japanese carrier afloat from the Pearl Harbor attack. Also included: Naval Aircraft Factory N3N North American T-6 Texan / SNJ Grumman F6F Hellcat
2007.302.109	Douglas Aircraft Company : Service Information	Meakin, Bob	Contents: torpedo-bombers, patrol aircraft, observation-

Object ID	Title	Author	Summary
	summary, Jan-Feb 1962 : 50th Anniversary of Naval Aviation, 1911-1961 : Souvenir Issue		scouting, fighter aircraft, transport aircraft, and bombing aircraft
2007.302.111	Inferno : The Epic Life and Death Struggle of the USS Franklin in World War II	Springer, Joseph A.	This is the story of the attack on the USS Franklin on March 19, 1945 (CV-13) by a lone Japanese aircraft. The aircraft was shot down, but Franklin remained afloat, against all odds and with casualties totaling 798 killed and more than 487 wounded. The officers and enlisted men left aboard (and those allowed to rejoin her later) were able to save her through sheer valor and tenacity. The ship was nicknamed "Big Ben" and "the ship that wouldn't die."
2007.302.113	Love and Glory : The Death of a Torpedo Squadron	Kernan, Alvin	Love and Glory, a historical novel, will particularly interest military buffs, as well as a more general audience for adventure fiction. They will discover what carrier war was back then, and will find descriptions of carrier warfare and its weapons in the 1940s in the dialogue and narrative, offering dramatized explanations of how a torpedo worked and what the torpedoed planes of the day were like. Fictional version of Torpedo 8 Squadron assigned to the USS Hornet at the Midway Battle, 1942
2007.302.114	On the Warpath in the Pacific : Admiral Jocko Clark and the Fast Carriers	Reynolds, Clark G.	A superb biography of one of the finest American air admirals, Jocko Clark, who led a carrier task group in the Pacific war and the Seventh Fleet in Korea. It is a rich, colorful, gloves-off account of this part-Cherokee flier, whose aggressive, often bombastic, but always successful style of leadership was comparable to General George Patton on land. Contents: Cherokee Kid, 1893-1913 -- Academy high jinks, 1913-1917 -- Germans, destroyers, aviators, 1917-1921 - - Policing the world, round one, 1921-1923 -- Flying with the battleships-- and Moffett, 1923-1931 -- Attacking Pearl Harbor with Ernie King, 1931-1933 -- Warplanes, carriers, and Hawaiian defenses, 1933-1939 - - Into the two-ocean war,

Object ID	Title	Author	Summary

2007.302.115	American Carrier Air Power at the Dawn of a New Century	Lambeth, Benjamin S.	Campaign against Osama Bin Laden's terrorist infrastructure in Afghanistan, a tasking that required deep attacks from the sea in a remote part of the world where the US lacked access close enough to the war zone for landbased theater air forces. Reviews the role of American carrier-based air power in conducting around-the-clock operations during the 3 weeks of major combat in Operation Iraqi Freedom. An optimistic view of American carrier air power's future that will be marked by greater carrier surge potential, the introduction of new combat aircraft, a successor to the Nimitz-class carrier, and an ever-tighter fusion of platforms, sensors, networks, and weapons.
2007.302.116	How They Won the War in the Pacific - Nimitz and His Admirals	Hoyt, Edwin P.	A concentrated look at Naval Admiral Chester W. Nimitz and his subordinate leaders -- fighting men under stress -- and the relationship of fighting admirals to their top leaders and each other. "The Patton of the Pacific," Bull Halsey could win a battle; ascetic and cultivated Raymond Spruance could win a campaign; but Chester W. Nimitz, the quiet but dauntless battler from the banks of the Pedernales River, could win a war. And the way he did win that war in the Pacific is the center of this excellent and absorbing biography of naval operations and of men in command relationships.

Object ID	Title	Author	Summary
2007.302.117	Japanese Carrier Air Groups, 1941-45	Francillon, René J.	There are descriptions and color photos of Japanese planes and pilot uniforms of World War II along with a description of the history of the Japanese carrier planes during the war.
2007.302.118	Rampant Raider - An A-4 Skyhawk Pilot in Vietnam	Gray, Stephen	Contents: Navy beginnings -- Naval school, preflight -- Saufley Field -- McCain Field -- Forest Sherman Field -- Chase Field -- Cougars and tigers -- The replacement air group -- Weapons and fleet training -- En route to war -- On the firing line -- Baptism by flack -- Alpha strikes -- Battle losses -- Deadly combat -- End of the line. A member of the USN's Light Attack Squadron 212's Rampant Raiders, A-4 pilot Stephen R. Gray writes about his experiences flying combat sorties from the deck of an aircraft carrier during one of the most intense periods of aerial combat in US history. From the perspective of a junior naval aviator, he takes a revealing look at the lessons he learned at the Naval Aviation Training Command and then in actual combat over Vietnam while flying the Skyhawk from the USS Bon Homme Richard.
2007.302.119	Douglas A-4 Skyhawk : Heinemann's Hot Rod	Winchester, Jim	The Skyhawk first entered service with the USN almost 50 years ago. It first flew on 22 June 1954 and is still in service with various US units and remains the backbone of many of the air forces to which it has been exported. It was originally conceived as a carrier-borne fighter bomber, but as the aircraft has evolved it has taken on other roles. It is renowned for its strength and survivability in combat. This is an in-depth look at the design, production, evolution, operation and performance of the aircraft. It also includes first-hand accounts of flying the Skyhawk in action.
2007.302.120	USN Carriers vs IJN Carriers : The Pacific 1942	Stille, Mark	This book provides an analysis of the variety of weaponry available to the rival carriers, in particular the embarked aircraft as well as the powerful ship-

Object ID	Title	Author	Summary
			borne guns. Study the design and development of these revolutionary ships and 'live' the experiences of the rival airmen and gun crews as they battled for victory in a duel of skill, tenacity and guts.
2007.302.122	Like Rolling Thunder : The Air War in Vietnam, 1964-1975	Frankum, Ronald B.	The first brief overview of the air war in Vietnam, this book examines each theater of operation--South Vietnam, North Vietnam, Laos, and Cambodia--and explores the extent to which the aerial campaigns aided U.S. tactics and strategy.
2007.302.123	Naval Air Power	Taylor, Michael John Haddrick	Beginning with a history of naval air power, the author continues with the attack role of carrier battle groups, the contribution of naval air power in fending off the submarine threat, and the tactics of naval aircraft. He assesses current naval air armament and the impact of V/STOL aircraft on naval power, providing details about notable aircraft used for naval purposes and about the aircraft carriers themselves.
2007.302.124	Battle of Leyte Gulf , The: The Last Fleet Action	Willmott, H. P.	"The Battle of Leyte Gulf was an extremely unusual battle. It was unusual on five separate counts that are so obvious that they are usually missed. It was unusual in that it was a series of actions, not a single battle. It was unusual as a naval battle in that it was fought over five days; historically, naval battles have seldom spread themselves over more than one or two days. It was unusual in terms of its name. This battle involved a series of related actions subsequently grouped together under the name of just one of these engagements, but in fact none of the actions were fought inside Leyte Gulf.... More importantly, it was unusual in that it was a full-scale fleet action fought after the issue of victory and defeat at sea had been decided, and it was unusual in that it resulted in clear, overwhelming victory and defeat." —from Chapter One

Object ID	Title	Author	Summary
			The Battle of Leyte Gulf—October 22-28, 1944—was the greatest naval engagement in history. In fact the battle was four separate actions, none of which were fought in the Gulf itself, and the result was the destruction of Japanese naval power in the Pacific. This book is a detailed and comprehensive account of the fighting from both sides. It provides the context of the battle, most obviously in terms of Japanese calculations and the search for "a fitting place to die" and "the chance to bloom as flowers of death." Using Japanese material never previously noted in western accounts, H.P. Willmott provides new perspectives on the unfolding of the battle and very deliberately seeks to give readers a proper understanding of the importance of this battle for American naval operations in the following month. This careful interrogation of the accounts of "the last fleet action" is a significant contribution to military history. Publication Date: August 19, 2005 (from Amazon.com)
2007.302.125	Lucky Lady : The World War II Heroics of the USS Santa Fe and Franklin	Jackson, Steve	Lucky Lady recreates the legendary WWII careers of the Franklin -- the most decorated naval vessel of the war -- and the Santa Fe -- unparalleled in frontline service and avoiding casualties -- through the eyes of the men onboard. Perspectives range from the highest levels of rank and flying altitude to the bottom of the pecking order and deep within the ships' bowels. Through the bloody years of the Pacific campaign -- from Pearl Harbor to the Philippines to the coast of Japan, and finally the decimated city of Nagasaki -- the crewmembers adapted to the routines of Navy life, braving kamikazes, ship-to-ship combat, and coping with the deaths of crewmates.
2007.302.126	Grumman F-14 Tomcat	Richardson, Doug	The Grumman F-14 Tomcat is arguably the finest air superiority fighter in the

Object ID	Title	Author	Summary
			world. The author personally interviewed the Tomcat's designer, Mike Pelehach, and their wide-ranging dialogue has revealed a significant amount of hitherto unpublished facets about the airplane's aerodynamic character, its weapons system concept, and its validity in the air combat scenarios of the 1990s.
2007.302.128	H-60 Black Hawk in action	Pickett, Paul	Sikorsky UH-60 Black Hawk medium-lift utility helicopter (US Army) Sikorsky SH-60/MH-60 Seahawk (or Sea Hawk) multi-mission helicopter
2007.302.129	Thach Weave : The Life of Jimmie Thach	Ewing, Steve	This biography completes a trilogy on the 3 Navy fighter pilots -- Jimmie Thach, Butch O'Hare, and Jimmy Flatley -- who developed sweeping changes in aerial combat tactics during WWII. Thach was the theoretical innovator of a tactic that became known as the Thach Weave, while O'Hare and Flatley joined him in making it a success.
2007.302.130	OS2U Kingfisher in action	Adcock, Al	The Kingfisher was the eyes of the battleships, being used as a gunfire spotter. The Kingfisher was also used as an air rescue aircraft & was responsible for saving a number of downed Navy pilots in the Pacific. Over 100 photos, 40 detail dwgs, 2 pgs of scale dwgs, 13 color paintings. 50 pgs. SS1119 \$12.95 (from squadronsignalpublications.com)
2007.302.131	Dive Bomber : Learning to Fly the Navy's Fighting Planes	Winston, Robert A. (Robert Alexander)	This lively memoir focuses on the author's flight school experiences in Pensacola during the golden days of the late 1930s, when training was a leisurely affair and young aviators were enveloped in an aura of glamour and distinction. During the time period of this book he flew aboard the carriers the USS Lexington and the USS Enterprise.
2007.302.132	F-4 Phantom	Bowman, Martin W.	A multi-role fighter for both land-based and carrier-borne

Object ID	Title	Author	Summary
			use, the twin-engine F-4 Phantom was built in larger numbers than any other Western modern-day warplane. It was the first fighter able to identify, intercept, and destroy any target that comes into its radar range without having to rely on ground control for guidance. It was also the first multi-service aircraft flying concurrently with the U.S. Navy, Air Force, and Marine Corps and is still in use today. About the Author Martin Bowman has written over 20 books on aviation and is a regular contributor of written and photographic articles to American and British aviation journals. Theo Boiten is a regular contributor to aviation and maritime magazines and published his first book, "Blenheim Strike," (1871187311) in early 1996. (from Amazon.com)
2007.302.133	Wings of Valor, Wings of Gold	Yarsinske, Amy Waters	This book tells the story of American naval aviation from its origins in Hampton Roads to its impact on world events. Much of the story is told in the aviators own words, because the author conducted hundreds of interviews, from admiral to airman, to capture the unique flavor of this challenging profession. In the end, the naval aviation community told their own story in action, deeds, and in the volumes of words they shared and which have been captured in more than 360 pages of text and more than 625 photographs and illustrations, 80 in color. The USS Midway is listed on 13 pages of the book (two of the pages show pictures of the Midway).
2007.302.134	Carrier Strike Force : Pacific Air Combat in World War II	McKay, Ernest A.	Carrier Strike Force - Pacific Air Combat in World War II in 9 Chapters from Defense to Offense, the Fast Carriers, to Leyte Gulf, Iwo and Okinawa and Victory to name a few with Bibliography and Index.
2007.302.135	First Heroes, The : The Extraordinary Story of the	Nelson, Craig	Immediately after Japan's attack on Pearl Harbor, President

Object ID	Title	Author	Summary
	Doolittle Raid -- America's First World War II Victory		Franklin D. Roosevelt sought to restore the honor of the US with a dramatic act of vengeance: a retaliatory bombing raid on Tokyo. On April 18, 1942, 80 brave young men, led by the famous daredevil Jimmy Doolittle, took off from a navy carrier, in the mid-Pacific on what everyone regarded as a suicide mission but instead became a resounding American victory and one of the major turning points of WWII. Includes USS Hornet and USS Enterprise information.
2007.302.136	Semper Fi in the Sky : The Marine Air Battles of World War II	Astor, Gerald	Astor now adds to his distinguished record as a popular military historian this superior history of Marine Corps aviation in World War II. That story opened in the wreckage of the corps' Hawaiian base at Ewa and with heroism in the last-ditch defense of Wake Island. It ended with marine Corsairs flying tactical missions in support of the coming invasion of Japan from bases in Okinawa. In between, the marines raised one of the world's larger air forces and carried out every form of mission except strategic bombing and despite the high casualty rate of their efforts at carrier-based fighter operations. Astor's treatment is balanced and sober. He doesn't exaggerate the swashbuckling qualities of Gregory Boyington's famous "Black Sheep" squadron, and he gives all due credit to the outstanding air-defense and antishipping work done at Guadalcanal. Altogether, this book is Robert Sherrod's venerable History of Marine Corps Aviation in World War II (1952; 2d ed., 1980) updated for younger generations who need the story newly retold. Roland Green --- From Booklist Copyright © American Library Association. All rights reserved Review "Captures the drama of aerial combat in the Pacific as

Object ID	Title	Author	Summary
			never before." –Carlo D'Este, author of Eisenhower: A Soldier's Life "All I wanted to be was an airplane pilot, and here I am in an airplane trying to kill someone." –Mel Freeman, pilot, Guadalcanal, from Semper Fi in the Sky "A riveting account, by a master craftsman, of the exploits of the heroic Marine Corps airmen of World War II." –Carlo D'Este (from Amazon.com)
2007.302.137	Leyte Gulf 1944	Ireland, Bernard	Leyte Gulf was a key victory for the US: its scale dwarfed previous sea conflicts and its outcome created an opportunity for the US forces to invade the Philippines. 4 different battles -- Leyte, Samar, Cape Engano and the Surigao Strait -- occurred almost simultaneously as part of a Japanese plan to claim a Trafalgar-style victory over US forces. Yet they were defeated in the battles on the surface, under the sea, and in the air. This highly accessible book describes the conflict's interweaving battles and the personalities of the commanders involved in what has been called 'the greatest sea battle of all'.
2007.302.138	Leader Born, A : The Life of Admiral John Sidney McCain, Pacific Carrier Commander	Gilbert, Alton Keith	In this book, Alton Keith Gilbert has provided the first full biography of Admiral John "Slew" McCain (father of Admiral John S. McCain, Jr. and grandfather of Senator John S. McCain, III), as well as a fascinating account of U.S. carrier operations in the Pacific War. An unconventional warrior, McCain's career was marked by courage and innovation, as he emerged from World War II as one of America's greatest combat leaders.
2007.302.139	Airwing Enterprise	O'Leary, Michael	This volume takes you aboard ship and places you in amongst the scorching, high pressure world of flightdeck ops,

Object ID	Title	Author	Summary
			Enterprise-style. Illustrated with over 150 sharp action photographs taken on, or above the 'Big E', and accompanied by a thoroughly exhaustive text, Air Wing Enterprise is US naval aviation today at its finest.
2007.302.140	Colorful U.S. Navy A-4 Skyhawks	Kinzey, Bert	Covers colors and markings of attack, composite, adversary, training, test & evaluation and special purpose units.
2007.302.141	U.S. Naval Aviation Flying Clothing and Gear	Warner, Jeff	Covers every aspect of U.S. naval aviation-related uniforms of World War II.
2007.302.142	USS Yorktown at Midway : The Sinking of the USS Yorktown (CV-5) and the Battles of the Coral Sea and Midway	Linzey, Stanford E.	Originally published as "God Was at Midway." "Linzey tells the story from the perspective of a young sailor who basically expected to perform a non-combatant role as a musician in the ship's band, but was instead caught up in a titanic (pun intended) struggle of violent combat and survival aboard the USS Yorktown. Young Linzey was a devoted Christian, which led him to a subsequent career as a U.S. Navy chaplain. His faith in God is a fundamental theme in the book, particularly with regard to the apparent divine intervention that brought about the unlikely American victory at Midway. Review by R. W. Russell of Lodi, CA.
2007.302.143	Aircraft Carriers : The Nimitz Class	Green, Michael	A book for young people about the Nimitz aircraft carriers. It gives information on how airplanes are launched, how they land, and how crews live aboard the carriers.
2007.302.144	Sky Ships: A History of the Airship in the United States Navy	Althoff, William F.	A comprehensive history of US Navy airships from the first blimp, DN-1, to the termination of all airship activities in 1962. (from Amazon.com)
2007.302.145	Naval Institute Guide to World Military Aviation, The - 1995	Francillon, René J.	This premier edition of a comprehensive, single-source reference answers the imperative needs of all professionals who must have access to thorough and clearly organized information on the aircraft, aeronautical systems, and weapons now in service in the world's air forces--and their influence on the balance of

			power in a fast-changing geopolitical climate.
2007.302.146	Pictorial History of American Aircraft, The	Yenne, Bill	12 seconds, 120 feet -- not a very auspicious beginning for what would become a great industry and the driving force behind ambitious, charismatic men of vision. But with Wilbur and Orville Wright's short flight at Kitty Hawk on 12-17-03, modern aviation was born and the world changed forever. This book tells the stories of the Wright brothers, the Loughhead brothers, Glenn Curtis, Glenn Martin, Donald Douglas, Bill Boeing and many others -- the designers who helped make their companies and our nation strongholds of both reliability and innovation in aviation.
2007.302.147	Guide to Over 900 Aircraft Museums	Blaugher, Michael A. (ed)	This guide is a directory to 852 USA and 62 Canadian Aircraft Museums. 2007.302.150	Jane's Fighting Ships - 2004-2005	Saunders, Stephen (ed)	Jane's Fighting Ships is an annual reference book (also published online, on CD and microfiche) of information on all the world's warships arranged by nation, including information on ship's names, dimensions, armaments, silhouettes and photographs, etc. Its annual editions cover the warships used by the different national naval and paramilitary forces, and provide data on their characteristics. It was originally published by John F. T. Jane (usually known as "Fred T.") in 1898 as Jane's All the World's Fighting Ships. Its success launched a number of military publications carrying the name "Jane's". It is a unit of Jane's Information Group, which is now owned by IHS. From Wikipedia, the free encyclopedia

Object ID	Title	Author	Summary
			Recently added to military aviation, helicopters were first used en masse during the Korean war and other conflicts of the 1950's becoming clear that their ability to insert troops and material onto battlefields and extract the injured as well. The Mojave, Wessex and Chinook became familiar to ground forces worldwide.
2007.303.005	Century of Flight, The, Vol. 5 : Naval Aviation, 1945-'95	Powell, Robert	Rare historic films and aerial footage together with vivid historical accounts reveal the history of military aviation. (from Amazon.com:) Discover how the naval aviation developed from the era of close-range carriers and piston-driven planes to today's "floating cities," capable of deploying advanced jet aircraft anywhere in the world, with 'Naval Aviation' . . .Through spectacular aerial footage and vivid historical accounts, you'll take part in the first sea landing tests for jets, guiding your Phantom in for a spin-rattling touchdown on a pitching flight deck. Fly into heavy fire during General MacArthur's Inchon invasion, after catapulting off of a battle-front ship along the Korean Coast. Soar through the skies in your A-6 intruder on a Tomcat into a skirmish with Libyan fighters and ride above the waves in an attack helicopter looking for Iraqi patrol boats during Operation Desert Storm. Finally, experience a tour of duty on a modern-day aircraft carrier, becoming part of the flight crew, as you train for future confrontations in the world's hotspots.
2007.303.006	Japanese Conquest	None Stated	Imperial Japan built its air force in secret, then used it to devastating effect in lightning-fast attacks. American pilots desperately fought to gain the upper hand. Relive the war above the Pacific ... (from Amazon.com:) Produced shortly after the fiftieth anniversary of powered flight, this documentary series,

Object ID	Title	Author	Summary
			hosted by veteran news anchor Walter Cronkite, traced the development of flight from the Wright Brothers to the present day. In addition to the impact of air travel on society and the economy, this series also took a detailed look at the military uses of air power, from the dogfighting biplanes of the First World War, to the high powered bombers and jet fighters of the 1950's.
2007.303.007	Flat Tops	None Stated	Experience the world of a U.S. Navy carrier battlegroup and sail aboard modern "flat tops," seeing their full operations from flight planning to flight launch.
2007.303.009	National Museum of Naval Aviation : Intrepid Sea-Air-Space Museum	None Stated	From the first plane to cross the Atlantic... to the first man on the moon, Naval Aviators have led the quest to expand our horizons. The National Museum of Naval Aviation offers a proud tribute to the men and machines in this quest. This video tour of the Museum is combined with footage from WWI, WWII, the USS Yorktown, and the Blue Angels. (from http://www.textbookx.com/detail-video-723876015137.html & http://www.rottentomatoes.com/m/intrepid_seaairspace_museum/about.php.) A tour of the retired aircraft carrier U.S.S. Intrepid, which now serves as a museum of military artifacts. (from http://www.navalaviation.com/12954r.html)
2007.303.011	Wings of Mercury, The	Baggett, Blaine	This four part series explores the historical, political and technological events of America's quest to conquer space. Uses previously classified NASA and U.S. government footage, as well as rare footage from the Russian space program.
2007.303.012	Here Comes the Navy	Bacon, Lloyd	Taglines for "Here Comes the Navy" (1934): THE HIT! THE STARS! THE FLEET! All America Wants

2007.303.014	Guinness Book of Naval Blunders	Regan, Geoffrey	The author of Guinness's two books of military blunders from all periods of history presents a corresponding survey of naval incompetence, focusing on the misjudgements and oversights of captains, fleet commanders and strategic planners from Roman times to the Falklands War. From errors of ship design, equipment and weaponry to the incompetence and omissions of sailors of every rank, the book incorporates failed amphibious operations, avoidable submarine disasters and naval aviation disasters. Case studies at the end of each chapter provide analysis of what went wrong in key battles and campaigns such as Navarino, Tsushima, Gallipoli, Jutland, Midway and Leyte Gulf. About the Author Geoffrey Regan is a former History Master at Charterhouse School, Godalming and Acting Headmaster at Halliford School. He has written 27 historical and educational books including Military Blunders, Historical Blunders, Royal Blunders, Flying Blunders, More Military Blunders, Famous British Battles, Decisive Battles, Blue on Blue and Fight or Flight. He was the series consultant for Channel 4's Great Military Blunders series, broadcast in 2000 and Historical Consultant for ABCs Blue on Blue (Autumn 2000). (from Amazon.com)
2007.303.015	Second World War, The	Keegan, John	Much more than a mere chronological narrative, the history of the war is recounted both periodically and

Object ID	Title	Author	Summary
			thematically. Treating each theater of war -- the war in the West, the war in the East, the war in the Pacific -- according to the "strategic dilemma" faced by the leaders, Keegan analyzes five crucial battles, each of which he finds characteristic of a distinctive kind of warfare of the period. Airborne battle of Crete, carrier battle of Midway, tank battle of Falaise, city battle of Berlin and amphibious battle of Okinawa. Includes: Airborne battle of Crete, carrier battle of Midway, tank battle of Falaise, city battle of Berlin and amphibious battle of Okinawa.
2007.303.016	Airshow : Aerobatic Teams of the World, The	Sakamoto, Kunihiro	Tomcats... Hornets... Thunderbolts... Blackbirds... Harriers Airshow puts you in the pilot's seat of the world's fastest and most formidable aircraft. Gazing skyward from ground level, or experiencing the action from a nearby cockpit, you will thrill to the soaring, swooping and spinning motions of such precision flying teams as the United States Navy's Blue Angels and Canada's Snowbirds. Spectacular photography of spine-tingling flight formation accompanies the roar of raw firepower as warplanes zoom at and alongside one another, inches from certain disaster. But these greatest of flying aces are in complete command - down to landing and emerging together in unison. Truly magnificent men, in magnificent machines, filmed at the world famous Abbotsford International Airshow. Color/Approximate Running Time: 60 Min. (from laserdisc jacket rear)
2007.303.017	Navy : The Journey of a Lifetime	None Stated	Navy promotional recruiting video
2007.303.018	Mach 1 and Beyond: The Illustrated Guide to High-speed Flight	Reithmaier, L. W. (Lawrence W.)	This compelling book opens up the world of high-speed flight to readers who do not have

Object ID	Title	Author	Summary
			extensive technical backgrounds. Covering both subsonic and supersonic flight, it demystifies the world of high-speed aerodynamics, flight principles, gas turbine jets, and more. You'll learn why there are no supersonic airliners, what problems confront designers of 2,000-mph aircraft, and whether or not a hypersonic, or Mach 5, airplane is likely to be built. About the Author Larry Reithmaier is a retired mechanical engineer who, while at Rockwell International, helped design and develop the F2H, F3, F86H, F100, F101, and F4 jet fighters, the B-1B bomber, and Apollo and Skylab spacecrafts. The author of several technical books on aviation, he also wrote the Standard Aircraft Handbook for Mechanics and Technicians, Sixth Edition; the Aviation and Space Dictionary; Mach I and Beyond; Private Pilot's Guide; and Aircraft Repair Manual. Includes: Grumman F-14 Tomcat McDonnell Douglas F-4 Phantom II McDonnell Douglas F/A-18 Hornet T-28 Trojan (from Amazon.com)
2007.303.019	Pride of the Marines	Daves, Delmer	Marine hero Al Schmid is blinded in battle and returns home to be rehabilitated. He readjusts to his civilian life with the help of his wife. (from IMDB.com)
2007.303.020	Modern Combat Aircraft III	None Stated	Shows 14 outstanding combat aircraft including F-14, F/A-18, F-8, S-3A, E-2C, P-3C, Mr.MK2, A-4, A-7E, S.MK2, A-6E, FRS.MK1, etc. One double-sided laserdisc (CAV mode, #68C59-6247, 57 mins.), Japanese narration, Japanese captions, no subtitles, no English. Includes : European naval aircraft Grumman A-6 Intruder Grumman E-2 Hawkeye Grumman F-14 Tomcat

2007.303.021	United States Marines, The: A History	Simmons, Edwin Howard	A thoroughly readable history of the Marine Corps with accent on their combat activities in each war in which the Marines have participated. This edition adds new conflicts since 1975 and updates previous editions with the results of recent scholarship.
2007.303.022	Battle Ready	Clancy, Tom	From Publishers Weekly: "In the lead-up to the Iraq War and its later conduct, I saw at a minimum, true dereliction, negligence, and irresponsibility, at worse, lying, incompetence and corruption." So says former U.S. Central Command commander in chief Zinni, who retired in September 2000 and has been outspoken ever since regarding the uses and abuses of the U.S. military. This book is the latest of Clancy's nonfiction Commanders series, which has previously featured collaborations with Gen. Fred Franks Jr. of the army, Gen. Chuck Horner of the air force and Gen. Carl Stiner, formerly U.S. Special Operations commander. As in those books, Clancy gives adequate background on his subject and his subject's context, then quotes him liberally, consigning tens of pages at a time to Zinni's italicized first-person reflections. Beginning the book with the 1998 CentCom-coordinated attack on Saddam Hussein (the unfortunately named Operation Desert Fox), Clancy and Zinni next move through 150 or so pages of Zinni's service as a Philadelphia-born (in 1947) Marine infantry officer during Vietnam and his racially charged Headquarters and Service stint on Okinawa in the early '70s. The book then

Object ID	Title	Author	Summary
			flashes forward to the end of the Cold War and steams along from there, with details on Zinni's European command service, including 1990 meetings with a recently de-Sovietized Russian army and support operations during the Persian Gulf War. Zinni joined CentCom just in time for the Somalia debacle, and he is candid about its failings. Over the next years, Zinni traveled widely in parts of the world that were obscure to the U.S. then (Pakistan, Central Asia), but are central now, and played cat-and-mouse with Saddam regarding weapons inspections all through the late '90s. But it is Zinni's 24-page closing statement, "The Calling," that will sell the book to nonbuff civilians, summing up his service and the ways in which he feels his generation's legacy is in jeopardy. Copyright © Reed Business Information, a division of Reed Elsevier Inc. All rights reserved. --This text refers to the Hardcover edition. From Booklist This is the fourth book in Clancy's nonfiction Commanders series; all have been cowritten with generals. This one chronicles the 40-year career of the now-retired Zinni, which includes two tours in Vietnam, two years as an instructor at the Basic School in the U.S., and his role as head of the U.S. Central Command. He also served in posts in Okinawa, Vieques Island, Germany, Turkey, and Somalia. Zinni reflects on the Vietnam War, saying, "Today we are seeing a stream of apologetic books by the policymakers and military leaders of that era--as though saying mea culpa enough will absolve them of the terrible responsibility they bear." On Operation Desert Storm, he says, "The only reason [that campaign] worked was because we managed to go up against the only jerk on the planet who was stupid enough to challenge us to refight

Object ID	Title	Author	Summary
			World War II." On the Iraq war, he insists, "False rationales presented as justification, a flawed strategy, lack of planning, the unnecessary distraction from real threats, and the unbearable strain dumped on our overstretched military, all of these caused me to speak out." He warns that military conflict has changed in the twenty-first century and we have been reluctant to recognize it or to acknowledge it. Whether or not readers agree with Zinni, this is a book that demands our attention. George Cohen Copyright © American Library Association. 2007.303.023	Faith of My Fathers	McCain, John	John McCain is one of the most admired leaders in the US government, but his deeply felt memoir of family and war is not a political one and ends before his election to Congress. With candor and ennobling power, McCain tells a story that, in the words of Newsweek, "makes the other presidential candidates look like pygmies." John McCain learned about life and honor from his grandfather and father, both 4 star admirals in the US Navy. This is a memoir about their lives, their heroism, and the ways that sons are shaped and enriched by their fathers.
2007.303.025	Das Boot : The Director's Cut	Petersen, Wolfgang	This is the restored, 209-minute director's cut of Wolfgang Petersen's harrowing and claustrophobic U-boat thriller, which was theatrically rereleased in 1997. Originally made as a five-hour miniseries, this version devotes more time to getting to know the crew before they and their stoic captain (Jürgen Prochnow) get aboard their U-boat and find themselves stranded at the bottom of the sea. Das Boot puts you inside that submerged vessel and explores the physical and emotional tensions of the situation with a vivid, terrifying realism that few movies can match. As Petersen tightens

Object ID	Title	Author	Summary
			the screws and the submerged ship blows bolts, the pressure builds to such unbearable levels that you may be tempted to escape for a nice walk on solid land in the great outdoors--only you wouldn't dream of looking away from the screen. --Jim Emerson Product Description Follows the daring patrol of U-96, one of the famed German U-boats known as the "gray wolves." 2007.303.026	History of Seaplanes : In the Wake of Wings	None Stated	This is the story of the seaplane family of aircraft - floatplanes, amphibians, and flying boats. From the first takeoff by Henri Fabre, to today's uses as recreational aircraft, 'In The Wake of Wings' follows the history of one of the world's most versatile means of transportation. The program features rare historical footage of early Curtiss seaplanes, the Martin Mars, the PBY, and dozens of vintage aircraft on floats. Contemporary footage includes a Short Sunderland, a Grumman Goose, and many other water-based airplanes. 2007.303.032	Military and Related Terms	Traynor, David	Explanations for modern acronyms, code names, aircraft and ship designations, popular nicknames, Soviet terms, supercarriers ; listings--aircraft, aircraft carriers, and submarines, military publications, nations
2007.303.033	Great War 1914-1918, The	Falls, Cyril	The years 1914 to 1918 saw Europe engaged in a conflict involving a greater area and a greater number of men than history had ever before recorded. In this book, Capt. Cyril Falls, known in British academic and governmental circles as an expert in military history, discusses the military side of WWI in the light of its battles, tactics and weapons; its problems of supply and transport; its armies and their commanders. The engagements in the many theaters of war in Europe, Asia and Africa are described in vivid detail, but particular attention is focused on the Western Front, where the principle and decisive battles were fought.
2007.303.034	Military 100: A Ranking of the Most Influential Military Leaders of All Time, The	Lanning, Michael Lee	From Library Journal Retired Army colonel Lanning (Senseless Secrets, Carol Pub. Group, 1995) gives a new twist on who's who among military leaders. Lanning not only provides concise biographies of his selected 100 military leaders but also takes the bold step of ranking them from one to 100, in the order of their enduring influence on world history.

Object ID	Title	Author	Summary
			The selected 100 span 15 centuries of warfare, from Attila the Hun (#15) to Norman Schwarzkopf (#49) and include both heroes and villains, innovators and heretics. Hitler is ranked rather high at #14, while Kim Il Sung is a lowly #86. As expected, George Washington is ranked first on the list; lone female, Joan of Arc, is #43. This is a grand list, filled with the famous and infamous and even some obscure men like Lennart Torstensson and Thomas Cochrane. As a clever approach to military history, this is recommended for the general reader.?Col. William D. Bushnell, USMC (ret.), Harpswell, Me. Copyright 1996 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. From Booklist Retired infantryman Lanning, author of several books on Vietnam, now tackles a wider canvas--all of history--to survey and rank the 100 most influential military figures. His criteria for inclusion measure not only battlefield prowess but also the long-term consequences of the specific leader's actions for the world, by which criteria George Washington outstrips Napoleon, and both Saddam Hussein and Adolph Hitler find places on the list. The biographies themselves are definitely capsule but definitely sound, balanced, well researched, and clear. Every reader will find at least one nonfavorite among the top 100 and the 50 honorable mentions and at least one favorite left out. But as an intelligent soldier-historian's roster of the movers and shakers of warfare, this book itself ranks high and will find readers in virtually any collection that includes it. Roland Green --This text refers to an out of print or

2007.303.051	Hollywood Goes to War	None Stated	Here are three great World War II documentaries, featuring three of Hollywood's greatest stars who joined the military during World War II. "Wings Up" is first, and Clark Gable is a recruiter, pushing America's young men to become flying officers. Officer candidates include actors Gilbert Roland and Robert Preston. Next is "Winning Your Wings" in which a very young Jimmy Stewart (already an Army pilot in 1942) asks you to become a pilot in the Army Air Corps. Flight training from basic to B-17s is covered. Stewart did fly combat missions. Finally, "Recognition of the Japanese Zero" stars Ronald Reagan as a fighter pilot who nearly shoots down one of our P-40s, mistaking it for a Japanese Zero. It was a common mistake. Includes rare footage of a captured Japanese Zero in action. Includes: Aviation Training Boeing B-17 Flying Fortress.

2007.303.052	Longest Battle : The War at Sea, 1939-45, The	Hough, Richard Alexander	According to prolific naval historian Hough, "World War II at sea was a non-stop sailor's battle." Constant battle, with few intermissions, is the theme of this one-volume naval history. While the author emphasizes the U.S. Navy, operations of the British, German, and Japanese navies are included. The sheer magnitude of the conflict makes it impossible to delve deeply into any action or campaign. Many important events are excluded, and the treatment of major campaigns varies from a few paragraphs to a page or two. There is no new information or viewpoint. Libraries in need of a one-volume history should still consider Samuel Elliot Morison's <i>The Two Ocean War</i> (1963). From Library Journal Stanley Itkin, Hillside P.L., New Hyde Park, N.Y. Copyright 1987 Reed Business Information, Inc. Book Description For those who served on shipboard during World War II, danger lurked 24 hours a day. Through a brilliant mixture of narrative history and personal accounts—collected over almost 30 years of interviewing combatants from both sides—a very powerful, human story emerges of the danger, elation, and miseries of six years of "the longest battle" in the war. (from Amazon.com)
2007.303.053	Rescue Pilot	McKinnon, Dan	Business & Commercial Aviation : In <i>Rescue Pilot</i>, distinguished naval aviator Dan McKinnon brings to life the dramatic at-sea helicopter rescues in which he participated during his anything but

Object ID	Title	Author	Summary
			peaceful peacetime service in the U.S. Navy. Helicopter flight in the 1950s was still in its infancy, so pilots like McKinnon had to learn as they went along. Rough water, treacherous weather and risky conditions were all part of a day's work. The author, the last chairman of the Civil Aeronautics Board and now owner and CEO of North American Airlines, interweaves technical and historical information with accounts of his own rotary adventures. McKinnon holds the U.S. Navy peacetime helicopter rescue record with 62 air-sea rescues. Rotor Review : By ADM Leon "Bud" Edney, USN (Ret), former CINCLANT Dan McKinnon has written a book that all helicopter pilots in particular as well as all carrier aviators together with sea-going sailors and Marines past and present will enjoy and war like an old sweater. This is the story of one man's incredible experience as a young Navy helicopter pilot written through the eyes and thoughts of events as they happened. Events that were filled with on-the-edge excitement, requiring great courage, commitment and professional skills. Events that not only shaped his life and character for all time, but also had the same effect on many of those he rescued. Rescue Pilot is not the story of one man, it is the story of the combined skills and courage of the pilot enlisted teams that routinely stand in harm's way to save lives when things go wrong in the most hazardous environment possible. Dan McKinnon takes the reader through his early attraction to flight and the commitment it takes to meet the demands of those who earn their "Navy Wings of Gold." His description of the training and teamwork associated with the mission of helicopter rescue pilot,

Object ID	Title	Author	Summary
			documents the hours of preparation it takes for these pilots to make the impossible seem routine. More than anything else, Rescue Pilot is a story of the character, confidence, courage, teamwork, adventure, and willingness to take risks among Navy helicopter crews charged with the mission of rescuing those whose lives are in jeopardy. The incredible responsibility, independent decision making and accountability placed on a junior officer from the first day he reports to his new squadron serves to remind those who follow this path to take advantage of every training opportunity. Reporting ready on arrival is not just a slogan in this business. The time frame for the majority of the action takes place on a deployment to the Western Pacific from July 1958 through January 1959 aboard the cruiser USS Helena (CA 75). The Helena was to be the flag ship of the Commander, US Seventh Fleet and LTJG McKinnon was to be the Admiral's personal command pilot. While this period covers a portion of the tensions in the Taiwan Straits, the operational intensity is typical of most helicopter deployment on cruisers and guided missile destroyers. When you have the responsibility of moving the Big Boss among all units and being at the leading edge of flying never-ending series of VIPs to and from the Flag Ship, you understand the meaning of being in the "Heat of the Kitchen." In this environment, Rescue Pilot shares with the reader the challenges, frustrations, humor, and opportunity to make an impact. When you are an air force of one and your passenger is the Fleet Commander, as they say in Naval Aviation, your opportunities to excel are unlimited. Only the very best get these choice assignments regardless of rank. Dan

Object ID	Title	Author	Summary
			McKinnon was clearly up to the task. Dan McKinnon's recorded on scene recollections and thoughts, during his two years of squadron life as a helicopter rescue pilot individually credited with 62 life saving rescues, providing both entertaining and enlightening reading. For those currently employed in this dangerous profession it will provide great satisfaction and pride to be part of this wonderful team. For those looking back to past experiences, as Dan McKinnon has done, it will place them once again in an environment and life style that only those who have lived it can truly appreciate. All in this category would go back in space to that time in a heartbeat. For those still trying to choose their profession, this book will motivate those with the competitive spirit to follow the course to earn those coveted "Navy Wings of Gold." A course that only the truly motivated should start and only those with the right stuff will complete. Dan McKinnon had and has the right stuff. His book should be in every aviator's library as a must read. (from Amazon.com)
2007.303.054	Dive Bomber	Curtiz, Michael	A new flight surgeon and a Navy pilot overcome personal differences to work on solving the problem of altitude sickness which causes blackouts at high altitude. 2007.303.062	Grumman F-14 Tomcat	Lake, Jon (ed)	To all Tomcat fans January 23, 2000 By Jon Lotton For all the people who love the F-14 tomcat , this book is for you . This book tells about the design history , the Tomcat opperators and who have been disbanded, fine scale drawings of the Tomcat, technical info and lots more. Also a great modelers resorce. Allaround a wonderful book for the Tomcat fan. Collection of World Air Power Journal Materials plus new Inf September 7, 2000 By "cobrachen" This book is published by the same published who published World Air Power and Wings of Fame journals. Part of the pages of this book came from the articles printed on World Air Power before. World Air Power journal is a high quality military journal with excellent photos. This book has all the excellent quality from the journal plus new materials including the 1991 gulf war. F-14 is a legend not only to Navy, but to all of the fighters current in service. There are some books in this field, but with latest information, this is the book to read. Everything you wanted out of an F-14 book plus something

Object ID	Title	Author	Summary
			extra! June 27, 2005 By CVN-65 This is THE book for Grumman's venerable F-14 Tomcat. Sure, some other books like Tomcat Alley by David F. Brown might beat it in the pictorial department, but overall the information in the articles plus the photos it already has beat any other book about the F-14 Tomcat. Everything about the Tomcat until the books date of publication is covered. From the early beginnings of the Navy's need for a Fleet Air Defense F6D Missileer and the VFX competition that Grumman won all the way to the combat record and current strike attack roles. Every F-14 variant is covered, even the ones that were only concept models. Plus great artistic renderings of historic F-14s. A lot of the articles here came from World Air Power Journal's F-14 cover issue back in the early 90s, but the information here is updated such as the squadron deployments, squadron disestablishments and the wars in Eastern Europe. All F-14 Squadrons in the US Navy are covered, and even some stuff about the IIAF/IRIAF F-14s. If all that isn't enough, there's a foreword by F-14 Tomcat pilot D. Stuart Broce, the VF-1 pilot who shot down a Mi-8 helicopter during Desert Storm. It's very interesting and heart warming to read. This book might be hard to find now, but if you get a chance, get it! 5 / 5 STARS! (from Amazon.com)

2007.303.063	Time Goes to War : From World War II to the War on Terror: Stories of Americans in Battle and on the Home Front	Knauer, Kelly (ed)	For connoisseurs of history's rough draft comes this anthology of Time magazine's coverage of conflicts from the Second World War to Operation Enduring Freedom. Full of local color ("An empty Chianti bottle lay in the desert where an Italian had dropped it in his 1942 retreat") and two-fisted prose ("the Jap ships lay like dozing ducks"), these war dispatches are models of

Object ID	Title	Author	Summary
			concise, impressionistic writing. They're accompanied by lots of vivid pictures, sometimes grouped into photo essays on topics such as the home front, the supporting cast (medics, cooks, service animals) and USO entertainers. The short and snappy reporting can seem shallow, and sometimes lapses into mere embellishments of Pentagon press briefings ("The Viet Cong's once-cocky hunters are now the cowering hunted," the magazine reported in 1965) but some pieces, like Robert Sherrod's taut and moving report on the battle for Iwo Jima, are still gems. --- From Publishers Weekly Copyright 2002 Reed Business Information, Inc. (from Amazon.com)
2007.303.064	Investigation of the Pearl Harbor Attack	Joint Committee on the Investigation of the Pearl Harbor Attack	Four years after the Pearl Harbor attack, a Congressional Joint Committee conducted an exhaustive investigation into the facts relating to the events and circumstances leading up to and following the Japanese attack. The Congressional Report, dated July 16, 1946, provides the results of the Joint Committee's investigation. This book is a copy, without changes of the original report published in 1946. In this edition, the publisher has included an index of every name which appears in the report. The Report records the facts of the Pearl Harbor disaster and seeks to find lessons to avoid similar disasters in the future, to evolve constructive suggestions for the protection of U.S. national security, and to determine whether there were failures in the U.S. military and naval establishments which in any measure may have contributed to the extent and intensity of the disaster. In the pages of the Report there is provided a review of the

Object ID	Title	Author	Summary
			diplomatic and historical setting of the Pearl Harbor attack, followed by a description of the Japanese attack itself. Set forth thereafter are separate treatments of responsibilities in Hawaii on the one hand and in Washington on the other. In addition to the Report itself, there has been added a full and complete Index of names which occur in the text. Finally, there is appended to the Report a recently obtained Memorandum for the Director, Central Intelligence, which concerns a study of the intelligence aspects of the Report.
2007.303.065	Blue Angels : An Illustrated History, The	Rausa, Rosario	The US Navy's Blue Angels have excited crowds since 1946 when Butch Voris led them through their first demonstration before a throng in Jacksonville, Florida. This elaborately-illustrated book chronicles not only the eventful history of this internationally known and highly respected team of flyers but that of its fascinating forebearers of pre-World War II years. This book features captivating narratives by the pilots themselves, describing what it is like to fly at jet-age speeds in close proximity to one another. In addition to the photography, there are scale drawings of aircraft flown by the demonstration squadron since its beginning, a roster of Blue Angel officers and other data.

			Harbor, Subic Bay, Buckner Bay, Yokosuka, Hong Kong and Manila. Midway returned to Alameda on 8 March 1959. CVG-2 embarked, consisting of: VF-211 (F8U-1) VF-64 (F3H-2) VA-63 (FJ-4B) VAH-8 (A3D-2) VA-65 (AD-6) VFP-61 Det.A (F8U-1P) VA(AW)-35 Det.A (AD-5N) VAW-11 Det.A (AD-5W) HU-1 Det.1 (HUP-2)
2007.305.001	Loyalty, Betrayal, and Other Contact Sports : The Story of a Fighter Pilot (Alpha) (Bravo)	Schaffert, Richard W.	Inscribed to Commander Bob Solomon, a former volunteer at the USS Midway Museum, by the author. This is a combined edition of two previously published parts: Alpha and Bravo. Schaffert, himself a former Navy fighter pilot, has written a novel about fighter pilot, Dick Williams. The book opens with the hero being shot down by Soviet MiGs, in one of the unacknowledged hot spots of the Cold War. Since William's call sign Brown Bear, is the same as Schaffert's, it may be hard to determine how much is truly fiction and how much is semi-autobiographical.
2007.305.002	Loyalty, Betrayal, and Other Contact Sports : The Story of a Fighter Pilot (Charlie)	Schaffert, Richard W.	Inscribed to Commander Bob Solomon, a former volunteer at the USS Midway Museum, by the author. This is the third part of the series: Charlie. The first two parts are Alpha and Bravo. Schaffert continues the exploits of LCDR Dick Williams, call sign Brown Bear. (Brown Bear is also the author's call sign.) Although listed as fiction, this is very likely semi-autobiographical. Many of his friends from the first novel, such as Canadian fight pilot, Jim Conrad, also figure prominently in this current book.
2007.306.001	Midway Multiplex, Vol. I, No. 2, Thursday, 13 January 1977	None Stated	USS Midway onboard newsletter for 13 January 1977. Contains Navy Unit Commendation letter from SECNAV to CTF 76 for evacuation of Saigon efforts.

Navy with Frontispiece of "Globe-Trotting Abe the Newsboy, carrying his clippings and autographed photos in his world-trotting bag". Dedicated to my Dearest Friends The Presidents and Officers and Men of the U. S. Navy. This educational book, my life's work, contains 538 pages and is full illustrated with photos of our old and new Navy. Preface by the Author. "The United States Navy was the making of Abe, the Newsboy". 25 Chapters.
2007.310.007	USS Ranger : The Navy's First Flattop From Keel to Mast, 1934-46	Cressman, Robert J.	USS Ranger (CV-4) was the US Navy's first aircraft carrier to be built as such from the keel up. Ranger helped maintain the FDR administration's Good Neighbor Policy, served as a platform for the development of new methods for the operation of carriers and carrier aircraft, continued the Navy's work in cold-weather flight operations, pioneered director-controlled antiaircraft fire, and trained many naval aviators. During WWII, Ranger occupied center stage in Operation Torch (against the Vichy French positions in North Africa in 1942) and in Operation Leader (against German shipping in 1943), the Navy's only carrier operation above the Arctic Circle during the war. Cressman combines exhaustive research in official records and numerous never-before- seen photographs to examine the

In print for 75 years and updated and expanded to meet recent developments. Chapters include Ships and Boats; Shiphandling; Oceanography and the Weather; and Rules of the Road.
2007.314.001	Historic Naval Ships Guide	Historic Naval Ships Association	A guide to more than 150 classic ships on public display
2007.314.002	Boeing F/A-18 Hornet	Elward, Brad A.	When it entered service in 1983, the Hornet proved to be an agile fighter and a proficient day bomber, but lacked true night and all-weather capabilities. In the late 1980s, the C and D models emerged, with a much-improved avionics package that expanded the aircraft's capabilities many-fold. These were followed in 1989 by the night attack configured C/D models, which today form all but a few USN and USMC strike-fighter squadrons, and which are uniquely responsible for bringing the night back to naval aviation as the Grumman A-6E Intruder retired. As the 1990s began, it became apparent that the growth potential of the C/D was virtually used up. This led to the F/A-18E/F Super Hornet, which was approved for LRIP on 28 March 1996 and has just recently been granted approval to issue a 5-year, 222 aircraft production contract.
2007.314.003	Carriers in Combat : The Air War at Sea	Hearn, Chester G.	WWII witnessed the carrier's heyday as swarms of American Wildcats and Hellcats and Japanese Zeroes catapulted from flight decks to attack enemy ships and planes at

			in the first MIG kill of the Vietnam War flying off of USS Midway. Became first C.O. of Top Gun and first NFO to command an aircraft squadron.
2007.319.002	Destination Point Luck : June 4 - 7th, 1942 Midway	Chief of Naval Operations	In 2007, the Chief of Naval Operations, Admiral Mike Mullen, encouraged the Navy to commemorate the Battle of Midway. This video was compiled and released from the Navy as part of the commemoration materials. There is an introduction by Adm. Mullen, scenes from the battle in B&W, and interviews of survivors which are in color. Also shows scenes back in the US in B&W. See the memo from Adm. Mullen at : http://www.navy.mil/navydata/cno/mullen/speeches/cno_midway_message_2007.pdf From You Tube: Destination Point Luck is a one hour documentary with interviews with many of the participants of the Battle Of Midway. Narrated by Ernest Borgnine, the interviewees include PBY pilots. Code breakers from the Combat Intelligence Unit (Code Name Station Hypo), marines from Midway Atol and pilots from the USS Hornet, USS Yorktown and USS Enterprise. Destination Point Luck follows the Navy from Pearl Harbor and the Battle of the Coral Sea to the victory at Midway.
2007.320.001	Instructions for Use in Preparation for the Rating of Coxswain	Bureau of Navigation	Twelve lesson training course for Coxswain published by the Bureau of Navigation in 1936.
2007.320.002	Instructions for Use in Preparation for the Rating of Seaman 1 c	Bureau of Navigation	A course in Twelve Assignments prepared under the supervision of the Bureau of Navigation
2007.320.003	Women Marines in WWI	Hewitt, Linda L.	The history of the first women to serve in the Marine Corps is a fascinating record of the dedication and drive of American women during WWI. This is to tell the story of the small band of women who answered the Corps' call for volunteers in 1918 with patriotism and enthusiasm.
2007.321.001	I Owe Russia \$1200	Hope, Bob	America's Number One Expert (Old Sincere to his friends)

Object ID	Title	Author	Summary
			didn't really cheat the Russians out of their money when he fled from Moscow. He left his writers there as security.
2007.321.002	Sea of Words, A : A Lexicon and Companion for Patrick O'Brian's Seafaring Tales	King, Dean	No man could easily surpass me in ignorance of naval terms, claims Stephen Maturin early on in Master and Commander, Patrick O'Brian's first novel. Indeed, Maturin's continuing ignorance of the ways of the sea and nautical terminology is one of the chief sources of humor in O'Brian's Aubrey-Maturin books -- and a very clever one, for it allows us, in our own ignorance of 18th-century naval cant, to associate ourselves with the novels' paragon of intelligence.
2007.322.001	Bob Hope's Dear Prez, I Wanna Tell Ya! : A Presidential Joke Book	Hope, Bob	He's America's last great oracle, and his political barbs have defined current events for generations. From Roosevelt to Truman, Eisenhower to JFK, LBJ, Nixon, Ford, Carter, Reagan, Bush and Clinton, Bob Hope has been their favorite entertainer, dinner guest and golfing partner and here, compiled for the first time, is the best of Bob Hope's presidential humor.
2007.322.002	I Was There	Hope, Bob	This book contains material from "I Never Left Home", "Who Threw That Coconut!", "So This is Peace", "Bob Hope: A Life in Comedy", "Don't Shoot, It's Only Me" Bob Hope remembers the laughs and tears of WWII
2007.322.003	Have Tux, Will Travel	Hope, Bob	From his one-night stands in vaudeville to countless performances for servicemen on US military bases across the globe, this delightfully candid book of funny life stories is pure Hope. In his own words, Hope recalls his brief career as an amateur prizefighter; his flops and successes in vaudeville; memories of sharing the stage with Ethel Merman and Jimmy Durante; his courtship of the young singer who would become his bride; his forgettable first screen test; his friendship with Bing Crosby and their high jinks on the sets of the famous Road pictures;

Object ID	Title	Author	Summary
			poignant and hair-raising trips to entertain the troops; a personal request from General Patton; and 18 holes of golf with President Eisenhower. "Parts of this book have appeared in the Saturday evening post under the title This is on me."
2007.322.004	My Life in Jokes	Hope, Bob	Bob Hope's legendary career spanned the entire 20th century, from impersonating Charlie Chaplin in front of the firehouse in Cleveland in 1909 to celebrating an unprecedented 60 years with NBC in 1996. To mark the occasion of his 100th birthday last year, Bob Hope collaborated with his daughter, Linda, on this extraordinary recollection in the form of his best jokes and anecdotes. Each of its 10 chapters corresponds to a decade in Bob's phenomenal career, and the book features remarkable photos of him from every decade.
2007.322.005	Don't Shoot, It's Only Me	Hope, Bob	Bob Hope has been cheered and loved by America's fighting men and women for at least two generations. Through 10 presidents and 3 wars he has been a moving target wherever the US needed a clay pigeon. On battlefields from North Africa, Europe and the South Pacific to Korea, Vietnam, and the Persian Gulf, Bob has been shot at and bombed on, sometimes by the enemy. Don't Shoot, It's Only Me is Bob's story of being there with the jokes at every vital point during the last half-century of America's history.
2007.323.001	Division Officer's Guide - 1952	Noel, John V.	Just as Watch Officer's Guide tells the young officer what to do and how to do it while he is on watch on the bridge or on the quarterdeck, Division Officer's Guide tells him how to handle his duties the rest of the time when he is not on watch.
2007.323.002	Instructions for Use in Preparation for the Ratings of Gunner's Mate 1c and Chief, and Turret Captain 1c and Chief	Bureau of Navigation	Navy Training Courses Instructions for use in Preparation for the Ratings of Gunner's Mate 1c and Chief and Turret Captain 1c and Chief , a course in twenty assignments

Object ID	Title	Author	Summary
			with Instructions, Qualifications, assignments, and references. Assignments include Mines, Broadside and Exposed Gun Mounts, Sights and Sighting, Preparation for Firing, gun construction, smokeless powder, care and inspection of ammunition, gun salutes, reports, range finders, small-arms range gun drill, fire control, errors of gun fire, turrets and large mounts, hydraulic pumps, and upkeep of machinery to name a few.
2007.323.003	Instructions for Use in Preparation for the Ratings of Gunner's Mate 2c	Bureau of Navigation	Navy Training Courses Instructions for Use in Preparation for the Rating of Gunner's Mate 2c in seventeen assignments. Includes Instructions and Assignments from Recoil Brakes, and Counterrecoil Mechanism, Trunnion Bearings, Rollers and Paths, Safety, Firing attachments and methods, ammunition, Metals used in Ordnance construction, naval rifled guns, Lewis Machine Gun, Colt, Automatic Rifle, Thompson, to name a few.
2007.323.004	Instructions for Use in Preparation for the Ratings of Gunner's Mate 3c	Bureau of Navigation	Gunner's Mate 3c a course in thirteen assignments prepared under the supervision of the Bureau of Navigation, 1939, with Instructions, Qualifications and Assignments from Tools, Measuring Instruments, Gears, etc to lubrication, Preservation, and Painting, Gun Mounts, Breech Mechanism, Firing Mechanisms, Gas-Expelling Apparatus, Ammunition Hoists, Care of a Battery, ammunition, safety, Magazines, Sights, Dotters, Magazine Rifle Caliber.30, Model 1903, and Automatic Piston, Caliber .45, Model 1922 with illustrations,

			Physical Drill Without Arms, Boats Under Oars, To pull and Oar, Knots and Splices-Sounding, The Compass, Relative Bearings, Visual Signaling, Swimming and Life-Saving, Organization, Advancement and Awards, Enlistment, Discharges, and Pay accounts, Uniform Regulations and General Characteristics of Ships, General Features of Ships of the Navy, Routing, Drills, First Aid, Athletics, to name a few.
2007.323.006	Gunner's Mate 1c and Chief	Bureau of Naval Personnel	This book is written for the purpose of aiding in promotion of men to the rating of Gunner's Mate 1c or Chief. It is realized that nothing can take the place of actual practice in Gunner's Mate duties.
2007.323.008	Aircraft Armament	Bureau of Naval Personnel	This book is written for the enlisted men of Naval Aviation. It is one of a series of books designed to give them the background information necessary to perform their aviation duties.
2007.323.009	Ship Handling -- Destroyers	Schmidt, John W.	INTRODUCTION: Handling a destroyer well is a skill which cannot be learned from studying a book such as this. It is one which you must develop for yourself through long years of practice, observation, and study. You must build it up a little at a time by trial and error, never missing an opportunity to work your ship in close quarters, profiting by your mistakes, and cherishing forever in your memory those infrequent maneuvers which you feel were perfectly performed. However, in the following chapters are expounded certain phases of the skill that may be of help to the new destroyer captain such as yourself, methods which have stood the test of time. There are little tricks of the trade I have used, some stumbled on by accident, others learned from destroyer captains under whom I have served - and some there are that I have learned from my own

Object ID	Title	Author	Summary
			mistakes and mishaps. These are set forth with the clear realization that there is nothing I can write which will substitute for sound judgment and experience in command at sea or for your own critical observation of the work of others. You are therefore warned that this book will not and cannot make you a perfect ship-handler, nor will it provide for every possible contingency that may arise. Neither can I assure you that the methods I recommend are the best. They have worked for me, and so, without further apology, I give them to you.
2007.323.010	Bluejackets' Manual, 1960	Noel, John V.	From the days of oars and coal-fired engines to the computerized era of the twenty-first century, The Bluejacket's Manual has been an essential part of the American Sailor's sea bag for more than one hundred years, serving as an introduction to the Navy for new recruits and as a reference book for Sailors of all ranks. Primarily intended to serve Bluejackets, this book will also be welcomed by potential recruits, Navy buffs, and a growing number of Bluejacket's Manual collectors. (from www.usni.org)
2007.324.001	Bill Sholin's "The Sacrificial Lambs" (Who Fought Like Lions) : The Kamikaze Massacre of-- 157 --US destroyers, Okinawa, Where 4,907 Sailors Gave Their Lives and 4,832 Were Wounded -- in the Greatest Air-sea Battle of All Time	Sholin, Bill	This is a true story. The USS Wren, DD568, was a survivor. This book tells about destroyer life as it was -- told by the people who lived it. Their individual duties, the guns, munitions, handling rooms, torpedoes, depth charges, fire and engine rooms, the bridge, how they worked, and who performed each job.
2007.324.002	Atlantic Campaign : WWII's Great Struggle at Sea	Van der Vat, Dan	The battle between Germany and the Allies for control of the Atlantic sea lanes was a prolonged and desperate struggle that came closer than any other to ending WWII in Germany's favor. Churchill called it "a war of groping and drowning, of ambush and stratagem, of science and

Object ID	Title	Author	Summary
			seamanship." It was a costly battle fought by courageous men under conditions of terrible fear and hardship in a campaign that depended heavily on tactical innovation, secret intelligence and rapidly developing technologies.
2007.324.003	Naval War in the Mediterranean, The - 1940-1943	Greene, Jack	This superbly-researched book gives a complete account of the war in the Mediterranean on, above and beneath the sea up until Fascist Italy's Armistice in Sept. 1943. Written with full access to Italian sources, it not only provides a detailed and fascinating narrative of the entire naval war, but also sets the individual actions fully in their strategic context for both the Axis and the Allies.
2007.324.005	My War	Rooney, Andy	Andy Rooney: "Anyone who lives through a war without being killed or seriously wounded has had an experience that can be matched by no other. It is likely I saw things most people will never see unless they were there. I've tried to empty my brain of those memories by writing them down."
2007.324.006	John Glenn, A Memoir	Glenn, John	He was the first American astronaut to orbit the Earth. Nearly four decades later, as the world's oldest astronaut, his courage riveted a nation. But these two historic events only bracket a life that covers the sweep of an extraordinary century. In this engrossing book, John Glenn tells the story of his unique life -- one lived at the center of a momentous time in history by a man who helped shape that history.
2007.324.007	Fletcher-Class Destroyers	Raven, Alan	Of all the American destroyer classes to serve in WWII, there is no doubt that the ships of the Fletcher class are the most famous. Described by one well-known commander as "perfect fighting destroyers," 175 Fletchers were built in a 2 1/2 year period, a stunning example of WWII warship standardization and mass production. This volume features: A complete description of the design,

Object ID	Title	Author	Summary
			construction, and wartime modifications of the class. 91 photographs, many never before published. 140 line drawings, many with comprehensive keys, that show every detail of the ship class -- fittings, antennas, weapons, propellers, fire-control equipment, camouflage schemes, and more.
2007.324.008	American Naval Broadships - A Collection of Early Naval Prints (1745-1815)	Smith, Edgar Newbold	Newbold Smith has over many years acquired the most extensive private collection of early American naval prints, depicting significant and colorful battles at sea, individual heroes and ships, and related naval actions. This book treats each of the 184 prints, and reproduces 115 of them, 92 in full color. The author provides historical background to the wars and to each engagement, in addition to detailed information about the prints.
2007.324.009	Ships of the High Seas	Abranson, Erik	19 famous ships, from a Viking longship to a modern supertanker, show the changing world of man and the sea at peace and at war. Seen in sequence, the ships illustrate the gradual evolution from small vessels, dependent on manpower, winds and weather, to the self-contained floating cities of today, navigated by computer and driven by nuclear power. In between come ships from the great days of sail, pioneers of steam, historic battleships and luxury liners.
2007.324.010	Harbor Worth Defending, A	Joyce, Barry Alan	"Barry Joyce has done a great service in recording and interpreting the history of the most dramatic part of the most important and most beautiful naval port in the world. By writing such an entertaining and readable book he ensures a wide audience for years to come." John Lehman, Former Secretary of the Navy. The harbor is San Diego. A military history of Point Loma.
2007.324.011	Aleutians Campaign, The - June 1942-August 1943	Office of Naval Intelligence	Until the end of the Pacific War no one can make a conclusive statement of the objectives of the Japanese attack on the

Object ID	Title	Author	Summary
			Aleutian Islands in June 1942. The enemy may have been planning the subsequent conquest of all the island in order to obtain access to Canada and our northwestern states. He may even have aimed at an immediate invasion of Alaska, only to be deterred by our victory at Midway. It is well known that the Japanese had long coveted Alaska and the Aleutians, and that many of their military leaders considered these poorly defended outposts the logical route for an invasion of North America.
2007.324.013	Naval Battles and Heroes	Cross, Wilbur	The naval events leading to the capture of Burgoyne and Cornwallis, and many other fascinating operations of American seamen, are recounted in this book. The editors of American Heritage have been unable to record all the battles and all of the courageous deeds of the heroes of the Navy, but they have selected battles -- from the Revolution, the War of 1812, the Mexican and Civil Wars, and from WWI and II -- which illustrate many climactic moments in US naval history.
2007.324.014	Destroyers for Great Britain; A History of 50 Town Class Ships Transferred from the United States to Great Britain in 1940	Hague, Arnold	The Town class ships occupy a unique place in British Naval history. With France out of the war and the US remaining neutral, Britain was offered 50 American destroyers by Roosevelt. They were not new, but they were tough and versatile. The famous flush deck destroyers had made their first appearance in 1917, and now they were to see action throughout another war. To avoid prejudicing US neutrality, Britain agreed to lease bases in exchange for the destroyers, and 43 arrived in batches in the UK during the autumn of 1940 via Canada. The remaining 7 stayed in Canadian waters, as part of the Royal Canadian Navy.
2007.324.015	Warship Losses of World War Two	Brown, David	The purpose of this book is to list and account for the loss, whether by enemy action or accident, of all ocean-going

Object ID	Title	Author	Summary
			purpose-built warships of all navies, combatant and neutral, between August 1939 and September 1945. The only conscious excursions from this principle are the inclusion of merchant ships employed as auxiliary cruisers (ie, the British Armed Merchant Cruisers and the German disguised raiders) and the exclusion of armed trawlers, even though many of these were purpose-built small fighting ships.
2007.324.016	US Warships of World War II	Silverstone, Paul H.	This is a most comprehensive handbook on the US naval forces in WWII. It is not a history -- although naturally, it contains much of interest to the historian -- it is, rather a complete and detailed survey of all the major ships and most support vessels of both the US Navy and Coast Guard. The American fleet during WWII was large and varied ranging from heavy battleships and aircraft carriers to auxiliary craft such as submarine tenders and attack cargo ships. All types and classes have been included in this profusely illustrated reference book.
2007.324.019	Watch Officer's Guide - 1941	Willson, Russell	1941 edition of old standard. Revised from earlier versions to put more emphasis on relative importance of watch officer duties like shiphandling and technique and safety of personnel and materiel with less emphasis on watchstanding routine.
2007.324.020	Nimitz	Potter, E. B. (Elmer Belmont)	Biography of Chester A. Nimitz, Commander in Chief, U.S. Pacific Fleet throughout World War II.
2007.324.021	Keepers of the Sea	Maroon, Fred J.	Documents every aspect of life in America's navy in the 1980's. Offers a spectacular view of navy's unprecedented response to nuclear, aeronautical and electronic technologies. Describes Navy's surface, subsurface and air forces as well as seagoing logistics, training and the projection of sea power to the land.
2007.324.024	Ships and Aircraft of the U. S. Fleet - 1950	Fahey, James C.	Describes the peacetime Navy of early 1950, cut to a

Object ID	Title	Author	Summary
			fraction of its V-J strength. The booklet lists all vessels on the Navy Register as of January 1, 1950; plus changes announced into June.
2007.324.025	Ships and Aircraft of the U. S. Fleet - 1958	Fahey, James C.	Describes the Cold War Navy of 1958, its vessels, active and reserve, building and authorized; its aircraft and guided missiles.
2007.324.026	Ships and Aircraft of the U. S. Fleet - 1965	Fahey, James C.	Describes the Cold War Navy of summer of 1965, its ships, active and reserve, building and authorized; its aircraft and aviation elements.
2007.324.027	Ships and Aircraft of the U. S. Fleet - 1939	Fahey, James C.	Much of the ship data given is unofficial and all aircraft specifications are from civilian sources. A full list of all vessels belonging to the combatant classes which are still represented on the Register is given, mentioning those now building or authorized, and the vessels that have been lost or scrapped in recent years.
2007.324.034	Camera at Sea: 1939 - 1945	Preston, Antony (ed)	This book concentrates on the most graphic and telling photography from all the major participating nations. In passing it touches on almost every aspect of the war, and gives a better impression of what naval combat was really like than any number of written accounts.
2007.324.035	United States Navy Memorial : A Living Tradition	Alexander, John W.	A Living Tradition symbolizes the essence of America's nautical tradition, capturing the kaleidoscopic emotions of all those who venture down to the seas in ships...and those of the loved ones they leave behind. Includes --- A quick and colorful history lesson --- Words by President Ronald Reagan and others --- Chronicle of our Navy's technological contributions --- Comments by Winds of War author Herman Wouk --- History and planning of the Navy Memorial --- Breathtaking color photography reflecting all facets of our Navy
2007.324.038	Faith of My Fathers	McCain, John	John McCain is one of the most admired leaders in the US government, but his deeply felt memoir of family and war is not a political one and ends

Object ID	Title	Author	Summary
			before his election to Congress. With candor and ennobling power, McCain tells a story that, in the words of Newsweek, "makes the other presidential candidates look like pygmies." John McCain learned about life and honor from his grandfather and father, both 4 star admirals in the US Navy. This is a memoir about their lives, their heroism, and the ways that sons are shaped and enriched by their fathers.
2007.324.040	Sea Battles in Close-up : World War 2, Vol. 2	Grove, Eric	Ten major naval engagements of the Second World War are thoroughly described and analyzed in this authoritative book by two respected British naval historians. This is a substantially revised compendium edition of a series with the same title published in the early 1970s and long out-of-print. (from usni.org)
2007.324.043	Book of United States Navy Ships, The	Van Orden, M. D.	Text and photographs introduce the characteristics and purposes of the various types of ships in the present-day Navy
2007.324.044	International Code of Signals, for Visual, Sound, and Radio Communications	US Naval Oceanographic Office	As adopted by the Fourth Assembly of the Inter-Governmental maritime consultative organization in 1965. For Visual, Sound, and Radio Communications. The revised code is intended to cater primarily for situations related essentially to safety of navigation and persons, especially when language difficulties arise.
2007.324.046	U.S. Navy : An Illustrated History, The	Miller, Nathan	The U. S. Navy an Illustrated History by Nathan Miller with foreword by Bruce Catton; Author's Preface; Ten Chapters from A Navy is Born to the Challenging Years with Notes, Acknowledgments, and Index with printed maps, color and black and white historical pictures. Loose newspaper articles, a Proceedings 04 article and color pictures were found in the book.
2007.324.048	Bull Halsey	Potter, E. B. (Elmer Belmont)	Applauded by the public and revered by the men who served under him, Adm. William F.

