			history and traditions, its core values, the Sailor's Creed, and naval hymns and anthems. Compiled by a former Navy liaison officer to the Joint Staff and battle watch captain in the Navy Operations Center, this fact-laden reference will prove invaluable to service personnel, civilian employees of the Navy Department, journalists writing about naval matters, and everyone else having an interest in the U. S. Navy. "This great overview of our current Navy belongs in every seabag and in every library. No matter how extensive your collection of reference volumes, this almanac will fill a niche. Seasoned veterans will use it as a guide to what is changing (and as a reminder of what is changeless), and new recruits will be exposed to the fascinating diversity of the Navy's mission in today's dangerous world. Anthony Cowden and the Naval Institute team have done a first-rate job in providing insight into previously neglected areas of our ever robust and dynamic Navy." — John Hagan, MCPON (1992-98), USN (Ret.) ISBN 978-1 59 14- 31-1 Cover design by Teresa Bonner Printed in the U.S.A. 9 781591 14131 (from back cover)

2011.302.029	Sea Service Medals: Military Awards and Decorations of the Navy, Marine Corps, and Coast Guard	Borch, Frederic L.	"Sea Service Medals" is the first and only complete historical examination of all the personal awards, decorations and medals that may be awarded to Navy, Marine Corps and Coast Guard personnel for heroism, achievement and service. As a comprehensive history of all awards and decorations of the United States' three sea services, this book serves as a valuable guide to the rich traditions of the Navy, Marine Corps and Coast Guard. It provides little-known historical information on the background and development

Object ID	Title	Author	Summary
			of each award and decoration, along with details of its design and award criteria. The authors, both of whom retired from the Armed Forces, are experts in the history of U.S. awards and decorations. The decorations examined include well-known awards for combat heroism such as the Navy Medal of Honor, the Navy Cross, and the Silver Star. Non-combat heroism awards such as the Navy and Marine Corps Medal and Coast Guard Medal are also discussed. All decorations and medals for achievement and service are examined, ranging from the Navy and Coast Guard Distinguished Service Medals, the Legion of Merit, and the Meritorious Service Medal to the Navy and Marine Corps Commendation Medal, Coast Guard Achievement Medal, and Combat Action Ribbon. Fifty full color photographs of sea service awards, including illustrations of never before-published rare Navy Medals of Honor, provide context for this unique history.
2011.302.030	Naval Institute Guide to World Naval Weapon Systems, The - 2006	Friedman, Norman	Long recognized as the most comprehensive reference work available on the subject, this guide remains the only complete reference to the weapons currently in service in ships, submarines, and naval aircraft around the world. It is the only book of its type to explain the transformation of the U.S. Navy into a network-centric force, a transformation that has had immense consequences for choices of tactics, weapons, services, and the systems coordinating them. This guide also offers unparalleled coverage of the weapons, sensors, and command systems of the world's navies, both those the U.S. Navy works with and those it may have to fight. Written by one of the world's leading naval analysts, the book describes the weapons and systems in detail and

Object ID	Title	Author	Summary
			examines the crucial relationship between them. Completely rewritten and newly illustrated, this edition makes a special effort to provide a clear and precise account of how weapon technology has changed to meet the new tactical and strategic challenges facing international naval forces today. Cutting-edge information is found throughout, enhanced by many new and rarely seen photographs and drawings. For example, this volume offers an unusually full account of the "system of systems" under development by the U.S. Navy and the other services to fight future limited regional wars. That initiative includes the changing role of space resources as they affect war on, over, and under the sea. This edition also benefits from the flood of material from Russia, whose weapons and systems are now owned and operated by numerous countries and are likely to be sold to many more. The guide provides uniquely detailed coverage of weapons developed and deployed in the Far East, an area that promises to be the liveliest scene of naval action in the future. Extensive sections are devoted to explaining the intricate workings of sensors and command systems. No other book, or even set of books, offers this sort of material in such accessible form. Its detail and completeness are backed by the authority of a long established professional expert. For the most complete and up-to-date information about weapons in every navy in the world, this is the essential resource - a work that, in effect, can serve as a textbook of modern naval technology. About the Author Norman Friedman is the author of dozens of books, including Terrorism, Afghanistan, and America's New Way of War and Seapower as Strategy: Navies and National Interest. A resident of New York, he lectures

2011.302.031	First Team : Pacific Naval Air Combat from Pearl Harbor to Midway, The	Lundstrom, John B.	Ace fighter pilots like Jimmy Thach and Butch O'Hare are justly renowned for their daring exploits in the perilous early months of the Pacific War when the US Navy carrier fighting (VF) squadrons amassed a remarkable combat record in the face of desperate odds. Yet, exactly how these skilled aviators and their squadron mates -- called the "first team", in keeping with athletic jargon popular at the time -- overcame the odds to help turn the tide of war has, until now, remained little known. With this comprehensive operational history of carrier-based air warfare, their heroic feats can at last be closely examined.
2011.302.032	Jane's Pocket Book of Naval Armament	Archer, Dennis Henry Ross	Introduction: In compiling this book I have attempted to provide the reader with a convenient source of information on most of the surface and submarine weapons currently or imminently in naval service or available for purchase by approved customers. Apart from omissions resulting from inadvertence or ignorance, there are three categories of weapon which I have excluded altogether and two others in which coverage has been deliberately restricted. The excluded categories are aircraft armament, mines and man-portable weapons. From the wide range of airborne weapons it was tempting to select for inclusion those that have been developed specifically for naval use: on reflection, however, it seemed that there was no valid reason for preferring them to functionally similar weapons that happen also to be used against targets on land by land-based aircraft. Since to

Object ID	Title	Author	Summary
			include every weapon that is or might be carried by naval aircraft would unreasonably increase the size and dilute the contents of the book, the only reasonable course appeared to be to omit them all. Mines present a problem of a different kind. That mine warfare is an important part of naval warfare is undeniable; and if one chooses to look on an acoustic or magnetic mine laid by a ship, submarine or aircraft as a very slow homing torpedo, the logical case for including such weapons in a book of this kind is strong. Unfortunately, while it is possible in some instances to obtain details of dimensions and general characteristics of mines that happen to be many are made in state-controlled factories from which it may be difficult to obtain any information at all. Moreover, the really important information, that concerning mine operating systems and the ways in which they can be countered, is understandably not available for publication. Much the same is true of one of the two categories whose share of the book has been restricted. On older and smaller craft, and notably on those that never venture far from the shore, there is to be found a great miscellany of weapons that have little relevance to the broad picture of naval armaments. Some of these are converted army weapons; others are rare survivors from an earlier era. For many such devices identification and the subsequent discovery of performance characteristics present problems which are out of keeping with the value of the information ultimately obtained. Among current weapons there are no deliberate omissions from the extensive list of cannon and guns having calibers of more than 30 mm. Below this caliber some small weapons and especially some varieties of mounting for

Object ID	Title	Author	Summary
			widely deployed weapons have been omitted because operationally the weapons are so much alike even though they may differ widely in superficial mechanical detail.

2011.302.041	Fly Navy : Discovering the Extraordinary People and Enduring Spirit of Naval Aviation	Townley, Alvin	Review Praise for Fly Navy "In Fly Navy, author Alvin Townley takes readers on an exhilarating and revealing flight into the world of U.S. naval aviators....More than a mere history of Navy flight, Fly Navy is an exploration of the heart and soul of naval aviation."

Object ID	Title	Author	Summary
			—Richard G. Latture, editor-in-chief of Naval History magazine "Flying has always captured the human imagination and, as we celebrate the 100th anniversary of naval aviation, Alvin Townley's Fly Navy crystallizes that imagination into inspiration. From the first sea-based flight through all of our nation's battles in the twentieth and twenty first centuries to the farthest reaches of man into space, Townley weaves a compelling story of the actions and lives of the men and women who make up the naval aviation legacy." —Vice Admiral Tom Kilcline Jr., commander of Naval Air Forces, 2007–201 "In this year of the 100th anniversary of naval aviation, Fly Navy gives the reader snippets of the colorful history of the exploits of naval aviators and naval aviation's importance to the United States this last century." —Captain James A. Lovell Jr., commander of Apollo 13 "With fascinating insight into the seldom seen parts of naval aviation, Fly Navy illustrates the profound sense of honor and duty found among the men and women who serve, from the mechanics to the fighter pilots and everyone in between. Alvin Townley's exquisite storytelling brings their stories to life and creates a book you can't put down. Fly Navy is a thrilling, moving reminder of what makes America great." --Gregory A. Freeman, author of The Last Mission of the Wham Bam Boys: Courage, Tragedy and Justice in World War II and Troubled Water: Race, Mutiny and Bravery on the USS Kitty Hawk "The spirit of naval aviation resides in the colorful

Object ID	Title	Author	Summary
			characters who share the common bond of gold wings and the excitement of aerial adventures from the sea. Fly Navy opens a window to this romantic, dedicated, and occasionally irreverent spirit." —George "Elwood" Dom, former TOPGUN instructor and commanding officer of the Blue Angels "For real-world adventure and excitement surrounding people from all backgrounds, income and education, and to learn lessons that will stick for life, this book is on-target."--The Washington Times Praise for Alvin Townley's Previous Books "Inspirational." —Secretary of Defense Robert M. Gates on Legacy of Honor "A compelling story about a new generation and America's future." —NFL MVP Peyton Manning on Spirit of Adventure Product Description Top Gun was only part of the story. Fly Navy delves beyond the Hollywood image to reveal the true mettle and genuine story of the elite men and women of naval aviation. For one hundred years, the U.S. Navy's aviators and crews have made the difference on military and peacetime missions around the world. Their unparalleled skill, preparation, and everyday dedication have paid off when it matters most: when lives are on the line. Together, these men and women—officers and enlisted personnel, past and present—have protected freedom, served their country, and forged a legacy of valor like no other. In this landmark book, Alvin Townley takes readers on an adventure around the world and across generations as he

Object ID	Title	Author	Summary
			goes behind the scenes of naval aviation. From the skies over the Arabian Sea to the jungles of Southeast Asia to carriers patrolling the vast Pacific, he uncovers incredible stories of service members who survived weeks adrift at sea, made midnight rescues in deadly storms, crash-landed behind enemy lines, and found themselves in situations where their exceptional training and focus were the only things standing between life and death. Filled with inspiring personal accounts of courage, camaraderie, and sheer perseverance, Fly Navy pays tribute to the extraordinary individuals who have built naval aviation into the revered force it is today—and will remain tomorrow. 2011.302.042	Vought Corsair Special Edition The First True Fighter Bomber	Westell, Freeman	A pictorial history of the F4U Corsair.
2011.302.043	Fly Navy : Celebrating the First Century of Naval Aviation	Hildebrandt, Erik	A book commemorating the centenary of naval aviation, primarily through the author's photographs. Most photos are of later vintage aircraft. Chapters based primarily on missions of naval aviation and associated platforms.
2011.302.044	Flight of the Intruder	Milius, John (director)	VHS also available: 2004.130.019. Danny Glover plays Commander Frank Camparelli, the battle-Hardened squadron leader of an aircraft carrier during the Vietnam War. Brad Johnson is pilot Jake Grafton, a disillusioned young renegade looking for payback. Willem Dafoe is Cole, the cynical, hell-bent bombardier Grafton recruits to fly an unauthorized mission behind enemy lines. The target: a missile depot in Hanoi. The plane: the A-6 Intruder, a low-altitude bomber with no defensive weapons. The risk: court-martial at the hands of Commander Camparelli ... if they live to return. (Source: back of slipcase)
2011.302.047	Unmanned Combat Air Systems	Friedman, Norman	An indepth survey of world

Object ID	Title	Author	Summary
			unmanned combat aircraft and the changing tactical environment necessitating the development of these vehicles. An analysis of the US Navy's Unmanned Combat Air System (UCAS) development of the X-47B, a carrier-capable unmanned aircraft.
2011.302.048	Debrief A Complete History of U.S. Aerial Engagements 1981 to the Present	Brown, Craig	Every aerial engagement that has resulted in a "kill" since the end of the Vietnam War is chronicled in this book; most told by the pilots involved.
2011.302.049	Grumman JF/J2F Duck	Ginter, Steve	The JF/J2F "Duck" was one of those military workhorses moving around in the background before and during WWII which did a tremendous job but never got the publicity of its' more glamorous teammates. Some said the Duck could be more aptly named the "Ugly Duckling". Be that as it may; when no other bomber could be found, it carried bombs; when no other transport could be found, it transported; when no other photo plane could be found, it photographed and when no other rescuer could be found, it rescued. When it came to "Utility Craft", the JF/J2F was the definitive. (from ginterbooks.com)
2011.302.050	Bell XFL-1 Airabonita	Thomason, Tommy H.	The Bell XFL-1 Airabonita was a experimental shipboard interceptor aircraft developed for the US Navy. It was similar to and a parallel development of the land-based P-39 Airacobra, differing mainly in the use of a tail wheel undercarriage in place of the P-39's tricycle gear. It first flew on May 13, 1940. Only one prototype was manufactured BuNo 1588. (from ginterbooks.com)
2011.302.051	USN/USMC Two-seat Skyhawks: TA-4F, EA-4F, TA-4J, and OA-4M	Ginter, Steve	Almost from the very beginning, Douglas had suggested to the Navy that a two-seat version of the Skyhawk would be useful, both as a trainer as well as for some types of combat missions where a second pair of eyes might be useful. These requests had always been turned down by the Navy out of budgetary

Object ID	Title	Author	Summary
			considerations. However, in 1964 the Navy changed its mind and convinced the Department of Defense to allocate money for the building of two prototypes of a two-seat Skyhawk. One of the more convincing arguments for the utility of a two-seat Skyhawk trainer was that those single-seat Skyhawks then being used for stateside training could be released for combat duty in Vietnam. (from ginterbooks.com)
2011.302.052	Walk Around F4U Corsair	Doyle, David	The F4U Corsair was arguably the best piston-engine carrier-borne fighter ever produced. Designed in 1938 and first flown in 1940, the Corsair remained in production until 1953, long after many of its contemporaries had been rendered obsolete. Three firms - Vought, Goodyear, and Brewster - manufactured the numerous versions and sub-variants of the Corsair. This book closely examines three of the most notable variants, the F4U-1D, -4, and -5, as well as selected sub-variants, through detailed color photographs of the most painstakingly restored examples existent. In addition to detailed line drawings and color profile illustrations, this volume is packed with over 200 photographs, including spectacular aerial shots and detailed photos of the legendary, inverted gull-wing fighter. Doyle; 80 pages. SS5565 \$18.95 (from squadronsignalpublications.com)
2011.302.053	F-14 Tomcat Story, The	Holmes, Tony	Designed to improve on the F-4 Phantom's air combat performance, the Tomcat entered service with the U.S. Navy in 1974, replacing the F-4 Phantom II. The winning Grumman design reused the TF30 engines from the F-111B, though the Navy planned on replacing them with the F401-PW-400 engines then under

Object ID	Title	Author	Summary
			development by Pratt and Whitney for the Navy. Though lighter than the F-111B, it was still the largest and heaviest U.S. fighter to ever fly from an aircraft carrier. The F-14 had its first kills on August 19, 1981, over the Gulf of Sidra and went on to serve in Operation Desert Storm, Operation Enduring Freedom over Afghanistan, and Operation Iraqi Freedom. The only F-14 loss in combat was when a crew was shot down over Iraq, the pilot rescued by Special Forces and the RIO held as a POW until the end of the war. This book tells the story of this fascinating aircraft which still serves in Iran's Air Force today. About the Author Tony Holmes is an aviation expert and the author of Jane's U.S. Military Aircraft, Jane's Vintage Aircraft Recognition Guide, and Warbird Legends. (from Amazon.com)
2011.302.054	Midway Campaign, The, December 7, 1941- June 6, 1942	Greene, Jack	A history of WWII in the Pacific beginning with the Japanese, American and Commonwealth situations prior to Pearl Harbor. Includes chapters on the major battles up to and including The Battle of Midway. Chapter X describes "The Early Carrier Raids".

2011.302.059	U.S. Navy UAVs in Action	Neubeck, Ken	The development of unmanned aerial vehicles actually predates the development of piloted aircraft. Although manned aircraft more than overtook the unmanned variety in importance throughout the 20th Century, unmanned aerial vehicles or UAVs are now poised to become a key component of air warfare. UAV evolved extensively and saw extensive action during Operation Desert Storm - the war against Iraq in 1991 - and since then the floodgates have been opened. The US Navy sees 2 main advantages in using UAVs - endurance and cost effectiveness. UAVs can stay aloft 2 or 3 days and ground operators can be rotated on a regular schedule; they also use less fuel thus reducing operating costs. Newer roles, such as bombing, are also being considered for UAVs, some of which will be equipped to carry a weapon pod or bomb rack, a valuable attribute over high-risk battlegrounds. Illustrated with 170 photographs, plus color profiles and detailed line drawings; Neubeck; 64 pages. SS1217 \$14.95 (from squadronsignalpublications.com)
2011.302.060	Consolidated PB2Y Coronado	Hoffman, Richard	The PB2Y Coronado was a large flying boat patrol bomber designed by Consolidated Aircraft. After deliveries of the PBY

Object ID	Title	Author	Summary
			Catalina, also a Consolidated aircraft, began in 1935, the United States Navy began planning for the next generation of patrol bombers. Orders for two prototypes, the XPB2Y-1 and the Sikorsky XPBS-1, were placed in 1936; the prototype Coronado first flew in December 1937. After trials with the XPB2Y-1 prototype revealed some stability issues, the design was finalized as the PB2Y-2, with a large cantilever wing, twin tail, and four Pratt & Whitney R-1830 radial engines. The two inner engines were fitted with four-bladed reversible pitch propellers; the outer engines had standard three-bladed feathering props. (However, note the three-bladed prop on the inner engine in the picture at the left.) Like the PBY Catalina before it, the PB2Y's wingtip floats retracted to reduce drag and increase range. 192 pages of history, drawings and photos. ORDER NUMBER - NF85 \$39.95 ISBN 0-942612-85-X (from ginterbooks.com)
2011.302.061	Birds of Prey: Predators, Reapers and America's Newest UAVs in Combat	Yenne, Bill	Although primitive unmanned TV-guided airplanes were used in combat during World War II, it is only recently that these machines have matured into the most significant new method of aerial combat since the beginning of contemporary warfare. The fact that onboard human pilots are no longer needed for these aircraft to carry out their deadly missions is fascinating for military enthusiasts and aviation historians alike. These remotely piloted vehicles are now re-writing the book on modern aerial surveillance and close air support. Delivering their lethal payloads with surgical precision, propeller-driven and jet-powered remotely piloted

Object ID	Title	Author	Summary
			aircraft are guided by satellite, and flown by human operators located halfway around the world in air-conditioned trailers, isolated from the hostile combat environment of the aircraft themselves. While this book also covers the history and development of early-unmanned aerial vehicles, the focus is on all the latest impressive technology used in today's most modern remotely piloted combat aircraft. Review It is a book that I have to say exceeded my initial expectations by quite a bit. It is interesting, timely and a book that I fully believe every aviation enthusiast should read. - --Modeling Madness, reviewed by Scott Van Aken, September 2010 This title is a great read and addition to a modeling research library. - --IPMS, reviewed by Rob Benson, October 2010 This is a fascinating book, which describes not just the aircraft but also the backup necessary to make these systems work. --- Model Aircraft Monthly, December 2010 ...this excellent book is one of the first really useful histories of the UAV, with a large portion devoted to programs that are now in development. - --Scale Aviation Modeller, December 2010 (from Amazon.com)

			airships, and ships of the interwar period. The critical factors that shaped Naval Aviation after World War I-- naval treaties, fleet tactics, government programs, leadership and organization, as well as the emergence of Marine Corps and Coast Guard aviation--are discussed in detail"-- Provided by publisher.
2011.302.074	Fleet Air Arm Carrier War : The History of British Naval Aviation	Darling, Kev	This is the story of British naval flying from aircraft carriers, from its conception in World War One to the present day. It includes the types of aircraft and the men who flew them, the carriers and the evolution of their designs, the theatres of war in which they served and their notable achievements and tragedies. It traces navy flying from the early days of the biplane, through the rapid developments during World War Two to the post-war introduction of jet-powered flight. The British inventions of the angled flight deck and later vertical landing jets revolutionised sea warfare and allowed the carrier to play a vital part in many recent land wars when naval aircraft flew in support of Allied land forces -- Publisher's website.
2011.302.075	World War One Aircraft Carrier Pioneer : The Story and Diaries of Captain JM McCleery RNAS RAF	Warner, Guy	Jack McCleery was born in Belfast in 1898, the son of a mill owning family. He joined the RNAS in 1916 as a Probationary Flight Officer. During the next ten months he completed his training at Crystal Palace, Eastchurch, Cranwell, Frieston, Calshot and Isle of Grain, flying more than a dozen landplanes, seaplanes and flying boats, gaining his wings as a Flight Sub-Lieutenant. In July 1917 he was posted to the newly commissioning aircraft carrier HMS Furious, which would be based at Scapa Flow and Rosyth. He served in this ship until February 1919, flying Short 184 seaplanes and then Sopwith 1.50 Strutters off the deck. He also flew a large number of other types during this time from shore stations

Object ID	Title	Author	Summary
			at Turnhouse, East Fortune and Donibristle. He served with important and well-known naval airmen including Dunning, Rutland (of Jutland) and Bell Davies VC. He witnessed Dunning's first successful landing on a carrier flying a Sopwith Pup in 1917 and his tragic death a few days later. He also witnessed the Tondern raid in 1918, the world's first carrier strike mission. He took part in more than a dozen sweeps into the North Sea by elements of the Grand Fleet and Battle Cruiser Fleet. He carried out reconnaissance missions off the coast of Denmark, landing in the sea to be picked up by waiting destroyers. He witnessed the surrender of the High Seas Fleet. Promoted to Captain, he acted as temporary CO of F Squadron for a time post-war. (from dust jacket flap)
2011.302.076	Panthers Over Korea	Schnitzer, George	Join the author, fresh from earning his wings, as he begins his short operational training, learning all about flying the Grumman F9F-2 jet fighter. There is little time for training before deployment aboard the USS Antietam. Carrier Air Group 15 soon will meet the enemy. The grind of combat flying becomes quickly apparent. The enemy gunners try to destroy the fighter-bombers with multiple anti-aircraft artillery installations while trying to stop the flow of supplies. For the jet pilots, it is not only the enemy flak that is faced day after day, but also the additional difficulty of operating jets off the World War II carrier. The flights are either boring as hell or suddenly hellish as the enemy's guns' tracer shells chase airplanes. No matter what, every flight ends with the split-second timing required to land aboard the carrier's short flight deck. GEORGE SCHNITZER was

Object ID	Title	Author	Summary
			awarded his Navy wings on January 31, 1951, and joined a recalled reserve squadron VF-831 flying the Grumman F9F-2. In October 1951 he flew his first combat mission in the Korean War from the USS Antietam. Deployed in January 1953 with VF-153, he flew on 161 missions, ending in July 1953. (from back cover)
2011.302.077	Aircraft Carriers	Taylor, Michael	A floating airbase? A seagoing city? The most versatile warship ever invented? A modern aircraft carrier is all these things, and more. The United States has 14 active aircraft carriers throughout the world's oceans — each is home to up to 90 planes and 6,000 officers and men. "Aircraft Carriers" takes you below decks, through the tense moments of aircraft launching, and onto the attack with Tomcats, Hornets and Harriers. (from back cover)
2011.302.078	Battle History of the United States Military, The, Vol. 1 - The Battle History of the United States Marines	Lou Reda Productions	Compendium of America's five major military branches - Navy, Marines, Army, Air Force and Coast Guard, and the great battles they fought on land, sea, and air. The DVDs cover America's military development from its earliest Coast Guard days to the technological wonders of the Gulf War. Set includes: Vol. 1 - The battle history of the United States Marines. Includes: Pageantry of the Corps.and U. S. Marine Corps Heraldry. Vol. 2 - The battle history of the United States Navy. Includes: U.S. Navy Heraldry. Vol. 3 - The battle history of the United States Army. Includes: U.S. Army Heraldry. Vol. 4 - The battle history of the United States Air Force. Includes: U.S. Air Force Heraldry. Vol. 5 - The battle history of the United States Coast Guard. Includes: U.S. Coast Guard

2011.302.079	Adrift : Rescues After The Battle of Midway	Kernan, Alvin	Heraldry. Book discusses the rescues of downed fliers following the Battle of Midway as well as the plights of various individuals, mainly those from the carrier USS Hornet (CV-8). USS Enterprise (CV-6) USS Yorktown (CV-5)
2011.302.080	Rise and Fall of the Japanese Imperial Naval Service	Edwards, Peter J.	Book describes people, events, ships and aircraft that shaped the Japanese Air Service from its origins in the late 19th century to its demise in 1945. The formative years began when a British Naval Mission was established in Japan in 1867 to advise on the development of balloons for naval purposes. After the first successful flights of fixed-wing aircraft in the USA and Europe, the Japanese navy sent several officers to train in Europe as pilots and imported a steady stream of aircraft to evaluate.
2011.302.081	Japanese Naval Air Force Fighter Units and Their Aces, 1932-1945	Hata, Ikuhiko	This book is a companion volume to Japanese Army Air Force Fighter Units and Their Aces, 1931-1945, published by Grub Street in 2002. As such it also represents a major updating and rewriting of Messrs Hata's and Izawa's earlier book of similar title, published in the USA some 20 years ago. The book commences with a comprehensive account of the operations of navy fighter units throughout the period under review. This is followed by individual sections detailing the history and achievements of each unit involved, be it land-based or aircraft carrier-based. A major section then provides biographical details regarding all pilots claiming eight or more aerial victories.
2011.302.082	Vought F4U Corsair : A Comprehensive Guide, The	Morrissey, Rafe	144 pages, color and black/white photographic illustrations, 28 color profiles (side view), 1 page with tail and wing view, line drawings, 1/48 scale plans and section on modelling the F4U. The Corsair remains one of the most distinctive and popular aircraft of World War II, and its

Object ID	Title	Author	Summary
			unique inverted gull wing design combined with the colourful characters of some of the aces who gained fame flying it in combat has added to its mystique. In addition, the Corsair was used effectively not only by the United States Navy and Marines, but also saw distinguished service in the Fleet Air Arm and the Royal New Zealand Air Force. Thus the Corsair has a multi-national appeal making it one of the ever-popular aviation subjects. (from Amazon.com)
2011.302.083	Vought F-8 Crusader	Paloque, Gerard	When it built the Crusader, the US Navy's first supersonic aircraft, Vought repeated the success it had had with the legendary WWII fighter, the F4U Corsair. 1250 examples were built. This fighter with its unusual variable incidence wing, made its maiden flight in March 1955 and equipped more than seventy Navy and Marine Corps squadrons during its thirty year career. Used in combat as early as the autumn of 1962 during the Cuban missile crisis, the Crusader distinguished itself during the first part of the Vietnam War in which it scored eighteen confirmed kills, more than half of the US Navy's total of kills for the whole of the conflict, earning it the unofficial title of 'MiGMaster'. Replaced gradually by more effective fighters like the F-4 Phantom II and the F-14 Tomcat, the Crusader, nicknamed the 'Last Gunfighter', finished its career in the United States in the Reserve units or specializing in photographic reconnaissance at the end of the eighties. France, the only export client except for the Philippines,

Object ID	Title	Author	Summary
			had Crusaders specially designed to operate from its small aircraft carriers, and the Ae'ronavale's last 'Crouze', and thereby the last F-8 in the world, was withdrawn from service in October 1999.
2011.302.085	North American FJ-3/3M Fury	Ginter, Steve	The North American FJ-2/-3 Fury were a series of swept-wing carrier-capable fighters for the United States Navy and Marine Corps. Based on the United States Air Force's F-86 Sabre, these aircraft featured folding wings, and a longer nose landing strut designed to both increase angle of attack upon launch and to absorb the shock of hard landings on an aircraft carrier deck. Although sharing a U.S. Navy designation with its distant predecessor, the straight-winged FJ-1 Fury, the FJ-2/-3 were wholly different aircraft. The FJ-4 Fury was a complete structural redesign of the FJ-3. 192 pages, over 210 photos, 44 pages of illustrations, 2 pages of models colored front , with 3 colored photos on the back cover, Squadron History and Patches. (from ginterbooks.com)
2011.302.086	Glorious Flattops, The	Hoyt, Edwin Palmer	In San Francisco Bay on a clear day in January 1911, an airplane landed aboard a ship for the first time. The plane was small and fragile. Its landing platform was of wooden planks hastily nailed to the deck of the battleship U.S.S. Pennsylvania. The landing and the takeoff were a success, but the Navy could see no useful future for the airplane. Ten years later General Billy Mitchell sank a derelict battleship with bombs from, an airplane. Finally, two experimental aircraft carriers were built by the U.S. Navy, the Lexington and Saratoga, converted from cruisers.

Object ID	Title	Author	Summary
			With the start of World War II the bombing of ships became common strategy and the aircraft carrier had become a necessity to the navies of England, Germany, Japan and America. The huge, vulnerable flattops became all important. Protecting them, maneuvering and using them determined the outcome of naval battles in the Atlantic and Pacific. Names such as Enterprise, Hornet, and Lexington became all important in communiqués. (from dust jacket flap)
2011.302.087	Vought's F8U-3 Crusader III: Super Crusader	Thomason, Tommy H.	The Vought XF8U-3 Crusader III was an aircraft developed by Chance Vought as a successor to the successful F-8 Crusader program and as a competitor to the F-4 Phantom II. Though based in spirit on the F8U-1 and F8U-2, and sharing the older aircraft's designation in the old Navy system, the two aircraft shared few parts 92 pages, 175 images, 2 pages of models colored front and with 3 colored photos on the back cover. (from ginterbooks.com)
2011.302.088	Such Men As These : The Story of the Navy Pilots Who Flew the Deadly Skies Over Korea	Sears, David	In 1951 James Michener went to Korea to report on a little-known aspect of America's stalemated war: Navy aviators. His research-inspired novel about these pilots became a best seller. Using Michener's notes, David Sears tracked down the actual pilots to tell their true-life stories. Included among these pilots are Jesse LeRoy Brown, the first African-American naval pilot, and Neil Armstrong, the first astronaut on the moon.
2011.302.089	Postwar Air Weapons : 1945-present	Newdick, Thomas	The Essential Weapon Identification Guide: Postwar Air Weapons is a highly illustrated guide to the air-launched weapons used by the world's armed forces since World War II, outlining their capabilities, deployment, and use in combat. This compact

Object ID	Title	Author	Summary
			volume includes every major weapon currently employed by the world's air forces today, from the 250-pound (113-kg) Small Diameter Bomb employed by US forces in Afghanistan, to the Russian/Indian Brahmos cruise missile currently being tested. Also featured are major types in use since World War II, including the US Tomahawk cruise missile and the Soviet-era AA-6 Acrid air-to-air missile. Organized by type of weapon and within this by country of origin, the book offers a comprehensive survey of air-launched weaponry in the modern era, including examples produced by the US, Russia, China, Sweden, the UK and France. Individual sections detail the weapons used by forces fighting in current and recent conflicts including Iraq, Afghanistan, Chechnya and Georgia. All the key air-to-air and air-to-ground weapons are featured, including variations of the AIM-9 Sidewinder, the various types of JDAM employed by US forces, and a wide range of Russian guided missiles and bombs. Also featured are the various ECM, targeting and navigation pods which form a key part of modern air warfare. Packed with more than 200 full-color artworks and photographs with exhaustive specifications, The Essential Weapon Identification Guide: Modern Air-Launched Weapons is a key reference guide for military modelers and aviation enthusiasts. 			in the Night) Fallen Outposts
2011.302.101	Warplanes of WWII, The, : Legendary Combat Aircraft, Disc 1 : The Germans	Creation Films	Control of the air became the key to military victory during World War Two. Axis and Allied pilots turned the skies over Europe and the Pacific into one of history's bloodiest arenas. The Warplanes of WWII provided a bird's eye view of the action, thanks to rare newsreel footage, some of which has not been seen in 60 years. You will bear witness to the German Blitzkrieg in Poland and France, along with the RAF's heroic stand against the Luftwaffe during the Battle of Britain. The series dramatizes what modern air squadrons could do to traditional ground and sea forces--from the Japanese Imperial navy's surprise attack on Pearl Harbor to the daring daylight bombing raids of the US Air Forces over Europe. Later, of course, American planes delivered the horrifying atomic payloads upon Hiroshima and Nagasaki that brought the war to a close. Disc 1 : The Germans : Out of the Ashes 1. Birds of Prey 2. Teutonic Knights of the Sky 3. In the Shadows 4. Iron Annie 5. Willy's Fighter 6. The First Blitz 7. Double Lightning 8. Condor Legion 9. Easy Prey 10. Blitz from Above Disc 1 : The Germans : The Great Air War 1. Battle of Britain 2. Eagle Day 3. The Fatal Error 4. Red Star Rising 5. Defending the Reich 6. In the Beginning 7. Birth of the ME-262 8. The Blitz 9. The Youngest General
2011.302.102	Modern Military Airpower : 1990-Present	Newdick, Thomas	"... extensively researched review of the equipment and organization of the world's air forces illustrated with detailed artworks of combat aircraft

Object ID	Title	Author	Summary
	Mutiny, and Bravery on the USS Kitty Hawk		was embroiled in an unpopular war in Vietnam, and the USS Kitty Hawk was headed to her station in the Gulf of Tonkin. Its five thousand men, cooped up for the longest at-sea tour of the war, rioted--or, as Troubled Water suggests, mutinied. Disturbingly, the lines were drawn racially, black against white. By the time order was restored, careers were in tatters. Although the incident became a turning point for race relations in the Navy, this story remained buried within U.S. Navy archives for decades. With action pulled straight from a high seas thriller, Gregory A. Freeman uses eyewitness accounts and a careful and unprecedented examination of the navy's records to refute the official story of the incident, make a convincing case for the U.S. navy's first mutiny, and shed new light on this seminal event in American history.
2011.302.120	Leave No Man Behind : The Saga of Combat Search and Rescue	Galdorisi, George	Beginning with the birth of combat aircraft in World War I and the early attempts to rescue warriors trapped behind enemy lines, Leave No Man Behind chronicles in depth nearly one hundred years of combat search and rescue (CSAR). All major U.S. combat operations from World War II to the early years of the Iraq War are covered, including previously classified missions and several Medal-of-Honor-winning operations. Authors George Galdorisi and Tom Phillips (both veteran U.S. Navy helicopter pilots) highlight individual acts of heroism while telling the big-picture story of the creation and development of modern CSAR. Although individual missions have their successes and failures, CSAR, as an institution, would seem beyond reproach, an obvious necessity. The organizational history of CSAR, however, is not entirely positive. The armed services, particularly the U.S. Air Force and Navy, have a tendency to cut CSAR at the end of a conflict, leaving no

2011.302.128	Hell in the Pacific : High Drama on the High Seas : The Story of the Last Great Naval War, Disc 2	Creation Films	The Pacific War was the largest naval conflict in history. Across the huge expanses of the Pacific, the two most powerful navies in the world found themselves locked in a death struggle. The war was fought in every possible climate, from Arctic conditions in the Aleutians, to the appalling heat and swelter of the South Pacific. Every conceivable type of naval activity was represented: carrier aviation battles, surface engagements, bitterly fought night-battles, the largest amphibious landings of the entire war, and the stealthy, brutal battles waged by and against submarines. This 5-DVD set includes rare combat footage (much of it in original color) and exclusive interviews with veterans from both sides of the war. Also included are rare commentaries from the Doolittle raiders and discussions with a number of key insiders--including one of the planners of the attack on Pearl harbor and Japanese diplomats. 2011.302.132	Warplanes of WWII, The, : Legendary Combat Aircraft, Disc 2 : The Japanese	Creation Films	Control of the air became the key to military victory during World War Two. Axis and Allied pilots turned the skies over Europe and the Pacific into one of history's bloodiest arenas. The Warplanes of WWII provided a bird's eye view of the action, thanks to rare newsreel footage, some of which has not been seen in 60 years. You will bear witness to the German Blitzkrieg in Poland and France, along with the RAF's heroic stand against the Luftwaffe during the Battle of Britain. The series dramatizes what modern air squadrons could do to traditional ground and sea forces--from the Japanese Imperial navy's surprise attack on Pearl Harbor to the daring daylight bombing raids of the US Air Forces over Europe. Later, of course, American planes delivered the horrifying atomic payloads upon Hiroshima and Nagasaki that brought the war to a close. Disc 1 : The Japanese : Rising Sun 1. The British Model 2. Divided Forces 3. The Die Has Been Cast

2011.304.003	Admiral Arleigh (31-Knot) Burke: The Story of a Fighting Sailor	Jones, Ken	(from britannica.com) Written by two World War II veterans who later became well-known war correspondents, this biography records the inspiring life of one of America's great naval heroes. Popularly referred to as "31-Knot" Burke, Admiral Arleigh Burke fought savage battles at sea and won every decoration a grateful nation could bestow, yet his service to his country was not in combat alone. This book is at once a stirring testament to Burke's World War II record as a combat leader and to his talents as a diplomat at the armistice table in Korea and as a politician in Washington. It details his legendary victories with DESRON 23 in the Pacific and his development of high-speed night tactics for destroyers that resulted in what many call the perfect naval engagement at the Battle of Cape St. George. Burke's most enduring contributions occurred during his unprecedented three terms as chief of naval operations when he directed the Navy's technical development during its revolutionary change from steam and gunpowder to nuclear concepts in ships, weaponry, strategy, and tactics. Published soon after Burke's retirement from the Navy in 1961, the book has remained a standard reference for four decades. About the Author Ken Jones served in the U.S. Navy in World War II and went to Korea as a war correspondent. He is the author of Destroyer Squadron 23. Hubert Kelley, a veteran of the Pacific War, is the author of many war-related stories that appeared in Harper's and other publications. (from Amazon.com)

2011.312.005	USS Midway (CVA-41) - Westpac Log - Featuring Snoopy - 1972-73	Girard, W. E.	This book is a collection of Snoopy cartoons and humorous anecdotes about the Midway from 16 April 1972 to 9 February 1973. Forward [sic], Dedication, Thanks, Apologies, Humorous Anecdotes, and like that How did "Snoopy ala Airplan" come about? I'll never forget the feeling when I presented the first airplan to the ship's Ops Officer, CDR "Al" Johnson. After a careful perusal his first question was, "Where's the Snoopy?" Being new to carrier aviation and airplans, my thoughts ran rampant with, "Let's see, we've got the Barcap, Tarcap, Migcap, Walleye, Pocket Money, and all that, but what the hell's a "Snoopy"?" Fortunately, before I could utter my smartest, "Err - umn - uhh" he clarified the situation and shot down the first airplan for a rewrite --- complete with Snoopy, and with a sigh of relief the first airplan hit the press. In order to give you a hint of my feelings the next day however, an apropos "humorous anecdote" is in order at this point. "Once upon a time there was a girl in our home town about to enter that stage

Object ID	Title	Author	Summary
			of puberty which separates the girls from the women. Her mother had carefully explained what to expect and how to handle it. Sure enough the day came but the poor girl (woman) was still quite unhappy and somewhat distressed about the state of affairs anyway. Finally, several days later, things had returned to normal and breathing a sigh of relief the girl said, 'I'm sure glad I don't have to go through that again!'" Needless to say, I was relieved to have gotten "The dog" over and done with on the first airplan, but when the Ops Boss looked at airplan #2 and said, "Hey, ya forgot Snoopy again. Ya know ya gotta have one for every airplan on the cruise!", I knew what that girl felt like about 28 days later. So - thanks to the Ops Boss, here's a collection of "The Dog". Of course, while we're passing out thanks, we have to give Mr. C. Schulz our thanks and apologies - the reason for both being obvious. AIRWING FIVE received the dirty end of the stick on most of the jokes. A lot of things happen each day on the ship that contain a humorous side, but since our Snoopy came from Air Ops, most of the topics are concerned with that area. Since it's always easier to poke fun at someone else than at yourself, AIRWING FIVE got poked. None of the jokes were meant to be malicious and in spite of appearances, we think the Wing's Sierra Hotel. Dedicationwise - we've all seen the Kudos and laudits MIDWAY, AIRWING FIVE, and COMCARDIVONE have received. Regardless of what others say there is a feeling that comes when you know you're on the "Number One" team. I personally feel that the night we picked up a sister carrier's load after twelve "plus" hours of our own air ops we had really proven we were the best. The

2011.312.006	Mission : Seventy-two - USS Midway (CVA-41) - 1972-73	Doweary, M. M. (ed.)	A pictorial account of the western Pacific deployment of USS Midway in 1972/73. The ship departed Alameda 10 APR 72 and returned to Alameda 3 March 1973, 1 week short of an 11-month deployment. Not only was it a long deployment, Midway was deployed 7 weeks ahead of schedule with less than one week's notice. Significant operations included 9 periods of line operations off Vietnam in support of the Vietnam War. Port calls included Pearl Harbor, Subic Bay (multiple), Hong Kong and Singapore. Bob Hope performed on Midway with his troop on 27 December in Singapore. The show was taped and broadcast on U. S. national television on 17 January 1973 as the Bob Hope Christmas Special. CVW-5 was embarked. The airwing consisted of VF-151 (F-4B), VF-161 (F-4B), VA-56 (A-7B), VA-93 (A-7B), VA-115 (A-6A and KA-6D), VAQ-130 Det 2 (EKA-3B), VFP-63 Det 3 (RF-8G), VAW-115 (E-2B), HC-1 Det 2 (SH-3G), and HC-7 Det 110 (HH-3A).
2011.312.007	Dive Bomber! : An Illustrated History	Smith, Peter Charles	For many, it is a dive bomber that conjures the most dramatic, quintessential image of World War II: a screaming German Stuka hurtling toward the ground as part of the frightening blitzkrieg that opened the war. In this illustrated history of dive bombers from around the world, Peter C. Smith takes the reader from the earliest experiments in 1910, through the planes first operations, to

Object ID	Title	Author	Summary
			their eventual emergence as effective tools of aerial warfare during World War II. With its large number of photographs, diagrams, and tables, this book presents a fascinating and authoritative piece of aviation history. About the Author Peter C. Smith has written more than thirty books on military history, including <i>Fist from the Sky</i> (9780811733304) and <i>Massacre at Tobruk</i> (9780811734745). (from Amazon.com)
2011.312.009	Unfit for Command : Swift Boat Veterans Speak Out Against John Kerry	O'Neill, John E.	Amazon.com Review: Due to the timing of its publication, <i>Unfit for Command</i> could be dismissed as the sort of controversial, loaded book typical in a presidential election year: Either courageous and necessary, or untruthful and malicious, depending on one's political point of view. Filled with interviews of men who served in Vietnam at the same time as John Kerry, the book poses the following question: "Why do an overwhelming majority of those who commanded or served with John Kerry oppose him?" (Note that the issue of "service" has sparked investigation into its definition--in other words, just how close was the interaction between Kerry and those cited in the book during Kerry's Vietnam tour of duty?) The charges leveled against Kerry in this book are severe and include filing false operating reports; lobbying for and receiving three Purple Hearts for minor wounds, two of which were self-inflicted; receiving a Silver Star under false pretenses; offering false confessions of bogus war crimes in both print and testimony; and recklessness in the field, including the burning of a village without cause or

Object ID	Title	Author	Summary
			direct order. The book also claims that Kerry left Vietnam after serving just four months instead of the usual one year tour and that he returned home and accused his fellow soldiers of atrocities without offering any evidence, endangering POWs in the process. It is debatable whether the book will change any minds, or votes. Instead, readers will likely reach one of two conclusions: Either John Kerry grossly misrepresented his military service or the authors are spinning the interviews that they conducted for ulterior motives. There is a third option, however; readers will further investigate both sides of the debate, and by doing so, may reach conclusions independent of partisan extremes. --Brian
2011.312.010	Carrier Admiral	Clark, Joseph James	Admiral Clark reviews the history of the aircraft carrier as a weapon and writes from his own experience of its use in the Atlantic, the Pacific in WWII, in Korea, in Vietnam, and its potential for the future.
2011.312.011	Anchors Aweigh : Verses by Midshipmen of the United States Navy	Trident Society	THIS collection of poetry is the successor to previous volumes ANCHORS AWEIGH, published by the Trident Literary Society in 1924 and 1936. Many of the worthiest poems from the former books are reprinted here. The rest are selected from more recent issues of the "Trident Magazine," the "Log," and Shipmate." Practically all were written -by Midshipmen or Naval Officers and represent their ideas and sensations gleaned from their varied experiences at the Naval Academy and with the Service all over the world. An effort has been made to include those poems which will most interest their readers and which will awaken pleasant memories and impressions, rather than to select them with a critical eye to their strictly literary merit. ,

Object ID	Title	Author	Summary
2011.312.012	Gangway--Fighter Pilot	Yount, Robert R.	Bob was a career naval aviator who retired as a Captain in 1973 after thirty-one years of distinguished service in the U.S. Navy. He wrote his memoirs, Gangway--Fighter Pilot, which described in detail his life and aviation career in the Navy including service in World War II, the Korean War and Vietnam War. He was attending junior college when at nineteen, he joined the Naval Aviation Cadet Program. He earned his "Navy Wings of Gold" in February 1943 at NAS Pensacola, known as the "Annapolis of the Air." In World War II, he was a dive bomber pilot in air group VB-100 flying the SB2C aircraft off the USS Bennington. In the Korean War, he was a fighter pilot with the VF-111 squadron aboard the USS Philippine Sea flying the Navy's newest jet fighter the F9F Panther. He received four Navy Air Medals for his efforts in both of these wars. In the Korean War, he had the distinction of being the first pilot to safely land the Panther jet aboard an aircraft carrier without the aid of the plane's tail hook which had malfunctioned. The Navy had designed a new, as yet untested, webbing, the Davis Barrier, for just such a situation. Bob's perfect landing proved the barrier successful. He was honored with a ship's company party hosted by the Task Group Commander, Rear Admiral Eddie Ewan as well as a congratulatory newspaper write-up by the UP's Task Force Seven Correspondent, Jack Burby. After the Korean War, he had a variety of jobs in naval aviation including test pilot, Air Operations Officer, Carrier and Carrier Air Group Training Officer, Air Group Operations Officer, Commander VAW-13, Executive Officer, USS Hornet, Commanding Officer Naval Ordnance Test Station China Lake and Commanding Officer Carrier Airborne Early

Object ID	Title	Author	Summary
			Warning Squadron 11, the largest carrier squadron in the Navy. When VAW-11 was re-commissioned in 1967 as seven new squadrons, he was promoted to Commander Air Wing 11 with the wartime rank of Commodore. His final tour of duty in 1968 was Assistant Chief of Staff Logistics Hawaiian Sea Frontier where he spent his last five years in the Navy coordinating a challenging variety of assignments in and around the Hawaiian Islands. 2011.312.013	From a Small Naval Observatory	Thomas, Walter R.	No one without a sense of humor should be assigned to Washington, D.C., for duty. Humor, in the maelstrom of government, really should be as available by prescription as some of the more powerful yet less effective sedatives. Humor can prevent madness. Sedation can only delay it. - Captain Walter "R" Thomas, U.S. Navy During the process of gaining clearance for this book, Captain Thomas received a phone call from a Pentagon office one day and was asked, "Are you on active duty?" Captain Thomas said, "Yes." After a short, but meaningful, pause the caller then asked, "Are you planning to retire soon?" This book evokes official questions like these. It paints a spectrum of Navy programs and official practices in controversial colors, and often touches bureaucracy in its tender spots. But the chapters are also splashed with wit, humor, and occasional satire which make them highly enjoyable as well. And the book is not only pertinent to the Navy; every military service and government agency will find its bitter roots in the author's prose garden. Captain Thomas said he hoped the book "might give today's

Object ID	Title	Author	Summary
			leaders a good view of chaos so that tomorrow's leaders could control it!" This book provides-a great vantage point. Captain Thomas entered the Navy at Pensacola, Florida, in 1948 as one of the Navy's "Flying Midshipmen." While assigned to various squadrons, he flew many different types of aircraft, including seaplanes and helicopters. He has also served tours as a ship's company officer on several aircraft carriers. His shore assignments include duty as a flight instructor, Special Assistant to the Chief of Naval Personnel, the U.S. Naval. War College staff and the Politico-Military Policy Division of the Chief of Naval Operations. Currently he is the Director of the U.S. Navy's Anti-Drug Program. Captain Thomas is a graduate of the U.S. Navy's Line School, the U.S. Naval Postgraduate School, the Navy's Legal School, the DOD Public Information Officer's School, the U.S. Navy's Command and Staff College and the U.S. Naval Warfare College..He also holds a master's degree in international affairs from George Washington University. 2011.315.005	Tora! Tora! Tora! : The Attack on Pearl Harbor	Fleischer, Richard (director)	Based on the books: Tora! Tora! Tora! by Gordon W. Prange, and The broken seal by Ladislav Farago. "Sir, there's a large formation of planes coming in from the north, 140 miles, 3 degrees east." "Yeah? Don't worry about it." This is just one of the many mishaps chronicled in Tora! Tora! Tora! The epic film shows the bombing of Pearl Harbor from both sides in the historic first American-Japanese coproduction: American director Richard Fleischer oversaw the complicated production (the Japanese sequences were directed by Toshio Masuda and Kinji Fukasaku, after Akira Kurosawa withdrew from the film), wrestling a sprawling story with dozens of characters into a manageable, fairly easy-to-follow film. The first half maps out the collapse of diplomacy between the nations and the military blunders that left naval and air forces sitting ducks for the impending attack, while the second half is an amazing recreation of the devastating battle. While Tora! Tora! Tora! lacks the strong central characters that anchor the best war movies, the real star of the film is the climactic 30-minute battle, a massive feat of cinematic engineering that expertly conveys the surprise, the chaos, and the immense destruction of the only attack by a foreign power on American soil since the Revolutionary War. The special effects won a well-deserved Oscar, but the film was shut out of every other category by, ironically, the other epic war picture of the year, Patton. -- Sean Axmaker "Tora! Tora! Tora!" is the Japanese signal to attack - and the movie meticulously recreates the attack on Pearl Harbor and the events leading up to it. Opening scenes contrast the American and Japanese positions. Japanese imperialists decide to stage

			means movie marathons in the Ready Room, catching up on paper work and checking their rooms for light leaks. It's also a time for long dormant hair-brained ideas to hatch and come to life. Such was the case in 1956 aboard USS Hancock (CVA-19), heading home to San Diego, with VF-121, F9F-8 Cougar squadron, bored by the daily routine. In collusion with ship's company, they concocted and produced a spoof of a typical pilots' briefing session, the mad scramble to man aircraft and the exhilarating, surging rush of a catapult launch. They called the film, "Launch 'Em", from which this tape was made. ASSOCIATION OF NAVAL AVIATION, INC. 5205 LEESBURG PIKE, SUITE 200 FALLS CHURCH, VIRGINIA 22041 (703) 998-7733 2) "Your Wildest Dreams" (Blue Angels music video from 1992) 3) "The Carrier Battle Group" (1986)
2011.315.030	SeaWings : CVW-5 on USS Independence	Kazunari, Takizawa (director)	Japanese documentary on carrier flight operations aboard the USS Independence (CV-62).
2011.315.031	Navy Air Combat/Navy Sea Battle	Ball, Robert E. Jr. (director)	Japanese-language laserdisc documentaries depicting U. S. naval operations during Desert Storm and air combat against Libyan MiGs.
2011.315.032	Censored Mail : A personal narrative of World War II Aboard the Aircraft Carriers U.S.S. Ranger (CV-4) and U.S.S. Randolph (CV-15)	Coyle, Darcy C.	Through original letters to and from his wife and family, timely news clips and ship's log entries, Coyle gives his readers a broad picture of the war and guides them with personal insight and recollection. The book begins with the author at the Naval Academy, and tracks him through World War II.
2011.315.033	Jane's All the World's Aircraft - 1979-80	Taylor, John W. R. (ed)	Jane's All the World's Aircraft sets the standard in aviation reference, providing exhaustive technical detail on over 950 civil and military aircraft currently being produced or under development by more

2011.319.005	War at Sea, 1939-1945	Hamilton, John	War at Sea contains 176 of the author's paintings. The paintings are supported by text and 43 maps.
2011.319.007	World at War : An Illustrated History of the Second World War	Preston, Andrew (ed)	This selection of over fifty representative land, sea and air battles has been compiled by a team of historians. Contents include: Battle in the air / Michael C. Tagg -- Battle on land / Duncan Anderson...[et al.] -- Battle at sea / Colin McIntyre
2011.319.008	United States Naval Institute 2010 : Membership Directory	United States Naval Institute	Membership Directory of the U.S. Naval Institute. Members are listed with the following information (when available) memberrship type, highest military rank, award received code(s), years and branch of service codes, foreign countries of service, military status code, conflict served in codes, career codes, employer information, residence information, spouse and children's names.
2011.319.009	Victory Era in Color!, The	Ethell, Jeffrey L.	Rare Color Photographs of the World War II years.
2011.319.010	Flat-Tops and Fledglings : A History of American Aircraft Carriers	Pawlowski, Gareth L.	Traces the history of the American aircraft carrier from the early days of the 1920's and 1930's of experiment and theory which would not be proven until the outbreak of World War II when the aircraft carrier became the backbone of our task forces in the Pacific and Atlantic campaigns. The role of the American aircraft carrier in Korea, the cold war and Vietnam conflicts are described in length.
2011.319.011	At Ease	Beno, Mike (ed)	Fall in for fun, as veterans from all branches of service share lighthearted memories of their days in uniform.
2011.319.013	Naval Operations in the '80s USN	Skinner, Michael	Are the Russians threats or targets? Is the battleship really viable? Will the supercarrier survive the cruise missile? Are U.S. "boomers" still invulnerable on their deepwater stations? USN tackles these

Object ID	Title	Author	Summary
			questions by taking you inside their fleet - into the heart of a giant Trident sub, into the fire control center of a battleship as it unleashes its nine-ton broadside, into the control room of an Aegis cruiser.
2011.319.014	Shame of Savo : Anatomy of a Naval Disaster, The	Loxton, Bruce	For more than half a century, an air of innuendo, accusation and mystery has surrounded the Battle of Savo Island, fought off the southern Solomon Islands during the early morning hours of 9 August 1942. How was it that a powerful group of Allied cruisers had been surprised and almost annihilated by a Japanese striking force obliged to travel hundreds of miles through waters patrolled by Allied reconnaissance aircraft? And why - given the overwhelming air strength available to the Allies due to the presence of their aircraft carriers - were the Japanese able to escape afterward practically unscathed, leaving more than a thousand Allied seamen dead in their wake? Who was to blame - if anyone was to blame - for such a monumental disaster? In this brilliant study, written by a retired senior Australian naval officer, many of the myths and misunderstandings concerning this important naval action have been exposed and corrected. Bruce Loxton, then a midshipman, was seriously wounded on the bridge of HMAS Canberra when that heavy cruiser was disabled during the opening stages of the battle. For him, reaching the truth of this affair became the passionate culmination of a lo -- This text refers to an out of print or unavailable edition of this title. (Amazon)
2011.319.015	Way It Was : Pearl Harbor, The Original Photographs, The	Goldstein, Donald M.	At long last, the familiar and overused photographs of the Day of Infamy can be retired. The 430 prints in this new and welcome collection were gathered from various Japanese and U.S. sources, and most have never been seen by the general public. The majority were taken during the height

Object ID	Title	Author	Summary
			of the air raid itself, many from Japanese cockpits. Along with numerous maps and sketches, they are arranged according to the various phases of the battle and are supplemented with commentary by two of Gordon Prange's coauthors (Goldstein and Katherine V. Dillon) The overall effect is to give the reader an uncanny sense of being present at the battle. This book will make a wonderful companion piece to Prange's now-classic <i>At Dawn We Slept</i> (LJ 11/1/81). - Raymond L. Puffer, U.S. Air Force History Prog., Los Angeles Copyright 1991 Reed Business Information, Inc. From Library Journal
2011.319.016	Pearl Harbor : December 7, 1941 : America's Darkest Day	Wels, Susan	This lavishly illustrated book tells the story of Pearl Harbor through a robust and dramatic narrative, newly designed maps and illustrations, hundreds of archival photographs, and scores of historical artifacts. In a jarringly candid foreword, Senator Daniel K. Inouye recounts his personal experiences during the attack and the effect they had on him from that day forward. Sir John Keegan's introduction sets the historical context and provides keen insights on the event from a distinguished military historian's perspective. And best-selling author Susan Wels's compelling narrative transports the reader back to the darkest day in our nation's history. From the burgeoning conflict in Europe to the harrowing events on the morning of December 7, 1941, and their enduring impression on American memory, this book tells the story -tragic and yet inspiring-that we can never forget. --This text refers to an out of print or unavailable edition of this title. From the Inside Flap
2011.319.017	Our Call To Arms : The Attack on Pearl Harbor	Sullivan, Robert (ed)	Pearl Harbor is the story of the worst battle defeat ever suffered by the U.S., and of how courage and ingenuity rose from the smoldering wreckage to build the worlds most powerful

Object ID	Title	Author	Summary
			war machine and, in victory's aftermath, to wage peace with even greater scope and success. In stirring text and dramatic photography, much of it rarely seen, LIFE brings Pearl Harbor alive in all its terror and heroism.
2011.319.018	World War II : A Complete Photographic History	Buell, Hal (ed)	This is the most comprehensive chronicle of the world's greatest conflict with more than 2500 photographs and maps.
2011.319.019	Guadalcanal Legacy, The	Merillat, Herbert Christian Laing	The story of the struggle for Guadalcanal, includes special stories, Guadalcanal Campaign veterans Association.
2011.320.001	Desert Storm : Thunder in the Gulf	Aviation Week Video	Experience the air war in Iraq and get the inside story behind the most massive air campaign in modern military history.
2011.320.002	Threshold : The Blue Angels Experience	Marlow, Paul	Follows the team of the United States Navy's Blue Angels (F-4 Phantoms) as they perform in air shows, travel from one part of the world to another, and as they express personal views and emotions about their experiences. Narrated by Leslie Nielsen.
2011.320.003	Touch the Sky	Mather, Ted (director)	U.S. Blue Angels take Christopher Reeve on aerobatic practice, then stage an airshow. Explains purpose of demonstration squadron and how Navy fliers are trained. Includes Blue Arrows Aerobatic team.
2011.320.004	Navy's Angels : New F-18 Hornets	Mitchell, James F.	Fasten your seat belt and hold on tight. You're going full afterburner with the U.S. Navy and Marine Corps' best naval aviators. Blue Angels McDonnell Douglas F/A-18 Hornet
2011.320.005	Magic of Flight, The, Disc 1	MacGillivray, Greg	Recounts the historical first flight of the Wright Brothers in 1903, and shows a variety of modern aircraft, the people who fly them and the human potential of training and performance. "Originally created for exhibition in IMAX® theaters"--Container. Contents: Opening -- Blue Angel training -- Imaging flight --

Object ID	Title	Author	Summary
			Wright Brothers -- How birds fly -- The Harrier -- Aircraft carrier -- Spin recovery -- Stunt flyer: Sean Tucker -- G force training -- Air shows -- The Blue Angels perform.
2011.320.007	World's Fighting Planes, The	Green, William	One page summaries of major aircraft of the following countries: Argentina, Australia, Canada, Finland, France, Germany, Great Britain, India, Italy, Japan, Netherlands, Poland, Spain, Sweden, Switzerland, USSR, United States and Yugoslavia. Includes brief description, specifications, photo and silhouette of each plane.
2011.320.008	Navy as a Fighting Machine, The	Fiske, Bradley A.	With an Introduction and Notes by Wayne P. Hughes, Jr.. Admiral Fiske has written a comprehensive book on naval operations esp. strategy and tactics. Chapters include: War and Nations, Naval Power, General Principles, Naval Bases, Operating the Machine and Fleet Tactics. Appendix includes formulas for battle lines.
2011.320.009	Scream of Eagles : The Creation of Top Gun and the U.S. Air Victory in Vietnam	Wilcox, Robert K.	Reads like a novel, but is a factual account of the development of the navy's Top Gun fighter school and how it help form a victory in the air war over Vietnam.
2011.320.010	Over the Beach : The Air War in Vietnam	Grant, Zalin	The story of the air war over Hanoi and Haiphong and the bombing of the same bridge on the same day in 1966, 67 and 72. Told through the voices of the pilots who flew the missions. The book also relates the political controversy surrounding the airwar and the development of the effective anti-aircraft system by the North Vietnamese.
2011.320.012	Top Gun Fighters & America's Jet Power	Hall, George	Photographs and specifications of many Navy jet planes. Introductions charts the history of jet power and jet propulsion. Description of America's air forces and the Navy's Top Gun fighter school.

Object ID	Title	Author	Summary
2011.320.013	PBY : The Catalina Flying Boat	Creed, Roscoe	The design, production and history of the PBY Catalina Flying Boat. Author uses personal experiences of PBY pilots to elaborate on strengths and weakness of the Catalina.
2011.320.014	Douglas A-4 Skyhawk	Kilduff, Peter	History and development of designer Edward H. Heineman's A-4 Skyhawk, including history of Douglas Aircraft, and the designer. Description and photos of A-4 in combat in Vietnam, the Middle East and the Cold War. List of citations awarded pilots of the A-4.
2011.320.015	On Yankee Station : The Naval Air War over Vietnam	Nichols, John B.	Authors describe what it was like to fly combat missions in Vietnam before the fall of Saigon. Included is an analysis of how the US could have ended the war in South Vietnam using conventional weapons. (from back cover of paperback edition:) Combining vivid personal narrative with historical and operational analyses, On Yankee Station takes a candid look at U.S. naval airpower in the Vietnam War. Coauthors John Nichols, a fighter pilot in the war, and Barrett Tillman, an award-winning aviation historian, make full use of their extensive knowledge of the subject to detail the ways in which airpower was employed in the years prior to the fall of Saigon. Confronting the conventional belief that airpower failed in Vietnam, they show that when applied correctly, airpower was effective, but because it was often misunderstood and misapplied, the end results were catastrophic. Their book offers a compelling view of what it was like to fly from Yankee Station between 1964 and 1973 and provides important lessons for future conflicts. At the same time, it adds important facts to the permanent war record. Appendixes provide helpful statistical data on carrier deployments, combat sorties, and aircraft losses.

Object ID	Title	Author	Summary
			"Invaluable reading for all concerned with the role of naval aviation, both during the Vietnam War and in our nation's future." - Sen. John McCain
			"A blistering indictment of the politicians who squandered lives and treasure on a war they lacked wisdom to win or abandon, and a long-overdue tribute to the courage and determination of the airmen who fought there." -Stephen Coonts, author of Flight of the Intruder
			"Reading 'On Yankee Station' is much better than having 'been there.' Readers will understand the war and our nation's future." -Robert Shaw, author of Fighter Combat
			"A major addition to serious literature on the war and a fine collaboration between a high-time F-8 pilot and MiG killer, and a highly respected aviation historian. . . . A must read." - Naval Aviation
			"A very attractive book with excellent maps and tactical diagrams, and appendixes that include a good chronology and a fine statistical summary of air-to-air results." - Hook
2011.320.016	Morgan's Aviation Hall of Fame	Morgan, Len	Description, history and photos of the F-4 Phantom II, C-47 (DC -3) and P-47 Thunderbolt. Includes facsimiles of Pilot Training Manuals for the C-47 and P-47.
2011.320.018	Conquerors of the Air : The Evolution of Aircraft, 1903-1945	Emde, Heiner	A history of selected aircraft from the Wright 'Flyer' of 1903, to the Gloster G.40 Jet Fighter of 1941, including the principal aircraft of WWII. Beautiful color , line and action drawings. Includes a table of air speed records to 1941 and metric equivalents.
2011.320.019	Air War - Vietnam	Middleton, Drew	An accurate and comprehensive account of how the Air Force fought and largely won the battle in the skies over Vietnam. Part I: A Tale of Two

Object ID	Title	Author	Summary
			Bridges; Part II: Airpower and the 1972 Spring Invasion; Part III: The Battle for the Skies Over North Vietnam; Part IV: The Mayaguez Incident.
2011.320.020	Two-Ocean War : A Short History of the United States Navy in the Second World War, The	Morison, Samuel Eliot	Taken from Admiral Morison's "History of the United States Naval Operations in World War II", it describes the most important battles and campaigns of the War.
2011.320.021	Greatest Flying Stories Ever Told, The	Underwood, Lamar (ed)	An anthology of flying stories, both fact and fiction. Included are "The Spirit of St. Louis" by Charles Lindberg; "West with the Night" by Berly Markham; "The Sound Barrier" by Chuck Yeager; "Carrier Qual" by Douglas C. Waller; "Winter's Morning" by Len Deighton and "Dooley" by Ernest K. Gunn.
2011.320.022	Fighter Combat : Tactics and Maneuvering	Shaw, Robert L.	The theory, history, mechanics and spirit of air combat. Chapters include Fighter Weapons, Basic Maneuvers, One-vs-One Maneuvering, Defensive Maneuvering, Aircraft Tactics, Fighter Missions, Tactical Intercepts and Section Tactics. Illustrated with 150 line drawings and 250 quotes from fighter pilots.
2011.320.023	Navy Wings of Gold	Robinson, F. Willard	Personal history of Navy and Marine pilots in WWII including the author who was shot down over the Pacific and survived to return to the war. Also covered are pilot training and qualifying, the author's assignment to VC-31 and VC-7, and his brother's experience as engineering officer aboard the USS Tuscaloosa during the attacks on German gun batteries at Utah Beach on D-Day.
2011.320.024	Jackrabbits to Jets : The History of Naval Air Station, North Island, San Diego, California	Sudsbury, Elretta	A history of North Island Naval Air Station, San Diego from the Curtiss era to the 1960's. Appendices include photos of the commanding officers, NAS, NI, Aircraft types in 1967, and a list of aircraft carriers, past and present.
2011.320.025	Illustrated Guide to Aircraft Carriers of the World, The	Ireland, Bernard	This is a reprint of 2006.302.123, 2005, although it has a 2007 copyright. The history of aircraft carriers and significant carrier battles.

Object ID	Title	Author	Summary

2011.320.078	Battle of the Atlantic, September 1939-May 1943, The	Morison, Samuel Eliot	This first volume deals with the defense of our own shores and ships. It describes the gradual emergence of the Navy from the neutrality patrol and Western Hemisphere defense, through the "short of war" phases to full-fledged war with Germany and Italy. Much of it is devoted to the history of transatlantic, coastal Russian, Caribbean and Brazilian convoys, and to the war on the U-boats.
2011.320.079	Operations in North African Waters October 1942 - June 1943	Morison, Samuel Eliot	This volume covers naval aspects of Operation "Torch," the North African campaign, which carried out the plan favored by President Roosevelt for opening a second front to relieve the Russians. Told with accuracy and detail of firsthand observation and participation, it is a full record of what was, at the time it occurred, the largest overseas expedition ever undertaken.
2011.320.080	Preliminary Pilot's Handbook of Flight Operating Instructions, Navy Model PBY-6A Airplane	Chief of the Bureau of Aeronautics	Provides standardized operating instructions and emergency procedures for the PBY-6A aircraft.
2011.320.083	Rising Sun in the Pacific, 1931-April 1942, The	Morison, Samuel Eliot	This volume is the first on the war in the Pacific, that major testing ground which proved the ability of our naval forces to come back from disaster and eventually achieve far-flung

Object ID	Title	Author	Summary
			objectives. Considerable attention is given to the 'incidents' that really began the war in the Pacific and to the internal conflict within Japan. The attack on Pearl Harbor is covered. Part II discusses " the Philippines and Near-by Waters", including the fall of Guam, the landings in Malaya and the rear guard in the Philippines. Part III deals with the aftermath of Pearl Harbor, Wake Island, communications and carrier strikes. Part IV, "Defense of the Malay Barrier," begins with the Abda Command of January to March, 1942, tells of Balikpapan, the prelude to the invasion of Java, the battle of the Java Sea, events in the Indian Ocean and finally the Halsey-Doolittle raid on Tokyo in April 1942.
2011.320.085	Struggle for Guadalcanal, August 1942-February 1943, The	Morison, Samuel Eliot	Battle of Guadalcanal; carrier battle of the Eastern Solomons; battles of Cape Esperance and the Santa Cruz Islands; the battles of Tassafaronga and Rennell Island
2011.320.086	Breaking the Bismarcks Barrier, 22 July 1942-1 May 1944	Morison, Samuel Eliot	Description of the battles of Operation Watchtower and the drive up the Solomon Islands
2011.320.087	Aleutians, Gilberts and Marshalls, June 1942-April 1944	Morison, Samuel Eliot	This volume is an account of amphibious operations in the northern and western Pacific; the Aleutians, Gilberts, and Marshalls. It picks up the story of the Aleutian campaign in June 1942. It then describes that mighty sweep of the Pacific Fleet across Micronesia which began with the assault on the Gilbert Islands in November 1943 and included the capture of the Marshalls. Except for the gallantly fought Battle of the Komandorski Islands, the tale of the volume is one of amphibious warfare. Both the preparation and the execution of Operations "Galvanic," "Flintlock" and "Catchpole" have been described in detail.
2011.320.088	New Guinea and the Marianas, March 1944-August 1944	Morison, Samuel Eliot	Five months in the Pacific war; submarine operations, Battle of the Philippine Sea and the recovery of Guam

Object ID	Title	Author	Summary
2011.320.089	Sicily-Salerno-Anzio, January 1943-June 1944	Morison, Samuel Eliot	Mediterranean operations; invasion of Sicily; capture of Salerno and the beachhead at Anzio
2011.320.090	Atlantic Battle Won, May 1943-May 1945, The	Morison, Samuel Eliot	Battle against the U-Boats in North Atlantic, Bay of Biscay, the Mediterranean, Caribbean and Indian Ocean.
2011.320.091	Invasion of France and Germany 1944-1945, The	Morison, Samuel Eliot	This volume of the series begins with Operation Neptune-Overlord which covered the Grand Strategy and High Politics of the years '41-43, and continues with Plans and Preparations for the invasion from Mar '42 to May '44. It talks of the German Plans to meet the invasion. It discusses the coiling of the spring, from January 1942-1944; and the final start of the invasion 3-6 June 1944. It continues with Utah Beach, Omaha and the Supporting role of the Navy in the invasion until the Liberation of Cherbourg. Part Two covers the operation Dragoon in Southern France and concludes with the Navy's part in the Final Campaigns August 1944 to May 1945.
2011.320.092	Leyte, June 1944-January 1945	Morison, Samuel Eliot	This volume records the Battle for Leyte Gulf. This battle is not only the greatest naval battle of all time, but one of the most controversial engagements in the American War in the Pacific. The Japanese sent three separate fleets to Leyte Gulf. Ozawa's Northern Force was demolished by Halsey's Third Fleet, with Mitscher in tactical command; the Southern Force was wiped out by Seventh Fleet in what probably will be the last battle line engagement in naval history, the night action in Surigao Strait; the Center Force, although lucky to surprise off Samar a vulnerable group of American escort carriers under Rear Admiral Clifton Sprague, was thrown back in confusion and suffered grave damage.
2011.320.093	Liberation of the Philippines: Luzon, Mindanao, the Visayas, 1944-1945, The	Morison, Samuel Eliot	In order to liberate the Philippines, a series of amphibious operations took place on the islands and shores of Mindoro, Lingayen Bay,

Object ID	Title	Author	Summary
			Palawan, Panay, Negros, Cebu, Corregidor, and Mindanao. The carrier actions supporting these operations are told in detail. In this period of the war (the winter of 1944-1945) the Japanese Kamikaze Corps arose as an effective threat, taking a terrific toll of ships and sailors' lives. Here, too, is Admiral Halsey's famous raid of Task Force 38 in the South China Sea, ranging from Formosa to Indochina. The author also tells the story of the frightful typhoon of 18 December, 1944, in which three ships went down and over eight hundred lives were lost.. Additional chapters tell the story of the three amphibious assaults on Borneo by Australian troops covered by the US Navy; of submarine operations in the southwest Pacific in 1945, and of Captain Milton Miles's amazing US Naval Group, China.
2011.320.094	Victory in the Pacific, 1945	Morison, Samuel Eliot	This volume starts out with the Decision, Plans, and Preparations, October 1944-February 1945, for the taking of Iwo Jima; the preliminary poundings. D-Day at Iwo Jima and the Conquest of Iwo Jima. Part II gives a short history of the area known as Ryukyus in which Okinawa is a part. The situational and organizational planning in preparation of the battle to take place in this area is described. The Navy's participation in this assault is described and the establishment of the Air and Naval base by the Seabeas after the island was secured. Part III of this book covers the Miscellaneous Operations: Pacific Fleet Submarines, Third Fleet in Japanese Waters, Parthian Shots, and Final passes, July 24 to August 15, 1945, and finally Victory and Peace.
2011.320.095	Supplement and General Index	Morison, Samuel Eliot	Part I is the story of postwar operation of the Navy in the Pacific, insofar as they were connected with World War II. These include the surrender of outlying Japanese garrisons, the Navy's share in the occupation of Japan proper,

Object ID	Title	Author	Summary
			minesweeping approaches to Japanese ports, and Operation "Magic Carpet" for the return of armed forces to the United States. Part II is a list of all named ships of the US Navy during the war, together with their dimensions and armament; all types of landing, beaching and othe "lettered" craft; and types of aircraft used by the Navy during the war. Part III is a list of all important errata so far discovered in the previous volumes. Part IV is a General Index to Volumes I-XIV.
2011.320.096	Tornado ADV	Chesneau, Roger	Pictorial description of the Tornado ADV jet plane.
2011.320.098	Magic of Flight, The, Disc 2	MacGillivray, Greg	Disc 2 is the high resolution disc that was designed to be played on a computer. Recounts the historical first flight of the Wright Brothers in 1903, and shows a variety of modern aircraft, the people who fly them and the human potential of training and performance. "Originally created for exhibition in IMAX® theaters"--Container. Contents: Opening -- Blue Angel training -- Imaging flight -- Wright Brothers -- How birds fly -- The Harrier -- Aircraft carrier -- Spin recovery -- Stunt flyer: Sean Tucker -- G force training -- Air shows -- The Blue Angels perform.
2011.321.001	Japan Military Review	None Stated	[Cover] Japan Military Review Special Edition: Carrier Battle Group [p.11-13] Carrier Fighter: F-18 Hornet Photographer: Shibata Mitsuo The F-18 Hornet--the newest fighter aircraft in the US Navy and Marine Corps--prepares to embark aboard the aircraft carrier MIDWAY. MIDWAY, homeported in Yokosuka, is the main force of the US 7th Fleet and recently remodeled for the embark of the fighter/attack F

Object ID	Title	Author	Summary
			-18 (details contained in the text of this issue). Although MIDWAY is 40 years old, it is estimated that this latest re-configuration will extend the ship's service life 20 years. The F-18, the new spear in the arsenal, is a supplement to the main fighter of the US Navy, the F-14. Since it can also perform attack roles, it is designated F/A, for fighter and attack. It's origin was as the YF-17, a light attack aircraft for the US Air Force whose place was eventually taken by the F-16. Designed to switch from attack to fighter roles, the Hornet has nine "hard points" which can carry 7,700 kilograms of armament: two air-to-air missiles and four bombs in the attack role plus three drop tanks for a maximum combat radius of 1800 kilometers, or it can carry up to 8 Sidewinder or Sparrow missiles in the air-to-air configuration. The JASDF has long been firm about the development of the locally-produced FSX, but lately the future of the FSX has become uncertain. If introduced from abroad, the more powerful F-18 would be a strong contender. [p.20-21] The F-18 Hornet Comes to CV-41 On November 14, the first squadron of F-18's landed at Atsugi. Because the final number of aircraft was determined to be 36, those planes plus 10 A-6's could be equipped to drop a rain of 260 tons of bombs. With MIDWAY's renovation, the power of the 7th Fleet has become even greater. [p.42-51] ["The Aircraft Carrier and the Projection of Sea Power" is outlines the modern-day role of the aircraft carrier. Specific sections describe fleet air defense (p.42-46), ASW (p.47-49), and warfare on the open

Object ID	Title	Author	Summary
			sea (p.50-51).]
			[p.52-61] ["The Soviet Nuclear Aircraft Carrier and Carrier Strike Force" describes the evolution of the Soviet Navy's aviation branch, focusing in the Kiev-class VTOL/helo carrier and their future deployment of conventional angled-deck carriers. Also included are sections on Soviet nuclear propulsion, the Kirov-class CGN, and air assets of the Soviet Navy. The chart on p.59 comparatively lists US and Soviet classes of ships and submarines.]
			[p.62-71] ["The Mobile Carrier Task Force" discusses the types of ships that make up a CTF, including the various support ships and the specific roles of each.]
			[p.72-83] ["The Future of Large-Deck Aircraft Carriers" describes the familiar debate on the worth of the large, nuclear-powered carrier as compared to it's effectiveness, cost, vulnerability, and options. Specific sections are: "The Advantages of the Large Deck Carrier" (p.73-75), "The Cost of the Large Deck Carrier" (p.76-77), "The Plan for a 15-carrier, 600-ship Navy" (p.78-79), and "The Plan for the Upkeep of 15 Carriers" (p. 80-83).
			An interesting chart on page 81 shows a detailed plan for the life expectancy of eighteen carriers from LEXINGTON through GEORGE WASHINGTON. The plan indicates LEXINGTON being decomissioned in 1992 at the age of 49 to be replaced by the CORAL SEA until the year 2000, at which time it will in turn be replaced by the FORRESTAL. All carriers up to JFK will go through a SLEP program and last at least 45 years. MIDWAY is shown as retiring in the year 2000]

Object ID	Title	Author	Summary
			[p. 84-91] "An Interview with MIDWAY," "The Modernization of MIDWAY into a New Fighting Force," "At Age 41, a Miracle Aircraft Carrier." This article describes in detail MIDWAY's EISRA period. It is prefaced with a ship's history, remarking on MIDWAY's design and construction during WW II, her launching, sea trials, and commissioning in 1945, and her status as the largest warship in the world at the time. It mentions that MIDWAY was the first of her class, followed by the F.D. ROOSEVELT and CORAL SEA. The modernization period from September 1955--September 1957 is discussed, as is the the one from February 1966--January 1970. Pages 86-91 deal exclusively with the Yokosuka EISRA, remarking on the various work passages. Modifications discussed in detail: the blister project, weight reduction, cable removal, asbestos removal, larger JBD's, the new avionics for the EA-6B ICAP 2 and Hornet, the new avionics repair shops in hangar bay #1, catapult overhauls, AIMD refits for the F-18's F-404 engine, CIC improvements including updated NTDS software, and new antennas for the SPS-48C, SPS-49/65, SPS-10, and SLQ-17 systems. Two excerpts quoting Captain Mixson are as follows:] [p.88, paragraph 2] This fundamental change in the basic shape of MIDWAY's hull, combined with the various other renovation projects, makes it clear that effort is being expended to keep MIDWAY operational until the 21st century. If this reveals the "Midway Magic" referred to

Object ID	Title	Author	Summary
			earlier, a close look at the fine details of the ESRA [sic] projects also shows much of the work being done by Japanese contract laborers. The Commanding Officer had the following to say about this subject: "I am very satisfied with both the quality of work and high skill level of the Japanese workers. The reason is that for a carrier, for a main ship of the line, the best situation is that where a long overhaul is not necessary, and there is no other country where you can expect this level of maintenance skill. Without a doubt you can trust the guys working here at SRF more than anyone in the world." [p.90, paragraph 5] The commanding officer, Captain Mixson, flew the A-4 SKYHAWK and A-7 CORSAIR II carrier-based attack aircraft ion [sic] Vietnam. He experianced over 250 combat missions and has flown over 30 types of aricraft. He had the following to say about his impressions of the F-18 Hornet and its ability to perform two roles: "Of course, the F-18 doesn't have the fighter capability of the F-14, but it has a combat radius of about 1000 miles and possesses the superb ability to switch between fighter and attack missions. From what I know of fighters, only a fantastic plane could do that." — Summaries and translations by LTJG E. L. Steiner, USN 24 JAN 1987
2011.322.001	Why Do They Call it That? : Seafaring Terms and Their Origins	Shappee, Rudy	Have you ever wondered why they call the pointed end of a ship the bow, and the blunt end the stern? Within this small book you will find not only the definitions of fifty-one of today's most common nautical terms, but the origins of them as well. After reading this

Object ID	Title	Author	Summary
			beautifully illustrated work you will understand how an admiral of the fleet gets the name of his rank from the ruler of an Arab empire, why they named the starboard side of a vessel after a steering oar, and why the forward part of a ship was named after a castle. No old sea dog or weekend sailor should be caught afloat or ashore without this handy reference to nautical terms spoken around the world. Readers will not only gain a firm understanding of the language of the sea, but be able to dazzle even seasoned old salts with the origins of the terms they use. (from back cover)
2011.322.002	From Torpedoes to Aviation : Washington Irving Chambers and Technological Innovation in the New Navy, 1876-1913	Stein, Stephen K.	A biographical study of Washington Irving Chambers, a naval strategist, pioneering torpedo designer and early supporter and developer in naval aviation.
2011.322.003	Omaha Beach : A Flawed Victory	Lewis, Adrian R.	While the U.S. First Infantry's invasion of Normandy was ultimately successful, the division suffered terrible casualties. Retired U.S. Army Major Adrian R. Lewis, assistant professor of history at the University of North Texas, combs primary source material and finds that most of the leaders on the ground opposed the plan, which was then imposed on them from higher up. A dual Main Selection of the History Book Club, this clearly written, carefully argued and well-researched account offers a still-valid lesson in the importance of communication up and down the chain of command, and on bravery.

Object ID	Title	Author	Summary
	Propulsion Plant Guide		Study Guide/Reference for prospective OOD (U) candidates and bridge watch-standers aboard USS Midway (CV-41) c. 1981 for Midway's engineering plant. This book gives a general description of the engineering plant including astern operation and stopping, casualties, blowing tubes, testing Main Engines, Maneuvering and Cruising Combination, ship control, speed indicators, propellers, and acceleration and deceleration rates. There is a section of Main Propulsion Turbines and Reducting (Reduction) Gears, Operating Instructions and Precautions. This section includes starting, maneuvering, underway, securing and precautions. The largest section is the one on Boiler Description and Operation. This section includes boiler particulars (each unit) boiler data, boiler data (weights) , installation plastic chrome ore, preparation for service, raising steam and putting unit in service, heating oil, lighting burners, adjustment of burner, adjusting air pressure, purging furnace, lighting second burner, handling superheater drains, tightening handhole (and hole) fittings, putting firs unit on the line when machinery plant is in cold condition, lighting superheater-side burners, putting unit on line when on (one) or more boilers are supplying superheater steam, emergency procedure--time limited, cutting in with superheated steam--adequate steam flowing through the superheater, steam temperature, procedure for raising steam in a boiler under dead ship conditions, no steam or electric power available, operation, securing a unit. Other information includes major equipment description and ratings, table of speed VS RPM ordered, Isolation valve check list, bilge pumping capabilities. There are five pages of diagrams and drawings which include: boiler and burner

2011.333.008	United States Navy in Desert Shield and Desert Storm, The	Chief of Naval Operations	Summary of the role of the United States Navy in Operations Desert Shield and Desert Storm, compiled from reports of operational commanders in supporting commands and information gathered at headquarters.
2011.333.009	Cordon of Steel : The U.S. Navy and the Cuban Missile Crisis	Utz, Curtis A.	This volume is the first in the series entitled The U.S. Navy in the Modern World. Informs the reader of the contributions made by the Navy in the Cuban Missile Crisis of 1962.
2011.333.010	Limited Duty/Chief Warrant Officer Professional Guidebook, The	None Stated	This book is for use by personnel in the administration of the Navy's Limited Duty Officer and Chief Warrant Officer Program. It contains general guidance and information on policies and regulations concerning the programs, e.g., planning by personnel for appointment, training and education, utilization, reversion, redesignation and retirement. It also contains a definition of each designator series and general and professional occupational standards for each specific designator.
2011.333.011	Armed Forces Decorations and Awards	American Forces Information Service	This booklet provides illustrations and brief descriptions of the decorations and awards that may be earned by members of the armed forces. Also included are descriptions of top civilian awards issued by DoD and the services as well as charts on the order of precedence for wearing individual decorations and awards. Includes: United States Armed Forces Awards Decorations Medals
2011.333.012	Hook Code : United States Navy and Marine Corps Aviation Tail Code Markings, 1963 - 1994	Martin, Patrick	The world of aircraft tail codes is complicated at best and incomprehensible at worst. While the USAF generally keeps things relatively constant, the Navy

Object ID	Title	Author	Summary
			issue is confused by the constant changing of air wings and ships. Opening pages include a glossary of abbreviations, and explanation of how each section is arranged and a history of different units. There is also a paint scheme section explaining the changing paint schemes. The main body of the book is broken down into three basic sections. First is a listing by tail code. There are two subsections to this; by letter-letter section (i.e. AB) , then number-letter (i.e. 6G), finally a section by unit. All sections detail which aircraft types were flown during what period of time. The unit section does this plus shows the changing tail codes as air wings are changed. 262 pages with 400 photos. Published 1994. Softbound - 8½" x 11" (from http://www.canmilair.com/books.htm)
2011.333.013	F/A-18 Hornet	Aoki, Hideo (ed)	This book contains mostly B&W pictures of the McDonnell Douglas F/A-18 Hornet in Japanese. Includes 1/72 scale drawings. The series, AJ Minigraph maybe a Japanese periodical titled Aviation Journal.
2011.333.014	Flight Quarters!!!	Bureau of Aeronautics	Manual covering flight deck operations and safety requirements on a U.S. Navy aircraft carrier in 1943. Fully illustrated. Formerly RESTRICTED handling.
2011.334.001	Pearl Harbor	Badsey, Stephen	Extensively illustrated telling 3 stories leading up to the attack of pearl harbor. 1st story, emergence of Japan; 2nd story U.S. become world power; 3rd story clash of U.S. and Japan power.

			Manila. Significant operation involved combat with 7 communist fighters off Hainan Island attempting a rescue mission for a British Cathay Airliner that has being shot down by the Chinese.
2011.335.007	VF-51 1954, The Eagle Screams	Thabet, E. J. (ed.)	Pictorial account of VF51 on board of USS Philippine Sea to the Far East from March 1954 to November 1954. Port call included: Pearl Harbor, Yokosuka, Hong Kong, and Manila.
2011.335.008	U.S. Naval Strategy in the 1980s : Selected Documents	Hattendorf, John B.	Selected documents focus on the developmental and historical aspects of the Navy Martine Strategies that were used in the 1980s. The purposes was to inform U.S. Navy officers in providing a consistent and widely agreed strategic rationale with the entire navy; along with tables, maps, and analytical statements of intelligent values. Contains 8 documents covering global campaign, peacetime operation, crisis management, and war-termination issues.
2011.335.009	United States Navy and the Vietnam Conflict, The, Vol. 1: The Setting of the Stage to 1959	Hooper, Edwin Bickford	This volume provides the backdrop of historical background for the period up to 1959 that will assist readers to understands the naval roles in this conflict in history. It shows the U.S. naval roles evolved and their relationships to the complex struggles, strategic consideration and the impact of US Naval power that implicated during this period in time. This volume also trace the story of Vietnam-related actions of US Navy and the initial period of American military aid and the 1st 5 years that followed the French-Viet Minh War.
2011.336.001	Fighters 1939-45, Attack and Training Aircraft	Munson, Kenneth	From the P-38, the ME-109, the Spitfire, and the Zero to the Corsair, the Hellcat, and the Russian Yak, the principal fighter aircraft developed and flown from 1939 to 1945 are illustrated in full color and described in detail in this new volume in The Pocket Encyclopedia of World Aircraft in Color.

Object ID	Title	Author	Summary
			Eighty of the fighter, attack, and training aircraft of World War II are shown in their major aspects—side elevation, plan view from above, and plan view from below—in drawings that combine maximum visual appeal with essential details of construction. The accompanying captions specify important details such as the date of each plane's first appearance, the pilots and campaigns with which it is most strongly identified, and its engine construction, wing span, length, height, take-off weight, maximum speed, operational ceiling, and endurance. The text, fully describing each fighter's development and service career, rounds out this unique pocket introduction to one of the most exciting periods in military aviation history. KENNETH MUNSON, who specialized for many years in the study of military aircraft, is the author of many aviation books, including four devoted to the aircraft of World War II. The principal artist, JOHN WOOD, who works with the British Interplanetary Society, has illustrated many of the standard works on aircraft. (from dust jack flap)
2011.336.002	Bombers, Patrol and Transport Aircraft, 1939-45	Munson, Kenneth	Descriptions of 80 of the principal bomber aircraft developed and flown from 1939 to 1945 are illustrated in full color and described in detail in this new volume in The Pocket Encyclopedia of World Aircraft in Color.
2011.336.003	Division Officer's Guide - 1972	Noel, John V.	Just as Watch Officer's Guide tells the young officer what to do and how to do it while he is on watch on the bridge or on the quarterdeck, Division Officer's Guide tells him how to handle his duties the rest of the time when he is not on watch.
2011.336.004	Ops Officer's Manual, The	Deutermann, Peter T.	Manual for officers in the billet of operations officer in a combatant ship of the U.S. Navy. It does not address

Object ID	Title	Author	Summary
			tactics and doctrine. It concentrates instead on the elements of managing the operations of a warship.
2011.336.005	Attacks on the Tirpitz, The	Frere-Cook, Gervis	This book is an account of all the efforts made by the British to obliterate the German battleship Tirpitz. As soon as Winston Churchill became Prime Minister he took a keen interest in her destruction. As a result no less than 22 separate attacks were mounted against the Tirpitz.
2011.336.006	Soviet Military Power : An Assessment of the Threat 1988	U. S. Dept. of Defense	Soviet Military Power was a Public Diplomacy publication of the United States Department of Defense, which provided an estimate of the military strategy and capabilities of the Soviet Union during the final years of the Cold War, ostensibly to alert the U.S. public to the significant military capabilities of the Soviet Armed Forces. First published in early October, 1981, it became an annual publication from 1983 until the collapse of the Soviet Union in 1991. Already in draft as the Soviet Union collapsed, the 1991 version was retitled "Military Forces in Transition". In addition to the majority English version, Soviet Military Power was translated, printed, and disseminated in a variety of languages, including German, French, Japanese, Italian and Spanish. (from Wikipedia.org)
2011.336.009	Soviet Warships 1945 to the Present	Jordan, John	The first edition of Soviet Warships was published in 1983. Since that time there have been important political developments, and new types of surface warships have entered service. It was felt that the scale of these developments was such as to justify a complete re-write, rather than a simple updating of the original.
2011.336.010	Fighting Ships of the World	Preston, Antony	Gives an in depth account of 40 years of warship building, from the beginning of WWII to 1980. Over 400 classes and individual vessels are described and illustrated.