Object ID	Title	Author	Summary
			Halsey was one of the leading American personalities of World War II. His reputation as a no-holds-barred fighter and his tough-guy expression earned him the nickname "Bull," yet he was also known for showing genuine compassion toward his men and inspiring them to great feats in the Pacific. Originally disclaiming the praise heaped on him, Halsey eventually came to believe in the swashbuckling legend that surrounded him, and his conduct became increasingly controversial. Naval historian E. B. Potter, who established his reputation with an award-winning biography of Chester W. Nimitz, gets behind the stereotype of this national hero and describes Halsey at his best and worst, including his controversial actions at Leyte Gulf. To write this book Potter had full access to Halsey's family and to the admiral's private papers and provides detail of Halsey's youth and career before the war. First published in 1985, it remains the definitive study. The late E.B. Potter, a longtime history professor at the U.S. Naval Academy and former naval officer who served in the Pacific during World War II, is the author of several books, including Nimitz, Admiral Arleigh Burke, and Sea Power: A Naval History, which he wrote with Admiral Nimitz. (from usni.org)
2007.324.053	US Warships Since 1945	Silverstone, Paul H.	From the massive U.S. fleet of World War II to the build-up of the 600-ship Navy, this reference gives the reader a complete chronological listing of U.S. warships built or proposed during the postwar era with accurate, easily accessible information at their fingertips. (from barnesandnoble.com)
2007.324.055	U.S. Navy War Photographs : Pearl Harbor to Tokyo Bay	Steichen, Edward (ed)	Right after the attack on Pearl Harbor until the Japanese

Object ID	Title	Author	Summary
			surrender in Tokyo Bay, Capt. Edward Steichen, USNR, and his expert staff photographed every aspect of Navy action in the Pacific. They cover the actions of Navy, Marine, and Coast Guard officers and men on ships, in planes, in bombings of Japanese ships, in receiving kamikaze attackers, in land action on Iwo Jima, Leyte, Guadalcanal and elsewhere, along with photos of officers and crew at work aboard ship.
2007.324.056	US Naval Vessels - 1943	Office of Naval Intelligence	More than 900 illustrations - including 679 photographs and 227 line drawings - depict the might of the US Navy at the height of the Second World War. Originally published as ONI-54 U.S. Naval Vessels by the U.S. Division of Naval Intelligence. See also United States Naval Vessels, 1945, which includes this work.
2007.325.001	Seapower	Gresham, John D.	We have a earlier copy copyright 2004 but it is the same book. Seapower is a tribute to the men and women of the U.S. Navy as seen through the lenses of the people who know them best, the Navy's own photographers. Huge page size allows for a design that maximizes the impact of the photographs and shows off the massive vessels in brilliant detail. There are 70 pages of aircraft carriers.
2007.325.002	USS Shangri-La (CV-38) - Sir Shang Goes West - Far East Cruise 1958	McCain, J.R. (ed)	Pictorial account of the deployment of the USS Shangri-La (CV-38) & Carrier Air Group II; Far East Cruise; March 8, 1958 - November 21, 1958. Air Wings aboard: VA-156 ,VA-113, VF-114 ,VA-115, VAH-4 Det. C, VFP-61 Det. C VA(AW)-35 Det. C ,VAW-11 Det. C. Ports of Call: Hawaii, Philippines, Hong Kong.
2007.325.003	USS Shangri-La (CVA-38) - Far East Cruise - 1959	Pedigo, M.L. (ed)	Pictorial account of USS Shangri-La (CVA-38) Essex-class aircraft carrier's Far East (West Pac) cruise from March to October 1959 with Carrier Air Group 11 consisting of VF-111 (F11F Tigers), VF-114 (F3H Demons), VA-113 (A-4 Skyhawks), VA-115 (AD/A-1

Object ID	Title	Author	Summary
			Skyraiders), VAAW-35 (VAW-11) Det C (N) & C (W) (AD/A-1 Skyraiders), VAH-4 Det C (A3D/A-3 Skywarriors), and VCP-63 Det C (F9F- _P Cougars) deployed aboard. Ports of call: San Diego, CA; Pearl Harbor, HI; Yokosuka, Sasebo, & Okinawa, Japan; Manila, The Philippines; Hong Kong.
2007.326.001	Vietnam Graffiti : Messages from a Forgotten Troopship	Beltrone, Art	During the Vietnam era the men for whom the General Nelson M. Walker was a temporary home left records of their life together on the troopship through lively handwritten inscriptions, slogans, and drawings on the surfaces of the canvas bunk inserts of the bunks under which they slept. Here are memories of home and loved ones, brash statements of bravado and determination in the face of conflict, expressions of fear and anxiety on the approach to the theaters of war, patriotic sentiments, humorous cartoons, and a variety of sexual references.
2007.327.001	War, The : An Intimate History - 1941-1945	Ward, Geoffrey C.	The companion volume to the 7 part PBS series Focusing on the citizens of four towns -- Luverne, Minnesota; Sacramento, CA; Waterbury, CT; Mobile, Alabama -- The War follows more than 40 people from 1941 to 1945. Woven largely from their memories, the compelling, unflinching narrative unfolds month by bloody month, with the outcome always in doubt. All the iconic events are here, from Pearl Harbor to the liberation of the concentration camps -- but we also move among prisoners of war and Japanese American internees, defense workers and school children, and families who struggled simply to stay together while their men were shipped off to Europe, the Pacific, and North Africa.
2007.328.003	Good War, The - An Oral History of WWII	Terkel, Studs	This is an account of the lives of ordinary Americans, at home and abroad, during WWII. Terkel presents men and women recalling the time when t

Object ID	Title	Author	Summary
			were all of 18 and 19, thrown into the Far Pacific or confronting the Germans in the last, vicious battles of the European campaign.
2007.328.004	At War, At Sea : Sailors and Naval Combat in the Twentieth Century	Spector, Ronald H.	An account of the most important naval conflicts of the 20th century. Beginning with a gripping narrative of one of the most decisive battles in history - the 1905 Battle of Tsushima between the Japanese and the Russians -- and ending with the sophisticated missile engagements off the Falklands and in the Persian Gulf, naval historian Spector explores every facet of naval warfare. Here are the real stories of combat at sea told from the point of view of the sailors who experienced it. How did it feel to be the target of a 15-inch shell at the Battle of Jutland or to experience a depth-charge attack in a submarine in the Battle of the Atlantic? What was it like to be under attack by Stuka dive bombers off Crete or kamikazes off Okinawa during WWII? What is the difference between being a sailor on a German U-boat or on today's nuclear submarines?
2007.330.001	Navies of World War 3	Preston, Antony	Discusses the future of Navies in the future. Chapters include 1) Naval Power and Technology, 2) Strategic Weapons, 3) Underwater Warfare, 4) Surface Combat, 5) Air Defense, 6) Anti -Submarine Operations, 7) Mines and Minesweepers, 8) Amphibious Warfare, and 9) Prospects for the Future.
2007.330.002	Aircraft Carriers, Submarines and Cruisers	Busquets, Camil	This book discusses the features, peculiarities and problems of aircraft carriers, submarines, and cruisers.
2007.331.001	Super LCCS : Gale's Library of Congress classification schedules combined with additions and changes through 2002 - Q	Droste, Kathleen (ed.)	The LC classification tables for the letter Q

Object ID	Title	Author	Summary
2007.332.001	Color Schemes and Markings - US Navy Aircraft - 1911-1950	Kilgrain, Bill C.	Traces the many changes in color schemes and markings employed by US Naval Aviation from its small, uncertain beginning in 1911 to its entry into the Korean War in 1950, as the world's mightiest Naval Air Power. Contains both standard and special purpose color schemes, national and unit markings, carrier identification markings, and designation systems. Included are Carrier Aircraft Assignment tables for the period 1926 to 1945.
2007.332.002	U.S. Military Aircraft Designations and Serials since 1909	Andrade, John M.	Designation Systems - US Army and Air Force - US Navy and Marine Corps Serial Numbers - US Army and Air Force - US Navy and Marine Corps - US Coast Guard Undesignated Aircraft 1909 to 1919 US Army, Air Force, and Tri-Service Systems 1919 to date US Navy, Marine Corps and Coast Guard 1919 to 1962 Miscellaneous Undesignated Aircraft
2007.332.003	Building the Navy's Bases in World War II : History of the Bureau of Yards and Docks and the Civil Engineers Corps 1940-1946. Vol. I.	United States. Bureau of Yards and Docks	Since the Bureau's war program antedated the declaration of war, it has been deemed advisable to include a record of the pre-war status of the shore establishment and to narrate the events of the preparatory and national defense emergency periods preceding Pearl Harbor, as well as the activities during the war itself. Similarly, brief summaries of the demobilization period following the signing of surrender terms by Japan have been included to complete the record. The Corps of Engineers, the Construction Battalions -- popularly known as the "Seabees" --, and the many civilian employees, engineering firms and contractors associated with the Bureau's program in furtherance of this country's war effort, endeavor has been made to correlate these activities with the broad sequence of events and with the policies and decisions which were the basis for each successive course of action.

2007.332.004	Building the Navy's Bases in WWII : History of the Bureau of Yards and Docks and the Civil Engineer Corps 1940-1946, Vol. II	United States: Bureau of Yards and Docks	Since the Bureau's war program antedated the declaration of war, it has been deemed advisable to include a record of the pre-war status of the shore establishment and to narrate the events of the preparatory and national defense emergency periods preceding Pearl Harbor, as well as the activities during the war itself. Similarly, brief summaries of the demobilization period following the signing of surrender terms by Japan have been included to complete the record. The Corps of Engineers, the Construction Battalions -- popularly known as the "Seabees" --, and the many civilian employees, engineering firms and contractors associated with the Bureau's program in furtherance of this country's war effort, endeavor has been made to correlate these activities with the broad sequence of events and with the policies and decisions which were the basis for each successive course of action.
2007.333.001	Gallant Lady : A Biography of the USS Archerfish : True Story of one of History's Most Fabled Submarines	Henry, Ken	The Archerfish -- named for a fish that kills its victims with a lethal blast of water from below -- won a unique, heroic place in military history and the memories of her crew members. From her assembly in New England, her dedication in May 1943, her service in WWII, where she broke the back of the Japanese Navy and sank the largest ship ever destroyed by a submarine, to the details of her critical role in the cold war, where she criss-crossed the oceans for 6 years to foil Soviet naval intelligence.
2007.333.002	Ship of Ghosts : The Story of the USS Houston, FDR's Legendary Lost Cruiser, and The Epic Saga of Her Survivors	Hornfischer, James D.	Contents: On Asia Station -- A bloodstained sea -- The emperor's guests -- In the jungle of the Kwai -- Rendezvous with freedom -- Men of the USS Houston (CA-30) and the lost battalion killed in action or died in captivity, 1942-1945. The author brings to life the awesome terror of nighttime naval battles that turned decks into strobe-lit

Object ID	Title	Author	Summary
			slaughterhouses, the deadly rain of fire from Japanese bombers, and the almost superhuman effort of the crew as they miraculously escaped disaster again and again -- until their luck ran out during a daring action in Sunda Strait. There, hopelessly outnumbered, the Houston was finally sunk and its survivors taken prisoner. For more than 3 years their fate would be a mystery to families waiting at home.
2007.333.003	This is Knotting and Splicing	Hin, Floris	The team which devised, wrote and photographed this book in Holland, has unlaid ropes, colored each strand and thus shown, where applicable, the relative complexities of knotting and splicing. Where different lines, but no strands, are involved then equal care has been taken to use or create cordage of different color. The book spans simple knots to time consuming plaited work and looks at the traditional hitches as well as the latest invention in the world of knots -- designed to counteract the slipperiness of some synthetics - the Hunter's Bend.
2007.334.001	Copes-Vulcan Desuperheater Station for Aircraft Carrier Heating Service	Blaw-Knox Company	NAVSHIPS technical manual for aircraft carrier desuperheater station.
2007.335.002	Air Navigation	Air Training Command	Provides information on all phases of air navigation for aviators and student aviators. Develops the art of navigation from the simplest concepts to the most advanced procedures and techniques.
2007.335.003	NATOPS Instrument Flight Manual - 1972	Chief of Naval Operations	This manual standardizes instrument flight procedures. Procedures contained are general in nature and are amplified in NATOPS manuals for specific aircraft platforms.
2007.335.004	NATOPS Flight Manual Navy Model C-2A Aircraft	Chief of Naval Operations	Provides standardized ground and flight procedures for the Navy Model C-2A Aircraft. Does not include tactical doctrine.
2007.335.005	NATOPS Flight Manual Navy Model TS-2A, US-2A/B/C Aircraft	Chief of Naval Operations	Provides standardized ground and flight procedures for the Navy Model TS-2A, US-2A/B/C Aircraft. Does not include tactical doctrine.

Object ID	Title	Author	Summary
2007.335.006	NATOPS Flight Manual Navy Model C-1A Aircraft	Chief of Naval Operations	Provides standardized ground and flight procedures for the Navy Model C-1A Aircraft. Does not include tactical doctrine.
2007.335.007	NATOPS Flight Manual Navy Model T-2B/T-2C Aircraft	Chief of Naval Operations	Provides standardized ground and flight procedures for the Navy Model T-2B/T-2C Aircraft. Does not include tactical doctrine.
2007.335.009	NATOPS Flight Manual Navy Model CT-39E/G Aircraft	Chief of Naval Operations	Provides standardized ground and flight procedures for the Navy Model CT-39E/G Aircraft. Does not include tactical doctrine.
2007.335.010	NATOPS Flight Manual Navy Model TA-4F/TA-4J Aircraft	Chief of Naval Operations	Provides standardized ground and flight procedures for the Navy Model TA-4F/TA-4J Aircraft. Does not include tactical doctrine.
2007.335.011	NATOPS Flight Manual Navy Model S-3A Aircraft	Chief of Naval Operations	Provides standardized ground and flight procedures for the Navy Model S-3A Aircraft. Does not include tactical doctrine. This manual was superseded in 1987.
2007.335.012	NATOPS Flight Manual Navy Model UC-12B Aircraft	Chief of Naval Operations	Provides standardized ground and flight procedures for the Navy Model UC-12B Aircraft. Does not include tactical doctrine.
2007.335.013	NATOPS Weapons System Manual, Navy Model S-3A Aircraft	Chief of Naval Operations	Provides standardized ground and flight procedures for the Navy Model S-3A Aircraft. Does not include tactical doctrine.
2007.335.014	NATOPS Flight Crew Pocket Checklist, Navy Model S-3A Aircraft	Chief of Naval Operations	Provides pocket-size standardized ground and flight procedures for the Navy Model S3 aircraft. Does not include tactical doctrine.
2007.335.015	NATOPS Flight Crew Pocket Checklist, Navy Model CT-39E/G Aircraft	Chief of Naval Operations	Provides pocket-size standardized ground and flight procedures for the Navy Model CT-39E/G aircraft. Does not include tactical doctrine. Designed and manufactured by North American and then Rockwell.
2007.336.001	Lindbergh, A Biography	Mosley, Leonard	For almost 50 years, Charles A. Lindbergh had a stormy love-hate relationship with the American people. He was 25 in 1927 when he took off in the Spirit of St. Louis for his lone flight across the Atlantic to Paris, and from that time

Object ID	Title	Author	Summary
			until his death in Hawaii in 1974 he lived out his life in blazing newspaper headlines. He had more heady triumphs and agonizing tragedies than a hundred men might experience in a lifetime, and endured them in a glare of publicity he loathed but could not escape because of the controversy he so often aroused.
2007.336.002	Aviation Cadet	Lent, Henry B.	Aviation Cadet by Henry B. Lent with frontispiece of "The goal of every aviation cadet is to win his Wings and join the flight squadrons of the might U. S. Navy". 19 Chapters beginning with wings over the Campus to Gold Wings! A notice on the bulletin board read that next Thursday afternoon "Lieutenant Commander Edward Lake, commanding officer of the U. S. Naval Reserve Aviation Base at Floyd Bennett Field, will arrive by plane to meet any members of the student body who are interested in an opportunity to receive flight training as Naval Aviation Cadets." A special showing of the official motion picture, Eyes of the Navy will be shown in the main assembly hall for all who wish to attend.
2007.336.003	Greatest Fighter Missions of the Top Navy and Marine Aces of World War II	Sims, Edward H.	The actual shooting of the naval war in the Pacific was waged almost exclusively in the air. In the great naval battles from Midway to Okinawa it was plane against ship, and, ultimately, plane against plane. The aircraft carrier replaced the battleship as the queen of the fleet, and even in the painful American counteroffensive, island-hopping from Guadalcanal to Okinawa, it was the airplane--observing, bombing and raiding enemy bases--that paved the way for the Marine and Army land forces. Sequel and companion to American aces (1958)
2008.001.001	USS Midway (CV-41) - Mediterranean Cruise - 1947-1948	Mahler, W. A. (ed)	A pictorial account of the USS Midway (CVB-41) Mediterranean Cruise, 1947-

Object ID	Title	Author	Summary
			48. The ship departed Norfolk, VA on 29 OCT 1947 and returned to Norfolk on 11 MAR 1948. Port visits included Gibraltar, Malta, Tangier, Cannes, Bone, Genoa, Naples, Syracuse, and Taranto. Total miles travelled - approx 19,000.
2008.016.005	Moving Guide for Naval Personnel	U. S. Naval Gun Factory, Washington, D.C.	Guide for naval personnel relative to the shipment of household goods attendant to change of station orders.
2008.037.004	US Navy War Photographs : Pearl Harbor to Tokyo Harbor. A collection of official U. S. Navy, Marine Corps, and Coast Guard photographs.	Steichen, Edward (ed)	A collection of official U. S. Navy, Marine Corps, and Coast Guard photographs presented to the men who served at the end of WW II by Secretary of the Navy James Forrestal.
2008.037.006	Air Navigation Manual, Volume II	Dept. of Air Force	Volume 2 of 3 that provide information on all phases of air navigation for navigators and student navigators in training. The purpose of volumes 1 and 2 is to develop the art of navigation from its simplest concepts to the most advanced procedures and techniques. The first ten chapters of this volume discuss celestial navigation. Special methods and techniques used to navigate in polar regions are explained next, followed by a chapter on advanced instruments and how to use them. The text continues with a discussion of operational problems and their solutions, and concludes with a chapter on automatic navigation systems.
2008.037.007	Air Navigation Manual, Volume III	Dept. of Air Force	Volume 3 of 3 that provide information on all phases of air navigation for navigators and student navigators in training. The purpose of volumes 1 and 2 is to develop the art of navigation from its simplest concepts to the most advanced procedures and techniques. This volume is meant as an inflight manual for navigation personnel. It contains preflight, operational and inflight maintenance procedures for airborne navigational equipment in step-by-step outline form. Reference tables, graphs and brief reviews of specialized techniques are also provided.

2008.074.001	USS Franklin D. Roosevelt CVA-42 - Calendar Cruise Book	Sterling, Jr., S (ed)	Calendar booklet for 1953 deployment of the USS Franklin D. Roosevelt (CVA-42). Deployment was 11 June 1953 to 3 December 1953. Includes photos, cartoons, pictures of the ship; pictures of crew at work, picture of Dwight Eisenhower's visit, USO, ports of call, 10,000th cat shot, 200th landing, Marine Corps birthday, etc. Ports of call: Naples; Pompeii; Gibraltar, Lisbon, Portugal; Golfe Juen, France; Villefranche; Monaco; Berne, Switzerland; Pisa, Taranto, Italy; Rome, Athens; Beirut, Damascus, Syria. VF-12 (F2H-2) VA-15 (AD-4) VC-62 Det. (F2H-2P) VC-33 Det. VC-12 Det. HU-2 Det. (HUP-2) There is also a separate booklet of titled "Something About the "FDR"". On the inside the title is "Something About the Aircraft Carrier Franklin D.Roosevelt CVB-42. It is on plain cream paper and has 24p. The size is 19 x 11 cm. No publishing company or place. Has a picture of King Paul and Queen Frederika of Greece. List flag as Rear Admiral Alfred Melville Pride; Chief of Staff Carrier Div. Two, Robert E. C. Jones, facts about the Roosevelt; CO listed as Captain Fitzhugh Lee, XO CDR David McCampbell. This booklet would have been published sometime between 28 July 1951 and 26 July 1952 when Lee was CO. Commander George H. Carter was listed as Commander Air Group.
2008.117.002	Instructions for Use in the preparation for the Rating of Ship's Cook 2c and 1c	Bureau of Navigation	Course of instruction for use of naval enlisted personnel seeking advancement to Ship's Cook 2nd Class and Ship's Cook 1st Class.
2008.301.001	Use of Tools : Basic Navy Training Courses	Bureau of Naval Personnel	One of several Navy Basic Training Courses, this was prepared as a basic reference

Object ID	Title	Author	Summary
			for enlisted men of the Navy whose duties require them to use tools to keep navy equipment shipshape.
2008.301.002	Pipe Fitter 1 & Chief	Bureau of Naval Personnel	Written for men of the Navy or Naval Reserve who are preparing for advancement to the rates of Pipefitter 1 or Chief Pipefitter. This book approaches pipe fitting problems from the standpoint of a leading petty officer concerned with the supervision and training of personnel and the administration and planning of work performed in shipboard and shore-based pipe shops.
2008.301.003	Damage Controlman 3 & 2	Bureau of Naval Personnel	An instructional manual written for men of the Navy or Naval Reserve who are preparing for advancement to the rates of Damage Controlman Petty officer 3rd Class or Damage Controlman Petty Officer 2nd Class.
2008.301.004	Metalsmith 1 & Chief	Bureau of Naval Personnel	An instructional manual written for men of the Navy or Naval Reserve who are preparing for advancement to the rates of Metalsmith Petty Officer 1 or Metalsmith Chief Petty Officer.
2008.301.005	Blueprint Reading	Bureau of Naval Personnel	An instructional manual and basic reference book written for enlisted men of the Navy or Naval Reserve whose duties require a knowledge of blueprint reading and layout work.
2008.301.006	General Training Course for Petty Officers	Bureau of Naval Personnel	Navy Training Courses series. An instructional manual and basic reference book on military requirements for U.S. Navy petty officers. Stresses the leadership role of petty officers in the Navy.
2008.301.007	RA-5C Vigilante Units in Combat	Powell, Robert R. "Boom"	Developed from the A-5 nuclear bomber and used in a reconnaissance role, the RA-5C Vigilante was the largest and fastest aeroplane ever to operate from the deck of an aircraft carrier. During the Vietnam War it sustained the highest loss ratio of any American aircraft in that conflict. This volume includes compelling accounts of combat missions over key communist targets, where crews dodged Surface-to-Air

Object ID	Title	Author	Summary
			Missiles (SAMs) and anti-aircraft fire to secure all-important mission photographs. Written by a Vigilante combat veteran this book is crammed full of action-packed first-
2008.301.008	In the Cockpit : Flat Tops	Arts Magic Ltd.	This is part of a six part series: 1) Fly Low! Hit Hard!, we have a VHS of this 2013.301.013, 2) Target Tank, 3) Flat Tops, 4) Eagles in the sky, 5) Red Star, and 6) Spies in the sky. Experience the awesome world of a US Navy carrier battlegroup as an F-14 Tomcat catapults over the bow, accelerating from 0 to 170mph in just 3 seconds. Sail aboard modern Flat Tops, seeing their full operations from flight planning to heart-stopping flight launch. Watch Harrier jets target, attack and dogfight with their adversaries. Experience the bone-jarring finale of hitting the deck, praying that the arrester wires will catch. Live through combat as you and crews of the US carriers roam the Vietnam coast and fly strikes against North Vietnamese targets. Launch bomb and missile attacks from the lethal A-6 Intruder. Hunt submarines with land-based Orion and Nimrod maritime patrol aircraft, control the interception of enemy aircraft aboard the amazing Hawkeye, and join combat air patrols with the Navy's latest multi-role fighter the F/A-18 Hornet.
2008.301.009	Carrier Pilot in the Forgotten War, A	Kaufman, Richard F.	Compilation of personal film of the author. Story of the Flying Midshipmen, who between 1946 and 1950 filled the ranks of those needed Navy pilots after WW II. Part I is a movie about the Flying Midshipmen in flight training at Pensacola during the late 1940s, followed by rigorous preparations for carrier qualifications in the fleet squadrons. It shows squadron life during the outbreak of the Korean War and how navy families coped with the long carrier cruises of those days. Part I is available at: http://www.flyingmidshipmen.org/richd.html. Part II depicts

Object ID	Title	Author	Summary
			an action packed drama from old movie film, photographs, and gun camera film taken during combat aboard the carrier USS Valley Forge. Part II is available online at: http://www.flyingmidshipmen.org/riche.html
2008.301.010	Coast Guard in Film, The	Judd, Ralph	Captures the Hollywood image of the Coast Guard as presented to the public throughout the 20th Century.
2008.301.012	Aircraft Carrier Operations	Americasarchive.com	Appears to be a set of five training or promotional films on aspects of flight or carrier operations: 1) Call to Glory is a 15 minute video. The first half shows the Air Force and the "behind the scenes" of the Paramount film "Call to Glory." There are scenes of Edwards AFB. There is about a 2 minute video titled Project Warrior, January 11, 1945. Major William A. Shomo and Lt. Paul M. Lipscomb are shown engaging the Japanese even though badly outnumbered. Shomo receives the Medal of Honor and Lipscomb receives the Distinguished Service Cross for their actions. The second half of the video shows Mike Powers ice skating and playing hockey. 2) Carrier Air Traffic Control Center SPN-35 - This is a 16 minute United States Navy Training Film MN 10607-A or 18687-A that appears to have been recorded on USS Kitty Hawk (CV-63). It focuses on the AN/SPN-35 computerized landing system radar. There are scenes from CIC, CATCC, ready room, and flight deck. It explains the positions in CATCC. Unfortunately, the sound and picture quality are poor. Recorded in 1969? 3) The Type C Mark 7 and Mark 11-1 Catapults - This is a 14 minute United States Navy Training Film MN 10124-B dated 1966 in excellent condition. It uses animation and real life video to describe the catapults and the crew positions of the men at the catapults. It shows launches

Object ID	Title	Author	Summary
			using the bridle system. It appears to have been recorded on USS Saratoga (CV-60). 4) Flight Deck - Episode 20, of Season 3 of The Dupont Show of the Week - It is a 40 minute video that follows a typical day of the flight deck crew of the aircraft carrier, U.S.S. Franklin D. Roosevelt. This was the 1964 deployment which left Mayport, Florida on 28 April and returned 22 December. The ship and its crew of 3,600 men begin their tour of duty with the 6th fleet by sailing from Jacksonville, Florida to the Mediterranean Sea. A routine day for the flight deck crew begins at 5 am and continues until 2 am. Aired on 23 August 1964 on NBC. The video begins with pilot training at Cecil Field then shows the farewells of the crew before departure on its deployment. There are lots of tears, and long rows of telephone booths on the pier. The remaining video shows flight ops with good scenes of Flight Deck Control, the Ouija Board, air to air refueling, launch, and recovery. It shows a plane blowing a tire on landing and damaging one of the arresting wires which had to be replaced. There are scenes of the LSO review and CCA in night ops. On 1 May 1964 Commander Robert Abraham Komoroff, Ops Officer of CVW -1 did not return to the ship. His plane went down and his body was recovered by helicopter. There is a scene of his memorial service in the forecandle (fo'c's'le). Produced, directed and written by Al Wasserman. 5) The Story of A Carrier Pilot - This is a 25 minute video from 1962 that follows Ltjg Donald E. Watkins as he trains to become a carrier pilot. The first half of the video shows Watkins training with VF-96, the Fighting Falcons, in a F-4H Phantom at Miramar. There is an interesting scene of training for hypoxia, and another interesting scene "Dining In" in which the four nuggets

Object ID	Title	Author	Summary
			(Watkins being one of them) have to perform for their squadron mates. The second half shows Watkins on board the USS Ranger (CV-61) as he qualifies to become a carrier pilot. (Bridle launch system was being used). Script by Mel Stuart and Robert Fresco. Produced, edited and directed by William Cartright. A Wolper Production. (The video at youtube.com is better: https://www.youtube.com/watch?v=4MR_bGZrEck)
2008.301.013	A-3 Skywarrior Assoc., 50th Anniversary Banquet and Flight Reenactment, 28 Oct. 2002	A-3 Skywarrior Association	Video documentary of A-3 Skywarrior Association 50th Anniversary reunion.
2008.301.014	Iwo Jima : 36 Days of Hell, Disc 1	Timeless Media	This is Disc 1 of a 2 Disc set. "The Pacific island was eight square miles of sulfurous rocks and volcanic ash, but its strategic importance was far greater. Thousands of U.S. Marines, sailors, and soldiers risked their lives to win back the island from the Japanese during World War II. Now see the true story behind what many military experts call the toughest battle the Marines ever fought." Contents: Disc 1: The face of Iwo Jima -- Plan of attack -- The landings -- The shores of Iwo Jima -- Mt. Suribachi -- Inch by inch -- Bloody Iwo -- Fire and steel -- Off shore support -- High price to pay -- An uneasy silence -- Was it worth it? -- Disc 2: The road to Iwo -- The B-29 superfortress -- Voices from the battlefield -- Iwo Jima memorial.
2008.301.015	Navy at Point Magu, The	C.F. Boone Nationwide Publications, Inc.	An unofficial guide to the Navy base at Point Magu, California. Describe the various commands resident on the base, base facilities, points of contact, etc. Looks to have been distributed as a Welcome Aboard book to newly arriving personnel. Appears to be mid-1960's

			vintage. No publish date provided.
2008.301.016	Missions and Milestones	Boeing Military Aircraft Company	Commemorates and documents 20 years of Vertical Take-Off and Landing (VERTOL) production of the Boeing Company from 1945. Contains photographs and characteristics of each model. Inside covers provide a pictorial timeline of first flights for each model.
2008.301.017	Project Hummingbird	Federal Aviation Administration	A Technical Summary and Compilation of Characteristics and Specifications on Steep-Gradient Aircraft. VTOL and STOL.
2008.301.018	Catapults, Vol. I - Hydraulic	Naval Air Technical Training Command	A digest of discussions and demonstrations of hydraulic catapults as they were presented in the classrooms, laboratories and shops at the Naval Air Training Unit, Philadelphia, PA. circa 1961 in the Catapult Course, Class C.
2008.301.019	Shaft Turbine Engines Operating Manual, T-53-L-1 and T-52-L-1A	Lycoming	Explains the operating techniques for the Lycoming T53-L-1 gas turbine engine.
2008.301.021	NATOPS Flight Manual Navy Model SH-3A Helicopters	Chief of Naval Operations	Provides standardized ground and flight procedures for the Navy Model SH-3A Helicopter. Does not include tactical doctrine.
2008.301.022	Airplane Power Plants	Chief of Naval Operations	A study of airplane powerplants that existed in the mid-1950's. Heavy emphasis on internal combustion, prop engines.
2008.301.023	Precipitation Static	Chief of Naval Operations	Results of a May 1943 Army-Navy committee set up to gather material to provide ground personnel with an explanation of precipitation static and some suggestions for meeting flying problems present by the phenomenon.
2008.301.024	Projectionist's Manual	Bureau of Naval Personnel	A reference manual for training officers, instructors and projectionists to assist them in understanding the problems of projection. It is not a technical service manual.
2008.301.025	Mathematics, Vol. 3	Bureau of Naval Personnel	The third and most advanced of a series of Navy training courses in mathematics. It includes the fundamentals of integral and differential calculus and an introduction to differential equations.

Object ID	Title	Author	Summary
2008.301.026	Quartermaster 3 & 2	Bureau of Naval Personnel	Designed to help men of the Navy and naval reserve meet the qualifications for advancement to the rate of Quartermaster 3 or Quartermaster 2.
2008.301.027	Thirty Seconds Over Tokyo	Lawson, Ted W.	AMERICA STRIKES BACK! After Pearl Harbor, America seemed to have lost the war before it had begun. Allied forces were being beaten across the Pacific by the Japanese military juggernaut, and morale was at the breaking point. America desperately needed to strike back at the enemy. For this, a corps of heroic volunteer fliers led by Lt. Col. James H. Doolittle began training to attack the very heart of the Japanese Empire -- Tokyo. To succeed, the "Tokyo Raiders" would have to launch sixteen fully loaded B-25 twin-engine medium bombers off the deck of the aircraft carrier Hornet -- something never done before -- and land at airfields in China. Through courage and luck, the raid itself went flawlessly. But bad weather, lack of fuel, and darkness worked against many of the pilots -- and for many, escaping China proved even more perilous than the mission.... This gripping eyewitness account -- hailed as "the most stirring story of individual heroism that [the war] has so far produced" (The New York Times) -- is one of the most daring missions in military aviation history: the legendary Doolittle Raid. INCLUDES HISTORIC PHOTOS - SOME NEVER BEFORE PUBLISHED Editorial Reviews From Library Journal The publisher inaugurates its "Aviation Classics" series with this 1943 narrative of Jimmy Doolittle's raid on Japan in answer to Pearl Harbor, which Lawson experienced

Object ID	Title	Author	Summary
			firsthand as a bomber pilot. This edition has twice as many photos as the original, as well as a new introduction by series editor and military historian Peter B. Mersky. Copyright 2002 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. About the Author Ted W. Lawson (1917-1992) was a native of California. He joined the Army Air Corps while working for Douglas Aircraft Company in Santa Monica and received his wings in November 1940. After the attack on Pearl Harbor, he volunteered for a secret mission that evolved into the raid on Tokyo in April 1942. Random House published his account of the raid, <i>Thirty Seconds Over Tokyo</i>, in 1943. Lawson subsequently served as technical advisor to MGM during the making of the popular wartime movie based on his book. After retiring from military service in 1945, he reentered private industry and worked on several projects that involved aircraft and space programs. Peter B. Mersky is series editor for Brassey's Aviation Classics. He has written or co-authored a dozen books, including <i>A History of Marine Corps Aviation</i>, some 100 magazine articles on U.S. Navy and Marine Corps aviation, and hundreds of book reviews. He is retired from both the U.S. Naval Reserve and Approach, the Navy and Marine Corps aviation safety magazine, for which he served as editor. He is currently preparing a volume on carrier warfare for Brassey's series of combat readers. He lives in Alexandria, Va. --This text refers to the Hardcover edition. (from Amazon.com)
2008.301.028	Pictorial History of the Blue Angels, A : U.S. Navy Flight	McGuire, Jim	A history of Navy and Marine Corps flight demonstration

Object ID	Title	Author	Summary
	Demonstration Teams 1928-1981		teams. Precision formation flying was a routine even before the Three Sea hawks of 1928. In 1946 the Blue Angels became the Navy and Marine Corps' first official flight demonstration squadron.
2008.301.029	Armed Forces Recipe Service, Version 2003	None Stated	When the prospects of cooking for large groups leaves you wondering what to serve, let the Armed Forces recipe cards help. These terrific, sure-fire recipes provide culinary inspiration along with instructions for cooking to make portions for 100 people or more. NTIS order # TM 10-412. 2008.301.052	Instrument Notes	Fighter Squadron 126	Training syllabus for instrument flying of aircraft associated with VF-126.
2008.301.053	Lucky Bag of 1935/1955	United States Naval Academy. Class of 1935	An account of the exploits and achievements of the class of 1935 graduated at the United States Naval Academy compiled 20 years after graduation. Contains photos of the Officers and their families. Lucky Bag is the term for the United States Naval Academy 'year book' dedicated to the graduating classes. A traditional Lucky Bag has a collection of photos taken around the academy and photographs of each graduating officer along with a single paragraph describing the individual written by a friend. While no one knows for sure, it is speculated that it is named after the 'lucky bag' that contains the possessions of sailors who lost items at sea. Each year every midshipman and graduating officer receive a Lucky Bag and is archived by both the US Naval Academy and the USNA Alumni Association. (from Wikipedia)
2008.301.055	US Cruisers 1883-1904 : Birth of the Steel Navy, The	Burr, Lawrence	Spanish American War, 1898, Battle of Manila Bay, Battle of Santiago, Naval Diplomacy

Messages from C-in-C (Reagan) down to the President of the College. Faculty and Staff. Class of 1982-'83. Campus events and activities. Graduation ceremonies. First yearbook for the Naval War College to be published

Object ID	Title	Author	Summary
2008.301.058	Aviation Boatswain's Mate 3 & 2	Bureau of Naval Personnel	A Navy Training course prepared especially for men of the navy studying for advancement to Aviation Boatswain's Mate E (ABE) Petty Officer 3rd Class and Petty Officer 2nd Class.
2008.301.059	Air Navigation Supplement	Bureau of Naval Personnel	A U.S. Navy training publication and air navigation supplement to Dutton's Navigation and nautical Astronomy, 9th edition. Date of publication is not available, however, it is probably before the advent of jet aircraft. This book belonged to the Navy correspondence course center in Scotia, New York - evidently never returned as required.
2008.301.060	Shield and Sword : The United States Navy and the Persian Gulf War	Marolda, Edward J.	Details naval operations in support of Desert Storm and includes candid observations of leadership effectiveness, interservice relations and methods of command and control. It also analyzes the effectiveness of various weapons systems and sensors.
2008.301.062	Visual Communication Topics	Bureau of Naval Personnel	Written for enlisted men of the U.S. Navy and Naval Reserve striking for communications ratings and for men in communications seeking advancement in rating. Devoted to visual communications - flag hist, flashing light and semaphore.
2008.301.063	Fire on the Hangar Deck : Ordeal of the Oriskany	Foster, Wynn F.	Ever since man first ventured to sea, fire has been his worst enemy. It is no less so on a modern aircraft carrier where high explosives, volatile fuels, and flaming engines are often mixed with sailors working long hours under arduous conditions. In 1966 this hazardous situation led to a catastrophe costing the lives of 44 men, injuring hundreds more, and causing millions of dollars of damage. The USS Oriskany, a 21 year old Essex-class carrier -- Gulf of Tonkin
2008.301.064	Boilerman 3 & 2	Bureau of Naval Personnel	For enlisted men of the U.S. Navy and naval reserve who are preparing for advancement to the rates of Boilerman 3 and Boilerman 2.
2008.301.065	Pilots' Powerplant Manual	Shedenhelm, L. E.	Considers the engine, engine

Object ID	Title	Author	Summary
			accessories and propeller as a single unit called the powerplant. Prepared for use as a textbook in the Civilian Pilot Training Program of the Civil Aeronautics Board (CAB), but the book should be of great assistance to all flying students preparing for the examinations required for issuance of the commercial pilot certificate.
2008.301.066	Technical Manual, Air Navigation	War Department	Describes and illustrates the various methods of air navigation used by pilots of the Army Air Corps.
2008.301.067	Technical Manual, Aircraft Engines	War Department	Internal-combustion engine principles; Classification and description of engine types; Description and construction of engine units; Repair principles; Engine lubrication; Engine cooling.
2008.301.068	Technical Manual, Aircraft Engine Operation and Test	War Department	Control systems Operation Testing Troubles Storage and shipment.
2008.301.069	Technical Manual, Airplane Hydraulic Systems and Miscellaneous Equipment	War Department	Hydraulic principles. Hydraulic system units. Airplane hydraulic systems. Inspection of hydraulic systems. Gases. Fire-extinguishing equipment. Flotation equipment. Oxygen equipment. Ice eliminating equipment. Heating and ventilating equipment. Aircraft parachute flare.
2008.301.070	Technical Manual, Aircraft instruments	War Department	A detailed study of the design, location and use of aircraft cockpit instrumentation.
2008.301.071	Technical Manual, Airplane Inspection Guide	War Department	Furnishes airplane mechanics, inspectors and other maintenance personnel in a concise form the necessary information relative to the inspection of airplanes, airplane engines and auxiliary equipment; and the Air Corps forms which are used to record the work.
2008.301.072	Aircraft Recognition Manual	Office of Naval Intelligence	Contains all information available at the Restricted level on United States and foreign country aircraft with photographs and characteristics.
2008.301.073	Flight Handbook, Navy Model A4D-1 & A4D-2 Aircraft	Bureau of Naval Weapons	Contains information regarding the behavior peculiar to the A4D aircraft in various

David	Contents: Engine Fundamentals and Thermodynamics Fuels and Combustion -- Engine Construction Two-Stroke and Four-Stroke Cycle Engines Combustion Chambers and Related Systems Fuel and Fuel Injection Systems - - Governors -- Cooling and Lubrication Systems Starting and Reversing Systems - - Troubleshooting
2008.301.077	Confederate Navy : A Pictorial History, The	Stern, Philip Van Doren	This big, profusely illustrated volume describes one of the most amazing fleets in all history -- the hastily improvised Navy of the South. At the beginning of the Civil War, the Confederate Navy was a very small collection of nearly anything that would float -- mostly small, unmilitary vessels and a few captured Union ships; there was not one real warship in the fleet. But the South fought back ingeniously, sending agents to England and France to have the finest warships built, innovating such modern weapons as the torpedo, the submarine, and the armored warship -- all of which changed the nature of naval warfare.
2008.301.078	Patrol Craft of World War II	Veigle, William	During WWII, Germany's U-boat campaign was strangling Great Britain by cutting off her supplies from the US. After Pearl Harbor, the US joined this Battle of the Atlantic. The Navy built PCs. More than 300 PCs went to war. Nearly 50,000 men served on them. PCs were rough riders but rugged

			rocks and volcanic ash, but its strategic importance was far greater. Thousands of U.S. Marines, sailors, and soldiers risked their lives to win back the island from the Japanese during World War II. Now see the true story behind what many military experts call the toughest battle the Marines ever fought." Contents: Disc 1: The face of Iwo Jima -- Plan of attack -- The landings -- The shores of Iwo Jima -- Mt. Suribachi -- Inch by inch -- Bloody Iwo -- Fire and steel -- Off shore support -- High price to pay -- An uneasy silence -- Was it worth it? -- Disc 2: The road to Iwo -- The B-29 superfortress -- Voices from the battlefield -- Iwo Jima memorial.

2008.302.001	Jane's All the World's Aircraft - 2004-2005	Jackson, Paul (ed)	Jane's All the World's Aircraft is an aviation annual publication founded by Fred T. Jane in 1909. It is published by Jane's Information Group. Jane's All the World's Aircraft has chronicled a century of ever-accelerating aviation progress and recorded the particulars of an unprecedented number of flying machines, using the widest possible interpretation of that phrase, in the most minute detail. Six editors have had the privilege of commenting upon the significant aircraft and events of manned flight since the first edition appeared in November 1909 as All the World's Airships (which was then a generic term for any machine that flew). This first publication was seen as being ahead of its time but even the skeletal book showed the strength of Fred T Jane's standardize approach to data collection. The first edition even carried a pre-addressed return proforma for aviation

Object ID	Title	Author	Summary
			pioneers to supply the details of new machines. Besides listing the different types of aircraft by nationality, the first issues covered aerial societies, journals and flying grounds and cost just 21 shillings (£1.05). Jane himself had a desire to fly and he was nearly killed doing so in 1909 whilst attempting a flight on Dartmoor. His aircraft caught fire, but he merely commented that it would be one less machine to include in his forthcoming work. As with Jane's Fighting Ships, Jane received extensive help from enthusiasts worldwide, including Louis Blériot, A.V. Roe and Prince Heinrich of Prussia. Jane censored the 1914 issue, which was published just after the outbreak of the First World War, blacking out whole sections describing British equipment and organization. He noted in it that, for all practical purposes, aircraft have no more to do with peace than submarines. The work's accuracy helped morale by dispelling alarmist rumours about imminent German air raids, showing that the Germans did not possess anything but the smallest fleet of airships. Respect for the accuracy of Jane's All the World's Aircraft transcended political enmities. Cold War notwithstanding, Soviet authorities supplied Jane's with information. Such was the technical reference book's reputation that Argentina even provided details of its aircraft during the Falkland's Conflict in 1982. Altogether, there have been only 97 editions, mainly due to disruptions during the two World Wars. 2009 was the 100th Year of Jane's All the World's Aircraft. From Wikipedia, the free encyclopedia

2008.302.006	Battle For Leyte Gulf, The	Woodward, C. Vann	The author paints a full portrait of the Battle--the greatest naval battle of World War II and the largest engagement ever to take place on the high seas. Fought at the end of 1944, the battle represented a supreme effort by the Japanese to maintain control of the Philippines. It ended in their greatest defeat--and a decisive victory for the United States Navy.
2008.302.007	Without Wings : The Story of Hitler's Aircraft Carrier	Burke, Stephen	Launched in 1938, and measuring over a quarter of a kilometer in length, the aircraft carrier Graf Zeppelin was the largest ship ever built by Nazi Germany. She was to operate the most modern carrier aircraft in the western world, and as such was feared by Great Britain's Royal Navy. Planned as one of four carriers, the premature start to World War II ensured that the others never materialised, leaving the Graf Zeppelin as Germany's sole aircraft carrier. Afloat and 85 per cent complete as the war began, a combination of steel and manpower shortages, conspired to have the necessary work needed to complete her suspended. Moved to the waters of occupied Poland as protection from Allied bomber attacks, she languished there for a number of years before the strategic importance of such a ship was recognised and work on her once again began under direct orders from Adolf Hitler. Considered a greater threat to British sea power than Germany's massive twin battleships Bismarck and Tirpitz, many in the Royal

Object ID	Title	Author	Summary
			Navy had concerns that Britain's powerful but largely aging surface fleet was ill prepared to cope with the German carrier. Surviving an attack by the RAF, she would eventually meet her end after receiving multiple bomb and torpedo hits in an orchestrated attack by Soviet ships and aircraft. Once on the seabed, she lay largely forgotten in post war Europe until the discovery of her wreck in June 2006, lying deep in the Baltic Sea. Drawing on previously unpublished documentation taken from numerous eyewitness accounts, this narrative tracks the incredible tale of Germany's sole aircraft carrier. A leviathan that could have altered the outcome of World War II, perhaps even making Germany the victor long before America had entered into the war. (from Amazon.com)

This is a gripping look at the real experiences of the men who belonged to the VMF-214.
2008.302.020	Guadalcanal Legacy, 50th Anniversary, 1942-1992	Birkitt, Philip D.	At what stage in the war did you feel that the balance had swung against you? a famed Japanese Admiral was asked. He answered simply, Guadalcanal was his answer. This history details the turning point of the war in the Pacific. All military branches are included. Volume II commemorates the 50th Anniversary of landing on Guadalcanal with a never-before-published history. Exciting new photographs and hundreds of biographies depict the epic battle for the island and the men who fought to secure it.

Object ID	Title	Author	Summary
2008.302.022	Striking Back: Midway and Guadalcanal 1942	Johnson, Lee (ed)	This was checked out to Bert Munoz who left in 2020. Midway was one of the most important naval battles in history. Fought from June 3rd to June 5th, barely six months after Pearl Harbor, the United States dealt a devastating blow to the Imperial Japanese Fleet, sinking four of her most powerful carriers and setting the stage for the beginning of the empire's downfall. Then, in August, fighting on land began. On what was a virtually unheard-of Pacific island, the U.S. shattered the myth of Japanese invincibility for good when U.S. Marines and Army halted the Japanese advance in it tracks.
2008.302.023	Destined for Glory : Dive Bombing, Midway, and the Evolution of Carrier Airpower	Wildenberg, Thomas	On June 4, 1942, three squadrons of US Navy Dauntless dive bombers set fire to 3/4 of Japan's carrier strike force at Midway and changed the course of the war in the Pacific.
2008.302.024	American & British Aircraft Carrier Development 1919-1941	Hone, Thomas	The development of aircraft carriers and carrier operations sparked a revolution in military affairs that completely and irrevocably changed the prosecution of war at sea. This valuable new history of carrier aviation, unlike the limited studies of the past, explains the development of carrier forces by comparing the ways in which two very different navies adopted the new military technology.
2008.302.025	First Team : Pacific Naval Air Combat from Pearl Harbor to Midway, The	Lundstrom, John B.	Ace fighter pilots like Jimmy Thach and Butch O'Hare are justly renowned for their daring exploits in the perilous early months of the Pacific War when the US Navy carrier fighting (VF) squadrons amassed a remarkable combat record in the face of desperate odds. Yet, exactly how these skilled aviators and their squadron mates -- called the "first team", in keeping with athletic jargon popular at the time -- overcame the odds to help turn the tide of war has, until now, remained little known. With this comprehensive operational

Object ID	Title	Author	Summary
2008.302.026	US Marine Corps and RAAF Hornet Units of Operation Iraqi Freedom	Holmes, Tony	history of carrier-based air warfare, their heroic feats can at last be closely examined. Some 84 of the 250 Hornets committed by Central Command to Operation Iraqi Freedom proudly bore MARINE titling on their rear fuselages. A further 14 were marked with the distinctive kangaroo roundel of the Royal Australian Air Force. The exploits achieved by the units that flew these jets into combat is detailed in this volume, the 3rd of 3 titles published in the Combat Aircraft series on what has been dubbed by many TACAIR insiders the 'Hornet's War.'
2008.302.027	U.S. Airpower at Sea	Drury, Richard S.	INTRODUCTION: If you have never been aboard an aircraft carrier, your first visit will be a surprise. First, the size is overwhelming. The USS Enterprise, CVN-65, for example, is 1,123 feet long with a breadth of 257 feet. Its flight deck area is 4.47 acres and its height, keel to mast top is 250 feet, equal to a 25 storey building. An aircraft carrier is quite simply the largest warship in the world. Next, the activity level is astonishing. Thousands of crewmembers make their homes in these floating cities and, particularly when air operations are underway, the combination of action and clamor is difficult for the novice to endure. In the bowels of the monster below the flightdeck, one is occasionally unaware of being on a ship at sea. Shops, huge dining halls, a post office, television and radio stations, library, recreation areas, work rooms - all have a life beyond day or night. The city lives twenty-four hours a day and the sky well above can be sunny, stormy or dark and go virtually unknown to those immersed in life inside. The flightdeck is a place of high drama. It is also extremely dangerous. People have died here. Nonsense is not tolerated. It is serious business. One

Object ID	Title	Author	Summary
			does not wander aimlessly around an operational flightdeck. Each move is carefully and precisely choreographed. There is a specific, functional reason for everyone's position, movement and piece of equipment. The incredible fury of an aircraft slamming onto the deck has to be seen and felt and heard to be at all understood. An operational flightdeck is a mixture of sensational beauty and startling brutality. All sensations are assaulted by raw engine heat, deafening jet screams and afterburner thunder, by vivid images of tons of airborne machinery falling out of the sky to literally smash onto the deck, by catapults shooting aircraft into the sky like huge bullets and steam covering the scene making immediate ghosts of launch crews. You can see it again and again and it never loses its intensity. It is an impressive, memorable experience. Until you have been there, all other descriptions fall short. The United States Navy is good at what it does with carriers. It has had some eighty years to get it right. On November 14, 1910, the Curtiss civilian test pilot, Eugene Ely, made the first takeoff from any ship, in this case a wooden platform erected over the forecastle of the anchored U.S.S. Birmingham, at Hampton Roads, Virginia. And, at 11:01 AM of 18 January 1911, Ely landed his Curtiss pusher biplane upon a large platform [built over the stern of U.S.S. Pennsylvania anchored in San Francisco Bay. This was the first shipboard landing. The aircraft carrier has been born. Early in 1911, Lt. Theodore G. Ellyson, reported to the Glenn Curtiss Aviation Camp at North Island, San Diego, for flight training is Naval Aviator Number One. The glorious tradition of gold-winged aviators had begun. Eighty years later the

Object ID	Title	Author	Summary
			incredible feat of launching and landing aircraft from an aircraft carrier is performed with staggering regularity. The 50HP Curtiss that Eugene Ely flew has been replaced by a thundering herd of supersonic fighters, attackers and various support type aircraft. Without a doubt, the aircraft carrier is the tip of the spear in the US projection of airpower and military might. Special acknowledgment for making this publication possible goes to Admiral Chuck McGrail, Assistant Deputy Chief of Naval Operations (Naval Warfare), Captain Richard "Turtle" Redditt, former F-8 driver and "Top Gun" instructor, and the Captains and crews of CV-61, the USS Ranger, and CVN65, the USS Enterprise. Torpedo Squadron Ten (VT-10) was commissioned in April 1942 in San Diego. This Navy carrier squadron, which achieved its fame flying the

Object ID	Title	Author	Summary
	Famous Avenger Squadrons		Grumman TBF and TBM Avenger torpedo bombers, became known as "The Buzzard Brigade." It struck hard at the heart of the Japanese resistance in the Pacific Theater, attacking key enemy bases in the Marshalls, Truk Atoll, Palau, New Guinea, Saipan, Tinian, Guam, and even Honshu and Kyushu on Japan's mainland. VT-10 completed three successful combat cruises, operating from the aircraft carriers Enterprise (CV-6) and Intrepid (CV-11). While flying from Guadalcanal, the Buzzard Brigade helped sink the first battleship Japan lost during the war. In its final attack on enemy warships off Okinawa, the squadron helped sink the 72,000 ton super battleship Yamato and torpedoed two of her screening warships. Officially decommissioned on November 26, 1945.
2008.302.033	Aces 2	Patton, W. Wayne	The exploits of air aces - pilots who shot down five or more enemy aircraft - have fascinated the world since WWI. Successful aces combined the killer instinct, mastery of their aircraft and air combat tactics, and the ability to rapidly adjust to changes in their situation. Chronicles 29 aces from WW I, WW II and the '67 Arab-Israeli war. 40 B&W drawings, 30 pages color profiles, 64 pages. (from ebay.com:) Reference book on aircraft, armor, and submarine aces of several nations. Most of the aces are from World War II with some World War I aces included. The book has articles on an eclectic mix of aces such as Ernst Barkmann (Panther tank ace), Joe Foss, Ivan Kozhedub, Hans-Joachim Marseille, Adolf Galland, Allan Deere, "Sailor" Malan, several pages and aircraft profiles for Saburu Sakai, Grigori Rechalov, Giora Rom (1967 Israeli ace), several pages and aircraft profiles for Georges Guynemer, several

Object ID	Title	Author	Summary
			submarine profiles for Zenji Orita and Alber Schnee, and quite a few more. Almost all of the aces have at least one aircraft, tank, or submarine illustrated in color profile. The book includes documentation and illustrations of aircraft rarely associated with air-to-air victories such as Walter Loos (2 kills in a Ta-152H), and Fritz Kelb (1 kill in a Me 163). Other rarities includes an A6M5 in which Sakai scored his first kill. (from squadron.com)

2008.302.036	Corsair - 30 Years of Filibustering 1940-1970	Pautigny, Bruno	The Corsair no doubt appears at the top of the list of mythical aircraft which have left their mark on aviation history. The author has given priority to the illustrations and iconography, followed by explanations which are deliberately concise but as rigorous as possible. The aim was to tell the 30 year story of the Corsair's extraordinary career from its baptism of fire in the Pacific to African skies, passing through the Far East and a less martial but nonetheless virile interlude in the colorful and exhilarating world of the Pylon Races. This work does not claim to be exhaustive and is destined as much to the enlightened amateur as to the neophyte, in whom perhaps will appear a new love for the fabulous Bent wing Bird.
2008.302.037	Warships : The Battleship Navy : Periscope Film The U.S. Navy, World War I to 1941		Seapower shaped the destiny of the United States in the 20th Century. Admiral Dewey's triumph at Manila in 1898 heralded a new era for the U.S. Navy. By 1941, it was one of the most powerful on earth. Featured on this DVD are twelve rare and historic films made by and for the U.S. Navy during the critical decades before WWII. Go "cruising with our Navy" in the Atlantic and Pacific, and join the Asiatic Fleet near Shanghai. The DVD cover has a reference to U.S. Navy Films 1898-1941, and the DVD itself has The Battleship Navy Historic U.S. Navy Films 1898-1941. See original newsreels of the fight against the U-boat menace in WWI, and the development of the first aircraft carrier USS Langley, and the use of

			submarines, and hundreds of aircraft. (This film was obtained be the C.I.A., dubbed into English, and is presented here in its entirety for the first time!) Watch as U.S. Navy pilots scramble their planes from nuclear powered aircraft carriers and perform a beach assault exercise for then-President John F. Kennedy. Judge for yourself how the navies of the two superpowers might have fared — if the Cold War had become a hot one! 140 minutes! (from periscopefilm.com)
2008.302.039	Vought F-8 Crusader	Mersky, Peter B.	When the prototype XF8U carrier-based fighter exceeded Mach 1 during its maiden flight in March 1955, the US Navy must have sensed they had a world beater of an airplane. Born of the same stable as the great 'bent-wing bird' - the F4U Corsair - and the aerodynamically advanced F7U Cutlass jet fighter, the Crusader earned a special place in the annals of US carrier airpower. To the great embarrassment of the US Air Force, the Crusader outperformed the contemporary F-100 Super Sabre by a handsome margin, being powered by the same Pratt & Whitney J57 afterburning turbojet but having rather more internal fuel. Carrier-based fighters were not supposed to be superior to the land-based variety. Author Peter Mersky's intimately researched text details the fighter, photoreconnaissance and drone versions of the Crusader. He also gives a vivid account of the Crusader's MiG-killing exploits during the Vietnam War. Its service with the French Aeronavale and Philippine Air Force is also featured. VOUGHT F-8 CRUSADER is illustrated with over 160 black and white photographs (the

Object ID	Title	Author	Summary
			vast majority previously unpublished), and 12 rare photographs in full colour. The text contains approximately 50,000 words; appendices and an index are included.
2008.302.040	Grey Ghost : The Story of the Aircraft Carrier Hornet, CV-12, CVA-12, CVS-12	Merideth, Lee W.	Story of one of the US Navy's most decorated combat ships. USS Hornet, CV-12, holds the record for the number of enemy ships and aircraft destroyed during WWII. During a span of 15 months of combat, Hornet's pilots shot down 668 enemy planes, destroyed 742 more on the ground, and sank or damaged 486 ships accounting for 1,269,710 tons. After being decommissioned for a brief period, Hornet was brought back into service and modernized 3 times. She saw service in Vietnam and was the Prime Recovery Vessel for the Apollo 11 and Apollo 12 moon missions. Includes information on the following: Grumman TBF -- Eastern TBM-3 Avenger -- Grumman F6F Hellcat Grumman F9F-2, F9F-5 Panther -- Douglas AD-5, AD-6 Skyraider Sikorski HSS-1 (UH-34) Seabat - - Piasecki HUP-2 (UH-25B) Retriever North American FJ-3, FJ-4 Fury Grumman S-2F S-2 Tracker, E-1 Tracer and C-1 Trader Vought F-8 (F8U) Crusader
2008.302.041	Combat Carriers and My Brushes with History -- WWII 1939-1946	Sommers, Sam	Not specifically a history of the Pacific War, Combat Carriers provides a glimpse behind the events -- what the war looked like as seen by a young man in the midst of it. Sommers takes his reader through the excitement and fear of 3 years at sea on an aircraft carrier, up against one of the most dominant and terrifying naval powers in history. Not only do we get first hand accounts of what it was like to face Japan's fabled kamikaze fighter pilots in battle, we experience the mixed feelings of seeing the human faces of Japanese prisoners-of-war.
2008.302.042	History of Dive Bombing, The	Smith, Peter C.	Not only do the flyers give graphic portraits of combat

Object ID	Title	Author	Summary
			missions, but from previously unexamined files, documents, and reports, the author has shed light on new and unexpected facets of this hidden story: the conflict behind the scenes with the RAF stoutly resisting attempts to use dive bombers, secret reports on testing the Soviet 'Wonder' bomber, the hushed up success of the Vengeance in the Burma campaign, the attacks on the giant battleship Tamato, and many others. What was it like to dive at the Japanese carriers approaching Midway, to serve with the doomed Stuka units at Neuhammer, to take part in the first dive bomber missions in Poland, to sink the Konigsberg, to dive bomb in a Spitfire?
2008.302.043	How to Fly and Fight in the F/A-18 Hornet	Isby, David C.	Jane's At the Controls is a new series providing a 'hands-on' briefing of what it is like to fly and fight in modern combat aircraft. By following a hypothetical mission set sometime in the near future, the full capabilities of the McDonnell Douglas F/A-18 will be revealed. With its APG-65 multimode radar and infra-red search and tracking sensor, the Hornet can operate by day or by night over the harshest environment of all: the ocean. It can carry a formidable ordinance load including Harpoon anti-ship missiles and SLAM, its equivalent for land targets. In this scenarior the Hornets will use laser guided bombs for pinpoint precision against enemy missile craft lurking among neutral shipping.
2008.302.044	U.S. Navy in the Korean War, The	Marolda, Edward J. (ed)	Documents how the Navy's domination of the seas around Korea enabled Allies forces to project combat power ashore the length and breadth of the Korean peninsula.
2008.302.045	Aircraft Carriers : A History of Carrier Aviation and its Influence on World Events, Volume II, 1946-2006	Polmar, Norman	Revised edition of : Aircraft Carriers ; A Graphic History of Carrier Aviation and Its Influence on World Events, c1969. A history of World Aircraft Carrier development and operation. This second volume details the role of

Object ID	Title	Author	Summary
			carriers in the unification controversies of the US armed forces and strategic deterrence. Addresses carriers in Royal Navy, The role of the development of the modern carrier in the Royal Navy and of the efforts of France and the Netherlands to build their fleets as well as Soviet Unions effort to produce carriers. The development of "oddball" aircraft are also covered as related to carriers.
2008.302.046	Incredible Great White Fleet, The	Carter, Samuel	Theodore Roosevelt's Great White Fleet sailed around the world from 1907 to 1909, stopping at ports in New Zealand, Japan, China, Egypt and other countries. It's purpose was to impress the world with America's naval might and, secretly, to check Japan's growth in the Pacific. The story of the voyage is told from the standpoint of the young men who served on the ships. The sailor's daily lives, the routine and the adventure, are realistically described.

2008.302.049	World's Great Aircraft Carriers : From the Civil War to the Present	Preston, Antony	Originally developed during WWI to fulfill scouting duties for the battle fleet, the aircraft carrier became the decisive naval arm in WWII and transformed naval warfare. The World's Great Aircraft Carriers is a highly illustrated record of the development of the aircraft carrier from the first manned balloon flights from a ship's deck in the Civil War to the nuclear-powered super carriers of the present. With the aid of 40 full-color artworks and 80 color and b/w photos, The

Object ID	Title	Author	Summary
			World's Great Aircraft Carriers explains the technology and tactics of carrier warfare. Includes full accounts of the great carrier battles of WWII, including Midway and the Coral Sea.
2008.302.050	Ship Strike : The History of Air-To-Sea Weapon Systems	Smith, Peter C.	This is the story of the airborne anti-ship missile's entire development span, with many reports of wartime actions and people involved.
2008.302.051	U.S. Naval Air Superiority : Development of Shipborne Jet Fighters 1943-1962	Thomason, Tommy H.	There are 19 pages on which Midway is listed. There are pictures of the Midway in a gale in 1949 on page 185. Photo of XFJ-2 testing, April 1954 on Midway on page 136. More pictures of suitability tests in 1951 on page 61 and 112: F3D-2 Skynight and F7U-1 Cutlass. This book profiles the turbulent design and development stage of the Navy's carrier-based jet fighter program and discusses the evolution and development of aircraft with a flight envelope ranging from slow-speed carrier approaches to supersonic intercepts. This book also looks at successful designs, such as the Fury, Banshee, Crusader, and Phantom II, to the also-rans, like the Fireball, Tiger, Pirate, and Cutlass-aircraft developed when the Navy's needs were measured against contractor and political demands and against the limits of the evolving engine and aerodynamic technologies of the day. Additionally the book examines the Navy's internal struggle to adapt jet-powered planes to its style of warfare as well as the development and evolution of carrier-borne fighters, their air-frames and engines, from the closing days of World War II through Vietnam. The USS Midway is listed on 19 pages. Pages 173-184 discuss the British innovations to carrier development: Steam catapult, angled deck, and mirror landing system.
2008.302.052	Brown Shoes, The - Personal Histories of Flying	Francis, Patricia B	Category: Veteran's Books US Navy History

Object ID	Title	Author	Summary
	Midshipmen and Other Naval Aviators of the Korean War Era		Description: The Brown Shoes History Project is proud to announce this limited edition coffee-table book featuring the history of a very select group of Naval Aviators who earned their Gold Wings between 1946 and 1953. The Naval Aviators featured in this volume came from many different backgrounds with many different dreams. The one thing they had in common was the desire to fly. They earned their wings in spite of tough training and government cutbacks and became heroes in the air by providing support for those brave young men on the battlefield. Many went to Korea and some, like Midshipman Jesse L. Brown, the first African-American Naval Aviator, never came home. Others, including one who became an astronaut, went on to fly even higher. 216 pages, 9" x 12" Hardbound (from http://www.turnerpublishing.com)
2008.302.053	Aircraft of World War II	Munson, Kenneth	Described as a "library in one volume," this comprehensive reference book is an invaluable source of information to all students of the Second World War. More than five hundred different aircraft types are mentioned in this compact volume, ranging from famous names like Spitfire and Flying Fortress to such aeronautical freaks as the lop-sided Bv 141 and the Japanese Ohka suicide aeroplane. Fighters, bombers, transports, trainers, gliders and experimental aircraft are all included, and over 275 of them are illustrated by a photograph in addition to descriptive text and specifications. Designation systems are fully explained, and short histories given of the

			major air forces involved in the war. No other single volume contains such a comprehensive coverage of the greatest period in the history of military aviation which explains why it has been reprinted so often. Cover Illustration: A formation of three Supermarine Spitfire Mk. XIVs. (From a painting by George F. Heiron.) (from dust jacket flap)
2008.302.054	Japanese Warships of World War II	Watts, Anthony John	The IJN (Imperial Japanese Navy) of World War II was administered by the Ministry of the Navy of Japan and controlled by the Chief of the Imperial Japanese Navy General Staff at Imperial General Headquarters. In order to combat the numerically superior American navy, the IJN devoted large amounts of resources to creating a force superior in quality, the objective being of "making up for quantity by means of quality". Consequently, at the beginning of World War II, Japan probably had the most sophisticated Navy in the world. Betting on the agile success of aggressive tactics (stemming from Mahanian doctrine and the lure of "decisive battle"), Japan did not invest significantly on defensive organization: she needed to protect her long shipping lines against enemy submarines, which she never managed to do, particularly under-investing in the vital role of antisubmarine warfare (both escort ships and escort carriers), and in the specialized training and organization to support it. IJN enjoyed spectacular success during the first part of the hostilities and completely drove out the Royal navy from the East Asia, but American forces ultimately managed to gain the upper hand through technological upgrades to its air and naval forces and a vastly greater industrial output.

Object ID	Title	Author	Summary
			Japan's reluctance to use their submarine fleet for commerce raiding and failure to secure their communications also hastened her defeat. During the last phase of the war, the Imperial Japanese Navy resorted to a series of desperate measures, including a variety of Special Attack Units (popularly called kamikaze). (from Wikipedia)
2008.302.055	Ships of the Battle of Midway	Gakken	Based on the latest research, this illustrated book chronicles the pivotal Battle of Midway with detailed color paintings and color and b&w photographs. A great resource for any student of the Pacific War. All text and captions in Japanese. (from http://www.hlj.com/product/GA-KPW-55)
2008.302.056	Military Aircraft of the Cold War	Winchester, Jim (ed)	A fact filled guide to 121 of the finest aircraft between 1945 and 1985 including performance data, allowing the reader to compare range, speed and ceiling with those of contemporary aircraft. Includes: Aerospatiale to Boeing; British Aerospace to Douglas; English Electric to Martin; McDonnell to Nanchang; North American to Sukhoi; Tupolev to Yakovlev.
2008.302.057	No Tumult, No Shouting The Story of the PBY	Thorburn, Lois	Catalina PBY patrol bombers, manufacture and patrols. Not a warplane but equipped with weapons of war.
2008.302.058	Man and His Art, The : R. G. Smith : An Autobiography	Smith, R. G.	R.G. describes his transition from helping design tactical aircraft to painting them. Contains 140 of his best paintings, drawings and sketches.
2008.302.059	F-4 Phantom II Navy Version	Koku-Fan - 74	F-4 Phantom II
2008.302.060	United States Navy in the Pacific 1897-1909, The	Braisted, William R.	A history of the evolution of the U.S. Navy in the Pacific Ocean from 1897 to 1909. Contents include : Winning the outposts of empire -- The Navy and the Boxers -- One among the Great Naval Powers -- The Russo-Japanese War and after -- Japan as America's Pacific Naval

Object ID	Title	Author	Summary
			Problem -- Conclusion.
2008.302.061	Hell's Islands : The Untold Story of Guadalcanal	Jersey, Stanley Coleman	A history of the Guadalcanal campaign that provides the reader with information that appears nowhere else in literature. Also covers roles played by forces occupying the other Solomon islands.
2008.302.062	Aircraft Carriers in Action	Bergaust, Erik	The author takes his readers aboard the newest aircraft carriers in the U.S. Navy to reveal what life is like both above and below decks. The missions of modern Task Forces and the immensely complex operations necessary to carrying out those missions are described clearly. Here, too, is the story of the beginnings of the Navy's air arm.
2008.302.063	Theodore Roosevelt and the Great White Fleet : American seapower comes of age	Wimmel, Kenneth	A concise, readable compilation of the events and attitudes surrounding Roosevelt's acquisition and execution of naval knowledge.
2008.302.064	Midway 1942	Grove, Philip D.	The Battle of Midway in June 1942 is one of the most famous, and one of the few decisive, naval encounters in history. It is also a rarity in that it took place against a backdrop of massive changes in naval technologies and tactics.
2008.302.065	Great White Fleet, The	Melville, John H.	Records the histories of the ships that made up the United Fruit Company's Great White Fleet. Chapter 23-24 discuss six mail ships, five of which became supply ships for the Navy in World War II. In other chapters, there is additional discussion of merchant ships during the wars.
2008.302.066	How to Fly and Fight in the F-14 Tomcat	Rockwell, David	Reveals what it is like to fly and fight in the F14 Tomcat.
2008.302.067	Japanese Aircraft Carriers and Destroyers	None Stated	This is the second of a series of authoritative volumes compiled by Japanese experts presenting a detailed pictorial and historically accurate survey about the ships of the Imperial Japanese Navy--their conception, operational service and eventual fate during and after the Pacific War. Notes, photo credits, and an index are included.
2008.302.068	They'll Have to Follow You!	Albertson, Mark	""Others may do as you have

Object ID	Title	Author	Summary
			done, but they'll have to follow you!" so proclaimed Teddy Roosevelt to the sailors and marines assembled on the afterdeck of USS Connecticut, flagship of the Great White Fleet. The United States Navy had come of age, as sixteen coal-burning battleships carried the Stars and Stripes to the far-flung ends of the globe in the most extraordinary peacetime demonstration of naval power in modern times. It is a story set in the closing stages of the Golden Age of Imperialism, a time when the Great Powers engaged in a battleship-building binge that not only set the world tottering on the brink of global catastrophe, but foreshadowed the later contest in nuclear arms between the United States and the Soviet Union. In this companion volume to USS Connecticut: Constitution State Battleship, Mark Albertson captures one of the finest moments of the United States Navy. In the first major strategic initiative by the United States in the twentieth century, the Atlantic Fleet Battleship Force circumnavigated the globe, steaming more than 46,000 miles in the most monumental achievement in modern maritime history, a triumph that helped make the United States a global power, and eventually, a super power. Step aboard one of the ships comprising the Great White Fleet and travel round the world in They'll Have to Follow You! " (from www.tatepublishing.com)
2008.302.069	Aces in Combat	Hammel, Eric	Adding to the acclaimed first four volumes of his exciting, in-the-cockpit series, The American Aces Speak, leading combat historian Eric Hammel comes through with yet another engrossing collection of first-person accounts by American fighter aces serving in World War II and the Korean War. As are the four earlier volumes, Aces In Combat is a highly

Object ID	Title	Author	Summary
			charged excursion into life and death in the air, told by men who excelled at piston-engine and jet -engine aerial combat and lived to tell about it. It is an emotional rendering of what brave airmen felt and how they fought in the now-dim days of America's living national history. View the Battle of Midway through Lieutenant Jim Gray's eyes as he must balance the needs of fellow pilots against the needs of his nation. Share the fear with Captain Charlie Sullivan as would-be rescuers deep in the New Guinea jungle attempt to turn him into a blood sacrifice. Crew a Canadian Mosquito night fighter as Lieutenant Lou Luma stalks the wily Hun-and bags an ace-over an airfield deep in Germany. Share Lieutenant Bud Fortier's and Major George Loving's grief when, on missions nearly eight years apart, they look on helplessly as trusted wingmen dive to their deaths in treacherous ground-attack runs. And watch anxiously as Captain Tom Maloney hovers between life and death for ten lonely days after stepping on a mine on an enemy-held beach. ... These are America's eagles, and the stories they tell are their own, in their very own words. Eric Hammel is an acclaimed military historian and author of more than thirty other combat histories, including Pacifica Military History's Guadalcanal: Starvation Island, Guadalcanal: Decision at Sea, Six Days in June, The Root: The Marines in Beirut, Ambush Valley, Fire in the Streets, Khe Sanh: Siege in the Clouds, and four other volumes in the American Aces Speak series. He lives with his wife in northern California. (from inside front cover)

2008.302.071	Battle of Midway Illustrated	Gakken	The Battle of Midway (Romaji: Middowe Kaisen) is widely regarded as the most important naval battle of the Pacific Campaign of World War II. Between 4 and 7 June 1942, only six months after Japan's attack on Pearl Harbor, and one month after the Battle of the Coral Sea, the United States Navy decisively defeated an Imperial Japanese Navy (IJN) attack against Midway Atoll, inflicting irreparable damage on the Japanese fleet. Military historian John Keegan has called it "the most stunning and decisive blow in the history of naval warfare." The Japanese operation, like the earlier attack on Pearl Harbor, sought to eliminate the United States as a strategic power in the Pacific, thereby giving Japan a free hand in establishing its Greater East Asia Co-Prosperity Sphere. The Japanese hoped that another demoralizing defeat would force the U.S. to capitulate in the Pacific War. The Japanese plan was to lure the United States' aircraft carriers into a trap. The Japanese also intended to occupy Midway as part of an overall plan to extend their defensive perimeter in response to the Doolittle Raid. This operation was also considered preparatory for further attacks against Fiji and Samoa. The plan was handicapped by faulty Japanese assumptions of the American reaction and poor initial dispositions. Most significantly, American

Object ID	Title	Author	Summary
			codebreakers were able to determine the date and location of the attack, enabling the forewarned U.S. Navy to set up an ambush of its own. Four Japanese aircraft carriers and a heavy cruiser were sunk for a cost of one American aircraft carrier and a destroyer. After Midway, and the exhausting attrition of the Solomon Islands campaign, Japan's shipbuilding and pilot training programs were unable to keep pace in replacing their losses while the U.S. steadily increased its output in both areas. (from Wikipedia)
2008.302.072	Carrier Fighters, 1939-1945	Brown, David	Carrier Fighters describes the development of naval fighter aircraft up to the outbreak of the Second World War, and the evolution of tactics and pilot training in the light of early wartime experience. Among the battles described are the Malta convoys of 1941 and 1942, the Coral Sea, Midway, and the Philippine Sea--the greatest air battle of the war. The development of a night-fighter force and the measures taken to counter the Kamikaze suicide attacks are also recounted.
2008.302.073	Naval Institute Guide to the Ships and Aircraft of the U.S. Fleet - 2005	Polmar, Norman	This timely guide describes the U.S. Navy, Marine Corps, and Coast Guard during an intensive period of transformation--from the Cold War to what some have called World War III. New details are provided on the changing carrier air wings, the littoral combat ship, the maritime prepositioning force, a new submarine rescue system, the deepwater cutter program, unmanned undersea vehicles, and the new MH-60R/S multipurpose helicopters.

			https://www.flickr.com/people/sdasmarchives/
2008.302.075	First 25 Years at McDonnell Douglas, The	East West Entertainment, LLC	Includes the release of the DC-5, Dauntless dive bomber, C-47, F-4 DC-8, Delta rockets and Mercury space program. 30 Minutes running time.
2008.302.076	Jets Volume One : Thunder : Altitude and Attitude	McDonnell Aircraft Corporation	"The greatest jets in the world, flown by the greatest pilots, accompanied by a soaring musical score that rocks. The missile shoots alone are truly exceptional, and classic footage like the VOODOO and the BANSHEE recall an early generation of fighter jet flight tests--some never seen before. Starring the F-4 PHANTOM, on of the most successful fighter aircraft ever flown. This is from an amazon.com review: "DVD is 52 minutes and covers the XF-85 Goblin during B-29 tests, the XP-67 Moonbat during flight tests (b/w), the XFD-1 Phantom during carrier qualifications on FDR, the F-101B in service and preceding single seat and recon models, and the F3H-2N Demon during carrier qualifications on the Ticonderoga alongside the new Cutlass, Skyhawk and Skyray. However, one caveat has to do with the pressing quality, as I have two copies from different retail sources at different times, and both have the same defects. There is a pimple in the Phantom section that causes a freeze, though you can press play repeatedly to get through it. There is an audio glitch of fast forward or rewind sound in the background at one point during Phantom, and the Voodoo sound distorts in one section. I don't know how endemic this is to other copies."
2008.302.077	Jets Volume Four : Blue Angels : Altitude and Attitude	U.S. News New Vision	This DVD, narrated by John Travolta, celebrates over 50 years of the world's premier fighter exhibition team. Take a behind-the-scenes. This is the full story, told by the Blues themselves, with an inside look at what it takes to achieve their famous level of precision and excellence. Originally produced in 1996 under the title:

2008.302.121	USS Yorktown : (CV10)	Friedman, Norman	The Aircraft Carrier Yorktown CV10 was the 4th US naval vessel carrying that name. The first Yorktown was a 16-gun sloop. 117 feet overall; she could have been parked crossways on the flight deck of the last Yorktown. Commissioned on Feb. 15, 1840. The Second Yorktown, Gunboat Number 1, steam-powered, speed of 16 knots. 244 feet long, carried a crew of approx. 200, armed with six 6-inch breech loading rifles, two 6-pounders, two 3-pounders, two 37 mm guns, and two Gatling machine guns. Commission April 23, 1889. The third Yorktown CV5 was an aircraft carrier, the 5th US carrier to be commissioned. Her design formed the basis of the Essex-class carriers. Commissioned Sept. 30, 1937. The USS Yorktown CV10 was the 2nd ship of the Essex-class fleet carriers. She was laid down on Dec. 1, 1941 as the Bon Homme Richard, but renamed Yorktown on Sept. 26, 1942, in memory of the previous Yorktown CV5 lost in the Battle of Midway.

			Army and Air Force Hawks are built for operations in the field. Many other nations fly Black Hawk and Seahawk airframes, but this book will focus primarily on US military variants.
2008.302.125	Aviation Art of Lou Drendel	Drendel, Lou	Lou Drendel has been drawing and painting airplanes since he can remember. Inspired by the model airplanes his father built for him, he took pencil and paper and began drawing. He hasn't stopped yet, more than 60 years later. Lou's art has been featured in dozens of books published by Squadron/Signal. Now, they are gathered together in one volume. This book displays more than 200 of the extraordinary works of the famed aviation artist; 64 pages of Color. (from Amazon.com)
2008.302.126	History of the Fleet Air Arm : From Kites to Carriers, The	Finnis, Bill	Royal Navy's first tentative investigation into airborne craft was in 1903 when research into the use of kites for observation and as radio aerial supports was carried out. In this history, we learn of the successes and disappointments of the service, moments that made a dramatic impact such as Taranto and the sinking of the Bismarck, and also the theatres of war that were a long wearisome vigil, such as the Battle of the North Atlantic, the Russian convoys and the fight for Malta. Post-war years saw the service in action in Korea and the Falkland Islands, and it was here in the Southern Hemisphere that the importance of seaborne aircraft was most importantly demonstrated, for without them we could not have won back those islands.

2008.302.130	U.S. Naval and Marine Corps Reserve Aviation, Vol. 1 : 1916-1942 Chronology	Heiser, Wayne H.	v. 1. 1916-1942 chronology -- v. 2. Aircraft, 1916-1942--v.3. The History of the Naval Aviation Bases This book, volume 1, is a chronological account of the establishment of Naval Reserve Aviation and its growth and development before World War II. it is a comprehensive history of Naval and marine Corps Reserve Aviation--a documentation of the significant events in that history, plus many which would fall under the category of trivia.
2008.302.131	U.S. Naval and Marine Corps Reserve Aviation, Vol. 2 : Aircraft 1916-1942	Heiser, Wayne H.	The second volume is to provide descriptions and illustrations of the various types of aircraft used by Naval Reserve Aviation during the period between World War I

Object ID	Title	Author	Summary
			and World War II. Included herein is information on a number of British planes. A section of the book is devoted to illustrations of insignia adopted by reserve bases and squadrons and usually displayed on their aircraft, and appendices provide synopsized descriptions of the engines and other equipment auxiliary to the aircraft.
2008.302.132	U.S. Naval and Marine Corps Reserve Aviation, Vol. 3 : The History of the Naval Reserve Aviation Bases	Heiser, Wayne H.	This book covers the inception and development of the various pre-World War II reserve aviation activities up to and, in large part, through the end of that war. In many instances, historical information is included concerning the communities in which the bases were located. Dozens of photographs are included to illustrate graphically the development of the bases. In addition to Naval Reserve Aviation Bases, histories of navy Pre-Flight Schools are included. A chronology covering the organizational growth of the Naval Aviation Reserve as it applies to all reserve facilities is included as an appendix to this volume. This chronology also includes a considerably detailed account of the aviation training provided for officers, aviation cadets, and enlisted men, most of whom were reservists, during World War II.
2008.302.134	British Fleet Air Arm in World War II	Barber, Mark	An account of the activities of the Royal Navy's Air Branch from 1939 to 1945. Illustrated with official and rare private photographs, with color uniform plates and battle paintings.
2008.302.135	On the Seas and In the Skies : A History of the U.S. Navy's Air Power	Roscoe, Theodore	Page 557 gives an account of why the USS Midway CVE was renamed the St. Lo. The thrilling records of individual acts of courage, invention, and vision on the part of civilians and a few Naval officers relieves the depressing picture of the bureaucratic blockage of their imagination and enterprise.

2008.302.136	\$5 Billion Misunderstanding, The : The Collapse of the Navy's A-12 Stealth Bomber Program	Stevenson, James P.	In 1990 the US Navy's A-12 - a replacement aircraft for the outdated A-6 Intruder - had the support of the secretary of defense before Congress. Nine months later the A-12 was cancelled, making it the largest weapons program every terminated by the Pentagon and the first cancelled for default with the demand that the contractors return the monies already paid them.... In recounting the events that eventually led to the stealth bomber's cancellation, Stevenson cites many examples of the mismatch between perception and reality experienced by navy program managers, the defense department, Congress, and the contractors. In the process of telling the story he takes on the entire defense acquisition process and its responsibility for the program that cost American taxpayers over \$5 billion, yet produced not a single airplane for their defense.
2008.302.137	Hostile Sky : A Hellcat Flier in World War II	Vernon, James W.	This memoir provides a carrier pilot's view of the conflict in the Pacific during the final months of the war when atomic bombs were dropped and Japan capitulated. A member of VBF-87, Vernon give a highly personal eyewitness account of life in a bomber-fighter squadron and the roller-coaster emotions involved in combat sorties over hostile sea and land.
2008.302.138	From POW to Blue Angel :	Armstrong, James Lowell	As only the third fighter pilot

Object ID	Title	Author	Summary
	The Story of Commander Dusty Rhodes		to become leader of the Blue Angels, Raleigh E. "Dusty" Rhodes helped develop the most famous aerobatics team ever formed. From POW to Blue Angel tells his story--a fast-paced drama teeming with action and human interest and capturing the initiative and tenacity of a true American hero. Jim Armstrong has drawn on extensive interviews and Dusty's scrapbooks and flight logs to produce a rare account of the Blue Angels in the late 1940s. Readers will experience the stress of practice and the exhilaration of air shows as Armstrong takes them inside Dusty's cockpit during the era when the Blues first found fame, perfecting their trademark formations and maneuvers. This book is also a moving account of the degradation that Rhodes suffered for three years as a prisoner of war, and includes his rare, ground observer's view of the firebombings of Tokyo and Yokohama. Armstrong poignantly captures Dusty's return to a changed postwar America, and also recounts his tour as a fighter pilot in Korea. From POW to Blue Angel is an intimate story of service and survival that will carve a place in naval aviation history--and inspire all who keep their eyes skyward. About the Author Jim Armstrong is Professor Emeritus of English at Fullerton College, Fullerton, California. He lives in Placentia, California. The late Roy M. "Butch" Voris (Captain, U.S. Navy) formed the Blue Angels in 1946 and served twice as their leader. (from Amazon.com)
2008.302.139	Night Fighters Over Korea	O'Rourke, Gerald Gerrard	One man's account of a period of naval combat that is little-

			known. The night skies over Korea were home to a few brave warriors of Composite Squadron 4 (VC-4) and Marine Night Fighter Squadron 513 (VMFN-513). Operations with Douglas F-3D Skynights from carriers often found the night more of an adversary than the enemy. A colorful book written with a touch of blarney and a good deal of action. 210 pgs., illustrations, 6"x 9", hdbd. (from historicaviation.com)
2008.302.140	Grumman F-14 Tomcat	Peacock, Lindsay T.	Pictorial work on the Grumman F-14 Tomcat carrier-launched jet superfighter.
2008.302.141	USS Saratoga, The : Remembering One of America's Great Aircraft Carriers, 1956- 1994	Tanner, Jane	When the USS Saratoga (CV 60) was commissioned on April 14, 1956, she was the most powerful aircraft carrier ever designed. Headlines heralded the mighty vessel as the "Queen of the Seven Seas," and she was affectionately dubbed Super Sara. For the next thirty-eight years, the Saratoga used her intimidating power to help shape history, as she manned the line during the Cuban Missile Crisis, saw 15,000 aircraft fly sorties off her deck during Vietnam, engaged in antiterrorist strikes against Libya, and participated in Operation Desert Storm. Now, after more than 60,000 sailors called her home, the decks are silent. The reign of one of the Navy's proudest ships ended on August 20, 1994, when the Saratoga was decommissioned. Come aboard one last time and see what it was like to live on a floating city, where the work was often dangerous, and the only reminder of home was a photograph of a loved one taped to a bunk wall. During twenty-two deployments to the Mediterranean, a tour off Vietnam, and missions in the Adriatic, the men learned to survive life at sea, braving tragic accidents and reveling in successful missions. The

Object ID	Title	Author	Summary
			cherished visits to exotic ports of call showed them the world, and they found entertainment and solace in the special guests who came aboard - from Bob Hope to Whitney Houston - and in the practical jokes that added levity to their grinding schedules. In this intimate look, you'll see why the Saratoga changed lives forever, taking aboard boys and returning them as men. And why so many sailors wept openly when Super Sara was brought to port one final time. Jane Tanner is a freelance writer and the author of "Jacksonville: Center for Enterprise Excellence on Florida's First Coast." She lives in Jacksonville, Florida, the home port of the USS Saratoga throughout its career. Jacket design by Laura McDonald

2008.302.142	Guadalcanal Air War, The	DeBlanc, Jefferson J.	DeBlanc first saw action in World War II at the island of Guadalcanal in the South Pacific. From his very first day there, he proved himself as a talented fighter pilot. He shot down two Betty bombers on his first day and soon began to lead his own squadron in the air. Within weeks, he was considered to be part of the flying elite, the Marine Fighter Aces. "The Guadalcanal Air War" is DeBlanc's firsthand account of his training and the events on Guadalcanal. It is DeBlanc's journey as a man as he discovers the value of life, including his own. Because of the efforts of men like DeBlanc, the battles fought on and above Guadalcanal marked a turning point in the war and ended Japanese expansion. From the Publisher "A gallant officer, a superb airman, and an indomitable fighter . . . [He] rendered decisive assistance during a

			critical stage of operations." -- Harry S. Truman, Medal of Honor Citation
2008.302.143	Imperial Japanese Naval Aviator 1937-45	Tagaya, Osamu	The fateful attack on Pearl Harbor forced the Western world to revise its opinion of Japan's airmen. Before the war, Japanese aviators had been seen as figures of ridicule and disdain; yet the ruthless skill and efficiency of their performance in December 1941 and the months that followed won them a new reputation as a breed of oriental superman. This book explores the world of the Imperial Japanese Naval airman, from the zenith of his wartime career until the turning of the tide, when the skill and experience of the average Japanese airman declined. Cultural and social background, recruitment, training, daily life and combat experience are all covered. Contents Introduction,Chronology,Enlistment,Recruitment and training,Flight training, Carrier qualification, Belief and belonging Appearance and equipment,Everyday life and front line duty,Tactics, Experience of battle,Glossary,Color plate commentary,Index (from Osprey.com)
2008.302.144	Clear the Deck! : Naval Aviation Incidents and Accidents of World War II	Graff, Cory	Aircraft carrier operations were a dangerous business, especially in wartime. When air operations are confined to a flight deck of 50,000 square feet (escort carrier size), it was one of the most hectic and hazardous places on earth. Accidents were bound to happen. In wartime, the stakes were even higher as heavily loaded and armed combat planes went about their missions in unprecedented numbers. Commonly, there was no alternate airfield, no time to lose, and absolutely no room for error. Clear the Deck! showcases many never-before-published

Object ID	Title	Author	Summary
			amazing and dramatic World War II-era, U.S. Navy battle damage, accident, and flight operations photographs gathered from the National Archives, National Museum of Naval Aviation, the Seattle s Museum of Flight, and numerous other collections. This book features U.S. Naval aircraft in action from Eugene Ely to the Brewster Buffalo, to the ultimate fighters of World War II Corsairs, Hellcats, Tigercats, and Bearcats many coming to grief on pitching, rolling carrier decks. The action begins in the 1920s, heats up during the carrier battles of 1942 -44, and concludes in the waters off the Japanese home islands as damaged fighters and torpedo bombers come back aboard ship often times with disastrous consequences. About the Author Cory Graff is the Assistant Curator for Military Collections at The Museum of Flight in Seattle, Washington. In his free time, Graff works on aviation-related history projects including exhibits and books. His articles have been published in Air & Space Magazine and The Museum of Flight's Aloft Magazine. Graff is the author of several books on military aviation subjects. (from Amazon.com)
2008.302.145	U.S. Navy Uniforms and Insignia 1940-1942	Warner, Jeff	Volume four in the series, this is the first book of its kind to examine the clothing, equipment and accoutrements used by the United States Navy through the early years of World War II. Beginning with the pre-war lineage of U.S. Navy uniforms in the 1920s, this volume chronologically documents Midshipmen's uniforms, recruit training and issue items including sea bag layouts and hammocks, with over 800 original and contemporary images. Wartime U.S. Navy insignia worn by commissioned officers,

Object ID	Title	Author	Summary
			warrant officers and chief petty officers is featured with concise descriptions and detailed photographs. Additionally, a complete catalog of enlisted men's rating badges and distinguishing marks are showcased in brilliant full color with detailed and informative captions. As a bonus, the complete 1941 U.S. Navy Uniform Regulations with all wartime changes and amendments is included on CD-ROM. (from Amazon.com)
2008.302.146	Carrier Battles of World War II	Classic Pictures Entertainment	(caption:) F6F "Hellcat" of Fighting Squadron Two, crash landing on flight deck of USS Enterprise, while in route to attack Makin Island, November 1943. Aircraft carriers proved to be the decisive instrument of naval warfare during the Second World War. In this program we witness some of the great carrier battles of World War II: The Battle of the Coral Sea, Midway, and the Great Marianas Turkey Shoot. We also see the important role that carrier based planes played in hunting down and crippling the German surface raider Bismarck. Carrier warfare fundamentally changed the nature of war at sea. They relegated the mighty battleships to a support role, permitted the projection of naval power to unprecedented distances, and allowed the world's navies to engage without having to come in sight of each other. CHAPTERS: 1. Carrier Development 2. Ark Royal vs the Bismarck 3. America vs Japan 4. Battle of the Coral Sea 5. Defending Midway 6. Japanese Counter Attack 7. American Supremacy 8. Kamikaze Pilots (from back cover)

2008.302.150	Aichi D3A ('Val') & Yokosuka D4Y ('Judy') - Carrier Bombers of the IJNAF	Richards, M. C.	In WWII, the European use of the dive-bomber -- and the later widespread discrediting of the Stuka -- largely overshadowed the considerable successes achieved by the Far East equivalent, the Aichi D3A, in the early stages of the Pacific War, 1941-45. Later, with the mounting Allied pressure, these dive-bombers -- the Carrier Bombers of the Imperial Japanese Navy Air Force (IJNAF) -- were employed as suicide bombers in the Kamikaze role. This then is the development story and the combat record of the Aichi D3A and its successor the Yokosuka D4Y Suisei (Comet). They were the two most important carrier bombers of the IJNAF in the Pacific War.
2008.302.151	Guadalcanal : The Carrier Battles : Carrier Operations in the Solomons, August-October 1942	Hammel, Eric	Guadalcanal (Isatabu) is a tropical island in the South-Western Pacific. The largest island in the Solomons, it was discovered by the Spanish expedition of Alvaro de Mendaña in 1568. The name comes from Guadalcanal, a village in the province of Seville, in Andalusia, Spain,

Object ID	Title	Author	Summary
			birthplace of Pedro de Ortega Valencia, a member of Mendaña's expedition. During 1942-43 it was the scene of bitter fighting between Japanese and American troops; the American forces were ultimately victorious. (from Wikipedia)
2008.302.152	Britain's Fleet Air Arm in World War II	Mackay, Ron	The Air Branch of the Royal Navy that was to carve its name into maritime history as the Fleet Air Arm faced an orphan existence up to 1937 when the Admiralty, having handed over control in 1918 to the RAF, resumed charge of its aviators. The Force was poorly equipped and dangerously short of qualified personnel with which to effectively challenge its Axis adversaries, and suffered accordingly in the initial stages of World War II. The provision of superior carrier aircraft designs (primarily from the U.S. Grumman and Chance-Vought companies), and a similar whole-sale expansion in Fleet and Escort carriers (most of the latter supplied from American shipyards), as well as the personnel with which to operate the warships and aircraft ensured that by 1943 the Fleet Air Arm was an all-round, efficient Force capable of independent combat operations in all the major War Zones right up to VJ-Day. (from schifferbooks.com)
2008.302.153	F/A-18 Hornet : In Detail & Scale, Vol. 45, Part 2 : Production Versions	Kinzey, Bert	In this new volume is the most extensive and detailed look at all four production versions of the F/A - 18 Hornet ever published. These include the F/A-18A, F/A-18B, F/A-18C, and F/A-18D. The cockpits of each of the four production variants are illustrated with detailed close-up photography, and this includes both the standard and night attack configurations in the rear cockpit of the F/A-18D. The ejection seats, canopy details, radar, avionics bays, engines, landing gear, internal cannon,

2008.302.155	Enormous Crime, An : Definitive Account of American POWs Abandoned in Southeast Asia, The	Hendon, Bill	The dramatic history of living American soldiers left in Vietnam, and the first full account of the circumstances that left them there. Based on thousands of pages of public and previously classified documents, this book makes a convincing case that when the American government withdrew its forces from Vietnam, it knowingly abandoned hundreds of POWs to their fate. The product of 25 years of research, it exposes the reasons why these American soldiers and airmen were held back by the North Vietnamese at Operation Homecoming in 1973 and what these men have endured since. This is a history of America's leaders in their worst hour; of life-and-death decision making based on politics, not intelligence; and of men lost to their families and the country they serve, betrayed by their own leaders.--From publisher description.
2008.302.156	British Aircraft Carrier, The	Beaver, Paul	In 1978 Ark Royal sounded her final 'finished with engines' and with that it seemed 60 years

Object ID	Title	Author	Summary
			of aircraft carrier development and operational use were at an end. However, the Falklands' crisis renewed Britain's faith in her carriers Hermes and Illustrious, and proved that their days of usefulness were far from over. During their time in service with the Royal Navy, carriers have been armed with the most flexible and powerful combinations of weapons available. This is the story of the British-built carriers which embody two great skills -- flying and seafaring.
2008.302.157	America's Fighting Admirals : Winning the War at Sea in World War II	Tuohy, William	World War II navy veteran and Pulitzer Prize-winning journalist Tuohy has credentials and credibility to write a good popular introduction to the WWII U.S. Navy. And he has, in the form of a group portrait of the admirals who oversaw America's navy as it became the largest in history, larger than the contemporary combined fleets of the rest of the world. The admirals' range of experience was vast, for some had started out in coal-burning battleships, while others' careers commenced soon after leaving Annapolis. The famous likes of King, Spruance, Mitscher, and the more-aggressive-than-skilled Halsey are here, of course, but so are well-serving battleship admirals and amphibious specialists including the ferocious Turner and MacArthur's right-hand landing expert, Barbey. Some failed to distinguish themselves--Kimmel of Pearl Harbor notoriety, Pownall, and Theobald--and few of the Atlantic admirals are here, since they served in an ocean dominated by the fight to the death between the British and the U-boats. An honorable tribute to honorable men, most of whom served their country well. Roland Green - Booklist Copyright © American Library Association. All rights reserved Review Booklist, May 2007 "World War II navy veteran

			and Pulitzer Prize-winning journalist Tuohy has credentials and credibility to write a good popular introduction to the WWII U.S. Navy. And he has, in the form of a group portrait of the admirals who oversaw America's navy as it became the largest in history, larger than the contemporary combined fleets of the rest of the world ... An honorable tribute to honorable men, most of whom served their country well." US Naval Institute Proceedings, June 2007 "In America's Fighting Admirals, a Navy veteran of World War II provides valuable reference points for the study of high-level naval leadership." Warships International Fleet Review (UK), November 2007 "Comprehensive and well-written – almost cinematic in some places, it is recommended for anyone interested in naval combat leadership or the U.S. Navy in general ... a superb, enthralling account of the U.S. Navy's WWII titans and their achievements." (from Amazon.com)
2008.302.158	Strike : U.S. Naval Strike Warfare Center	Joss, John	Flying at the edge of the envelope, evading radar, suppressing enemy threats, destroying targets, learning to stay alive on today's battlefield... and tomorrow's - this is the world of STRIKE, the Navy's Strike Warfare Center at Fallon NAS, Nevada. Attack squadrons from the Navy and Marine Corps go up against every possible mission and threat - and you go along for the ride. Page 64 has picture of Tacts command/control console which looks like the one on display in the Midway ACMR/TACTS room sponsored by Cubic Corporation.
2008.302.159	With the Old Breed at Peleliu	Sledge, E. B.	Many now call the campaign

Object ID	Title	Author	Summary
	and Okinawa		for Peleliu the toughest battle the Marines have ever fought. But when it was over, there was little time for licking wounds. They were shipping out for Okinawa. Sledgehammer's brutal and dramatic story is for all the men of the "old breed" who struggled, bled and died at Peleliu and Okinawa. It is an eyewitness account of the harrowing realities of combat and Marines at war.
2008.302.160	Guadalcanal - World War II's Fiercest Naval Campaign	Stewart, Adrian	Adrian Stewart graphically describes the series of battles as control of the seas around Guadalcanal changed from Japanese to American daily. After initial misconceptions that the Japanese could not fight at night, the Americans bludgeoned their way through to grim but decisive victory.
2008.302.161	Hornets Over Kuwait	Stout, Jay A.	This no-holds-barred look at modern air warfare is eminently readable and decidedly personal, yet it makes a serious contribution to the reader's understanding of Marine Corps aviation. Stout is a Marine F/A-18 pilot who flew 37 sorties against the Iraqis during Desert Storm. Infused with the cocky confidence -- and sometimes ribald humor -- of a young pilot fighting in one of the world's fastest and most lethal machines, this book offers readers a fascinating blend of technological and human dynamics.
2008.302.162	Enterprise, The : Greatest of the Flat-tops	Cooke, David C.	The USS Enterprise is not only the world's first atomic-powered aircraft carrier, she is the largest, heaviest, most complex ship ever built. Her 8 gigantic atomic reactors provide a total of more than 280,000 horsepower -- which is enough to push the 85,350 ton ship through the water at a speed exceeding 40 miles per hour. The author escorts the reader on a guided tour of all her wonders -- the flight deck, the vast hangar deck, the squadron ready rooms, reactor rooms, combat information center, bridge, weather room, primary flight control, and sickbay.

Object ID	Title	Author	Summary
			He tells how the 4600 men aboard live and work, and how they are entertained.
2008.302.163	Angles of Attack : An A-6 Intruder Pilot's War	Hunt, Peter	A-6 pilot's account of Operation Desert Storm. Moments after Desert Storm began, attack pilot Pete Hunt was in the air over the Persian Gulf. Hunt saw it all, and this is his electrifying account. Tested to the max, flying all night, every night, for weeks on end, Hunt executed dozens of mission--from carpet bombing to dropping laser-guided five-hundred-pound bombs; from supporting Marines on the ground to bombing fleeing Iraqis along the blood-soaked "highway of death." His A-6 jet was a wide-open target for the blazing antiaircraft fire streaking up to destroy it. Escaping this deadly blizzard of fire made setting the A-6 back down on a little deck in a big ocean seem almost easy. But Hunt, like the rest of his squadron, the VA-145 Swordsmen--honored as the premier Attack Squadron in the United States navy for 1991--was just doing his job : keeping America free. During the Persian Gulf War the squadron was deployed on the USS Ranger CV-61.
2008.302.164	Ghosts on the Battleship North Carolina	Bradshaw, Danny	There are ghosts on the Battleship North Carolina. I know that for a fact. I've felt their presence in icy arctic blasts of cold that penetrate a room and wrap around me like a polar wind loose from the wilderness. I've heard their steps cross rooms and thud up and down the stairs, sometimes hurrying toward me as if to move me aside from where I stand, sometimes walking away as if, now that they had made themselves known, they could be done for a while. I've seen their shapes, moving through a passageway or standing in a door. I have even looked into the face of one and know him to be young and strong and angry.....

2008.302.167	Saga of the Bent-Wing Birds : Corsair Aces in the Solomons	Musciano, Walter A.	In the history of aerial warfare few aircraft have earned such an honored place as the Vought F4U Corsair -- the "bent-wing bird." Entering action in early 1943 in the South Pacific, the Corsair was the first Allied plane to meet the Japanese on even terms. It far exceeded even its designers' fondest hopes, while compiling a combat loss ratio of better than 11 to 1. Here are the stories of some of the men who flew the Corsair to fame: Pappy Boyington, Knobby Walsh, Ike Kepford, Bob Hanson and others. The key to the Allied offensive in the South Pacific during 1943 and 1944 was the island fortress of Rabaul, cornerstone of the Japanese defense system. Appendix containing the histories of Marine and Navy Corsair squadrons, medals, decorations and awards, a production chronology of the Corsair and its specifications, and a complete account of the combat record of the Corsair. Includes: Extensive collection of 86 photographs of the Corsair

			missions of the "Special Attack" units of the Imperial Japanese Navy and Army are described together with those of the Royal Navy, Royal Italian Navy, Kriegsmarine and Luftwaffe. Book includes a full description of the operations of Japanese Shinyo and Maru-ni explosive motorboat squadrons based on the first-hand accounts of former officers of the Imperial Navy. Includes : Japanese midget submarines of all types, Kaiten human torpedoes, Kamikaze air squadrons, Fukuryu frogmen, Banzai charges and suicidal anti-tank tactics; Italian midget submarines, MTM explosive boats and Maiali manned torpedoes; German Biber and Seehund midget submarines, Neger and Marder manned torpedoes, Linse explosive boats, Rammjagers and experimental aircraft; and British "Chariots" and "X-craft."
2008.302.171	Fist From the Sky : Japan's Dive-Bomber Ace of World War II	Smith, Peter C.	Known as the "god of dive-bombing," Takashige Egusa was one of the Imperial Japanese Navy's most legendary pilots of WWII. In December, 1941, he led an 80 plane attack force against Pearl Harbor and, 2 weeks later, assaulted the American gun batteries on Wake Island. After a series of missions in the Indian Ocean, Egusa was badly burned at Midway in 1942. A warrior to the last, he returned to duty, only to be killed on a desperate raid on enemy aircraft carriers in the Marianas.
2008.302.172	Kiss the Boys Goodbye : How the United States Betrayed Its Own POWs in Vietnam	Jensen-Stevenson, Monika	The classic account of the abandonment of American POWs in Vietnam by the US government. For many Americans, the recent conflicts in Iraq and Afghanistan bring back painful memories of one issue in particular: American policy on the rescue of and negotiation for American prisoners. One current American POW of the Taliban, Sergeant Bowe Bergdahl, stands as their

Object ID	Title	Author	Summary
			symbol. Thousands of Vietnam veteran POW activists worry that Bergdahl will suffer the fate of so many of their POW/MIA comrades—abandonment once the US leaves that theater of war. Kiss the Boys Goodbye convincingly shows that a legacy of shame remains from America's ill-fated involvement in Vietnam. Until US government policy on POW/MIAs changes, it remains one of the most crucial issues for any American soldier who fights for home and country, particularly when we are engaged with an enemy that doesn't adhere to the international standards for the treatment of prisoners—or any American hostage—as the graphic video of Daniel Pearl's decapitation on various Jihad websites bears out. In this explosive book, Monika Jensen-Stevenson and William Stevenson provide startling evidence that American troops were left in captivity in Indochina, victims of their government's abuse of secrecy and power. The book not only delves into the world of official obstruction, missing files, censored testimony, and the pressures brought to bear on witnesses ready to tell the truth, but also reveals the trauma on patriotic families torn apart by a policy that, at first, seemed unbelievable to them. First published in 1990, Kiss the Boys Goodbye has become a classic on the subject. This new edition features an afterword, which fills in the news on the latest verifiable scandal produced by the Senate Select Committee on POWs. About the Author Monika Jensen-Stevenson is a former magazine editor and producer for 60 Minutes. She won a Gold Medal for Best TV Documentary at the New York International Film and TV

Object ID	Title	Author	Summary
			Festival for one of her CTV productions and an Emmy for her minidocumentary In the Belly of the Beast. William Stevenson was trained in aerial espionage as a British naval fighter pilot during World War II. A respected historian and expert on covert warfare, he is the author of sixteen books, including A Man Called Intrepid, Intrepid's Last Case,. and 90 Minutes at Entebbe. (from Amazon.com)
2008.302.173	Torpedo Squadron Four : A Cockpit View of World War II	Thomas, Gerald W.	This is a historical account of WWII as seen by the pilot of an Avenger, the US Navy's's famous torpedo bomber. While the focus of this book is on the activities of Torpedo Four (VT-4), combat records are included for the other squadrons in the Air Group, Bombing Four (VB-4), and Fighting Four (VF-4). Also, in December, 1945, the dive bombers, because of heavy losses, were replaced with the first carrier-based Marine fighters (VMF-124 and VMF-213). Torpedo Four was assigned to 3 different aircraft carriers during WWII. Initially, on the Ranger in the Atlantic, the squadron flew with 6 Douglas "Devastators." Later, VT-4 became a 9 plane unit flying some of the first Grumman TBF Avengers. Aboard the USS Bunker Hill and USS Essex in the Pacific, the squadron operated with 15-18 TBMs.

2008.302.176	F-14 Tomcat	Jezewski, Dariusz	The person responsible for the F-14 project was Adm. Tom Conolly, Deputy Chief of Naval Operations for Air. The aircraft was dubbed "Tom's Cat" long before it was officially named "Tomcat". The F-14 entered the fleet in 1973, replacing the F-4 Phantom II. VF-1 Wolfpack and VF-2 Bounty Hunters were the first Navy fighter squadrons to receive the new aircraft. VF-2 flew the first operational sorties from the USS Enterprise in March, 1974. F-14A version deliveries were completed in April 1987 at a total of 557 plus 80 planes supplied to Imperial Iranian Air Force.
2008.302.177	Naval Battle of Guadalcanal, The : Night Action, 13 November 1942	Grace, James W.	One of the most ferocious naval battles of World War II, the night action off the coast of Guadalcanal on 13 November 1942-between U.S. cruisers and Japanese battleships fighting at point-blank range-claimed the lives of two American admirals. Though famous for tipping the scales in favor of the U.S. Navy in this critical area of the Pacific, this action has never before received the treatment provided in this book. Here, James Grace describes events from deck level and from both sides. He draws on a wealth of previously untapped primary sources, including the vivid personal recollections of some two hundred Japanese and American survivors of the fight. These eyewitness accounts lend immediacy to a work that will appeal to the general reader as well as to serious World War II buffs and historians. While the focus is on the details of the actual battle, the book also covers the planning on both sides that led to the action and the missions of the American and Japanese task forces. Grace defines the roles played by intelligence, the weather, and the air forces.

Object ID	Title	Author	Summary
			He presents information about how the Americans knew of Japanese plans to bombard the island yet managed only to throw a force together out of desperation. He points to the confusion caused by the deaths early on of the American commanders, the miserable performance of U.S. torpedoes, and the limitations of radar. Because naval leaders on both sides have been criticized in the past for how they conducted the fight, the author also explains why events occurred as they did and why the battle was so crucial to the overall Guadalcanal campaign. Fourteen maps help the reader follow the action, and photographs bring events alive. The fruit of many years of research, this study adds an important dimension to the battle. (from dust jacket flap)
2008.302.178	Bent Wings : F4U Corsair Action and Accidents	Blechman, Fred	You are in an F4U Corsair, turning toward the carrier and preparing all the controls for a night carrier landing. 			battleships, cruisers and submarines capable of embarking aircraft), operations and the aircraft themselves - construction, performance and markings. (from Amazon.com)
2008.302.181	Aircraft Carriers : A Graphic History of Carrier Aviation and Its Influence on World Events	Polmar, Norman	Aircraft carriers are the mainstay of United States naval power despite the advent of nuclear-powered missile submarines and other so-called "nuclear age" weapons. Indeed, the versatility of the aircraft carrier has led to the development of a carrier-based nuclear strike capability in the United States, British and French navies for use in a wide spectrum of military operations. AIRCRAFT CARRIERS describes the development and operations of the world's aircraft carriers, from the earliest efforts to fly an airplane from a ship to the use of aircraft carriers in the protracted Vietnamese War. Mr. Polmar, a leading authority on warships, describes ships, men, and aircraft in AIRCRAFT CARRIERS. He tells of the Furious, the first warship to sacrifice a gun for a flight deck; the Shinano, the largest carrier of World War II which was sunk before ever having launched a plane; the Ark Royal, which stopped the Bismarck and helped save Malta; Clement Ader, who was probably the first man to propose the modern aircraft carrier; Vice Admiral Takijiro Onishi, who planned the carrier raid on Pearl Harbor; the Swordfish torpedo plane, which helped win a war it was too old for; the AJ-1 Savage which pioneered the development of a carrier-based strike capability. Mr. Polmar tells his story against the backdrop of politics, technology, and warfare in the 20th Century. The quest for disarmament, the "Billy" Mitchell controversy, the

Object ID	Title	Author	Summary
			development of the atomic bomb, the Cold War confrontations, and the strife in Africa and the Middle East are examined as they influenced aircraft carriers and how aircraft carriers affected the events. Comprehensive and authoritative, this narrative of the "flat-tops" ranges from the Arctic fury of the Murmansk convoy route to the glass-smooth waters of Yankee Station in the Tonkin Gulf: a vast panorama unfolded with fascinating detail and clarity by Mr. Polmar and his collaborators, General Minoru Genda, Japanese Air Self-Defense Force (formerly Captain, Imperial Japanese Navy); Captain Eric M. Brown, O.B.E., Royal Navy; and the late Professor Robert M. Langdon, U.S. Naval Academy. Norman Polmar is a leading authority on 20th Century warships. His previous books in this field are Atomic Submarines (1963) and Death o f the Thresher (1964). His articles on military subjects regularly appear in periodicals in the United States and abroad. He is currently a naval operations specialist with the Northrop Corporation's Deep Submergence Systems Program. Previously he was Assistant Editor of the Naval Institute Proceedings and before that Associate Editor of the Navy Times. Mr. Polmar is Editor of the United States section of the annual reference volume Jane's Fighting Ships. Mr. Polmar is a graduate of The American University in Washington, D.C. He resides with his wife and two young children in Lanham, Maryland, a suburb of Washington. 2008.302.186	A-1 Skyraider, The	Birdsall, Steve	"When I started on this book, the A-1s were still in twelve of the fifteen Attack Carrier Air Wings. They were fighting with the Air Force and the VNAF, and were being called the most effective COIN aircraft we had. Then there were the MiG kills, Medal of Honor, and finally the Navy retirement. " (from Acknowledgement)
2008.302.187	Attack on Taranto : Blueprint for Pearl Harbor, The	Lowry, Thomas Power	On November 11, 1940, 21 slow, canvas-covered British warplanes, launched from the carrier <i>Illustrious</i>, attacked the harbor at the Italian port of Taranto and put most of the Italian navy out of commission. This all-but-forgotten operation, the authors argue, deserves historical recognition as an inspirational precedent for the Japanese raid on Pearl Harbor 13 months later. Taranto demonstrated that battleships in a shallow, heavily defended harbor could be sunk by a handful of torpedo-bombers. That lesson Adm. Isoroku Yamamoto, commander-in-chief of the Japanese fleet, learned well-while the American military virtually ignored it. The book includes an instructive comparison of the ways Japanese and Americans reacted to Taranto and a fine summary of the origin and development of carrier doctrine. The account of the 1940 raid itself is detailed and suspenseful. Lowry is the author of <i>The Story Soldiers Wouldn't Tell: Sex in the Civil War</i>; Wellham, who flew in the Taranto raid, is the author of <i>With Naval Wings: The Autobiography of a Fleet Air Pilot in World War II</i>. Illustrations. - Publishers Weekly Copyright 1995 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. (from Amazon.com)

Object ID	Title	Author	Summary
2008.302.188	Aces of the Rising Sun 1937-1945	Sakaida, Henry	This book combines Aircraft of the Aces 13: 'Japanese Army Air Force Aces 1937-45' and Aircraft of the Aces 22: 'Imperial Japanese Navy Aces 1937-45'. Very little has been published in English on the air arms of the Japanese Army and Navy, and the pilots who flew for them. Yet between 1937 and 1945, 150 JAAF and 21 Imperial Japanese Navy pilots achieved 'ace' status in eight years of near-constant warfare. This book relates the experiences of both air forces, revealing how the JAAF aces achieved their scores flying over terrain ranging from the Mongolian plains to the jungles of New Guinea, and how the IJN pilots drew on their experience of fighting over Manchuria, China and Mongolia to take on Allied forces in the Pacific (from Amazon.com)
2008.302.189	Hands to Flying Stations - Vol. 1	Soward, Stuart E.	Over the years the Canadian Naval Air Branch emerged as a highly motivated, and skilful operational force, achieving a level of effectiveness equal to the best that the Royal Navy and the US Navy could offer. These results were not achieved without a considerable loss of life as the branch evolved. In the first 10 years, 58 young men of all ranks died, serving in the cause of Canadian Naval Aviation. Vol. 1 of this book describes for the first time those early days, and is the story as told by those who were there.

2008.302.192	No Greater Glory : the Four Immortal Chaplains and the Sinking of the Dorchester in WWII	Kurzman, Dan	The sinking of the troop carrier Dorchester in the icy waters off Greenland shortly after midnight on Feb. 3, 1943, was one of the worst sea disasters of WWII. It was also the occasion of an astounding feat of heroism -- and faith. As water gushed through a hole made by a German torpedo, four chaplains -- members of different faiths but linked by bonds of friendship and devotion -- moved quietly among the men on board. Preaching bravery, the chaplains distributed life jackets, including their own. In the end, these four men went down with the ship, their arms linked in spiritual solidarity, their voices raised in prayer.

2008.302.197	Pearl Harbor : Why, How, Fleet Salvage, and Final Appraisal	Wallin, Homer Norman	Pearl Harbor will long stand out in men's minds as an example of the results of basic unpreparedness of a peace loving nation, of highly efficient treacherous surprise attack and of the resulting unification of America into a single tidal wave of purpose to victory. Therefore, all will be interested in this unique narrative by Admiral Wallin. The Navy has long needed a succinct account of the salvage operations at Pearl Harbor that miraculously resurrected what appeared to be a forever shattered fleet. Admiral Wallin agreed to undertake the job. He was exactly the right man for it – in talent, in perception, and in experience. He had served intimately with Admiral Nimitz and with Admiral Halsey in the South Pacific, has commanded three different Navy Yards, and was a highly successful Chief of the Bureau of Ships. On 7 December 1941 the then Captain Wallin was serving at

Object ID	Title	Author	Summary
			Pearl Harbor. He witnessed the events of that shattering and unifying "Day of Infamy." His mind began to race at high speeds at once on the problems and means of getting the broken fleet back into service for its giant task. Unless the United States regained control of the sea, even greater disaster loomed. Without victory at sea, tyranny soon would surely rule all Asia and Europe. In a matter of time it would surely rule the Americas. Captain Wallin salvaged most of the broken Pearl Harbor fleet that went on to figure prominently in the United States Navy's victory. So the account he masterfully tells covers what he masterfully accomplished. The United States owes him an unpayable debt for this high service among many others in his long career. Table of contents: Introduction -- The trends toward war -- Problems and dilemmas of the United States and eventual preparedness for war -- The fleet at Pearl Harbor -- Imminence of war -- Japanese attack, strategy and tactics -- Results of Japanese surprise air raid -- Washington's response to the Japanese attack -- Observations and statements made by survivors -- Other ships' official reports -- "All hands" engaged in salvage work -- Getting the less-damaged ships ready for action -- Ships sunk at Pearl Harbor -- Conditions which prevailed or were encountered in salvage work -- Final appraisal of the Pearl Harbor attack.
2008.302.198	Reluctant Raiders, The : The Story of United States Navy Bombing Squadron VB/VPB-109 During World War II	Carey, Alan C.	The Reluctant Raiders is perhaps the most documented and researched book on a United States Navy land-based squadron flying the PB4Y-1 Liberator and PB4Y-2

Object ID	Title	Author	Summary
			Privateer. The final result of five years of research, the book traces the squadron's history from its commissioning in August 1943, to the final days of World War II, including: never before published combat and nose art photography; the squadron's tactical organization; a chronology of each combat aircrew's mission record; personnel killed in action; and an appendix containing Japanese shipping and aircraft destroyed or damaged by the squadron From the Author The Reluctant Raiders is about my father's squadron which served in the Central Pacific between December 1943 and September 1945. It was written because I realized that such a work on a Navy B-24 Liberator Squadron had never been told and published at an international level. A considerable amount of historical information was obtained via the National Archives and the Navy History Center, such as After Action Reports and the Squadron History, and should be considered accurate. Therefore, the date, time, and location of missions are based upon official records. However, I decided to leave some controversial information out of the final draft as this work was a tribute to the men and I didn't want to distract from the central purpose of the book. Maybe, one day, I can include additional stories that were told to me after the initial publication. Still, I salute my father and the veterans of VB/VPB-109 for their forgotten service to the United States. (from Amazon.com)

			The USS Hornet Museum is a museum ship in Alameda, California, USA. It is composed of the USS Hornet (CV-12) aircraft carrier, exhibits from the NASA Apollo moon exploration missions, and several retired aircraft from the Second World War and the transonic and early supersonic jet propulsion period. A number of compartments contain exhibits concerning contemporary carriers that are supported by related associations. The flight deck, hangar deck, and first deck below are open for self-guided tours. Docent-led tours are available into the ship's navigation and flight deck control areas of the island and down into one of the engineering spaces containing two of the four ship's propulsion turbines. It is located on the southernmost pier of the former Naval Air Station Alameda. There are plans to relocate it to the corner of the Seaplane Lagoon closest to the

2008.302.224	Sea Cobra : Admiral Halsey's Task Force and the Great Pacific Typhoon	Melton, Buckner F. Jr.	The ripple of interest in the typhoon that struck the U.S. Third Fleet in December 1944, sinking three destroyers and drowning 800 sailors, swells onward in this absorbing naval adventure saga. Historian Melton (Aaron Burr) paints a

Object ID	Title	Author	Summary
			wider canvas than do Bob Drury and Tom Clavin in Halsey's Typhoon (reviewed Oct. 9). Like them, he regales readers with firsthand recollections of the shrieking winds and titanic waves that battered ships to pieces, the ordeal of survivors besieged by thirst and sharks, and the heroism of sailors who rescued them in mountainous seas. He recounts at length the subsequent navy inquiry into the performance of meteorologists, Adm. William Halsey and Cmdr. James Marks of the sunken destroyer Hull, who are pilloried by Drury and Clavin but largely exonerated here. Melton pads out the story with a blow-by-blow of the preceding Battle of Leyte Gulf, an account of another typhoon Halsey sailed the Third Fleet into in 1945, and a chapter on Japanese kamikazes. Melton's prose can be purplish—"The beast was still growing in the heart of the sea... feeding on the heat of the water as if it were mother's milk"—but when the storm breaks, he settles down to a straightforward, gripping narrative. Photos. (Mar.) - Publishers Weekly Copyright © Reed Business Information, a division of Reed Elsevier Inc. All rights reserved. From Booklist The author of A Hanging Offense (2003), on the 1842 Somers mutiny, takes to sea again in fine style in this powerful account of the great typhoon off the Philippines in the autumn of 1944, which inflicted major damage on Admiral "Bull" Halsey's U.S. Third Fleet. This book ranges more broadly than Bob Drury and Tom Clavin's Halsey's Typhoon (2006), covering more kinds of ships (the light carriers really took a pounding) and the subsequent court of inquiry in greater detail. It adds an afterword on Typhoon Viper, which struck the Third Fleet off Okinawa in 1945, and at no

Object ID	Title	Author	Summary
			point does it err on the side of charity to either Halsey or the U.S. Navy's weather forecasting. It does offer unstinted praise for the men of the Third Fleet, few of whom, except the Annapolis graduates, had seen saltwater before Pearl Harbor but who fought their ships through the worst weather disaster ever to strike the U.S. Navy. A solid shelf mate for Halsey's Typhoon and the burgeoning numbers of nautical-calamity tomes. Roland Green Copyright © American Library Association. All rights reserved (from Amazon.com)
2008.302.228	Men We Left Behind, The : Henry Kissinger, the politics of deceit, and the tragic fate of POWs after the Vietnam War	Sauter, Mark	On July 23, 1992, Jane Gaylor, a 71-year-old Texas POW mother, learned from the Pentagon that her son, missing in Vietnam since 1970, might still be alive. For years the Pentagon lied to Mrs. Gaylor, telling her that her son Charles was dead, and deceived the American public about the fate of its other lost sons. A senior Vietnamese government defector, who passed grueling Pentagon lie detector tests, saw U.S. soldiers in Hanoi long after the war ended, including one believed to be Mrs. Gaylor's son. Now, the compelling story of the fate of POWs is revealed in horrifying detail in "The Men We Left Behind." America felt that a great weight was lifted from its shoulders when Henry Kissinger negotiated the end of the Vietnam War and President Nixon claimed that it was "peace with honor." "The Men We Left Behind" reveals that it was neither peace, nor honor, but blackmail and dishonor. North Vietnamese negotiators insisted on the terms of blackmail: massive reconstruction aide in exchange for POWs. The Nixon Administration agreed to these terms, but never told the American public. Five Presidents, the State

Object ID	Title	Author	Summary
			Department and the Pentagon have cloaked the entire history of POWs from Vietnam in secrecy, lying to Congress, families of POWs and the media. "The Men We Left Behind" is the definitive expose of this despicable fraud. The book includes compelling personal stories of individual POWs who were caught behind enemy lines and Pentagon lies. "The Men We Left Behind" unveils secret Senate testimony, including the sworn statement of the Pentagon's top POW expert about specific prisoners left behind. The authors name these POWs and tell their tragic stories. This extensively-documented volume also uncovers startling new evidence that some prisoners may have been secretly returned to the United States. "The Men We Left Behind" reveals how the Senate POW Committee, chaired by Senator John Kerry of Massachusetts, in an effort to rush the Committee's investigation and open trade with Vietnam, covered up the true story and protected Henry Kissinger and other U.S. officials as they concealed the truth. Confirmed by interviews with returned POWs, sources within the U.S. intelligence community and KGB, "The Men We Left Behind" is a shocking indictment of Henry Kissinger, Richard Nixon, the Department of Defense and the Senate Select Committee on POW/MIA Affairs. About the Authors Mark Sauter and James Sanders are co-authors of "Soldiers of Misfortune: Washington's Betrayal of American POWs in the Soviet Union." Sanders is an investigative journalist and former police investigator who lives in Williamsburg, Virginia. Sauter, a former Army officer, is an investigative reporter

Object ID	Title	Author	Summary
			war: the Battle of Midway, June 4, 1942 Missile warfare and the American imperium: Operation Praying Mantis, the Persian Gulf, April 18, 1988 Epilogue: naval battles and the 21st century. (from Amazon.com:) From Booklist A distinguished specialist in naval history and the Civil War studies five decisive moments in American naval history. In the Battle of Lake Erie, Oliver Hazard Perry's modest fleet prevented a British invasion of the Northwest. The Civil War duel between the Monitor and the virginia touched off a building race in ironclads, something that the Confederacy couldn't possibly win. At the Battle of Manila Bay, Commodore George Dewey's victory proved the potential of the new steel-shell-firing navy and opened the way to American overseas expansion. In World War II, the Battle of Midway, if it didn't necessarily prevent a Japanese victory, certainly sped an American one and proved the worth of the carrier-based aviation that has been America's major maritime striking arm ever since. Finally, Operation Praying Mantis in the Persian Gulf proved that when one goes closer inshore, attackers lacking command of the air can still use missiles to noteworthy effect. Roland Green Copyright © American Library Association. All rights reserved --This text refers to the Hardcover edition. Review this award-winning book - perhaps Symond's best ever...is history at its absolute best. Proceedings
2008.302.333	Eyes of the Fleet : A History of Naval Photography	Giberson, Art	Signed by the author. Chief Photographer's Mate Art Giberson retired from the U.S. Navy in May 1977. During his more than 20 years of active

			service, he served on two aircraft carriers, USS Lake Champlain (CVS-39) and USS Oriskany (CVA-34); a submarine tender, the USS Orion (AS-18) and the destroyer USS Zellars (DD-777) . He served two tours of duty at the Naval Schools of Photography in Pensacola, Florida.
2008.302.334	Gunner : An Illustrated History of World War II Aircraft Turrets and Gun Positions	Nijboer, Donald	Through Dan Patterson's remarkable photography, we get to see, close up, the cramped, cold, exposed turrets that so many young men fought and died in. Veterans describe in spirited detail what it was like to fly and fight in the war's most renowned aircraft. Gunner reveals not just the turrets of such famous aircraft as the Lancaster and the B-17, but also the rarely seen gun positions of aircraft such as the Me 410, the Italian S.M. 79 and the Russian Il-2 Shturmovik. This book allows us to imagine what it must have been like to be an air gunner in the Second World War. (from barnesandnoble.com)
2008.302.335	Corsair KD431 : The Time Capsule Fighter	Morris, David	Would you 'restore' an expensive piece of antique furniture by stripping it down to the bare wood, and then re-coating it in a high-gloss polyurethane varnish? If you did, then at a stroke you've probably wiped its value from several thousand pounds down to a few hundred, and destroyed its original character. The same principle holds good for vintage aircraft restoration and preservation. At the Fleet Air Arm Museum, Yeovilton, is a rare Second World War Chance Vought Corsair fighter aircraft. To fully understand the aircraft and unravel the myths and truths surrounding KD431, an enormous research task lay ahead. Thousands of hours of painstaking detail work were required to achieve what initially looked like an impossible goal. The skill and patience of all those concerned was eventually rewarded, but

Object ID	Title	Author	Summary
			not necessarily with the results expected or at times wished for. The end result was the revealing of what is probably the last truly original Corsair fighter left in existence and one of very few Second World War aircraft displayed in such original condition. About the Author DAVID MORRIS is Chief Engineer and Curator of Aircraft at the world-famous Fleet Air Arm Museum, Yeovilton, where he has been on the staff since 1980. (from Amazon.com)

Object ID	Title	Author	Summary
2008.304.002	China - Burma - India	Moser, Don	As with all the Time-Life books of wars, China-Burma is a quick journalistic account of the better known campaigns, events, and personalities of the relevant theatre. The title is an easily digested picture book with a magazine style; primarily an introduction for those with a casual interest in CBI. The reader will encounter intriguing stories of colourful commanders, incredible courage, and daring missions. The semiphotographic account is not a formal history book, and does not propose explanations of events. However, it does give quick understanding of the national attitudes and cultures which shaped the war in Southeast Asia. Primarily, the book follows hot tempered theatre commander Joseph Stilwell, given the task of developing strategy and preparing troops despite insurmountable military and diplomatic obstacles. The struggle is made nearly hopeless from indifferent allied leaders, unprepared troops, corrupt governments and scarce supplies. The author has drawn heavily from Stilwell's own papers for first hand accounts of events, and for evaluations of people and strategic decisions. Much as a movie might, the narrative cuts from action to action between the creation of the CBI theatre in December 1941, to the capture of Rangoon, May 1945. Many photographs accompany the text, which vividly describes the ordeals faced by allied troops fighting the Japanese onslaught. In the mountains, plains and jungles of burma and its surroundings, incredible sacrifices and achievements are made by soldiers amidst unbearable suffering and death. The tragic plight of millions of civillians suffering from war-induced famines, riots, displacement and poverty is also poignantly documented. Among the pages of history,

Object ID	Title	Author	Summary
			single chapters focussing on famous commanders and groups have been inserted for individual description. Though these illustrated commentaries of Stilwell, Chennault and the Flying Tigers, "Hump" ATC aviators, Wingate and his Chindits, and others are overly romantic and occasionally contradict the main text, they are quite interesting reading, and are valuable for explaining the allied strategies used and their consequences. 2008.305.010	On War	Clausewitz, Carl von	'War is merely the continuation of policy by other means' On War is one of the most important books ever written on the subject of war. Clausewitz, a Prussian officer who fought against the French during the Napoleonic Wars, sought to understand and analyse the phenomenon of war so that future leaders could conduct and win conflicts more effectively. He studied the human and social factors that affect outcomes, as well as the tactical and technological ones. He understood that war was a weapon of government, and that political purpose, chance, and enmity combine to shape its dynamics. On War continues to be read by military strategists, politicians, and others for its timeless insights. (from Amazon.com)

Object ID	Title	Author	Summary
	Second World War	(ed)	book relate, "the early history of the Zeppelin airships hardly seemed to be a happy augury for the start of a commercial passenger-carrying airline", Yet that is exactly what the Zeppelins did start, and in their four years of operation from 1910 to 1914 - the first airline service in the world - they carried 34,028 passengers and crew, on journeys totalling some 107,000 miles, without any fotal [sic] accidents. Inevitably, however, it was the heavier-than-air aeroplane, not the airship, which was to create the airline industry that we know today. Louis Bleriot, an example of whose cross-Channel Type XI monoplane forms such a fine frontispiece to this book, showed in 1909 that air travel from country to country was not only practicable but inevitable; though ten more years, four of them occupied by a world war, were to pass before the commercial transport of passengers by aeroplane began to develop in earnest. Ironically, it was the war which helped to make this possible, and the first "airliners" were little more than conversions of aircraft which, only a few months earlier, had been carrying guns and bombs instead of passengers. The Atlantic routes, bridging the old and new worlds, were quickly seen to represent the "Blue Riband" of the air, and were pioneered by such legendary fliers as Alcock and Brown, Lindbergh, Mermoz and, again, Zeppelin. Other routes were blazed by other famous pilots, and newly-created networks were flown by such vividly-contrasting transport aircraft as the Ford and Fokker trimotors, the H.P.42, the little F13 and giant G 38 from Junkers and the Short "Empire" flying-boats; and then in 1936, the "plane that changed the world", the superb Douglas DC-3.

Object ID	Title	Author	Summary
			This book tells the story of them all, not forgetting the immensely valuable part played by the air-mail companies and the world-wide air races such as the "MacRobertson", all of which helped to "improve the breed" and lead towards the Jumbo jets and supersonic airliners of today and tomorrow. (from dust jacket flaps)

			room. Flight crews starting jet engines with cigarette lighters. These and other hi-jinks might not be regulation, but they do appear in Launch 'Em, an amazing and infamous U.S. Navy film shot aboard the carrier Hancock. A short time after its release, Launch 'Em was banned by the brass. And it wasn't alone. The Man From LOX, an ambitious safety film that went a bit too far, was pulled faster than you can say "this is also lox". Private Snafu and a whole series of cartoons that were shown to front-line soldiers during WWII, were put on the scrap heap right after VJ Day. They were gone, but not forgotten. Now, thanks to some hard work and some greased palms, we've managed to assemble a collection of some of the most legendary, most outrageous government -funded films and cartoons ever made. Featured are ten films, including one of the Cold War's most famous civil defense propaganda film, the innocuous Duck and Cover. An episode of Private Snafu , a U.S. Navy cartoon, a blooper reel with Ronald Reagan and other actors, comes along for the price of admission. Also included, is a military film banned for another reason entirely. Featuring President John F. Kennedy's review of the Pacific Fleet, it was forever withdrawn from circulation following his assassination in 1963 . . .until now. Digitally remasted and restored from original 16mm prints, the films featured on this DVD were originally made for the U.S. armed forces and the public. Please note: because of the age and rarity of these films, image and sound quality may vary. Color and black and white

			on the ocean bottom. Original broadcast date: 10/24/2000 Topic: archaeology, technology/weapons and warfare (from http://www.pbs.org/wgbh/nova/1istseason/27.html)
2008.306.012	Mister Roberts	Ford, John	A comedy-drama about life aboard a Navy cargo ship in Pacific waters during World War II. The monotonous non-combat duty of a fun-loving crew is enlivened by a feud between the petty, intolerant captain and an impetuous, highly-respected cargo officer whose continuous efforts to get a transfer to combat duty are blocked by the captain. (from catalog.loc.gov)
2008.306.015	Illustrated Directory of Submarines of the World, The	Miller, David	More than 250 submarines, from the Civil War to the missile-launching, nuclear-powered vessels of today, are described in detail and illustrated with contemporary and archival photography and drawings. Arranged by types: diesel-electrics, non-nuclear, nuclear-attack, missile-armed, and special-role vessels-the book provides a comprehensive overview of every major submarine class around the globe. Each entry includes specifications and incisive development and battle histories. (from Amazon.com)
2008.306.016	Submarine Warfare Today	Chant, Christopher	Submarines have played a vital role in naval warfare since World War I, and with the decision to place nuclear warheads in ballistic missiles in the 1950s, the submarine was thrust into the forefront of international strategy and defense. Today, the nuclear deterrents of the globe's major military powers are either wholly or largely submerged beneath the ocean. Containing full-colour

Object ID	Title	Author	Summary
			artwork and action photographs, Submarine Warfare Today is a comprehensive guide to the different types of submarine in service today, from the giant yet barely detectable ballistic missile submarines to the nuclear and diesel-powered attack submarines that patrol the world's shipping lanes. The book begins with a series of articles on modern submarine warfare before discussing each type of submarine in turn, allowing the reader to compare similar vessels in service with different nations. Submarine Warfare Today also covers the helicopters used in modern anti-submarine warfare and details the range of submarine and anti-submarine mines and torpedoes in use today. Accompanying the illustrations in each entry are highly detailed specifications and a design and development history of each type or class of submarine. With its accessible format, Submarine Warfare Today is an authoritative guide to the high-tech vessels that lurk stealthily beneath the great oceans. Chris Chant is a freelance writer who has written extensively on naval, aviation and military matters. His work includes Modern Combat Aircraft, SAS in Action, Aircraft of World War II, Small Arms, Warships Today, Aircraft Carriers, and Tanks. He currently lives in central England.

2008.306.025	Shadow Divers : The True Adventure of Two Americans Who Risked Everything to Solve One of the Last Mysteries of World War II	Kurson, Robert	From Publishers Weekly Kurson's chronicle of an extraordinary deep-sea discovery makes for a captivating audio experience. In 1991, divers John Chatterton and Rich Kohler came across the buried remains of a German submarine just off the coast of New Jersey. Unable to identify the ship and mystified as to its origins, the two men became obsessed with learning where the U-boat came from and what brought it to the bottom of the sea. Although the story's set-up, which comprises most of the first disc, drags, the pace picks up when the partners begin traveling the world, digging up clues. Reader Scott uses character voices but keeps them subdued, even when dealing with the salty language of the seamen. This is a wise move, since there's plenty of drama inherent in the text; lengthy and detailed passages describing deep-water dives, and the horrible things that can go wrong with them, evoke mental pictures that are atmospheric and downright claustrophobic at times. A segment featuring interviews with Chatterton and Kohler rounds out this satisfying audio edition. Copyright © Reed Business Information, a division of Reed Elsevier Inc. All rights reserved. --This text refers to an out of print or unavailable edition of this title.
2008.306.027	Hitler's Lost Sub	Wolfinger, Kirk	Fifty years after World War II, a team of divers discovered an unidentified German U-boat off the New Jersey coast. What boat was it? And what secret mission had brought it there? This video also traces the history of submarines and undersea warfare from the American Revolution through World War II. (from WorldCat)

2008.306.031	Helicopters at War	Wragg, David	The pre-eminence of the helicopter as a modern naval and military tool was spectacularly demonstrated with its successes in the Falklands and the vital part it played in the victorious outcome. From da Vinci to Sikorsky, the early stages of the helicopter's history are briefly outlined; detailed analysis of the craft's development begins with the experiments of the 1940s and the first true operational use in Korea. Since then the unique potential of the helicopter has been exploited to the full, and this book describes both its contributions in the Suez crisis and after, and its newer roles including its functions as a counter-insurgency and anti-tank weapon. In non-technical language the changing style of the machine of the future is outlined. International in scope and illustrated with 128 photographs, this is the definitive account of the startling advance of one of today's most versatile military weapons. (from dust jacket flap)
2008.306.032	Famous Fighters of the Second World War, Vol. 2	Green, William	It has been said that Great Britain owes her continued existence as a free nation to

Object ID	Title	Author	Summary
			the fighter aircraft more than to any other single weapon, for twenty-one years ago British fighters emerged victorious from the "Battle of Britain"; sounding the death knell for Germany's hopes of invading the British Isles. Today the fighter pilot is likely to see little more of his opponent than a blip on a radarscope; the fighter of the 'forties has passed into history along with the halberd and the crossbow. In this Second Series of "Famous Fighters of the Second World War," the author describes, with the same wealth of detail that characterized the preceding volume, the development and careers of the last of the fighting bi-planes, the little Gloster Gladiator, which carried something of the First World War into that second epic struggle; that indomitable trio of the U.S. Navy and Marine Corps fighters, the Wildcat, Hellcat and Corsair, which destroyed the myth of Japanese aerial invincibility founded by the Zero-Sen; the fighter versions of the Junkers Ju 88 whose nocturnal depredations in the R.A.F.'s bomber stream over the Third Reich were so impressive at one period of the War that the abandoning of large-scale night attacks on German targets was seriously considered; the highly manoeuvrable Macchi C.202 Folgore with its beautifully co-ordinated controls -- a pilot's aeroplane in every respect; the Japanese Army's equivalent of the Zero-Sen, the Nakajima Ki.43 Hapabusa [sic], and its successor, the Ki.84 Hayate which could out-climb and out-manoeuvre the most advanced versions of the Mustang and Thunderbolt; Heinkel's superlative He 219 night fighter which, but for ministerial muddle and confusion, would have provided the Allies with some serious headaches. These and many other fighters, both successful and

Object ID	Title	Author	Summary
			unsuccessful, but all famous, are surveyed with hundreds of rare photographs, highly detailed full-page tone drawings by Peter Endsleigh Castle. and comparative side views of the many variants of each aircraft by Dennis I Punnett. (from dust jacket flap)

2008.306.036	First Book of Submarines, The	Icenhower, Joseph Bryan	Submarines
2008.306.037	Battle of the River Plate, The	Powell, Michael	Documentary-style account of the World War II chase of the German battleship, the Admiral Graf Spee by British forces. The German ship was eventually scuttled off coast of South America. The Graf Spee, with her superior speed, appears and disappears, sinking ship after ship and threatening to cut off crucial Allied supplies. But the net is tightening round the German killer as the last ship sunk by her managed to radio her position before she went down. Three British cruisers, posing as a naval task force, are charged with setting the trap. The film is notable for its amazing sea battles--made with the co-operation of the Admiralty, Royal Navy and US Navy--and non-stereotypical depiction of characters on both sides of the war.