Object ID	Title	Author	Summary
2011.336.011	USS Tripoli (LPH-10) - Westpac '83 (April 27 - October 23)	Wensing, K. (ed.)	This is a cruise book for the USS Tripoli (LPH-10), an amphibious assault ship designed to transport helicopters and Marine Corps troops to foreign shores for the conduct of amphibious operations. The Tripoli departed its home port of San Diego, CA on April 27, 1983 and made port calls at Pearl Harbor, HI; Hong Kong, British Crown Colony; Subic Bay, Philippines; Korea and Okinawa, Japan before returning to San Diego on October 23, 1983.
2011.338.001	United States Destroyer Operations in World War II	Roscoe, Theodore	This book presents the dramatic story of the United States Navy's Destroyer service--the story of the DD's and DE's and the destroyermen that waged and won the greatest sea, anti-submarine, and surface-air battles in naval history. This historical record is paralleled by a review of methods and techniques, which supports the volume's primary purpose--to serve as an informative, instructive, and inspirational text for those in Naval Service who are interested, directly or indirectly, in destroyer warfare.
2011.338.002	War at Sea : a Naval History of World War II	Miller, Nathan	This is a comprehensive history for the general reader with details operations of all combatants that were involved in the World War II, includes the primary navies - the U.S., the British, the Germans, and the Japanese. This book also filled with anecdotes and personal accounts from the surviving servicemen documenting struggles and what life at sea was like, along with archival materials such as intelligence documents, ship logs, and official reports.
2011.338.003	Destroyer Escorts in Action	Adcock, Al	Over 565 Destroyer Escorts and Fast Attack Transports were built. Named to honor US Navy heroes. Coverage of the DEs, DERs & APDs into the 1990s. (Retrieved from www.squadronsignalpublications.com)
2011.338.004	Kamikaze	NFV, Inc.	Documents through Allied

Object ID	Title	Author	Summary
			and Japanese newsreel film, the war in the Pacific from the attack on Pearl Harbor to the dropping of the atomic bomb on Hiroshima.
2011.338.005	Fleet That Came to Stay, The	United States. Office of War Information.	"Visual story of Japan's Kamikaze pilots, made during the three-month campaign of the Battle of Okinawa, from Easter Sunday morning, April 1, 1944, through the end of the action." Copy of video put out by the US Office of War Information ; War Activities Committee.
2011.338.006	World War II With Walter Cronkite : Air War Over Europe	CBS Inc.	Part of CBS Video Series, World War II With Walter Cronkite. Video includes 4 segments of the Air War over Europe: Target Ploesti Raid on Schweinfurt Counterblast: Hamburg and Guided Missiles (about the German V- series of guided missiles--includes information on Werner von Braun and Albert Speer) Archival original footage. 85 minutes. (Amazon.com)
2011.338.007	Air War : Naval History	United States. Navy	Poor quality reproduction of US government films. The video contained 4 parts: "Hook Down, Wheels Down", Part I : The Story of the United States Navy's Aircraft Carriers, and Part II : Heritage of Action. This portion is a historical color documentary on aircraft carriers from USS Langley to USS John F. Kennedy. It contains live footage and interviews. It also includes some classical events such as launching of B-25's, the suicide Kamikaze, etc. The Hooks Down, Wheels Down video (approximately 58 minutes for both parts) was produced for the Chief of Naval Operations by the Office of Information at the Naval Photographic Center. We have other VHS copies of the above video that might be better quality. "December 7th" - (approximately 34 minutes) Battle history on the attack of

Object ID	Title	Author	Summary
			Pearl Harbor. It shows Pearl Harbor before, during and after the attack. "Story of Naval Aviation" (approximately 27 minutes) - This portion consist of footage and fascination of flying in the Navy which includes the first transatlantic flight as well as the first U.S. carrier landing. This video was produced by the U.S. Navy and reedited by N.F.V. (Non-Fiction Video) in 1991.
2011.338.008	Semper Fidelis : The Story of the U.S. Marines in WWII and Korea	Dastar Corp.	This films contains 6 hours on the history of the United States Marine Corps. It covers from pre-war training to final victory in the Pacific. Witness their story through the eyes and lenses of Marine combat cameramen in this stunning and unforgettable collection of authentic, historical film footage. From bloody beaches and dense jungles to barren hilltops, follow the Marines into battle and observe the most legendary engagements in Marine Corps history. Never before had the world seen such heroism and self-sacrifice as was exhibited by the Marines in the pivotal battles of World War II - including Guadalcanal, Tarawa, Iwo Jima, Okinawa and many more. Also included, as extra features, are summaries of some of the key events and personalities of the war against Germany in the European theatre. (from www.timeless_video.com) Contents: - Guam & Midway -- - Guadalcanal & Bougainville -- - Rabaul & Saipan -- - Tinian & Peleliu -- - Iwo Jima & Okinawa -- - Pusan & 1st Marine Division -- - No Name Hill & Inchon
2011.338.009	Fighting Destroyer Escorts of World War II	Davis, Martin	Video devoted to the history of DEs and APDs. It concentrates on men who crewed these ships and the impact these ships had on their lives during World War II. President Franklin D. Roosevelt commissioned 565 of these "trim but deadly" warships to take on the German U-boats and turn the tide of the Battle of the Atlantic. They

Object ID	Title	Author	Summary
			went beyond their anti-submarine and escort duties to become Navy legends as the "little ships that fought with the courage of a battleship." They battled the Japanese navy, blasted the Kamikazes, supported the D-Day landings and saw our boys safely home. Harry S. Truman saved them. Now the men who manned the DEs have brought this rare ship home. Dramatic footage and the men who fought the battles tell this little known story.
2011.338.010	Enemy Below, The	Powell, Dick (director, producer)	When an American destroyer detects a German U-boat prowling beneath the surface, its captain (Mitchum) immediately pursues the enemy. The sub's commander (Jurgens) is a wily veteran who uses ingenious evasive tactics while angling for position to torpedo the destroyer. As both men try to outthink and outmaneuver each other, the chase becomes a deadly chess game in which any mistake can bring defeat and death. Alternating between both ships and their crews, the film offers an impartial view of war that portrays the American and German captains as professional soldiers who respect each other's abilities. The film won a 1957 Academy Award for Best Special Effects.
2011.338.011	Little Ship, Big War : The Saga of DE343	Stafford, Edward Peary	This is a true story of men against the sea. It is a day to day account of the ship in which they sailed--the destroyer escort Abercrombie--from the time her keel was laid in Orange, Texas, through the Battle of the Philippine Sea, to picket duty against kamikazes during the invasion of Okinawa, to battle action in the Sea of Japan, the signing of the peace treaty in Tokyo Harbor and eventual decommissioning in San Francisco.
2011.338.012	Little Wolf at Leyte	Doscher, J. Henry	The story is told from the vantage point of the USS Samuel B. Roberts (DE-413) and its effects to all of the 13 little ships of Task Unit 77.4.3 that was entered into battle of

Object ID	Title	Author	Summary
			Leyte Gulf. Includes bibliographical references (p. 140-144) and index.
2011.339.001	Jane's Fighting Ships - 1924	Parkes, Oscar (ed)	Fighting ships of the world's navies as of 1924, giving tonnage, dimensions, armament and many other details. Of additional interest are the many pages of advertisements for nautical items in the front of the book, many with photographs. (from Amazon.com)
2011.339.002	Jane's All the World's Aircraft - 1939	Grey, C. G. (ed)	Jane's All the World's Aircraft Editors C G Grey - Editor: 1916 - 1940 Charles Grey, or C G as he was known, the second editor of Jane's All the World's Aircraft, is considered by some to be the first great aviation journalist. He became an honorary Companion of the Royal Aeronautical Society. Grey was born on 13th November 1875 and educated at the Erasmus Smith School in Dublin and as an engineer at the Crystal Palace School of Engineering. Grey's first job was as a staff writer for The Autocar. His secondary role as the magazine's aviation specialist resulted in a commission from Iliffe and Sons, Ltd. to edit a penny weekly aviation paper called The Aero. In 1911, in partnership with Mr E V (Later Sir Victor) Sassoon, Grey founded The Aeroplane and he remained editor until 1939. Grey took over as editor of Jane's All the World's Aircraft from 1916 to 1940. From 1939 he was air correspondent of The Yorkshire Evening Post, Edinburgh Evening News and various overseas journals. Grey also wrote a number of books including A History of British Air Ministry (1940), The Luftwaffe (1944) and The Civil Air War (1945). "Anyone who read C G in the 'twenties and 'thirties without having met him might have

Object ID	Title	Author	Summary
			supposed his critical references, and sometimes perverse and acid comments, reflected his nature and personality. Nothing could have been further from the truth. As long as we knew him he was a gentle and kindly man, always charming and generous to his friends, among whom he numbered rivals. Today there are men on Flight's staff who recall a kind word of encouragement here or a spot of advice there from the one-and-only C G, particularly when they were taking their first tentative steps in the hard and competitive world of journalism. His goodwill continued to be reflected in frequent correspondence. From the first to the last occasion upon which we talked to him, he never once failed to express either an original thought or to reveal an unexpected viewpoint on some current topic. Neither his writing nor his conversation was ever lacking in humour and regardless of one's age." - Flight Magazine, 18th December 1953, published after Grey's death. Leonard Bridgman - Editor: 1941 - 1959 "Leonard Bridgman, who died on 19th December, 1980, will be remembered with respect by many people for achievement in a range of widely differing interests and skills,"wrote John W R Taylor, his successor as Editor for Jane's All the World's Aircraft. Bridgman's first assignment in aviation was in 1913, aged 18, when one of his drawings was used to illustrate the Hendon Air Race programme. As payment he received a flight in a 70 hp Maurice Farman biplane. During the First World War, Bridgman served as an officer in the Honourable Artillery Company. He is best remembered within the aviation industry as the journalist who joined C G

Object ID	Title	Author	Summary
			Grey in 1923 on the staff of Jane's All the World's Aircraft after working on the staff at The Aeroplane. Bridgman also edited Esso Air World from 1939 to 1963. In 1956 in recognition of his contribution to technology, principally his work on Jane's All the World's Aircraft, Bridgman was awarded a Paul Tissandier Diploma by the Federation Aeronautique Internationale. By that time, he had been associated with flying and publishing for 43 years. Bridgman was also a talented artist and produced many aviation paintings, wash drawings and illustrations. He received commissions for numerous advertisements for British companies and illustrated Oliver Stewart's text for The Clouds Remember, one of the classics of aviation literature. 2011.339.009	Corsairs and Flattops: Marine Carrier Air Warfare, 1944-1945	Condon, John Pomeroy	When Marine aviation squadrons were assigned carrier duty in 1944, they lacked the opportunity be properly trained and equipped for carrier operations. "Essentially no deck time was allotted to Marine aviators going through flight training, and little after they reached the operational forces. This lack of basic carrier training coupled with the urgency of the situation and, in some part, due to the Corsairs carrier suitability, resulted in tragic loss of life and equipment. Most of those losses were operational, not combat.. Not only were the Marines lacking in carrier experience, they were also weak in navigation and instrument flying skills. Throw in some bad weather, and you have all the ingredients for a disaster." From the Foreward. The Marines were pressed into service because at this stage in the Pacific War, there were fewer closeby islands to serve as bases for the Marine aviators to provide close in air support for Marine land based units and the increased use of kamikaze pilots required an increased need for pilots and planes to fly Combat Air Patrols (CAPs) over the carrier groups. The USMC pilots participated in Iwo Jima, Okinawa, Indochina, the Philipines and Tokyo. The book includes never-before-

2011.339.010	Fight to Fly	Houston, Jerry	U.S. Navy Lieutenant Paxton Langford receives orders to a fighter squadron deploying to Vietnam—an answered prayer—for he fears the conflict will end before he gets his chance at an enemy MiG. To him, his future couldn't look brighter. But then Sally Banks finagles her way into his life...and his heart. That she doesn't understand the war, or approve of participants in war, rocks their romantic boat, but even so, their attraction holds and should prevail, except for an unplanned indiscretion when Pax arrives in San Diego. Combat flying from carriers provides more than enough challenges, but Pax faces a force deadlier than MiGs, SAMs, or flak—one against which he has no defense. How he confronts this juggernaut will determine his future in the Navy and with Sally. Such high stakes magnify any misstep's cost. Lieutenant Langford's emotional gauntlet provides rarely attained insight into love and war. (from back cover)
2011.339.012	Operation Lifeline : History and Development of the Naval Air Transport Service	Lee, James	FOREWARD: THE RECORD OF the Naval Air Transport Service is a record of achievement in spite of deficiencies and delays in its every essential requirement. As the year 1941 passed the halfway mark the fact became clear, if indeed it had not been so previously, that the United States was headed in the direction of a mortal danger against which it was almost totally unprepared. Time had been wasted and was being wasted. The vital need was to recapture time that had been lost; to save time that was about to be lost. One obvious means of doing so was to exploit high speeds where previously we had used slow speeds. An obviously appropriate field

Object ID	Title	Author	Summary
			for exploitation was that of transport. Even at that eleventh hour it might be expected that air transport equipment would have been procured, personnel assigned and trained, an organization perfected, and supporting facilities prepared. None of these things happened, however, till six days after Pearl Harbor when a directive was signed and the Naval Air Transport Service came into being. Plans were made at once to procure the necessary aircraft and personnel, which must necessarily be drawn from commercial airlines since the Navy had neither the proper equipment nor personnel to handle the job immediately. At the time the first NATS Squadron was commissioned — VR-1 on 9 March, 1942, at NAS, Norfolk — NATS comprised five R4D aircraft, 27 officers, and 150 men. Three and a half years later NATS was operating a total of 431 planes. It was turning out impressive totals in plane-miles, passenger-miles, and ton-miles of cargo. But it was still plagued with shortages of planes, for of the total load required to be carried by air for the support of the Pacific Fleet and its bases, NATS could handle less than half. Of the total four engine land planes obtained under contract for the armed services during the war, NATS received less than one-fifth, and much of that not until near the end of the war. It was a classic example of too little and too late.
2011.339.014	Navy's Air War: A Mission Completed, The	Aviation History Unit, OP-519B, DCNO (Air)	FOREWORD: It has often been noted that aviation came of age in World War II. This is true of naval aviation as it is of the air forces of our Army, our allies, and, indeed, of our enemies. This book gives the people of the United States a picture of naval aviation as it was organized and functioned during the recent conflict. It

Object ID	Title	Author	Summary
			not only includes the story of air's part in operations already well known but also sets forth less publicized and less exciting activities. There are chapters on training, on maintenance, on procurement, and on many other matters not hitherto given much space but vital to the success of the Navy's air war. In a word it attempts not just to hit the high spots but rather to give to the people the story of the naval air force as a whole, as a team reaching from a desk in Washington to the fighting areas. For thirty years I have had the honor to play a part in naval aviation. During that time I have watched it grow through two world wars. If this book seems to indicate that many changes in equipment, tactics, and organization were made while the conflict was in progress, that was because aviation was a relatively new weapon and we learned as we went. That in itself augurs well for the future. When new equipment and new tactics are developed, naval aviation will prepare to meet them in the same spirit and with the same determination that it showed in the war just past. Personally, the greatest memory of my years with naval aviation is of those with whom I served, of all those who through the years have contributed to the development and growth of naval air power, and especially of those who gave their lives that this nation might emerge victorious from the greatest war of all time. MARC A. MITSCHER ADMIRAL, USN
2011.339.015	Doolittle's Tokyo Raiders.	Glines, Carroll V., Jr.	The first bombing raid against Japan, led by General (then Lt. Colonel) James H. "Jimmy" Doolittle, was no glory-seeking dash into the wild blue yonder. It was a bold master stroke designed to bolster lagging U. S. morale and force the

Object ID	Title	Author	Summary
			Japanese to defend their own shores with fighter planes intended to extend their areas of conquest. In vivid, "you-are-there" style, Colonel Glines takes the reader through the tense weeks of preliminary planning behind this hazardous daylight attack... the painstaking, round-the-clock concentration on a spiderweb of intermeshing details as some of the keenest brains in the U. S. Army Air Forces and the U. S. Navy wrestled with such revolutionary problems as training pilots to launch heavily loaded, land-based bombers from the cramped space of a carrier's deck. The events aboard the bombers are graphically related by a member of each crew who tells — in his own words — his experiences, thoughts and emotions from take-off to bailout or crash landing in China. Then came the aftermath of capture, imprisonment, execution, starvation, or — for the lucky ones — escape to freedom. The fate of the imprisoned airmen and their Chinese benefactors is documented by testimony from the Japanese War Crimes Trials. Doolittle's Tokyo Raiders was written with the full endorsement and cooperation of General Doolittle and the Tokyo Raiders organization. From thousands of official papers, diaries, charts and from personal interviews, Colonel Glines has forged a gripping drama of wartime crisis that pulses with the urgency, resourcefulness and determination of brave airmen making an appointment with destiny. (from dust jacket flap)

Object ID	Title	Author	Summary
			an August day in 1914; and the six decades that followed have shown beyond doubt that mankind's leaning towards violence as the solution to all problems, while perhaps diminishing in the individual, is a constantly and hideously ascending curve at a national level. In August, 1914 the world's battlefields were ruled by sheer weight of gunpowder and steel, and horsed cavalry was still a realistic weapon; the handful of flimsy 'heavier-than-air' machines which spluttered over the heads of the grey and khaki legions were an interesting and slightly ridiculous novelty, with perhaps some small value as mobile reconnaissance posts. A little more than 60 years later, air power is accepted without question as the decisive weapon in any major nation's armoury ; and one man, riding a 2,000 mile -an hour thunderbolt, can slaughter millions in a poisoned fire-storm at the mere touch of a switch. The growth of air power from a joke to a madman's nightmare has taken less than a generation, and the men and machines who people this fantastic story have as much colour and fascination as any branch of human history. To record their achievements, their appearance, the very 'nature of the best', the Publishers have gathered together in these volumes a selection from the roll-call of military flying, dissected and described by leading experts from all over the world, and illustrated in all their fascinating detail by the cream of England's aviation artists. We are on the brink of Space; soon, the manned aircraft may be as much an echo from the past as the Swiss pikemen or Lee's cavalry. It is the hope of the Publishers that these books will help to keep the great names sharp in the memory for just a little longer. Fokker, Sopwith, Hawker, Messerschmitt and Macchi; Vickers and de

2011.339.017	Igor Sikorsky : His Three Careers in Aviation	Delear, Frank J.	A biography of one of aviation's outstanding pioneers, covering his incredible three careers in flight. The designer of the first multi-engined airplane, the ocean-spanning Flying Clippers of the 1930's, and the first practical helicopter is revealed as a humble genius — a man of kindness, humanity, piety, and humor, whose tenacity and intelligence made his "impossible dreams come true. Igor Sikorsky's story is a fascinating one — his attempts at a helicopter as early as 1909 in his native Russia; the building of the four-engined "Grand;" recognition by Czar Nicholas; his move to America and the "factory" on a chicken farm; the ill-fated S-35

Object ID	Title	Author	Summary
			designed for the first Atlantic crossing; the huge flying boats; his friendship with Charles Lindbergh; eventual reality of the helicopter; his beliefs about the future of science and mankind. Mr. Sikorsky has achieved every honor awarded in the field of aviation. With a Foreword by Lieutenant General James H. (Jimmy) Doolittle, USAF (Ret.). Jacket design by Ragna Tischler Goddard (from dust jacket flap)
2011.339.019	Complete Book of Fighters : An Illustrated Encyclopedia of Every Fighter Aircraft Built and Flown	Green, William	From Library Journal Aviation readers here have a pair of wrist-benders to peruse (these two books together weigh about 12 pounds). Both books are by long-time aviation authors, are exhaustively thorough and illustrated, and represent lifetimes of work. British aviation historians Green and Swanborough began their encyclopedia back in June 1971 in the back pages of Air Enthusiast magazine with a column called "Fighter A to Z." In the intervening decades entries were added and corrections made. To produce this encyclopedia of "every fighter aircraft built and flown," cutaway and full-color renderings were added for the better-known types. A few aviation enthusiasts might doubt that "every" fighter is represented, but the nearly 1700 entries and over 4000 illustrations will give you your money's worth, and then some. Musciano's interest in seaborne aviation began even before he designed American carriers during World War II. His history starts with Civil War balloon ships, continues through the early uses of aircraft in World War I, and then covers the explosion of diversity and interest through World War II and on to the modern era's "force projection" role. Musciano's effective telling of the story of aircraft

Object ID	Title	Author	Summary
			carriers relies on short entries topped with headlines and illustrated with black-and-white photos and his own meticulous arrangement drawings of the ships and places. Both books are recommended for public libraries. Mel D. Lane, Sacramento, Cal. Copyright 1995 Reed Business Information, Inc. (from Amazon.com)
2011.339.020	Vietnam : The Helicopter War	Chinnery, Philip	Unique compilation of helicopter operations stories covering the entire period of the US involvement in SEA the '60-'70s. The British author solicited these accounts and photos from veteran aviators who drew them from their memories and provided photos from their personal collections - most photos never seen before as they are not from military files. These are are real, no BS, accounts of what it was like to serve in Army, Navy, Air Force and Marine helicopter units in the complex and challenging conditions which made up the US effort to assist the nation of South Vietnam. Numerous short story accounts detailing thrills, terror, humor and pathos which made up the daily lives of military helicopter pilots in Southeast Asia. Great photos of every type helicopter flown in that theater. Mention is made of the USS Midway (CV-41) on page 176. (from Amazon.com)
2011.339.021	Handbook of Rockets and Guided Missiles, The	Bowman, Norman John	INTRODUCTION: Guided missiles and rockets are most commonly divided into classes according to the place of launching and the target. For example, under ground launched missiles we have the anti-aircraft type where the target is an objective in the sky, and the ground-toground type where the target is another ground installation. These types have rather different requirements and

Object ID	Title	Author	Summary
			characteristics as we shall see. Under the air launched missiles we have those where a ground installation is the target -and those where another plane or missile is the target.
2011.339.022	Knights of the Sky	Valencia, Eugene A.	There were - knights of the sky. Flyers who made the sky a vast battle arena where chivalry last reigned. Pilots who flew with compassion for fellow flyers and the courage to battle a valiant foe. Men who conquered five or more of the enemy and were honored with the coveted title - fighter ace. (from dust jacket back)
2011.339.023	TFX Decision: McNamara and the Military, The	Art, Robert J.	The F-111 fighter-bomber is without doubt one of the most controversial pieces of military hardware of this decade. The plane that is now undergoing rigorous combat tests in Vietnam and capturing major headlines in the press has been a source of contention and intense rivalry since its original conception in 1959. The issue around which the debate has raged is former Secretary of Defense Robert McNamara's decision to award the contract for the development of the TFX (Tactical Fighter Experimental — the original designation of the F-111) to General Dynamics–Grumman. This decision and the events leading to it are the subject of Robert Art's book. The TFX decision is a classic study of civilian-military relations. It was the culmination of a dramatic confrontation between the military and civilian leaderships within the Pentagon over the largest procurement contract for aircraft ever given by the Defense Department. When Secretary McNamara awarded the development contract to General Dynamics–Grumman, not only did he override the military boards of the Navy and Air Force, which had unanimously recommended Boeing, but he also firmly established civilian control

Object ID	Title	Author	Summary
			over the military and demonstrated the power of the highly publicized McNamara management techniques that have profoundly influenced the running of our government. Mr. Art probes deeply into the sources of the controversy. He analyzes the service rivalries, partisan politics, military-civilian friction, the TFX's many technological innovations, and shows how they led to complex and often emotional confrontations. He tells why McNamara chose General Dynamics–Grumman and how the Secretary was able to enforce his decision over the objections of the military brass who had traditionally been the final authority for selecting development contractors for new weapon systems. He also discusses the acrimonious ten-month debate over the TFX decision in the Senate Permanent Investigating Subcommittee headed by Senator McClellan, which subsequently focused the nation's attention on this controversial issue. The TFX Decision is at once a citizen's report of the birth of a modern military airplane, and an analysis of how Secretary McNamara thought and worked. Most important, however, it is a close look at government on the highest levels in the process of decision-making. As such, it is a vital glimpse into a little understood realm. Robert J. Art was born in 1942 and received a B.A. degree summa cum laude from Columbia University and a Ph.D. from Harvard University. He is a member of Phi Beta Kappa, assistant professor of politics at Brandeis University, and a research fellow at the Center for International Affairs, Harvard University. Mr. Art lives in Cambridge, Massachusetts.

2011.339.025	Illustrated Encyclopedia of Aircraft Armament : A Major Directory of Guns, Rockets, Missiles, Bombs, Torpedoes, and Mines; Their Operating Principles, and Tactical Deployment	Gunston, Bill	Today's generation of high-performance combat aircraft is among the most potent and awe-inspiring of man's technological creations. The millions of people who flock to airshows, build model kits, and buy aviation books and magazines testify to the enduring fascination. It should not be forgotten, however, that all this glamorous hardware exists to fight — most combat aircraft are weapons platforms, and their mission is to carry and deliver ordnance to a specific target. However simplistic it may sound, it is worth stressing that without aircraft armament, the fighting aircraft would not exist. This book provides the reader with a fully illustrated directory of all the airborne weapon systems that are currently in service, or being actively developed, worldwide. It falls into two distinct sections. The first 50 pages are devoted to examining the evolution of aircraft armament from the earliest days to the present. This historical survey is split into three segments: pre-1920, pre-1950, and post-1950. It takes the reader from the dawn of fighting in the air and the initial problems of fitting weapons onto aircraft, through World War II and the proliferation of guns, turrets, rockets, and bombs, to the conflicts in Korea, Israel, Vietnam, and Afghanistan, a period that has witnessed very rapid development of a wide range of guided missiles, torpedoes, "smart" bombs, mines, and so on. The second and largest part of the book consists of the directory of weapons currently in the military arsenal that can be fitted either to fixed-wing aircraft or helicopters. This again is divided according to weapon type, with separate sections devoted to air-to-air

Object ID	Title	Author	Summary
			missiles, unguided ordnance (free-fall bombs, rockets, submunition dispenser systems, mines); air-to-surface missiles and torpedoes; and guns and installations (turrets and pods). The text provides comprehensive specifications and data for each entry, while the narrative text describes the weapon's design history, combat use, and in-service status. The illustrations include a superb selection of color and black and-white photographs, cutaway drawings, and graphic explanatory diagrams that illustrate the operating principles and tactical or strategic deployment of the weapon types under discussion. No other book available offers so much information and so many color illustrations on this fascinating subject. The Illustrated Encyclopedia of Aircraft Armament will establish itself as the reference work on aircraft weapon systems for many years to come. BILL GUNSTON is a former RAF pilot and flying instructor, who has spent most of his working life accumulating a wealth of information on aerospace technology and history. He is an assistant compiler of Jane's All the World's Aircraft and was formerly technical editor of Flight International and technology editor of Science Journal. His numerous books include The Illustrated Encyclopedia of the World's Modern Military Aircraft, Modern Fighting Aircraft, and American Warplanes. Jacket design by Peter A. Davis (from dust jacket flaps)

2011.339.026	Bell Aircraft Since 1935	Pelletier, Alain J.	This text looks at the history of the aircraft manufacturers Bell, whose family of helicopters have been produced in their thousands for military and civil operations worldwide. It also

			deals with the more unorthodox aircraft built before and during World War II. (from Amazon.com)
2011.339.027	General Dynamics Aircraft and Their Predecessors	Wegg, John	Covers complicated histories of the companies which eventually led to the production of aircraft under the General Dynamics name. Products are described in great detail and illustrated with photographs and general-arrangement drawings. Production lists are included for a wide range of aircraft types covering aviation for more than 70 years. (from dust jacket flap)
2011.339.028	Japanese Aircraft, 1910-1941	Mikesh, Robert C.	This work looks at the history of Japanese aircraft between 1910 and 1941. It includes descriptions of aircraft that range from the well known to the obscure. (from Amazon.com)
2011.339.029	British Naval Aircraft Since 1912	Thetford, Owen Gordon	An historical summary of British naval aviation is followed by technical descriptions, service histories, squadron allocations, major operational events, illustrated by photographs, and a general arrangement drawing of each major type of land plane, seaplane, flying-boat, or helicopter. This main section is followed by short descriptions and photographs of all other types used including rigid and non-rigid airships. Appendices include listings of naval aircraft strength, aircraft carriers, and other ships to which aircraft have been attached. The collection of the Fleet Air Arm Museum is presented in detail and there is a bibliography.
2011.339.030	Fairey Aircraft Since 1915	Taylor, Harold Anthony	From 1918 to well after World War II, Fairey's name was associated with some of the best British naval aircraft, from the Fairey I11s to the Gannet. Both these and more are fully described and illustrated in this book. There is also a complete history of the aircraft by constructors' names.

			(from Amazon.com)
2011.339.031	Supermarine Aircraft Since 1914	Andrews, C. F. (Charles Ferdinand)	Supermarine, one of the great names in British aviation, was associated from its earliest days with flying boats and amphibians - the Channel Type and Sea Eagle saw early airline service, and the Sea Lions initiated Supermarine's association with the international Schneider Trophy contests. The Spitfire, arguably one of the world's best-known aeroplanes, owed its existence to Supermarine's Schneider seaplane experience and the highly successful collaboration with Rolls Royce. After the war Supermarine played a major part in the development of jet aircraft for both the Royal Air Force and the Royal Navy. This title traces the company's entire development; beginning with the aircraft company founded at Woolston by Noel Pemberton-Billing and concludes with the Type 316-318 B.12/36 Bomber. It is illustrated with some 300 photographs and with nearly 80 general arrangement drawings, which include some, hitherto unpublished projects. Appendices cover the dispersal of Spitfire aircraft production, a list of production types and a list of serial numbers by type. Review "Couched in the real language of aviation, with scarcely a wasted word, this book features a mass of fascinating key material from surviving company records, illustrated by countless new photographs, the discovery of which is itself a notable achievement." Air Pictorial (from Amazon.com)
2011.339.032	Curtiss Aircraft, 1907-1947	Bowers, Peter M.	This important book is a complete history of the pioneer work of Glenn Curtiss and of, the subsequent companies which bore his name. Glenn Curtiss was involved in some of the earliest practical flying experiments with gliders and powered aircraft. Before

Object ID	Title	Author	Summary
			the First World War he had built the America flying-boat, which was sold to Britain and led to the Royal Naval Air Service's family of Felixstowe patrol flying-boats. It was a Navy/Curtiss flying-boat, the NC-4, which, in May 1919, made the first-ever aerial crossing of the North Atlantic. Many thousands of First World War pilots learned to fly on the Curtiss J N Jenny, and this famous aircraft was to live on for many years, mainly in the hands of the barnstormers – the men who toured the United States giving flying exhibitions and joyrides. Through the 1920s and 1930s such military types as Hawks, Falcons, Shrikes and Helldivers achieved worldwide reputations. For the civil market there was the Robin light aircraft and for the airlines the Condor sleeper transport. Curtiss built some beautiful racing biplanes and on two occasions, as seaplanes, these won Schneider Trophy races. During the Second World War Curtiss aircraft were used by U S, British, French and other services. There was a range of single-seat fighters including the P-36, Tomahawk and Kittyhawk; there were naval types such as the S B C and S B2C Helldivers, the Seagull, Seamew and Seahawk; there were large numbers of C-46 Commando transports, many of them still flying; and there was the little-known C-76 all-wood Caravan. All these aircraft and many others, including projects and prototypes, are described and illustrated with a large number of photographs and general-arrangement drawings. (from dust jacket flap)
2011.339.033	Warbirds of World War II, vol. 2, part 1 : Mitsubishi A6M Zero	Stone, Fergus	We also have a DVD of this: 2009.310.023. Japan's Mitsubishi A6M Zero was

Object ID	Title	Author	Summary
			the Imperial Air Force's most famous and used aircraft. They entered service over China in July 1940 and stayed until the very end of World War II. (from slipcase rear)
2011.339.034	Warbirds of World War II, vol. 2, part 2 : Messerschmitt Bf109	Stone, Fergus	We also have a DVD of this: 2009.310.059. Although a tricky aircraft on take-off and landing, the Messerschmitt BF109 was the craft of choice by most of Germany's leading aces and they preferred to fly them even when new fighters became available. (from slipcase rear)
2011.339.035	Warbirds of World War II, vol. 2, part 3 : Hawker Hurricane	Stone, Fergus	We also have a DVD of this: 2009.310.059. Most of the RAF's fighter command kills during the battle of Britain were made by the Hawker Hurricane. The "Hurri" was easy to fly, stable as a gun platform, carried eight guns and it could out turn any other fighter in the sky. (from slipcase rear)
2011.339.036	Warbirds of World War II, vol. 2, Part 4 : Griffon Supermarine Spitfire	Stone, Fergus	We also have a DVD of this: 2009.310.059. With the ability to out match the German Focke-Wulf FW 190, this British aircraft drew the honor of being the first Allied fighter to shoot down a Messerschmitt Me262. With lean powerful looks and a top speed of 460 mph the Griffon Supermarine Spitfire made an ideal fighter. It's [sic] ability as an [sic] V-1 flying bomb interceptor was further strengthened by extra fuel tanks in the wings and fuselage. The Navy version of the Spitfire was the Seafire. (from slipcase rear)
2011.339.037	Warbirds of World War II, vol. 2, part 5 : Grumman F6F Hellcat	Stone, Fergus	We also have a DVD of this: 2009.310.023. The Grumman F6F Hellcat was a major step forward in carrier aviation. By the end of the war the Hellcat, along with it's [sic] sister the Corsair, dominated the Pacific. With over 12,000 produced, the F6F was a perfect example of a simple design being in the right place at the right time.

Object ID	Title	Author	Summary
			(from slipcase rear)
2011.339.038	Warbirds of World War II, vol. 2, part 6 : North American B-25 Mitchell	Stone, Fergus	Of all the American twin-engine bombers, the North American B-25 Mitchell was the easiest to fly and land. General Doolittle's Tokyo Raiders proved it could do the near impossible by flying off the USS Hornet. It's [sic] famed ease of operation allowed the pilot to give his attention to the more important aspects of combat flying.
			(from slipcase rear)
2011.339.039	Warbirds of World War II, vol. 2, part 7 : Vought F4U Corsair	Stone, Fergus	We also have a DVD of this: 2009.310.023. After some early modifications, the Vought F4U Corsair was cleared for full combat operations at sea. The Corsair went on to become, according to many, the finest overall World War II fighter. So successful was the Corsair that production continued up to, and including, the Korean War.

2011.339.040	Fifty Years of Japan's Aviation, 1910-1960, The	Kori, Katsu	Chronicles aeronautics in Japan from 1910-1960. Photos throughout.
2011.339.041	Illustrated Encyclopedia of Aircraft, The : Index (Part 1)	Morse, Stan (ed)	Numbers 215 and 216 are the final issues of THE ILLUSTRATED ENCYCLOPEDIA OF AIRCRAFT, and bring to completion the world's most comprehensive aviation encyclopedia. In a total of 4320 pages we have described well over 12,000 aircraft in more than 31/2 million words, and illustrated them with over 17,000 pictures. For the editorial staff and the contributors to this publication, compiling the Encyclopedia has been an unforgettable experience, not least because we soon learnt that we had a large, loyal and enthusiastic readership. Your letters of praise (many), your valuable criticisms (thankfully few) and your suggestions have been very important to us, and we most sincerely thank you for the support that has made it possible to compile this

Object ID	Title	Author	Summary
			mammoth work. We have now undertaken a new and equally exciting publication, WARPLANE, the first issue of which came out in September. WARPLANE is devoted to contemporary military aircraft, is even more heavily illustrated than the Encyclopedia, and contains phenomenal amounts of new material that comes from many different sources and has never before been assembled in this form. We confidently commend WARPLANE to you: it will be a worthy companion to the Encyclopedia on your bookshelves. Stan Morse

2011.339.045	McDonnell Douglas Aircraft Since 1920	Francillon, René J.	This important work traces the history of two great United States aircraft manufacturers and their predecessor companies. The two companies, Douglas and McDonnell, have made significant

Object ID	Title	Author	Summary
			contributions to the development of world air transport and to the defence of many countries. Each product of these companies is described in detail, and its history of development and service is fully covered. Among the Douglas types are the first Douglas transport, the Cloudster; the World Cruisers which made the first flight round the earth; numerous pre-war military types; the DC-1, DC-2 and DC-3, of which well over 10,000 were built in civil and military versions. The Second World War Devastator, Dauntless and Boston series are well recorded and lead on to the great series of four-engined transports, the DC-4, D and DC-7. The post-war jet aircraft include the DC-8, DC-9 and DC-10 jetliners and such types as the Skyray, Skyhawk and Skylancer. Also dealt with at length are the very high speed research aircraft, the present-day F-15 Eagle, F-18 Hornet, AV-8B Harrier and the YC-15 STOL transport. Some of the more important projects are included and there is a full production list of Douglas aircraft. The McDonnell types include the early Phantom, the Banshee, Goblin and Voodoo. The later Phantom, of which more than 5,000 have been built, is recorded in great detail and there are such little known types as the Whirlaway and Little Henry. The book is illustrated with hundreds of photographs and with detailed general arrangement drawings.
2011.339.046	Carrier Warfare in the Pacific : An Oral History Collection	Wooldridge, E. T. (ed)	From Publishers Weekly The Japanese attack on Pearl Harbor marked the end of the battleship as the centerpiece weapon of the U.S. Navy--in the future, the aircraft carrier would be the star of the fleet.

Object ID	Title	Author	Summary
			In this oral history edited by Wooldridge, Ramsey Fellow at the National Air and Space Museum, we see how Colonel Jimmy Doolittle's flyers learned to launch their B-25s off the Hornet . Admiral John S. Thach details his "Thach Weave," a fighting tactic which allowed slower American planes to fight the fast Japanese Zero on equal terms. The outspoken Thach also charges that the Yorktown would not have been sunk at the Battle of Midway if Admirals Fletcher and Spruance had been carrier admirals. A major part of the story lies in the sheer might of American industry. During the course of the war the U.S. would build 17 Essex- class carriers; many Independence - class carriers; and an extraordinary 109 escort, or jeep, carriers. As the war winds down we are a part of the excitement of the "Turkey Shoot" in the Battle of the Philippine Sea, in which Navy pilots could choose their targets, and we share the terror of trying to find a carrier to land on at night. We witness the destructiveness of the kamikazes as the Franklin loses 800 of its crew and we see equal destructiveness when two typhoons wreck the fleet. This is a story of guts, sacrifice, terror and exhilaration to be savored by anyone interested in the carrier as the ultimate war machine. Photos. Copyright 1993 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. Review "A stirring tribute to the heroes of carrier warfare in World War II. Thirty firsthand accounts by the officers and men who served aboard carriers and those who flew the aircraft from their decks illuminate with dramatic intensity the invaluable contribution of carrier operations that helped to turn the tide of war in the Pacific theater and led to the final Allied victory over Japan."—Sea Power

2011.339.048	All the World's Air-Ships 1909.	Jane, Fred T.	Jane's All the World's Aircraft is an aviation annual publication founded by Fred T. Jane in 1909. It is published by Jane's Information Group. Jane's All the World's Aircraft has chronicled a century of ever-accelerating aviation progress and recorded the particulars of an unprecedented number of flying machines, using the widest possible interpretation of that phrase, in the most minute detail. Six editors have had the privilege of commenting upon the significant aircraft and events of manned flight since the first edition appeared in November 1909 as All the World's Airships (which was then a generic term for any machine that flew). This first publication was seen as being ahead of its time but even the skeletal book showed the strength of Fred T Jane's standardised approach to data collection. The first edition even carried a pre-addressed return proforma for aviation pioneers to supply the details of new machines. Besides listing the different types of aircraft by nationality, the first issues covered aerial

			societies, journals and flying grounds and cost just 21 shillings (£1.05). Jane himself had a desire to fly and he was nearly killed doing so in 1909 whilst attempting a flight on Dartmoor. His aircraft caught fire, but he merely commented that it would be one less machine to include in his forthcoming work. As with Jane's Fighting Ships, Jane received extensive help from enthusiasts worldwide, including Louis Blériot, A.V. Roe and Prince Heinrich of Prussia. Jane censored the 1914 issue, which was published just after the outbreak of the First World War, blacking out whole sections describing British equipment and organisation. He noted in it that, for all practical purposes, aircraft have no more to do with peace than submarines. The work's accuracy helped morale by dispelling alarmist rumours about imminent German air raids, showing that the Germans did not possess anything but the smallest fleet of airships. Respect for the accuracy of Jane's All the World's Aircraft transcended political enmities. Cold War notwithstanding, Soviet authorities supplied Jane's with information. Such was the technical reference book's reputation that Argentina even provided details of its aircraft during the Falkland's Conflict in 1982. Altogether, there have been only 97 editions, mainly due to disruptions during the two World Wars. 2009 was the 100th Year of Jane's All the World's Aircraft. From Wikipedia, the free encyclopedia

2011.339.052	Jane's All the World's Aircraft - 1985-86	Taylor, John W. R. (ed)	About Jane's All the World's Aircraft
			Jane's All the World's Aircraft sets the standard in aviation reference, providing exhaustive technical detail on over 950 civil and military aircraft currently being produced or under development by more than 550 companies. Complete with photographs and line drawings to aid recognition and comparison, this authoritative resource provides you with the ability to evaluate competitors, identify potential buyers, and business partners, and examine aircraft equipment.
			Each entry enables you to check key specifications for any aircraft including dimensions, performance, structure, landing gear, power plants, and armaments. Plus, with details of the world's aircraft manufacturers and their programmes, you can identify key contracts and customers.

			has chronicled a century of ever-accelerating aviation progress and recorded the particulars of an unprecedented number of flying machines, using the widest possible interpretation of that phrase, in the most minute detail. Six editors have had the privilege of commenting upon the significant aircraft and events of manned flight since the first edition appeared in November 1909 as <i>All the World's Airships</i> (which was then a generic term for any machine that flew). This first publication was seen as being ahead of its time but even the skeletal book showed the strength of Fred T Jane's standardised approach to data collection. The first edition even carried a pre-addressed return proforma for aviation pioneers to supply the details of new machines. Besides listing the different types of aircraft by nationality, the first issues covered aerial societies, journals and flying grounds and cost just 21 shillings (£1.05). Jane himself had a desire to fly and he was nearly killed doing so in 1909 whilst attempting a flight on Dartmoor. His aircraft caught fire, but he merely commented that it would be one less machine to include in his forthcoming work. As with Jane's <i>Fighting Ships</i>, Jane received extensive help from enthusiasts worldwide, including Louis Blériot, A.V. Roe and Prince Heinrich of Prussia. Jane censored the 1914 issue, which was published just after the outbreak of the First World War, blacking out whole sections describing British equipment and organisation. He noted in it that, for all practical purposes, aircraft have no more to do with peace than submarines. The work's accuracy helped morale by dispelling alarmist rumours about imminent German air raids, showing that the

2011.340.001	Black Sheep : The Life of Pappy Boyington	Wukovits, John F.	Anyone over 50 should recognize the name: leading the WWII Marine Fighting Squadron 214Athe air and ground fighting Black SheepABoyington ("Black Sheep One") racked up the most hits in the Marines, earning the Medal of Honor before being shot down over Japanese territory in 1944. Presumed dead, he spent 20 months in a prisoner-of-war camp, and was released at war's end to the surprise of the nation. Twelve years later, his memoir Baa Baa Black Sheep hit bestseller lists, and six years after that, the book became a hit TV series starring Robert Conrad. Retired naval flight officer Gamble, who has already penned an account of the squad's exploits, here narrows his focus to its most famous exponent. The results are less than heroic. Black Sheep's appeal was in its raciness for its time (in one scene quoted here, Boyington is on his knees "in front of two very gorgeous gams"); one purpose of this book seems to be to fill in the blanks and innuendo, and to detail some years better lost. It's unclear that anyone still cares about these matters, though, and the

Object ID	Title	Author	Summary
			same is true of the numbing familial detail of the first chapters. But Boyington's military exploits are still of interest to buffs, and here Gamble's expertise comes to the fore. If Boyington, who died in 1988 at 76, had a tendency to fudge or exaggerate, Gamble carefully sets the matter of his actual achievements straight, and they remain impressive. Veterans of the war and fans of the show may want the full story here, but since Gamble assumes Boyington's status rather than rehabilitates it, few others will tune in. (Dec.) From Publishers Weekly Copyright 2000 Reed Business Information, Inc. --This text refers to the Hardcover edition. From Booklist Gamble's <i>Black Sheep</i> (1998) made it clear that the men of Marine Fighting Squadron 214 were misfits only according to bureaucratic regulations. Their legendary commanding officer, Gregory "Pappy" Boyington, however, was about as unorthodox as one could be and still accomplish anything useful. The product of a catastrophically dysfunctional family, he spent his life fighting a ferocious drinking problem, a string of wives and lovers, and, somewhat more successfully--he won the Medal of Honor for 20-odd air-to-air victories--the Japanese. As World War II loomed, he was about to be thrown out of marine aviation for his drinking and debts. He volunteered for the Flying Tigers and compiled a combat record that made him invaluable. He ended the war a prisoner of the Japanese, and until he died in 1988, he was often a prisoner of alcoholism. Nowadays a reader has to understand Boyington's time and place to tolerate him. Gamble gives us such an understanding, and even so, you may feel slightly hungover at the end of this fine biography. Roland Green Copyright © American Library Association. All rights

Cuba and the wrecked Maine : with introduction and descriptive text : reproductions of photographs. The Hawaiian Islands : the paradise of the Pacific : reproductions of photographs. Cover title: The American Navy, Cuba and Hawaii
2011.346.001	F-14 Tomcat Units of Operation Enduring Freedom	Holmes, Tony	Contents: Introduction--Build-up to War--Operation Enduring Freedom Begins--Ground War--Operation Anaconda--Tomcat Finale--Appendices; Colour Plates Commentary; Index.
2011.346.002	Standing By : The Making of an American Military Family in a Time of War	Buckholtz, Alison	A candid account of the author's family's experiences during her husband's 7-month deployment to the Persian Gulf as a pilot on an aircraft carrier. Depicts the struggles of a separated family far from other loved ones and the sense of community developed among other families in the same situation.
2011.346.003	Modern Warships	Bonner, Kit & Carolyn	Since World War II, the nature of sea battles, and of warships, has changed dramatically, reflecting profound changes in the world at large. This book offers a close-up look at what these changes entail, and how they have come into play in regional conflicts in Southeast Asia, in escalating naval hostilities between the Soviet Bloc and the West, and in skirmishes and major engagements in our day. Here are the warships of the Korean conflict, and the larger Cold War that paralyzed much of the world for forty-six years; here are the vertical takeoff and landing aircraft, which,

Object ID	Title	Author	Summary
			coupled with the new, smaller aircraft carrier, allowed for a nimbler, more flexible force that could respond to the political brushfires of recent years; and here is the aircraft carrier of the twenty-first century, a military city on the sea. With detailed pictures and text, Modern Warships tracks the role of warships in a world of increasingly littoral naval conflict, where small nations can possess increasingly advanced technology and super-power dominance has declined. An invaluable resource for the military and naval historian, with many images appearing for the first time, the book offers a unique vantage point on today's maritime affairs. (Information from electronic data provided by the publisher.) USS Midway photos on
2011.346.004	Subic Bay : From Magellan to Mt. Pinatubo : The history of the U.S. Naval Station, Subic Bay	Anderson, Gerald R.	Table of Contents: Chapter One - The Spanish Colonization Chapter Two - The Sun Sets on a Spanish Dream Chapter Three - The Bolo War Chapter Four - The Decade of Disappointment Chapter Five - World War I Chapter Six - World War II Chapter Seven - After the War Chapter Eight - The Earth Shook, Day Turned into Night Chapter Nine - Farewell to Subic Bay Index Appendix A
2011.346.005	San Diego's Naval Training Center	Garey, Jennifer A.	San Diego's Naval Training Center (NTC) was commissioned on June 1, 1923, and for 70 years served as a young recruit's introduction to a naval career, beginning with nine weeks of basic orientation and organization training (BOOT) camp. Originally consisting of 135 acres adjacent to San Diego Bay, NTC eventually expanded to almost 550 acres with 300 buildings, landscaped promenades, parade grounds, and a concrete

Object ID	Title	Author	Summary
			training non-ship, the USS Recruit (a.k.a. USS Neversail), where recruits learned their first duties of seamanship. Advanced training schools were later added for military personnel learning specialized duties. After training hundreds of thousands of recruits, NTC was officially closed on April 30, 1997, and has since been transformed into San Diego's new and vibrant cultural center, Liberty Station. Object ID	Title	Author	Summary
	Cadets 1-48, 1962		featuring the 48 NAS Pensacola 16-week, Pre-Flight training graduating classes of 1962. The first eight weeks serve as an officer candidate school for Aviation Cadets and the second eight weeks provide academic, physical and military training in preparation for earning their Wings. Also contains description of activities conducted at the training school and photos of the staff and students,
2011.348.004	USS Ranger (CVA-61) Western Pacific Cruise, 1964-65	Carmichael, Charles L.	Pictorial account of the deployment of the USS ranger (CVA-61) to the western Pacific in 1964-65. The ship departed San Francisco (Alameda) on 5 August 1964. Port calls included, Hawaii, Subic Bay, Yokosuka and Hong Kong. The ship returned to the San Francisco Bay area on 10 April 1965. Embarked: Carrier Air Wing 9 (CVG-9) consisting of VF-92 (F-4 Phantom IIs), VA-93 (A-4 Skyhawks), VA-94 (A-4 Skyhawks), VA-95 (A-1 Skyraiders), RVAH-5 (RA-5C Vigilantes), VF-96 (F-4 Phantom IIs), VAH-2 Det M (A-3 Skywarriors), VAW-11 Det M (WF-2/E-1B Tracers), & VFP-63 Det M (RF-8 Crusaders).
2011.350.001	Contact! Naval Aviator Careers 1 -2000, vol. 1	Arthur, Reginald Wright	This book contains the biographies of the first 2000 Naval Aviators with emphasis on their training and Navy assignments. Also, includes awards, names of family members, and quotations from the aviators or a family member. Also includes photos of early planes and aviators.
2011.351.001	Unexplained Mysteries of World War II	Breuer, William B.	The first comprehensive book to focus on the vast, intriguing and unexplored area of the wide range of mysterious, baffling, unexplained, oddly coincidental and inexplicable events of World War II.
2011.351.002	Fighting Ships of the United States Navy	Pratt, Fletcher	A compendium of U.S. Navy ship types in 1941 prior to the outbreak of hostilities. "Accurate drawings and authoritative detail of every

Object ID	Title	Author	Summary
			type of ship in the Navy." Color drawings of current ship types accompanied by silhouettes of older ships to compare and contrast. For aircraft carrying ships drawings of associated aircraft are placed on the same page as the ship type. Some pages provided drawings of antisubmarine tactics or antiship attacks by torpedo boats or aircraft.
2011.351.003	Battle Stars and Naval Awards : including Presidential Unit Citations and Navy Unit Commendations earned by the Navy, Coast Guard and Marine Corps during World War II and Korea	Perkins, J. W.	Lists the individual battle history of 7,977 American naval fighting ships awarded Battle Stars, Presidential Unit Citations or Navy Unit Commendations during WW II or Korea. Chapter 1 provides a chronology of WW II and Korean War engagements. Loose leaf letter signed by author included.
2011.351.004	Island Encounters : Black and White Memories of the Pacific War	Lindstrom, Lamont	Combines islanders' oral traditions and images captured by lenses to speak of important changes in islander self-conception and the balance of political power wrought by events of World War II in the Pacific.
2011.351.006	Fighting Liberty Ships : A Memoir, The	Hoehling, Adolph A.	Through the eyes of gunnery officer A. A. "Dolph" Hoehling comes this compelling story of the men of the Armed Guard who served on Liberty ships, a hodge-podge of merchant vessels that carried supplies to the Allies in World War II. Without these ships - more than 6,000 were armed by the U.S. Navy, 710 of which were lost - many believe there could have been no victory. (from back cover:) In telling their little-known story, the author movingly writes about the long stretches at sea living with the constant threat of U-boats below and the Luftwaffe somewhere above, and about his own near-paralyzing-fear as he rode out a 135-mile-per-hour hurricane and later managed to survive a roaring inferno when his ship collided with another. "Fighting Liberty Ships is

Object ID	Title	Author	Summary
			three things at once ... a first-rate memoir ... a history of the Naval Armed Guard ... a history of World War II and the part the Liberty ships played in that war.... To see the war through the eyes of a perceptive and talented observer is to experience what it must have been like from the decks of those gray workhorses on the ocean." Orlando Sentinel
2011.351.007	Liberty Incident, The : The 1967 Israeli Attack on the U.S. Navy Spy Ship	Cristol, A. Jay	Comprehensive analysis of the attack by Israeli warplanes and patrol boats on the U.S. intelligence collection ship Liberty off the coast of the Sinai Peninsula in 1967 during the Six -Day War between Israel and its Arab neighbors. Author was a Navy pilot (18 years) and spent 20 years in the Navy's Judge Advocate Corps. This was the subject of his PhD dissertation in 1996.
2011.351.009	War at Sea, The	Cant, Gilbert	An comprehensive account of naval battles during the early years of WW II. Published in 1942, only one chapter deals with the Pacific.
2011.351.010	Bluejacket Odyssey : Guadalcanal (sic) to Bikini, Naval Armed Guard in the Pacific	McGee, William L.	Bluejacket Odyssey is the story of a generation of Armed Guard seen through the eyes of a young enlisted man. Combining interviews with shipmates, records from the National Archives, and exhaustive research, McGee has produced an engrossing book that has the inimitable mark of one who was there. He tells an honest story, taking the reader for a ride through war zones on Liberty ships, Victory ships, and the cruiser, USS Fall River. From Japanese Zeros, nuclear tests, and South Sea native customs, to marathon poker games, Bluejacket Odyssey is a close-up view of a defining period in our nation's history.
2011.351.011	Action in the North Atlantic	Gilpatric, Guy	Out of print for 50 years, this is the book that was made into the hit movie with Humphrey Bogart and Raymond Massey, honoring the important contributions of the merchant marine in winning World War

Object ID	Title	Author	Summary
			II. Written by Guy Gilpatric, author of the classic Mr. Glencannon stories. About the Author Guy Gilpatric was a pioneer in aviation, setting an altitude record in the early 1900s. After serving as a pilot in World War I, he became an advertising executive and then began the famous series of stories about Mr. Glencannon, which appeared in the Saturday Evening Post in the 1930s, '40s' and 50s. Publication Date: June 30, 2000 (from Amazon.com)
2011.351.012	Action in the South Atlantic : The Sinking of the German Raider Stier by the Liberty Ship Stephen Hopkins	Reminick, Gerald	The complete story of the sinking of the German raider Stier by the Liberty ship Stephen Hopkins, the only time during World War II that a German surface warship was sunk by a U.S. ship. About the Author Gerald Reminick is a Professor of Library Services at Suffolk Community College in New York. This is his seventh book on the history of the merchant marine in World War II. (from Amazon.com)
2011.351.013	Arctic Convoys, 1941-1945, The	Woodman, Richard	During the last four years of the Second World War, the Western Allies secured Russian defenses against Germany by supplying vital food and arms. The plight of those in Murmansk and Archangel who benefited is now well known, but few are aware of the courage, determination and sacrifice of Allied merchant ships, which withstood unrelenting U-boat attacks and aerial bombardment to maintain the lifeline to Russia. In the storms, fog and numbing cold of the Arctic, where the sinking of a 10,000 ton freighter was equal to a land battle in terms of destruction, the losses sustained were huge. Told from the perspective of

Object ID	Title	Author	Summary
			their crews, this is the inspiring story of the long-suffering merchant ships without which Russia would almost certainly have fallen to Nazi Germany. Publication Date: October 2007 (from Amazon.com)
2011.351.014	Battle Station Sick Bay : Navy Medicine in World War II	Herman, Jan K.	In this compelling oral history, Navy medical personnel from World War II recall their experiences and the role Navy medicine played in the great crusade. Physicians, nurses, and corpsmen report the way it was, matter-of-factly, with pride and pathos, but not without humor. These are the veterans whose skills were tested at Pearl Harbor, Corregidor, Guadalcanal, Peleliu, Normandy, Iwo Jima, and Okinawa. Readers will appreciate as never before the single-minded purpose to which the men and women of Navy medicine dedicated themselves as they healed the wounded aboard vessels under kamikaze attack, in POW camps, and still other appalling circumstances. Former pharmacist's mate Wheeler Lipes describes the time, mythologized by Hollywood and the press, when he removed a shipmate's appendix while his submarine cruised submerged in enemy waters. Dr. Henry Heimlich reveals how a failed chest surgery performed on a wounded Chinese soldier later inspired the lifesaving maneuver that has made his name a household word throughout the world. Cardiologist Dr. Howard Bruenn remembers Franklin D. Roosevelt's last moments at Warm Springs. Stanley Dabrowski recalls the confusion and terror at Iwo Jima as he, a pharmacist's mate, treated his first sucking chest wound under fire. Dr. Ferdinand Berley tells about hearing, while a POW, the Japanese emperor announce the war's end over the radio. Jan Herman also oversaw six

			videos in a series "Navy Medicine at War" about naval medicine during World War II: 1) Navy Medicine's Trial by Fire : December 7th, 1941, 2) Navy Medicine at Normandy: D-Day: June 6, 1944, 3) Guests of the Emperor, 4) Battle Station Sick Bay, 5) Stepping Stones to Tokyo, and 6) Final Victory. As of 10/28/2014, we have volumes 1-5. Vol. 6 is available on the internet: https://archive.org/details/FinalVictoryWMV9640x480. (from Amazon.com)
2011.351.015	Last Big-gun Naval Battle: The Battle of Surigao Strait , an Eyewitness Account	Sauer, Howard	The Battle of Leyte Gulf -- four major actions -- was the greatest sea battle in history. The Surigao Strait action is considered the Navy's greatest single triumph, a model of timing [sic], coordination and execution. This is a unique, behind-the-guns view; a gripping eye-witness account riding the battle line at Surigao in the last Crossing of the 'T'. Publication Date: April 1, 1999 (from Amazon.com)
2011.352.001	Anchor, The -- Company 61-552	George, Charlie C. (ed.)	'Yearbook' for Company 61-552 of the Naval Recruit Training Center at San Diego, CA. Contains history and description of activities conducted at the training center with a section on the particular graduating class.
2011.352.002	USS Midway 1963-1964	Romano, Jerry (ed)	USS Midway (CVB/CVA/CV-41) aircraft carrier; lead ship of the class. A pictorial summary of the USS Midway crew on a deployment from Alameda NAS to the western Pacific with the Seventh Fleet from 8 November 1963 to 26 May 1964 with CAW -2 consisting of VF-21, VF-24, VA-22, VA-23, VA-25, VAH-8, VAW-11, and VFP-63 embarked aboard. Port visits included Hawaii; Subic Bay, The Republic of the Philippines; Hong Kong; and Sasebo, Beppu, Iwakuni, and Yokosuka, Japan.
2011.352.003	US Naval Air Station, Cubi Point, Bataan, Philippines	Stout, Cecil A., Jr.	Pictorial account of the activities ongoing at NAS

Object ID	Title	Author	Summary
	1962 - 1963 - Ang Tanod, Yearbook for July 1962 - July		Cubi Point, RP from July 1962 to July 1963. Commands involved include Commander Fleet Air Southwest Pacific; U.S. Naval Magazine, Subic Bay; Guards and Company Marine Barracks; Utility Squadron Five Det Alfa; Cubi Point Message Center; Carrier Airborne Early Warning Squadron Thirteen, Det One.
2011.355.001	By George	George, Harris James	This is a memoir of Harris James "Bud" George, an attorney of Greek heritage. He was sent to officers candidate school in 1953. He served in the Navy from 1953-1956??. Most of his time was spent on the USS Midway pages, 46-118, and the USS Forestal, pages 119-144. Former USS Midway crew member.
2011.357.001	U.S. Navy Dive and Torpedo Bombers of WWII	Tillman, Barrett	With their stout airframes, innovative airbrake designs and near-vertical dive capabilities, U.S. Navy torpedo and dive bombers rendered Japanese deck gunners nearly defenseless and played a crucial role in the course of the war in the Pacific. This photohistory uses remarkable color photography from the period, along with quotes and anecdotes from pilots and crewmembers, to relate the stories behind Navy dive bombers over the Pacific. Included in the collection are the legendary SBD ("Slow But Deadly") Dauntless, SBC Helldiver, TBD Devastator and TBF and TBM Avengers. In addition to the aircraft, photographs depict American servicemen testing and training, while first-person accounts tell of missions against Japanese vessels. About the Author Barrett Tillman is the author of many fiction and nonfiction books including, Clash of the Carriers and Hellcats. He lives in Mesa, Arizona. (from Amazon.com:)
2011.357.002	History of Aircraft Piston Engines : From the Manly Balzer to the Continental	Smith, Herschel H.	This book is about aircraft piston engine development, and was meant to fill a gap in

Object ID	Title	Author	Summary
	Tiara, A		aviation history. In the words of the author it has been the ongoing improvement and enlargement of the engines that has made all the rest of aircraft development possible.
2011.357.003	Military Aircraft Insignia of the World	Cochrane, John	A compendium of national military aircraft markings presented alphabetically by country.
2011.359.001	Vietnam, A Retrospective, Vol. I	National Archives (U.S.)	Volume 1 of a 6-part series that tells the story of the Vietnam War and the involvement of the United States from 1963 to 1965 as captured by the lens of the combat cameraman. The films were compiled for public distribution, but public opinion was so against the war by the early 70's that the films were never officially released at that time (according to an online film historian). Contents: Hidden War in Vietnam (1963) Operation Montagnard (1964) Why Vietnam? (1965) Night of the Dragon (1966)
2011.359.002	Vietnam, A Retrospective, Vol. 2	National Archives (U.S.)	Volume 2 of a 6-part series that tells the story of the Vietnam War and the involvement of the United States from 1963 to 1965 as captured by the lens of the combat cameraman. The films were compiled for public distribution, but public opinion was so against the war by the early 70's that the films were never officially released at that time (according to an online film historian). Contents: A Nation Builds Under Fire (1966) - narrated by John Wayne To Save a Soldier (1966) - narrated by Henry Fonda Report on Marine Activities (1966) Another Day of War (1967)
2011.359.003	Vietnam, A Retrospective, Vol. 3	National Archives (U.S.)	Volume 3 of a 6-part series that tells the story of the Vietnam War and the involvement of the United States from 1963 to 1965 as captured by the lens of the combat cameraman. The films were compiled for public distribution, but public opinion was so against the war by the

Object ID	Title	Author	Summary
			An annual catalog of U.S. aircraft industry events, production, trends, etc. featuring articles on the latest aircraft and innovations from various aircraft manufacturers.
2011.362.005	Desert Score	Almond, Denise L. (ed.)	Presents a summary of the U.S. weapons systems used during Desert Shield and Desert Storm. Every U.S.-made weapon that saw action during Desert Storm, as well as many others that were present but not used in combat are included. Every major U.S. weapons system is highlighted with valuable data to provide a complete operational and fiscal picture.
2011.362.006	Crossed Currents: Navy Women from WWI to Tailhook	Ebbert, Jean	History of Women in the Navy.
2011.362.007	Naval Institute Guide to Combat Fleets of the World - 2002-2003 : Their Ships, Aircraft, and Systems	Baker, A. D. (ed)	We also have a digital copy of this work located in CD. Internationally acknowledged as the best one-volume reference to the world's naval and paranaul forces, this popular Naval Institute guide is both comprehensive and affordable. Updated biennially since 1976, it has come to be relied on for its all-inclusive, accurate, and current data on the ships, navies, coast guards, and naval aviation arms of more than one hundred eighty countries and territories, including for the first time this year East Timor. Large fleets and small maritime forces get equally thorough treatment as evidenced in this new edition, which highlights major and even minor developments that could have an impact on the world scene. From orders of new patrol boats for Yemen and ship-name changes in the Georgian Navy to performance details of the British Navy's new Astute-class submarines and Type 45 destroyers, the information is easily accessed by readers wanting to keep abreast of the world's navies. A thorough indexing of material and a logical ship-typing system makes the book easy

Object ID	Title	Author	Summary
			to use and allows quick comparisons between fleets. With the retirement of longtime Combat Fleets editor A. D. Baker III in 2002 and the appointment of Washington defense consultant and author Eric Wertheim as the new editor, the guide continues to present timely, authoritative information supported by hundreds of new illustrations. The section on the Indian Navy, for example, presents new photos and line drawings of frigates in the Shivalik and Talwar classes and late-breaking information about the modified Kiev-class aircraft carrier expected to enter India's fleet. For the Chinese Navy, Wertheim provides details of new armament fits and construction of its Project 52 destroyers, and for the German Navy he offers service entry details of the new Sachsen-class Type 124 air defense frigates. Even seemingly minor changes in naval aviation are recorded, including Japan's recent decision to purchase new EH-101 helicopters. Readers can also find out the latest about the U.S. littoral combat ships and DD(X) warship programs and the Kidd-class destroyers being transferred to Taiwan. More than a hundred correspondents from around the world contributed information and illustrations to this new volume. From giant aircraft carriers and ballistic missile submarines to tugboats and launches, the characteristics and capabilities of ships large and small are reliably recorded. Complete descriptions of naval aircraft, weapons, weapons systems, and sensors are also provided along with useful commentary on organization, personnel strengths, and bases. For those who need fast access to facts about the world's navies, this single-volume naval reference is essential-and a bargain considering the wealth of material it provides. 4450

2011.362.014	Handbook of the Hospital Corps - United States Navy - 1959	Bureau of Medicine and Surgery	Designed as textbook for instruction for naval hospital corpsmen and as the primary reference for the independent duty hospital corpsman. Significant revision of 1949 handbook of same name.
2011.363.001	Soviet Military Power : Prospects for Change 1989	U. S. Dept. of Defense	Soviet Military Power was a Public Diplomacy publication of the United States Department of Defense, which provided an estimate of the military strategy and capabilities of the Soviet Union during the final years of the Cold War, ostensibly to alert the U.S. public to the significant military capabilities of the Soviet Armed Forces. First published in early October, 1981, it became an annual publication from 1983 until the collapse of the Soviet Union in 1991. Already in draft as the Soviet Union collapsed, the 1991 version was retitled "Military Forces in Transition". In addition to the majority English version, Soviet Military Power was translated, printed, and disseminated in a variety of languages, including German, French, Japanese, Italian and Spanish. (from Wikipedia.org)

2012.026.008	USS Midway (CVA-41) - Westpac - 1961	Welles, Chris (ed)	Pictorial account of USS Midway (CVA-41) deployment to South East Asia. The aircraft carrier departed Alameda, CA on 15th February to Hawaii, Guam, Subic Bay; Philippines, to Japan (Sasebo, Yokosuka), Hong Kong and arrived back in Alameda, CA on 28th September. Midway was one of three carriers ordered to the South China Sea in support of U.S. diplomatic efforts to broker a ceasefire between the Pathet Loa and the Loation Government between March and May of 1961.
2012.033.006	Jane's Fighting Ships of World War II	Jane, Fred T.	Jane's Fighting Ships is an annual reference book (also published online, on CD and microfiche) of information on all the world's warships arranged by nation, including information on ship's names, dimensions, armaments, silhouettes and photographs, etc. Its annual editions cover the warships used by the different national naval and paramilitary forces, and provide data on their characteristics. It was originally published by John F. T. Jane (usually known as "Fred T.") in 1898 as Jane's All the World's Fighting Ships. Its success launched a number of military publications carrying the name "Jane's". It is a unit of Jane's Information Group, which is now owned by IHS. From Wikipedia, the free encyclopedia

Object ID	Title	Author	Summary
			The ship departed Alameda 10 APR 72 and returned to Alameda 3 March 1973, 1 week short of an 11-month deployment. Not only was it a long deployment, Midway was deployed 7 weeks ahead of schedule with less than one week's notice. Significant operations included 9 periods of line operations off Vietnam in support of the Vietnam War. Port calls included Pearl Harbor, Subic Bay (multiple), Hong Kong and Singapore. Bob Hope performed on Midway with his troop on 27 December in Singapore. The show was taped and broadcast on U. S. national television on 17 January 1973 as the Bob Hope Christmas Special. CVW-5 was embarked. The airwing consisted of VF-151 (F-4B), VF-161 (F-4B), VA-56 (A-7B), VA-93 (A-7B), VA-115 (A-6A and KA-6D), VAQ-130 Det 2 (EKA-3B), VFP-63 Det 3 (RF-8G), VAW-115 (E-2B), HC-1 Det 2 (SH-3G), and HC-7 Det 110 (HH-3A).
2012.060.004	Navy Song Book	Bureau of Naval Personnel	One hundred (100) songs including: Special Navy Songs, Patriotic Songs, Miscellaneous Navy Songs, Songs of the Armed Forces, Miscellaneous Songs, Holiday and Seasonal Songs, and Folk Songs of Other Lands. NAVPERS 15047-A.
2012.060.006	Flags of our Fathers	Bradley, James	The true story behind the immortal photograph that has come to symbolize the courage and indomitable will of America.
2012.060.007	Sea Services in the Korean War, 1950-53	Naval Institute Press	This CD contains the complete text of the official USN and USMC histories of the conflict plus The Sea War in Korea by Malcolm W. Cagle and Frank A. Manson, originally published by the Naval Institute Press in 1957 - 7 vol. in all. Also included are 280 photographs, 185 maps, and several essays written specifically for this commemorative CD. Together, these elements tell the story of the USN, USMC, and Coast Guard in the first major

Object ID	Title	Author	Summary
			conflict of the Cold War.
2012.060.009	Pacific War 1941-1945, The	Costello, John	The Pacific War embraces both the grand strategy of the war and the actions on land, at sea, and in the air. It chronicles the maneuvers in Tokyo and Washington, London and Moscow, Sydney and Singapore (and the fatal miscalculations in Pearl Harbor and the Philippines), as well as the moments of terror and courage of individual soldiers, sailors, and airmen on both sides throughout the war. This account is written for those for whom the war is part of their actual experience and for a whole new generation that has only a partial grasp of this tragic conflict. In the concluding section of the book, an "After-Action Report," the author reveals that the real decision to go to war was made, effectively, by the US and Britain on Nov. 26, 1941, not by the Japanese on Dec. 7. Only in this book will be found a full account of how hitherto secret intelligence failed through misinterpretation at Pearl Harbor and the Philippines and why Douglas MacArthur was instrumental in reversing 20 years of carefully constructed defensive strategy in the months before Pearl Harbor.
2012.060.011	Carrier Strike : The Battle of the Santa Cruz Islands, October 1942	Hammel, Eric	The Battle of the Santa Cruz Islands, a strategic naval action in the bitter Guadalcanal Campaign, was history's fourth carrier-versus-carrier naval battle. Though technically a Japanese victory, this battle proved to be the Empire of Japan's last serious attempt to win the Pacific War by means of an all-out carrier-based, naval aviation confrontation. Of the four Japanese aircraft carriers that fought the Battle of the Santa Cruz islands, only one survived the war. See the companion book, Carrier Clash: The Invasion of Guadalcanal and the Battle of the Eastern Solomons, August 1942 also by Eric Hammel.

			warfare -- Anti-submarine warfare -- Propulsion systems -- Nuclear power -- Electronic warfare -- Stealth ships -- Jet aircraft at sea -- Helicopters and ships.
2012.060.015	John F. Kennedy : Man of the Sea	Shepard, Tazewell	This book tells the story of JFK's lifelong interest in ships and "the oceans on which we so much depend." It reveals how this enthusiasm shaped his character as a young man, affected his career as a PT boat skipper and influenced his thinking as the President. Inscribed by the author to Peg and Bob, November 27, 1965.
2012.060.016	American Defenders of Bataan & Corregidor, 1941-1942, vol. 1 : History of the Defenders of the Philippines, Guam and Wake Islands, 1941-1945	American Defenders of Bataan and Corregidor.	Inscribed by Everett Reamer(?), a survivor of Japanese war camps. to Betty Jane and Frank Kadar, 6/19/92. Also includes a photocopy of an article from a newspaper dated vol. 11, number 72, June 14, 1992, about Everett D. Reamer. History of the defenders of the Philippines, Guam, and Wake Islands, 1941-1945; Defenders : Philippines, Guam & Wake Islands; American defenders of Bataan and Corregidor, 1941-1942.
2012.060.017	Midway Magic : An Oral History of America's Legendary Aircraft Carrier	McGaugh, Scott	Throughout its 47-year career, the USS Midway sailed at the center of almost every international crisis and conflict in the latter half of the 20th century. Its crew set new standards of naval aviation. A captured German V-2 rocket was launched off the carrier in 1947, marking the dawn of naval missile warfare. Midway taught the Navy how to fly among the icebergs during sub-Arctic winter air operations off the coast of Greenland. Time and again, Midway rescued thousands of refugees on its humanitarian missions. During an odyssey that spanned the end of World War II, the Korean and Vietnam Wars, the Cold War, detente, and even Desert Storm, Midway answered every call, both military and peacekeeping. Based on more than 300 interviews with Midway

Object ID	Title	Author	Summary
			sailors who served aboard America's longest serving carrier between 1945 and 1992, readers of Midway Magic join the crew, experiencing these historic accomplishments alongside the men who were there. --This text refers to an out of print or unavailable edition of this title. About the Author Scott McGaugh is a professional writer and graduate of Arizona State University. A former newspaper publisher in Durango, Colorado and accredited public relations professional, McGaugh has co-owned several leading San Diego public relations and advertising agencies. Since 1996, Scott McGaugh played an active role in the campaign to bring the USS Midway to San Diego as a permanent museum. A San Diego native, McGaugh's writing has been published in more than 150 newspapers and magazines, and he is a highly sought speaker and university guest lecturer. MIDWAY MAGIC is the first of several books planned by Scott McGaugh. --This text refers to an out of print or unavailable edition of this title.

2012.060.018	Midway Memories : The Official Photo Collection of the San Diego Aircraft Carrier Museum	McGaugh, Scott	Inscribed to Frank (Kadar) by both authors. A unique photo essay of the 47-year odyssey of the historic aircraft carrier USS Midway. More than 225,000 men served aboard the longest-serving carrier in U.S. Navy history. More than 200 never-before published photos taken by Midway sailors are featured. Midway Memories is a unique insight into a floating city at sea--population: 4,500--sailing at the tip of America's sword. About the Author Scott McGaugh also is the author of Midway Magic, the first book to chronicle the unmatched 47-year odyssey of the aircraft carrier USS Midway. He interviewed more than 300 Midway sailors and beginning in 1996 played a

Object ID	Title	Author	Summary
			leading role in getting the USS Midway to San Diego, Calif. in 2003. Scott McGaugh became the marketing director for the Midway when it opened as a naval aviation museum in 2004. In two short years, the Midway Museum became the most-visited historic naval ship museum in the continental United States. (from Amazon.com)
2012.060.019	Ironclaw : A Navy Carrier Pilot's War Experience	Baldwin, Sherman	From Publishers Weekly Baldwin was fresh out of pilot training as a lieutenant j.g. when, on Dec. 10, 1990, he was assigned to the aircraft carrier USS Midway in the Persian Gulf. A skilled aviator, the young "nugget," (a pilot on his first sea cruise) nevertheless had much to learn before becoming proficient at carrier operations. The process would be short and intense: Operation Desert Shield had begun months earlier, and Baldwin, along with his shipmates, knew that the U.S. could go to war against Iraq at any time. When Operation Desert Storm was launched in January 1991, Baldwin found himself in the thick of the action. By then, he had logged numerous hours on carrier launches, aerial refueling and landings performed at night on the pitching deck of "the smallest carrier in the fleet." As related here, these tasks are as terrifying as the later wartime missions. Baldwin's account of his attempt to hook up to a refueling tanker in the dark, while running out of gas and hampered by nervous jitters, is among the most vivid in aviation literature. His running tale of his long-distance courtship of his wife is less engaging, but it doesn't hamper the appeal of this gritty and visceral memoir. Copyright 1996 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. From Library Journal "The lowest jet in the stack

Object ID	Title	Author	Summary
			was a F/A?18 Hornet at 6000 feet. At 2152 I heard, 'Drago 307, commencing, altimeter 30.10.' The Prowler's holding speed was 250 knots." Nearly 300 pages of such technical jargon comprise this work by Baldwin, a navy fighter pilot who came to the Gulf War within a few weeks of graduation from flight school. He describes his career from basic training to advanced pilot school, the courtship of his fiancée, and his arrival on the aircraft carrier Midway. One is impressed by the tremendous amount of training, stamina, and skill needed to become a modern combat pilot. Unfortunately, Baldwin is not as skillful a writer, and his text soon becomes very tiring. Only for the most dedicated aviation technical buffs.?Stanley Itkin, Hillside P.L., New Hyde Park, N.Y. Copyright 1996 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. Former USS Midway crew member.
2012.060.020	Band of Sisters : American Women at War in Iraq	Holmstedt, Kirsten	This book presents twelve stories of American women in combat in Iraq including: the US's first female pilot to be shot down and survive; the military's first black female pilot in combat; a twenty-one-year-old turret gunner defending convoys; two Marine lance corporals in a fire-fight, and a nurse struggling to save lives, including her own. Inscribed by the author to Betty (Kadar?) 7/4/08. Pages 115-133 are about a Navy Aviation Boatswain's Mate Handler (ABMH) Marcia Lillie's experience on an aircraft carrier during the war.
2012.060.021	1942 : The Year That Tried Men's Souls	Groom, Winston	In this riveting account, acclaimed novelist and historian Winston Groom relates the story of 1942 as it has never been told before, with an accomplished storyteller's eye for the time's fascinating tales

Object ID	Title	Author	Summary
			and characters--from the great leaders of the twentieth century to war heroes such as General Jimmy Doolittle, who led a daring revenge raid on Tokyo, to lesser known but equally fascinating characters such as Claire "High Pockets" Phillips, an attractive actress and dancer who, after her husband was killed while a prisoner of war, used the nightclub she ran in Manila to front a spy-and-supply ring that got desperately needed items into the POW camps and probed Japanese intelligence officers for vital information.
2012.060.022	Codebreakers' Victory : How the Allied Cryptographers Won World War II	Haufler, Hervie	In this book, veteran World War II cryptographer Hervie Haufler details how American and British codebreakers were the decisive factor in the Allied victory. He brings us an insider's view of this "secret war"--from the Purple Machine to the breaking of Japan's JN-25 naval code--in an accessible account based on years of research, exclusive access to previously top secret files and archives, and interviews with specialists, survivors, and cryptoanalysts from nearly every country that fought in the war. Haufler takes us inside the shadowy world of decoding units, such as Hut8 in Bletchley Park, where cryptologists worked around the clock to crack the German Enigma cipher. We see how crucial information, often obtained by surreptitious and violent means, gave Allies the decisive edge in the Battle of Britain, at Midway, and against the U-boats in the North Atlantic --and how Allied intelligence saved the Soviet Union from almost certain defeat. Cryptography enabled Nimitz and MacArthur to persevere in the Pacific, and helped Eisenhower and Patton mount the European assaults. And by deciphering the complex codes used by Rommel and the panzer divisions in Africa, Allied forces were able to use German information and tactics

Object ID	Title	Author	Summary
			against them. In compelling detail, Haufler shows us how it was done--as only one who was on the front lines of the cryptographic war can.
2012.060.023	American Raiders : The Race to Capture the Luftwaffe's Secrets	Samuel, Wolfgang W. E.	References several ships, and pages 329-330 includes information about the USS Ranger. At the close of World War II, Allied forces faced frightening new German secret weapons--buzz bombs, V-2s, and the first jet fighters. When Hitler's war machine began to collapse, the race was on to snatch these secrets before the Soviet Red Army found them. The last battle of World War II, then, was not for military victory but for the technology of the Third Reich. In this book, the author assembles from official Air Force records and survivors' interviews the largely untold stories of the disarmament of the once mighty Luftwaffe and of Operation Lusty--the hunt for Nazi technologies.
2012.060.024	Cartoon History of United States Foreign Policy, 1776-1976, A	Foreign Policy Association	The power of a good cartoon not only to inform and entertain but to persuade is legendary. Here approximately two hundred creations of the leading cartoon artists in our history provide a vivid panorama of our stormy foreign policy from Revolution to Vietnam, from Independence to Bicentennial. The Vietnam cartoons can be found on pages 136-151.
2012.060.025	Ninety Days, The : Five Battles that Changed the World, October 1942-January 1943	Carmichael, Thomas N.	On October 4, 1942, a vast surge of military power would be focused in the five major battle areas of the war: at Guadalcanal in the South Pacific; El Alamein in the Eastern Mediterranean; French North Africa in the Western Mediterranean; Stalingrad in Russia; and the Barents Sea in the North Atlantic. The armies and the navies of the Allies and the Axis would meet in these five crucial head-on clashes. At the end of ninety days it would be a different war indeed. Each of the five major areas is a chapter in the book.
2012.060.026	Twenty Decisive Battles of	Mitchell, Joseph B. (Joseph	A revision of Sir Edward S.

Includes information on the following squadrons: VF-124 Gunfighters, VF-126 Bandits, VF-1 Wolfpack, VF-2 Bounty Hunters, VF-21 Freelancers, VF-24 Renegades, VF-51 Screaming Eagles, VF-111 Sun Downers, VF-114 Aardvarks, VF-154 Black Knights, VF-211 Checkmates, VF-213

Object ID	Title	Author	Summary
			Blacklions, VRC-13 Saints, VF-301 Devil's Disciples, VF-302 Stallions, VAW-110 Firebirds, VAW-112 Golden Hawks, VAW-113 Black Eagles, VAW-114 Hornet Hawgs, VAW-116 Sun Kings, VAW-117 Nighthawks, VAW-88 Cottonpickers. Also information on Carrier Air Wing 2 (CVW-2), Carrier Air Wing 11 (CVW-11), Carrier Air Wing 14 (CVW-14), Carrier Air Wing 15 (CVW-15), Carrier Air Wing Reserve 30 (CVWR-30).
2012.215.011	HMS Warrior, Britain's First Ironclad	Dulake, Robin	A history of Britain's first ironclad - armoured cruiser to power plant hulk to oil barge hulk - and a documentation of the restoration of the ship and her return to Portsmouth as a museum ship.
2012.301.001	Sally '62	None Stated	A pictorial account of the deployment of USS Salisbury Sound (AV-13) to the western Pacific in 1962. The ship departed Alameda, CA on 28 May and returned to Alameda on 15 November. While deployed the ship acted as flagship for the Taiwan Strait Patrol (Task Force 72) at Buckner Bay, Okinawa. Port visits included Yokosuka, Iwakuni, Sasebo, Kagoshima and Kobe, Japan; Manila, RP; Kaohsiung, Taiwan; and Hong Kong. CAPT J. L. Holloway III assumed command during the cruise. ADM Holloway later served as Chief of Naval Operations (CNO).
2012.301.002	Navy Counselors Handbook	Lowry, Howard S.	A guide for Career Counselors of the U.S. Navy in carrying out their jobs. Prepared as part of a package for use by personnel intending to convert to the Navy's new rating of Navy Counselor (NCC).
2012.301.003	USS Midway (CVA-41) - Westpac - 1961	Welles, Chris (ed)	Pictorial account of USS Midway (CVA-41) deployment to South East Asia. The aircraft carrier departed Alameda, CA on 15th February to Hawaii, Guam, Subic Bay; Philippines, to Japan (Sasebo, Yokosuka), Hongkong and arrived back in Alameda, CA on 28th September. Midway was one of three carriers ordered to the South China Sea in support

Object ID	Title	Author	Summary
			of U.S. diplomatic efforts to broker a ceasefire between the Pathet Loa and the Loation Government between March and May of 1961.
2012.301.004	Naval Aviation in Review	Office of the Chief of Naval Operations.	We have an electronic copy at 2020.335.081. A look back over the last 50 years to see how Naval Aviation developed and what it has become. The book is concerned with the whole complex of Naval Aviation--the men who fly, the aircraft with which they are equipped, the organization supporting them, and the naval tradition which they inherit and perpetuate.
2012.301.005	Warfighting	Gray, A. M.	Commandant of the Marine Corps' philosophy on warfighting published as Marine Corps doctrine. Chapter 1 describes the characteristics, problems and demands of war. Chapter 2 derives a theory about war based on the understandings delineated in Chapter 1. Chapters 3 and 4 outline how the Marine Corps is to prepare for war, and to wage war, respectively.
2012.301.006	Midway Inquest : Why the Japanese Lost the Battle of Midway	Isom, Dallas Woodbury	Although there are a number of excellent accounts of the battle, none satisfactorily explain why the Japanese lost, given their overwhelming advantage in firepower. While it is well known that the Japanese were unable to launch an immediate attack because they were in the process of changing armament on their planes from torpedoes to land bombs for a second strike on Midway Island, none of the published accounts of the battle give firm explanations for why the rearming operation could not have been reversed, and an attack launched before the American dive bombers arrived. Based on extensive research in Japanese primary records, Japanese literature on the battle, and interviews with over two dozen Japanese veterans from the carrier air groups, this book solves the mystery at last.
2012.301.008	To Die Gallantly, The Battle of the Atlantic	Runyan, Timothy J. (ed.)	The Battle of the Atlantic was the most important campaign

Object ID	Title	Author	Summary
			of the war, for Allied success in Europe depended on massive movements of ships, men and materiel across the Atlantic from the Americas. German U-boats were causing severe damage to this vital supply line, unless the deadly U-boat menace could be eliminated, the Allies would be unable to defeat Germany. It is the story of combined efforts of planners and strategists, spies, and codebreakers, naval officers and crews, merchant mariners, and civilians at home in both Allied and Axis nations to achieve an end to the carnage at sea. And it is the story of the triumphs of technology, as Allied advances in radar and sonar ultimately led to victory over the German wolfpacks.
2012.301.009	U.S. Marine Corps Aviation : 1912 to the Present	Mersky, Peter B.	In this first history of Marine Corps aviation, the author tells about the pilots who carried on the Marine Corps tradition of "first to fight" from Henderson Field on Guadalcanal, the Chosin Reservoir in Korea, and the ships in the Persian Gulf. Aircraft of the Marine Corps are illustrated in this story, from the very earliest days to the present, with more than 270 rarely seen photographs and the author's own drawings.
2012.301.010	Lead On! : A Practical Approach to Leadership	Oliver, Dave	Handbook where aspiring leaders can learn how to achieve seemingly impossible goals. Replete with examples from the author's experience and from the history of the nuclear Navy.
2012.301.011	USS Midway (CV-41) - We Believe in Magic - 1982-1983	Hager, D. (ed.)	Pictorial account of the life of the Midway from mid-1982 through 1983. Operations included COPE Strike, ASWEX 82-83. a NORPAC exercise with USS Enterprise (CVN-65),, MERLION 82-1, MULTIPLEX 83-1, EMERALD CREST, CRAE, MINEX B 83-1AK, TEAM SPIRIT 83, FLEETEX 83-1, READEX 83, VALIANT BLITZ 83-1, MISSLEX OKI, MULTIPLEX 83-3A, MINEX A/B 8-2, and finally an ORE (Operational Readiness

Object ID	Title	Author	Summary
			Evaluation). Port visits included Singapore, Pusan, Subic Bay and Hong Kong. CVW-5 was embarked consisting of the following squadrons: VF-161 (F-4S); VF-151 (F-4S); VA-93 (A-7E); VA-56 (A-7E); VA-115 (A-6E and KA-6D); VAW-115 (E-2B); VMFP-3 Det.B (RF-4B); VAQ-136 (EA-6B); and HC-1 Det.2 (SH-3G).
2012.301.012	USS Midway (CV-41) - Mediterranean Cruise - 1947-1948	Mahler, W. A. (ed)	A pictorial account of the USS Midway (CVB-41) Mediterranean Cruise, 1947-48. The ship departed Norfolk, VA on 29 OCT 1947 and returned to Norfolk on 11 MAR 1948. Port visits included Gibraltar, Malta, Tangier, Cannes, Bone, Genoa, Naples, Syracuse, and Taranto. Total miles travelled - approx 19,000. Onboard: CVBG-1 VF-1B (F4U-4/F6F-5P) VF-2B (F4U-4) VA-1B (AD-1) VA-2B (AD-1/TBM-3W) VCN-2 Det. (F6F-5N)
2012.301.014	Instructions of Operation and Maintenance of Anchor Windlass, Aircraft Carriers CVB41, CVB42, CVB43	Commander, Naval Sea Systems Command	Technical manual for the anchor windlass machinery installed aboard the Midway-class aircraft carriers. The associated change documents a SHIPALT accomplished on Coral Sea during an SRA in 1986.
2012.301.015	USS Midway (CV-41) - A Touch Of Salt - 1976-1978	Begy, C. R. (ed)	Pictorial account of USS Midway activities during the period of 1976 to 1978 including an 89 day South China Sea/Indian Ocean deployment commencing in August of 1977. The ship departed from Yokosuka, Japan. There is a 1976 cruise book, and a 1978-79 cruise book. One source on the internet lists 4 deployments in 1976, 3 deployments in 1977, and 2 deployments in 1978. It is difficult to determine which deployments this book covers. Port calls in this book included the Pusan, Hong Kong, Subic Bay, Freemantle (Perth), Karachi, Singapore, Diego Garcia, Bandar Abbas, Misawa, Kadena. Onboard was:

Object ID	Title	Author	Summary
			Carrier Air Wing Five (CVW-5) Squadrons listed in this book but which change with other deployments in 1977 are: VF-161 (F-4N) VF-151 (F-4N) VA-115 (A-6A/B and KA-6D) VAW-115 (E-2B) VQ-1 VMAQ-2 Det. (EA-6A) HC-1 Det.B-1 and B-2 (SH-3G) The following was written by Pete Clayton and Robert L. Broaddus and appears on page 279 of the Midway cruise book for 1978-79: Beginning in May of 1977, VF-151 and VF-161 transitioned to F-4Js and VA-56 and VA-93 started flying A-7Es. VA-115 also exchanged their A-6As and Bs (A-6Bs) for A-6Es. This CVW-5 transition occurred while the ship was in port for its 60 day EISRA (Extended Incremental SRA, a unique modernization concept developed for Midway). The air wing transition was completed in September when USS Coral Sea fighter squadrons VF-191 and VF-194 exchanged their F-4Js with Midway's F-4Ns, prior to Coral Sea returning to Alameda after her 1977 deployment. In late 1977, Midway made an 87 day deployment to the Indian Ocean where she was the principal participant in Midlink 77, an exercise hosted by the Iranian Navy and including representation from Pakistan, Turkey, and the Royal Navy.
2012.301.016	USS Midway (CV-41) / Carrier Air Wing Five "Winners" 1978-1979	Begy, C. R. (ed.)	A pictorial account of the activities of USS Midway in the general period February 1978 through May 1979. Operations included deployments through the South China Sea to the Indian Ocean and exercises Multiplex 79, Team Spirit 79 and a joint exercise with the Iranian Navy. Also documented are many visits by VIPs to the Midway. Countries visited included Japan, Korea, Thailand, Republic of the Philippines, and Kenya. Pages 186-191 show the Russian (Soviet Union) ships and

Object ID	Title	Author	Summary
			planes in the area. Onboard: Commander Carrier Group Seven (COMCARGRU-7) Commander Carrier Group One (COMCARGRU-1) Commander Carrier Group Three (COMCARGRU-3) Carrier Air Wing Five (CVW-5) VF-161 (F-4J) VF-151 (F-4J) VA-93 (A-7E) VA-56 (A-7E) VA-115 (A-6E and KA-6D) VAW-115 (E-2B) VMFP-3 Det.2 (RF-4B) VMAQ-2 Det. 			for navy pilots. There are many pictures of activity on the flight deck.
2012.301.021	Kimmel, Short, and Pearl Harbor	Borch, Frederic L.	n late 1995 amidst heated debate over the blame placed on Rear Adm. Husband E. Kimmel and Maj. Gen. Walter C. Short for the devastation of the attack on Pearl Harbor and their subsequent demotions, the Department of Defense ordered its own investigation into the matter. The first to be conducted outside the Army and Navy establishment and the only official inquiry into restoring Kimmel and Short to the ranks they held prior to the attack, the investigation took a fresh look at the entire controversy. Called the Dorn Report after Edwin Dorn, the then-undersecretary of defense who led the investigation, the report found Kimmel and Short guilty of errors of judgment but not solely responsible for the catastrophe and did not recommend restoring their ranks.". "This book presents the complete report issued by the investigators; added commentary by Fred Borch and Daniel Martinez will help readers understand what it all means. Borch was the Army's representative on the team that conducted the investigation and one of three writers of the report. His firsthand knowledge contributes significantly to the analysis presented here
2012.301.022	Silver Star, The	Wise, James E.	The authors have compiled this stirring collection of profiles in courage to honor the Sailors and Marines awarded the Silver Star by the U.S. Navy while serving in Iraq and Afghanistan. It documents the extraordinary, award-winning actions of young American men in the war against global terrorism. A companion volume to The Navy Cross (Naval Institute Press, 2007), this book also includes selected profiles of Silver Star recipients from previous wars whose stories stand out as the best among an elite group. It is the first book to recognize and preserve for future

2012.301.026	Pacific Hawk	Vader, John	This book tells the story of the P-40 Hawk; a World War II fighter. Included are various short stories which detail interesting events during the construction and service of this fighter. In addition this book contains a section on Admiral Yamamoto's failed I-Go Sakusen which also set the stage for his death after being ambushed by Lightning fighters while riding in a Japanese bomber. From the back cover: Operations took them to the Arctic cold, torrid desert heat, torrential tropical rains and steaming swamps. Often enough they toiled into the air with a thousand pound bomb and four forty pounders. Thier pilots recklessly hurled them against Zeros, Me 109s, Fw 190s and with unexampled courage, overcame. Seldom has an aircraft had a more varied career.
2012.301.027	Illustrated Directory of Warships : from 1860 to the Present Day, The	Miller, David (David M. O.)	Covering every major warship type from the American ironclads of the 1860s through today's super-sophisticated aircraft carriers, this fact-filled directory describes more than 200 fighting vessels, providing technical specifications along with development and service histories. Intricately detailed full-color drawings vividly bring the warships to life, while contemporary photographs depict the vessels at sea and in combat.
2012.301.028	Flying Tigers : Claire Chennault and the American Volunteer Group	Ford, Daniel	Many books, articles, films, and TV productions have appeared on the legendary exploits of the Flying Tigers, General Chennault's small band of U.S. Army and Navy pilots recruited to fly for China in 1941. This

Object ID	Title	Author	Summary
			is not another laudatory work. The author tries to strip away many of the legends surrounding the Group. There were never more than 100 pilots (not 200). Some of them enlisted for adventure and some for patriotic reasons. The majority were attracted by the salary--\$500 per month plus a bonus for every enemy plane destroyed--much more than they could earn in the peacetime Army. Most served out their year's contract, collected that money, and went home. Contrary to popular opinion, they were not fighting the Japanese before America entered the war. They did not see action until December 7th. The Group destroyed 115 enemy planes and lost 22. Actually they had little influence on the outcome of World War II; but 50 years
2012.302.001	Remember Pearl Harbor : American and Japanese survivors tell their stories...	Allen, Thomas B.	Compelling narrative laced with first-person accounts from both American and Japanese survivors combines with dramatic archival images and a brief overview to paint a vivid portrait of what it was like to have witnessed, participated in, and lived through the surprise attack on Pearl Harbor that infamous morning of December 7, 1941. Historical photos set the scene. This landmark volume will provide young readers with valuable insights into both the Japanese and American points of view and demonstrate why people on both sides feel the need to remember Pearl Harbor. 2012.302.004	Battle of Midway, The : The Destruction of the Japanese Fleet	White, Steve	America's Greatest Naval Victory...For Younger Readers!, May 13, 2010 By Michael OConnor "Wordsmith" (Wausau, WI USA) Published in 2007, THE BATTLE OF MIDWAY, THE DESTRUCTION OF THE JAPANESE FLEET is part of the 'Graphic Battles of World War II' series put out by Rosen Publishing and Osprey Publishing. Written by Steve White and illustrated by Richard Elson, the book is intended for readers 9-12. White opens the book with a 5-page introduction to WW II events prior to June 1942 and the opposing forces who fought at Midway. Then White and illustrator Elson recreate this

Object ID	Title	Author	Summary
			most momentous battle in graphic novel format. As with the PEARL HARBOR volume, the story is accurately told. However, Elson does a better job of illustrating the ships, aircraft, etc. that fought at Midway. (Several panels depict men caught in the midst of fires, explosions, etc. that might be upsetting to readers 9-10). The book concludes with a 2-page summation of events after Midway. (from Amazon.com)
2012.302.005	Aircraft Carriers	Sutherland, Jonathan	The young reader's fascination with ships can be boundless. In this book youngsters get a chance to take a much closer look at several amazing aircraft carriers and a few aircraft that fly from their decks. Each carrier is shown on a two-page spread on which a full color ship is seen in a cutaway illustration. There is a brief discussion of each ship, some key facts, and an interesting vignette about the ship or plane. For example, when discussing the HMS Invincible, we learn that "The 'Invincible' can throw out hundreds of thousands of metal called chaff to confuse the guiding system of a missile coming at it." There are numerous captions to describe parts of the ships, planes, or functions of items such as radar systems. In this fascinating and very popular book we get to take a close look at aircraft carriers such as the HMS Glorious, USS Enterprise, USS Lexington, USS Nimitz, USS Tarawa, the Ivan Rogov, HMS Invincible, and the Garibaldi. The airplanes include a Mitsubishi A6M2 Reisen, an AV-8B Harrier II, a Grumman E-2C Hawkeye, and we get to see a deck crew in action. The amazing detail and description of these aircraft carriers and airplanes will

Object ID	Title	Author	Summary
			keep the reader mesmerized for hours. The illustrations are very detailed and the cutaways are simply amazing in that the young reader will get a clearer picture as to how complex these crafts are. The descriptions of the ships don't go into a great amount of detail, but give just enough to spark an interest in each ship, perhaps paving the way to a report on aircraft carriers. In the back of the book is an index, a glossary, and additional recommended book and web site resources to explore. The amazing detail and description of these aircraft carriers and airplanes will keep the reader mesmerized for hours!, June 20, 2010 By D. Fowler "Dragonfly77" (Vermont) (from Amazon.com)
2012.302.006	First Naval Air War, The	Treadwell, Terry C.	The First World War was to introduce many innovative and novel ways of killing the enemy. It was the first truly modern war fought with modern equipment, and for the first time the newfangled aircraft were to play their part. Of the 57 nations involved in the First World War, only 14 had a naval air force of any description. The first aircraft were flimsy and fragile, but by late 1914 they had progressed from limited reconnaissance duties to an offensive role. By the end of the war, aviation was an important element of the modern navy. The first aircraft carriers appeared and it was obvious that the days of the capital ship were coming to an end. The First Naval Air War is the story of the development of naval aviation from those fledgling squadrons of 1914 to the major weapon in the armory of naval warfare in only five years. About the Author Terry C. Treadwell served in the RAF and is a former research

2012.302.007	Aichi 99 Kanbaku 'Val' Units, 1937-42	Tagaya, Osamu	The Aichi Type 99 Carrier Bomber (D3A) - code named 'Val' by Allied intelligence - was the mainstay of the Imperial Japanese Navy's carrier dive-bomber force from 1941 to 1943. It sank more Allied warship tonnage than any other Axis aircraft during World War II (1939-1945). While the Val's participation in the major carrier battles has been widely covered in other English language sources, details of its operations have received scant attention in English. This book explores the Val's combat operations. Colour illustrations and photographs complement the development of dive-bombing methods in the IJN. About the Author The son of a former officer in the Japanese Naval Air Technical Arsenal, Osamu Tagaya has written a number of books on Japanese aircraft, principally for the Smithsonian Institute. Born in Japan and educated in the US, Osamu has also lived in the UK and brings unique bilingual and broad cultural perspectives to his lifelong aviation research. This is his third book for Osprey. He lives in California, USA. (from Amazon.com)
2012.302.008	Admiral Nimitz : The Commander of the Pacific Ocean Theater	Harris, Brayton	Chester Nimitz was an admiral's Admiral, considered by many to be the greatest naval leader of the last century. After the attack on Pearl Harbor, Nimitz assembled the forces, selected the leaders, and - as commander of all U.S. and Allied air, land, and sea forces in the Pacific Ocean - led the

2012.302.013	Carrier War : Aircraft Carriers in World War II	McGowan, Tom	This brief volume begins with an interesting history of the evolution of aircraft carriers, followed by a discussion of the world situation in 1941 and the importance of the U.S. military bases at Pearl Harbor. Another chapter tells briefly of the Japanese attack on Pearl Harbor. The remainder of the text describes the major battles in the Pacific and the shift in the role of battleships as carriers became more important. The pages of text have wide margins. The large, black-and-white photos are not the ones usually seen in history texts. A map of the Japanese Empire appears on the endpapers. While not comprehensive, this book can serve as a springboard to many of the standard titles that should be available in most libraries. A good introduction for readers who are becoming familiar with this period of history.
2012.302.014	Hero Found : The Greatest POW Escape of the Vietnam War	Henderson, Bruce	In February 1966, Dieter Dengler was shot down over "neutral" Laos in territory controlled by the Pathet Lao guerrillas and North Vietnamese regulars. Dengler's impulse was to free other American, Thai and Chinese POWs--some of whom had been held captive for years. Dengler spent six months in the jungle before returning to his ship. The author, Bruce Henderson served with Dengler on the USS Ranger.
2012.302.015	Enormous Crime, An : Definitive Account of American POWs Abandoned in Southeast Asia, The	Hendon, Bill	The dramatic history of living American soldiers left in Vietnam, and the first full account of the circumstances that left them there. Based on thousands of pages of public and previously classified

Object ID	Title	Author	Summary
			documents, this book makes a convincing case that when the American government withdrew its forces from Vietnam, it knowingly abandoned hundreds of POWs to their fate. The product of 25 years of research, it exposes the reasons why these American soldiers and airmen were held back by the North Vietnamese at Operation Homecoming in 1973 and what these men have endured since. This is a history of America's leaders in their worst hour; of life-and-death decision making based on politics, not intelligence; and of men lost to their families and the country they serve, betrayed by their own leaders.--From publisher description.
2012.302.016	Danger Zone: The Complete Chronology of US Naval Aviation, 1898-1995	Grossnick, Roy A.	This is a complete rundown of the history of US Naval aviation from the year 1898 to 1995. From the pioneer years of the 19th century through the two World Wars, Vietnam, Korea, the Cold war and up to the crisis in the Near East, this is the ultimate chronology for all people interested in naval aviation. Hundreds of pages, tons of facts and information and a wealth of pictures. (from back cover)
2012.302.017	Steel Beach : My Life As a Naval Aircrewman, 1972-1976	Manthos, Jeff Lee	By late 1973 America's ground troops had left South Vietnam. But the South China Sea was still patrolled by the US Navy and its carrier battle groups, which continued to sail the coastal waters of Vietnam and the Tonkin Gulf. Caught in the restlessness of being in neither war nor peace, missions were flown, sorties counted, bombs loaded and missiles and rockets armed. The saga of Vietnam was not over yet and as America strained to put the war behind, the sailors of Task Force 77, known as the Tonkin Gulf Yacht Club, continued their vigilance. Object ID	Title	Author	Summary
			South China Sea. The situation was best summed up by a popular phrase from that time: If you're not confused, you don't understand the situation. Jeff Lee Manthos was a helicopter aircrewman during this period, deploying on aircraft carriers in the South China Sea, Tonkin Gulf, Indian Ocean and Persian Gulf. The flight deck was the center of activity for him and the rest of the air wing. Given rare time off from long hard days and nights of flight operations at sea, aircrews and sailors would congregate on the flight deck for sun and relaxation. As a result, the flight deck was affectionately called Steel Beach. Review In Steel Beach, Jeff Lee Manthos doesn't tell us about his life as a Naval helicopter crewman in the aftermath of the Vietnam war, he shows us. He guides us along to the extent we're awash in the pungent odor of jet fuel, and know the heart-racing apprehension of flying far out over the expanse of unforgiving ocean. We struggle beside him in the classroom, and sweat alongside him through rigorous training to become a highly trained rescue crewman aboard the Navy's impressive Sea King helicopter. He places us among the high drama and tension on the dangerous carrier deck, and makes us feel the bone-jarring catapult in the cramped, stifling spaces below deck. And throughout his superbly written, masterful blend of personal insight, we share the exuberance of his youth, and his ride on the rollercoaster of young love. One does not have to be particularly fond of aviation or military life to become absorbed in Steel Beach; Manthos's love of writing is clearly evident, making his memoir appealing to all. Steel Beach makes the reader eager for more from

Object ID	Title	Author	Summary

the pen of Jeff Lee Manthos. -- Wayne Mutza, military aviation historian and author

For everyone who thought a Navy seaman's job was simply swabbing the deck, Jeff Manthos can beg to differ, and he does so in great style. In his ship-shape and fine-tuned memoir, STEEL BEACH, Jeff takes the reader inside the world of Vietnam-era aircraft carriers and rescue helicopters with sailors risking their lives for each other and their country every day. I swear, I was tasting salt on my lips and smelling engine oil on my skin by the time I finished this book, but it was so much more than just that. Watching the journey of a boy becoming a man is an intense ride and a great read you won't want to miss. --Jody Seay, award-winning author; creator, producer, and host of the TV show Back Page.

It isn't often that one reads about carrier helicopter crew operations. Even more unusual is information about helicopter squadrons in the immediate Vietnam post-war era. Interestingly enough, aircraft carriers always deployed the helicopter as the first aircraft in the air and the last to land for serving in air operations as both plane guard and SAR for the fixed-winged community. Author Jeff Manthos was a helicopter aircrewman during this period. Deployed to the South China Sea, Indian Ocean, and Persian Gulf. The flight deck was truly the center of activity for him as well as the rest of the Air Wing. Given rare time off from long hard days of flight operations at sea, aircrews congregated on the flight deck for sun and relaxation. As a result, the flight deck was often referred to as Steel Beach. The new book by the same name tells of the author's years in the U.S. Navy, with an emphasis on his time as a member of Helicopter Squadron Four (HS-4), which

Object ID	Title	Author	Summary
			earned the name Black Knights for achieving around-the-clock and all-weather ASW (antisubmarine warfare) capability. The bulk of Steel Beach was written from memory. Manthos also had memorabilia to draw on, but perhaps most valuable were his letters home, saved by his mother and not discovered until after her death. With more than 300 SAR, ASW, medevac and logistics missions in the Sikorsky SH-3 Sea King helicopter, Manthos's experiences are certainly worth relating. His is a remarkable journey. --Robert S. DeGroat, Flight Journal magazine, June 2008 About the Author Jeff Lee Manthos has been writing since his collegiate days. His love of writing has been manifest in his numerous poems and short stories. In 1997 he visited Vietnam with a veterans group, producing his journal Crossing the South China Sea. Jeff was born the son a combat fighter pilot in the Langley Air Force Base, Virginia, hospital in 1953. As his family was stationed overseas and around the US, he spent much of his youth travelling. A decade after his father s retirement to their Wyoming ranch and after a move to Colorado, Jeff enlisted in the Navy. His deployments completed his travels around the globe. After his service he gained a B.A. in Philosophy and then pursued the art of violin making, attending the Violin Making School of America. He has been a professional violin maker for over 20 years. Jeff s service memoir, Steel Beach, is his most recent literary endeavor. He is currently working on two manuscripts, one on his life as a boy on a Wyoming ranch and one about his fight against non-Hodgkin s lymphoma. Jeff resides in the heart of Oregon s Willamette Valley where he enjoys cycling, gardening

2012.302.018	Pacific Crucible : War at Sea in the Pacific, 1941-1942	Toll, Ian W.	The planning, the strategy, the sacrifices and heroics—on both sides - illuminating the greatest naval war in history. On the first Sunday in December 1941, an armada of Japanese warplanes appeared suddenly over Pearl Harbor, Hawaii, and devastated the U.S. Pacific Fleet. Six months later, in a sea fight north of the tiny atoll of Midway, four Japanese aircraft carriers were sent into the abyss. Pacific Crucible tells the epic tale of these first searing months of the Pacific war, when the U.S. Navy shook off the worst defeat in American military history and seized the strategic initiative. Ian W. Toll's dramatic narrative encompasses both the high command and the "sailor's-eye" view from the lower deck. Relying predominantly on eyewitness accounts and primary sources, Pacific Crucible also spotlights recent scholarship that has revised our understanding of the conflict, including the Japanese decision to provoke a war that few in the country's highest circles thought they could win. The result is a page-turning history that does justice to the breadth and depth of a tremendous subject. 24 pages of black-and-white illustrations and 12 maps Publication Date: November 14, 2011 (from Amazon.com)

2012.302.024	Northrop BT-1	Ginter, Steve	The Northrop BT was a two seat, single engine, monoplane, dive bomber built by the Northrop Corporation for the United States Navy. At the time Northrop was a subsidiary of the Douglas Aircraft Company. The design of the initial version began in 1935. A 700 hp (522 kW) Pratt and Whitney XR-1535-66 Twin Wasp Jr. double row, radial air-cooled engine powered the aircraft. The aircraft had slotted flaps and a landing gear that partially retracted. The next iteration of the BT, designated the XBT-1 was equipped with a 750 hp (559 kW) R-1535 engine. This aircraft was followed in 1936 by the BT-1 that was powered by an 825 hp Pratt and Whitney R-1535-94 engine. One of the BT-1 aircraft was modified with a fixed tricycle landing gear and was the first such aircraft to land on an aircraft carrier. One of the first aircraft Edward Heinemann designed 90 pages of history, drawings and photos. (from ginterbooks.com)
2012.302.025	North American T-28 Trojan Pilot's Flight Operating Instructions	United States Navy	Designed as a replacement for the T-6 Texan, North American's T-28 Trojan first flew in 1949 and remained in production until 1957. The T-28A was initially adopted as primary trainer by the U.S. Air Force, but it served in this capacity for less than a decade. The U.S. Navy and Marine Corps found the T-28B/C model aircraft well suited to their needs, and continued to use it up until 1984, when it was replaced by the T-34C turboprop. Despite its training designation, the T-28 flew in a combat role, perhaps most famously during the Vietnam conflict where Trojans

Object ID	Title	Author	Summary
			performed close air support and counter-insurgency missions for the C.I.A. Modified attack trainer T-28D "Nomads" also flew for the French in Algeria. Originally created by the U.S. Navy in 1962, this T-28B/C pilot's flight operating manual was required reading for pilots and trainees. This high quality reproduction includes the original manual in its entirety, including information on carrier landing training and emergency procedures. It's a fascinating reference that puts you right in the cockpit of one of history's great planes. Publication Date: August 24, 2010 (from Amazon.com)
2012.302.026	Aces of Fighting 17: VF-17's Top Guns in World War II, The	Cook, Lee	They were called the deadliest fighter squadron in action in the South Pacific; U.S. Navy Fighting Squadron Seventeen, famous with their Skull and Crossbones insignia, became one of the most successful squadrons of WWII. Flying the F4U Corsair, VF-17 shot down 152 Japanese aircraft in aerial combat in only 76 days. At the end of the war VF-17 had the top four Navy Corsair aces:Kepford, Hedrick, Blackburn, and Smith. After seventeen years of meticulous research, Lee Cook presents this new book, which is also greatly enhanced by considerable VF-17 family involvement who have supplied original material and photographs not previously appeared in previous works. The Aces of Fighting 17 has a detailed biography of each VF-17 ace and has a host of hitherto unpublished photographs. 2012.302.028	Enterprise : America's Fightingest Ship and the Men Who Helped Win World War II	Tillman, Barrett	Pearl Harbor . . . Midway . . . Guadalcanal . . . The Marianas . . . Leyte Gulf . . . Iwo Jima . . . Okinawa. These are just seven of the twenty battles that the

Object ID	Title	Author	Summary
			USS Enterprise took part in during World War II. No other American ship came close to matching her record. Enterprise is the epic, heroic story of this legendary aircraft carrier—nicknamed "the fightingest ship" in the U.S. Navy—and of the men who fought and died on her. America's most decorated warship, Enterprise was constantly engaged against the Japanese Empire from December 1941 until May 1945. Her career was eventful, vital, and short. She was commissioned in 1938, and her bombers sank a submarine just three days after the Pearl Harbor attack, claiming the first seagoing Japanese vessel lost in the war. It was the auspicious beginning of an odyssey that Tillman captures brilliantly, from escorting sister carrier Hornet as it launched the Doolittle Raiders against Tokyo in 1942, to playing leading roles in the pivotal battles of Midway and Guadalcanal, to undergoing the shattering nightmare of kamikaze strikes just three months before the end of the war. Barrett Tillman has been called "the man who owns naval aviation history." He's mined official records and oral histories as well as his own interviews with the last surviving veterans who served on Enterprise to give us not only a stunning portrait of the ship's unique contribution to winning the Pacific war, but also unforgettable portraits of the men who flew from her deck and worked behind the scenes to make success possible. Enterprise is credited with sinking or wrecking 71 Japanese ships and destroying 911 enemy aircraft. She sank two of the four Japanese carriers lost at Midway and contributed to sinking the third. Additionally, 41 men who served in Enterprise had ships named after them.

Object ID	Title	Author	Summary
			As with Whirlwind, Tillman's book on the air war against Japan, Enterprise focuses on the lower ranks—the men who did the actual fighting. He puts us in the shoes of the teenage sailors and their captains and executive officers who ran the ship day-to-day. He puts us in the cockpits of dive bombers and other planes as they careen off Enterprise's flight deck to attack enemy ships and defend her against Japanese attackers. We witness their numerous triumphs and many tragedies along the way. However, Tillman does not neglect the top brass—he takes us into the ward rooms and headquarters where larger-than-life flag officers such as Chester Nimitz and William Halsey set the broad strategy for each campaign. But the main character in the book is the ship itself. "The Big E" was at once a warship and a human institution, vitally unique to her time and place. In this last -minute grab at a quickly fading history, Barrett Tillman preserves the Enterprise story even as her fliers and sailors are departing the scene. Publication Date: February 14, 2012 (from Amazon.com) Contents: Prologue: Kearny, New Jersey, 1958 -- "I have done the state some service" (1938-1941) -- "Keep cool, keep your heads, and fight" (December 1941-May 1942) -- "Revenge, sweet revenge" (June 1942) -- "We didn't know a damned thing" (August 1942) -- "A fighting chance" (October 1942) -- "The most exciting part of your day" (November 1942-January 1943) -- "A long and teedjus journey" (February-December 1943) -- "If any of them lived it wasn't our fault" (January-June 1944) --

2012.302.037	USS Yorktown CV-5 & CV-10	Campbell Films	This DVD is a collection RARE and amazing films on the famous US Navy's USS Yorktown CV-10 and newsreels on the CV-5 that was lost in the battle of Midway. US Navy Carriers got there names form historical Icons, either from famous people or famous battles. The battle of Yorktown is where George Washington defeated the British in our revolutionary war. A very fitting name for 2 very famous ships. The 1st (CV-5) was launched in 1937 and was on her way through the Panama canal when Pearl Harbor attack happened. Here 1st conflict was in Feb, 1942 at the attack of the Marshall island, (See CV-5 Newsreels), then to the battle of the Coral Sea where she was damaged (See actual damage in CV-5 Newsreels as a bomb explodes on the deck), then repaired to fight in the battle of Midway were she was lost. Almost a year latter, CV-10 USS Yorktown (Essex class carrier) was launched (April 1943), and served through to war in the pacific (see CV-10 Newsreels too). She also served in the Korea and was finally de-commissioned in 1970. Today she is a Maritime Museum for all to see. 1st Film: "The Fighting Lady". This film is a Navy story about the Famous CV-10 USS Yorktown. It is in very good color and shows the life and times aboard the ship during 1944 to 1945. From Truk island, to sinking of lots of Japanese ships, to shooting down enemy fighters, this is Life aboard a carrier. Great

Object ID	Title	Author	Summary
2012.302.038	USS Franklin CV-13	Campbell Films	historical footage. Runtime 61:28 Min's
			2nd Film: "CV-05 USS Yorktown Newsreels". This film is a collection of 2 newsreels on the CV-5 plus some photos at the end of the sinking of the 1st USS Yorktown at the battle of Midway. 1st newsreel is about CV-5 launching an attack in Feb. 1942 against Marshall island. Amazing. 2nd is called "US Carriers fight for life" and it is about the fight at Coral Sea where CV-5 actually gets bombed by Japanese planes. She takes to direct bomb hits in this footage and a near miss that bounces a SBD over the side. Also amazing footage. Final is photos of her sinking at Midway. Runtime 11:37Min's
			3rd Film: "CV-10 USS Yorktown Newsreels". This too is a collection of 2 newsreels. 1st. USS Yorktown CV-10 Smashes Truk Island. Truk was a Japanese stronghold in the pacific and this footage shows an all out fight with the Japanese to take command of the area. 2nd. A short clip from "Salute to the Navy" and it shows the USS Yorktown fighting the enemy plus fighting off Kamikaze's. Another action packed fight aboard the carrier. Runtime 12:40 Min's. (from campbellfilms.com)
2012.302.038	USS Franklin CV-13	Campbell Films	This DVD is a collection RARE and amazing films on the famous US Navy's USS Franklin CV-13 and how she survived Kamikaze attacks in the Pacific war with Japan. Nicknamed "Big Ben", was one of 24 Essex class aircraft carriers built during WW2 for the US Navy, the fifth US Navy ship to bear the name. Commissioned in January 1944, she served in several campaigns in the Pacific Theater Operations, earning four battle stars. She was badly damaged by a Japanese air attack in March 1945, with the loss of

Object ID	Title	Author	Summary
			hundreds of her crew, becoming the most heavily damaged carrier to survive the war. During WW2 she served in the Marianas, Peleliu, and Leyte gulf battles and was damaged as her planes attacked and helped to sink the mighty Japanese battleship Musashi. Later, Before dawn on 19 March 1945, USS Franklin, which had maneuvered to within 50 mi of the Japanese mainland, closer than had any other U.S. carrier during the war, launched a fighter sweep against i Honshu and later a strike against shipping in Kobe Harbor. Suddenly, a single aircraft — possibly a Judy dive bomber, though other accounts suggest an Aichi D3A "Val", also a dive bomber — pierced the cloud cover and made a low level run on the ship to drop two semi-armor-piercing bombs. The damage analysis came to the conclusion that the bombs were 550 lb (250 kg. One bomb struck the flight deck centerline, penetrating to the hanger deck, effecting destruction and igniting fires through the second and third decks, and knocking out the CIC and airport. The second hit aft, tearing through two decks. At the time she was struck, Franklin had 31 armed and fueled aircraft warming up on her flight deck. The hangar deck contained 22 additional planes, of which 16 were fueled and five were armed. The forward gasoline system had been secured, but the aft system was operating. The explosion on the hangar deck ignited the fuel tanks on the aircraft, and gasoline vapor explosion devastated the deck. Only two crewmen survived the fire on the hangar deck. The explosion also jumbled aircraft together on the flight deck above, causing further fires and explosions, including the detonation of 12 "Tiny Tim" air-to-surface missiles. ¾ in of armor had been installed on

Object ID	Title	Author	Summary
			the hangar deck after the 30 October 1944 damage; this contained the explosion and fire and prevented spread of the fire below. Franklin lay dead in the water, took a 13° starboard list, lost all radio communications, and broiled under the heat from enveloping fires. Many of the crew were blown overboard, driven off by fire, killed or wounded, but the hundreds of officers and enlisted who voluntarily remained saved their ship. The casualties totaled 724 killed and 265 wounded, and would have far exceeded this number, but for the work of many survivors. Franklin had suffered the most severe damage experienced by any U.S. fleet carrier that survived World War II, but managed to sail her way home. 1: "The Story of Big Ben". 12:01 Min's 2: "The Saga of the Franklin; Crew's Story". Runtime 24:52 Min's 3: "USS Franklin Newsreels". 16:35 Min's. 4. "CV-13 Technical Story--How the Franklin Survived". 18:08 Min's. (from campbellfilms.com)
2012.302.039	Hellcat Tales : A U.S. Navy Fighter Pilot in World War II	Gadbois, Robert	From enlistment in 1942, through cadet aviation training, joining VBF-12/Air Group 12 as a SB2C Helldiver pilot, Gadbois later switched to flying the F6F Hellcat, embarking on the USS Randolph (CV-15), and conducting air operations including fighter sweeps over Tokyo, combat missions over Iwo Jima and Okinawa, and fighting off kamikaze attacks.

2012.302.047	Northrop BT-1	Listemann, Phil H.	The BT-1 belongs to the category of warplanes which just missed, in this case by a couple of weeks, having an operational role in WW2 and has for all practical purposes been forgotten. Nevertheless its importance was probably higher than is currently recognised for at least two reasons. Designed by Ed Heinemann the BT-1 was sufficiently successful to allow him to go on to design such aircraft as the Boston/Havoc, Invader and Skyhawk, some of America's most famous aircraft. Despite its shortcomings, including a deadly spin, the BT- 1 led the way to its successor, the SBD Dauntless, which wrote itself into the pages of the USN's history during the desperate, and decisive, battles of 1942 and 1943 which took place in the Pacific. Publication Date: June 2008 (from Amazon.com)
2012.302.048	U.S. Navy Against the Axis, The : Surface Combat, 1941-1945	O'Hara, Vincent P.	Naval historian Vincent O'Hara recounts here the dramatic story of the U.S. Navy's surface fleet in World War II, especially its ship-to-ship combat. He suggests that the fleet's role in America's ultimate victory was far more crucial than commonly credited and holds many lessons for today's Navy and the nation as a whole. His work is the only single volume to treat every surface naval action involving major American warships, both famous and obscure. It places each action in its larger context to provide a valuable historical resource

Object ID	Title	Author	Summary
			on how the Navy and its ships met the test of battle. O'Hara refutes the widely held notion that the attack on Pearl Harbor rendered surface warfare obsolete. He offers readers details of U.S. naval actions barely mentioned in other histories to demonstrate how U.S. battleships, cruisers, and destroyers played a decisive role at critical junctures in the war and made significant contributions to the Allied victory. He also documents the performance of weapon systems, shows how doctrine developed, and examines the role played by new technologies. Numerous maps, tables, and charts enhance the text. A cautionary tale relevant to today s Navy, this book illustrates how swift adaptability and intellectual honesty were fundamental to the Navy s success against Japan. Its underlying premise is that in a conflict against conventional or asymmetric enemies, the United States cannot assume to hold title to the same virtues demonstrated by its Navy three generations past. Instead, those lessons must be constantly studied and validated in the face of postwar mythologies, lest they be forgotten. Publication Date: March 30, 2007 About the Author VINCENT P. O'HARA, a naval historian and researcher, is also the author of German Fleet at War, 1939-1945, published by the Naval Institute Press in 2004. His work appears in many periodicals and annuals, including Warship, World War II Quarterly, MHQ, Storia Militare, and World War II. He lives in Chula Vista, California, with his wife and son. (from Amazon.com)

2012.302.049	Admirals, The : Nimitz, Halsey, Leahy, and King--The Five-star Admirals Who Won the War at Sea	Borneman, Walter R.	How history's only five-star admirals triumphed in World War II and made the United States the world's dominant sea power. Only four men in American history have been promoted to the five-star rank of Admiral of the Fleet: William Leahy, Ernest King, Chester Nimitz, and William Halsey. These four men were the best and the brightest the navy produced, and together they led the U.S. navy to victory in World War II, establishing the United States as the world's greatest fleet. In THE ADMIRALS, award-winning historian Walter R. Borneman tells their story in full detail for the first time. Drawing upon journals, ship logs, and other primary sources, he brings an incredible historical moment to life, showing us how the four admirals revolutionized naval warfare forever with submarines and aircraft carriers, and how these men-who were both friends and rivals-worked together to ensure that the Axis fleets lay destroyed on the ocean floor at the end of World War II.

Object ID	Title	Author	Summary
			Publication Date: May 1, 2012 Review "Borneman demonstrates comprehensive command of published and unpublished sources, fingertip understanding of the period, and a polished writing style in this unique collective biography of the four men who 'with a combination of nimble counsel, exasperating ego, studied patience, and street-fighter tactics' shaped the modern U.S. Navy to win WWII at sea." (Publishers Weekly) "Borneman deftly manipulates multiple narrative strands and a wealth of detail. He vividly fleshes out the numerous vain, ambitious men vying for power at the top and examines their important decisions and lasting ramifications. An accomplished, readable history lesson." (Kirkus Reviews) "Walter Borneman's The Admirals is an epic group portrait of Nimitz, Halsey, Leahy, and King. Not since the heyday of Samuel Eliot Morison has a historian painted such a fine portrait of the five-star admirals who helped America beat Japan during the Second World War. Highly recommended!" (Douglas Brinkley, Professor of History at Rice University and author of The Wilderness Warrior) "They were completely different in temperament and personality, but the U.S. Navy's four five-star admirals in World War II shared a sense of vision, devotion, and courage. Walter Borneman has written a rousing tale of victory at sea." (Evan Thomas, author of The War Lovers) "This is Walter Borneman at his best. The portrait of the forgotten admiral, Leahy, is worth the whole book. But there's scarcely a page where a reader won't learn something

Object ID	Title	Author	Summary
			unexpected, and occasionally shocking." (Thomas Fleming, author of Time and Tide) "Walter Borneman's decision to tell the gripping story of America's war at sea through the prism of the relations between her four greatest admirals is inspired. The four very different temperaments and personalities of these giants of the US Navy, their rivalries, interactions and comradeship, make for a compelling tale...There's more about true leadership in these pages than will be found in a library of lesser books." (Andrew Roberts, author of The Storm of War) Review "Borneman deftly manipulates multiple narrative strands and a wealth of detail. He vividly fleshes out the numerous vain, ambitious men vying for power at the top and examines their important decisions and lasting ramifications. An accomplished, readable history lesson."-- Kirkus Reviews (from Amazon.com) Contents: List of Maps -- Prologue: The Banks of the Severn -- Saturday, December 6, 1941 -- pt. 1. 2012.302.050	Adversary : America's Aggressor Fighter Squadrons	Llinares, Rick	Adversary takes an inside look at the dedicated adversary tactics units within the U.S. Air Force, Navy and Marine Corps. Every unit in this highly specialized group, from the Navy's well known TOPGUN program to the US Air Force's elite 414th Combat Training Squadron is reviewed. The Marine Corps Sniper squadron and Navy reserve units are also covered. Over the course of a two year time-frame, authors Rick Llinares and Chuck Lloyd were afforded unprecedented access to each of the five remaining aggressor squadrons. Join the authors as they go inside the best air combat training units anywhere in the world. Fly with USAF F-16 Vipers, Navy F/A- 18 Hornets and Marine F-5E Tigers during actual training missions. Hear directly from actual aggressor pilots as they describe what it's like to simulate the bad guy. Learn how they fly their 'Soviet fighters' against American airman in mock air battles. The book covers the history of the adversary programs in the American military as well as exploring the current air combat environment Modern threat aircraft flown by the former

Object ID	Title	Author	Summary
			Soviet Union as well as the three American aggressor fighters are also included. Playing the role of the 'bad guy' in the dangerous environment of aerial combat is not an easy task. Adversary pilots must first be superb fighter pilots. They must also be excellent teachers of the art of air combat, masters of their trade. Their job is to teach, to take the best fighter pilots in the world and make them even better. Adversary tells their story in dramatic photography and fascinating text. (from schifferbooks.com)
2012.302.051	A-1 Skyraider in Vietnam : The Spad's Last War, The	Mutza, Wayne	Through its remarkable service during the war in Southeast Asia, the Skyraider became legendary. It served with distinction in the hands of U.S. Navy, U.S. Air Force, and South Vietnamese Air Force pilots, who took the war to the enemy, often at low altitude and in the face of devastating anti-aircraft fire. And it suffered heavy losses. The Skyraider's versatility and the mettle of its pilots were unmatched. This book takes not only a look at an old airplane, but at the warriors who flew and maintained the machine they called the "Spad." This volume captures the essence of combat in the Spad, and explains the broad range of Spad operations. The text, which is rich with the narratives of Spad pilots and ground crew, is complemented by over 300 original photographs, seventy emblems, and detailed listings of every Skyraider that flew in the war, and the colorful units to which they were assigned. This fascinating volume is a must for aviation enthusiasts, history buffs, and modelers alike. (from schifferbooks.com)
2012.302.052	TBM/TBF Avenger in Action	Doyle, David	The Avenger was the foremost Torpedo Bomber in the US Navy's arsenal during WWII. Designed by Grumman as a replacement for the Douglas TBD Devastator, Avenger

Object ID	Title	Author	Summary
			production began prior to the Japanese attack on Pearl Harbor and it remained in US Navy service until October 1954. Demand for the large torpedo bomber was so strong that General Motor's newly-formed Eastern Aircraft Division was contracted as a second source for the Avenger, ultimately accounting for more than half of the total production. In addition to its obvious use as a torpedo bomber, the Avenger also served as a horizontal bomber, dropping conventional bombs, as well as mines and notably, depth charges, while operating in an antisubmarine role. This all-new edition is filled with 212 vintage photos, 29 of them in color, these are augmented by five color profiles and a like number of detailed line drawings; 80 pages. (from squadronsignalpublications.com)

2012.302.053	Crusade in the Pacific, Disc 1	Tourtellot, Arthur B.	These videos are duplicates of the ones in the 2-disc set, War in the Pacific. However, that set has four additional videos: The Pacific in Eruption, Awakening in the Pacific, Shifting Tides in the Orient and War in Korea (2004.144.011 and 2004.144.014). This documentary covers the entire saga of World War II in the Pacific theatre, utilizing film footage shot by cameramen on both sides of the War. Contents: pt. 1. The rise of the Japanese empire -- America goes to war in the Pacific -- The U.S. and the Philippines -- The Navy holds- 1942 -- pt. 2. Guadalcanal: America's first offensive -- War in the north: the Aleutians -- The road back: New Guinea -- Up the Solomons Ladder: Bougainville -- pt 3. 2012.302.061	USN & USMC F4U Corsair	Campbell Films	The F4U Corsair was the first single engine plane to reach over 400 MPH in level flight. Known as the Hog, Bent Wing, and to the Japanese, Whistling Death. This plane was just amazing. The designers wanted to a 13 ft prop on a 2000 hp radial engine and there solution to keep the prop from hitting the ground was the bend the wings in a invert gull layout. The plane was to be a 1st rate carrier plane, but it was just too dangerous to land at first. So the F4U was used by the Marines in the Pacific. This plane could out fly anything the Japanese had to offer and in the end, it racked up a kill ratio over 11 to 1. The British figured out how to safely land on Carriers, and the US Navy finally adopted the F4U in lat 1943. Between the F6F and the F4u, The Japanese planes were doomed. The next war, Korea, The F4U was very effective as a bomber and fighter and was credited with shooting down a mig. We collect film and try to bring the to you. We have a rare film of the F4U factory footage at Akron, as our bonus film on this DVD. We hope you will enjoy this collection. 1st Film: "Flying the F4U Corsair". This film is a US

Object ID	Title	Author	Summary
			Navy film about how to fly the F4U Corsair. I think everyone has this film, but this DVD would not be complete with out it. Well worth watching. Runtime 28:10 Min's 2nd Film: "F4U Factory-Changes the Win the War, Too". This is a Wilding Film for the War Dept that talks about how managers (foremen) can increase production on a factory line. Luckily, The factory is at a F4U Plant. You can see the pictures in the middle of the plant production. The film was 40 min's long, and we edited it to 27 min;s to keep it on as much as possible on the F4U and the factory. Very Rare and fun to see.. Runtime 27:49 Min's 3rd Film: "Corsairs In Korea". This is a Navy film that is about the USN of the coast of Korea and how the Navy Planes, F4U and the AD-1 Skyraiders saved the day by attacking the Chinese. There is footage of F9F Jets and lots of staffing, bombing, and carrier activity. Runtime 21:16 Min's 4th Film: "Naval Pacific Newsreels". Here is a collection of newsreels on the Polar Regions. 1st US Carrier Planes Sweep the China Sea. 2nd Newsreel: The Was In the Pacific Continues. 3rd Newsreel: USS Midway test Arctic Conditions. (This would be Operation Frostbite.) Runtime 10:27 min's. 5th Film: Rare "F4U Corsair Footage". 1st, a short story about Fighter pilot Vice Admiral Bill Houser and his F4U. 2nd Very Rare footage (7min's) of the F4U Factory at Akron Ohio during the War. They build not only F4U's, but there is footage of an Advanced F4U engine and canopy being tested, parts of the B-29, then test Flying the F4U. and 3rd, 4 min's of the F4U landing aboard carriers in slow motion. Very fun to see. Runtime 17:12

2012.302.062	USS Forrestal Aircraft Carrier CV-59	Campbell Films	The Forrestal Class Carrier were the 1st Super Carriers with a length of over 1000 ft, Angled flight deck, and steam catapult. These 4 carriers were not Nukes, but set the standard for all carriers from then on. This is the story about the mighty USS Forrestal CV-59, plus war activities of the 4th Forrestal class carrier; USS Independence CV-62, Plus, the Fire Disaster on board July 29th 1967, Where John McCain's plane got caught in the inferno. This collection shows these amazing ships being built, to daily use, to the fire. We hope you will enjoy. 1st Film: "USS Forrestal CV-59". This is a great film created by the Navy on building the USS Forrestal carrier CV-59. Known as the 1st Super Carrier in the world. From the keel to launching, a great historical film. Amazing stuff. 19:33 Min 2nd Film: "Attack Carriers". This is a film from the Forrestal Class carriers called Face of the Nation. The actual footage is on the USS Independence, the 4th and last Forrestal Class carrier. Takeoff, landings, life aboard the great carrier, to action in Vietnam. Amazing carrier story and amazing color footage 28:07 Min 3rd Film: "USS Forrestal fire Disaster". This film is extraordinary in it's content and footage of the fire disaster that took place July 29th, 1967. After a previous day of over 70 sorties in Vietnam, the crew was getting the planes for another day when a Zuni rocket fired off into a Gassed-up A-4 Skyhawk. All hell broke out. 134 men died that day and the ship almost was lost had it not been for the gallant crew. A must see. 18:44 Min 4th Film: "Carrier

Object ID	Title	Author	Summary
			Newsreels". These is a collection of great footage on USS Forrestal carriers. 1st; Rare Footage of the CV-59. 2nd; Biggest Warship puts to Sea. 3rd; USS Forrestal; trial tests. 4th; CV-62 Launched. 5th; C-130 lands on CV-59. 6th; 7th Fleet flexes muscles. 7th; Americas newest. 8th; Nuke Task Force! Great Clips. 10:36 Min From the campbellfilms.com
2012.302.063	USN Curtiss SB2C Helldiver	Campbell Films	This DVD is about the amazing "Curtiss SB2C Helldiver". This plane was the replacement to the Douglas SBD Dauntless Dive Bomber. Hated at first, it was known as the "Beast" to many, but after the bugs were worked out, the plane became effective in the fleet. A small history note; The Army bought a few hundred of them when they first came out, and was not well received and were rejected. We hope that you will enjoy this collection. 1st Film: "Flying the Curtiss SC2B Helldiver". This is a great film created by USN about how to fly the Curtiss SB2C Helldiver. This is a very nice print and the plane is put through it's passes. Startups, Bomb load types, flying, takeoffs and landings, stalls, and of course, Diving!. Amazing stuff. Runtime 32.23Min's 2nd Film: "Aerial Torpedo" 3rd Film: "Action at Angaur". This is a film from the US Army bout the invasion of the Anguar island. With the help of the Marines and the Navy with carrier action, destroyers, and battleships, the story shows how the Army got the job done. There is carrier footage of the TBF Avenger, F6F Hellcat and the SB2C Helldiver included. Great film.. Runtime 28:23 Min's 4th Film: "US Navy Newsreels with the Helldiver". This is a great collection of Navy

Object ID	Title	Author	Summary
			carrier action. From attacks, to crashes, these newsreels are entertaining and are historical glimpses of the these old planes. 1: Carrier strikes Manila Bay". 2. Carriers Hit Manila held bases. 3. Naval Battle in the Philippines. 4. USN Secrets-Rockets and Helldiver. 5. Carriers in a Typhoon. 6. Navy tests Carriers in Arctic. Runtime about 16:14 Min's. 5th Film: "Curtiss Factory"
2012.302.064	USN T-34 T-28 & SNJ Trainers	Campbell Films	1st Film: "Wings Of Gold USN Training". Climb aboard and see what its like to fly for the US Navy. Start off your training in the T-34 Trainer. Then when you've honed your skills, you can graduate to the T-28. Once you've polished that off, you can hop into the SNJ-Texan. But it's not over yet rookie, when you have finally arrived, then will you be good enough for the T-33 Trainer. Enjoy this movie showcasing the gradual process the Navy Pilots went through to climb the ranks to the top of their training; making them full-fledged Fighter Pilots. Runtime 21:12 Min's. 2nd Film: "Aerobatics in the T-34". Learn to fly the T-34 in this fun short film. This is where the fighting ends and the Aerobatic fun begins. Join the boys and have a blast doing loops, rolls, aileron controls, half Cuban eights, split S' and the like. So come on and enjoy what its like to fly in the T-34 trainer from a Daredevil's perspective. Runtime 12:12 Min's 3rd Film: "USN Newsreels ". Here is a collection of newsreels on US Navy Carriers featuring different types of Navy Aircraft. 1st newsreel: SkyDive Navy Plane Passes Test. 2nd Newsreel: Aviation In The News. 3rd Newsreel: San Francisco - Carrier Landings By Mirror. 4th Newsreel: Military Miracles - A News Magazine Report. 5th Newsreel: 7th Fleet Flexes Muscles. Great stuff.

			Runtime 13:15 min's. 4th Film: SNJ & AT6 Cadets 5th Film: Hand it Back 6th Film: "Weekend Warriors". Come serve the navy for the weekend, we'll spare you from the everyday routine, but be ready to WORK! When things would get hot, the Navy needed everyone's help, so they would enlist different volunteers for the weekend to do anything, from flying to swabbing the deck. In this short film, put yourself in the shoes of a Weekend Warrior and witness the procedures and tasks that endured after enrollment. Great footage. Runtime 10:15 min. B/W 7th Film: "Navy Trainer ST Footage". Here is a bonus film featuring some exclusive footage on the AT-6 SNJ Texan at the Alameda Air-show doing loops and strafing runs. After that is a T-28 coming in for landings. The 3rd part is footage of the magnificent AT-6 SNJ landing and taking off at our local Brackett Air Field. This is a bonus film with footage taken by us so please, do enjoy (Some was shot in HD and some was shot SD, can you tell?). Runtime 8:54 Min's From Campbellfilms.com website.

2012.302.065	USN PBY Catalina Flying Boats	Campbell Films	1st Film "The Story of the Black Cats" This is our own film, about the story of how the PBY's bombed the Japanese supply ships. Good copy and Very nice Film, and fun to see. 19:29 Min. 2nd Film: "Eyes of the Navy" 3rd Film:"The Story of the PBYs at Pearl Harbor Dec.7" Our Film the story about the PBYs on the day of Pearl harbor attack, Dec 7th, 1941. Did you know that PBY#2 reported sinking a submarine at 7:00 AM that morning?.

Object ID	Title	Author	Summary
			Great stuff. 12:56 min.
			4th Films "Military Seaplane Newsreels" A collection of newsreels, from the famous N-4, the big MARS seaplane by the Navy, (There were 2 versions of the Mars, (1. ver. was a twin tail and 2nd was a single tail). Plus the building and flying of the famous Spruce Goose by Howard Hughes. Great and HARD to FIND reels. 17:45 Min.
			5th Film "What is a USN Seagull" ? Our Film about the Navy's Seagulls. I'll give you a hint, Is it a seagull, is it a plane, or is it a Pelican? I'm sure you already know, but it is fun to watch.. 4:00 min
			7th Film "Stock Footage of the Canadiar CL-415". This footage of two Canadiar Fire Planes on loan from Canada. We had a major fire close to our town and this pair of planes flew over our home to get water from the lake. Really great stuff if you like seaplanes in action. It was shot in HD using our Sony V1U formatted to SD DVD. Fun to see!!! Anyway it's free. 4:42 min.
			BONUS Film 6th Film: "Nazi Luftwaffe Seaplanes". This a collection of various Nazi Seaplanes in action. The Luftwaffe Seaplanes were used for Bombing Convoys, to Ambulances, to Search and Rescues. Lots of RARE footage and NARRATION is in GERMAN language. Runtime 19:22 Min's

2012.302.083	Battle Ground Pacific Ocean, Disc 2	Timeless Media Group	At the outbreak of WWII, the US possessed seven aircraft carriers, less than four years later, the number had grown to nearly 100. More than any other weapon, the aircraft carrier made the war in the Pacific not only possible, but also winnable. This 2 DVD set, Pacific Ocean, deals primarily with the role the aircraft carrier made during the war. DISC 2 The Battle of Midway The Life and Death of the USS Hornet The Fighting Lady Kamikaze
2012.302.084	Naval Aces of World War 1, Part 2	Guttman, Jon	This second Naval Aces of World War 1 book looks at the many flying naval heroes who served alongside or against those of the Royal Naval Air Service (RNAS). While the RNAS operated its own formidable arsenal of Nieuport and Sopwith scouts over the Flanders coast, the German Navy countered with its own Land Feld Jagdstaffeln and Seefront Staffeln. Unique to World War 1 was the use of flying boats as fighters in combat, which figured at least partially in the scores of Russian aces Aleksandr de Seversky and Mikhail Safanov. The best flying boat fighter, however, was Italy's Macchi M 5, flown by three aces and also the mount of Charles H Hammann, the first American to earn the Medal of Honor in aerial combat. Also unique were the sole US Navy ace, David Ingalls, who scored his six victories while attached to No 213 Sqn RAF, and Greek ace Artitides Moraitinis, credited with nine victories over Salonika and the Dardanelles.

2012.302.086	Naval Aviation in the Korean War : Aircraft, Ships and Men	Thompson, Warren E.	The first part of this book covers the role of US aircraft carriers and aircraft in stopping the North Korean initial push to the south and also their role in the famous Inchon Landing and Pusan Perimeter Break out. The last part of the first chapter deals with naval operations during the Marine's Chosin Reservoir march to the sea in December 1950. The book goes on to describe the stabilization of the front lines after the Chinese had entered the war during 1951. At this time, the emphasis for naval air operations was centered on interdiction behind the lines. The focus was on trying to stop road and rail traffic from resupplying the communist troops and allowing them to build up to a major offensive. It also includes the entry of the F2H Banshee into carrier operations which gave the USA four major types of aircraft with which to wage the war. During 1952 most carrier air groups spend their time off the coast of North Korea while hitting targets up along the Yalu River, putting them well within the range of the MiG-15s. Navy F9F Panthers were used as top cover while the Corsairs and Skyraiders went after major targets such as the dam complexes up river and marshaling yards north of Pyongyang. During 1953, naval air operations were stepped up in an effort to get the communists back to the truce talks. The number of MiG-15s had grown to a figure many times that of the UN for overhead protection. The deep missions were more dangerous than ever and the Chinese brought in state of the art antiaircraft automatic

2012.302.089	Pacific Naval War 1941-1945, The	Wragg, David	This book shows how the Royal Navy and the Royal Australian Navy made significant contributions to the ultimate victory against Japan in World War II. The book begins by setting the scene in the Far East and studying the decisions that led Japan into war. It goes onto analyse the situation faced by the Royal Navy with its initial heavy losses of major ships, including the Prince of Wales and Repulse. Yet, within a couple of years, the Royal navy was able to send the strongest and most balanced fleet in its history to the Far East to play a major role attacking Japanese oil production and prevent reinforcements being flown from Japan to Iwo Jima and Okinawa. Meanwhile the Royal Australian navy developed from a small force designed to support the royal navy in the southern hemisphere into a viable naval force in its own right. The use of fascinating eye-witness accounts brings a human dimension to this important contribution to Second World War naval history. Several pages are listed for Midway Island and the Battle of Midway.
2012.302.090	US Carrier War	Darling, Kev	This book covers all aspects of the operations made by US aircraft carriers from their introduction into service during World War One to the

			continuing conflicts in the Middle East. Table of Contents : Origins and development -- Neutrality and Atlantic crossings -- War in the Pacific : attack and fightback -- War in the Pacific : turning point to victory -- War in the Pacific : battles and defeats - - War in the Pacific : the setting of the rising sun -- Police action in Korea -- Further Korean carrier operations -- Vietnam : a long-drawn-out affair -- From Desert Storm to the future -- Appendices. 1. Primary carrier aircraft of the US Navy -- 2. US Navy aircraft carriers.
2012.302.091	Developing the Gull-Winged F4U Corsair : And Taking It to Sea, Vol. 1	Harvey, Ralph	This book is about the development of the Corsair, and how it eventually became one of the leading American naval fighters of World War Two. This includes information about the period in which the Corsair was developed; how it compared to other important fighters; how America was able to produce these fighters in large numbers, plus some often overlooked information about the contributions of the fleet Air Arm of Britain's Royal Navy. And that's important, because it was the Royal navy's Fleet Air Arm, and not the U.S. Navy, that first used the Corsair as a shipboard fighter during the war. Table of Contents: Uncharted Territory--a 400 m.p.h Fighter; Ugly Duckling or Revolutionary Design?; At the Factory--Winning Through Mass Production; The F4U Corsair Goes to War; Fleet Air Arm Methods--Taming the Ill-Mannered Beast; F4U Corsairs of the U.S. Navy and Marine Corps; Corsairs of the Fleet Air Arm and the Royal New Zealand Air Force; Moving to Texas, then Deploying to Korea.

	Me - WESTPAC Cruise - 1962-1963		CVA-31 on a West Pac Cruise from July 12 1962 to February 11 1963. The ship left from San Diego and returned to San Diego? Port calls included Hawaii, Subic Bay, Olongapo, Manila, Hong Kong, Sasebo, Nagasaki, Okinawa, Yokosuka, Tokyo, Iwakuni, and Hiroshima. Other pictures include the "Smallboys" : USS Turner Joy, DD-951; USS Towers, DDG-9; USS Dennis J. Buckley, DDR-808; USS Ernest G. Small, DDR-838. Visiting dignitaries included: RAdm. Paul Masterton; Capt. Eugene G. Fairfax; French Chief of Naval Operations, Georges E. J. Cabanier; Mayor of Beppu, Japan, Commanding Officer of the Ark Royal.
2012.302.116	USS Enterprise (CVN-65) - WESTPAC Cruise - 1984	Kelly, J. M. (chair)	Pictorial account of the deployment of the USS Enterprise CVN-65 on its 11th WESTPAC cruise. She left Alameda on 31 May 1984 and returned to Alameda on 20 December 1984. Ports of call included: San Diego, Hawaii, Philippines, Hong Kong, Philippines. There are also pictures of REFTRA, ORE, RIMPAC, Indian Ocean Ops, FLEETEX, and a Tiger cruise. Two aviators were lost on 16 August 1984 from VF-114 and VF-213.
2012.302.120	USS Forrestal (CV-59) - 1967	Davison, 'Dog' (ed.)	A pictorial account of the activities of USS Forrestal leading up to and during its deployment to the South China Sea in 1967. A yard period in Portsmouth, VA from April 1966 to January 1967, Refresher training at Guantanamo Bay (14 FEB-18 MAR) and a dependents cruise (22 May) preceded the deployment. The ship departed Norfolk on 6 June on returned to Norfolk on 14 September. Significant events included combat operations in support of the Vietnam War including the first strikes against North Vietnam that took place 25 July 1967. Many pages are devoted to the famous fire that occurred on 29 July 1967 and repairs made during the cruise and

Object ID	Title	Author	Summary
			after return to Norfolk. Port visits included Rio de Janeiro and Subic Bay.
2012.302.121	USS Independence (CV-62) - Mediterranean Cruise - 1973-74	Smith, Leigh R.	Pictorial account of the deployment of USS Independence CV-62 on a Mediterranean cruise. She left 21 June 1973 from Norfolk and returned 19 January 1974 to Norfolk. Ports of call and interesting things include: President Nixon onboard for Armed Forces day, photos of her time in the Norfolk Naval Shipyard, Soudha Bay, Crete; pages 124-129 are underway replenishment; Athens, Greece; Tunis, Tunisia; Istanbul, Turkey; Emergency Sortie October 7, 1973; Miss USA Amanda Jones. Onboard were: Carrier Task Force 60, CVW-7 (page 60-61 has large color pages for all the squadrons) VF-102 RVAH-14 HS-5 VA-66 VA-65 VA-12 VAQ-130 VS-28 VF-33 VAW-122

She left from Naval Station Mayport on 11 April 1972 and returned to Mayport on 13 February 1973. This was a Vietnam combat cruise. Ports of call included: Subic Bay, Philippines; and Singapore. Onboard were: Attack Carrier Air Wing Three (CAW-3) VF-31 VF-103 VA-75 VA-37 VA-105 RVAH-1 VAW-123 HS-7 HC-7 Det 110 VMCJ-2 Det

Object ID	Title	Author	Summary
			The inside back cover lists 7 deceased sailors and 9 POW/MIA. Copied from www.uscarriers.net: On April 11, 1972, USS Saratoga departed Naval Station Mayport en route to Subic Bay, Philippines, and her first deployment to the western Pacific. She arrived on May 8 and headed for Vietnam the following week, arriving at "Yankee Station" on May 18 for her first period on the line. Before year's end, she was on station in the Tonkin Gulf a total of seven times: May 18-June 21; July 1-16; July 28-August 22; September 2-19, Sept. 29-Oct. 21; Nov. 5-Dec. 8; and December 18-31. During the first period, she lost four aircraft and three pilots. On the plus side, on June 21, two of her F-4 Phantoms from VF-31 attacked three MiG 21s over North Vietnam. Dodging four surface to air missiles, one of the F-4s, piloted by Cmdr. Samuel C. Flynn Jr., with radar intercept officer Lt. William H. John, shot down one of the MiG aircraft. This Phantom, Bureau number 157307, was later transferred to the Smithsonian's National Air and Space Museum. The aircraft was transferred upon its arrival at Dulles International Airport on November 29, 1988. Saratoga's planes attacked targets ranging from enemy troop concentrations in the lower panhandle to petroleum storage areas northeast of Hanoi. On her second line period, she lost an F-4 to enemy fire northeast of Hanoi with the pilot and radar intercept officer missing in action. During this period, her aircraft flew 708 missions against the enemy. On August 6, Lt. Jim Lloyd, flying an A-7 on a bombing mission near Vinh, had his plane shot out from under him by a SAM. He ejected into enemy territory at night. In a daring rescue by helicopters supported by CVW-3 aircraft the following day,

Object ID	Title	Author	Summary
			he was lifted from the midst of enemy soldiers and returned to USS Saratoga. It was the deepest penetration by U.S. helicopters into enemy territory since 1968. During a port visit to Singapore in October there was a fire in the boiler-room. Three crewmen were killed, 12 were injured and the carrier was lightly damaged. USS Saratoga departed "Yankee Station" for Subic Bay on January 7, 1973. From there she sailed for the United States, via Singapore and arrived at Mayport on February 13, 1973.
2012.302.126	USS Ranger (CVA-61) - The Ranger as Aircraft Carrier - Western Pacific Cruise - 1968-1969	Meriwether, Heath J. (ed)	Pictorial history of the deployment of the USS Ranger CVA-61 to the Western Pacific. She departed 26 October 1968 from Alameda and returned 17 May 1969 to Alameda. This was a Vietnam combat cruise. Ports of call included: Hawaii, Japan, Hong Kong, Philippines and a 10 page spread on San Francisco. Onboard were: Carrier Division Three (CarDiv-3)) Attack Carrier Air Wing Two (CVW-2) VA-165 VF-21 VAW-115 VA-147 VA-155 VF-154 RVAH-9 VAH-10 Det 61 VAQ-130 Det 61 HC-1 Det 61 HS-2 Three men were lost from squadrons VF-21 and VA-155.

2012.302.137	USS Randolph (CVA-15) - Sixth fleet Cruise - 1954-55	White, Charles E.	Pictorial account of the deployment of USS Randolph (CVA-15) to the Mediterranean November 30, 1954 from Newport News and returning June 18, 1955. Carrier Air Wings aboard: ATG-181 ,VF-41 (F2H-3), VF-21 (F9F-7) VF-34 (F2H-2), VA-42 (AD-6), VC-62 Det.,VC-12 Det.,VC-33 Det.,HU-2 Det.1. She sailed to the Mediterranean; Marseilles, France; Genoa, Italy; Venice, Italy; Valencia, Italy; Algeria; Palermo, Sicily, Barcelona, Spain; Athens, Greece; Istanbul, Turkey; Cannes, France; Naples, Italy. Joined the Sixth Fleet in November after undergoing repairs from damage by Hurricane Edna.
2012.302.140	Corsairs over Rabaul	Szlagor, Tomasz	History of F4-U Corsairs, their pilots and air battles over Bougainville, Guadalcanal and Rabaul.
2012.302.141	Blue Moon over Cuba	Ecker, William B.	Recounting the historical events of the Cuban Missile Crisis, interwoven with the first-hand accounts of Captain Ecker, Blue Moon over Cuba describes how the photographs his squadron took became key to developing a peaceful resolution to the crisis.
2012.302.142	History of Air-to-Air Refuelling	Tanner, Richard M.	This is a unique account of the development and operational use of air-to-air flight refuelling since its early beginnings in the USA and UK. The author draws upon his life-long career as senior design engineer with the successful British company Flight Refuelling which was responsible for the development of the hose and drogue technique now preferred by many of the world's air forces.
2012.302.143	Ultimate Fighter : Lockheed Martin F-35 Joint Strike Fighter	Sweetman, Bill	Ultimate Fighter tells how a series of little-known technology programs coalesced into a 3,000 -airplane plan-the F-35 joint strike fighter (JSF). As one of the first major aircraft programs to start from

Object ID	Title	Author	Summary
			scratch in the era of information technology, the JSF virtually flies itself, while the pilot manages the mission with the help of very acute high-resolution sensors and displays. The F-35 is one of the biggest single military projects in history-but it was born as a compromise between the needs of three U.S. services in the budget-strapped post-Cold War era. Author Bill Sweetman chronicles the high stakes competition between two aviation giants, Lockheed Martin and Boeing, to build the Joint Strike Fighter-the next generation fighter jet. Publication Date: November 20, 2004 About the Author Bill Sweetman was the chief aerospace consultant on the Nova (PBS) production of "Battle of the X-Planes." He is an experienced aviation journalist, having written more than 30 books in the field. He was awarded the Aviation/Space Writers Association Award of Excellence in 1990 and 1992. Sweetman also served as consulting editor on Jane's International Defense Review. Sweetman lives in St. Paul, Minnesota.
2012.302.144	USS Bon Homme Richard (CV-31) - Far East Cruise - 1964	Testa, S. J. (ed)	Pictorial account of the deployment of the USS Bon Homme Richard CV-31 to the Western Pacific and Vietnam. She left San Diego on 28 January 1964 and returned 9 September 1964 (according to the book) and returned 21 November 1964 according to one website. Ports of call and items of interest were: Pearl Harbor; Subic Bay, Philippines; Hong Kong; Diego Suarez, Madagascar; Mombasa, Kenya; Aden; Shah of Iran visit; Sasebo, Japan; Yokosuka, Japan. The ship was part of the First Concord Squadron, Task Force 90 which was the first US Task Force to patrol the waters of the Indian Ocean.

Object ID	Title	Author	Summary
			Onboard was: Carrier Division Five (CarDiv-5) Carrier Air Wing Nineteen (CVW-19) VF-191 (F-8E) VA-192 (A-4C) VF-194 (F-8C) VA-196 (A-1H) VA-195 (A-4C) VAH-4 Det. E (A-3B) VFP-63 Det. E (RF-8A) VAW-11 Det. E (E-1B) HU-1 Det. E (UH-2A)
2012.302.145	USS Theodore Roosevelt (CVN-71) - Volume 1 - 1984-1987	Hopkins, John L.	Pictorial account of the USS Theodore Roosevelt CVN-71 from commissioning through sea trials and its shake down cruise. Also includes pictures of the construction, christening and a history of the ship. Includes portfolio of sixteen 8 1/2 x 12 color pictures of the ship. Ports of call and important events include: Lee Greenwood and beauty queens onboard, plank owner breakfast, Caspar Weinberger and John Lehman onboard, commissioning, deperming, Sea Sparrow and CIWS firing, Nassau, Bahamas; dependent's cruise; Shock Trials; Edward Kennedy, Congressman Owen V. Pickett, and Theodore Roosevelt IV onboard; Theodore Roosevelt Association (TRA); media; NATO Sea Sparrow conference; and a Congressional Luncheon. No listing of Air Wing or squadrons.
2012.302.146	F/A-18C/D Hornet	Zmuda, Tom	Having lost to General Dynamics the USAF tender for a fighter aircraft, Northrop resolved to offer its YF-17 prototype to the U.S. Navy. McDonnell Douglas, a company with vast experience in building carrier-borne aircraft, was invited to cooperate. In 1975 the two companies won the contest for the Navy Air Combat Fighter, this time beating General Dynamics and its naval adaptation of F-16. The aircraft which evolved from the YF-17 was designated the F/A 18 Hornet.

Object ID	Title	Author	Summary
			As compared to the YF-17, the Hornet featured increased wing area, enlarged front section of the fuselage and more powerful General Electric F404-GE-400 engines. The prototype was first flown on 18th November 1978. A total of 11 machines were tested, including nine of single-seat F/A-18A version and two twin-seat F/A-18B trainers (initially designated TF-18). Carrier trials onboard USS "America" were conducted at the turn of October and November 1979. In May 1980 first Hornets were delivered to Fleet Replacement Squadron VFA-125, stationed at NAS Lemoore, California. This unit trained pilots from both U.S. Navy and U.S. Marine Corps. Overall, 410 F/A-18A/Bs were built. 1987 saw introduction of F/A-18C, followed by F/A-18D two-seater. Both variants had provisions for carrying AIM-120 AMRAAM, AGM-65 Maverick and AGM-84 Harpoon missiles. They were also fitted with new Martin-Baker SJU-17/A ejection seats. Beginning with early nineties of the 20th century, the aircraft is powered by F404-GE-402 engines. The twin-seater F/A-18D is no longer a trainer but an attack aircraft, used mainly for night operations. Its derivative, operated by the Marine Corps, is the F/A-18D(RC) reconnaissance version, fitted with ATARS (Advanced Tactical Airborne Reconnaissance System) in place of six-barrel M61A1 cannon. In 1992 the AN/APG-65 radars, hitherto used by the F/A-18C/D, began to phase out in favour of newer AN/APG-73 sets. The first Hornets equipped with new radars were delivered to VFA-146 and VFA-147 squadrons in 1994. The F/A-18E and the F/A-18F Super Hornets, currently in production, are practically new designs. Despite their general resemblance in appearance,

Object ID	Title	Author	Summary
			they are larger, feature several construction improvements, new F414-GE-400 powerplants and much more advanced electronics. The first Super Hornet was issued to the U.S. Navy in December 1998, and the first unit to become operational on them was VFA-115. As many as 460 machines of this type are planned to see service by 2012. Presently the F/A-18E/F variants are in the process of receiving new AN/APG-79 radar fitted with AESA (Active Electronically Scanned Array). EA-18G Growler, carrier-based electronic warfare version of the two-seat F/A-18F Super Hornet, is the latest development of the Hornet. It was designed to replace the aging Grumman EA-6B Prowlers. Hornets already saw combat in operations against Libya, Iraq (during the first war in the Gulf) and in former Yugoslavia. They remain in active service in Afghanistan and Iraq. The first foreign buyer of Hornets was Canada. Later they were also purchased by Australia, Spain, Kuwait, Switzerland, Finland, and Malaysia. Tom Zmuda

2012.302.150	Seaforth World Naval Review 2011	Waters, Conrad (ed)	Launched in 2009, this annual is rapidly establishing a reputation as an authoritative but affordable summary of all that has happened in the naval world in the previous twelve

Object ID	Title	Author	Summary
			months. It combines the standing features of regional surveys with one-off major articles on noteworthy new ships and other important developments. Besides the latest warship projects, it also looks at wider issues of importance to navies, such as aviation and electronics, and calls on expertise from around the globe to give a balanced picture of what is going on and to interpret its significance. This year's special features include in-depth studies of the growing naval power of Turkey and South Africa, plus analyses of four significant new warship classes: The RN's Astute class submarines; India's Project 15 destroyers; the Norwegian Fridtjof Nansen, the smallest warship to carry the Aegis weapon system; and USS Independence, an innovative littoral combat ship design.

2012.302.164	USS Boxer (CV-21) - Oriental Cruise - Busy "B" Cruise Book "Operation Orient" - Jan-Jun 1950	Whiteside, R. E. (ed)	Pictorial account of the deployment of the USS Boxer (CV-21) to the Far East and Korea in the first part of 1950. There would be another deployment in 1950 hence the designation of 1950a for the date. The Boxer departed San Diego? on 11 January 1950 and returned to San Diego? or San Francisco? on 25 June 1950. Ports of call and items of interest: Hawaii, Japan, Hong Kong, Subic Bay, Manila, Sasebo, Korea, Singapore, Tyrone Power and Michelene Prella were guests. Onboard were: Carrier Group Nineteen (CVG-19) VF-191 (F8F-2) VF-151 (F8F-2) VF-153 (F8F-2) VA-195 (AD-3) VC-61 Det. VC-11 Det. HU-1 Det.

Object ID	Title	Author	Summary
2012.302.165	Model Art Modeling Magazine [Battle of Midway Aircraft]	None Stated	Color photos and black and white line drawings of museum-quality scale models of Imperial Japanese Navy aircraft used at The Battle of Midway for hobbyists. Text is in Japanese. In addition to the Nakajima B5N Kate, Aichi D3A Val, and Mitsubishi A6M Zero, there are articles on the Aichi E13A1 Type Zero reconnaissance seaplane from the IJN heavy cruiser Tone and the 13Shi experimental carrier bomber conversion reconnaissance plane from the IJN carrier Soryu. Also includes article on USS Essex (CV-9) as she appeared in WWII.
2012.302.166	USS Oriskany (CV-34) - Officers and Men of the 1960 Cruise - 1960	None Stated	Pictorial account of the deployment of the Essex-class aircraft carrier USS Oriskany (CVA-34) from 1960 cruise (COMCARDIV 7) with CVG-14. Crew information only; few photographs of carrier ops; no ports of call specified.
2012.302.167	USS Tarawa (CVA-40) - Mediterranean Cruise - 1953	None Stated	Pictorial account of the deployment of the Essex-class aircraft carrier USS Tarawa (CVA-40) on a Mediterranean cruise, Captain Jack P. Monroe, USN commanding. The U. S. S. TARAWA (CVA 40) was first commissioned at Portsmouth, Virginia, on December 8, 1945. Too late for the conflict that inspired her conception, she was duly shaken down and operated on both the Atlantic and Pacific coasts as a training ship. Finally in October 1948, she set out on a world cruise that took her from San Francisco to New York via Hawaii, Asia, Suez and Gibraltar. Upon her return she was placed in the reserve fleet and decommissioned. On February 3, 1951, the TARAWA was commissioned for the second time with Captain John H. Griffin USN as Commanding Officer. Shortly thereafter she enjoyed the unique distinction of being officially adopted by the State of Connecticut.

Object ID	Title	Author	Summary
			The remainder of 1951 saw her plodding the Atlantic seaboard from Maine to Cuba, until she departed in November for the Mediterranean Area with Carrier Air Group Eight embarked. Upon her return, the "Terrible T" put into the yard for repairs and in August 1952 Captain Jack P. Monroe assumed command. In October 1952, the TARAWA again pointed her bow southward as she headed for the pale blue waters of Guantanamo Bay, Cuba for yet another shake-down and training exercise. Pausing at Jacksonville, Florida to take aboard the last of her new air group, she became the first carrier to use the dock facilities of the then newly completed NAS Mayport, Florida. Her assignment in the Caribbean completed, the TARAWA headed north in December for anxiously awaited Christmas leaves before departing for her second cruise with the Sixth Fleet. New Years Day 1953, found her moored at NAS Quonset, Rhode Island as she feverishly readied herself for the sailing date of January 7, 1953. All of her hundreds of people were filtering back from final leaves, her cranes worked day and night loading supplies and aircraft. Finally the dawn of the seventh arrived. It is from that dawn whence hangs the tale that follows. A tale, not so much of a ship, but more of the people that go to make her up; the people that are her life's blood.
2012.302.168	USS Philippine Sea (CV-47) - The Chosen Theatre - The Showboat Premier in 3 Acts ...Many Scenes - 1950-1951	Smith, M. S.	Pictorial account of the deployment of the USS Philippine Sea (CV--47) to Korea in 1950. She departed San Diego 5 July 1950 and returned to San Francisco Naval Yard 9 June 1951. She sailed with Air Group 11, but on 26

Object ID	Title	Author	Summary
			March exchanged 11 for Air Group 2. This ship received the nickname "Showboat" before the Korean conflict, when it was frequently used as a civilian and military orientation carrier. When the Navy wanted to show some VIP's how carriers operate, to illustrate the mobility of these fast-moving airfields, the Philippine Sea took on the assignment. Ports of call and items of interest: Pearl Harbor; Okinawa; Sasebo; Nagasaki; 1721 sorties in 29 days at sea; 3 fires on the flight deck (usually as a result of a plane crash); invasion of Inchon; Yokosuka; Choshin Reservoir; Hungnam; page 83 lists the 7627 offensive combat sorties and what was damaged and destroyed; Yokohama; Tokyo. There are pictures of the ship's crew by departments, but no department pictures of the air wings.
2012.302.169	USS Valley Forge (CV-45) - World Cruise - 1947-48	Lunger, J. P. (ed)	Pictorial account of the deployment of the USS Valley Forge (CV-45) on a world cruise. She was the first United States aircraft carrier to circumnavigate the globe. She departed San Diego on 9 October 1947 and returned to San Diego on 11 June 1948. Ports of call and items of interest: Flagship of Task Force 38 and Carrier Division Five; Honolulu; Sydney; Hong Kong; Tsingtao; Singapore; map of the voyage; Trincomalee; Ras Tanura; 7 pages of pictures of the visit of the Prince of Saudi Arabia; Suez; Gibraltar; Tangier; Bergen; Portsmouth; New York; Panama; nicknamed "Happy Valley" Onboard: Air Group Eleven (CAG-11) There are no individual pictures nor group pictures of crew and air wing. Mostly candid pictures without individuals identified. At the end of the book is a page of lists of Firsts for the Valley Forge. This include: First US carrier around the world, First US carrier to transit the

2012.302.176	Constellation, CVA-64, Spirit of the Old - Pride of the New [1960-62]	Broadwell, R. E. (ed.)	A pictorial account for USS Constellation of the period of late stages of construction at the Brooklyn Naval Yard through transfer to her new Pacific homeport of San Diego. She was launched 8 October 1960, delivered to the Navy 1 October 1961, and commissioned 27 October 1961, with Captain T. J. Walker in command. Following fitting out and acceptance trials, Constellation departed her home port of Norfolk, Virginia, on 7 February 1962 for initial air operations off the Virginia Capes. She conducted her first catapult launch and arrested landing the same day with Commander George C. Watkins, air group (CVG) 13 commander, at the controls of an A4D-2 Skyhawk of Attack Squadron 34. After a month of operating locally, "Connie" conducted a two-month shakedown cruise in the Caribbean. In summer 1962, Constellation was transferred to the U.S. Pacific Fleet and CVG-13 was disestablished. For the two-month trip around Cape Horn to her new home port of San Diego, Calif., Connie embarked elements of CVG-5 and departed Mayport, Fla.,

2012.302.189	USS Princeton CV-37 - Korea 1950-51	Prell	Pictorial record of the 1950-51 Korean combat cruise of the Essex-class aircraft carrier USS Princeton (CV-37). Ports of call: Bangor & Bremerton, WA; San Diego, Alameda, Oakland, & San Francisco, CA; Pearl Harbor, Hawaii; Sasebo & Yokosuka, Japan. Combat operations against Wonsan, Hungnam, Songjin, & Chungjin, Korea. Embarked on board: CAG 19, VA-55, VC-3, VC-11, VF-23, VF-871.
2012.302.190	USS Hornet (CV8) : Loss in action in the Battle of Santa Cruz, 27 October 1942	Sumrall, Robert F. (ed)	Editorial Notes: This is a presentation of facts regarding the loss of the Aircraft Carrier USS HORNET (CV8). The technical introduction is a discussion of the requirements for the YORKTOWN class carriers, their operational performance, and their ability to sustain damage. The circumstances leading to the action, and the order of battle are outlined for the reader in an attempt to put this action in perspective with the overall campaign for Guadalcanal. Finally, the actual Bureau of Ships damage report has been edited and reproduced. Sufficient photographs and other graphics have been included to give the reader as complete a picture as possible of the ship.

Object ID	Title	Author	Summary
			Special acknowledgement is given to Dr. Dean C. Allard and his staff of the Operational Archives Branch, Naval History Division, Department of the Navy, for their cooperation and assistance with official records. I will be eternally grateful to my friend and colleague Dr. Norman Friedman for his help and inspiration. Finally, the help from my assistant, Ann Jensen, has been immeasurable.
2012.302.191	Mighty O, The : USS Oriskany CVA-34	Giberson, Art	"This is the story of the USS Oriskany (CVA-34)--- affectionately known as "The Mighty O." She was one of those front line units and saw combat action in two wars --- Korea and Vietnam."--p. [1]
2012.302.192	Intrepid Aviators : The True Story of USS Intrepid's Torpedo Squadron 18 and Its Epic Clash with the Superbattleship Musashi	Fletcher, Gregory G.	The story of USS Intrepid's Torpedo Squadron 18 which was part of its Air Group 18. The action takes place in World War II in the Pacific and includes the clash with the Musashi in which the squadron contributed. CONTENTS: In the Philippine Sea -- In California -- In Hawaii -- In Linga Roads -- In the middle latitudes -- In the Visayans -- Over Luzon -- Over Formosa -- In the Sibuyan Sea -- On Strike 2 Able -- On Strike 2 Baker -- On Strike 2 Charlie -- Off Banton and Cape Engano -- Off Banton and Luzon -- On Panay -- Epilogue.
2012.302.193	Carrier Strike : US Naval Air-Power at Sea	Evans, Andy	Carrier Strike is a compilation of selected articles and features, some of which have previously appeared in issues of Model Aircraft Monthly, and have been expanded and enlarged, and others that have been specifically written for this publication. CONTENTS: The essential guide to the combat aircraft of the US Navy and Marine Corps * Stingers! The F/A-18 Hornet * Spooks at Sea - the F-4 Phantom * Bomb Truck - the A-6 Intruder * SLUFF Light Strike - the A-7 Corsair II * Top Cat - the F-14 Tomcat * Jump Jets - the AV-8B Harrier II *

2012.302.195	Santa Cruz 1942 : Carrier Duel in the South Pacific	Stille, Mark	Santa Cruz is the forgotten carrier battle of 1942. Despite the myth, the Japanese carrier force was not destroyed at Midway but was rebuilt in time to participate in the Guadalcanal campaign. At the battle of the Easter Solomons in August, the opposing carrier forces fought to a draw. In October, both sides committed their surviving carriers to gain control of the waters around Guadalcanal. In the resulting battle of Santa Cruz, two American carriers (Hornet and Enterprise) faced four Japanese carriers (Junyo, Hiyo, Shokaku, Zuikaku) and one light carrier (Zuiho). The clash occurred on October 26, and the Americans were defeated with the loss of the carrier Hornet and damage to Enterprise. In return, two Japanese carriers were damaged (Shokaku and Zuiho). More importantly, the Japanese suffered heavy aircraft losses and were unable to turn their tactical victory into a strategic one, since the damaged Enterprise was able to escape. Santa Cruz was the last time during the war the Japanese carrier force was able to take on the growing power of the US Navy on equal terms.
2012.302.196	Refueling and Complex Overhaul of the USS Nimitz (CVN 68) : Lessons for the Future	Schank, John F.	Rand report MR-1632-NAVY. In May 1998, the USS Nimitz (CVN-68) entered Newport News Shipbuilding to begin its midlife refueling/complex overhaul (RCOH). The CVN-68 RCOH was the first of the Nimitz class and only the fourth for an aircraft carrier (Enterprise has undergone three). The project took five years of planning and three years of execution to complete. The budget was 2.2 billion dollars. Because of the cost overruns and delays, Rand was asked to identify changes in processes and procedures that

Object ID	Title	Author	Summary
			would lead to better cost and schedule performance for the remaining Nimitz-class RCOHs.
2012.302.197	USS Hancock (CVA-19) - Western Pacific Cruise - 1970-71	Steele, Craog A. (ed)	Pictorial account of the deployment of the USS Hancock, CVA-19 to the Western Pacific 1970-1971. She departed Alameda 22 October 1970 and returned 3 June 1971. Ports of call and items of interest : includes a brief history and homecoming in 1970 from previous cruise; Hawaii; Olongapo, Philippines; Subic Bay; picture of an A-7 from the Kitty Hawk landing by mistake on the Hancock; Miss Black America USO show; Ray Camacho and the Teardrops; Baguio, Pagsanjan Falls, Whiterock Beach and Corregidor; officer wedding at Cubi Point Chapel; Yokosuka; Kamakura and Ofuna; Nikko, Japan; Tokyo; Hong Kong; Victoria; Repulse Bay; Aberdeen; Kowloon; New Territories; Sydney, Australia. 2012.302.210	USMC Aviators : Marine Corps Airmen in the Pacific, 1941- 1945	Pons, Gregory	Translated from the Frency by Gregory Pons and David A. Reid. With his new book, Gregory Pons invites us to discover the aviators of the legendary US Marine Corps

Object ID	Title	Author	Summary
			in the South Pacific. This volume contains seven chapters, each named for a different squadron, and the personal memoirs, flight log books, and photo albums of the men who served in it. Through these words and photos, as well as many outstanding never-before-published photographs, the author enables the reader to share in the daily lives of these men as they experience training and combat. With its colorful plane profiles, original documents, and reconstructions detailing the flight equipment of these men, this book is the first of its kind about US Marine aviation. After the success of his two previous books, the author was inspired by the TV series "Baa Baa Black Sheep", VMF-214, and its famous Commanding Officer, Major Gregory "Pappy" Boyington to research and write about the many other US Marine aviators and their squadrons that were there. Contents Introduction : 10 pages Chapter 1 VMSB-144 : 18 pages Chapter 2 VMSB-235 : 10 pages Chapter 3 VMF-222 : 61 pages Chapter 4 VMSB-341 : 10 pages Chapter 5 VMTB-143 : 48 pages Chapter 6 VMF-512 : 18 pages Chapter 7 VMTB-454 : 15 pages Bibliography, acknowledgments : 1 page --From the http://www.eden-mili-arts.com/ website. Many pictures of uniforms and flight equipment.

2012.302.211	American Aces Against the Kamikaze	Young, Edward M.	The clashes between US Navy, Marine Corps and USAAF units and the hastily created Special Attack kamikaze units of the Imperial Japanese Army Air Force (JAAF) and Imperial Japanese Navy (IJN) were some of the last large-scale aerial engagements of the Pacific War. Kamikaze strikes came to the

Object ID	Title	Author	Summary
			fore during the Okinawa campaign in April-May 1945, when mass attacks were made. Japanese Special Attack units had first been introduced in response to the retaking of the Philippines by American forces in late 1944. Overall, Special Attack Units flew some 1900 suicide sorties, losing 900+ aircraft in the process. During the course of the fighting, 67 US Navy, 21 Marine Corps and three USAAF pilots became aces, destroying at least five aircraft between March and June 1945. In many ways it was an uneven combat. While many regular JAAF and IJN aviators volunteered for the Special Attack units, a large number of the kamikaze pilots were inexperienced and only recently out of flying training. they also often flew obsolete aircraft. These less experienced aviators were no match for the Hellcat, Corsair, Wildcat, Lightning and Thunderbolt pilots who were at the peak of their game. (From the back cover).
2012.302.212	History of Aircraft Carriers in the United States Navy and Its Current Fleet	Wikipedia	This book is a compilation of articles from Wikipedia. Contents include: Short history of the US Navy and Navy ships. Aircraft carrier history. The Supercarrier - USS Enterprise (CVN-65). The Nimitz Class of Supercarriers. USS Nimitz (CVN-68). Nimitz Class aircraft carriers : USS Dwight D. Eisenhower (CVN-69); USS Carl Vinson (CVN-70); USS Theodore Roosevelt (CVN-71); USS Abraham Lincoln (CVN-72); USS George Washington (CVN-73); USS John C. Stennis (CVN-74); USS Harry S. Truman (CVN-75); USS Ronald Reagan (CVN-76); USS George H. W. Bush (CVN-77). The Gerald R. Ford Supercarriers which includes the Gerald R. 2012.302.213	Convair PB4Y-2/P4Y-2 Privateer	Veronico, Nicholas A.	Comprehensive history of the Consolidated Vultee (Convair) PB4Y-2/P4Y-2 Privateer. Includes numbers photos, cutaways, and diagrams.
2012.302.214	Grumman F6F Hellcat	Meyer, Corwin	A comprehensive history of the Grumman F6F Hellcat. Many photos, close ups of instrument panels, cutaways and equipment. Although not as glamorous as a Corsair, a Phantom, or a Tomcat, the author believes the Hellcat was the most important aircraft in Naval history. Without it the Pacific war would have had a very protracted conclusion. Usually these books include a small section at the end that reviews model kits of the subject aircraft, but not this time. Also, there is no information on display and civilian aircraft.
2012.302.215	USS Wright (CVL-49) - Cruise of '54 - 1954	Dabbs, Charles L. (ed)	A pictorial account of the deployment of the Saipan-class light aircraft carrier USS Wright (CVL-49) from Norfolk, VA 20 April 1954 - Oct 1954 passing through the Panama Canal to join the Far East Seventh Fleet. Shakedown, in early 1954 to the Caribbean, Naval Base Guantanamo Bay, Cuba to Haiti, Port-Au-Prince and return to Quonset Point for next assignment from April - October to 8 hour transit of Panama Canal 25 April 1954 through the Gatun Lock, Gatun Lake and "Gamboa Reach", Gaillard Cut, Pedro Miguel, Miraflores Lock and the Pacific Ocean. Close by Panama City. Gorgas Hospital named after Colonel William Crawford Gorgas whose health program stopped deaths from malaria and yellow fever. Home of the Institute for Research in Tropical America in Barro Colorado with over 230 species of birds. On to San Diego, CA, Point Loma, North Island, NTC, MCRD, Miramar, Ream Field and Brown Field & a visit to Tijuana, Mexico. On to

A British Crown Colony and haven for refugees from Communist China. Shopping was most welcomed and Commanding Officer Captain Thomas P. Wilson was welcomed aboard 28September 1954 ("Relieving Ceremony")replacing Captain John E. Clark. Tiger Balm Gardens of interest. Liberty Parties and Wright's Baseball Team, Volleyball Team. Air Department: Helicopter Det HU -2; Marine Attack Squadron 211 (VMA-211) Douglas AD Skyraiders aircraft.(famed Wake Island Avengers of WWII) V-1 Division; V-2 Division; V-3 Division; A Division; B Division; E Division; M Division; R Division; S-3M Division; S-1, S-2 & S-4A Divisions; S-3 Division; X, H, & D Divisions, & S-4 Division on board.
2012.302.216	Carrier Observer : A Back Seat Aviator's Story	Wallace, Gordon	Gordon Wallace joined the Fleet Air Arm in 1940 and trained as an observer. In "Carrier Observer" he recalls this period and gives the reader a fascinating insight into the

Object ID	Title	Author	Summary
			life of a navigator who has the responsibility of finding his way back to a carrier in the middle of an ocean in all weathers. The author saw action in Ceylon, Malta and Tunisia. Gordon Wallace has studied in some detail what has been described as one of 'the most dangerous moments of the war' when there was a real threat that the Eastern Fleet would be destroyed by the Japanese. His carefully reasoned conclusions make interesting reading. He was one of the few survivors of the daylight raid on an Axis airfield in Tunisia for which Wing Commander Malcolm was awarded a posthumous Victoria Cross after his nine aircraft took on 60 German ones. He escaped death narrowly three times including once when his aircraft crashed between enemy lines. Written in a light and often amusing style, Carrier Observer is a delightful portrait of life in the Fleet Air Arm during World War II. Jacket painting by Lynn Williams. (from dust jacket flap)

2012.302.217	USS Bon Homme Richard (CV-31) - Bonnie Dick - Westpac - 1968	Boucher, L. J. (ed)	Pictorial account of the deployment of the USS Bon Homme Richard (CV-31) to the Western Pacific and Vietnam. She departed San Diego on 27 January 1968 and returned on 10 October 1968. 2012.302.218	USS Philippine Sea (CV-47) - Headliner - 1957-58	Ranney, H. F. (ed)	This is a pictorial account of the USS Philippine Sea (CV-47) search for the Pan American Airliner, Romance of the Skies which went down 8 November 1957 AND of the 1958 deployment of Philippine Sea. The Philippine Sea was called in to help with the search for the Airliner--the search was successful, the discovery tragic--the ship picked up 15 bodies and wreckage of the plane. She was deployed from San Diego 8 January of 1958 for her 7th deployment in the Pacific. She returned to San Diego 15 July 1958 and started deactivation. Ports of call and items of interest: Long Beach; Pearl Harbor; Subic Bay; Operation Strongback (rendezvousing off Okinawa, the ship joins 100 other ships, in what is the largest amphibious operation since World War II); Okinawa; South China Sea Training exercises; A No Hook Landing of a Marine OE observation plane; a poster showing the status of water and asking men to save water; 10 pages of Pollywog ceremonies with a 2-page certificate; Exercise Oceanlink with seven types of aircraft and three nations; Hong Kong; Sasebo and Yokosuka Japan; several pages of sporting pictures including Oceanlink Games with Australia, England, New Zealand and the Philippines. At the back of

2012.302.229	S-3 Viking in Action	Elward, Brad A.	The Lockheed S-3 Viking was developed in the late 1960s to serve as a dedicated carrier-based anti-submarine aircraft. Over the years, it evolved into an outstanding surveillance and anti-surface platform, effective not only against submarines but also large and small surface ships. As its nearly 35-year career came to an end in 2009, the Viking also took on the carrier air wing organic tanking requirements, retiring with over half of its service life remaining. A total of 187 aircraft were built and served in 16 United States Navy squadrons. The Viking and its main variant, the highly-classified ES-3A Shadow electronic surveillance aircraft, played a key role in the Cold War and in the conflicts of the 1990s. The book is one of the

Object ID	Title	Author	Summary
			few publications to tell the Viking story and is packed with photos and detailed line drawings, all depicting the aircraft's weapons, paint schemes, sensors and interior. It also provides an overview of some of the more significant variants that were studied, but never fully pursued, such as the Carrier On-Board Delivery (COD) and dedicated (KS) refueling variants. It also discusses the aircraft's role in Operation Desert Storm and how the lessons learned from that conflict impacted the Vikings' mission during the latter part of the 1990s and early 2000s. Illustrated with 186 photographs, line drawings, and numerous color profiles; 80 pages. ISBN 978-0-89747-702-4 SS10230 \$18.95 (from http://www.squadronsignalpublications.com)

2012.302.230	On Boyington's Wing : The Wartime Journals of Black Sheep Squadron Fighter Ace Lt. Col. Robert W. McClurg	McClurg, Robert W.	Whenever the fighter pilots of the Black Sheep Squadron headed out on a mission in their F4-U Corsairs, they always flew in pairs. The guy in the other plane was known as your "wingman." Incredibly, when Bob McClurg joined the Black Sheep Marine Fighter Squadron in the South Pacific theatre during WWII, he barely had any flying hours under his belt. The colorful squadron leader, Greg "Pappy" Boyington, literally took McClurg under his wing and made an Ace fighter pilot out of him. McClurg flew many missions as Boyington's wingman in the distinctive "bent-winged" aircraft. The Corsairs could really take a beating, but they often lacked critical equipment such as working compasses or radios. Outmaneuvered by the swift Japanese zeroes, they often limped back to the base. But the zeroes were fragile, and, as McClurg says, after a morning combat mission there were usually a lot fewer lunches

Object ID	Title	Author	Summary
			served at the Japanese base than there had been breakfasts. Boyington's combat tactics, which are reprinted in this book, were largely responsible for the high success rate of the Black Sheep. Several books have been written about the Black Sheep, but this is the only one besides Boyington's autobiography, "Baa, Baa, Black Sheep," and Frank Walton's "Once They Were Eagles." that has been written by one of the original squadron members. Thanks to a 1970s television series, the Black Sheep became a cultural icon, but the series did not give a completely accurate portrayal of the squadron, and McClurg sets the record straight. He emphasizes that these fighter pilots and their leader were not "misfits," as is commonly believed. Here is McClurg's story in his own words, with excerpts from his wartime journals accompanied by transcriptions of the actual combat reports from the National Archives, as well as several never before published photographs. A WWII aviation classic! 2003, 5½ x 8½, cloth, 256 pp. (from Amazon.com)
2012.302.231	Eyes of the Fleet : An Analysis of the E-2C Aircraft Acquisition Options, The	Younossi, Obaid	The E-2C Hawkeye is the U.S. Navy's all-weather airborne early-warning aircraft and an integral component of the Navy's carrier air wing. Although some of the fleet E-2Cs are currently being replaced with an enhanced version of the aircraft, many E-2Cs are approaching their service life limits and the Navy is concerned about the aging fleet's ability to satisfy future operational performance requirements. The Navy soon has to decide whether to buy new aircraft, retrofit old aircraft or refurbish them to extend their service lives, or adopt some combination of these options. This book analyzes the costs, benefits, and risks of those options. The authors

Object ID	Title	Author	Summary
			find that none of the life-extension and retrofit options can sustain the required minimum number of available aircraft over the long run unless the Navy also buys some new E-2C aircraft, and radar-modernization retrofitting coupled with a life-extension program is so expensive that it would be more cost effective to buy new aircraft already equipped with the upgraded radar. In addition, a steady flow of E-2C work is critical to the Saint Augustine facility of Northrop Grumman Corporation, the E-2C prime contractor, and maintaining such a workflow is not feasible with a life-extension program alone. (from http://www.rand.org/publicati
2012.302.233	Wings of the Fleet : US Navy & Marine Corps Aviation 1919-1941	Freeman, Peter	The On Target series are dedicated to providing a wide range of schemes and markings of aircraft of different historic periods. Between the World Wars, US Naval aircraft development was closely tied to the rise in the strategic importance of the aircraft carrier, and as such many of the illustrations within this book feature carrier-borne aircraft, but also included is an assortment of Battleship and Cruiser Squadrons, and naval and marine Air Stations aircraft, including a full range of the amazing blue, grey and white McClelland Barclay schemes trialled in 1940. The layout follows a chronological format of presenting each aircraft type from its first entry into service until obsolescence, with a cut-off date of 7 December 1941, allowing the reader to appreciate the evolution of the colour schemes and markings.
2012.302.234	USS Ranger (CVA-61) - Southern Atlantic and Southern Pacific - 1957-58	Shear, George E. (ed)	Pictorial account of the deployment of the USS Ranger, CVA-61 to the Southern Atlantic and Southern Pacific. She departs Norfolk 20 June 1958 and returns 20 August 1958. 2012.302.235	USS Coral Sea (CV-43) - Shakedown and Mediterranean Cruises - 1956-57	Amhowitz, Harris J. (ed)	Published in two parts: the first is this cruise book and the second is the one with photos of the crew. The Cruise Book and the Crew's Book both dated 1956, but the Cruise book covers events in 1956-57.. The cruise book is a pictorial account of the Shakedown cruise and inspections between 1 February 1956 and 12 August 1956. She left Norfolk Naval Shipyard, Portsmouth on 1 February 1956. She stopped at Mayport, Florida; GTMO (Guantanamo Bay); and returned to Norfolk on 5 April 1956. During April she experienced Operation Intex. On 23 April 1956 she departed Norfolk for a weekend in New York, and returned to Norfolk on 1 May 1956. On 3 May there was a Joint Civilian Orientation Cruise, and on 8 May she entered NNSY for major repairs to reduction gears. On 2 July she departed Portsmouth for Operations in Norfolk area and for Carrier Pilot Qualifications off Mayport, Florida. She

Object ID	Title	Author	Summary
			departed Mayport 13 August 1956 for the Mediterranean and returned on 11 February 1957. Ports of call and items of interest: the front and back covers have maps of the cruise; Naples; Santa Lucia; Capri; Pompeii; Amalfi; Palermo; Genoa; Italian Riviera; Athens; Istanbul; Alexandria, Egypt; Suez crisis--Points Abraham, Isaac, Jacob and Moses; Augusta, Sicily; Taranto, Italy; Cote d'azur; Cannes, France; Christmas gift given from the crew to Hungarian refugees. There are many pictures of the ship and its departments, but none of the people in the pictures are identified. Within the Air Wing photos there are two pages showing a crash, the helicopter recovery of 4 men, and picture of medics attending the men back on the flight deck. More photos of tours: Venice; Pisa; Florence; Rome. There is a picture of a "tagged" airplane--a plane not from the Coral Sea but forced to land on the ship. At the end the cruise book staff is identified, and the last page is a "In Memoriam." 2012.303.003	American Air Power: The First 75 Years	Christy, Joe	A comprehensive history of U.S. military aviation ... the aircraft, the battles, the people, and the politics! A thoroughly engrossing and exceptionally well-written account of American military aviation from the delivery of the first military craft by the Wright brothers in 1909, right up to the present. All the dimensions of America's air involvement are explored in depth ... the technological, strategic, tactical, and political considerations that have shaped our nation's air defense policies and practices ... the aircraft, the airmen, and the decision makers . . . the stories behind the headlines ... how aviation developed in the Army, Navy, Marines, and finally in a separate Air Force ... it's all here, generously illustrated with dozens of photos from military and private archives! Names, dates, and places have been meticulously

Object ID	Title	Author	Summary
			researched, but the real emphasis is on the personalities and the politics that influenced the development of U.S. air power. Beginning with the reluctance of the military establishment to recognize the potential defense capabilities of the airplane and pioneering efforts of the first Army Signal Corps airmen, the author covers aviation's contribution to WW-I (including the fact that not a single U.S.-made plane flew in combat), the period between the two world wars (the lack of military funding, the rivalries between Army and Navy air arms, and the technological advances that were made) and the years immediately prior to WW-II that saw the introduction of the Curtis P40, the Lockheed P-38, and the Chance-Vought F4U Corsair. You'll learn why America lacked advanced aircraft at the opening of WW-II, despite announced plans for vastly expanded plane production. You'll get a behind-the-scenes look at the air war in the Pacific (from the early defeats to the turning point at Midway, from the feats of the "Flying Tigers" in China and the Hump pilots in India to the dropping of the first atomic bombs on the Japanese mainland). The air war in Europe and North Africa is carefully related not only in terms of "what", "where", and "when", but also "why". The Berlin Airlift that thwarted the Soviet blockade and ushered in the Cold War (and prompted U.S. acquisition of 700 B-52 global bombers), the Korean War, the air war in Vietnam—including the F-111 fiasco—and the state of U.S. airpower at the beginning of the 1980s are all covered in revealing perspective. Even the Carter administration's defense policies regarding the B-1 bomber, cruise missiles, MX missile system, and the "stealth" bomber are carefully examined from both military and political viewpoints.

Object ID	Title	Author	Summary
			Highly informative, crammed with little-known details, and written in entertaining, easy-to-follow style, this book promises absorbing reading for every aviation enthusiast and military history buff! Joe Christy is a professional writer who has received two national awards for his books on aviation history. A member of the Air Force Association, Aviation/Space Writers Association, and OX-5 Aviation Pioneers, he is the author of many TAB titles including WWII: U.S. Navy & Japanese Combat Planes and WWII: Luftwaffe Combat Planes & Aces. This beachhead would be held until sufficient ground troops can land and carry the fight to the enemy and defeat him on his own soil. The first recorded

Object ID	Title	Author	Summary
			amphibious landing on enemy soil was carried out by a strong Persian force landing at Marathon, Greece in 490 BC. A much smaller Greek Army eventually defeat-ed the Persian Army and the Persians were forced to withdraw. Julius Caesar of Rome employed amphibious forces when he conquered England in 54 BC. In 1066, Norman ruler William the Conqueror used amphibious forces to cross the English Channel and defeat the English forces at the Battle of Hastings. During the American Revolution, General George Washington utilized the element of sur-prise and wooden rowboats to cross the Delaware River on 25 December 1776. His forces attacked British (Hessian) forces at Trenton, New Jersey. Washington's crossing of the Delaware marked the first time American forces had utilized amphibious warfare. In 1847, during the Mexican War, US Marines attacked Veracruz, Mexico from the sea. They secured the beach and defeated the Mexican forces. The US War Between the States (Civil War) pro-duced few amphibious landings, with the exception of the Northern forces attacking the Batteries Tracy and Huger, part of the defenses of Mobile, Alabama in 1864. The last US amphibious landings during the 19th Century occurred in the Philippines Islands, when American troops attacked Spanish forces during the 1898 Spanish-American War. This would not be the last time American forces would have to attack that island group. World War One saw no amphibious landings since American forces landed on friendly territory during that conflict. (from Introduction)
2012.303.008	Fighting Helicopters of the	Chant, Christopher	The helicopter began to come

Object ID	Title	Author	Summary
	20th Century		of technical age during the closing stages of Wor d War II, but in that conflict was used largely for development purposes. In the years following World War II, the helicopter was developed to an initial maturity with a piston—engined powerplant, and in this form possessed so small a payload that its primary military uses were casualty evacuation, scouting and, to a more limited extent, light tactical transport. Having proved its basic capabilities in these tasks during the Korean War, the helicopter was then transformed into a truly effective means of military transport by the replacement of the heavy piston engine by the light turboshaft, which offered considerably greater power. Pioneered by the Sud-Aviation Mouette, but brought to an early perfection in the Bell UH-1 Iroquois that became best known in the Vietnam War as the 'Huey', the turboshaft-powered tactical helicopter is now an essential part of the tactical mobility inventory of any army. It was during the Vietnam War that helicopter-carried armament became standard. Further evolution of the armed helicopter concept resulted in the helicopter gunship. The other main use of the armed helicopter is in naval warfare. Further development in powerplant technology and sensor sophistication has enhanced the capabilities of the naval helicopter to an enormous degree, and the type is now a potent anti-ship and anti—submarine weapon. Christopher Chant is a successful writer on modern military matters, and has a substantial number of authoritative titles to his credit. He was born in Cheshire during December 1943 but spent his childhood

Object ID	Title	Author	Summary
			in East Africa, where his father was an officer in the colonial service. He returned to the UK for his education, at The King's School, Canterbury and at Oriel College, Oxford, where he took a honours degree in Literae Humaniores. Military matters, and especially aviation, have long been a passion, and after taking his degree he moved to London as an assistant editor on the Purnell partworks History of the Second World War and History of the first World War. With the completion of the latter he moved to Orbis Publishing as editor of the partwork World War II, with the conclusion of this publication he decided to become a freelance writer and editor. Living first in London, and then in Lincolnshire after his marriage in 1978, he has written extensively on military and aviation subjects, and has also contributed if as editor and writer to the partworks The Illustrated Encyclopedia of Aircraft, War Machine, Warplane, and Take-Off and also to the magazine World Air Power journal. John Batchelor is a technical artist with a special interest in military equipment. He is a collector of antique and modern firearms, and has always had a deep appreciation of the combined technical and intuitive qualities that go into the creation of machines such as aircraft, and been conscious of the expertise and artistic skill to produce them. After service in the Royal Air Force he really learned his profession in the technical publications departments of the Bristol Aero Company, Martin Baker Ltd. and Saunders-Roe Ltd., before turning freelance to work on a number of technical and boys' papers, including the Eagle, and Purnell partworks History of the First World

2012.303.009	All the Ship's at Sea	Lederer, William J.	Making Annapolis Was Easy Good old Barracks B is no more, and I guess I'm its only mourner. It burned down in the winter of I 941 [sic]. Some Newporters claim that spontaneous combustion did the job. Alaybe so, but I wouldn't have blamed the captain of the head if he had struck the match. Nothing remains now but a heap of rubble. Perhaps there isn't even any rubble. I haven't been to Newport for a year, but in 1930, when I arrived there as a hospital apprentice, Barracks B was the proudest building at the United States Naval Training Station. Though it had been built in 1904, it was still referred to as the New Barracks. Its SO new, said Coxswain Brown, that it ain't even finished yet. There's a couple of panes of glass missing. That head is cold enough to freeze a volcano all the way down to hell. All the Ships at Sea What Brown said about the crews head and wash- room being cold was true it was also dirty and smelly. These three qualities were brought to our attention the first thing every day. After leaving our warm hammocks we were lined up in the head, naked and shivering, to take our turns in the cold shower. I felt sorry enough for myself each morning, but I was sorrier for the guy who had to clean the place. Captain of the head was a tough billet. The job was given as unofficial punishment to men who were dirty or who didn't rise promptly at reveille. Yet the captain was an important personage because the lives of several hundred men revolved about the head. It was not only their bathroom but also their clubroom, curb market, and library. It was the only unsupervised spot in the

Object ID	Title	Author	Summary
			barracks. We found it possible to sneak smokes there during working hours, and, despite the dirt and the draft, we could relax there a little. Fights were held in the head without interruption. The kind of literature not approved by the chaplain was read- and hidden-there. Small business was conducted within those cold gray walls. Here some sailors financed their Newport liberties by selling half-smoked cigarettes-snipes-four for a cent. The honest efforts of regimented souls to express themselves decorated the walls. Scribbled all over were such remarks as Chief Amorary has a shape like a beer bottle, or John LaPlant, the worlds greatest lover, blew his nose here. Making Annapolis Was Easy The place had a certain quality which the chief yeoman called the sanctity of the john. But coziness was not part of that quality. Long streamers of twisted paper lay about, whispering in the multiple drafts. Soggy cigarette butts, shredded and brown, spotted the deck. The brass pipes had an overcoat of green mold. The vivid memory of this salon of discomfort dates back to a day in February, 1930, when I was summoned to the executive officers office. The sign on the door said COME IN. I obeyed. The exec, who was reading, looked at me over his glasses. Lederer Yes, sir. I have your application here for the Naval Academy Preparatory Class. Thank You, sir... (from Amazon.com)

			and out. Part 2. The Young pilots - true Adventures of America's Fighter Aces in WWII: No assignment made a marine aviator sweat more than being sent to night fighter school. It was top secret, top priority, and top danger for the young pilots who'd proven their fling skills and now were picked as night fighters., marine pilot Bruce Porter accepted this hazardous duty--taking off at night from a carrier or land base--and hunting the enemy down in total darkness. It took steady nerves and just plain guts, since locating your aircraft carrier at night -- with no lights on -- was often a mix of intuition and fly-by-the seat-of-your-pants luck. Bonus features included original WWII training film; interview with Ace Fighter Pilot Col. R. Bruce Porter; Photo album; Complete WWII Pilot's Operating Handbook, An 01-85FB-1 1 may 1946.
2012.303.013	Chained Eagle	Alvarez, Everett	On August 5, 1964, while Lt. (jg) Everett Alvarez was flying a retaliatory air strike against naval targets in North Vietnam, antiaircraft fire crippled his A-4 fighter-bomber, forcing him to eject over water at low altitude. Alvarez relates the engrossing tale of his capture by fishermen, brutal treatment by the North Vietnamese, physical and mental endurance, and triumphant repatriation nearly nine years later in 1973. Alvarez spent more time as a prisoner of war in Vietnam than any other flier. As Senator John McCain, a fellow POW, has written, "During his captivity, Ev exhibited a courage, compassion, and indomitable will that was an inspiration to us all." Indeed, the book, which was written with Anthony S. Pitch, is remarkable for its lack of rancor. Alvarez directs his strongest words against the small number of POWs who broke ranks and collaborated with the enemy. As one reviewer wrote, Alvarez "relates the misery of his

Object ID	Title	Author	Summary
			condition with a detachment that robs it of its shock value." Chained Eagle also tells the story of the Alvarez family's ordeal during his years of imprisonment: His sister became an antiwar activist, his wife divorced him, and relatives died. Yet throughout his time as a prisoner of war, Alvarez remained duty-bound and held steadfast to his religious faith and the values enshrined in the U.S. Constitution. From Publishers Weekly Navy Lieutenant Alvarez, a pilot, was shot down over North Vietnam in 1964 and held prisoner until 1973. In this engrossing account of the experience written with freelancer Pitch, he emerges as a duty-bound officer who held fast to his religious faith and "the values enshrined in the Constitution." The book is a top-drawer POW memoir, but what sets it apart is its unblinking concurrent narration of the Alvarez family's ordeal. His sister became an antiwar activist, and Alvarez's discovery of this had a demoralizing effect. A more severe psychological crisis revolved around the coldness of his wife's letters, a situation that reached its climax when she divorced him for another man. Alvarez's anguished response to the news amid dreadful physical conditions, and the manifest kindness of his comrades in captivity, is movingly told. In an upbeat conclusion, the prisoner's release is joyously described. Military Book Club main selection. Copyright 1989 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. From School Library Journal YA-- Interspersed in this basically straightforward personal account of eight and one half years in North Viet Nam prison camps are omniscient accounts of

Object ID	Title	Author	Summary
			Alvarez' family's history and their reaction to his internment and release, his life prior to Viet Nam, and President Johnson's Gulf of Tonkin decision. Alvarez' adjustment to prison reality, his commitment to God and country, his search for proper behavior in the face of torture, his joy when he was able to share confinement with other American prisoners of war, and his gradual acceptance of long captivity give evidence to his growth as man and patriot. His detailed vignettes of the horrors of prison life, mitigated with the all but unanimous solidarity of the prisoners, and spiced with infrequent occasions of joy, provide readers with an opportunity for understanding what his experience must have been like. An appropriate choice for leisure reading, biography, and Viet Nam assignments. -- Barbara R. Hawkins, West Potomac High, Alexandria, VA Copyright 1990 Cahners Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. (from Amazon.com)

2012.303.020	Turning the Tide : Decisive Battles of the Second World War	Cawthorne, Nigel	The Second World War was the final global conflict of the twentieth century. It involved more combatants, and a wider range of battlefield terrain than any other conflict in history, from the frozen plains of Russia to the baking Libyan desert, and from the atolls of the Pacific

Object ID	Title	Author	Summary
			to the skies over Britain. In "Turning the Tide," Nigel Cawthorne has taken a fresh look at the crucial battles which decided the outcome of the Second World War, beginning with the evacuation of Dunkirk in 1940, a feat that boosted the morale of a nation during its darkest hour, and reaching a climactic end with the final bloody reckoning between the Red Army and the Third Reich amongst the ruins of Berlin. (from back cover) Contents: Western Europe -- North Africa -- The Russian front -- The Pacific war -- Victory in Europe -- Victory in the Pacific. Pages 123-133 cover the Battle of Midway. First published by Arcturus Publishing Limited.
2012.303.021	Encyclopedia of Weaponry, The : The development of weaponry from prehistory to 21st century warfare	Hogg, Ian V.	Contents: The first weapons -- Medieval developments -- The age of gunpowder -- Mobile warfare -- The age of invention - - The First World War -- The Second World War -- Today and tomorrow. (from WorldCat) From the first clubs and spears of early humanity to the "smart" bombs and laser technology of today, the history of mankind has been inextricably bound up with the twin stories of war and the weaponry used to wage it. In short, to study weaponry is to study a central aspect of human history. With its in-depth look at the development of weaponry from prehistory to the present day, "The Encyclopedia of Weaponry" is an invaluable reference source for anyone interested in the evolution of human civilization. Written by one of the most widely-known and well-regarded military historians of the last few decades, it covers all the significant landmarks in weaponry development.

Object ID	Title	Author	Summary
			The book is organized chronologically, starting with a chapter examining the first weapons ever created by man and ending with a chapter looking at the high—tech killing machines of today. Between these start and end points, there are chapters covering the whole history of weaponry including medieval developments, the age of gunpowder, and mobile warfare. There are also individual chapters looking at the weaponry developed and deployed in World War I and World War II. Throughout the book there are stunning and informative photographs, illustrations, and diagrams of the weapons featured, the majority of which are in full color. Written in an authoritative yet readable style, "The Encyclopedia of Weaponry" is a comprehensive guide to the tools of war and armed conflict. (from dust jacket flap)

Includes 250 color profiles, over 500 photographs, and 14 color three-view cutaway drawings. The USS Midway is listed with a picture on page 65. Midway class aircraft carriers are mentioned on pages 65 and 68.
2012.304.009	Naval Institute Guide to Combat Fleets of the World - 1998-1999 : Their Ships,	Baker, A. D. (ed)	Internationally acknowledged as the best one-volume reference to the world's naval

Object ID	Title	Author	Summary
	Aircraft, and Systems		and paranaval forces, this popular Naval Institute guide is both comprehensive and affordable. Updated biennially since 1976, it has come to be relied on for all-inclusive, accurate, and up-to-date data on the ships, navies, coast guards, and naval aviation arms of more than 180 countries and territories. Large fleets and small maritime forces get equally thorough treatment as evidenced in this new edition, which highlights major and even minor developments that could have an impact on the world scene. A thorough indexing of material and a logical ship-typing system make the book easy to use and allow for quick comparisons between fleets. The guide continues to present timely, authoritative information supported by more than four thousand illustrations from correspondents throughout the world. From giant aircraft carriers and ballistic missile submarines to tugboats and launches, the characteristics and capabilities of ships large and small are reliably recorded. Complete descriptions of naval aircraft, weapons, weapon systems, and sensors are also provided along with useful commentary on organization, personnel strengths, and bases.

			From Wikipedia, the free encyclopedia
			A collectors' item and reference tool
			This is a facsimile reproduction of seventeenth issue of Jane's. The 1914 issue is an obvious choice for reprinting: here are drawn up the navies that were to change the course of history and themselves be changed out of recognition. 1914 was perhaps the heyday of the dreadnought and the battleship. As yet unmenaced by the aeroplane and the submarine, they were at once the supreme military deterrent, and a demonstration of the wealth and prestige of the countries that built them. The dreadnought was imitated throughout the world, and possibly contributed directly to the conflict that was shortly to engulf civilization. As one turns the pages, these mighty leviathans loom even larger through the magnifying glass of history. The "Barham" and the "Queen Elizabeth," "von der Tann" and "Derflinger," the "Viribus Unitis" of the Austro-Hungarian navy, all look like dinosaurs surviving from a darker age. The writing, even then, was on the wall. All the first-class powers were developing submarines; the French navy even had a primitive aircraft carrier. But still the battleship dominated, for Jutland, Dogger Bank and the Coronels were in the future. Perhaps a lesson or two had been learnt from the Russo-Japanese War, but the old order stood firm and the mighty fleets catalogued here were still the major index of world prestige. There might have been something wrong

2012.304.013	Ships and Aircraft of the U. S. Fleet - 1972	Rowe, John S.	In this ninth edition of Ships and Aircraft of the U.S. Fleet, the essential format with which users of the earlier editions have become familiar over a period of 32 years remains intact. Each type of ship (carriers, battleships, cruisers, and so on) is taken in turn. Tables, marked off between heavy bold rules, give such essential information on each class of ship as displacement, dimensions, and weapons. Below the main tables, marked off with a double rule, each ship in a class is named, along with information which applies to that ship alone, such as . her

Object ID	Title	Author	Summary
			hull number, where she was built, and her present status. When tabular heads are the same for successive tables, the heads are not repeated. Instead, a broken rule shows the continuation of heads from the table above. The class name is set off with quotation marks when the name ship does not exist. Additional information not susceptible to tabulation follows each class treatment. Unlike previous editions of "Ships and Aircraft," the photographs are grouped by ship type for ease of comparison. The date in the caption indicates the date the photograph was made. Aircraft and weapons are presented in similar fashion. Of particular interest are the lists showing the enormous numbers of ships sold, given away, sunk as targets, or scrapped since 1965 when the eighth edition of this work was published. The final pages of the book are devoted to changes which occurred from the time the tables were set in type to 1 September 1971. A key to the abbreviations and symbols used in Ships and Aircraft is also located there. Naval Institute Press (from inside front cover)

2012.306.001	F-14 Tomcat Units of Operation Enduring Freedom	Holmes, Tony	The legendary F-14 Tomcat was the weapon of choice to strike hard and fast against the enemies of the United States in the wake of the September 11 attacks. Determined to hit the al-Qaeda bases within Afghanistan, US plans were hampered by the reluctance of neighboring countries to allow US military aircraft to operate from their land bases. This meant that carrier-based F-14s were forced to fly several hundred miles a day to reach their targets, flying thousands of missions involving

			precision bombing strikes on al-Qaeda and Taliban positions. A fascinating exploration of modern air warfare, this book details the actions of the F-14 pilots and aircraft involved in Operation Enduring Freedom with eye-opening insights into the tactical approach and wider strategic aims exclusively provided by senior officers from a number of the air wings involved. Written by a leading Tomcat expert with exclusive access to mission reports, combat diaries, first-hand accounts and accompanied by photographs from the author's private collection and fantastic full-color artwork, this reveals the battle experiences of the most famous modern fast jet.