2008.306.040	Battle Ground Pacific Ocean, Disc 1	Timeless Media Group	"Japan is beaten, and carrier supremacy defeated her." - Vice Adm. Marc A. Mitscher, USN At the outbreak of World War II, the United States possessed seven aircraft carriers and one escort carrier. Less than four years later, the number had

Object ID	Title	Author	Summary
			grown to nearly 100. More than any other weapon, the aircraft carrier made the war in the Pacific not only possible, but also winnable. The Fast Carrier Task Force, which included warships of all description, became the main striking force of the United States Navy in the latter half of the Pacific War. By the time of the Battle for Leyte Gulf, it had already proved itself one of the most potent instruments in the history of naval warfare, obliterating Japanese air power, and sweeping enemy warships and merchant shipping from the seas, wherever it had ventured. Disc One: Sea Power In The Pacific Beginning with Japanese aggression in Manchuria in 1931, this film provides an overview of the war in the Pacific, culminating with the nuclear annihilation for Hiroshima and Nagasaki. The Battle For Leyte Gulf Fought in the seas surrounding the Philippine island of Leyte from October 23 to october 26, 1944, the Battle for Leyte Gulf was the largest naval battle in modern history and the last major naval engagement of WWII. Air Power-Pacific Pattern The American drive across the Central Pacific relied on carrier-based air power. As the target softened, battleships would move in and begin to bombard the objective from the sea. Assault troops would then stage amphibious landings, covered by air strikes, and capture the objective. Once secured, naval construction battalions would move in and build or improve airstrips to provide permanent air cover. Silent Victory The heroic efforts of American submarines during the war in the Pacific are frequently overlooked, however,

Object ID	Title	Author	Summary
			military historians fully agree that the submarine campaign recorded positive results disproportionate to its size and numbers. U.S. submarines crippled Japan's merchant marine, sinking 5.3 million tons, or over half of its ship, in the most successful campaign of the war. However, these accomplishments came at a price; 22 percent of submarine personnel died during the conflict, the highest of any American service. Disc Two: The Battle Of Midway On June 4-6, 1942, a large Japanese naval force attempted to capture Midway Island, but was surprised and defeated by U.S. forces in one of the Pacific war's most significant battles. On hand to document the action was a crew of naval photographers led by director John Ford. The Life And Death Of the USS Hornet The aircraft carrier USS Hornet (CV-8) enjoyed an eventful but relatively brief career during WWII. Notable for launching the Doolittle Raid and as a participant in the Battle Of Midway, Hornet succumbed to battle damage after the Battle of the Santa Cruz Islands. The Fighting Lady This Academy Award winning documentary follows the exploits of an unidentified Essex -class aircraft carrier from July 1943 to June 1944. The Fighting Lady and her crew participate in the assaults on Marcus, Kwajalein, Truk and Tinian, culminating with the Battle of the Philippine Sea. Kamikaze During the summer of 1944, a small group of Japanese pilots deliberately attempted to crash their planes into American ships participating in the invasion of Biak Island. For the Japanese, this first attack paved the

Object ID	Title	Author	Summary
			way for a completely new way of fighting the Americans. However, only a small percentage of "Kamikazes" managed to reach their targets, those that did usually inflicted tremendous damage and casualties, making them one of the most feared and destructive weapons the U.S. Navy during the Second World War.
2008.306.041	Jane's Warship Recognition Guide	Faulkner, Keith	Jane's Warship Recognition Guide is the most comprehensive handbook on modern warships. First published in 1994 under the title Jane's Fighting Ships Recognition Guide, it is now revised to take account of the sweeping changes affecting the world's navies. Over 200 classes of warship are covered with: * Class and ship names * Weapons system and radars * Full page photographs of every warship * Detailed line diagrams * Key recognition features (from back cover)
2008.306.042	Submarine Warfare in the Civil War	Ragan, Mark K.	"There is no better guide to the fascinating history of submarine technology that evolved during the Civil War." -- Clive Cussler Product Description Many people have heard of the Hunley, the experimental Confederate submarine that sank the USS Housatonic in a daring nighttime operation. Less well known, however, is that the Hunley was not alone under the waters of America during the Civil War. Both the Union and Confederacy built a wide and incredible array of vessels that could maneuver underwater, and many were put to use patrolling enemy waters. In Submarine Warfare in the Civil War, Mark Ragan, who spent years mining factory records and log books, brings this little-known history to the surface. The hardcover edition, Union and Confederate Submarine Warfare in the

Object ID	Title	Author	Summary
			Civil War, was published to wide acclaim in 1999. For this new paperback edition, Ragan has revised and updated the text to include the full story of the Hunley's recovery and restoration. (from Amazon.com)
2008.306.043	Unlocking the Sky : Glenn Hammond Curtiss and the Race to Invent the Airplane	Shulman, Seth	In the American imagination, Wilbur and Orville Wright are "earnest, young bicycle builders who attacked an age-old technological problem with fresh, ingenious thinking and dedication." There is plenty of truth to this, writes Seth Shulman, but it also obscures an important fact: The first flyers were so secretive and desperate to cash in on their invention that their behavior actually "retarded" the development of aviation. One of their most brutish acts involved a punishing legal fight with Glenn Hammond Curtiss, the inventor of the aileron (wing flaps that stabilize an aircraft in flight), retractable landing gear, pontoons, and much else. Unlocking the Sky suggests that Curtiss deserves at least near-equal billing with the brothers from Dayton. He performed the first public flight in the United States, sold the first commercial airplane, and piloted the first flight from one American city to another. "Curtiss surely belongs in the pantheon of America's greatest entrepreneurial inventors," writes Shulman. Yet he's virtually forgotten today, except by aficionados of aviation history. He comes across as a pioneering hero on these pages--and the Wright brothers as thuggish would-be monopolizers. This may be revisionist history, but it's a history that perhaps could stand revising. --John J. Miller - Amazon.com --This text refers to an out of print or unavailable edition of this title. From Publishers Weekly Journalist Shulman (Owning

Object ID	Title	Author	Summary
			the Future) gives readers a jumbled but compelling revision to accepted aviation history in this study of American aviation pioneer Glenn Curtiss. A bicycle builder like the Wright brothers, he was second into the air (1908), but invented more of modern aviation technology and built better airplanes. This did not keep the Wrights (particularly Orville) from suing Curtiss on the questionable ground that their patent gave them a monopoly of airplane building in the U. S. Shulman's account presents Curtiss as the Little Guy vs. the Corporate Monopolists and uses "non-fiction novel" techniques (e.g., assigning Curtiss present-tense internal dialogue) in a way that calls unnecessary attention to them. It also tries to cram too many subjects into a modest length, but in the end it succeeds in offering the general reader an up-to-date overview of Curtiss's remarkable achievements. 8-page b&w photo insert. 2008.306.044	Green Hell : The Battle for Guadalcanal	Owens, William J.	On 7 August 1942, the amphibious assault on Tulagi and Guadalcanal was the first American offensive in World War II against the rampaging forces of the Empire of Japan. The enemy retaliated from the sea, air and on land. It was swift, fierce and bloody. Yet many soldiers contend the greatest struggle of all was confronting the "Green Hell" - a reeking, rotting, malaria-infested jungle that tested any soldier's strength and courage. Against all odds, the young and inadequately trained and supplied 1st Marine Division, commanded by Lt. General Archer Vandergrift and the Army's equally inexperienced 164th Infantry Regiment held

Object ID	Title	Author	Summary
			onto Guadalcanal for four awesome months against the best trained and seasoned forces that Japan sent in. Every aspect of the battle remains impressive, from the assistance of the Australian Coastwatchers who hid away in dangerous observation points along the Solomon Islands to the Army and 2nd Marine Division's actions in the last two months of the campaign. (from back cover)
2008.306.045	World's Worst Aircraft, The	Yenne, Bill	The subjects of this book are not the greats, nor the near greats, of aviation history, but the black sheep that have embarrassed their builders, enraged their owners and frightened their pilots. In many cases, these are aircraft that never should have been built, and which are more starkly bizarre than the most deranged flights of fantasy. Such aircraft are made ever so much worse simply by the fact that someone once actually took them seriously. Our inclusions have been selected on the basis of their having utterly failed at their intended role, or their having been built for an utterly ill-conceived task. We have included aircraft that were designed to be overweight and underpowered despite existing aeronautical knowledge - or even despite ordinary common sense. Some of our selections were designed -- by people who should have known better -- as being virtually impossible to get off the ground, while others herein were designed to be impossible to land! In the pages that follow, the reader will find some of the worst and most dangerous contrivances ever perpetrated, including Count Caproni's Transaereo, which was really nothing more than three huge triplanes nailed to a houseboat, and the Bullet of Dr. William Whitney Christmas, which

Object ID	Title	Author	Summary
			was more of a murder weapon than an airplane.
			World War II produced many of aviation's greatest achievements, but also some of its worst nightmares. There was the worthless Brewster F2A Buffalo, the asymmetrical (a kinder term than "dishfigured") Blohm & Voss Bv-141, the "disposable" Bachem Ba-349 and, of course, the infamous Yokosuka MXY7, the only airplane ever designed to kill its own pilot!
			It is not our intention to ridicule any planemakers -- except perhaps Count Caproni or Dr. Christmas -- but to poke some lighthearted fun at human eccentricities and to shake an occasional finger at institutions such as General Motors for hoodwinking the U.S. Government with the XP-75. Our purpose is to tour a few of the monuments of foolishness, had planning and bad timing and to have a little fun in doing so.
			Includes: Brewster F2A Buffalo Mitsubishi G4M "Betty" Yokosuka MXY-7 Ohka. Douglas XSB2D-1 "Turkey" Douglas BTD-1 Destroyer Douglas XTB2D-1 Skypirate Douglas XAD2 Skyshark Lockheed XFV-1 Convair XFY-1 Pogo Convair XF2Y-1 Sea Dart Douglas R4D-8 (from dust jacket inner flap)

2008.306.051	Combat Aircraft	Messenger, Charles	This series of books describes the development of the 20th Century armaments industry. Featuring the most modern weapons, and always including the personnel involvement, each book looks at today's examples from all over the world. The books include photographs and illustrations and end with a concise history, tracing the technological development and theaters of operation of each subject. Titles in the series: Tanks and Armored Vehicles, Combat Aircraft, Missiles and Artillery, Surface Warships, Helicopters, Submarines. (from the back cover)
2008.306.052	Smithsonian Book of Flight for Young People, The	Boyne, Walter J.	For thousands of years, people looked up into the sky and dreamed of flight. But all their efforts to create a machine that would actually fly were in vain-until this century, when

Object ID	Title	Author	Summary
			human imagination worked in tandem with science. The Smithsonian Book of Flight for Young People is a fascinating, lavishly illustrated history of aviation, from the first unmanned balloons through the record-breaking flight of the Voyager. Its clear, concise text is brought to life by a collection of handsome black-and-white and color photographs. Adapted under the auspices of the Smithsonian's National Air and Space Museum, this celebration of flight -- and of the men and women who have been an integral part of its progress -- will inform and stimulate readers of all ages. WALTER J. BOYNE is a former director of the National Air and Space Museum and a retired colonel of the United, States Air Force. He has written numerous articles about aviation. (from back cover)

2008.306.053	Last Broadside, The	Wortman, Matthew (director)	From the day the first humans put to sea 50,000 years ago, the ocean has never lost its power to fascinate mankind. This fascination endures despite -- or, perhaps, because of -- the ever-present danger that has been, for a thousand generations, the cost of seafaring: shipwrecks. From prehistoric dugouts to the Titanic herself, new discoveries, and thousands of old ones, retain a firm grip on the imagination of the world; they remain a source of dread and fascination, an example of human frailty in the face of nature's power. Lost Ships is a chronicle of three of the most fascinating adventure stories in maritime history -- or, rather, three stories of adventure and three of exploration, for each part of Lost Ships intertwines the tale of a shipwreck with that of its subsequent discovery by

Object ID	Title	Author	Summary
			Mensun Bound, marine archaeologist and adventurer. Using a combination of high-tech gadgetry -- sonar sensing, satellite mapping, carbon dating -- and old-fashioned detective work, Bound documents the distinct character of each discovery, tells the story of the crew and/or passengers, places each wreck in its historical context, and shows the Challenges overcome in the exploration of the wreck. And what a selection of shipwrecks these are: the Mahdia ship that carried the spoils of Sulla's sack of Athens in the first century B.C.E., sank off the coast of North Africa, and was rediscovered only in 1993; the Agamemnon, Horatio Nelson's first ship of the line and victor at the Battle of Trafalgar; and the Graf Spee, one of Nazi Germany's most powerful warships, scuttled in the River Plate in Uruguay after the most thrilling naval chase of the century. Here are: ... * the near-legendary story of the outgunned British cruisers Exeter, Ajax, and Achilles, and the epic battle they had fought with the pride of the German navy, the pocket battleship Graf Spee...the commerce raider scuttled in the harbor of Montevideo by her extraordinary commander, Zee Kapitan Hans Wilhelm Langsdorff...Langsdorff's suicide, fallen on the battle ensign of the ship he had commanded. Ranging from the Mediterranean to the South Atlantic, from satellites hundreds of miles above the surface of the earth to the ocean floor, Lost Ships is a vivid and exciting record of both nautical adventure and maritime exploration. 2008.306.055	Forgotten Fighters and Experimental Aircraft - US Navy 1918-1941	Bowers, Peter M.	Peter M. Bowers, 52, has been an aviation enthusiast since before Lindbergh flew the Atlantic in 1927. His collection of aeronautical documents was started in 1928, and now numbers in the thousands. While a student at the Boeing School of Aeronautics in 1940 he started an airplane photo negative collection that is now one of the largest in the world, containing nearly 50,000 individually-filed negatives. From 1942-1947, Pete Bowers served in the Army Air Force as an Engineering and Technical Intelligence Officer. He has been employed at the Boeing Company as an engineer since 1947. He learned to fly in 1948 and has accumulated more than 3,500 hours and several advanced pilot ratings. His first article was published in 1938 in a model airplane magazine. From that time on, the Bowers byline has become familiar on historical, technical and sport flying subjects in countless magazines as well as several complete books. In addition to writing and flying, he is active in many national organizations, including the American Aviation Historical Society, the Society of World War One Aero Historians and the Aviation/Space Writers Association. This volume is but the first Mr. Bowers has in preparation in the FORGOTTEN FIGHTERS

2008.306.056	Battle of the Atlantic, The	Aitken, Andy (writer, director)	Hitler's U-boats, roaming in wolfpacks, hunted defenseless convoys of Allied merchant ships. The British used accurate reconnaissance, breaking German codes and U.S. entry into the war to win the battle of the Atlantic. (from WorldCat)
2008.306.058	Battle Ground : The Battle of the Atlantic, Disc 2	Timeless Media Group	The conflict at seas between Allied merchant ships and their escorts and German U-boats, christened the Battle of the Atlantic by Winston Churchill, was the longest and arguably the most critical campaign of WWII. If Britain had fallen, there would have been no base for the western Allies to launch a strategic air offensive or a land invasion of the European mainland to defeat Germany. To survive, Britain needed imports of food, fuel and raw materials from overseas. The Germans used submarines (U-boats), mines, surface warships, armed merchant ships and aircraft during the battle, but it was the U-boats that posed the deadliest threat to Britain's survival. "The Battle of the Atlantic was the dominating factor all through the war... " - Winston Churchill Disc 1 Wolfpacks While german panzer division race toward Warsaw, the powerful German navy prepares for an even greater struggle, the Battle of the Atlantic. Hitler hurls his U-boats into the Atlantic to sever the arteries that feed Britain. Even before the United States enters the war, the bottom of the Atlantic is a formidable cemetery of Allied ships.

Object ID	Title	Author	Summary
			Atlantic Convoy In response to the attack on Pearl Harbor, U.S. industry and its armed forces mobilize in an all out effort to go to war. Yet, supply convoys bound from the United States are stalked by German U-boats. Getting supplies to their destinations safe will be a dominating factor throughout the war. The South Atlantic As war descends on Europe, Germany's surface force is vastly outnumbered, but the pride of the fleet is the incomparable Graf Spee, a pocket battleship combining maximum hitting power with the greatest possible speed. At the outbreak of war, her orders are to destroy and disrupt enemy merchant shipping by all possible means. Let any ship run about of her, and that ship is doomed. Commerce Raider In WWII, the German Navy challenged Allied maritime superiority by pursuing a strategy of economic warfare, called cruiser warfare (Kreuzerkrieg). While the primary agent for the execution of that strategy was the U-boat, Germany also employed ships disguised as noncombatant merchant vessels to attack enemy commerce. This segment combines veteran interviews and archival footage to tell the story of high seas piracy during WWII. The Mid-Ocean Gap As Hitler's U-boats harvest victory after victory in the Battle of the Atlantic, the massacre is costing the Allies millions of dollars and thousands of lives. To counteract enemy submarines, a ring of strategic air bases has been forged. In 600 -mile sweeps, planes encompass the North Atlantic. But there is still a center ocean gap left uncovered by land based planes.

Object ID	Title	Author	Summary
			Disc 2 Crisis In The Atlantic Since the outset of WWII, Britain's ultimate survival depended on the supply convoys linking her to the immense resources of Canada and the United States. By 1941, the U.S. Navy was playing an increasingly active role in this critical campaign. Atlantic Patrol The Royal Canadian Navy, which was tiny in 1939, began an amazing period of growth that eventually made it capable of bearing a substantial part of the fighting in the North Atlantic. This film focuses on the work of Canadian merchant seamen and features an attack on a U-boat by a Canadian corvette. Sea War - Timely Arrival By the summer of 1942, one Allied ship was going down every four hours, yet German I-boat losses remained frustratingly low. In response, the British took steps to extend the range and strength of convoy escort by sea and air. As anti-submarine measures became more successful in the waters around Great Britain, German submarines ranged further into the Atlantic in pursuit of the vital convoys that were Britain's lifeline. D-Day + 3 The invasion of Europe by the Allies was one of the most anticipated, tenuous and ultimately decisive events of WWII, but that fateful day would not have been possible had the Germans been victorious in the Battle of the Atlantic. This film summarizes the tit antic naval effort that was required to make the Normandy landings a success. Beachhead To Britain Produced by Warner Brothers in cooperation with the U.S. Coast Guard, this short Technicolor film is a tribute to U.S. Navy

2008.307.001	Summon the Stars - The Advance of Aviation from the Second World War	Christy, Joe	"Summon the Stars" is the exciting story of America's airmen and aircraft -- both military and civilian -- since 1939. It takes up where the authors' previous book ("Command the Horizon, U.S. aviation 1899-1939") left off, and traces in words and pictures our fabulous aerospace heritage from the beginning of World War II to the landing on the moon. The authors, two of America's best known in this field, again take the reader behind the scenes to seek the "whys" in order to give perspective to the events. The results are often surprising, always fascinating. Each facet of the aviation and space story is discussed and fully illustrated. Scattered

Object ID	Title	Author	Summary
			through the book is a sequence of over 375 remarkable photographs. And the authors, both experienced in the air, treat each topic with humor, devotion, and a lively sense of what is controversial. They offer their own evidence as to who was to blame for Pearl Harbor, assess the "effectiveness" of former Defense Secretary McNamara's cost effectiveness programs, and view critically today's airport congestion problem, the Vietnam War, and many other issues. In their breezy, "pull no punches" prose, they do not hesitate to present their conclusions. McNamara, for example, is seen as a man "possessed of a tidy mind bounded by dollar signs"; his handling of the controversial F-111 fighter program is detailed in full. The Vietnam War policy from the airman's point of view is characterized as one that "would seem to possess little defense, either morally or militarily. The gradualism of 'flexible response' wasted American lives, enemy lives, and the lives of innocent civilians while hindering rather than hastening a conclusion of the conflict." The authors begin their discussion of the present airport crisis by pointing out: "... although the patient ... continues to be mainly attended by quacks, primarily concerned with expanding their own 'practices,' it is still alive and functioning -- to a degree." In addition, Christy and Shamburger have included chapters on the rise and development of Pan American World Airways, the beginnings and growth of private and business flying, and the fun world of the sport aviation enthusiasts who build their own planes and restore and fly antique aircraft. The Strategic Air Command and the man chiefly responsible for its inception (General Curtis E.

			LeMay), are portrayed in depth. And the Berlin Airlift, the Hump pilots, bold Bill Lear, the conquering of the sound barrier, and the "Retread Tigers" who flew in the Korean War of the fifties are all depicted. The photographs the authors have included come from many sources and were carefully selected from the thousands available to them. The illustrations range from a 1919 Glenn Martin Bomber (designed by Donald Douglas) to the proposed space vehicles of the seventies. For the convenience of space buffs, a complete list of every manned space flight -- both Russian and American -- has been included, and the history of modern rocketry, from Dr. Goddard's earliest experiments to the mighty Saturn 5, has been detailed. "Summon the Stas" vividly re-creates Man's boldest dreams and his greatest adventures during a uniquely significant portion of his history. (from dust jacket flaps)

It was 78 pages with 95 photos and over 150 profiles. It was reprinted two time (sic) and has been out of print for more than 15 years this volume has replaced at least part of it. This volume will cover F2H-1, F2H-2/2B/2N/2P Banshees. The F2H-3 and F2H-4 will be covered by a future volume. (from http://www.ginterbooks.com)
2008.311.011	Curtiss XBTC-2 Eggbeater	Kowalski, Bob	Curtiss Model 98 XBTC-2 was designed for a request for a single seat dive/torpedo bomber in 1942. A Wright R 3350 with a four bladed prop should power the -1, a P&W R-4360 with 3-bladed contra props the -2. Work on both variants was slow, to other commitments and stability problems were encountered during wind tunnel testing. The -2 was first flown on January 20th 1945, all work on the -1 was terminated since 1943. The crash of the first prototype in February 1947 and of the second in August 1947 ended the development. March 1945, the Navy ordered 10 relatively minor derivatives of the XBTC-2. They had 2,500-horsepower Wright R-3350-4 engines turning single-rotation propellers. Progress was faster on this model, and the first flight was made in January 1946. Gross weight was 19,072 pounds, and max speed was 297 mph at sea level and 330 mph at 17,000 feet. Armament was two 20mm cannon, eight five-inch rockets and one 2,000-pound

2008.311.012	Vought TA-7C/EA-7L, A-7K "Twosair"	Ginter, Steve	In 1972, Vought modified the first TF-41-powered A-7E (BuNo 156801) as a tandem, two-seat combat trainer demonstrator. The two-seater flew for the first time on August 19, 1972, piloted by John Konrad. After demonstrating the two-seat Corsair II at various naval air stations, Vought was awarded a contract to modify 60 TF30-powered Corsair IIs (24 A-7Bs and 36 A-7Cs) into two-seat trainers, to be designated TA-7C. The first converted TA-7C flew for the the first time on December 17, 1976 and was delivered to the Navy on January 31, 1977. The TA-7Cs were delivered to VA-122 and to VA-174. This book includes US Air National Guard A-7K Greek TA-7Hs, Portugese TA-7Ps, and Thai TA-7Es
2008.312.001	Chronicle of Aviation	Gunston, Bill (ed)	A true bonanza of aviation trivia and hard, factual information best describe this first-rate reference. In the pages of this book are flying machines of all types, from hot-air balloons and the harsh primitive fighters of World War I, through the most modern experimental combat and civil aircraft. While individual descriptions of particular planes are not heavily burdened with technical detail, enough of the latter comes through to give the reader an idea of the impact and place in aviation history of the machine in question. Equally fascinating are the print-media accounts chronicling both the tragic and the exhilarating moments in aviation and our quest for the sky in the early 19th through the 20th century. This volume will be hard to top: it is well balanced, fun to read, and capable of providing enjoyment and solid information for lay reader, aviation enthusiast,

			and scholar alike. Highly recommended for all reference libraries. - Thomas G. Anton, Field Museum of Natural History Lib., Chicago - Library Journal Copyright 1993 Reed Business Information, Inc. (from Amazon.com)
2008.313.001	USS Midway : The Hero Ship	Lou Reda Productions	From its commissioning in 1945 to its role in Operation Desert Storm in 1991, the USS Midway gallantly provided the U.S. military with nearly a half a century of loyal service.
2008.315.001	Jane's Fighting Ships - 1953-54	Blackman, Raymond V. B. (ed)	Jane's Fighting Ships is an annual reference book (also published online, on CD and microfiche) of information on all the world's warships arranged by nation, including information on ship's names, dimensions, armaments, silhouettes and photographs, etc. Its annual editions cover the warships used by the different national naval and paramilitary forces, and provide data on their characteristics. It was originally published by John F. T. Jane (usually known as "Fred T.") in 1898 as Jane's All the World's Fighting Ships. Its success launched a number of military publications carrying the name "Jane's". It is a unit of Jane's Information Group, which is now owned by IHS. From Wikipedia, the free encyclopedia
2008.316.001	USS Midway CVB 41 Mediterranean Cruise 1952	Fox, Duane C. (ed)	Pictorial account of the 126-day deployment of USS Midway (CVB-41) to the Mediterranean Sea in 1952. The ship departed Norfolk, VA on 12 January and returned to Norfolk on 5 May. Port visits included Gibraltar, Augusta, Naples, La Spezia, Genoa, Palermo, Gulf Juan, Suda Bay, Athens and Palma.
2008.317.001	Crusader! : Last of the Gunfighters	Gillcrist, Paul T.	Crusader! is oral history in its purest form. Unlike other aircraft "histories", this story is written 100% from the perspective of the cockpit.

Object ID	Title	Author	Summary
			The author's personal interviews with 16 of the 17 living Crusader pilots who shot down MiGs in combat is the high point of the book.
2008.318.001	USS Saratoga, The : Remembering One of America's Great Aircraft Carriers, 1956-1994	Tanner, Jane	When the USS Saratoga (CV 60) was commissioned on April 14, 1956, she was the most powerful aircraft carrier ever designed. Headlines heralded the mighty vessel as the "Queen of the Seven Seas," and she was affectionately dubbed Super Sara. For the next thirty-eight years, the Saratoga used her intimidating power to help shape history, as she manned the line during the Cuban Missile Crisis, saw 15,000 aircraft fly sorties off her deck during Vietnam, engaged in antiterrorist strikes against Libya, and participated in Operation Desert Storm. Now, after more than 60,000 sailors called her home, the decks are silent. The reign of one of the Navy's proudest ships ended on August 20, 1994, when the Saratoga was decommissioned. Come aboard one last time and see what it was like to live on a floating city, where the work was often dangerous, and the only reminder of home was a photograph of a loved one taped to a bunk wall. During twenty-two deployments to the Mediterranean, a tour off Vietnam, and missions in the Adriatic, the men learned to survive life at sea, braving tragic accidents and reveling in successful missions. The cherished visits to exotic ports of call showed them the world, and they found entertainment and solace in the special guests who came aboard - from Bob Hope to Whitney Houston - and in the practical jokes that added levity to their grinding schedules. In this intimate look, you'll see why the Saratoga changed lives forever, taking aboard boys

Object ID	Title	Author	Summary
			and returning them as men. And why so many sailors wept openly when Super Sara was brought to port one final time. Jane Tanner is a freelance writer and the author of "Jacksonville: Center for Enterprise Excellence on Florida's First Coast." She lives in Jacksonville, Florida, the home port of the USS Saratoga throughout its career. Jacket design by Laura McDonald
2008.318.002	Fighting Ships of World Wars One and Two	Batchelor, John H.	Fighting Ships of World Wars One and Two traces the fascinating development of modern naval warfare. It examines the effectiveness of blockade tactics in World War I and the crucial role of the submarine and aircraft-carrier in World War II. It also deals in depth with the most important sea battles of the two wars, including the Battle of Jutland - the 20th century Trafalgar - and the Battle of Midway, fought between opposing navies who never actually saw one another. The book is illustrated throughout with contemporary action photographs and with John Batchelor's authoritative full-colour drawings;of the major warships. These include such famous ships as the British Dreadnought; the pride of the Japanese navy, the Yamato; the Tirpitz; the US aircraft carrier Hornet; the Bismarck; and the Hood. The text, written by acknowledged naval experts from many countries, provides the background to a complete understanding of naval warfare during the first half of the 20th century. Including: 1914: THE NAVIES WEIGH-IN BATTLE OF HELIGOLAND BIGHT BLOCKADE THE BATTLE OF

2008.318.003	Penguin Encyclopedia of Modern Warfare, The	Macksey, Kenneth	Since the mid-nineteenth century, the art and practices of war, spurred on by the revolution in technology, have changed fundamentally at increasing speed, making it difficult to stay abreast of current events and to remain aware of the implications of past developments. This encyclopedia provides a compact guide to the events and developments of the past 150 years, covering the principal wars, campaigns, battles and personalities of the period, along with descriptions of evolving strategy, tactics, intelligence handling, logistics, weapons and technology. It also supplies background information about such matters as military philosophy, law and the laws of war, training and educational methods, which will be invaluable to students of world history, as well as of

Object ID	Title	Author	Summary
			the art of war. To those for whom knowledge of current affairs and a look into the future is necessary, or those involved with science and industry - indeed for anybody interested in how the modern world is shaped by the application of armed force - this easily assimilated, authoritative reference work is essential. The encyclopedia is fully and clearly cross-referenced and indexed to make it simple to research less familiar subjects with relative ease and in considerable detail. To assist, there are eighty maps and diagrams, plus a chronology. And for those who wish to study in yet greater depth there is an entry on bibliography, plus a bibliography of major reference works and bibliographies. (from dust jacket flap)
2008.318.004	U.S. Ironclad Monitor	Besse, Sumner Bradford	Some say that the battleship began with USS Monitor, the famous ironclad whose battle with the CSS Virginia in Hampton Roads on Mar. 9, 1862, drew the attention of the world. Monitor had a centerline, rotating iron gun turret, armored sides and deck, and steam propulsion. She was ill-equipped for sailing on the high seas, however, and foundered off Cape Hatteras, N.C., in December 1862. (from navy.mil)
2008.318.005	C.S. Ironclad Virginia	Besse, Sumner Bradford	CSS Virginia was the first steam-powered ironclad warship of the Confederate States Navy, built during the first year of the American Civil War; she was constructed as a casemate ironclad using the raised and cut down original lower hull and steam engines of the scuttled USS Merrimack. Virginia was one of the participants in the Battle of Hampton Roads, opposing the Union's USS Monitor in March 1862. The battle is chiefly significant in naval history as the first battle between

			ironclads. (from Wikipedia)
2008.318.006	Encyclopedia of Ships and Seafaring	Kemp, Peter (ed)	This book is a history of ships and sailing. it is illustrated with more than 200 photographs and 50 original drawings, 80 of them in color. In this book, the reader will find nautical terms of the great age of sail--together with more modern ones--defined in modern language and vividly illustrated to provide an immediate grasp of each topic. The text is arranged under twenty main subject headings, each major section opening with an introductory essay written by an expert and setting the various terms in perspective.
2008.318.007	Atlas of Maritime History	Natkiel, Richard	Includes pages on Midway, Battle of, 1942.
2008.318.008	Origins of Sea Terms	Rogers, John G.	"Origins of Sea Terms" differs from existing glossaries and dictionaries. It emphasizes word roots and earliest meanings, making it an indispensable companion to standard maritime dictionaries. The author steers his way through a potentially dry subject with a witty flair that will please as well as inform. The mariner's language is almost universal in its usage and its sources. An idle curiosity about the derivation of the term "peajacket" led John G. Rogers to devour ancient and modern texts in his six-year search for the origins of sea terms. While light-hearted in its presentation, "Origins of Sea Terms" is serious in intent. It contains 1,248 entries pertaining to life onboard ship. hulls and rigging, shiphandling, sea and weather conditions, and naval and technical terms. "Origins of Sea Terms" is volume XI in Mystic Seaport Museum's American Maritime Library. (from dust jacket flap)

Object ID	Title	Author	Summary
2008.318.009	Nautical Dictionary	O'Flynn, Joseph P.	Over 3,800 Maritime Terms Defined
2008.318.010	Glossary of Modern Sailing Terms, A	Rousmaniere, John	Sailing enthusiasts can define "anchor," but how many know what is a "Cunningham" or the meaning of "snub"? This glossary will tell you. It is the only book-length one of modern sailboat terminology. Here arranged alphabetically are approximately 1,100 terms carefully and concisely explained for the beginning sailor confused by the multiplicity of sailing terms as well as for the expert who reads technical articles on sail trim and racing tactics. From "abaft" to "yawl," the author defines not only the traditional words such as "starboard" and "aloft," but newer ones as well - for example, "Barber hauler," "chord," and "twist." The emphasis is modern. Most nautical dictionaries deal only with anachronistic terms from the old square-rigger days, but this glossary describes terms and equipment currently used on sophisticated boats like the 12-Meters racing for the America's Cup. Many of the entries are cross-referenced and, to further clarify the terms, over 150 are illustrated. A valuable handbook for all sailors, it has an added attraction - its size - easily carried and stored on any boat. (from dust jacket flap)
2008.318.011	Naval Terms and Definitions	Soule, C. C. (Charles Carroll)	NAVAL TERMS and DEFINITIONS by C. C. Soule, Commander U. S. Navy , second edition, illustrated with Preface by the author that this little book has been prepared especially for the use of Midshipmen at the Naval Academy in the belief that the language of the sea is threatened with extinction through disuse and misuse, and it is in the early days of a Naval Officer's training that he should acquire a nautical vocabulary to be second nature and so he can give his orders properly and

			correctly. Illustrations are from Knight's "Modern Seamanship," Riesenbergs's "Standard Seamanship for the Merchant Service," the Boy Scouts of America's "Seascout Manual," and Patterson's "Nautical Encyclopedia" with permission.
2008.318.012	Steel Shipbuilder's Handbook	Cook, Clarence Westgate	A glossary of ship building terms, abbreviations and symbols. Includes 4 foldout plates of a typical steel ship.
2008.318.014	Ships and Aircraft of the U. S. Fleet - War Edition	Fahey, James C.	This edition is necessarily incomplete. Information not readily available to the enemy has been excluded. All data beyond that included in the 1941 "Two-Ocean Fleet" edition is based on officially released government documents and matter appearing in the public prints.
2008.318.016	Dictionary of Naval Abbreviations	Wedertz, Bill	Long and complex acronyms and abbreviations are a too-often-confusing fact of life for those in uniform. For anyone interested or working in the field of naval or defense matters, this book is also a valuable reference, especially for the neophyte puzzling over such tortured concoctions like PRELIMPERSACCT, NAVTRAEQUIPCENREPLAN T, LANTSHIPRON and the like. And even things like HAIR, COLA and CLASSMATE have translations much different than those of us in "civvies" would ordinarily think. The only downside to this otherwise superb book is its age. Last updated in 1984, it lacks many of the newer and more heavily used acronyms that have come into use in a military, technological and world situation that has changed so much since the mid-1980s. Perhaps a perpetually available "latest and greatest" edition is impossible in today's fast-moving world, but it would be a tragedy if this work were not revised soon. If nothing else, the reviser or revisers would have the closest thing to job security imaginable these

2008.319.001	Stepping Stones to Tokyo	United States. Navy.	The Battle of Midway in June 1942 may have been the so-called turning point in the Pacific for having stemmed the Japanese advance during World War II, but winning the war at sea was not enough. Retaking the Japanese-held islands for the final assault on Japan was another

Object ID	Title	Author	Summary
			priority. Throughout the Pacific theater of World War II, hospital corpsmen, physicians, dentists, and nurses -- personnel of the Navy Medical Department -- were entrusted with the health of their troops and providing aid when they were injured in combat. This video chronicles the harrowing stories recalled by these non-combatants and their patients as the Navy and Marine Corps confronted the deadliest enemy American fighting men had faced in any war. Jan Herman also oversaw six videos in a series "Navy Medicine at War" about naval medicine during World War II: 1) Navy Medicine's Trial by Fire : December 7th, 1941, 2) Navy Medicine at Normandy: D-Day: June 6, 1944, 3) Guests of the Emperor, 4) Battle Station Sick Bay, 5) Stepping Stones to Tokyo, and 6) Final Victory. As of 10/28/2014, we have volumes 1-5. Vol. 6 is available on the internet: https://archive.org/details/FinalVictoryWMV9640x480. PIN# 806534 Run Time: 40:00

2008.322.002	A6M Zero in Action	Nohara, Shigeru	In 1937, with Japanese forces moving ever deeper into China, and the possibility of a larger conflict with the US over mineral rich Southeast Asia looming on the horizon, the Imperial Japanese Navy issued specifications to Mitsubishi and Nakajima for the development of an advanced "state of the art" fighter which would surpass the performance of any fighter aircraft it was likely to meet. Formally presented to the two aircraft companies on Jan. 17, 1938, during a meeting at the Yokosuka Naval Air Arsenal, Nakajima, believing the specifications to be nearly impossible to meet withdrew from the competition. Mitsubishi however was persuaded to undertake development of the far reaching design specifications.
2008.322.003	International Law for Seagoing Officers	Brittin, Burdick H.	This book has served as a standard reference on international law for 3 decades. Originally intended for officers in the US Navy, it has become an important source of information for all those who use the oceans and its airspace, and who travel to foreign lands in peace and war. This new edition has been thoroughly revised, updated, and expanded with an emphasis on freedom of navigation and the regimes that impact on that freedom.

2008.322.006	AV-8 Harrier	Wogstad, James	The McDonnell Douglas (McDonnell Douglas merged with Boeing in 1997) AV-8B Harrier II is a second-generation vertical/short takeoff and landing (V/STOL) ground-attack aircraft. An Anglo-American development of the British Hawker Siddeley Harrier, the Harrier II is the final member of the Harrier family that started with the Hawker Siddeley P.1127 in the early 1960s. The AV-8B is primarily used for light attack or multi-role missions, and is typically operated from small aircraft carriers, large amphibious assault ships and simple forward operating bases. The AV-8B is used by the United States Marine Corps (USMC), Spanish Navy and Italian Navy. A variant of the AV-8B, the British Aerospace Harrier II was developed for the British military. The TAV-8B is a dedicated two-seat trainer version. The Harrier II and other models of the Harrier family have been called "Jump Jets". The AV-8B was extensively redesigned by McDonnell Douglas from the earlier AV-8A/C Harrier. It has a new wing, an elevated cockpit, a redesigned fuselage, and other structural and aerodynamic refinements. The number of hardpoints was increased from five to seven. Later upgrades, which resulted in the AV-8B(NA) and AV-8B Harrier II Plus, added radar and night-attack capabilities. British Aerospace joined the improved Harrier project as partner in 1981. Since corporate mergers in the 1990s, Boeing and BAE Systems have jointly supported the program.

Object ID	Title	Author	Summary
			AV-8Bs have participated in numerous conflicts, providing close air support for ground troops and performing armed reconnaissance, proving themselves versatile assets. US Army General Norman Schwarzkopf named the USMC Harrier as one of the seven most important weapons of the Gulf War. The aircraft took part in combat during the Iraq War beginning in 2003. The Harrier II has served in Operation Enduring Freedom in Afghanistan since 2001, and was used in Operation Odyssey Dawn in Libya in 2011. Italian and Spanish Harrier IIs participated in overseas conflicts, in conjunction with NATO coalitions. American and Italian AV-8Bs are expected to be replaced by the Lockheed Martin F-35B Lightning II. (from Wikipedia)
2008.322.007	Aviation in the United States Navy	None Stated	Aviation in the United States Navy, with the first fifteen and last fifteen years front inside cover. Aviation and the changes to life with the balloon boat George Washington Parke Custis of Civil War days...called the first aircraft carrier by some with many citations for naval aviation on to 1898, and a constructed platform on the stern of the USS Pennsylvania to Pensacola flight school in 1914. Includes carriers of WWII at Midway, Naval Aviators awarded Congressional Medal of Honor to the Seventh fleet in 1961.
2008.322.008	First Navy Aircraft, The : Curtiss Navy Model A-1	None Stated	The Curtiss Model E was an early aircraft developed by Glenn Curtiss in the United States in 1911. Essentially a refined and enlarged Model D, variants of the Model E made important steps in pioneering the development of seaplanes and flying boats in America. Like its predecessor, the Model E was an open-framework biplane with two-bay unstaggered wings of equal span. In landplane configuration, it

Object ID	Title	Author	Summary
			was fitted with tricycle undercarriage, and as a seaplane with a large central pontoon and outriggers under the wings. Most examples of the Model E followed the pattern of the "headless" Model Ds, with elevators and horizontal stabilizer carried together in the cruciform tail unit. The large ailerons were mounted in the interplane gap, their span continuing past the wings themselves, and were controlled by a shoulder yoke. The Model E was designed and built as a two-seater, although in practice some of the lower-powered versions were converted to single-seaters. The Model E achieved fame through examples purchased by the United States Navy. A Model E-8-75 floatplane became the Navy's first aircraft when purchased in June 1911 and received the designation A-1, as well as the nickname "Triad" since it could operate from the land and sea and in the air. Theodore Ellyson became the Navy's first pilot when he took off from Keuka Lake near Hammondsport, New York on 30 June. In all, the Navy was to purchase some 14 Model Es, designating their earliest examples from A-1 to A-4, then redesignating these together with new purchases in the AH-1 to AH-18 block of serials. These aircraft achieved a number of firsts for the Navy, including the first cross-country flight in a seaplane, a world seaplane altitude record of 900 ft (274 m) and a much later national seaplane altitude record of 6,200 ft (1,890 m), and significantly for later naval operations, the first catapult launch of a seaplane. 2008.322.019	Navigation, Air Traffic Control - NAVELEX Program Information Series	Naval Electronics Systems Command	This volume presents the history, current status and planning for equipment and systems in the areas of navigation and air traffic control. These include an all-weather VLF navigation system, a low cost satellite receiver for small ships and aircraft, improved air traffic control radars and automated carrier landing systems, and air traffic control communications systems compatible with the Federal Aviation Administration network.
2008.322.020	Story of Wake Island, The	Devereux, James P. S.	Here is the true story of how a tiny garrison of Marines, taken by surprise on the day of Pearl Harbor, held isolated Wake Island for 14 blazing days. They sank 5 enemy warships, dozens of planes, and piled the beaches with enemy dead -- and showed the world how Americans could fight!
2008.322.021	Sea Raider Atlantis	Mohr, Ulrich	The Atlantis was the most successful German hunter ship in the day when Germany was the hunter. One of the Ghost Fleet, she cruised for two years, destroying merchant ships in the Indian and Atlantic oceans. The survivors she saved from watery graves were unanimous in their admiration for the efficient German officers and sailors who rescued them. The incredible record of the Atlantis finally ended in November 1941, when she was destroyed in the South Atlantic, shattered by the guns of HMS Devonshire.
2008.322.022	Yard, The : Building a Destroyer at the Bath Iron Works	Sanders, Michael S.	Amazon.com Review Michael S. Sanders describes the birth of a ship with the love of a parent, relating how the

Object ID	Title	Author	Summary
			naval destroyer USS Donald Cook was "assembled over four years piece by piece, steel plate by steel plate, from the first half-moon slices of keel to topmost radar mast, almost by hand." The Yard is a land-based tale focusing on the thousands of men and women in Bath, Maine, who practice the old craft of shipbuilding. Their business has adapted itself to modern ways, but Sanders intriguingly shows how ancient Phoenicians would nevertheless recognize important parts of today's construction process. Sanders spends plenty of time explaining what goes into making a ship: the engineering, the materials, and the labor. He also tells of an industry in peril, as American shipyards compete against foreign builders whose governments subsidize their work. Yet The Yard is ultimately about ordinary people who build: "electricians, pipefitters, welders, braziers, tinknockers, riggers, anglesmiths, straighteners, blasters, and shipfitters" plus "legions of naval architects, draftsmen, and marine engineers." The Yard may lack the dazzle of Blind Man's Bluff and its stories of submarine espionage, but it will hold a similarly strong attraction for readers drawn to human endeavor on the open sea and what makes it possible. --John J. Miller --This text refers to an out of print or unavailable edition of this title. From Publishers Weekly This book is richAin content, in texture and not least in integrity. Sanders has been a ghostwriter, but he finds his own voice in this story of a shipyard, a ship and their people. The yard is the Bath Iron Works (BIW), in Maine, and it has been building ships for more than a century. The ship is the U.S.S. Donald Cook, a state-of-the-art destroyer. From the first rough sizing of the plates to the actual launching takes almost four years. Sanders's greatest

Object ID	Title	Author	Summary
			triumph is his description of shipbuilding processes in language that a lay reader can readily understand. His second achievement is his depiction of the shipyard culture. Sanders eschews an elegiac approach, depicting a shipbuilding community whose ties and loyalties cut across management-labor lines. Shipbuilding is a skilled craft that demands a synergy of strength and artistry. It is dirty. It is dangerous. And BIW's employees merit respect for their skills. At the book's end BIW, rather than fading from the scene, is poised to enter the 21st century at the cutting edge of ship construction. When the navy takes over, the Cook becomes the focus of a different but equally effective kind of crew. The shipyard community is local, coming largely from Bath itself, and it is essentially male. The Cook's commissioning crew is cosmopolitan, with a broad spectrum of backgrounds and experiences, and it includes three dozen women. The men and women who serve on the Cook are like their ship and its builders: among the best in the world. Sanders's own craftsmanship is as worthy of recognition as that of the shipbuilders whose story he so ably tells. Illustrations not seen by PW. (Nov.) Copyright 1999 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. (from Amazon.com)

2008.322.023	Mekong!	Reeves, James R.	In the hellzones of Vietnam, his job is to search and destroy on land and under water. In less than a year, this Naval Special Forces soldier will learn the brutal ways of hand-to-hand guerilla combat in the jungles and swamps of the Mekong Delta. He will become a leader of men and later be forced by his wounds to let others face that challenge. He will fight desperately to stay alive and

			sane in a war that no one can explain so he can return to an America that doesn't understand. James Reeves wrote this authentic, gripping novel about the experiences of his friend, James C. Taylor, a former SEAL. MEKONG! is based on Taylor's story as told to Reeves in many conversations and taped interviews. Taylor's nightmares and flashbacks have been greatly reduced by the telling of this story.
2008.323.001	Grumman Aircraft since 1929	Francillon, René J.	Although Grumman does not rank among the oldest United States aircraft manufacturers, having been founded in 1929, within a decade it was playing a vital role in supplying outstanding naval aircraft, and during the Second World War some 40 percent of the Royal Navy's carrier-based aircraft were also supplied by Grumman. In its early period Grumman produced a series of high-performance biplanes with retractable undercarriages but soon progressed to monoplanes, with the Wildcat, Hellcat and Avenger making important contributions to the Allied cause — particularly in the Atlantic and Pacific theatres. After the war Grumman further enhanced its position with naval jet fighters such as the Panther and Cougar. In more recent years the company has produced aeroplanes for almost every navy task requiring fixed-wing aeroplanes. In parallel with its high-performance naval aircraft Grumman developed its range of amphibious flying-boats, the Widgeon, Goose, Mallard and Albatross, which have seen worldwide civil and military service. For the business world Grumman produced the propeller-turbine Gulfstream

Object ID	Title	Author	Summary
			and its jet-powered successors, while its Ag-Cat biplanes have filled an agricultural role. Rene J Francillon's book traces the development and service histories of all Grumman's aircraft from the earliest FF and SF biplanes up to today's F-14 Tomcat and the experimental X-29 with its forward-swept wing. A wide range of Grumman design projects is included. Production lists and hundreds of photographs and drawings complete this outstanding review of one of the world's great aircraft manufacturers and its products. Cover illustration: An original painting by Dugald Cameron of Grumman TBF-1s of VT-8 US Navy before the Battle of Midway in June 1942. (from dust jacket flap)
2008.323.002	EN-200, Naval Engineering I	Hillman, L. C. (ed)	U.S. Naval Academy textbook for an introductory course in ship stability under varying conditions and the effect that these conditions have on stability considerations in design, construction and operation of naval ships.
2008.323.003	Weather for the Mariner	Kotsch, William J.	This mariner's guide to the weather provides information on weather warnings and fronts, the Beaufort Scale, cloud formations, fog, storms, wind, waves and swells, barometer use, and simple forecasting methods in one easy-to-read volume. It also offers an entire chapter on acid rain and its effects on mariners and their electronic equipment. It is an essential volume for any seamanship bookshelf. (from usni.org)
2008.323.004	Mariner's Weather	Crawford, William P.	The single most important fact of life to the racing yachtsman, cruiser, or merchant seaman is the weather. This book about the weather, written by a master mariner, sets out to fill the gap between "instant knowledge" books which provide a veneer

Object ID	Title	Author	Summary
			of jargon, and heavy texts requiring prior knowledge of meteorology. This book presents instead a seamanlike survey of the basics of weather, offering a foundation for practical observation and interpretation as well as a ground-work for advanced study. Basic information on the atmosphere, winds, heat and its consequences, clouds, fogs, fronts, tropical cyclones, ice, instruments and charts is provided here. (from Amazon.com)
2008.323.006	Annapolis Book of Seamanship, The	Rousmaniere, John	(First launched in 1983, Annapolis remains the sailor's bible, a comprehensive chapter and verse guide to all aspects of seamanship from the simplest ABC's to the most advanced skills and latest electronics. And while much of the original edition has been left in dry dock to make way for the many changes on the water since 1983 --like multihull vessels, satellite tracking, and the reality that while all ships remain "she," there is no longer the assumption that it's a "he" at the helm--Rousmaniere still emphasizes what he's stressed from the first tack: the importance of mastering sailing's fundamentals. This means knowing every inch of your boat and how to handle her, understanding the importance of safety on the seas and preparing for all emergencies, reading the weather, learning to navigate, knowing essential boat maintenance, and being aware of the traditions every sailor steps into whenever he or she sticks feet in a pair of topsiders. Clearly organized and presented, cleanly and smoothly written (given how much technical information he presents, Rousmaniere's prose is blessedly jargon-free), and thoroughly illustrated with photos and drawings, Annapolis is as essential as a good wind, perhaps the one volume no sailor should leave port

Object ID	Title	Author	Summary
			without. --Jeff Silverman Review Yachting magazine A volume that any sailor or would-be sailor simply must own. American Sailing Association The beauty of the book is that it is both a superb reference manual, which any sailor -- regardless of experience -- will want to own, and a readable, practical introduction to sailing for the beginner, A joy to behold. The most complete and best reference book on the sport that has ever been available. Chuck Hawley West Marine Products The Annapolis Book of Seamanship is thorough, well written, and nicely illustrated. Not just a repeat of tired old sailing methods of thirty years ago, it integrates the classic techniques (storm tactics. navigation) with the modern (Crew Overboard Recovery, modern anchors, and electronics). I highly recommend this book and encourage anyone to buy it if they want to improve their sailing skills. Sail magazine The Annapolis Book of Seamanship is about practically everything that has to do with sailing and sailboats. Yachting magazine [Rousmaniere's] chapters on sail trim and weather, in particular, are the best that I can recall reading. Sea magazine The piloting part is unusually thorough and understandable and could serve as a text all by itself. The individual chapters on sailing in heavy weather and handling emergencies are recommended reading for all who sail. Great Lakes Sailing Scanner magazine If you buy one book on sailing this year, this is the one of get. Sailing Canada magazine Mark Smith's line drawings are

2008.330.001	Lucky Thirteen : D-Days in the Pacific with the US Coast Guard in WWII	Wiley, Ken	Embedded in our collective memory of WWII are images of soldiers and Marines splashing ashore on hostile island beaches. Very little has been written about how those troops traversed the last few miles from transport ships into the teeth of fanatical Japanese-held territory. Lucky Thirteen is the sotry of one of those boats and the men who helped win WWII. Ken Wiley was assigned to the attack transport Arthur Middleton and dispatched into the caldron of war int he Pacific Theater. Wiley's responsibilities included command of "Lucky 13", his own Landing Craft Vehicle Personnel (LCVP for short). His assignments included campaigns for the Marshall Islands, the Marianas, the Philippines, and Okinawa.
2008.330.002	Hell in the Pacific : The Battle for Iwo Jima	Rottman, Gordon L.	Iwo Jima was a battle of almost unique savagery. On a Pacific Island less than 5 miles long, over 20,000 Japanese

Object ID	Title	Author	Summary
			defenders had dug themselves into the rock, awaiting the full might of US firepower. By the time the American troops had secured the island in March 1945, after 36 days of horrific fighting, almost every Japanese soldier was dead, along with nearly 7,000 US Marines. Little wonder that Lt.-Gen. Holland Smith, Commander Fleet Marine Forces Pacific, described Iwo Jima as "the most savage and costly battle in the history of the Marine Corps."
2008.330.003	U-Boats vs Destroyer Escorts : The Battle of the Atlantic	Williamson, Gordon	The U-Boat was developed from a small coastal vessel into a state-of-the-art killer, stalking the high seas picking off merchant convoys, until the introduction of the Destroyer Escort and other specialized escort vessels, and the development of dedicated anti-submarine tactics provided a means of defence and attack against the U-boats. Insight into the lives of the Royal Navy, US Navy and Wolfpack crews as they played their deadly games of cat and mouse on the high seas, gambling with their lives and the fate of the war
2008.330.004	Imperial Japanese Navy Battleships 1941-45	Stille, Mark	At the forefront of Japanese naval technology in WWII were its battleships. This title covers the 12 monstrous Japanese battleships that saw service with the Imperial Japanese Navy in WWII. Each class is considered in turn, in light of its design and construction, its armament and wartime modifications. Contents: Kongo Class Fuso Class. Ise Class. Nagato Class. Yamato Class (Battleships).
2008.330.005	Laughing & Gripping with the 97th Seabees	DeLaurentis, Rocky	The story is true for the most part and is based on actual events that took place during the time and places indicated. Names are fictitious. Read of the life in a typical Seabee battalion, seen through the eyes of a 22 year old would-be historian of sea stories for the

2008.332.001	USS Midway (CVA-41) - World Cruise - 1954-55	Patureau, Alan C. (ed.)	Pictorial account of the world cruise of USS Midway in 1954-55, conducted as Midway was changing homeports from Norfolk, VA to the west coast of the U. S. The ship departed Norfolk 27 December 1954 and transited to the Pacific via the Cape of Good Hope. She operated in the western Pacific with the U.S. Seventh Fleet, conducting the Formosa Straits patrol and other fleet exercises and maneuvers in the South China Sea. She arrived at her new homeport of Alameda, CA on 14 July 1955. She remained there for only a week before proceeding north for a major overhaul at Bremerton, WA which commenced on 3 August 1955. Port calls during her deployment included Mayport, Capetown, Colombo, Manila, Hong Kong, Yokosuka and Pearl Harbor.
2008.333.001	Flight Handbook, USAF Series T6-G Aircraft	Secretary of the Air Force	Contains all information necessary for the safe and efficient operation of the North American T-6G Texan aircraft. Published jointly by the USAF and U.S. Navy. This book was designed for Air Force pilots.
2008.335.002	Taking Care of Business... USS Midway CV-41 - 1976	Wong, Gordon (ed.)	Pictorial account of the activities of the USS Midway over an undetermined period that covered events in 1975 to sometime in the first half of 1976. 16 pages of photos are devoted to Operation Frequent Wind during the fall of Saigon in 1975. Port visits in the period included Singapore, Pusan, Karachi, Hong Kong and Subic Bay.
2008.336.001	Aviation Machinist's Mate 3	Rogers, Robert E.	A self-study package to enable ambitious Aviation Machinist's Mates to help themselves fulfill the requirements of the rating.

And watch as man's yearning comes true on a blustery December morning in Kitty Hawk, North Carolina, as Orville Wright makes the first controlled powered flight. View spectacular archival film of some of the most famous - and breathtaking - flights ever made"
2008.340.030	Century of Flight, The, Vol.14 : The Spectacle of Flying	Powell, Robert	"You're about to experience the most death-defying stunts, spine-tingling races and breathtaking formation flights ever performed. By using cockpit-view films, colorful pilot anecdotes and dynamic animated graphics, you'll be able to fly into buildings, under bridges and even through Paris' Arc de Triomphe with early daredevils. Go for a breezy walk on the top wing of a bi-plane, and hang on for dear life as the aircraft begins to roll over. Watch the chilling debut of Adolf Hitler's secretly assembled Luftwaffe, and the mock bombing raids of the Soviet Red Air Force as they rehearse for World War II"
2008.340.031	Century of Flight, The, Vol.22 : Anyone Can Fly	Powell, Robert	Shows the development of civil aviation, including private aviation schools. Shows individuals flying planes, helicopters, microlights, gliders, and hot-air balloons
2008.340.032	Century of Flight, The, Vol.19 : Embracing the World : Civil Aviation : Post 1945	Powell, Robert	"Watch as aviation changes dramatically with each new innovation - from the piston to the turbo prop to the jet engine. See the jet go from planning to prototype to production with the innovative Boeing 707. Witness the crowning moment in civil aviation history - as Europe wins the race to launch a supersonic passenger aircraft - the Concorde. And see what goes on behind the scenes: the air traffic controller overload, the tragic mistakes in design and the constant threat of air terrorism"

Object ID	Title	Author	Summary
2008.340.033	Century of Flight, The, Vol.20 : Angels of Mercy	Powell, Robert	"Witness daring rescues in the face of nature's fury, through actual disaster footage of hurricanes, earthquakes, floods and tornadoes. View the incredible drama of human bravery against manmade disasters like the meltdown of Chernobyl and the crash of a Boeing 737 into the icy waters of the Potomac River. Feel the terror as men and women cling desperately to the roof of a raging skyscraper inferno as helicopters dart between the flames to save survivors. And watch the fearless rescue missions from the front line of America's wars - from WWII to Vietnam to the Persian Gulf"
2008.340.034	Century of Flight, The, Vol.21 : High Above the Trenches : Fighter Combat 1914-1918	Powell, Robert	Details the use of fighter aircraft in Europe during World War I.
2008.340.035	Century of Flight, The, Vol.23 : Romance of the Air, The : Civil Aviation 1919-1939	Powell, Robert	A study of civil aviation between the world wars.
2008.340.036	Century of Flight, The, Vol.24 : Law Enforcement From the Air	Powell, Robert	The use of airplanes in law enforcement, both civilian and military. Includes traffic patrol, drug interdiction, and no-fly-zone patrols.
2008.340.037	Century of Flight, The, Vol.25 : Strike from the Air : The Birth of Strategic Bombing 1914-1918	Powell, Robert	Documents multiple uses of aircraft in World War I.
2008.340.038	Century of Flight, The, Vol.26 : The Parachute Story	Powell, Robert	A look at the development of the parachute.
2009.015.010	Air Forces of the World	Hewish, Mark	A detailed survey of 125 air forces including all major types of military aircraft in service throughout the world. With more than 330 photographs--most in full color--and a panoramic eight-page fold-out containing full color maps.
2009.015.012	Soviet War Machine, The : An Encyclopedia of Russian Military Equipment and Strategy	Bonds, Ray (ed)	With more than 100,000 words of descriptive text and accurate data, hundreds of action photographs, most of which are in full color, over 200 full color and line detailed drawings, many comparative tables and charts, plus eight original maps and diagrams, THE SOVIET WAR MACHINE is a unique volume. Never before has there been such an extensive compilation of information

Object ID	Title	Author	Summary
			and illustration on the already vast and increasingly powerful fighting forces of the Soviet Union and her Warsaw Pact allies. In 248 pages the book traces the history of the Soviet military forces from the 1917 Revolution, and reveals their known strengths today. Expert authors of international repute describe in fascinating detail the weapons, the tactics, the strategies, the leaders and the personnel. They evaluate the equipment -- from infantry pistol to nuclear missile -- as a potential threat to Western nations. They describe what is to some the alarming increase in Soviet military strength, pinpointing the major bases close to the West-facing borders, and detailing the range and probable targets of many nuclear-armed missiles. Russian reconnaissance aircraft and "spy ship" routes are plotted on colored maps which also reveal the positions of warship building yards, major air force bases, ground force emplacements in the USSR and in other Warsaw Pact countries, and also, incredibly, where important strategic missile test sites are situated. THE SOVIET WAR MACHINE is the most dynamic and comprehensive compilation of authoritative comment, extensively researched facts and powerful illustrations on the formidable armed might of the Soviet Union ever to have appeared between two covers. (from dust jacket flap)
2009.015.015	Search and Rescue Survival	Dept. of Air Force	Thorough guide to survival regardless of location or climatic condition. Describes proper use of equipment in survival kit and how to recognize and use natural resources to aid survival.

2009.048.008	Wildcat : The F4F in WW II	Tillman, Barrett	This is the 2nd edition of The Wildcat in WWII. • With a Foreword by Marion Carl, an ace with 16-1/2 victories in the Wildcat. • 113 photographs on quality stock. • Exploits of the British version, the Martlet. • Full appendices including data on both Navy and Marine Wildcat aces.
2009.052.001	Victory in the Pacific	Green, Michael	World War II was the defining conflict of the twentieth century. This illustrated series, written and edited by esteemed military historians, takes readers back in history to the years between 1939 and 1945, when land, sea, and sky were filled with the sounds of battle as Axis and Allied forces fought on every front. Covering both the details and significance of the events of the war, this series includes numerous illustrations, maps, and photographs. An insightful introduction to each volume by series editor Roger Cirillo places each aspect of the war in context. (from books.google.com)
2009.052.003	History of U. S. S. Lexington CV -2, 1927 - 1942	None Stated	USS Lexington (CV-2), nicknamed "Lady Lex,"[1] was an early aircraft carrier built for the United States Navy. She was the lead ship of the Lexington class, though her sister ship Saratoga was commissioned a month earlier. Originally designed as a battlecruiser, she was converted into one of the Navy's first aircraft carriers during construction to comply with the terms of the Washington Naval Treaty of 1922. The ship entered service in 1928 and was assigned to the Pacific Fleet for her entire career. Together with her sister, Lexington was used to develop and refine carrier tactics in a series of annual exercises before World War II. On more than one occasion these included successful surprise attacks on Pearl Harbor, Hawaii. The ship's turbo-electric propulsion

Object ID	Title	Author	Summary
			system allowed her to supplement the electrical supply of Tacoma, Washington during a drought in late 1929 to early 1930. She also delivered medical personnel and relief supplies to Managua, Nicaragua in 1931 after an earthquake. Lexington was at sea when the Pacific War began on 7 December 1941, ferrying fighter aircraft to Midway Island. Her mission was cancelled and she returned to Pearl Harbor a week later. A few days later, she was sent to create a diversion from the force en route to relieve the besieged Wake Island garrison by attacking Japanese installations in the Marshall Islands. The island was forced to surrender before the relief force got close enough, and the mission was cancelled. A planned attack on Wake Island in January 1942 had to be cancelled when a submarine sank the oiler required to supply the fuel for the return trip. Lexington was sent to the Coral Sea the following month to block any Japanese advances into the area. The ship was spotted by Japanese search aircraft while approaching Rabaul, New Britain, and her aircraft shot down most of the Japanese bombers that attacked her. Reinforced by the carrier Yorktown, the two carriers successfully attacked Japanese shipping off the east coast of New Guinea in early March. Lexington was briefly refitted in Pearl Harbor at the end of the month and rendezvoused with Yorktown in the Coral Sea in early May. A few days later the Japanese began Operation MO, the invasion of Port Moresby, Papua New Guinea, and the two American carriers attempted to stop the invasion forces. They sank the light aircraft carrier Sho-ho- on 7 May during the Battle of the Coral Sea, but did not encounter the main Japanese force of the carriers Sho-kaku and Zuikaku until

Object ID	Title	Author	Summary
			the next day. Aircraft from Lexington and Yorktown succeeded in badly damaging Sho-kaku, but the Japanese aircraft crippled Lexington. Vapors from leaking aviation gasoline tanks sparked a series of explosions and fires that could not be controlled, and the carrier had to be scuttled by an American destroyer during the evening of 8 May to prevent her capture. (from barnesandnoble.com:) "On April 1, 2001, aircraft commander Shane Osborn was piloting an EP-3 ARIES II reconnaissance plane over the South China Sea when it was suddenly intercepted and harassed by two Chinese F-8 fighters. On earlier missions the Chinese had flown dangerously close to American aircraft in a nerve-racking game of chicken. This time, however, one of the Chinese fighters went too far, colliding with Osborn's plane and being hacked in two by one of its props, in the process inflicting catastrophic damage to the EP-3. With almost certain disaster impending, Lieutenant Osborn, using the aviation skills of a superbly trained pilot and the strength and endurance of a natural athlete, managed to recover from a near-inverted dive and avoid either ditching the plane in the sea or having the crew bail out, both potentially fatal maneuvers. Instead, he and his crew were able to fly their crippled aircraft through harrowing circumstances to a safe emergency landing on the Chinese island of Hainan. Chinese military forces immediately took the crew into detention." "Meanwhile, an international political crisis, the first of the new Bush administration, erupted between the United States and China as each superpower attempted to force blame on the other.

Object ID	Title	Author	Summary
			Lieutenant Osborn, oblivious to the proceedings in the outside world, was separated from the rest of his crew and isolated in an interrogation room where he was subjected to hour upon hour of aggressive and repetitive videotaped questioning. Osborn, maintaining an iron will throughout, resisted the interrogators' demands that he accept responsibility for the collision and apologize. Finally the two governments were able to work out an agreement for the release of the crew after their being held for eleven days." Born to Fly takes us right into the cockpit of the reconnaissance plane on that fateful day, in a white-knuckle tale of heroism and split-second decision making. It also weaves in fascinating stories of

Object ID	Title	Author	Summary
2009.302.003	Hammer from Above : Marine Air Combat Over Iraq	Stout, Jay A.	"The book is a no holds barred look at the run up to war and then the air campaign over Iraq. Relying on testimony from the pilots and crews freshly returned from Iraq gives the book the feeling of being written then and there by those involved. Jay Stout used a maximum of common sense to let the people tell their own story and interjected himself only to clarify the testimony or to set the picture for the testimony." Excerpted from book review by Richard N. Story.
2009.302.004	Barrier and the Javelin, The : Japanese and Allied Pacific Strategies Feb. to June, 1942	Willmott, H. P.	The second volume of 3 vol. history of the war in the Pacific tells how Japan arrived at a situation in which war with the US was the only means of ensuring her long-term security, resolving her immediate problems of access to raw materials and dealing with an increasingly unwinnable war in China. Explains the basis of Allied miscalculations and provides explanations for the defeats that overwhelmed American, British, and Dutch forces throughout Southeast Asia in a little more than 3 months. The book's stunning assessment of the Coral Sea and Midway battles offers insights and interpretations that continue to be discussed, decades after it was first published.
2009.302.005	Empires in the Balance : Japanese and Allied Pacific Strategies to April, 1942	Willmott, H. P.	1st installment of a 3 vol. study of the strategic policies of the countries involved in the Pacific War. Remarkable in its scope and depth of research, covers the whole range of political, economic, military and naval activity in the Pacific. Comprehensively covers events between December 1941 and April, 1942, concluding with the Doolittle Raid on April 18.
2009.302.006	American Nightfighter Aces of WWII	Thomas, Andrew	The Americans lagged behind their European contemporaries in military aviation in the late 1930s, and it took the Battle of Britain to awaken America to the necessity of having aircraft that could defend targets against night-time attack by bomber

			aircraft. This book examines the numerous aircraft types that were used by the US in this role, beginning with the early stop-gap conversions like the TBM Avenger, Lockheed Ventura and the A-20 Havoc (P-70). It goes on to detail the combat history of the newer, radar-equipped Hellcats, Corsairs and Black Widows that were designed to seek out enemy aircraft and which registered most of the kills made by the Navy, Marine Corps and USAAF in 1944–45. With full-colour profiles and rare photographs, this is an absorbing account of an underestimated flying force: the American Nightfighters. Contents * Chapter 1: Building the Nightfighter Programme * Chapter 2: Yanks in the RAF * Chapter 3: Pacific War Operations * Chapter 4: MTO Operations * Chapter 5: Black Widow in the ETO * Appendices · Paperback; September 2008; 96 pages; ISBN: 9781846033063 (from ospreypublishing.com)
2009.302.007	US Navy PBV Catalina Units of the Atlantic War	Ragnarsson, Ragnar J.	Several books have been written about US naval patrol aviation in World War 2, but none do full justice to the role played by patrol squadrons of the US Navy in the longest, most bitterly fought campaign of the war - the Battle of the Atlantic. From the Arctic to the Equator, anti-submarine aircraft of the US Navy patrolled both sides of the stormy Atlantic alongside their allied counterparts, escorting merchant shipping through submarine-infested waters - the crucial lifeline from the United States to Great Britain and the Mediterranean, and staging troops and supplies for the ultimate liberation of North Africa and Europe. This book

2009.302.013	Soldiers of misfortune : Washington's secret betrayal of America's POWs in the Soviet Union	Sanders, James D.	"Soldiers of Misfortune" is the outrageous and compelling story of thousands of American POWs held captive by the Soviet Union and of the U.S. government officials who lied about their fate for half-a-century, keeping a lid on the most disgraceful cover-up in American history. "Soldiers of Misfortune" reveals for the first time that top U.S. officials, from Roosevelt to Bush, made the determination to write off America's missing sons, secretly held hostage in the Soviet Union. In an explosive revelation. Colonel Philip Corso, an intelligence aide to President Dwight Eisenhower, revealed exclusively to the authors that the president personally made the decision to abandon hundreds, perhaps thousands, of U.S. POWs from the Korean War. More than six years ago, Jim Sanders began his lonely quest for the truth about American POWs "liberated" by Soviet troops in Germany and Eastern Europe near the end of World War II. Then Mark Sauter and R. Cort Kirkwood joined in the search -- sifting through thousands of formerly classified documents, interviewing military brass and escapees from Russia, and evaluating chilling eyewitness accounts. As the authors neared the truth. top level Pentagon officials attempted to "neutralize" and silence them in a desperate attempt to bury the truth from the public. At the same time a

Object ID	Title	Author	Summary
			newspaper office and Sanders's car were surreptitiously entered, his apartment ransacked and crucial documents stolen. A secret covenant of the 1945 Yalta agreement provided that the U.S. and Britain would return Soviet citizens residing in the West. In exchange, Stalin promised to return Western soldiers who had been liberated by the Red Army. After the war, American and British authorities breached that agreement by secretly permitting Soviets to remain in the West. Stalin learned about the deception and retaliated by holding 23,500 American and 30,000 British and Commonwealth soldiers captive in the vast Soviet gulag system. The authors trace the fate of American POWs from the Korean, Vietnam and Cold wars. In the early years of the Cold War, American soldiers and civilians were kidnapped off the streets of Europe and taken to the Soviet Union where they were interrogated and brainwashed, later disappearing into the gulag. Hundreds of Korean War POWs were transferred to China and the Soviet Union during that war. Despite countless denials by American officials, the authors provide new evidence that Vietnam War MIAs were smuggled out of the Asian jungles and taken to live out their lives in Siberian exile. "Soldiers of Misfortune" turns history upside down -- it documents that every president since World War II has lied to the American people about the fate of its fighting men. This book leaves only one unanswered question: How many Americans are still alive in Russia, China and North Korea? About the Authors James Sanders, an investigative journalist (and former police division commander) lives in

2009.302.017	Ark Royal : The Life, Death and Rediscovery of the Legendary Second World War Aircraft Carrier	Rossiter, Mike	The fascinating story of the life, legend and rediscovery of a British naval icon. In June 1941 HMS Ark Royal sailed through a ferocious storm intent on tracking the Bismarck. A dozen swordfish bombers took off from her deck and pounded shell after shell into the German battleship, sending her to the ocean floor. It was a signal victory that resonated around the world. Hitler, furious at the loss of the German fleet's flagship, demanded the destruction of the Ark Royal. HMS Ark Royal, launched in 1938, was one of the most sophisticated weapons in the British military arsenal. In her first two years of operation the Ark Royal survived countless attacks, and was considered one of the luckiest ships in the navy. But her luck was not to last, and within one month of sinking the Bismarck, HMS Ark Royal was destroyed while sailing off the coast of Gibraltar. There she rested, one kilometre beneath the sea, until her wreck was discovered by Mike Rossiter in 2004. In gripping detail, and using the testimony of survivors and the men who lived, flew and fought on the Ark Royal, Mike Rossiter tells her remarkable story, and of the quest to discover this naval legend. About the Author Mike Rossiter is an independent documentary filmmaker, whose work has been nominated for BAFTA and EMMY awards. In 2001 he filmed the search

The time of the first Navy heavy bombing (VB) squadron's arrival in the South Pacific, during the Solomon and the New Georgia Campaigns, to the final campaigns in the Central Pacific.
2009.302.022	HMAS Melbourne	Hall, Timothy	HMAS Melbourne (R21) was a Majestic-class light aircraft carrier of the Royal Australian Navy (RAN). Operating from 1955 until 1982, she was the third and final conventional aircraft carrier(I) to serve in the RAN. Melbourne was the only British Commonwealth naval vessel to sink two friendly warships in peacetime collisions. The ship was laid down for the British Royal Navy as the lead ship of the Majestic class in April 1943, and was launched as HMS Majestic (R77) in February 1945. At the end of World War II, work on the ship was suspended until she was purchased by the RAN in 1947. At the time of purchase, it was decided to incorporate new aircraft carrier technologies into the design, making

Object ID	Title	Author	Summary
			Melbourne the third ship to be constructed with an angled flight deck. Delays in construction and integrating the enhancements meant that the carrier was not commissioned until 1955. Melbourne never fired a shot in anger during her career, having only peripheral, non-combat roles in relation to the Indonesia -Malaysia confrontation and the Vietnam War. However, she was involved in two major collisions with allied vessels. On the evening of 10 February 1964, Melbourne collided with and sank HMAS Voyager when the Daring class destroyer altered course across her bow. Eighty-two of Voyager's crew were killed, and two Royal Commissions were held to investigate the incident. The second collision occurred in the early morning of 3 June 1969, when Melbourne collided with and sank the Allen M. Sumner class destroyer USS Frank E. Evans in similar circumstances. Seventy-four United States Navy (USN) personnel died, and a joint USN–RAN Board of Inquiry was held. These incidents, along with several minor collisions, shipboard accidents, and aircraft losses, led to the reputation that Melbourne was jinxed. Melbourne was paid off from RAN service in 1982. A proposal to convert her for use as a floating casino failed, and a 1984 sale was cancelled, before she was sold in 1985 and towed to China for breaking. The scrapping was delayed so Melbourne could be studied by the People's Liberation Army Navy (PLAN) as part of a secret project to develop a Chinese aircraft carrier and used to train PLAN aviators in carrier flight operations.

2009.302.026	Jets at Sea : Naval Aviation in Transition 1945-55	Marriott, Leo	As World War Two drew to a close, jet-powered aircraft were beginning to be introduced into service. To take advantage of this major development it was necessary for all the world's air powers to rethink combat tactics and develop the means of handling these faster and generally larger aircraft in the air, on land and especially at sea. As this modern breed approached and finally broke the sound barrier, so did landing and takeoff speeds. The decade after the war saw rapid developments in the design of both naval aircraft and their seaborne bases - the aircraft carrier. The first jet to land aboard a carrier was a modified de Havilland Vampire in 1945 on H.M.S. Ocean. Progress was rapid and the application of

Object ID	Title	Author	Summary
			British inventions such as the angled flight-deck, steam catapult and mirror landing sight soon became adopted by the major navies of the world. Naval aircraft too became more sophisticated by the addition of high-lift flap systems and strengthened undercarriages to allow them to operate more safely at sea. The author describes the development of these improvements and then their operational advantages in the Korean War and Suez. He goes on to describe the US development of a potential nuclear carrier-borne bomber, the French Navy and its withdrawal from Vietnam in 1954 and then the use of naval aircraft for anti-submarine work. 			Tomcat fan Collection of World Air Power Journal Materials plus new Inf September 7, 2000 By "cobrachen" This book is published by the same published who published World Air Power and Wings of Fame journals. Part of the pages of this book came from the articles printed on World Air Power before. World Air Power journal is a high quality military journal with excellent photos. This book has all the excellent quality from the journal plus new materials including the 1991 gulf war. F-14 is a legend not only to Navy, but to all of the fighters current in service. There are some books in this field, but with latest information, this is the book to read. Everything you wanted out of an F-14 book plus something extra! June 27, 2005 By CVN-65 This is THE book for Grumman's venerable F-14 Tomcat. Sure, some other books like Tomcat Alley by David F. Brown might beat it in the pictorial department, but overall the information in the articles plus the photos it already has beat any other book about the F-14 Tomcat. Everything about the Tomcat until the books date of publication is covered. From the early beginnings of the Navy's need for a Fleet Air Defense F6D Missileer and the VFX competition that Grumman won all the way to the combat record and current strike attack roles. Every F-14 variant is covered, even the ones that were only concept models. Plus great artistic renderings of historic F-14s. A lot of the articles here came from World Air Power Journal's F-14 cover issue back in the early 90s, but the information here is updated such as the squadron deployments,

			squadron disestablishments and the wars in Eastern Europe. All F-14 Squadrons in the US Navy are covered, and even some stuff about the IIAF/IRIAF F-14s. If all that isn't enough, there's a foreword by F-14 Tomcat pilot D. Stuart Broce, the VF-1 pilot who shot down a Mi-8 helicopter during Desert Storm. It's very interesting and heart warming to read. This book might be hard to find now, but if you get a chance, get it! 5 / 5 STARS! (from Amazon.com)
2009.302.030	F4U Corsair Units of the Korean War	Thompson, Warren	This is the story of the Navy and Marine Corps F-4U squadrons that flew the venerable Corsair in combat against the North Koreans. Although outclassed by the new generation of jet fighters and chiefly used in the close air support role, a number of Corsairs were sent up against the night raiders that North Korea sortied over UN lines after dark, and it was in an F4U-5N nightfighter that Lt. Guy Bordelon became the US Navy's sole ace of the conflict. Including dozens of Corsair pilots' unpublished accounts of the hard-fought air war over Korea, this book also features extensive appendices that list every unit deployment and details of Corsairs lost in the war.
2009.302.031	US Navy A-1 Skyraider Units of the Vietnam War	Burgess, Richard R.	Designed and built as a carrier-based attack aircraft in 1944, the A-1 reached frontline units too late to see combat in World War 2. With the advent of jets in the late 1940s, the Skyraider was seen as a dated throwback to the golden age of piston-engined naval aviation. Despite its days being seemingly numbered, the A-1 proved to be a huge success in the Korean War thanks to it being able to carry virtually any weapon in the naval arsenal from its external wing hardpoints. Nicknamed the "flying dump truck," the A-1 was a key component of naval air wings into the 1960s, thus allowing

Object ID	Title	Author	Summary
			the aircraft to play its part in the escalating conflict in Vietnam. Both A-1 attack and EA-1F electronic countermeasures aircraft saw action in Southeast Asia from 1960 through to 1969, when the last examples were finally retired from carrier decks.