2012.311.001	For Spacious Skies : The Uncommon Journey of a Mercury Astronaut	Carpenter, M. Scott (Malcolm Scott)	In 1962, an anxious nation watched on live TV as astronaut Scott Carpenter's Aurora 7 capsule malfunctioned during reentry. Only his courage and skill saved the day. But instead of praise for having the "Right Stuff," Carpenter drew criticism for "botching" an otherwise flawless mission and overshooting his landing zone. Although a mechanical glitch was responsible, Carpenter-the "free spirit" of the Mercury Seven-never flew into space again. But his days as a daring, pioneering explorer were far from over... Carpenter overcame tremendous adversity to go from small-town boy to Navy test pilot, Mercury astronaut, and undersea explorer. Now, writing with his daughter, he breaks his 40-year silence to set the record straight about the Aurora 7 mission, the often ruthless early years at NASA-and the rugged upbringing

Object ID	Title	Author	Summary
			that produced the man John Glenn has called "one of America's modern heroes." Amazon.com Review M. Scott Carpenter was America's fourth man in space, his 1962 three-orbit mission in a tiny Mercury capsule closely paralleling that of John Glenn's previous mission. But that's where the similarities end: a malfunctioning navigational system caused Carpenter to splash down, dangerously, some 250 miles off-target, and Glenn's fame would somehow forever eclipse that of all seven of his fellow original astronauts combined. This memoir, penned in conjunction with Carpenter's daughter Kris, oddly distances itself from Carpenter's life through use of a third-person narrative (only the astronaut's calm account of his perilous mission is delivered directly in his voice), a device that ultimately echoes the more personal distances Carpenter endured in his own fateful, if troubled, journey toward the stars. While Carpenter may have been able to trace his lineage back to the Plymouth colony of the 1630s, his immediate family seemed shattered. His research-chemist father was successful but absent, his mother often a bedridden invalid. Carpenter's journey to the Mercury program after a Rocky Mountain childhood and a stint on lumbering Naval patrol planes is one of the more unlikely of the original astronaut class, and he offers up his own perspectives on what has become a compelling body of American folklore (thanks largely to Tom Wolfe's <i>The Right Stuff</i> and the memoirs of other participants). While the account of NASA's infancy seems quaint, its officialdom often comes off as nothing short of cutthroat, perhaps inspiring the pioneering spaceman to the book's final adventures

Object ID	Title	Author	Summary
			exploring a distinctly different frontier--the bottom of the ocean --as part of the Navy's endurance-minded SeaLab program. --Jerry McCulley --This text refers to an out of print or unavailable edition of this title. From Publishers Weekly Amid a flurry of recent accounts of the early days of the U.S. space program, astronaut Carpenter and Stoeve, his daughter, weigh in with a biography (most of it written jarringly in the third person) of the fourth American in space. While a good deal of factual information about Carpenter's life is presented, there is very little probing beneath the surface. Perhaps the most controversial material is Carpenter's discussion of the specifics of his three-orbit flight on May 24, 1962, which ended with the American public not knowing for hours whether Carpenter and his Mercury capsule Aurora 7 had survived re-entry. His take is very different from that offered last year by Chris Kraft (Flight: My Life in Mission Control). While the former mission controller claims that Carpenter "malfunctioned," Carpenter argues that he fulfilled his tasks admirably despite a series of mechanical failures on board the capsule. The third person voice is lively if not compelling, and though there is not very much new information about the early days of NASA here, one can get a flavor of the times and a sense of the people responsible for bringing America into the space age. Pictures not seen by PW. Copyright 2002 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. (from Amazon.com)

Object ID	Title	Author	Summary
			a subject scarcely addressed in unclassified literature since the beginning of this century.
2012.313.003	American Battleship at Peace and War, An : The U.S.S. Tennessee	Utley, Jonathan G.	The USS Tennessee was no ordinary ship. When she set sail in 1920, she was touted as the most powerful ship in the world. Massive steel armor more than a foot thick and a dozen 14-inch guns made her a match for anything afloat. When Tennessee went to war in 1941, she was already obsolete. Yet she survived the attack on Pearl Harbor and saw action in battles that became legendary : Tarawa, Kwajalein, Eniwetok, Saipan, Surigao Strait, Iwo Jima, and Okinawa. She was one of only two battleships to earn a Naval Unit Citation for action during World War II.
2012.313.004	Fighting Ships and Seamen	Macintyre, Donald G. F. W.	Selected naval battles of world wars I and II and stories of heroes on both sides. Companion volume to "Fighting Pilots" by Patrick Pringle. Although the book is dealing with the age of steam, Nelson's principle of seeking close decisive action is the theme of this book.
2012.313.005	Forgotten Fleet : The Mothball Navy	Madsen, Daniel	A pictorial history of the U.S. Navy's mothball fleet, this handsome book takes a rare look at the so-called fleet behind the fleet, from the end of World War II to the present. Through photographs of the ships and shipyards where they were laid up and brief ship histories, it tells the story of how these ships were paid off and preserved, how some were reactivated, and how most left the reserve fleet to be broken up. Additional photos of the ships in action remind readers that forgotten though they were while in mothballs, many made their marks on history. Year after year the warships lay quiet and lifeless, like boarded up old houses once full of activity that had outlived their usefulness. The row upon row of mostly now-anonymous vessels, hatches sealed shut, offer a bleak contrast to the

Object ID	Title	Author	Summary
			drama of their wartime operations. You can almost hear the wind whistling through the masts and superstructures stripped of radars. Below decks there is only the sound of the dehumidifiers, removing moisture from the air, retarding the buildup of rust and deterioration. Berthing areas, repair shops and radio rooms have been frozen in time, looking exactly as they did when sealed decades before. Among them are such well-known ships as the Enterprise and the Midway, as well as little-known ones like the Fall River, and some that were laid up almost as soon as they were completed, like the Oregon City. Here too are the frigates and nuclear submarines of a later age. These are the ships of the forgotten fleet, built for war but resting at peace in coastal parking lots on both sides of the country, their story told for the first time. (from Amazon.com) USS Midway is mentioned on pages 11, 90, 162, 164, 183-187, 191 and 204. Midway photos on pages 185 and 187.
2012.313.006	McKinley's Bulldog : The Battleship Oregon	Sternlicht, Sanford V.	This is the story of the USS Oregon BB-3 nicknamed the "Bulldog." The Oregon was authorized in 1890 and her keel laid down in 1891. She took part in the Spanish-American War, the reopening of Peking which was under siege during the Boxer rebellion, World War I, and became an ammunition barge during World War II. In between the wars she was a museum in Oregon.
2012.313.007	Tirpitz : The Floating Fortress	Brown, David	This is the full story of the design, construction, and career of the Tirpitz. Lurking in a Norwegian fiord, Tirpitz posed a constant threat to the heavily-defended Allied convoys that plied between Britain and the North Russian ports, and seriously limited the operational scope of the British Home Fleet. For nearly three years, she constrained the Royal Navy to retain vessels in northern waters that would have been

Object ID	Title	Author	Summary
			much better employed in other theatres of the war. The attempts to lure Tirpitz out of her lair were unsuccessful. She came under regular air attack and finally in the end, the aircraft triumphed; on 12 November 1944, 29 Lancasters from Lossiemouth inflicted such damage on the 'floating battery' that she capsized. The latent threat was finally eradicated.
2012.313.008	Combat Fleets of the World - 1982/83 : Their Ships, Aircraft and Armament	Labayle Couhat, Jean (ed)	Internationally acknowledged as the best one-volume reference to the world's naval and paranaul forces, this popular Naval Institute guide is both comprehensive and affordable. Updated biennially since 1976, it has come to be relied on for all-inclusive, accurate, and up-to-date data on the ships, navies, coast guards, and naval aviation arms of more than 180 countries and territories. Large fleets and small maritime forces get equally thorough treatment as evidenced in this new edition, which highlights major and even minor developments that could have an impact on the world scene. A thorough indexing of material and a logical ship-typing system make the book easy to use and allow for quick comparisons between fleets. The guide continues to present timely, authoritative information supported by more than four thousand illustrations from correspondents throughout the world. From giant aircraft carriers and ballistic missile submarines to tugboats and launches, the characteristics and capabilities of ships large and small are reliably recorded. Complete descriptions of naval aircraft, weapons, weapon systems, and sensors are also provided along with useful commentary on organization, personnel strengths, and bases.
2012.313.009	Ships and Aircraft of the U.S. Fleet - 1987	Polmar, Norman	This completely revised edition of Norman Polmar's highly regarded triennial guide presents a comprehensive

Object ID	Title	Author	Summary
			description of the Reagan administration's 600-ship Navy of the late 1980s. It includes not only the Navy's ships, submarines, and aircraft, but its people, organizations, weapons, and electronics as well. Detailing the considerable changes that have occurred in the past few years as new ships join the fleet, this fourteenth edition fully examines the buildup spurred by the aggressive John Lehman, secretary of the navy from 1981 to 1987. Complete information is provided on the four Iowa-class battleships added to the fleet, along with the new 95,000-ton nuclear carriers and a flotilla of amphibious, mine, and auxiliary ships still on the building ways. The book also examines two ship designs now under construction, the ARLEIGH BURKE-class missile destroyers and the SEAWOLF-class attack submarines, and the heated controversies surrounding these designs and their building programs. Indeed, this is the only reference available that provides extensive discussions of all new-construction programs as well as the existing fleet. To give continuity to the early editions of this volume, edited by the late James C. Fahey, special tables list all combat ships built for the U.S. Navy since World War II. Other unique features of this book include full descriptions of the Navy's administrative and operational organizations. The detailed examinations found here of the Navy's new sealift programs, Fleet Marine Force, naval weapons, electronics, and aircraft are not available in any other naval reference volume. In his incisive analysis of the state of the fleet, Polmar suggests that a variety of political actions could

Object ID	Title	Author	Summary
			quickly reduce the size and capabilities of the U.S. Navy, and he predicts some probably lean years ahead in the Navy's budget. He also cites some recent technical failures that may affect the future of the fleet. Supporting the text are several hundred photographs and drawings, many published here for the first time, that give general identification views of ships and aircraft and show close-ups of electronic equipment and weapons. Front jacket photos: From top, IOWA (BB 61), L.& L. Van Ginderen; CH-53E helicopter, W.D. Griffin; and the superstructures of the GOLDSBOROUGH (DDG 20) (left) and the BENJAMIN STODDERT (DDG 22), Giorgio Arra. Back jacket photo: STURGEON (SSN 637), Giorgio Arra. (from dust jacket flap)
2012.313.011	Flush Decks and Four Pipes	Alden, John Doughty	If there has ever been such a thing in the history of the US Navy as a typically American class of ship, the flush-deck destroyers of WWI come closest to filling the bill. They made their appearance in every part of the world between the years 1917 and 1947, their distinctive silhouette unmistakably proclaiming them "made in America."
2012.313.012	United States Navy Destroyers of World War II	Reilly, John C.	This work is intended to provide a general idea of the third- and fourth-generation destroyers with which the United States navy fought its share of World War II, and of the process by which each successive class of ships came to be. The third generation of the early 1930s--the Farragut, Porter, Mahan, Dunlap, Gridley, Somers, Bagley, Benham and Sims classes--broke with previous destroyers in important respects, particularly in

Object ID	Title	Author	Summary
			armament. They were; however, limited by the London Treaty, and tactical doctrines. The fourth generation, laid down shortly before World War II, revolutionised US destroyer design, and were more suited to the war to come. It comprised the famous Benson, Gleaves, Fletcher, Allen M Summer, and Gearing classes.
2012.313.013	Battleship Bismarck : A Survivor's Story	Müllenheim-Rechberg, Burkard Freiherr von	This is a complete story of the Battleship Bismark from its construction to its sinking. It is a personal account of the ship's activities told first-hand by the author who served aboard the Bismark from before its commissioning to its sinking.
2012.313.014	Rise of American Naval Power,1776-1918, The	Sprout, Harold Hance	Sea Power and American Independence (1776-1783). Strategic lessons of the War of 1812. Last years of the Old Navy (1865- 1881). Beginnings of the New Navy (1881 - 1889). Alfred Thayer Mahan: Sea Power and the New Manifest Destiny. Mahan vindicated: The War with Spain. Mahan Triumphant: The Naval policy of Theodore Roosevelt. Europe at Ware: Neutrality and Preparedness (1914 - 1917).
2012.313.015	Submarine	Crane, Jonathan	This book traces events as the nuclear-powered hunter-killer submarine Warspite takes part in a major NATO exercise as an enemy submarine. It investigates what life is like for the men who crew submarines--and for their wives at home--and gives a first-hand account of the extraordinary pressures on the "Perishers", the group of experienced British officers who must pass what has been described as the toughest course in the world to realize their ambition and command a submarine. Also included is a general history of the development of the submarine.
2012.313.016	Battle to Save the Houston, The : October 1944 to March 1945	Miller, John Grider	This book tells the story of epic proportions of a dedicated band of men who refused to give up their crippled ship in the closing days of 1944. Their 14,000-mile odyssey from Formosa to the

Object ID	Title	Author	Summary
			Brooklyn Navy Yard aboard the severely damaged light cruiser Houston is recorded in rich detail. The heavy physical toll exacted from the crew in the course of the war-within-a-war ultimately forced the navy to reevaluate its ship abandonment policy and triggered improvements throughout the navy in the damage control capabilities of its ships.
2012.313.017	Anti-Submarine Warfare	Hill, J. R.	Hardcover with 112 pages - Millions of dollars, pounds, and rubles are spent each year on anti-submarine research and development, yet public knowledge of this staple of modern naval operations is quite limited. With the publication of this comprehensive and up-to-date guide, the general reader at last has access to reliable information on all phases of anti-submarine warfare. Written by an expert who knows only too well the threat submarines pose to the Western alliance. Filled with black/white photo's and illustrations. (from Amazon.com)
2012.313.018	Destroyer Skipper : A Memoir of Command at Sea	Sheppard, Don	Highly decorated combat officer Don Sheppard's book is the final volume in the three book chronicle of a navyman's life and adventures on the oceans of the world. Sheppard, a "mustang" sailor who rose through the navy holding every rank and rate from seaman recruit in 1948, to full commander in 1988, captures the daily drama of commanding a U.S. Navy destroyer, and recounts his struggle to push himself and his men to ever greater deeds of accomplishment.
2012.313.019	U.S. Submarines Since 1945 : An Illustrated Design History	Friedman, Norman	This series offers detailed descriptions of the evolution of all classes of the principal U.S. combatant types. Each volume is fully illustrated with deck plans, outboard profiles, sketches from major design studies, and numerous detailed photographs. The appendixes

2012.313.023	Japanese Aircraft of the Pacific War	Francillon, René J.	Explains how the U.S. Navy developed its destroyers and describes the naval and civilian forces that determined the design and operation of these ships.
			This work presents a comprehensive analysis of the Japanese aircraft industry and its products between the late thirties and the dawn of the nuclear age. A series of introductory chapters covers the history of the Japanese aircraft industry and of the air arms of the Imperial Japanese Army and Navy, and their designation, camouflage, and marking systems.

Object ID	Title	Author	Summary
2012.313.024	War in the Falklands : The Full Story	Eddy, Paul (ed)	This is the true story of the actual military engagement in the Falklands, the planning and execution of the invasion, the crucial strikes--from both sides--on land, in the air, and at sea, and a full examination of the new and traditional weaponry employed.
2012.313.026	Battlecruiser Invincible : The History of the First Battlecruiser, 1909-16	Tarrant, V. E.	This is the story of Invincible--the super-cruiser, first of her type. As a cruiser, she was a monster at 17,000 tons. At the time, she was the longest warship in the world, faster than any battleship, faster even than the fastest German liner. She was able to hurl four tons of high explosive at her foe every minute. She guarded the trade routes, and in World War I she hlped annihilate the German cruiser squadron of Von Spee at the First Battle of the Falklands. She and her sister battlecruisers were called upon to perform the role of scouting force to lure enemy battlefleet back on to the guns of the battleships. However, here speed could not compensate for her lack of armour, and she was sunk at Jutland.
2012.313.027	Destroyer! : German destroyers in World War II	Whitley, M. J.	In April 1940, the fjords of Norway became a bloody battleground for destroyers: on two days, in the greatest destroyer battles fought in western waters during WWII, ten German and two British destroyers were sunk. Describes German destroyer action in : Minelaying during the Polish campaign; Laying minefields close to British shores; Supporting the invasions of Denmark and Norway; Making sorties from France on Allied shipping; Operating with the larger ships and escorting them on the 'Channel dash'; Fighting bitter battles against Russian convoys in the Arctic waters; Skirmishing with British destroyers in the North Sea, English Channel and Bay of Biscay; and Bombarding and ninelaying in the baltic. This book describes all these

Object ID	Title	Author	Summary
			actions in detail and documents the design and construction of the warships themselves.
2012.313.028	War games : The Secret World of the Creators, Players, and Policy Makers Rehearsing World War III Today	Allen, Thomas B.	In this report, the author discusses war games, how they unfold, forecasts for the t\future, the auditions of strategies and weapons that my dermine whether many of us will live or die. War Games contains top-secret material, obtained under the Freedom of Information Act and never before published. The author explores whether war games--managed usually by men who are not elected officials--be allowed to influence foreign and military policies.
2012.313.029	Battle of the River Plate, The	Pope, Dudley	An account of the men, ships and tactics which culminated in the scuttling of the German ship Graf Spee in1939.
2012.313.030	HMS Sheffield : The Life and Times of "Old Shiny"	Bassett, Ronald	This book tells the story of the first HMS Sheffield. In 1940 she fought in the action off Cape Spartivento; in the following year she shared in the bombardment of Genoa, exchanged salvoes with Bismarck and sank one of that battleship's supply tankers, Friedrich Breme. In the Arctic a mine blew a 22-foot hole in her stern, but in an Icelandic fjord her crew fashioned a makeshift timber patch before streaming her back to Britain to fight again. In 1942, in the Barents Sea, Sheffield was in action against the pocket battleships Admiral Hipper and Lutzow, and sank the German destroyer Friedrich Eckoldt. In 1943 she shared in the destruction of the battlecruiser Scharnhorst off North Cape and later supported carrier attacks upon Tirpitz.
2012.313.031	Battleship Nelson : The Story of HMS Nelson	Careless, Ronald	This is the story of the HMS Nelson, from her construction in 1922-7 to the end of her career in 1948. For most of that time she served as a flagship, most notably with Force 'H' in the Mediterranean participating in the hard-fought convoy operations from Gibraltar to Malta. Her wartime career was impressive in terms of sheer

			workload alone, for during these years, she steamed more than 135,000 miles, from Scapa Flow to Philadelphia, Cape Town and the Far East. She took part in the major amphibious operations of the European theatre from Lofoten Raid to Normandy, was torpedoed, mined and the target for countless bombing attacks.
2012.313.032	Decline of British Seapower, The	Wettern, Desmond	Chronicles the history of Great Britain's Navy from the end of World War II until 1970.
2012.313.033	HM Submarines in Camera, 1901-1996	Tall, J. J.	This is a book of photographs from the archives of the Royal Navy Submarine Museum, the Imperial War Museum, the National Maritime Storico Navale in Venice, and a number of private collections. They cover the stories of the first submersibles, the development of the submarine as a potent weapon of sea power in the First and Second World Wars, and the dawn of the nuclear age when submarines became launch platforms for strategic nuclear weapons with the potential for mass destruction.
2012.313.034	Yankee Mining Squadron; or, Laying the North Sea Mine Barrage	Belknap, Reginald Rowan, 1871-1959.	This is the author's story of laying the mine barrage across the North Sea from the Orkney Islands to Norway. The purpose was to contain the German U-boats. He describes the mine base at Inverness and the process of laying mines. He discusses the American Mark VI mine and its characteristics.
2012.313.035	Battleship Scharnhorst	Koop, Gerhard	The battleship Scharnhorst and her sister ship Gneisenau formed the backbone of the German fleet at the beginning of the Second World War. Gneisenau, heavily damaged by bombs shortly after operation 'Cerberus', had to be scrapped. Scharnhorst was moved to Norway on Hitler's orders. where she was scuttled in November 1943 near the North Cape after a heavy battle against superior British forces. This books contains a general introduction to the consturction of battleships, and references

Object ID	Title	Author	Summary
			the Scharnhorst model in the Maritime Museum in Wilhelmshaven.
2012.313.036	Battleship Tirpitz	Koop, Gerhard	Together with her sister ship Bismarck, the Tirpitz was the last, and largest, battleship ever build in Germany. After a construction period of five years, the Tirpitz was put into service in 1941. She initially lay in the Norwegian fjords and through her presence posed a constant threat to Allied convoys bound for Murmansk. Despite all protective measures, however, the Tirpitz eventually came under the attack of midget submarines and Allied aircraft, and was scuttled in November 1944. This book contains a general introduction to the development of battleships, and with extensive cross-references to Bismarck, this title offers a complete guide to the history and construction of one of the most famous German warships ever built.
2012.313.037	Royal Navy in Focus - 1920-29, The	Warlow, Ben	These photos of the Royal Navy come from the archives of Wright and Logan. The photos have been assembled to cover the Royal Navy of the twenties. Despite many of the vessels having been built during or even before the First World War, many went on to endure the Second World War.
2012.313.038	Vietnam Brown Water Navy, The : Riverine and Coastal Warfare 1965-69	Rottman, Gordon L.	A pictorial account of the warfare along the coast of Vietnam.
2012.313.039	Guide to the Soviet Navy - 1977	Breyer, Siegfried	This reference work provides accurate, up-to-date data on ship and aircraft specifications, performance, weapons and electronics, and analysis of current changes and trends in Soviet naval strategy, leadership, operations, and training.
2012.313.040	Battle for the Falklands, The	Hastings, Max	The authors have two stories to tell. The first is a narration of a short, violent clash in the freezing fogs and mountainous seas of the South Atlantic. The other is an informed analysis of the political decision-making that led to the conflict.--From the Washington Post Book

			World
2012.313.041	Sea Power in the Falklands	Koburger, Charles W.	This book describes and analyzes, from the point of view of the craft of war, the first significant high tech naval war in history where weapons such as the Harrier VSTOL and the Exocet missile were used and where "computer faced computer." The author discusses the roles of aircraft carriers, shore-based air support, guided missile destroyers, submarines, merchant vessels, and supercarriers.
2012.313.042	Ships & Aircraft of the U.S. Fleet - 1975	Morison, Samuel L.	The main text in this edition carries the Navy to early 1975, while the addenda update the main text to mid-1975. All data are from official unclassified Navy publications, the editors' own records, and other naval sources.
2012.313.043	Our Falklands War : The Men of the Task Force Tell Their Story	Underwood, Geoffrey	This book is the personal story of some of the Servicemen and civilians, who took part in the Falklands campaign 8,000 miles from home.
2012.313.044	USS Arizona	Friedman, Norman	A history of the USS Arizona battleship with many photos and drawings.
2012.313.045	Russian Battleships : Sevastopol Class	Sobanski, Maciej S.	A history of the Sevastopol class of Russian battleships. Includes technical data and operational history. Contains data for the Poltava (1914); Parizhskaya Kommuna (ex-Sevastopol) (1930); Marat (ex-Pietropavlovsk) (1934); Parizhskaya Kommuna (ex-Sevastopol) (1937); Gangut (ex-Oktyabrskaya Revoluciya, ex-Gangut) (1950); and Oktyabrskaya Revoluciya, (ex-Gangut) (1939).
2012.313.046	British Battleships of World War Two : The Development and Technical History of the Royal Navy's Battleships and Battlecruisers from 1911 to 1946	Raven, Alan	This books presents a comprehensive account of the design and construction of British battleships that served in the Second World War.
2012.313.047	World's Warships, The	Blackman, Raymond V. B.	Fourth edition of the World's Warships by Raymond Blackman. This book does not pretend to constitute an exhaustive

Object ID	Title	Author	Summary
			survey of every naval vessel in the world right down to small escort vessels, minesweepers, patrol boats, landing ships, auxiliaries, service craft and ancillary vessels—such a task would be beyond the compass of these pages with their full descriptive, statistical and tabulated treatment—but it does include all the modern and major warships extant of the principal maritime powers. The arrangement of ships is not alphabetical by country, but categorical, in descending order for easy reference and comparison. All the aircraft carriers, commando carriers, guided missile ships and cruisers in the world, and all modern destroyers, frigates, destroyer escorts, and submarines are fully described with technical and building data, but old and small warships of lesser countries have been omitted, partly for reasons of space and because it was felt that readers would prefer a comprehensive summary of the qualities of modern fighting ships to a sketchy mention of all naval vessels, however unimportant or unseaworthy, of all countries. Massive battle fleets with great cruiser squadrons scouting ahead and flanked by protective screens of destroyers circulating in their predetermined orbits or localised spheres of influence, now belong to the past. In the modern concept, allowing much more flexible strategy and tactics, task forces are formed and sent out to operate in any part of the world. These task forces consist of any strength and combination of the aircraft carriers, cruisers, destroyers, anti-submarine frigates, and submarines described in this book. In a future war fought with the newest weapons of mass destruction the role for navies remains clear; their functions are: to search out and destroy

Object ID	Title	Author	Summary
			enemy ships wherever they are, and by all means within their power to prevent the enemy from using the seas for his own purposes; to protect the communications necessary to support any warlike operations and to safeguard the supply lines of the engaged countries; to provide direct air support for operations ashore and afloat in those areas where it cannot readily be given by shore-based aircraft. In war two outstanding qualities of sea power are vividly evident, namely mobility and relative independence of land bases. In peace naval power plays a prominent part in supporting national policy overseas and in ensuring that world-wide trade continues unmolested. The latest inventions affect naval warfare by altering the character of forces needed, but do not diminish the need for navies. In emergency aircraft carriers and other warships can be brought to bear quickly and effectively in any part of the world. Battleships are now almost extinct. They have disappeared from the Russian, French, Italian, Argentine, Brazilian and Chilean navies, while the United States Navy retains 4 battleships, although all have been withdrawn from active service. And conventional cruisers are following battleships into obsolescence in every country except two. In the United States Navy some cruisers are used as flagships and others have been converted into guided-missile ships. Only Russia built a large number of conventional cruisers after the Second World War. But naval architects and maritime experts are becoming increasingly aware of the revolution in naval strategy and global sea warfare caused by the introduction of guided-missile ships and nuclear-powered submarines. With their increase in size, propulsive

			reliable source available to the serious researcher on U.S. Navy submarine operations in World War II. (from Amazon.com) Written for the Bureau of Naval Personnel from material prepared by R.G. Voge [and others] Designed and illustrated by Fred Freeman, photographs by the U.S. Navy.
2012.313.051	United States Battleships : The History of America's Greatest Fighting Fleet	Pater, Alan F. (ed)	Alan Pater tells the little known story of each battleship from the proto-type battleships Maine and Texas to the never built Montana class after World War II. All of the U.S. Navy Battleships were named for states except for one, the USS Kearsage (BB-5). Published in cooperation with The American Battleship Association.
2012.313.052	Battleships of the U.S. Navy in World War II	Terzibaschitsch, Stefan	Illustrated with photographs, deck plans and silhouette drawings, the book covers all the classes of battleships of the U.S. Navy involved in World War II. Because many older ships were kept in service, it is almost a history of the U.S. Battleship while it also includes mention of later Korean War Service. The text includes details of construction, armament, radar and wartime camouflage. Additionally, there is a chapter on Japanese battleships, the design of which greatly influenced American thinking. Translation of Die Schlachtschiffe der US-Navy im 2. Weltkrieg
2012.313.053	Air Raid : Pearl Harbor! : Recollections of a Day of Infamy	Stillwell, Paul (ed)	Recaptures the experiences that moved a nation to action and presents them from the perspectives of a cross section of the people involved: 47 participants, some of whom were in Hawaii, others in Washington, the Philippine Islands, Tokyo, and at sea. This collection of first- person narratives recounts the events as they took place. Includes information on battleships: USS Nevada -- USS Oklahoma USS Arizona -- USS California

2012.313.059	Naval Institute Guide to	Prezelin, Bernard (ed)	Internationally acknowledged

Object ID	Title	Author	Summary
	Combat Fleets of the World - 1990/91 : Their Ships, Aircraft, and Armament		as the best one-volume reference to the world's naval and paranaul forces, this popular Naval Institute guide is both comprehensive and affordable. Updated biennially since 1976, it has come to be relied on for all -inclusive, accurate, and up-to-date data on the ships, navies, coast guards, and naval aviation arms of more than 180 countries and territories. Large fleets and small maritime forces get equally thorough treatment as evidenced in this new edition, which highlights major and even minor developments that could have an impact on the world scene. A thorough indexing of material and a logical ship-typing system make the book easy to use and allow for quick comparisons between fleets. The guide continues to present timely, authoritative information supported by more than four thousand illustrations from correspondents throughout the world. From giant aircraft carriers and ballistic missile submarines to tugboats and launches, the characteristics and capabilities of ships large and small are reliably recorded. Complete descriptions of naval aircraft, weapons, weapon systems, and sensors are also provided along with useful commentary on organization, personnel strengths, and bases.

2012.313.060	Naval Institute Guide to World Naval Weapons Systems, The - 1989	Friedman, Norman	Long recognized as the most comprehensive reference work available on the subject, this guide remains the only complete reference to the weapons currently in service in ships, submarines, and naval aircraft around the world. It is the only book of its type to explain the transformation of the U.S. Navy into a network-centric force, a transformation that has had immense consequences for choices of tactics, weapons, services, and the systems coordinating them. This guide also offers unparalleled coverage of the

Object ID	Title	Author	Summary
			weapons, sensors, and command systems of the world's navies, both those the U.S. Navy works with and those it may have to fight. Written by one of the world's leading naval analysts, the book describes the weapons and systems in detail and examines the crucial relationship between them. Completely rewritten and newly illustrated, this edition makes a special effort to provide a clear and precise account of how weapon technology has changed to meet the new tactical and strategic challenges facing international naval forces today. Cutting-edge information is found throughout, enhanced by many new and rarely seen photographs and drawings. For example, this volume offers an unusually full account of the ""system of systems"" under development by the U.S. Navy and the other services to fight future limited regional wars. That initiative includes the changing role of space resources as they affect war on, over, and under the sea. This edition also benefits from the flood of material from Russia, whose weapons and systems are now owned and operated by numerous countries and are likely to be sold to many more. The guide provides uniquely detailed coverage of weapons developed and deployed in the Far East, an area that promises to be the liveliest scene of naval action in the future. Extensive sections are devoted to explaining the intricate workings of sensors and command systems. No other book, or even set of books, offers this sort of material in such accessible form. Its detail and completeness are backed by the authority of a long-established professional expert. For the most complete and up-to-date information about weapons in every navy in the world, this is the essential resource—a work that, in

2012.313.061	Yorktown Class Carriers	Wiper, Steve	Proceedings magazine - World Naval Developments
			(from modelwarships.com:)
			For those of you that are wanting to build the USS Yorktown, Enterprise, or Hornet, this "photo album" is for you, it is full of detailed photographs that trace the lives of the three ships through their prewar years to their demise. The photographs are high quality and arranged from prewar images to the last images of each ship. According to the author these books are commonly misconstrued as "being for modelers", when in fact, they are for anyone interested in a visual history of ships, or a particular ship.
			The book begins with an overview of the Yorktown's and there is a short history of each ship. The photo's are well captioned, with the important features in each photo explained. There is also a little background information provided that helps the reader understand what is being presented. This book is geared towards the modeler, not only pointing out the details but

Object ID	Title	Author	Summary
			explaining what they are and when they were added or removed. Camouflage measures are described, with the time frame noted.. The pictures range from yard photo's taken while each ship was in for refit, to in action shots taken during the battles that all three ships engages in. Most of the photo's, I have not seen published before. the ones I have seen before are of even higher quality in this book. The close up shots of the various fittings are pretty revealing, and you will even find some great hanger deck shots should you be inclined to detail the interior of your ship. The aircraft that served aboard the three ships are covered as well. The years they entered service and were replace is noted, as well as their specifications. The General Statistics of the ships are covered in the back of the book, with Air Group and Squadron info presented for easy reference. This 8-1/4" x 11" soft book has 64 pages and well over 100 photo's. This book is a must have for anyone interested in any of these three carriers, whether you wish to model it, or just are fascinated with the ships, it definitely belongs on your book shelf! Special thanks to Keith Butterley of Warship Books for the review copy. Keith carries a full line of Classic Warships books as well as just about any Warship related book you need.

2012.313.066	Battleship New Jersey : An Illustrated History	Stillwell, Paul	This handsome, large-format book tells the remarkable story of the famous warship by taking the reader inside the ship to relate events as they were experienced by the crew. It also offers a striking collection of over 350 photographs, biographies of the commanding officers, and a design history of the Iowa-class battleship. (from barnesandnoble.com)
2012.313.067	United States Navy Aircraft Since 1911	Swanborough, Gordon	The core of the book describes more than 140 significant aircraft types, and each is illustrated with at least one photograph and a three-view line drawing. Also, included in the description are the squadrons that flew the plane. A section is devoted to those aircraft procured for service but of less significance, while appendices cover foreign aircraft, gliders, balloons, and airships. There is a comprehensive index. Several pages are devoted to aircraft designations, aircraft colouring (coloring), and markings of US Naval Aircraft. Library also has 1st and 2nd editions.
2012.313.068	Harrier	Mason, Francis K.	This is the second edition of this book. The history of the Harrier — the world's first successful jet V/STOL aircraft -- is as remarkable as the aeroplane itself. Perhaps most remarkable of all, as this book clearly shows, is the fact that the project even survived in the face of official hostility, lack of political and professional backbone, and sheer ignorance. McDonnell Douglas merged

Object ID	Title	Author	Summary
			with Boeing in 1997. After the end of the Second World War, the vulnerability of airfields to missile attack became increasingly obvious, while in more recent years the viability of the large fleet aircraft carrier has also been seriously questioned. In both contexts, the availability of a V/STOL combat aircraft, capable operating from small ships or clearings in forests, makes obvious sense. Yet it was to be many years before the validity of the concept gained Service acceptance. In this authoritative study, Francis K. Mason — himself a former Hawker senior projects designer — describes early post-war experiments with vertical take-off aircraft and the political climate in which Hawk persevered with their P 1127 design in the face of official apathy. An often unappreciated fact which the author is at pains to point out is that it was only thanks to substantial American funding that the Bristol vectored-thrust Pegasus turbofan was brought to fruition, for without this engine there might have been no Harrier. Indeed, American support for the project has always been enthusiastic continues today with the joint Anglo-American development and construction the advanced AV-8B, which seems likely gain acceptance as the next V/STOL combat aircraft by the two nations. This book traces every stage of the Harrier's evolution, flight trials and operational success with the Royal Air Force, Royal Navy and United States Marine Corps. It discusses the problems inherent in V/STOL operations and not only provides a detailed description of the Harrier's structure, but also a complete list of every aircraft built to date, with brief histories of each. Well illustrated with superb photographs and the

			author's own painstakingly researched drawings and tone paintings, this book pays due tribute to shining example of British genius, ingenuity and perseverance. (from dust jacket flap)
2012.313.069	Electronic Greyhounds : The Spruance-class Destroyers	Potter, Michael C.	(from dust jacket flap:) "The Spruance class carries an unusually large, volume-consuming electronic suite-so much that she could be designated a DDE to stand for electronic warfare destroyer." -Philip Sims, Naval Sea Systems Command, 1974 Since their introduction in 1975, Spruance (DD 963)-class destroyers have revolutionized the U.S. Navy. This book describes how the ships emerged from a cloud of controversy to become the mainstays of today's surface fleet. Solidly based on official documents and firsthand experience by key participants, it is the first complete account of the warships that have seen more action since 1980 than all other surface combatants combined. This authoritative and comprehensive study not only details every aspect of the class, it also covers Kidd-class guided-missile destroyers, Ticonderoga-class Aegis cruisers, and never-built variants. It describes the ambitious DX/ DXG project, the struggle to introduce gas turbines, and the Total Package design competition for the class - the most ambitious attempt to date to reform defense contracting - and considers them against the background of Cold War strategy, lessons from Vietnam, and American politics. Illustrations show competing DD 963 designs, the progressive modernization of the ships and their weapons, and operations. Using information

Object ID	Title	Author	Summary
			declassified for this book, the author details destroyer operations off Libya, Grenada, Lebanon, Nicaragua, Soviet Russia, Iran, Iraq, central Africa, and elsewhere. It takes readers on an actual intelligence mission and a gunfire-laden drug bust in the Caribbean. It describes trapping Iraqi blockade runners, rescuing Special Forces commandos under fire at Grenada, and experiencing a sense of helplessness while combing the waters off Japan for debris from Korean Airlines flight 007. As told by Capt. Michael Potter, who himself served on one of the first Spruance-class destroyers, Electronic Greyhounds is an exciting, true story of high technology and
2012.313.070	U.S. Aircraft Carriers : An Illustrated Design History	Friedman, Norman	This book treats the reader to detailed information on every U.S. carrier class, from the Nimitz class to the "side-wheeler" training carriers that operated in the Great Lakes during World War II. Book includes comprehensive history of flight deck plans, outboard profiles, sketches of major design studies, and descriptions of several unique carrier proposals that never got beyond the designer's table but still had a major influence upon contemporary design thinking.
2012.313.071	Dreadnought : A History of the Modern Battleship	Hough, Richard Alexander	HMS Dreadnought was the wonder of the Edwardian Age: mighty, magnificent, overwhelmingly powerful in her size, her speed, her 10 12-inch guns, and her protection of armor. She was the very stuff of imperialism, the status symbol supremen, the ultimate deterrent of the era before the bomber, bacteriological warfare, and nuclear fission removed grandeur from the nations' arsenals. Not only was the launching of HMS Dreadnought the most important naval event leading up to the 1st WW, but her construction aroused international controversy and drew into the naval race not

Object ID	Title	Author	Summary
			only Germany and England but the US, Italy, France, and Japan as well.
2012.313.072	Pictorial History of the Sea War, 1939-1945, A	Kemp, Paul	This pictorial history brings together images from international archives and personal collections to demonstrate the diversity and drama of these years, to portray the atmosphere experienced by the mariners in this most unforgiving battlefield of all. It presents a superb visual record of World War Two-the great convoy battles with German riders; desperate struggles in the icy seas of the Arctic; great naval-air battles in the Pacific, the vast amphibious operations that brought the Allies to grips with the enemy on land; and much more.
2012.313.073	Naval Gun	Hogg, Ian V.	Naval Gun is the story of gun development, placing the accent on the guns rather than on the ships or the tactics which employed them. It relates the rise and decline of naval ordnance from the 14th century until yesterday, illustrating the main line of development and yet exploring some less well-known but equally important and diverting byways.
2012.313.074	Destroyers - 60 Years	Schofield, William G.	Often outweighed, outgunned, and outpowered, destroyers have written sagas of glory against battleships and cruisers, kamikazes and beach artillery. This is a story of action with North Atlantic convoys and off South Pacific beachheads; of Hunter-Killer groups and anti-submarine warfare; of shore bombardment and amphibious support. Pearl Harbor, Coral Sea, Omaha Beach, Samar, Lingayen Gulf, Korea, Lebanon, and Formosa are all names solidly linked with the record of destroyer action. Over 100,000 official Navy photographs were scanned and the 200 best were selected for this book.
2012.313.075	Jutland, the German Perspective : A New View of the Great Battle, 31 May, 1916	Tarrant, V. E.	This book is about the Battle of Jutland, 31 May to 1 June 1916. Now, for the first time this classic sea battle is viewed from the enemy's perspective.

Object ID	Title	Author	Summary
			Drawing on many official sources, archives and translations of documents about the Battle of the Skaggerak (as Jutland is known to the Germans), the historian V. E. Tarrant has created this superb new study of the battle.
2012.313.076	Hitler's U-boat War, vol. 2 : The Hunted, 1942-1945	Blair, Clay	Volume 1 is Hitler's U-boat War, The Hunters, 1939-1942. In unprecedented detail and drawing on sources never used before, Clay Blair continues the dramatic and authoritative story of the failures and fortunes of the German U-boat campaign against the United States and Great Britain. All the major patrols and sorties made by the Germans are described in detail and with considerable human interest: the Peleus and Laconia affairs; the capture at sea of U-505; the crisis of German command; the futile operations against the Americas; and the mounting and devastating losses that , in effect, entirely destroyed the German submarine service. This is the second volume in the series. The first volume (The Hunters, 1939-1942) describes the Battle of the Atlantic waged first against the British Empire and then against the Americas.
2012.313.077	Allied Landing Craft of World War Two	Baker, A. D. (Arthur David), 1941-	Described and illustrated in this book are the landing ships, craft, barges, vehicle, personnel and tank landing craft, support and command craft, amphibious vehicles and supply and repair craft that proved indispensable to the US, British and Australian forces in World War Two, during the 'Torch' landings in North Africa, those in Sicily and Italy, D-Day in Normandy and the US island-hopping campaigns in the Pacific. In addition to extensive data tables and a complete list of designations, there are detailed outboard drawings of each type and over 350 black and white photographs. "Originally published in 1944, with a subsequent supplement, as ONI 226--Allied landing craft and ships by the U.S. Division of

Object ID	Title	Author	Summary
2012.313.078	Death in the South Atlantic : The Last Voyage of the Graf Spee	Powell, Michael	Naval Intelligence"--T.p. verso She was known as Germany's Tiger of the Seas. For months she had ruthlessly hunted Allied merchant vessels, but now she came under the attack of HMS Exeter, HMS Ajax, and HMNZS Achilles. Previously published in 1956 as The Last Voyage of the Graf Spee
2012.313.079	Submarine Warriors	Gray, Edwyn	This books includes information on master submariners such as: Howard W. Gilmore who deliberately sacrificed his life to save his boat and her crew; "Mush" Morton who became a legend in the Pacific in Wahoo, attacking the Japanese almost in their home waters; his exec, Richard O'Kane, who went on to sink an incredible twenty-four Japanese ships as the skipper of Tang before a faulty torpedo ended the ships life.. There are also ironies of history such as the Italian one-man-submarine commando who was decorated by the captain of a ship he had sunk, and the Japanese commander who testified at the court-martial of the American skipper whose ship he torpedoed. Most of the stories took place in the two World Wars.
2012.313.080	Iron Afloat : The Story of the Confederate Armorclads	Still, William N.	During the Civil War, the Confederate government commissioned and put into operation twenty-two armorclad vessels of war. This is the story of those ironclads. From the inception of the program, through the problems of building the vessels, through the careers of the vessles themselves (including gripping battle descriptions). to their eventual destruction or surrender, it is all here. Reprint. Originally published: Nashville, Tenn : Vanderbilt University Press, 1971. With new illustrations and addendum to the bibliography.
2012.313.081	NATO and Warsaw Pact Submarines Since 1955	Kolesnik, Eugene M.	Through 200 half-tone illustrations the author traces the development of the modern submarine. There are basically two types: (a) conventional

Object ID	Title	Author	Summary
			submarines which are either diesel-electric boats of the coastal and ocean going type, or nuclear-powered, deep-diving hunter-killer boats; and (b) the fleet ballistic missile submarines which are regarded as providing the most survivable component of the nuclear deterrent in both the East and West. All of the types, in the many facets of their operational lives, are well covered, from internal photographs showing life on board to test firing missiles and broadside views of the boats underway. The latest NATO developments in submarine technology and the operational concepts which shape them are illuminated. The photographs also include Soviet submarine accidents and the US Navy's Deep Submergence Rescue Vehicles (DSRVs). The Warsaw Pact is comprehensively covered. The USSR's potent submarine force has over 300 attack submarines of 25 classes, all but one of the classes being nuclear-powered, while the 'Typhoon' Class SSBN, designed for operation under the Arctic ice, offers a dangerous new nuclear threat to the West.
2012.313.082	Damn the Torpedoes : A Short History of U.S. Naval Mine Countermeasures, 1777-1991	Melia, Tamara Moser	Recounts the U.S. Navy's longstanding efforts to counter enemy sea mines. These relatively inexpensive and often unsophisticated weapons pose a deadly threat to use of the sea. The book covers the early use of and countering contact mines (1777-1919), to the operational use of influence mines (1919-1945) and the Wonsan generation (1945-1965), to the impact of low-intensity mine warfare (1965-1991).
2012.313.083	Mud, Muscle, and Miracles : Marine Salvage in the United States Navy	Bartholomew, C. A., 1940-1990.	This book covers the history of marine salvage from the days when wooden ships ran aground to the time (with the advent of steam) that it became possible to refloat wrecked vessels; clear harbors; and

Object ID	Title	Author	Summary
			locate and raise sunken ships, their cargoes, and other objects lost at sea. The book covers the construction of a cofferdam to reveal the battleships Maine at the bottom of Havana harbor, to the use of side-scan sonar, high-speed computers, and remotely operated vehicles to recover the debris from spaceship Challenger in the Atlantic Ocean.
2012.313.084	Warrior : Restoring the World's First Ironclad	Lambert, Andrew	Launched in 1860, Warrior was the first ever iron-hulled, sea-going armoured ship, and for a number of years was the most powerful warship in the world. By a fluke of history, the ship also survived to be the last of the broadside ironclads, and was rescued from an obscure existence as a refuelling hulk in West Wales. This book tells the story of her restoration.
2012.313.085	British Destroyer, The	Manning, Thomas Davys, 1898-	This is a history of the British destroyer. The destroyer was originally called a torpedo-boat destroyer.
2012.313.086	Weapons That Wait : Mine Warfare in the U.S. Navy	Hartmann, Gregory Kemenyi	This is a scholarly history concerning mine warfare by Dr. Gregory Hartmann. A Rhodes Scholar, he trained at Caltech and was technical director of the Naval Ordnance Laboratory (NOL) at White Oak, Maryland for 25 years. The work is illustrated with numerous pictures and graphs. (from Amazon.com)
2012.313.087	Midway : The Battle that Doomed Japan; The Japanese Navy's Story	Fuchida, Mitsuo	For the Japanese, still gloating over the easy victory at Pearl Harbor and the rapid conquest of their Pacific empire, the Midway operation had one objective; to draw out the U.S. Navy and destroy it. Midway Island was selected as the base which, by its loss, would pose the greatest threat to American naval power in the Pacific. In this book, you will see the battle for Midway as it appeared to Japanese eyes. With them you will see the weakness of the Imperial Japanese Navy. It was a plan for victory. Only afterward, stunned by their losses, did the Japanese ask themselves, What should we

Object ID	Title	Author	Summary
2012.313.088	Battle of Leyte Gulf, The	Stewart, Adrian	have done that we did not do;, and Why did it fail?. The largest naval battle in scale, Leyte Gulf was also the most varied. Every type of military vessel and aircraft took part in the conflict, including powerful battleships and aircraft carriers, cruisers, destroyers, submarines, interceptor fighters, and 'suicide planes'. From this battle the world would discover the vital importance of the aircraft carrier. The author examines the differing aims and outlooks of the American and Japanese commanders, as well as the crucial decisions made on both sides.
2012.313.090	Battleship : The Sinking of the Prince of Wales and the Repulse	Middlebrook, Martin	Battleship tells for the first time the full story of the Prince of Wales and Repulse disaster.. Disposing convincingly of several accepted myths, the authors take full advantage of recently released secret World War II documents from British government archives and of the Japanese Official History, which gives a fascinating side of this devastating battle.
2012.313.091	Battle for the Komandorski Islands, March 1943, The	Lorelli, John A.	A classic sea battle was fought in the cold reaches of the North Pacific on 26 March, 1943. Just off the Komandorski Islands, a small American task force encountered a Japanese fleet nearly twice its size. It was a unique event in the war in the Pacific: a traditional gunfight that took place entirely in daylight with neither air power nor submarine support. Includes information on Task Group 16.6 and Salt Lake City, cruiser.
2012.313.092	Shinano! The Sinking of Japan's Secret Supership	Enright, Joseph F.	Books have immortalized Japan's super battleship Yamato and Musashi, but the top-secret conversion to an aircraft carrier of a bigger sister ship, Shinano, has remained part naval legend, part military secret. Even after this huge mystery carrier was sunk on her first night at sea by Captain Enright's submarine Archer-Fish, U.S. intelligence questioned Shinano's existence. This is the first and definitive

Object ID	Title	Author	Summary
			book on the Pacific war's most remarkable one-on-one sea battle, by its key surviving participant.
2012.313.093	Ed Heinemann : Combat Aircraft Designer	Heinemann, Edward H.	In this comprehensive autobiographical record of his achievements, Ed Heinemann and coauthor, Rosairo "Zip" Rausa, have tried to tell it like it was, including the lows as well as the highs. Despite tragedies in his personal life and a formal education limited to high school, Ed Heinemann became one of the legendary stalwarts in the golden age of aviation.
2012.313.094	Battle History of the Imperial Japanese Navy, 1941-1945	Dull, Paul S.	This unique book based on hitherto unused Japanese sources tells the story of the Pacific War from the viewpoint of the Japanese themselves, focusing on both the celebrated and lesser-known sea battles.
2012.313.095	Ships and Aircraft of the U.S. Fleet - 1984	Polmar, Norman	This latest edition of Norman Polmar's highly regarded guide to the ships and aircraft of the U.S. Fleet describes the Navy as it undergoes an unprecedented peacetime buildup. In his incisive opening analysis of the state of the fleet, Polmar offers high praise for Secretary of the Navy John Lehman's ability to obtain funds to reach the goal of a 600-ship fleet. Polmar concludes, in fact, that the goal will be surpassed by more than 100 ships, at the end of this decade. But, he warns, it remains unclear how long a force of this size can be maintained and how it can be manned. With the same convenient format Polmar developed for the previous two editions, this thirteenth edition of Ships and Aircraft provides the most comprehensive description available of the contemporary U.S. Navy. In addition to its careful examination of ships and aircraft, it contains data on personnel, organization, weapons, electronics, and shipyards. The ships and aircraft of the U.S. Coast

Object ID	Title	Author	Summary
2012.313.096	Ships and Aircraft of the U.S. Fleet - 1978	Polmar, Norman	Guard and National Oceanic and Atmospheric Administration also are covered in detail.
			New features in this edition include extensive descriptions of the current U.S. Marine Corps and the Rapid Deployment Joint Task Force, as well as expanded treatment of the U.S. shipyards that build and maintain the fleet. Among the long list of new ships described in detail are the Aegis missile cruisers of the TICONDEROGA class, the missile destroyers of the ARLEIGH-BURKE class, the new MSH and MCM minesweeper classes, and the planned "SSN 21" advanced nuclear attack submarine. The Israeli-built Kfir fighter for adversary training and the new F/A-18 Hornet strike fighter also receive in-depth treatment.
			Approximately 800 photographs and drawings are provided. most not previously published, with general identification views of ships and aircraft, and close-ups of electronic equipment and weapons.
			Front jacket photos: Clockwise from upper left, CALIFORNIA (CGN 36) and NIMITZ (CVN 68), U.S. Navy; antennas of MISSISSIPPI (CGN 40) and SOUTH CAROLINA (CGN 37) , Giorgio Arra; CITY OF CORPUS CHRISTI (SSN 705), Giorgio Arra; bridge watch of DEWEY (DDG 45), Lt. Cdr. A. Lopez, U.S. Navy; and F/A-18 Hornets of VFA-125, Northrop Corp.
			Back jacket photo: TICONDEROGA (CG 47) and NEW JERSEY (BB 62) off the coast of Lebanon in 1983, General Dynamics Corp.
2012.313.096	Ships and Aircraft of the U.S. Fleet - 1978	Polmar, Norman	The 11th Edition of Ships and Aircraft describes the US Navy of the late 1970s -- its ships, aircraft, personnel, sensor

Object ID	Title	Author	Summary
			and weapon systems, and organization. The scope and depth of the book have been expanded considerably over previous editions because of the complexity of the contemporary US Fleet, and to compensate for the limitations of other reference works in this field.
2012.313.097	Battleships	Preston, Antony	A history of battleships.
2012.313.098	US Naval Vessels - 1943	Office of Naval Intelligence	More than 900 illustrations - including 679 photographs and 227 line drawings - depict the might of the US Navy at the height of the Second World War. Originally published as ONI-54 U.S. Naval Vessels by the U.S. Division of Naval Intelligence. See also United States Naval Vessels, 1945, which includes this work.
2012.313.099	That Gallant Ship : U.S.S. Yorktown (CV-5)	Cressman, Robert	(from pictorialhistoriespublishing.com:) USS Yorktown (CV-5) -The definitive history of one of the U.S. Navy's early aircraft carriers.
2012.313.100	American Cruisers of World War II : A Pictorial Encyclopedia	Ewing, Steve	(from pictorialhistoriespublishing.com:) A Pictorial Encyclopedia 8-1/2x11, 152 pgs., 148 photos, sb. \$12.95 ISBN 0-933126-51-4
2012.313.101	Graf Zeppelin : The German Aircraft Carrier	Breyer, Siegfried	(from schifferbooks.com:) This book presents an account of the use and actions of the aircraft carrier Graf Zeppelin, one of the primary pieces of the German navy in WWII.
2012.313.102	USS Enterprise (CV-6) : The Most Decorated Ship of World War II : A Pictorial History	Ewing, Steve	The USS Enterprise, commissioned in 1938, saw service in World War II from the surprise attack at Pearl Harbor in 1941 to the Okinawa campaign in 1945. The author presents a detailed narrative of the ship's twenty-year history including 130 black and white and color photographs.
2012.313.103	Fighting Lady, The : The New Yorktown in the Pacific War	Reynolds, Clark G.	An intimate day-by-day account of the "The Fighting Lady", an epic aircraft carrier which dominated the greatest seamar

Object ID	Title	Author	Summary
			of all time; The new Yorktown, named for the "old Yorky" sunk at the Battle of Midway early in World War II. Not only has the author reconstructed the joys and agonies of the men who sailed and fought her--and flew from her--but he has allowed them to tell it in their own words. His sources include and unparalleled collection of diaries kept by crewmen and pilots.
2012.313.104	U-boat War	Buchheim, Lothar Gunther	A Pictorial and verbal account of life aboard a submarine. A word and picture chronology of submarine warfare in the North Atlantic. Translation of U-Boot-Krieg.
2012.313.105	Glorious Page in Our History, Adm. Chester Nimitz, 1942 : The Battle of Midway, 4-6 June 1942	Cressman, Robert	A Pictorial history of the Battle of Midway, and includes a section on what occurred on Midway prior to 1935. It includes what occurred between the coming of Pan American Airways and incipient Navy interest in the mid-1030s and the start of World War II. Likewise, Midway's first battle with the Japanese, on 7 December 1941, is given its proper place.
2012.313.107	German Navy in World War Two, The : A Reference Guide to the Kriegsmarine, 1935-1945	Showell, Jak P. Mallmann	Illustrated with over 350 photographs and drawings. This guide provides basic reference to the ships, organization, command and rank structure, leaders and uniforms of the Kriegsmarine.
2012.313.108	Jane's Fighting Ships - 1961-62	Blackman, Raymond V. B. (ed)	Jane's Fighting Ships is an annual reference book (also published online, on CD and microfiche) of information on all the world's warships arranged by nation, including information on ship's names, dimensions, armaments, silhouettes and photographs, etc. Its annual editions cover the warships used by the different national naval and paramilitary forces, and provide data on their characteristics. It was originally published by John F. T. Jane (usually known as "Fred T.") in 1898 as Jane's All the World's Fighting Ships. Its success launched a number of military publications

Object ID	Title	Author	Summary
			carrying the name "Jane's". It is a unit of Jane's Information Group, which is now owned by IHS. From Wikipedia, the free encyclopedia
2012.313.110	Naval Institute Guide to the Ships and Aircraft of the U.S. Fleet - 1993	Polmar, Norman	This edition describes the fleet of the early 1990's and the ongoing naval programs, as well as several recent cancellations. The emphasis on sealift ships, including maritime prepositioning, has led to development of a special chapter to describe those ships.
2012.313.111	Naval Institute Guide to the Ships and Aircraft of the U.S. Fleet - 1997	Polmar, Norman	Revised and updated with the latest technical data and incisive commentary on the U.S. Navy's current ship, aircraft, weapon, and electronic programs, this popular reference is essential for an understanding of the Navy as it enters the 21st century embroiled in the interservice debate over roles and missions in an era of downsizing. Award-winning author and naval analyst Norman Polmar delivers late-breaking details of the Navy's newest programs-such as the arsenal ship and the F/A-18E Hornet aircraft-while helping the reader keep track of the large number of ships and units being taken out of service. Particular attention is given to submarines, which have become the most controversial U.S. warships of the decade. The new attack submarine (NSSN) and Seawolf programs are addressed in detail. The book also provides an update on the state of the Navy, Defense Department organization, Navy Department organization, fleet organization, the Military Sealift Command, naval personnel, the Naval Reserve, the Coast Guard, and the National Oceanic and Atmospheric Administration. The roles available to women in the Navy, the reorganization of the Marine Forces (formerly Fleet Marine Forces), and the changing structure of the fleet are among the other issues

Object ID	Title	Author	Summary
			discussed. Like its predecessors, this 16th edition of Ships and Aircraft will be indispensable to anyone- especially naval officers, military analysts, congressional staffers, defense contractors, journalists, and buffs-needing technical data and program information on the contemporary U.S. Navy. Jacket photos (top to bottom): The F/A-18 Hornet, the first of seven flight test aircraft for the F/A-18E/F program (McDonnell Douglas) (from dust jacket flap)
2012.313.112	Naval Institute Guide to the Ships and Aircraft of the U.S. Fleet - 2001	Polmar, Norman	Packed with authoritative information, up-to-date photographs, line drawings, maps, and useful appendixes, this timely new guide describes the U.S. Navy, Marine Corps, and Coast Guard during an intensive period of transformation from the Cold War to what some call World War III. In the war against radical Muslim fundamentalists, the sea services play significant roles, and this comprehensive volume gives a valuable overview of each force and provides details of their ships, aircraft, weapons, and people. New to this eighteenth edition are chapters on the Navy's littoral combat ships and the unmanned aerial vehicles being flown by all three services. Continuing a longstanding tradition as the most complete resource of its kind, this updated edition easily meets the high expectations and exacting standards of those who rely on it to stay informed and make important decisions. For example, new details are provided on the changing carrier air wings, the close-in weapon systems being provided for defense against small craft, a new submarine rescue system, the deepwater cutter program, unmanned undersea and unmanned surface vehicles,

Object ID	Title	Author	Summary
			and the new MH-60R/S multipurpose, ship-based helicopters. In cataloging and updating the assets of U.S. Navy, Marine, and Coast Guard and in assessing various trends, the author once again reinforces the guide's reputation for accuracy and reliability. (Description for 18th edition) (Source: www.usni.org/store/)
2012.313.113	Your Navy	Bureau of Navy Personnel. Standards and Curriculum Division	A book written for all enlisted men of the U.S. Navy. As part of the Navy training courses it was intended to give men an understanding of the history and development of the Navy and an appreciation of the Navy's role in national history.
2012.313.114	British Cruisers of World War Two	Raven, Alan.	This book presents a detailed account of the design, construction and technical history of the cruisers that served in the Royal Navy during the second World War. Cruisers--the backbone of the fleet--fought in every theatre of the war at sea, and were present at practically all of the major engagements--Exeter, Ajax and Achilles trapped Admiral Graf Spee at the battle of the River Plate; Norfolk and Suffolk made first contact with Bismarck on her sortie into the North Atlantic, and it was Dorsetshire that gave the German battleship her coup de grace; Belfast, Norfolk and Sheffield took part in the sinking of Scharnhorst at the Battle of the North Cape; and cruisers were present at the Battles of Syrte, Cape Matapan, Java Sea and Barents Sea, besides escorting convoys and supporting the landings in the Mediterranean and Normandy. In all, 121 cruisers are described and illustrated. There are 400 photographs and over 60 sets of detailed plans.
2012.313.115	Warships of the Imperial Japanese Navy, 1869-1945	Jentschura, Hansgeorg.	A translation with revisions of Die japanischen Kriegsschiffe, 1869-1945. This book is the work of three distinguished German naval researchers and the result of many years of

Object ID	Title	Author	Summary
			original research. It provides details of battleships, battlecruisers, cruisers, aircraft carriers, escort carriers, gunboats, torpedo boats, submarines, combatant auxiliaries, mine-laying craft, submarine chasers, landing ships, and support and transport ships of all types. Includes nearly 400 general-arrangement drawings, plus 200 photographs.
2012.313.116	Battleships : Axis and Neutral Battleships in World War II	Garzke, William H.	This book provides a definitive technical history of all German, Italian, Japanese, and Spanish battleships and battlecruisers built--and even those projected--since 1930. Each ship class is presented in a separate chapter that provides extensive technical data on ship characteristics and performance and includes meticulously executed line drawings, some of which are large fold-outs, of plan views, outboard, inboard, and armor profiles, and more. among the classes included are the powerful Yamato, the Scharnhorst battlecruisers, the legendary Bismarck, and Italy;s Vittorio Veneto. The Spanish version of this latter class and the enormous ships of the German "H" and "O" classes are described as well, although they were never constructed. Contents: Introduction -- The Yamato class -- The Scharnhorst class -- The Bismarck class -- Germany : the "H" - class battleships -- The "O" - class battlecruisers -- The Vittorio Veneto class -- Spain -- Conclusion -- Appendixes : A. Stability characteristics of the Bismarck class -- B. Inboard profile and deck plans of the Bismarck -- C. Battleship and battlecruiser guns
2012.313.117	Requiem for Battleship Yamato	Yoshida, Mitsuru.	This tells the story of the Yamato by a young ensign who served on the bridge during the climatic battle agsinst American airplanes. Translated by Richard H. Minear.
2012.313.118	Memories & Memorials : The World War II U.S. Navy : 40	Ewing, Steve.	This book is a review of memorable successes and

Object ID	Title	Author	Summary
	Years After Victory		sacrifices of battleships, carriers, cruisers, destroyers, destroyer escorts and submarines during World War II, and contains an expansive compilation of pictures and information detailing significant memorials dedicated since 1945. Includes 400 pictures (32 in color). Also included are renderings by renowned artist, Joe Cason, listings of Presidential Unit Citation and Navy Unit Commendation winners, battle star totals, and major warships lost during World War II.
2012.313.119	Hunters and the Hunted : Adventures of Italian Naval Forces, The	Cocchia, Aldo	Translation of Sommergibili all'attacco. This book is a description of Italian submarine activity during World War II.
2012.313.120	Ship That Changed the World : The Escape of the Goeben to the Dardanelles in 1914	Van der Vat, Dan.	This is the story of the German ship, the Goeben. Drawing on German, French, and British sources, Dan van der Vat examines the disastrous failure by the French and the British to bring the Goeben to action. His research reveals the entire story of the Goeben affair, including high political and diplomatic drama, an exciting chase, the trail of a British admiral, and daring naval operations from Sevastopol to the tragedy of Gallipoli.
2012.313.121	Naval Night Battles in the Solomons, The	Kilpatrick, C. W.	This is an account of the fourteen night battles fought in the Pacific Solomons during World War II, documented in their own words by the action reports filed by the commanding officers of the involved ships. The chronological technique is taken from Navy logs, blending reports from many destroyers and cruisers into a single narrative. The accounts are taken verbatim from radio reports between ships, summaries of damage, ammunition expenditures and human interest items which have been collected by the author over years of research.
2012.313.122	Last Gentleman-of-War : The Raider Exploits of the Cruiser Emden	Lochner, R. K.	Translation of Die Kaperfahrten des kleinen Kreuzers Emden. The Emden is credited with capturing or sinking nineteen

Object ID	Title	Author	Summary
			merchant ships while sweeping the seas from Diego Garcia to Calcutta, from the Maldive islands to the Malay Peninsula. In one raid alone she sank a Russian cruiser and destroyed a Frenchy torpedo boat after boldly steaming into a British port. Allied warships were determined to hunt her down, but she cleverly eluded them until an Australian cruiser finally engaged her in a fierce and unequal battle off the Cocos islands and cut short her spectacular career. The story continues through her survivors, who embarked on an adventure-filled journey across the Indian Ocean, overland on the Arabian Peninsula, to Constantinople and the safety of a German squadron.
2012.313.123	Miracle at Midway	Prange, Gordon William	The Battle of Midway Island was the turning point for naval dominance in the Pacific Theater. In June of 1942, seven months after Pearl Harbor, Admiral Yamamoto prepared his large and powerful fleet to do battle with an inferior United States force under the command of Admiral Chester Nimitz. There was no apparent reason to believe, given the superiority of Japanese forces, that the outcome would not be as crushing, in its way, as the loss of American forces at Pearl Harbor. The Japanese intelligence code was broken and Nimitz set in motion the flexible and operational tactics to win the Battle of Midway.
2012.313.124	German Destroyers and Escorts : A Selection of German Wartime Photographs from the Bundesarchiv, Koblenz	Beaver, Paul	Over 150 photos of German destroyers, escorts and torpedo boats active during World War II.
2012.313.125	Dive Bomber! : An Illustrated History	Smith, Peter Charles	For many, it is a dive bomber that conjures the most dramatic, quintessential image of World War II: a screaming German Stuka hurtling toward the ground as part of the frightening blitzkrieg that opened the war. In this illustrated history of dive bombers from around the world, Peter C. Smith takes the reader from the earliest

Object ID	Title	Author	Summary
			experiments in 1910, through the planes first operations, to their eventual emergence as effective tools of aerial warfare during World War II. With its large number of photographs, diagrams, and tables, this book presents a fascinating and authoritative piece of aviation history. About the Author Peter C. Smith has written more than thirty books on military history, including <i>Fist from the Sky</i> (9780811733304) and <i>Massacre at Tobruk</i> (9780811734745). (from Amazon.com)
2012.313.126	Hitler's U-boat War, vol. 1 : The Hunters, 1939-1942	Blair, Clay	Volume 2 is Hitler's U-boat War, The Hunted, 1942-1945. This first volume covers the opening three years of the war, August 1939 to August 1942. Told chronologically, it is subdivided into two major sections, the War Against the British Empire, and the War Against the Americas.
2012.313.127	Greek and Roman Naval Warfare : A Study of Strategy, Tactics, and Ship Design from Salamis (480 B.C.) to Actium (31 B.C.)	Rodgers, William Ledyard, 1860 -1944.	This book was originally published in 1937. It is a companion to Naval Warfare Under Oath. Although weapons and tactics have changed, the basic reason for the existence of any naval force is to control what happens at sea. The principles of strategy which the ancients developed still remain valid, and a thorough understanding of them as they are presented in this text might well tip the balance in favor of the better informed of two otherwise equal opponents.
2012.313.128	Naval Warfare Under Oars, 4th to 16th Centuries : A Study of Strategy, Tactics and Ship Design	Rodgers, William Ledyard	This book is a classic study of naval strategy and fleet tactics in the days of rowing ships and is acknowledged to be the best book ever written on the subject. With its companion volume, <i>Greek and Roman Naval Warfare</i> , it offers a thorough examination of the principles of early naval warfare, principles that have remained valid from ancient times onward despite dramatic changes in weaponry and

Object ID	Title	Author	Summary
2012.313.129	Commandos From the Sea : Soviet Naval Spetsnaz in World War II	Strekhnin, Yuriy Fedorovich	ship design. This books tells the story of the World War II forerunners of the spetsnaz of the Cold War. Readers follow the expert swimmers, parachutists, skiers, mountain climbers, marksmen, and hand-to-hand combat specialists on one impossible mission after another, working behind German lines to gather intelligence and conduct partisan and diversionary-demolition operations. The commandos lived by their wits and off the land, fighting their way out of every dangerous situation, blowing up bridges and fortifications, ambushing German SS patrols, snatching prisoners, and reporting enemy strengths.
2012.313.130	Blooding of the Guns, The	Fullerton, Alexander, 1924-	At 2:28pm on May 31, 1916, the battle of Jutland begins. Sixty miles off the coast of Denmark the assembled fleets of Britain and Germany confront each other in what will prove to be the most important naval battle of World War I. The ships of Sir John Jellicoe, out of Scapa and Cromarty, and the ships of Sir David Beatty from Rosyth prepare to close on the German High Fleet. Soon one hundred and fifty British vessels and 60,000 men wage war against Admirals von Scheer, Hipper, their 45,000 men, and one hundred of the Kaiser's ships.
2012.313.131	With the Battle Cruisers	Young, Filson, 1876-1938	The author, Filson Young, served on the staff of Vice Admiral Sir David Beatty, commanding the Battle Cruiser Force of the Grand Fleet in HMS Lion. This book is an account of that time.
2012.313.132	Air War South Atlantic	Ethell, Jeffrey L.	This book tells the story of the air actions which took place during the Falklands conflict in the spring of 1982. Contents include: accounts from the pilots involved, on almost all air-to-air combats and attack missions; details of the movements and intentions of the Argentine fleet, including the aircraft carrier 25 de Mayo, on 2 May immediately before

Object ID	Title	Author	Summary
			the sinking of the cruiser General Belgrano; details of the Exocet missile attacks, successful and unsuccessful, by Super Etendard aircraft of the Argentine Navy; the story of the Vulcan bomber which was forced to land in Brazil; the Argentine account of the devastating air attacks on the landing ships Sir Galahad and Sir Tristram on 8 June; and new information on the losses of HMSs Sheffield, Ardent, Antelope and Coventry, and the container ship Atlantic Conveyor.
2012.313.133	War-ships : A Text-book On the Construction, Protection, Stability, Turning, etc., of War Vessels	Attwood, Edward Lewis, 1871-	A textbook on the construction of war ships.
2012.313.134	All the World's Fighting Fleets - 1938	Talbot-Booth, E. C. (Eric Charles)	Discusses history of fighting ships, types of warships, construction, armour, engines, fuel consumption, provisions, badges, lights, weapons, flags, signalling, Royal Navy Administration, personnel, ranks and ratings, and organization of warships, uniforms, decorations, traditions and customs, nicknames and figures of speech, reserves, a short history of the Royal Marines, and navies of the world.
2012.313.135	Fiasco : The Break-out of the German Battleships	Potter, John Deane	In February 1942 the German battleships Scharnhorst and Gneisenau and the heavy cruiser Prinz Eugen slipped out of Brest harbor. They were on their way to safety to Germany. The next day the German warships struck a humiliating blow at British air and sea power. They steamed through the narrow Straits of Dover in broad daylight, defying all the forlornly heroic efforts to stop them. This is the story of the breakout.
2012.313.136	NATO Major Warships : Europe	Grove, Eric J.	This pocketbook covers the major waships of the European signatories of the North Atlantic Alliance.
2012.313.137	Pacific Odyssey : History of the USS Steele During WWII	Bates, Frank W., 1920-	This is the story of the USS Steele, DE-8 in the Asiatic-Pacific Theatre of War from July 1943 to September

Object ID	Title	Author	Summary
			1945. In 1943, as one of the first two Destroyer Escorts in the Southwest Pacific, this ship escorted convoys through submarine infested waters in the area of the Solomon and Marshall Islands and was one of the first ships into Majuro, Kwajalein, and Eniwetok. In 1944 the USS Steele escorted convoys to Saipan and Guam, and assisted in the raids on Marcus and Wake Island and the shore bombardment in the Eastern Carolines. The ship participated in the invasion of the Paluas and Leyte. The vessel was engaged in the training of Allied submarines in evasive tactics to thwart Japanese submarine attacks on allied shipping.
2012.313.138	U.S.F. Constellation : Yankee Racehorse	Sternlicht, Sanford, 1931-	The U.S. Frigate Constellation is the oldest United States warship afloat and the first American-build vessel to win a major naval victory. The ship was nicknamed "Yankee Racehorse," was launched in Baltimore in 1797, as a member of the originally fleet commissioned by the Continental Congress. This is the story of the ship, including her glory years under Captain Thomas Truxtun, her continuing service through both World Wars, her near-demise, and her restoration that continues even today.
2012.313.139	Our Navy in the War	Perry, Lawrence	A history of the United States Navy in World War I.
2012.313.141	Ships of the German Fleets, 1848 -1945, The	Hansen, Hans Jurgen, 1921-	Translation of: Schiffe der deutschen Flotten Reprint, with new foreword. Originally published: London ; New York : Hamlyn, 1974. This book includes some outstanding individual illustrations of the most important German warships from the earliest times to the end of the WWII. It includes historical pictures of naval reviews, maneuvers on the high seas, voyages in foreign waters, and battles. Accompanying these is a comprehensive text explaining technical details and describing the careers of the ships

Object ID	Title	Author	Summary
2012.313.142	Battleship Texas	Power, Hugh Irvin, 1947-	illustrated. The USS Texas is the only intact ship of any nation to have survived two world wars. In WWI Texas operated with British battleships in the North Sea and protected troop convoys. In WWII the ship participated in the American landings at Normandy, Iwo Jima, and Okinawa. It was decommissioned in 1948 and became a state memorial.
2012.313.143	Sumner-Gearing--Class Destroyers : Their Design, Weapons, and Equipment	Sumrall, Robert F.	The Sumners and their long-hulled sisters, the Gearings, were designed and built in the midst of the Second World War and adapted and modernized during the cold War. The author describes the ships as they were first completed and in later variations into the 1970s. The author traces the origins of these destroyers through half a century of changing naval technology, showing the great advances made in ordnance, fire control, and steam engineering. Contents: Design background - - The Sumner-Gearing class design -- Conversions and modernizations -- Armament -- Fire control -- Radar, electronics, and sonar -- Engineering and damage control -- Appendix A: Tables -- Appendix B: Drawings -- Appendix C: Sumner-Gearing class list
2012.313.144	Battleships : Allied Battleships in World War II	Garzke, William H.	This book describes the Allied battleships from the standpoint of their design, development, and construction. Chapters deal with the French Dunkerque and Richelieu classes; the Netherlands-Design 1047; the British King George V class, and the Lion and Vanguard classes; and finally the Soviet ships.
2012.313.145	Naval Institute Guide to Combat Fleets of the World - 1995 : Their Ships, Aircraft, and Armament	Baker, A. D. (ed)	Internationally acknowledged as the best one-volume reference to the world's naval and paranaval forces, this popular Naval Institute guide is both comprehensive and affordable. Updated biennially since 1976, it has come to be relied on for all -inclusive, accurate, and up-to-date data

Object ID	Title	Author	Summary
			on the ships, navies, coast guards, and naval aviation arms of more than 180 countries and territories. Large fleets and small maritime forces get equally thorough treatment as evidenced in this new edition, which highlights major and even minor developments that could have an impact on the world scene. A thorough indexing of material and a logical ship-typing system make the book easy to use and allow for quick comparisons between fleets. The guide continues to present timely, authoritative information supported by more than four thousand illustrations from correspondents throughout the world. From giant aircraft carriers and ballistic missile submarines to tugboats and launches, the characteristics and capabilities of ships large and small are reliably recorded. Complete descriptions of naval aircraft, weapons, weapon systems, and sensors are also provided along with useful commentary on organization, personnel strengths, and bases.
2012.313.146	Jane's Underwater Warfare Systems - 1994-95	Watts, Anthony J. (ed)	Includes information on Anti-Submarine Warfare, Underwater Weapons, Mine Warfare, and other underwater warfare systems.
2012.313.147	Jane's Fighting Ships - 1996-97	Sharpe, Richard (ed)	Jane's Fighting Ships is an annual reference book (also published online, on CD and microfiche) of information on all the world's warships arranged by nation, including information on ship's names, dimensions, armaments, silhouettes and photographs, etc. Its annual editions cover the warships used by the different national naval and paramilitary forces, and provide data on their characteristics. It was originally published by John F. T. Jane (usually known as "Fred T.") in 1898 as Jane's All the World's Fighting Ships. Its success launched a number of military publications carrying the name "Jane's". It

2012.313.149	Battleship Bismarck, The : A Documentary in Words and Pictures	Elfrath, Ulrich	A translation of Schlachtschiff Bismarck. With 200 photos and drawings, many in large format and previously unpublished, and with numerous additional portrayals in the form of sketches, detailed drawings and maps, an panorama of the course of events is presented: not only the shining, triumphant victory of the Bismarck over the [powerful; "Hood" and the brand new battleship "Prince of Wales", but also the tragic further course of operations, which is documented in a unique manner in many portrayals.
2012.313.150	German Navy at War, 1935-1945, The, vol. 1 - The Battleships	Breyer, Siegfried	Translation of Deutsche Kriegsmarine, 1935-1945. In this volume, the authors present their book on the "big ships": the battleships, pocket battleships, aircraft carrier and cruisers. The chronology begins in 1935 and the fleet

Object ID	Title	Author	Summary
			agreement with England, and continues to the end of 1945, when the last big ships sank in a hail of Anglo-American bombs, or fell into Allied hands. The book also includes the Z-plan of 1939, with its projected super-battleships. Volume 2 in the series is U-Boats.
2012.313.151	Warships and Naval Battles of the Civil War	Gibbons, Tony	The construction, cost and campaigns of every major vessel and class which took part in the Civil War are detailed and illustrated. Every known fighting vessel of the conflict--over 1500 in all--is documented.
2012.313.152	German Cruisers of World War Two	Whitley, M. J.	This book is a design and operational history of German cruisers. With 175 photos, line drawings, maps and diagrams, it tells the full story of each vessel, from the drawing board to her ultimate destruction: the heavy cruisers Admiral Hipper, Blucher and Prinz Eugen; and the light cruisers Emden, Konigsberg, Karlsruhe, Koln, Leipzig and Nurnberg. Part One details design and construction, and Part Two describes the ships at sea.
2012.313.153	Warships of World War II	Lenton, H. T.	This book covers the British and Dominion naval effort in World War II from 1939-1945.
2012.313.154	German Warships of World War II	Taylor, J. C.	Continuing the Ian Allan series of reference books dealing with the great Navies that took part in the second World War this book contains details of "fighting ships" of the German Navy. In addition details are included of those ships taken over from other countries and which served as an integral part of the German Navy.
2012.313.155	Weyer's Warships of the World - 1984/85	Albrecht, Gerhard	Published in Germany as Weyer's Flottentaschenbuch, this work has come out almost every year since it was begun in 1900. The name was originally Taschenbuch der Deutschen Kriegsflotte. It is a list of the world's warships.
2012.313.156	Jane's Naval Review - 1986	Moore, John (ed)	Naval year, Naval aviation and the resurgence of the aircraft carrier, Soviet submarine propulsion,

Object ID	Title	Author	Summary
			France's commitment to a nuclear navy, Soviet Navy--the King is Dead, US Navy, Budget pressures threaten British amphibious fleet, Indian Ocean's uneasy rim, Torpedoes for tomorrow, Ruling the airwaves--electronic warfare at sea, Anti-mine Hovercraft, AEGIS shoots down the critics, NATO's naval problems, Latin American navies, South-east Asia, US Ready;y Reserve Force Who shall defend the Canadian Arctic, Rising stakes in the Northern Waters, Navies in the terrorist world
2012.313.157	Battleship Arizona : An Illustrated History	Stillwell, Paul	The author draws on nearly 100 interviews of former crewmen and official documents to present a complete history of the USS Arizona from its keel-laying in 1914 onward.
2012.313.158	Bedford Incident, The	Rascovich, Mark	The "Bedford Incident" tells the tale of the titular ship, a US Destroyer during an epic hunt for a Russian submarine. The Bedford has the firepower to sweep the red sub away like so much dust on the sea. But cold war politics and some substantial realities require that the Bedford do no more than track the sub. More than mere politics, the Bedford's obsessed captain knows that the Russian sub, running on diesel-electric engines, can endure no more than hours submerged before it must surface to recharge. With the Red Navy soon to become nuclear-powered, the Bedford knows that its latest find may be its last easy catch. "Easy" becomes illusory as the Bedford fights a war of nerves against the Russian crew while battling cruel northern seas and endless ice. Rascovich never shows us the Russian crew, only the tensions faced by the Americans, and the seams that are quickly becoming undone. From Amazon book jacket review.
2012.313.159	Hunt for Red October, The	Clancy, Tom	An advanced Soviet nuclear

Object ID	Title	Author	Summary
			submarine is heading for the U.S. coastline. Most government intelligence experts think it is planning to attack, except for one man. He believes the sub's commander is really planning to defect, but he has only a short time to find the sub and prove his theory. (From Worldcat)
2012.313.160	British & Empire Warships of the Second World War	Lenton, H. T.	In this book, the author has detailed all the warships of the British, Dominion and Colonial naval forces that participated in World War II. The background of each ship is given, with extensive tables for the individual units, specifying the name, builder, engine manufacturer, building dates and ultimate fate of each vessel where known. For each class of warship dimensions, displacements, armament and armour thicknesses are detailed. Has over 630 photographs.
2012.313.161	U.S. Cruisers : An Illustrated Design History	Friedman, Norman	This book traces the history of the cruiser from the first steel cruisers in 1883 to the cruises 100 years later.
2012.313.162	U.S. Small Combatants : Including PT-boats, Subchasers, and the Brown-water Navy : An Illustrated Design History	Friedman, Norman	This book describes in detail the PT-boats of World War II fame, the subchasers of both world wars and the postwar period, the coastal and riverine craft that fought the brown-water war in Vietnam, and modern hydrofoils, including the Pegasus (PHM) class. This book provides details of numerous noncommissioned U.S. combatants, including the Swifts, Plastics, ASPBs, Monitors, and CCBs of the Vietnam War. It also includes descriptions of a 1917 motor torpedo boat, the Shearer on-man torpedo boat, the PTT designs of 1959- and 1960, and the river transport designed for Vietnam.
2012.313.163	U.S. Naval Weapons : Every Gun, Missile, Mine, and Torpedo Used by the U.S. Navy from 1883 to the Present Day	Friedman, Norman	This encyclopedic works includes every significant weapon system employed by the US Navy from the birth of the 'New Navy' in 1883 to the present day (1982). For each gun, missile, mine or torpedo a detailed tabular specification is given, and these entries are

Object ID	Title	Author	Summary
			backed with an authoritative discussion of why the weapon was developed and how well it functioned in service.
2012.313.164	German Navy at War, 1935-1945, The, vol. 2 - U-Boat	Breyer, Siegfried	Translation of Deutsche Kriegsmarine, 1935-1945. In this volume, the authors report on the U-Boat, as well as on small battle groups (one-man torpedoes, explosive boats, midget submarines), the naval infantry and naval aviation. Volume 1 in the series is Battleships.
2012.313.165	Blue Water Beat : The Two Lives of the Battleship USS California	Gruner, George F.	This book is number 245 of a Special Limited Edition of 500 copies. This book commemorates the 75th anniversary of the commissioning of the USS California. A super-dreadnought, the California was saved twice by mud--once at her launching and once at Pearl Harbor. The author takes the reader aboard this modern ship-of-the-line to meet captains and enlisted men, admirals and sailors. He describes the pageantry of the great naval reviews, the fetes and celebrations, life aboard a battleship in peace time--trading with natives in foreign ports, the care and handling of "Yosemite Prunes," the ship's mascot) a bear, baking in the galley, firing the great guns, and going ashore on liberty
2012.313.166	German Warships, 1815-1945, vol. 1 : Major Surface Vessels	Groner, Erich	This is the English translation of the standard work on German naval vessels. This book provides data on the design, construction, dimensions, machinery and armament, and comments on the performance, seakeeping, and service history for around 10,000 ships and craft. Volume 1 is Major Surface Vessels (including armoured vessels, battleships, frigates and corvettes, battlecruisers, aircraft carriers, cruisers, light cruisers, gunboats, torpedo-boats, destroyers and fleet escorts; and Volume 2 is U-boats and Mine Warfare Vessels (including U-boats and U-boat cruisers,

2012.313.176	Selected Papers on British Warship Design in World War II : From the transactions of the Royal Institution of Naval Architects	Baker, R. (Rowland), 1908-	This a reprint of articles from the Transactions of the Royal Institution of naval Architects, 1947. These articles describe the wartime experience of British warship designers. These articles were first-hand accounts by the people directly responsible for the new ship-types and innovative designs produced in response to the pressures of war.
2012.313.177	British Battleships of World War One	Burt, R. A	This book presents the complete technical history of British capital ship design and construction during the dreadnought era, from 1905 to 1918. Seventy years ago at Jutland, Dogger Bank, Heligoland Bight and the First Battle of the Falklands, mighty squadrons of these great armoured ships fought their German counterparts for command of the sea.
2012.313.178	British Battleships, 1889-1904	Burt, R. A.	As a result of the National Defence Act of 1889 a vast programme of warship construction was begun. Over the next twenty years, a fleet of 52 battleships was built. All were armed with large, turret-mounted guns, steel armoured, and propelled by coal-fired steam engines. The book contains over 200 illustrations and 40 sets of large-scale line drawings.
2012.313.179	USS Indianapolis, CA-35	Wiper, Steve (ed)	This presents a complete history of the USS Indianapolis, CA-35. It includes full page authentic U.S. Navy photographs, completely rendered and scale illustrations, and the entire service history and general statistics.
2012.313.180	USS Minneapolis, CA-36	Wiper, Steve (ed)	This presents a complete history of the USS Minneapolis, CA-36. It includes full page authentic U.S. Navy photographs, completely rendered and scale illustrations, and the entire service history and general statistics.
2012.313.181	USS Louisville, CA-28	Wiper, Steve (ed)	This presents a complete history of the USS Louisville, CA-28. It includes full page authentic U.S. Navy

			photographs, completely rendered and scale illustrations, and the entire service history and general statistics.
2012.313.182	USS Texas, BB-35	Wiper, Steve (ed)	This presents a complete history of the USS Texas, BB-35. It includes full page authentic U.S. Navy photographs, completely rendered and scale illustrations, and the entire service history and general statistics.
2012.313.183	USS San Francisco, CA-38	Wiper, Steve (ed)	This presents a complete history of the USS San Francisco, CA-38. It includes full page authentic U.S. Navy photographs, completely rendered and scale illustrations, and the entire service history and general statistics.
2012.313.184	Omaha Class Cruisers	Wiper, Steve (ed)	This book was created as a warship resource guide; covering all ships in a single class with official US Navy photographs, highlighted history and statistical sheet for each vessel. The Omaha class cruisers are: USS Omaha, CL-4 USS Milwaukee, CL-5 USS Cincinnati, CL-6 USS Raleigh, CL-7 USS Detroit, CL-8 USS Richmond, CL-9 USS Concord, CL-10 USS Trenton, CL-11 USS Marblehead, CL-12 USS Memphis, CL-13
2012.313.185	New Orleans Class Cruisers	Wiper, Steve (ed)	This book was created as a warship resource guide; covering all ships in a single class with official US Navy photographs, highlighted history and statistical sheet for each vessel. The New Orleans class cruisers are: USS New Orleans, CA-32 USS Astoria, CA-34 USS Minneapolis, CA-36 USS Tuscaloosa, CA-37 USS San Francisco, CA-38 USS Quincy, CA-39 USS Vincennes, CA-44
2012.313.186	Lexington Class Carriers : CV-2 USS Lexington & CV-3 USS Saratoga	Wiper, Steve	This book was created as a warship resource guide; covering all ships in a single class with official US Navy photographs, highlighted history and statistical sheet

Object ID	Title	Author	Summary
			for each vessel. The Lexington class aircraft carriers are: USS Lexington, CV-2 USS Saratoga, CV-3
2012.313.187	Imperial Japanese Navy : Kongo class battleships	Wiper, Steve	The Kongo class battleships were the most widely employed capital ships of the Imperial Japanese Navy (IJN) during World War Two. This book covers all four ships of that class: Kongo, Hiei, Kirishima, and Haruna, with 15 profile, 5 plan view drawings and 112 photographs from their conception, to their final demise. Included are multiple drawings of four of the main aircraft types used on these ships, and a complete record of their movements during World War Two.
2012.313.188	USS Salem, CA-139	Wiper, Steve (ed)	This presents a complete history of the USS Salem, CA-139. It includes full page authentic U.S. Navy photographs, completely rendered and scale illustrations, and the entire service history and general statistics.
2012.313.189	Fleet Submarines of World War Two	Walkowiak, Thomas F	A description (with data) about submarines of World War II.
2012.313.190	Destroyer Escorts of World War Two	Walkowiak, Thomas F	A description (with data) about destroyer escorts of World War II.
2012.313.191	USS Kidd (DD661)	Sumrall, Robert F.	A description (with data) of the USS Kidd (DD-661).
2012.313.192	USS Missouri (BB 63) : Part 1, 1941-1984	Sumrall, Robert F.	A description (with data) of the USS Missouri (BB-63).
2012.313.193	USS Iowa (BB 61)	Sumrall, Robert F.	A description (with data) of the USS Iowa (BB-61).
2012.313.194	USS Bowfin (SS-287)	Sumrall, Robert F.	A description (with data) of the USS Bowfin (SS-287).
2012.313.195	Escort Carriers in Action	Adcock, Al	US Navy escort aircraft carriers. Includes: ; CURTISS BIPLANE; GRUMMAN TBF TORPEDO BOMBER; F4F FIGHTER; TBM AVENGER; F4U CORSAIR; SB2C HEKKDIVER; NORTH AMERICAN P-5B'; NAVAL AIRCRAFT FACTORY SON-3; P-38 LIGHTNING; P-47 THUNDERBOLTS; VGF-26; SBD DAUNTLESS; F2A BUFFALO; F6F HELLCAT; TBF/TBM AVENGER; VGF-29; OS2U; SOC; J2F;

Object ID	Title	Author	Summary
			R4D; SNB; JD; F-84; F-86; T-6; F-8-; PIASECKI HUP HELECOPTER;
2012.313.196	USS Lexington : In Detail & Scale	Kinzey, Bert	USS Lexington (CV/CVA/CVS/CVT/AVT-16) Essex-class aircraft carrier. Includes: F4F WILDCAT; F6F-3 HELLCAT; T-2B BUCKEYE; FJ-4 FURY; F4D SKYRAY; TA-4J SKYHAWK; VT-7; A-6E; EA-6A; T-2C; C-2 GREYHOUND; VA-172; A-7E; HC-16; H-3; C-1 COD; F7U CUTLASS; F3H-2N; A T-28; F9F COUGAR; C-11; TA-4J;
2012.313.197	USS Forrestal : In Detail & Scale	Kinzey, Bert	USS Forrestal - World's first super carrier Coverage of Carrier Air Wing Six
2012.313.198	USS Enterprise : In Detail & Scale	Kinzey, Bert	USS Enterprise (CVN-65) nuclear-powered aircraft carrier. Includes : A-4 SKYHAWK; F-14 TOMCAT; F,A-18 HORNET; A-7; A-6E TRAM; CVW-11; S-3A VIKING; E-2C HAWKEYE; SH-3H SEA KING;
2012.313.199	USS America : In Detail & Scale : CVA-66, CV-66	Kinzey, Bert	USS America (CVA/CV-66) Kitty Hawk-class supercarrier
2012.313.200	Pocket Battleship "Admiral Graf Spee"	Breyer, Siegfried	A pictorial history of the German battleship Admiral Graf Spee. "Translated from the German by Dr. Edward Force"--T.p. verso. "With Special Section 'Current Naval Information!'"--Cover. Also, includes : Charles de Gaulle, France's first nuclear aircraft carrier -- China, newest member of SSBN "club" -- New rocket destroyer for the U.S. Navy.
2012.313.201	German Battleship Scharnhorst, The	Breyer, Siegfried	The battleship Scharnhorst was a sister ship of the battleship Gneisenau and identically built in almost every detail. For that reason, the Scharnhorst will be described here more or less summarily and, in general, the Gneisenau volume will be referred to as the source of detailed information. "This title was originally published under the title, Schlachtschiff "Scharnhorst," by Podzun-Pallas Verlag

Object ID	Title	Author	Summary
			GmbH, Friedberg"--T.p. verso "With special section: Current naval information"--Cover Translated from the German by Edward Force.
2012.313.202	Battleship "Tirpitz"	Breyer, Siegfried	A history of the German battleship Tirpitz. Translated from the German by Edward Force. "With special section: Current naval information"-- Cover
2012.313.203	British Escort Ships	Lenton, H. T.	This book covers anti-submarine escort ships during World War II. The best-known escorts were the "flower" class corvettes, which were based on a whale- catcher design. The United States produced the destroyer escort (DE) to meet an Admiralty requirement, and a larger number of these were handed over in 1942 to meet the critical shortage. British and Canadian yards turned out a series of frigates to meet the same requirement, and these proved most successful of all. With the exception of some of the earlier sloops and ex-US patrol frigates, the book gives a complete listing of all the front-line escorts in service with the RN and RCN.
2012.313.204	Canada's Flowers : History of the Corvettes of Canada	Lynch, Thomas G.	The corvette was the largest escort class ever built, bar none, and by war's end had changed the Royal Canadian navy (RCN) of the time into a first-class naval force.
2012.313.205	HMS Ark Royal : The Ship and Her Men	Smith, David F.	The authors were Deputy Heads of the Air Engineering and Supply Departments. They joined the HMS Ark Royal in 1984 during the latter stages of building at Swan Hunters shipyard in Newcastle-upon- Tyne and served through the Operational Readiness Inspection in April 1986. This is a mostly pictorial history of that time.
2012.313.206	Warships of the Imperial Russian Navy, Vol. 1 : Battleships	Tomitch, V. M.	This book presents a complete and accurate description of all Russian warships after the advent of steam propulsion.
2012.313.207	Regia Marina : Italian Battleships of World War II : A Pictorial History	Bagnasco, Erminio	A pictorial history of the Italian battleships in World War II.

Object ID	Title	Author	Summary
2012.313.208	German Battleship Gneisenau, The	Breyer, Siegfried	A pictorial history of the German battleship Gneisenau. Its sister ship, the Scharnhorst, is almost identical.
2012.313.209	German U-boat Type XXI	Breyer, Siegfried	A history of the German U-boat type XXI which was developed at the end of World War II.
2012.313.210	Essex Class Carriers in Action	Smith, Michael C.	Squadron Signal publications has been producing modelers reference books for over 20 years. They have a pretty thorough line of books covering various classes of ships. This one is dedicated to the Essex Class Carriers of the second world war.. The book begins with a history of carrier development and covers the high points of Essex Class Carriers in the many roles they served in. Planes onboard: GRUMMAN F6F HELLCAT; CURTISS SB2C-3 HELLDIVER; GRUMMAN F3F WILDCAT; GRUMMAN TBF AVENGER; DOUGLAS SBD DAUNTLESS; VOUGHT F4U CORSAIR; The book is filled with photo's and drawings that will help the modeler add those finer details that help make your kit stand out. Most kits have instructions that are a little lacking and it is a benefit to the modeler to have a reference to call upon when detailing or painting your kit. My favorite feature of the "In Action" books are the great centerfolds, elevation and plan drawings of some of the ship in the class, nicely illustrated in color to give the modeler an idea of the camouflage patterns used. Check out the sample image on the right. Not only do the illustrations give the model and idea of the colors used, but also the weathering used. There are a number of illustrations of weapons, radar's and various fitting used on the carrier. The illustrations will be a big help in doing that final detailing need to spruce up your model. The illustrations also explain the difference between the long and short hull

Object ID	Title	Author	Summary
			carriers, and show accurate catapult placement in case you want to try to correct one of the flaws in the Hasegawa CV USS Ticonderoga. I especially appreciate the plan and elevation line drawings the show all the carrier classes in their relative sizes at the front of the book. There are also illustrations of the typical aircraft that they carried. From cover to cover you will find many useful illustrations and photo's of Essex Class carriers from their initial deployment to their late war appearances. My only complaint is the lack of 50's and 60's images of the Essex class conversions. At a relatively low cost this book represents a great value for anyone interested in building an Essex or Ticonderoga Class Carrier kit out there such as the Hasegawa CV USS Ticonderoga. (from modelwarships.com)
2012.313.211	Soviet Navy at War, 1941-1945	Budzbon, Przemyslaw	Following heavy losses during the withdrawals from the Baltic and the Black Seas, the Russians were unwilling to risk larger surviving units whose maintenance in besieged Leningrad or small Caucasian ports was therefore often neglected. The entire burden of the surface naval war was now borne by the 'mosquito' fleet: minesweepers, motor boats, patrol craft and 1,300 mercantile conversions--adapted trawlers, tugs and riverine vessels. These were used in all environments--open sea, lakes and rivers--and for all sorts of duties throughout the war, and they suffered heavy losses. Also includes information on the Soviet Union's two weeks' war with Japan. B&W photos on most pages. Many of the photos are from the Imperial War Museum in London.
2012.313.212	Battleship Scharnhorst : The Crew Photo Album	Shoker, Randall S.	A photo album of the German Battleship Scharnhorst. Signed by the author.

Object ID	Title	Author	Summary
2012.313.213	USS John F. Kennedy : In Detail & Scale	Kinzey, Bert	Includes coverage of Carrier Air Wing Three. From bow to stern, and from the top of the mast to the features below the waterline, all of the ship's details are covered with extensive photography. A record of the ship's history is also presented, and changes made during yard periods and overhauls are illustrated.
2012.313.214	Boston Naval Shipyard, 1800-1974, The	Norton, Bettina A.	The Boston Naval Shipyard in Charlestown, Massachusetts was originally called the Charlestown Navy Yard. Its history began around 1813 when a wharf and ship house were built, and the sloop, the U.S. Frolic, was launched. The yard has subsequently sent to war another several hundred vessels from wooden sloops of war and ships of the line to 2,100-ton Fletcher class destroyers. This booklet was reprinted from the Proceedings of the Bostonian Society, Annual Meeting, 1974. The cover includes the phrase "A Bostonian Society Picture Book."
2012.313.215	U.S.S. Wisconsin : A History of Two Battleships, The	Zeitlin, Richard H.	A history of the two battleships named the USS Wisconsin: BB-9 and BB-64. The keel of the first Wisconsin, BB-9, was laid down on the eve of the Spanish-American War, and she sailed with the Great White fleet on its famous world voyage of 1907-1909. The fast battleship Wisconsin, BB-64, was launched on December 7, 1943. She served in the Pacific to the end of World War II and again in the Korean War; in 1988 she was refitted and recommissioned for yet another tour. Includes an essay on the ships' silver by Anne Woodhouse.
2012.313.216	U.S.S. Abraham Lincoln	Smith, Barry D.	This is a photographic history of the USS Abraham Lincoln, CVN-72.
2012.313.217	U.S.S. Houston : The Last Flagship of the Asiatic Fleet	Holbrook, Heber A.	The Houston was the first United States Cruiser to be sunk in World War II. A "Treaty Class" heavy cruiser that carried only light armor plating to protect her turrets and vitals, she was lost in a violent

Object ID	Title	Author	Summary
			surface battle against superiorly protected and armed Japanese cruisers and destroyers during the Japanese invasion of the Dutch East Indies. In numbers, Houston's combat deaths was only exceeded by the Arizona at Pearl Harbor.
2012.313.218	Fast Attack Craft	Watts, Anthony J.	This book charts the development of fast attack craft in detailed photographs.
2012.313.219	United States Navy Camouflage of the WW2 Era, part 1	Sowinski, Larry	This is a 1988 reprint of 2016.367.039. Almost all the material in this book is based on official USN documents and photographs. The intention is to make readers aware of the camouflage guidelines as they were set down. Each chapter covers that period of time when a significant instruction was released to the fleet. "Drawings by T. Walkowiak ; design and layout by L. Sowinski"--Page [2] of cover.
2012.313.220	United States Navy Camouflage of the WW2 Era, part 2 : Fleet Carriers	Sowinski, Larry	This books is a 1995 reprint of 2005.309.064 but with different pictures. This book covers only camouflage of fleet and light fleet carriers during World War II era. "Drawings by T. Walkowiak ; design and layout by L. Sowinski (1977)"--Page [2] of cover.
2012.313.221	Battleship Country : The Battle Fleet at San Pedro-Long Beach, California, 1919-1940	Beigel, Harvey M.	This is an account of the Pacific Fleet when it was home ported in San Pedro Bay in Southern California. The ships included the aircraft carriers Saratoga and Lexington. The fleet arrived in Pearl Harbor in May of 1940 for annual maneuvers. President Roosevelt ordered the fleet to remain at Pearl Harbor as a deterrent to the Japanese.
2012.313.222	U.S.S. Juneau CL(AA) 52	Dickson, Rod	This is a history of the Juneau, the second of the Atlanta class anti-aircraft light cruisers (CLAA). She was commissioned in February of 1942 and was sunk by the Japanese at the Naval Battle of Guadalcanal in November 1942. In total 687 men, including the five Sullivan brothers, were killed in action as a result of its sinking.

Object ID	Title	Author	Summary
2012.313.223	U.S.S. Cassin Young (DD-793) : A Fletcher Class Destroyer	Harmon, J. Scott	A history of the USS Cassin Young DD-793, a Fletcher class destroyer named for Commander (later Captain) Cassin Young who was awarded a Medal of Honor for his actions at Pearl Harbor. He was killed at the Naval Battle of Guadalcanal. The ship was commissioned in 1943 and served through 1960. She is now a Memorial Ship at the Boston Navy Yard.
2012.313.224	Mountaineer Battlewagon : U.S.S. West Virginia (BB-48)	Smith, Myron J.	This is a history of the USS West Virginia BB-48, a Colorado class battleship. She was commissioned in 1923 and served through World War II in battles in the Pacific . She was decommissioned in 1947. Her nicknames were the "Wee Vee" and the "Mountaineer Battlewagon."
2012.313.225	HMS Cossack / Tribal Class Destroyer	Lyon, David	The sixth of seven British ships named Cossack at time of publication, the subject was a Tribal Class Destroyer. Addresses inter-war destroyer development, Tribal class design, Cossack's Construction and trials, and operational career. Combat in World War II included being among the ships in the pursuit and sinking of the Bismark.
2012.313.226	HMS Campbeltown (USS Buchanan/Flush Decker Destroyer ('4-stacker') 1918- 1942	Wingate, John	Account of the ship that blew up the lock gates at St. Nazaire on 28 March 1942. Built at Bath, Maine and commissioned as USS Buchanan at the end of World War I, the ship saw sporadic active service with the U.S. Navy until handed over to the British at the beginning of World War II when it was renamed HMS Campbeltown. After further service with British and Dutch navies the ship was outfitted by the British for and became the primary vessel in the famous naval raid on the locks at St. Nazaire. Contains a detailed account of the naval portion of the raid and an eyewitness account of the aftermath.
2012.313.227	USS Charles Ausburne/Fletcher Class Destroyer 1942-1967	Cracknell, William H.	Provides a brief history of the first Charles Ausburne (DD-294) and follows the exploits of the second ship of the name

Object ID	Title	Author	Summary
			(DD-570), the last Fletcher Class destroyer authorized, through World War II. The ship became the flagship of 31-knot Arleigh Burke and a member of DESRON 23, the only destroyer squadron in WW II to receive a Presidential Unit Citation. Built in 1942, the ship was inactivated in 1946, given to the German navy 13 years later and decommissioned from the German Navy in 1960. Details of key battles in the Solomons. The Slot.
2012.313.228	HMS Exeter/Heavy Cruiser 1929-1941	Tonks, Randall A. R.	Fifth ship employed by the British navy to bear the name Exeter. Commissioned 21 July 1931 and sunk in the aftermath of the Battle of the Java Sea 11 March, 1942. Badly damaged in the Battle of the River Platte by the Graf Spee 13 December 1939.
2012.313.229	SMS SEYDLITZ/Grosser Kreuzer 1913-1919	Ruge, Friedrich	German heavy cruiser of World War I. Participated in numerous engagements including the Battle of Jutland and the Battle of Dogger Bank. The ship was scuttled by its crew while interned at Scapa Flow in 1919.
2012.313.230	British Fleet & Escort Destroyers, vol. 1	Lenton, H. T.	These volumes give a complete description of all fleet and escort destroyers which served in the British and Dominion navies between 1939-1945, including those that were cancelled or only projected, together with the fifty old destroyers loaned from the United States Navy in 1940.
2012.313.231	British Fleet & Escort Destroyers, vol. 2	Lenton, H. T.	These volumes give a complete description of all fleet and escort destroyers which served in the British and Dominion navies between 1939-1945, including those that were cancelled or only projected, together with the fifty old destroyers loaned from the United States Navy in 1940.
2012.313.232	American Fleet and Escort Destroyers, vol. 1	Lenton, H. T.	These volumes give a complete description of all fleet and escort destroyers which served in the United States Navy between 1941-1945, including those that were cancelled or only projected.

Object ID	Title	Author	Summary
2012.313.233	American Fleet and Escort Destroyers, vol. 2	Lenton, H. T.	These volumes give a complete description of all fleet and escort destroyers which served in the United States Navy between 1941-1945, including those that were cancelled or only projected.
2012.313.234	Soviet Navy, The, vol. 1	Meister, Jurg	These volumes are the result of many years of painstaking research based on captured German documents, official Soviet sources and other material and represent the first detailed account of the composition and losses of the Soviet navy during the war years. All names and technical details of Soviet warships have been rechecked and verified as far as possible, and are the most accurate ever published.
2012.313.235	Soviet Navy, The, vol. 2	Meister, Jurg	These volumes are the result of many years of painstaking research based on captured German documents, official Soviet sources and other material and represent the first detailed account of the composition and losses of the Soviet navy during the war years. All names and technical details of Soviet warships have been rechecked and verified as far as possible, and are the most accurate ever published.
2012.313.236	German Surface Vessels, vol. 1	Lenton, H. T.	Listed in this volume are the regular warships of the German Navy, both those completed and those whose construction was subsequently abandoned or projected.
2012.313.237	German Surface Vessels, vol. 2	Lenton, H. T.	Listed in this volume are some of the auxiliary units of the German Navy--only a selection has been made amongst the more interesting conversions, and from those naval vessels which were captured by the Germany Navy put to use.
2012.313.238	American Battleships, Carriers, and Cruisers	Lenton, H. T.	This book describes all the classes of battleships, carriers and cruisers which were in service with the American navy during the war years. Details are given of displacement, dimensions, protection, armament and complement, and there is an individual entry on each vessel, including those

Object ID	Title	Author	Summary
			laid down during the war but not completed until afterwards. Cancelled battleships and battlecruisers of the First World War are included, to show the evolution of these categories, and all cancelled contracts relating to the Second World War are also given.
2012.313.239	German Submarines, vol. 2	Lenton, H. T.	This second volume on German submarines, covers the designs studied after the outbreak of the war, of which relatively few were even put into production. While volume I dealt with conventional submarines, those described in this book are very different, and the scale drawings of the internal arrangements are particularly interesting for the uncompleted projects.
2012.313.240	USS Enterprise (CVAN-65) Nuclear Attack Carrier	Cracknell, William H.	A history of the USS Enterprise from its forbears and development through its first ten years of service.
2012.313.241	Rn Zara/Heavy Cruiser 1929-1941	Fraccaroli, Aldo	A history of the Italian cruiser Zara from the Italian naval strategy at the time of her design, through buidling and operational service. Zara was sunk by the British Mediterranean Fleet in the Battle of Matapan on 28 March 1941.
2012.313.242	HMS Hood/Battle-Cruiser 1916-1941	Fraccaroli, Aldo	A history of the HMS Hood, concentrating on the last 10 years of service. Her construction and early years were to be addressed in a later edition. In 1939 she was scheduled for an extensive rebuild which would have included additional deck armor plating. Due to the imminence of hostilities, however, Hood was accorded only a minor refit. Covers patrol and escort operations early in WW II, the destruction of the French fleet in Oran, and the final encounter with the Bismark.
2012.313.243	HMS Hesperus/ex-Brazilian "H"- class destroyer	Dickens, Peter	One of six Brazilian destroyers being built in England at the outbreak of World War II and requisitioned for the British navy. The original name of the Hesperus was Juruena, changed to Heary and then changed to

Object ID	Title	Author	Summary
			Hespersus shortly thereafter. Built for anti-surface warfare the ships of the "H" class were re-equipped for ASW (ASDIC, Depth Charge, Hedgehog) and sent to battle the German U-boats preying on Atlantic convoys. Her operations, convoys and kills are chronicled.
2012.313.244	IJN Yukikaze/Destroyer/1939-1970	Chihaya, Masataka	Covers the destroyer building program in Japan from the early 1900's up through 1938 when Yukikaze was constructed as the eighth member of the Kagero-class. Yukikaze participated in landing operations in the Philippines, the battle of the Java Sea, Battle of Midway, Guadalcanal and the Solomons, Kuala Gulf, the Marianas and the Carolines, Sumar and Leyte, and the last raid intended to confront the U.S. landings at Okinawa during which the battleship Yamato was sunk. Yukikaze was the lone survivor of 18 Kagero and 20 Yuguma-class destroyers at war's end.
2012.313.245	HMS Furious/Aircraft Carrier 1917-1948	Jenkins, C. A.	First in a two-part series takes the Furious from a design idea as a battle cruiser with two 18-inch guns to a fast seaplane tender to which she was changed late in her construction, perhaps the only aircraft carrier ever to sport an 18-inch gun. By 1918 her lone 18-inch mount aft was removed and replaced with a landing-on deck, retaining a superstructure and funnel amidships. In 1925 and upon completion of her reconstruction she was a flush-decked carrier. Covers trials and operations in World War I, and the initial post-war years up through 1925.
2012.313.246	HMS Furious/Aircraft Carrier 1917-1948, Part II : 1925-1948	Jenkins, C. A.	2nd of two-part series. Takes the ship from completion of her conversion to a flush decked carrier through the long peace and then through her many operations in World War II.
2012.313.247	USS Indianapolis (CA-35), Heavy Cruiser 1932-1945	Cracknell, William H.	Story of the cruiser Indianapolis, commissioned in 1932, major participant in the Pacific in WW II; carried the atomic bombs from the U.S.

Object ID	Title	Author	Summary
			to Tinian; sunk two weeks before war's end in the greatest U.S. single-ship tragedy ever.
2012.313.248	HMS Cavalier and the 'CA' class destroyers	Preston, Antony	One of the British destroyers built during World War II, but the longest serving - paying off in 1972. Treated as a class. Discusses design, nomenclature, armament, propulsion, etc.
2012.313.249	Abdiel-Class Fast Minelayers	Burton, Tom	Based on lessons learned in World War I Britain ordered Abdiel and her three sister ships, Latona, Manxman and Welshman in 1938-39. They were delivered in 1941 and two more, Adriane and Apollo were completed in late 1943 and early 1944, respectively. Built as fast minelayers their speed and storage capacity made them ideal for other tasks in which they frequently became involved, such as troop and armament transport.
2012.313.250	U.S.S. COD, WWII Submarine Memorial, Photo Museum Guide	Shoker, Randall S.	Photographic guide to the USS Cod (SS-224) submarine memorial and museum in Cleveland, OH. Cod was commissioned in June, 1943 and conducted 7 wartime patrols in the Pacific in WW II. She was opened as a memorial in 1976.
2012.313.251	U534 Story, The	None Stated	The story of the sinking, refloating and turning the German U-boat 534 into a museum near Mersey, UK where it was managed by the Warship Preservation Trust. Additional info: The Warship Preservation Trust was based in Birkenhead, Wirral, England and hosted Europe's largest collection of preserved warships including the German U-Boat U-534. On 5 February 2006 the museum closed due to being required to relocate and subsequently went into voluntary liquidation. By default, ownership of the collection transferred to the Mersey Docks and Harbour Company (MDHC) following the demise of the Trust. On 27 June 2007, the Merseytravel transit authority announced that it had acquired U-534 to display at the Woodside Ferry

Object ID	Title	Author	Summary
			Terminal. For technical reasons and to facilitate economical transportation to its new site, the vessel was cut into four sections. It will be displayed in this form to allow visitors better access and visibility. (Source - Wikipedia)
2012.313.252	HMS Plymouth & Onyx	None Stated	HMS Plymouth and HMS Onyx were both veterans of the Falklands War and saved from the scrap heap some time later by being obtained for by a museum near Mersey, UK where they were managed by the Warship Preservation Trust. Additional info: The Warship Preservation Trust was based in Birkenhead, Wirral, England and hosted Europe's largest collection of preserved warships including Plymouth and Onyx. On 5 February 2006 the museum closed due to being required to relocate and subsequently went into voluntary liquidation. By default, ownership of the collection transferred to the Mersey Docks and Harbour Company (MDHC) following the demise of the Trust. The HMS Plymouth Preservation Trust undertook to raise the £250,000 needed to bring the warship back to her home city. It had been hoped that the frigate could be berthed at Millbay Docks, but the offer of a berth was withdrawn in January 2007 by Associated British Ports. In May 2006 HMS Onyx was sold to the Barrow-in-Furness businessman Joe Mullen, for a reported £100,000 as a 'gift to the people of Barrow'. It left Birkenhead on 13 June 2006 to form the centrepiece of a new heritage museum in Cumbria. (Source - Wikipedia)
2012.313.253	History and Times of the U.S.S. Portland, The	Holbrook, Heber A.	The USS Portland (CA-33) was nicknamed "Sweetpea." Sweetpea's story tells of the birth of a warship, her delivery and how a name is picked. her history is also the story of the workings of the peace-time Navy in the years of the 1930s. Portland's history is also the history of much of World

Object ID	Title	Author	Summary
			War II in the Pacific, for she was in almost every major naval engagement fought against the Japanese. She sank two enemy destroyers, assisted in the sinking of three battleships and a heavy cruiser, and shot down more than a dozen airplanes. Quite likely she also sank a Japanese midget submarine. She was seriously damaged by a torpedo in the Battle of Guadalcanal, but she survived, and survived the war. Signed by the author.
2012.313.254	History of the U.S.S. San Francisco in World War II	Holbrook, Heber A.	In World War Two, the heavy cruiser USS San Francisco earned 17 battle stars, making her one of the most decorated warships in United States history. During the struggle for Guadalcanal in October and November of 1942, the San Francisco was the flagship of the admiral in command of the American warships. In one of these battles, four of the San Francisco's sailors were awarded the Medal of Honor--a figure unequalled in the history of US wars. She took part in the Battle of Cape Esperance and the Battle of Guadalcanal.
2012.313.255	Submerged Cultural Resources Study : USS Arizona Memorial and Pearl Harbor National Historic Landmark	Lenihan, Daniel J. (ed)	The combined experience of the National Park Service's Submerged Cultural Resources Unit and the Navy's Mobile Diving and Salvage Unit One joined together to investigate the USS Arizona and associated sites in Pearl harbor. "Publication was made possible through a donation from Arizona Memorial Museum Association"--Half t.p. Shipping list no.: 89-825-P. Item 646-N-5.
2012.313.256	World's Warships, The	Blackman, Raymond V. B.	First edition of the World's Warships by Raymond Blackman. This is a concise and authoritative survey of the modern fighting ships of the world's navies. The ships are arranged by class--battleships, aircraft carriers, cruisers, etc. for easy reference, and illustrated with over one

Object ID	Title	Author	Summary
			hundred carefully chosen photographs. The maximum information is given, including details of tonnage, armaments (security permitting), specifications; and in the case of smaller craft, a list of sister ships to which the same data applies.
2012.313.257	Ships of the World's Battlefleets	Talbot-Booth, E. C. (Eric Charles)	This covers the ships of Great Britain, France, Germany, Italy, Japan and the United States.
2012.313.258	Aircraft of the Royal Navy	Ellis, Paul	This book tells the story of the RN's pioneering association with aircraft, from the Short Tandem of 1911 to the Sea Harrier, V/Stol strike fighter of the 1980s. The author has chosen the pictures in this book to show the Royal Navy's aircraft at their best, in soaring flight or coming safely aboard. But to complete the story he occasionally presents on of the embarrassing moments, all bent propellers and collapsed undercarriage, that have inevitably attended naval aviation over the years. This fine gallery of photographs is counterpointed by concise histories and basic details of the aircraft that have been the eyes and strong right arm of Britain's navy for over 70 years.
2012.313.259	HMS Hermes : A Pictorial History	Dyson, Tony	HMS Hermes was the Flagship of the Fleet during the Falkland Conflict. This is a pictorial history of the Hermes whose nickname was "Happy Hermes."
2012.313.260	Guide to the Soviet Navy - 1983	Polmar, Norman	This reference work provides accurate, up-to-date data on ship and aircraft specifications, performance, weapons and electronics, and analysis of current changes and trends in Soviet naval strategy, leadership, operations, and training.
2012.313.261	Guide to the Soviet Navy - 1986	Polmar, Norman	This reference work provides accurate, up-to-date data on ship and aircraft specifications, performance, weapons and electronics, and analysis of current changes and trends in Soviet naval strategy, leadership, operations, and training. Considering the

Object ID	Title	Author	Summary
			drastic changes in the Soviet naval forces in the midst of perestroika, this fifth edition is the most comprehensive review and analysis available of the modern Soviet fleet - its ships, aircraft, weapons, electronics, bases, shipyards, personnel, and leadership - and provides coverage of the fleet reductions made since 1988. It contains technical data on every combat and support ship of the Soviets including specialized merchant ships that support military activities. Award-winning author and military analyst, Norman Polmar, discusses the navy's force reductions in detail and shows that although the Soviet Navy has diminished in size, its capabilities in virtually all combat areas - antisurface, antisubmarine and antiair warfare, plus theatre tactical nuclear weapons, chemical operations, mine warfare, and intelligence collection - have actually been improved. Essays on the Soviet Navy's missions, tactics operations, exercises, training, and fleet development explore the true impact of fleet reductions and policy adjustments not only on Soviet naval forces, but also on Warsaw Pact co-ordination. Among the subjects covered are the impact of the disappearance by 1989 of the remaining Sverdlovclass cruisers and the scrapping of 30 submarines. Descriptions of the two new 65,000-ton Thilisi-class aircraft carriers and the Ul'yanovsk, a 75,000-ton full-deck carrier, are provided, as are the improvements in Soviet submarines, reported to have "closed the gap" between Soviet and US undersea capabilities. Appendices include the Soviet navy's order of battle since 1945, naval leaders, and naval ship transfers to nations throughout the world. The author has also written "Submarines of the Russian and Soviet Navies" and "The Ships and Aircrafts of the US Fleet". (from Amazon.com for 1991

			edition)
2012.313.262	Modern Royal Navy Warships	Beaver, Paul	Identifies and describes every major warship in current service; details pennant numbers, flight deck codes, dimensions, weapon systems and performance; each class of vessel illustrated with first-class photographs and specially drawn scale plans; reveals particular incidents of interest in each ship's career, including action in the South Atlantic.
2012.313.263	Fifty Years of Naval Tugs	Hannan, Bill	A history of British tugboats from about 1935 to 1985.
2012.313.264	Battleship Oregon : Bulldog of the Navy : An Oregon Documentary	Webber, Bert	The USS Oregon, BB-3 is the only American battleship to serve in three wars: the Spanish-American War, the first World War and World War II. This book is a history of the ship.
2012.313.265	Riverine Operations, 1966-1969	Fulton, William B.	This is an account of the US Army's Riverine operations in Vietnam, 1966-1969. There are several references to the Navy and Marines--see the index for specific pages. Published by the Department of the Army. CMH 90-18.
2012.313.266	Royal Navy in Focus - 1930-39, The	Critchley, Mike (ed)	These photos of the Royal Navy come from the archives of Wright and Logan.
2012.313.267	Royal Navy in Focus - 1940-49, The	Critchley, Mike (ed)	These photos of the Royal Navy come from the archives of Wright and Logan.
2012.313.268	Royal Navy in Focus - 1950-59, The	Critchley, Mike (ed)	These photos of the Royal Navy come from the archives of Wright and Logan.
2012.313.269	Royal Navy in Focus - 1960-69, The	Critchley, Mike (ed)	These photos of the Royal Navy come from the archives of Wright and Logan.
2012.313.270	Royal Navy in Focus - 1970-79, The	Warlow, Ben (ed)	These photos of the Royal Navy were taken mostly by RN photographers.
2012.313.271	Royal Navy in Focus in World War II	Warlow, Ben (ed)	These photos of the Royal Navy are from the collection of Sydney Goodman. The captions are by Ben Warlow.
2012.313.272	Fleet Air Arm in Focus, The - Pt. 1	Hobbs, D. A.	This is an attempt to capture something of the spirit of the Fleet Air Arm through a collection of photographs put together over a number of years.

Object ID	Title	Author	Summary
2012.313.273	Fleet Air Arm in Focus, The - Pt. 2	Hobbs, David	This is an attempt to capture something of the spirit of the Fleet Air Arm through a collection of photographs put together over a number of years.
2012.313.274	Channel Sweep : Photographs from the 1950s & 60s Skyfotos Collection	Warlow, Ben (ed)	These photos ships of the Royal Navy were taken from the Skyfotos collection.
2012.313.275	USS Hornet CV-12, CVA-12, CVS12	Self, Chuck	A short history of the USS Hornet CV-12 and a short description of the Hornet Museum in Alameda. Pictures include aircraft carried on the Hornet and pictures of the inside of the ship.
2012.313.276	U.S. Coast Guard Cutters and Craft, 1946-1990	Scheina, Robert L.	A companion volume to the author's popular survey of World War II Coast Guard cutters and craft, this book continues the story with a comprehensive summary of the Coast Guard in the postwar era. This book provides brief histories of the cutters and craft in service from 1946 to the present. Typical entries include information on home ports, major rescues, special patrols, and service during the Korean and Vietnam wars. Construction information is also given, with names and locations of the builders, dates for keel laying, launchings, commissionings, and decommissionings. Nearly 200 photographs support the text.
2012.313.277	U.S. Coast Guard and Revenue Cutters, 1790-1935	Canney, Donald L., 1947-	From 250-foot Lake-class cruising cutters to 36-foot picket boats, more than 1,000 vessels are included in this the first complete and systematic listing of U.S. Revenue Service and Coast Guard vessels through 1935/ Each entry gives dimensions, rig, propulsion, complement, service dates, and a brief service history.
2012.313.278	Leander Class	Meyer, C. J. (Christopher J.)	Included are details of the origins, construction and operations; all the Leander weapons systems -- Seacat, Ikara, Exocet, Sea Wolf and more -- and helicopters -- Wasp and Lynx. There are sections on non-British and exported Leanders, Replenishment at Sea and the Batch

Object ID	Title	Author	Summary
			modernisations. Over 150 photographs and line drawings supplement the text and illustrate the many aspects of
2012.313.279	Invincible Class	Beaver, Paul	The HMS Invincible was part of the Falklands Task Force and played a major role as the fighter control ship. Its Sea Kings and Sea Harriers, together with those of the flagship, HMS Hermes, kept the Argentine strike aircraft at bay and eventually won air superiority over the disputed islands. Also included in this class are HMS Illustrious and HMS Ark Royal.
2012.313.280	Type 42	Marriott, Leo	This book covers a class of destroyer that has seen extensive worldwide service, with the RN and the Argentine Navy. Included are details of design, construction, weapons, machinery, sensors and histories of the ships, including a consideration of the influence of the argentine units on the Falklands War. There are plans, drawings, and over 120 photographs. Two Type 42 destroyers were sunk Sheffield and Coventry in the Falklands War.
2012.313.281	Type 22	Marriott, Leo	The Type 22s are the largest frigates ever built for the Royal Navy, and the Batch III version is almost the same size as the 'County' class destroyers or a World War 2 light cruiser. They have proved to be exceptional anti-submarine warfare vessels. This type will be remembered for its part in introducing the Sea Wolf surface-to-air missile into service, and the valuable work performed by Broadsword and Brilliant during the Falklands War. The three Batches present interesting studies in warship design, with Batch II ships featuring a lengthened hull and the Batch III units swapping Exocets for Harpoon missiles and mounting a 4.5in gun in addition.
2012.313.282	Type 21	Lippiett, John	The Type 21 Frigate broke new ground in warship design when it entered service in the early 1970s. Its novel propulsion system of four gas turbines

Object ID	Title	Author	Summary
			produced a speed and dash which, together with its fine appearance, rapidly engendered a spirit in the class that gave renewed ever subce, /tge sguos gave served ub nabt rikes wirkdwudem abd ub 1982 seven out of the eight members of the class served with distinction in the /falklands conflict. HMS Ardent and HMS Antelope were sunk by enemy bombs. In this book the author, John Lippiett, traces the background and development of the class, and includes details of the weapons, sensors and machinery. The 150 photographs with diagrams, line drawings, tables and annexes provide an excellent record of a notable class of warship.
2012.313.283	USS New Jersey : The Navy's Big Guns : From Mothballs to Vietnam	Leifer, Neil	The USS New Jersey is one of the Iowa class battleships, the largest to ever fly the American flag, from World War II to Vietnam and into the Persian Gulf fracas. The book chronicles the dreadnought's size, spectacle and a great moment in her history: her voyage from out of mothballs to her brief, but remarkable, tour of duty in the Vietnam War.
2012.313.284	Kiev & Kuznetsov : Russian Aircraft Carriers	Dean, Barry	The Kiev class aircraft carriers, or AVIONESUSCHIY KREYSER (Aviation cruiser) were the first Soviet full flight deck carriers to be built. There are four ships in this class. Effective January 1991, the improved Kiev, the Baku, was renamed the Admiral Gorshkov. The Kiev class includes the Kiev, the Minsk, the Novorossiysk, and the Admiral Gorshkov (ex-Baku). The Kuznetsov class includes the Admiral Kuznetsov (originally named Leonid Brezhnev, then the Tbilisi, and finally commissioned the Admiral Kuznetsov). Other carriers in this class are the Varyag and the Ulyanovsk but as of this publication, they have not been completed.
2012.313.285	Royal Navy Destroyers Since 1945	Marriott, Leo	Provides a history of the destroyer and traces the evolution of same from 1945

Object ID	Title	Author	Summary
			onward. At the time of writing Great Britain had only 13 destroyers remaining and none scheduled for construction.
2012.313.286	Grey Wolves of the Sea : German U-boat, Type VII	Nowarra, Heinz J.	This is a history of German u-boat type VII of which 693 were built. Translated from the German by Edward Force Originally published under the title: Graue Wölfe auf allen Meeren-U-VII. Friedberg: Podzun-Pallas Verlag Bibliog: Includes bibliographical references (t.p. verso)
2012.313.287	Rise of the Ironclads	Amadon, George F. (George Frazee)	The book discusses the design, conversion, and manufacture, design problems and operating features of the warships USS Monitor and USS Merrimack (later captured by the Confederates and renamed the CSS Virginia).
2012.313.288	USS Los Angeles (CA-135) : Cold War Sentinel	Beigel, Harvey M.	This is a history of the heavy cruiser USS Los Angeles (CA-135), the first naval surface--combatant designated by that name. Described as "The Pacific Fleet's Glamour Girl" by the local press, the cruiser had gained notoriety as the focus of a Los Angeles county-wide war bond drive during World War II. The Los Angeles served for 18 years.
2012.313.289	U.S. Battleships in Action, Part 2	Stern, Robert Cecil	(Those designed before the Washington Treaty of 1922. Ships that bore the brunt of the Japanese attack at Pearl Harbor. Rebuilt, they fought back to final victory in 1945. 98 photos, 23 line dwgs & 9 full-color paintings. 50 pgs.
2012.313.290	U.S. Ballistic Missile Subs in Action	Adcock, Al	This is a history of ballistic missile submarines. It includes data on the George Washington Class, the Ethan Allen Class, the Lafayette Class, the James Madison Class, the Benjamin Franklin Class, and the Ohio Class.
2012.313.291	On Deck, USS Alabama	Adcock, Al	The Alabama was authorized by Congress in 1939 and laid down on 1 February 1940. She was commissioned on 16 August 1942, and after her shakedown cruise joined the US Atlantic Fleet and Task Force 22 which was formed around the USS

Object ID	Title	Author	Summary
			Ranger (CV-4) escorting convoys. In 1943 the Alabama and her sister ship the USS South Dakota sailed through the Panama Canal and joined the Pacific Fleet. During her two years in the Pacific, the Alabama fought from the Gilbert Islands in the central Pacific to Tokyo Bay, Japan. Today the Alabama is a memorial ship located at Battleship Park on Mobile Bay, Mobile, Alabama. the display also includes a Vought-Sikorsky OS2U Kingfisher scout-observation aircraft--carried by the battleship from 1942-1945--as well as many other historic aircraft.
2012.313.292	PT Boats in Action	Connelly, T. Garth	American PT (Patrol Torpedo) boats served in every theater of operations, from 7 December 1941 to August of 1945. They served the United States Navy, the British Royal Navy and the Russian Navy. One was even captured by the German Kriegsmarine and used operationally for a short period. It is claimed that a PT boat (PT-23) shot down the first Japanese aircraft of the war. It was a PT boat (PT-41) that took Gen Douglas MacArthur out of Corregidor and it was PT boat (PT-373) that took him back to the Philippines in 1944. This book will cover the development of each of the classes that saw combat in the Second World War, and how they evolved from a Scott-Paine design brought back from England by the Chairman of Elco during 1939. PT boats served as fast torpedo attack boats at night, gunboats attacking enemy landing barges, and some of the newer boats coming from the factories sporting crude five inch rocket launchers, gave the boats the punch of a Destroyer.
2012.313.293	USS Arizona (BB-39) : A Photographic History	Friedman, Norman	This is a pictorial history of the battleship, USS Arizona BB-39, which was sunk at Pearl Harbor, 7 December 1941--with the greatest loss of life ever incurred in any one disaster in US Naval history.

Object ID	Title	Author	Summary
2012.313.294	Volunteer State Battlewagon : USS Tennessee (BB-43)	Smith, Myron J.	This is a history of the battleship, USS Tennessee (BB-43). She was nicknamed "Big T", "Tenny", "Tenny Maru", "The Rebel", and "The Rebel Ship." She may also have been called the Volunteer Battlewagon. She was the pride of American when commissioned in 1920, and originally and uniquely manned largely by home-state boys. She was slightly hurt at Pearl Harbor, 7 December 1941, but was repaired and went in to the Pacific War.
2012.313.295	Free State Battlewagon U.S.S. Maryland (BB-46)	Smith, Myron J.	The battleship, USS Maryland (BB-46), was the third largest, and most famous ship to carry that name--and the last. She was nicknamed "Old Mary", "Fighting Mary", and might also have been called "Old Line" and "Free State Battlewagon." She was the world's most powerful dreadnought when commissioned in 1921, and the least damaged of all the battleships at Pearl Harbor, 7 December 1941. This ship was under attack over 100 times with the Japanese reporting her sunk on three different occasions.
2012.313.296	USS Ward : The First Shot	Lott, Arnold S.	The USS Ward (DD-139), one of more than two hundred flushdeck "four pipers" turned out during the frantic ship-building program of 1917-1920. Her active service was short; a couple of years just after World War I ended, and two more years after World War II began. Her combat record began on 7 December 1941, when she fired the first shots of World War II, and ended on 7 December 1944 when she sank under enemy air attack. Between those dates, she spent time on routine patrol, sub-hunting, and amphibious landing operations from the Solomons Islands through new Guinea and to the Philippines. The Ward was redesignated Armed Personnel Transport, APD-16, February 1943.
2012.313.297	Haida : The Story of the Famous Tribal Class	Sclater, William	This is the story of the hard fighting Tribal Class

Object ID	Title	Author	Summary
	Destroyer of the Royal		Destroyers of the Royal Canadian Navy on the Murmansk Convoy, the English Channel and the Bay of Biscay.
2012.313.298	Navy for Virginia, A : A Colony's Fleet in the Revolution	Cross, Charles B.	A booklet about Virginia's colonial fleet during the Revolutionary War.
2012.313.299	Buckley-class Destroyer Escorts, The	Franklin, Bruce Hampton	This book presents the first complete photographic record of all 154 Buckley-class ships, including the only known photographs of several of these ships. Selections of the original line drawings of the class are also reproduced, providing valuable details of the ship's arrangements as designed. The text describes the development of the class, armament, major conversion programs, differences between the American and British ships, and the operational history of Buckleys in the U.S. and Royal navies. Throughout the book, recollections and contemporary observations from the men who served aboard these ships are used to provide a personal touch to the history of these "Little Wolves."
2012.313.300	Royal Navy Frigates Since 1945	Marriott, Leo	This book discusses the frigates in development during World War II, and those developed after the war. The book includes information on the following classes: Black Swan Castle Loch Bay Type 16 Type 16 Salisbury Leopard Whitby/Rothesay Blackwood Tribal Leander Amazon Broadsword Duke Frigate designs in the post Falkland era and the NFR 90 project.
2012.313.302	U.S. Army Ships and Watercraft of World War II	Grover, David H. (David Hubert)	This book confirms that the Army had more ships and craft than the US Navy in World War II. In fact, at least 127,793

Object ID	Title	Author	Summary
			vessels, including 1,665 ships weighing more than 1,000 tons, were in the army's service-- nearly twice as many as the navy. This book incorporates information about vessels operated by the Corps of Engineers, the Army Air Forces, the Coast Artillery Corps, and the Signal Corps, as well as the more commonly recognized army transportation commands. There are lists of army vessels and their characteristics and specifications. There are also brief summaries of the army's involvement with each class of vessel and photographs of all representative types. Troopships, freighters, hospital ships, passenger vessels, tankers, tugs, mincraft, dredges, repair ships, barges, landing craft, communication ships, and tenders are just a few of those included.
2012.313.303	U.S.S. San Francisco (CA38) : A Technical History	Hansen, Chuck	This is a technical description of the USS San Francisco (CA-38, a New Orleans class heavy cruiser. The San Francisco was sunk at the First Battle of Guadalcanal in World War II.
2012.313.304	PT Boats at War : World War II to Vietnam	Polmar, Norman	Contents include: The torpedo and the torpedo boat -- The American torpedo boat -- "They were expendable" -- Building and manning PT boats -- War in the Pacific -- Return to the Philippines -- War in the Mediterranean -- The invasion of Europe -- Victory and defeat - - U.S. motor torpedo boats -- PT boat characteristics -- PT boat order of battle -- PT boat squadrons -- PT boat tenders
2012.313.305	Aegis Guided Missile Cruiser	Bailey, Dennis M.	Aegis missile cruisers are the navy's high-tech guardians of the fleet. Armed with air-to-air missiles, Tomahawk cruise missiles, antisubmarine torpedoes and the Phalanx close-in weapons system, aimed by the most sophisticated radar system ever built, the Aegis cruisers can protect the fleet from any threat--missiles, ships, aircraft and submarines. Included is a lit of CG-47 class also known as the

Object ID	Title	Author	Summary
			Ticonderoga class of cruisers.
2012.313.306	United States Mosquito Fleet, The	Ferrell, Bob	The P.T. Boat Museum and Library in Memphis Tennessee (now in Germantown Tennessee) published this technical history of Motor Torpedo Boats of the Second World War. The author, Robert Ferrell served with PT Base 17 in the Philippine Islands. The book describes the development and technical characteristics of the various types of patrol Torpedo Craft that served the US navy from 1940 through 1945. The back cover has over 40 colored patch photos for PT boats.
2012.313.307	Tarawa and Wasp Class General Purpose Amphibious Assault Ships	Meisner, Arnold	Mostly B&W photos of amphibious assault ships. Eight pages of colored photos.
2012.313.308	U.S.S. Cairo : The Story of a Civil War Gunboat, Comprising a Narrative of her Wartime Adventures, by Virgil Carrington Jones and an Account of her Raising in 1964 by Harold L. Peterson	Jones, Virgil Carrington	The history of the Civil War gunboat the USS Cairo. The USS Cairo was sunk in the Yazoo River by a Confederate torpedo in December 1862. A century later she was raised and salvaged along with thousands of priceless artifacts. The boat was restored by the national park Service and can be seen at Vicksburg national Military park.
2012.313.309	Operational Experience of Fast Battleships : World War II, Korea, Vietnam	Reilly, John C.	The ships discussed in these pages form the three classes of fast battleships completed for the United States Navy between 1941 and 1944. The Iowa class has rejoined the active fleet as modern surface warships. North Carolina, Massachusetts, and Alabama, survivors of the two earlier classes, now serve as memorials to those who built, sailed, and fought them in World War II.
2012.313.310	Ships of the Royal Navy	Blundell, W. D. G. (Walter Derek George)	An illustrated and up-to-date guide to Britain's fighting fleet, with more than 80 pictures, 7 colour plates, and all ships or classes drawn to constant scale, more than 80 drawings in all.
2012.313.311	Submarines of the Royal Navy	None Stated	There are three basic types of submarine operated by the Royal Navy; each with a specialist role to play. These are the nuclear-powered Fleet submarine; the nuclear-powered Polaris submarine, and the

Object ID	Title	Author	Summary
			diesel-electric powered Patrol submarine. At present the Royal Navy has 33 submarines--eleven Fleet, four Polaris and sixteen Patrol boats. Two other Fleet submarines of the new and improved type are under construction, to be known as the Trafalgar class.
2012.313.312	Royal New Zealand Navy, The	Burgess, Michael	A photographic description of the ships of the Royal New Zealand Navy. This book covers a variety of photographs of all major, and many minor vessels in service since 1913. In October 1941 the name was changed from the New Zealand Division of the Royal Navy to the Royal New Zealand Navy. Warships prefix was changed to HMNZS from HMS.
2012.313.313	H.M.A.S. Parramatta, 1910-1928 : Torpedo Boat Destroyer	Lind, L. J.	The story of the HMAS Parramatta, the first ship of the Australian Navy. She was built by Scots shipbuilders and her speed was 29 knots. She served in the Pacific, the Far East, the Mediterranean, the Black Sea and the Atlantic.
2012.313.314	H.M.A.S. Canberra	Payne, Alan	The story of the HMAS Canberra served continuously as the Flagship of the Royal Australian Navy from 1931-1940. During the depression years HMAS Canberra and her sister ship the HMAS Australia formed the backbone of the Navy and were the only modern cruisers in the squadron until the commissioning of HMAS Sydney in 1935. During World War II Canberra served on convoy escort duties and hunting enemy raiders. She was damaged on 9 August 1942 in the Battle of Savo Island. She was abandoned and sunk in Ironbottom Sound.
2012.313.315	H.M.A.S. Hobart : The Story of the 6inch Cruiser, H.M.A.S. Hobart, 1938-1962	Lind, L. J.	The story of the HMAS Hobart a 6inch Cruiser of the Royal Australian Navy. She was built at the Royal Dockyard in Devonport, England as one of three light cruisers of the "Modified Leander" Class. Hobart saw service in the Royal Navy as HMS Apollo.
2012.313.316	Fighting Ships of the Royal Australian Navy	Gillett, Ross	This book is arranged by class as a pictorial history of all

Object ID	Title	Author	Summary
			Royal Australian navy warships, both built-for-the-purpose (330 ships) and requisitioned for service (159 ships excluding the NAP), from 1 July 1911 when the Australian navy officially came into existence.
2012.313.317	Camouflage, v. 1 : Royal Navy 1939-1941	Raven, Alan	The Royal Navy was the biggest user of seagoing camouflage in the Second World War. The issued instructions for camouflage became more of a set of recommendations and resulted in a six year period that saw everything from strictly correct to any number of individual ideas and colors. This volume does not pretend to be complete, but for the first time, the story is given some degree of depth. Twenty four color chips on shown on the back cover.
2012.313.318	Camouflage, v. 2 : Royal Navy 1942	Raven, Alan	Discusses the camouflage colors and designs used by Royal Navy ships during World War II--especially the year 1942.
2012.313.319	British Warships & Auxiliaries - 1990/91	Critchley, Mike	Descriptions of the warships, weapons and auxiliaries of the Royal Navy.
2012.313.320	Dido Class Cruisers	Raven, Alan	This book covers descriptions of the the sixteen ships in the Dido class of cruisers with at least two pictures for each ship.
2012.313.321	Town Class Cruisers	Raven, Alan	The Town Class or Southampton class, as they were once called, is probably the best known of the British cruiser classes to see action during WWII, and one of the class, the Sheffield, is almost certainly the most famous British cruiser of all time. This book contains descriptions and photos of this class of cruiser.
2012.313.322	War Built Destroyers O to Z Classes	Raven, Alan	This book provides descriptions of the following classes of British destroyers: O, P, Q, S, T, U and Z. The book contains many photos and some colored drawings.
2012.313.323	Renown and Repulse	Northcott, Maurice P.	This book is a description of two British battlecruisers: HMS Repulse and HMS Renown. There are

Object ID	Title	Author	Summary
2012.313.324	County Class Cruisers	Raven, Alan	numerous drawings and The Man o'war series will be devoted to famous classes of warships of the WWII era. Emphasis will be on never-before-published data and photos. This book is about the County class cruisers. It includes many photos and drawings.
2012.313.325	Slava, Udaloy and Sovremenniy	Zaloga, Steven J.	As a result of Gorbachev's perestroika policy, in 1989, the Soviet and American navies agreed to a series of port visits between their two fleets. A Slava class cruiser and a Sovremenniy class destroyer visited the US Navy base at Norfolk in 1989 and a Sovremenniy class and a Udaloy class destroyer visited San Diego in 1990. This work is a photographic description of these three classes of Soviet ships.
2012.313.326	Blohm+Voss - A Proven Prime Contractor	None Stated	This is a brochure from the German ship building company, Blohm+Voss. There are 8 x 11 color photos and descriptions of the Meko 200 Vasco da Gama class Frigate built for the Portuguese Navy, the Meko 140 Espora class Corvette built for the Argentine Navy, the Meko 200 Yavuz class Frigate built for the Turkish Navy, and the Meko 360 built for the Nigerian Navy.
2012.313.327	MEKO-Technology	Blohm+Voss	This Meko Technology brochure contains articles on Blohm+Voss activities during the period 1982-1987 as published in the magazine Naval Forces. Meko is a type of frigate manufactured by Blohm+Voss in Hamburg Germany. Mekos have been sold to the Portuguese Navy, the Nigerian Navy, the Turkish Navy, and the Argentinian Navy.
2012.313.328	Hunt Class Escort Destroyers	Raven, Alan	This describes the Hunt class of escort destroyers with many black and white photos and tables. There is a four page color fold out.
2012.313.329	Battleships Rodney and Nelson	Raven, Alan	This describes the two British battleships: the HMS Rodney and the HMS Nelson. Many

			black and white photos and one color foldout.
2012.313.330	V and W Class Destroyers	Raven, Alan	This describes the British V and W class destroyers. Includes many black and white photos with one color foldout.
2012.313.331	USS Arizona (BB-39) : A Photographic History	Friedman, Norman	This is a pictorial history of the battleship, USS Arizona BB-39, which was sunk at Pearl Harbor, 7 December 1941--with the greatest loss of life ever incurred in any one disaster in US Naval history.
2012.313.332	Iowa Class Battleships, The : Iowa, New Jersey, Missouri & Wisconsin	Muir, Malcolm	This book chronicles the entire history of the longest-lived and last battleships in the world--the four ships of the US Navy's illustrious 'Iowa' class. Laid down after the restrictions of the Washington Naval Treaty had been overthrown, they were the ultimate in US battleship design and -- apart from the ill-fated Musashi and Yamato -- the largest and most powerful battleships ever built.
2012.313.333	Trafalgar 200 International Fleet Review : A Pictorial Record	Bush, Steve	Billed as the largest ever gathering of international warships the world has ever seen, the Trafalgar 200 International Fleet Review took place on 28 June 2005. There were over 150 ships from 36 countries with the majority from Great Britain. There were also tall ships from 8 countries, and non military vessels from Great Britain.
2012.313.334	USS Gridley (CG-21) - West Pac - 1981-82	Schenk, (ed)	The Guided Missile Cruiser Gridley, CG-21 . The deployment lasted 215 days of which 163 were underway. She visited Olongapo in the Philippines, Hong Kong, Japan, Singapore
2012.313.335	USS Benfold (DDG-65) Commissioning Day	Hill, (ed)	This is a commissioning brochure for the USS Benfold (DDG-65) which was commissioned in San Diego, CA on March 30, 1996. Includes pictures of crew, with their home towns, and biographies of department heads.
2012.313.336	Aircraft-carriers and Aircraft-carrying Cruisers	Burgess, Michael	Many of the photographs in this volume are of vessels in New Zealand waters or in visible association with New

Object ID	Title	Author	Summary
			Zealand ships. Aircraft carriers and aircraft carrying cruisers are included from the following countries: Spain, Great Britain, United States, Royal New Zealand Navy, Japan, Australia, Brazil, France, Italy, and the U.S.S.R.
2012.313.337	Royal Navy : Ships, Aircraft & Missiles	Great Britain. Directorate of Naval Recruiting.	This is a recruiting brochure for Great Britain's Royal Navy. It lists ships, aircraft and missiles in current use with brief descriptions of each.
2012.313.340	Ships of the USSR Navy, vol. 1, pt. 1 - Underwater boats	Apalkov, Yuri	This is a four volume set published in seven books about ships of the USSR. This volume has photographs and detailed diagrams of submarines launched from 1960s-1970s.
2012.313.341	Ships of the USSR Navy, vol. 1, pt. 2 - Underwater Boats	Apalkov, Yuri	This is a four volume set published in seven books about ships of the USSR. This volume has photographs, detailed diagrams, and specifications of submarines.
2012.313.342	Ships of the USSR Navy, vol. 2, pt. 1 - Strike Ships : Aircraft Carriers, Rocket Artillery Ships	Apalkov, Yuri	This is a four volume set published in seven books about ships of the USSR. This volume has photographs, detailed diagrams, and specifications of Soviet aircraft carriers and rocket attack ships.
2012.313.343	Ships of the USSR Navy, vol. 2, pt. 2 - Strike Ships : Small Rocket Ships and Rocket, Torpedo and Artillery Boats	Apalkov, Yuri	This is a four volume set published in seven books about ships of the USSR. This volume has photographs, detailed diagrams, and specifications of Soviet small attack craft and patrol boats of the Soviet Navy.
2012.313.344	Ships of the USSR Navy, vol. 3, pt. 1 - Anti-submarine Ships : Anti-submarine Cruisers, Large Anti-submarine Ships, Patrol Ships	Apalkov, Yuri	This is a four volume set published in seven books about ships of the USSR. This volume has photographs, detailed diagrams, and specifications of large Soviet anti-submarine surface vessels.
2012.313.345	Ships of the USSR Navy, vol. 3, pt. 2 - Anti-submarine Ships : Small Anti-submarine Ships	Apalkov, Yuri	This is a four volume set published in seven books about ships of the USSR. This volume has photographs, detailed diagrams, and specifications of small Soviet anti-submarine surface vessels.
2012.313.346	Ships of the USSR Navy, vol. 4 - Amphibious Ships and Minesweepers	Apalkov, Yuri	This is a four volume set published in seven books about ships of the USSR. This

Object ID	Title	Author	Summary
			volume has photographs, detailed diagrams, and specifications of amphibious ships and minesweepers of the USSR Navy.
2012.313.347	Domestic Built Underwater Boats : Design and Construction	Aleksandrov, Y. I.	History of Russian submarines from their beginning to date of publication with extensive diagrams and photographs throughout.
2012.313.348	Our Aircraft Carriers in Port and Underway	Babich, Valeriy	The author provides a history of Russian naval aviation with comparisons throughout of aircraft carriers and aircraft of the world's navies. Photographs throughout.
2012.313.349	Soviet Aircraft Carriers : Aircraft Carriers and Cruisers of Admiral Gorshkov	Balakin, Sergey	The author provides a history and specifications of the different carriers in the Soviet fleet along with photographs and diagrams of carriers and aircraft.
2012.313.350	Ocean Shield of the Country of the Soviets, The	Medvedev, L. N. (ed)	A photo album of the different branches of the Soviet Navy. Includes a history of the Soviet Navy from the beginning of the 20th century.
2012.313.351	Squadron Battleships of the Black Sea Fleet : Photo-documents from the Collections of the Russian National Archives of the Navy	Guber, K. P.	Photos of each of the Russian battleships that served in the Black Sea at the end of the 19th and beginning of the 20th centuries.
2012.313.352	Squadron Battleships Gangut and Navarin	Bogdanov, Mikhail A.	A history of two Russian battleships, the Gangut and the Navarin, from design and construction through their service life. Complete with technical diagrams, details of design, specifications, etc. The Gangut was launched in 1911 and was lost in a shipwreck and stricken in 1956. The Navarin was launched in 1891 and completed in 1896 based on British Trafalgar class battleships. The Navarin was sunk at the Battle of Tsushima in 1905. There are 69 B&W photos with captions in Russian and English.
2012.313.353	Admiralty's Shipyards : Ships and Years 1704-1925	Bogdanov, Mikhail A.	A history of the Russian Navy from 1704-1925 with illustrations throughout. There are 262 illustrations with English titles given on pages 196-200.
2012.313.354	Russia's Aircraft Carriers	Kurochkin, D. B.	A history of Russian naval aviation, development or

			Russian (Soviet Union) aircraft carriers. Illustrations throughout, technical diagrams of the different classes of Russian (Soviet Union) aircraft carriers.
2012.313.355	Kremlin's Nuclear Roulette : The Drama of the Atomic Submarines of the USSR	Mazyuk, Igor A.	Personal account of medical officer's experience in the Soviet nuclear submarine fleet. Appears to be signed by the author.
2012.313.356	Die Flotte - 2000	None Stated	This is a list with pictures of the ships in the German navy as of 2000. It contains descriptions of the different classes of ships, color page of international Morse code, pictures of insignia for German sailors. Also has description of the following planes and helicopters: Panavia PA-200 Tornado, Dassault-Breguet 1150 Atlantic, GKN Westland Sea Lynx MK 88 A, Westland Sea King MK 41 A, and Dornier DO 228 LM/LT.
2012.313.357	Soviet Destroyers	Platonov, A. V.	Page 5 describes a German Destroyer of 1936-1942, British destroyer of 1944, Japanese destroyer of 1942, and USS Fletcher class and Geary class destroyers 1942-44. The first photos belong to the grenade or rocket launching periods. This is followed by the period of nuclear rocket destroyers on pages 61-77. USS destroyers Spruance and Arleigh Burke are on page 78. Pages 85-100 is the conclusion and comparisons of Soviet missiles with US Harpoon, Tomahawks, Terrier, Tart or Standard SM-1 and SM-2, Mark 57 NATO Sea Sparrow, RAM, 20mm MK-15 and ASROC mark 42 and 45 and various other armaments of the Soviet Union, Germany, Japan, France, England, and Sweden.
2012.313.360	Submarine Fleet	Amirkhanov, L. E.	On page 3, there is a forward by the President of the Association, Admiral Valentine N. Ponikarovsky. On page 1 there is a list of 12 sections with the page, title and author of each part. There are pictures of 24 heroes of submarine ships inside front and back covers. On page 5 is a list of 19 locations hosting submarines.

Object ID	Title	Author	Summary
2012.313.361	Secretary of the Navy Guest Cruise 16 Aug to 21 Aug, aboard the U.S.S. Kitty Hawk CVA-63, Cruise from San Diego, Calif. to Hawaiian Islands	USS Kitty Hawk	This is a small photo book of the Secretary of the Navy Guest Cruise 16 August to 21 August 1963 aboard the USS Kitty Hawk CVA-63. The cruise was from San Diego to the Hawaiian Islands. Secretary of the Navy at that time was Fred Korth. Other guests were: Ray T. Anthony, Oklahoma City; Charles C. Bjorseth, La Jolla; Donald J. Brown, Tacoma; Thomas A. Clarkson, San Diego; James S. Copley, La Jolla; John Dudley Digges, La Plata; Roy Drew, La Jolla; Arnold Fletcher, Sherman Oaks; Frank J. Fletcher, La Plata; William H. Hayt, West Lafayette; William H. G. Hesse Jr., Milton-Freewater; Theodore P. Jardine, Chicago; Cornelius M. Maaskant, Hanford; Elmer Perkins, Wichita Falls; Frank R. Tavel, San Rafael, and Gilson Wright, Oxford. Escort Officer was LCDR G. E. Soldatos, Ninth Naval District.
2012.313.362	Russian Navy as it has existed for 300 Years	None Stated	A short history of the Russian Navy from 1696-1996.
2012.314.001	Hunter-Killer: U. S. Escort Carriers in the Battle of the Atlantic	Y'Blood, William T.	A definitive study of the vital contributions of the Escort Carrier Groups in the Battle of the Atlantic in World War II. Though land-based aircraft, various support groups, and the convoy system itself helped win the Battle of the Atlantic, Y'Blood shows beyond a doubt that the escort carriers groups' influence was profound.
2012.314.003	Escort Carriers in Action, The : The Story-In Pictures-of the Escort Carrier Force U.S. Pacific Fleet	Gilbert, Price (ed)	Each carrier made hundreds of excellent photographs which have been collected for the official record as a complete pictorial account of the part the combatant escort carriers played in the war against Japan.
2012.315.002	Fire When Ready, Gridley! Great Naval Stories from Manila Bay to Vietnam	Honan, William Holmes	Great Naval stories from Manila Bay to Vietnam. Drawing from a lifetime of reading about the sea, the author has assembled these 26 tales of astounding heroism, great naval battle stories that reveal human quality outside the frame of ordinary experience. One genuinely feels as if one is an immediate bystander to history.

			Includes information : Spanish-American War Russo-Japanese War World War I World War II Vietnam Cold War Falklands Conflict
2012.315.004	Joint Air Operations : Pursuit of Unity in Command and Control, 1942-1991	Winnefeld, James A.	With the current downsizing of the U.S. military putting a premium on joint response to threats, this landmark study of joint U.S. air operations over the past fifty years provides timely information on a topic of vital concern. The most comprehensive single-volume discussion available, it examines six major air campaigns—Midway, the Solomon Islands, Korea, Vietnam, El Dorado Canyon (Libya), and Desert Storm—in a search for lessons learned that might be applied in the planning and organizing of future joint operations. The focus of the book is on the differences — at times bitter acrimony — among the services on the control and employment of theater air forces. With each service having an "air force" of its own, each with a distinctive doctrine, the study confirms that their views are often diametrically opposite and that joint doctrine has been slow to evolve. The authors, RAND Corporation analysts, are refreshingly objective and clear in addressing the problems and issues that continue to hamper effective joint air operations but point to the progress shown in Desert Storm, as indicated by their interviews with some fifty airmen, planners, and major commanders of the operation. Their recommendations for the future take advantage of the diversity inherent in U.S. air power while minimizing sources of disharmony. Based on a RAND study published in 1991, this book has been expanded and

Object ID	Title	Author	Summary
			revised to appeal to a broader audience and promises to stimulate discussion and debate on how to optimize the effectiveness of Us S. forces facing cuts in funding. It is must reading not only for military professionals but for military history enthusiasts and everyone interested in the nature of America's future air battles.
2012.315.005	How the Battleship Maine was Destroyed	Rickover, Hyman George	Adm Rickover conducts a reanalysis of the events surrounding the sinking of the USS Maine in Havana Harbor in 1898, an action which sparked the Spanish-American War because the prevailing view was that the explosion had been caused by an external source. The author concludes the initial explosion was caused by an internal accumulation of coal dust that, when sparked, combusted and produced catastrophic results.
2012.315.006	Complete Guide to United States Marine Corps Medals, Badges, and Insignia : World War II to Present	Thompson, James G.	Designed to be a definitive reference for Marines, active and retired and detailed enough to meet the need of historians and collectors.
2012.315.007	War in the Gulf	Allen, Thomas B.	An attempt to look at an image-filled war without modifying the truth of what took place. Filled with color and action photos. Includes a chapter on "Thunder from the Sea"--"The naval buildup in the Gulf area was massive--the largest since World War II. By the start of Desert Storm, the U.S. Navy had more than 100 ships in the Persian Gulf, Arabian Sea, Red Sea, and eastern Mediterranean. Fifty ships from coalition navies also steamed in those waters. The use of naval forces in Desert Shield permitted nations that were unable or unwilling to commit ground forces to be active participants in opposing Saddam Hussein's invasion of Kuwait."
2012.315.008	Skyhooks : The Story of Helicopters	Coombs, Charles	A history of the helicopter written for a juvenile audience. Chapters: The versatile Machine; Like Eagles' Wings; How Do They Fly?;

Object ID	Title	Author	Summary
			Air Taxis; Working Whirlybirds; Birds of War; In the Crystal Ball.
2012.315.010	Admirals of American Empire : The Combined Story of George Dewey, Alfred Thayer Mahan, Winfield Scott Schley and William Thomas Sampson	West, Richard Sedgewick	All four of the main subjects entered the Naval Academy between 1854 and 1857. The book follows their stories through the Spanish American War where they were America's chief naval leaders. First Edition signed by author.
2012.315.011	Unknown Battle of Midway, The : The Destruction of the American Torpedo Squadrons	Kernan, Alvin	A story of avoidable mistakes and flawed planning, this book reveals the enormous failures that led to the destruction of four torpedo squadrons but were omitted from official naval reports: the planes that ran out of gas, the torpedoes that didn't work, the pilots who had never dropped torpedoes, and the breakdown of the attack plan. The standard navy tactics for carrier warfare are revealed in tragic contrast to the actual conduct of the battle and the after-action reports of the ships and squadrons involved.
2012.315.012	Air Power at Sea : 1945 to Today	Winton, John	Here with the help of over 100 action photographs and basing his research on interviews with people who have experienced these operations first-hand, the author examines the enormous changes which have overtaken the world's flying navies: the coming of jet fighters and nuclear-powered carriers, the spectacular success of the helicopter, the development of the 'jump jet' from 'Flying Bedstead' to Sea Harrier, the arrival of the missile in air combat, and the use of new devices, such as the steam catapult, the angled flight deck, the mirror landing aid and the ejector seat.
2012.315.013	Grey Ghost : The Story of the Aircraft Carrier Hornet, CV-12, CVA-12, CVS-12	Merideth, Lee W.	This copy autographed by the author. Story of one of the US Navy's most decorated combat ships. USS Hornet, CV-12, holds the record for the number of enemy ships and aircraft destroyed during WWII. During a span of 15 months of combat, Hornet's pilots shot down 668 enemy planes, destroyed 742 more on the ground, and sank or damaged

Object ID	Title	Author	Summary
			486 ships accounting for 1,269,710 tons. After being decommissioned for a brief period, Hornet was brought back into service and modernized 3 times. She saw service in Vietnam and was the Prime Recovery Vessel for the Apollo 11 and Apollo 12 moon missions. Includes information on the following: Grumman TBF -- Eastern TBM-3 Avenger -- Grumman F6F Hellcat Grumman F9F-2, F9F-5 Panther -- Douglas AD-5, AD-6 Skyraider Sikorski HSS-1 (UH-34) Seabat - - Piasecki HUP-2 (UH-25B) Retriever North American FJ-3, FJ-4 Fury Grumman S-2F S-2 Tracker, E-1 Tracer and C-1 Trader Vought F-8 (F8U) Crusader
2012.315.014	Hellions of the Deep : The Development of American Torpedoes in World War II	Gannon, Robert	American entered the war with torpedoes far inferior to those of the enemy. This book tells the story of how the Navy planners threw aside the careful procedures of peacetime science and initiated "radical research": gathering together the nation's best scientists and engineers in huge research centers and giving them freedom of experimentation to create sophisticated weaponry with a single goal--winning the war.
2012.315.015	History of Warships : From Ancient Times to the Twenty-first Century	George, James L.	Contents: Early history: The Age of Galleys -- The Age of Sail -- The Age of Steam, Ironclads, and Steel. Modern ships: Overview of the Modern Age -- Battleships and battle cruisers -- Cruisers -- Destroyers and frigates -- Submarines -- Aircraft carriers -- Amphibious ships -- Service ships -- Mine ships -- Small combatants -- Futuristic warships. Comments and conclusions: Summaries, ironies, myths, and lessons -- The future of seapower and warships, another Golden Age? -- Warship balance in World War I -- Warship balance in World War II -- Warship balance in the year 2000 -- Warship casualties since World War II

Object ID	Title	Author	Summary
2012.315.016	Story of Wake Island, The	Junghans, E. A.	This article briefly describes the early history of Wake Island and then describes what happened to the Island and the people on it during World War II.
2012.315.017	War at Sea in the Ironclad Age	Hill, J. R.	In the mid nineteenth century the major naval powers began to revolutionize their navies, dispensing with wood, sail and cannonballs and embracing steel, steam and shells. This narrative history charts the development of these warships from the first French floating batteries to the famous Dreadnoughts. Contents: Introduction, technical and strategic context -- The technical background -- Navies and their people -- Theories of sea warfare -- The American Civil War -- Navies and imperial expansion -- Fleet action.
2012.315.018	Encyclopedia of U-boats : From 1904 to the Present, The	Moller, Eberhard	This comprehensive reference book traces the hundred-year history of the German submarine from its modest beginnings in 1904, through the huge fleets of the two World Wars, to the commercially successful designs of the present day. Every class of U-boat is given a detailed data sheet, including individual fates, and the book is illustrated throughout with historic photographs and plans. Chapters devoted to special topics include midget submarines, the development of machinery down to modern air-independent systems, some of the most famous U-boat commanders, surviving boats in museums, and ancillary matters like U-tankers, bunkers and shelters. Originally published in German. Contents: Introduction -- Early submersibles -- U-boats in service -- Projects -- Captured submarines -- Manned torpedoes and miniature -- Machinery, sensors and weapons -- The u-boat 'aces' -- U-boat decoys -- U-tankers -- U-boat bunkers -- U-boats in the Mediterranean and Black Sea -- Commercial U-boats:

			Deutschland and Bremen -- U-boats preserved -- U-boats of the Austro-Hungarian Navy.
2012.315.019	Spanish-American War and Philippine Insurrection, 1898-1902, The	De Quesada, A. M.	This book details the uniforms and weapons of the American, Spanish, Cuban and Filipino forces involved in the United States Army's first overseas war. Plate F shows color illustrations of US Navy uniforms (1898) of a seaman, Commodore George Dewey, a chief petty officer, and a US Marine Sergeant. In 1898 the USA took the decision to intervene in the Cuban war of independence against Spain, and to expel the last vestige of European colonial rule from the Americas. This also led to the US acquiring rule over the Philippine Islands; and there, US troops were sent into the jungle to fight a "colonial" war of their own, against Filipino insurgents unwilling to exchange one master for another. The text is illustrated with rare early photographs, and color plates. Illustrated by Stephen Walsh.
2012.315.020	Spitfire--The Story of a Famous Fighter	Robertson, Bruce	A fully illustrated story that commences with the foundation of the Supermarine works in 1912, details the Schneider Trophy seaplanes and other experimental aircraft that led to the Spitfire, and follows the history of the spitfire itself right through to the present day, ending with a listing of surviving examples no on display around the world. There are 10 photos of 1/72 scale three-view scale tone-drawings. Tone paintings by W. F. Hepworth, based on original drawings by J. D. Carrick and Frank Yeoman, and produced by D. A. Russell.

2012.315.026	Epic Sea Battles	Koenig, William J.	Describes twelve famous sea battles including the battles of Midway, Coral Sea and Leyte Gulf. Contents: The Nile, 1798; Trafalgar, 1805; Navarino, 1827; Hampton

Object ID	Title	Author	Summary
			Roads, 1862; Manila Bay, 1898; Tsushima, 1905; Coronel and Falkland, 1914; Jutland, 1916; Matapan, 1941; Coral Sea, 1942; Midway, 1942 (pages 212-231 includes map and photos); and Leyte Gulf, 1944.
2012.315.030	Charles Vernon Gridley : A Naval Career	Schoenfeld, Maxwell Philip	This is a biography of Charles Vernon Gridley. On May 1, 1898, Gridley was commanding the USS Olympia in Manila Bay. Early in the morning his commander, Admiral Dewey, gave the command "You may fire when ready, Gridley" which was the signal to fire on a Spanish fleet. Gridley died on June 5, 1898.
2012.315.031	Warthog and the Close Air Support Debate, The	Campbell, Douglas N.	This book is a history of Close Air Support (CAS), the A-10 Warthog, and the U.S. Air Force. There are several references to the marine Corps and the Navy. Contents: The origins of air support -- Air support in the atomic era -- Vietnam and the A-7 choice -- The A-10's improbable conception -- CAS aircraft on trial -- Developmental and operational challenges -- Fire in the minds of men -- The bureaucratic war, the political war, and the real war.
2012.315.032	Flight Plan for Tomorrow : The Douglas Story, A Condensed History	Douglas Aircraft Company. Public Relations Dept.	A history of the Douglas Aircraft Company published by its public relations department. It lists Navy planes and models as well as USAF, commercial, and spacecraft.
2012.315.033	American War Medals and Decorations	Kerrigan, Evans E.	This is a guide to medals, decorations, badges and awards conferred, throughout the history of the United States, on members of the armed services and in some cases on civilians. There are four color plates of medals and decorations.
2012.315.034	Guadalcanal--The Island of Fire : Reflections of the 347th Fighter Group	Ferguson, Robert Lawrence	This book was written by a man who was among the first combat troops to arrive on the Soloman Island of Guadalcanal. He recounts the six month struggle to hold the Island. Included are original maps and never before published combat pictures. This book honors the men of the 67th Fighter

Object ID	Title	Author	Summary
			Squadron, "The Game Cock," and the other squadrons that became the 347th Fighter Group.
2012.315.035	Combat Surgeon : On Iwo Jima with the 27th Marines	Vedder, James S.	The 5th Marine Division arrived at Iwo Jima on 22 transports. They departed a month later not quite filling eight. This book is the story of those 33 days on Iwo Jima as seen through the eyes of the chief medical officer for the 3d Battalion, 27th Marines.
2012.315.036	Hell at Tassafaronga : The History of the Heavy Cruiser New Orleans (CA 32)	Brown, Herbert C.	Signed by the author. Fighting its way through seventeen battles of the Pacific war of 1941-45, from the Pearl harbor attack to the last days of the gruesome kamikaze attacks at Okinawa; surviving catastrophic damage during a vicious night battle, damage so unique it was featured in Ripley's "Believe it or Not," and returning to take part in almost every major sea battle in the Pacific, this ship with a crew of average young Americans helped change the history of the world.
2012.315.037	Mighty Fallen, The : Our Nation's Greatest War Memorials	Bond, Larry	This book presents 150 never-before-seen photographs of the nation's greatest monuments and war memorials, along with text that describes the memorials and tells their stories. The book covers 300 years of military service memorials.
2012.315.038	History of the Middle East Wars, The	Westwood, J. N.	Conflict in the Middle East has been a persistent threat to the peace and security of the world since the establishment of Israel in 1948. In the years since then Israel and the nearby nations have fought five major wars and endless minor skirmishes with the ever present threat of escalation and superpower involvement, Contents: Israel's First War; Uneasy Truce; Suez and Sinai 1956; Regrouping and Rearmament; The Six Day War; Confrontation and Attrition; The October War of 1973; Crisis in Lebanon; Israel in Difficulty; The First Gulf War; The Second Gulf War, and New Kinds of Conflict.

2012.315.039	Signal Victory, A : The Lake Erie Campaign, 1812-1813	Skaggs, David Curtis	The Battle of Lake Erie on 10 September 1813 is considered by many to be the most important naval confrontation of the War of 1812. The battle marked the U.S. Navy's first successful fleet action and one of the Royal Navy's rare surrenders of an entire squadron. The American commander was Oliver Hazard Perry, and his British opponent was Commander Robert H. Barclay.
2012.315.040	World War 1 in Color, Disc 1	FreemantleMedia	Using rare archive footage from sources around the World, including Britain's own Imperial War Museum, this 6 part series has been painstakingly colorized using the latest computer-aided technology to bring the first world war to color, as experienced by those who fought and endured it. 2012.315.048	Vietnam Combat, Disc 1	Timeless Media Group	Disc. 1.; Vietnam at war --; Infantry & armor --; The Viet Cong --; Khe Sanh.Disc 2.; Helicopter war --; Air war --; Naval war --; Disc 1 - Vietnam at War -- With the communist North Vietnamese and Viet Cong threatening to overrun South Vietnam, Americans went to Southeast Asia in an effort to save the south Vietnamese, yet their actions and policies ultimately failed. an overview of the war in Vietnam.

Object ID	Title	Author	Summary
			Disc 1 - Infantry & Armor--This is the story of how Americans came to penetrate the enemies' havens on foot and with armored vehicles. See Vietnam combat up close and personal.
			Disc 1 - the Viet Cong--the American military expected to overwhelm the North Vietnamese Army and Viet Cong Guerrilla, but instead encountered a determined and formidable foe.
			Disc 1 - Khe Sanh--In Vietnam as elsewhere, the first combat units ashore were the marines, but their greatest test occurred not on the beaches, but at the remote outpost of Khe Sanh.
			Disc 2 - The Helicopter War--More than any other weapon, the helicopter came to represent America's presence in Vietnam. This is the true story of the use of the helicopter in combat, the brave men who manned the machines and those who rode them into the fury of Vietnam combat.
			Disc 2 - The Air War--America's war in Vietnam was fought with extensive use of airpower. This is the story of that effort, the planes and the men who provided America's aerial punch.
2012.315.049	Vietnam Combat, Disc 2	Timeless Media Group	Disc 2 - The Naval War--The navy fought on the waters in and around Vietnam, in the skies across Southeast Asia and even on the land. No service was involved with so many different aspects of the fighting.

2012.315.052	U.S. Marine Corps Story, The	Moskin, J. Robert	The story of the United States Marine Corps spans more than 210 years. J. Robert Moskin has researched this book for over thirty years. In addition to studying thousands of documents in archives and libraries, he interviewed numerous Marines at Headquarters, from coast to coast and overseas. It is the story, he says, "of men in battle - the story of individual courage - of men who risked everything to do what, had to done." Although no Marine ever started a war, the Marines have been ready when called. The author has updated this edition to include the tales of Lebanon and Grenada and bring the Marine Corps story into the late eighties. It is a fascinating story because it mirrors the entire violent sweep of American history. It is also a story that a Marine can read pride and reexperience the esprit of the Corps and the special code of comradeship that drives the Marine Corps whenever this country calls. "The ideal gift for anyone who has served or is serving in the Marines, their relatives and their friends..." - The New York Times Book Review

Object ID	Title	Author	Summary
			"The best written story of the Corps that I have read..." -General Wallace M. Greene Former Commandant, USMC "It is a hell of a piece of work.' - Leon Uris "Marine Corps veterans will love it!' - Newsday J. Robert Moskin is an historian and an award-winning journalist. Formerly the Foreign Editor and member of the Editorial Board of "Look" magazine, he has written extensively about military and foreign affairs. His reporting has received awards from the Overseas Press Club, the National Headliners Club, and the Newspaper Guild of New York. This book received the Distinguished Service Award of the Marine Corps Combat Correspondents Association. Correspondents Association (from back cover)
2012.315.053	Iwo Jima	Newcomb, Richard F.	The assault on Iwo Jima has been called the classical amphibious operation of recorded history. The largest force of Marines ever committed to action, 30,000, captured the island after thirty-six days of bitter fighting. Although the supporting forces of all services contributed magnificently to the final victory, it was the Marine combat teams that had to close with the enemy and destroy them.
2012.315.054	U.S. Marines	Padden, Ian	The author tell the Marine story, from the days of the Revolution through the French, Civil and Spanish wars, up to their unforgettable, legendary engagements in Belleau Woods, Iwo Jima, Korea and Vietnam. The story is told through historical and eyewitness accounts.
2012.315.055	United States Marine Corps in World War II, vol. 2 : Battering the Empire	Smith, Stanley E. (ed)	The true account by the men who fought in the Pacific, and by distinguished Marine experts, authors and newspapermen. With many maps and official Marine

			Corps photographs. Part 3: Munda to Cape Gloucester: Reduction of Rabaul; Part 4: Tarawa to Peleliu: Battering
2012.315.056	Hill 488	Hildreth, Ray	On June 13, 1966, men of the 1st Recon Battalion, 1st Marine Division were stationed on Hill 488. Before the week was over, they would fight the battle that would make them the most highly decorated small unit in the entire history of the U.S. military, winning a Congressional medal of Honor, four navy Crosses, thirteen Silver Stars, and eighteen Purple Hearts--some of them posthumously. During the early evening of June 15, a battalion of hardened North Vietnamese regulars and Viet Cong-- outnumbering the Americans 25-to-1--threw everything that had a the sixteen marines and two Navy corpsmen. Every man who held the hill was either killed or wounded.
2012.315.057	Battle for Hue : Tet, 1968	Nolan, Keith William	The unforgettable saga of the bloodiest battle of the Vietnam War--and of the Marines who fought it!

2012.316.001	United States Navy in World War II, The : The One-Volume History, from Pearl Harbor to Tokyo Bay	Smith, Stanley E.	The substance of this history of World War II is largely personal narrative with running commentary and connective. Any flaws are the imperfections of men whose personal involvement took precedence over mere battle technicalities. No period marks the history of man's struggle for freedom more dramatically than the great war that burst like Apocalypse upon the Navy and America at Pearl Harbor. Coming to a close, appropriately, on the main deck of the U.S.S. Missouri, this war began and ended with a fleet. It seems most fitting, therefore, that this well-selected anthology should be devoted to those giant events which took place at sea--for had they failed, freedom would have failed. , by men who fought in the Atlantic and the Pacific and by distinguished naval experts, authors and newspapermen
2012.316.002	Fly Navy : Discovering the Extraordinary People and Enduring Spirit of Naval Aviation	Townley, Alvin	Review Praise for Fly Navy "In Fly Navy, author Alvin Townley takes readers on an exhilarating and revealing flight into the world of U.S. naval aviators....More than a mere history of Navy flight, Fly Navy is an exploration of the heart and soul of naval aviation." —Richard G. Latture, editor-in-chief of Naval History magazine "Flying has always captured the human imagination and, as we celebrate the 100th anniversary of naval aviation, Alvin Townley's Fly Navy crystallizes that imagination into inspiration. From the first sea-based flight through all of our nation's battles in the twentieth and twenty first centuries to the farthest reaches of man into space, Townley weaves a

			compelling story of the actions and lives of the men and women who make up the naval aviation legacy." —Vice Admiral Tom Kilcline Jr., commander of Naval Air Forces, 2007–201 "In this year of the 100th anniversary of naval aviation, Fly Navy gives the reader snippets of the colorful history of the exploits of naval aviators and naval aviation's importance to the United States this last century." —Captain James A. Lovell Jr., commander of Apollo 13 "With fascinating insight into the seldom seen parts of naval aviation, Fly Navy illustrates the profound sense of honor and duty found among the men and women who serve, from the mechanics to the fighter pilots and everyone in between. Alvin Townley's exquisite storytelling brings their stories to life and creates a book you can't put down. Fly Navy is a thrilling, moving reminder of what makes America great." --Gregory A. Freeman, author of The Last Mission of the Wham Bam Boys: Courage, Tragedy and Justice in World War II and Troubled Water: Race, Mutiny and Bravery on the USS Kitty Hawk "The spirit of naval aviation resides in the colorful characters who share the common bond of gold wings and the excitement of aerial adventures from the sea. Fly Navy opens a window to this romantic, dedicated, and occasionally irreverent spirit." —George "Elwood" Dom, former TOPGUN instructor and commanding officer of the Blue Angels "For real-world adventure and excitement surrounding people from all backgrounds,

			income and education, and to learn lessons that will stick for life, this book is on-target."--The Washington Times
			Praise for Alvin Townley's Previous Books
			"Inspirational."
			—Secretary of Defense Robert M. Gates on Legacy of Honor
			"A compelling story about a new generation and America's future."
			—NFL MVP Peyton Manning on Spirit of Adventure Product Description Top Gun was only part of the story. Fly Navy delves beyond the Hollywood image to reveal the true mettle and genuine story of the elite men and women of naval aviation.
			For one hundred years, the U.S. Navy's aviators and crews have made the difference on military and peacetime missions around the world. Their unparalleled skill, preparation, and everyday dedication have paid off when it matters most: when lives are on the line. Together, these men and women—officers and enlisted personnel, past and present—have protected freedom, served their country, and forged a legacy of valor like no other.
			In this landmark book, Alvin Townley takes readers on an adventure around the world and across generations as he goes behind the scenes of naval aviation. From the skies over the Arabian Sea to the jungles of Southeast Asia to carriers patrolling the vast Pacific, he uncovers incredible stories of service members who survived weeks adrift at sea, made midnight rescues in deadly storms, crash-landed behind enemy lines, and found themselves in situations where their exceptional training and focus were the only things standing between life and death.
			Filled with inspiring

2012.319.001	Prelude to Pearl Harbor : The Air War in China 1937-1941	Wagner, Ray	Describes the fighting that developed Japanese air power from 1937 to 1941 and the way American military aircraft were changed by the war in China.
2012.319.002	RAF At War, The	Barker, Ralph	Exploits of the Royal Air Force in WW II. 5 segments (or chapters) which are headed; 1. The first taste of combat: A bitter surprise, 2. The battle for survival, 3. Striking back with bombs, 4. Defending the Empire's distant skies and 5. A winged thrust at the heart of the Reich.
2012.319.003	Attack From the Sea : A History of the U.S. Navy's Seaplane Striking Force	Trimble, William F.	An award-winning aviation historian chronicles the Navy's efforts to develop a powerful sea-based strike force through the use of long-range attack seaplanes supported by surface ships and submarines. William Trimble traces the concept back to the early 1930s when American strategic planners sought ways to mount an assault across the Pacific with minimum air support. But it was not until 1950, when the Navy was threatened with losing its big carriers and long-range aircraft, that the idea of a Seaplane Striking Force was resurrected. Lured by breakthroughs in seaplane

Object ID	Title	Author	Summary
			performance and the promise of the turbojet-powered Convair Sea Dart fighter and the Martin Sea Master attack flying boat, the Navy believed it could challenge the Air Force in the strategic role, the author explains, but found that the technology did not live up to expectations. This book investigates the difficulties of weapon system procurement within the context of strategic realities, interservice rivalry, and constrained defense budgets. It also looks at an alternative weapon system that the Navy saw as a means of extending its conventional reach and as a complement to the carrier and land-based bomber used for nuclear deterrence. That weapon, however, proved unsuccessful in the end. The author helps the reader understand that while conceptual and operational flaws kept the Seaplane Striking Force from achieving the goals set for it, the idea of a mobile weapon system capable of long-range attacks from the sea remains valid. Other books touch briefly on the subject, but this is the first to examine the concept in depth. Contents: Naval aviation in crisis -- Seaplanes and strategy - - Seaplane reborn -- Designs -- SeaMaster -- New look, new missions -- Toward an operational force -- End of the line
2012.320.001	Naval Ordnance; a textbook prepared for the use of the midshipmen of the United States Naval academy, by officers of the United States navy	Peyton, T. G. (ed.)	A basic textbook on the subject of naval weapons and their control prepared primarily as a classroom text for midshipment at the U.S Naval Academy and in the Naval Reserve Officers Training Corps. It is a limited treatment of fundamental concepts and principles of ordnance with enough data on typical weapons and control systems for the purposes of the training programs for which it was intended.

			IIs), VAQ-137 (EA-6B Prowlers) , VA-145 (A-6/KA-6D Intruders) , VS-37 (S-3A Viking), & VQ-1 (EA-3B Skywarriors).
2012.346.001	Absolute Victory : America's Greatest Generation and Their World War II Triumph	Knauer, Kelly (ed)	Traces the last year of World War II, concluding with victories over Japan and Germany. Follows U.S. and British armies through Market Garden, the Battle of the Bulge, the liberation of Nazi death camps to the last days of Adolf Hitler. In the Pacific traces Gen MacArthur's return to the Philippines, the invasions of Iwo Jima and Okinawa and the creation and deployment of the atom bomb. Introductory interview with George H. W. Bush. Illustrated in the Time-Life series manner.
2012.346.002	Ship : The Epic Story of Maritime Adventure	Lavery, Brian	A chronicle of great vessels, legendary journey and heroic seafarers. Covers centuries of exploration endeavor and conflict. Contains illustrated profiles of key ship types. Examines maritime influence on trade, industry and society. Describes nautical milestones and stories of war at sea. Generously illustrated.
2012.346.004	American Way of War, The : Guided Missiles, Misguided Men, and a Republic in Peril	Jarecki, Eugene	In the sobering aftermath of America's invasion of Iraq, documentarian Jarecki launches a penetrating inquiry into how forces within the American political, economic, and military systems have come to undermine the carefully crafted structure of our republic--upsetting its balance of powers, vastly strengthening the hand of the president in taking the nation to war, and imperiling the workings of American democracy. Surveying a scorched landscape of America's military adventures and misadventures, Jarecki's account includes interviews with leading figures in the Bush administration, Congress, the military, academia, and the defense industry. Their insights expose the deepest roots of American war making. As Jarecki powerfully argues, only concerted action by the

Object ID	Title	Author	Summary
			American people can, and must, compel the nation back on course.--From publisher description.
2012.348.001	What If? : The World's Foremost Military Historians Imagine What Might Have Been	Cowley, Robert (ed)	Military history (from the Plague that saved Jerusalem in 701 B.C. to the cold war) is analyzed and theories are presented about the course of the outcome if certain criteria had been changed.
2012.348.002	Ships and the Sea : A Chronological Review	Haws, Duncan	This richly illustrated nautical history describes in a unique way the development of ships, the law of the sea, merchant and naval sea-practice and life aboard, from the dawn of history to the present day. Aircraft carriers are listed on pages 172, 198-203, 206, and 208-210. The Battle of Midway is listed on pages 198-99, and 208.
2012.348.003	Modern Air Combat : The Aircraft, Tactics and Weapons Employed in Aerial Warfare Today	Gunston, Bill	This book is about fighting aircraft, but unlike most of the numerous books already written on this subject it is concerned with the true nitty-gritty of modern air warfare --- the weapons, the systems and the tactics --- while also including such familiar details as the wingspan and type of engine fitted.
2012.348.004	Military Aircraft Markings & Profiles	Wheeler, Barry C.	Featuring 140 aircraft and over 850 full color illustrations and photographs, this book traces the story of military aircraft markings and camouflage from World War I to the present day.
2012.349.001	Lemon Tears	Phan, Cam Van	"I am a Vietnamese Boat People (sic). "Lemon Tears" is my autobiographical account of my early life during the Vietnam war and my flight from the country as a boat refugee shortly after the 1975 fall of Saigon." The Vietnamese title is May Tho Dai.
2012.350.001	Aircraft Anatomy of World War II : Technical Drawings of Key Aircraft 1939-1945	Eden, Paul (ed)	Bombers and dive bombers -- Fighter and ground attack aircraft -- Transport, reconnaissance and maritime patrol aircraft. Full specifications for each aircraft including dimensions, powerplant, weight, performance, and armament.

Object ID	Title	Author	Summary
2012.350.002	Jutland 1916 : Clash of the Dreadnoughts	London, Charles	The only major fleet engagement of World War I, the Battle of Jutland has been surrounded by controversy ever since. The British public felt that Admiral Jellicoe had failed -- A reaction rooted in hundreds of years of the 'Nelson Cult (a conviction that anything short of a Trafalgar-style annihilation was letting the side down). True, the German fleet had sunk more ships and suffered fewer casualties, but the British had forced them to disengage and run for port and were still cruising off Denmark, spoiling for a fight. The careers of both Jellicoe and Scheer suffered little in consequence, though criticisms of each persist. The key question remains though: on the high seas, in this head-to-head, who fared worse? 'The truth', as they say, 'is down there'.
2012.350.004	McDonnell F-4 Phantom : Spirit in the Skies	Lake, Jon (ed)	This volume tells the story of the F-4 Phantom in far greater detail than any other publication. With a quarter of a million words and 650 photographs, it recounts the history, details the variants, portrays the units--their colors and their aces, describes the weapon systems, and depicts what a great aircraft the Phantom was to fly.
2012.350.005	Classic Sailing Ships	Giggall, Kenneth	This book presents forty of the world's most famous sailing ships, with original paintings by the celebrated Dutch artist Cornelis de Vries. De Vries' ship portraits are exquisitely detailed; whenever possible, he works from archive collections of original shipbuilder's designs. Most of the ships included here were built between the sixteenth and nineteenth centuries, when these ships played a vitally important part in the lives of nations and men. The text provides details on each ship.
2012.350.006	Tomcat! : The Grumman F-14 Story	Gillcrist, Paul T.	This book is an oral history told in anecdotal format. Of particular interest are the chapters dealing with the sale of Tomcats to iran and the

Object ID	Title	Author	Summary
			subsequent integration of the airplane into Iran's armed forces. The book contains over 150 photographs, most in color and never before published, and many of them taken by Tomcat aircrews with hand-held cameras. Inside front and back covers are colored patches of the squadrons that flew the Tomcat.
2012.350.007	Lexington Class Carriers : CV-2 USS Lexington & CV-3 USS Saratoga	Wiper, Steve	This book was created as a warship resource guide; covering all ships in a single class with official US Navy photographs, highlighted history and statistical sheet for each vessel. The Lexington class aircraft carriers are: USS Lexington, CV-2 USS Saratoga, CV-3
2012.350.008	USS Louisville, CA-28	Wiper, Steve (ed)	This presents a complete history of the USS Louisville, CA-28. It includes full page authentic U.S. Navy photographs, completely rendered and scale illustrations, and the entire service history and general statistics.
2012.350.010	US Navy Fighters - Second World War	Masahiko, Takeda (ed.)	US Navy Fighters WWII - Aircraft covered include the F2A Buffalo, F4F Wildcat, F6F Hellcat, F4U Corsair, F7F Tigercat, F5F Skyrocket, F8F Bearcat, SB2C Hell Diver, SBD Dauntless, TBD Devastator, SB2U Vindicator, TBF(M) Avenger and Experimental/Prototype Fighter aircraft.
2012.350.011	WWII US Navy Fighters	Koku-Fan	US Navy fighter and torpedo bombers of WWII. Airplanes documented include TBF Avenger, F4U Corsair, F6F Hellcat, F2A Buffalo, F4F Wildcat, F7F Tigercat, F5F Skyrocket, XP-50, F8F Bearcat, SB2C Hell Diver, SBD Dauntless, Douglas Vindicator/Devastator and the camouflage markings of U.S. Aircraft.
2012.350.012	Airwar Over Korea	Koku-Fan	Air war over Korea -- Topics covered include MIG Killers of the US Navy, USAF and US Marine Corps. Covers MiG Alley, Air Force Fighters over Korea, Air Attack over the coast, USAF Medium

Object ID	Title	Author	Summary
			Bombers, Attack to the North, United Nations Air Forces, Photo Reconnaissance, Search and Rescue and the Air Transport Force.
2012.350.013	Yamato Class Warships	Gakken	Details and facts about the Japanese Yamato class battleships. Includes pictures, charts, fact tables, biographies, trivia and other historical information relating to the warship.
2012.350.014	American Aces of World War II and Korea	Hess, William N.	This book covers American Aces in World War II, The American Volunteer Group, American Aces in Korea, and Lists of American Aces in the Royal Air Force, Army Air Force and AVG, Navy, and Marine Corps.
2012.350.015	Pacific Air Combat WW II : Voices from the Past	Sakaida, Henry	The stories of pilots from World War II. Some of the people mentioned are: Kaneyoshi Muto, Lyndon Baines Johnson, Yohei Hinoki, Shoichi Sugita, Rex Barber the pilot who downed Admiral Yamamoto, Wellman Howard Huey, Henry Meigs, Takeo Tanimizu, Minoru Fujita, Forrest McCormick, Edward J. Bollen, Robert Silvio Scamara, Isamu Kashilde, Masajiro Kawato, Pappy Boyington, Edward Mikes, and many others. The author's hobby is reuniting former enemy pilots from WWII.
2012.350.016	Flying Aces : Aviation Art of World War II	Kitchens, James H.	This is volume one of a three volume set. We have a book with all three volumes under this call number on the shelf. The other two volumes are: volume 2 : Bomber Missions and volume 3 : Carrier War. This book presents more than seventy dramatic war scenes painted by some of the most respected masters of aviation art, including Stan Stokes, Robert Taylor, and Roy Grinnell, each beautifully reproduced in full color. The paintings are enhanced with archival photographs of legendary Aces and historical descriptions of their planes and their greatest battles. This book was later incorporated with two other books in to Aviation Art of World War II which we

Object ID	Title	Author	Summary
			also own.
2012.350.017	Imperial Japanese Navy : Yamato Cass Battleships	Wiper, Steve	Photographs and histories of the three Japanese class Yamato battleships: Yamato, Musashi, and Shinano.
2012.350.018	Kriegsmarine Battleship Bismarck	Wiper, Steve	A pictorial history of the German Navy (Kriegsmarine) battleship, the Bismarck.
2012.350.019	Fletcher, Gearing & Sumner Class Destroyers in World War Two	Herne, Jeffery J.	Developed for the warship enthusiast and modeler, the Warship Perspective Series offers general arrangement plans, fittings drawings, camouflage patterns, and technical charts and data. This volume covers the Fletcher, Gearing and Sumner class destroyers of WWII.
2012.350.020	Atlanta Class Cruisers in World War II	Arnold, Glenn R.	Developed for the warship enthusiast and modeler, the Warship Perspective Series offers general arrangement plans, fittings drawings, camouflage patterns, and technical charts and data. This volume covers the Atlanta class cruisers of WWII.
2012.350.021	Flying Scoreboards : Aircraft Mission and Kill Markings	McDowell, Ernest R.	Details the kill markings of aircraft from World War I through Desert Storm. Photos and diagrams with captions explaining the significance of the various painted on markings.
2012.350.022	Japanese Naval Vessels	Maru Special, The	Contains various photos and diagrams related to the Japanese Kongo-class battleship "Kirishima" ("Fog Island"). Discusses the construction and history of the battleship.
2012.350.023	Battleship Yamato, The : 1/100 Super Scale Model	Watanabe, Yoshiyuki (ed.)	Full color photographs of a 1/100 scale model of the Yamato in section one. Section two contains B&W photos and historical information on the Yamato.
2012.350.024	Aircraft Carrier Zuikaku : 1/100 Super Scale Model	Watanabe, Yoshiyuki (ed)	Full color photographs of a 1/100 scale model of the Zuikaku are printed in section one. Section two contains B&W photos and historical information on the Zuikaku.
2012.350.025	Vought's F-8 Crusader Part One : Pace, Steve Development and Testing, Foreign Users, and F8U-3		The F-8 has been one of the rare aircraft in aviation history to have been a success from the start, void of teething

Object ID	Title	Author	Summary
			problems, and to excel at its designed mission until retirement. Over its 31 years of operations, many names and phrases have been used to describe this incredible aircraft. The best phrase used was the "Last Gunfighter" or the "Last of the "Gunfighters". This phrase sums up the F-8's reason for success..... --Steve Ginter 112 PAGES, 239-B&W PHOTOS, 15-COLOR PHOTOS, 25-PAGES DRAWINGS
2012.350.026	Vought's F-8 Crusader Part Two : Navy and Marine RF-8 Photo-recon Squadrons	Ginter, Steve	Naval Fighters Number Seventeen covers the Navy and Marine RF-8 photo Crusader squadrons. This book differs from previous books in that the aircraft's development and testing was covered in Part One (NF-16) of the four-part F-8 series. This book provides brief squadron histories and extensive color and markings for the RF-8 squadrons.... --Steve Ginter 64 PAGES, 197-B&W PHOTOS (from ginterbooks.com:)
2012.350.027	Vought's F-8 Crusader Part Three : Marine Fighter Squadrons	Ginter, Steve	This book provides brief squadron histories and extensive color markings for Marine F-8 Fighter squadrons. Marine fighter squadrons used the following models: F8U-1 (F-8A) , F8U-1E (F-8B), F8U-2 (F-8C), F-8U-2N (F-8D), F8U-2NE(F-8E), F-8H, F-8K, and F-8L. --Steve Ginter 64 PAGES, 157-B&W PHOTO ORDER NUMBER - NF18 - \$12.95 (from ginterbooks.com:)
2012.350.028	Vought's F-8 Crusader Part Four : Navy Fighter Squadrons	Ginter, Steve	This book provides brief squadron histories and extensive color and markings for Navy F-8 fighter squadrons. Naval Fighters is 217 pages

Object ID	Title	Author	Summary
			and includes hundreds of photographs. --Steve Ginter 216 PAGES, OVER 600-B&W PHOTOS, 14-COLOR PHOTOS, SQUADRON INSIGNIAS ORDER NUMBER - NF19 - \$25.95 (from ginterbooks.com:)
2012.350.029	Fighter Tactics and Strategy 1914-1970	Sims, Edward H.	Traces the development of the tactics and strategy of aerial combat through two world wars, the Korean conflict and the war in Vietnam; the pilots; and their aircraft.
2012.350.030	Admiral Halsey's Story	Halsey, William F.	Adm Halsey's on story of the Pacific War. Takes reader from Adm Halsey's childhood, through his midshipman days at Annapolis, to the dramatic moment he made good his brag in Tokyo Bay.
2012.350.031	Aerial Gunners : The Unknown Aces of World War II	Watry, Charles A.	The story of the aerial gunners in World War II - one of determination, grit, dedication and loyalty to the aircrew of which they were members.
2012.350.032	Aircraft Carrier : The Majestic Weapon	MacIntyre, Donald G. F. W.	The aircraft carrier, in 1939 mistrusted not only by the more conservative type of naval officer - the majority perhaps of the senior ranks — but by those many fanatics of air power who believed that the shore based aeroplane had made all navies redundant, became, in the course of the war, the dominating factor in naval operations. (from back cover)
2012.350.033	Five Down and Glory	Gurney, Gene	Detailed record of the battles of every American fighter ace.
2012.350.035	Mig Alley	Davis, Larry	A chronicle of battles with MIG aircraft in the Korean War.
2012.350.036	and Kill MIGs : Air to Air Combat in the Vietnam War	Drendel, Lou	Original title Strategy, tactics, lessons learned and re-learned. Accounts of dogfights, Ace pilot biographies and combat stories, all taking place during the Vietnam War. Marty Vehanen Summary: This article has illustrations

Object ID	Title	Author	Summary
			of the A-1 Skyraider flown by Clint Johnson on the Mig Killing mission of 20 June 1965 and the four A-1s who were jumped by two MIG-17's, who attempted to maneuver with the Spads. One MIG got slow in front of one of the Spad's 20mm cannon. Additional illustrations of an F-4B of VF-161 flown by Pat Arwood and Taco Bell on their MIG killing mission of 18 May 1972. (18 May 1972, MIG-19, F-4B, VF-161, CVW-5, CVA-41, A/C No. NF-110, BuNo 153068, Lt. Henry "Bart" Bartholomay, Lt. Oran Brown); (Mig- 19, F-4B, VF-161, CVW-5, CVA-41, A/C No. NF-105, BuNo 153915, Lt. Pat Arwood, Lt. Mike "Taco" Bell). This article is narrated by "Taco" Bell. The Midway had been sent to WestPac seven weeks early for this cruise. The ship was steaming for their Pre-ORI drill when they were recalled to port and given short notice to get ready to pull out. On 18 May, the Midway launched three Alpha Strikes into North Vietnam. Bell flew with the CAG on the first one, leading a strike up into Hon Gai. Lt. Bell describes this strike operation in detail. Sometime between the bombing halt of 1968, and the renewed campaign against North Vietnam in 1962, a major television network aired a special report on the North Vietnamese Air Force on its nightly news program. The reporter built up the North Vietnamese Air Force as "a force to be reckoned with", indicating that if the United States ever decided to go back "Up North" they would run into stiff opposition. (23 May, 1972, 2 Mig-17s, F-4B, VF-161, CVW-5, CVA-41, A/C No. NF-100, BuNo 153020, LCDR Ronald "Mugs" McKeown, Lt. Jack Ensck); Mugs McKeown was asked if he had seen the news program and did he think that the North Vietnamese were as tough as the reporter made them out to be? McKeown's response was "If they want to

Object ID	Title	Author	Summary
			get me, they better bring a hundred!" His response was a manifestation of a growing confidence in the abilities of Navy fighter pilots in general.
2012.350.037	Duels in the Sky : World War II Naval Aircraft in Combat	Brown, Eric Melrose	Famed test pilot Eric Brown pits various allied and Axis aircraft against one another in theoretical combat to determine which deserve to be called the greatest.
2012.350.038	World War II War Eagles : Global Air War in Original Color	Ethell, Jeffrey L.	Warplanes from the 1939-145 era photographed in ASA 10 Kodachrome film with five emulsions that make the product virtually grainless. Contain 225 Kodachrome images, 12 22-inch foldout pages, four Boyd color profiles.
2012.350.040	Firepower : Aircraft Carriers	Jordan, David	Contents: Dawn of the aircraft carrier -- Aircraft Carrier war against Germany -- Pearl Harbor to the Coral Sea -- Victory in the Pacific -- Jets at sea: New Technology -- Vietnam: Carrier combat -- Rise of the Supercarriers -- British and French carriers -- Index and Picture credits. Includes: Firepower: Aircraft Carriers - Cutaway Illustrations, Performance, Specifications, Mission Reports
2012.350.041	WWII Air War : The Men, The Machines, The Missions	von Wodtke, Carl (ed)	A collection of accounts about aviation during World War II gleaned from the pages of Aviation History magazine. Keywords - Avenger, Zero, Doolittle, Bockscar, buzz bomb, Cactus Air Force, Ruhr dam,
2012.350.044	Hellcat	Anderton, David A.	Back in the 1980s, Crown Publishers put out a series of coffee-table books on WW II warbirds (P-51, Me 109, Spit, FW 190, etc.) written by various authors and featuring the exquisite artwork of Rikyu Watanabe. This 1981 release, a salute to Grumman's brutish war-winning Hellcat, combined the talents of Watanabe and David Anderton. In 56 pages, Anderton charts the development and combat history of the F6F. The Hellcat destroyed over 5,100 Japanese aircraft, compiling a never-to-be topped kill-loss ratio of 19

Object ID	Title	Author	Summary
			-to-1. Anderton's text is clear, concise and entertaining. The major draw in this and the other Crown books, however, was Watanabe's artwork...and it's magnificent as always. HELLCAT features several gatefolds, one of which - a triple-gatefold, color side profile of a VF-27 F6F - folds out to over three feet in length! Double-gatefolds of the F4F and F8F are also included as is a four-page gatefold showing the major USN and IJN aircraft of World War II, a triple-gatefold of the USS Yorktown, a six-view of an F6F-3, F4F three-view, F6F-5 cutaway, etc. And all for \$15.95 circa 1981! Despite the preeminent role the F6F played in World War II, it never received the historic coverage it deserved. While not definitive, the Anderton/Watanabe volume presents a comprehensive and wonderfully vivid portrait of this legendary fighter. By Michael OConnor "Wordsmith" (Wausau, WI USA)) (TOP 500 REVIEWER) (from Amazon.com)

2012.350.057	Koku-Fan, The	Koku-Fan	Japanese aircraft, World War II and earlier. Nakajima Type 1 Fighter "Hayabusa" Kawasaki Type 3 Fighter "Hien" Kawasaki Type 2 Two-seat Fighter "Toryu" Nakajima Type 4 Fighter "Hayate" (many others including biplanes)
2012.351.001	Female Tars : Women Aboard Ship in the Age of Sail	Stark, Suzanne J.	The presence of women on board the ships of the Royal Navy in the Age of Sail has been disregarded by historians and ignored and even hidden by the navy. Suzanne J. Stark is the first to seriously address the issue of female "Tars", and here she presents an in-depth study on the women who lived and worked on British warships of the eighteenth and early nineteenth century.
2012.352.001	Fighters : The World's Great Aces and their Planes	Park, Edwards	From Sopwith Camels to F/A-18 Hornets this volume spans the globe to trace the colorful history of fighter planes and their pilots. (from books.google.com) Excellent though slim survey of the history of dogfighting, May 4, 2001 By Rottenberg's rotten book review (nyc) The story of air warfare and fighter aircraft is almost as old as aviation itself. When war came shortly after the Wright brothers' first flight, it didn't take long for militaries to recognize the uses (though

Object ID	Title	Author	Summary
			not immediately offensive) of the airplane. This book goes back to those early, clumsy beginnings, tracing the history of dogfighting from the Red Baron until Desert Storm, with stops in Britain (as in "Battle of"), Korea and Vietnam. This is more of a coffee table book, and few aviation buffs will find anything that new. An historical survey of fighter aircraft is a bit ambitious for a single book, even as slim as this one. But the pictures are excellent, and the reading, if light, is engaging. The author also remains close to the humans who drive these killer machines - from brooding Frank Luke and the cold-blooded Richtoven to the WWII aces turned jet-age wing commanders like Robin Olds. The author wisely breaks down the periods rather than consolidate them, and also has separate chapters for each nation. It's in WWI chapters that the author shines - his tales of the early aces give those pioneer warriors the attention that usually goes to pilots of Mustangs, Sabrejets and Fulcrums. The technology was barely existent to get planes in the air, let alone coordinate them (no radar or wireless radio was available; even in the next war, Russian pilots preferred their slow and unmaneauverable lend-lease P-39 fighters over faster and more agile Yaks, because the American planes came with radio), and even tactics weren't rigidly enforced (German ace Boelke warned his squadromates against letting more than one plane attack an enemy, since in the fray, the two wingmen might collide - a fear that turned true when Boelke collided with a fellow Albatross while he and the wingmen concentrated on a single enemy plane). Even when air superiority was achieved, the weak technology of the age gave this little meaning - the British had air superiority over the Somme, yet still lost in one day more men than America

Object ID	Title	Author	Summary
			lost in a decade in Vietnam. Unfortunately, the story thins out after WWI, and the author feels comfortable enough to rely on the same material aviation fans have seen in countless forgettable discovery-channel documentaries. Although the pictures are great, the author runs out of stories to in them to. Nevertheless, the pictures are still enough reason for your resident flyin fool to appreciate. (from Amazon.com)
2012.352.002	Air Aces	Shores, Christopher	Describes the fighting careers of famous fighter pilots and places their victories in the context of their time. Tables give statistics on all wars since 1914 including lessers knowns like the indo-Pakistani war and the Russian revolution. More than 250 color and black and white photos of the aces and the aircraft they flew.
2012.353.001	Ensign Newman K. Perry and the USS Bennington Disaster	Riddle, Margaret K.	The story of a young naval officer, his beloved wife, Vipont, and the 1905 explosion of the gunboat Bennington in San Diego harbor that took his life.
2012.354.001	USS Midway (CVA-41) - Western Pacific Cruise - 1958-1959	May, Larry (ed)	A pictorial account of the life aboard USS Midway from the time of her recommissioning at Bremerton, WA in 1957 through the end of her WESTPAC cruise of 1958-59. Includes workups in southern California, and calls at Long Beach and San Francisco prior to deployment from her new homeport of Alameda on 16 August 1958.. Deployment port visits included Pearl Harbor, Subic Bay, Buckner Bay, Yokosuka, Hong Kong and Manila. Midway returned to Alameda on 8 March 1959. Onboard: VF-211 (F8U-1) VF-64 (F3H-2) VA-63 (FJ-4B) VAH-8 (A3D-2) VA-65 (AD-6) VFP-61 Det.A (F8U-1P) VA(AW)-35 Det.A (AD-5N) VAW-11 Det.A (AD-5W) HU-1 Det.1 (HUP-2)

Object ID	Title	Author	Summary
2012.355.001	Heavy Cruiser Takao, The	Skulski, Janusz	The Takao class of Japanese heavy cruisers was approved in the 1927-31 Programme. Four vessels were launched between May 1930 and April 1931, of which Takao was the first. These were genuinely aggressive ships, being fast, heavily armed with both guns and torpedoes, and well protected. They saw much action in the Pacific War between 1941 and 1945, and Takao, having survived a torpedo attack during the Leyte Gulf Battle preliminaries, was sunk by explosive charges from the British midget submarine XE3 in Singapore Harbour. After being refloated she was scuttled in the Malacca Straights in 1946.
2012.355.002	Pawns of War : The Loss of the USS Langley and the USS Pecos	Messimer, Dwight R.	Account of the sinking of the USS Langley, the pick up of survivors by the USS Pecos, and subsequent sinking of the Pecos. This book describes in detail the events that led up to the mission, the attack on the Langley by Japanese bombers, her abandonment and eventual sinking, the rescue of her survivors, and the attack on and the sinking of the USS Pecos, the fleet oiler that took on most of her crew.
2012.355.003	Iron Bottom Bay	Stone, John Scott	In Washington, Rear Admiral Richmond 'Kelly' Turner devised Operation Watchtower to turn the Pacific tide. Later, Bull Halsey would mention Operation Toenails. But Judd Barlow, Ensign, USNR, called the poorly planned, hastily executed sixteen month fiasco, "Operation Organized Confusion". And thereby hangs our tale.
2012.355.004	Requiem for a Fleet : The U.S. Navy at Guadalcanal, August 1942-February 1943	Freeman, Robert H.	Contents: Welcome Aboard -- 7-8 August 1942, The Invasion -- August 9, The Battle of Savo Island -- The Remainder of August 1942, The Battle of the Eastern Solomons -- Sept. 1942 -- October 11-12, The Battle of Cape Esperance -- October 15-16 -- War Neurotics -- Oct. 16 - Nov. 7, The Battle of the Santa Cruz Islands -- Nov. 12-15,

Object ID	Title	Author	Summary
			The Naval Battle of Guadalcanal -- Nov. 30, The Battle of Tassafaronga -- PT-boats -- 9 Dec. 1942 - 11 Feb. 1943, The Battle of Rennell Island -- Summation, Navy Medical Corps -- A Sampler of Casualties and Awards -- Troopship and Cargoship Casualties -- Ships, Casualties, and Sources
2012.355.005	Primer of Navigation : With Problems in Practical Work and Complete Tables	Mixter, George W.	Simple enough for the beginner, thorough enough for the more advanced student of navigation, this book should be read by every yachtsman interested in getting from one place to another across the seas. This "navigator's Bible" first published in 1940, now contains the newly-announced U.S. and British Sight Reduction Tables for Marine Navigation (H. O. Pub. No. 229) which are of major importance to celestial navigation. Also includes new international rules of the road, and the latest equipment such as the new compasses, speed indicators, and electronic depth finders.
2012.355.006	Battle History of the Imperial Japanese Navy, 1941-1945	Dull, Paul S.	This unique book based on hitherto unused Japanese sources tells the story of the Pacific War from the viewpoint of the Japanese themselves, focusing on both the celebrated and lesser-known sea battles.
2012.355.007	World War II Quiz & Fact Book, The	Benford, Timothy B.	Name the beaches at Normandy...the American baseball player who spied on Japan...the song the British stole from the Germans...Mussolini's mistress...the first member of Congress to enlist after Pearl Harbor...plus much more. This fingertip compilation of over 1000 facts in the form of questions and answers and 50 photographs covers the essential, the unusual, and the statistical military and political developments of WWII. Includes: Contents: Multiple Choice --- Code Names --- Messages and Quotations Quotes on War in General --- The War on Land --- The Air

			War Naval Operations and Sea Battles --- Historic Dates
2012.355.008	Merchant Marine Officer's Handbook	Turpin, Edward A.	The Merchant Marine Officers' Handbook has now been in use for 23 years and, the authors are happy to state, throughout this period it has never ceased to merit and maintain a foremost position of practical usefulness in the Merchant Marine field. The many changes in rules, regulations, and methods which arise from time to time have been incorporated, as complete as is humanly possible, in the six reprintings of the Handbook Since its inception. This has proved a strong point in its favor. It is noteworthy that several maritime academies have been using the book as a text. This encouraging fact alone has further urged both authors and the publisher to provide this New Edition, in order to maintain the Handbook's increasingly popular use for reference purposes on board ship, as well as to meet current requirements for the deck officer's license. EDWARD A. TURPIN WILLIAM A. MACEWEN
2012.355.009	Dutton's Navigation and Piloting	Dutton, Benjamin	A textbook on navigation and nautical astronomy, prepared for the instruction of midshipmen at the United States Naval Academy. Original edition (1926) by Commander Benjamin Dutton.
2012.355.010	Navigation and Nautical Astronomy	Dutton, Benjamin	A textbook on navigation and nautical astronomy, prepared for the instruction of midshipmen at the United States Naval Academy. Original edition (1926) by Commander Benjamin Dutton. Inscribed to K. L. Everett, the husband of the donor, from his Navigator.
2012.355.011	Hurricane Story, The	Gallico, Paul	The story of the Hurricane--the little single-seater airplane that stood forth against the Luftwaffe.