2009.302.038	Pacific War Papers, The, : Japanese Documents of World War II	Goldstein, Donald M.	Japanese source documents that cover the Japanese Navy before WW II; pre-WW II diplomacy; and politics and documents pertaining to the post-Pearl Harbor naval war.
2009.302.039	Encyclopedia of Warships from World War II to the Present Day	Jackson, Robert (ed)	Publisher's Description -- Ahoy, Sea Dogs and Battleship Historians! Here's a book you're bound to love. The Encyclopedia of Warships is an exciting compendium of more than 300 of the finest battleships, aircraft carriers, submarines, destroyers, and cruisers ever built. Each ship is described in great detail and is illustrated with full-color artwork and photographs of the ship in action. You'll learn all about each vessel's design, development, and service record. It's arranged in chronological order by type of vessel and provides a selective guide to the most important fighting vessels from WWII onward. Naval buffs will especially enjoy the meticulous specification tables featuring information on dimensions, powerplant, performance, armament, speed, and complement. This requisite reference includes legendary grey ladies like the Bismarck and the U.S.S. Enterprise.
2009.302.040	Japanese Military Aircraft : Aircraft of the Imperial Japanese Navy. Land-based aviation, 1929-1945 (I)	Cea, Eduardo	Japan was isolated from foreign influence for thousand years, with hardly any influence from the outside world, during which it developed a very particular culture different from the West. It became involved in the "Culture of Western Welfare" at the end of the 19th century. In this background the Japanese army and navy develop new weapons, tactics and machinery. This book is about this changes, particularly the adaptation of its sky fighters to western patterns. In this forth book of our collection "Japanese Aviation", the author explores the aviation land based during the period 1922-1934. (from Amazon.com:)

Object ID	Title	Author	Summary
	Shipborne Aircraft, A		and an award-winning historian of naval flying, this book provides a masterly overview of the history of aviation in the world's navies down to the present day. Heavily illustrated from the author's comprehensive collection of photographs, the book is essential reading for anyone with an interest in navies or air power. The author traces the progress and growing effectiveness of naval air power, concentrating on the advances and inventions that allowed shipborne aircraft to match their land-based counterparts and looking at their contributions to twentieth-century warfare. About the Author David Hobbs, a retired naval pilot and former curator of the Fleet Air Arm Museum in Yeovilton, Somerset, UK, is the author of a number of books on naval aviation, including a comprehensive encyclopedia of the world's aircraft carriers. (Source: Amazon.com)
2009.302.042	I Was Chaplain on the Franklin	O'Callahan, Joseph Timothy	On the morning of March 19, 1945, about 50 miles off the coast of Japan, the aircraft carrier USS Franklin was bombed by Japanese aircraft. Two heavy bombs penetrated the hangar deck killing everyone inside. The planes on the flight deck were knocked into the air, their whirling propellers smashing gas tanks which spilled 17,000 gallons of gasoline. Fires raged from stem to stern on three decks. For four interminable hours, explosions rocked the Franklin. All communications, fire mains and power were gone. Into the thick of the choking smoke and fury came a hero with a white cross on his helmet. "Padre" to the Catholics, "Rabbi Joe" to the Jewish boys, Chaplain O'Callahan was "Father" to everyone on board.

2009.302.046	At War With the Wind : The Epic Struggle With Japan's World War II Suicide Bombers	Sears, David	A victor's-eye view of the desperate suicide-bombing campaign in the closing months of World War II. Former naval officer Sears (The Last Epic Naval Battle: Voices from Leyte Gulf, 2005) writes affectingly of the terror the "divine wind" campaign wrought on American sailors. Contrasting the fate of several American ships to that of USS Cole in the 2000 al-Qaeda terror attack, he demonstrates the damage that the Imperial Navy suicide bombers wrought. That campaign, he observes, was a mark of having no other options, the American fleet having destroyed most of Japan's and forcing "a stunning new 'backs-against-the-wall' paradigm for modern warfare." The author focuses on U.S.

Object ID	Title	Author	Summary
			forces, though with considerable attention to the Japanese side of the equation, for which readers will also want to consult Emiko Ohnuki-Tierney's provocative <i>Kamikaze Diaries</i> (2006) and Albert Axell's <i>Kamikaze: Japan's Suicide Gods</i> (2002). Sears does a particularly good job of bringing in the various voices of the fast-dwindling corps of American survivors of hellish engagements at Leyte and Okinawa, among other places. Drawing on interviews, diaries and other sources, the author depicts men such as a Marine junior officer who, his soldiers suspected, slept at attention, in contrast with one of those fighters who weighed only 135 pounds and was "quiet, introspective, and mild mannered." Both served valiantly, as did most of their comrades, even though, by the closing months of the war, recruits were pushed through training and sent into the field as "90-day wonders fresh from Midshipman School." The horror of kamikaze steeled them - those who survived, that is, for the attacks took a terrible toll on American sailors, Marines and soldiers, which left "even the healthiest veterans perplexed and embittered at a nation, culture, and people capable of devising such attacks." Sears closes with a look at how veterans on both sides bridged the gulf between them.Of considerable interest to students of the Pacific War. (Kirkus Reviews) --Kirkus Reviews A work of power and passion . . . The finest account of the American reaction to the furious suicide raids that attempted to turn the course of the War in the Pacific. --Donald L. Miller, author of <i>D-Days in the Pacific</i> A real stunner . . . A superb narrative of life, death, and incredible heroism. --Jim Hartz, former host of <i>Today</i>

Object ID	Title	Author	Summary
			"Thorough and vivid . . . A timely, absorbing book." --John C. McManus, author of Alamo in the Ardennes
			"Gripping naval combat writing . . . Sears pulls no punches in this powerful account of the sheer terror that was kamikaze warfare." --M. G. Sheftall, author of Blossoms in the Wind
			Mesmerizing . . . With history like this, who needs fiction? Simply thrilling. --Kenneth Sewell, author of Red Star Rogue
			Powerful . . . David Sears salutes American heroism in the bleakest days of the war. --H. Paul Jeffers, author of Command of Honor

			Product Description A Main Selection of the Military Book Club and a Featured Alternate of the History Book Club
			In the last days of World War II, a new and baffling weapon terrorized the United States Navy in the Pacific. To the sailors who learned to fear them, the body-crashing warriors of Japan were known as suiciders; among the Japanese, they were named for a divine wind that once saved the home islands from invasion: kamikaze. Told from the perspective of the men who endured this horrifying tactic, At War with the Wind is the first book to recount in nail-biting detail what it was like to experience an attack by Japanese kamikazes. David

Object ID	Title	Author	Summary
			Sears, acclaimed author of The Last Epic Naval Battle, draws on personal interviews and unprecedented research to create a narrative of war that is stunning in its vivid re-creations. Born of desperation in the face of overwhelming material superiority, suicide attacks by aircraft, submarines, small boats, and even manned rocket-boosted gliders were capable of inflicting catastrophic damage, testing the resolve of officers and sailors as never before. Sears s gripping account focuses on the vessels whose crews experienced the full range of the kamikaze nightmare. From carrier USS St. Lo, the first U.S. Navy vessel sunk by an orchestrated kamikaze attack, to USS Henrico, a transport ship that survived the landings at Normandy only to be sent to the Pacific and struck by suicide planes off Okinawa, and USS Mannert L. Abele, the only vessel sunk by a rocket-boosted piloted glider during the war, these unforgettable stories reveal, as never before, one of the most horrifying and misunderstood chapters of World War II. This is the candid story of a war within a war a relentless series of furious and violent engagements pitting men determined to die against men determined to live. Its echoes resonate hauntingly at a time of global conflict, when suicide as a weapon remains a perplexing and terrifying reality. November 1, 1945 Leyte Gulf The destroyer Killen (DD-593) was besieged, shooting down four planes, but taking a bomb hit from a fifth. Pharmacist mate Ray Cloud, watching from the fantail, saw the plane a sleek twin-engine Frances fighter-bomber swoop in low across the port side. As its pilot released his bomb, Cloud said to himself, He dropped it too soon, and then watched as the

Object ID	Title	Author	Summary
			plane roared by pursued and chewed up by fire from Killen's 40- and 20-mm guns. The bomb hit the water, skipped once and then penetrated Killen's port side hull forward, exploding between the #2 and #3 magazines. The blast tore a gaping hole in Killen's side and water poured in. By the time Donice Copeland, eighteen, a radar petty officer, emerged on deck from the radar shack, the ship's bow was practically submerged and the ship itself was nearly dead in the water. Practically all the casualties were awash below decks. Two unwounded sailors, trapped below in the ship's emergency generator room, soon drowned. The final tally of dead eventually climbed to fifteen. (Source: Amazon.com)
2009.302.047	British Naval Aircraft Since 1912	Thetford, Owen Gordon	An historical summary of British naval aviation is followed by technical descriptions, service histories, squadron allocations, major operational events, illustrated by photographs, and a general arrangement drawing of each major type of landplane, seaplane, flying-boat, or helicopter. This main section is followed by short descriptions and photographs of all other types used including rigid and non-rigid airships. Appendices include listings of naval aircraft strength, aircraft carriers, and other ships to which aircraft have been attached. The collection of the Fleet Air Arm Museum is presented in detail and there is a bibliography.
2009.302.048	Dawn Like Thunder, A : The True Story of Torpedo Squadron Eight	Mrazek, Robert J.	Novelist and former U.S. congressman Mrazek has written an admirable history of the Torpedo Squadron Eight, legendary to World War II buffs. Most of the squadron, flying off the U.S.S. Hornet for the Battle of Midway in obsolete Devastators, perished in a famous low-level attack. But six more modern Avengers flew from Midway itself, and

Object ID	Title	Author	Summary
			the survivors in them formed the nucleus of a squadron that went on to fly Avengers off the carrier Saratoga until it was damaged by a submarine attack, and then from Henderson Field on Guadalcanal in the climactic stages of the campaign for the island. Mrazek has made painstaking use of written sources and the personal memories of surviving members of the squadron to produce a long book, but one that will keep students of the crucial year 1942 reading assiduously. A boon to the literature of the WWII Pacific theater and of naval aviation. --Roland Green Review "A Dawn Like Thunder hooked me from the first page and didn't let go. Mrazek has written the definitive account of how the few American pilots of Torpedo Squadron Eight changed history at Midway and Guadalcanal. A stirring, truly heroic book that is destined to become a classic." (Alex Kershaw, author of The Longest Winter) "A marvelous book. Mrazek's research and obvious affection for his heroes is indeed extraordinary. A Dawn Like Thunder is a spectacular achievement and a vital addition to any Pacific War library." (Hon. Charles Wilson of Charlie Wilson's War) "Robert Mrazek has, with a raw, unsparing telling given grace and life to so many who died so young, so every-day, so gallantly. Wonderfully uplifting." (Frank Deford, author of The Entitled) "A Dawn Like Thunder is no ordinary history. It is a soaring epic prose ballad about a group of young Americans whose rendezvous with destiny in 1942 at Midway and then Guadalcanal blazed a trail their whole generation would follow. With an amazing depth of

Object ID	Title	Author	Summary
			research and a keen eye for detail, Mrazek has brought to vivid life an enduring tale of human tragedy and triumph that will speak down to the latest generation." (Richard B. Frank, author of Downfall) "Robert Mrazek brings the daredevil pilots of Torpedo Squadron Eight back to life in a narrative so vivid and heartbreaking that their courage reaches across the decades, leaving us moved by their incredible sacrifice and heroism." (Thurston Clarke, author The Last Campaign) "A remarkably vivid tale of valor, fate, and young men dying young. Mrazek's epic story, reconstructed with breathtaking research and recounted with a novelist's keen eye for detail, is a worthy monument to Torpedo Squadron Eight." (Rick Atkinson, author of The Day of Battle) "The most highly decorated Navy Flyboys of World War II flew through hell and suffered the highest combat losses. Strap yourself in as Robert Mrazek takes you on a heroic flight into history." (James Bradley, author of Flyboys) (from Amazon.com:) From Booklist

2009.302.049	Kamikazes, Corsairs, and Picket Ships : Okinawa 1945	Rielly, Robin L.	This is the previously untold story of one of the most ferocious and prolonged air/naval battles ever: the battle at the radar picket stations during the American assault on Okinawa in the spring of 1945. It weaves together the experiences of the ships and their crews, in a way that no one has attempted before. The US fleet and its accompanying airpower that took station off Okinawa was of gigantic proportions, such that the Japanese could only rely on suicide attacks to inflict critical damage. While losses in the

Object ID	Title	Author	Summary
			main fleet, including damage to ships such as the Enterprise and Intrepid, have been well covered, less well known is the terrific battle waged on the radar picket line, the fleet's outer defense against Japanese marauders. Of the 206 ships that served on radar picket duty, 29 percent were sunk or damaged by Japanese air attacks, making theirs the most hazardous naval surface duty in World War II. The great losses were largely due to the relentless nature of the kamikaze attacks, but also the improper use of support gunboats, failure to establish land-based radar at the earliest possible time, the assignment of ships ill-equipped for picket duty, and, as time went on, crew fatigue. The nature of the US air cover is also described in full, as squadrons dashed from their carriers and land bases to intercept the Japanese swarms, resulting in constant melees over the fleet. At times, US pilots "chased" enemy planes into walls of AA fire while often having to brave it themselves. Toward the end of the battle, the radar picket ships became the prime kamikaze targets as Japanese pilots despaired of getting through the "big blue blanket" of American fighter planes to reach larger prey. This work is based on primary sources, including ship and aircraft action reports, ship logs, and personal interviews. Robin L. Rielly has written an engrossing narrative of air/naval combat, combining firsthand action with astute tactical and strategic analysis. REVIEWS "To any who want to learn more about the age of the Kamikaze at Okinawa, this book is to be desired. For the serious historian who wants a "blow by blow" coverage of the US defense against the Japanese airpower portion of the battle for Okinawa, it is a must. And for the casual reader...you'll

Object ID	Title	Author	Summary
			gain insight even if you just peruse this book." Object ID	Title	Author	Summary
			The sheer amount of information contained within the neatly designed 432 pages is monumental...the author and his publisher should be congratulated for compiling so much data into this book – making it 'the' single volume reference source on the US Navy from the time of the Washington Navy Treaty to the aftermath of World War Two.' – Warships Magazine Praise for the U.S. Navy Warship series Invaluable tools for any historian working in American naval history. —International Journal of Maritime History These are just what naval history buffs and modelers want when searching for information—everything about a vessel or its class is compiled on the same page. What a time saver! —Ships in Scale An important reference work from a recognized and expert author with a long tradition of scholarship. —American Reference Books Annual A necessity for any library. —Nautical Research Journal Product Description The Navy of World War II, 1922-1946 comprehensively covers the vessels that defined this momentous 24-year period in U.S. naval history. Beginning with the lean, pared-down navy created by the treaty at the Washington Naval Conference, and ending with the massive, awe-inspiring fleets that led the Allies to victory in the Second World War, the fourth volume in the celebrated U.S. Navy Warship series presents a detailed guide to all the warships that exhibited the might of the U.S. Navy to the

Object ID	Title	Author	Summary
			fullest. Showcasing all the ships—both the famous and the often overlooked—that propelled the U.S Navy to prominence in the first half of the twentieth century, The Navy of World War II catalogues all the warships from this era, including those that did battle in the European, Mediterranean, and Pacific Theaters from 1941-1946. From the fleet attacked at Pearl Harbor, to those that fought valiantly in the Battle of the Guadalcanal, to the official surrender of the Japanese on the deck of the USS Missouri, this latest volume is the definitive guide to the warships that defined this pivotal period in U.S. naval history. Each volume in the U.S. Navy Warship series represents the most meticulous scholarship for its particular era, providing an authoritative account of every ship in the history of the U. S. Navy from its first incarnation as the Continental Navy to its present position as one of the world's most formidable naval superpowers. Featuring convenient, easy-to-read tabular lists, every book in the series includes an abundance of illustrations, some never before published, along with figures for actions fought, damages sustained, casualties suffered, prizes taken, and ships sunk, ultimately making the series an indispensable reference tool for maritime buffs and military historians alike.

2009.302.052	Preliminary Pilot's Handbook, FM-2 Airplane	General Motors Corporation	2009.302.052 and 2009.302.053 are both on one CD. Prepared for the purpose of familiarizing flying personnel with the take-off, flying and landing characteristics of the FM-2 airplane; the functions of particular systems and installations; and the operation of the various automatic and manual controls.
2009.302.053	Pilot's Handbook for Navy Model F6F-3, F6F-3N, F6F5, F6F-5N Airplanes	Bureau of Aeronautics	This manual is filed with 2009.302.052 which is also on CD. It was given a separate objectid so that its cataloging information would be easier to find. Prepared for the purpose of familiarizing flying personnel with the take-off, flying and landing characteristics of the F6F airplane; the functions of particular systems and installations; and the operation of the various automatic and manual controls.
2009.302.054	Pilot's Handbook for Navy Model F1F-1N, F7F-2N, F7F-3, F7F-3N Airplanes	Bureau of Aeronautics	Prepared for the purpose of familiarizing flying personnel with the take-off, flying and landing characteristics of the F7F airplane; the functions of particular systems and installations; and the operation of the various automatic and manual controls.
2009.302.055	Pilot's Handbook, F8F-1, F8F-1B, F8F-1N Airplane	Bureau of Aeronautics	Prepared for the purpose of familiarizing flying personnel with the take-off, flying and landing characteristics of the F8F airplane; the functions of particular systems and installations; and the operation of the various automatic and manual controls.

Object ID	Title	Author	Summary
2009.302.056	Flight Handbook, F9F-8 Aircraft	Bureau of Aeronautics	This manual is on the same CD with F8F (2009.302.055). There are two manuals, but only one CD. Prepared for the purpose of familiarizing flying personnel with the take-off, flying and landing characteristics of the F9F airplane; the functions of particular systems and installations; and the operation of the various automatic and manual controls.
2009.302.057	Flight Handbook for Navy Model F11F-1 Aircraft	Bureau of Aeronautics	Prepared for the purpose of familiarizing flying personnel with the take-off, flying and landing characteristics of the F11F airplane; the functions of particular systems and installations; and the operation of the various automatic and manual controls.
2009.302.058	F6F Hellcat at War	Graff, Cory	Descended from the F4F Wildcat (and sometimes called the Wildcat's "big brother"), the Grumman F6F Hellcat debuted with the Pacific Fleet in mid-1943 and soon was taking on Japanese Zero fighters. Over the next two years, the Hellcat proved to be the most successful fighter aircraft in naval history--with more than 5,000 air-to-air kills in the Pacific, and the highest kill/loss ratio of any American fighter plane in Army, Navy, or Marine service during World War II. Taking advantage of the Hellcat's combination of easy handling and lethality, more than 300 of its pilots achieved "ace" status. This lavishly illustrated book offers a thrilling look at the Hellcat at war--from its first action in September 1943, when fighters off the USS Independence shot down a spying seaplane, to its service with the British Fleet Air Arm and its part in the invasion of Southern France. Detailing the Hellcat's design and development, telling its pilots' war stories, and tracing the aircraft's adventures through the end of World War II, this book is a fitting and fascinating tribute to a fighter plane

2009.302.059	U.S. Experimental & Prototype Aircraft Projects: Fighters, 1939-1945	Norton, Bill	His latest book is a valuable reference for anyone interested in the challenges of wartime aircraft production. ---Aviation History, reviewed by C.V. Glines, March 2009 This book will appeal to both the armchair enthusiast as well as the modeler. The enthusiast will enjoy reading the easy to follow text and the modeler will be impressed with the sharp, clear images of the experimental and prototype machines. ---Hyperscale, reviewed by Rodger Kelly, November 2008 You know, it seems like one can count on certain publishers to provide the finest coverage of a subject, and so it is with Specialty Press. An outstanding book that I know will be a major reference for both enthusiast and modeler alike. One that I can easily give my highest recommendation. ---Modeling Madness, reviewed by Scott Van Aken, October 2008 Product Description America's military aircraft industry was forced to grow at an incredible pace during World War II. At the beginning of the conflict, the nation's air arms were out-matched by better-performing Axis aircraft. It was the development, often in secret, and subsequent performance of America's fighter aircraft that helped turn the tide of the war. This book focuses on those American fighter projects of WWII that never reached combat forces, or only in a very limited manner. The book illuminates little known or minimally documented aircraft and projects that significantly advanced fighter design but

Object ID	Title	Author	Summary
			never went into full-rate production and deployment. The standard types are also examined to illustrate the state of the art at the time, the American posture and capabilities, goals set by national and military leadership, and general factors affecting the course of development for classes of fighters. Hence, this work follows the overall development of American fighter aircraft, but emphasizes those little-known projects that matured to the point of significant design development such as mockups, wind-tunnel models, and especially those yielding flying prototypes. Also includes dead-end variants of service types, those only exported after US evaluation, and aircraft that entered service in only small numbers before being overcome by more advanced models or the end of hostilities. (Source: Amazon.com)
2009.302.060	American Secret Projects : Fighters and Interceptors 1945-1978	Buttler, Tony	Throughout aviation history there have been many aircraft designs that have failed to progress beyond the drawing board for a variety of reasons. The aircraft that have taken to the skies represent only a small percentage of those that were planned. This latest title in the highly successful Secret Projects series is also the first to deal with United States aircraft. Compiled by Tony Buttler, who has been researching the subject for many years, this book examines the great variety of U.S. fighter designs between the end of World War II and the period immediately after the USA s withdrawal from Vietnam. The book covers the immediate postwar designs of subsonic aircraft for both the USAF and USN, U.S. supersonic designs, the U.S. Vertical Take Off and Landing program, and the competitions that ultimately led to the development of iconic

			aircraft such as the F-14 Tomcat. About the Author Tony Buttler is a full-time aviation historian with numerous published books and articles.
2009.302.061	Incredible Attack Aircraft of the USS United States, 1948-1949, The	Zichek, Jared A.	This is the comprehensive story of some of the most radical attack aircraft ever designed to operate from an aircraft carrier. These incredible projects were developed in 1948 to equip the USS United States, an immense 65,000-ton supercarrier that was to have been the core of the Navy's nascent strategic nuclear bombardment capability. Legendary aerospace companies such as Convair, Curtiss-Wright, Douglas, Fairchild, Lockheed, Martin, North American, Northrop, and Republic would each submit proposals to the competitions. Varying widely in appearance, these studies ranged from Douglas's relatively small and modern Model 593 to their unconventional Model 1186 series, which was inspired by the X-3 Stiletto and featured a small parasite aircraft mounted atop a gigantic missile. Recently declassified, details of these fascinating projects are presented here for the first time. (Source: Amazon.com)
2009.302.062	Naval Aviation	Kirk, Robert	Presents an exhaustive and fascinating account of the people and planes that launched the U.S. Navy to its current position of international preeminence. The program traces the evolution of Navy fighter aircraft from the first takeoff from a warship by Eugene Ely in 1910 to the top guns of Desert Storm. Contents: Advances in naval aviation -- F4F Wildcat and F6F Hellcat -- Battles from the SS Midway -- Jet aircraft challenges -- The Gulf War's F-14A Tomcat and F/A-18A Hornet --

2009.302.063	Naval Institute Guide to Combat Fleets of the World - 2005-2006 : Their Ships, Aircraft, and Systems	Wertheim, Eric	Future of naval aviation. We also have a hardback copy in Reference. Internationally acknowledged as the best one-volume reference to the world's naval and paranaul forces, this popular Naval Institute guide is both comprehensive and affordable. Updated biennially since 1976, it has come to be relied on for its all-inclusive, accurate, and current data on the ships, navies, coast guards, and naval aviation arms of more than one hundred eighty countries and territories, including for the first time this year East Timor. Large fleets and small maritime forces get equally thorough treatment as evidenced in this new edition, which highlights major and even minor developments that could have an impact on the world scene. From orders of new patrol boats for Yemen and ship-name changes in the Georgian Navy to performance details of the British Navy's new Astute-class submarines and Type 45 destroyers, the information is easily accessed by readers wanting to keep abreast of the world's navies. A thorough indexing of material and a logical ship-typing system makes the book easy to use and allows quick comparisons between fleets. With the retirement of longtime Combat Fleets editor A. D. Baker III in 2002 and the appointment of Washington defense consultant and author Eric Wertheim as the new editor, the guide continues to present timely, authoritative information supported by hundreds of new illustrations. The section on the Indian Navy, for example, presents new photos and line drawings of frigates in the Shivalik and Talwar classes and late-breaking information about the modified Kiev-class aircraft carrier expected to enter India's fleet. For the Chinese Navy, Wertheim provides details of new armament fits and

Object ID	Title	Author	Summary
			construction of its Project 52 destroyers, and for the German Navy he offers service entry details of the new Sachsen-class Type 124 air defense frigates. Even seemingly minor changes in naval aviation are recorded, including Japan's recent decision to purchase new EH-101 helicopters. Readers can also find out the latest about the U.S. littoral combat ships and DD(X) warship programs and the Kidd-class destroyers being transferred to Taiwan. More than a hundred correspondents from around the world contributed information and illustrations to this new volume. From giant aircraft carriers and ballistic missile submarines to tugboats and launches, the characteristics and capabilities of ships large and small are reliably recorded. Complete descriptions of naval aircraft, weapons, weapons systems, and sensors are also provided along with useful commentary on organization, personnel strengths, and bases. For those who need fast access to facts about the world's navies, this single-volume naval reference is essential-and a bargain considering the wealth of material it provides. 4450 photographs. Also available in hardcover (ISBN: 1-59114-934-7). About the Author Eric Wertheim, a strategic analyst in Northern Virginia, consults to government and private industry. A columnist for Proceedings magazine since 1994, he is the coauthor of Chronology of the Cold War at Sea, among other books.
2009.302.064	How to Fly, T-6 SNJ Howard	Bureau of Aeronautics	A collection of Navy training films produced by the Bureau of Aeronautics in the 1953/54 timeframe detailing how to fly the North American Aircraft T-6 SNJ Howard airplane. 2009.302.066	Douglas SBD Dauntless	Janowicz, Krzysztof	(104 pages, English text, includes free decals in 1/72, 1/48 and 1/32 scale. Illustrated with more than 90 b/w photos, 7 color photos, 18 color profiles and 16 pages of scale drawings plus scrap art.
2009.302.067	Boeing XF8B-1 Fighter : Last of the Line, The	Zichek, Jared A.	The Boeing XF8B-1 "Five-in-One" fighter was the last piston engine fighter built by Boeing and very nearly the last fighter built by the company until its merger with McDonnell Douglas in 1997. Conceived in 1943, the XF8B-1 was unusual for a naval fighter in having an internal bomb bay, tremendous range, and counter-rotating propellers, the latter necessitated by its huge Pratt & Whitney R-4360 "Wasp Major" engine, a 28-cylinder air-cooled radial that produced a staggering 3,500 hp. An exhaustive account based on extensive research at the National Archives and Boeing Historical Archive, this book contains an authoritative text along with hundreds of rare photos, general arrangement drawings, color profiles, artist's impressions, and extensive extracts from the pilot's and maintenance manuals. 2009.302.068	Saving Big Ben : A Historical Novel	Prato, Peter J.	Saving Big Ben is a wonderful book June 12, 2001 By A

Object ID	Title	Author	Summary
			Customer Saving Big Ben is a wonderful book. It honors two recipients of the Congressional Medal of Honor, Father Joseph O'Callahan, S.J., and Lieutenant (JG) Donald Gary. It is my belief that when you honor these two men, you honor all Medal of Honor recipients and more than that--you honor all the brave men who fought at their side, suffered with them and often died with them. The great bravery and sacrifices of these men should also be honored and forever remembered. Raymond "Jerry" Murphy, USMC Congressional Medal of Honor Recipient (Korea 1953) Marginal Telling of a Great Story August 1, 2007 By Jim Allen I had such great hopes for this book... but most of them were dashed. On one hand you have a story that rates in the "Top Ten" of the most compelling tales in U.S. naval history. In that same hand, a fictionalized account gives an author the opportunity to immerse the reader to the neck into the story, as only historical fiction can do. There was great potential in the idea! On the other hand you have an author that did not do justice to the story. Character development, dialog and action scenes were not of a quality that would make it outside a self-published environment. There are many other problems but I really don't want to beat the author up. It was a sincere effort on his part. It was good enough to finish and to give three stars. Most of the good comes from the Big Ben story itself and that makes it worth reading. Worth paying \$20-plus bucks for... I'm not so sure. Fiction can be truer than life June 14, 2001 By A Customer Fiction can be truer than life. If you want to know what it felt like to have your life hanging by a thread, trying to fight a

			day status as the country with the world's largest and most powerful navy. (Source: Amazon.com)
2009.302.073	Bloody Friday off Guadalcanal	Cortesi, Lawrence	Guadalcanal (Isatabu) is a tropical island in the South-Western Pacific. The largest island in the Solomons, it was discovered by the Spanish expedition of Alvaro de Mendaña in 1568. The name comes from Guadalcanal, a village in the province of Seville, in Andalusia, Spain, birthplace of Pedro de Ortega Valencia, a member of Mendaña's expedition. During 1942-43 it was the scene of bitter fighting between Japanese and American troops; the American forces were ultimately victorious. At the end of the war, Honiara, on the north coast of Guadalcanal, became the new capital of the British Solomon Islands Protectorate. Guadalcanal is mainly covered in tropical rainforest and jungle, and it has a mountainous interior with an active volcano, Mount Popomanaseu. The population in 1998 was around 85,000. (from Wikipedia)
2009.302.074	Japanese Special Attack Aircraft & Flying Bombs	Ishiguro, Ryusuke	This curious book, translated from Polish, presents details and historical photos of aircraft used or planned for use by the Japanese Navy and Army for special (suicide) attacks in WWII. The authors never clarify their criteria for inclusion of aircraft in the book, but it appears to be aircraft specifically designed for suicide attacks or ones heavily modified near war's end for use in suicide missions. Many of these aircraft never had production models, and the book's historical photos show aircraft not usually seen in works on Japan's Special Attack Forces. The book focuses on the aircraft themselves rather than personal stories related to

Object ID	Title	Author	Summary
			their development and use in suicide attacks, so at times the text reads like an encyclopedia. The book appears to be directed at aircraft modelers rather than a general audience. The first quarter of the book covers the historical background of Japan's kamikaze operations, but it contains quite a few errors. The book's middle section introduces technical details, line sketches (generally 1/72 scale), and historical photos of ten Army special attack aircraft and eight Navy special attack aircraft. The final quarter presents remote-controlled flying bombs, eight used or planned for use by the Army and four by the Navy. The last 24 pages have color profile sketches of two or three aircraft per page, but these at times have an unclear connection with the main text since some aircraft are not included in the middle section on special attack aircraft. Even though the bibliography lists over 40 references, this does not mean that the authors accurately summarize the history of Japan's special attack operations in the book's first part. Mistakes abound. For example, Vice Admiral Shigeru Fukudome is introduced as the "third father of the Kamikaze" (p. 8), along with the first two fathers Vice Admiral Takijiro Ohnishi and Vice Admiral Matome Ugaki, even though Fukudome did not immediately go along with the idea of suicide attacks due to great concerns that they would destroy pilot morale (Inoguchi and Nakajima 1958, 67). The book refers to Army special attack squadrons as Shimpu (Kamikaze) units (pp. 15, 61), even though this term was never used by the Japanese Army. Kamata Flying School is given as the place where the first Army special attack squadron (p. 54), the Banda Squadron, was formed, but

Object ID	Title	Author	Summary
			actually this was Hokota Flight School (Osuo 2005b, 8). Vice Admiral Ugaki led a squadron of 11 aircraft in the last kamikaze attack of WWII, and three aircraft in his squadron returned to base after taking off (Osuo 2005a, 140; Yasunobu 1972, 165). However, the book erroneously states four aircraft returned to base (p. 50). Despite the authors' statement that Vice Admiral Ohnishi got promoted to Admiral after introducing the kamikaze concept into combat tactics (p. 49), this never happened. Another false claim is the following statement: "Days after the armistice, Allied aircraft strafed the moored flotillas of suicide boats that had been prepared, to ensure they could not be used by fanatics ignoring the surrender" (p. 49). Such an event could not have happened as suicide motorboats containing explosive charges had been hidden in tunnels along the coastline of mainland Japan, so such motorboats would not have been visible or already would have been destroyed by Japanese not wanting them to fall into enemy hands. The following two paragraphs from the book's first section provide numerous other examples of how many mistakes fill the book's history of Japan's Special Attack Forces (p. 46): Japanese losses were relatively light, so the following day the Kikusui 8 formation was still able to operate [A]. The radar-patrolling destroyers were the primary targets again [B], as the destroyer USS Drexler was attacked at observation post no. 2 [C]. The attack began as K11W Shiragiku aircraft [D], led by Sub-Lieutenant Shigeru Kawada, emerged from low rain clouds [E]. In an intense attack, the destroyer received

Object ID	Title	Author	Summary
			hits from five aircraft [F], and a series of explosions [G] killed 158 sailors and wounded 51. Eventually [H], fuel tanks caught fire and, following a large explosion, the ship turned over and sank. The USS Braine was the next destroyer to suffer [I], as one of the attacking aircraft fell on her deck and exploded in an ammunition store [J]. The ensuing explosion killed 56 sailors [K], and the ship overturned and quickly sank [L]. A. In this sentence "the following day" refers to May 26, 1945, but Kikusui No. 8 did not actually start until May 27 (Ugaki 1991, 619; Warner and Warner 1982, 259). B. Vice Admiral Ugaki (1991, 619-20), who led the Kikusui attack, gives no indication in his diary that "radar-patrolling destroyers were the primary targets." When he writes about the results of the attack, he does not stress destroyers in any way: "In spite of the small number of attack planes, the following results were confirmed in last night's attacks: three cruisers, one destroyer, and one big transport sunk; one cruiser and two unidentified ships torpedoed and set on fire, while one cruiser and one transport were also torpedoed but the result is unknown." C. The Action Report, Involving Loss of U.S.S. DREXLER (DD741) indicates that Drexler was at Radar Picket Station No. 15, not No. 2 as indicated in the book, when attacked by suicide aircraft (Brown 2002, 97-8). D. The destroyer Drexler did not get attacked by Shiragiku aircraft. The Shiragiku Squadron took off from Kanoya Air Base between 1801 and 1847 on May 27, 1945 (Osuo 2005a, 241), but Drexler did

Object ID	Title	Author	Summary
			not get hit until 0702 the next morning (Brown 2002, 100). The article Who Sank the Destroyer Drexler? provides convincing evidence that Drexler was hit by two twin-engine Ki-45 Army Type 2 Toryu Fighters (Nicks) from the 45th Shinbu Squadron that took off at 0455 on May 28,1945, from Chiran Air Base. E. The Action Report written by Drexler's Captain indicates, "On the morning of 28 May 1945 the sky was clear except for scattered alto cumulus clouds, surface visibility unlimited, wind direction North, force 2, sea calm with small waves" (Brown 2002, 99). The Action Report makes no mention of "low rain clouds" indicated in the book Japanese Special Attack Aircraft & Flying Bombs. F. Only two Japanese aircraft, not five, hit Drexler (Brown 2002, 100-1; Warner and Warner 1982, 260). G. The Action Report written by Drexler's Captain (Brown 2002, 101) makes no mention of a "series of explosions." Instead, the Action Report states: "The warheads from neither torpedo mount were set off. The depth charges were not set off and none detonated when the ship went down." A Navy Department news release described the sinking after the second aircraft hit (Brown 2002, 111): "When the plane struck the destroyer at the base of the #2 stack, a tremendous explosion rocked the ship, blowing parts hundreds of feet and starting an immense oil fire. The Drexler rolled over rapidly on her starboard side and her bow lifted high out of the water. She sank stern first within 49 seconds after the last suicider found his mark." H. The book uses the word "eventually" with the implication that the ship did not sink quickly. The first aircraft

Object ID	Title	Author	Summary
			hit at 0702, and the second plane to hit Drexler approached about 30 seconds later (Brown 2002, 100). The destroyer sank 49 seconds after the second hit (Brown 2002, 101). I. USS Braine was not the next destroyer after Drexler to suffer, since Braine was attacked at 0745 on May 27, 1945 (USS Braine DD-630 web site, Okinawa: "A Fiery Sunday Morning," http://ussbrainedd630.com/okinawa.htm, March 6, 2010), whereas Drexler was attacked the following day at about 0700. J. The survivors of the suicide attack on Braine do not indicate that the kamikaze aircraft "exploded in an ammunition store" (USS Braine DD-630 web site, Okinawa: "A Fiery Sunday Morning," http://ussbrainedd630.com/okinawa.htm, March 6, 2010). K. The actual number of persons killed was 67, not 56 (USS Braine DD-630 web site, Okinawa: "A Fiery Sunday Morning," http://ussbrainedd630.com/okinawa.htm, March 6, 2010). Warner and Warner (1982, 260) and Ugaki (1991, 619) state 66 men were killed. L. Braine did not sink even though the book indicates this. Braine was repaired and then decommissioned in July 1946. The destroyer was recommissioned in April 1951, sold to the Argentine Navy in August 1971, and finally sunk as a target ship in November 1986 (USS Braine DD-630 web site, http://ussbrainedd630.com/, March 6, 2010). The value of Japanese Special Attack Aircraft & Flying Bombs lies in its technical details and historical photographs of Japan's special attack aircraft and weapons, but the book's first section on

Object ID	Title	Author	Summary
			operations conducted by the Luftwaffe against the Allies in World War 2. The Luftwaffe committed a wide range of aircraft to such operations from coastal reconnaissance, with shorter-range and shipboard patrol float planes, to long-range U-boat liaison and transports; for example, the Arado Ar 196 A, Dornier Do 18 and Do 24, Blohm und Voss Ha 138, Heinkel He 115, Junkers Ju 52, the enormous Blohm und Voss 222 Wiking flying boat, and the equally impressive Blohm und Voss 238 - the heaviest aircraft to have flown in the world. The operations of the extensive force included 'shadowing' and long-range protection for U-boats under the auspices of the 'Fliegerfuhrer Atlantik', shipboard operations assigned to the German capital ships, mine-laying, air-sea rescue, torpedo-bombing and transport. David Wadman and Adam Thompson examine in detail the various aircraft used by the Luftwaffe, a popular subject for modellers and historians. Beautifully illustrated using over 220 colour and mono photographs and 15 detailed colour profiles of the specific aircraft types; this is the definitive account of maritime aircraft used by the Luftwaffe. About the Author Adam Thompson has degrees in Curatorial Management from the University of Canberra and History from the University of Sydney. He is currently enrolled in an honors degree in history (University of New England) with his thesis being the performance of Luftwaffe and Kuestenfliegergruppen anti-shipping operations in western Europe. He has worked at the Canadian Warplane Heritage Museum in Hamilton and the Peel Heritage Museum in Peel, Canada. He lives in South Wales, Australia. Raised and educated in Hendon, close to the former RAF

Object ID	Title	Author	Summary
			airfield, David Wadman quickly developed an interest in military aviation. Subsequently intrigued by accounts of the air battles fought over Britain and Europe, he expanded this interest to include the aerial reconnaissance operations of the Luftwaffe. His first published work, 'Aufklärung der Luftwaffe Reconnaissance Aircraft and Units 1935-1945', appeared in 1997, and he has co-authored five titles in the Classic Colours 'Jagdarmee' series. 2009.302.078	Carrier Operations in World War II	Brown, J. D.	The Royal Navy's Fleet Air Arm grew from a small force into a powerful strategic weapon during World War II, with British carrier-based aircraft fighting throughout the world. This complete history describes their activities in the Home, Mediterranean, Eastern, and British Pacific Fleets, together with forces created for specific operations, and lists aircraft and units embarked during the various phases. The author also covers carrier operations in the Pacific between 1941 and 1945, noting that both the U.S. Navy and Imperial Japanese Navy watched the Royal Navy's early carrier operations in the European Theatre and benefited from the lessons. This work combines material from two earlier studies by J. D. Brown and adds information the author was compiling for a third volume at the time of his death. About the Author J. D. Brown, a Fleet Air Arm carrier pilot and head of the Naval Historical Branch after his retirement, is the author of official histories and a number of well-received books. (Source: Amazon.com)

2009.302.086	Aircraft Carriers : A Graphic	Polmar, Norman	"Aircraft carriers are the

Object ID	Title	Author	Summary
	History of Carrier Aviation and Its Influence on World Events		mainstay of United States naval power despite the advent of nuclear-powered missile submarines and other so-called "nuclear age" weapons. Indeed, the versatility of the aircraft carrier has led to the development of a carrier-based nuclear strike capability in the United States, British and French navies for use in a wide spectrum of military operations.' (from dust jacket flaps) AIRCRAFT CARRIERS describes the development and operations of the world's aircraft carriers, from the earliest efforts to fly an airplane from a ship to the use of aircraft carriers in the protracted Vietnamese War. Mr. Polmar, a leading authority on warships, describes ships, men, and aircraft in AIRCRAFT CARRIERS. He tells of the Furious, the first warship to sacrifice a gun for a flight deck; the Shinano, the largest carrier of World War II which was sunk before ever having launched a plane; the Ark Royal, which stopped the Bismarck and helped save Malta; Clement Ader, who was probably the first man to propose the modern aircraft carrier; Vice Admiral Takijiro Onishi, who planned the carrier raid on Pearl Harbor; the Swordfish torpedo plane, which helped win a war it was too old for; the AJ-1 Savage which pioneered the development of a carrier-based strike capability. Mr. Polmar tells his story against the backdrop of politics, technology, and warfare in the 20th Century. The quest for disarmament, the "Billy" Mitchell controversy, the development of the atomic bomb, the Cold War confrontations, and the strife in Africa and the Middle East are examined as they influenced aircraft carriers and how aircraft carriers affected the events.

Object ID	Title	Author	Summary
			Comprehensive and authoritative, this narrative of the "flat-tops" ranges from the Arctic fury of the Murmansk convoy route to the glass-smooth waters of Yankee Station in the Tonkin Gulf: a vast panorama unfolded with fascinating detail and clarity by Mr. Polmar and his collaborators, General Minoru Genda, Japanese Air Self-Defense Force (formerly Captain, Imperial Japanese Navy); Captain Eric M. Brown, O.B.E., Royal Navy; and the late Professor Robert M. Langdon, U.S. Naval Academy. Norman Polmar is a leading authority on 20th Century warships. His previous books in this field are Atomic Submarines (1963) and Death o f the Thresher (1964). His articles on military subjects regularly appear in periodicals in the United States and abroad. He is currently a naval operations specialist with the Northrop Corporation's Deep Submergence Systems Program. Previously he was Assistant Editor of the Naval Institute Proceedings and before that Associate Editor of the Navy Times. Mr. Polmar is Editor of the United States section of the annual reference volume Jane's Fighting Ships. Mr. Polmar is a graduate of The American University in Washington, D.C. He resides with his wife and two young children in Lanham, Maryland, a suburb of Washington. JACKET TYPOGRAPHY BY DIANE WHITEBAY JACKET PHOTOGRAPH COURTESY OF UNITED STATES NAVY Printed in the U.S.A.

2009.302.087	Aircraft Carriers of the U.S. Navy	Terzibaschitsch, Stefan	A fully comprehensive book on the most powerful ships in the history of naval warfare that covers all American fleet carriers - even those never completed - between Langley (CV-1), a converted collier, and the latest giants of the Nimitz

2009.302.088	Strike from the Sea : Development of US Navy Attack Aircraft from Skyraider to Super Hornet 1948-Present	Thomason, Tommy H.	Strike from the Sea: U.S. Navy Attack Aircraft from Skyraider to Super Hornet 1948-Present celebrates carrier-based air-to-ground attack aircraft which first came into operation during the Korean War, reached maturity during Vietnam, and are deployed today throughout the world. Well-known author and naval aviation authority Tommy Thomason not only explores such legendary Navy aircraft as the A4D Skyhawk, A3J Vigilante, and A-6 Intruder, but also the critical role of the aircraft carrier itself, for without these massive nuclear-powered floating airfields, U.S. Navy attack aircraft would have no sea-borne bases from which to operate. Armament from gravity bombs to today's GPS-guided "smart weapons" are covered in great detail, and this book also explains that while many different types of airplanes were required for flying attack missions in the past, only one aircraft - the advanced F/A-18E/F Super Hornet - is needed to carry out these same missions in an even more complex and hostile combat environment today. (Source: publisher's website)
2009.302.089	Unlocking the Sky : Glenn Hammond Curtiss and the Race to Invent the Airplane	Shulman, Seth	In the American imagination, Wilbur and Orville Wright are "earnest, young bicycle builders who attacked an age-old technological problem with fresh, ingenious thinking and dedication." There is plenty of truth to this, writes Seth Shulman, but it also obscures an important fact: The first flyers were so secretive and desperate to cash in on their invention that their behavior actually "retarded" the development of aviation. One of their most brutish acts involved a punishing legal fight with Glenn Hammond Curtiss, the inventor of the aileron (wing flaps that stabilize an aircraft in flight), retractable

Object ID	Title	Author	Summary
			landing gear, pontoons, and much else. Unlocking the Sky suggests that Curtiss deserves at least near-equal billing with the brothers from Dayton. He performed the first public flight in the United States, sold the first commercial airplane, and piloted the first flight from one American city to another. "Curtiss surely belongs in the pantheon of America's greatest entrepreneurial inventors," writes Shulman. Yet he's virtually forgotten today, except by aficionados of aviation history. He comes across as a pioneering hero on these pages--and the Wright brothers as thuggish would-be monopolizers. This may be revisionist history, but it's a history that perhaps could stand revising. --John J. Miller --This text refers to an out of print or unavailable edition of this title. - Amazon.com From Publishers Weekly Journalist Shulman (Owning the Future) gives readers a jumbled but compelling revision to accepted aviation history in this study of American aviation pioneer Glenn Curtiss. A bicycle builder like the Wright brothers, he was second into the air (1908), but invented more of modern aviation technology and built better airplanes. This did not keep the Wrights (particularly Orville) from suing Curtiss on the questionable ground that their patent gave them a monopoly of airplane building in the U. S. Shulman's account presents Curtiss as the Little Guy vs. the Corporate Monopolists and uses "non-fiction novel" techniques (e.g., assigning Curtiss present-tense internal dialogue) in a way that calls unnecessary attention to them. It also tries to cram too many subjects into a modest length, but in the end it succeeds in offering the general reader an up-to-date overview of Curtiss's remarkable achievements. 8-page b&w photo insert.

2009.302.097	British Carrier Aviation : The Evolution of the Ships and Their Aircraft	Friedman, Norman	From the seaplane carriers of 1914 to the success of the Falklands Taskforce the record of the Royal Navy carriers and naval aircraft for innovation and operational achievement has been unequalled among world navies. It is a record which has been maintained against a background of often limited resources and a British role in the world which has

Object ID	Title	Author	Summary
			changed dramatically since 1918. British Carrier Aviation is the story of that record. The author's thematic approach does full justice to the complex interrelationship between strategy, technology and design in the evolution of this exceptional naval arm. He draws widely on official sources, and includes many previously unpublished drawings and photographs of the carriers and their aircraft, making British Carrier Aviation as much a book for the layman as for the naval expert, and of major interest to aircraft- as well as ship-enthusiasts. (from back cover)
2009.302.098	Aircraft Instruments	Naval Air Technical Training Command	Written to present to the enlisted men of Naval Aviation essential information on procedures used in the installation, operation and maintenance of aircraft instruments.
2009.302.099	Battle of Surigao Strait	Tully, Anthony P.	"Aims to sort out the discrepancies that have crept in over time to standard accounts of the battle... a confused and complex night action. Of special interest is Tully's exploitation of fresh source materials." -- Malcolm Muir, Jr., author of Black Shoes and Blue Water: Surface Warfare in the United States Navy, 1945--1975 "If the vibrant international community of experts who study the Pacific War and discuss and debate it online can be seen as a mafia, then Anthony Tully is its consigliere. Whenever a question arises about the battle history of World War II in the Pacific--what really happened after the fleets collided, dive-bombers entered their dives, and shot met plate--he is the indispensable man. In this book he paints Admiral Nishimura's high-speed run into history with an entirely fresh palette of

Object ID	Title	Author	Summary
			detail, from the command decisions to the after-action reports. It offers naval history buffs something fresh and easy to relish on almost every page" - - James D. Hornfischer, author of Ship of Ghosts and The Last Stand of the Tin Can Sailors Product Description Surigao Strait in the Philippine Islands was the scene of a major battleship duel during the Battle of Leyte Gulf. Because the battle was fought at night and had few survivors on the Japanese side, the events of that naval engagement have been passed down in garbled accounts. Anthony P. Tully pulls together all of the existing documentary material, including newly discovered accounts and a careful analysis of U.S. Navy action reports, to create a new and more detailed description of the action. In several respects, Tully's narrative differs radically from the received versions and represents an important historical corrective. Also included in the book are a number of previously unpublished photographs and charts that bring a fresh perspective to the battle. (Source: Amazon.com)

2009.302.100	Forgotten Weapon : U.S. Navy Airships and the U-boat War	Althoff, William F.	Airships played an important but overlooked role in World War II, and with this study their contributions to antisubmarine warfare are examined in depth for the first time. Aviation historian William F. Althoff takes a close look at the U.S. naval airship s admirable wartime record. In analyzing its development and use, he credits the collaboration between the naval aviators and scientists from such government-sponsored institutions as the National Defense Research Committee (NDRC) for the urgent evolution of the modern anti-submarine airship. He explains key NDRC projects that exploited lighter-than-air

Object ID	Title	Author	Summary
			platforms for airborne tests and special devices and that were hurried into production in the race against the Germans to gain a technological advantage in the Battle of the Atlantic. These efforts, he argues, helped turn the tide against the U-boat menace and saved countless lives, ships, and cargoes. About the Author William F. Althoff is the author of USS Los Angeles: The Navy's Venerable Airship and Aviation Technology, among other books. A former Ramsey Fellow in naval aviation history at the Smithsonian National Air & Space Museum, he has conducted research on polar aeronautics during several visits to the Arctic. He resides in New Jersey. (Source: Amazon.com)

2009.302.129	Nakajima G5N Shinzan and G8N Renzan	Koku-Fan - 90	Nakajima G5N (Shinzan) and G8N, "Liz" and "Rita". From Wikipedia: The Shinzan was a long-range, heavy bomber developed using technology from the Douglas DC-4E airliner. It first flew on 10 April 1941. Only a mere six[1] or seven Shinzans were built. Four were used as long-range transports by the Imperial Japanese Navy, two G5N1 and two G5N2 under the new designation G5N2-L. The Shinzan was allocated the Allied reporting code-name "Liz". The Nakajima G8N Renzan ("Mountain Range") was a four-engine long-range bomber designed for use by the Imperial Japanese Navy. The Navy designation was "Type 18 land-based attack aircraft; the Allied code name was "Rita".
2009.302.130	Experimental Twin Engine Japanese Fighters Ki-83, Ki-96, Ki-102 and Ki-108	Koku-Fan - 94	Experimental twin engine Japanese fighter planes; Ki-83, Ki-96, Ki-102, and Ki-108. From Wikipedia: The Mistubishi Ki-83 was designed as a long-range heavy fighter of World War II. The Kawasaki Ki-96 was a twin-engine Japanese heavy fighter of World War II. Intended to replace the Ki-45s of the Imperial Japanese Army Air Force, it was not adopted, manufacture not proceeding past the prototype stage. The Kawasaki Ki-102 was a Japanese warplane of World War II. It was a twin-engine, two-seat, long-range heavy fighter developed to replace the Ki-45 Toryu. Three versions were planned: the Ki-102a day fighter, Ki-102b ground-attack and Ki-102c night fighter. This aircraft's Allied reporting name was "Randy". The Kawasaki Ki-108 was a version of the Ki-102: Ki-108 - High-altitude fighter prototype with

2009.302.131	U.S. Naval Aircraft in WWII	Koku-Fan - 73	U.S. Naval Aircraft in WWII. This is a Koku-Fan illustrated book, 93-12, No. 73. in addition to specific airplanes, pages 17-34 appear to be a synopsis of the naval campaigns with a bibliography of books in English on page 34.
2009.302.132	Japanese Aircraft of WW II	Maru Graphic - 10	Illustrated Graphic Quarterly, Maru Graphic - 10, of Japanese Aircraft of WWII
2009.302.133	Japanese Carriers and Carrier Battles CG-52	Tochibayashi, Masaru	This summary is copied from a review of the book at this web site: http://www.pacificwrecks.com/reviews/3dcg.html This is the second book and DVD by master 3D animation, Masaru Tochibayashi, aka "Tochy Suppon". This contains CGI air combat animations (video game quality). This book's text is in Japanese, but the illustrations alone make it useful for any reader. Renderings include Japanese and American aircraft carriers, including computer renderings of cross sections, side views and cutaways of every imaginable view of each carrier type. Also, an overview of Pacific carrier battles and strikes. The book concludes with a story board overview of the DVD animation covering the Battle of the Eastern Solomons. Depictions of air combat realistically present the capabilities of aircraft, and follow the historically accurate events of the battle, including air combat between F4F Wildcats and A6M2 Zero. Plus, dive bombing attacks by Vals and Dauntless dive bombers and torpedo attacks by B5N2 Kate. The DVD is titled: "Fierce battle! The South Pacific Sea Battle". To the Allies, this battle is known as the Battle of the Santa Cruz Islands.

			Japanese victory that resulted in the loss of four Allied cruisers. However, in the latter, the Americans managed to turn the tables despite the battle being fought throughout the night. This book presents a view of the design and development of the opposing weapons systems, illustrated with newly commissioned digital artwork. It uses firsthand accounts to bring the battles to life and explain why the Americans suffered early on, but eventually had their revenge. (Source: ospreypublishing.com)
2009.302.139	USN F-4 Phantom II vs VPAF MiG-17/19 : Vietnam 1965-73	Davies, Peter E.	The Vietnam War placed unexpected demands upon American military forces and equipment. The principal US naval fighter, the McDonnell F-4 Phantom, had originally been designed to defend the Fleet from air attack at long range. However, its tremendous power and bomb-carrying capacity made it an obvious candidate for the attack mission in Vietnam from 1965 onwards. Its opponent was the MiG-17, a direct descendant of the MiG-15, which had given USAF Sabre jets a hard fight in the Korean War. This book brings to life their dangerous duels and includes detailed cockpit views and other specially commissioned artwork to highlight the benefits and shortcomings of each plane type. It was in the skies over Vietnam that many of the techniques of air combat evolved as pilots learned how to use and to defeat supersonic fighters for the first time. Also includes information on MiG-21. (Source: ospreypublishing.com)

2009.304.006	Battleships	Watts, Anthony J.	In 1939 the battleship was still regarded as the prime naval unit with naval doctrine based upon the major Fleet action between opposing battleships. By 1943 air power had proved the vulnerability of the battleship and by the end of the war the battleships had been relegated to a very secondary role providing gunfire support for carrier forces and amphibious landings. Every class of battleship operated or planned by the major naval powers is listed, together with a short background to the design. Tables list technical data and a brief note of their fate. (from front cover)
2009.304.007	Pearl Harbor Attack : An Abbreviated History	Lott, Arnold S.	PEARL HARBOR! The name flashed around the

Object ID	Title	Author	Summary
			world on Sunday, 7 December 1941, as radio broadcasts and then newspaper headlines described the Japanese sneak attack on U.S. naval and military installations in Hawaii. The attacking aircraft concentrated on, and did most damage to, ships of the United States Pacific Fleet in Pearl Harbor, and that became the name of the battle which threw the United States into World War II — Pearl Harbor. The action at Pearl Harbor lasted for one hour and fifty minutes. The war which followed lasted for 1,351 days. In the many years since that tragic day, politicians, statesmen, military experts and historians have filled unnumbered books as they tried to determine exactly what happened, why it happened, and who was responsible. Those who were at Pearl Harbor on 7 December 1941 will never forget what happened, nor will others who only remember the shock and disbelief that swept the nation that day. One immediate result was that the little-known name of an American naval base suddenly took its place in history with other names that have stood for courage and bravery — Bunker Hill, the Alamo, and Chateau Thierry. It was first a requiem, and then a battle cry, and finally a victorious chant — Remember Pearl Harbor! Decades later, all that remains to remind the world of what happened at Pearl Harbor are the rusting hulks of the battleships Arizona and Utah. And, inscribed on a wall of ageless marble, the names of men who were there on 7 December 1941 and never left. For them, especially, remember Pearl Harbor.
2009.304.008	Pearl Harbor and the USS Arizona Memorial : A	Wisniewski, Richard A. (ed)	This is an easy to read pictorial history of Pearl Harbor and

Object ID	Title	Author	Summary
	Pictorial History		the 184 ft. USS Arizona Memorial. Through black and white photos, descriptions, illustrations, and maps, an account of Pearl Harbor is given. This book is not about the incidents of the December 7, 1941 alone. It is about the USS Arizona Memorial, which has become a tribute to those who were killed there on December 7, whether military or civilian personnel. It is a very informative book with several black and photos on every page, 10 chapters on various aspects, and an excellent bibliography at the end.
2009.304.010	Operation Crossroads	Swaney, Edwin S.	A personalized story of one of America's most famous battleships, the USS Nevada (BB-36). Now a retired businessman, Ed Swaney, during World War II, enlisted in the Navy, becoming a Lieutenant in the USNR. While aboard the Nevada for twenty months in 1944, 1945, and 1946, he kept several diaries. Rediscovering these after many years, he decided to write a personalized history of the ship, recording some information that has been overlooked. The famous Nevada (BB36) was recently honored at the launching and christening of the new USS Nevada (SSBN-733) which has generated more public interest than any other recently constructed ship of the US Navy. "General Quarters, General Quarters. Now all hands man your battle stations. We are under attack!" Pearl Harbor, December 7, 1941 It was Commander Yeager who gave the first order to "Commence Firing" to the American warships on the morning of June 6 after the Nevada had moved into position off Utah Beach;

Object ID	Title	Author	Summary
			hence, it was the Nevada that fired the first salvo at Normandy Beach. Normandy, June 6, 1944
			"What dumb S.O.B. got us in this mess?" Iwo Jima, February 17, 1945
			Front Cover - The Nevada in her newly-acquired orange paint resting at Bikini Atoll prior to the July 1, 1946, atomic bomb test
			"Operation Crossroads" has been taken from the diaries of many former Nevada personnel. Sunk at Pearl Harbor, she was raised, completely remodeled into a modern battleship, and fought her way from Attu to Normandy Beach, Cherbourg and southern France, then on to Iwo Jima, Okinawa, Jaluit and the East China Sea. Many times the Nevada led American fleets into battle.
			After the Pearl Harbor catastrophe the Nevada seemed to possess an aura of invincibility until she encountered a kamikaze at Okinawa.
			"Operation Crossroads" reflects the moods of a fighting, happy ship as she underwent the horror of war. Over one hundred pictures and eleven maps help describe life aboard one of the most famous battleships of the US Navy.
			"General, if we lit up the island like a football field, would it help?" Iwo Jima, February 19, 1945
			"War was no longer some grisly action transpiring on some island that we were shelling and from which we were somewhat removed. It now was happening in our home (the Nevada)." Okinawa, March 27, 1945
			"While we as a nation can neither understand nor condone the strange philosophy of the Japanese kamikaze, we as

Object ID	Title	Author	Summary
			soldiers and sailors can understand the devotion to duty and the unflinching disregard for personal consequences which this enemy has shown." At the burial from the Nevada of Japanese suicide pilot, March 27, 1945 Back Cover - The new USS Nevada (SSBN-733) at her launching, September 14, 1985, Groton, Connecticut
2009.304.011	Lest We Forget : Report of the Japanese Raid on Pearl Harbor	Gibson, Gary (ed)	The attack on Pearl Harbor (called Hawaii Operation or Operation AI by the Japanese Imperial General Headquarters (Operation Z in planning) and the Battle of Pearl Harbor) was a surprise military strike conducted by the Imperial Japanese Navy against the United States naval base at Pearl Harbor, Hawaii, on the morning of December 7, 1941 (December 8 in Japan). The attack was intended as a preventive action in order to keep the U.S. Pacific Fleet from interfering with military actions the Empire of Japan was planning in Southeast Asia against overseas territories of the United Kingdom, the Netherlands, and the United States. The base was attacked by 353 Japanese fighters, bombers and torpedo planes in two waves, launched from six aircraft carriers. All eight U.S. Navy battleships were damaged, with four being sunk. Of these eight damaged, two were raised, and with four repaired, six battleships returned to service later in the war. The Japanese also sank or damaged three cruisers, three destroyers, an anti-aircraft training ship, and one minelayer. 188 U.S. aircraft were destroyed; 2,402 Americans were killed and 1,282 wounded. The power station, shipyard, maintenance, and fuel and torpedo storage facilities, as well as the submarine piers and headquarters building (also

Object ID	Title	Author	Summary
			home of the intelligence section) were not attacked. Japanese losses were light: 29 aircraft and five midget submarines lost, and 65 servicemen killed or wounded. One Japanese sailor was captured. The attack came as a profound shock to the American people and led directly to the American entry into World War II in both the Pacific and European theaters. The following day (December 8), the United States declared war on Japan. Domestic support for non-interventionism, which had been strong, disappeared. Clandestine support of Britain (for example the Neutrality Patrol) was replaced by active alliance. Subsequent operations by the U.S. prompted Germany and Italy to declare war on the U.S. on December 11, which was reciprocated by the U.S. the same day. There were numerous historical precedents for unannounced military action by Japan. However, the lack of any formal warning, particularly while negotiations were still apparently ongoing, led President Franklin D. Roosevelt to proclaim December 7, 1941, "a date which will live in infamy". (from Wikipedia)

2009.304.012	Sea Power : A Modern Illustrated Military History	Batchelor, John H.	This authoritatively written and expertly illustrated book contains the history of the three most important weapons of naval power this century — the battleship, the submarine and ship-borne aircraft. The story of the battleship begins with the fascinating nineteenth-century period of development, with the steel freaks and monstrous muzzle—loading guns, which led to a developmental dead-end. It continues with the Japanese triumph at Tsushima, the building of Britain's

Object ID	Title	Author	Summary
			revolutionary DREADNUUGHT and the naval race which led to the inconclusive Battle of Jutland. With the advent of the submarine and aircraft, the battleship's power at sea began to wane and the Second World War saw the last of the giants begin to slip away, victims of the new powers at sea. The earliest recorded designs for an undewvater vessel come from the sixteenth century, but it was the invention of the battery-powered electric motor and the needs of the First World War which brought the submarine into its own. The development of the submarine between the Wars and the vital role it played in the Second World War - when for the second time in 30 years the blockade of Britain almost succeeded — are authoritatively described. A survey of postwar developments culminates in the almost Endless power of the inter-continental ballistic missile -armed nuclear submarines of the present day. The Battle of Jutland and the Battle of the Coral Sea were only 26 years apart, but in those years between the greatest big gun battleship action and the first big carrier-versus-carrier action, naval aircraft evolved from frail and primitive observation biplanes to become deadly instruments of power at sea. The final part of this book tells the story of the mortal threat to the surface warship posed by the monoplane dive and torpedo bombers in the North Atlantic and, above all, in the Pacific during the Second World War. 727 illustrations 359 in color Front cover: USS Boise, with seaplane catapult in the stern. Back cover: American Nautilus, served in the Pacific throughout the Second World War.

			he could not get back to his carrier; the generals, the sailors, the housewives and children responding to the attack with anger, numbness and magnificent courage
2009.304.017	Battle of Midway, The	Peck, Ira	The Battle of Midway changed the whole course of the war in the Pacific. From then on the Japanese had to give up their ambitious plans for new conquests and assume a defensive role. As our industrial production increased, final defeat became inevitable for Japan.
2009.304.018	At Dawn We Slept : The Untold Story of Pearl Harbor	Prange, Gordon W.	The authentic record of how Japan planned and executed the infamous assault. The 1941 attack was a military classic, one of the greatest surprises in the history of warfare. It shattered the quiet Sunday morning on Oahu, destroying myths, illusions, cherished ideas, and assumptions, as completely as a tornado levels a Midwestern town. Pearl Harbor was a national disgrace. It remains a living symbol of America's lack of alertness, and its gross underestimation of a potential enemy. This book tells us about ourselves as a people, our political and military leaders, and the way they thought and acted.
2009.304.019	Pearl Harbor : The Verdict of History	Prange, Gordon William	Sequel to "At Dawn We Slept" This volume is the story not of Pearl Harbor but of the responsibility for Pearl Harbor. It deals not with action but with reaction. No book on this subject has ever given such complete coverage to the acts, failures to act, and the mental attitudes that made the Japanese attack on Pearl Harbor possible and successful.
2009.304.021	Pearl Harbor : The Way it Was, December 7, 1941	Stone, Scott C. S.	Summary of Dec 7 1941 Japanese attack on Pearl Harbor. Extensively illustrated. First published in Japan. This may be first English language edition. Includes loose notebook foldout page on Pearl Harbor attack.
2009.304.022	Infamy : Pearl Harbor and Its Aftermath	Toland, John	Within weeks after Pearl Harbor, FDR had appointed a

(from Wikipedia)

Object ID	Title	Author	Summary
2009.306.005	Encyclopedia of the World's Combat Aircraft, The	Gunston, Bill	More than 200,000 words of text and data, over 500 accurate drawings-many in color-and 40 cutaway drawings make THE ENCYCLOPEDIA OF THE WORLD'S COMBAT AIRCRAFT the most impressive single volume ever published on the subject of military aircraft. It gathers together all the important combat aircraft of the world, covering more than 1,500 of them. In scope it ranges from the first few primitive machines to the excellent piston-engined warplanes which made air power so vital in World War II, from the exciting early jets to the sophisticated aircraft of the nuclear age, supreme as they are amongst the machines of war and, by their very menace, capable of ensuring peace. Not all the aircraft in this magnificent volume have had to prove themselves in war, but the detailed performance statistics and authoritative, concisely-written texts leave little doubt as to their effectiveness. And for those interested in the relative capabilities of the combat aircraft of the Eastern and Western blocs there is a wealth of information, as there is about the machines that have opposed each other through- out the history of war in the air. For each entry in this volume there is at least one, and sometimes more than one, uniquely- detailed profile drawing, usually in colour. There are in addition cutaway drawings, each one highly researched and precisely drawn. No other publisher has even attempted such a comprehensive work in colour on this fascinating subject. (from dust jacket flap)

2009.307.002	Mammoth Book of Fighter Pilots, The	Lewis, Jon E.	From yesteryear's flying aces to today's top guns, The Mammoth Book of Fighter Pilots presents, in the words of the combat pilots who fought them, fifty incredible air battles that have shaped military history in the twentieth century. Veteran anthologist Jon E. Lewis has assembled firsthand accounts from all the great military campaigns of aerial warfare, including World Wars I and II, the Spanish Civil War, Korea, Vietnam, the Falklands, the Gulf, and Bosnia. Page after exciting page of this singular collection brings into vivid play the exploits of such legendary pilots as Manfred von Richtofen, Eddie Rickenbacker, Douglas Bader, and Johnnie Johnson; the Luftwaffe World War II aces Heinz Knoke, Gerd Barkhorn, and Johannes Steinhoff; and forty other brave airmen from America, Britain, France, Japan, Russia, and

2009.308.003	Annapolis : The Life of a Midshipman, A Picture Story	Engeman, Jack	The first book to tell in pictures and text what actually goes on in the life of a midshipman from admission to graduation. Forward by Admiral David L. McDonald, USN, Chief of Naval Operations. Included in photos is sister of USS Midway curatorial officer, David Hanson.
2009.308.004	In the course of duty : the heroic mission of the USS Batfish	Keith, Don	In February 1945, the Japanese High Command sent four submarines on a secret

Object ID	Title	Author	Summary
			recovery mission to the Philippines. An American submarine wolfpack was sent to intercept them. During the night, the submarine USS Batfish engaged the enemy. And in the ensuing skirmish, a fully armed torpedo lodged in a firing tube. With the enemy alerted to their presence, and their own torpedo threatening to destroy them, the crew of the Batfish entered into a 72-hour battle. In an astonishing display of skill, fortitude, and mariner's luck, the Batfish not only survived, but they destroyed a record-breaking three enemy submarines in a single engagement. This is the never-before-told story of the submarine, the captain, and the crew of the USS Batfish, and a testament to the bravery of those who endured hell under the waves. About the Author Don Keith is a critically-acclaimed, award-winning author. In addition to writing fiction and nonfiction, he heads up the curriculum in Media Marketing and Management at Virginia College and runs the school's full-service advertising and marketing agency.

2009.310.001	From Navy Blue to Corporate Gray : A Career Transition Guide for Navy, Marine Corps, and Coast Guard Personnel	Savino, Carl S.	The authors have written From Army Green to Corporate Gray, a similar guide targeting army personnel and soon-to-be army veterans--quite similar, in fact. Krannich is author of a number of job-hunting guides and both Navy Blue and Army Green rely heavily on material adapted from his Careering and Re-Careering for the 1990s. Savino is a retired army major now doing technical consulting for Booz, Allen & Hamilton. This and their earlier book are virtually identical because so much of their advice applies to all military personnel. In this second book, specific resources are substituted for U.S. Navy, Marine Corps, or Coast Guard members or veterans wherever there are differences from the U.S. Army version. The authors have chosen to target their audiences specifically; libraries at military installations and public libraries in communities with nearby military bases should definitely acquire one or the other of these excellent guides depending on the branch of service involved. David Rouse - Booklist Product Description A complete career transition guide for members of the three sea services. (Source: Amazon.com)
2009.310.002	Swing Shift	Demme, Jonathan	Following the Japanese bombing of Pearl Harbor, Kay Walsh's husband goes to war, leaving her behind. Like millions of other women left at the homefront, Kay goes to work in a factory to support the war effort. She discovers in herself strengths and feelings she didn't know she had, and her life is changed forever.

			would later gain a grim distinction: he is the only American from any war that the government changed from killed -in-action, body not recovered (KIA/BNR) to missing in action (MIA). What happened to Scott Speicher that January night tormented his family, battle-toughened pilots and intelligence agents for over a decade. His eleven-year journey back from the dead would eventually splash headlines and raise questions among civilian and military leadership as to how one of America's best and brightest pilots ended up behind enemy lines--and remained there unclaimed and seemingly unwanted through three presidential administrations and innumerable opportunities to
2009.310.006	Story of the Winged-S : Late Developments and Recent Photographs of the Helicopter, The	Sikorsky, Igor Ivan	The story of the Winged-S begins in Russia, in the mind and imagination of a boy who dreams of flying in machines he has designed and built himself. The dreamer met discouragement and, often, ridicule, but these only fed the dream. The story tells of days and nights of hard work, of makeshift experiments, of suppressed excitement as various contraptions were completed and tested. First came the helicopters, carefully constructed after a trip to Paris; the engines weren't powerful enough. Then came the S-1, which took only one hop into the air, and the S-2, which flew bravely until it crashed into a ravine. There followed the S—3, on up to the S-6 which took first prize in a military competition in Petrograd. The S-21, first multi-engine airplane ever built, flew in 1913. From there on, higher and higher into the air rose Sikorsky planes. Farther and farther they flew with larger and larger loads. The years of World War I speeded them on.