2012.355.026	Rules of the Road : International- -Inland	United States Coast Guard	This publication contains the International Regulations for Preventing Collisions at Sea (commonly called the International Rules of the Road), which must be followed by all public and private vessels of the United States (including motor-boats) while navigating upon the high seas. It also contains the Inland Rules of the Road to be followed by all vessels while navigating upon certain inland waters of the United States.
2012.356.002	USS Chandeleur, 1942-1945 - For Auld Lang Syne - The War Diary of the U. S. S. Chandler (AV-10)	Kimmell, Elmer L. (ed.)	A pictorial account of the seaplane tender Chandeleur during World War II in the period 19 November 1942 to 19 November 1945. 19 November 1942 is the date the ship was accepted by the Navy, one year to the day after it was launched. it participated in many operations and visited many islands/atolls in the South Pacific. It's PBV's were the first to sight the YAMATO as is made its death sortie toward Okinawa.
2012.356.003	Aircrewman's Gunnery Manual	Bureau of Aeronautics	A manual on the operation of the Browning 50 caliber machine gun as installed in aircraft to be operated by an aircrewman. Also addresses 30 caliber machine gun and 45 caliber pistol. Instruction on how to strip a machine gun, maintenance, how to load, aim, fire, correct jams, etc. Also covers ball turrets and drop turrets. Formerly RESTRICTED handling. Sections on This is Your Gun, Sighting and Shooting, Power Turrets.
2012.357.001	USS Midway (CV-41) - Movin' West - 1974	Hughes, Ken (ed)	Pictorial account of the change of homeports of USS Midway (CV -41) from Alameda, CA to Yokosuka, Japan in 1973 and other activities the ship engaged in through at least September

Object ID	Title	Author	Summary
			1974 when Midway entered the shipyard in Yokosuka. The ship departed the San Francisco Bay area on 11 September and arrived at Yokosuka on 5 October. No significant operations or exercises were noted other than a period of Refresher Training. Port calls in the period included, Hawaii, The Philippines, Hong Kong and Pusan.
2012.358.001	Instructions for the Operation and Installation of the Sperry Gyropilot	Sperry Gyroscope Co.	A manual for the operation and use of the Sperry autopilot. now manufactured in quantity for transport, military and private airplanes.
2012.359.001	Collection of Articles on Presentation Silver	Brown, Bonnie (ed)	The Midway has an exhibit of Presentation Silver that was originally given to the USS Toledo. After the Toledo's decommissioning, the silver went to the USS Kitty Hawk, and when the Kitty Hawk was decommissioned the silver became the property of the Naval Supply Systems Command. This notebook/binder gathers together several articles about the history and management of presentation silver. These include 1) OPNAV Instruction 4001.3, Policy and Procedures for the Management of Presentation Silver, 2) An email from James W. Cheevers, Associate Director/Senior Curator at the US Naval Academy Museum about the history of presentation silver. 3) Silver Magazine, November/December 1999 which includes: p. 15 a picture of the 40-inch bronze miner from the USS Arizona presentation silver; pages 24-33 an article by Sherry Langrock titled "Navy Ships' Presentation Silver--The Myths & the Mysteries, Part I. Photos include pictures from the services of the USS San Francisco, USS Macon, USS Lexington, a two-page color picture of the USS Arizona punch service; USS Castine, USS Houston, USS Massachusetts, a drawing for

Object ID	Title	Author	Summary
			the USS Marblehead, a photo of the lost clock from the USS Philadelphia, USS Michigan, USS New Jersey, and USS Denver. 4) Silver Magazine January/February 2000 which includes the second part of the Sherry Langrock article with the same title. Photos include silver from the USS Utah, USS Idaho, USS Salt Lake City, USS Wichita, USS Washington, USS Seattle, and USS Bremerton. Also included are articles about the USS Arizona Silver miner returns (pages 26-27), and "Silver on the High Seas : U.S. Navy Presentation Silver Services" An Interview with Kenneth R. Trapp (pages 36-40). 5) An article by Debbie Dortch of the Naval Supply Systems Command Office of Communications dated 1/14/2008 and titled "USS Indiana Presentation Silver Heads Home." 6) A short description of what Title 10 U.S. Code, section 7221 authorizes the Navy to do with presentation silver. 7) A short history of the USS Wisconsin silver copied from our book (2012.313.215, REF Box 1C). 8) A paragraph about silver on the Coral Sea copied from our book (2009.302.101 VA65 .C75 H1 2008). 9) Article by Ensign David L. Greger titled "A Salty Silver Service", a history of the USS California service beginning in 1907 and transferred to several aircraft carriers. (copied from the net at www.oocities.org/pentagon/6636/znews12.html). 10) An article titled "Wisconsin's Silver Service" from The Daybook of the Hampton Roads Naval Museum. 11) An article titled "The USS Iowa Silver Service Comes Home" from the Palimpsest, vol. 73, no. 4, Winter, 1992. 12) An article titled "Legacy of Elegance : The North Carolina Silver" by Michelle Saxton,

Object ID	Title	Author	Summary
			from Wrightsville Beach Magazine, March 2011, pages 16-21. 13) An article titled "The Silver Service of the USS Arizona" by L. J. Priston, from Silver, November-December 1994, pages 10-17. 14) An article titled "The Battleship U.S.S. Arkansas and Its Silver" by Charles S. Curb from Silver Society of Canada Journal, Vol. 11, pages 34-45, 2008 (http://silversocietyofcanada.ca/sites/default/files/USSArkansas.pdf) 15) Booklet titled "Washington State's Executive Mansion" published by the Governor's mansion Foundation. Includes pictures of the USS Washington silver on display in the governor's mansion, Olympia, Washington. (filed in the back pocket as it is oversized). No date. 16) Booklet titled "Silver Service : U.S.S. Florida. No author stated. No date.. Includes statistics about the battleship, photos and names of the Silver Service State Committee, and drawings of the silver. Reprinted in 2011. 17) Booklet titled "Indiana's Gift to the Battleship Indiana : Story of the Subscription Account of the Presentation Description of the Silver Service : List of Books and Names of Subscribers." No author stated. Gives history and cost of acquiring the silver for the battleship. No pictures. Reprint, but without dates. 18) Duplicate of 2013.303.002 "Mermaids and Saguaro." 19) Duplicate of 2012.313.215 The U.S.S. Wisconsin : A History of Two Battleship."
2012.359.002	Collecting American 19th Century Silver	McClinton, Katharine Morrison	This book was added to the collection because of its chapter "American Navy Battleship and Cruiser Silver," pages 171-185. All the pictures are black and white. Pictures from Navy ships include: USS Maryland USS Maine USS Detroit

Object ID	Title	Author	Summary
			USS New Orleans USS Helena (Gunboat) USS Florida USS Montgomery USS Minneapolis USS Charleston USS Nashville USS Chattanooga USS Maryland USS Pennsylvania Other Navy ships are also mentioned.
2012.359.003	Gorham Silver, 1831-1981	Carpenter, Charles H.	During the height of presentation silver to the navy, most of it was made by Gorham. Pages 267-268 discusses United States silver services for naval vessels, pages 174-179 gives a list of ships for which Gorham made silver, and there are illustrations of presentation silver from the USS Long Beach (p. 267-268); USS Minneapolis, (p. 175-176); USS New Orleans (p. 175-176); USS Rhode Island (p. 176-177); and USS Utah (p. 175-177).
2012.359.004	Marks of Achievement : Four Centuries of American Presentation Silver	Warren, David B.	This book is from an exhibition held at the Museum of Fine Arts, Houston. Included in the book are several pages on US Navy silver. Articles include: battleship silver, (p. 136-137 and 166-169); construction of vessels for, (p. 106); US Navy and foreign privateers, (p. 88-89, and 106); the Monitor, (p. 116); the US Navy and the Riggin incident, (p. 163), and the War of 1812 silver, (p.107, 109-10, 112-13).
2012.360.001	Engineering the F-4 Phantom II : Bugos, Glenn E. Parts into Systems		Conceived in 1953 in a chickenwire-covered cubicle known as the advanced design cage at McDonnell Aircraft, the F-4 Phantom II fighter-bomber was produced for 25 years, serving a full workload in Vietnam for the Navy, Marines, and Air Force, and surviving through the 1990s in the air arms of eleven nations. While most case studies of modern aircraft focus on the many ways the military-industrial complex goes wrong, this trenchant, invigorating study looks deeper at how those who built the complex intended it to work.

Object ID	Title	Author	Summary
			Step by step the reader discovers how the relationships among parts, systems, procedures, economies, and missions were shaped by relationships among people--scientists, engineers, testers, program managers, subcontractors, military strategists, pilots, and corporate leaders. Drawing on exhaustive research, including interviews with key players, the author makes a major advance in the burgeoning body of literature on technology management by showing how McDonnell worked through the problems of technical integration that plagued defense engineering in the 1960s and 1970s and led to programs full of "complexity." It is as much a study of how aircraft manufacturers and military officers went about their business as it is a life-and-times history of an important aircraft.
2012.362.001	USS Jarrett FFG-33 - Middle East Forces Deployment - 1998	None Stated	This is a pictorial account of the 24 June 1998 to 7 December 1998 deployment of the USS Jarret. Ports of call include San Diego, CA - Pearl Harbor, HI - Kota Kinabaw, Borneo - Singapore - Phuket, Thailand - Bahrain - Saudi Arabia - Dubai, UAE - Qatar - Bali - Darwin, Australia.
2012.362.002	USS Stein - The Last Westpac - 1991	Stengel, Joe (ed)	A pictorial account of the 1991 WESTPAC cruise. Port calls include Subic Bay, Philippines - - Penang, Malaysia -- Abu Dhabi, Jebel Ali, Dubai UAE -- Dammam, Saudi Arabia -- Muscat, Sultanate of Oman -- Pattaya, Thailand -- Hong Kong.
2012.363.001	USS Midway CVB 41 Mediterranean Cruise 1952	Fox, Duane C. (ed)	Pictorial account of the 126-day deployment of USS Midway (CVB-41) to the Mediterranean Sea in 1952. The ship departed Norfolk, VA on 12 January and returned to Norfolk on 5 May. Port visits included Gibraltar, Augusta, Naples, La Spezia, Genoa, Palermo, Gulf Juan, Suda Bay, Athens and Palma. Onboard: Carrier Air Wing Six (CVW-06) VF-21 (F9F-2)

Object ID	Title	Author	Summary

2012.366.001	USS Midway (CVA-41) - World Cruise - 1954-55	Patureau, Alan C. (ed)	Pictorial account of the world cruise of USS Midway in 1954-55, conducted as Midway was changing homeports from Norfolk, VA to the west coast of the U. S. The ship departed Norfolk 27 December 1954 and transited to the Pacific via the Cape of Good Hope. She operated in the western Pacific with the U.S. Seventh Fleet, conducting the Formosa Straits patrol and other fleet exercises and maneuvers in the South China Sea. She arrived at her new homeport of Alameda, CA on 14 July 1955. She remained there for only a week before proceeding north for a major overhaul at Bremerton, WA which commenced on 3 August 1955. Port calls during her deployment included Mayport, Capetown, Colombo, Manila, Hong Kong, Yokosuka and Pearl Harbor.
2012.367.001	It's Your Ship : Management Techniques from the Best Damn Ship in the Navy	Abrashoff, Michael D.	The story of the author's command of the USS Benfold and the management and leadership tools he employed in the execution of his duties.
2012.367.002	Carlson's Raid : The Daring Marine Assault on Makin	Smith, George W.	Departing Pearl harbor on 8 August 1942, 219 men of Carlson's Raiders, including the president's son, Maj. Jimmy Roosevelt, traveled 2,000 miles to the Gilbert Islands in the submarines Nautilus and Argonaut. Landing on Makin Atoll on 17 August, the marine Raiders captured the atoll in two days of heavy fighting. Before leaving, they destroyed a radio station, burned Japanese equipment, and captured a trove of documents that proved to have significant intelligence value. Additional Navy ships listed in the book are: USS Arizona, USS California, USS Enterprise, USS Grayling,

2012.369.001	USS Enterprise (CVN-65) - Power In Motion - 1989-1990	Judkins, James T. (Ed.)	A pictorial account of the 1989 - 1990 world cruise of the USS Enterprise. Events included PACEX-89, ANNUALEX, VALIANT BLITZ, Operation Classic Resolve. Ports of call included Hong Kong, Subic Bay, Pattaya Beach, Singapore, Rio De Janeiro, Saint Thomas.
2012.369.002	USS Carl Vinson (CVN-70) - Carl Vinson Chronicles, Vol. 8 - 1995	Gist, Christopher J. (ed)	A pictorial account of the USS Carl Vinson's 1994 WESTPAC cruise. Included is a visit to the Carl Vinson by President Bill Clinton and pictures from Operation Southern Watch monitoring the "No fly zone" above Iraq. The ship made port visits at Hawaii, Yokosuka, Hong Kong, Singapore, Jebel Ali. During the cruise, two documentaries were filmed on board the ship. The first, produced by ABC Corporation, detailed the Carl Vinson's Chaplain's department. The second, produced by The Discovery Channel, featured daily life on board an aircraft carrier.
2012.370.001	Jane's Fighting Ships - 1939	McMurtrie, Francis E. (ed)	Jane's Fighting Ships is an annual reference book (also published online, on CD and microfiche) of information on all the world's warships arranged by nation, including information on ship's names, dimensions, armaments, silhouettes and photographs, etc. Its annual editions cover the warships used by the different national naval and paramilitary forces, and provide data on their characteristics. It was originally published by John F. T. Jane (usually known as "Fred T.") in 1898 as Jane's All the World's Fighting Ships. Its success launched a number of military publications carrying the name "Jane's". It is a unit of Jane's Information Group, which is now owned by IHS.

Object ID	Title	Author	Summary
	Fighting Ships - 1898		A collectors' item and reference tool This is a facsimile edition of the first issue of "Jane's Fighting Ships." Like other editions recently successfully reprinted by Arco, it is both a collectors' piece and a reference tool. It has the added interest of being the first attempt to bring to public notice a full account of the world's navies. Pictures, dimensions, tonnages, armament details are here for scholar or enthusiast with all their implications for the history we ourselves have lived.
2012.370.005	Mighty Mo : The U.S.S. Missouri : A Biography of the Last Battleship	Newell, Gordon R.	USS Missouri (BB-63) ("Mighty Mo" or "Big Mo") is a United States Navy Iowa-class battleship, and was the third ship of the U.S. Navy to be named in honour of the US state of Missouri. Missouri was the last battleship built by the United States, and was the site of the surrender of the Empire of Japan which ended World War II. Missouri was ordered in 1940 and commissioned in June 1944. In the Pacific Theater of World War II she fought in the battles of Iwo Jima and Okinawa and shelled the Japanese home islands, and she fought in the Korean War from 1950 to 1953. She was decommissioned in 1955 into the United States Navy reserve fleets (the "Mothball Fleet"), but reactivated and modernized in 1984 as part of the 600-ship Navy plan, and provided fire support during Operation Desert Storm in January/February 1991. Missouri received a total of 11 battle stars for service in World War II, Korea, and the Persian Gulf, and was finally decommissioned on 31 March 1992, but remained on the Naval Vessel Register until her name was struck in January 1995. In 1998, she was donated to the USS Missouri

2012.371.007	Flyboys : A True Story of Courage	Bradley, James	carriers and their uses; the great sea battles and the national aims or strategies which caused A true story of what happened to eight fliers who where shot down over the island of Chichi Jima during World War II. In 1945, American flyers, 'flyboys', were ordered to take the communications station on Chichi Jima, an island north of Iwo Jim. "Iwo Jim was coveted for its airstrips, Chichi Jima for its communications stations. Powerful short- and long-wave receivers and transmitters atop Chichi's Mount Yoske and Mount Asahi were the critical communications link between Imperial Headquarters in Tokyo and Japanese troops in the Pacific. The radio stations had to be destroyed the U.S. military decided and the Flyboys had been charged with doing so. Eight American airmen were downed in water in the vicinity of Iwo Jima.... The truth of their demise was kept secret. The U.S. government decided the facts were so horrible that the families were never told. Over the decades, relatives of the airmen wrote letters and even travelled to Washington, DC in search of the truth. Well-meaning bureaucrats turned them away with vague cover stories."
2012.371.008	Top Guns : America's Fighter Aces Tell Their Story	Foss, Joe	In this unique volume the authors, two prominent, highly decorated war veterans, present the extraordinary stories of 27 of the greatest fighter aces of the 20th century. Brought together for the first time, here are the war experiences of a few great men who helped to make history. Photographs throughout. (from books.google.com)
2012.371.010	Introduction to Naval Aviation	Chief of Naval Operations	General history of Naval Aviation through October 1945. Chapters include: 1) Concept of U. S. Naval Aviation, 2) History of Naval Aviation, 3) Organization of Naval Aviation, 4) The Aircraft Carrier, 5) Naval Aircraft, 6) Naval

2012.371.011	Imperial War Museum Duxford	Crosby, Frank	Exhibit guide to the Imperial War Museum at Duxford Airfield, UK.
2012.371.012	Bill Bolton--Flying Midshipman	Sainsbury, Noel	This work is part of a four volume series about Bill Bolton, a fictional character, and his adventures in Naval Aviation. The other books in the series are: Bill Bolton and Hidden Danger Bill Bolton and the Flying Fish Bill Bolton and Winged Cartwheels
2012.371.013	US Naval Aviation Training, Corpus Christi, TX - 1946 - Ten and Four : Or Five and Two If You Are Lucky	Wharton, Charles L (ed)	A yearbook for flight training classes at Corpus Christi Texas Naval Air Station. Includes a picture of Harold Nemer (Hal), a Midway Docent. Title page contains the author as Naval Aviation Training, Corpus Christi, Texas. Includes chapters on N.A.I.F.S., Squadron VT-2A, Squadron VT-2C, Ground School Training, and Fubar and Fancy Free. There is no date, but the Commanding Officer was RADM Sprague who was the Commander from August 1946 to April 1948. Hal Nemer is in this book, and he entered the Navy in 1945. So we are guessing the book was published in 1946.
2012.371.015	Blue Devils, The : US Navy & Marine Corps Aces of World War II	Styling, Mark	When America was plunged into war in the wake of the surprise attack on Pearl Harbor on 12-7-41, the first aircraft to take the fight to the Japanese were manned by naval aviators flying from Pacific Fleet aircraft carriers that had miraculously escaped the carnage in Hawaii. Escorting bombers attacking the

Object ID	Title	Author	Summary
			Imperial Japanese Navy, a handful of Wildcats succeeded in fending off attacks by the superior A6M Zero-sen fighter. This pugnacious Grumman fighter held the line in the Pacific until the arrival of better aircraft in the shape of the Corsair and Hellcat during 1943. Both types duly proved more than a match for their Japanese counterparts to the point where the Hellcat was dubbed the "ace maker".
2012.371.016	Age of the Biplane, The	Bowyer, Chaz	Chaz Bowyer, internationally recognized as a leading authority on British aircraft and the men and women who flew them, now recalls the "golden years" of the biplane, tracing the progress of aircraft design and focussing on the ideas, men and planes of that nostalgic era. here are the principal airplanes-- the Camel, Nieuport, Fokker, Albatros, Curtiss, Boeing, Gloster and a hundred others--their advantages and faults, their importance in military and commercial aviation progress, the famous and, occasionally infamous, planes of history. Illustrated with 250 photographs, many in color.
2012.371.017	Warplanes & Air Battles of World War I	Fitzsimons, Bernard (ed)	In this book the authors tell the story of the first war planes and of the pilots who flew them. The expert descriptions of the development of the warplane, and the personal accounts of th men who fought in them, combine with the hundreds of photographs and drawings to make this a uniquely readable and informative book.
2012.371.018	Mosquito	Sweetman, Bill	During World War II the de Havilland team gambled on a structure built almost entirely of wood. The Mosquito was intermediate in size between a typical fighter and a heavy bomber. It was powered by two V-12 Rolls-Royce Merlin engines, and it carried a crew of two. It could cruise well above 30,000 feet and had a range of more than 1,700 miles. It could carry a heavier bomb load than the Boeing B-17. Since all guns were mounted forward, it

Object ID	Title	Author	Summary
			was defenseless if attacked from behind, but with an airspeed in excess of 400mph, it was the fastest combat aircraft possessed by any nation in the early years of the war. The plane did have problems--it was difficult to fly and required experienced pilots, particularly in tropical, humid climates where the wooden structure would shrink or swell, producing unpredictable flight characteristics. The casein glue used on early models was subject to attack by micro-organisms and would decay like cheese.
2012.371.019	Fighters at War : The Story of Air-to-Air Combat	Spick, Mike	This fact-filled volume takes us through the evolution of one of the most potent weapons ever invented - the fighter, the warplane dedicated to air-to-air combat. The author relates how the basic tactics of air fighting were born, tactics that are as valid today as then. There is a separate chapter on Naval Air Power, 1941-1945.
2012.371.020	Aircraft of World War II	Jackson, Robert	This book profiles 35 planes, and his earlier book on the same subject has 75 planes. This book was reviewed by Michael O'Connor on Amazon.com. He states "While I've seen fairly good computer artwork of airplanes, it ain't in this book! The artwork is inaccurate and reproduced very poorly." He says the shapes are wrong and the colors too dark. However, 35 planes are profiled, from the legendary Supermarine Spitfire and P-51 Mustang to innovative designs such as the Messerschmitt Me 262 and Boeing B-29. Each aircraft is presented in a unique seven-view format, showing not only the left and right profiles and top and front views, but also the view from the rear, and also from below, which reveals the weapons hardpoints or bomb bay, and the undercarriage configuration. Inscribed on the title page.

2012.371.023	Brassey's Air Combat Reader	Boyne, Walter J. (ed)	"Anyone interested in the history of air warfare will treasure this wide-ranging anthology." -U.S. Naval Institute Proceedings Product Description Showcasing the twentieth century's best writing on the topic of air combat from World War I through the Gulf War, Brassey's Air Combat Reader examines the evolution of air combat strategy and tactics. It includes extracts from memoirs by such legends as Antoine de Saint-Exupéry, hair-raising third-person accounts by such great pilots as Douglas Bader and by such heroic leaders as Pete Mitscher, and one compelling work of fiction by best-selling novelist Walter Boyne. Classic writings on the art and science of air warfare by visionaries Billy Mitchell, Giulio Douhet, and others trace the evolution of military aviation. Philip Handleman concludes with an insightful chapter about the future of air warfare. (Source: Amazon.com) Dust jacket: Historic Feats

Object ID	Title	Author	Summary
2012.371.024	Douglas F4D Skyray	Williams, Nick	and Aviation Legends This copy signed by Steve Ginter on page 2. The Skyray is another one of those aircraft that were designed, developed, tested and forced into operations during the turbulent early 1950's when it seemed possible to build any type of combat aircraft from the weird to the wonderful. Some of these aircraft were to have very positive benefits from the innovative designs and new systems tried. At the same time, these aircraft often would have some very unforgiving or dangerous flying characteristics, which never were fully overcome. The Skyray fell into this category too, as many of its design parameters fell into the range of the unknown. This was a common occurrence during this timeframe as manufacturers were pushing technology beyond its established limits. --Steve Ginter (from ginterbooks.com:) 188 PAGES, 388-B&W PHOTOS, 28-COLOR PHOTOS, 13-PAGES DRAWINGS
2012.371.025	Convair XF2Y-1 and YF2Y-1 Sea Dart	Long, B. J.	(from ginterbooks.com:) The Sea Dart test program began in December 1952 and ended in late 1957 with the three test aircraft performing over 300 test operations. All tests were conducted from the Convair San Diego Bay seaplane ramp. Four Convair engineering test pilots were involved, plus several Navy test pilots from the Naval Air Test Center, Patuxent River, Maryland. Five Sea Dart aircraft were built. Only three were flown, with four aircraft still in existence today. The second aircraft crashed on 4 November 1954, and the last two aircraft were completed as airframes only, without the engines ever being installed.

Object ID	Title	Author	Summary

2012.371.028	U.S. Naval Fighters : Navy/Marine Corps 1922 to 1980s	Jones, Lloyd S.	Generally chronological account of 78 U.S. Navy and Marine Corps fighters produced by 25 companies from the Vought VE-7 to the McDonnell Douglas F/A-18 with B/W photos and three-view plan drawings of most.
2012.371.029	History of Aerial Warfare, A	Taylor, John W. R.	In this history of aerial warfare, the author takes as his starting point the prescient theories of the 17th century Jesuit, de Lana Terzi. he deals with the early reconnaissance balloons, the work of the Wright brothers, the Zeppelins, the aircraft of both World Wars, those of the post-1945 "cold war", and the sophisticated and lethal weaponry of the nuclear age. In addition, he contributes an important chapter on the inter-war years, when the R.A.F.'s sue of the airlift and the development of the concept of air control provided a significant pointer to the future of air operations. he also discusses the role of the helicopter in Vietnam, and the paradox of technology in this theatre of war which saw both the development of super-sophisticated pilotless reconnaissance aircraft and the reintroduction of turboprop aircraft in a limited strike capacity.
2012.371.030	Fighter Aces	Shores, Christopher	Very similar to Shore's later book "Air Aces" published in 1983 which we have. Describes the fighting careers of famous fighter pilots and places their victories in the context of their time. Has 130 photos.
2012.371.031	Aircraft Carriers	Preston, Antony	This appears to be an abridged version of Preston's 1979 book which we have. This book has colored photos whereas the 1979 version does not.
2012.371.032	Jane's Encyclopedia of Aviation	Taylor, Michael John Haddrick (ed)	Material culled from all of Jane's manuals from 1909 to the present features vital statistics to more than five thousand air and space craft, including records, specs, aircraft function, and photographs.

2012.371.036	Navy Air Colors : United States Navy, Marine Corps, and Coast Guard Aircraft Camouflage and Markings Vol. 1, 1911 - 1945	Doll, Thomas E.	INTRODUCTION: Of all the facets of aviation history; painting schemes, national insignia, organizational markings, unit badges, and personal emblems are the most difficult to document. Specifications, Technical Orders, Letters, and Memoranda are basic sources of data. Photographs and personal recollections, while mostly supportive, are often contradictory and/or misleading, if not viewed as variations to the norm. Implementation of official directives issued by the Bureau of Aeronautics and Fleet and Force Commanders could take months to become effective. Unit custom and/or command prerogatives resulted in variations that were sometimes major in scope. Many of these will be noted in the text and photographically. From the procurement of its first aircraft in 1911, through World War One, Navy and Marine Corps aviation was almost entirely coast based. Seaplanes (695) and flying boats (1,170) far outnumbered the 242 landplanes on hand on 11 November 1918. In general, color was basic and markings were simple. The slow but steady growth between the two World Wars took landplanes to sea aboard aircraft carriers and placed float planes on all battleships and cruisers. Continuing organizational changes were a natural result, with

Object ID	Title	Author	Summary
			corresponding changes in color and markings. The tremendous expansion during World War Two brought major changes in painting schemes and for a time, a near disappearance of unit markings. In consideration of these variables, therefore, the authors have attempted to describe the evolution of the color schemes and markings carried by aircraft and airships of the United States Navy, Marine Corps, and Coast Guard from 1911 through 1945. In so doing, every effort has been made to correlate the "official" with the "visual" record and to resolve the many ambiguities thereby disclosed. Two childhood best friends, Rafe and Danny, grow up wanting to fly planes. When Rafe gets the chance to join the Royal Air Force during World War II, he takes it, leaving his new love, Evelyn, a dedicated Navy nurse, and Danny, also a pilot, behind. Danny and Evelyn are transferred separately to the idyllic paradise of Hawaii, where they eventually meet through a connection to Rafe, who has been declared missing. But just as the love triangle begins to get complicated, Dec. 7, 1941 arrives, changing all of their lives forever. Information from pre-release promotional materials; release date: Dec. 4, 2001./ Originally produced as a motion picture in 2001./ Special features: "Unsung heroes" historical documentary; Faith hill

2012.377.001	Aviation Art of Keith Ferris, The	Ferris, Keith	In the world of aviation painting Keith Ferris is a name to conjure with--he is justly famous, not only for the drama and beauty of his action paintings but for the absolute accuracy of each subject. In a personally written Introduction to over forty color plates in this volume he describes how he achieves his extraordinary effects.
2012.377.002	Band of Secrecy : A Sea Story from the Battle of Pearl Harbor	Harding, Warren G.	An anecdotal story of W. G. Harding's experiences aboard the USS California (Battleship) while moored in Pearl Harbor, 7 December 1941. Included in the book is an artist conception of Pearl Harbor before the attack, and photos of the attack on Pearl Harbor, photos of the USS Arizona band (all of whom died on the ship), the USS California after the attack, some graphic drawings of men dying, USS California band, several pictures of Lovine B. "Red" Luckenbach, several pictures of Dave Kennedy, pages 144-157 are x-rated, pages 169-229 list individual bios of members of the USS California band, and Log Twelve contains the author's opinion that the US

Object ID	Title	Author	Summary
			government knew that Japan would attack us. Here is another description by NG : This book is a personal narrative which focuses heavily on the events of Pearl Harbor from the viewpoint of the author. He was a band member aboard the USS California during the attack. His ship was heavily damaged and ordered abandoned. Because of flooding within the ship his damage control team was ordered not to break watertight integrity-To shelter in place until a rescue could later be managed. The author received this message over the ships internal communication system but kept it a secret from the rest until later in the day. Many hours later in the day the author informs his fellow shipmates that the ship had been abandoned long before. Later a member of their party escapes the compartment they are trapped in by climbing 6 decks through an air shaft to the main deck above. He later returns and rescues the author and the other trapped sailors. The story continues on with various other sea stories and short biographies of people he once knew while serving in the navy. Later in the war the author and other members of his band are later tasked as computer operators, working with early punch card computers in order to break the Japanese message coding system.
2012.377.003	Emperor's Last Soldiers, The	Masashi, Ito	The Emperor's Last Soldiers is a first person account by Ito Masashi of his 16 years spent holding out in the jungles of Guam. The story begins with Masashi's drafting into the Japanese Military and continues on through his trials and tribulations along with his comrade Minakawa. The two are eventually captured and returned to Japan to a hero's welcome well after the war's end.
2012.377.004	Illustrated History of Seaplanes and Flying Boats, An	Allward, Maurice	In this heavily illustrated book, Maurice Allward records the history or a unique period in

Object ID	Title	Author	Summary
			the story of aviation. For a brief period of forty years, the flying boat and its smaller counter-part, the float plane, were a familiar sight of the flying scene. Without the need for runways, the great flying boats pioneered the air routes of the world in peace, and roved the oceans protecting shipping in time of war. It was a float plane, the famous Supermarine S6Bm which won the Schneider Trophy outright for Britain and proved to be the test-bed for the magnificent Spitfire of World War II. Maurice Allward, himself a pioneer in this era, tells the story with great enthusiasm and illustrates the test with many rare photographs.
2012.378.003	USS Ticonderoga (CVS-14) - 1971 - T-GRAM '71	Gay, William A. (ed)	A pictorial account of the carrier's first Westpac deployment in her ASW configuration as part of ASW Group Three. The ship departed San Diego on 11 March 1971 and returned on 7 July, having steamed some 28,000 miles. Port visits included Pearl Harbor, Subic Bay, Singapore, Hong Kong, Yokosuka and Sasebo. 2013.301.002	Beneath the Waves : The Life and Navy of Capt. Edward L. Beach Jr.	Finch, Edward F.	One of the U.S. Navy's best known submarine officers, Capt. Edward L. Beach, enjoyed fame both as a bestselling author and as a highly decorated naval officer. Not long after the success of his first novel Run Silent, Run Deep, which was later made into a major feature film, he commanded the first submarine to circumnavigate the globe submerged. During World War II, Beach earned ten decorations for gallantry, including the Navy Cross, while on twelve combat patrols in the Pacific. Following the war, he

Object ID	Title	Author	Summary
			became the public face of the submarine community and served as an aide to the first chairman of the Joint Chiefs of Staff and to President Dwight D. Eisenhower. All the while, he continued to write books, a total of ten, including three novels, before his death in 2002. This biography tells the story of Beach's remarkable life, weaving together his joint careers and offering insights into his experiences at sea and in the White House and on Capitol Hill."--Publisher's description
2013.301.003	Fit to Fight : Pearl Harbor Naval Shipyard, 1908-2008	Pearl Harbor Naval Shipyard Association	On May 13, 1908, Congress established what would become a national treasure: Navy Yard Pearl Harbor. Through a century of conflict and change, the "No Ka Oi" Shipyard has kept the U.S. Pacific Fleet "Fit to Fight." At critical times in American history, such as the battle of Midway, the Shipyard made the difference between victory and defeat. Fit to Fight is the story of this shipyard's first century of service, and the men and women who made her great. It is also the story of the shipyard's tremendous socio-economical impact on the State of Hawaii. It is illustrated with rare photographs not previously accessible to the general public. It tells the history of the shipyard and examines plans for its next century of service.
2013.301.006	American Sniper : The Autobiography of the Most Lethal Sniper in U.S. Military History	Kyle, Chris	Gripping, eye-opening, and powerful, American Sniper is the astonishing autobiography of SEAL Chief Chris Kyle, who is the record-holding sniper in U.S. military history. Kyle has more than 150 officially confirmed kills (the previous American record was 109), though his remarkable career total has not been made public by the Pentagon. In this New York Times bestselling memoir, Kyle shares the true story of his extraordinary decade-long career, including his multiple combat tours in Iraq (Operation Iraqi Freedom) and

Object ID	Title	Author	Summary
			elsewhere from 1999-2009. Kyle's riveting first-person account of how he went from Texas rodeo cowboy to expert marksman and feared assassin offers a fascinating view of modern-day warfare and one of the most in-depth and illuminating looks into the secret world of Special Ops ever written.
2013.301.007	Electric Ship Propulsion	Robinson, Samuel Murray	It is assumed that the readers of this volume will have an elementary knowledge of the theory of steam turbines, electric generators, induction motors, etc. An attempt has been made to cover as thoroughly as possible the special points that arise in connection with the propulsion of ships by electricity and to compare this method with others that are already in use or projected. Chapters include: I) History of electric Propulsion and Types of Ships for Which it is Best Adapted II) Systems of Propulsion III) Propeller Characteristics IV) Characteristics of Alternating Current Motors and Generators for Ship Propulsion V) Special Characteristics of Turbines and Governors for Electric Propulsion VI) Ventilation, Heaters, Fire Extinguishers VII) Switchboards, Interlocks and Controls VIII) Wire, Cable, Insulators and Insulation IX) Exciters and Other Auxiliaries X) The Jupiter (cargo vessel) XI) The U. S. S. New Mexico (BB-40) XII) The California, Maryland and West Virginia (BB-44, BB-46, BB-48) XIII) The Tennessee, Colorado and Washington (BB-43, BB-45, BB-47) XIV) United States Battle Cruisers and Battleships Nos. 49-54 XV) The Wulsty Castle (cargo ship) XVI) Diesel Electric Drive XVII) Care and Upkeep

2013.301.008	Organizational Mainenance Testing and Troubleshooting, Seat, Canopy, Survival Equipment and Boarding Ladder Navy Model F/A-18C and F/A- 18D 164196 and UP.	Commander, Naval Air Systems Command	This is a duplicate of a manual in the Air Wing collection. Both manuals are Change 5 only--not the entire manual. This manual provides standardized procedures for servicing seat, canaopy, survival equipment and boarding ladder for the F/A-18C and F/A-18D 164196 and up.
2013.301.009	Bob Hope : A Life In Comedy	Faith, William Robert	From Amazon.com: Reporter: "What's it like to be Bob Hope?" Hope: "I wouldn't have it any other way." From Bob Hope's early career as an upstart among professionals like Jack Benny and Milton Berle in the rollicking world of traveling comedians, to his blazing success as a radio, television, and film star, this completely revised and updated version of William Faith's acclaimed biography takes a straightforward, appreciative, and very funny look at Hope's life and times on the occasion of his 100th birthday. Filled with anecdotes, photographs, and plenty of jokes, the book reveals the real Bob Hope from his boyhood in England and youth in Cleveland to his present status as a living legend-a full-blooded, authentic appraisal of the man and his humor, a comic institution who is also a brilliant businessman, manipulator of the media, and politically influential figure. And of course Hope is the man who brought laughter and cheer (and long-legged beauties) to GIs throughout the world. At a time when patriotic fervor has never been running higher it's worth recalling the singular tribute paid Hope by none other than John Steinbeck: "When the time for recognition of service to the nation in wartime comes to be considered, Bob Hope should be high on the list.... He gets laughter wherever he goes from men who need laughter." Happy 100th, Bob! William Robert Faith worked as Bob Hope's public relations representative for fourteen

			years. A professor at the University of Southern California's School of Journalism, he lives in Burbank, California.
2013.301.010	Beyond Glory : Medal of Honor Heroes in Their Own Words	Smith, Larry	From Amazon.com: This first oral history of living Medal of Honor winners evokes Flags of Our Fathers with stirring accounts of patriotic valor. This New York Times best-selling account of battlefield courage celebrates the larger-than-life sacrifices of those awarded the nation's highest honor for valor in combat. Exclusive interviews with these twenty-four men—firsthand accounts of battlefield sacrifice from the greatest generation to Vietnam, along with before-and-after stories—form the core of this classic work. The recipients, as portrayed here, represent a cross-section as diverse as America itself—officers and enlisted men; African Americans, Hispanics, and Caucasians; men who went on to become famous (Daniel Inouye, James Stockdale, Bob Kerrey) and others who returned proudly to small towns. Beyond Glory, in the voices of these heroes, is a testament to the courage of the American nation.
2013.301.011	Once a Marine : An Iraq War Tank Commander's Inspirational Memoir of Combat, Courage, and Recovery	Popaditch, Nick	Known as "The cigar marine" from an AP photograph taken April 9, 2003, this is the story of Gunnery Sergeant Nick Popaditch from his tours in Iraq, to his injuries which left him legally blind and partially deaf, and to his struggle to remain a true marine.
2013.301.013	In the Cockpit : Fly Low! Hit Hard!	None Stated	This is part of a six part series: 1) Fly Low! Hit Hard!, 2) Target Tank, 3) Flat Tops (we have a DVD of this 2008.301.008), 4) Eagles in the sky, 5) Red Star, and 6) Spies in the sky. Attack aircraft, and their advanced weaponry, are amongst the most awesome weapons on today's battlefield. Speed into action with many of the best-known modern ground attack machines as they streak over enemy lines to deliver

Object ID	Title	Author	Summary
			their deadly payloads of rockets, guided weapons, and bombs. Includes : Corsair II (Jet attack plane) Skyhawk (Jet attack plane) Skyraider (Attack plane) Douglas A-1 Skyraider (Attack plane) Airplanes, Military -- Audio-visual aids. Air warfare. Air warfare -- Audio-visual aids. "Fly Low, Hit Hard" takes you to Vietnam as you fly with the nimble A-4 Skyhawk, the mighty F-4 Phantom, and the carrier-borne A-7 Corsair. Then move on to such international aircraft as the battle-proven Israeli Kfir, Anglo-French Jaguar and Tornado. See why the USAF's A-10 Thunderbolt II has become the most feared tank-buster in the world. Join Warthog pilots wheeling and lurking over the battlefield, before zeroing in to blast armor with devastating 30mm cannons that can rip most modern tanks apart in seconds. Color • Running time approx: 60 minutes (from slipcase rear)

2013.301.030	USS Midway (CV-41) - Chapel and Chapel Restoration	USS Midway Museum	This is a CD of pictures in two parts. The first part is a collection of photos taken by Clint Griffin of the Chapel Restoration which took place from 14 April 2008 to 13 November 2008. The second part is a collection of photos of the chapel and religious events that took place when CDR Paul W. Murphey was chaplain (1985-87 and 1990-91).
2013.301.031	Disaster at D-Day : The Germans Defeat the Allies, June 1944	Tsouras, Peter G.	From Amazon: What might have been if the Allied invasion of Europe in June 1944 didn't have the same outcome? In Disaster at D-Day, historian Peter G. Tsouras shows us what could have been, if only a few things had happened differently. From the slight repositioning of units to the presence of certain commanders; Tsouras gives an in-depth description of not only what could have been, but just how close it was to happening.
2013.301.032	History of the World's Warships, The	Chant, Christopher	An excellent reference. The ultimate history of maritime warfare. This book presents the complete historical spectrum from the most primitive fighting vessels to the most sophisticated mammoths in use today with full technical specifications. Illustrated throughout. [From Amazon.com]
2013.301.033	My Three Years with Eisenhower : The Personal Diary of Captain Harry C. Butcher, USNR, Naval Aide to General Eisenhower, 1942 to 1945	Butcher, Harry C.	Capt. Butcher accompanied General Dwight Eisenhower to England in 1942 as Ike's personal aid and confidant and was with the Supreme Commander as he planned and commanded the Allied invasions of North Africa, Sicily, Italy, and France. Shortly after arriving in England, General Eisenhower instructed Butcher to keep an official day-by-day diary of events at Allied headquarters. The result is a portrait of Ike amid the details of war. This book is not for everyone. It is not a biography of Dwight D. Eisenhower. It is not a detailed chronicle of WWII. Although

Object ID	Title	Author	Summary
			Capt. Butcher proves to be a capable writer, the book lags at times into uninteresting minutiae and gossip. But at other times, it uses interesting minutiae and gossip to provide a glimpse into the day-to-day activities of the men who led the Allied assault against Hitler. All of the major players of the allied effort are here. General George Patton gets quite a bit of attention as does Winston Churchill. But the most interesting parts are the descriptions of how Ike waged war and what it says about the man. [K Weber]
2013.301.034	United States Naval Aviation Museum	Naval Aviation Museum Association, Inc.	This book is a description (with photographs) of planes in the Naval Aviation Museum in Pensacola, Florida. There is also a brief specification for each plane. We have a later editions published around 1988 and in 2007.
2013.301.035	Matterhorn : A Novel of the Vietnam War	Marlantes, Karl	A novel about the Vietnam War written by Marine combat veteran.

Object ID	Title	Author	Summary
			transmissions. Unfortunately some of the copies are unreadable. Page 22 has a list of the correspondents, their nationality, and their affiliation. The first two pages are stories from Turner about what happened on his ship. Included are ship of South Vietnamese Army Rangers turned away; fake Catholic priest asking to be rescued; unescorted children; full body searches; ditching helicopters in the ocean as there was no room onboard and rescuing the pilots; painting over the South Vietnamese flag on the South Vietnamese ships to get into the Philippines. There are two articles by Fox Butterfield, a reporter for the New York Times, and one of the 33 reporters on the Mobile. 1) "Saigon Hears the Fighting at Its Edge" dated April 28, 1975; and "Six Days in the Evacuation From Saigon" dated May 4, 1975 which describes his evacuation from Saigon. The Mobile was only allowed to take evacuees by helicopter and had to turn away those in fishing boats. They were directed to merchant ships under charter to the Military Sealift Command. He describes 30 South Vietnamese Air Force helicopters arriving as well as the South Vietnamese Navy ships. There are two emails from Le Nguyen to Capt. Turner about landing on the Mobile. They are dated 2005. Page 75 is an account from Le Nguyen about landing on the Mobile from 2014. There are 54 pages of transmissions from the correspondents from the Mobile. Unfortunately, they are in poor condition and some are not readable. 31) Bucklew, James E. Operation Frequent Wind. Bucklew was an OS2, Radar Operator assigned to OI

			Gilbert Islands to Manchuria -- 7. End Game: War in the Pacific. The Battle of Midway is listed on pages 68-76.
2013.301.045	Epic Sea Battles	Koenig, William J.	Describes twelve famous sea battles including the battles of Midway, Coral Sea and Leyte Gulf. Contents: The Nile, 1798; Trafalgar, 1805; Navarino, 1827; Hampton Roads, 1862; Manila Bay, 1898; Tsushima, 1905; Coronel and Falkland, 1914; Jutland, 1916; Matapan, 1941; Coral Sea, 1942; Midway, 1942 (pages 212-231 includes map and photos); and Leyte Gulf, 1944.
2013.301.046	Great Pacific War, The : A History of the American-Japanese Campaign of 1931-33	Bywater, Hector C. (Hector Charles)	Although this book portrays the course of an imaginary war between the US and Japan, it has not been written to support the view that such a conflict is either close at hand or inevitable. No doubt there are elements of danger in the immigration controversy, while further causes of friction may attend the growth of American commercial enterprise in the Far East. For the moment, however, the Pacific horizon is fairly free from clouds. But if war between the two nations is happily improbable, it remains a contingency that cannot be dismissed as wholly impossible.
2013.301.047	Flight of Jesse Leroy Brown, The	Taylor, Theodore	Jesse was raised in a poor but loving family and instilled with values of dignity, education, and perseverance even in the midst of deeply entrenched segregation. A star athlete and an outstanding student, Jesse turned a deaf ear to everyone who told him that he should attend a black college, or that he didn't stand a chance of becoming a Navy pilot. Undeterred, he made his way from the deep South to the campus of Ohio State University. Then, defying the wishes of his family and an unwritten rule of racial exclusion, he qualified for the Navy reserve and was accepted into the Naval Air Training

Object ID	Title	Author	Summary
			School at Glenview, Illinois-the first black man to enter the program. On March 18, 1947, late morning, like a bird, like a kite, like an impossible dream, Jesse Leroy Brown was flying. While other applicants-many from upper-class backgrounds-were weeded out of the rigorous qualifying process, Jesse forged ahead, often directly in the face of shameful racism and hostile superior officers. When he arrived at the cradle of Naval aviation in Pensacola, Florida, in 1947, he knew the washout rate was high and the odds were stacked against a man openly referred to as "nigger." But Jesse Leroy Brown had lots of practice beating the odds, and now he was on his way to becoming the first black man to fly a Navy fighter and make a carrier landing. He was also on his way to becoming an American hero over the battlefields of Korea. The Flight of Jesse Leroy Brown is both a stirring story of a man breaking historic racial barriers and a thrilling tale of Naval carrier aviation. Award-winning author Theodore Taylor, a master of adventure on land and sea, has written a biography that will speak to both those who love the excitement of combat in the air ... and to anyone who has ever dreamed the impossible dream.Jesse Leroy Brown was raised in the segregated South by a hard-working, loving family who instilled values of dignity, education, and perseverance. A star athlete and an outstanding student, he was determined to become a Navy pilot, although such a thing was unheard of for a black man in the 1940s. Undeterred, he entered Ohio State University, rather than a black college, and was able to qualify for the Navy reserve and was accepted into the Naval Air Training School at Glenview, Illinois. Despite racism, and open hostility by many of his superior officers,

			he finally reached his goal, flying a Navy fighter plane and landing it on a carrier--the first African American ever to do so. Publication Date: November 1, 1998 (from Amazon.com)
2013.302.001	McDonnell Douglas F-4 Phantom : 1958 Onwards (All Marks) : An Insight into Owning, Flying and Maintaining the Legendary Cold War Combat Jet	Black, Ian	First entering service in 1960 with the US military, the F-4 Phantom remained at the forefront of US air power throughout the 1970s and 1980s. It saw extensive action during the Vietnam War as the principal air superiority fighter for both the US Navy and Air Force, as well as in the ground-attack and reconnaissance roles. The F-4J, K and M also played key roles with the RAF and Royal Navy in the same period. Former RAF Phantom navigator Ian Black gives the F-4 the Haynes Manual treatment. About the Author Former RAF Phantom navigator Ian Black retrained as a pilot and flew the Lightning and Tornado. He is now an A340 Airbus captain with Virgin Atlantic and an accomplished aviation author and photographer. (from Amazon.com)

2013.302.006	Smoke Trails : The Last of the F-4 Phantoms	Hunter, Jamie	The McDonnell Douglas F-4 Phantom II remains one of the most popular and charismatic

Object ID	Title	Author	Summary
			fighter aircraft in the world today. Though its long and distinguished service career is almost over, the type remains operational in modest numbers and in various roles at air forces around the world. This book takes the reader to the last operational locations of the F-4 for a look at its current activities. With a particular emphasis on recent air-to-air images of the remaining operational Phantoms shot by the joint authors, Katsuhiko Tokunaga and Jamie Hunter, the book also includes interviews with and information about the pilots and those still associated with the popular type. It will take the reader behind the scenes of the last Phantom squadrons and into their ops rooms. It is now almost exactly 50 years since the first F-4 Phantom flew. With the type now entering the twilight of its career in active service, interest in an already highly regarded aircraft has grown significantly. About the Author Jamie Hunter is an aviation journalist and photographer who lives in the south of London. He is a regular contributor to a number of aviation magazines. Katsuhiko Tokunaga, a native of Tokyo, is one of the world's most distinguished aviation photographers who has covered the high-performance military jets of 26 nations, concentrating on air-to-air photography. 2013.302.028	Marines and Helicopters, 1946-1962	Rawlins, Eugene W.	FOREWARD: This history, which traces the development of helicopters in the Marine Corps from 1946 to 1962, offers a tribute to the creative vision and planning of a handful of Marine officers who conceived of the vertical assault concept in amphibious operations at a time when suitable aircraft to make it work did not exist. The story of the subsequent struggle to procure and develop those aircraft, to refine a doctrine

Object ID	Title	Author	Summary
			for their employment, and to familiarize the Marine Corps with their use is an interesting and vital part of modern Marine Corps history. The documentary basis for this monograph was primarily the official records of the Marine Corps and Navy Department, but considerable use was made of interviews and correspondence with key individuals involved in all phases of helicopter development. The author, Lieutenant Colonel Eugene W. Rawlins, received his Bachelor of Arts degree in history from California State University at Fullerton. His experience in Marine Corps aviation includes tours in fighter, attack, transport, and helicopter aircraft. During a period of separation from the Marine Corps he was employed by Sikorsky Aircraft as a production test pilot and later flew for San Francisco and Oakland Helicopter Airlines. After returning to the Marine Corps, Lieutenant Colonel Rawlins served in Vietnam with HMM-361 and -364 in 1963-1964. Three years later he returned to Vietnam for a tour with HMH-463. In 1971 after an assignment as Commanding Officer, HMH—361 at Santa Ana, he came to the History and Museums Division where he remained until july 1973. Comment copies of the manuscript were sent to many individuals involved with both the conceptual and operational aspects of Marine helicopter development. Major William J. Sambito incorporated these comments

Object ID	Title	Author	Summary
			and edited the manuscript for printing.
			Major Sambito earned his Bachelor of Arts degree in psychology from Colby College, Maine, and is an experienced helicopter
			pilot who served with HMM-262 and -165 during the Vietnam War. After attending the Armed Forces Staff College in January
			1975, he was assigned to the History and Museums Division.
			The History and Museums Division welcomes any comments on the narrative and additional information or illustrations which might enhance a future edition.
2013.302.029	Marines and Helicopters, 1962-1973	Fails, William R.	FOREWARD: This history traces the development of helicopters in the Marine Corps from 1962 to 1973 and is the second in a series of two volumes which between them cover the story of Marines and helicopters from 1946 to the present. In the period covered by this volume, the Marines at last acquired helicopters fully capable of carrying out an amphibious vertical assault, and they further elaborated their helicopter doctrines and tactics. In the Vietnam war, pilots and machines met and surmounted the test of actual combat. The documentary basis for this monograph was primarily the official records of the Marine Corps and Navy Department, but considerable use was made of interviews and correspondence with key individuals involved in all phases of helicopter development. The author, Lieutenant Colonel William R. (Bob) Fails, USMC (Ret), received his Bachelor of Arts degree in English from Hiram College, Hiram, Ohio, and his Master of Business Administration in Financial Management from The

			George Washington University, Washington, D.C. His Marine Corps aviation experience includes tours with fixed-wing fighter and attack squadrons, as a flight instructor, and as a helicopter pilot and aircraft maintenance officer. He served in Vietnam in 1965-66 with HMM-263 and again in 1970-71 as S-4 of MAG—16 and facility manager for Marble Mountain Airfield. He came to the History and Museums Division in 1973 from the 34th MAU in the Mediterranean, in which he had been Executive Officer. Now retired, Lieutenant Colonel Fails resides and works in Tempe, Arizona. Comment copies of the manuscript for this volume were sent to many individuals involved with both the conceptual and operational aspects of Marine helicopter development. In association with Lieutenant Colonel Fails, Dr. Graham A. Cosmas incorporated these comments and edited the manuscript for printing. Dr. Cosmas received his PhD degree in history from the University of Wisconsin and joined the staff of the History and Museums Division in December 1973 after teaching at the University of Texas and the University of Guam. The History and Museums Division welcomes any comments on the narrative and additional information or illustrations which might enhance a future edition.

	at Sea in the U.S. Navy, 1912-1995		of the fleet oiler concept in the US Navy. The author charts the concept from the first fleet oilers of World War I onward. Numerous tables on ship design and capabilities, descriptions of ship types, photographs of every class of US Navy fleet oiler, and ship drawings are included. In World War II refueling at sea provided the US Navy with the mobility it needed to accomplish its island-hopping advance toward Japan, as advocated in Plan Orange. He explains how underway replenishment enabled US carriers to range freely across the Pacific in the first months of the war, and later to remain on station far from their bases for weeks at a time.
2013.302.040	Fighter Country : The F-14 Tomcats of NAS Oceana	Parsons, Dave	Fighter Country is a grand tribute to NAS Oceana, Virginia, and its Tomcats. Within are more than 190 full-color photos of F-14s and other aircraft from all of Oceana's fighter squadrons--on the base and on the boat in action around the world. It takes you through a year in the life of the Tomcat driver or radar intercept officer (RIO): study at the RAG, soaking up the lore of the fighter community in the officers' club, air combat maneuvering, carrier qualifications, workups, deployment on a cruise , and into combat during Operation Desert Storm. Includes chapters on the following squadrons: VF-11, Red Rippers VF-14, Tophatters VF-31, Tomcatters VF-31, Swordsmen VF-33, Starfighters VF-41, Black Aces VF-43, Challengers VF-74, Be-Devilers VF-84, Jolly Rogers VF-101, Grim Reapers VF-102, Diamondbacks VF-103, Sluggers VF-142, Ghostriders VF-143, Pukin' Dogs Includes 4 pages of aviator

2013.302.041	Air War in the Persian Gulf	Murray, Williamson	The author analyzes the Coalition's conduct of air operations during the war against Iraq in 1990 and 1991. It examines how the enormous concentration of air power in the Gulf helped or prevented the Coalition from reaching its objectives. The USS Midway is listed on page 325. Aircraft carriers are listed in the index under carriers and under USS; aircraft are listed by number, ie, F-4Gs.
2013.302.042	Carrier Battle in the Philippine Sea : The Marianas Turkey Shoot June 19-20, 1944	Tillman, Barrett	West of the Mariana Islands in June 1944, the American and Japanese navies clashed in the greatest aircraft carrier battle of all time. Twenty-four flattops (aircraft carriers) embarking 1,350 airplanes were directly engaged, excluding US escort carriers and Japanese land-based units. Hull numbers of US Navy ships are included, with the exception of aircraft carriers, which are listed separately in the appendices. The appendix contains a near-complete list of all Japanese carrier captains and senior squadron (hikotai) leaders engaged in the Battle of the Philippine Sea. Included are the USN Order of Battle, and the Japanese Order of Battle.
2013.302.043	Escort Carriers and Their Air Unit Markings During W.W. II in the Pacific	Dresser, James	Preface: The CVE - Navy designation for aircraft carrier, escort served as the jack-of-all-trades vessel during World War II. Eighty-six CVEs were built during WW II and they served with great distinction in the Atlantic and the Pacific. They [sic] were many nicknames such as jeep or baby flattops to describe these remarkable vessels. In the Pacific they served as convoy escorts, airplane and personnel transport, submarine hunters, training ships, ferrying aircraft and pilots to the fast carriers of Task Forces 58 and 38 and providing air support for Army and Marine invasion forces. You name it and the CVEs carried out their various duties in a superb manner.

			Jim Dresser honors these carriers and their air groups with this revision to his original book first published in 1980. His new edition, based on years of dedicated research, is filled with new information, photographs and squadron aircraft markings and insignias. This book helps fill a gap in WW II Naval Aviation history about these carriers and the aircraft they carried into battle. Future historians will thank the author for his dedication in producing this fine book. CDR Doug Siegfried USN (Ret.)

Object ID	Title	Author	Summary
	Tarawa To Tokyo - 1943-46		Lexington (CV-16) 's activities in WWII 1943-1946 commissioned at South Boston Navy Yard 17Feb1943. "Tarawa to Tokyo" On Sept. 1, 1945, a Navy admiral commanding a task force sent out word on his flagship that he wanted the youngest enlisted man and the youngest officers to accompany him on a flight to mainland Japan. The next day, the supreme Allied commander in the Pacific theater of World War II would be accepting the Japanese surrender aboard the battleship USS Missouri in Tokyo Bay. Bill Johnson, then 17, accompanied Vice Adm. Frederick Sherman and a young ensign from Sherman's flagship, the USS Lexington, to a nearby airstrip. "He wanted the youngest enlisted man and the youngest officer because he figured they would live a long time and be able to talk about it" Johnson said. As Johnson remembers, he and the ensign accompanied the admiral to the battleship the day before the formal surrender was to be signed. They bunked aboard the ship. The next day, with more than 3,000 sailors, soldiers and Marines aboard, they waited for the official Japanese contingent, led by Foreign Minister Mimoru Shigemitsu, who hobbled up the Missouri's ladder on his wooden leg. Johnson took up his vantage point directly above and behind the desk where Gen. Douglas MacArthur and other commanders awaited the Japanese. Despite his excellent view, Johnson still was about 75 to 100 feet away from the proceedings, and couldn't hear MacArthur's short speech very clearly. "I had no idea this would go down in history. I had no idea I'd be part of history. I didn't really comprehend how large World War II is in the history of the United States," Johnson said. A couple of weeks

Object ID	Title	Author	Summary
			earlier, when the Japanese had announced their intention to surrender, the crew of the Lexington were told they would get a beer ration, which stunned most sailors because the Navy acted as if Prohibition still was the law. "We got two cans of hot beer. They stamped our hands so we couldn't get into line twice. It was Olympia beer," he said. Johnson was a career Navy man, retiring from service as a chief storekeeper. During one posting to Orange in the early 1950's, he met and married a Beaumont women, which is how he came to live here. The Beaumont Enterprise Article written by Dan Wallach, staff writer From: Dictionary of American Fighting Ships, Vol. IV, 1969, pp. 105-106. CV-16: dp. 27,100; l. 872'; b. 93'; dr. 28' 7"; s. 32.7 k.; cpl. 3,748; a. 12 5", 68 40mm., 62 20mm., ac. 103; cl. Essex) The fifth Lexington (CV-16) was laid down as Cabot 15 July 1941 by Bethlehem Steel Co., Quincy, Mass., renamed Lexington 16 June 1942, launched 23 September 1942; sponsored by Mrs. Theodore D. Robinson; and commissioned 17 February 1943, Capt. Felix B. Stump in command. After Caribbean shakedown and yard work at Boston, Lexington sailed for Pacific action via the Panama Canal, arriving Pearl Harbor 9 August 1943. She raided Tarawa in late September and Wake in October, then returned Pearl Harbor to prepare for the Gilbert Islands operation. From 19 to 24 November she made searches and flew sorties in the Marshalls, covering the landings in the Gilberts. Her aviators downed 29 enemy aircraft on 23 and 24

Object ID	Title	Author	Summary
			November. Lexington sailed to raid Kwajalein 4 December. Her morning strike destroyed a cargo ship, damaged two cruisers, and accounted for 30 enemy aircraft. Her gunners splashed two of the enemy torpedo planes that attacked at midday, and opened fire again at 1920 that night when a major air attack began. At 2322 parachute flares silhouetted the carrier, and 10 minutes later she was hit by a torpedo to starboard, knocking out her steering gear. Settling 5 feet by the stern, the carrier began circling to port amidst dense clouds of smoke pouring from ruptured tanks aft. An emergency hand-operated steering unit was quickly devised, and Lexington made Pearl Harbor for emergency repairs, arriving 9 December. She reached Bremerton, Wash., 22 December for full repairs completed 20 February 1944. Lexington sailed via Alameda, Calif., and Pearl Harbor for Majuro, where Rear Adm. Marc Mitscher commanding TF 58 broke his flag in her 8 March. After a warm-up strike against Mille, TF 58 operated against the major centers of resistance in Japan's outer empire, supporting the Army landing at Hollandia 13 April, and hitting supposedly invulnerable Truk 28 April. Heavy counterattack left Lexington untouched, her planes splashing 17 enemy fighters; but, for the second time, Japanese propaganda announced her sunk. A surprise fighter strike on Saipan 11 June virtually eliminated all air opposition over the island, then battered from the air for the next 5 days. On 16 June Lexington fought off a fierce attack by Japanese torpedo planes based on Guam, once a gain to emerge unhurt, but sunk a third time by propaganda pronouncements.

Object ID	Title	Author	Summary
			As Japanese opposition to the Marianas operation provoked the Battle of the Philippine Sea 19 and 20 June, Lexington played a mayor role in TF 58's great victory. With over 300 enemy aircraft destroyed the first day, and a carrier, a tanker, and a destroyer sunk the second day, American aviators virtually knocked Japanese naval aviation out of the war; for with the planes went the trained and experienced pilots without whom Japan could not continue air warfare at sea. Using Eniwetok as her base, Lexington flew sorties over Guam and against the Palaus and Bonins into August. She arrived in the Carolinas 6 September for 3 days of strikes against Yap and Ulithi, then began attacks on Mindanao, the Visayas, the Manila area, and shipping along the west coast of Luzon, preparing for the coming assault on Leyte. Her task force then blasted Okinawa 10 October and Formosa 2 days later to destroy bases from which opposition to the Philippines campaign might be launched . She was again unscathed through the air battle fought after the Formosa assault. Now covering the Leyte landings, Lexington's planes scored importantly in the Battle for Leyte Gulf, the climactic American naval victory over Japan. While the carrier came under constant enemy attack in the engagement in which Princeton was sunk, her planes joined in sinking Japan's superbattleship Musashi and scored hits on three cruisers 24 October. Next day, with Essex aircraft, they sank carrier Chitose, and alone sank Zuikako. Later in the day, they aided in sinking a third carrier, Zuiho. As the retiring Japanese were pursued, her planes sank heavy cruiser Nachi with four torpedo hits 5 November off Luzon.

Object ID	Title	Author	Summary
			But in the same action, she was introduced to the kamikaze as a flaming Japanese plane crashed near her island, destroying most of the island structure and spraying fire in all directions. Within 20 minutes major blazes were under control, and she was able to continue normal flight actions, her guns knocking down a would-be kamikaze heading for carrier Ticonderoga as well. On 9 November Lexington arrived Ulithi to repair battle damage and learn that Tokyo once again claimed her destroyed. Chosen flagship for TG 58.2 on 11 December, she struck at the airfields of Luzon and Formosa during the first 9 days of January 1945, encountering little enemy opposition. The task force then entered the China Sea to strike enemy shipping and air installations. Strikes were flown against Saipan, Camranh Bay in then Indochina, Hong Kong, the Pescadores, and Formosa. Task force planes sank four merchant ships and four escorts in one convoy and destroyed at least 12 in another, at Camranh Bay 12 January. Leaving the China Sea 20 January, Lexington sailed north to strike Formosa again 21 January and Okinawa again 22 January. After replenishing at Ulithi, TG 58.2 sailed 10 February to hit airfields near Tokyo 16 and 17 February to minimize opposition to the Iwo Jima landings 19 February. Lexington flew close support for the assaulting troops 19 to 22 February, then sailed for further strikes against the Japanese home islands and the Nansei Shoto before heading for overhaul at Puget Sound. Lexington was combat bound again 22 May, sailing via Alameda and Pearl Harbor for San Pedro Bay, Leyte where she joined Rear Adm. T. L., Sprague's task force for the final round of airstrikes

Object ID	Title	Author	Summary
			which battered the Japanese home islands through July until 15 August, when the last strike was ordered to jettison its bombs and return to Lexington on receiving word of Japanese surrender. During this period she had launched attacks on Honshu and Hokkaido airfields, and Yokosuka and Kure naval bases to destroy the remnants of the Japanese fleet. She had also flown bombing attacks on industrial targets in the Tokyo area. After hostilities ended, she continued to fly precautionary patrols over Japan, and dropped supplies to prisoner of war camps on Honshu. She supported the occupation of Japan until leaving Tokyo Bay 3 December with homeward bound veterans for transportation to San Francisco, where she arrived 16 December. After west coast operations, Lexington decommissioned at Bremerton, Wash., 23 April 1947 and entered the Reserve Fleet there. Designated attack carrier CVA-16 on 1 October 1952, she began conversion and modernization in Puget Sound Naval Shipyard 1 September 1953, receiving the new angled flight deck. Lexington recommissioned 15 August 1955, Capt. A. S. Heyward, Jr., in command. Assigned San Diego as her home port, she operated off California until May 1956 sailing then for a 6-month deployment with the 7th Fleet. She based on Yokosuka for exercises, maneuvers, and search and rescue missions off the coast of China, and called at major Far Eastern ports until returning San Diego 20 December. She next trained Air Group 12, which deployed with her on the next 7th Fleet deployment. Arriving Yokosuka 1 June 1957, Lexington embarked Rear Adm. H. D. Riley, Commander Carrier Division 1, and sailed as his

			flagship until returning San Diego 17 October. Following overhaul at Bremerton, her refresher training was interrupted by the Lebanon crisis; on 14 July 1958 she was ordered to embark Air Group 21 at San Francisco and sail to reinforce the 7th Fleet off Taiwan, arriving on station 7 August. With an other peacekeeping mission of the U.S. Navy successfully accomplished, she returned San Diego 19 December. Now the first carrier whose planes were armed with air-to-surface Bullpup guided missile, Lexington left San Francisco 26 April 1959 for another tour of duty with the 7th Fleet. She was on standby alert during the Laotian crisis of late August and September, then exercised with British forces before sailing from Yokosuka 16 November for San Diego, arriving 2 December. Through early 1960 she overhauled at Puget Sound Naval Shipyard. Lexington's next Far Eastern tour began late in 1960 and was extended well into 1961 by renewed tension in Laos. Returning to west coast operations, she was ordered in January 1962 to prepare to relieve Antietam (CVS-36) as aviation training carrier in the Gulf of Mexico, and she was redesignated CVS-16 on 1 October 1962. However, during the Cuban missile crisis, she resumed duty as an attack carrier, and it was not until 29 December 1963 that she relieved Antietam at Pensacola. Into 1969, Lexington has operated out of her home port, Pensacola, as well as Corpus Christi and New Orleans, qualifying student aviators and maintaining the high state of training of both active duty and reserve naval aviators. Her work has been of increasing significance as she has prepared the men vital to the continuing Navy and Marine Corps

			operations over Vietnam, where naval aviation has played a major role in defending the cause of freedom. Lexington marked her 200,000th arrested landing 17 October 1967, and was redesignated CVT-16 on 1 January 1969. Lexington received the Presidential Unit Citation and 11 battle stars for World War II service. On Sept. 1, 1945, a Navy admiral commanding a task force sent out word on his flagship that he wanted the youngest enlisted man and the youngest officers to accompany him on a flight to mainland Japan. The next day, the supreme Allied commander in the Pacific theater of World War II would be accepting the Japanese surrender aboard the battleship USS Missouri in Tokyo Bay. Bill Johnson, then 17, accompanied Vice Adm. Frederick Sherman and a young ensign from Sherman's flagship, the USS Lexington, to a nearby airstrip. "He wanted the youngest enlisted man and the youngest officer because he figured they would live a long time and be able to talk about it" Johnson said. As Johnson remembers, he and the ensign accompanied the admiral to the battleship the day before the formal surrender was to be signed. They bunked aboard the ship. The next day, with more than 3,000 sailors, soldiers and Marines aboard, they waited for the official Japanese contingent, led by Foreign Minister Mimoru Shigemitsu, who hobbled up the Missouri's ladder on his wooden leg. Johnson took up his vantage point directly above and behind the desk where Gen. Douglas MacArthur and other commanders awaited the Japanese. Despite his excellent view, Johnson still was about 75 to 100 feet away from the proceedings, and couldn't hear MacArthur's short speech very clearly.

Object ID	Title	Author	Summary

"I had no idea this would go down in history. I had no idea I'd be part of history. I didn't really comprehend how large World War II is in the history of the United States," Johnson said. A couple of weeks earlier, when the Japanese had announced their intention to surrender, the crew of the Lexington were told they would get a beer ration, which stunned most sailors because the Navy acted as if Prohibition still was the law. "We got two cans of hot beer. They stamped our hands so we couldn't get into line twice. It was Olympia beer," he said. Johnson was a career Navy man, retiring from service as a chief storekeeper. During one posting to Orange in the early 1950's, he met and married a Beaumont women, which is how he came to live here.

The fifth Lexington (CV-16) was laid down as Cabot 15 July 1941 by Bethlehem Steel Co., Quincy, Mass., renamed Lexington 16 June 1942, launched 23 September 1942; sponsored by Mrs. Theodore D. Robinson; and commissioned 17 February 1943, Capt. Felix B. Stump in command.

After Caribbean shakedown and yard work at Boston, Lexington sailed for Pacific action via the Panama Canal, arriving Pearl Harbor 9 August 1943. She raided Tarawa in late September and Wake in October, then returned Pearl Harbor to prepare for the

Object ID	Title	Author	Summary
			Gilbert Islands operation. From 19 to 24 November she made searches and flew sorties in the Marshalls, covering the landings in the Gilberts. Her aviators downed 29 enemy aircraft on 23 and 24 November. Lexington sailed to raid Kwajalein 4 December. Her morning strike destroyed a cargo ship, damaged two cruisers, and accounted for 30 enemy aircraft. Her gunners splashed two of the enemy torpedo planes that attacked at midday, and opened fire again at 1920 that night when a major air attack began. At 2322 parachute flares silhouetted the carrier, and 10 minutes later she was hit by a torpedo to starboard, knocking out her steering gear. Settling 5 feet by the stern, the carrier began circling to port amidst dense clouds of smoke pouring from ruptured tanks aft. An emergency hand-operated steering unit was quickly devised, and Lexington made Pearl Harbor for emergency repairs, arriving 9 December. She reached Bremerton, Wash., 22 December for full repairs completed 20 February 1944. Lexington sailed via Alameda, Calif., and Pearl Harbor for Majuro, where Rear Adm. Marc Mitscher commanding TF 58 broke his flag in her 8 March. After a warm-up strike against Mille, TF 58 operated against the major centers of resistance in Japan's outer empire, supporting the Army landing at Hollandia 13 April, and hitting supposedly invulnerable Truk 28 April. Heavy counterattack left Lexington untouched, her planes splashing 17 enemy fighters; but, for the second time, Japanese propaganda announced her sunk. A surprise fighter strike on Saipan 11 June virtually eliminated all air opposition over the island, then battered

Object ID	Title	Author	Summary
			from the air for the next 5 days. On 16 June Lexington fought off a fierce attack by Japanese torpedo planes based on Guam, once a gain to emerge unhurt, but sunk a third time by propaganda pronouncements. As Japanese opposition to the Marianas operation provoked the Battle of the Philippine Sea 19 and 20 June, Lexington played a mayor role in TF 58's great victory. With over 300 enemy aircraft destroyed the first day, and a carrier, a tanker, and a destroyer sunk the second day, American aviators virtually knocked Japanese naval aviation out of the war; for with the planes went the trained and experienced pilots without whom Japan could not continue air warfare at sea. Using Eniwetok as her base, Lexington flew sorties over Guam and against the Palaus and Bonins into August. She arrived in the Carolinas 6 September for 3 days of strikes against Yap and Ulithi, then began attacks on Mindanao, the Visayas, the Manila area, and shipping along the west coast of Luzon, preparing for the coming assault on Leyte. Her task force then blasted Okinawa 10 October and Formosa 2 days later to destroy bases from which opposition to the Philippines campaign might be launched . She was again unscathed through the air battle fought after the Formosa assault. Now covering the Leyte landings, Lexington's planes scored importantly in the Battle for Leyte Gulf, the climactic American naval victory over Japan. While the carrier came under constant enemy attack in the engagement in which Princeton was sunk, her planes joined in sinking Japan's superbattleship Musashi and scored hits on three cruisers 24 October. Next day, with Essex aircraft, they sank carrier Chitose, and alone sank Zuikako. Later in the day,

Object ID	Title	Author	Summary
			they aided in sinking a third carrier, Zuiho. As the retiring Japanese were pursued, her planes sank heavy cruiser Nachi with four torpedo hits 5 November off Luzon. But in the same action, she was introduced to the kamikaze as a flaming Japanese plane crashed near her island, destroying most of the island structure and spraying fire in all directions. Within 20 minutes major blazes were under control, and she was able to continue normal flight actions, her guns knocking down a would-be kamikaze heading for carrier Ticonderoga as well. On 9 November Lexington arrived Ulithi to repair battle damage and learn that Tokyo once again claimed her destroyed. Chosen flagship for TG 58.2 on 11 December, she struck at the airfields of Luzon and Formosa during the first 9 days of January 1945, encountering little enemy opposition. The task force then entered the China Sea to strike enemy shipping and air installations. Strikes were flown against Saipan, Camranh Bay in then Indochina, Hong Kong, the Pescadores, and Formosa. Task force planes sank four merchant ships and four escorts in one convoy and destroyed at least 12 in another, at Camranh Bay 12 January. Leaving the China Sea 20 January, Lexington sailed north to strike Formosa again 21 January and Okinawa again 22 January. After replenishing at Ulithi, TG 58.2 sailed 10 February to hit airfields near Tokyo 16 and 17 February to minimize opposition to the Iwo Jima landings 19 February. Lexington flew close support for the assaulting troops 19 to 22 February, then sailed for further strikes against the Japanese home islands and the Nansei Shoto before heading for overhaul at Puget Sound.

Object ID	Title	Author	Summary
			Lexington was combat bound again 22 May, sailing via Alameda and Pearl Harbor for San Pedro Bay, Leyte where she joined Rear Adm. T. L. Sprague's task force for the final round of airstrikes which battered the Japanese home islands through July until 15 August, when the last strike was ordered to jettison its bombs and return to Lexington on receiving word of Japanese surrender. During this period she had launched attacks on Honshu and Hokkaido airfields, and Yokosuka and Kure naval bases to destroy the remnants of the Japanese fleet. She had also flown bombing attacks on industrial targets in the Tokyo area. After hostilities ended, she continued to fly precautionary patrols over Japan, and dropped supplies to prisoner of war camps on Honshu. She supported the occupation of Japan until leaving Tokyo Bay 3 December with homeward bound veterans for transportation to San Francisco, where she arrived 16 December. After west coast operations, Lexington decommissioned at Bremerton, Wash., 23 April 1947 and entered the Reserve Fleet there. Designated attack carrier CVA-16 on 1 October 1952, she began conversion and modernization in Puget Sound Naval Shipyard 1 September 1953, receiving the new angled flight deck. Lexington recommissioned 15 August 1955, Capt. A. S. Heyward, Jr., in command. Assigned San Diego as her home port, she operated off California until May 1956 sailing then for a 6-month deployment with the 7th Fleet. She based on Yokosuka for exercises, maneuvers, and search and rescue missions off the coast of China, and called at major Far Eastern ports until returning San Diego 20 December. She next trained

			guile. What we have in common is that we both shared the most intensive period in our lives, and lived to write about it." Art Buchwald
			"With a vivid memory, Captain Andrew Jones recreates his World War II experience as a Marine pilot of the legendary F4U. His story of one man's war, told with verve and skill, is an eloquent testimony. His book should find a well deserved place in the annals of the Pacific Campaign." James A. Michener
			"This (book) is the real thing!" Brig. Gen. William Lanagan, USMC (Ret.)
2013.302.062	Flying Cats : The Catalina Aircraft in World War II	Hendrie, Andrew	The Consolidated PBV Catalina was probably the most versatile and successful flying boat/amphibian ever built, serving not just with the US Army Air Force, Navy and Coast Guard during the Second World War but also with the air forces of Britain, Canada, Australia and New Zealand, with the Danes, Free French and Norwegians as well as in Brazil, Chile, Indonesia and elsewhere. With a remarkable lifting capacity and endurance, this long-range twin—engined aircraft could absorb a great deal of punishment and still return home safely after flights lasting an entire day and covering thousands of miles. It was employed as a maritime reconnaissance aircraft, as a bomber and torpedo—bomber, as an anti-submarine weapon, as a mine layer, as a special operations machine and as a search and rescue craft by day and night. It ferried stores, mail and people — many of them sick and injured — across all the world's oceans and is rightly held in the deepest respect by all who had anything to do with it, flying or being flown. In this book Andrew Hendrie

			tells the whole amazing story of the 'Flying Cats', of their exploits and achievements, of the heroism of many of their crews and the problems they had to endure. With numerous photographs as well as appendices listing technical data and individual aircraft histories, this is the definitive history of the Catalina and its operations world—wide. (from dust jacket flap)
2013.302.063	Battleship and Cruiser Aircraft of the United States Navy, 1910-1949	Larkins, William T.	This thorough study of the history, development and service of floatplanes carried on battleships and cruisers documents a long neglected subject for the first time in over 400 photographs. From the 1920s through World War II, aircraft operating from catapults were used for spotting gunfire and scouting ahead of the fleet. Flying these planes was unique and the dramatic launching and recovery operations are covered by both photographs and text. Colors and markings are detailed and special attention has been paid to images showing catapult and ship details for both the ship and aircraft modeler. The assignment of all aircraft by type, totals, squadrons and ships is given annually from 1924 to 1949. In addition to rare photos of all of the experimental aircraft that were tested for this purpose, an additional chapter covers floatplanes used on small ships and submarines. (from dust jacket flap)

Object ID	Title	Author	Summary
	Halsey at Leyte Gulf		of this book, Carl Solberg, was serving in the Pacific as a young air combat intelligence officer on Admiral William F. Halsey's flagship, New Jersey, as three Japanese fleets converged on the Philippines for one of the largest and most complex naval battles of World War II. As Solberg recalls in this compelling memoir, the Japanese Navy's master plan for repelling American invasions had just been captured, translated, copied, and interpreted - but we know now not fully understood. Reportedly, Admiral Halsey had seen the document and ignored it. Solberg explains that his roommate, Lt. Harris Cox, pored over the plan for several nights and with Solberg suddenly came to realize what the enemy's big surface ships were up to at Leyte. The two young intelligence officers urgently tried to warn the admiral on the night of 24 October that by going north after the Japanese carriers he was doing exactly what the enemy wanted him to do. But Halsey had already retired for the night and their message never got through to him. Had it been heeded, their warning might have had a significant impact on the battle. This book offers new insights into the events that led to Halsey's controversial decision to send Task Force 34 north and provides a better understanding of what happened that night. (from books.google.com)

2013.302.073	Last Zero Fighter: Firsthand Accounts From WWII Japanese Naval Pilots, The	King, Dan	Firsthand accounts from interviews conducted in Japan with five WWII Japanese Naval aviators. All are veterans of the pivotal battles of the Pacific War including; USS Panay, Nanking, Pearl Harbor, Wake Island, Rabaul, Port Darwin, Indian Ocean Raid, Ceylon, Midway, Guadalcanal, Marshall Islands, Tarawa, Iwo Jima, Okinawa, the Kamikaze in the Philippines, the home defense and the dropping of the

			atomic bomb. The book is 348 pages includes 78 photos (many from the veterans' own albums), 9 original maps and illustrations. Includes an introduction to the Japanese pilot training system for both officers and enlisted men. Each pilot is followed from the time he joined the navy until war's end. They explain in their own words; why they joined the navy, what they thought about the war, about the aircraft they flew, how they felt about their friends and their former adversaries. The interviews were conducted firsthand in their own language by KING who is a linguist and Pacific War historian who spent 10 years living in Japan. Includes: Mitsubishi A6M Zero. Mitsubishi A6M (Fighter plane) Zero (Fighter plane). Publication Date: July 11, 2012 (from Amazon.com)
2013.302.074	Battle-Tested : Carrier Aviation in Afghanistan and Iraq	Grant, Rebecca	"America will always need sailors and ships and shipborne aircraft to preserve her liberty..." So said eminent naval historian Samuel Eliot Morison in 1963. On September 11, 2001 America's liberty was under threat once more... and the carriers deploying to the North Arabian Gulf were about to face a whole new test of battle in the global war on terror. Here is the lively story of how carrier aviation forged new operational standards in Afghanistan and massed again to deliver sophisticated striking power for the war with Iraq. Told from the perspectives of aviators and admirals alike, "Battle-Tested: Carrier Aviation in Afghanistan and Iraq" adds a fresh chapter to the illustrious history of the world's most powerful warships - and stakes out their operational relevance to the ongoing challenges of the 21st Century.

2013.302.076	F-35 Lightning II	Hamilton, John	Thin on photography and content, November 8, 2012 By Dale Broadbent "dalewb2" This book by John Hamilton needs a review. There is no information from the publisher on Amazon, no summary on the back of the book or on Amazon, there isn't even an introduction by the author or photographer or publisher. The book begins with a copyright page and table of contents, and then launches right into the book content. Every page is a photograph from end to end for the most part with captions in bold white 28-pt font (approximately). The text seems to be written to grade school children with its simple, straightforward style, and short sentence structure. There really isn't much in here you couldn't get off the internet; and that brings me to another topic - I found the one single image in the book of the cockpit on the internet - in higher resolution no less. With no way of knowing for sure, I got the distinct impression this book was cobbled together as a collection of general information on the F-35 with publicly-available information and photography (e.g., from Lockheed Martin). While it is convenient to have all this info in one place, it really didn't add much to the information I had already collected on the plane for a game I'm involved in. The

Object ID	Title	Author	Summary
			book seems targeted to children - something I did not find cute in the least. If you're looking for a good source of photography and information on the F-35 I would definitely steer clear of this one or pick it up at your local library. (from Amazon.com)

			that combine high speed with superb maneuverability. Bizarre Stealth-technology shapes and materials which can make an aircraft almost undetectable. New engine designs, pushing the physical limits of known metals, for speed, range and agility. Onboard computers with near-human intelligence, capable of talking and responding to spoken commands, always ready to help or advise the pilot. Science fiction? Negative, sir. Technology fact and a multi-billion-dollar business. Bill Sweetman is Technical Editor - North America for the Interavia Publishing Group and has published dozens of articles on Western and Soviet warplane technology. "Advanced Fighter Technology" is the companion to "Stealth Aircraft," the unique and widely cited investigation into the Pentagon's biggest, most secret programs. (from back cover)

2013.302.083	Airborne Weapons of the West	Thornborough, Anthony M.	Even as the combat aircraft was in its infancy there were attempts to ally it to purpose-built weapons, rather than the cumbersome and ineffective ground-based adaptations which armed the early fighters. Today's airborne munitions represent a quantum leap in destructive potential, and airpower is more than ever before the crucial element in the armed forces. Denied the safety of movement by day and night which current weapons can easily accomplish, an army can quickly cease to exist as recently demonstrated in the live war for Kuwait. The range of bombs, missiles, rockets and self defence pods now available in the arsenal of the West is vast, but relatively unknown even to the most ardent enthusiasts. Here is the definitive illustrated reference to that firepower seen on all frontline interceptors,

Object ID	Title	Author	Summary
			interdictor, air defence/air superiority and true bomber aircraft. Weapons include Sidewinder, AMRAAM and Maverick missiles, Rockeye, Paveway and nuclear bombs and the Gatling family of aircraft cannon; all lavishly illustrated in close up and in action with detailed text tracing individual weapons' history, development and future refinement. Authoritative yet immensely readable and informative, this is the book for all aviation enthusiasts who seek the facts and figures for current Western aviation firepower. (from back cover)
2013.302.085	Fleet Air Arm in camera, 1912-1996 : archive photographs from the Public Record Office and the Fleet Air Arm Museum, The	Hayward, Roger	For many decades a fascinating and sizeable archive of photographs, depicting the operations and equipment of British naval aviation, has remained unrecorded and largely unseen in countless documents held at the Public Record Office at Kew. Other equally important images of British naval aviation and the Fleet Air Arm can also be found in the collections of the world-famous Fleet Air Museum at RNAS Yeovilton. Together these two important collections cover a period from 1912, when British naval aviation was making its first tentative steps, through to the high-technology Fleet Air Arm (FAA) of the 1990s. "The Fleet Air Arm in Camera 1912-1996" will bring a representative selection of these two collections to the notice of a wider audience. Many of the photographs are published here for the first time and give the reader a fascinating kaleidoscope of images depicting the vast range of offensive, defensive, shore and carrier-based operations in which the FAA and its predecessors — the Naval Wing of the RFC and the Royal Naval Air Service — have been

Object ID	Title	Author	Summary
			involved over a period of more than eighty years. "The Fleet Air Arm in Camera 1912-1996" contains some 240 photographs, many of which were taken in action. Each photograph has been thoroughly researched and is accompanied by a detailed caption. This remarkable volume of illustrations will appeal not only to those with an interest in naval aviation, but also to anyone with an interest in the history of air power. (from dust jacket flap)
2013.302.086	Fantail Fighters	Scutts, Jerry	INTRODUCTION: During World War II, the US Navy, Marines and Coast Guard operated two main types of floatplane, the Curtiss SOC Seagull and Vought OS2U Kingfisher plus one amphibian, the Grumman J2F Duck. During the latter half of the war, the single-seat Curtiss SC-1 Seahawk entered service, to become the last aircraft ordered for duty aboard non-carrier classes of ship. In addition, the Navy and Coast Guard operated the ill-fated Curtiss SO3C Seagull which served very briefly aboard cruisers before its relegation to land bases. In terms of wartime service, the Grumman J2F Duck was the oldest, having flown for the first time on 4 May 1933. The J2F was the only US single-engined amphibian to put in front-line sea duty during hostilities, being designed primarily to provide the Navy with a "utility" service aboard aircraft carriers. Its dual wheel/float landing gear also enabled it to perform a useful rescue function in combat areas. On 5 March 1934 the portly Curtiss XSOC Seagull biplane made its debut, some three months before early production J2F-1 Ducks joined VS-3 aboard the carrier Lexington. Despite its somewhat anachronistic appearance the

Object ID	Title	Author	Summary
			SOC was one of the most reliable and well-liked floatplanes the Navy ever ordered, so much so that it was taken out of honorary retirement in 1944 to replace its would-be successor aboard some ships of the fleet.
2013.302.087	Intruder	Chesneau, Roger	INTRODUCTION: It became readily apparent during World War II, the first conflict in which carrier aircraft played a really significant part, that the naval air commander faced two enemies. One was the nation mounting the offensive against his country and all that that implied, particularly its shipping but also (and more and more importantly as the war was carried towards its homeland) its ground forces and their equipment, supply lines and communications network, and its industrial base. The other enemy was the elements — the lousy weather that so often prevented him from carrying out his job, usually at a critical moment. Coupled with this was an inherent difficulty in actually finding certain types of targets. A ship, perhaps a couple of hundred feet long, not only stood out in isolation from its surroundings when it was under way, but it also very conveniently left behind it a wake maybe hundreds of yards in length. A land target like an airfield was not all that more difficult to spot, given reasonable weather. If, however, a factory had to be located, or worse still a mobile target such as a road convoy, the chances of success were rather more remote. Although artificial aids were promising to come to the .commander's rescue by the close of World War II, radar-assisted navigation and bombing enabling both sea-going and land-based objectives to be hit with increasing accuracy, the advent of the atomic bomb seemed to point

Object ID	Title	Author	Summary
			to the fact that high-precision weapons delivery might not, after all, be that important: one detonation would wipe out large numbers of targets at a stroke and, with the Soviet Union and its sprawling land mass seen as the only potential foe in the immediate postwar world, a few dozen of these detonations, well placed, would win any conflict.
2013.302.088	USS Wright (CVL-49) - Mediterranean Cruise - 1951	Cederstrom, A. D. (ed)	Pictorial account of the deployment of the USS Wright (CVL-49) to the Mediterranean 10 January 1951 - 31 March 1951 from Norfolk, VA. Air Defense Exercises with the USS Roanoke (CVL-145) then on to Gibraltar. 2013.302.097	Grumman F-14 Tomcat	Aviation Classics	Born out of the US Navy's Naval Fighter Experimental programme, the Tomcat first flew in December 1970 and was instantly recognised as the best fleet defence fighter and long range interceptor in the world. With its heavy armament of guns and air to air missiles, including the massive long range AIM-54 Phoenix missile, when combined with its powerful Hughes AWG-9 radar it gave the Tomcat the capability of engaging targets at up to 100 miles. Aside from its excellent service with the US Navy and interestingly, the Iranian Air Force, the Tomcat also found fame as a movie star, firstly in The Final Countdown and later in the Tom Cruise blockbuster Top Gun. This issue of Aviation Classics will tell the complete story of the aircraft, its development, service career and retirement from the US Navy as well as take the reader backstage to find out how the movie Top Gun was made, the story told by the aircrew who flew the aircraft in the film. --From aviationclassics.co.uk description.
2013.302.098	Battle of Midway, The : The Naval Institute Guide to the U.S. Navy's Greatest Victory	Hone, Thomas (ed)	An all-embracing work detailing both the American and Japanese sides of the pivotal Battle of Midway. Chapters are excerpts from books and articles and selections from several Naval Institute oral histories.
2013.302.099	Torpedo Squadron Four : A Cockpit View of World War II	Thomas, Gerald W.	This is a historical account of WWII as seen by the pilot of an Avenger, the US Navy's's famous torpedo bomber. While the focus of this book is on the activities of Torpedo Four (VT-4), combat records are included for the other squadrons in the

Object ID	Title	Author	Summary
			Air Group, Bombing Four (VB-4), and Fighting Four (VF-4). Also, in December, 1945, the dive bombers, because of heavy losses, were replaced with the first carrier-based Marine fighters (VMF-124 and VMF-213). Torpedo Four was assigned to 3 different aircraft carriers during WWII. Initially, on the Ranger in the Atlantic, the squadron flew with 6 Douglas "Devastators." Later, VT-4 became a 9 plane unit flying some of the first Grumman TBF Avengers. Aboard the USS Bunker Hill and USS Essex in the Pacific, the squadron operated with 15-18 TBMs.
2013.302.100	Battle-Tested : Carrier Aviation in Afghanistan and Iraq	Grant, Rebecca	"America will always need sailors and ships and shipborne aircraft to preserve her liberty..." So said eminent naval historian Samuel Eliot Morison in 1963. On September 11, 2001 America's liberty was under threat once more... and the carriers deploying to the North Arabian Gulf were about to face a whole new test of battle in the global war on terror. Here is the lively story of how carrier aviation forged new operational standards in Afghanistan and massed again to deliver sophisticated striking power for the war with Iraq. Told from the perspectives of aviators and admirals alike, "Battle-Tested: Carrier Aviation in Afghanistan and Iraq" adds a fresh chapter to the illustrious history of the world's most powerful warships - and stakes out their operational relevance to the ongoing challenges of the 21st Century. (from back cover)
2013.302.101	Ace Factor, The : Air Combat and the Role of Situational Awareness	Spick, Mike	What makes a fighter ace? Why are a staggering forty per cent of aerial engagements won by a mere five per cent of pilots? It can be condensed into two words: situational awareness, or SA for short. In this book, Mike Spick analyses some of the

Object ID	Title	Author	Summary
			combat situations which have created the great aces of the two World Wars as well as those of the Korean, Middle East and South-East Asian conflicts. he includes quotations to demonstrate situational awareness from some of the greatest aces of all time, as well as from other pilots who observed them in action.
2013.302.102	Naval Battles for Guadalcanal 1942, The : Clash for Supremacy in the Pacific	Stille, Mark	The battle for Guadalcanal that lasted from August 1942 to February 1943 was the first American counteroffensive against the Japanese in the Pacific. In the waters off Guadalcanal, US and Japanese naval forces fought a series of engagements that resulted in heavy losses for both sides, but which eventually forced the Japanese to withdraw from the island. The six months of battles included seven major encounters, two of which were fought between carriers, but the other five, all at night, pitted the surface forces of the two navies against each other in a series of vicious, often close-quarter engagements. This title details the contrasting fortunes experienced by both navies over the intense course of this series of battles that turned the tide of the naval war in the Pacific. It saw the Japanese Empire reach its greatest extent, with only defeat and disaster to follow.
2013.302.103	Advanced Fighter Technology : The Future of Cockpit Combat	Sweetman, Bill	Air battles over the Falklands, the Mediterranean and the Lebanon have slammed home one lesson: the West's fighter aircraft are effective and lethal. 			international customers and planned enhancements. Each system and weapon of these planes are discussed in detail.
2013.302.105	F4F Wildcat vs A6M Zero-Sen : Pacific Theater 1942	Young, Edward M.	The combats between the Grumman F4F Wildcat and the Mitsubishi A6M Zero-sen during 1942 saw the world's two best carrier fighters, derived from contrasting design philosophies and naval fighter doctrines, battle for aerial superiority in the skies over the Pacific. The superb A6M Zero-sen was without doubt the world's finest carrier fighter in 1942, and superior to the rugged F4F Wildcat in speed, climb, maneuverability and service ceiling. The Wildcat, in turn, had superior firepower and structural strength. Against a fighter that outclassed them, US Navy pilots quickly learned to avoid dogfights with the Zero-sen. They also developed tactics that enabled the Wildcat to hold its own against its more nimble opponent. This Due volume covers one of the most important confrontations between two classic, rival fighters during the first year of the War in the Pacific.
2013.302.106	Naval Institute Guide to Combat Fleets of the World - 2013 : Their Ships, Aircraft, and Systems	Wertheim, Eric	Internationally acknowledged as the best one-volume reference to the world's naval and paranaul forces, this popular Naval Institute guide is both comprehensive and affordable. Updated periodically, it has come to be relied on for its all-inclusive, accurate, and current data on the ships, navies, coast guards, and naval aviation arms of more than one hundred seventy countries. Large fleets and small maritime forces get equally thorough treatment. A comprehensive and informative ship-name index makes the book easy to use and allows for quick comparisons between ships and fleets. This new edition, the first in six years, presents timely information on major and even minor developments that could impact the world scene. More than four thousand illustrations

Object ID	Title	Author	Summary
			and multi-view drawings present the user with the most detailed views available for identification and comparison purposes. An expanded chapter on the Chinese navy provides major updates on the status of its new aircraft carrier and the latest Chinese submarines, surface ships, and naval missiles. Dozens of detailed line drawings depict exactly where the weapons and sensors are located on the world's combatants such as the Iranian Ghadir-class submarines, the French Forbin-class destroyers, and the U.S. Navy's littoral combat ships. From giant aircraft carriers and ballistic missile submarines to tugboats and launches, the characteristics and capabilities of ships large and small are reliably recorded. Complete descriptions of naval aircraft, weapons, weapons systems, and sensors are also provided along with useful commentary on organization, personnel strengths, and bases. For those who need fast access to facts about the world's navies, this single-volume naval reference is essential-and a bargain considering the wealth of material it provides.
2013.302.107	Mitsubishi J2M Raiden (Jack)	Peczkowski, Robert	More for the modeller than the general enthusiast; March 27, 2010; By Jim Davis This book is one of Mushroom Model Publications' Yellow Series (it is 6110). It is a square bound, 6-1/2" x 9-1/2", square bound, 80 page card cover. The book is divided into three sections. The first is the development history text supported by numerous black and white photos, line drawings, tables, and, interestingly, a two page, American Intelligence identification card for the "Jack 11". This section comprises the first 27 pages.

Object ID	Title	Author	Summary
			The second section comprises detailed photographs and technical manual drawings. Some of the photos are period photos but many are of the only surviving example. These are in full color. The survivor's location is not identified; it is at the Planes of Fame Museum in Chino, CA. This section runs from page 28 to page 62 and includes a brief bibliography. The last section has the color profiles. There are 18 pages of these. They're fairly monotonous because the color scheme varied hardly at all during the aircraft's career; the main variation are unit codes. (from Amazon.com)
2013.302.108	Jane's All the World's Aircraft - 2011-2012	Jackson, Paul (ed)	An unparalleled reference to aircraft under development or in production. Jane's All the World's Aircraft sets the standard in aviation reference. It provides exhaustive technical detail on more than 1,000 civil and military aircraft currently being produced or under development by approximately 560 companies. Photographs and line drawings aid recognition and comparison, giving you the ability to evaluate competitors, recognise trends in aerospace development, identify potential buyers and select business partners. You can check key specifications for any aircraft, including dimensions, performance, structure, landing gear, power plants and armaments. In addition, there are details of the world's aircraft manufacturers and their programmes, so you can identify key contracts, production rates, customers and order backlogs. Key contents include: * Fixed-wing, rotary-wing and lighter-than-air * Air-launched missiles summary

Object ID	Title	Author	Summary

2013.302.109	Battleship Yamato and Okinawa Suicide	Matsuno, Masaki	The Battleship Yamato and Operation Ten-Go. The Yamato was supposed to be beached in Okinawa and continue shooting until destroyed. The allies decoded the messages about the operation, and the ship was sunk before reaching Okinawa. Includes a DVD with 3D CG (computer graphics).
2013.302.110	Battle of Kai Shiden	None Stated	About the Imperial Japanese Navy's aircraft the Kai Shiden. Also known as the N1K1 Shiden Kai and Shidenko. The Japanese name means purple lightning and the US code name was George. Includes a DVD with 3D CG (computer graphics).
2013.302.111	Fierce Battle of Midway : The Return of Wyvern and Tamon Yamaguchi	Matsuno, Masaki	The Battle of Midway. Includes a DVD with 3D CG (computer graphics).
2013.302.112	Battle of the Coral Sea	Matsuno, Masaki	The Battle of the Coral Sea. Includes a DVD with 3D CG (computer graphics).
2013.302.113	Maru (Ushio Shobo)	Ushio Shobo	This is issue 2 of Maru 2012. Topics covered are USS George Washington, CVN-73, Kawanishi Shiden, pages 68-93; analysis of North Korean missiles; Fleet Week, San Francisco October 2011; British Army sweaters; Japanese Naval Academy training; the Mitsubishi A6M Zero pages 189-207; page 190 shows the chief engineer who developed the Zero; Europe's newest Navy weapons starts page 119; and a fiction story about the Japanese military before the attack on Pearl Harbor--that starts on p. 110. More info on the Kawanishi

Object ID	Title	Author	Summary
			Shiden: It looks like the airplanes listed in the first diagram are prototypes and test production runs of the George fighter. The second set looks to be production variants and modified versions. The book has each model listed under the Japanese type names but I was unable to find a chart matching the Japanese nomenclature to the (International? American?) nomenclature. Reading the book it looks like the ground based version didn't have many modifications throughout it's life (The cowling and machine guns in the cowling changed a few times. The later versions had a #13 smaller vertical stabilizer and one test version had a rocket pod attached to the bottom for additional speed. The last one listed had a tail hook fitted for carrier use). N.G.

2013.302.114	Black Wings : The American Black in Aviation	Hardesty, Von	This book is the outgrowth of an exhibit which opened at the National Air and Space Museum on September 23, 1982. Both the exhibit and the book are designed to call attention to the historic role which blacks have played in shaping the growth of modern aviation. Includes names and places where black Americans served. Includes Tuskegee Air Field Alabama. The black witnesses to the flight of the first large balloon in the United States at Bladensburg, Maryland, on June 19, 1784, were slaves waiting to be sold. There seemed to be little possibility that any of their descendents might take part in the exciting adventure of human flight. But take part they did, in ways that have benefited all mankind. The story of black participation in aviation is filled with the names of courageous men and women who had to overcome enormous social pressures in order to gain the right to pursue the dream of flight with all its risks and rewards. The names

Object ID	Title	Author	Summary
			of these gallant pioneers remain unfamiliar to us, even today. Their stories are largely forgotten, and with them, a rich portion of our cultural heritage. ` It is our hope that the publication of this book will not only call attention to the accomplishments of these neglected pioneers, but also serve as the foundation for a thorough study of the achievements of blacks in aviation. Those in search of models for the youth of today could scarcely find a better set than the black men and women who fought for the right to fly. My congratulations to curators Von Hardesty and Dominick Pisano, and to Donald Lopez, the Chairman of our Aeronautics Department, for their fine work on both the Black Wings exhibition and this book. In calling attention to this neglected and important phase of the history of flight, they have enabled the National Air and Space Museum to more accurately record and celebrate the achievements of all of those who have helped to make the dream of flight a reality. WALTER J. BOYNE Director National Air and Space Museum (from inside front cover)
2013.302.115	Kugisho E14Y Glen : The Aircraft that Bombed America	Ishiguro, Ryusuke	Although the title calls this the Kugisho E14Y Glen, daveswarbirds.com calls it the Yokosuka E14Y1 Type O Glen. Kugisho was not listed as a manufacturer in daveswarbirds.com. Only one enemy aircraft has ever dropped bombs on mainland USA - and that aircraft was a submarine-launched "Glen" floatplane. This book tells the story of the design, development and operational use of the E14Y1 "Glen".Included are details of earlier Japanese submarine-launched aircraft, and of the

Object ID	Title	Author	Summary
			submarines designed and used as seaplane carriers. Profusely illustrated with photos, plans and colour profiles - plus a description and photos of the only remnants of the E14Y1 still in existence, submerged aboard the hulk of the Akibasan Maru off Kwajalein Atoll in the Pacific. (from Amazon.com)
2013.302.116	Early US Jet Fighters : Proposals, Projects and Prototypes	Buttler, Tony	In the aftermath of World War II the development of military fighter aircraft in the USA continued apace to take advantage of a new form of propulsion the jet engine. With incredibly swift progress, post-war fighter design embraced supersonic types and the early development of the American jet fighter reached its maturity. Design competitions were held which led to the F-87 to F-93 series of fighters and, not to be outdone, the US Navy ran competitions for carrier-based jets which resulted in the Douglas Skyknight, Grumman Panther and Vought Cutlass. All projects resulted in a large number of design studies and proposals including plans for a Navy Long Range Escort Fighter (the abandoned OS-112). Some are quite well known but, following recent access to the papers in the Sarah Clark and George Spangenberg document collections in the US National Archives, many further previously unknown or unseen designs have come to light including new information on the types that were flown. Competitions for, amongst others, the McDonnell Demon carrier based jet fighter together with flying boat fighters culminated in the first full supersonic design competitions held for each service including the MX1554 (Convair F-102 Delta Dagger) and OS-130 (Vought F8U Crusader) programs.

Object ID	Title	Author	Summary
			Early US Jet Fighter, Proposals, Projects and Prototypes tells the story of these developments backed up with three-view drawings, manufacturer's models and rare photographs. Appendices illustrate the effort being put into this work during the 1940s and 1950s, by detailing American research establishments and test facilities, chief designers, flight characteristics and a curious one-off study of an in-flight refuelling concept. 2013.303.001	Sea Clocks : The Story of Longitude	Borden, Louise	For hundreds of years ships had been sailing to places far and near without really knowing where they were. Sailors knew how to measure latitude, their location north or south of the equator; but they could not measure longitude, their location east or west of their home port. This is the story of John Harrison, an Englishman without any scientific training, who worked for more than forty years to develop a clock that would work at sea and would allow sailors to know their longitude. Includes beautiful illustrations by Erik Blegvad.
2013.303.002	Mermaids and Saguaros : The USS Arizona Silver	Edwards, Maxine T.	On March 13, 1913 Congress authorized a ship to be named for the state of Arizona. Mr. L. W. Mix of Nogales served as a chairman of a committee to present a set of sterling silver from the residents of the state. Donations were received from private citizens and businesses. Even school children gathered pennies, choosing Memorial Day and July 4th of 1916 as Tag Days. Students took to the streets throughout Arizona, selling tags to raise money for the silver. The committee raised \$9,000 and commissioned 87 pieces from Reed & Barton silversmiths. In January 1941 the Navy told all its ships to take off non-essential materials as war was eminent. The Arizona sterling was taken

2013.305.002	Planes	Johnstone, Michael	The desire to fly is as old as man himself. Since Daedalus and Icarus made their legendary, if bizarre, attempt, progress has been slow—until a sudden acceleration in the 20th century. Although the Montgolfier brothers had got their balloon into the air, it was much more recently that the first successful flight of a heavier-than-air craft was accomplished. After that, things speeded up. Determination, commercial interests and two world wars have all contributed to a staggering level of achievement in our own time. Now Concorde crosses the Atlantic in 3-1/2 hours; one jumbojet carries 500 people; and flying the world has come within the reach of millions. Here is a comprehensive survey of the

			many roles to which aircraft have been, and are put—civilian, military and unusual. (from dust jacket flap) A concise history on the development of aircraft from hot air balloons to the present day for young readers. Profusely illustrated with mostly color photographs.
2013.305.003	U.S.S. Frustrate : "The Luckiest Ship in the Navy"	Dennis, E. B.	This is the true story of a United States destroyer that began her life in 1935 and survived until 1946 because of an uncanny series of events that would give rise to the belief in "guardian angels" or some other supernatural protection. (from Amazon.com) The destroyer U.S.S. Flusser (DD-368) got the nickname of U.S.S. Frustrate from a February 1943 newspaper article with the subtitle "Fighting Ship Vainly Seeking Action in the Pacific." Flusser had been stationed at Pearl Harbor when Japan attacked on December 7, 1941, but the destroyer had been escorting the carrier Lexington (CV-2) away from base so did not encounter the enemy. Not until September 1944 did Flusser directly engage the Japanese in battle when the ship was hit by shrapnel from nearby exploding shells that had been launched from shore batteries on Wotje Island. In November and December 1944, the action really got hot during several encounters with kamikaze aircraft in the Philippines. E. B. Dennis served aboard Flusser as a sonarman from January 1942 until April 1945, when he had to leave due to three fractured vertebrae. He published a previous book about Flusser (The Destroyer U.S.S. Flusser DD368, 1989). U.S.S. Frustrate, published in 1998, generally expands on the accounts included in his earlier work, but this book does not

Object ID	Title	Author	Summary
			include a few interesting items from the prior work such as a June 1944 newspaper article about the continuing frustrations of U.S.S. Frustrate. Both books suffer greatly from a lack of personal stories despite the author's involvement in the U.S.S. Flusser Association. This history quickly turns into a dry recitation of ship movements most probably from official logs. Although the author's emotions and opinions during the war do not come out in the narrative, he clearly has a sense of humor. The end of each of the 46 chapters has a joke, quite unrelated to the book's main contents. He sometimes uses inflammatory terms for Japanese kamikaze such as "suicide nuts," "crazy Kamikazes," and "nuts who like to die for the Emperor." Flusser's closest encounter with a kamikaze came on November 18, 1944. A suicide plane passed just over the bridge, and its bomb exploded along the port side amidships. "Pieces of the aircraft rained all over the ship like hail. Almost everyone on the deck picked up a piece of the airplane" (p. 112). During the Battle of Ormoc Bay on December 7, 1944, Flusser faced continuous kamikaze attacks. The destroyer Mahan (DD-364) and the high speed transport Ward (APD-16) were sunk by kamikaze hits. In mid-afternoon, a kamikaze plane crossed Flusser's bow and slammed into the bridge of the destroyer Lamson (DD-367). The crash killed 21 men, but Flusser rescued many survivors from the water as kamikaze planes continued their attacks. Although Flusser may have had the somewhat negative nickname of Frustrate, the crew considered her to be a lucky ship to have gone through the entire war and survived so many life-threatening

			situations. (from http://www.kamikazeimages.net/books/ships/frustrate/)
2013.305.004	200,000 Miles Aboard the Destroyer Cotten	Robinson, C. Snelling (Charles Snelling)	In mid-1943, Snelling Robinson joined the crew of the Fletcher class destroyer USS Cotten as a newly commissioned ensign. The Cotten sailed to Pearl Harbor in time to join the Fifth Fleet. Under the command of Admiral Raymond Spruance, the Fifth Fleet participated in the invasions of Tarawa and Iwo Jima and several naval battles in the Philippine Sea and the Leyte Gulf. Robinson writes from the perspective of a young naval officer and integrates this with the background of the larger conflict, including the politics of command. Publication Date: October 17, 2000 (from Amazon.com)
2013.305.005	Black May : The Epic Story of the Allies' Defeat of the German U-boats in May 1943	Gannon, Michael	For three years German U-boats turned the Atlantic Ocean into a killing field, but in May 1943, the Allies struck back successfully and reversed the tide of war. In just one month, using new tactics, new technology, and the coordinated forces of a new generation of submarine hunters, the Allies destroyed 41 U-boats and damaged 37 others. With this book, the noted naval historian Michael Gannon illuminates the epic battle and those who shaped it, from the men who made key command decisions to the sailors trapped inside the steelhulled U-boats as they were pounded by Allied depth charges. Drawing on never-before-released transcripts of secretly recorded conversations of U-boat POWs, Gannon tells the story of two powerful enemies going head-to-head in a desperate naval battle and explains why one side

Object ID	Title	Author	Summary
			emerged the victor. Amazon.com Review After a year of terrorizing ships off the coast of the United States, the tide turned against the U-boats in May 1943 when Allied forces sank 41 vessels and damaged 37 others. This frenzy of activity essentially reopened the North Atlantic to merchant shipping and helped clear a path for the Allies' final assault on Europe the following year. Michael Gannon tells his story with wonderful anecdotes from all perspectives--in one scene, he describes a surfaced U-boat crew standing on deck and watching automobile headlights shine through the blackness of night from the New Jersey shore. Few people realize that German naval vessels actually came so close to the United States, but they did--until, as Gannon tells the story, they were finally pushed away, once and for all, in a single hectic month of combat. Although Black May is something of a sequel to Gannon's extraordinary Operation Drumbeat, which described the German's initial successes, it stands on its own as a brilliant work of naval history. -- John J. Miller --This text refers to an out of print or unavailable edition of this title. From Publishers Weekly Combining scholarship, storytelling and analysis, Gannon (Operation Drumbeat) delivers a compelling, comprehensive account of the turning point of the Battle of the Atlantic in May 1943. Gannon integrates coverage

Object ID	Title	Author	Summary
			of the North Atlantic convoy battles with the Bay of Biscay offensive simultaneously mounted by RAF Coastal Command. The book's focal point is the epic story of Convoy ONS 5, which included 43 merchantmen (ships used in commerce) and a half dozen escorts. ONS 5 was sailing to Halifax, and most of its ships were in ballast. But cargoes were less important than tonnage for German Admiral Karl Donitz's U-boat wolf packs. Gannon takes readers from the decks of merchantmen to the bridges of warships, to the conning towers of U-boats in a kaleidoscope whose final pattern was as much a function of skill and determination as of weapons systems. Thirteen merchantmen were sunk. But a half-dozen U-boats went down as well, and seven more were so crippled they had to return to base. U-boat captains were like fighter pilots: a relatively small number scored a disproportionate number of victories. By May 1943, many of the original "aces" were dead. Their successors were generally less willing to push attacks against escorts whose crews, techniques and tactics had exponentially improved since 1940. Meanwhile, civilian analysts had developed an operational model indicating that by concentrating on the choke point provided by the Bay of Biscay, RAF Coastal Command would be in a position to

Object ID	Title	Author	Summary
			paralyze the U-boat offensive. When implemented, the plan's verifiable figures matched the projected numbers. Few men fought better in an evil cause than did the U-boat crews. But, as Gannon shows in his excellent book, none performed better in a good one than those who defeated them. 40 b&w photos. Copyright 1998 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. (from Amazon.com)
2013.305.006	War Beneath the Waves : A True Story of Courage and Leadership Aboard a World War II Submarine	Keith, Don	The gripping story of heroism under the sea, from the national bestselling author of Final Patrol & U.S.S. Billfish In November 1943, while on war patrol in the Makassar Strait, the U.S.S. Billfish submarine was spotted by the Japanese, who launched a vicious depth charge attack. Explosions wracked the sub for fifteen straight hours. With senior officers incapacitated, diving officer Charlie Rush boldly assumed command and led key members of the crew in a heroic effort to keep their ship intact as they tried to escape. Told in harrowing detail, War Beneath the Waves is an inspiring tale of one man's leadership and courage under fire, and of the remarkable efforts of a submarine crew to do their duty and save their ship. Editorial Reviews From Booklist A seasoned chronicler of submariners' exploits now tells the tale of a heroic feat of endurance in the fall of 1943, when U.S.S. Billfish endured a 15-hour depth-charging by some uncommonly skilled and persistent Japanese antisubmarine vessels.

Object ID	Title	Author	Summary
			Further handicapping her was the fact that her captain was better at being a staff officer than he was at the extraordinarily
			demanding and personal job of leadership required in submarines. Nor was he the only one whose skill or nerve failed to meet
			requirements. On the other hand, many of the crew rose to fill gaps and bring the ship safe home. Dealing equally with the
			hardware and the interpersonal dynamics of WWII submarining, Keith will inform and please both the rank newcomer to the
			subject and the well-read expert on it. Invaluable for the WWII submarine annals. --Roland Green --This text refers to an out

			"A story of extraordinary courage and valor...Don Keith has done yeoman's work setting the stage and detailing (the) story." -- Florida Times-Union (from Amazon.com)
2013.305.007	Air Combat : An Oral History of Fighter Pilots	Dorr, Robert F.	At 20,000 feet, any fight you survive is a victory...A fully-illustrated oral history of pilots and their planes. From the savage dogfights of World War II to the high-tech missile duels of today, those who wage war in the skies-and the machines they fly-are a breed apart. These are their stories, in their own words. In Air Combat, veteran and military author Robert F. Dorr has collected dozens of interviews from combat veterans who have experienced what it's like to face the enemy in the skies above-from the first days of World War II to the current war on terror. Each story offers a first-hand account of what it's like to be in the thick of the fight, describes the history, strengths, and weaknesses of each man's plane in detail, and offers readers a rare glimpse into the minds and hearts of those who dare to fight in the air.
2013.305.008	Future of Sea Power, The	Grove, Eric J.	This book reexamines the whole of maritime strategy, exploring likely future developments while putting forward a new overall empirical theory of sea power. (from Amazon.com)
2013.305.009	World War II : The Allied Counteroffensive, 1942-1945	Brinkley, Douglas (ed)	World War II comes alive through the public records and private accounts of the day. We have long relied on historians to sift through the debris of the past and piece together narratives to shape our understanding of events. But it is in the letters, diaries, speeches, song lyrics, newspaper articles, and government papers that history truly comes alive. Eminent

Object ID	Title	Author	Summary
			historian Douglas Brinkley has carefully chosen the critical documents that bring to life the days of the war from the first Allied counteroffensive to V-J Day. His selections span the momentous, such as Eisenhower's address to the troops in preparation for D-Day or Hirohito's surrender on Japanese radio, to the intimate and the obscure. Readers will find one of Tokyo Rose's broadcasts, letters from soldiers on the eve of battle, Ernie Pyle's dispatches from Sicily, and Truman's diary entries in which he wrestles with the decision to drop the A-bomb. Each primary document is accompanied by a relevant piece of New York Times reporting from the period and original text explaining the historical significance of the event in the war's progress. News photos and other images add a strong visual component to this vivid re-creation of history.
2013.305.010	Battle of Midway (Parts One & Two), The	Aitken, Andrew (director) (?)	In June 1942 the critical battle of the war in the Pacific was fought between American and Japanese carrier forces, separated by hundreds of miles of ocean. The Battle of Midway was a significant landmark in naval history and a turning point in the war at sea. For the first time battleships fled before aircraft carriers, and major fleet engagements took place well beyond the range of visual contact. In the aftermath of the battle Japanese naval power was fatally damaged, and the ability to defend her new found maritime empire, seriously weakened. Although heavily outnumbered, the American task force, through better intelligence appreciations, superior tactics and strategy, and remarkably good luck, achieved a stunning victory, destroying four Japanese carriers at the cost of only one of its own. Drawing on extensive

Object ID	Title	Author	Summary
			sources of original archive footage, including rare color material, and employing the most modern techniques of animated 3D imaging, Battlefield assesses the opposing strategies and tactics, sets the battle within its historic context, and chronicles the sequence of events in a compelling narrative. Overall, the series presents one of the most comprehensive, analytical and vibrant accounts of World War II ever published. 12-volume set of the Battlefield series. These documentaries provide vintage battlefield footage about the tactics, generals, weapons and outcome of some of the most decisive battles of WWII. The videos are still in the original presentation case with only some slight wear on the corners of the case. Titles included in this series are: The Battle of France, The Battle of Britain, The Battle of Midway, The Battle of Stalingrad, The Battle of Normandy, and The Battle of Berlin.

2013.305.011	Russian Navy : Myth and Reality, The	Morris, Eric	The modern Russian Navy has come a long way since its humiliating defeat at the hands of Admiral Togo at the Battle of Tsushima during the Russo-Japanese war. Although its naval history dates back to Peter the Great, Russia achieved little at sea in the first half of this century. The maritime role was subordinated by doctrine and circumstances to the needs of land warfare. Since 1945 the Russian navy has become an increasingly important instrument of Soviet foreign policy. Eric Morris examines this development and shows how Russia, in her dealings with the United States and other powers, has evolved a relationship which has moved away from the propaganda

Object ID	Title	Author	Summary
			and confrontation of the 1950s to a more subtle policy of detente. Behind this, however, lies the ominous strategy of "sea denial" propogated by Admiral Sergei Gorshkov, the flamboyant naval Commander in Chief, which points to Soviet pretensions to mastering the oceans of the world. Manifesting this intent, Russian ships have become increasingly evident. This new Russian maritime policy is analyzed in this illuminating — and at times disturbing — book. ERIC MORRIS, born in 1940, is a lecturer in the department of War Studies and International Affairs at the British Royal Military Academy, Sandhurst. (from dust jacket flaps) Cuban Missile Crisis, 1962. Gorshkov, Sergei? Georgievich, 1910- 1988 Russian Navy
2013.305.013	From Here to Eternity	Zinnemann, Fred (director)	Here's a model for adapting a novel into a movie. The bestseller by James Jones, a frank and hard-hitting look at military life, could not possibly be made into a film in 1953 without considerably altering its length and bold subject matter. Yet screenwriter Daniel Taradash and director Fred Zinnemann (both of whom won Oscars for their work) pared it down and cleaned it up, without losing the essential texture of Jones's tapestry. The setting is an army base in Hawaii in 1941. Montgomery Clift, in a superb performance, plays a bugler who refuses to fight for the company boxing team; he has reasons for giving up the sport. His refusal results in harsh treatment from the company commander, whose bored wife (Deborah Kerr) is having an affair with the tough-but-fair sergeant (Burt Lancaster) . You remember--the scene with the two of them embracing on the beach, as the surf crashes in.

Object ID	Title	Author	Summary
			The supporting players are as good as the leads: Frank Sinatra and Donna Reed won Oscars (and Sinatra revitalized his entire career), and Ernest Borgnine entered the gallery of all-time movie villains, as the stockade sergeant who makes Sinatra miserable. Zinnemann's work is efficient but also evocative, capturing the time and place beautifully, the tropical breezes as well as the lazy prewar indulgence. This one is deservedly a classic. -- Robert Horton (from Amazon.com)
2013.305.014	Grumman F-14 Tomcat	Osborn, Phil (producer)	History of the development and operation of the Grumman F-14 Tomcat. Includes footage of the predecessor F-111B and the Number One F-14 aircraft crash. The Grumman F-14 Tomcat is a supersonic, twin-engine, two-seat, variable-sweep wing fighter aircraft. The Tomcat was developed for United States Navy's Naval Fighter Experimental (VFX) program following the collapse of the F-111B project. The F-14 was the first of the American teen-series fighters which were designed incorporating the experience of air combat against MiGs during the Vietnam War.
2013.305.015	Rise of the Drones	Yost, Peter (writer, producer, director)	Drones. These unmanned flying robots—some as large as jumbo jets, others as small as birds—do things straight out of science fiction. Much of what it takes to get these robotic airplanes to fly, sense, and kill has remained secret. But now, with rare access to drone engineers and those who fly them for the U.S. military, NOVA reveals the amazing technologies that make drones so powerful as we see how a remotely-piloted drone strike looks and feels from inside the command center. From cameras that can capture every detail of an entire city at a glance to swarming robots that can make decisions on their own to giant air frames that can stay aloft for days on end,

Object ID	Title	Author	Summary
			drones are changing our relationship to war, surveillance, and each other. And it's just the beginning. Discover the cutting edge technologies that are propelling us toward a new chapter in aviation history as NOVA gets ready for "Rise of the Drones." (from: http://www.pbs.org/wgbh/nova/military/rise-of-the-drones.html) Includes segment on the Northrop Grumman X-47B unmanned combat air vehicle (UCAV) intended for carrier launches.
2013.305.016	Air Warriors : The Inside Story of the Making of a Navy Pilot	Waller, Douglas C.	Several B&W photos aboard the USS Stennis and the USS John F. Kennedy. The author follows pilot trainees through two years of intense preparation. He offers vivid illustrations from the fray: hair raising aerial dogfights; stomach-swallowing dive-bombing runs; high-speed tactical maneuvers grazing the desert floor; and numerous nerve-twisting aircraft carrier takeoffs and landings. In addition to his own experiences and those of the group of trainees he joins, his research is based on interviews with hundreds of other students and their instructors.
2013.305.017	Fighting Lady, The : An American Carrier in Action	Steichen, Edward (dir)	We have three other DVD copies: 2007.302.088 and 2010.302.073 and 2006.302.186. The credits lists CMDR Edward J. Steichen as the supervisor. Narrated by Lieut. Robert Taylor, USNR, and photographed in zones of combat by the U. S. Navy. The film follows one of the many new aircraft carriers built since pearl harbor, known as The Fighting Lady in honor of all American carriers, as it goes into action against the Japanese in the Pacific Ocean in 1942. (The ship used was the USS Yorktown CV-10). See the ship and its pilots undergo their baptism of fire, attacking the Japanese base on Marcus

2013.305.019	History Through the Lens: Tora! Tora! Tora! - A Giant Awakes	Reynolds, Burt (narrator)	Supplemental historical documentary on Disc 2 of Fox Home Video "Tora! Tora! Tora! Special Edition" DVD set. "Tora! Tora! Tora!" is the Japanese signal to attack - and the movie meticulously recreates the attack on Pearl Harbor and the events leading up to it. Opening scenes contrast the American and Japanese positions. Japanese imperialists decide to stage the attack. Top U.S. brass ignore it's possibility. Intercepted Japanese messages warn of it - but never reach F.D.R.'s desk. Radar warnings are disregarded. Even the entrapment of a Japanese submarine in Pearl Harbor before the attack goes unreported. Ultimately the Day of Infamy arrives - in the most spectacular, gut-wrenching cavalcade of action-packed footage ever. You'll see moments of unsurpassed spectacle and heroism: U.S. fighters trying to take off and being hit as they taxi; men blasted from the decks of torpedoed ships while trying to rescue buddies; savage aerial dogfights pitting lone American fliers against squadrons of Imperial war planes. It's the most dazzling recreation of America's darkest day - and some of her finest hours. (from http://www.foxconnect.com/t

Unmatched in their aerial daring, the Blues Angels have long been surrounded with an

Object ID	Title	Author	Summary
			aura of greatness. In this dynamic firsthand account, former fighter pilot, award winning author and photographer Brian Shul penetrates the Blue Angel mystique and explores the essence of the world's most famous flight demonstration squadron. Traveling with the Blue Angels for an entire year, Shul observed, photographed and, most importantly, flew with this prestigious Navy unit in pursuit of their story, shooting over 20,000 photographs to capture the essence of this elite team for this 50th Anniversary Commemorative. Riveting images as awe-inspiring as the teams performance thrust the reader into the cockpit for an exhilarating sense of what it is like to fly in the world's tightest aerial formation, delivering a thrilling close-up view normally seen only through the visors of the Blue Angels. For the first time, you will not only fly in close formation with the Blues, but will attend their flight briefings, and from the pilots' own words, learn about the difficulties, and dangers, of flying 30 inches apart at 500 mph. Whether tucked into the slot position, pointed straight up in the Diamond Loop, or hanging upside down in your seat with the solos less than 200 feet above the runway; you will fly to the heart of the Blue Angel experience as never before. From a stirring foreword by the very first Blue Angel to an introduction to team members and their engaging sense of humor; from the deadly serious demands of winter training season to the cockpits of Blue Angel pilots during actual performances, this book takes the reader where few have ever gone. Through the brilliance of his camera lens, Brian Shul has created an unforgettable

2013.305.043	Good to Go : The Rescue of Capt. Scott O'Grady, USAF, from Bosnia	Kelly, Mary Pat	Title on cover is "Good to Go" So perfectly executed was the mission to rescue Capt. Scott O'Grady that it amazed even the men responsible. Just, five hours after radio contact was first made with Basher 52 - O'Grady's call sign - the Air Force captain was safely on board the USS Kearsarge. The downed F-16 fighter pilot's rescue from a Bosnian mountainside by Col. Martin Berndt's 24th Marine Expeditionary Unit electrified the nation in June 1995 and renewed many Americans' faith in the military. This book tells the story of the mission in the words of the men who commanded, planned, and carried it out. To get the inside account, Mary Pat Kelly traveled throughout Europe to conduct more than one hundred interviews, visiting U.S. ships and bases and UN posts in Croatia and Bosnia where participants were stationed. Adm. Leighton W. Smith Jr., commander in chief of U.S. naval forces in Europe and head of NATO forces in the Southern European theater, provides

Object ID	Title	Author	Summary
			the framework with his day-to-day commentary on the efforts to find Captain O'Grady and a nearly minute-by-minute record of the rescue itself. In concert with Lt. Gen. Michael E. Ryan, commander of U.S. and NATO air forces, the admiral reveals the decision-making process that led to the "Good to Go" order. Readers then hear from the Tactical Recovery of Aircraft and Personnel (TRAP) team - the Navy and Marine Corps commanders, pilots, crew chiefs, and grunts who made it happen. Speaking for the Navy are Capt. Christopher Cole, skipper of the Kearsarge, Como. Jerome Schill, and their staffs, from the intelligence officers to the grapes who fueled the aircraft. Captain O'Grady puts his own (from dust jacket flap)
2013.305.045	MiG : Fifty Years of Secret Aircraft Design	Belyakov, R. A.	When the story behind the Soviets' most secret aircraft design bureau and the fighter planes it produced was made public in France in 1991, the world of military aviation was abuzz with its phenomenal revelations. Indeed, the Aero-Club de France heralded the original version as "best document of the year." As the authors make clear, the efforts of the MiG design bureau became landmarks of technical progress on both sides of the Atlantic Ocean. During the cold war, MiG always had to find a way to counter the latest American program — whether it was the MiG-9 versus the F-80 Shooting Star, the MiG -15 versus the F-86 Sabre, the MiG-19 versus the F-100 Super Sabre, or the MiG-25 versus the Lockheed A-11. Among its groundbreaking developments are the afterburning chamber, the Soviet air-to-air missile, the sweepback wing, pressurized and air-conditioned cockpits, tricycle landing gears, automatic brakes for gear wheels, and ejection seats.

Object ID	Title	Author	Summary
			MiG aircraft have set fifty-five world records, twenty-one of which are still standing as this book goes to press. In this milestone translation of the original French publication, R. A. Belyakov, chief MiG designer since 1970, and Jacques Marmain, a French aviation journalist renowned for his expertise on Russian aircraft, offer an inside look at every MiG aircraft built since 1941 — - including those in the current inventory — to fill in the details of what until now has been primarily guesswork. But this book is no propaganda instrument. Belyakov and Marmain detail the mistakes and dead ends as well as the successes encountered in the various designs and productions. Filled with photographs, drawings, specifications, and performance characteristics never before released, such as illustrations drawn from the MiG design bureau archives, this book is a tour de force in military aircraft history. It is the only firsthand account of some of the world's most famous aircraft, setting standards for accuracy as it reveals the secrets of the most important design bureau in the Russian aircraft industry, right up to the MiG—29 Fulcrum and MiG—31 Foxbat [sic - s/b Foxhound]. This translation provides readers of English with the most complete reference work on the subject ever published and offers an extensive interview with R. A. Belyakov as a prelude to the documentation. (from dust jacket flap) Translation of: Samolety MIG.
2013.305.046	Night Fighters : A Development & Combat History	Gunston, Bill	The thrilling story of night fighters and night fighter operations, from World War 1 to the present day, has never before been told. This dramatic book, which will appeal to the interested layman as well as

Object ID	Title	Author	Summary
			the serious aviation historian, relates the problems underlying the development of effective airborne radars; of specialised night fighting aircraft such as the famous Mosquito and Ju 88; of night fighting tactics and of specialised weapons. Although technically detailed, it is also a vivid narrative which really puts the reader 'into the cockpit' and conveys all the confusion and downright terror of aerial combat in the dark. (from back cover) Grumman F-14 Tomcat. Grumman F4F Wildcat. Grumman F6F Hellcat. Grumman F7F Tigercat. Grumman F8F Bearcat. Hellcat (Fighter planes). McDonnell Douglas F-4 Phantom II. McDonnell F2H Banshee. McDonnell F3H Demon. Phantom II (Jet fighter plane). Skyknight (Jet fighter plane). Skyray (Fighter plane). Tiger (Jet fighter plane). Tigercat (Fighter plane). Tomcat (Jet fighter plane). Vought F4U Corsair. Vought F7U Cutlass. Vought F-8 Crusader. Wildcat (Fighter plane).
2013.305.047	Igor Sikorsky : The Russian years	Finne, K. N.	Much has been written about early aviation, and many are familiar with Igor Sikorsky's American-made seaplanes and helicopters. During the Golden Age of Flight, Sikorsky was a close friend of Charles Lindbergh and a pioneer aviation industrialist. He had a profound and enduring impact on the development of American aviation. Less familiar to us, however, are Sikorsky's Russian years, beginning in Kiev in 1910, when as a young inventor he designed his first airplane. For the next decade, spanning the turbulent years of World War I and the Russian Revolution, Sikorsky designed a series of aircraft. By the time he emigrated to the West in 1918, he had established himself as

Object ID	Title	Author	Summary
			one of Europe's preeminent aircraft designers. K.N. Finne's memoir, available for the first time in English translation, provides the most comprehensive and authoritative documentation to date of this obscure period. Drawings, maps, original photographs, appendices, and an epilogue by Igor Sikorsky's son Sergei bring to light significant information about the development of the world's first heavy bomber — the Il'ya Muromets. This behemoth, with its enclosed cockpit and heated cabins, could stay aloft for hours, cruising at sixty-five miles per hour with as many as sixteen passengers. On the eve of World War I, the Il'ya Muromets made an epic sixteen-hundred-mile round-trip flight from St. Petersburg (now Leningrad) to Kiev. During the war, the Russians manufactured more than seventy of these multi-engined aircraft and deployed them in a special squadron at the front for bombing and reconnaissance missions. Finne, a friend and admirer of Sikorsky's prior to the Russian Revolution, wrote this firsthand account in 1930 from exile in Yugoslavia. As a flight surgeon with the squadron of Flying Ships in the Imperial Russian Air Force, Finne been in a unique position to record Sikorsky's major aeronautical achievements. Although neither historian nor professional writer, Finne has produced a compelling record. This adapted English-language edition has not only made that record available to English-speaking aerohistorians, military historians, flying enthusiasts, and general readers, but has also filled an important gap in our knowledge of aviation history. Carl J. Bobrow developed an

Object ID	Title	Author	Summary
			interest in aviation at an early age. He began his research on I. I. Sikorsky in 1983 after attending a Smithsonian seminar at the National Air and Space Museum. He is a member of the Cross and Cockade Society of World War One Aero Historians and of the American Aviation Historical Society. Von Hardesty, Ph.D., is a curator at the National Air and Space Museum. He is the author of "Red Phoenix: The Rise of Soviet Air Power" and the editor of "Gatchina Days: Reminiscences of a Russian Pilot." (from dust jacket flaps)
2013.305.048	F4F Wildcat in action	Linn, Don	In 1935 the US Navy Bureau of Aeronautics issued a request for proposals to the US aviation industry for a new fighter design to replace the Grumman F3F. A number of designs were submitted and from these the Navy selected two for further development. In the Spring of 1936 the Navy awarded contracts for two prototype fighters, the Brewster XF2A-1 and the Grumman XF4F-1. Brewster's XF2A-1 prototype was a monoplane, while the Grumman design, the XF4F-1, was a biplane, similar to Grumman's earlier F3F-3 already in service. Grumman, realizing that its competitive edge could be lost if they continued with biplane designs while others were building monoplanes, sought the Navy's permission to change the XF4F-1 prototype from a biplane to a monoplane configuration. On 10 July 1936, the Navy agreed to the Grumman proposal. The XF4F-1 contract was cancelled and Grumman received authorization to build a prototype of the monoplane XF4F-2 in its place. The Grumman and Brewster prototypes would be flown in a competitive fly-off which would determine which design

2013.311.006	Hellcats of the Navy	Juran, Nathan (Dir)	the war in Iraq. Approx 10 Hours. Color. Originally produced as a motion picture in 1957. Dramatic World War II action aboard a U.S. submarine is the setting for the only film in which Ronald Reagan and Nancy Davis star together. Based on a true incident, submarine Commander Casey Abbott (Reagan) leads a daring mission to enter the heavily mined Tsushima Straits to sever a vital link between the Asiatic mainland and the Japanese home islands. Abbott charts the dangerous waters, destroys an enemy island installation and sinks thousands of tons of enemy shipping. In the course of the operation, Abbott teaches his second in command, Lt. Commander Landon (Arthur Franz), the important difference between command decision and emotional reaction. Landon is put to the test when he must order a crash dive which leaves Abbot swimming alone in the trackless sea. When rescued, Abbott is cared for by nurse Blair (Davis), and now he too must test his own emotions. Based on the book by Charles A. Lockwood and Hans Christian Adamson./ Originally produced as a motion picture in 1957./ Participants: Ronald Reagan, Nancy Davis, Arthur Franz.
2013.311.007	Pearl Harbor and the War in the Pacific, Disc 1 : Pearl Harbor : A Day of Infamy	Timeless Media Group	On the morning of December 7, 1941, a surprise attack by Japanese naval aviation against the American held island of Oahu and Pearl Harbor thrust the United States into World War II. This story details one of the most momentous events in American history and a crucial turning point in the 20th century. Chapters: 1. Prologue 2. The Japanese Paradox 3. The Great Depression 4. The China Incident 5. The Drift to War 6. The Choice for War 7. Last Days of Peace 8. Eleven Minutes of Terror

This manual consists of 15 chapters with test questions at the end of each chapter.
2013.311.013	Aviation : A Smithsonian Guide	Lopez, Donald S.	ReviewFrom the National Air and Space Museum of the Smithsonian Institution comes this lavishly (and lovingly) illustrated history of aviation. With an authoritative text by museum advisor and World War II fighter ace Donald Lopez, this wondrously entertaining book takes the reader on a flight through time, from the first balloons of the Mongolfier brothers to the stealth technology of the F-117 fighter.Among the more than 350 photographs are rare cockpit shots taken inside classic planes (including Lindbergh's Spirit of St. Louis and a B-17 Flying Fortress), numerous full-color photos of planes in the Smithsonian's permanent collection, and a fold-out timeline showing milestones in the development of aviation.Product DescriptionWith spectacular photographs and a fast-paced text, Aviation provides a soaring look at the feats of imagination and engineering that have enabled humans to fly. Broad in scope and rich in anecdote, this exciting volume recounts the vision of early theorists and first attempts at piloted flight, traces the fierce international competition to dominate the skies, and profiles daring risk-takers like Orville and Wilbur Wright, Charles Lindbergh, Chuck Yeager, and Amelia Earhart. But the real stars of aviation are the amazing flying machines themselves, from balloons and biplanes to The Spirit of St. Louis and the Concorde jet,

2013.311.016	Few, The : The American "Knights of the Air" Who Risked Everything to Save Britain in the Summer of 1940	Kershaw, Alex	The never-before-told story of the American pilots--idealists, adventurers, romantics--who joined the RAF before America entered the war and helped save Britain in its darkest hour. Eight young Americans joined Britain's Royal Air Force, defying their country's neutrality laws and risking their U.S. citizenship to fight side-by-side with England's finest pilots in the summer of 1940--over a year before America entered the war. Flying the lethal and elegant Spitfire, they became "knights of the air" and with minimal training but plenty of guts, they dueled the skilled and fearsome pilots of Germany's Luftwaffe. By October 1940, they had helped England win the greatest air battle in the history of aviation. Winston Churchill once said of all those who fought in the Battle of Britain, "Never in the field of human conflict was so much owed by so many to so few." These daring Americans were the few among the "few."--From publisher description.
2013.311.017	In the Cockpit II : Inside History-making Aircraft of World War II	Connor, Roger D.	The pages of this book reveal a wide range of complexity and ingenuity as seen on 34 aircraft operated by the major combatants during World War II. These aircraft reside today in the collection of the Smithsonian's National Air and Space Museum.

2013.314.002	Carrier War : Task Force 58 and the Pacific Sea Battles	Jensen, Oliver	The story of Task Force 58 in the carrier war in the Pacific during World War II.
2013.314.004	Night Flying Avenger	Grant, Pete	In this exciting book about the first naval aviators who took off and landed at night on carriers during World War II, Pete Grant, a combat pilot, takes you into the cockpit of his night torpedo bomber as he and his fellow pilots attack German submarines in the mid-Atlantic Gap and later participate in the first night carrier raids over Tokyo on February 16, 1945. With realism that only a navy pilot who was there can recall, he dramatically describes the fighting and tells what it felt like to be shot off a catapult at night, at full throttle, from the deck of the U.S.S. Saratoga, the "Queen of the Flattops." The reader experiences the fears and heartaches of these pioneering night pilots as they prepare for battle, fly their missions, and then attempt safe landings at night on a carrier bobbing around in the middle of the ocean. Grant presents new insight into what actually happened on February 21, 1945, when the "Sara" was hit by seven Japanese kamikaze planes and almost sunk off the coast of Iwo Jima. The Japanese were attempting to finish off the Saratoga as she gave air support for the marines trying to take the island. He dramatically illustrates the problems and disasters that can develop in combat when

Object ID	Title	Author	Summary
			quick decisions have to be made in interpreting a blip on a radar screen in a plane or in a ship's combat intelligence center. The "Avenger" torpedo bombers, piloted by Pete Grant, and other naval aviators, played an important role during World War II and is similar to the plane flown by President George Bush when he was shot down in the Pacific. After reading this story you'll soon realize that Pete Grant has written an awesome book about the first carrier-based night pilots that is clear, authentic, reflective, and is truly "autobiographical historical fiction." Pete Grant is the pseudonym of a successful nonfiction writer A veteran pilot of Night Torpedo Squadrons VTN 43, VTN 53, and VTN 63, he is now a surgeon. Jacket Design by Sue Pierce/IPA

2013.314.005	Off My Sea Chest	Conarroe, Lewis H.	If you're one of twelve million men and women who were in a war called World War II you will probably be breathing down the author's neck, but if you've ever been part of any large organization from which you could not easily get out, OFF MY SEA CHEST will give you a night of open season. It was written, in fact, for everyone who has ever yearned to take 180 pounds of uniformed red tape, and push; a composite and hilarious gripe by a man who knows what hews griping about — as necessary as fresh air and twice as exhilarating. Specifically, OFF MY SEA

Object ID	Title	Author	Summary
			CHEST is a debunking book, sharply and amusingly critical of certain aspects of the Navy; graft, red tape, confusion, blatant injustice, gold braid, inexcusable inefficiency, unnecessary paperwork, and stupidity in relatively high places. It is the story of Lewis Conarroe's experiences as a naval reserve officer aboard such nonexistent ships as the U.S.S. Veteran, the U.S.S. Neversail, the U.S.S. Navy-regs. And it is also the story of such naval types as Captain Composite, Commodore Spleenish, Lieutenant Priggish, not to mention Crockrot and Bandyshanks — the gold braid, bootlickers, connivers, grafters, and bullies that loused up the landscape and the seascape as well. But it is also the story of millions of servicemen - and of an exclusive and expensive cow, Silver Star, on Mantrap Island. That part of the navy which had little or nothing to do with winning battles comes up for a critical and justifiable ride under the skilled handling of a man whose own experiences in it were such that it was a toss-up whether he would get a book down on paper or have a nervous breakdown instead. Readers of the "nautibiography" will be happy that it was the former, for Mr. Conarroe pushes off his sea chest in such a way that he performs a service for the postwar world which is comparable to what Marion Hargrove did for the early stages of military training. It's not a brave

Object ID	Title	Author	Summary
			book, full of glorious deeds; its author made no epic speeches, took no Jap prisoners, shot down no Jerries. He was stuck in the deadly, dull, red-taped, blue-jacketed reaches of the Potomac along with a bunch of factors - some of them human - that tended to gum up victory. OFF MY SEA CHEST is not the book for a brass hat to cool off with, but it is a book to warm the hearts and merit the laughter of all the ex-servicemen and women who, as a matter of fact, have generally intended to write this book themselves. (from dust jacket flaps)
2013.314.007	Flights of Passage : Reflections of a World War II Aviator	Hynes, Samuel Lynn	Some 40 years after the dramatic combat experiences in WWII, it is not the mechanics of flying and war-making that remain uppermost in this pilot's memory. What Hynes remembers best and describes so eloquently in this memoir are the sensations he experienced in his rites of passage from un-trained cadet to war-weary aviator, from youthful innocence to manhood.
2013.314.008	Last Men Out : True Story of America's Heroic Final Hours in Vietnam, The	Drury, Bob	The USS Midway is cited on pages 166 (Jolly Green Giant helicopters from Midway), 207 (General Carey brief stop on Midway) and 214. The monsoon winds swirling up from the South China Sea had doubled in magnitude as Marine Staff Sergeant Mike Sullivan stood on the roof of the American Embassy, watching North Vietnamese artillery pound Saigon's airport. It was late in the afternoon of April 29, 1975, and for the past eight days the airstrip had been the busiest in the world as flight after flight of United States cargo planes ferried Vietnamese refugees, American civilians, and soldiers of both countries to safety while 150,000 North Vietnamese troops marched on the city. With Saigon now

Object ID	Title	Author	Summary
			encircled and the airport bombed out, thousands were trapped.Last Men Out tells the remarkable story of the drama that unfolded over the next twenty-four hours: the final, heroic chapter of the Vietnam War as improvised by a small unit of Marines, a vast fleet of helicopter pilots flying nonstop missions beyond regulation, and a Marine general who vowed to arrest any officer who ordered his choppers grounded while his men were still on the ground. It would become the largest-scale evacuation ever carried out—what many would call an American Dunkirk.In a gripping, moment-by-moment narrative based on a wealth of recently declassified documents and indepth interviews, Bob Drury and Tom Clavin focus on the story of the eleven young Marines who were the last men to leave, rescued from the Embassy roof just moments before capture, having voted to make an Alamo-like last stand. As politicians in Washington struggled to put the best face on disaster and the American ambassador refused to acknowledge that the end had come and to evacuate, these courageous men held their ground and helped save thousands of lives. They and their fellow troops on the ground and in the air had no room for error as frenzy broke out in the streets and lashing rains and enemy fire began to pelt the city. One Marine pilot, Captain Gerry Berry, flew for eighteen straight hours and had to physically force the American ambassador onto his helicopter.Drury and Clavin gained unprecedented access to the survivors, to the declassified "After-Action reports" of the operation, and to the transmissions among helicopter pilots, their officers, and officials in Saigon secretly recorded by the National Security Agency. They deliver a taut and stirring account of a turning point in American history which unfolds with

2013.314.009	Tailspin : Women at War in the Wake of Tailhook	Zimmerman, Jean	The scandal of the 1991 Tailhook convention will go down in history as the most sordid & divisive episode in the history of the U.S. Navy, rocking it to the highest levels. This book explores the link between the events of that night in Las Vegas & the legal ban on women in combat. That link forms the substance of this narrative as it portrays one of the most traditional organizations in the world, the U.S. Navy, on the brink of historic change. She recalls the role of female warriors throughout history as she introduces today s fierce women in the jet pilot pipeline, for whom the term armor-plated ceiling was more than a harsh metaphor. Photos. Editorial Reviews Amazon.com Review Jean Zimmerman vividly explains how the decision to end the legal ban on women in combat stems directly from the Tailhook scandal and argues persuasively that "measured against virtually any historical or cultural time line it signals a fundamental shift in the relations between the sexes" Stimulating and provocative. -- This text refers to an alternate Hardcover edition. From Publishers Weekly Zimmerman (Breaking with Tradition) recounts how the proud tradition of American seafaring men has been usurped by the strutting, party-animal naval aviator popularized by the movie Top Gun. "They claim to love women but what the pilots really get off on is the image of themselves they see in each other." Her analysis of women's struggle to gain a foothold in the military and her examination of the Navy fighter-pilot culture leads toward

Object ID	Title	Author	Summary
			the conclusion that the Tailhook scandal was all but inevitable. Her account of events on the third floor of the Las Vegas Hilton over the 1991 Labor Day weekend, when sexual harassment and gang-rape became virtually indistinguishable at the Tailhook convention, is comprehensive and authoritative. She follows this with an inquiry into the legal and personal ramifications for those involved. Using Tailhook as the central event of her argument, she lays bare the antipathy of military men to women in the ranks. Her provocative inquiry into women's efforts to gain acceptance in the military concludes with an optimistic assessment of their likely future in the ongoing struggle. This is an angry book by a freelance investigative journalist of the first rank. Photos. Author tour. Copyright 1995 Reed Business Information, Inc. --This text refers to an alternate Hardcover edition. (from Amazon.com)

2013.315.001	Jane's Fighting Ships - 1973-74	Moore, John E. (ed)	Jane's Fighting Ships is an annual reference book (also published online, on CD and microfiche) of information on all the world's warships arranged by nation, including information on ship's names, dimensions, armaments,

Object ID	Title	Author	Summary
			silhouettes and photographs, etc. Its annual editions cover the warships used by the different national naval and paramilitary forces, and provide data on their characteristics. It was originally published by John F. T. Jane (usually known as "Fred T.") in 1898 as Jane's All the World's Fighting Ships. Its success launched a number of military publications carrying the name "Jane's". It is a unit of Jane's Information Group, which is now owned by IHS. From Wikipedia, the free encyclopedia
2013.315.002	Lucky Bag of 1939	U.S. Naval Academy	A yearbook for the 1939 graduating class of the U.S. Naval Academy.
2013.315.003	Ethics for the Junior Officer : Selected Cases From Current Military Experience	Montor, Karel (ed)	Originally compiled and edited by the late Karel Montor, a longtime professor of leadership at the U.S. Naval Academy, with letters from VADM R. P. Rempt, Capt D. F. Tuma, RADM T. C. Lynch, and a foreword by VADM James Bond Stockdale. This volume contains over one hundred case studies from and about active-duty U.S. military officers facing ethical challenges on the job. In a short narrative, each case describes the ethical challenge faced by a junior officer. It then asks readers what they think is the right thing to do in that situation. This valuable hands-on reference also includes discussion questions and an analysis of each case study. . The USNA Class of 1964 has a project to give copies of this book to every member of the graduating class at the Academy. On the title page of this book, it states that this book is "A Gift from the USNA Class of 1964 to the USNA Class of 2007."

2013.315.009	Ships, Salvage, and Sinews of War : The Story of Fleet Logistics Afloat in Atlantic and Mediterranean Waters During World War II	Carter, Worrall Reed	This copy was presented to Rear Admiral RADM Victor D. Long. Foreword: TWICE IN OUR GENERATION the Atlantic Ocean and the waters adjoining it have been the key to the strategic concepts and efforts of great wars. In each case, mastery of the Atlantic enabled us to win through to victory. In World War II the maintaining of our forces and those of our allies, in Europe and Africa; and support of the civilian economies in Europe, required a logistical and shipping effort surpassing anything ever attempted before in that part of the world. Merchant ships, combatant ships, and military supporting vessels, all in vast numbers, were employed in the war effort; the sea lanes were infested with submarines and subjected to every other conceivable form of attack. The story of this Naval phase of World War II, is told in this book by Rear Admirals W. R. Carter and E. E. Duvall, United States Navy, who, in an earlier volume, Beans, Bullets, and Black Oil," have related the naval logistical story of the war in the Pacific. No student of naval warfare can afford to neglect this vital phase of operations at sea. A knowledge of logistical requirements, and an understanding of the vast efforts involved in the logistical support of modern campaigns, are "musts" for the military aspirants to high command. Rear Admirals Carter and Duvall have both had broad experience in the logistical support of maritime operations and are uniquely qualified to treat this important subject. The opinions expressed, and conclusions reached, in this book, are those of the authors.

			ROBERT B. CARNEY Admiral, U. S. N. Chief of Naval Operations 28 May 1954
2013.316.001	British Aircraft	Gunston, Bill	Detailed descriptions of some of the most famous aircraft in history. Dozens of action photos, plus profiles, cutaways and line drawings.
2013.316.002	Encyclopedia of British Military Aircraft, The	Bowyer, Chaz	From the Sopwith 1 1/2 Strutter to the Spitfire, the Hurricane to the Harrier, every major flying machine which served with the British armed forces--the Royal Air Force, Royal navy and Army --is described and illustrated in this book. The book traces the development of the warplane in Britain from before the First World War through to the present day.
2013.316.003	History of World Airpower	Taylor, Michael John Haddrick	This book explains in detail how air power, with the sophisticated aircraft of today, plays such a vital part in any conflict, one which has a decisive impact on any battle.
2013.317.001	United States Naval Academy, Annapolis, Maryland, Catalog - 1994-95	United States Naval Academy	A guide for prospective midshipmen as to the course of instruction and requirements of the U.S. Naval Academy at Annapolis, MD. Discusses curricula, entrance requirements, faculty and staff, recreational opportunities, professional development, etc.
2013.317.002	Aviation Storekeeper, Volume 1	Naval Air Technical Training Command	PREFACE: The thorough and intensive training given Navy pilots and aviation technicians today becomes worthless if the Aviation Storekeeper assigned to handle the supplies upon which they depend lacks a complete working knowledge of such stores and equipment. To attain this knowledge an understanding of the operating principles of all naval aircraft is vitally essential. To perform his important duties efficiently the Aviation Storekeeper must not only be able to identify instantly the parts used in aircraft, but he must also have a thorough understanding of the actual supply problems of procurement, receipt, storage, issue, cataloging, and

Object ID	Title	Author	Summary
			accounting. The Aviation Storekeeper must realize that aviation is continually developing and that, since aviation parts and planes themselves become obsolete in a relatively short time, constant study is necessary to keep fully informed of changes as they occur. The primary purpose of this text is to present the principles of aviation supply. The organization of this book follows basically the curriculum of the Aviation Storekeeper School, class A of the Naval Air Technical Training Command. For the convenience of personnel striking for Aviation Storekeeper, the qualifications for advancement in rating have been included as appendix IV. It is suggested that this appendix be used by the reader as a means of review when the text has been completed. As one of the NAVY TRAINING COURSES, this book represents the joint endeavor of the Naval Air Technical Training Command and the Training Publications Section of the Bureau of Naval Personnel.

2013.318.001	USS Midway (CV-41) - A Touch Of Salt - 1976-1978	Begy, C. R. (ed)	Pictorial account of USS Midway activities during the period of 1976 to 1978 including an 89 day South China Sea/Indian Ocean deployment commencing in August of 1977. The ship departed from Yokosuka, Japan. There is a 1976 cruise book, and a 1978-79 cruise book. One source on the internet lists 4 deployments in 1976, 3 deployments in 1977, and 2 deployments in 1978. It is difficult to determine which deployments this book covers. Port calls in this book included the Pusan, Hong Kong, Subic Bay, Freemantle (Perth), Karachi, Singapore, Diego Garcia, Bandar Abbas, Misawa, Kadena. Onboard was:

Object ID	Title	Author	Summary
			Carrier Air Wing Five (CVW-5) Squadrons listed in this book but which change with other deployments in 1977 are: VF-161 (F-4N) VF-151 (F-4N) VA-115 (A-6A/B and KA-6D) VAW-115 (E-2B) VQ-1 VMAQ-2 Det. (EA-6A) HC-1 Det.B-1 and B-2 (SH-3G) The following was written by Pete Clayton and Robert L. Broaddus and appears on page 279 of the Midway cruise book for 1978-79: Beginning in May of 1977, VF-151 and VF-161 transitioned to F-4Js and VA-56 and VA-93 started flying A-7Es. VA-115 also exchanged their A-6As and Bs (A-6Bs) for A-6Es. This CVW-5 transition occurred while the ship was in port for its 60 day EISRA (Extended Incremental SRA, a unique modernization concept developed for Midway). The air wing transition was completed in September when USS Coral Sea fighter squadrons VF-191 and VF-194 exchanged their F-4Js with Midway's F-4Ns, prior to Coral Sea returning to Alameda after her 1977 deployment. In late 1977, Midway made an 87 day deployment to the Indian Ocean where she was the principal participant in Midlink 77, an exercise hosted by the Iranian Navy and including representation from Pakistan, Turkey, and the Royal Navy.
2013.319.001	USS Midway (CV-41) - Mediterranean Cruise - 1947-1948	Mahler, W. A. (ed)	A pictorial account of the USS Midway (CVB-41) Mediterranean Cruise, 1947-48. The ship departed Norfolk, VA on 29 OCT 1947 and returned to Norfolk on 11 MAR 1948. Port visits included Gibraltar, Malta, Tangier, Cannes, Bone, Genoa, Naples, Syracuse, and Taranto. Total miles travelled - approx 19,000. Onboard: CVBG-1 VF-1B (F4U-4/F6F-5P) VF-2B (F4U-4) VA-1B (AD-1) VA-2B (AD-1/TBM-3W)

			and Merchant Marine in Vietnam. Most of the authors were officers either in command or key staff positions.
2013.320.005	CVN-68 Nimitz : U.S. Navy Aircraft Carrier	Zimmerman, W. Frederick	A unique and valuable keepsake with beautifully printed color images of CVN-68, U.S.S. Nimitz, a capsule biography, and rare color photographs of the great man himself. A terrific book for anyone who likes the Navy, aircraft carriers, military history, or World War II. (from Amazon.com) USS Midway Museum in page 4 photo.
2013.320.006	U.S. Navy Ships Camouflage WWII : Destroyers and Destroyer Escorts	Adcock, Al	Since the formation of the Continental Navy in 1775, US Navy ships have donned numerous colors. During WWI, when the German U-boat threatened to stop US and Canadian supplies from reaching their European allies, the British Royal Navy began using a splinter-type camouflage to confuse the enemy about the speed, distance, and the course of its ships. The US also adopted similar camouflage during this timeframe. When the Bureau of Construction and Repairs began issuing instructions for different camouflage schemes and colors, the Navy took note, and by WWII, USN destroyers sported several different camouflage schemes that ranged from blue to gray to black and included painted bow waves and multiple dazzle schemes. When WWII ended in 1945, the fleet was restored to Standard Navy Gray to await the next revolution in deceptive paintwork. Illustrated with 116 b/w photos, 2 color photos, and over 30 color renderings/profiles. Adcock; 68 pages. SS6099 \$16.95 (from squadronsignalpublications.com)
2013.320.007	Consolidated PBV-5A Catalina	Doyle, David	The Consolidated PBV is the

Object ID	Title	Author	Summary
			most readily recognized and widely produced flying boat design ever made. The aircraft, which came to be known as the Catalina, has its origins in Consolidated's 1932 Model 28. The US Navy began taking deliveries of the PBV-1 in October 1941 and then placed orders for over 600 more following Pearl Harbor. During WWII, PBVs conducted anti-submarine warfare, patrol bombing, convoy escort, search-and-rescue operations, and cargo transport. Some PBV-1s went to the US Army and others to US Allies - Australia, Britain, Canada and the Free French forces. This book presents a comprehensive view of the Catalina with 170 photographs, color profiles and detailed line drawings. Doyle; 72 pages. SS5560 \$18.95 (from squadronsignalpublications.com)
2013.321.002	Armed Forces Talk : Tools for the fighting Man : Planes	United States. Office of Armed Forces Information and Education.	This is the fifth TALK in the series on "tools for the Fighting Man," designed to familiarize personnel of all the Services with the history and general functions of the principal weapons of each Service. This TALK is devoted chiefly to planes as weapons, but discusses also their ever-increasing use in combat for transportation and communications. Includes a large black and white picture of General Hoyt S. Vandenberg, Chief of Staff of the Air Force.

2013.327.001	Great Book of Modern Warplanes	Sweetman, Bill	Oversized, though not too big to fit on a bookshelf, this unique= collects in one place the most detailed, and highly illustrated descriptions ever produced of a number of the world's most in modern warplanes. Some of these descriptions have been officially adopted by the manufacturers as the basic briefing material for potential of Wind customers and VIP visitors who need a detailed overview of the aircraft. The individual chapters of this book offer perhaps the best and most authoritative profile it is possible to obtain on the ahead with the exception of classified documents....awe chapter was produced in close collaboration with the relevant authorities, and their value is sled by incisive comments, vivid action photographs, superb color illustrations, and helpful explanatory diagrams. With over 800 full-color and 180 black-and-white illustrations The reader will note that no fewer than four of the aircraft waned are produced by a single plant in the Amen= Midwest. McDonnell Douglas in St. Louis is the ancestral home of the F-4 Phantom II, which has earned its revered place in air combat history F-15 Eagle, regarded by many as the ultimate fighter, the F/A-18, possibly the best one-man combat aircraft flying today; and the unique AV- Harrier II, derived from the Harrier Jump-Jet, which so powerfully proved its prowess in the Falklands War of 1982. Another of the big names in fighters today is General Dynamics, producer of both

Object ID	Title	Author	Summary
			the F-111 and F-16 Fighting Falcon. The former, the last United States Air Force jet fighter to be numbered under the pre-1962 designation scheme, was planned to be the ultimate go-anywhere fighter-bomber to supersede all existing fighter and attack aircraft of both the United States Air Force and United States Navy. What emerged was an aircraft so huge (largely because of the tremendous range that was called fol.), that it has never been a fighter at all, though it is probably without equal as a low-level interdicator. In contrast, the F-16 is probably the world's most agile dogfighter. One of their principal opponents in a world war could be the MiG-23/-27 Flogger, the Warsaw Pact's most important military aircraft. Also found in the pages of The Great Book of Modern Warplanes is the swing-wing F-14 Tomcat whose overall capability cannot be matched by any other fighter. Its AIM-84 Phoenix missile alone will be able to keep it in a class by itself throughout the foreseeable [sic] future. Other aircraft included in this unique compilation include the more specialized A-10A Thunderbolt II ground attack aircraft and B-1B bomber. The B-1B came into existence more than 25 years ago when the United States Air Force began to accept that Mach 0.8 at sea level made more sense to a strategic bomber than Mach 3 at 70,000 feet. Gradually its role changed from a free-fall bomber to a carrier of cruise missiles (while retaining colossal capability with "iron bombs" for any so-called conventional war), and now includes hundreds of subtle "stealth" qualities, to enable it to survive in today's high-tech air warfare theater. The Great Book of Modern Warplanes will explain all the

			exciting design features of today's most important warplanes. The authenticity of the text is stunningly enhanced by more than 1000 photographs in color and black-and-white and by 200 diagrams and illustrations that graphically display the ways in which these high-tech =clines are built and how they could operate in time of war. (from dust jacket flaps)
2013.327.003	Encyclopedia of World Air Power, The	Gunston, Bill	The world's most comprehensive encyclopedia on contemporary military aviation. Over 600 entries on military aircraft in service, their missile systems, and the air forces that fly them.
2013.327.004	Rand McNally Encyclopedia of Military Aircraft, The, 1914-1980	Angelucci, Enzo	Huge book that covers all military aircraft 1914-1980. June 21, 2000 If you have seen Jane's All the World's Aircraft, then you have an idea of what this book is like, but this book is done much nicer. Color drawings and historical descriptions are included for each plane. A great reference book for those interested in military aircraft. 2 of 2 people found the review helpful From the Inside Jacket May 29, 2008 By Emily Rounds The Rand McNally Encyclopedia of Military Aircraft, 1914-1980 is the most complete, authentic, and spectacular book of its kind ever prepared. It depicts and describes all of the world's principal military aircraft produced from the outbreak of World War I to the present day. There are 800 types in all, ranging from fighters and bombers to reconnaissance planes and trainers, with 1,706 airplanes shown in color, 16 color charts, 252 photographs, 772 cutaway drawings, and seven color diagrams. Full-color illustrations are paired with capsule descriptions that

Object ID	Title	Author	Summary
			provide extensive technical information on each plane, including insignia, manufacture, type, year, engine wingspan, length, height, weight, maximum speed, ceiling, range, armament, and crew. The extraordinary graphics include: *Dramatic gate-fold illustrations- -such as a four-page fold-out with minutely detailed color drawings of the 88 principal bombers of World War II, ranging from Japan's tiny Yokosuka Ohka 11 to America's jumbo Boeing B-29 Superfortress, from Germany's Junkers Ju.86 to Russia's Tupolev TB-3. *Major diagrams, on two-page spreads, which minutely detail individual models by presenting a cutaway view of the plane in color, with up to 100 parts numbered and keyed to an index adjacent to the diagram. An informative text traces the development of military aircraft through the years, including such background information as production costs, quantities produced, strengths and weaknesses, and impact on aerial warfare. This is the definitive reference, prepared over a period of six years by the same creative group responsible for Rand McNally's highly acclaimed "Color Illustrated Guide" aircraft series. 1 of 1 people found the review helpful (from Amazon.com)

2013.327.005	Great Book of Modern Warplanes	Spick, Mike (ed)	This is the second edition of a book published in 1987. It features full technical descriptions, and battle action from Baghdad to Belgrade.It collects in one place the most detailed, and highly illustrated descriptions ever produced of a number of the world's most

2013.327.007	World Encyclopedia of Civil Aircraft : From Leonardo da Vinci to the Present	Angelucci, Enzo	Originally published in Italian in 1981 by Arnoldo Mondadori Editore S.p.A., Milano under the title "Atlante enciclopedico degli aerei civili del mondo da Leonardo a oggi". This book is a comprehensive survey of all civil, sporting, and commercial flying machines from the sketchbooks of Leonardo da Vinci to the SST. Has 3,000 illustrations, more than 1,200 in color.
2013.327.008	Soviet Military Power	Koenig, William J.	The authors examine the role of military power in the Soviet state and the policy aims which the armed forces are designed to attain. The performance of individual weapons plays a vital part in this question and this is fully discussed. The text is enhanced by over 300 illustrations, many of them never previously published in the West.
2013.327.009	Aircraft : Fighters and Bombers in Action	Chant, Christopher	This is the history of the rise of military aircraft from the first days of observation balloons and the pioneer warplanes of 1914-1918 to the hyper-sophisticated, multi-role machines that dominate the battlefields of the 1970s. The book is illustrated throughout with original color artwork, diagrams, maps and contemporary photographs.
2013.327.010	Battle of Britain : The Greatest Battle in the History of Air Warfare	Bickers, Richard Townshend	This book tells the full story of the greatest air battle in history - the battle that shaped the future of the free world. A team of distinguished authors and historians describe the events leading up to the assault on Britain, and the history, structure and equipment of the protagonists. A detailed blow-by-blow account of the battle follows, while several key days are examined in exhaustive detail and illustrated by superb dioramas showing the ebb and flow of the combat. Finally, the exploits of the RAF aces are described, and in a tribute to

			the men that fought for freedom the complete list of aircrew that fought under the aegis of RAF Fighter Command during the battle is included. Dramatic historical photographs, revealing coloured diagrams, specially-commissioned colour photographs and penetrating historical analysis combine to provide one of the most attractive and authoritative books yet published on the subject. Note: To commemorate the 60th Anniversary of the Battle of Britain.
2013.327.011	Warplanes & Fighters of World War II	Anderton, David A.	This book is a compilation of three previously published books: 1) American Fighters of World War II by David A. Anderton which we have, 2006.323.136 2) British Fighters of World War II by Bill Gunston 3) German Warplanes of World War II by Francis K. Mason This compilation examines the American, British and German warplanes and fighters of World War II. It graphically charts the development of fighters and warplanes from both sides during the traumatic years of the war. It pays tribute to those men and machines who fought bloody battles in the skies of Europe and the Pacific. Includes technical descriptions and cutaway drawings. It is filled with detailed illustrations and period photographs.
2013.328.001	USS Midway - Far East Cruise 1962	Langkammerer, G. W. (ed.)	Pictorial account of the deployment of the USS Midway CV-41 the Western Pacific Ocean 1962. She departed Alameda 6 April 1962 and returned 20 October 1962. Ports of call and items of interest : Pearl Harbor, Yokosuka, Sasebo, Hong Kong, Subic Bay, Buckner Bay, Iwakuni and Beppu. In Memoriam page. Brief summary detailing the tensions between North and South Vietnam and the role the USS Midway played, on standby, as a friend of Freedom. CCG-3 VF-21 (F3H-2) VA-22 (A4D-2N)

2013.330.014	World War II Campaigns in Pacific, Vol. 7 : Bombs Over Japan	Marathon Music & Video	This is from a set of 7 VHS tapes about World War II in the Pacific. There are four sections in this tape: Bombs Over Japan - The release of two uranium bombs over Japan. Japanese Surrender - The formal end of the war against Japan. Post War Changes - The rise of Communism in the Pacific and the changes in Indo-China, India, China and the rest of the Orient. The Korean War - Despite its initial popularity, the limited war that Korea was to become, aroused intense opposition on the home front.
2013.330.015	World War II The Great War, Vol. 1 : The Battle of San Pietro	Moravia, Alberto	This is from a set of 10 VHS tapes about World War II. Description of the set from Amazon.com: Major American campaigns in the Pacific during World War II are ably chronicled in this set of documentaries produced by the History Channel. The focus of the films is primarily U.S. Army and Marine action, as forces using an island-hopping strategy across the Pacific made amphibious landings that were usually followed by vicious combat against Japanese defenders. Action footage shot by American combat cameramen provides the bulk of the visual material, and many of the clips dramatically demonstrate what a terrible price was paid to conquer the islands. The narration of each documentary offers information about particular combat units, and strategy and tactics are explained with the use of maps. General Douglas MacArthur, as one might expect, receives a lot of attention, and Admiral William "Bull" Halsey has an entire documentary (which is actually an episode of the Biography series) devoted to him and his naval campaigns. One film focuses on jungle warfare in Burma and New Guinea, while another provides a quick-moving overview of how warplanes were

The narration of each documentary offers information about particular combat units, and strategy and tactics are explained with the use of maps. General Douglas MacArthur, as one might expect, receives a lot of attention, and Admiral William "Bull" Halsey has an entire documentary (which is actually an episode of the Biography series) devoted to him and his naval campaigns. One film focuses on jungle warfare in Burma and New Guinea, while another provides a quick-moving overview of how warplanes were deployed by both sides. MacArthur's triumphant return to the Philippines is featured in one documentary, and the American assault against fanatical resistance on Okinawa is the subject of another film. These films do not cover the entire Pacific War, but they are informative, visually compelling, and intelligently assembled. --Robert J. McNamara In this volume Admiral Kelly Turner risked the tricky tides around the Gilbert Islands and called for a strike on its biggest island, Tarawa. The first set of Marines landed successfully, but the next set, due to low tides had to wade in for hundreds of yards under murderous fire, only half of them survived. Having been attacked for hours at sea and bombed for a full week, no

			one expected the 4,500 Japanese soldiers to hold out so long. With 991 marines dead and 2,311 wounded it was a vital and costly lesson for the Americans.
2013.330.021	World War II The Great War, Vol. 7 : Submarine Warfare	Moravia, Alberto	This is from a set of 10 VHS tapes about World War II. Description of the set from Amazon.com: Major American campaigns in the Pacific during World War II are ably chronicled in this set of documentaries produced by the History Channel. The focus of the films is primarily U.S. Army and Marine action, as forces using an island-hopping strategy across the Pacific made amphibious landings that were usually followed by vicious combat against Japanese defenders. Action footage shot by American combat cameramen provides the bulk of the visual material, and many of the clips dramatically demonstrate what a terrible price was paid to conquer the islands. The narration of each documentary offers information about particular combat units, and strategy and tactics are explained with the use of maps. General Douglas MacArthur, as one might expect, receives a lot of attention, and Admiral William "Bull" Halsey has an entire documentary (which is actually an episode of the Biography series) devoted to him and his naval campaigns. 2013.335.001	Air Navigation Manual, Volume I	Dept. of Air Force	Volume 1 of 3 that provide information on all phases of air navigation for navigators and student navigators in training. The purpose of volumes 1 and 2 is to develop the art of navigation from its simplest concepts to the most advanced procedures and techniques. This volume starts with the movement of the air mass and its effect on the flight path of an aircraft and proceeds to the measurements, charting and mapping of the earth. How to use basic instruments to obtain information on direction, altitude, temperature and speed, and how to solve basic navigation problems by dead reckoning are explained. Then the application of forecast and inflight information to achieve optimum flight is covered. Finally, radio, loran and radar as aids to dead reckoning are discussed.

Object ID	Title	Author	Summary
2013.335.002	Air Navigation Manual, Volume II	Dept. of Air Force	Volume 2 of 3 that provide information on all phases of air navigation for navigators and student navigators in training. The purpose of volumes 1 and 2 is to develop the art of navigation from its simplest concepts to the most advanced procedures and techniques. The first ten chapters of this volume discuss celestial navigation. Special methods and techniques used to navigate in polar regions are explained next, followed by a chapter on advanced instruments and how to use them. The text continues with a discussion of operational problems and their solutions, and concludes with a chapter on automatic navigation systems.
2013.335.003	Air Navigation Manual, Volume III	Dept. of Air Force	Volume 3 of 3 that provide information on all phases of air navigation for navigators and student navigators in training. The purpose of volumes 1 and 2 is to develop the art of navigation from its simplest concepts to the most advanced procedures and techniques. This volume is meant as an inflight manual for navigation personnel. It contains preflight, operational and inflight maintenance procedures for airborne navigational equipment in step-by-step outline form. Reference tables, graphs and brief reviews of specialized techniques are also provided.
2013.335.008	Flight Manual Navy Model A4D-2N Aircraft	Chief of the Bureau of Naval Weapons	Provides standardized ground and flight procedures for the Navy Model A4D-2N Aircraft. Does not include tactical doctrine.
2013.335.009	Flight Handbook, Navy Model F9F-8 Aircraft	Chief of the Bureau of Aeronautics	Provides standardized ground and flight procedures for the Navy Model F9F-8 Aircraft. Does not include tactical doctrine. Includes addendum dated 1 March 1955.
2013.335.010	Supplement to AN 01-85FGF-1, Flight Handbook, Navy Model F9F-8 Aircraft	Chief of the Bureau of Aeronautics	CONFIDENTIAL supplement and subsequent revision to the flight handbook for the Navy Model F9F-8 Aircraft (2013.335.009). Contains operating limitations and other sensitive information.

2013.337.001	USS Midway (CV-41) - Fortieth Anniversary 1945-1985 - The Magic Goes On - 1984-85	Williamson, Willie (ed.)	A pictorial account of an approximate 2-year period in Midway's forward deployed life. It covers the 28 December 1983 to 23 May 1984 deployment to the Western Pacific--Indian Ocean and Persian Gulf; the 15 October 1984 to 12 December 1984 deployment to the Western Pacific, and the history of the Midway until she went in to drydock in March of 1985. Midway was at this time homeported in Yokosuka, Japan. During the 5 month cruise (late 1983 - early 1984), Midway spent 111 continuous days at sea (on Gonzo Station) and steamed over 63,000 miles. Conducting almost 9,800 hours of flight operations, she launched and recovered over 5,300 aircraft, breaking the all-time record for the first quarter in any year of her history. Ports visits included Sasebo, Subic Bay, Manila, Pattaya Beach, and Singapore. A visit to Perth was cancelled to take up a USS Kitty Hawk commitment in the Indian Ocean. Carrier Air Wing Five (CVG-5) was embarked. Onboard for the 1983-84 deployment were: VF-161 (F-4S), VF-151 (F-4S), VA-93 (A-7E), VA-56 (A-7E), VA-115 (A-6E and KA-6D), VAW-115 (E-2B), VMFP-3 Det.B (RF-4B), VAQ-136 (EA-6B), and HC-1 Det.2 (SH-3G). Onboard for the October - December deployment were: VF-161 (F-4S), VF-151 (F-4S), VA-93 (A-7E), VA-56 (A-7E), VA-115 (A-6E and KA-6D), VAW-115 (E-2B), VAQ-136 (EA-6B), and HS-12 (SH-3H). Page 457 lists deaths which includes personnel from VF-161, VA-115, VA-56, VA-93, Eng and Wep.

2013.338.003	Combat Fleets of the World - 1984-85 : Their Ships, Aircraft, and Armament	Labayle Couhat, Jean (ed)	Internationally acknowledged as the best one-volume reference to the world's naval and paranaval forces, this popular Naval Institute guide is both comprehensive and affordable. Updated biennially since 1976, it has come to be relied on for all-inclusive, accurate, and up-to-date data on the ships, navies, coast guards, and naval aviation arms of more than 180 countries and territories. Large fleets and small maritime forces get equally thorough treatment as evidenced in this new edition, which highlights major and even minor developments that could have an impact on the world scene. A thorough indexing of material and a logical ship-typing system make the book easy to use and allow for quick comparisons between fleets. The guide continues to present timely, authoritative information supported by more than four thousand illustrations from correspondents throughout the world. From giant aircraft carriers and ballistic missile submarines to tugboats and launches, the characteristics and capabilities of ships large and small are reliably recorded. Complete descriptions of naval aircraft, weapons, weapon systems, and sensors are also provided along with useful commentary on organization, personnel strengths, and bases.
2013.338.004	Grumman F-14 Tomcat	Stevenson, James Perry	Grumman F-14 Tomcat fighter jet divided into three main segments: History of Development; Physical and Aerodynamic Characteristics; and F-14 Weapons System/
2013.338.005	Modern Combat Aircraft Design	Huenecke, Klaus	A detailed look at the complex nature of modern aircraft design. Covers combat tasks, aircraft design, aerodynamics, stability and control, engines, integration, performance, armament, avionics and cockpit instrumentation.

Object ID	Title	Author	Summary
2013.338.006	Air Test and Evaluation Squadrons & Tomcat Development from 1970-2004	Mastromatteo, Peter M. (ed)	A collection of Tomcat era insignias which give anecdotal information about the aircraft itself, Grumman and several of its subcontractors, F-14 weaponry, avionics, variants, the squadrons who operated the Tomcat, and many other facets related to this aircraft.
2013.339.001	Quiet Heroes : Navy Nurses of the Korean War 1950-1953, Far East Command	Omori, Frances	Navy nurses serving in the Korean War 50 years ago were called, saved lives, and came home quietly. Review Frances Omori has carefully documented wonderful, true stories of real people that show the lasting power of goodness. -- Vice Adm. Daniel Oliver, U.S.N, Ret, Chief of Naval Personnel, 1996-1999 The human misery endured by many of the wounded during the Korean War can never be portrayed in words. -- Col.Walt Ford, U.S.M.C., Ret., Editor, Leatherneck: Magazine of Marines About the Author Frances Omori is currently an active duty commander in the U.S. Navy. As a national security analyst and strategist, she addresses policy issues including arms control, weapons of mass destruction (chemical, biological and nuclear), counterproliferation, and war gaming and simulation. She is a liason for the U.S. Pacific Command. Before joining the navy, she was a broadcast journalist in Colorado, a television producer in Los Angeles, and a casting director for the television show "Hawaii Five-o." Frances has also been a legislative assistant and press secretary for the U.S. Senate and U.S. House of Representatives. This is Frances Omori's second book; she was co-editor of Strength Through Cooperation: Military Forces in Asia-Pacific. (from Amazon.com)

			sister's World War II service as a nurse, and attendance at the Bikini Atoll atomic tests, followed by her death from cancers in 1949.
2013.339.003	All This Hell : U.S. Nurses Imprisoned by the Japanese	Monahan, Evelyn M.	"Some of the least known but most interesting World War II narratives involve the experiences of civilian and military American women living in the South Pacific during the Japanese occupation.... "All This Hell"... provides a readable and gripping introduction to the topic for all readers." — Library Journal "A complete view of the WWII military women POW experience.... A genuine gift to the documentation from which we all need to learn, appreciate and take to heart for the future." — The Stars and Stripes "A stirring account."—American History Hundreds of U.S. Army and Navy nurses were stationed in Guam and the Philippines in the first years of World War II. After the Japanese attack on Pearl Harbor in December 1941, five navy nurses on Guam became the first American military women of the war to be taken prisoner by the Japanese. More than seventy army nurses survived five months of combat conditions in the jungles of Bataan and Corregidor before being captured, only to endure more than three years in prison camps. When freedom came, the U.S. military ordered the nurses to sign agreements with the government not to discuss their horrific experiences. Evelyn Monahan and Rosemary Neidel—Greenlee have conducted numerous interviews with survivors and scoured archives for letters, diaries, and journals to uncover the heroism and sacrifices of these brave women.

Object ID	Title	Author	Summary
			Evelyn M. Monahan served as a U.S. Army medic during the Vietnam era and is a retired psychologist. Rosemary Neidel-Greenlee served in the Navy Nurse Corps during the Vietnam era and has held a number of clinical posts within the Department of Veterans Affairs. They are coauthors, with Agnes Jensen Mangerich, of "Albanian Escape: The True Story of U.S. Army Nurses Behind Enemy Lines." (from back cover)
2013.339.004	War at Sea : A Naval History of World War II	Miller, Nathan	This is a comprehensive history for the general reader with details operations of all combatants that were involved in the World War II, includes the primary navies - the U.S., the British, the Germans, and the Japanese. This book also filled with anecdotes and personal accounts from the surviving servicemen documenting struggles and what life at sea was like, along with archival materials such as intelligence documents, ship logs, and official reports.
2013.339.005	Great Admirals, The : Command at Sea, 1587-1945	Sweetman, Jack (ed)	Combining scholarship with readability, this collection of nineteen biographical essays examines admirals of many navies - from the advent of the gun-armed sailing ship onward, through nearly four centuries - who gave naval combat a recognizably modern form. The theme is leadership in war at sea. Each essay explores the combination of personal attributes and professional experience that shaped the given commander's style of conduct, while analyzing a battle in which that leadership can be observed in action.
2013.339.006	Autumn Winds Over Okinawa, 1945	Mead, Pelham Kenneth	On the fateful day on August 30, 1945, four sailors departed the USS Antietam CV-36 aircraft carrier on a launch headed for the shores of Okinawa. The war was officially over, and all of them wanted to transfer back to the states. In the launch were Chief Petty Officer of Machinists

Object ID	Title	Author	Summary
			Ken Mead, Seaman First Class Robert Brown, Seaman First Class Lincoln Overland, and Seaman First Class Charles Smitty. The seas were calm that day as the launch headed into the docks at Nahu Bay. Atop a flagpole beyond the beach, Old Glory was rippling in the wind. The stumps of hundreds of burned out palm trees were visible beyond the white beach sands. Little did they know that this island would become their home for over a month despite all their radio efforts calling to nearby ships. The author is the son of Ken Mead.
2013.339.007	Corregidor : The End of the Line	Morris, Eric	This island fortress in the Philippines was the place to which General MacArthur's troops retreated after the first surrender ever of an American army in the field, on the Bataan peninsula. First-hand research and interviews, the moment-by-moment actions by which an inadequately prepared army of Americans and Filipinos -- lied to by Washington -- were humiliated and defeated by the triumphant Japanese invaders.
2013.339.008	Pacific Onslaught 7th Dec. 1941/7th Feb. 1943	Kennedy, Paul	Contents: Origins of the Pacific War --- Pearl Harbor Hong Kong, Malaya and Singapore -- The Philippines and the Dutch East Indies Burma and the threat to India -- The Tokyo raid and the Battle of the Coral Sea Midway -- Guadalcanal -- New Guinea, Burma, China The Strategic balance
2013.339.010	America at War! : Battles that Turned the Tide	Black, Brian	This book explores eleven of the greatest American battles and discusses how they changed the course of history. Contents: The Revolutionary War : the Battle of Saratoga -- War with Mexico : the Battle of Buena Vista -- The America Civil War : the Battle of Gettysburg -- War with Spain : the Battle of San Juan Hill -- World War I : the Meuse-Argonne Offensive -- World War II : the Battle of Midway -- World War II : D-Day -- The Korean War : Inchon Landing -- Modern warfare -- The

2013.339.016	Pearl Harbor : America's Call to Arms	Sullivan, Robert (ed)	Introduction by Hugh Sidey. Table of Contents: Hitler's drumbeat - Germany leading up to War Thunder in the east - Japan leading up to War Home front - What Americans were thinking before Dec. 7 December 7, 1941 - 38 pages of pictures showing the attack -- includes one colored map of Pearl Harbor Call to arms - Americans at War Enemy" within - pictures of Japanese internment camps in the US Bombs and smashes - chapter on Pearl Harbor portrayed in movies Testimony - personal accounts of people who were there Pearl Harbor today.
2013.339.017	SSN : Strategies of Submarine Warfare	Clancy, Tom	Based upon Tom Clancy's SSN, an interactive submarine combat thriller available on CD-ROM. Clancy presents fifteen thrilling scenarios--fact-based mission profiles for Captain Mackey and the USS Cheyenne--stirring plots and characters, perfectly accurate details, and the chilling knowledge that it really could happen...
2013.339.018	Principles of Naval Weapons Systems	Frieden, David R. (ed)	Written in support of the education of NROTC and U.S. Naval Academy midshipmen by providing entry-level knowledge of the theory and principles of weapons systems encountered in Navy and Marine Corps operations.
2013.339.019	Silent Warrior : The Marine Sniper's Vietnam Story Continues	Henderson, Charles	Henderson, a retired Marine Corps officer, first told Hathcock's Vietnam-and-aftermath stories in his highly readable, highly hagiographic Marine Sniper: 93 Confirmed Kills (1986), which continues to be a favorite item at the PX. Sniper detailed how U.S. Marine Corps Sgt. Carlos J. Hathcock II used his uncanny marksmanship in Vietnam to record more than 300 hits,

Object ID	Title	Author	Summary
			and how he dragged six of his unconscious buddies away from a burning tank. After an arduous recovery from serious burns received then, Hathcock learned that he had multiple sclerosis, a disease he succumbed to last year. Henderson frames Warrior by imagining what Hathcock was thinking on his deathbed. Waves of imagined dialogue, based on interviews Henderson conducted with Hathcock and with a raft of witnesses to his heroics, crash through page after page. The voices of former Vietcong and North Vietnamese soldiers, including the late Tran Van Tra, who commanded VC forces in South Vietnam, fill things out, along with Henderson himself. What he and the others say is sure to add to the Hathcock myths and will thrill buffs and ex- and current servicemen alike. But few other readers will be able to countenance the overheated style and lack of journalistic care in sourcing the story, although Hathcock was doubtless an exemplary soldier. After an initial burst from fans of Sniper, whose sales it will revive, this book will sell steadily but probably less prolifically than its predecessor. From Amazon.
2013.339.020	Dauntless Helldivers : A Dive-Bomber Pilot's Epic Story of the Carrier Battles	Buell, Harold L.	The author piloted dive-bombers in the Pacific campaigns of WW II, participating in most of the major naval-air battles: Coral Sea, Midway, Eastern Solomons, Philippine Sea. Besides flying from the decks of the carriers Yorktown , Saratoga , Enterprise and Hornet , he saw much action during a wild four-week sojourn with the Marines' "Cactus Air Force" on Guadalcanal. Buell is refreshingly self-revealing, admitting his doubts and fears, his passionate desire to become "a killer angel, an avenging force," and incidentally giving frequent credit to his personal guardian angel. The engaging memoir recounts one Navy

Object ID	Title	Author	Summary
			pilot's experiences waging war in a now-extinct manner, i.e., dive-bombing, and conveys in vivid detail what the crucial carrier war was all about. Photos. Copyright 1991 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. - From Publishers Weekly From Library Journal Commander Buell's remembrance of the actions in the South Pacific flying dive bombers from carriers (and for three weeks from Guadalcanal's runways, still under fire from determined Japanese defenders) is personal and immediate even after almost a half century. He adds to his own memoirs and diary entries several accounts from fellow fliers to make a vivid history of that continual series of sea battles that was the Pacific War. Buell's view from the cockpit of a Dauntless is that of the average pilot, and from that perspective he gives us a sense of the urgent and frightening assault of events from the Coral Sea until the invasion of the Philippines. A rare combination of personal recollections and overall history that remains focused on the author's own place and time, this still makes sense of a bewildering swirl of actions in a huge arena. Highly recommended for history collections. - Mel D. Lane, Sacramento, Cal. Copyright 1991 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. Soldiers' Story, The : Vietnam in Their Own Words Steinman, Ron

In this book, veteran journalist Ron Steinman gathers the candid reminiscences of seventy-six men who survived combat in Vietnam. Not a military analysis or political study, this oral history vividly conveys the hardships, friendships, fears, and personal triumphs of marine, Army,

Object ID	Title	Author	Summary
			Air Force and navy veterans. Page 298-300 is a story by Toby Haynsworth, Supply Officer on the USS Midway. Pages 262-318 cover the Fall of Saigon (Operation Frequent Wind). Other chapters include: Battle of the Ia Drang Valley Siege of Khe Sanh Tet Offensive Secret War Air War (Includes stories by John McCain, p. 227, and Paul Galanti, p. 233 both US Navy, and both were POWs)
2013.339.022	Famous American Military Leaders of World War II	Army Times Publishing Co.	This book is written for adolescent readers. It includes brief biographies of twelve military leaders of World War II: George Catlett Marshall Ernest J. King Douglas MacArthur Dwight David Eisenhower Chester W. Nimitz Curtis Emerson LeMay George Smith Patton, Jr. Evans Fordyce Carlson Omar Nelson Bradley Henry Harley Arnold William Frederick Halsey, Jr. James Harold Doolittle
2013.339.023	Gulf War, The	King, John	Examines the causes, events, and aftermath of the recent conflict in the Persian Gulf.
2013.339.024	World War II in the Pacific	Stein, R. Conrad	This book presents an overview of the causes, participants, battles and outcomes of conflicts. It also includes Report Links which direct readers to web sites, source documents and maps and photos related to World War II. A MyReportLinks.com Book
2013.339.025	Rise of the Dictators 1919-1939, The	Banyard, Peter	Discusses, in text and illustrations, the events in the world between the years 1919 and 1939 and the emergence of dictators such as Hitler, Stalin, Mussolini, and Franco.
2013.339.026	First World War, The	Pimlott, John	Discusses, in text and illustrations, the causes, events, outcome, and lasting impact of the First World War. Section on the "War at Sea" begins on page 38.
2013.339.027	Attack on Pearl Harbor, The	Rice, Earle	From Amazon: Grade 7 Up. The interest-holding content; historic photographs and

Object ID	Title	Author	Summary
			reproductions; informative maps; and extensive use of boxes, sidebars, and insets combine to make this book an excellent series entry. Rice's objective account gives readers sufficient background information concerning the Japanese and American roles in the Pacific and Far East from the opening of trade with Japan in 1853 to 1941. This discussion leads to the conclusion that the events of December 7, 1941, were almost inevitable and the lack of preparedness on the part of the U.S. was a "seeming invitation to disaster." The author covers in great detail the plans for the Japanese attack and descriptions of what occurred on the fateful day itself. He concludes that Yamamoto demonstrated that the dominance of the battleship was over; the "dreadnought" was to be supplanted by the aircraft carrier and its warplanes. The extensive use of primary-source material makes history come alive. The detailed chronology, directory of aircraft involved, glossary of Japanese and American terms, suggestions for further reading, bibliography, and index add tremendously to the overall value of the book. The average-to-poor quality black-and-white photos and reproductions, and the lack of drawings or photos in the aircraft appendix are minor disappointments.
2013.342.001	International Law for Seagoing Officers	Brittin, Burdick H.	INTERNATIONAL LAW FOR SEAGOING OFFICERS is another book in "The Professional Library" for members of the seagoing services published by the Navy's professional society, the United States Naval Institute. In twelve readable, concise chapters, INTERNATIONAL LAW FOR SEAGOING OFFICERS covers such fundamental topics as these: the scope and sources of international law; the rights and duties of sovereign states;

Object ID	Title	Author	Summary
			diplomatic and consular agents and their roles in international affairs; territory, whether land, air, or water, the nationality, citizenship, and rights of persons, and the jurisdiction of foreign courts over them, international law on the high seas; the conduct of ships of various types under various conditions; war on land and at sea, and the protection of war victims; and the measures and pacts by which civilized nations attempt to achieve collective security and to enforce international agreements. Appendices reproduce the texts of the principal international agreements to which the United States of America is a signatory. The book is further supplemented by a glossary, a bibliography, and an exhaustive index. Among other titles in "The Professional Library" are included the following; DUTTON'S NAVIGATION AND PILOTING, for decades recognized as the authoritative work in its field. Crenshaw, NAVAL SHIPHANDLING, a brilliant presentation of the experience and skill of expert shiphandlers, covering the principles of handling naval vessels of every type. Noel, THE DIVISION OFFICER'S GUIDE and (as reviser) THE WATCH OFFICER'S GUIDE, two invaluable short manuals explaining the duties of the young officer off watch or on. More than one hundred other titles of professional and general interest, such as UNITED STATES DESTROYER OPERATIONS IN WORLD WAR II with its companion volume UNITED STATES SUBMARINE OPERATIONS IN WORLD WAR II, together with World War II histories of the Japanese, German, Italian, and French navies, written by officers

			who served in them, are published by THE UNITED STATES NAVAL INSTITUTE ANNAPOLIS, MARYLAND (from dust jacket back)
2013.342.002	Naval Customs, Traditions and Usage	Lovette, Leland Pearson	Since 1934, this book has been the standard reference for the meaning of nautical words and expressions, the origin of naval customs, and a source of ready access to much information formerly unwritten on military and naval etiquette. The first edition was the result of long and meticulous research. Subsequent editions have been thoroughly revised and augmented by much new material, the result of continuing research and the first-hand observations of the author during his thirty years of active naval service. Hanson W. Baldwin, the distinguished military-naval correspondent of "The New York Times" (himself a Naval Academy graduate), says of Naval Customs: "The range of this book is as sweeping as the sea itself. Pre-eminently a book for the Navy and those who love the Navy, it is nevertheless a volume so varied in its subject matter, so interesting in its treatment, that no one who has felt the surge of blue water can afford to be without it." The cockade hat illustrating the dust jacket is from the uniform of George E. Dewey, the hero of Manila Bay. The unique rank of Admiral of the Navy was established solely for him, and abolished on his death. "Cocked hats" were a traditional part of the full-dress uniform worn by officers of the U. S. Navy from 1797 until World War II. Admiral Dewey's uniform is displayed in the U. S. Naval Academy Museum, Annapolis, Maryland. JACKET AND COVER

2013.344.035	Sacred Moments, Prayers of a Navy Chaplain at Sea and Ashore, Volume I : Prayers at Sea Destroyer Squadron Fifteen (CDS 15) and USS Peleliu (LHA 5)	Murphey, Paul W.	Dr. Murphey served as chaplain of Destroyer Squadron Fifteen (CDS-15) based in Yokosuka, Japan, from June 1976-February 1978. He was chaplain for the USS Peleliu (LHA-5) in Long Beach, CA from February 1980 to August 1982. This book is a compilation of his experiences and the prayers that he delivered at sea and on

Object ID	Title	Author	Summary
2013.344.036	Sacred Moments, Prayers of a Navy Chaplain at Sea and Ashore, Volume III : Prayers Ashore	Murphey, Paul W.	special occasions. Former USS Midway crew member. Dr. Murphey was a chaplain who served on Inactive Duty Naval Reserve, Navy and Marine Corps Reserve Center Lexington, Kentucky, from 1969-1976; with First Force Service Support Group (1st FSSG) Camp Pendleton, Ca, 1978-1980; with Naval Submarine Base Bangor, Washington from 1982-1985; with the Chapel of Hope, Commander Fleet Activities Yokosuka, Japan, 1987-1990. These are some of the prayers that he gave at those locations. In addition, there are sections on his Life after the Navy, personal reflections on why he became a Navy chaplain, a Christian wedding ceremony, and ministry at sea. Former USS Midway crew member.
2013.344.037	Blackrobe in Blue : The Naval Chaplaincy of John P. Foley, S.J. 1942-1946	O'Brien, Steve	This volume is a revealing inside account of a Jesuit priest from Boston who served as a naval chaplain in World War II.
2013.345.001	Fighting Amphibs : The LCS(L) in World War II	Ball, Donald L.	Tells the story of the LCS(L) in support of amphibious operations, minesweepers, UDT patrols, picket duty , etc. These ships did a little bit of everything. Designed to provide close-in fire support to troops on the beach they ended up performing numerous tasks in 1944 and 1945, including shooting down Kamikaze aircraft, putting out fires on other ships and on the beach and destroying suicide boats.
2013.346.001	USS Midway (CVA-41) - Westpac - 1961	Welles, Chris (ed)	Pictorial account of USS Midway (CVA-41) deployment to South East Asia. The aircraft carrier departed Alameda, CA on 15 February and returned 28 September 1961. Ports of call and items of interest: 14 pages of pictures of San Francisco and Hunter's Point; Long Beach; back to Alameda; Dodie Stevens on board; Hawaii; Guam; Subic Bay; Philippines; Japan (Sasebo, Yokosuka); Hongkong. Midway was one of three carriers ordered to the South China Sea in support of U.S. diplomatic efforts to

2013.347.001	Battle Surface! : Lawson P. "Red" Ramage and the War Patrols of the USS Parche	Moore, Stephen L.	Cmdr. Lawson Paterson "Red" Ramage was among an elite group of just seven U.S. submariners who were awarded the Medal of Honor during World War II and the first not to die in the course of his heroic exploits. He was honored for his actions in the Pacific on the night of 31 July 1944 when he kept his submarine, USS Parche, on the surface and defiantly charged into the midst of a large Japanese convoy. Ramage's close-in, furious surface rampage became the talk of the submarine force, both in terms of its boldness and its destruction of the enemy shipping. Remarkably, Parche's crew had managed to reload their torpedo tubes while their skipper twisted and turned the boat through the chaos of machine gun bullets, exploding heavy shells, and Japanese ships trying to ram them. To tell Parche's dramatic story, author Stephen Moore draws on recently discovered wartime diaries and interviews with dozens of veterans, who add rich details to the official record. Readers learn what it was like on patrol in the Pacific to endure the terrors of torpedo attacks and depth charges, as well as learn how they relieved the stress of combat on liberty. The only book to focus exclusively on Parche and the incredible "Red" Ramage, it

			offers a rare, up-close look at the actions of the legendary World War II submarine, whose conning tower and periscopes are on permanent display in Pearl Harbor.
2013.347.002	Secret Missions : The Story of an Intelligence Officer	Zacharias, Ellis M.	This is a true story by the author of his assignments to Japan for the purpose of furthering the goals of naval intelligence, of his work in monitoring Japanese agents in the U.S., and attempting to divine the plans of the Japanese Navy prior to the U.S. entry into World War II.. He predicted the general time frame of Japan's surprise attack on Pearl Harbor, and that it would be against Pearl Harbor. He was called to testify on same before Congress in the hearings called to investigate U.S. unpreparedness. He greatly assisted in the efforts to bring Japan to surrender at wars end.
2013.347.003	City at Sea	Kaufman, Yogi	Awe-inspiring, the modern aircraft carrier--truly a self-contained city--provides a presence at sea recognized and respected around the world. The Kaufmans have produced a total portrait that highlights the remarkable performances of a large supporting cast--the men and women behind the pilots and ship's officers who make the carrier go. Full-color, full-page photos. From Booklist The Kaufmans, father Yogi and photographer son Steve, give us a splendid look at U.S. Navy supercarriers. The text introduces the history, tactics, and internal organization of these ships, which operate with a crew of about 6,000, and offers comments from crew members ranging from captain to cook. The book's selling point, though, is its magnificent, technically outstanding, well-reproduced photographs--a series of vivid images registering the sheer size and complexity of the supercarriers. Consider it an invaluable acquisition for

2013.347.006	Service Etiquette	Swartz, Oretha D.	This is an absolute must have resource for today's service member. I picked up my copy while in ROTC as a general guide. Since owning it, many friends have not only borrowed it, but have been so impressed that they have also bought a copy for themselves. It has served us all very well. Now, as I plan my wedding, it has become the "go to" source. I think after the wedding, I will need another copy- this one may well be worn out. The book is excellently laid out and is incredibly easy to understand. All the bases are covered in this great book. (from Amazon.com)

			and they pledge to do all they can to come home together. Haunted by dreams of violence and death, one of the friends makes it his personal mission to watch over his friends--and the best place to do that is in the US Navy. Stationed off the coast of Vietnam on the USS Boston, the friend and his fellow sailors provide crucial support to the troops on the
2013.352.016	Vanished : The Sixty-Year Search for the Missing Men of World War II	Hylton, Wil S.	" From a mesmerizing storyteller, the gripping search for a missing World War II crew, their bomber plane, and their legacy. On September 1, 1944, a massive American bomber carrying eleven men vanished over the tiny Pacific archipelago of Palau, leaving behind a trail of mysteries. For more than sixty years, the U.S. government, the children of the missing airmen, and a maverick team of scientists and scuba divers searched the archipelago for clues with cutting-edge technology and unyielding determination. They crawled through thickets of mangrove and slogged into groves of poison trees, flew over the islands in private planes shooting infrared photography, trolled the water with magnetometers and side-scan sonar, and launched grid searches on the seafloor, but the trail seemed to lead nowhere. Now, in a spellbinding narrative, Wil S. Hylton weaves together the true tale of the missing men, their final days, the loved ones left wondering, and the broad sweep of world events that converged upon their last mission. With more than 56,000 troops still missing, the Pacific theater of World War II accounts for two-thirds of all American MIAs over the past century. These soldiers have never been seen again. But our government has never stopped trying to find them, and for two generations, their families have passed down the wounds of war, unable to find closure in a story without an ending. This is the story of those missing

	Cooling Refrigerating Plant		the Carrier Corporation photographic laboratory processor water cooling refrigerating plant on CVB 41 class vessels.
2013.357.009	Instruction Book, CVB-41 Class Vessels, Sterling Potato & Vegetable Peeler, Model A-1-C- 50 Pound	Toledo Scale Co., Sterling Div.	Description, specifications, and installation operating and maintenance instructions for the Sterling Vegetable Peeler, 50 lb. model, installed CVB 41 class vessels.
2013.357.010	Illustrated Parts Breakdown for Models J57-P-2, -P-2A, -P-2B, - F-7, -P-7, -P-11, -F-21, -P-21, -F- -21A, -P-21A, -P-23, -F-23A, -P- 23A, -F-39, -P-39 and -P-41 Aircraft Engines	Bureau of Aeronautics	A Catalog of parts for turbo jet engine models built by Pratt and Whitney and by Ford broked down into a Group Assembly Parts List and a Numerical Parts List.
2013.357.011	Illustrated Parts Breakdown for Models J57-P-4, -P-4A, -P-8, -P- -8A and -P-12 Aircraft Engines	Bureau of Aeronautics	A Catalog of parts for turbo jet engine models of the era built by Pratt and Whitney broken down into a Group Assembly Parts List and a Numerical Parts List.
2013.357.012	Technical Manual, Illustrated Parts Breakdown, Aircraft Engines, Navy Models J57-P- 16, -P-20, -P-20A and -P-420	Commander, Naval Air Systems Command	A Catalog of parts for turbo jet engine models of the era built by Pratt and Whitney broken down into a Group Assembly Parts List and a Numerical Parts List.
2013.357.013	Technical Manual, Illustrated Parts Breakdown, Aircraft Engines, Navy Models J60-P- 3A, -P6; USAF Models J60-P-3, -P3A, -P-5, -5A and P9	Bureau of Naval Weapons	A Catalog of parts for turbo jet engine models of the era built by Pratt and Whitney broken down into a Group Assembly Parts List and a Numerical Parts List.
2013.357.014	Technical Manual, Hangar Sprinkling System Pump Motor and Controller	Walter H. Eagan Co., Inc.	Description, Installation, Operation and Care and maintenance instructions for the Walter Eagan Hangar sprinkling system pump motor and controller.
2013.357.015	Instruction Book for Handy Billy Pumps Installed on VC 2-S-AP 5 Vessels	Deming Company	Description, Installation, Operation and Care and maintenance instructions for the Deming Handy Billy pump, Model 601 - No. 3.
2013.358.002	Bluejackets' Manual, 1973	United States Naval Institute	U.S. Navy enlisted person's bible. This revision contains 28 chapters plus appendices and covers soup to nuts - physical fitness to weapons, to pay and benefits.
2013.358.003	Modern Seamanship	Knight, Austin Melvin	A guide for those who follow the sea as a profession, for sport, or for relaxation. In print since 1901 and updated and continually expanded to meet

Object ID	Title	Author	Summary
			recent developments. This 1918 reprint has 25 chapters plus appendix. Later editions are titled Knight's Modern Seamanship.
2013.358.004	Naval Leadership and the American Bluejacket	Ageton, Arthur A.	Of the many books about leadership by far the greatest number have been written by and for members of the Army or industry. While nearly all these contribute something to the study of leadership in the Navy, none of them, not even those written by the Army, are completely applicable to naval leadership. The problem of leadership in a Navy at war is complicated by crowded living conditions in ships, by long periods at sea and at advanced bases, and by the correspondingly necessary close association between officers and men in life aboard ship. In a Navy expanding to several times its peacetime size, with many thousands of new and inexperienced officers, a new approach to the subject of naval leadership, which is specific and suggestive, is needed. This little book is the result of the author's long session of extensive reading on leadership in the course of preparation of the manuscript of "The Naval Officer's Guide", and from the necessity recently, as Executive Officer of a major ship, to train and assist in orienting some of our new and inexperienced officers in the most difficult feature of the most exacting profession in the world today.
2013.359.001	Jane's Fighting Aircraft of World War I	Taylor, John William Ransom	Originally published by Jane's Publishing Company, 1919. A reproduction of Jane's All the World Aircraft, wartime editions.
2013.359.002	Military Aircraft Markings & Profiles	Wheeler, Barry C.	Featuring 140 aircraft and over 850 full color illustrations and photographs, this book traces the story of military aircraft markings and camouflage from World War I to the present day.
2013.359.003	Aviation : The Early Years = Die Anfänge der Luftfahrt = Les Premières Années de	Almond, Peter	This book chronicles the first years of man-powered flight in photographs. It is illustrated

Object ID	Title	Author	Summary
	l'Aéronautique		with 450 photographs from the Hulton Getty Picture Collection including many newly re-discovered pictures. Text is in three languages: English, German and French.
2013.359.004	Historic Aircraft	McDonald, Steve	This book describes collections of famous and unusual aircraft around the world. It is illustrated with 120 color photographs.
2013.359.005	Flight : The Five Ages of Aviation	Blake, John	This book illustrates the history of aviation entirely with paintings. The text, too, is original in its viewpoint, for the author has concentrated on those incidents in aviation's past that not only seem to him to be of most significance and interest, but those also that have been neglected and deserving of more attention than they normally receive. The illustrations are by members of the Guild of Aviation Artists.
2013.359.006	Fighters of World War II	Donald, David (ed)	Gives detailed information about 24 fighter planes of World War II. Has more than 100 B&W and dozens of genuine wartime color photographs, plus more than 100 color illustrations. This material was previously published in 1990 as part of the reference set "Airplane." Contents: Messerschmitt Bf 109 -- Mitsubishi Ki-46 -- P-47 Thunderbolt -- Hawker Hurricane -- Supermarine Spitfire -- Henschel Hs 129 -- Nakajima Ki-84 -- Hawker Typhoon - Dewoitine D.520 -- Macchi MC200 -- Bristol Beaufighter -- Mitsubishi A6M -- Focke Wulf Fw 190 -- Nakajima Ki-43 -- Yak 1-9 -- Hawker Tempest -- Polikarpov I-16 -- Griffon Spitfires -- Messerschmitt Bf 110 -- Kawasaki Ki-61 -- Lockheed P-38 Lightning -- Mustang -- F4F Wildcat -- Dornier Do 335.