Object ID	Title	Author	Summary
			The war ended abruptly for Russia, as did the dreamer's Russian career. There followed a move to America, a new land with new horizons, a mecca for dreamers. The Flying Clippers and the helicopters conceived and built here were the products of his imagination and perseverance. They also were the end products of those early dreams. In his final chapters, Igor I. Sikorsky discusses the helicopter and his pride in the development of "The Guardian Angel." He takes a look at the future, and reveals, in a fascinating way, his thoughts on the nature of inventive powers. He looks back on a life rich both in dreams and accomplishment, the story of the Winged-S. During the 1920s he developed a number of airplanes — some of them amphibians. These led to the famous Flying Clippers of the 1930s, majestic airplanes which pioneered transoceanic air routes. In the late 1930s he concentrated once again on the helicopter. In the quarter of a century that followed, Sikorsky Aircraft produced nearly 5000 helicopters, beginning with the VS—300 in 1939. Mr. Sikorsky, active daily as a consultant at Sikorsky Aircraft long years after his retirement, has remained interested in the helicopter's true potential. The present plant at Stratford, Connecticut, is a far cry from the shed in Kiev where he built his first helicopter. It seems almost unbelievable that so many things could have happened to this courageous, inspired man over the brief span of his career. As Mr. Sikorsky nears his sixtieth year in aviation, an increasing number of honors and awards are conferred upon him, and he is often called to

Object ID	Title	Author	Summary
			speak before students, people interested in flying, or the learned members of engineering societies. He has received such outstanding awards as the General William E. Mitchell Award (1944) as "the U.S. citizen making the outstanding individual contribution to aviation progress"; the Gold Medal of the Federation Aeronautique Internationale (1947); the Presidential Certificate of Merit (1948); the Silver Medal of the Royal Aeronautical Society, Great Britain (1949); the Daniel Guggenheim Medal (1951); the James Watt International Medal, London (1955); the Cross of a Chevalier of the Legion of Honor, France (1960); the Grover E. Bell Award, American Helicopter Society (1960); and the Elmer A. Sperry Award (1965) for "the concept and development of a new form of aerial transportation." (from dust jacket flaps)
2009.310.007	Jane's All the World's Aircraft - 1988-89	Taylor, John W. R. (ed)	Jane's All the World's Aircraft is an aviation annual publication founded by Fred T. Jane in 1909. It is published by Jane's Information Group. Jane's All the World's Aircraft has chronicled a century of ever-accelerating aviation progress and recorded the particulars of an unprecedented number of flying machines, using the widest possible interpretation of that phrase, in the most minute detail. Six editors have had the privilege of commenting upon the significant aircraft and events of manned flight since the first edition appeared in November 1909 as All the World's Airships (which was then a generic term for any machine that flew). This first publication was seen as being ahead of its time but even the skeletal book showed the strength of Fred T Jane's standardised approach to data collection. The first edition even carried a pre-addressed

Object ID	Title	Author	Summary
			return proforma for aviation pioneers to supply the details of new machines. Besides listing the different types of aircraft by nationality, the first issues covered aerial societies, journals and flying grounds and cost just 21 shillings (£1.05). Jane himself had a desire to fly and he was nearly killed doing so in 1909 whilst attempting a flight on Dartmoor. His aircraft caught fire, but he merely commented that it would be one less machine to include in his forthcoming work. As with Jane's Fighting Ships, Jane received extensive help from enthusiasts worldwide, including Louis Blériot, A.V. Roe and Prince Heinrich of Prussia. Jane censored the 1914 issue, which was published just after the outbreak of the First World War, blacking out whole sections describing British equipment and organisation. He noted in it that, for all practical purposes, aircraft have no more to do with peace than submarines. The work's accuracy helped morale by dispelling alarmist rumours about imminent German air raids, showing that the Germans did not possess anything but the smallest fleet of airships. Respect for the accuracy of Jane's All the World's Aircraft transcended political enmities. Cold War notwithstanding, Soviet authorities supplied Jane's with information. Such was the technical reference book's reputation that Argentina even provided details of its aircraft during the Falkland's Conflict in 1982. Altogether, there have been only 97 editions, mainly due to disruptions during the two World Wars. 2009 was the 100th Year of Jane's All the World's Aircraft. From Wikipedia, the free encyclopedia

2009.310.010	Day of Infamy/Thunder Gods : The Kamikaze Pilots Tell Their Story	Lord, Walter	There are two series in this collection: Day of Infamy by Walter Lord, read by Tom Parker and Thunder Gods by hatsuho Naito read by Christopher Hurt. In brilliant detail Walter Lord traces the human drama of the great attack on Pearl harbor : the spies behind it; the Japanese pilots; the crews on the stricken warships; the men at the airfields and bases; the generals, the sailors, the housewives, and the children who responded to the attack with anger, numbness, and magnificent courage. This book was originally published in 1957. The second book is Thunder Gods. It is the compelling first-hand account of the pilots who pledged themselves to die for their emperor in the closing days of the Pacific War. Known to the world as kamikaze (divine wind) , they were born out of the desperation of the Imperial

Object ID	Title	Author	Summary
			Command, determined to avoid the shame of surrender at any cost. Using as a rationale the loudly proclaimed belief that the suicide attacks by Japanese pilots attested to the spiritual righteousness of Japan's struggle, the Command's exhortations convinced legions of young men of the virtue of volunteering for the Ohka program, in which flying bombs were constructed whose only guiding mechanism was their human cargo. These pilots are the thunder gods of the title, and this is the first time they have told their own story. Thunder Gods was originally published in 1981. Oka (Airplane). Yokosuka MXY-7 Oka.
2009.310.011	America's Fighters of the 1970s: F-14 and F-15	Stern, Robert Cecil	Introduction: The F-111 was to have become the primary tactical fighter of both the US Air Force and Navy during the second half of the 1960s, but for a variety of reasons it was acquired only in limited numbers by the former and not at all by the latter. Both services, therefore, began an intensive search for a replacement for their ageing inventories of 1950s -vintage jets. In the meantime, both services acquired large numbers of the McDonnell Douglas Phantom Its to fill the immediate demands of the escalating Vietnam War. For all its many fine qualities, the F-4 proved far less capable in combat over Vietnam than either service would have wished. In particular, the lack of gun armament and relatively poor manoeuvrability of early Phantoms were seen as causes of its disappointing showing. Not surprisingly, the specifications issued by both services for their Phantom-successor included integral gun armament and much improved ACM (Air Combat Manoeuvre) capability. These were the only points of agreement in the proposals which the two set vices requested during the

Object ID	Title	Author	Summary
			late 1960s.
			The US Navy wanted the aircraft that the F-111B should have been, a big, heavily armed fleet defence interceptor. The Request for Proposals for its new VFX was issued in July 1968, Grumman winning the design competition with its variable geometry Design 303 in January 1969. The main armament of the new F-14 was to be the AWG-9 weapons system based on the long-range AIM-54 Phoenix missile, originally developed for the F-111B. Power was provided by a pair of Pratt & Whitney TF30s rated at 20,900lbst each. The result was the F-14 Tomcat, a heavy (55,000lb) and expensive (\$15 million apiece in 1973) two-seat aircraft. The Air Force's choice for a Phantom-successor was determined by a design competition initiated with feasibility studies in 1965. The FX was to be the first pure air superiority fighter in the USAF inventory since the F-86 Sabre. From the beginning, emphasis was on power and manoeuvrability. The design from McDonnell Douglas was declared the winner on 23 December 1969. In the F-15 Eagle the Air Force got what it wanted, a new-generation dogfighter. As of 1983, both Tomcat and Eagle remain in production, with no end in sight. Significantly, neither has a successor on the drawing-boards. (A US Navy policy decision announced early in 1983 has specifically killed any current development of a Tomcat successor. Plans now call for the procurement of 138 more Tomcats and the upgrading of existing F-14s for front-line service at least until the year 2000.) For the foreseeable future, they will remain the backbone of the airpower of the USA.

2009.310.016	Lonely Vigil : Coastwatchers of the Solomons	Lord, Walter	This is Walter Lord's best-selling account of the Coastwatchers of the Solomons—that remarkable band of individualists who operated deep behind Japanese lines in the dark days of 1942-43. Living by their wits, with the help of friendly natives, they passed along critical intelligence, rescued downed flyers, and saved men from their sinking ships—including John F. Kennedy's PT 109. In Admiral Halsey's words, "The Coastwatchers saved Guadalcanal and Guadalcanal saved the Pacific." It is also the story of the natives who helped them, the missionaries they worked with, the downed flyers and castaways they rescued, the

Object ID	Title	Author	Summary
			Marine patrols they guided, the pilots and submariners who serviced them, and even the Japanese who chased them. To piece the story together, Lord traveled 40,000 miles to interview the participants, pore through archives, and examine private letters and diaries. He even made a three-day hike through the Guadalcanal jungle to inspect the coastwatcher hideout on Gold Ridge, to put readers in their shoes. The result is a major contribution to the history of World War II told by a master storyteller. "A stirring tale of forgotten heroes, splendidly told by a master narrator."--Arthur Schlesinger, Jr. "So much of this exciting tale is new to me. I knew some of these valiant men well. Walter Lord has brought them to life again, and all of us who fought in those distant islands, in the seas around them and in the skies above them, may renew our thanks to those who kept the lonely vigil."--Samuel B. Griffith II, Brigadier General USMN (Ret.) About the Author Walter Lord, an OSS officer in World War II and native of Baltimore, is the author of such best sellers as A Night to Remember, Day of Infamy, and Incredible Victory. 2009.310.018	Russian Top Gun	Ball, Robert E. Jr. (writer, director)	The United States has TOP GUN and RED FLAG. The Air Forces of the Union of Soviet Socialist Republics have their own air combat programs. The crucial question that we must ask is, "If war is declared,

Object ID	Title	Author	Summary
			who will get the first 'lock-on' and shoot his enemy out of the sky?" The Soviet Mikoyan/Gurevich design bureau created the MiG-21 Fishbed which was the scourge of our F-4 Phantoms above the jungles of Vietnam, the MiG-23 Flogger which Libya sends to dogfight with our F-14 Tomcats, the MiG-25 Foxbat which flies even faster than our F-15 Eagle, and the MiG-29 Fulcrum which some experts believe is more sophisticated than our F/A-18 Hornet and F-16 Fighting Falcon. Long range Soviet bombers shadow our carrier battle groups and the Mi-24 Hind gunship helicopter strikes terror in Afghan rebels and Nicaraguan contras. If the United States is to maintain air superiority, it is vital to know the wartime capabilities of these Soviet fighters. A MILITARY FILMS, INC. Production Produced by Joseph Dickstein Written and Directed by Robert E. Ball, Jr. Narrated by Joe Huser Music by Carl Pritzkat Distributed By: SIMITAR ENTERTAINMENT, INC. Plymouth, MN 55447 Made & Printed in U.S.A. 82551 09921 Approximately 40 Minutes - Not Rated (from slipcase rear) A study of the military capabilities of the Air Forces of the Soviet Union. Discusses the MiG fighter planes, long range Soviet bombers, and the Mi-24 Hind gunship helicopter.
2009.310.019	Return with Honor	Hanks, Tom	On August 4, 1964, a 26-year-old Navy fighter pilot was shot down over North Vietnam. The first American airman to be captured by the Vietnamese, Everett Alvarez was a prisoner of war for eight and a half years—the longest period of

Object ID	Title	Author	Summary
			captivity of any American war prisoner in North Vietnam. Alvarez, along with 461 other captured American airmen, would not be released until the Paris Peace Accords were signed in 1973. American Experience presents "Return With Honor," the story of these captured airmen, featuring rare film footage from Vietnam's archives. This two-hour special from Academy Award-winning filmmakers Freida Lee Mock and Terry Sanders represents "a major shift in the screen image of the Vietnam veteran," according to The New York Times. More than 20 veterans describe their captivity and their struggle to survive—mentally, physically, and spiritually—and to return with honor. The film is introduced by Tom Hanks, who says, "I am fascinated and moved by these stories of extraordinary courage, sacrifice, and heroism." Return With Honor is a testament to the ingenuity and endurance of these extraordinary men. Through riveting first-person accounts, the film describes their sudden transformation from self-confident "top-gun" aviators into prisoners of war. The men recall the harrowing moments of their shoot down and capture, the many years they were kept in solitary confinement, and the repeated bouts of excruciating torture. And it is also the story of the women left behind who for years did not know whether they were wives or widows. In addition to Everett Alvarez, among the men and women in Return With Honor who tell their own stories, in their own words, are: • Commander. James Stockdale, USN. Along with other POW senior ranking officers, Stockdale was in solitary confinement for

Object ID	Title	Author	Summary
			much of his seven and a half years of captivity. Back in the States, his wife, Sybil, and other wives of POWs formed The League of Families of Prisoners of War and Missing in Action, in an attempt to change the "keep quiet" policy of the US government, which kept the plight of the POWs secret. • Lt. Ed Mechenbier, USAF. During captivity, Mechenbier held "wine tastings" for other prisoners, pouring imaginary vintages and vividly describing their flavors. Mechenbier was a prisoner of war for five years, eight months. • Lt. John ("Mike") McGrath, USN. A self-taught artist, McGrath drew his first picture on a prison wall with his own blood. He vowed to remember everything he saw in prison so he could draw it if he got out; all the drawings in Return With Honor were made by McGrath after his release. • Lt. Ron Bliss, USAF, was shot down September 4, 1966, the same day as his friend and fellow Air Force Academy graduate Tom McNish. Their capture was extensively filmed by the North Vietnamese. He was a prisoner of war for six and a half years, most of them at the Hoa Lo Prison (built by the French and nicknamed by the American POWs the "Hanoi Hilton") where, he says, "You could hear the screams of about fifty years. It was a hard place." • Lt. Cmdr. John McCain, USN, was shot down October 26, 1967; he ejected and landed in a lake in the center of Hanoi. Seriously wounded in the bailout, McCain was not expected to live. After he refused an offer of early release, his interrogator told him, "Things are going to be very bad for you now." McCain adds, "He was right." Return With Honor was filmed on location in Vietnam and in

Object ID	Title	Author	Summary
			communities across the United States. The production team received unprecedented cooperation from the Ministry of Culture and Information in Vietnam to film in Hanoi and was given access to their film archives and never-before-seen footage of the POWs being shot down, captured, and held in captivity. Production began in June 1997 in the United States and Vietnam with the filming of more than 25 former POWs and their wives, including Senator John McCain, Congressman Sam Johnson, and Pete Peterson, now US ambassador to Vietnam, whose current residence is just three blocks from the "Hanoi Hilton," where he spent six and a half years in captivity. Return With Honor is a universal story of honor, love and duty. For more information on the film, go to the film producers' Web site. http://www.returnwithhonor.com (Source: pbs.org)

			Phantom aircraft.
2009.310.027	F-14 Tomcat	Koku-Fan - 18	The Grumman F-14 Tomcat is a supersonic, twin-engine, two-seat, variable-sweep wing fighter aircraft. The Tomcat was developed for the United States Navy's Naval Fighter Experimental (VFX) program following the collapse of the F-111B project. The F-14 was the first of the American teen-series fighters which were designed incorporating the experience of air combat against MiG fighters during the Vietnam War. The F-14 first flew in December 1970 and made its first deployment in 1974 with the U.S. Navy aboard USS Enterprise (CVN-65), replacing the McDonnell Douglas F-4 Phantom II. The F-14 served as the U.S. Navy's primary maritime air superiority fighter, fleet defense interceptor and tactical reconnaissance platform. In the 1990s, it added the Low Altitude Navigation and Targeting Infrared for Night (LANTIRN) pod system and began performing precision ground-attack missions. The Tomcat was retired from the active U.S. Navy fleet on 22 September 2006, having been supplanted by the Boeing F/A-18E/F Super Hornet. As of 2012, the F-14 was only in service with the Islamic Republic of Iran Air Force, having been exported to Iran in 1976, when the U.S. had amicable diplomatic relations with the then government of Shah Mohammad Reza Pahlavi. 2009.310.041	Pearl Harbor Cover-up, The	Schuler, Frank A.	December 7, 1941... A black day in American history, and a day that changed the world and its history.

Object ID	Title	Author	Summary
			But there were many other days and events before and after the infamous attack on Pearl Harbor that have, for thirty-five years, been covered under a cloak of secrecy and deceit. This book is an attempt to tell the true, untold story of those days and the people who played major roles in the Pearl Harbor disaster... and its shameful, blameful cover-up! This is a story of diplomatic subtleties, international espionage and intrigue, sabotage, stupidity, deceit, and such criminal activities as rewritten cables, destroyed dispatches, mutilated records, and "reorganized" files. It is a story that rewrites a tragic page in our history books. "Watergate changed the face of American Politics... Pearl Harbor changed the face of the world. Frank Schafer's story is startling and makes a strong case for the reopening of the Congressional hearings which were so ignobly terminated in 1945. It is now painfully obvious that not all the facts were presented. Frank Schuler and Robin Moore have chipped away the crusted layers of deceit and reveal, for the first time, facts about the criminal and brazen Pearl Harbor cover-up." (from back cover)
2009.310.042	Defeat at Sea: The Struggle and Eventual Destruction of the German Navy, 1939-1945	Bekker, C. D. (Cajus D.)	DEFEAT AT SEA is an absorbing and often thrilling account of the struggle and eventual destruction of the German Navy in World War II as seen from the other side. From the early days of the war, including an excellent account of the GrafSpets final battle, to the last disastrous hours of the U boat fleet, this is the day-by-day account of the sea war the German Navy lost with such finality. C. D. BEKKER, a former German naval officer,

2009.310.046	Fleet That Had to Die, The	Hough, Richard	In the summer of 1904, Russia and Japan were at war. To strengthen their Pacific Fleet, and to raise the siege on their naval base at Port Arthur, on the mainland of Manchuria, the Russians launched a naval attack which has no equal in history for daring and foolhardiness ... * Obsolete ships were sent on a voyage of 18,000 miles * Sailors mutinied, and officers openly predicted defeat * Off the coast of England, the battleships blasted away at fishing trawlers—to beat off a "surprise attack" * The admiral did not trust his own navy—for weeks he refused to radio his location or his future plans At the end of one of the most heroic voyages in the history of the sea, the Russian and Japanese battleships met at Tsu Shima. Before dark, Russia had suffered a crushing defeat. Of her 42 warships, four were left to fight—all that remained of the fleet that had to die. "Must rank with some of the best chronicles of battle, including THE REASON WHY and GALLIPOLI." —Los Angeles Times (from back cover)
2009.310.047	Raider Wolf : The Voyage of Captain Nerger, 1916-1918	Hoyt, Edwin Palmer	"Truly Magnificent Adventure" - Nashville Banner There never was a sea voyage quite like that of Captain Karl Nerger and the imperial German raider "Wolf," and

Object ID	Title	Author	Summary
			there could never be one quite like it again. The saga of the Wolf began on November 30, 1916 when a German freighter glided quietly out of Kiel harbor. But beneath that innocent exterior were concealed vicious guns and tons of mines. For the next fifteen months, under the sure hand of Captain Nerger, she ran the British blockade, laid her first mines off the coast of Scotland, and moved into the North Atlantic. She also prowled the Indian Ocean, the South Pacific, and skirted the Antarctic Ocean in her search for victims. She terrorized Australia, made a daring attack at Singapore, and another off Ceylon. She took one vessel after another but left no trail. And during it all she suffered food and fuel shortages, fire and disease; nearly foundered in a gale, and was once covered with ice. Still she survived to return home triumphant, her hold once crammed with mines now full of prisoners. Wolf is the story of men against one another and men against the sea. It is, too, a story of the victories of brave men against great odds ... a true story you will not forget. (from back cover)

			and allow for quick comparisons between fleets. The guide continues to present timely, authoritative information supported by more than four thousand illustrations from correspondents throughout the world. From giant aircraft carriers and ballistic missile submarines to tugboats and launches, the characteristics and capabilities of ships large and small are reliably recorded. Complete descriptions of naval aircraft, weapons, weapon systems, and sensors are also provided along with useful commentary on organization, personnel strengths, and bases.
2009.310.058	Fall of Saigon : Scenes from the Sudden End of a Long War, The	Butler, David	This book documents the last few chaotic weeks of the US presents in Vietnam. The human story is effectively conveyed by first hand accounts of eyewitnesses from many strata of Vietnam society. The author, an NBC reporter in Saigon, witnessed these events firsthand. His unique perspective and access to the diplomatic corps adds a fascinating credibility to the book. His discussion concerning the actions and statements of Ambassador Graham Martin particularly intrigued me. Did Martin's decisions during that period contribute to the frantic last minute evacuation that left many friendlies stranded? The author makes no judgments. Butler includes transcript of many diplomatic cables to and from Martin and Secretary of State Kissinger and the White House concerning events and plans for evacuation and rescue. Reading these transcripts today still conveys a strong emotional impact for this reader. Interspersing these high level discussions are the stories of a whole society turned upside down while "we" skipped town. The Fall of Saigon is not an easy book to read. We are forced to confront the final conclusion of our failed crusade. Our goal was the

			Kong, China. USS Midway (CV -41) aircraft carrier; lead ship of the class.
2009.314.003	Taking Care of Business... USS Midway CV-41 - 1976	Wong, Gordon (ed.)	Pictorial account of the activities of the USS Midway over an undetermined period that covered events in 1975 to sometime in the first half of 1976. 16 pages of photos are devoted to Operation Frequent Wind during the fall of Saigon in 1975. Port visits in the period included Singapore, Pusan, Karachi, Hong Kong and Subic Bay.
2009.315.001	Theory of Flight of Sikorsky Helicopters	Montgomery, John R.	Sikorsky Service School training text helpful to the student who wishes to obtain basic information on the theory of flight applicable to the articulated rotor system used on Sikorsky helicopters.
2009.315.002	Brief History of U.S. Navy Torpedo Development, A	Jolie, E. W.	Includes detailed description of torpedoes, chronology of significant events. This report covers the growth/development of the "auto-mobile" or self-propelled torpedo in the U.S. Navy from torpedo inception in Europe by Robert Whitehead in 1866 up to and including Torpedo Mk 48 of 1978. Part I is a narrative of the historical aspects of the evolution, while part II contains illustrations and characteristics of each of the torpedoes that was in development or is/was in service use over the 112-year period. Keywords include: Torpedo Development; U.S. Naval Torpedo Station; Howell Torpedo; Whitehead Torpedo; Bliss-Leavitt Torpedo; Flywheel; Hot and Cold Running Torpedo; Stream Torpedo; Electric Torpedo; and Monopropellant.
2009.316.001	NATOPS Flight Manual Navy Model C-2A Aircraft	Chief of Naval Operations	Provides standardized ground and flight procedures for the Navy Model C-2A Aircraft. Does not include tactical doctrine.
2009.316.002	NATOPS Flight Manual Navy Model EA-6B ICAP II Aircraft	Chief of Naval Operations	Provides standardized ground and flight procedures for the Navy Model EA-6B ICAP II Aircraft. Does not include tactical doctrine.
2009.316.003	NATOPS Pocket Checklist C	Chief of Naval Operations	Divided into three sections:

Object ID	Title	Author	Summary
	-2A Aircraft		white is pocket checklist, blue is bingo information, and yellow is emergency procedures.
2009.316.004	American Nautical Almanac for the Year 1945, The	United States Naval Observatory	Published from 1879-1957 as The American Nautical Almanac for the Year In 1958 the name changed to Nautical Almanac for the Year.... The object of the volume is to provide the navigator with a compact publication containing all the ephemeris material essential to the solution of problems of navigational position.
2009.316.005	NATOPS Aircrew Pocket Checklist, MH-53E Helicopter	Chief of Naval Operations	Provides pocket-size standardized ground and flight procedures for the MH-53E helicopter. Does not include tactical doctrine.
2009.316.006	NATOPS Aircrew Pocket Checklist, CH-53E Helicopter	Chief of Naval Operations	Provides pocket-size standardized ground and flight procedures for the CH-53E helicopter. Does not include tactical doctrine.
2009.316.007	NATOPS Aircrew Pocket Checklist Navy Model SH-60F HH60F Helicopters	Chief of Naval Operations	Provides pocket-size standardized ground and flight procedures for the SH-60F and HH-60F helicopters. Does not include tactical doctrine. The different variations of th Sikorsky helicopters have different names the HH-60F could be the Pave Hawk or the Jayhawk.
2009.316.008	NATOPS Aircrew Pocket Checklist AV-8B/TAV-8B 161573 and Up	Chief of Naval Operations	Provides pocket-size standardized ground and flight procedures for the AV-8B and TAV-8B aircraft. Does not include tactical doctrine.
2009.316.009	NATOPS Aircrew Pocket Checklist US-3A Aircraft	Chief of Naval Operations	Provides pocket-size standardized ground and flight procedures for the US-3A aircraft. Does not include tactical doctrine. Six S-3 Vikings were converted to specialized utility and limited cargo duties and were designated US-3A.
2009.316.010	NATOPS Aircrew Pocket Checklist E2C Aircraft : Serial Number 163029 and Subsequent	Chief of Naval Operations	Provides pocket-size standardized ground and flight procedures for the E2C aircraft. Does not include tactical doctrine.
2009.316.011	NATOPS Aircrew Pocket Checklist F-14A Aircraft	Chief of Naval Operations	Provides pocket-size standardized ground and flight procedures for the F-14A

			Publication series.
2009.317.002	NATOPS Flight Manual Navy Model A-6E TRAM/KA-6D Aircraft	Chief of Naval Operations	Provides standardized ground and flight procedures for the Navy Model A-6E TRAM/KA-6D Aircraft. Does not include tactical doctrine.
2009.318.001	Anchor, The -- Company 60-062	None Stated	Yearbook for Company 60-062, 1960 of the Naval Training Center at San Diego, CA. Contains the history and description of the activities conducted at the training center with a section on the particular graduating class. Includes the 36 page booklet "I'm At The U.S. Naval Training Center."
2009.318.002	USS Kearsarge (CVS-33) - Westpac Safari - Project Mercury Far East Cruise - 1963	Meyer, H.K. (ed)	The USS Kearsarge was first designated a CVA-33 attack carrier and then in 1958 as an CVS-33 Antisubmarine Warfare Carrier. This cruise was to pick up the Mercury Faith 7 capsule and astronaut Gordon Cooper from the MA-9 (Mercury-Atlas) launched spacecraft. Cooper was launched into space on May 15, 1963. He orbited the Earth 22 times and splashed down in the Pacific 34 hours, 20 minutes and 3 seconds later and was picked up by crews from the Kearsarge.
2009.318.004	USS Kearsarge (CVS-33) - Far East Cruise - 1961	None Stated	The USS Kearsarge was first designated a CVA-33 attack carrier and then in 1958 as an CVS-33 Antisubmarine Warfare Carrier. This cruise was her Seventh Far Eastern cruise with the mighty SEVENTH fleet.
2009.320.001	Angles of Attack: An A-6 Intruder Pilot's War	Hunt, Peter	Peter Hunt, a Navy pilot flying A-6 Intruders, off the USS Ranger, used his "daily journal, notes, strike debriefs, logbooks, videos, mission recordings, letters, and photographs to provide accurate detail and to portray" what he actually thought and felt at the time. Hunt flew multiple night time missions from the night the Persian Gulf War started. He flew a variety of missions including carpet bombing, dropping laser guided bombs, supporting Marines on the ground, and bombing Iraqi's along the "highway of death."
2009.320.002	Naval Air War in Korea, The	Hallion, Richard	DEATH HIGH ABOVE THE 38TH PARALLEL

Object ID	Title	Author	Summary
			In the early 1950's the Asian skies erupted in a blazing firestorm of destruction. Although considered by many to be the deciding factor in the bloody Korean conflict, until now little has been -written about the courageous pilots who helped secure the eventual uneasy peace. Filled with rare photographs, stunning oral memoirs, and only recently declassified material, here at last is the complete history of the heroic men who took to the air to battle a fierce Communist aggressor. From the massive bombing raids on P'yongyang to the bitterly-won armistice at Ammonium, an inspiring and insightful account of the missions, the men, and the machines that clashed in America's first brutal experience in modern limited warfare. (from back cover)
2009.320.003	US Navy in World War II	Heiferman, Ronald	At the end of World War I the American Navy was the second largest Navy in the world, second only to the Royal Navy which had just defeated the Kriegsmarine at Jutland. A combination of disarmament conferences and public indifference kept the US Navy static until the 1930s when President Roosevelt, an old Navy man himself, recognized the growing danger of the rise of both Germany and Japan and started a surreptitious rearmament. By 1941 America's nascent fleet was preparing for war. When war struck at Pearl Harbor on 7 December 1941, much of America's naval strength which was concentrated in the Pacific was wiped out in a matter of minutes. Fortunately the aircraft carriers were at sea and were able to conduct holding operations at the Battles of the Coral Sea and Midway until American industry could swing into motion. By 1943

Object ID	Title	Author	Summary
			America had the largest fleet in the world fighting the U-Boats in the Atlantic and the Imperial Japanese Navy in the Pacific. By the end of World War II the US Navy dominated most of the oceans of the world. The rise of the fighting strength of the naval arm, the ships, the men who fought on them, the great naval Commanders, the battles in which they fought and the weapons of the US Navy from the submarine and torpedo to the Naval Air Force and the giant aircraft carriers are told by Professor Ronald Heiferman, a noted authority on World War II and its battles. THE US NAVY IN WORLD WAR II, a companion volume to THE US AIR FORCE IN WORLD WAR II, is likely to become a collector's item for all those interested in the maritime aspects of World War II. (from dust jacket flap)
2009.320.007	Navy Department General Orders	Bureau of Navigation	Catalog of U.S. Navy Department General Orders through number 245 of 27 November 1946. Contains subject index published in 1944. Military directives

2009.320.015	Navigation and Nautical Astronomy	Dutton, Benjamin	A textbook on navigation and nautical astronomy, prepared for the instruction of midshipmen at the United States Naval Academy. Original edition (1926) by Commander Benjamin Dutton.
2009.320.016	Beyond the Limits : Flight Enters the Computer Age	Ceruzzi, Paul E.	Computers and flying machines are two dominant technologies of our time. Spacecraft and fighters make use of leading-edge computer technologies in their design, testing, manufacture, navigation, and operation; pilots and astronauts rely on computer simulations throughout their training. Paul Ceruzzi describes these technologies, their history, and the part they play in today's flying machines in fascinating accounts of Northrop ("midwife of the computer industry"), missile tracking, Whirlwind, Apollo, Minuteman, and the ill-fated launch of the space shuttle Challenger. Ceruzzi points out that the "revolution" in aerospace technology has been going on for at least forty years. For the first time he tells how modern flight depends on computers, how this came about, and what its consequences are. He brings to light new facets of the individual stories of aerospace and computing, while also revealing more general themes about the dynamics and evolution of these modern technologies. Paul Ceruzzi is Associate Curator at the National Air and Space Museum of the Smithsonian Institution. Beyond the Limits marks the

2009.327.002	Flight of the Intruder	Coonts, Stephen	In Flight of the Intruder Jake Grafton is an A-6 Intruder pilot during the Vietnam War who flies his bomber on sorties past enemy flak and SAM missiles, and then must maneuver his plane, often at night, onto the relatively small deck of an aircraft carrier. Former Navy flyer Stephen Coonts gives an excellent sense of the complexities of modern air raids and how nerve-wracking it is, even for the best airmen, to technically solve sudden problems over and over, knowing that even a twist of fate like a peasant wildly firing a rifle from a field could wipe out the crew. Grafton alternates between remorse over the fate of his unseen Vietnamese victims on the ground and a gung-ho "let's win this war" sentiment that lashes at both policymakers who select less-than-important targets for the dangerous missions and advocates for peace back in the States.
2009.327.003	Behind the Lines : Hanoi, December 23, 1966--January 7, 1967	Salisbury, Harrison E.	An account by the first newspaper correspondent to get access to North Vietnam during the Vietnam War. A behind the lines look at a country at war and reporting that changed perceptions of how the war was being fought.
2009.327.004	Front Page Vietnam / as Reported by the New York Times	Keylin, Arleen (ed.)	Over 175 front pages of the New York Times traces the involvement of the United States in Southeast Asia during the period surrounding the Vietnam War.

Bole (DD-755) USS Brinkley Bass (DD-887) USS Alfred A. Cunningham (DD-752) USS Bradley (DE-1041)
2009.327.009	CVA, CVS Natops Manual	Chief of Naval Operations	Standardizes flight procedures for aircraft carriers. Also contains USS Bon Homme Richard NATOPS supplements 1 through 10.
2009.327.010	Z Gram Centurion, Z-1 thru Z-100	Commanding Officer, USS Midway (CV-41) (ed.)	A compilation of the first 100 Z-grams, promulgations to the fleet by CNO, ADM. Elmo Zumwalt, designed to refocus the personnel management practices of the U.S. Navy, improve retention and improve morale late in the Vietnam War era.
2009.327.011	A-6A Bombardier/Navigator Handbook	Litton Industries, Inc.	A guide to A-6A mission planning and flight navigation with a discussion on inertial navigation principles.
2009.327.012	Tactical Pocket Guide, A-6 Aircraft	Commander, Operational Test and Evaluation Force	Guide containing data on physical and flight characteristics of ordnance and external stores designed for the A-6 aircraft.
2009.327.013	CVA, CVS Natops Manual	Chief of Naval Operations	Standardizes flight procedures for aircraft carriers. By section, covers pre-deployment, preparing for flight operations, air traffic control and doctrine, launching aircraft, and aircraft and weapons handling procedures.
2009.327.014	NATOPS Flight Manual Navy Model A-6A, A6-B Aircraft	Chief of Naval Operations	Standardizes flight procedures for the U.S. Navy model A6-A and A6-B aircraft.

Object ID	Title	Author	Summary
2009.327.015	NATOPS Flight Manual Navy Model A-6A, A6-B Aircraft Change Notice	Chief of Naval Operations	This is a major change to the pub of the same title dated 15 September 1968. The original pub has about 700 pages. This change has about 450 pages. Purpose of the original document is to standardize flight procedures for the U.S. Navy model A6-A and A6-B aircraft.
2009.327.016	NATOPS Flight Manual Navy Model A-6A, A-6B, A-6C Aircraft	Chief of Naval Operations	Standardizes flight procedures for the U.S. Navy model A-6A , A-6B and A-6C aircraft.
2009.327.017	NATOPS Flight Manual Navy Model A-6A, A-6B, A-6C Aircraft Change Notice	Chief of Naval Operations	This is a major change to the pub of the same title dated 15 September 1971. The original pub has about 800 pages. This change has about 100 pages. Purpose of the original document is to standardize flight procedures for the U.S. Navy model A-6A, A-6B and A-6C aircraft.
2009.327.018	NATOPS Flight Manual Navy Model KA-6D Aircraft	Chief of Naval Operations	Standardizes flight procedures for the U.S. Navy model KA-6D aircraft.
2009.327.019	KA-6D, A-6th Sense, No. 6	Grumman Aerospace Corporation	A basic guide to the KA-6D air-to-air tanker version of the A-6. Written in the vein of the older '... Sense' publications, illustrated with cartoon-like drawings.
2009.327.020	A-6A Power Plants and Related Systems Familiarization	Naval Air Technical Training Command	Training publication on the Navy A-6A aircraft consisting of 10 multi-page foldout technical drawings of the J-52 P6 and J-52 P-8 engines and related systems.
2009.327.021	Environmental Control System Diagrams [A-6]	Naval Air Technical Training Command	Training publication on the Navy A-6A aircraft consisting of single and multi-page foldout technical drawings of the aircraft's environmental systems, including the ejection seat and ejection sequence.
2009.328.001	USMC : A Complete History	Hoffman, Jon T.	A history of the United States Marine Corps from 1775-2003.
2009.328.002	U.S. Navy : A Complete History	Goodspeed, M. Hill	This chronology, featuring a collection of essays and pictorials arranged in a sequential fashion, is both a history of our Navy and of our nation; for as the Navy grew in capability and strength, so did the United States. While no book can relate the history of every ship and sailor that ever served, the chronology is a

Object ID	Title	Author	Summary
			clear and succinct summary of the many roles played by a Navy tailored to meet the changing needs of the people it is sworn to support and defend.
2009.328.003	Illustrated Guide to Battleships and Battlecruisers, An	Jordan, John	A magnificently illustrated compact directory of the world's capital ships from 1939 to the present day. (from back cover)
2009.328.004	Illustrated Guide to the Modern Soviet Navy, An	Jordan, John	A magnificently illustrated compact directory of the Soviet Union's modern surface navy. More than 30,000 words of data and text. Every ship class illustrated, many in color. (from back cover)
2009.328.005	Illustrated Guide to Modern Destroyers, An	Jordan, John	A magnificently illustrated directory of the most important destroyers in service today. 160 [sic] fact-packed pages, featuring full data and descriptions of 54 classes of destroyer in service with 17 of the world's major naval powers. More than 160 superb illustrations: 94 dramatic color and 44 black and white photographs, plus 26 highly detailed ytechnical line drawings. (from back cover)
2009.328.006	Illustrated Guide to Bombers of World War II, An	Gunston, Bill	A magnificently illustrated, compact directory of the major bombers that fought in the most ferocious war in history. More than 40,000 words of text and data. Every aircraft illustrated.. (from back cover)
2009.328.007	Illustrated Guide to German, Italian and Japanese Fighters of World War II: Major Fighters and Attack Aircraft of the Axis Powers, An	Gunston, Bill	A magnificently illustrated, compact directory of the most important Axis Powers' fighters and attack aircraft that played a part in World War II. More than 40,000 words of text and data. Every aircraft illustrated.. (from back cover)
2009.328.008	Illustrated Guide to Spy Planes and Electronic Warfare Aircraft, An	Gunston, Bill	A magnificently full-color directory of the world's modern spyplanes and electronic intelligence and jamming aircraft. (from back cover)

Object ID	Title	Author	Summary
2009.328.009	Illustrated Guide to Future Fighters and Combat Aircraft, An	Gunston, Bill	A magnificently illustrated, compact appraisal of international research projects destined to become tomorrow's fighting aircraft . (from back cover)
2009.328.010	Illustrated Guide to Modern Warships, An	Lyon, Hugh	A magnificently illustrated, compact directory of the most important fighting ships used by the world's navies today. More than 40,000 words of text and data. Every warship accurately detailed. (from back cover)
2009.328.011	Illustrated Guide to Aircraft Markings, An	Wheeler, Barry C.	A detailed examination of the colors and codes worn by the warplanes of more than 100 air forces world-wide. 160 [sic] pages packed with photographs, artwork and background detail on the combat colors of modern military aircraft. Current camouflage for air superiority, ground attack, penetration, naval and special purposes illustrated and expertly assessed. (from back cover)
2009.328.012	Illustrated Guide to Modern Fighter Combat, An	Spick, Mike	A detailed examination of the aircraft, their weapons systems and the tactics they employ in today's air combat arena. 160 [sic] pages packed with full-color action photographs and graphic explanatory diagrams, plus fully detailed specification and performance tables backed by informed analysis covering all the major types of aircraft designed to fly and fight in today's high-threat environment. (from back cover)
2009.328.013	Illustrated Guide to the Modern US Army, An	O'Neill, Richard	All the major weapons used by the world's most technologically advanced ground forces. (from front cover) A magnificently illustrated, compact directory of all the major weapons used by today's high-technology US Army. More than 40,000 words of

Object ID	Title	Author	Summary
			text and data. Over 130 full-color illustrations. ISBN 0-668-06066-2 (from back cover)
2009.328.014	Illustrated Guide to Weapons of the Modern Soviet Ground Forces, An	Bonds, Ray	Major Equipment of Today's Red Army. (from front cover) A magnificently illustrated, compact directory of well over 60 weapons and other military equipment currently in service with the Soviet ground forces. More than 40,000 words of text and data. Over 200 illustrations, mostly color. ISBN 0-668-05344-5 (from back cover)
2009.328.015	Illustrated Guide to Modern Elite Forces, An	Walmer, Max	The weapons, uniforms, tactics and operations of the world's toughest troops. (from front cover) A magnificently illustrated, compact directory of international secret special warfare units, their weapons, training and uniforms. More than 40,000 words of text and data. Over 100 dramatic illustrations. ISBN 0 668 06064 6 (from back cover) Cover: The weapons, uniforms, tactics and operations of the world's toughest troops
2009.328.016	Illustrated Guide to World War II Tanks and Fighting Vehicles, An	Foss, Christopher F.	39 formidable tanks and many variants described in 160 fact-packed pages in color. More than 170 superb illustrations, including action photographs and highly detailed color drawings. (from front cover) A magnificently illustrated, compact directory of all the major battle tanks used by the world's armies in World War

Object ID	Title	Author	Summary
			II. More than 40,000 words of text and data. Every tank accurately detailed. ISBN 0-668-05232-5
2009.328.017	Illustrated Guide to Modern Tanks and Fighting Vehicles, An	Bonds, Ray (ed)	The world's major combat vehicles described in 160 fact-packed pages. 120 action photographs, ost in color. Superbly detailed technical drawings. (from front cover) A magnificently illustrated, compact directory of the major battle tanks and combat vehicles used by the world's armies today. More than 40,000 words of text and data. Every tank accurately detailed. ISBN 0-668-04965-0 (from back cover)
2009.328.018	Illustrated Guide to Rifles and Automatic Weapons, An	Myatt, Frederick	78 modern rifles and automatic weapons. All photographed in full color. 35,000 words of text. (from front cover) A magnificently illustrated compact directory of the most significant rifles and automatic weapons used in twentieth-century warfare. More than 35,000 words of expert text. Every weapon illustrated; individual data tables. ISBN 0-668-05229-5 (from back cover)
2009.328.019	Illustrated Guide to Pistols and Revolvers, An	Myatt, Frederick	An international selection of 74 revolvers and 54 self-loading pistols. All in full color. (from front cover) A magnificently illustrated compact directory of percussion and cartridge revolvers and self-loading pistols from the 19th

Object ID	Title	Author	Summary
			century to the present day. More than 35,000 words of expert text. Every weapon illustrated; individual data tables. ISBN 0-668-05233-3 (from back cover)
2009.328.020	Illustrated Guide to the World's Airliners, An	Green, William	All airliners in service and under development are included in 280 fact-packed pages. 77 aircraft types. All illustrated, most in full color. Also features a section on 80 major world airlines, comprising detailed history, fleet data and a color drawing of the company livery. (from front cover:) ... directory of the world's passenger-carrying airliners. More than 60,000 words of data and text. Every aircraft illustrated, mostly in color. ISBN: 0-668-05612-6 (from back cover)
2009.328.021	Illustrated Guide to USAF : The Modern US Air Force, An	Gunston, Bill	All the major aircraft flown by the world's most advanced air power. Over 160 color photographs. Superb color profiles. 90 line drawings. (from front cover) A magnificently illustrated, compact directory of the most important aircraft and air weapons of today's United States Air Force. More than 40,000 words of text and data. Over 270 illustrations, mostly color. ISBN 0-668-05497-2 (from back cover)
2009.328.022	Illustrated Guide to the Israeli Air Force, An	Gunston, Bill	78 aircraft types and variants from over 30 years of combat are detailed in 160 fact-packed pages. More than 130 photographs, 65 in full color. 33 color profiles and 68 technical line drawings.

Object ID	Title	Author	Summary
			(from front cover) A magnificently illustrated, compact directory of the fighting aircraft of the world's most combat-proven air force. More than 30,000 words of data and text. Every aircraft illustrated. ISBN: 0-668-05506-5 (from back cover)
2009.328.023	Illustrated Guide to the Modern Soviet Air Force, An	Gunston, Bill	In-depth analysis of more than 40 aircraft plus variants. 160 fact-packed pages. 100 photographs, many in rare color. Over 60 superb color drawings. 70 line drawings. (from front cover) A magnificently illustrated compact directory of the most important military aircraft in Soviet service today. More than 40,000 words of text and data. Many rare action photographs. ISBN 0-668-05496-4 (from back cover)
2009.328.024	Illustrated Guide to Techniques and Equipment of Electronic Warfare, An	Richardson, Doug	A revealing insight into one of the most closely guarded areas of military activity: the clandestine world where threat and countermeasure battle constantly for supremacy. (from front cover) An enthralling account, profusely illustrated, of the art and science of modern black-box warfare. 160 pages packed with authoritative text, more than 130 photographs in full-color and dozens of clear and revealing diagrams. Featuring information and analysis on such subjects as the electronic battlefield and jamming systems. (from back cover)
2009.328.025	Illustrated Guide to Tank Busters, An	Quarrie, Bruce	...aircraft, weapon systems and tactics used to destroy tanks on the modern battlefield. 160 pages packed with

Object ID	Title	Author	Summary
			detailed data, informed analysis and full-color action photographs on one of the most crucial areas of modern defense technology. From the M40 recoilless rifle through the Swingfire missile and the Mi-28 Havoc helicopter, every major current anti-tank weapon is featured
2009.328.026	Illustrated Guide to Space Warfare, An	Hobbs, David	More than 25 years have passed since the first military satellites were launched, and in that time space systems have played an ever increasing role in terrestrial military operations. At first they were force multipliers, allowing many traditional military missions to be conducted more efficiently, but as technology progresses they are becoming force enablers, opening up entirely new mission possibilities. As their importance has grown, so has the incentive to threaten an opponent's systems and the need to defend friendly satellites; more recently, the fact that ballistic missiles travel through space on their way to their targets has spurred the investigation of new "Star Wars" technologies aimed at intercepting them before they can deliver their lethal payloads. This Guide catalogues the development of military space systems from the dawn of the space age to the present day. Current satellite systems are detailed, and "Star Wars" research programs are fully described to indicate how future war in space could proceed. (from dust jacket flap)
2009.328.027	Illustrated Guide to Modern Submarines : The Undersea Weapons that Rule the Oceans Today, An	Miller, David	An international survey of more than 70 submarine classes. Full details of boats, weapons, and tactics.
2009.328.028	Illustrated Guide to Modern Sub Hunters, An	Miller, David (David M. O.)	Major weapons used to track and destroy enemy submarines today. Over 90 ASW systems: ships and aircraft, sensors and missiles.

Object ID	Title	Author	Summary
2009.328.029	Illustrated Guide to the Air War Over Vietnam: Aircraft of the Southeast Asia Conflict, An	Nalty, Bernard C.	Sets out to describe and show the most of the major types of aircraft used on all sides during some 30 years of warfare over and around Vietnam and to explain why they were used.
2009.328.030	Illustrated Guide to the Modern US Navy, An : The World's Most Advanced Naval Power	Jordan, John	Deals with the surface ships of the U.S. Navy.
2009.328.031	Illustrated Guide to Military Helicopters, An	Gunston, Bill	A magnificently illustrated directory of the military helicopters, past and present, that have served the world's armed forces. More than 30,000 words of data and text, Every aircraft illustrated.
2009.328.033	Illustrated Guide to Allied Fighters of World War II, An	Gunston, Bill	As indicated by title. Aircraft are arranged alphabetically by manufacturer name within national groups. Each aircraft contains notes on Origin, Type, Engine, Dimensions, Weight, Performance, Armament, History and User.
2009.328.034	Illustrated Guide to Modern American Fighters and Attack Aircraft, An	Wheeler, Barry C.	As indicated by title. Aircraft are arranged alphabetically by manufacturer name within national groups. Each aircraft contains notes on Origin, Type, Engine, Dimensions, Weight, Performance, Armament, History and User.
2009.328.035	Illustrated Guide to Modern Naval Aviation and Aircraft Carriers, An	Jordan, John	As indicated by title. Aircraft are arranged alphabetically by manufacturer name within national groups. Each aircraft contains notes on Origin, Type, Engine, Dimensions, Weight, Performance, Armament, History and User. Ships are described by Completed, names, Displacement, Dimensions, Elevators, Catapults, Propulsion, Armament, and Aircraft.
2009.329.001	USS Enterprise (CV-6) : The Most Decorated Ship of World War II : A Pictorial History	Ewing, Steve	The USS Enterprise, commissioned in 1938, saw service in World War II from the surprise attack at Pearl Harbor in 1941 to the Okinawa campaign in 1945. The author presents a detailed narrative of the ship's twenty-year history including 130 black and white and color photographs.
2009.329.002	Complete History of World War II, The	Miller, Francis Trevelyan	A complete history of World War II with a board of historical and militaty authorities. War

Object ID	Title	Author	Summary
			photographs, maps official records. Includes chronology.
2009.329.003	Materials Handbook : An Encyclopedia For Purchasing Agents, Engineers, Executives and Foremen	Brady, George	An alphabetized listing of man-made and natural materials; their history and scientific and manufacturing applications
2009.329.004	Bluejackets' Manual, 1938	United States Naval Institute	5th revision of Lt. Ridley McLean's original by United States Naval Institute. This revision modernizes the manual to bring it in line with latest Bureau of Navigation training courses and includes such other information as would tend to make an able seaman and a thorough man-war's man.
2009.329.005	Ships and Aircraft of the U. S. Fleet - Victory Edition	Fahey, James C.	This edition describes in detail the wartime expansion of the US Navy. Considerable information which was withheld for reasons of security has been released since Germany and Japan surrendered. A complete roster of combatant vessels and fleet auxiliaries to which names and serial numbers were assigned follows, arranged by class or type Unnamed mine and patrol vessels, landing craft and fleet auxiliaries are grouped numerically by classes.
2009.329.006	Ships and Aircraft of the U. S. Fleet - 1950	Fahey, James C.	Describes the peacetime Navy of early 1950, cut to a fraction of its V-J strength. The booklet lists all vessels on the Navy Register as of January 1, 1950; plus changes announced into June.
2009.329.007	Ships and Aircraft of the U. S. Fleet - War Edition	Fahey, James C.	This edition is necessarily incomplete. Information not readily available to the enemy has been excluded. All data beyond that included in the 1941 "Two-Ocean Fleet" edition is based on officially released government documents and matter appearing in the public prints.
2009.329.008	Ships and Aircraft of the U. S. Fleet - 1965	Fahey, James C.	Describes the Cold War Navy of summer of 1965, its ships, active and reserve, building and authorized; its aircraft and aviation elements.
2009.330.001	USS Forrestal CVA-59 - 1978 Mediterranean Deployment	Apperson, E. (ed)	Pictorial account of her 13th Mediterranean Deployment from 4 April, returning to Mayport, FL on 26 October

Object ID	Title	Author	Summary
			1978. In front of book is a bumper sticker which reads "Forrestal - The Ship with a Heart." Ports visited: Naples, Italy; Catania, Sicily; Valencia/Palma (de Mallorca?) /Malaga/Rota, Spain. Participated in operations Atlantic Crossing, Dawn Patrol, Northern Wedding, Display Determination in addition to ASW Operations and Training, Operations in the Eastern and Western Med. Embarked aboard: CVW-17, CTF-60, CDG -12, CCG-6.
2009.330.002	USS Forrestal CVA-59 - 1979-1980 Mediterranean Deployment	Ancowitz, Steven J.	Pictorial account of USS Forrestal (CV-59) aircraft carrier; lead ship of the class; on her Mediterranean deployment from Mayport, FL on 27 November 1979 returning 7 May 1980 with CVW-17 consisting of HS-3 (SH-3D/H), VS-30 (S-3A), VF-11 (F-4J), VAW-125 (E-2C), VA-85 (A-6E, KA-6D), VA-83 (A-7C/E), VA-81 (A-7C/E), VAQ-133 (EA-6B), VF-74 (F-4J) & one C-1A embarked aboard. Ports visited: Rota, Spain; Marseille & Tulon, France; Naples, Italy; Alexandria, Egypt; Haifa, Israel; Athens, Greece; Palermo, Sicily; Barcelona, Spain.
2009.332.004	Air Navigation - Part 5, Relative Movement	Bureau of Aeronautics	Explains how the aerial navigator can determine his position from a fixed or moving base. Covers problems of interception and geographic searches necessary to the application of dead reckoning.
2009.332.006	Useful Information for Newly Commissioned Officers	Naval Training Support Command	A handbook for new naval officers covering, career, orders, first duty station advice, personal affairs, official records, uniforms, customs of service, social etiquette, professional reading and educational opportunities.
2009.332.007	Night Vision for Airmen	Aviation Training Division, Office of the Chief of Naval Operations	A guide to practicing good night vision.
2009.332.008	Instructor Manuscripts for Reserve Officers' Training Corps, Military Science III, Leadership	United States Army Infantry School	Prepared to support Subject Schedule 443 in presenting instruction in the theory of leadership to students of the Army Reserve Officers'

Object ID	Title	Author	Summary
			training Corps.
2009.332.009	Instrument Flying, Instrument Trainer Instruction Guide	United States Army Air Forces	Standardizes instruction methods and procedures for all Instrument Trainer activities: to provide the instructor with standard and approved flight procedures; to enable the instructor to make the best possible use of the instrument trainer for both basic instrument flying and advanced radio flying. Formerly Restricted handling.
2009.332.011	Airman's Information Manual	Winner, Walter P. (ed.)	Purpose to acquaint student pilots with basic flight and operational procedures as required or recommended by the Federal Aviation Administration, and to serve as a refresher manual for all licensed pilots.
2009.332.012	Naval Aviators Course II	Bureau of Naval Personnel	Primarily for use in the training of, and in maintenance of proficiency of Naval Reserve officers who are naval aviators. This manual is the second of two parts and includes procedures to be followed when operating naval aircraft within the continental United States during peacetime, aircraft armament and tactical use of the fundamental types of naval aircraft. Formerly Restricted handling.
2009.332.013	Aviation Cadet Regulations	Training Division Bureau of Aeronautics	Rules governing naval aviation cadets in the World War II era including organization; instructions relating to conduct and integrity, uniforms and appearance, cadet officer insignia, naval customs, traditions and etiquette, sickness and disability, and leave and liberty; and standing regulations.
2009.332.014	Cold Weather Operations Handbook	Marine Corp Development and Education Command	Prepares Marines to survive and conduct operations for extended periods under moderate through extreme cold weather conditions.
2009.332.015	Instrument Flight Training Manual, The	Dogan, Peter	Meant to provide, in a quickly understood form, a solid instruction for the beginner and a valuable overall refresher for the rated pilot in Instrument flight. Grew out of lessons learned from years of experience of teaching

Object ID	Title	Author	Summary
			instrument rating.
2009.332.016	Airman's Information Manual	Winner, Walter P. (ed.)	Purpose to acquaint student pilots with basic flight and operational procedures as required or recommended by the Federal Aviation Administration, and to serve as a refresher manual for all licensed pilots.
2009.332.017	Naval Ordnance and Gunnery, Volume 2 - Fire Control	Bureau of Naval Personnel	A basic textbook on the subject of naval weapons and fire control prepared mainly as a classroom text for students at the U.S. Naval Academy and NROTC. Contains master index for Volumes 1 and 2.
2009.332.018	Seaman	Bureau of Naval Personnel	Prepared as a text to aid men and women of the U.S. Navy and Naval Reserve who are preparing for advancement to the rate of Seaman.
2009.332.019	Analysis of Primary Training Accidents, An	Bureau of Aeronautics	An analysis of the causes and results of accidents that occurred in the U.S. Navy's primary flight training during 1943. Written to provide new students with an awareness of types of mistakes that are repeated over and over again by student pilots in the hopes of avoiding future accidents.
2009.332.020	ABC Warfare Defense	Bureau of Naval Personnel	Discusses characteristics of Atomic, Biologic and Chemical warfare agents, methods of sampling and detection, and decontamination procedures. Intended as a basic reference on the subject for all enlisted men of the U.S. Navy.
2009.332.021	Basic Military Requirements	Naval Training Command	A self-study training course covering the military requirements for men and women of the U.S. Navy and Navy Reserve. The subject matter is general nature and applies to all general rates.
2009.332.022	Basic machines	Bureau of Naval Personnel	A reference for enlisted men in the Navy whose duties require knowledge of the fundamentals of machinery. Beginning with the simplest machine, the lever, the book proceeds with the discussion of the block and tackle, inclined plane, screws and gears. Explains work and power and differentiates between the terms force and pressure. The final chapters

Object ID	Title	Author	Summary
			include several examples of simple mechanisms combine to make complex machines.
2009.332.023	Fireman	Bureau of Naval Personnel	Developed to assist a U.S. Navy Fireman Apprentice in becoming a Fireman.
2009.332.024	NATOPS Manual, General Flight and Operating Instructions	Chief of Naval Operations	4th revision of the original NATOPS manual setting out program purpose and scope and covering such topics as operation of naval aircraft, visual identification system flight records and reports, flight clearance, air traffic rules, flight precautions, responsibilities of pilots, etc. 14 other OPNAV instructions were cancelled and their subjects incorporated into this revision.
2009.332.025	Naval Air Training and Standardization Manual, C-131	Chief of Naval Operations	Standardizes ground and flight procedures for the Navy C-131 aircraft in order to improve operational readiness and effectiveness. Does not include tactical doctrine. Formerly For Official Use Only.
2009.332.026	Rand's Role in the Evolution of Balloon and Satellite Observation Systems and Related U.S. Space Technology	Davies, Merton E.	Attempts to capture the breadth of interests, the diligence of effort, and the synergy of multidisciplinary applications that Rand and RAND Corporation contributed to achievements for the United States and for the scientific community worldwide in the exploration of planetary and interplanetary space from April 1946 to 1988.
2009.332.027	Radio Navigation for Pilots	McIntosh, Colin H.	Provides pilots with a brief and non-technical presentation of radio-navigation techniques.
2009.332.029	Physics Manual for Pilots	Training Division Bureau of Aeronautics	Physics provides a potential naval aviator insights required to understand the basic fundamentals of aircraft engine operation, what makes an airplane fly, and what makes the weather the way it is and what it is likely to be.
2009.332.031	Aircraft Engines	Naval Air Technical Training Command	A Navy training course on aircraft engines prepared for Aviation Machinist Mates for use in studying for advancement in rate. This edition includes turbo-jet engines.
2009.332.032	Flight Engineering	Naval Air Technical Training Command	Written for the enlisted men of naval aviation. It is one of a

Object ID	Title	Author	Summary
			series of books designed to give them the necessary information to perform their aviation duties. Specifically, it is written for men holding, or desiring to hold, the rating of AMMF.
2009.332.033	Parachutes	Bureau of Naval Personnel	Navy training course designed for those men striking for the rating of parachute rigger. A primer on parachutes and other life-saving equipment such as life rafts and life jackets which are also the responsibility of the parachute rigger.
2009.332.034	Hospital Corpsman 3 & 2	Bureau of Naval Personnel	Navy training course written especially for Hospital Corpsman of both Navy and Naval Reserve preparing for advancement in rate to 3rd or 2nd Class Petty Officer.
2009.332.035	Manual of Engine Operation	Pratt & Whitney Aircraft	Contains Pratt 7 Whitney's Aircraft Engine and It's Operation; Use of the Torquemeter; The Use of Operating Curves; Single Stage, Two Speed Supercharger and It's Operation; and Two Stage, Two Speed Supercharger and It's Operation.
2009.332.036	Ordnanceman 1 & C	Naval Training Command	For use by enlisted personnel of the Navy and Naval Reserve preparing for advancement to AO1 and AOC.
2009.332.037	Gunner's Mate G 3 & 2	Naval Education and Training Command	Provides the technical knowledge and skill requirements necessary to perform tasks in the operations, maintenance and repair of gun mounts, rocket launchers, and small arms, and is for use in preparing for advancement to the ratings of Gunner's Mate G Petty Officer 3rd Class and 2nd Class.
2009.332.038	Infantry Drill Regulations	War Department	One of the War Department's basic field manual series, this one covering infantry drill, formations and some signals. Includes looseleaf 409th Infantry administrative memorandum (1944) on marking and folding of clothing.
2009.332.040	Aviation Ordnanceman 3&2	Naval Education and Training Command	Rate training manual for use by members of the Navy and Naval Reserve in preparing for advancement to Aviation Ordnancemen Petty Officer

Object ID	Title	Author	Summary
			3rd Class or 2nd Class.
2009.332.041	Meteorology for Naval Aviators	Chief of Naval Operations, Air Training Division	Provides the naval aviator with an understanding of basic weather phenomena; particularly weather hazards, weather office information and flight techniques.
2009.332.042	NATOPS Instrument Flight Manual - 1972	Chief of Naval Operations	This manual standardizes instrument flight procedures. Procedures contained are general in nature and are amplified in NATOPS manuals for specific aircraft platforms.
2009.333.001	Question of Honor, A : The Cheating Scandal That Rocked Annapolis and a Midshipman Who Decided to Tell the Truth	Gantar, Jeffrey	In December of 1992, 133 cadets of Annapolis were accused of cheating on an important engineering exam. Two years later, after an internal probe and an investigation demanded by Congress, twenty-nine cadets were separated from the Academy, two weeks short of their graduation and commissioning. One of those cadets was midshipman Jeffrey Gantar--who chose to risk his hard-won career to tell the truth about a conspiracy and cover-up.
2009.333.002	Right Thing, The	Waddle, Scott	In the span of eight minutes on February 9, 2001, Navy Commander Scott Waddle's life was forever changed. He gave the order to perform an emergency maneuver that inadvertently caused the nine-thousand-ton nuclear attack submarine he commanded to rip up through the water and smash into the Ehime Maru, a Japanese fishing boat.
2009.334.001	United States Naval Aviation Patches : Fighter Squadrons, Strike-fighter Squadrons, Reconnaissance Squadrons	Roberts, Michael L.	This is the third of three volumes covering Naval Aviation patches from World War II to the present -- each volume will contain over 1000 patches in full color. This volume covers the patches of the Blue Angels, fighter squadrons, strike-fighter squadrons, all-weather fighter units, composite fighter units, reconnaissance squadrons, lighter-than-air units, torpedo squadrons, airborne early warning squadrons, and training units.
2009.334.002	USS Franklin D. Roosevelt	Wolf, T. (ed)	Pictorial account of the

Object ID	Title	Author	Summary
	(CVA-42) - 1962-63		Midway-class aircraft carrier USS Franklin D. Roosevelt (CV -42)'s Med Cruise 1962-63 - Sixth Fleet Deployment, Sept. 62 - April 63
2009.334.003	Saving Seaman Stuart	Stuart, Curtiss N.	The personal narrative of James Merton (Jim) Stuart who served onboard the USS Franklin during World War II.
2009.334.005	Few Naval Customs, Expressions, Traditions and Superstitions, A	Beckett, W. N. T. (Walter Napier Thomason)	The 2nd edition was 1931 This is the 3rd edition, but there was no date.
2009.334.006	Four Stacker Comic Book	Algiers, Norman (Norman A.)	"Four Piper Destroyer Fellowship proudly presents a reprint of the original." "I drew this - for U.S. Asiatic 4-stacker Destroyer Group - going back in memory to my 5 years 1935-40 on USS Elliott DD 146 ..."--P. 45 A comic book presentation of the author's life on the USS Elliott DD 146.
2009.334.007	Last Battleship, The : The Story of the USS Missouri (BB-63)	Stone, Scott C. S.	A short, illustrated history of the USS Missouri Battleship BB-63.
2009.334.008	Maritime Museums of North America including Canada	Smith, Robert H.	This book describes more than 600 maritime museums and canal locks in the United States and Canada. Several elaborately cross-referenced indexes will guide the reader to any area o specialized interes, such as submariens, ships, scrimshaw, research libraries, and photographic collections. (The author lives in Del Mar, CA). This appears to be an updated version of the book: The Naval Institute guide to maritime museums of North America : with selected lighthouse, canal, and canal lock museums / Robert H. Smith, published in 1990.
2009.334.009	Saving Big Ben : A Historical Novel : The Saga of the USS Franklin, the Most Decorated Ship in Naval History	Prato, Peter J.	Saving Big Ben is the story of the aircraft carrier U.S.S. Franklin, CV 13, "the ship that would not be sunk." Her crew was awarded the greatest number of decorations ever conferred on a single ship in Naval History. "Direct from the USS Franklin's declassified deck and action logs." This is a work of fiction. This is an Original Limited Edition pre-Publication Copy, signed by the author, 7/23/01.

Object ID	Title	Author	Summary
2009.334.010	USS Franklin (CV-13) : The Ship That Wouldn't Die	Nilo, James (ed)	The "Ship That Wouldn't Die." More than 120 vivid battle photos, personal war memories, and the facts behind the amazing legend chronicle this "great lady" who was named for the patriot Benjamin Franklin. She lived up to her namesake displaying the fortitude of courage that makes her a "Statesman of the Sea." Come relive the story of the ship that wouldn't die through the memories of the men that served aboard her. Personal biographies, ships roster, and priceless documents make this a must for WWII history buffs everywhere.
2009.334.011	Theaters of War : We Remember	Lazar, Wendy Phillips (ed)	From torrid mosquito-infested islands of the South Pacific to forested snow-covered mountain passes in Europe, Theaters of War : We Remember is a vivid and dramatic document of World War II as seen through the eyes and told from the hearts of those who experienced it.
2009.334.012	War and Remembrance	Wouk, Herman	War and Remembrance is a historical romance. The subject is World War II, the viewpoint American.
2009.334.013	Brassey's Air Combat Reader	Boyne, Walter J. (ed)	"Anyone interested in the history of air warfare will treasure this wide-ranging anthology." -U.S. Naval Institute Proceedings Product Description Showcasing the twentieth century's best writing on the topic of air combat from World War I through the Gulf War, Brassey's Air Combat Reader examines the evolution of air combat strategy and tactics. It includes extracts from memoirs by such legends as Antoine de Saint-Exupéry, hair-raising third-person accounts by such great pilots as Douglas Bader and by such heroic leaders as Pete Mitscher, and one compelling work of fiction by best-selling novelist Walter Boyne. Classic writings on the art and science of air warfare by visionaries Billy Mitchell, Giulio Douhet, and others

			trace the evolution of military aviation. Philip Handleman concludes with an insightful chapter about the future of air warfare. (Source: Amazon.com) Dust jacket: Historic Feats and Aviation Legends
2009.334.015	USS Chevalier DD-805 '67-'68	Meter, Charles M. (ed)	USS Chevalier (DD/DDR-805) Gearing-class destroyer
2009.334.016	USS Parsons (DD-949) - Yearbook - 1960-1961	None Stated	USS Parsons (DD-949) was built as a Forrest Sherman-class destroyer. In 1967 she was converted to a Decatur-class guided missile destroyer and redesignated DDG-33.
2009.337.001	Meet the SNJ-3	Jam Handy Organization, The	An orientation to the SNJ-3 aircraft showing how to start the engine, warm up, take off, fly, land, taxi back and shut down the plane. This appears to be a training film, "The Pilot Meets the SNJ-3", turned into a training manual. Formerly 'Restricted' handling.
2009.337.002	Milestones of Flight	Taylor, Michael John Haddrick	"... a condensation of fascinating highlights of man's effort to gain wings and to reach out into space. It provides a running development of aviation and spaceflight which, interspersed with a background of important international events, makes fascinating reading." [From the book's Introduction]
2009.337.003	Jane's All the World's Aircraft - 1970-71	Taylor, John W. R. (ed)	Compendium fo the world's aircraft organized by country with characteristics tables and photos of most aircraft types.
2009.339.001	USS Midway (CV-41) - Movin' West - 1974	Hughes, Ken (ed)	Pictorial account of the change of homeports of USS Midway (CV -41) from Alameda, CA to Yokosuka, Japan in 1973 and other activities the ship engaged in through at least September 1974 when Midway entered the shipyard in Yokosuka. The ship departed the San Francisco Bay area on 11 September and arrived at Yokosuka on 5 October. No significant operations or exercises were noted other than a period of Refresher Training. Port calls in the period included, Hawaii, The Philippines, Hong Kong

Object ID	Title	Author	Summary
			and Pusan.
2009.339.002	Taking Care of Business... USS Midway CV-41 - 1976	Wong, Gordon (ed.)	Pictorial account of the activities of the USS Midway over an undetermined period that covered events in 1975 to sometime in the first half of 1976. 16 pages of photos are devoted to Operation Frequent Wind during the fall of Saigon in 1975. Port visits in the period included Singapore, Pusan, Karachi, Hong Kong and Subic Bay.
2009.339.003	USS Midway (CV-41) - We Believe in Magic - 1982-1983	Hager, D. (ed.)	Pictorial account of the life of the Midway from mid-1982 through 1983. Operations included COPE Strike, ASWEX 82-83. a NORPAC exercise with USS Enterprise (CVN-65)., MERLION 82-1, MULTIPLEX 83-1, EMERALD CREST, CRAE, MINEX B 83-1AK, TEAM SPIRIT 83, FLEETEX 83-1, READEX 83, VALIANT BLITZ 83-1, MISSLEX OKI, MULTIPLEX 83-3A, MINEX A/B 8-2, and finally an ORE (Operational Readiness Evaluation). Port visits included Singapore, Pusan, Subic Bay and Hong Kong. CVW-5 was embarked consisting of the following squadrons: VF-161 (F-4S); VF-151 (F-4S); VA-93 (A-7E); VA-56 (A-7E); VA-115 (A-6E and KA-6D); VAW-115 (E-2B); VMFP-3 Det.B (RF-4B); VAQ-136 (EA-6B); and HC-1 Det.2 (SH-3G).
2009.339.004	USS Midway (CV-41) - 1981-1982 - Carrier Air Wing FIVE	Cribbs, John B. (ed)	A pictorial account of the life of the USS Midway between the beginning of 1981 to the middle of 1982. Extended underway periods included a deployment to the western Pacific (WESTPAC) and Indian Ocean from 24 FEB to 5 JUN 81, 26 JUN to 16 JUL 81 (WESTPAC), 3 SEP - 6 OCT 81 (WESTPAC) and 26 APR to 18 JUN 82 (WESTPAC). Significant operations/exercises included MERLION, BEACON SOUTH, BEACON COMPASS, MISSLEX, MINEX, GONZO, SOAFEX, MULTIPLEX (2), TEAM SPIRIT 82-1 and READEX

Object ID	Title	Author	Summary
			82. Midway underwent an Extended Incremental Ships Restricted Availability (EISRA) from late December 81 to 7 MAR 82 in Yokosuka. Port calls during the period covered by the cruise book included Singapore, Pattaya Beach, Hong Kong, Pusan, Sasebo and Subic Bay. CVW-5 was embarked for all extended underway operations. It's composition varied slightly but general consisted of: VF-161 (F-4S); VF-151 (F-4S); VA-93 (A-7E); VA-56 (A-7E); VA-115 (A-6E and KA-6D); VAW-115 (E-2B); VMFP-3 Det.B (RF-4B); VAQ-136 (EA-6B); and HC-1 Det.2 (SH-3G).
2009.339.005	T-, T+: Tico 14 Crew's Book - Apollo 16 Recovery	Folgate, Julius M. (ed)	During the remainder of her active career, [USS Ticonderoga (CV-14)] made two more deployments to the Far East. Because of her change in mission, neither tour of duty included combat operations off Vietnam. Both, however, included training exercises in the Sea of Japan with ships of the Japanese Maritime Self Defense Force. The first of these two cruises also brought operations in the Indian Ocean with units of the Thai Navy and a transit of Sunda Strait during which a ceremony was held to commemorate the loss of USS Houston (CA-30) and HMAS Perth in 1942. In between these two last deployments, she operated in the eastern Pacific and participated in the recovery of the Apollo 16 moon mission capsule and astronauts near American Samoa during April of 1972. The second deployment came in the summer of 1972, and, in addition to the training exercises in the Sea of Japan, Ticonderoga also joined ASW training operations in the South China Sea. That fall, she returned to the eastern Pacific and, in November, practiced for the recovery of Apollo 17. The next month, Ticonderoga

			recovered her second set of space voyagers near American Samoa. The carrier then headed back to San Diego where she arrived on 28 December. (from navy.mil)
2009.339.006	USS Ticonderoga - Prime Recovery Ship - Apollo 17 - 1972-73	Barsosky, John	Pictorial account of the recovery mission for Apollo 17, the last of the Apollo missions. Ticonderoga was the primary recovery ship. The ship departed San Diego on 25 November 1972 and returned to San Diego on 27 December the same year. The recovery took place off Samoa on 18 December.
2009.339.007	USS Ticonderoga (CV-14) - Prime Recovery Ship - Skylab II - 1973	McDaniel, Bobby	Pictorial account of the last mission of USS Ticonderoga as primary recovery ship for Skylab II. The recovery took place on 22 June, 1974, and Ticonderoga arrived back at her homeport of San Diego with the ship's deactivation process already underway.
2009.340.001	USS Midway (CV-41) - Mediterranean Cruise - 1947-1948	Mahler, W. A. (ed)	USS Midway (CVB/CVA/CV-41) aircraft carrier; lead ship of the class. A pictorial account of the USS Midway (CVB-41) Mediterranean Cruise, 1947-48. The ship departed Norfolk, VA on 29 OCT 1947 and returned to Norfolk on 11 MAR 1948. Port visits included Gibraltar, Malta, Tangier, Cannes, Bone, Genoa, Naples, Syracuse, and Taranto. Total miles travelled - approx 19,000.
2009.341.001	USS Hancock (CV-19) - The Fighting Hannah : A War History of the USS Hancock - 1944-46	Hines, E. G. (ed)	Pictorial account of the USS Hancock (CV-19) during World War II and up through 1946. The Hancock was christened on 24 January 1944, and was commissioned 15 April 1944, with Captain Fred C. Dickey in command. This cruise book is a pictorial account beginning with the christening follows her through her war time campaigns and four captains (including D. V. Gallery), and up to her inactivation in September of 1946. Ports of call and items of interest: liberty stop in Hawaii; joined Halsey's third fleet and hit air fields in Okinawa; supported ground troops around

Object ID	Title	Author	Summary
			Masbate Island, south of Manila; the Hancock became the flagship of Task Force 30 when Vice Admiral John S. McCain boarded; more sorties against Ulithi; destruction of airfields on Formosa, Luzon and a sally into the South China Sea; Wake Island; joined Admiral Halsey's Third Fleet for the invasion of Japan; at the end of the book there is a list of Killed and Missing in Action, and a last list of Missing.
2009.342.001	USS Chicago (CG-11) - 1979	Kochersperger, Michael F. (ed)	Front page has this title: The Final Deployment of the World's Greatest Guided Missile Cruiser, USS Chicago (CG-11) in Westpac, 30 May 1979-17 December 1979.
2009.342.002	USS Mahlon S. Tisdale (FFG-27) PACEX '89	Williams, T. (ed.)	Oliver Hazard Perry class guided -missile frigate USS Mahlon S. Tisdale (FFG-27). PACEX 89 commenced on 05 September 1989, Tisdale's third deployment to SEVENTHFLT and the Western pacific.
2009.343.001	Library of Congress World War II Companion, The	Kennedy, David M. (ed.)	"... examines in a unique and engaging manner this devastating conflict, its causes, conduct and aftermath. it considers the the politics that shaped the major combatants; military leadership and the characteristiccs of major Allied and Axis armed services, the weaponry that resulted in the war's unprecedented destruction, as well as debates over use of these weapons; the roles of the resistance groups and underground fighters; war crimes; daily life during wartime; the uses of propaganda; and much more." (Excerpted from jacket flap.)
2009.343.003	Dawn Like Thunder, A : The True Story of Torpedo Squadron Eight	Mrazek, Robert J.	Novelist and former U.S. congressman Mrazek has written an admirable history of the Torpedo Squadron Eight, legendary to World War II buffs. Most of the squadron, flying off the U.S.S. Hornet for the Battle of Midway in obsolete Devastators, perished in a famous low-level attack. But six more modern Avengers flew from Midway itself, and the survivors in them formed

Object ID	Title	Author	Summary
			the nucleus of a squadron that went on to fly Avengers off the carrier Saratoga until it was damaged by a submarine attack, and then from Henderson Field on Guadalcanal in the climactic stages of the campaign for the island. Mrazek has made painstaking use of written sources and the personal memories of surviving members of the squadron to produce a long book, but one that will keep students of the crucial year 1942 reading assiduously. A boon to the literature of the WWII Pacific theater and of naval aviation. --Roland Green Review "A Dawn Like Thunder hooked me from the first page and didn't let go. Mrazek has written the definitive account of how the few American pilots of Torpedo Squadron Eight changed history at Midway and Guadalcanal. A stirring, truly heroic book that is destined to become a classic." (Alex Kershaw, author of The Longest Winter) "A marvelous book. Mrazek's research and obvious affection for his heroes is indeed extraordinary. A Dawn Like Thunder is a spectacular achievement and a vital addition to any Pacific War library." (Hon. Charles Wilson of Charlie Wilson's War) "Robert Mrazek has, with a raw, unsparing telling given grace and life to so many who died so young, so every-day, so gallantly. Wonderfully uplifting." (Frank Deford, author of The Entitled) "A Dawn Like Thunder is no ordinary history. It is a soaring epic prose ballad about a group of young Americans whose rendezvous with destiny in 1942 at Midway and then Guadalcanal blazed a trail their whole generation would follow. With an amazing depth of research and a keen eye for

Object ID	Title	Author	Summary
			detail, Mrazek has brought to vivid life an enduring tale of human tragedy and triumph that will speak down to the latest generation." (Richard B. Frank, author of Downfall) "Robert Mrazek brings the dare-devil pilots of Torpedo Squadron Eight back to life in a narrative so vivid and heartbreaking that their courage reaches across the decades, leaving us moved by their incredible sacrifice and heroism." (Thurston Clarke, author The Last Campaign) "A remarkably vivid tale of valor, fate, and young men dying young. Mrazek's epic story, reconstructed with breathtaking research and recounted with a novelist's keen eye for detail, is a worthy monument to Torpedo Squadron Eight." (Rick Atkinson, author of The Day of Battle) "The most highly decorated Navy Flyboys of World War II flew through hell and suffered the highest combat losses. Strap yourself in as Robert Mrazek takes you on a heroic flight into history." (James Bradley, author of Flyboys) All above from Amazon.com

2010.301.020	Welcome Aboard : A Service Manual for the Naval Officer's Wife	Johnson, Florence Ridgely	How This Book Came to be Written: Thirty years ago Florence Ridgely Johnson married a young Junior Lieutenant only four years out of the Naval Academy and a few months out of Naval Flight Training. Since then her husband, in his progress from Lieutenant Junior Grade to Rear Admiral, has served afloat and ashore pretty much around the world. Service orders have taken him from the Navy Department at Washington and various home ports to carrier and patrol squadrons at sea and naval bases and air stations overseas. And like any other loyal Navy wife, Mrs. Johnson accompanied her husband from country to country and place to place, moving on an average of every two years or less. Hence she acquired intimate first hand experience not only of Naval Customs and social usage, but also with packing, moving, making new homes and new friends, and handling the complications of business and legal affairs that every wife has to handle who marries into the Service.

Object ID	Title	Author	Summary
			And inasmuch as it is both custom and tradition that the wife of an officer in the Service has a moral obligation to render whatever assistance is in her power to welcome aboard any newcomer and help her "get squared away," Mrs. Johnson formed the habit of writing down the answers to questions most often asked her by junior officers' wives. These questions and their answers covered such a broad field that she eventually decided to incorporate all the information at her command into one book. This is that book. (from dust jacket inside front flap)
2010.301.021	Answer Book on Naval Social Customs, The	Wier, Ester	"Of at least a baker's dozen books dealing with military social customs and codes of behavior expected of officers and their wives, this is the most practical one we have seen." NAVY TIMES Plunged into the whirlpool of naval social life, the young naval officer and his wife often feel lost. There are hundreds of unwritten social laws and points of protocol to be learned in a short time. This practical, down-to-earth book serves the Navy wife as an accurate reference, in question-and-answer form, of the WHO, WHAT, WHEN, WHERE, WHY, AND HOW of naval social life. The authors cover their subject completely and thoroughly. Winzola McLendon of the WASHINGTON POST praised their effort highly for containing "a wealth of information which is never included in the conventional books of etiquette." This book is filled with positive information of the "how-to" type. It is not merely a statement of traditions and customs. Within its pages you will find complete information on social calls and cards. It

Object ID	Title	Author	Summary
			covers everything from Brunches to Baby Showers, telling you how to invite your guests, how to answer invitations, what time parties are held, what to wear, and how to act. Even functions such as Sewing Groups and Dessert Bridge are covered, as well as what to do when going aboard ship. The glossary of naval terms not only explains their meaning but gives you a key to which ones may be included in your conversation. This book will help settle many of the finer points of social amenities which still puzzle the "old timers." Many amusing and pointed illustrations add spice and piquancy to the text. (from dust jacket inside front flap)
2010.301.022	San Diego : A City of Heroes	North Shores Adult School	The book is a compilation of 19 biographies of military men from San Diego many of whom have won the Navy Cross, the Distinguished Service Cross, the Congressional medal of Honor and/or the Silver Star. Each of the biographies includes a B&W photograph of a portrait of the person. Biographies include: Staff Sgt. Markland, USMC; Sgt. Major Anthony B. Kouma, USMC; Lieut. James B. Southall, USMC; Pvt. Fred Leo Hall, USA; Lieut. Harold F. Dixon, USN; Gunnery Sgt. Arthur G. Barbosa, USMC; General Alfred H. Noble, USMC; Rear Adm. Leslie E. Gehres, USN; Colonel John F. Williams, USA; Colonel Carl L. Sitter, USMC; V. Adm. Lawson P. Ramage, USN; Cdr. Ernest W. Downey, USN; Captain Arthur J. O'Keefe, USA; Colonel A. C. Hofstetter, USMC; Gen. Harry Schmidt, USMC; Major Leland C. Nielsen, USA; Brig. Gen. Roswell Winans, USMC; Captain James W. Allen, USMC; and Captain Stanley W. Vejtasa, USN.

2010.302.009	Chance Vought F7U Cutlass	Koku-Fan - 132	Chance Vought F7U Cutlass
2010.302.010	Nimitz Class Aircraft Carriers	Goodall, Jim	The largest naval vessels in the world are the Nimitz-class super aircraft carriers. The Nimitz (CVN-68) launched the class when it was commissioned on 3 May 1975 and it has been followed by another 9 vessels. Each is more than 1,000 feet long, and displaces 103,000 tons at full load. Carriers are vital to the projection of US power around the globe: USS Nimitz responded to the Iran hostage crisis in the late 1970s, launched raids on Libya in the early 1980s and challenged China's growing navy in the Taiwan Straits in 1996. USS Dwight D. Eisenhower was the first US warship to respond to the Iraqi invasion of Kuwait in August 1990. USS Carl Vinson was the first to launch air attacks as part of Operation Enduring Freedom in Afghanistan. In the mid-1990s USS Theodore Roosevelt supported NATO air strikes against Bosnian Serbs during fighting in former Yugoslavia. USS Abraham Lincoln backed up Operation Iraqi Freedom and Enduring Freedom in Afghanistan in the early 2000s. Illustrated with more than 300 photographs, plus color profiles and detailed line drawings. Goodall; 80 pages. (from squadronsignalpublications.com)
2010.302.011	Sir James Martin : The Authorised Biography of the Martin-Baker Ejection Seat Pioneer	Sharman, Sarah	A biography of Sir James Martin, founder of the Martin-Baker Aircraft Company and designer of the ejection seat which has saved the lives of more than 6400 aircrew worldwide. One of the finest engineers of this century, Sir James was a passionate individualist, with little time for government control. The book features Sir James's prototype aircraft, including the MB5 piston-engined fighter, and

			examines the ejection seat for which he is best remembered. Royalties from the book will be donated to the RAF Benevolent Fund. (Source: Amazon.com)
2010.302.012	Captain Course	Maritime Institute	The Maritime Institute's U.S. Coast Guard Approved Course will cover all sections of the required material for the following licenses: Master/Mate of Near Coastal or Inland Steam or Motor Vessels of Not More Than 100 Gross Tons; Master of Inland Steam or Motor Vessels of not more than 100 Gross Tons; Operator of Uninspected Passenger Vessels (OUPV) of Less Than 100 Gross Tons, Not More Than 100 Miles Offshore.
2010.302.013	Return to the Philippines, 1944	Lambert, John W.	Whether air power has been truly decisive in any war is always a hotly debated issue. However, for the conflict that raged in the Pacific from 1941 to 1945 there can be no such dispute. The employment of land or carrier-based airpower was key to the strategic operations of all adversaries. These are pictorial studies of the Allied air offensive that defeated Japanese air forces in the vast Pacific Ocean region, destroyed Japan's navy and its supply lines, and finally devastated the war making potential of the Japanese homeland. The photos come from official archives as well as from the private collections of veterans. The captions reflect painstaking research to supply date, place, and units engaged. Volume One reviews the period from 1943 to 1944 after the Allies stemmed the tide of Japanese conquest in the South Pacific. Allied victories defeated or isolated Japanese forces in New Guinea, the Solomons, the Mandated Islands, and the Marianas, setting the stage for the invasion of Leyte and the return to the Philippines. During this period the vaunted Japanese Navy was rendered impotent by carrier and land-based air

			of veterans. The captions reflect painstaking research to supply date, place, and units engaged. Volume Three describes the final air assault on the Japanese homeland by Marianas-based B-29s; tactical air forces based on Okinawa, Ie Shima, and Iwo Jima; and by the aircraft carrier armada of Task Force 38. (Source: schifferbooks.com)
2010.302.016	Century of British Naval Aviation, 1909-2009, A	Wragg, David	Published to coincide with the Centenary of Naval Aviation, this book tells the fascinating and proud history of the first century of British Naval aviation. During this period the Royal Navy has led the way with technological achievements such as the angled flight decks, mirror deck landing systems and vertical take-off and landing (VTOL). Operational successes during two World Wars include the sinking of the Konigsberg and the daring attack on the Italian fleet at Taranto, Arctic and Atlantic convoy protection and operations with the United States Navy in the Pacific. Post-war saw the politically ill-fated Suez intervention and the triumphant recapture of the Falklands.
2010.302.017	Carrier Pilot : An Unforgettable True Story of Wartime Flying	Hanson, Norman	Norman Hanson's story of serving as a fighter pilot aboard an aircraft carrier in the Royal Navy during World War II. The book describes training in the UK and with the US Navy; the attitude of Americans to Britons; the camaraderie which existed among aircrews; and the incredibly high risks involved in carrier flying. There is a mass of descriptive information about aircraft operations from carriers. The famous British aircraft carrier Illustrious is described lucidly and extensively, providing a vivid image of what it was like to live on and fly from these huge vessels.
2010.302.018	Flying Hookers for the Macon : The Last Great Rigid Airship Adventure	Hook, Thom	A history of the USS Macon airship. A number of viewpoints as to why the Macon was lost are given.

Object ID	Title	Author	Summary
			Included as appendices are accounts of the last flight by Lt. H. B. Miller, RADM Calvin M. Bolster, and RADM Alfred B. Metsger. There is a list of the battle crew of the Macon, a bibliography and an index.
2010.302.019	CVN-76 Ronald Reagan : U.S. Navy Aircraft Carrier	Zimmerman, W. Frederick	Twenty three colored pictures of the Ronald Reagan aircraft carrier (CVN-76) with a brief description of each picture.
2010.302.020	Grumman F-14 Tomcat: A Comprehensive Guide, The	Evans, Andy	This title features: full colour throughout; details of the F-14A, F-14B and F-14D Tomcat variants; in-depth views of the Tomcats flown by the US Navy and Iranian Air Force; walkarounds, weapons and warfare; flying the Tomcat - 'From the Cockpit' commentary; 32 Colour side-views; Modelling The Tomcat in popular scales; a guide to available kits, decals and accessories; and, scale plans. (Source: Amazon.com)
2010.302.021	Battle of Midway, The	Horton, Thomas F. (director)	This program documents the Battle of Midway--the most important battle of the war in the Pacific during WWII. Not only was it a demoralizing disaster for the Japanese Navy and the war commanders, but it deprived the Japanese of their most important strategic resource that was essential in the naval battles of the Pacific war--aircraft carriers. This documentary utilizes Japanese and American archival footage from the actual battle, as well as interviews with many of those who fought the battle on both sides. Also, re-creations and computer graphics illustrate the decisive turning points of the battle. (from back cover:) The Battle of Midway was the most important battle of the War in the Pacific during World War II. By any ordinary standard, the U.S. Navy was hopelessly outclassed. They had no battleships, the enemy eleven. They had eight cruisers, the enemy twenty three. They

Object ID	Title	Author	Summary
			had two working cruisers, the enemy had eight...and they actually knew very little of war. They were up against the finest fighting plane in the world: The Japanese Zero-yet somehow they prevailed? This is their story of strategy, pluck, individual skill and incredible luck over might.
2010.302.022	Japanese Secret Projects : Experimental Aircraft of the IJA and IJN 1939-1945	Dyer, Edwin M.	Secret and X-Plane aircraft projects remain highly popular with historians, enthusiasts, modellers and the flight sim community. Surprisingly, secret Japanese planes of World War 2 remain an area which has been largely ignored due to scarcity of information. They do, however, have a large base of interest as unlike the majority of secret Luftwaffe programs that were resigned to the drawing board, the vast number of aircraft featured within this book actually flew or were in development. The book is divided into two sections dedicated to the two air forces of the IJA and IJN, with over 42 aircraft examined, each with its history, variants, performance, and any combat records laid out in an easy to read fashion. Much information about their secret technical exchanges with the Luftwaffe throughout the war is also uncovered. This is beautifully complimented by stunning colour renditions of the aircraft in combat and colour profiles of genuine markings and camouflage. Notable emphasis is placed upon the transonic rammer aircraft, strategic long-range bombers, and the ways in which the Japanese adapted German technology to their needs, particularly the Me262 and Me 163 Komet. Secret Japanese armaments are also covered in detail, with information on guided missiles, aerial rockets, and unique bombs. It is a gripping read for aviation and military enthusiasts around the world! About the Author

Object ID	Title	Author	Summary
			Edwin M. Dwyer has studied military technology for more than 20 years, concentrating on weaponry from 1914 to 1960. In 1999, he created the Hikoki:1946 website, highlighting Japanese experimental aircraft. He is currently serving in the United States Civil Air Patrol with the rank of Master Sergeant. Object ID	Title	Author	Summary
			(CVN-73). John C. Stennis (Aircraft carrier). USS John C. Stennis (CVN-74). Harry S. Truman (Aircraft carrier). USS Harry S. Truman (CVN-75). . Ronald Reagan (Aircraft carrier : CVN-76). USS Ronald Reagan (CVN-76). George H. W. Bush (Aircraft carrier). USS George H. W. Bush (CVN-77).
2010.302.033	US Navy Aircraft 1946-2000	None Stated	Mostly Black and White photos of US Navy Aircraft. Text is in Japanese.
2010.302.034	Camouflage & Markings of the US Navy/USMC, Vol. 2: 1955-1975	Kawano, Yoshiyuki	Color photos and color drawings of US Navy and US Marine Corps planes and their markings. Text is in Japanese.
2010.302.035	U.S.S. Saratoga : CV-3 & CVA/CV-60	Stahura, Barbara	There is a history of USS Saratoga CV-3, 1925-146, and USS Saratoga CVA/CV-60, 1959-1994. Additionally, veterans of the USS Saratoga CF -3 & CVA/CV-60 were invited to write and submit biographies for inclusion in this publication. Appendices include: the crest of Saratoga, ship specifications, KIA, awards and medals, USS Saratoga Association.
2010.302.036	McDonnell F-4 Phantom : Spirit in the Skies	Lake, Jon (ed)	This volume tells the story of the F-4 Phantom in far greater detail than any other publication. With a quarter of a million words and 650 photographs, it recounts the history, details the variants, portrays the units--their colors and their aces, describes the weapon systems, and depicts what a great aircraft the Phantom was to fly.
2010.302.037	Air Base	Guyton, Boone T.	Includes several early pictures of North Island Naval Air Station, San Diego, CA. Also, some pre World War II airplanes, and two pictures of the USS Lexington. The author was a Naval Aviator and a test pilot for Vought-Sikorsky Aircraft. This book appears to be a fictionalized account of his time in the Navy, 1935-1939.

Object ID	Title	Author	Summary
2010.302.038	Japanese Submarine Aircraft	Januszewski, Tadeusz	From a review written by Ray Mehlberger from the cybermodeler website. "This book tells the stories of using submarines to transport aircraft to areas of operations that was beyond the aircraft's normal flying range. Several countries tried this during WWII including Germany, Britain and the US. Only Japan persisted with the tactic. Includes pictures and line drawings of the "Glen" and "Seiran" planes." Japanese aircraft include: Yokosho 1-Go, Yokosuka E6Y1, Watanabe E9W1 (Slim), Kugisho E14Y1 (Glen), Watanabe E14W1, Aichi M6A Seiran/Nanzan, and Kugisho Ohka Model 43 Ko.
2010.302.039	Naval Air Weapons Meet, 1956-1959	Romano, Angelo	In 1956 the US Navy decided to establish an annual competition between specially selected Navy and Marine Corps squadrons from both coasts. The first such was called the Navy Fleet Air Gunnery Meet and was held at NAAS, El Centro in June 1956. The second meet which was renamed the Naval Air Weapons Meet in April 1957. The third was held in 1958; the fourth and last was in 1959 and was at MCAAS Yuma. After the fourth the Navy suspended the meets. This book is a photographic history of the meets.
2010.302.040	United States Naval Aviation 1910-1918	Shirley, Noel C.	A complete history of the early development of naval aviation in the U.S., and the role that the naval aviation service applied to the war effort during 1917-18. Detailed discussion is also provided regarding the role of USMC aviation during this time. There are over 100 pages in the Appendixes that describe 19 Naval Air Stations abroad.
2010.302.041	United States Naval Vessels : The Official United States Navy Reference Manual	Morison, Samuel L.	This book comprises four manuals compiled from official sources during World War II: Silhouettes of U.S. Naval Ships (ONI-54) Ships and Shapes : Anatomy and Types of Naval Vessels (ONI-223) US : United States Naval

Object ID	Title	Author	Summary
			Vessels (ONI-222) United States Fleet (From Pearl Harbor to Oct. 1, 1945) Index of United States Fleet Manuals such as those in this book, were distributed widely through the fleet and used constantly as a standard reference. The Office of Naval Intelligence published a library of manuals that covered our own Navy as well as British, French, Soviet, Japanese and German Navies, among others. The first part of this book comprises the manual entitled ONI 222-US:United States Naval Vessels. In the official introduction to this manual. Commodore Thomas B. Inglis, USN,Acting Director of Naval Intelligence states, "It is a graphic and statistical picture of the U.S. Navy at its peak in numerical strength. The information in this manual is corrected to and as of 1 September 1945." The second part of this book is study compiled by the Statistical Section of the Officer of Naval Intelligence. Entitled The United States Fleet(From Pearl Harbor to Oct. 1, 1945). the purpose of this study is two fold. As it states in the introduction, "the purpose of the present table is A: To provide a compact and readily intelligible overall view of the United States Fleet. (1) Before the onset of War, (2) At the end of the war, (3) At the present time, and (4) As presently being built for the future, and B: To present a summary of the charges which have taken place in the United States Fleet, Documented by the names or hull numbers of the vessels whose status have changed". The latter includes those ships sunk during the war and converted/reclassified to other uses. The final part of this book is a reprint of a 1 December 1944 document entitled Index of United States Fleet. This document was prepared by Commander, Air Force, Pacific Fleet. Excepting un-named

Object ID	Title	Author	Summary
			ships and craft, all vessels are included. They are listed individually by their classification, followed by their name, in tabular form under their class name. While this document does not include unnamed ships, such as those found in the Patrol Vessel and Amphibious categories, the manual does include a separate section for Landing Ships, Craft and Vehicles, with characteristics and illustrations, at the end of the document. (Source: schifferbooks.com)
2010.302.042	United States Navy SB2U Vindicator	Bell, Dana	This second book in a new series, authored by famed aircraft historian Dan [sic] Bell, is a dedicated look at the US Navy dive bomber from the pre-war and early WWII period. All aspects of this aircraft are covered in a 72 page format, 8 of which are full color. Included are numerous photographs of overall views, all exterior details, cockpit interiors, line drawings, color photographs, and color illustrations. Extensive research is presented within the body of text, as well as informative captions which accompany each photograph and the illustrations. This book offers many previously unknown details and corrections to past information in one of, if not the most extensive look at this aircraft type. This publication, as well as this new series of dedicated aircraft pictorials, will become a highly sought after reference for both the aircraft modeler and enthusiast. (Source: freetimehobbies.com)
2010.302.043	First and Foremost : An Illustrated History of Carrier Air Wing One - Part 2 - 1957-1973	Olson, Douglas D.	An history of Carrier Air Wing One from 1957 through 1973. The second in a four-part series covering the life of the air wing. Includes appendices for Air Wing One commanders and unit insignia.
2010.302.044	Vought SB2U-3 Vindicator Pilot's Flight Operating Instructions	Bureau of Aeronautics	PeriscopeFilms.com reprint of formerly Restricted, Bureau of Aeronautics publication. WW II forerunner of today's

Object ID	Title	Author	Summary
			NATOPS manuals, in this case for the SB2U-3 Vindicator. Covers ground only for the concern of the pilot flying the SB2U-3 for the first time. Contains no emergency procedures or in-depth technical data.
2010.302.045	Jet Fighters of the U. S. Navy, Part 2 : Going Supersonic	Kinzey, Bert	Part 2 of two-part series dealing with jet fighters of the U.S. Navy. This book covers the period 1953 to 2002 when the book was published. Includes color photos and descriptions of the aircraft discussed.
2010.302.046	U.S. Aircraft & Weapons of Operation Iraqi Freedom	Kinzey, Bert	Intended to be a concise guide to the aircraft and weapons used in the air campaign of Operation Iraqi Freedom. Navy, Marine and Air force aircraft are covered. Army helicopters are not covered. A brief look at British, Australian and Kuwaiti aircraft is provided in the final three pages.
2010.302.047	VF-11/111 'Sundowners' 1942-95	Tillman, Barrett	Fighting Squadron 11 was established at San Diego in August 1942, beginning a half-century record that spanned aerial combat in three wars from the piston to the jet age. Earning its battle spurs at Guadalcanal in Wildcats, the 'Sundowners' transitioned to Hellcats in 1944 and saw further action from USS Hornet (CV-12). Redesignated VF-111 in 1948, the unit converted to F9F Panthers and scored history's first jet-versus-jet victory over Korea in 1950. FJ-3 Furies and F11F Tigers followed, before VF-111 received the world-class F8U Crusader in 1961. During the Vietnam War, the "Sundowners" logged six deployments, scoring MiG kills in F-8s and F-4 Phantom IIs. From 1978 to disestablishment in 1995, VF-111 flew F-14 Tomcats from USS Kitty Hawk (CV-63) and Carl Vinson (CVN-70), completing 37 deployments from 17 'flattops' in its 52-year career. VF-111 had one deployment on the Midway in 1965 described on pages 80-83.
2010.302.048	Such Men As These : The Story of the Navy Pilots Who Flew	Sears, David	In 1951 James Michener went to Korea to report on a little-

Object ID	Title	Author	Summary
	the Deadly Skies Over Korea		known aspect of America's stalemated war: Navy aviators. His research-inspired novel about these pilots became a best seller. Using Michener's notes, David Sears tracked down the actual pilots to tell their true-life stories. Included among these pilots are Jesse LeRoy Brown, the first African-American naval pilot, and Neil Armstrong, the first astronaut on the moon.
2010.302.049	Grumman F11F Tiger Pilot's Flight Operating Instructions	Chief of the Bureau of Naval Weapons	As the Blue Angels' aircraft in the late 1950s, Grumman's F11F -1 Tiger came to symbolize the speed and might of Navy airpower. The Tiger's design incorporated the area rule to enable cruising speeds up to 1.1 Mach. The prototype flew in 1954, and carrier trials commenced in 1956. Eventually seven squadrons flew F11Fs. Hampered by maintenance issues, and the fact that the Vought Crusader proved superior, the Tiger had a short service life, withdrawn from carrier duty after four years, in 1961. Only 199 were built. The remaining Tigers flew in a training capacity, and the Blue Angels continued to fly them for over a decade, 1957-1969. Originally printed by the U.S. Navy, this handbook provides a fascinating glimpse inside the cockpit of the Tiger. Originally classified "restricted", the manual was declassified and is here reprinted in book form. 210 pages, 8.5x11, b&w with color covers. (Source: periscopefilm.com)
2010.302.050	Douglas F4D Skyray Pilot's Flight Operating Instructions	Chief of the Bureau of Naval Weapons	The Douglas F4D Skyray was a single-engine, delta-wing fighter aircraft. Equipped with the J40 after-burning turbojet, it was at one time the world's hottest plane. On October 15, 1953, pilot Bob Rahn flew at 728 mph on a 100 km course -- a mark that would not be eclipsed for five years.

Object ID	Title	Author	Summary
			Troubles with powerplants resulted in delays with the F4D entering service. When it finally came on line in 1956, it was generally met with enthusiasm. Yet the plane's short range, awkward handling characteristics, and inherent instability made it somewhat ill-suited for carrier use. Although 420 "Fords" were built by 1958, they were withdrawn in 1964. Originally printed by Douglas and the U.S. Navy, this handbook provides a fascinating glimpse inside the cockpit of this plane. The manual was recently declassified and is here reprinted in book form. 175 pages, 8.5x11, softbound, b&w, color covers. (Source: periscopefilm.com)

2010.302.051	F3H Demon Pilot's Flight Operating Manual	Chief of the Bureau of Naval Weapons	Designed as a replacement for the U.S. Navy's F2H Banshee, the McDonnell F3H Demon fighter served with the fleet for nearly a decade, including during the Cuban Missile Crisis. Although it could not fly at supersonic speeds, the Demon served admirably as an all-weather interceptor and flew alongside the F8U Crusader and F11F Tiger. Armed with up to four 20mm cannons, the aircraft could also fire Sidewinder and Sparrow missiles. Over 500 Demons were built. The planes were dubbed "The Chair" by pilots due to its high-visibility cockpit, but it was also called the "lead sled" due to its poor power to weight ratio. The Demon was replaced by the F-4 Phantom in 1964. Originally printed by McDonnell and the U.S. Navy, this F3H Demon Pilot's Flight Operating Instruction manual taught pilots everything they needed to know before entering the cockpit. Originally classified "Restricted", the manual was declassified long ago and is here reprinted in

Object ID	Title	Author	Summary
2010.302.052	Douglas F3D Skyknight Pilot's Flight Operating Instructions	Chief of the Bureau of Aeronautics	book form.
			8x10", softbound, full color covers and black and white interior. 155 pages.
			(Source: periscopefilm.com)
			Designed by famed Douglas engineer Ed Heinemann, the F3D Skyknight was a twin-engine night fighter. A product of the early jet era, the F3D was equipped with the J34 turbojet, and boasted a powerful radar system to locate targets in the shadow of midnight.
			The XF3D-1 test bed first flew in 1948. In total, 265 Skyknights would be in service before production ceased in 1952. The Skyknight had an illustrious combat career for both the Navy and Marine Corps.
2010.302.053	USS Ticonderoga CV/CVA/CVS Wiper, Steve -14		During the Korean War F3Ds flew as escorts during nighttime raids, and as interdiction aircraft. They downed more enemy planes than any other aircraft in that conflict. Some Skynights continued to fly as test aircraft into the 80s.
			Originally printed by Douglas and the U.S. Navy, this handbook provides a fascinating glimpse inside the cockpit. The manual was recently declassified.
			79 pages, 8.5x11, softbound, b&w interior, color covers.
			(Source: periscopefilm.com)
			The book cover [sic] the long career of USS Ticonderoga which entered service in 1944 and was decommissioned in 1973. Steve Wiper have [sic] worked closely together with the USS Ticonderoga Crew Association in the production of the book.
			(Source: bismarck-class.dk)
			The book is 72 pages + cover.
			There are 106 black & white

			photos, and 16 color photos which is a great help to ship modelers. The quality of the photos are excellent, as usual for books from Classic Warships. Many of them has not been published before. This book is great and a must for anybody interested in the Essex Class and Ticonderoga Class aircraft carriers.
2010.302.054	Wrong Stuff, The : Flying on the Edge of Disaster	Moore, John	Author's experience as test pilot for U.S. Navy, North American Aviation and NASA from Korea to 1970. Includes personal history and discussion of Apollo One disaster.
2010.302.055	Pictorial History of War Films, A	Jeavons, Clyde	War has been a favourite theme of film makers from the earliest days of commercial cinema, and in this splendidly illustrated history Clyde Jeavons provides a masterly guide to seventy-five years of war film production. Avoiding the pitfalls of political moralizing and jingoism, he writes simply and concisely about hundreds of war movies made by the film industries of many nations, including the USA, Britain, France, Italy, Germany and Japan. He is concerned in the main with commercial films about twentieth-century war - a large enough source of material, for war has been a constant and violent part of our century's history - but he also looks at films inspired by the Russian Revolutions, at important documentaries and television series, and at such historical films as The Red Badge of Courage and Henry V, which have important comments to make about war. Most of these films have distinct themes: patriotic, morale-boosting, heroic, or - for the majority of the really great war films -anti-war. Together, they sum up the cinema's image of war: the heroism of individual men and women contrasted with the futile waste of war, the glory of battles won set against grim battlefields

Object ID	Title	Author	Summary
			of mud, dirt, barbed wire and death. Clyde Jeavons is the first writer to undertake a really comprehensive history of the war film. His book is a vivid summary of the important milestones in the development of a genre as exciting and popular with film-goers as the Western or crime movie. It will find a place on the bookshelves of the serious film buff and of the average cinema-goer. Over 350 illustrations. (from dust jacket flap)
2010.302.056	Blue Angels : The U.S. Navy's Ambassadors in Blue	Kinzey, Bert	Contents: Introduction: F6F Hellcats, F8F Bearcats, SNJs; The Transition to Jets: F9F Panthers, TO-2 &TV-2 Seastars, F9F Cougars, F7U Cutlasses; Going Supersonic: F11F (F-11A) Tigers, F-4J Phantoms; Economic Considerations: A-4 Skyhawk IIs; Back to the Mainstream: F/A-18 Hornets; Fat Albert.
2010.302.057	Fighting 17 : The Jolly Rogers	Jenz, Tom	This is the story of Navy squadron VF-17, the Jolly Rogers. flying their beloved "Hogs," the F4U-1 Corsair, they cleared the skies of 154 Japanese planes in 76 days of combat over the Solomon Islands. While never losing a bomber to enemy attack, Fighting-17 destroyed the heart of Japanese fighter command over Bougainville and Rabaul paving the way for the Allied Advance. As related by the squadron's skipper, Tom "Tommy" Blackburn, and four of his men, the events of 1943-44 are enhanced by splendid film footage, personal photographs, and the memories of those who were there.
2010.302.058	This film is restricted : World War II "secrets" revealed, Disc 1	Timeless Media Group	The United States government produced thousands of films during World War II, many of which were considered "classified." 2010.302.059	Confidential Films of World War II : More "Secrets" Revealed, Disc 1	Timeless Media Group	During World War II, the United States government produced literally thousands of films. Though many were intended for the average GI, others were considered too sensitive for general viewing. Classified or confidential films covered an enormous range of subjects, and while most concerned the prosecution of the war, other matters, by today's standards trivial and by no means a threat to national security, were also regarded as "confidential." It wasn't until years after the war concluded that many of these films were declassified. "This Film Is Confidential" features many such films. Disc 1 • Germans Raid Bari - One of the most disastrous bombing attacks against allied ships during the entire war took place at Bari, Italy, on December 2, 1943. • Bombing Of Burma - Though considered a backwater, Burma, and the supply line that ran through it, was the key to keeping China in the war against Japan. • Supplies For China By Air - Beginning in April 1942, pilots started flying the "Hump," a dangerous 530-mile long passage over the Himalayan Mountains. • Bombing If New Britain - Rabaul, situated on New Britain Island in the Bismarck Archipelago, was the major Japanese naval and air base in the Southwest Pacific. • Bombing Of Berlin - Berlin was the chief urban center of Nazi Germany during the Second World War, and by late 1943, the target of countless bombing raids.

Object ID	Title	Author	Summary
			• Double-Header Marauder Operations - The Martin B-26 Marauder, a medium bomber, is sent against industrial targets in Germany.
			And Many More...
			Disc 2
			• Bombing Of Cassino - Cassino, Italy was the scene of the bloodiest of the Western Allies' struggles with the German Wehrmacht during the Second World War. • South Pacific Action - Air superiority was crucial to the war in the Pacific, and the establishment of airfields for land based aircraft played a central role in strategic planning. • Invasion - With Allied forces ashore after the D-Day invasion, the establishment of airfields on the continent was vital in sustaining the campaign. • Attacks Against Italy - During the advance on Rome from southern Italy, enemy installations were continually harassed by Allied aircraft. • Fighter Kills On D-Day - Gun sight aiming point cameras record fighter activity over occupied France on June 6, 1944. • Attacks Against Europe - From their bases in England, B-17 formations strike deep into the heart of the German homeland.
			And Many More...

2010.302.065	Japan's War in Colour	Batty, David	It was assumed no color films existed in Japan until the victorious U.S. forces arrived in 1945. This DVD is remarkable proof that those assumptions were verifiably false. Now you can discover the story of a nation at war from its rare color films, plus letters and diaries from those who lived through it. Almost all the material in this color documentary has been recently discovered and allows the viewer to experience Japanese culture and events from an entirely new perspective. Subject matter includes Imperial Japanese troops in 1931 Manchuria, remarkable domestic scenes of 1930s Japan, preparation for war in 1939, and images of occupation in 1940s Shanghai. Additional features are: 1) The last bomb, a 35-minute U.S. government film, which includes reconstruction and original colour footage 2) Exclusive colour footage showing the Battle for Iwo Jima, the devastation caused to Hiroshima and Nagasaki by the dropping of atomic bombs, and scenes from post-war Japan 3) Restoring film, a segment illustrating the complex process to restore film to its original quality 4) The power of sound, a piece on composer Chris Elliott with extracts revealing the importance of sound and a sample of five original Chris Elliott tracks 5) Interactive maps 6) The diary of a Japanese soldier 7) A photo gallery.

			Fighting Lady (1944) - Fighting Lady (1944) - We have two other DVD copies: 2007.302.088 and 2010.302.073 and one VHS copy. The credits lists CMDR Edward J. Steichen as the supervisor. Narrated by Lieut. Robert Taylor, USNR, and photographed in zones of combat by the U. S. Navy. The film follows one of the many new aircraft carriers built since pearl harbor, known as The Fighting Lady in honor of all American carriers, as it goes into action against the Japanese in the Pacific Ocean in 1942. (The ship used was the USS Yorktown CV-10). See the ship and its pilots undergo their baptism of fire, attacking the Japanese base on Marcus Island, and gain in experience and confidence with each new battle-Kwajalein, Truk, and The Marianas Turkey Shoot. Won an Academy Awards, 1945: Best documentary feature. United News (1945) - Newsreel footage shot aboard USS Missouri, depicting the official signing ceremony denoting the unconditional surrender of Japan.

2010.302.074	WW II, War in the Pacific, Volume II	Waffen, Les (ed.)	Contains two of the 63 films in the National Archives series covering World War II, one of six volumes in the War in the Pacific sub-series. Runtime approx 120 minutes. Films: Solomon Islands (1945) - The United States Marine Corps ends the Japanese occupation of the Solomon Islands. Footage includes Admiral Bull Halsey conferring with his aides, and the arrival of Admiral Chester Nimitz at a new airfield. Produced by the Marine Corps Photographic Section. Runtime 37 min. This is the Philippines (1945) - A motion picture designed to prepare U.S. soldiers for active duty in the Philippines, including an overview of

			government training films, dramatizations, and appearances by numerous Hollywood stars. Volume VI War comes to America - Varied footage spotlighting world events that prompted the United States to abandon its isolationist views in preparation for entry into WW II. Filmed events include Edward R. Murrow reporting during a London air raid, President Roosevelt urging Congress to amend U.S neutrality laws, and the Japanese attack on Pearl Harbor.

2010.302.091	Hell to Pay : Operation Downfall and the Invasion of Japan, 1945-47	Giangreco, D. M.	Giangreco, a longtime former editor for Military Review, synthesizes years of research in a definitive analysis of America's motives for using atomic bombs against Japan in 1945. The nuclear bombing of Japan, he concludes, was undertaken in the context of Operation Downfall: a series of invasions of the Japanese islands American planners estimated would initially cause anywhere from a quarter-million to a million U.S. casualties, plus millions of Japanese. Giangreco presents the contexts of America's growing war weariness and declining manpower resources. Above all, he demonstrates the Japanese militarists' continuing belief that they could defeat the U.S. Japan had almost 13,000 planes available for suicide attacks, and plans for the defense of Kyushu, the U.S.'s initial invasion site, were elaborate and sophisticated, deploying over 900,000 men. Japanese and American documents presented here offer a chillingly clear-eyed picture of a battle of attrition so daunting that Army Chief of Staff George C. Marshall considered using atomic and chemical weapons to support the operation. Faced with this conundrum, in Giangreco's excellent examination,

			President Truman took what seemed the least worst option. 44 b&w photos, 12 maps. (Oct. 15) - Publishers Weekly Copyright © Reed Business Information, a division of Reed Elsevier Inc. All rights reserved. Review A former editor at Military Review provides us with one of the first books to detail the planned U.S. invasion of the Japanese home islands in October 1945 and the Japanese preparations for that invasion. Drawing on solid research in both countries, Giangreco lays out the U.S. planning and the whole scenario of what would have happened: millions of casualties, prolongation of the Pacific war, possibly past 1947, and manpower shortages and war weariness in the United States, with Japanese militarists and their no-surrender policy in control in Japan. The two-pronged invasion would have begun on the island of Kyushu, preceded by no fewer than nine atom-bomb drops behind the landing beaches. Illustrative of just how much the war with Japan was a close-run thing, this is essential reading. --Library Journal A former editor at Military Review provides us with one of the first books to detail the planned U.S. invasion of the Japanese home islands in October 1945 and the Japanese preparations for that invasion. 2010.302.122	Payoff in the Pacific	United States. Army Pictorial Center	A chronicle of World War II in the Pacific from Pearl Harbor to the dropping of the atomic bomb on Hiroshima, and includes actual combat footage.
2010.302.123	Downfall : The End of the Imperial Japanese Empire	Frank, Richard B.	Downfall: The End of the Imperial Japanese Empire is an impeccably written analysis of the last months of the Pacific War and the unfolding of the American air campaign over Japan. The story opens with a searing description of the fire-bombing of Tokyo in March 1945, which caused more deaths than the atom bomb in Hiroshima. Within five months, Japan's economy was collapsing and the country faced catastrophic starvation. Richard B. Frank coolly analyzes different scenarios for ending the war (Russia waited in the wings). Frank concludes that the emperor and the Japanese military were far from ready to surrender, and that the decision to use the atom bomb probably saved millions of lives, not only Allied but Japanese and other Asian lives, also--perhaps a hundred thousand Chinese were dying each month under Japanese occupation. The effects of the bomb worked on many levels, even lending faces to the Japanese militarists, who could convince themselves that they were defeated not by a

Object ID	Title	Author	Summary
			lack of spiritual power but by superior science. Densely documented, intelligently argued, Downfall recreates the end of the war from the viewpoints of the principals, giving the book an unusual immediacy. A highly valuable insight into the disintegration of the Japanese Empire, one of the most dramatic episodes of World War II. --John Stevenson --This text refers to an out of print or unavailable edition of this title. From Publishers Weekly The premise behind this excellent history of the concluding stages of WWII in the Pacific is that the dropping of the atomic bomb on Hiroshima and Nagasaki has cast a light so bright that it has blinded historians to many of the political, diplomatic and military realities that existed before August 6, 1945. In his comprehensive study of the last months of WWII, Frank (Guadalcanal) aims to present events "as they were perceived and recorded by American and Japanese participants in 1945. A not years or decades thereafter." In 1945, American strategists developed their plan, "Operation Downfall," for forcing the unconditional surrender of Japan. Japanese leaders, meanwhile, mobilized all available military and civilian resources for a final defense of the homeland. Though they knew the war was lost, Japanese military strategists believed their preparations were sufficient to compel the Allies to offer more generous terms on which the war might end. Frank immerses his readers in the flow of intelligence estimates, battle experience and shifting strategy on both sides. The centerpiece of the book is an exacting and dispassionate examination both of the American decision to use the atomic bomb and of whether Japan would have surrendered absent the bomb. Frank marshals an impressive and complex array of

Object ID	Title	Author	Summary
			evidence to support his contention that surrender by Japan was by no means imminent in August 1945, and that alternatives to the bomb, such as incendiary bombing, carried no certainty of causing less suffering and fewer deaths than the atomic bomb. In his balanced use of sources and in his tough-minded sensitivity to moral issues, Frank has enriched the debate about the war's conclusion. Agent, Robert Gottlieb of William Morris. Copyright 1999 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title.
2010.302.124	Steady Nerves and Stout Hearts : The Enterprise (CV6) Air Group and Pearl Harbor, 7 December 1941	Cressman, Robert J.	In the 48 years since Japanese planes attacked the U.S. Pacific Fleet at Pearl Harbor, many accounts of that event, written from varying viewpoints, have been published. It is not our intention to present yet another overview of what occurred on that day, as the 50th anniversary draws near, nor to debate at whose feet blame rests, but rather examine, in the form of a "small unit history," how that attack affected a certain group of men who suddenly found themselves thrust into a war. This book began as an article recounting the trials and tribulations of the 36 men (Enterprise's air group commander, his passenger, 13 crews from Scouting Squadron SIX and four from Bombing SIX) who were Pearl-bound on the morning of 7 December 1941. As work progressed, however, we became convinced that, almost without exception, not even the accounts of Pearl Harbor which have emerged in recent years have described accurately the experiences of these men nor have detailed what other operations the carrier Enterprise (CV-6) and her air group conducted on that day. We believe that the narrative which follows is the first to

Object ID	Title	Author	Summary
			identify the men from Enterprise who were in the air that morning in the skies near or over Oahu, and to detail what happened to them. While this story centers on the 36 aforementioned men assigned the a.m. search on 7 December, the Wake Island ferry mission that preceded it and the other operations that occurred on the 7th— the abortive searches for the Japanese fleet and the tragic loss of planes from Fighting Squadron SIX that night—have been included to provide a context for what went on before, and after, that momentous morning. (from back cover)
2010.302.125	Koga's Zero : The Fighter That Changed World War II	Rearden, Jim	Found upside down in an Alaskan bog in the eighth month of our war with Japan, a Japanese Zero fighter plane was retrieved and soon test flown by U.S. pilots. Knowledge gained from those flights ended the dominance of the Zero in the Pacific. Contents: An aerodynamic impossibility -- Designing the Zero -- The long-lived Zero -- The Zero at Pearl Harbor -- The first raid on Dutch Harbor -- The Zero at Midway -- Heroic comedy of errors -- Loss of Koga's Zero -- Discovery and retrieval of Koga's Zero -- Koga's Zero flies again -- The significance of Koga's Zero - - Appendix : Koga's Zero vs. U.S. fighter planes. 2010.302.134	Marine Wings : Stories of War and Peace as Written by the Pilots	Minnesota Marine Air Reserve, LLC	"Buckle yourself in..." Marine Wings: Stories of War and Peace as Written by the Pilots includes first-hand accounts of marine aviators and ground personnel who had front row seats in the action. Twenty-three pilots ranking from captain to colonel recount their most memorable flying experiences between the years of 1938 to 1998 involving intercepts of enemy aircraft, close air support of ground troops, bombing, transportation, ordnance, communication, engineering, testing and air/sea rescue. It also shares some of the lighter moments, and mistakes, made during war and between the wars, as well as aviation experiences from civilian occupations. From fabric-covered biplanes to jets that break the sound barrier, these are the guys who set the standards for marine aerial warfare. Marine Wings will help you: * Relive, from the cockpit, the harrowing, and sometimes humorous, flight experiences of marine aviators. * Discover the joys and quirks of flying aircraft from biplanes to amphibians to troop transports to helicopters to prop-driven fighter planes to jets. * Gain appreciation for the Marine Air Reserves and their vital role during war and peace. What The Critics Are Saying: "World War II was the 'big one'—all out war. And nowhere was there tougher combat than with the Marines in the Pacific. The Minnesota Marine Air Reserve was there, as well as

Object ID	Title	Author	Summary
			in later combat in Korea and Vietnam. These are a few of their stories - 'what it was really like' - from 1938 to 1998." John Glenn, astronaut, U.S. Senator, Colonel USMC (Ret.) "Marine Wings is an entertaining and riveting account of Marine flyers from Minnesota in World War II. I loved the stories of courage, daring and good time." Tom Brokaw, former anchor of "NBC Nightly News", and author of The Greatest Generation "These are tales written by Marine air reservists. Reservists made up over 90% of the total combat pilots who flew in Marine combat aircraft wings in World War II and Korea... We who flew the F4U Corsairs are eternally grateful to the unsung heroes who built those rugged aircraft with their dependable engines. The deep growl of that engine was mighty comforting - especially over enemy territory hundreds of miles from home base. We all know that the true Marine aviator heroes were those who did not return from their battles in the sky." Brigadier General Bruce J. Matheson, USMC (Ret.) Original member of Greg Boyington's VMF-214, "The Black Sheep" About The Author The Minnesota Marine Air Reserve, formed in 1931, served with distinction throughout World War II, Korea, and beyond. They were one of the first fighter squadrons in the country called for active duty in Korea. With members located throughout the United States, the group includes a recipient of the Navy Cross as well as four members in the Minnesota Aviation Hall of Fame. Object ID	Title	Author	Summary
2010.302.135	Supersonic Cowboys	Knott, Ron	This appears to be an earlier edition of Supersonic Fighter Pilots. INTRODUCTION Supersonic Cowboys is a book of heroes; in fact more than forty heroes are listed herein. And there are many, many, many, more. The heroes in Supersonic Cowboys were not just a hero for a day, or a one time event hero, but they were heroes almost every day, day-in and day-out, for months at a time for our country. I was honored to serve with the likes of these heroes. We were all one bullet - or one crash away from eternity. After flying for the Navy for only seven years more than 200 of my pilot friends had lost their lives flying Navy aircraft. Needless to say, this is a dangerous profession. In fact I am the only living pilot left that was in my flight school graduating class. James Michener was quick to recognize and report the heroic actions of Navy and Marine Aviators when he wrote the following statement in The Bridges at Toko-Ri, Where do we get such men? Supersonic Cowboys is not a Hollywood story made up to appease the masses, but it is full of true life courageous stories, conveyed by the heroic pilot about his life and near-death daring experiences. His script was literally written in his own blood, sweat, and tears, no matter if he was on active duty or in one of the Reserve Squadrons. Injury and death made no distinction between the two groups. Many of the stories in this book have been asleep for more than 30 years. And all too often many like stories are laid to rest each year; forever. My motivation for writing these stories is because my kids, grandkids, and associates continue to ask me what it was like flying Navy Jets from the decks of aircraft carriers.

Object ID	Title	Author	Summary
			That is the reason I have included so much detail about some of the normal procedures, abnormal procedures, and emergency procedures. For example, I go to great detail in explaining how the ejection seat works, how it feels to be catapulted off the aircraft carrier, the excitement of flying supersonic speeds and many more like adventures that the earth-bound people will never experience except through these stories. All the chronicles conveyed herein are by pilots who are still living at the time of this publication. For each story in Supersonic Cowboys there are at least ten other stories where the pilot did not survive. The sad part of this report is the fact that the others may have performed flawlessly, yet they did not survive. They too were courageous heroes and did their best, but a posthumous recognition is all we can give them now. Yet, we will meet them again in the great "Eternity Fraternity." You will read in Supersonic Cowboys reports of pilots ejecting from their crippled aircraft, crashing on land, boat, and sea, being shot down by the enemy, taken captive as POWs, saving airplanes that have experienced many major malfunctions, and yet they were usually flying again within a few hours if they have not sustained long term injuries. That takes real guts as the old saying goes. Herein are true tales of real people who overcame fear with courage and valor. These are a very special group of Fighter Pilots. Ed (Mofak) Cathcart says, "The name Fighter Pilot can be attached to any of the following pilots if he flies a Skyraider, a Skyhawk, a Crusader, a Warthog, a Super Saber, a Tomcat, an Intruder, an Eagle, a Super Hornet, a Cobra Gunship helicopter, and many other fighting military aircraft." He continues to say, "Fighter

Object ID	Title	Author	Summary
			Pilots are a breed of warriors with a special attitude, aptitude and spirit. They are fearless, arrogant, and demonstrated a flamboyant personality that exudes confidence and bravado in every minute of flight and every second, at Happy Hour, or post flight activity. The Fighter Pilot was his own biggest fan, conceited, overconfident, big-headed and egotistical." I can't argue with that because for the most part it's true. I was a Crusader Fighter Pilot as well. They've earned their right to swagger by enduring the most intense, rigorous, competitive and concentrated flight training program their country has ever developed. In Supersonic Cowboys you will read of real life stories, written in first person, about Crusader Fighter Pilots, flying this fantastic machine in peace and war. You will read in this book that the Crusader was one of the most, if not the most, dangerous Navy fighter aircraft to land on an aircraft carrier. In other words the airplane was a joy to fly, but it would kill you in a second if you did not fly the machine properly. Herein are accounts of flying thrills and adventures reported by a great group of Navy and Marine pilots. Like Dizzy Dean said, If you can do it, it ain't bragging. The below outline is a list of the real life stories that are recorded in Supersonic Cowboys. These events were sent to me by the pilots involved. Contents PART I DEDICATION MY CRUSADER ACKNOWLEDGMENT INTRODUCTON CHAPTER 1 - TRAINING FLIGHT CHAPTER 2 - RECRUITMENT CHAPTER 3 - FLYING THE

2010.302.137	West of the Rock	Marchione, Mark	Fictional account of Navy jet fighter pilots and their interactions with each other and the civilian world.
2010.302.138	British Aircraft Carriers, 1939-45	Konstam, Angus	The story of the small British aircraft carriers from the purpose built HMS Ark Royal of 1938, to the Illustrious and Implacable class carriers and the light fleet carriers. Includes history of WW I British carriers and the first flight deck landing on August 2, 1917. (from ospreypublishing.com:) With war against Germany looming, Britain pushed forward its carrier program in the late 1930s. In 1938, the Royal Navy launched the HMS Ark Royal, its first-ever purpose-built aircraft carrier. This was quickly followed by others, including the highly-successful Illustrious class. Smaller and tougher than their American cousins, the British carriers were designed to fight in the tight confines of the North Sea and the Mediterranean. Over the next six years, these carriers battled the Axis powers in every theatre, attacking Italian naval bases, hunting the Bismark, and even joining the fight in the Pacific. This book tells the story of the small, but resilient, carriers and the crucial role they played in the British war effort.
2010.302.139	USS Coral Sea (CV-43) : The Ageless Warrior	Askew, Donald C.	Historical record of the USS Cora Sea including rosters, list of cruises and personal experiences of the crew. ----- Named for our decisive WWII victory, the Battle of the

Object ID	Title	Author	Summary
			Coral Sea, this ship has been a source of great pride for the U.S. Navy. Sail with The Ageless Warrior: Older and bolder in 43 years of traversing the world's oceans to defend the cause of freedom. Details of deployments with the US 6th and 7th Fleets, air strikes against Vietnam and a collection of magnificent photos. A full length photo of the Ageless Warrior is featured on the endsheets.
2010.302.140	USS Ticonderoga CV-CVA- CVS-14	Parrent, Erik (ed)	History of the USS Ticonderoga including personal experiences and bios of some of the crew members. (from turnarounds.com:) The Big T Herself! From her commissioning in 1944, fighting in World War II (including an attack by 2 kamikazes), being refitted for jet aircraft and serving in peacetime and Vietnam, the whole story is here! Contains official ship's history, stories, biographies and photos of the sailors who served her!

Articles: Editorial; Midway Atoll's Undaunted Defenders; A Large Part in a Great Victory: B-17's at Midway; The Master Weaver; If There Is Only One PLane Left; Timeline and Map; Midway's Final Casualties; Yorktown's Final Fight; I Sank the Yorktown; A Fateful Six Minutes; Silent Sentinels.
2010.302.143	Marines at Midway	Heinl, Robert Debs	An account of the role played by U.S. Marines in the base-development and defense of Midway Atol leading up to and including the Battle of Midway.
2010.302.144	Source Book of Aircraft Carriers and Their Aircraft, A	Watts, Anthony John	Describes the development of naval aviation and aircraft

Object ID	Title	Author	Summary
			carriers from the earliest attempts to fly aircraft from a ship, to future possibilities of operating vertical, short take-off and landing aircraft from mini-carriers. Over 100 photos.
2010.302.145	Hero of the Air : Glenn Curtiss and the Birth of Naval Aviation	Trimble, William F.	Examines the pioneering work of Glenn Curtiss and his role in the origins of aviation in the U.S. Navy. Addresses the broader implication of the Curtiss-Navy collaboration in the context of the longstanding trend of government-private cooperation in the introduction and development of new technologies.
2010.302.146	Open the Hangar Doors and the Stories Fly Out	Leute, George M., Jr	Real life incidents in naval aviation that involve pilots and their aircraft and the judgements, decisions and actions they take under difficult and sometimes life-threatening conditions. Like War Stories, but real.
2010.302.147	Killer Rays : The Story of the Douglas F4D Skyray and F5D Skylancer	Frankel, Mark	Provides an explanation of how and why the Skyraider came to be, examines the technological problems it overcame, analyzes its service history, recreates how it was flown, studies its stillborn successor, the Skylancer, and explores the place of the Skyraider in Naval Aviation history with the advantage of 50 years of hindsight.
2010.302.148	Midway 1942 : Turning Point in the Pacific	Stille, Mark	Stille examines the Battle of Midway from a fresh perspective. Although it was the second battle where the US and IJN carriers met up (after the Battle of the Coral Sea in May 1942), both Japan and the United States had differing reasons for the engagement. For Japan, it was "to advance into the Central Pacific with the ultimate goal of seizing Hawaii". The added benefit was "forcing the remaining units of the U.S. Pacific Fleet to give battle." For the United States, particularly Fleet Admiral Chester Nimitz, who was determined to "engage the Japanese aggressively as soon as favorable conditions existed. To Nimitz, favorable conditions included committing his

			1945-1962.
2010.302.161	One Hundred Years of U.S. Navy Air Power	Smith, Douglas V.	Published to coincide with the centennial celebration of U.S. naval aviation, this book details the history of U.S. aviation from its earliest days, before the Navy's first aircraft carrier joined the fleet, through the modern jet era marked by the introduction of the F-18 Hornet. It tells how naval aviation got its start, profiles its pioneers, and explains the early bureaucracy that fostered and sometimes inhibited its growth. The book then turns to the refinement of carrier aviation doctrine and tactics and the rapid development of aircraft and carriers, highlighting the transition from propeller-driven aircraft to swept-wing jets in the period after World War II. Land-based Navy aircraft, and balloons are also considered in this sweeping tribute.
2010.302.162	U.S. Aerial Armament in World War II : The Ultimate Look, Volume 1: Guns, Ammunition , and Turrets	Wolf, William	Following his previous "Ultimate Look" volumes on the B-29, B-32, B-18, and B-25, Wolf has written the definitive book on U.S. aerial armament in World War II. Drawing from his extensive library, microfilm archives, and technological manuals Wolf covers aerial machine guns and cannon; a discussion of the machine gun vs. cannon controversy, ammunition; gunsights; gun cameras; search radar and radar gunsights; Central Fire Control systems and remote sighting; an extensive section on the development, installation, and description of the numerous bomber turret and non-turret gun positions; fighter aircraft armament; gunnery training; bomber and fighter air to air and strafing gunnery tactics; fighter and bomber gunnery "aces;" and a survey of the armament installations on all World War II U.S. fighters and bombers. Each topic is introduced by a history of its development and manufacture, followed by a detailed description and pictorial of the weapon, its installation, and use.

Object ID	Title	Author	Summary
2010.302.163	U.S. Aerial Armament in World War II : The Ultimate Look, Volume 2: Bombs, Bombsights, and Bombing	Wolf, William	Following his previous "Ultimate Look" volumes on the B-29,B-32, B-18, and B-25, and volume one in the series on guns, ammunition, and turrets, Wolf continues his definitive history of U.S. aerial armament in World War II. Drawing from his extensive library, microfilm archives, and technical manuals Wolf covers the development of Bombs and Bombing Theory and Strategy; an extensive chapter on Conventional Bombs and Fuses; Bomb Handlign and Release and Control Mechanisims; an extensive chapter on Conventional and Radar Bombsights; The Bombardier; Bombing Missions Described; Bombing Tactics; Effects of Bombs; Miscellaneous Ordnance. Volume 3, available later in 2010, will cover Air-Dropped, Air-Launched, and Sercret Aerial Weapons.
2010.302.164	USS Randolph CV/CVA/CVS-15	Turner Publishing Company	Special Edition Volume about the U.S.S. Randolph. "It is with great pleasure that we introduce this volume on the USS Randolph (CV/CVA/CVS-15)". Dave Turner, President of Turner Publishing Company
2010.302.165	This film is restricted : World War II "secrets" revealed, Disc 2	Timeless Media Group	The United States government produced thousands of films during World War II, many of which were considered "classified." These film reports covered all theaters of operation and ran the gamut, from important news of battles and invasions, to the introductions of new equipment and supply methods. Originally produced for commanding Generals and their immediate staff, we are able to bring you these inside"secret" stories of World War II through the Freedom of Information Act. Disc 1 Invasion of Southern France - Over 800 U.S. Navy vessels and thousands of airborne troops attack the Germans in Southern France. Progress in Southern France -

Object ID	Title	Author	Summary
			See the aftermath first hand as the Nazi's flee from Southern France.
			5th Army Pierces Gothic Line - General Mark Clark leads his troops into battle against the German built fortifications woven into the rough mountainous terrain.
			Channel Coast Activities - Get a first hand view as the R.A.F. coastal command sweeps across the channel to bomb Nazi merchant convoys.
			Operations in France - Brest, one of the most important harbors in France, is targeted by the Allies.
			And Many More...
			Disc 2
			R.A.F. Sinks Tirpitz - Watch the R.A.F. battle the last of German's big battleships in Norway.
			School for Jungle Life - Get a first hand look as the art of jungle living is demonstrated for U.S. troops.
			Japs Raid Saipan B-29 Base - See the aftermath of a deadly Japanese air attack on Isley Island.
			Ormoc Landings - Witness the 77th Division take the Eastern shore of Ormoc Bay on the third anniversary of Pearl Harbor.
			And Many More...

2010.302.166	Confidential Films of World War II : More "Secrets" Revealed, Disc 2	Timeless Media Group	During World War II, the United States government produced literally thousands of films. Though many were intended for the average GI, others were considered too sensitive for general viewing. Classified or confidential films covered an enormous range of subjects, and while most concerned the prosecution of the war, other matters, by today's standards

Object ID	Title	Author	Summary
			trivial and by no means a threat to national security, were also regarded as "confidential." It wasn't until years after the war concluded that many of these films were declassified. "This Film Is Confidential" features many such films. Disc 1 • Germans Raid Bari - One of the most disastrous bombing attacks against allied ships during the entire war took place at Bari, Italy, on December 2, 1943. • Bombing Of Burma - Though considered a backwater, Burma, and the supply line that ran through it, was the key to keeping China in the war against Japan. • Supplies For China By Air - Beginning in April 1942, pilots started flying the "Hump," a dangerous 530-mile long passage over the Himalayan Mountains. • Bombing If New Britain - Rabaul, situated on New Britain Island in the Bismarck Archipelago, was the major Japanese naval and air base in the Southwest Pacific. • Bombing Of Berlin - Berlin was the chief urban center of Nazi Germany during the Second World War, and by late 1943, the target of countless bombing raids. • Double-Header Marauder Operations - The Martin B-26 Marauder, a medium bomber, is sent against industrial targets in Germany. And Many More... Disc 2 • Bombing Of Cassino - Cassino, Italy was the scene of the bloodiest of the Western Allies' struggles with the German Wehrmacht during the Second World War. • South Pacific Action - Air

Object ID	Title	Author	Summary
			superiority was crucial to the war in the Pacific, and the establishment of airfields for land based aircraft played a central role in strategic planning. • Invasion - With Allied forces ashore after the D-Day invasion, the establishment of airfields on the continent was vital in sustaining the campaign. • Attacks Against Italy - During the advance on Rome from southern Italy, enemy installations were continually harassed by Allied aircraft. • Fighter Kills On D-Day - Gun sight aiming point cameras record fighter activity over occupied France on June 6, 1944. • Attacks Against Europe - From their bases in England, B-17 formations strike deep into the heart of the German homeland. And Many More...
2010.303.001	Surigao, Ostatni Bój Gigantów (Surigao, Last Fight of the Giants)	Ozon, Michal	Battle of Surigao Strait was the [sic] only (one of?) many skirmishes that took place in the great American campaign for the liberation of the Philippines. But this battle was unique in that (this was?) the last time in the history of warfare there has been a direct marine artillery duel between the biggest ships of war, which were battleships ... 2010.303.003	Killer Subs in Pearl Harbor	None Stated	NOVA joins an exclusive dive beneath the waters of Pearl Harbor to trace new clues to the historic sinking of the USS Arizona. 1,177 crew members perished in the dramatic 1941 sinking of the storied battleship-the greatest loss of life in United States naval history. For decades, it has been thought that the Arizona was brought down by fire from Japanese aircraft. But the discovery of a Japanese "midget sub" displaced from the scene of the battle raises new questions about the Arizona's final hours. Severed into three pieces and dropped in 1,200-foot deep water outside of the harbor, the sub matches four other experimental vessels discovered in shallower water closer to the harbor entrance. All were equipped with a pair of torpedoes-but only the torpedoes of the fifth sub are still missing, apparently fired at an unknown target. What was the submarine's mission? Why was it laid to rest so far from the harbor? What was the fate of its two-man crew? With unprecedented access to the Arizona wreckage, NOVA teams up with the Hawaii Undersea Research Lab to use manned deep submersibles in an attempt to resurrect the fifth midget submarine. (Source: KPBS.org) (USS Midway Museum appears briefly as a source for the investigative research.)
2010.303.004	Marines of the Margarita The Story of Camp Pendleton and the Leathernecks who train on a Famous California Rancho	Witty, Robert M.	Marine Corps Base Camp Pendleton is the major West Coast base of the United States Marine Corps and serves as its prime amphibious training base for Assault Craft Unit 5. It is located on the Southern California coast, in San Diego County, and bordered by Oceanside to the south, San Clemente, Cleveland National Forest, Orange and Riverside

Object ID	Title	Author	Summary
			counties to the north, and Fallbrook to the east. The base was established in 1942 to train U.S. Marines for service in World War II. By October 1944, Camp Pendleton was declared a "permanent installation" and by 1946, it became the home of the 1st Marine Division. It was named after Major General Joseph Henry Pendleton (1860–1942), who had long advocated setting up a training base for the Marine Corps on the west coast. Today it is the home to myriad Operating Force units including the I Marine Expeditionary Force and various training commands. In 1769, a Spaniard by the name of Capt. Gaspar de Portolà led an expeditionary force northward from lower California, seeking to establish Franciscan missions throughout California. On July 20 of that same year, the expedition arrived at the location now known as Camp Pendleton, and as it was the holy day St. Margaret, they christened the land in the name of Santa Margarita. During the next 30 years, 21 missions were established, the most productive one being Mission San Luis Rey, just south of the present-day Camp Pendleton. At that time, San Luis Rey Mission had control over the Santa Margarita area. In 1821, following the Mexican War of Independence from Spain, Californios became the new ruling class of California, and many were the first generation descendants of the Portolà expedition. The Mexican governor awarded land grants and ranchos to prominent businessmen, officials and military leaders. In 1841, two brothers, Pio Pico and Andrés Pico, became the first private owners of Rancho Santa Margarita. More land was later added to the grant,

Object ID	Title	Author	Summary
			giving it the name of Rancho Santa Margarita y Las Flores, which stayed with the ranch until the Marine Corps acquired it in 1942. The design of the ranch's cattle brand is seen in the base's logo today. In 1863, an Englishman named John (Don Juan) Forster (Pio Pico's brother-in-law) paid off Pico's gambling debts in return for the deed to the ranch. During his tenure as owner of the ranch, he expanded the ranch house, which was first built in 1827, and developed the rancho into a thriving cattle industry. Forster's heirs, however, were forced to sell the ranch in 1882 because of a string of bad luck, which included a series of droughts and a fence law that forced Forster to construct fencing around the extensive rancho lands. It was purchased by wealthy cattleman James Flood and managed by Irishman Richard O'Neill who was eventually rewarded for his faithful service with half ownership. Under the guidance of O'Neill's son, Jerome, the ranch began to net a profit of nearly half a million dollars annually, and the house was modernized and furnished to its present form. (from Wikipedia)
2010.303.005	American Naval Forces in the Vietnam War	Hemingway, Albert	The U.S. Navy and Marine Corps performed key roles in Vietnam. In addition to traditional roles, these branches had to adapt to fight a different kind of war - a war in which the terrain and waterways were unlike anything they had encountered in previous conflicts. Small boats were built to interrupt enemy supply lines. The Navy also introduced the Seawolves, which were UH-1B Huey gunships that supported the riverboats. The Marines found themselves fighting NVA and communist guerrilla fighters known as the Viet Cong (VC)

Object ID	Title	Author	Summary
2010.303.006	American Air Forces in the Vietnam War	Keeter, Hunter	in the jungles and cities of South Vietnam. Air power was the defining feature of the Vietnam War, with Air Force, Navy, Marine Corps, and Army forces contributing pilots and aircraft. U.S. pilots in Vietnam, whether flying jets, bombers, or helicopters, faced the dangers of being shot down by enemy aircraft, antiaircraft artillery, or surface-to-air missiles. Downed pilots and aircrew had to evade capture in the jungles of Vietnam or face captivity and sometimes torture in feared prisons such as the "Hanoi Hilton." Book jacket. (from books.google.com)
2010.303.007	Salute to Sun City Palm Desert's Resident Veterans	Kay, Terry P.	A collection of short military biographies of veterans past and present, residing in Sun City Palm Desert, California, an active adult community in the Coachella Valley near Palm Springs. (from title page)
2010.303.008	Strike Force : Flight Deck	Madacy Entertainment Group	Same video as vhs 2008.302.078. This is part 1 of a five part series: 1) Flight Deck, 2) SR-71 Blackbird, 3) Air battle, 4) Hot flying, 5) Test pilot. We currently have Flight Deck and Test Pilot. There is no single weapon so flexible, so formidable, so capable of projecting power as an aircraft carrier and its Air Wing. See and feel what life on - and above - the FLIGHT DECK is all about. * The modern-day carrier Air Wing in action * Cockpit views of missions and breathtaking day and night landings * The treacherous environment of deck crews * The staggering logistical requirements * The role of the "flat top" and its battle group.

Object ID	Title	Author	Summary
			The F-14 descends quickly. The carrier, - a blur of light in the darkness. There's a heavy sea running. The pilot checks his airspeed and angle of attack. The runway looks no longer than a basketball court. He's indicating 130 knots... The battle-ready Air Wing - technologically sophisticated and ready for any mission. They're all here; the A-6 Intruder, the A-7 Corsair, the F-14 Tomcat, the S-3A Viking, the SH-3 Sea King helicopter, the E-2C Hawkeye, the EA-6B Prowler, and the newest addition to the Air Wing, the F/A-18 Hornet. In Flight Deck, you'll attend the briefings and meet the pilots. Best of all, you'll fly with them in dramatic segments shot right from the cockpit. You'll feel what it's like to land on a pitching flight deck at night, or to jerk forward on a steam catapult from 0-150 knots instantly.
2010.303.009	Storm Center : The USS Vincennes and Iran Air Flight 655: A Personal Account of Tragedy and Terrorism	Rogers, Will (Will C.)	From the Preface: "The account of the tragic destruction of Iran Air Flight 655 by the cruiser Vincennes, the subsequent bombing of our van and the events surrounding both of these incidents is not an attempt to replot old ground. Our intent rather is to tell the reader the personal story of two ordinary people catapulted into the center of extraordinary circumstances. We have attempted to correct numerous errors that found their way into public perception of these events. some errors arose simply because we chose to restrict access to ourselves. Others were flights of fancy that ignored published facts."
2010.303.010	Globalization and Maritime Power	Tangredi, Sam J.	"Globalization and Maritime Power" focuses on the direct impact of globalization on naval forces and the maritime aspects of commerce and international relations. It seeks to translate what we have

Object ID	Title	Author	Summary
			learned about the phenomenon of globalization into the language of strategy and defense policy. This book uses a general knowledge of globalization to deduce its impact on the maritime world, and applies inductive reasoning to the maritime impacts of defense planning. Its intent is to provide national security leaders with analyses applicable to the future security environment. (Source: Amazon.com)
2010.303.011	US Coast Guard Aviation	Dorr, Robert F.	"MAYDAY! MAYDAY!" When a ship is in trouble, no matter what the weather or how high the seas, Coast Guard search and rescue (SAR) helicopters and airplanes are the first to the rescue. Although it is the mission they are most known for, there is much more to Coast Guard aviation than search and rescue. The distinctive orange and white Coast Guard aircraft constantly patrol for maritime smugglers and poachers, spot and help contain oil spills, and interdict and seize millions of dollars worth of illegal drugs every year. "US Coast Guard Aviation" is the first all-color, inside look at the special airplanes and helicopters flown by the US Coast Guard. Within are more than eighty color photos of past and present Coast Guard aircraft in action: the HC-130H Hercules, the HH-65 Dauphin, the HU-25B Guardian, and many others. Coast Guard aviation is more than just aircraft. It is an enormous team of highly skilled and motivated men and women who fly these important missions and maintain the aircraft. Author Robert F. Dorr has captured their spirit and dedication in "US Coast Guard Aviation."

The Canadian merchant navy at war, by Leslie Roberts. pt. III. Of ships and shipbuilding, by Wallace Ward and J. A. Morton.
2010.303.013	Soviet Navy, The	Saunders, Malcolm George (ed)	The Soviet Navy (Russian: Voenno-morskoj flot SSSR, literally "Military Maritime Fleet of the USSR") was the naval arm of the Soviet Armed Forces. Often referred to as the Red Fleet, the Soviet Navy would have played an instrumental role in a Warsaw Pact war with NATO, where it would have attempted to prevent naval convoys from bringing reinforcements across the Atlantic Ocean from North America to Western Europe. The Soviet Navy was divided into four major fleets: the Northern, Pacific, Black Sea, and Baltic Fleets; under separate command was the Leningrad Naval Base. The Caspian Flotilla was a smaller force operating in the land-locked Caspian Sea. The 5th Operational Squadron in the Mediterranean drew its units from the Black Sea, Baltic, and Northern Fleets; the Indian Ocean Squadron primarily from the Pacific Fleet. Other components included Naval Aviation, Naval Infantry (the Soviet equivalent of marines), and Coastal Artillery. (from Wikipedia)
2010.303.014	Soviet Seamen	Doldobanov, G.	Soviet Seamen in 9 chapters beginning with signals of Joy and Alarm in the open-air cinema in which hundreds are gathered to hear radio announcements regarding the ships gone to sea and arriving in different world ports. A sailor's life calls for courage, selflessness and loyalty to his country. Ships sail to

			Marseilles, Alexandria, and the Antarctic. the Secret Soviet Weapon comments on the ice-breaker Lenin in 1960 - atomic ship on Arctic voyage by the Northern Sea Route. Seamen receive radiograms and old ships are being replaced by new fast steamers and motor vessels and navigation equipment. Husbands at sea and their return and family relationships; health services are but a few of the topics discussed.
2010.303.015	Notes on Servicing Radio and Sound Equipment, United States Navy	West Coast Sound Training Squadron	One version has NAVSHIPS 900,085 on it. Our cataloging came from Navy Dept. Library. Notes on Servicing Radio and Sound Equipment with inscription by Cpl. D. T. Auld, A. S. N.12125288 , 17 Jan 44. Restricted, Navy Department, Office of Chief of Naval Operations regarding this publication by f. H. Horne. Foreword by A. D. Burhans, Captain, U. S. Navy, Commander, West Coast Sound Training Squadron; with Contents in IV Parts beginning with Circuit Components, abbreviations and symbols to Receivers, Transmitters, and Appendices.
2010.303.016	Air Power 2000	Gething, Michael J.	Which current aircraft will still be operational in AD 2000 How will they be adapted? What new weapons will they carry? What aircraft currently at prototype stage will be in service? What will move from the drawing-board into production What new techniques are planned for firepower, accuracy and survival? THE '2000' SERIES This is the final volume of the 2000 series which, since the first title was published in early 1990, has aimed to present informed forecasting on the state of military hardware at the turn of the century — not 'sci-fi dreaming' but reasoned prediction based on the current equipment in production, items at prototype stage, equipment

Object ID	Title	Author	Summary
			known to be on the drawing-board and on each author's consideration of what expected development will create.
			The series has thus advanced the understanding of the enthusiastic follower of the military equipment scene and enabled him more thoroughly to follow the evolving state of the industry. There has always been the opportunity to gain an inside view of trends and developments and so gain an enhanced awareness of each topic. Each book has been profusely illustrated with photographs and drawings.
			The selected authors have been chosen for their affinity with the industry concerned, their appreciation of the manner of its change and their ability to predict trends from this background of knowledge and first-hand information.
			(from dust jacket back)
			Looks at the present and future aircraft scene to use informed prediction in looking forward to the state of play at the start of the next century. Coverage ranges from battlefield helicopters to high-level reconnaissance aircraft, from multi-role machines to unmanned warplanes.
2010.303.017	Submarine Warfare : Monsters & Midgets	Compton-Hall, Richard	(from Amazon.com)
			This is more than just another picture book about warfare. Submarines both large and small are discussed from a historical as well as a topical point of view by a professional of the Royal Navy. Along with many black-and-white photographs, there is an extensive text based on original sources. Compton-Hall provides readers with information current up to today's nuclear submarines, using the men and their vessels to tell the true stories of both "midgets and monsters." - School Library Journal

2010.303.019	History of the Chaplain Corps, United States Navy, The, Volume VIII	Martin, H. Lawrence (ed.)	Volume 8 of 12 comprising the history of the U.S. Navy Chaplain Corps. This volume covers the period 1972 to 1981 and includes biographical and service record sketches of 1325 chaplains who attained extended active duty status during the period. Photos contained are of flag rank only.
2010.303.020	Sailor : A Pictorial History : Life Aboard the World's Fighting Ships	McGowan, A. P. (Alan Patrick)	A pictorial history of sailors; their dress, conditions of service, food, accommodation, leave and discipline. Short text sections provide an insight into the stories behind the many photographs of the world's sailors.
2010.303.021	Warships	Simmons, Jacques	Here is an authoritative and readable account of the modern warship, from the first armored ships of the iron and steam period to the sophisticated nuclear-powered and missile-equipped craft of today. Full color art throughout the text illustrates dozens of warships. The main international developments in ordnance, protection and engine power, along with the changes in function which affected design, are traced through capital ships, carriers, cruisers, torpedo boats and destroyers, submarines, sloops and gunboats. Fighting ships of World War II and recent naval advances are described fully. (from back of dust jacket)
2010.303.022	Fighters and Bombers of World War II	Munson, Kenneth	Here, brought together in one volume for the first time, are Kenneth Munson's two authoritative works on the fighters and bombers of World War II. Though many types of aircraft, old and new, conventional and bizarre, took part in the war of 1939-45, there can be no doubt of the vital role played by the fighters and bombers of the world's airforces. The war brought advances in the

Object ID	Title	Author	Summary
			fighter's speed and firepower, and in the range and payload of the bomber, hitherto undreamt of by aeronautical designers. By 1945 the introduction of the first jet- and rocket-powered interceptors was to change the nature of air combat forever by the tremendous speeds of which they were capable. These memorable aircraft, and all their principal predecessors since 1939, are authoritatively described in Kenneth Munson's fascinating text, and are brought to life by 160 pages of accurate and detailed coloured drawings. For ease of reference the book is divided into two sections: Fighters, Attack and Training aircraft; and Bombers, Patrol and Transport planes. (from dust jacket flap) Wood, John W. (John William) (illustrator)
2010.303.023	Bombers Patrol and Transport Aircraft	Munson, Kenneth	From America's Boeing B-52 Stratofortress and Lockheed C-140 JetStar to Russia's Tupolev Tu-16 Badger and British Aircraft Corporation's Canberra—the major bomber, patrol, and transport aircraft that make up the world air power of today are illustrated in full color and described in full detail in this new volume of The Pocket Encyclopedia of World Aircraft in Color. The eighty aircraft selected include propeller-driven bombers, jet bombers (straight-, swept-, and delta-winged), early warning aircraft, antisubmarine aircraft, search and rescue aircraft, reconnaissance aircraft, jet transports, and propeller-driven transports now in use all over the world. The aircraft are illustrated in three major aspects—side elevation, plan view from above, and plan view from below, combining the maximum visual appeal with the essential details of construction, and national and squadron markings. The accompanying text

Object ID	Title	Author	Summary
2010.303.024	Fighters Attack and Training Aircraft	Munson, Kenneth	authoritatively describes each airplane's development and service career. An appendix provides details of the various missiles which may be carried.
			A companion volume, FIGHTERS: Attack and Training Aircraft, is also available in this series. (from dust jacket flap)
2010.303.025	Introduction to Airborne Radar	Stimson, George W.	From America's McDonnell F-4 Phantom II and Convair F-106 Delta Dart to England's Hawker Siddeley Sea Vixen and Russia's Mikoyan MiG-15UTI Midget—the major fighter, attack, and training aircraft that make up the world air power of today are illustrated in full color and described in full detail in this new volume of The Pocket Encyclopedia of World Aircraft in Color. The eighty aircraft selected include piston-engined fighters, jet fighters (straight-, swept-, and delta-winged), ground attack aircraft, jet trainers, and piston-engined trainers now in use all over the world. The aircraft are illustrated in their major aspects—side elevation, plan view from above, and plan view from below, combining the maximum visual appeal with the essential details of construction, and national and squadron markings. The accompanying text authoritatively describes each airplane's development and service career. An appendix provides details of the various missiles which may be carried. 2010.303.026	Pearl Harbor: Japan's Fatal Blunder: The True Story Behind Japan's Attack on December	Albright, Harry	The "swift and ruthless" policy of the Japanese navy in World War II was due to the

Object ID	Title	Author	Summary
	7, 1941		military genius of Adm. Heihachiro Togo, whose strategies during the Sino- and Russo-Japanese wars, the author asserts, provided a model for Adm. Isoroku Yamamoto in his attack on Pearl Harbor on December 7, 1941. Albright, an intelligence officer at Army headquarters on Oahu at the time, tells the familiar story of the failure of the U.S. command to heed the warnings of impending disaster. He also argues that neither Gen. Walter Short nor Adm. Husband Kimmel deserves the degree of blame for the Pearl Harbor disaster that historians have placed on their shoulders. Albright tells, as well, of the planning, preparation and execution of the two-wave Japanese assault. He contends that the Japanese could have caused far greater damage had they exploited their initial success with a third wave, a carrier-baiting landing on Oahu and he speculates on how this might have turned out. The study concludes with an examination of the devastating Japanese naval defeat at Midway six months after Pearl Harbor and the death of Yamamoto. - Publishers Weekly Copyright 1988 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. Review "Albright's description of the sea and air battles... are superbly realistic. The entire book reads like a thrilling novel." --. (Source: Amazon.com)

2010.303.028	U.S. Marines in Vietnam : The War That Would Not End, 1971-1973	Melson, Charles D.	About the Author, Charles D. Melson, Maj. USMC (Ret) Charles D. Melson, Maj USMC (Ret) served in several critical operations throughout his entire military career. He extended overseas to remain with his regiment in Vietnam and was cited for achievement and combat action, and augmented meritoriously into the regular Marine Corps. In 1986, he served with the Marine Corps Historical Center and developed a volume of official history, U.S. Marine Operations in Vietnam, 1971-1973, among other significant research and historical documentation. (Source: hellgatepress.com)
2010.303.029	Story of Submarines, The	Weller, George	History of submarines of the world from its conception in ancient Greece to the first nuclear submarines of the early 1960s.
2010.303.030	Dive! : The Story of an Atomic Submarine	Harris-Warren, H. B.	A brief history of United States Navy submarines and a profile of an early Skipjack class SSN given the fictional name "USS Seatrout."
2010.303.031	Jets of the World : New Fighters, Bombers, and Transports	Colby, C. B. (Carroll B.)	Foreward In collecting photographs and material for this book, a revised edition of my original Jets of the World which was published in 1952, I had the cooperation of many manufacturers, both here in the United States and abroad. Most sent me excellent photographs, background information and almost anything not restricted by national security. Unfortunately, comparable - or in fact, any - information from sources behind the "Iron Curtain" has not been made available to me, so that regretfully I have been able to include nothing about the planes of countries beyond that barrier. In many instances I could

Object ID	Title	Author	Summary
			include obsolete aircraft from those countries, but rather than include such material I have chosen to omit them entirely. I have selected those aircraft which possess unique characteristics, are of special importance or are of particular interest because of design, purpose or details. It would be impossible to include every model of every type produced by those few countries which are capable of developing successful jet aircraft in quantity. This is particularly true of the United States and England who far outstrip the other free nations in their jet inventories. However, on the following pages you will find exceptional photographs of the most outstanding jet aircraft of Europe and the United States: fighters, bombers, cargo, and transport aircraft. You will also find several aircraft presented which are so new that they are not yet flying, such as the several "SSTs," the supersonic transports of the future. This is indeed the "Space Age," but there is still plenty of excitement, adventure, and "new frontiers" a bit closer to the earth, where the "Air Age" is still finding new horizons in design, speed and luxury. In this new edition of Jets of the World you will find many examples of what man has designed, and is developing, to breach those and other horizons we will find in the future. My sincere appreciation to the many manufacturers who helped me with this book, as well as to the Book and Magazine Branch of the Office of the Secretary of Defense, Washington, D.C., for its usual enthusiastic cooperation. - C. B. COLBY Founding member Aviation/Space Writers Assoc.

2010.303.032	Our Space Age Jets : A Completely Revised Edition of Our Fighting Jets	Colby, C. B. (Carroll B.)	In 1951 when the first edition of Our Fighting Jets was published, I included the latest and best of our fighting aircraft at that time. Now, in its seventh printing, that original publication, although still of value as a record of the fighting planes of a few years ago, is no longer up to date. For that reason I am revising it and in this new edition you will find very few of the original fighting jets that appeared in that first book. Much has happened in aeronautical design and engineering since then. Speeds have doubled and redoubled. Range, ceiling and armament have increased astonishingly. Engines, electronic equipment, pilot comfort and safety, and structural strength have been improved almost beyond anticipation. Here is presented a selection of outstanding aircraft embodying these advances in fighting aircraft design. True, there are some planes still in service that are not included, and a few of the planes in my original book are represented here. The latter veterans have earned the right to be here through continuing outstanding performance, better performance through important modifications, or almost by force of numbers of such veterans still in active service. National security regulations prohibit me from including all information about many of the newer aircraft, and that is as it should be. So too, there are some aircraft almost ready to take to the skies which cannot even be hinted at, and that

Object ID	Title	Author	Summary
			too is heart-warming to know, for it is always wise to have a few "aces" up the sleeve in case of an emergency. Uncle Sam has not only one but several "aces" up his red, white, and blue sleeves with which to confuse and confound any would-be aggressor, if such awful occasion should arise. By the time you read this book it may be that some of those "aces" are flying, and at that time everyone can talk about them. I can assure you that it will be interesting "talking"! As many aircraft appear in several modifications of the original model, I have selected data and photographs to give you as complete a coverage as possible. Many modifications present no external changes in general silhouette of the aircraft, nor do they substantially alter performance figures, so they have been omitted. Others may have done both but are of such limited service that they too have been omitted. The aircraft presented on the following pages represent a top selection of the latest, most interesting or most famous weapons in the arsenal of our "space-age Air Force." As in the past I am once more indebted to many for their help and suggestions in assembling the material and photographs for this book. To the many manufacturers and unknown photographers whose products and art are herewith presented, my sincere thanks. In particular, I would like to express my sincere appreciation to Orville S. Splitt, Acting Director, Office of News Service, Office of the Assistant Secretary of Defense, for his usual efficient help, and to Major Ben R. Fern, USAF, Chief, Magazine and Book Branch, of the same office, for his most painstaking and enthusiastic cooperation in many ways. C. B. COLBY Lieut. Colonel, CAP USAF

2010.303.035	Where Hell Freezes Over : A Story of Amazing Bravery and Survival	Kearns, David A.	Though Kearns's gripping debut is not the first account of the crash of the Martin PBM seaplane George 1 in Antarctica in December 1946, his is the most recent and most complete, unfolding with page-turning immediacy. The plane was part of Operation Highjump, a mammoth U.S. Navy survey expedition that set out to photomap Antarctica under the leadership of hardy polar perennial Adm. Richard E. Byrd. The George 1 crashed in a whiteout, and three of the nine crewmen died. The others survived their injuries and two weeks of Antarctic weather, thanks to personal ingenuity, hardihood, courage, the leadership of Capt. Henry Caldwell and the salvaging of adequate food. Their radios didn't work, but a shoestring search-and-rescue operation

Object ID	Title	Author	Summary
			finally spotted their smoke signals. All were flown out safely and returned home, although pilot Ralph LeBlanc lost his legs. Copilot Bill Kearns lived to become the author's father. With intimate access to surviving sources, plus a depth of personal commitment, the author makes a compelling addition to survival literature. - Publishers Weekly (Nov. 15) Copyright © Reed Business Information, a division of Reed Elsevier Inc. All rights reserved. From Booklist Kearns'account of the crash of the flying boat George I in Antarctica in December 1946 (Kearns is the son of one of the survivors) is, nearly 60 years later, a history of technology as much as an enthralling and inspirational record of survival. Employed in Operation Highjump, a full-scale mapping and survey expedition, George I crashed in a whiteout with nine men aboard. Six survived the crash, some with serious wounds, and then successfully endured three weeks on the Antarctic ice, thanks to their strength and ingenuity, and the leadership of Captain Henry Caldwell. Their radios didn't work, but their smoke signals were eventually spotted, and all were rescued. This is a story likely to interest readers far beyond the ranks of survival-narrative fans. 2010.303.047	Battlefield Vietnam, Vol. 7 : Air War Vietnam	Flitton, Dave (writer, producer, director)	February 7, 1965. In the first strike of Operation Flaming Dart, a formation of heavily armed Skyhawk and Crusader fighter planes scream over the North Vietnamese training base at Dong Hoi. Launched in response to recent Viet Cong guerrilla raids, the planes pass through heavy antiaircraft fire to unleash a torrent of bombs and rockets. As the base's barracks and supply depots explode into flames, the war planes turn back toward home to prepare for their next attack. Climb into the cockpit for a firsthand view of the early air war in Vietnam--from the unauthorized combat missions of the U.s. Air Force's Farmgate detachment to the first dramatic raids of Rolling Thunder. Find out how the Soviets and Chinese helped build the North's air force and air defenses in response to U.s. air attacks,. Watch China prepare its industries and citizens to withstand the unthinkable--an American nuclear strike. Then see why President Johnson's weekly luncheons turned into top-secret planning sessions...for the strategic bombing of North Vietnam.
2010.303.048	Battlefield Vietnam, Vol. 8 : Rolling Thunder	Flitton, Dave (writer, producer, director)	April 3, 1965. American Navy and Air Force planes begin a relentless attack on North Vietnam's transport system--bridges, road and rail junctions and supply depots. Over the next three and a half years,

Object ID	Title	Author	Summary
			Operation Rolling Thunder will expand to include airfields, power plants and industries, oil storage facilities...and ultimately targets in the cities of Hanoi and Haiphong, as the U.S. attempts to bomb North Vietnam out of the war. Follow the escalation of the air war in Vietnam, from the massive deployments of Rolling Thunder in the North to the devastating "carpet bombings" of Arc Light over the jungles of the South and the naval bombardment of Operation Sea Dragon. View amazing Soviet footage of a surface-to-air missile installation, then see why the deadly new SAM quickly became a U.S. pilot's worst nightmare. Watch a fierce dogfight between American fighters and nimble MiG17s in the shrapnel-filled airspace over Hanoi. And discover what led President Johnson to announce a cutback in history's largest bombing campaign in the aftermath of the infamous Tet Offensive.
2010.303.049	Battlefield Vietnam, Vol. 1 : Countdown to Tet	Flitton, Dave	This is one volume of a set of 12 on the Vietnam War. January 1967 : American and South Vietnamese troops begin a series of sweeps through traditional Viet Cong strongholds--first the Iron Triangle near Saigon, then in War Zone C, along the Cambodian border. Thousands of guerrillas are killed in ferocious firefights, their installations destroyed. In the northern part of the country, escalated bombing raids appear to be pounding the North Vietnamese Army into oblivion. But North Vietnam and the Viet Cong are far from conceding defeat..infact, they are preparing to unleash the biggest offensive of the war. Learn the secrets of Ho Chi Minh's remarkable strategy to shatter South Vietnamese and U.S. resolve in a countrywide attack. Discover how the military leader, who originally opposed the ambitious plan, turned it into a shocking reality.

Object ID	Title	Author	Summary
			Follow Viet Cong guerrillas on a perilous journey down the Ho Chi Minh trail to infiltrate a heavily patrolled South. Then see how an initial attack on a Marine base triggered the massive assault...and a serious strategic blunder by U.S. command.
2010.303.050	Battlefield Vietnam, Vol. 2 : The Tet Offensive	Flitton, Dave	January 31, 1968 : At the dawn of Tet, the Vietnamese New Year, the early-morning quiet is shattered by explosions and the fire of automatic weapons. In a stunning maneuver, Viet Cong units have simultaneously launched full-scale assaults on towns and cities across South Vietnam. In Saigon, one battle after another erupts at key targets throughout the capital city...including the United States Embassy. Before the Tet Offensive is over, 80,000 Viet Cong will confront South Vietnamese and American troops in an unprecedented surprise attack. Discover how the Americans were startled by one of the most amazing offensives in military history. Follow the troops on both sides--from the dramatic attack on Saigon in the south to the ferocious firefights at Khe Sanh near the DMZ. Through graphic combat footage relive the assault on Hue, the biggest, bloodiest battle of the entire offensive. And see how the catastrophic outcome of Tet changed the course of the war and America's role in it.
2010.303.051	Battlefield Vietnam, Vol. 3 : Search and Destroy	Flitton, Dave	October 20, 1965 : After infiltrating the South through neighboring Cambodia, North Vietnamese regiments attack on American Special Forces camp at Plei Mei. Soon they hear the ominous "whup whup whup" of the helicopter gunships from the U.S. First Air Cavalry Division. Beaten back by intense machine-gun and rocket fire, the attackers retreat....with the Air Cavalry in hot pursuit. The Air Cavalry's crucial mission was to keep the Northern troops from regrouping and cutting South Vietnam in half--by trapping

Object ID	Title	Author	Summary
			and then annihilating the enemy with overwhelming firepower. Follow the world's first helicopter-based military formation into action of the battle of the Ia Drang Valley. See how the results of the fierce confrontation changed the fighting tactics of the North. Then go deep into the Viet Cong's largest underground stronghold--an amazing network of tunnels just twenty miles from the South's capital city--to learn how guerrillas prepared to combat an increasingly determined American military.
2010.303.052	Battlefield Vietnam, Vol. 4 : Showdown in the Iron Triangle	Flitton, Dave (writer, producer, director)	September 14, 1966 : Troop-laden U.S. helicopters hover over a landing zone in enemy-held territory. As they descend, the choppers are hit with heavy fire--an ambush by the Viet Cong's elite Ninth Division. Thousands of reinforcements from both sides rush to the site. By the following day, the search and destroy mission Operation Attleboro has become a raging, full-scale battle. Follow Viet Cong and American forces into the major confrontations of Attleboro and Cedar Falls. See one of the largest airmobile assaults ever staged and the first parachute drop of the war, during Operation Junction City. Crawl into the booby-trapped passages of an immense underground fortress with the U.S. Army's Tunnel Rats, armed only with a knife, a pistol and a flashlight. Drive through a hail of enemy machine-gun fire on the deadliest highway in South Vietnam. Witness battles of shocking violence, as the Viet Cong throw wave upon wave of troops against American forces determined to destroy them...once and for all.
2010.303.053	Battlefield Vietnam, Vol. 5 : War on the DMZ	Flitton, Dave (writer, producer, director)	December 1967 : A battalion of U.S. Marines uncovers huge caches of weapons, fresh trails and elaborate bunker complexes near the border of Laos....but not a single enemy soldier. Unknown to the Americans, the surrounding jungle is actually

Object ID	Title	Author	Summary
			crawling with thousands of North Vietnamese troops, all under strict orders not to fire. Their preparations are almost complete for a major offensive that could leave the South wide open to invasion--and force the Americans out of the war. With days, the NVA will attack the Marine combat base at Khe Sanh. Get ready for intense battle action between Marines and North Vietnamese in Operations Hastings and Prairie. Find out why the U.S. Joint Chiefs of Staff tried to expand the war into Cambodia and Laos --and how the infamous McNamara line almost became a key part of the plan. And discover how North Vietnamese military leaders trained, transported and concealed 20,000 troops--with weapons and supplies--under the noses of the U.S. Marines, as they prepared for a major siege on Khe Sanh.
2010.303.054	Battlefield Vietnam, Vol. 6 : Siege at Khe Sanh	Flitton, Dave (writer, producer, director)	January 21, 1968. At 5:30 a.m. a deafening barrage of North Vietnamese artillery slams into the Marine combat base at Khe Sanh. As Marines frantically dive for cover, an incoming round scores a direct hit on the base's main ammo dump--sending shells and mortar rounds in every direction. For the next two days, the troops will have to duck their own flying ammo, feverishly repair damaged runways and fight off relentless probing attacks as they prepare for the biggest battle of the entire war. Follow the Americans and the North Vietnamese into the battle --from its explosive beginning to the last-ditch assaults that killed thousands in a barrage of gunfire. Make a hair-raising run during Operation Niagara, the largest tactical bombing campaign ever conceived. Visit the trenches that helped the North Vietnamese survive a rain of bombs, machine-gun fire and rivers of flaming napalm. And discover how, just months after the battle, the base that was

			to be held "at any cost" met its surprising end.
2010.303.055	Battlefield Vietnam, Vol.11 : Dien Bien Phu, The Legacy	Flitton, Dave (writer, producer, director)	March 13, 1954. The French army base at Dien Bien Phu, deep in hostile territory, is suddenly hit by a massive artillery bombardment. Greatly outnumbered, and surrounded by withering mortar and field gun fire, the French troops bravely combat wave upon wave of enemy assault. As one stronghold after another falls under relentless attack by Vietnamese guerrilla fighter, the French government calls on the United States to help prevent a stunning defeat. The aftermath of the battle at Dien Bien Phu would ultimately lead to the creation of North and South Vietnam. Visit the North's shrewd leader Ho Chi Minh to learn his violent strategy for reuniting the two countries. Eavesdrop on White House conversations to find out why fear of "the domino effect" soon pulled the U.S. into the conflict. Discover the secret American plan to deploy massive combat forces in the South...in 1959. Then follow a band of early Viet Cong guerrillas as they prepare to embroil South Vietnam in a full-scale war.
2010.303.056	Battlefield Vietnam, Vol.12 : The Undeclared War	Flitton, Dave (writer, producer, director)	August 2, 1964. Off the coast of North Vietnam, enemy patrol boats surprise the U. S. destroyer Maddox with a barrage of torpedoes and machine-gun fire. The unprovoked attack, then a possible second attack two nights later, send the simmering conflict between the United States and North Vietnam spiraling dangerously toward outright war. Within a week, American jets bomb the North in retaliation, and President Lyndon Johnson acquires the power to wage unrestricted war in Vietnam. Follow the escalating U.S. involvement in Vietnam--from military advisors after the battle at Dien Bien Phu to unofficial combat missions less than a decade later--that ultimately

Object ID	Title	Author	Summary
			led to the confrontation in the Tonkin Gulf. Learn the Viet Cong tactics that ensured an overwhelming victory over helicopters and armor in the battle of Ap Bac. Witness the incredible destructive power of bombing operations Faming Dart and Rolling Thunder. Then feel the excitement of the first full-scale U.S. battle of the war, Operation Starlite, and see why its results left commander General Westmoreland confident of total victory.
2010.303.057	Battlefield Vietnam, Vol. 9 : Peace with Honor	Flitton, Dave (writer, producer, director)	(see Image 2 for description on slip case rear) April 29, 1970. South Vietnamese soldiers, backed by U.s. forces, sweep into Cambodia to attack communist bases. In a series of firefights with the Viet Cong and North Vietnamese Army, the invading troops destroy vast supply depots and inflict heavy casualties. For the South, it is a major victory. But in the United States, news ignites a firestorm of criticism and protests over America's continuing role in the war. From the aftermath of the Tet Offensive, follow the events that led to a new kind of fighting for U.S. troops...and a radical shift in American policy. Learn President Nixon's plan for the "Vietnamization" of the war, and its consequences for U.S. and Southern forces. As peace talks stall, attend top-secret meetings of the Hanoi Politburo for the planning of a risky new invasion. Find out how, and why, renewed Soviet support made the daring offensive possible...then follow the remarkable buildup of the North Vietnamese Army as it prepares to conquer the South.
2010.303.059	PBY: The Catalina Flying Boat	Creed, Roscoe	The greatest of all flying boats, the PBY Catalina, was one of the most versatile aircraft ever built. This definitive study, first published in 1985, pulls together in a single volume all of the aircraft's fascinating facts. The author carefully analyzes the PBY's dual use in the war as a plane of mercy

Object ID	Title	Author	Summary
			and as a bomber, and he chronicles the flying boat's contributions in peacetime. (from Amazon.com:)
2010.303.060	Battlefield Vietnam, Vol.10 : The Fall of Saigon	Uschan, Michael V.	March 30, 1972. North Vietnamese artillery located inside the Demilitarized Zone open fire on the South's forward defenses. The ferocity of the barrage throws the defending troops into chaos, as 30,000 Northern soldiers storm across the border. Soon the South Vietnamese forces are driven back to the Cua Viet river's edge, bombarded by withering tank and artillery fire. It is the first attack in a daring offensive to conquer all of South Vietnam. Learn how U.S. airpower rescued South Vietnam from certain defeat during the North's Spring Offensive. Witness secret negotiations at the Paris Peace Talks and find out why the South's president tried to derail an agreement that would end the conflict. See how devastating U.S. B-52 bombing raids pounded North Vietnam to its knees--and helped bring an end to the American war in Vietnam. Then discover what happened after the withdrawal of U.S. troops, as Northern forces battled their way through the South, leading to a final, all-out assault against the capital city of Saigon.

A pictorial summary of the USS Midway crew on a deployment from Alameda NAS to the western Pacific with the Seventh Fleet from 8 November 1963 to 26 May 1964 with CAW -2 consisting of VF-21, VF-24, VA-22, VA-23, VA-25, VAH-8, VAW-11, and VFP-63 embarked aboard. Port visits included Hawaii; Subic Bay, The Republic of the Philippines; Hong Kong; and Sasebo, Beppu, Iwakuni, and Yokosuka, Japan.
2010.307.001	Martin Baker Ejection Seats	Martin-Baker	This is a short video that shows the design and testing of Martin-Bake pilot ejection seats. These seats are used in over 90 Air Forces, in 182 different aircraft, and over 68,000 have been delivered. This is a Corporate Presentation promotional video - 1997.
2010.308.001	Anchor, The -- Company 317	None Stated	Company 317 at the Naval Training Center in San Diego. The introductory history states that this NTC is in its 35th year of service, and it was commissioned in 1923. That would put this book at about 1954.
2010.309.001	Pappy Boyington Field : A Campaign to Honor a Hero	Gonzales, Kevin E.	From the website: pappyboyingtonfield.com . "Pappy Boyington Field" tells the story of the grass-roots effort to honor a WWII Hero in the town of his birth Coeur D'Alene, Idaho. For many years a controversy brewed over the proposal to add a commemorative name to an airfield in a small town in Idaho. The film follows members of the community who battled against bureaucracy, and weaves in their stories during the campaign. "Pappy"

Object ID	Title	Author	Summary
			Boyington was born in Coeur d'Alene, Idaho in 1912, and for his service in WWII, was awarded both the Navy Cross and the Medal of Honor.
			Personal insights into Pappy Boyington's life are provided by his son Greg Boyington Jr., as well as actor Robert Conrad who portrayed Pappy in the television series "Baa Baa Black Sheep".
			Archival film footage of the F4U Corsair is showcased, as well as Jet aircraft flown by today's Marine Corps fighter pilots. Included in the film is music of The United States Marine Band "The President's Own".
			Pappy was the Commanding Officer of the famed Black Sheep Squadron in the Pacific during WWII, he was an ACE Fighter Pilot, POW, and Medal of Honor recipient.
2010.310.001	USS Midway (CVA-41) - World Cruise - 1954-55	Patureau, Alan C. (ed.)	Pictorial account of the world cruise of USS Midway in 1954-55, conducted as Midway was changing homeports from Norfolk, VA to the west coast of the U. S. The ship departed Norfolk 27 December 1954 and transited to the Pacific via the Cape of Good Hope. She operated in the western Pacific with the U.S. Seventh Fleet, conducting the Formosa Straits patrol and other fleet exercises and maneuvers in the South China Sea. She arrived at her new homeport of Alameda, CA on 14 July 1955. She remained there for only a week before proceeding north for a major overhaul at Bremerton, WA which commenced on 3 August 1955. Port calls during her deployment included Mayport, Capetown, Colombo, Manila, Hong Kong, Yokosuka and Pearl Harbor.

2010.314.001	Division Officer's Guide - 1962	Noel, John V.	Just as Watch Officer's Guide tells the young officer what to do and how to do it while he is on watch on the bridge or on the quarterdeck, Division Officer's Guide tells him how to handle his duties the rest of the time when he is not on watch.
2010.314.002	Cook Book of the United States Navy, The - 1940	Bureau of Supplies and Accounts	A comprehensive collection of recipes tested under service conditions afloat and ashore which, under ordinary market conditions, provides a moderately priced menu. Also contains sample menus.
2010.314.003	Principles of Cookery	Shircliffe, Arnold	A compilation of recipes and advice on the culinary art worked out at the Naval Air Technical Training Center, Navy Pier, Chicago during 1942 and 1943 by Arnold Shircliffe, nationally known authority on food and food preparation.
2010.314.004	Traditions of the Navy : A Collection of Naval Customs, Terms and Traditions	Windas, Cedric W.	Reprint of 1942 work. A compilation and explanation of seafaring customs, terms and traditions from around the world.
2010.314.005	Submariner	Coote, John	First-hand account of submarine patrols in the North and Mediterranean Seas by the youngest ever Royal Navy submarine commander during WWII.
2010.314.006	Into the Valley : a Skirmish of the Marines	Hersey, John	Story of one company of marines during a small battle on the Island of Guadalcanal in WWII.
2010.314.007	Struggle for Guadalcanal, August 1942-February 1943, The	Morison, Samuel Eliot	This volume is devoted to the Guadalcanal campaign. After a brief description of the Solomon Islands, the author launches forth into the Battle of Savo Island. The full story of this severe defeat to the United States is here told for the first time. Other major actions

Object ID	Title	Author	Summary
			covered by this volume are: the carrier battle of the Eastern Solomons; the battle of Cape Esperance; the battle of the Santa Cruz Islands; the great three-day naval battle of Guadalcanal, the battle of Tassafaronga; the battle of Rennell Island. The relation between the ground fighting and naval warfare, which was a significant feature of this campaign, is described in considerable detail. The initial bombardment of Munda by "Pug" Ainsworth's task force, and the development of the Black Cats is also covered.
2010.314.008	Holy Bible, The, containing the Old and New Testaments, translated out of the original tongues, and with the former translations diligently compared & revised	None Stated	King James version of the bible with book plate indicating presentation to an individual upon graduation from Naval Officer Candidate School in Newport, R.I., circa 1940.
2010.315.001	Illustrated Directory of Modern Weapons : Warplanes, Tanks, Missiles, Warships, Artillery, Small Arms	Bonds, Ray (ed)	Over 600 weapons described, 600 illustrations--most in color, and over 200,000 words describing strategic, air, land, and sea weapons. Includes appendix and index.
2010.315.002	Fighter! : A Pictorial History of International Fighter Aircraft	Gunston, Bill	A celebration of the world's greatest fighters from World War I to the present day (1999). Featuring color and black-and-white photographs documenting more than 80 years of fighter history, plus color portraits of beautifully restored vintage aircraft.
2010.316.002	Digital Computer Basics	Naval Education and Training Command	Treats the overall operation of a representative computer in sufficient detail to equip the reader with a knowledge of the functions of the basic sections of a computer and how these sections are related. Two chapters on programming.
2010.316.003	Radar Electronics Fundamentals	Bureau of Ships	Provides the student technician with an understanding of the basic circuits which are the components of more complex radar circuits.
2010.316.004	Erection and Maintenance Instructions for Army Models B-24D,E,G and RB-24C Navy Model PB4Y-1	Commanding General, Army Air Forces	Formerly Restricted/For Official Use Only. Contains B-24 technical specifications and instructions for handling and maintenance, disassembly, repair and reassembly of major components of the airplane.

Object ID	Title	Author	Summary
2010.316.005	Aviation Storekeeper's Handbook	Aviation Storekeeper School	A text used in training naval aviation storekeepers late in WW II in Jacksonville, FL. Formerly RESTRICTED handling. Included at back is mimeographed 54-page student aid on same subject prepared by instructors at the school for use in conjunction with this textbook.
2010.316.006	Reaching for the Skies, vol. 6 : The Birth of Air Combat	Vaughn, Robert	This is one volume of a 12-set volume. Tracks the early development of the aircraft as a weapon in battle, from its modest beginnings during WW I to the supersonic modern fighters. From Wikipedia: "This program is a unique historical document, as it features interviews with many World War I aviators from both sides, these included ; George Vaughn, Ray Brooks, Carl-August von Schoenebeck, Wolfram Eisenlohr, and various others. The programme sheds valuable light on these periods of history. The men's recollections are valuable as many of them were already quite old at the time, and such a set of reminiscences can never be recorded again." This aired as Episode 3 of 12 on the BBC/CBS series Reaching for the Skies in 1988/89 and was titled The Aeroplane Goes to War for at least the BBC airing of that series. The entire set includes: [1] Quest for speed--[2] Fighters--[3] Pioneers--[4] Victory over the sea--[5] Trailblazers--[6] The birth of air combat--[7] Giants of the air. [8] Vertical flight--[9] Bombers--[10] The adventure of flight--[11] Rivals over the atlantic--[12] Lighter than air.

2010.320.071	Naval Institute Guide to the Ships and Aircraft of the U.S. Fleet - 1997	Polmar, Norman	Revised and updated with the latest technical data and incisive commentary on the U.S. Navy's current ship, aircraft, weapon, and electronic programs, this popular reference is essential for an understanding of the Navy as it enters the 21st century embroiled in the interservice debate over roles and missions in an era of downsizing. Award-winning author and naval analyst Norman Polmar delivers late-breaking details of the Navy's newest programs-such as the arsenal ship and the F/A-18E Hornet aircraft-while helping the reader keep track of the large number of ships and units being taken out of service. Particular attention is given to submarines, which have become the most controversial U.S. warships of the decade. The new attack submarine (NSSN) and Seawolf programs are addressed in detail. The book also provides an update on the state of the Navy, Defense Department organization, Navy Department organization, fleet organization, the Military Sealift Command, naval personnel, the Naval Reserve, the Coast Guard, and the National Oceanic and Atmospheric Administration. The roles available to women in the Navy, the reorganization of the Marine Forces (formerly Fleet Marine Forces), and the changing structure of the fleet are among the other issues discussed. Like its predecessors, this

Object ID	Title	Author	Summary
			16th edition of Ships and Aircraft will be indispensable to anyone—especially naval officers, military analysts, congressional staffers, defense contractors, journalists, and buffs—needing technical data and program information on the contemporary U.S. Navy. Jacket photos (top to bottom): The F/A-18 Hornet, the first of seven flight test aircraft for the F/A-18E/F program (McDonnell Douglas) (from dust jacket flap)
2010.321.003	Yokosuka: Base of an Empire	Tompkins, Tom	Yokosuka Naval Base (is) the most significant U.S. base in Japan and western Pacific. Headquarters of U.S. Naval Forces, Japan, and home port for the Seventh Fleet, it has extensive dock facilities, including the only drydock facility in the western Pacific capable of handling large attack carriers. (from books.google.com)
2010.321.004	Rig for Church	Maguire, William Augustus	RIG FOR CHURCH by Wm A Maguire (NY: Macmillan Co; 1942) tells how he was to give services on USS California and was enroute down SE Loch from the Officer's Club Landing near Merry's Point as the torpedo attack happened. R.G. Smith, USS California, was on the boat and confirms Maguire's presence and how they barely made it to ten-ten dock. (Source: pearlharborattacked.com)
2010.321.005	Picture History of World War II American Aircraft Production	Stoff, Joshua	Over 250 rare photographs depict one of the greatest industrial feats of World War II—indeed, of all time: the massive production of military aircraft by American manufacturers. Photos show teams of workers turning out Boeing B-17 bombers in Seattle, huge B-24D Liberators at the Ford plant in Willow Run, F6F Grumman Hellcat fighters in Bethpage, Long Island, and much, much more. In his Introduction and

2010.321.030	American Guerrilla in the Philippines	Wolfert, Ira	THERE WERE, I found, all sorts of ways to tell this story. The facts are these: Iliff David Richardson went out to the Philippines about a year before the war as an officer on the U.S.S. Bittern, a mine sweeper. He then transferred to the famous "expendable" motor torpedo boat Squadron 3, commanded by John D. Bulkeley, and fought these boats until they were shot out from under him. Then he involved himself in the guerrilla movement on Leyte, worked up to chief of staff to Col. Ruperto Kangleon, and ultimately became primarily responsible for the radio network which was General MacArthur's light back to Leyte. (from "A FOREWORD")
2010.321.031	Inside Hanoi's Secret Archives	McConnell, Malcolm	The story of "Operation Swamp Ranger" a covert mission to Vietnam that uncovered thousands of documents, photographs and artifacts from the archives of the People's Army of Vietnam (PAVN) in 1992. Documents relating to American prisoners of war and MIA's.
2010.321.032	Code-Breakers, The : The Story of Secret Writing	Kahn, David	A comprehensive history of secret codes and how they have affected human history from ancient Egypt to the analysis of messages from outer space.

2010.322.001	USS Midway (CV-41) - Mediterranean Cruise - 1947-1948	Mahler, W. A. (ed)	Cruise Book, USS Midway (CVB-41) Mediterranean Cruise, 1947-48. A pictorial account of the USS Midway (CVB-41) Mediterranean Cruise, 1947-48. The ship departed Norfolk, VA on 29 OCT 1947 and returned to Norfolk on 11 MAR 1948. Port visits included Gibraltar, Malta, Tangier, Cannes, Bone, Genoa, Naples, Syracuse, and Taranto. Total miles travelled - approx 19,000.
2010.322.002	USS Midway (CVA-41) - World Cruise - 1954-55	Patureau, Alan C. (ed.)	Pictorial account of the world cruise of USS Midway in 1954-55, conducted as Midway was changing homeports from Norfolk, VA to the west coast of the U. S. The ship departed Norfolk 27 December 1954 and transited to the Pacific via the Cape of Good Hope. She operated in the western Pacific with the U.S. Seventh Fleet, conducting the Formosa Straits patrol and other fleet exercises and maneuvers in the South China Sea. She arrived at her new homeport of Alameda, CA on 14 July 1955. She remained there for only a week before proceeding north for a major overhaul at Bremerton, WA which commenced on 3 August 1955. Port calls during her deployment included Mayport, Capetown, Colombo, Manila, Hong Kong, Yokosuka and Pearl Harbor.
2010.324.001	Dark Journey, The : Inside the Reeducation Camps of Vietcong	Truong, Hoa Minh	This is a true story of a Vietnam war survivor who endured the brutality and inhuman conditions of prisoners inside the reeducation camps of the Vietcong. Inscribed to the USS Midway Museum and signed by the author.

2010.332.001	Above and Beyond: The Aviation Medals of Honor	Tillman, Barrett	From 1918 to 1972 over one hundred American aviators (pilots and crew) from all military services received the United States' highest military decoration for "distinguishing themselves by conspicuous gallantry and courage at risk of their own lives, above and beyond the call of duty." Through a combination of interviews with the surviving fliers and in-depth research, Barrett Tillman presents the incredibly valiant and inspiring stories behind the medals and in many cases sets the "official record" straight. These accounts, which redefine heroism, feature some of the most famous airmen in history-Frank Luke Jr., Jimmy Doolittle, Joe Foss, David McCampbell, Leo Thorsness, and Patrick Brady, to name a few-and lesser-known fliers who finally get the recognition they deserve. In World War I, Lieutenants Edwin Russell Bleckley and Harold Ernest Goettler flew in the first sustained aerial resupply operation in history. To accurately drop supplies to the 77th Infantry's "lost battalion," they flew so low that German troops perched on French cliffs were firing down on them.

Object ID	Title	Author	Summary
			Second Lieutenant David Richard Kingsley, returning in a battered B-17F from a bombing run over Ploesti, Romania, in 1944, gave his parachute to a badly wounded man just before the plane went down. Over North Korea in 1951, helicopter pilot Lieutenant John Kelvin Koelsch, while rescuing a downed pilot, was shot down and captured. He refused to talk and provided only name, rank, and serial number, a procedure that would become the American code of conduct for future POWs. Major Patrick Henry Brady took such heavy fire during one day in Vietnam that he went through three Huey helicopters while evacuating fifty-two men from certain death. Half of the medal winners died earning it; most of the survivors consider themselves lucky just to be alive. Their selfless acts of true heroism deserve to be remembered. (Source: Amazon.com)
2010.333.003	Double-Edged Secrets : U. S. Naval Intelligence Operations in the Pacific during World War II	Holmes, Wilfred Jay	Captain W. J. Holmes, USN (Retired) was one of the men whose wisdom and quick thinking materially shortened the struggle for the Pacific, thus saving thousands of lives on both sides of the war. Double-Edged Secrets is the story of his intelligence service from June 1941 until the end of the war. It is the first account of these critical events to benefit from the recently liberalized American security regulations.
2010.333.004	Naval Boilers	Latham, Robert F.	U. S. Naval Academy textbook.
2010.333.006	USS Yorktown CVS-10 1959-1960 Cruise	Hale, William B. (ed.)	Pictorial account of the deployment of the USS Yorktown (CVS-10) to the Western Pacific, departing Long Beach on 3 January and returning on 26 July 1960. Deployment port calls included Yokosuka, Buckner Bay, Sasebo, Hong Kong, Subic Bay, Manilla and Pearl Harbor. The book also covers port calls made to Seattle and San Francisco in August and September of 1959,

2010.333.007	Admiral Arleigh Burke : A Biography	Potter, E. B. (Elmer Belmont)	respectively. This follows Burke's distinguished career from his early days at the Naval Academy, through his dramatic WWII destroyer exploits in the Solomons that earned him the nickname "31-Knot Burke", to his participation in the carrier operations that spearheaded the Navy's drive across the Pacific. The book also fully examines Burke's postwar service, including his unprecedented 6 year tenure as Chief of Naval Operations from 1955 to 1961, when he was a strong advocate of carrier aviation and nuclear propulsion and was a major force in developing the Navy's Polaris missile program. Awarded the Medal of Freedom, the nation's highest civilian honor, in 1977, Burke became the first living US naval officer to have a class of ships named after him, the Arleigh Burke guided-missile destroyers.
2010.333.009	Rickover : Controversy and Genius	Polmar, Norman	Rickover is a stunning examination of the life, career, controversies, accomplishments, and blunders of a man who for decades has been a well-known public figure. The authors examine, for the first time, the career of a man whose actions will shape not only tomorrow' s navy, but also the future of global strategy for the United States.

			Alameda, CA on 21 June 1966 through her next Westpac deployment commencing 19 November 1966 and ending with her return to Alameda, probably in early July 1967
2010.333.022	USS Constellation CV 64 - Westpac '77	Cook, D (ed.)	USS Constellation (CV-64) Kitty Hawk-class supercarrier. Westpac 1977 cruise. Ports of call: San Diego, CA; Pearl Harbor, HI; Subic Bay, the Philippines; Pattaya, Thailand; Singapore; Hong Kong; Pusan, Korea; Yokosuka, Japan.
2010.333.023	Victory Through Air Power	De Seversky, Alexander P.	The author of this book shows how air power on land and sea has been the one crucial and deciding factor in all the military events of the war to date, and how air power is bound to determine the final outcome of the war. His analysis of the mistakes that have so far been made in the military aviation- on both sides, and notably by the Germans- make almost fascinating reading about the war to date.
2010.333.024	Five Women I Love : Bob Hope's Vietnam story	Hope, Bob	A week before Christmas, while Santa is checking his south-only maps, Bob Hope, the knight before Christmas (and a few days after), rises from a Southern California airstrip, dips his wings in tribute to the USO and the Pentagon brass and flies west. What he brings to the GI's in Vietnam, Thailand and way stations will never be in Santa's sleigh - one-of-a-kind presents like Janis Paige, Anita Bryant, Kaye Stevens, Joey Heatherton and Carroll Baker (that's five - other names furnished on request, with purchase price of book). Five of the lovelies on any one trip is the quota. (from goodreads.com)
2010.333.025	America's Navy in World War II	Cant, Gilbert	This is an account of the service of the United States navy beginning with Pearl Harbor, covering American naval actions in the Atlantic, Pacific, and Mediterranean up to the sinking of the Chicago, off Guadalcanal, in January 1943.

Object ID	Title	Author	Summary
2010.333.026	PT 109 : John F. Kennedy in World War II	Donovan, Robert J.	"To me, it has always been one of the great war stories of all time."--Senator Edward M. Kennedy In the early morning darkness of August 2, 1943, in the waters of Blackett Strait in the Solomon Islands, the Japanese destroyer Amagiri sliced an American PT boat in two, leaving its crew for dead in a flaming sea. Over the next three days, the boat's skipper, a boyish lieutenant from Boston named John Fitzgerald Kennedy, repeatedly risked his life in an effort to summon help until he finally secured his crew's rescue. First published to wide critical acclaim in 1961, Robert Donovan's timeless classic tells the complete, harrowing story of PT 109 and her crew. This 40th anniversary edition includes a foreword from Daniel Schorr, a preface by the author recounting the circumstances of the book's creation, and an afterword by World War II naval historian Duane Hove portraying the broader context for PT boat operations in the South Pacific. Here for a new generation of readers is a compelling glimpse of the values of service and duty that characterized America during the war years, as fresh and timely now as when it was published forty years ago. "In PT 109 we see a man assailed by hunger, heat, cold, discouragement and danger rising, without dramatics or posturing, to greatness."--New York Times Book Review "A tense, tough and intelligent story of wartime adventure and heroism."--San Francisco Chronicle From the Back Cover (from Amazon.com)

			and its activities at its base in Roosevelt Roads, through it's redesignation as Utility Squadron 8 (UTRON-8) in July 1960. GMSRON-2 was on the leading edge of guided missile technology, providing services to Regulus missile-carrying submarines and providing the fleet with unmanned aerial drone services. Includes loose-leaf memorial pamphlet for LT James B. Tiller who died on duty with the squadron in July 1960.
2010.334.005	Fighting 17, The Hellcat Squadrons, VF 17 VBF	None Stated	A pictorial account of the history of Fighter Bomber Squadron 17 and its parent organization, Air Group 17 from CAG-17's reforming at NAS Alameda in April 1944 through their departure for home from the Okinawa area in June 1945. The air group trained on the west coast, at Hilo, Hawaii and at Guam before transferring to their fighting carrier, USS Hornet at a western Pacific atoll. Fighter bombing squadron 17 was formed at Guam in January 1945. Combat operations were carried out against Tokyo, The Bonin Islands/Iwo Jima, Honshu, Kyushu and along the Ryuku island chain to Okinawa where a great deal of activity took place. VF/VBF 17 also took part in the sinking of the battleship Yamato.
2010.336.001	U.S. Aircraft & Armament of Operation Desert Storm : In Detail & Scale	Kinzey, Bert	Takes a brief look at each of the U.S. fighter, attack and electronic warfare aircraft that played a major role in operation Desert Storm. Information is provided on how each aircraft was used, what units participated, and what ordnance loads were typical for each of the aircraft. Photographs taken during and immediately after the Gulf War are included to illustrate the aircraft with the markings and external stores they carried in combat.

			aircraft carrier departed Alameda, CA on 15th February to Hawaii, Guam, Subic Bay; Philippines, to Japan (Sasebo, Yokosuka), Hong Kong and arrived back in Alameda, CA on 28th September. Midway was one of three carriers ordered to the South China Sea in support of U.S. diplomatic efforts to broker a ceasefire between the Pathet Loa and the Loation Government between March and May of 1961.
2010.341.001	Marine Corps, The	Crumley, B.L.	In this Book, the author has brought to life the story of the Corps in peace and war. She has managed to convey not only the facts and deeds but also the emotions that make up the history of one of the world's finest military institutions.
2010.342.001	Aircraft Carriers at War : A Personal Retrospective of Korea, Vietnam, and the Soviet Confrontation.	Holloway, James L.	A contemporary perspective of the events, decisions, and outcomes in the history of the Cold War Korea, Vietnam, and the Soviet confrontation that shaped today s U.S. Navy and its principal ships-of-the-line, the large-deck, nuclear-powered aircraft carriers. (From Amazon.com)
2010.342.002	We Were Pirates : A Torpedoman's Pacific War	Schultz, Robert	A sailor's extraordinary experiences on an American submarine in the Pacific are candidly reported in this eye witness account of war from a torpedoman's perspective.
2010.342.003	Down To The Sea : An Epic Story of Naval Disaster and Heroism in WWII	Henderson, Bruce	This epic story opens at the hour the Greatest Generation went to war on December7,1941, and follows four U.S. Navy ships and their crews in the pacific until their day of reckoning three years later with a far different enemy : a deadly weapon typhoon. In December 1944, while supporting General McArthur's invasion of the Philippines, Admiral William 'Bull' Halsey neglected the Law of Storms, placing the mighty U.S. Third Fleet in harm's way. Drawing on extensive interviews with nearly every living survivor and rescuer, as well as many families of lost sailors, transcripts and other records from naval courts of

Object ID	Title	Author	Summary
			inquiry, ships' logs, personal letters, and diaries, Bruce Henderson finds some of the story's truest heroes exhibiting selflessness, courage, and even defiance.
2010.342.005	Fateful Rendezvous : The Life of Butch O'Hare	Ewing, Steve	This first full biography, written with the O'Hare family's cooperation and utilizing recently released Japanese war records, chronicles the short but eventful life of the American hero, Butch O'Hare, and sheds new light on his mysterious death. The authors describe in detail O'Hare's awe-inspiring feats of aerial combat and his key role in developing tactics such as the Thach Weave and the night-fighting techniques that helped defeat the Japanese.
2010.342.006	South Pacific Destroyer : the Battle for the Solomons from Savo Island to Vella Gulf	Crenshaw, Russell Sydnor	This is the story of those lean months of the Pacific War, when the fate of the Solomons was still in the balance. It is told through the experiences of the USS Maury (DD-401), her officers and her crew who were a part of the South Pacific Force throughout the period and participated in much of the action.
2010.342.007	Gators of Neptune : Naval Amphibious Planning for the Normandy Invasion	Yung, Christopher D.	It is a story of cooperation and, at times, discord between the two navies as they planned the naval portion of the Allied invasion of Normandy. With the evolution of amphibious warfare as a backdrop, the book has sufficient technical detail to satisfy the modern-day practitioner of amphibious warfare, yet it is written in a style that makes it accessible to the general public.
2010.342.008	Reaper Leader	Ewing, Steve	Foreword --Preface -- Acknowledgments --1 A Little Rogue --2 Flying in the Depression-Era Navy --3 Preparation for War --4 Pearl Harbor --5 Battle of the Coral Sea --6 "The Navy Fighter" and Fighting Squadron Ten --7 The Grim Reapers and the Battle of Santa Cruz --8 The Grim Reapers at Guadalcanal and Rennell Island --9 Air Group Five Commander on Yorktown (CV-10) --10 Task Force Operations Officer: Battle of

2011.108.002	Recognition Pictorial Manual.	War Department	WW II reconition guide of axis powers ships and aircraft.
2011.301.001	Destroyers in the United States Navy	Naval History Division	Although the Navy commissioned its first true Destroyer on November 11, 1902 (USS BAINBRIDGE, DD-1), this type of ship has a lineage which can be traced back to the early beginnings of our Navy. With the commissioning of the USS BAINBRIDGE, DLG(N) 25, the latest step in progress is marked by the Navy's leadership in science as well as in fighting spirit. Bainbridge DD-1 was 250 -ft. long, carried two torpedo tubes and two 3" guns. Bainbridge, DLG(N) 25 is 550 ft. long, and carries many anti-submarine torpedoes in a rocket launcher to give them sufficient range to work against today's nuclear powered submarines. Instead of guns, she carries two Terrier surface-to-air missile launchers — a defense against today's supersonic aircraft. Yet with all these differences, these two ships have one thing in common; the quality of the American Navy men who sail in them. GEORGE W. ANDERSON Admiral, U. S. Navy Chief of Naval Operations
2011.301.002	We Thought We Heard the Angels Sing	Whittaker, James C.	True story of the experiences of the men who, with Eddie Rickenbaker on board their aircraft, crashed in the Pacific in 1943.
2011.301.006	Small-Caliber Ammunition Guide, Volume 2	Huntington, R. T.	Designed to assist the reader in identifying military cartridges in calibers from 20 to 40 mm as to cartridge designation, country, and weapon for which the cartridges are intended.
2011.301.007	Engineman 1 & C	Naval Education and Training Command	Training manual designed for use by enlisted personnel of the Navy and Naval Reserve in preparing for advancement to Engineman First Class and Chief Engineman.
2011.301.010	Anchor, The -- Company 60-461	George, Charlie C. (ed)	'Yearbook' for Company 60-461 of the naval recruit training

2011.301.012	Panay Incident , December 12, 1937, The	Icenhower, Joseph Bryan	Recounts the events and effects of the Japanese sinking of the gunboat Panay in the Yangtze River in 1937
2011.301.013	Naval Institute Guide to Combat Fleets of the World - 2000-2001 : Their Ships, Aircraft, and Systems	Baker, A. D. (ed)	There is a hard copy located in REF. Internationally acknowledged as the best one-volume reference to the world's naval and paranaul forces, this popular Naval Institute guide is both comprehensive and affordable. Updated biennially since 1976, it has come to be relied on for its all-inclusive, accurate, and current data on the ships, navies, coast guards, and naval aviation arms of more than one hundred eighty countries and territories, including for the first time this year East Timor. Large fleets and small maritime forces get equally thorough treatment as evidenced in this new edition, which highlights major and even minor developments that could have an impact on the world scene. From orders of new patrol boats for Yemen and ship-name changes in the Georgian Navy to performance details of the British Navy's new Astute-class submarines and Type 45 destroyers, the information is easily accessed by readers wanting to keep abreast of the world's navies. A thorough indexing of material and a logical ship-typing system makes the book easy to use and allows quick comparisons between fleets. With the retirement of longtime Combat Fleets editor A. D. Baker III in 2002 and the appointment of Washington defense consultant and author Eric Wertheim as the new editor, the guide continues to present timely, authoritative information supported by hundreds of new illustrations.

Object ID	Title	Author	Summary
			The section on the Indian Navy, for example, presents new photos and line drawings of frigates in the Shivalik and Talwar classes and late-breaking information about the modified Kiev-class aircraft carrier expected to enter India's fleet. For the Chinese Navy, Wertheim provides details of new armament fits and construction of its Project 52 destroyers, and for the German Navy he offers service entry details of the new Sachsen-class Type 124 air defense frigates. Even seemingly minor changes in naval aviation are recorded, including Japan's recent decision to purchase new EH-101 helicopters. Readers can also find out the latest about the U.S. littoral combat ships and DD(X) warship programs and the Kidd-class destroyers being transferred to Taiwan. More than a hundred correspondents from around the world contributed information and illustrations to this new volume. From giant aircraft carriers and ballistic missile submarines to tugboats and launches, the characteristics and capabilities of ships large and small are reliably recorded. Complete descriptions of naval aircraft, weapons, weapons systems, and sensors are also provided along with useful commentary on organization, personnel strengths, and bases. For those who need fast access to facts about the world's navies, this single-volume naval reference is essential-and a bargain considering the wealth of material it provides. 4450 photographs. Also available in hardcover (ISBN: 1-59114-934-7). About the Author Eric Wertheim, a strategic analyst in Northern Virginia, consults to government and private industry. A columnist for Proceedings magazine since 1994, he is the coauthor of Chronology of the Cold War at Sea, among other books.

2011.302.001	Skipper : Confessions of a Fighter Squadron Commander	Winters, Hugh	Wartime exploits of VF-19 under the command of the author, Hugh Winters in 1943-44. A first person narrative, it describes the formation, training and combat experience of a fighter squadron as well as a personal account of a combat leader. Wartime exploits of VF-19 under the command of the author, Hugh Winters (Theodore Hugh Winters, Jr.) in 1943-44. A first person narrative, it describes the formation, training and combat experience of a fighter squadron as well as a personal account of a combat leader. Winters was cited with two Navy crosses. The first Cross came from his actions on Oct. 24, 1944, when he led his squadron, Air Group 19, on a strike against a Japanese fleet that resulted in damage to two battleships and four cruisers during the Battle of Leyte Gulf in the Philippines. At the same time, he supplied information about the enemy's status by flying at low levels through intense anti-aircraft fire. A day later, Capt. Winters led another strike and served as target coordinator against the Japanese fleet off the coast of Formosa. He directed the attacks that resulted in the sinking of three Japanese aircraft carriers, hanging around until all three sank, earning him his second Cross. (Reprinted from Richmond Times Dispatch, May 10, 2008).
2011.302.003	Jane's All the World's Aircraft - 1992-93	Lambert, Mark (ed	Jane's All the World's Aircraft sets the standard in aviation reference, providing exhaustive technical detail on over 950 civil and military aircraft currently being produced or under development by more than 550 companies. 			resource provides you with the ability to evaluate competitors, identify potential buyers, and business partners, and examine aircraft equipment. Each entry enables you to check key specifications for any aircraft including dimensions, performance, structure, landing gear, power plants, and armaments. Plus, with details of the world's aircraft manufacturers and their programmes, you can identify key contracts and customers. Key contents include: * Fixed- and rotary-wing aircraft * Lighter than air * Air-launched missiles * Aero-engines * First flights * Aerospace Calendar * Official records * International aircraft registration prefixes * Propeller technology (from jawa.janes.com)
2011.302.004	Blue Ghost Memoirs : USS Lexington CV-16, 1943-1945	Romanelli, Otto C.	Category: Veteran's Books US Navy History Author Otto C. Romanelli, Lt. Cdr. USNR Ret., recounts his experiences during 1943 - 45 aboard the USS Lexington "The Blue Ghost". Through numerous photographs, charts and maps his exciting journey comes to life. A wonderful personal account story. (from turnerpublishing.com)
2011.302.005	Combat Carriers : USN Air and Sea Operations from 1941	Bowman, Martin W.	From the end of World War Two to the present day, the aircraft carrier has been a potent display of the might of the US Navy. The current fleet of nuclear-powered aircraft carriers are some of the largest ships in the world, and can rightly claim to be mini cities at sea, with 7000 crew, upwards of 50 aircraft aboard and massive flight decks that would put some provincial airports to shame. Martin Bowman tells the

			story of the modern day carriers from World War Two through the Korean and Vietnam wars to the Gulf conflicts of the last two decades. Using many unpublished images, as well as interviews with pilots, crew and officers, he tells the definitive story of these floating behemoths. (from Amazon.com)
2011.302.006	Escort Carrier in World War II : Combustible, Vulnerable, Expendable!, The	Wragg, David	To the US Navy they were CVEs or carrier vessels escort. The Royal Navy called them auxiliary carriers. To crews of endangered merchantmen in the Atlantic and Arctic oceans they were heaven-sent protection. To men who manned them, they were simply Combustible, Vulnerable, Expendable! As the battle for command of the oceans gathered pace, the need for air cover against enemy aircraft and submarines brought tmprecedented demand for carriers. To meet this desperate need, over 100 vessels were converted or specially built for convoy duty. Even before the 7 December 1941 attack on Peed Harbor and despite being officially neutral, the Americans were laying down the first CVEs in their vast shipbuilding yards. In this book, David Wragg, who is firmly established as one of the United Kingdom's leading authorities on this period of maritime history, reveals the full story of these ships' crucial role and contribution for the first line. He captures the spirit of the moment as only a writer with a true understanding of the sea and those who fight on, over and under it can. The Escort Carrier in World Pk II will be enjoyed by all with an interest im naval history. (from dust jacket flap)

Includes hundreds of photos, compelling stories of life on board ship and biographical profiles of veteran sailors and airmen. The amazing stories behind this carrier and her men will fascinate readers for generations to come. (from turnerpublishing.com)
2011.302.009	Three Lives of a Warrior	Butler, Phillip	Few men have literally been blown out of the sky and lived to tell about it. If you can call being starved, beaten and otherwise tortured living. But not only did Phil Butler survive, he came out of the experience a new man...a war hero, a loving husband, a warrior for peace and justice. Now he is telling his story, a compelling tale about becoming a warrior, from the seeds of his childhood in Oklahoma, the tempering of his character as a POW for 2855 days and nights, and his conscious growth when he returned to the United States. Phil Butler's story is not only interesting, it is instructive; he defines a path for the willing and the courageous. No, a man - or a woman - doesn't have to be tortured to be a warrior and it doesn't even always help. But most people who would evolve to that higher level do so after confronting great demons and daunting tasks. Phil Butler's account of his journey is part road map, part history, and always an engaging tale. About the Author Doctor Phillip Butler is a 1961 graduate of the United States Naval Academy and a former light-attack, carrier pilot. In 1965 he went down over North Vietnam where he was captured and spent 2,855 days and nights, almost eight years, as a prisoner of war. He is a highly decorated combat veteran who was awarded two Silver

			Stars, two Legion of Merits, two Bronze Stars and two Purple Heart medals. After his repatriation in 1973 he earned a PhD in sociology from the University of California at San Diego and became a Navy Organizational Effectiveness consultant. He completed his Navy career in 1981 as a professor of management at the Naval Postgraduate School in Monterey. Phil then founded Camelot Enterprises, a management seminar, professional speaking and consulting services business. As a professional keynote speaker he told his dramatic and inspirational story of how POW's were able to survive and succeed. As an organizational development consultant he specialized in team building, leadership development, interpersonal skills, strategic planning, organizational re-structuring and other topics. In 2000 he retired as a traveling professional speaker and consultant. He has been a constant community service volunteer since his repatriation from Vietnam, having served on more than a dozen boards, some of which he chaired. He and his wife Barbara have been volunteer docents at Point Lobos State Reserve for 20 years. He has also been a 20 year peace and social justice activist with Veterans for Peace, having served as their national board chair. He currently chairs the Peace Coalition of Monterey County, a coalition of 21 peace and social justice organizations in Monterey County. He is married and lives in Monterey with his wife, Barbara Baldock, where he enjoys golf, reading and playing his piano. (from Amazon.com)

2011.302.023	American Secret Projects : Bombers, Attack and Anti-submarine Aircraft, 1945 to 1974	Buttler, Tony	The Secret Projects series is now well established with both aviation historians and modelers. American Secret Projects: Bombers, Attack and Anti-Submarine Aircraft 1945–1974 describes the important area of post–World War 2 bomber development in the United States. During the period to the 1970s, the U.S Air Force operated several classes of bomber—heavy long-range types for strategic operations, medium bombers, and fighter bombers for interdiction and ground support. The U.S. Navy had its own series of attack aircraft and bombers for delivering nuclear weapons, while the antisubmarine aircraft was another area to be examined in considerable depth. As a superpower, America was also able to look at some of the more unusual approaches in the creative process—for example, bombers propelled by nuclear propulsion. Many of the aircraft that entered service or flew only as prototypes resulted from design competitions involving many other proposals that for one reason or another, never left the drawing board. About the Author

Object ID	Title	Author	Summary
			Tony Buttler joined High Duty Alloys Ltd, Redditch in 1974 where he spent nineteen years as a metallurgist testing titanium and aluminum forgings for the aircraft and defense industries. A growing interest in archives and historical records saw him take a master's degree in library and information science at Loughborough University before becoming a full-time aviation historian. Since 1995 he has had numerous articles published by most of the major aviation journals, and has written several of the well-known book in the Warpaint series. For Midland Publishing he has written three acclaimed volumes in the British Secret Projects series. (from Amazon.com)

2011.302.025	Fly Navy : The View from the Cockpit, 1945-2000	Manning, Charles K.	book review by Fred Lane Manning, C. (Ed.) Fly Navy: The view from the cockpit 1945-2000. Leo Cooper: Barnsley. 2000. 224 pp incl. index and photos. US\$61.42. The 2800 members of the Royal Navy's Fleet Air Arm Officers Association were invited to contribute recollections and photographs of their notable flying experiences between the years 1945 and 2000. A total of 113 responses are published in this book. Professionally edited, the reports make a very colourful collation of carrier- and shore-based flying, in war and peace. It is sobering to note that the year 2000 Fleet Air Arm Roll of Honour carried the names of 915 men who lost their lives in RN flying operations since 1946 (p. xiii). The book does not wail about the dead. It is about the survivors.

Object ID	Title	Author	Summary
			Each chapter describes operations relating to a specific decade and each carries a list of aircrew numbers killed during that period. Clearly, a proper analysis requires comparison with data such as the total number of hours flown that year by the RN, whether nasties were shooting back, and other operational factors, but the raw scores suggest the 1950s were the most lethal, with an average of 33.5 pilots plus 10.8 aircrew and others killed each year. The 1950s saw the entire nature of naval flying change, with the introduction of jet fighters, air-to-air missiles, turboprop aircraft and helicopters. It also saw the introduction of the angled deck, steam catapult and mirror deck-landing sight. Fighter weights more than quadrupled, from an 8500 lb (3850 kg) Seafire in 1950 to a 40,000 lb (18,144 kg) Scimitar in 1958. The Seafire trundled in at 90 knots. The Scimitar hit the wires at 135 knots. It required a number of years to install the angled deck on all RN carriers, but meanwhile, until the mirror replaced the LSO, the entire landing signals system changed from "British" to "American" around 1950. This meant that, for instance, the old British "Go Lower" signal, answered reflexively by experienced pilots, now meant the opposite: "You are Low". Late finals is no time for cognitive deliberations. Not all the extensive retraining was successful. Then, unlike the USN, the RN discarded the LSO entirely when they introduced the mirror. The RAN followed the RN and made do without LSOs, until Skyhawks and Trackers arrived in 1969. Personal reports The heart of the book, however, lies in its very personal reports. For instance, what do you do if the "spectacular, unsafe and unpopular" RATOG doesn't fire when you press the tit in a

Object ID	Title	Author	Summary
			Sea Fury? If you are quick enough, you throttle back and apply the brakes. In most instances the aircraft slowed to graceful walking pace before it swan-dived off the bow (p 38). Then there are a number of hair-raising stories about accidents that led to overcoming novel problems, like engine failure in Wyverns due to fuel starvation off the catapult, to pitch-up and stall problems in Buccaneers due to slow acceleration after catapulting (p 59). Ejecting could ruin your whole day. Worse, one pilot pointed his sick Seahawk seawards off Scotland and deliberately ejected over land, only to find that his aircraft doubled back to crash ashore while a strong offshore wind blew him out to sea (p 68). (from navalofficer.com.au)
2011.302.026	Vought Sikorsky OS2U Kingfisher	Darling, Kev	Vought-Sikorsky OS2U Kingfisher observation scout floatplane
2011.302.027	OS2U Kingfisher	Bell, Dana	This is the third book by Classic Warships in the Aircraft Pictorial series and the second book authored by Dana Bell. Like his previous book on the Vindicator this one is packed full of useful information, photos, and drawings. Mr. Bell has really done his homework as the book as this book is a treasure trove of information. Many of the photos come from the manufacturer and document all kinds of details of the aircraft. The photos are of the usual high resolution quality that we have come to expect from Classic Warships Publishing. They show interior and exterior details in great clarity. Almost enough to scratchbuild a large scale model of one. Certainly enough to superdetail one. There are 72 pages in the standard Aircraft/Warship Pictorial soft cover format in the 72 pages. 71 B&W and 8

Object ID	Title	Author	Summary
			color. There are also drawings and illustrations. Some like the color marking guide shown below even include dimensions of the lettering. Not just for the aircraft modeler, ship modelers will love it too as there are plenty of photos showing the Kingfisher in it's natural environment. Photos show them onboard various ships and being handled by the many different cranes types used on the US Navy Cruisers and Battleships that used them. There are even photos showing how they captured the floatplane on their towed sleds. This is Aircraft Pictorial 3 - OS2U Kingfisher by Dana Bell. Published by Classic Warships Publishing (ISBN 978-0-9823583-4-2) with a USA Retail price of only \$18.00. A fantastic price for anyone interested in these work-horses of the US Navy scout plane fleet. You don't have to be a modeler to appreciate this book, anyone who is interested in Naval Aviation and history will enjoy it too. (from modelwarships.com)
2011.302.028	Naval Institute Almanac of the U.S. Navy, The	Cowden, Anthony	The United States Navy is a complex, multidimensional organization whose operations are constantly adapting to changes in world events. Like other almanacs that are used for ready reference and a means of staying current, this almanac is designed to demystify and update the Navy for naval personnel and civilians alike. The information included here explains the Navy's current organization, leadership, ships, aircraft, weapon systems, naval bases, and air stations, and serves as a handy guide to Navy-related Web sites. Readers will also find articles on the war on terrorism, Operation Iraqi Freedom, and modern naval strategy, among other contemporary topics. A separate section covers the Navy's