Object ID	Title	Author	Summary
2013.359.007	Great Aircraft Collections of the World	Ogden, Bob	This book presents in one volume the cream of the world's 700 public aircraft museums and celebrates man's great achievement of the twentieth century : human flight. It lists 37 collections in 22 other countries, and 33 collections in the United States. Includes 230 photographs.
2013.359.008	Complete Illustrated Encyclopedia of the World's Aircraft, The	Mondey, David (ed)	International guide listing all the world's manufacturers of production aircraft, both military and civil, from the beginning of powered flight to the present day. An extensive introduction about the history of aviation precedes the alphabetical encyclopedia.
2013.359.009	Color Profiles of World War 1 Combat Planes	Apostolo, Giorgio	This book is filled with both color illustrations of combat planes from WWI plus black and white photos from that era. The text describes 25 different planes. Translated from the Italian by Dale McAdoo, with an introduction by William Green
2013.359.010	Bombers of World War II	Donald, David (ed)	From 1939 to 1945, bomber aircraft waged a campaign of terror and destruction never before experienced. "Bombers of World War II" examines 23 of the planes that fought during this terrible conflict, from the German light bombers of the Blitzkrieg to the heavy aircraft of the strategic bombing campaigns in Europe and the Far East. This highly illustrated and comprehensive book examines the development and service records of the most important bombers of World War II. Each bomber is described in full detail, with lists of all its variants. Extensive specifications tables provide information on performance, weights, dimensions, and weapons load. In addition, each entry features a fully annotated cutaway drawing that details the plane's internal layout and working parts. More than 130 black-and-white and dozens of genuine

Object ID	Title	Author	Summary
			wartime color photographs, plus more than 150 color illustrations, reveal the planes in action, showing each bomber in its various forms and in the liveries of the different squadrons to which it was assigned, as well as the markings of the foreign air forces with which it served. Packed with information and overflowing with illustrations, "Bombers of World War II" is a fascinating guide to the bomber aircraft of 1939 to 1945: Junkers Ju 88 Tupolev Tu—2 Curtis SB2C Helldiver Boeing B—29 Heinkel He 115 Fairey Swordfish Douglas SBD Dauntless Lockheed Hudson Avro Lancaster n Heinkel He 111 Savoia—Marchetti S.M. 79 Short Sunderland Vickers Wellington Mitsubishi G4M DeHavilland Mosquito Bristol Blenheim Pe-2 Junkers Ju 87 Handley Page Halifax Avro Anson Focke Wulf Condor B-24 Liberator Heinkel He 177 Don't miss the companion volume, "Fighters of World War II." Jacket design by Kevin Ullrich
2013.359.011	History of Flight	Taylor, Michael John Haddrick	Includes information on the Dauntless, the Helldiver, and the F4U Corsair. The book contains more than 350 illustrations, including perfect perspective exterior views of the aircraft and many highly detailed and intricate full color cutaway illustrations.
2013.360.001	Torpedo 8 : The Story of Swede Larsen's Bomber Squadron	Wolfert, Ira	This is the story of Torpedo 8's career of vengeance; it largely is the personal story of Swede Larson, the leader, who took the issue with desperate

Object ID	Title	Author	Summary
			seriousness, but it is also the tribal story of the whole squadron. What the men of Torpedo 8, along with all hands on Guadalcanal, went through as they clung to Henderson Field for weeks and months against superior forces is a story that should live forever in American history.
2013.361.001	Aircraft Carriers : A History of Carrier Aviation and its Influence on World Events, Volume II, 1946-2006	Polmar, Norman	A history of World Aircraft Carrier development and operation. This second volume details the role of carriers in the unification controversies of the US armed forces and strategic deterrence. Addresses carriers in Royal Navy, The role of the development of the modern carrier in the Royal Navy and of the efforts of France and the Netherlands to build their fleets as well as Soviet Unions effort to produce carriers. The development of "oddball" aircraft are also covered as related to carriers.
2013.361.002	Cold War Submarines : The Design and Construction of U.S. and Soviet Submarines	Polmar, Norman	"Outlining the evolution of the modern submarine in meticulous detail, Cold War Submarines is a serious reference for naval historians and a tribute to sub crews, designers and builders." Naval Institute Proceedings
2013.362.001	Destroyer : An Anthology of First-hand Accounts of the War at Sea, 1939-1945	Hawkins, Ian (ed)	Anthologist Ian Hawkins has drawn together numerous stories from the officers and crew who served on 'B' class destroyers and others. No ships of the Second World War Royal Navy were embroiled in a wider range of tasks than its destroyers. At the heart of many vital operations, they were required to do the 'dirty work' of the navy time and time again. From shepherding Britain's convoy lifelines across the Atlantic, to fighting tooth-and-nail against E-boats in the Channel; from courageous inshore work in support of beleaguered troops, to capturing the keys to hitherto unbreakable German codes, the destroyer was always 'in amongst it' and frequently the first into, and last out of, action.

Object ID	Title	Author	Summary
2013.362.002	Our Hidden Front	Gilman, William	Stories of World War II based in Alaska and the Aleutian Islands.
2013.362.003	Inchon to Wonsan : From the Deck of a Destroyer in the Korean War	Alexander, James Edwin	Destroyers were the workhorses of the U.S. fleet in 1950 when the Communists invaded South Korea. These versatile ships hunted submarines, screened aircraft carriers during air operations, bombarded the shoreline, served on radar picket patrol and blockade duty, and performed search and rescue missions. This is the story of their experiences during the first crucial year of the war, told by an enlisted man from the destroyer John A. Bole. This book includes a letter (yellow note paper) that E. T. Forbes wrote to the San Diego Union Tribune in 2004 about the bombing of the USS Rochester (CA-124).
2013.362.004	Desert Victory : The War for Kuwait	Friedman, Norman	The USS Midway is listed on page 88. Friedman opens the book with a useful summary of the political and strategic circumstances that led to war and continues with explanations of the allied military buildup and blockade of Iraq. An important element of the book is the detailed examination of the weapons used. A full complement of appendixes supports the text, providing listings of major weapons, orders of battle, air losses on both sides, Scud firings and interceptions, and much more.
2013.362.005	Run Silent	Kaplan, Philip	This book traces the history of the submarine. But though the book fully describes the development of the submarine, the real focus is on th men who go to sea in them. Drawing upon interviews with submariners, past and present, and their journals and memoirs, and with the help of hundreds of illustrations, many previously unpublished, the author paints a vivid portrait of their lives and experiences.
2013.362.006	Dec. 7, 1941 : The Day the Japanese Attacked Pearl Harbor	Prange, Gordon W.	Originally published: December 7, 1941. New York : McGraw-Hill, c1988. "The last of the Prange manuscripts about Pearl Harbor" --Intro. The last

Object ID	Title	Author	Summary
			volume of the trilogy (from the back dust jacket). December 7, 1941 is a moment-by-moment, richly detailed chronological account of the "day that will live in infamy" that combines an analysis of the major events and an oral history from the military and civilians who were there.
2013.362.007	October Fury	Huchthausen, Peter A.	Drawing on his own experiences as well as personal accounts and observations of the US and Soviet officers and sailors, the author transports you to the deadly center of the showdown at sea. " ... a U.S. Navy officer who served on one of the ships involved reveals the startling truth behind the single most harrowing moment of the Cold War."--Dust jacket. Contents: Cuba Libre -- Operation Anadyr -- Destroyer USS Blandy -- The Art of Antisubmarine Warfare -- Operation Kama Departure -- October Fury -- Spies and Diplomats -- Russian Roulette -- Atlantic Datum -- Carrier Randolph Finds Savitsky's B-59 -- Cecil vs. Dubivko in B-36 -- Blandy vs. Shumkov in B-130 -- Hide-and-Seek -- Soviet Shell Game -- Ketov Evades in B-4 -- Endgame -- Kola Homecoming -- Newport Farewell.
2013.362.008	American Caesar : Douglas MacArthur, 1880-1964	Manchester, William	This book is a biography of Douglas MacArthur and presents him in all his many-faceted glory, complexity, and contradiction. Contents: Reveille -- First call -- Ruffles and flourishes (1880-1917) -- Charge (1917-1918) -- Call to quarters (1919-1935) -- To the colors (1935-1941) -- Retreat (1941-1942) -- The green war (1942-1944) -- At high port (1944-1945) -- Last post (1945-1950) --

Object ID	Title	Author	Summary
			Sunset gun (1950-1951) -- Recall (1951) -- Taps (1951-1964).
2013.362.010	Vertical Warfare	Drake, Vivian Francis	This book written during World War II explains aerial warfare and bombardment. The book supports aerial bombing. Contents: The Principles The Tools The Moving Targets Stationary Land Targets Precision Bombing The Air Plan Publisher's Note
2013.362.011	Nelson : A Biography	Walder, David	This is a biography of England's great national hero. It is the fullest and Most comprehensive study of his character and achievements that has appeared for over twenty-five years. His person life is examined in detail. This book also seeks to explain what distinguished Nelson from other admirals and how he introduced new concepts in naval warfare which aimed at total destruction of th enemy. The three great victories at the Nile, Copenhagen, and Trafalgar are described with freshness and immediacy.
2013.362.012	Mutiny : A History of Naval Insurrection	Guttridge, Leonard F.	Guttridge examines the world's famous and not-so-famous mutinies --- the bloody uprising aboard the Potemkin, the racial disturbances on the Constellation, the rebellion at the Nore, the hijacking of the Storozhevoy, to name but a few --- and asks what these incidents, occurring in different navies and in different ages, have in common. His findings are both startling and illuminating.
2013.362.013	Sea War in Korea, The	Cagle, Malcolm W.	Contains newspaper clipping about the North Korean attack on ships. Foreword by Admiral Arleigh A. Burke. The end of the Cold War, the anniversary of the Korean War, and the constant challenges of limited war we face today make this resurrection of a classic work both timely and relevant. This is a reprint of the book riginally published in 1957. A few

Object ID	Title	Author	Summary
			years after the war ended, the book was the first--and remains the only--full accounting of the U.S. Navy's role in the Korean conflict to be written for the general public. It is a subject that has not received the attention it deserves mostly because the larger, more dramatic naval operations of World War II overshadowed Korea. Authors Malcolm Cagle and Frank Manson show that sustaining the war would have been impossible without the U.S. Navy. Once the navy won command of the sea, United Nations forces were able to slow and eventually stop the communist invasion. They argue that without American naval dominance in the waters around Korea and the vital logistics tail that stretched halfway around the world, the tide-turning amphibious landing at Inchon would never have materialized, and the countless insertions, extractions, naval gunfire support operations, and naval aviation missions would not have occurred. They further argue that in the heightened tensions of the time, the Seventh Fleet served as a deterrent to the temptation of widening the war elsewhere in the Pacific. Their rigorous analysis of the war, their presentation of lessons learned, and even their list-filled appendix of ships lost, enemy aircraft destroyed, patrol squadrons, and more, make this book as valuable a reference today as when it was first offered. (from Amazon.com)
2013.362.014	Silent Victory : The U.S. Submarine War Against Japan	Blair, Clay	The author provides a complete and unbiased account of what happened during the submarine war in the Pacific and addresses such controversial aspects of the campaign as the torpedo scandal and discrepancies between claimed and confirmed sinkings. To get to the truth, the author interviewed scores of skippers, staff officers, and

Object ID	Title	Author	Summary
			code breakers and examined thousands of documents and personal papers. He takes the reader into the submarine war at all levels, from strategy sessions in Washington to moments of terror waiting out exploding depth charges at the bottom of the ocean.
2013.362.016	Incredible Victory	Lord, Walter	By any standards they were hopelessly outclassed. No battleships, only eight cruisers, three carriers and shore defenses including guns from the turn of the century. They knew little of war. None of the Navy pilots on one of the carriers had ever been in combat; nor had any of the Army fliers. Of the Marines, 17 of 21 new pilots were just out of flight school. Their enemy was brilliant, experienced and all-conquering. They had equipment problems. They took crushing losses. They had no right to win. Yet they did, and in doing so, they changed the course of the war. More than that, they added a new name-Midway- to that small list that inspires men by shining example.
2013.362.017	Kinkaid of the Seventh Fleet : A Biography of Admiral Thomas C. Kinkaid, U.S. Navy	Wheeler, Gerald E.	His name is not remembered with the likes of Nimitz, Halsey, and Spruance, yet Thomas Kinkaid commanded forces involved in some of the greatest naval battles of World War II, including the invasion of the Solomons, Surigao Strait, and the Battle of Leyte Gulf. This remarkable portrait of Kinkaid's 46- year naval career will stand as the last word on the life of one of the most important admirals of World War II. (Source: http://www.history.navy.mil)
2013.362.018	Famous American Admirals	Reynolds, Clark G.	Biographies of 215 American Naval and maritime flag officers. Complete service records.
2013.362.019	Sailor's Admiral: A Biography of William F. Halsey, A	Merrill, James M.	Merrill's biography of Halsey during World War II in the Pacific; an account of the battles in which Halsey participated, interspersed

Object ID	Title	Author	Summary
			with a few command scenes or quotations from Admiral Halsey.
2013.362.020	Pearl Harbor : Final Judgement	Clausen, Henry C.	Pearl Harbor investigation
2013.362.021	Battle of the Atlantic, The	Hughes, Terry	The first complete account of the origins and outcome of the longest and most crucial campaign of WWII-The German attempt to sever Allied supply lines in the Atlantic. The battle began with the sinking of the passenger liner Athenia and was remorselessly sustained by Uboats for the next five years and eight month--the entire duration of the war. More than just a military record, it looks behind the ocean battles between convoys and U-boats to show the human struggle on two continents, including the role played by women in shipyards, factories, and farms.. It describes the epic endurance of survivors on gale-wracked seas, the technological miracles of primitive computers that broke the Atlantic U-boat code, and the Germans' massive production program which almost brought a revolutionary fast new submarine into operation in time to threaten the Allied invasion of Europe.
2013.362.022	Sharks of Steel	Kaufman, Yogi	Companion to the Discovery Channel mini-series. The evolution of the submarine through photographs and paintings from WW II through the early 1990's. From a patrol on a diesel submarine in 1940 through modern submarines, and finally a glimpse of the largest submarine, the Typhoon
2013.362.023	Adak : The Rescue of Alfa Foxtrot 586	Jampoler, Andrew C. A.	In the tradition of great tales of men against the sea, this story offers a compelling look at courage and commitment in the face of certain tragedy. It is a powerful blend of human drama and real-life naval operations, but unlike most books in the genre, its heroes are airmen not seamen, and most survived their ordeal. Published on the twentieth-fifth anniversary of Alfa Foxtrot 586's fatal mission as a tribute to those lost, the account was written by a

Object ID	Title	Author	Summary
			naval aviator who has flown the same aircraft on the same mission from the same air base. The aircraft is a P-3 Orion on station during a sensitive mission off the Kamchatka Peninsula in the north Pacific. The time is mid-day on 26 October 1978. Andy Jampoler takes readers into the cockpit of the turboprop as a propeller malfunction turns into an engine fire, eventually forcing Jerry Grigsby to ditch his patrol plane into the empty, mountainous seas west of the Aleutian Islands. His fourteen crewmembers, strapped in their seats, expect the worst--and get it. The aircraft goes down in just ninety seconds, taking one of the three rafts with it. A second raft, terribly overcrowded, soon begins to leak. The flight crew's desperate battle to survive is told with the authority, drama, and sensitivity that only someone with the author's background could provide. He draws on interviews with survivors, searchers, and even the master of the Soviet fishing trawler that saved the living and recovered the bodies of the dead. He also draws on recordings of radio communications, messages in the files of the state and defense departments, and the patrol squadron's own investigation of the ditching. Everyone who likes survival epics and enjoys reading sea and air adventures will be entertained by this engrossing true story. 240 pages. 11 photographs. 5 line drawings. 3 maps. Notes. Bibliography. Hardcover. 6 x
2013.362.024	First 24 Hours of War in the Pacific	Young, Donald J.	The first the world knew of the Japanese attack on Pearl Harbor on December 7, 1941, was at 8:00a.m., Hawaiian time, when the stunning message "AIR RAID ON PEARL HARBOR X THIS IS NO DRILL" was hurriedly flashed from Admiral Kimmel's headquarters at Pearl Harbor. Twenty-four hours

Object ID	Title	Author	Summary
			and two minutes later, at 1:32p.m., Washington time, the Congress of the United States officially declared war on the Empire of Japan.
2013.362.025	Battle of Manila Bay : The Spanish-American War in the Philippines.	Conroy, Robert	Under cover of darkness Commodore George Dewey's American fleet had slipped through the mined waters under the shore batteries of Corregidor and emerged unscathed in Manila Bay. The ships had been under Spanish fire for more than half an hour. Still the American guns were silent. Only when Spanish shells were bursting on all sides did Commodore Dewey call to the captain of his flagship "You may fire when ready, Gridley". A shout went up from 500 sailors manning the guns: "Remember the Maine!". The big guns of the heavy cruisers spoke at last. Two hours later, with various Spanish ships beached, burning, sunk, or sinking, there was a flutter of flags from Dewey's signal mast: "Withdraw from action. Let the men go to breakfast." By lunchtime Dewey was absolute master of Manila Bay, having destroyed seven warships-the entire effective force of the Spanish Far Eastern fleet-and killed or wounded nearly four hundred the of enemy.
2013.362.026	Last Christmas Show, The	Hope, Bob	"Take the radio show to March Field? A captive audience with military polices guarding the gates so they can't get out?" "He said yes and I said yes and it's one of the happiest yesses in my life." "If I had said no I would have missed twenty-five of the greatest road shows and performer ever got to make, a quarter century of overseas trips to entertain U.S. servicemen around the world. A chance to work with some of the most talented and beautiful artists in the business."
2013.362.027	Naval Institute Guide to the Ships and Aircraft of the U.S. Fleet - 2005	Polmar, Norman	Packed with authoritative information, this timely new guide describes the US Navy. Marine Corps and Coast Guard during the intensive period of transformation since the Cold

Object ID	Title	Author	Summary
			War. The sea services play vital roles in today's military, and this comprehensive volume gives a valuable overview of each force and provides details of their ships, aircraft, weapons and people. New to this eighteenth edition are chapters on the Navy's littoral combat ships and the unmanned aerial vehicles being flown by all three services. This updated edition surpasses the exacting standards established by its predecessors, cementing the guide's reputation for accuracy and reliability. Detailing the considerable changes that have occurred in the past few years as new ships join the fleet, this fourteenth edition fully examines the buildup spurred by the aggressive John Lehman, secretary of the navy from 1981 to 1987. Complete information is provided on the four Iowa-class battleships added to the fleet, along with the new 95,000-ton nuclear carriers and a flotilla of amphibious, mine, and auxiliary ships still on the building ways. The book also examines two ship designs now under construction, the ARLEIGH BURKE-class missile destroyers and the SEAWOLF-class attack submarines, and the heated controversies surrounding these designs and their building programs. Indeed, this is the only reference available that provides extensive discussions of all new-construction programs as well as the existing fleet. To give continuity to the early editions of this volume, edited by the late James C. Fahey, special tables list all combat ships built for the U.S. Navy since World War II. Other unique features of this book include full descriptions of the Navy's administrative and operational organizations. The detailed examinations found here of the Navy's new

Object ID	Title	Author	Summary
			sealift programs, Fleet Marine Force, naval weapons, electronics, and aircraft are not available in any other naval reference volume. In his incisive analysis of the state of the fleet, Polmar suggests that a variety of political actions could quickly reduce the size and capabilities of the U.S. Navy, and he predicts some probably lean years ahead in the Navy's budget. He also cites some recent technical failures that may affect the future of the fleet. Supporting the text are several hundred photographs and drawings, many published here for the first time, that give general identification views of ships and aircraft and show close-ups of electronic equipment and weapons. Front jacket photos: From top, IOWA (BB 61), L.& L. Van Ginderen; CH-53E helicopter, W.D. Griffin; and the superstructures of the GOLDSBOROUGH (DDG 20) (left) and the BENJAMIN STODDERT (DDG 22), Giorgio Arra. Back jacket photo: STURGEON (SSN 637), Giorgio Arra. (from dust jacket flap)

2013.362.028	Naval Institute Guide to Combat Fleets of the World - 2005-2006 : Their Ships, Aircraft, and Systems	Wertheim, Eric	We also have a digital copy in CD. Internationally acknowledged as the best one-volume reference to the world's naval and paranaul forces, this popular Naval Institute guide is both comprehensive and affordable. Updated biennially since 1976, it has come to be relied on for its all-inclusive, accurate, and current data on the ships, navies, coast guards, and naval aviation arms of more than one hundred eighty countries and territories, including for the first time this year East Timor. Large fleets and small maritime forces get equally thorough treatment as

Object ID	Title	Author	Summary
			evidenced in this new edition, which highlights major and even minor developments that could have an impact on the world scene. From orders of new patrol boats for Yemen and ship-name changes in the Georgian Navy to performance details of the British Navy's new Astute-class submarines and Type 45 destroyers, the information is easily accessed by readers wanting to keep abreast of the world's navies. A thorough indexing of material and a logical ship-typing system makes the book easy to use and allows quick comparisons between fleets. With the retirement of longtime Combat Fleets editor A. D. Baker III in 2002 and the appointment of Washington defense consultant and author Eric Wertheim as the new editor, the guide continues to present timely, authoritative information supported by hundreds of new illustrations. The section on the Indian Navy, for example, presents new photos and line drawings of frigates in the Shivalik and Talwar classes and late-breaking information about the modified Kiev-class aircraft carrier expected to enter India's fleet. For the Chinese Navy, Wertheim provides details of new armament fits and construction of its Project 52 destroyers, and for the German Navy he offers service entry details of the new Sachsen-class Type 124 air defense frigates. Even seemingly minor changes in naval aviation are recorded, including Japan's recent decision to purchase new EH-101 helicopters. Readers can also find out the latest about the U.S. littoral combat ships and DD(X) warship programs and the Kidd-class destroyers being transferred to Taiwan. More than a hundred correspondents from around the world contributed information and illustrations to this new volume. From giant aircraft carriers

Object ID	Title	Author	Summary
			and ballistic missile submarines to tugboats and launches, the characteristics and capabilities of ships large and small are reliably recorded. Complete descriptions of naval aircraft, weapons, weapons systems, and sensors are also provided along with useful commentary on organization, personnel strengths, and bases. For those who need fast access to facts about the world's navies, this single-volume naval reference is essential-and a bargain considering the wealth of material it provides. 4450 photographs. Also available in hardcover (ISBN: 1-59114-934-7). About the Author Eric Wertheim, a strategic analyst in Northern Virginia, consults to government and private industry. A columnist for Proceedings magazine since 1994, he is the coauthor of Chronology of the Cold War at Sea, among other books.
2013.362.029	War at Sea, 1939-1945	Rohwer, Jürgen	This books is based on the author's earlier works: The Chronology of the War at Sea (2 volumes) which we also have. This superb illustrated history of the naval operations of the Second World War. It covers the strategies of the British, American, German, Italian and Japanese navies and also deals with the naval efforts of the smaller belligerents. Two hundred and fifty photographs from the archives of all the countries involved, many of them rare, bring new insight into the events of WWII. The author served in the German navy from 1942-1945. Contents: The Naval Arms Race 1922-1938/41 -- The German Offensives 1 September 1939-30 June 1940 -- Battle of the Atlantic I 1 September 1939-30 June 1940 -- Battle of the Atlantic II 1 July 1940-11 December 1941 -- The Mediterranean I 10 June

2013.364.001	Fighting Ships of World War II	Westwood, J. N.	This book presents the celebrated fighting ships of World War II. it details both their wartime careers and their design features. In addition it describes the evolution between the wars of the various ship types: how their designers sought to make compromises to satisfy the requirements of fighting qualities, sea-going capability, expense, and those of the different naval treaties.
2013.365.002	F4U Corsair	Johnsen, Frederick A.	This book is a detailed description of the Corsair fighter plane. It has a large fold out of the Corsair as well as many drawings and a cutaway view. (from dust jacket flaps:) The Vought F4U Corsair was one of the first fighter planes to give the Americans the tactical edge during the war in the Pacific. At a time when the navy's [sic] aging P—40s and Wildcats were too slow and the P—38s too few in number to cope with the maneuverable Zero, the fast, powerful Corsair stemmed the tide of Japanese victories. The Corsair was designed in 1938 in response to the navy's [sic] request for a modern fighter plane that could be launched from an aircraft carrier. It was powered by the massive Pratt and Whitney R-2800 Double Wasp radial engine, generating over 2,000 horsepower, and fitted with a

Object ID	Title	Author	Summary
			huge propeller more than thirteen feet in length. To ensure that this propeller would clear the ground, a distinctive inverted gull wing was designed, shaped like a V, with the landing gear attached to the low point of the V, in effect raising the aircraft higher off the ground. In addition to the large engine, a fuel tank was fitted in the fuselage forward of the cockpit. This had the effect of putting so much of the airplane ahead of the pilot that forward visibility was impaired whenever the nose was raised, as in takeoff, climb, and landing maneuvers. Though armament varied, the norm was six wing—mounted .50-caliber machine guns and racks for two 1,000-pound bombs or eight 5-inch rockets. The F4U was a hot airplane, with a top speed in excess of 400 mph and a gross weight of over six tons, and it could climb to 19,000 feet. This kind of performance made it very effective in combat, but there were problems. Unlike the Grumman Hellcat, a rugged machine that was simple to fly, the Corsair could be a handful for the inexperienced pilot. Poor forward visibility, a landing gear with a serious bouncing tendency, and the tremendous torque of the large engine—propeller combination made certain maneuvers very treacherous, particularly on the deck of an aircraft carrier. More than half of all Corsair crashes were attributable to noncombat causes, and many Corsair squadrons were shifted to land-based operations as a result. Corsairs need no introduction to navy [sic] and marine [sic] aviators. They were widely used in the South Pacific. Their first combat mission was over Guadalcanal in 1943, and they were used in close support of marine ground operations. Corsairs were the aircraft

Object ID	Title	Author	Summary
			down by the legendary VMF-214 Black Sheep squadron under Major Greg Boyington and navy [sic] squadron VF-17, the "Blackburn's Irregulars," under Lieutenant Commander John T. Blackburn. They were the only aircraft fast enough to provide some defense against kamikaze attacks. In spite of their idiosyncrasies, the fast, powerful Corsairs were not retired at the end of World War II. It took some time for jet aircraft to render them completely obsolete — Corsairs played a large role in the Korean War and were widely used by the French in Indochina and during the Suez intervention in 1956. Today these magnificent fighter aircraft are curiosities at air shows, but they will be remembered with respect and affection by those who flew them. About the Author FREDERICK A. JOHNSEN began writing and photographing for aviation publications while he was a student at the University of Washington in the late 1960s and early 1970s, where he earned degrees in both history and journalism. He has written and published the well-known Bomber Books, about the B—36, B—29, PB4Y—1 and -2, B-17, P-61, and a pictorial history of the Fifth Bomb Group. He has been a reporter on a daily newspaper; the editor of "Western Flyer," an aviation newspaper; and an aviation museum consulting curator and editor. He is the Wing Historian for the 62nd Military Airlift Wing at McChord Air Force Base, Washington, and is also the curator of the McChord Air Museum. About the Illustrator RIKYU WATANABE, dean of aircraft illustrators, was born in 1927 in Osaka, Japan. In

Object ID	Title	Author	Summary
			1943 he volunteered for the Japanese Army Flight Cadet School. When the war ended in 1945 he was at an army air-force [sic] base in China. Returning to Japan he studied painting at Bunka Gakuin University, from which he was graduated in 1950. Since then he has become one of the world's leading illustrators. Since 1966 he has specialized in aircraft illustration, thus combining his two careers — pilot and artist — to produce some of the finest aircraft illustrations that have ever
2013.365.003	Illustrated Longitude, The	Sobel, Dava	Recounts in words and images the epic quest to solve the thorniest problem of the 17th and 18th centuries. The story of John Harrison's quest and 40-year obsession to measure longitude. An illustrated version of the author's 1995 work.
2013.365.004	Above and Beyond, 1941-1945	Morrison, Wilbur H.	A comprehensive account of carrier airpower in the Pacific, through the eyes of the pilots, Marines, generals, and admirals -- American and Japanese -- who were there. Using photographs, declassified Navy documents, candid accounts of Japanese and American fleet commanders, and exclusive interviews with carrier pilots, Above and Beyond chronicles not only the crucial battles but the great surprises, evasions, and tactical breakthroughs that characterized the coming-of-age carrier aviation. A new look at the legends of William Halsey and Dougals MacArthur; the relationships and rivalries among such admirals as Nimitz, King and Spruance; and above all the sacrifices made by the Navy and Marine pilots whose valor gave ever higher meaning to the call of duty. From the cover: Revelatory new views of the Pacific victory through the eyes of admirals and pilots who were there.

Also included is an index, a guide on how to order spare parts, and appendicies providing general engine views.
2013.371.003	Instruction Book, Model 250DA Dishwashing Machine, Model 175DA Dishwashing Machine, Model 60DA Dishwashing Machine	Insinger Machine Company	The Insinger company provided six dishwashing machines for each of the CVB class of ships: four Model 250DA machines for the crew sculleries; one Model 175DA for the officer's scullery; and one Model 60DA machine for the CPO pantry. This book provides operating instructions and technical drawings for all three models.
2013.374.001	Red November : Inside the Secret U.S.-Soviet Submarine War	Reed, W. Craig	Few know how close the world has come to annihilation better than the warriors who served America during the 46-year struggle known as the Cold War. Yet for decades their work has remained shrouded in secrecy. Now, W. Craig Reed, former U.S. Navy diver and fast-attack submariner, provides an eye-opening narrative of the underwater struggles and espionage operations between the United States and the former USSR that brought us several times to the brink of nuclear war. Reed served aboard submarines involved

Object ID	Title	Author	Summary
			in espionage operations, and his father was a top naval intelligence specialist intimately involved in the Cuban Missile Crisis. Reed is one of the first authors to obtain in-depth interviews with dozens of navy divers, espionage operatives, submariners, and government officials on both sides (including several Soviet submarine captains), who describe the most daring and decorated missions of the conflict.--From publisher description.
2013.374.002	Nightfighter : Radar Intercept Killer	Magruder, Mark A.	This book was written by the son of Lt. Col. Marion Milton "Black Mac" Magruder who developed the highly classified training program for nightfighters of the VMF(N)533 also known as Black Mac's killers. During their time on Okinawa and Engebi, the squadron experienced the worst typhoon season the island had seen in several hundred years. They also would become the target of the Giretsu, when the ruthless Japanese suicide warriors attacked Yontan Air Field, the only attack of its kind during the war. And even though the squadron arrived one month after battle commenced, the 533 held the record for all radar-intercept kills. Black Mac's Killers set many records and earned many distinctions during the war, including the Presidential Unit Citation.
2013.374.003	Over the Beach : The Air War in Vietnam	Grant, Zalin	As a Time correspondent, Grant frequently visited the fighter pilots who flew missions over North Vietnam from the carrier Oriskany, and interviewed many of them anew after the war. The material he collected, combined with diligent research and considerable journalistic talent, comprises a first-class account of an important aspect of the war that has not received major attention. The pilots are portrayed in a dimensional way rarely found in war literature, and Grant conveys vividly what it was like to live through intense anti-aircraft fire,

Object ID	Title	Author	Summary
			dogfights with MIGs, downing and rescue (as well as downing and capture) and psychic burnout. This is more than an air-combat book, however: the author follows the course of disagreements between the high command and Defense Secretary Robert McNamara over the usefulness of the air war, the reaction of the pilots to charges of bombing civilian areas, the struggle of a pilot's widow to confirm that he has been killed and then to reconcile herself to his death. First serial to Vietnam Veterans of America; Military Book Club dual main selection. - From Publishers Weekly Copyright 1986 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. In this sympathetic and penetrating history the pilots of a fighter squadron aboard the U.S.S. Oriskany battle the internal politics of their unit, their own doubts about the Vietnam War, and fears for their safety, while acting like fighter jocks, all bravado and hard living. Laced through this diverse, personality-filled work are the words of wives and many of the pilots themselves and the author's telling assessment of the bombing policy, which was tentative and ineffective despite the courage and skill of the men who carried it out. The action begins in July 1966 and ends as a final run is cancelled due to bad weather in 1972. This is a valuable examination of the Navy's bombing of the North, with less emphasis on hardware than a pilot might wish, but biting and insightful. A gem. Mel D. Lane, Sacramento, CA. - From Library Journal Copyright 1986 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title. "The Right Stuff without the hype, Yeager without the ego."—Washington Post

Object ID	Title	Author	Summary
			Book World "While the jet-jockey competitiveness, the undercurrent of fear, the victories and foul-ups of jet sweeps have been described many times, few such chronicles have done it so grippingly and with such a ring of accuracy. Mr. Grant explores the emotions felt not only by the men in battle but by the wives and others left behind, and the questions the war raised in their minds. To put in larger context the war's impact on individual participants, the author periodically reviews the high-level struggles over how to fight the air war. "What is most impressive is to find an analysis so clearly stated, so seemingly on track in locating the weak spots in the policies of various political and military officials....Written in a straightforward yet stylish prose, Over the Beach carries tremendous conviction."—Richard Witkin, New York Times Book Review (from Amazon.com)
2013.374.004	My Life as a Spy : One of America's Most Notorious Spies Finally Tells His Story	Walker, John Anthony	John A. Walker, Jr. was a chief warrant officer and communications specialist for the US Navy. In 1985 he was arrested for selling classified secrets to the Soviet Union. Upon his arrest, it was revealed that he had been acting as a spy from 1968 to 1985 and that his son, brother, ex-wife, and an acquaintance had also participated in the espionage ring.

2013.374.023	Oxford Companion to Ships & the Sea, The	Kemp, Peter (ed)	The Companion is international in scope and covers the seafaring history of the world from earliest times to present. At its heart are the short biographies of those who have left their mark upon the sea -- the navigators and explorers, naval and merchant seamen, marine designers, writers and artists, pirates and inventors. Yachtsmen and their craft, and the phenomenal growth of their sport in recent years, are given due place. Included too are definitions of technical seamanship, accounts of naval battles, histories of famous ships, descriptions of types of vessel, and articles on the development and principles of shipbuilding, navigation, seamanship, diving, fishery, and the lore and customs of the sea. The main articles are written by specialists in their subjects; other contributors are generally well known maritime authors who have long studied maritime history in all its aspects. Line Drawings by Peter Milne and the OUP Drawing Office --Cover blurb
2013.375.001	Battle of the Narrow Seas, The : The History of Light Coastal Forces in the Channel and North Sea, 1939-1945	Scott, Peter Markham	This is the history of the struggle for control of the Narrow Seas which stretch north-east and south-west from the Straits of Dover. It began in the summer of 1940 when the European ports from Bordeaux to the far north had fallen into enemy hands. For more than four years a battle went on to prevent the Germans from using coastwise shipping. The Coastal Forces fought the enemy and the elements in the Mediterranean, in the Caribbean, in the far East, in West Africa, off Iceland, in the Irish Sea and round the coasts of Scotland. The book is

Object ID	Title	Author	Summary
			much more than a memoir and tells the whole story of the wide-ranging conflict against the Germans, fought in the congested waters of the Channel. Actions against convoys and E-boats, often under the shadows of French cliffs; an impossible sortie against Scharnhorst and Gneisenau as they ran the gauntlet through the Straits in February 1942; the attack on St. Nazaire, and the defensive and offensive roles taken on by MTBs (Motor Torpedo boats) during the D-Day landings are just some of the events covered in the book. Written by Peter Scott who, as a MTB commander, saw action against th enemy throughout the course of the War.
2013.375.002	U-505 : The Final Journey	Wise, James E.	On 4 June 1944 the German submarine U-505 became the first man-of-war since the War of 1812 to be captured by the U.S. Navy in battle on the high seas. Attacked by the American hunter-killer force Task Group 22.3 off the coast of West Africa, the U-boat was forced to the surface after a fierce bombardment. Abandoned by the crew while partially afloat, she was boarded by American sailors and secretly towed to Bermuda. Renamed USS Nemo, the submarine made a war bond subscription tour of Atlantic and Gulf of Mexico ports before docking at Portsmouth, New Hampshire, to await scrapping. These events are vividly described in the pages of this book along with the story of how the U-505 became a major attraction at the world-renowned Museum of Science and Industry in Chicago. The author tells how Admiral Dan Gallery, the commander of Task Group 22.3, saved the boat and became a major force in convincing the Navy Department not to scuttle the submarine but to transfer the U-505's ownership to the science museum, where she would be put on display to

			commemorate the thousands of Americans who had been lost at sea during World War II. Contents: The U-505 joins the war in the Atlantic -- The Battle of the Atlantic, 1939-1945 -- U-boat hunter-killer groups -- Task Group 22.3 -- The last patrol of U-505 -- The battle and the capture -- Bringing the U-505 to Chicago -- Restoration: a continuing task -- The new U-505 experience -- Appendix A. Operating and living aboard the U-505 -- Appendix B. The evolution of the submarine.

2013.375.003	US Navy and the War in Europe, The	Stern, Robert Cecil	Even before Germany declared war in 1941, US naval vessels were actively engaged in Atlantic convoy battles, and suffered their first casualties long before the Pearl harbor attack. After the attack on Pearl Harbor, the US Navy immediately sent reinforcements to the over-stretched Royal navy, taking part in attacks on German occupied Norway, flying aircraft to Malta and Egypt from its carriers and adding protection to the convoys to Russia. Its involvement in the crucial Battle of the Atlantic was also substantial, and the invasions of North Africa and Europe from 1942 onwards would have been unthinkable without the massive US forces. As late as 1945 the crossing of the Rhine by the Allied armies was heavily dependent on US Navy assets and expertise. Contents: A "Queer idea of neutrality" September 1939-November 1940 -- Just short of war November 1940 -December 1941 -- The learning curve December 1941-September 1942 -- Friends & enemies: the landings in North Africa October 1942-November 1942 -- Climax in the Atlantic November 1942-October 1943 --

2013.375.004	Warships after Washington : The Development of the Five Major Fleets, 1922-1930	Jordan, John	The Washington Treaty of 1922, designed to head off a potentially dangerous arms race between the major naval powers, agreed to legally binding limits on the numbers and sizes of the principal warship types. It effectively banned the construction of new battleships for a decade. The approach of this book is novel in combining coverage of the political and strategic background of the treaty--and the subsequent London Treat of 1930--with analysis of exactly how the navies of Britain, the USA< Japan, France and Italy responded, in terms of the types of warships they built and the precise characteristics of those designs. This was not just a matter of capital ships, carriers and cruisers, but also influenced the development of super-destroyers and large submarines. Now, for the first time, warship enthusiasts and historians can understand fully the rationale behind much of inter-war naval procurement.
2013.375.005	Last Sentry, The : The True Story That Inspired The Hunt for Red October	Young, Gregory D.	This real-life thriller, which inspired Tom Clancy's famous first novel, The Hunt for Red October, chronicles a 1975 mutiny aboard one of the Soviet Navy's most advanced warships, the destroyer Storozhevoy (Sentry in English). The mutiny was led by the ship's political officer, Valery Sablin, who planned to launch a revolution and overthrow the government. News of the incident was suppressed by the Soviets, but Gregory Young, an American naval officer studying at the naval Postgraduate School in

Object ID	Title	Author	Summary
			Monterey, California, managed to piece the story together. In 1982 while doing some research in the basement of the U.S. Naval Academy library, Clancy came across Young's report of the attempt and wrote a fictionalized account that launched his career. With the help of recently declassified KGB documents and Sablin family papers, Young and Russian linguist Nate Braden provide a full account of events as they unfolded. In telling the compelling story, they offer a candid portrait of life in the USSR and shed light on many myths of the Cold War.
2013.375.006	Galloping Ghost, The : The Extraordinary Life of Submarine Legend Eugene Fluckey	LaVO, Carl	Eugene Fluckey was one of the great naval heroes of World War II. His exploits as captain of the submarine USS Barb revolutionized undersea warfare and laid the groundwork for the nuclear-powered ballistic missile submarine fleet. He retired as a rear admiral and was awarded numerous presidential, congressional, and military honors, including the Medal of Honor and four navy Crosses. In the war against Japan, Flukey fired the first ballistic missiles from a submarine, sank more tonnage than any other U.S. submarine skipper--including an aircraft carrier, a cruiser, and a destroyer--and blew up a train after landing submariners-turned-saboteurs on mainland Japan in 1945. Here is the legendary submariner's story, told with the exclusive access to Fluckey's personal papers and based on interviews with him, his family, and barb shipmates, official navy documents, and the recollections of his contemporaries.
2013.375.007	Enterprise : America's Fightingest Ship and the Men Who Helped Win World War II	Tillman, Barrett	Pearl Harbor . . . Midway . . . Guadalcanal . . . The Marianas . . . Leyte Gulf . . . Iwo Jima . . . Okinawa. These are just seven of the twenty battles that the USS Enterprise took part in during World War II. No other American ship came close to matching her record. Enterprise is the epic, heroic story of

Object ID	Title	Author	Summary
			this legendary aircraft carrier—nicknamed "the fightingest ship" in the U.S. Navy—and of the men who fought and died on her. America's most decorated warship, Enterprise was constantly engaged against the Japanese Empire from December 1941 until May 1945. Her career was eventful, vital, and short. She was commissioned in 1938, and her bombers sank a submarine just three days after the Pearl Harbor attack, claiming the first seagoing Japanese vessel lost in the war. It was the auspicious beginning of an odyssey that Tillman captures brilliantly, from escorting sister carrier Hornet as it launched the Doolittle Raiders against Tokyo in 1942, to playing leading roles in the pivotal battles of Midway and Guadalcanal, to undergoing the shattering nightmare of kamikaze strikes just three months before the end of the war. Barrett Tillman has been called "the man who owns naval aviation history." He's mined official records and oral histories as well as his own interviews with the last surviving veterans who served on Enterprise to give us not only a stunning portrait of the ship's unique contribution to winning the Pacific war, but also unforgettable portraits of the men who flew from her deck and worked behind the scenes to make success possible. Enterprise is credited with sinking or wrecking 71 Japanese ships and destroying 911 enemy aircraft. She sank two of the four Japanese carriers lost at Midway and contributed to sinking the third. Additionally, 41 men who served in Enterprise had ships named after them. As with Whirlwind, Tillman's book on the air war against Japan, Enterprise focuses on the lower ranks—the men who

Object ID	Title	Author	Summary
			did the actual fighting. He puts us in the shoes of the teenage sailors and their captains and executive officers who ran the ship day-to-day. He puts us in the cockpits of dive bombers and other planes as they careen off Enterprise's flight deck to attack enemy ships and defend her against Japanese attackers. We witness their numerous triumphs and many tragedies along the way. However, Tillman does not neglect the top brass—he takes us into the ward rooms and headquarters where larger-than-life flag officers such as Chester Nimitz and William Halsey set the broad strategy for each campaign. But the main character in the book is the ship itself. "The Big E" was at once a warship and a human institution, vitally unique to her time and place. In this last -minute grab at a quickly fading history, Barrett Tillman preserves the Enterprise story even as her fliers and sailors are departing the scene. Publication Date: February 14, 2012 (from Amazon.com) Contents: Prologue: Kearny, New Jersey, 1958 -- "I have done the state some service" (1938-1941) -- "Keep cool, keep your heads, and fight" (December 1941-May 1942) -- "Revenge, sweet revenge" (June 1942) -- "We didn't know a damned thing" (August 1942) -- "A fighting chance" (October 1942) -- "The most exciting part of your day" (November 1942-January 1943) -- "A long and teedjus journey" (February-December 1943) -- "If any of them lived it wasn't our fault" (January-June 1944) -- "Vector two seven zero" (June-July 1944) -- "Only human" (August-December 1944) -- "Live with great enthusiasm" (January-May

Object ID	Title	Author	Summary
2013.375.008	German Invasion of Norway : April 1940, The	Haarr, Geirr H.	1945) -- "The Enterprise has a soul" (1945-1958). This superb history of the German invasion of Norway, focussing on the events at sea, is unsurpassed in its research and coverage. The narrative is based on primary sources from British, German and Norwegian archives, and has been hailed as the best account of the campaign and of the reasons behind the invasion. Weserubung also ushered in entirely novel military strategems. It was the first ever combined operation where air, sea and land forces operated together, success requiring cooperation between normally fiercely competing services. It was also the first time that paratroopers were used, while the following days were to witness the first dive-bomber attack to sink a major warship and the first carrier task-force operations.
2013.375.009	Home on the Rolling Main, A : A Naval Memoir	Ditcham, A. G. F.	From first joining the Royal navy in 1940 until the end of the campaign against Japan, Tony Ditcham was in the front line of the naval war. After brief service in the battlecruiser Renown off Norway and against the Italians, he was into destroyers and saw action in most European theatres --against E-boats and aircraft in 'bomb alley' off Britain's East Coast, on Arctic convoys to Russia, and eventually in a flotilla screening the Home Fleet. During the dramatic battle of the North Cape in December 1943 he enjoyed a grandstand view of the sinking of the great German battleship Scharnhorst from his position in the u\gun director of HMS Scorpion (his account was so vivid that it formed the basis of the description in the official history). later, his ship operated off the American beaches during D-Day, where two of her sister ships were sunk with heavy loss of life, and he ended the war in the British pacific Fleet preparing for the invasion of Japan. this incident-packed

Object ID	Title	Author	Summary
			career is recounted with restraint, plenty of humour and colourful descriptive power--his account of broaching and almost capsizing in an Arctic winter storm is as good as anything in the literature of the sea. The result makes enthralling reading, and as the surviving veterans rapidly decline in numbers, this may turn out to be one of the last great eyewitness narratives of the Second World War at sea.
2013.375.010	Destroyer Captain : Lessons of a First Command	Stavridis, James	This memoir of James Stavridis' two years in command of the destroyer USS Barry (DDG-52) reveals the human side of what it is like to be in charge of a warship--for the first time and in the midst of international crisis. From Haiti to the Balkans to the Arabian Gulf, the Barry was involved in operations throughout the world during the author's 1993-95 tour. Drawing on daily journals he kept for the entire period, Stavridis exposes the complex nature of those deployments in a "real time" context and describes life on board the Barry and liberty ashore for enlisted and officers alike.
2013.375.011	Zumwalt : The Life and Times of Admiral Elmo Russell "Bud" Zumwalt, Jr.	Berman, Larry	Admiral Elmo Russell Zumwalt, Jr., the charismatic chief of naval operations (CNO) and "the navy's most popular leader since WWII" (Time), was a man who embodied honor, courage, and commitment. In a career spanning forty years, he rose to the top echelon of the U.S. Navy as a commander of all navy forces in Vietnam and then as CNO from 1970 to 1974. His tenure came at a time of scandal and tumult, from the Soviets' challenge to the U.S. for naval supremacy and a duplicitous endgame in Vietnam to Watergate and an admirals' spy ring.
2013.375.012	For Crew and Country : The Inspirational True Story of Bravery and Sacrifice Aboard the USS Samuel B. Roberts	Wukovits, John F.	This book describes the actions of the Destroyer Escort, the Samuel B. Roberts at the battle of Leyte Gulf. The destroyer along with twelve other vessels comprising Taffy 3, stood

Object ID	Title	Author	Summary
			between Japan's largest battleship force ever sent to sea and General Douglas MacArthur's transports inside Leyte Gulf. Faced with the surprise appearance of more than twenty Japanese battleships, cruisers, and destroyers, including the Yamato, at seventy thousand tons the most potent battlewagon in the world, the twelve-hundred-ton Samuel B. Roberts turned immediately into action with six other ships. Of the 563 destroyer escorts constructed during WWII, this was the only one to be sunk. The men who survived faced a horrifying three-day nightmare in the sea, where they battled a lack of food and water, scorching sun, numbing nighttime cold, and shark.s Formation of a crew -- "You are now a member of a great fighting team" -- The ship "Looked awful damn small" -- "Our war began" -- In the Pacific -- "We are doing something for the war effort" -- "We were not to be trifled with" - - The battle -- "We weren't supposed to have no surface engagement!" -- "Look at that little DE committing suicide" -- "Boys, take off your hats. there goes a good ship" -- "Such a helpless, useless feeling" -- Samar's aftermath -- "They did not die in vain" -- "A bond that will stand all time".

			returning to the U.S. Port visits included Pearl Harbor, Yokosuka, Kobe, Subic Bay and Hong Kong. Carrier Air Group 2 was embarked, consisting of VF-64, VA-65, VA-63, VF-24, VX-4 Det. A, VAH-6 Det. A, VAAW-35 Det. A, VAW-11 Det. A, VFP-61 Det. A and Guided Missile Group 1
2014.079.006	USS Shangri-La (CVA-38) - Air Task Group Three - January-June 1956	Kownenn, J. C. (ed)	Pictorial account of the deployment of the USS Shangri-La (CVA-38) January - June, 1956 from Homeport of San Diego, CA to the Far East. AIR TASK GROUP 3 (ATG-3) on board. VF-53 (FJ-3M). VF-92, VF-122, VC-3 Det. J, VC-6 Det. J, VC-61 Det. J, VC-35 Det. J (AD-5N), VC-11 Det. J (AD-5W), HU-1 Det. J. Ports of Call: Pearl Harbor, HI; Yokosuka, Japan; Iwakuni, Japan; Subic Bay, Philippines; Manila, Philippines; Hong Kong
2014.079.007	USS Henrico (APA-45) - Westpac - 1963	Cisch, D. S. (ed)	A pictorial account of the deployment of the USS Henrico (APA-45) with Amphibious Squadron One onboard to the Western Pacific. She departed San Diego on 26 March 1963 for the Western Pacific via Hawaii and returned to San Diego on 13 November 1963. The book is dedicated to Go Bi-Moe a member of the aboriginal Paiwan tribe of Taiwan (Taiwan). She became a Christian and opened a Christian kindergarten in her village. The crew of the Henrico send her money so that she can teach full time. Ports of call and items of interest: the front end covers give the statistics and the history of the ship; the back end covers give a map of the deployment. Okinawa, Yokosuka, Numazu and Sasebo, Japan; Hong Kong; Korea; and the Philippines. The Henrico made two dependents cruises to Hong Kong: one from Sasebo, Japan on 19 May 1963 and another from Subic Bay, Philippines on 21 September 1963. Henrico also participated in Operation "Flagpole" (a joint operation conducted with ROK forces) and Operation

Object ID	Title	Author	Summary
			"Bayonet Beach" conducted with the 8th US Army. Henrico celebrated her 20th anniversary on 24 June 1963. Henrico departed Okinawa on 20 October 1963 for San Diego, California via Pearl harbor, arriving on 13 November 1963. The next to last page has a humorous memo to family about the changes the men will bring home with them including table manners and new phrases.
2014.079.008	Construction Electrician's Mate 3 & 2	Bureau of Naval Personnel	This book is written for men of the navy and of the naval Reserve who are studying for advancement to the rates of construction Electrician's Mate 3 or 2. The first chapter of this book provides general information about the role of the Construction Electrician (CE) in the Navy, the functions of operational companies of a Construction Battalion, and publications useful to a CE. Chapter 2 discusses the properties of electrical conductors. Battery repair is the subject of chapter 3. Chapter 4 gives a brief explanation of the types of drawings with which CEs should be familiar. Chapters 5-9 contain a discussion of the generation and distribution of electric light and power. Chapters 10-12 cover the fundamentals of telephone communications. Chapter 13 summarizes common circuit faults.
2014.079.009	Fire Control Technician 3	Bureau of Naval Personnel	This book is written as an aid in preparing Fire Control Technician strikers for promotion to the rate of Fire Control Technician 3. The material in this book has been organized into nine parts. The first four chapters are devoted to the fire-control problem and basic mechanisms. Chapter five covers gyroscopes, the principles of which are utilized in the chapter which follows on Lead-Computing Sights. The last three chapters discuss maintenance of fire-control circuits, synchro transmitters and receivers, and safety precautions.

2014.079.010	USS Henrico (APA-45) - Vietnam - 1965	Richards, P. K. (ed)	A pictorial account of the deployment of the USS Henrico (APA-45) with Amphibious Squadron One onboard to participate in Vietnam War. Ports of call and items of interest: From 16 December 1964 to 27 January 1965 the ship operated between Subic Bay and Okinawa transferring troops; on 8 March HENRICO was part of the task group that landed the first U. S. combat unit in Viet Nam at Da Nang, Hue, and Chu Lai. Also stopping in the Philippines; Yokosuka, Japan; Okinawa; Hong Kong; pages 66-68 pictures of Vietnam landings; Hawaii. The ship departed Yokosuka on 2 June and arrived in San Diego on 16 June 1965.
2014.079.012	USS Lake Champlain (CVS-39) - Mediterranean Cruise - 1959	None Stated	A pictorial account of the deployment of the USS Champlain (CVS-3) to the Mediterranean. She departed Norfolk 5 June 1959 and Mayport 15 June? and returned to Quonset Point. Could not determine date of return, but believe it was August. Ports of call and items of interest: the carrier spent three months engaged in Anti-Submarine Warfare exercises as part of a Hunter-Killer team not only from the US, but allied Navies as well; Gibraltar; Naples; Capri; Rome; Genoa; Marseilles; Barcelona; Lisbon; Fatima; hosted two Portuguese orphans; p.112 says they were in Lisbon on 25 August; VIPS US Ambassador to Portugal, commander 6th fleet; Italian General; orphan parties; Jane Russell on pages 122-123. Pages 125-135 contain lists of officers and crew, sorted by department, and listing their home towns. Squadrons onboard: VS-30 HS-1 VAW-12 HU-2
2014.079.029	Burgess Blue Book	Burgess, Yorke	Handbook of electrical formulas, electrical drawings and electrical problems and calculations.

Object ID	Title	Author	Summary
2014.079.030	Copeland Electrical Handbook	Copeland Refrigeration Corporation	This booklet supplements the Coplemetic service manual for its refrigeration and air conditioning product line, expanding the electrical details to include information on both Copelemetic and Copelaweld motor compressors.
2014.079.031	Fractional Horsepower Electric Motors. What kinds are available--what makes them run and what they will do--how to repair, rewind, and reconnect them.	Veinott, Cyril G.	Tells the story of the fractional horsepower motor, what types and kinds are available, and what makes them run, what they will do, and how to repair them when necessary.
2014.111.006	Taking Care of Business... USS Midway CV-41 - 1976	Wong, Gordon (ed.)	Pictorial account of the activities of the USS Midway over an undetermined period that covered events in 1975 to sometime in the first half of 1976. 16 pages of photos are devoted to Operation Frequent Wind during the fall of Saigon in 1975. Port visits in the period included Singapore, Pusan, Karachi, Hong Kong and Subic Bay.
2014.301.001	NATOPS Flight Manual A-7E Aircraft	Chief of Naval Operations	Contains standardized air and ground procedures for the LTV A-7E aircraft.
2014.301.002	NATOPS Flight Manual Navy Model TA-7C Aircraft	Chief of Naval Operations	Contains standardized air and ground procedures for the LTV TA-7C aircraft.
2014.301.003	Preliminary NATOPS Flight Manual Navy Model F/A-18A and TF/A-18A Aircraft	Chief of Naval Operations	Contains standardized air and ground procedures for the McDonnell F/A-18A Hornet aircraft.
2014.301.005	NATOPS Flight Manual Navy Model E-2C Aircraft	Chief of Naval Operations	Provides standardized procedures for the operation of the E-2C early warning aircraft.
2014.301.007	Navigation and Nautical Astronomy	Dutton, Benjamin	A textbook on navigation and nautical astronomy, prepared for the instruction of midshipmen at the United States Naval Academy. Original edition (1926) by Commander Benjamin Dutton.
2014.301.010	Radiotelephone Procedure	War Department	War Department technical manual on radiotelephone procedures for use by the Army Air Forces. Contains errata change 1 as loose leaf.
2014.301.011	Radio Handbook	Orr, William I.	Comprehensive reference book with 33 chapters written for the advanced radio amatuer and electronics engineer.

Object ID	Title	Author	Summary
2014.301.012	Sea of Thunder : Four Commanders and the Last Great Naval Campaign, 1941-1945	Thomas, Evan	Journalist and historian Thomas writes with a knowing feel for the clash of cultures as he follows four men through the naval war of 1941-1945 in the South Pacific: Admiral William ("Bull") Halsey, the macho, gallant, racist American fleet commander; Admiral Takeo Kurita, the Japanese battleship commander charged with making what was, in essence, a suicidal fleet attack against the American invasion of the Philippines; Admiral Matome Ugaki, a self-styled samurai who was the commander of all kamikazes and himself the last kamikaze of the war; and Commander Ernest Evans, a Cherokee Indian and Annapolis graduate who led his destroyer on the last great charge in the Battle of Leyte Gulf, the biggest naval battle ever fought. From new documents and interviews with American and Japanese veterans, Thomas was able to piece together and answer mysteries about the battle that have puzzled historians for decades.--From publisher description
2014.301.013	Pueblo Surrender, The : A Covert Action by the National Security Agency	Liston, Robert A.	In this exhaustively researched reexamination of the Pueblo incident, the author comes to a remarkable conclusion: the Pueblo was purposely surrendered in a secret mission planned by the National Security Agency. The operation was the subject of a total cover-up--from the White House, the Pentagon, the Congress, and the American public.
2014.301.014	Nimitz-class aircraft carriers	Elward, Brad A.	Contents: Origins of the supercarrier -- Design and development of the Nimitz class -- The Nimitz carrier structure -- The flight deck -- Aircraft launch and recovery operations - - LSOs and the lens -- The hangar bay -- The island and significant inner structures -- Defensive systems -- Electronic systems and radars -- Integrated air defense -- The Carrier Wing (CVW) -- Propulsion and powerplant -- Operational history -- The carriers -- Nimitz-class

Object ID	Title	Author	Summary
			follow-on : the USS Gerald R. Ford (CVN 78) class. About this book The Nimitz class aircraft carrier is the ultimate symbol of the United States superpower status. A true behemoth, this is an unsurpassed weapons platform that overshadows all of its nearest rivals. A history of the world's largest aircraft carriers, with runways over 300 meters long, this book looks at the development and deployment of the nuclear-powered Nimitz class aircraft carriers from 1975 when the USS Nimitz, the lead ship of the class, was commissioned, to the present day. All of the class are still operational and the tenth and last of the class, the USS George H. W. Bush, was commissioned in 2009. Here, Brad Elward provides a detailed overview of their design and development, highlighting their unique features, from jet blast deflectors to cutting edge radar systems, and a history of the Nimitz class in service, from deployment in the Gulf during Operation Desert Storm, through to the enforcement of the no fly zone over Bosnia. Contents INTRODUCTION DESIGN AND DEVELOPMENT: The Development of Nimitz, Design Considerations, Carrier Systems, The Various Subclasses – Nimitz, Roosevelt, Bush, Carrier Air Wings, The Concept of the Carrier Battle Group OPERATIONAL HISTORY The Carriers, Nimitz Carriers in Desert Storm, No-Fly Enforcement and Bosnia Kosovo, Nimitz' Respond to Terror, The Surge Concept SUMMARY OF THE NIMITZ CLASS BIBLIOGRAPHY APPENDICES: A. Carrier Air Wing Assignments and Cruises B. Carrier Commanding Officers and Air Wing Commanders C.

			Carrier Deployment Schedules Paperback; November 2010; 48 pages; ISBN: 9781846037597
2014.301.015	Pertinent Facts about Personal Affairs	USS Midway	Provides family assistance information for families of deployed Midway sailors and forms for the sailor to fill out providing location of will and other important documents. Includes a letter from the C.O. dated 21 April 1972 to family members giving some information on the deployment of the ship and the usefulness of the info contained in the booklet.
2014.301.016	Mains'l Haul, vol. 50, nos. 1&2, Winter/Spring 2014 : Restoration of a Legacy : Swiftboats and Their Sailors	Maritime Museum of San Diego	Presents a condensed history of Vietnam-era Swift Boats featuring personal stories of the men who fought in them. The Navy designated these boats as PCF, Patrol Craft Fast, but they were mostly known by their nickname, Swift Boats.
2014.301.017	History of the Marine Corps Recruit Depot, San Diego, The	MCRD Historical Society	A history of the Marine Corps west coast recruit training facility opened in San Diego in 1921.
2014.301.018	Bartlett's Familiar Quotations	Bartlett, John	From Amazon: BARTLETT'S was in 1855 as a small booklet containing 258 pages of quotes. BARTLETT'S showcases a sweeping survey of world history, from the times of ancient Egyptians to present day. New authors include Warren Buffett, the Dalai Lama, Bill Gates, David Foster Wallace, Emily Post, Steve Jobs, Jimi Hendrix, Paul Krugman, Hunter S. Thompson, Jon Stewart, Elizabeth Kubler-Ross, Barack Obama, Che Guevara, Randy Pausch, Desmond Tutu, Julia Child, Fran Leibowitz, Harper Lee, Nassim Nicholas Taleb, Patti Smith, William F. Buckley, and Robert F. Kennedy. In the classic BARTLETT'S tradition, the book offers readers and scholars alike a vast, stunning representation of those words that have influenced and molded our language and culture.
2014.301.019	Farewell to Connie : San	San Diego Union-Tribune	It was a city within a city. For

Object ID	Title	Author	Summary
	Diego's Aircraft Carrier for 41 Years		41 years, the carrier constellation --home to as many as 5,500 sailors--operated out of San Diego Bay, where its island became part of the city's skyline. More than 160,000 men and women served on "Connie" during a period that stretched from the Vietnam War to the invasion of Iraq in 2003. This short film recounts the history of the ship through the eyes of San Diegans who served on its decks.
2014.301.020	Jewel of the Mall : The World War II Memorial	Brown, Stephen R.	This book is a 90 page full-color photographic book on the WWII Memorial with an introduction by Senator Robert Dole and photography by renowned photographer Stephen R. Brown.
2014.302.001	Target Rabaul : The Allied Siege of Japan's Most Infamous Stronghold, March 1943 - August 1945	Gamble, Bruce	From Amazon: March 1943, Washington, D.C.: Major General George Kenney, commander of the 5th Air Force, begins to formulate plans for Operation Cartwheel—a mission to neutralize Rabaul, Japan's most notorious stronghold, with the use of unescorted daylight bombing raids against the base and the heavily-defended satellite installations nearby. But the undertaking would prove to be anything but straightforward, and the story of Rabaul's destruction remains one of the most gripping of World War II's Pacific Theater. In Target: Rabaul, award-winning military historian Bruce Gamble expertly narrates the Allied air raids against the stronghold: the premature celebrations by George Kenney and Gen. Douglas MacArthur; the bequeathing of authority to Adm. "Bull" Halsey; the unprecedented number of near-constant air battles that immediately followed; the Japanese retreat to Truk Lagoon in 1944; and their ultimate surrender to Allied forces in August 1945. This amazing story, one that profiles the bravery and resolve of the Allies in the horrific Pacific battleground, is the turbulent conclusion to an acclaimed

Object ID	Title	Author	Summary
			trilogy from one of today's most talented nonfiction military authors. Contents: A pirate goes to Washington -- Stepping stones: the Elkton Plan -- New Guinea graveyard -- The heart of darkness -- Lethal moonlight -- Zeamer and Sarnoski -- The big feud -- Wewak -- Hornet's nest - - Primary colors -- The buccaneers attack -- Stormy weather -- Bloody Tuesday -- Redemption for the Pond Lily -- Carrier raid redux -- Ferdinand the bull -- The twisted code -- Transition -- The ace race -- The feeding frenzy -- Fortress rubble -- Island of despair -- Glory.
2014.302.002	Battles of Coral Sea and Midway, 1942 : A Selected Bibliography, The	Smith, Myron J.	From Amazon: In this first book-length, partially-annotated bibliography, Smith provides more than 1,300 citations to the growing literature on these major battles. Materials in seven languages are cited as well as information provided on many of the repositories located in the United States or abroad that have holdings necessary for the continuing reinterpretation of the battles. Following an overview and introduction, the volume contains sections devoted to reference works and sites, general histories, hardware, biography, combatants, and special studies, and separate section for both battles. Access is augmented by author and name indexes. This volume will be a required reference guide for all those concerned with the War in the Pacific and modern military studies.
2014.302.003	USS Attu (CVE-102) - Cruise of the "Little A" - 1944-45	Burrows, E. G. (ed)	This is the U.S.S. ATTU (CVE102), affectionately called by the men who sailed with her the "Little A." For well over a year now her address has been Fleet Post Office, San Francisco, which means little to the folks back home, but to her crew it calls up memories of far ports and distant islands from Espiritu Santo to the gates of Tokyo and war's end. For most they were isles of little

Object ID	Title	Author	Summary
			enchantment, and what will linger longest are the hours of heat and sweat and toiling, the pre-dawn sleepy scramble to General Quarters, the blast of the reveille bugle, and the days upon days of wandering through empty horizonless seas. For we have traveled 100,000 miles and our real address has never been the same for more than a few days at a time. We have our gripes, our beefs against our ship and against the Navy, and we will always argue, because we are individuals and we were born with the right to speak our minds. Many of us have already returned to civilian life, more will be leaving soon, others will go on to new ships and new duties, but we will all agree on one thing: the "Little A" did her job well. Casablanca class aircraft carriers.
2014.302.004	USS Forrestal (CVA-59) - 10th Anniversary Issue - Mediterranean Cruise - 1965-66	None Stated	A pictorial account of the activities of USS Forrestal on its 10th Anniversary Cruise during its deployment from Norfolk, Virginia to the Mediterranean. Port visits included Genoa, Gulfe Juan, Toulon, Malta, Beirut, Athens, Naples and Barcelona. A section includes photos of Replenishment at Sea. Onboard: Carrier Air Wing Eight (CAW-8) VF-74 (F-4B) VMF(AW)-451 (F-8D) VA-83 (A-4E) VA-81 (A-4E) VA-112 (A-4C) VAH-11 (A-3B) VFP-62 Det. (RF-8A) VAW-12 Det. (E-1B) VAW-33 Det. (EA-1F) HC-2 Det. 2014.302.020	Betrayed	Douglass, Joseph D.	From back cover: Over 30,000 American POW/MIA were left behind following WWII, Korea, Vietnam and the Cold War. American officials abandoned the men rather than confront the Communists who held them captive. Betrayed is the story of these war crimes and atrocities as told by a top Communist official who monitored much of the operation.
2014.302.021	Hero of the Angry Sky : The World War I Diary and Letters of David S. Ingalls, America's First Naval Ace.	Rossano, Geoffrey L. (ed)	From cover: This book draws on the unpublished diaries, correspondence, informal memoir and other personal documents of the U.S. Navy's only flying "ace" of World War I to tell his unique story. David S. Ingalls was a prolific writer, and virtually all of his World War I aviation career is covered, from the teenager's early, informal training in Palm Beach, Florida, to his exhilarating and terrifying missions over the Western Front. While Ingall's wartime experiences are compelling at a personal level, they also illuminate the larger, but still relatively unexplored, realm of early U.S. naval aviation.
2014.302.022	USS Enterprise CVA(N)/CVN-65 : The World's First Nuclear-Powered Aircraft Carrier	McKay, David Peter Robert	This book comprehensively describes the spirit, structure, function, and roles of Enterprise and of her sailors and airmen, those special men and women who sparked life into the cold icon. Big E sailed the seven seas for over half a century,

2014.302.025	Just Call Me Frank! : Memories of a Navy Jet Pilot	Hamrick, Frank	Captain Frank Hamrick rose through the ranks, testing and flying 19 different types of transition aircraft for the Navy, names like Panther, Cougar, Fury, Crusader, Marauder, and Vigilante. Flying in the 50's, 60's, and 70's, he caught the leading edge of military jet aviation, and pioneered new ways of approaching aviation safety. Often going head to head with senior officers, and with lessons learned the "hard way." he survived 135 combat missions over North Vietnam as a reconnaissance pilot, flying the almighty RA-5C Vigilante.

	Independence CVA-62 1970-71 Mediterranean Cruise		deployment of Forrestal-class aircraft carrier USS Independence (CV-62)'s Mediterranean cruise from 23 June 1970 to 31 January 1971. Ports of call: Norfolk, VA; Barcelona, Spain; Cannes, France; Naples & Taranto, Italy; Athens, Greece; Malta. Embarked aboard was Carrier Attack Air Wing SEVEN (CVW-7) consisting of VF-102 (F-4J Phantom IIs), VF-33 (F-4J Phantom IIs), VA-65 (A-6A Intruders), VMA-331 (A-4E Skyhawks), RVAH-12 (RA-5V Vigilantes), VAQ-129/VAH-10 Det 62 (KA-3B Skywarrior), VAW-122 (E-2A Hawkeyes), HS-2 (SH-3A Sea Kings).
2014.302.041	USS Independence CV-62 Cruisebook, 1996, "Freedom's Flagship"	McNamara, CDR (coord.)	Pictorial account covering the return from deployment of the Forrestal-class aircraft carrier USS Independence (CV-62)'s in March 1994 through completion of another Indian Ocean deployment in 1995 and a RIMPAC exercise in Hawaii in June 1996. Also included in this period were an earlier RIMPAC exercise and Exercise Cobra Gold in 1995 and monitoring of Chinese missile exercises off the coast of Taiwan in March 1996. The ship was home-ported in Yokosuka throughout the period. President Clinton visited the ship in Yokosuka on 17 April 1996. The CNO also visited in the period. Port calls included Pearl Harbor, Manila, Pusan and Hong Kong. Embarked for the I.O deployment was Carrier Air Wing FIVE (CVW-5) consisting of: VF-154 (F-14A); VF-21 (F-14A); VFA-192 (F/A-18C); VFA-195 (F/A-18C); VA-115 (A-6E and KA-6D); VAQ-136 (EA-6B); VAW-115 (E-2C); VS-21 (S-3B); VQ-5 Det. (ES-3A); and HS-14 (HH/SH-60H/F). CVW-5 was also embarked for the early 1996 operations and consisted of: VF-154 (F-14A); VFA-192 (F/A-18C); VFA-195 (F/A-18C); VA-115 (A-6E and KA-6D); VAQ-136 (EA-6B); VAW-115 (E-2C); VS-21 (S-3B); VQ-5

Object ID	Title	Author	Summary
2014.302.042	USS Independence (CV-62) Final Cruise 1959-1998: The Oldest and Finest	Rule, Donald P. (ed)	Det. (ES-3A); and HS-14 (HH/SH-60H/F) Pictorial account of the Forrestal-class aircraft carrier USS Independence (CV-62)'s final cruise with Carrier Air Wing FIVE (CVW-5) embarked aboard consisting of VF-154 (F-14A Tomcats), VFA-192 (F/A-18 Hornets), VFA-195 (F/A-18 Hornets), VFA-27 (F/A-18 Hornets), VS-21 (S-3B Vikings) , VAQ-136 (EA-6B Prowlers), VAW-115 (E-2C Hawkeyes), HS-14 (SH-60F/H Seahawks), VQ-5 Det 5 (ES-3A Shadows), & VRC-30 Det 5 (C-2A Greyhounds). Ports visited: Yokosuka & Otaru, Japan; Pearl Harbor, Hawaii; Apra Harbor, Guam; Sydney & Perth, Australia; Kuala Lumpur, Malaysia; Singapore; Pattaya Beach, Thailand; Hong Kong; Pusan, South Korea; United Arab Emirates; Bahrain. From page 5 of "History & Tour:" This past year, INDEPENDENCE made a four month "Southern Swing" deployment, covering several major exercises and seven ports of call. Included in these ports of call were two historic port visits. The first was February 28 to the island territory of Guam. Indy was the first aircraft carrier to pull into Guam in 36 years. The second, two months later, was to Port Klang, Malaysia. Indy became the first aircraft carrier in the world to make a port visit to Malaysia. Before sailing back to Yokosuka, Japan, INDEPENDENCE made its last port call of the deployment in May to Hong Kong. Indy's port visit was the last U.S. Naval port visit to the territory before its reversion to China on July 1, 1997. INDEPENDENCE deployed to the Arabian Gulf in Jan. 1998 to support negotiations between the UN and Iraq and to again participate in Operation Southern Watch.

Object ID	Title	Author	Summary
			Today, September 30th, 1998, Independence's commissioning pennant is hauled down 39 years, 9 months and 20 days after it was first proudly hoisted. Adm ??? [sic] speaks of Indy's mighty accomplishments through the years just as Admiral Arleigh "31-Knot" Burke foretold of the protection and service Indy would provide America in his commissioning speech Jan. 10th, 1959.
2014.302.043	USS Siboney (CVE-112) - Mediterranean Cruise - 1953	Ray, M. U. (ed)	Pictorial account of the Commencement Bay-class escort carrier USS Siboney (CVE-112)'s Mediterranean cruise departing from Norfolk, VA on 16 September 1953 and returning in 01 December 1953. Cover has 1954, but we believe that 1954 was the publish date not the cruise date. With Anti-Submarine Squadron 31 (VS-31) flying AF Guardians embarked aboard. Ports visited: Plymouth, England; Algiers; Izmir, Turkey; Naples, Italy; Athens, Greece.
2014.302.044	USS John F. Kennedy (CVA-67) - 1980-81	Agell, Charles W. (ed.)	Pictorial account of the deployment of the modified Kitty Hawk-class aircraft carrier USS John F. Kennedy (CVA-67) to the Mediterranean in 1980-81. She departed Norfolk on 4 August 1980 and returned to Norfolk on 28 March 1981. Ports of call included Toulon, France; Naples, Italy; Barcelona, Spain; Alexandria, Egypt; Haifa, Israel; Palma de Mallorca, Spain; Athens, Greece; Valencia, Spain; and Malaga, Spain. CVG-1 was embarked with: VF-14 (F-14A) VF-32 (F-14A); VA-46 (A-7B); VA-72 (A-7B); VA-34 (A-6E and KA-6D); VAQ-138 (EA-6B); VAW-126 (E-2C); VS-32 (S-3A); and HS-11 (SH-3D). Small coverage given to a yard period at Portsmouth in 1979-80, ORE and Boston OPSAIL '80.

Object ID	Title	Author	Summary
			many air groups the US Navy was hurriedly forming in the aftermath of the Japanese attack on Pearl Harbor. Equipped with Grumman F4F Wildcats, VF-9 first saw combat during the Allied invasion of North Africa in November 1942, where the squadron engaged Vichy French fighters over Morocco. Returning to the United States, VF-9 became one of the first squadrons to receive the Grumman F6F Hellcat and to deploy on the USS Essex, the first of its class of fleet carriers that would form the backbone of the US Navy's Fast Carrier Task Force. VF-9, the Hellcat, and the Essex all entered combat in the fall of 1943. In the hands of the squadron's pilots, and with other Navy fighter squadrons, the Hellcat proved superior to the Imperial Japanese Navy's A6M Zero, which had heretofore been the world's premier carrier fighter plane. Contents - Organisation, Training and First Combat Cruise - Second Combat Cruise - Third Combat Cruise - Appendices Paperback; March 2014; 96 pages; ISBN: 9781782003359 (from ospreypublishing.com)

2014.302.046	USS Saratoga (CV-60), Mediterranean Cruise, 1992	Benesek, George J., Jr. (ed.)	Pictorial account of the deployment of the second Forrestal-class supercarrier, USS Saratoga, to the Mediterranean Sea in 1992. It was the ship's 21st Med deployment. The ship departed Mayport, FL on 6 May 1992 and returned to Mayport on 6 November. Significant operations included enforcing UN sanctions imposed on Yugoslavia in the Adriatic Sea from 24 July. She participated in exercises Poopdeck, Dasix-Lafayette, Eclipse Bravo, Juniper Hawk, and Display Determination. Port visits included Naples, Palma de

2014.302.050	USS Randolph (CVS-15) - Mediterranean Crew's Book - 1967	Patrell, D. M. (ed.)	Pictorial account of the deployment of Essex-class aircraft carrier USS Randolph (CVA-15) to the Mediterranean in 1967. She departed Norfolk in September 1967 and returned to Norfolk in December. It was her last Med deployment. Port visits included, Naples, Barcelona and Gibraltar. CVSG-56 was embarked with VS-24 (S-2); VS -27 (S-2); HS-3 (SH-3D); and VAW-121 Det. (E-1B).
2014.302.051	USS Antietam (CV-36) - 1956	Blair, J. P. (ed)	Pictorial account of the cruise of this Essex-class aircraft carrier to the Mediterranean in 1956. The ship departed Quonset Point, RI on 25 September, and loaded jets at Norfolk before proceeding to the Mediterranean for what was designed as a show -the-flag and extended ASW training cruise. The ASW group, headed by COMCARDIV-18 consisted of Antietam, DESRON 36, AO-143 Neosho and SS-532 Halfbeak. This cruise book is unusual in that group photos of the submarine's crew are included. The group was diverted while in the Atlantic to a SAR mission for a lost Military Air Transport plane. Only a landing gear and a life raft were recovered. Port visits in the Atlantic included Brest and Rotterdam. Med port visits included Piraeus, Taranto and Naples. The cruise (initially planned to last until 31 March 1957) was over with the return to Quonset Point on 21 December 1956 in time for Christmas. Air Squadrons embarked were: VS-31 (S2F-1); HS-1 Det 50 (HSS-1); HS-3 Det. 50 (HSS-1);HS-5 Det. 50 (HSS-1); VF(AW)-4 Det. 50 (F9F-5); VU-6 Unit 5 (drones); and HU-2 Det. 50 (HUP-2).

2014.302.058	Front Burner : Al Qaeda's Attack on the USS Cole	Lippold, Kirk S.	On October 12, 2000, eleven months before the 9/11 attacks, the USS Cole docked in Yemen for a routine fueling stop. At 1118, on a hot, sunny morning, the 8,400-ton destroyer was rocked by an enormous explosion. The ship's commander, Kirk Lippold, felt the ship violently thrust up and to the right, as everything not bolted down seemed to float in midair. Tiles tumbled from the ceiling, and the ship was plunged into darkness, beginning to sink. In a matter of moments Lippold knew that the Cole had been attacked. What he didn't know was how much the world was changing around him. The bombing of the Cole was al Qaeda's first direct assault against the United States and expanded their brazen and deadly string of terrorist attacks throughout the Middle East.

Object ID	Title	Author	Summary
			In this gripping first-person narrative, Lippold reveals the details of this harrowing experience leading his crew of valiant sailors through the attack and its aftermath. Seventeen sailors died in the explosion and thirty-seven were wounded - but thanks to the valor of the crew in the perilous days that followed, the ship was saved. Yet even with al Qaeda's intentions made clear in an unmistakable act of war, the United States government delayed retaliating. Bureaucrats and politicians sought to shift and pin blame as they ignored the danger signaled by the attack, shirking responsibility until the event was ultimately overshadowed by 9/11. "Front Burner" captures a critical moment in America's battle against al Qaeda, telling a vital story that has - until now - been lost in the fog of the war on terror. COMMANDER KIRK S. LIPPOLD was the commanding officer of the USS Cole during al Qaeda's attack in October 2000. Lippold's personal awards include the Defense Superior Service Medal and Combat Action Ribbon, among others. He retired from the Navy in 2007 and remains active in current events and national security affairs. He lives in Carson City, Nevada. (from dust jacket flaps)
2014.302.059	World Super Carriers - Naval Air Power Today	Holmes, Tony	Pictorial account of aircraft and aircraft carriers for United States and France. Aircraft carriers include the USS John F Kennedy (CV-67), USS Coral Sea (CV-43), USS Tarawa (CV-40) and the French carrier Rafale B. Foch.
2014.302.060	Grumman F-14 Tomcat Leading US Navy Fleet Fighter	Jenkins, Dennis R.	In 1994, the US Navy's Grumman F-14 Tomcat appeared to be out of a job. But an amazing thing happened. Instead of quietly fading away, the Tomcat was born again

Object ID	Title	Author	Summary
			through a series of relatively inexpensive upgrades. The Navy currently says that the Tomcat will be gone by 2005.
2014.302.061	Joint Strike Fighter Boeing X-32 vs Lockheed Martin X-35	Sweetman, Bill	This book covers the history leading up to the JSF program, gives detailed descriptions of all versions of each design, and explains the problems and challenges encountered by the competing companies. Color photography and artistic renditions include: JSF tests and evaluations, inside the factory and on the assembly line, cockpit and weapon details, full design coverage of each variant.
2014.302.062	Night Cats & Corsairs	Carey, Alan C.	The threat of enemy aircraft striking American naval forces at night with impunity during World War II led the navy to seek fighter aircraft capable of stopping this threat. Trace the history of radar-equipped night fighter aircraft produced for the US Navy and marine Corps by the American aircraft companies Grumman and Vought before the arrival of jets with nocturnal capabilities. World War II squadrons operated night variants of the Vought F4U-2 Corsair and grumman F6F-3/5N Hellcat while post-war night fighter units were equipped with the Grumman F7F-3N Tigercat and/or Vought F4U-5N/NL. Night Cats and Corsairs never before published color and black and white photographs covering the night variants of the F6F Hellcat, F7F Tigercat, F4U-2 and F4U-5N/NL Corsairs.
2014.302.064	USS Yorktown, Westpac 64 - 65	Blair, J. (ed)	Pictorial account of the Essex-class aircraft carrier USS Yorktown (CVS-10)'s Westpac cruise in 1964-65. She departed San Diego on 22 October 1964 as part of ASW Group 3, and returned on 17 May 1965. She conducted an ORE en route while in the Hawaiian operating areas. This was the first cruise in which she conducted operations in the South China Sea in support of the Vietnam War. The

2014.302.067	Vietnam War Almanac, The	Summers, Harry G. Summers, Harry G. Summers, Harry G. Summers, Harry G.	This book presents an exceptionally wide range of objective information on the war that divided the American people and changed the nature of global politics in the second half of the 20th century. The Almanac consists of three sections: Part I: An introductory history of Vietnam that describes the physical setting of the country and analyzes the significance of Vietnam's historical and physical realities in shaping American policy. Part II: A detailed chronology of military and political events from 1959 to the fall of Saigon. Part III: More than 450 alphabetically arranged articles on the people, battles, weapons, military units, controversial issues and key concepts of the war.
2014.302.068	Hornet : The Inside Story of the F/A-18	Kelly, Orr	The F/A-18 revolutionized airplane design in important ways. Kelly traces the Hornet from its origin in response to the Russian Backfire bomber to its use in the 1986 Libyan raid. The plane that would become America's state-of-the-art strike-fighter faced strong opposition from many factions. The project succeeded despite those heavy odds.
2014.302.069	Vought F4U Corsair, The : A Comprehensive Guide	Morrissey, Rafe	144 pages, color and black/white photographic illustrations, 28 color profiles (side view), 1 page with tail and wing view, line drawings, 1/48 scale plans and section on modelling the F4U. The Corsair remains one of the most distinctive and popular aircraft of World War II, and its unique inverted gull wing design combined with the colourful characters of some of the aces who gained fame flying it in combat has added to its mystique. In addition, the Corsair was used effectively not only by the United States Navy and Marines, but also saw distinguished service in the Fleet Air Arm and the Royal New Zealand Air Force. Thus the Corsair has a multi-national appeal making it one of the ever-popular aviation subjects.

2014.302.070	Rhino : The Immortal Phantom II	Cupido, Joe	(from Amazon.com) Original title 'Rhino' The McDonnell-Douglas F-4 Phantom II - the 'Rhino' - is perhaps the most famous and beloved combat jet of all time; and JOE CUPIDO has been recording examples of this war-proven veteran for some twenty years. In this dazzling gallery of new photographs, never before published, he presents nearly 100 studies of USAF, USN, USMC, ANG and AFRES Phantoms during their last decade of squadron service. Here the most demanding 'buff' will find a wide variety of types, and handsome liveries; the final images of many units which have since disbanded, or retired the Phantom; even a selection of veteran 'MiG-killers' photographed just before their retirement from Air National Guard units. All these aircraft, from veterans of Vietnam to 'Wild Weasels' which fought in the Gulf, are accompanied by highly detailed captions, usually including full airframe and unit histories. This book is a feast of COLOUR, DATA and DETAIL for all true 'Phantom phreaks' who appreciate the unique appeal of an immortal combat aircraft. (from back cover)
2014.302.071	USS Carl Vinson (CVN-70) - Carl Vinson Chronicles, Vol. 15 - 2003	Meeker, LCDR (ed.)	Pictorial account of the deployment of Nimitz-class aircraft carrier Carl Vinson to the western Pacific and Indian Ocean in 2003. The ship departed its homeport of Bremerton on 13 January and returned on 19 September. Port calls included San Diego, Pearl Harbor, Apra Harbor (Guam), Yokosuka, Singapore, Fremantle and Hong Kong. CVW-9 was embarked with: VFA-22 (F/A-18C); VMFA-314 (F/A-18C); VFA-146 (F/A-18C); VFA-147 (F/A-18C); VAQ-138 (EA-6B); VAW-112 (E-2C); VS-33 (S-3B); and HS-8 (SH/HH-60F/H).

2014.302.072	USS Saratoga (CV-60) - MED 80	Thompson, G. A. (ed)	Pictorial account of the deployment of the USS Saratoga (CVA-60) to the Mediterranean. She departed Mayport, Florida on 10 March 1980 and returned on 27 August. She participated in exercises Dawn Patrol and Multiplex 4-80. Port visits included Rota, Palma de Mallorca, Malaga, Naples, Livorno and Tunis. CVW-3 was embarked with: VF-31 (F-4J); VF-103 (F-4J); VA-37 (A-7E); VA-105 (A-7E); VA-75 (A-6E and KA-6D); VS-22 (S-3A); VAW-123 (E-2C); Amittai HS-7 (SH-3H).
2014.302.073	USS Bennington (CVA-20) - Mediterranean Cruise - 1953-1954	Walbridge, Thomas (ed)	Pictorial account of the Mediterranean Sea deployment of the Essex-class aircraft carrier USS Bennington in 1953-54. She departed from Quonset Point, RI on September 16 and returned to the same port on 23 February. She participated in NATO exercise Operation Mariner in the North Atlantic before proceeding to the Med. Ports calls included Palermo, Cagliari, Istanbul, Suda Bay, Phaleron Bay, Genoa, Cannes, Marseilles, Naples, La Spezia, Cannes, Barcelona, Augusta Bay, and Gibraltar. Air Group 7 was embarked with: VF-71; VF-72 (F9F-5); VF-74 (F4U-4); VA-75 (AD-4); VC-4 Det; VC-12 Det; VC-33 Det; VC-62 Det; and HU-2 Det. Includes loose-leaf, probable VIP Public Affairs package with 8x10 glossies and considerable reading material.
2014.302.075	USS Enterprise (CVAN-65) - Yankee Station - 1968	Chapman, John F. (ed)	Pictorial account of the deployment of the USS Enterprise (CVAN-65) from Alameda, CA to the western Pacific. Briefly addresses July 1967 change of command, subsequent yard period at Hunter's Point, workups, Operation Blue Lotus, port visit to San Diego and visit by President LBJ later in 1967. The ship deployed from Alameda on 3 January 1968 and returned on 18 July. The ship conducted air strikes from Yankee Station against

Object ID	Title	Author	Summary
			Vietnam targets throughout. Also occurring on this cruise was the capture of the USS Pueblo by the North Koreans, and a protest against Enterprise's visit to Sasebo. Other port calls were Pearl Harbor, Subic Bay and Hong Kong. CVW-9 was embarked with: VF-92 (F-4B); VF-96 (F-4B); VA-35 (A-6A/B); VA-56 (A-4E); VA-113 (A-4F); RVAH-1 (RA-5C); VAW-112 (E-2A); VAH-2 Det 65 (KA-3B); HC-1 Det 65 (UH-2C); VAW-13 Det 65 (EKA-3B); HC-7 Det 111
2014.302.076	USS Intrepid (CVS-11) - One Hundred and Seventy Years of Naval Tradition 1803-1973 - 1972-1973	Converse, (ed)	Pictorial account of Essex-class aircraft carrier USS Intrepid (CVS-11)'s Mediterranean cruise which began 25 November 1972 and ended in 1973. Includes history of all American ships named "Intrepid." Embarked: VA-45 (A-4E Skyhawks), VS-24 (S-2 Trackers), VS-27 (S-2 Trackers), VS-31 (S-2G Trackers), VAW-121 (E-1B Tracers), VRC-40 (C-1A Traders), HS-5 (SH-3 Sea Kings), HS-11 (SH-3 Sea Kings). Ports of call: Quonset Point, RI; Copenhagen, Denmark; Rotterdam, The Netherlands; Portsmouth & "Greenrock," UK; Barcelona & Palma, Spain; Naples & Genoa, Italy; Cannes, France; Lisbon, Portugal; Athens, Greece. Fighting "I" is on cover.
2014.302.078	US Marine Corps Fighter Squadrons of World War II	Tillman, Barrett	The US Marine Corps has a long heritage of aviation excellence, a reputation that was largely built on the impact and performance of the "flying leathernecks" in the bitter fighting in the Pacific during World War II. As the US island-hopping campaign against Japan gathered pace, US Marine Corps fighter squadrons operating legendary Grumman and Vought aircraft became instrumental in the success of amphibious assaults and in breaking fierce enemy resistance, engaging Japanese attack aircraft in the skies and ground-based targets while supporting and protecting US ground forces. The flying

Object ID	Title	Author	Summary
			legends Marion Carl, Greg "Pappy" Boyington, Joe Foss and others were all World War II Marine fighter pilots, taking to the skies in Corsairs, Wildcats, Venturas and Hellcats. Aviation historian Barrett Tillman's comprehensive account pays homage to these individuals and their mounts, and is packed with historic and organizational details of the squadrons who took to the skies above the Pacific.
2014.302.079	Cold War at Sea : An Illustrated History	Bonner, Kit	From back cover: For the ships of the US and Russian Navies, millions of square miles of open ocean wasn't enough room. Aircraft carriers, guided missile cruisers, destroyers and submarines constantly squared off: monitoring each others maneuvers, intercepting radio transmissions, targeting one another with weapons systems and forcing each other off course. Intelligence was gathered, threats were made, and in a few cases, determination or stubbornness caused collisions between giant warships as neither would give way. We will never again see the sheer quantity of awesome naval power that was afloat during the height of the Cold War. Thousands of men and billions of dollars of hardware played cat and mouse. Armed with massive firepower and nuclear weapons, the potential for finding themselves in a massive sea battle was huge. This was the Cold War at sea. "Cold War at Sea" sails you into a battle of nerve.
2014.302.080	USS Saratoga	Doyle, David	A pictorial history of the USS Saratoga CV-3 from design, to construction, to battle, to appearances on the silver screen and finally to her demise at Bikini Atoll, where she underwent two atomic blasts.

			screen and finally to the sinking of the Lexington on 8 May 1942. Twenty-six officers and 190 crewmen were lost, the balance, 2,735, were saved and would go on to staff the carriers that soon would follow.
2014.302.082	USN Aircraft Carrier Air Units, Vol. 1, 1946-1956	Kasulka, Duane A.	In the immediate post war years the United States Navy was dominated by problems of demobilization, an uneasy international situation, and a re-organization. Demobilization was rapid with the number of aircraft carriers in service reduced from 109 in 1945 to twenty-five a year later, and by the middle of 1950 to nine. The unsettled international situation in vastly separated areas of the world resulted in the formation of Carrier Task Groups to operate in the North Atlantic, Mediterranean and the Western Pacific, providing tangible evidence of America's presence and support for their Allies and the Free World. The first of the international crises was quick in coming as President Truman dispatched US Naval forces to Turkey in March of 1946, responding to a massive build-up of Soviet forces along the Turkish border. The next major US foreign policy test came when French, British, and American air forces provided a massive airlift into the city of Berlin, breaking the Soviet surface blockade of the former German capital. In some respects this period was almost a repeat of the post World War I twenties. Political clamoring for both a separate air force and a merger of all the military services, was satisfied, to a greater or lesser degree, with the creation of the Department of Defense (DOD) in 1947, which combined the three services (the Air Force, Army and Navy) under a single Secretary of Defense. In the Fleet itself, the main problems were the transition to a severely lower force level, the incorporation of World War

Object ID	Title	Author	Summary
			II combat experience, and the introduction of new weapons and technology. Jet aircraft, guided missiles and nuclear weapons, all required great adjustments in plans, organization and tactic. The re-organization created by the DOD and the forced agreements among the three services of their respective missions and roles, coupled with a decreasing military budget quickly flared into open dispute as the services fought each other for a larger share of the limited peacetime funds. This increasing interservice fighting had the underlying effect of stifling naval aviation. This became obvious in 1949 when the Secretary of Defense cancelled the Navy's new super aircraft carrier UNITED STATES which had already been funded and agreed to by the President. This high handed cut at naval aviation forced the Navy to fight both the Air Force and the politicians who charged 'duplication', claiming that Navies had become obsolete and that the aircraft carrier was both too vulnerable and too expensive! The result was an ultimatum placed on the Navy by Congress to develop a nuclear capability without new and larger aircraft carriers or face extinction.
2014.302.083	Marine Muscle : Hornet and Harrier	Halberstadt, Hans	Photo-journalist Hans Halberstradt presents a close-up look at the battle-proven Harrier and Hornet and their missions - with the color, detail and data that are the hallmarks of the WINGS series.
2014.302.085	USS Carl Vinson (CVN-70) - Carl Vinson Chronicles, Vol. 19 - 2012	Reynolds, Erik (ed.)	Pictorial account of the USS Carl Vinson (CVN-70) WESTPAC deployment in 2012. She departed San Diego on 30 November 2011. Ports of Call included Hong Kong; Jebel Ali, UAE; Chennai, India; Perth, Australia and Pearl Harbor. She returned home to San Diego on 23 May 2012. Also included are pictures of Christmas Day, New Year's Day, Morale Day, 5K Fun

There is a volume 2, titled : USS Yorktown : CV-10, CVA-10, CVS-10 : The Fighting Lady's History. This book is in celebration of the 50th Anniversary of the Yorktown (CV-10). This publication provides an insight to the history of the ship from its commissioning to its present day resting place at The Patriots Point Naval & Maritime Museum in Mt. Pleasant, across the harbor from Charleston, South Carolina. USS Yorktown was commissioned on 15

Object ID	Title	Author	Summary
			April 1943. Photos and text describe the battles she engaged in during World War II. The Yorktown was in the picture "Tora! Tora! Tora!" On 27 December 1968 she picked up the three Apollo-8 astronauts after splash down. She began her 14,000 mile cruise to her original home, Norfolk, VA, on 21 January 1969. She spent her final active duty months deployed in the Atlantic as a member of Carrier Division 16 of the Atlantic Fleet. She was decommissioned on 27 June 1970 at Boston Navy Yard. Her name was stricken from the navy's list of ships on 1 June 1973. She was 30 years old.
2014.302.093	USS George Washington (CVN-73), Mediterranean Sea & Arabian Gulf 2002	Dorey, Joseph (ed)	A pictorial account of the 2002 deployment of USS George Washington. The ship departed 20 June 2002 for a six-month deployment. The GW immediately began flight operations while still in the Atlantic Ocean off of Portugal's Azores Islands. The GW supported Operation Enduring Freedom and Operation Southern Watch. Ports of Call included: Souda Bay, Crete; Suez Canal; Jebel Ali, UAE; Suez Canal II; Lisbon, Portugal; Naples, Italy; Koper, Slovenia; Strait of Gibraltar and finally Homecoming on 20 December 2002 to Norfolk, VA. Serving aboard was CVW-17 which included the following squadrons: VF-103, VFA-34, VFA-81, VFA-83, VAQ-132, VAW-125, VS-30, HA-15, and VRC-40.
2014.302.095	Log Book of the USS Saratoga (CVA-60) -- Her Mediterranean Cruise of 1963	Rhodes, P. K. (ed)	Pictorial account of the seven-month deployment of the USS Saratoga (CVA-60) to the Mediterranean. While underway, she served 14,000 meals a day. Ports of Call included: Palermo, Italy; Marseille, France; Genoa, Italy; Paris, France; Venice, Italy; Naples, Italy; Augusta Bay, Italy; Rome, Italy; Capri, Italy; Cannes, France; Athens, Greece; Hannover, Germany; Florence, Italy; Pisa, Italy; Palma de Mallorca, Spain;

			Taranto, Italy; Barcelona, Spain; Istanbul, Turkey; and the final port of call, Gibraltar. Embarked on this deployment is Carrier Air Group Three consisting of the following squadrons: VF-31, VF-32, VA-34, VA-35, VA-36, VAH-9, VAW-12, VFP-62, HU-2,
2014.302.096	USS Bennington (CVA-20) - We're off to the Far East aboard the U.S.S. Bennington - 1955-56	Katz, E. (ed)	Pictorial account of the first Far East (WestPac) deployment of the Essex-class aircraft carrier USS Bennington from 31 October 1955 to 16 April 1956. She departed from New York, made stops at Quonset Pt., RI; Mayport, FL; Trinidad, Montevideo, & Valparaiso in South America; and San Diego, CA before heading out across the Pacific to Hawaii; Yokosuka, Kobe, & Okinawa, Japan; Hong Kong; and Subic Bay in the Philippines and returning to San Diego. Embarked aboard was ATG-201 consisting of VC-33 (AD Skyraiders), VC-4 (F2H Banshees), VC-62 (F9F-5P Panthers (?)), HU-1 (HUP Retrievers), VC-12 (AD Skyraiders), VA-105 (AD4 Skyraiders), VF-13 (F9F-6 (?) Cougars), VA-36 (s), VFP-62 Det.30 "(F2H-2P Banshees), and AJ Savages.
2014.302.097	USS Yorktown : CV-10, CVA-10, CVS-10 : The Fighting Lady, Vol. 2	Stahura, Barbara	This book continues volume 1 which is titled USS Yorktown : CV-10, CVA-10, CVS-10 : The Fighting Lady's Golden Anniversasry History. There are 30 pages of history; 20 pages of special stories by men who served on the Yorktown; 7 pages of U.S.S. Yorktown Assocation Roster; 48 pages of biographies of former crewmen.
2014.302.098	Miramar : The Home of Top Gun	Hall, George	Pictorial account of aircraft that would have been involved with Top Gun at Miramar in San Diego, Fightertown USA. To read a description of Top Gun, The Navy's Fighter Weapons School see Top Gun, also by George Hall, 2004.301.033. Includes photos F-14s; F/A-18s; and F-4s. Includes some names and squadron identifications. There are 14 pages of

Object ID	Title	Author	Summary
2014.302.099	Hell Divers	Forsyth, John F.	pictures on or near aircraft The author flew an SB2C Helldiver for Bombing Squadron 18, the "Sunday Punchers," from the deck of the USS Intrepid. Along with the other pilots and airmen of Air Group 18, he played a part in winning some of the greatest naval air battles of World War II — Coron Bay, Formosa (Taiwan), Leyte, Luzon and many others. This book is a collection of the best combat stories from these battles. Stories of sinking ships, of dogfighting with Zeros, of Kamikaze attacks, of comrades shot down, of those who escaped and made it back and of those who were lost. The action was real and the recollections are vivid. "Hell Divers" brings you the naval air war in the Pacific as it really happened. Author John F. Forsyth flew Helldivers and Corsairs for the US Navy from 1943 to 1945. He was awarded the Navy Cross, the Silver Star, three Distinguished Flying Crosses and four Air Medals. After discharge from the Navy, he attended Harvard Law School, graduating in 1948. He has since practiced Law in the Rochester, New York, and Naples, Florida, areas. (from back cover)
2014.302.100	F8F Bearcat	Doyle, David	The Grumman F8F Bearcat represents the pinnacle of US carrier-borne piston-engine fighter design. Marrying a compact, lightweight airframe with a powerful 18-cylinder Pratt & Whitney Double Wasp radial engine churning out more than 2,000 horsepower produced an aircraft intended to be an interceptor that could operate from the smallest escort carriers. While the Bearcat prototype first took to the air in August 1944, and the first squadron equipped with the new fighters was operational in May 1945, the war ended

Object ID	Title	Author	Summary
			before the Bearcat actually saw combat in World War II. The type would ultimately see combat in the First Indochina War. Visually chronicles this diminutive fighter with ample images and captures the nuances of this famed warbird. Illustrated with 179 photographs (89 vintage black-and-white photos, 13 color photos from the same time period, and 77 further color photos of preserved aircraft) plus five color profiles and 17 detailed line drawings. (From Amazon)
2014.302.101	USS Forrestal (CVA-59) - The Story of a Carrier - 1959-60, Part 1	Kyle, K. L. (ed)	Part 1 covers the summer 1959-summer 1960; Part 2 covers the air group, and Part 3 covers the ship's company. USS Forrestal The Story of a Carrier Part 1, Its concept, Its components 1959-1960. First in its class designed specifically to launch, land and maintain supersonic jet aircraft -- A Mobile Airbase. In July 1955 the largest warship ever built was christened by the widow of Secretary of Defense, James Vincent Forrestal, as part of his hope of Power for Peace. She was in the Egyptian crisis and left for the Mediterranean on her first deployment with the Sixth Fleet as an ambassador of good will to all the countries she visited. She had open house in Oceana, VA, then on to Gitmo Bay, with Ports of Call at Nice, Naples, Istanbul, Athens, Beirut, Jerusalem, Cannes, Split, Capri, Genoa, Venice - Milan, Valencia, and Barcelona returning the Summer of 1960.
2014.302.102	USS Forrestal (CVA-59) - The Story of a Carrier - 1959-60, Part 2	Kyle, K. L. (ed)	Part 1 covers the summer 1959 through the summer 1960; Part 2 covers the air group, and Part 3 covers the ship's company. USS Forrestal (CV-59) Part 2 The Story of a Carrier covers the air group CVG-8 which includes: VFP-62 DET 42-60 Light Photographic Squadron

2014.302.104	Grumman F-14 Tomcat	Baker, David	Designed for carrier operations to protect the fleet from incoming hostile aeroplanes, the Grumman F-14 Tomcat is regarded as one of the finest air superiority fighters in the world. Fast, manoeuvrable and well armed, it is capable of flying at over Mach 2, its swing wing enabling it to operate safely from carrier decks. This book tells the story of this aeroplane from the design, development and operational life of the F-14, to the political gameplay that surrounded its beginnings.
2014.302.105	Naval Anti-Aircraft Guns and Gunnery	Friedman, Norman	From Amazon: This book does for naval anti-aircraft defense what Friedman's Naval Firepower did for surface gunnery - it makes a highly complex but historically crucial subject accessible to the layman. It traces the growing aerial threat from its inception in WWI and the response of each of the major navies down to the end of WWII, highlighting in particular the underestimated danger from dive-bombing. The work considers what effective AA fire-control required, and how well each navy's systems actually worked, analyzing the weapons, how they were placed on ships, and how this reflected the tactical concepts of naval AA defense. All important guns, directors and electronics are represented in close-up photos and drawings, and lengthy appendices detail their technical data. It is, simply, another

Object ID	Title	Author	Summary
			superb contribution to naval technical history by its leading exponent.
2014.302.106	Marine Air : The History of the Flying Leathernecks in Words and Photos	Dorr, Robert F.	Military historian, Robert F. Dorr, presents the first fully illustrated, oral history of the Marine Air Wing--and give the Flying Leathernecks the recognition they deserve. From World War I through World War II, the Korean Conflict, Vietnam, from Grenada to Panama to Desert Storm, from Operation Enduring Freedom to Operation Iraqi Freedom, Marine Air's world-class pilots continue to rule the skies.
2014.302.107	Heliborne : USMC Helicopter Assault	Debay, Yves	Be it Grenada or the Lebanon, Vietnam or Panama, the US Marine Corps has always formed the spearhead of the American military machine. To perform its bridgehead role the Marines rely heavily on the helicopter. The art of heliborne assault has been perfected using such types as the ubiquitous CH-46 'Frog' and the behemoth CH-53 Sea Stallion. Along with these main players in the 'troop trucking' role, the small, shark-like, AH-1 Sea Cobra (SeaCobra) has proven to be a tough 'jungle fighter' when its awesome fire-power has been called into play.
2014.302.108	USS Theodore Roosevelt (CVN-71) - Volume 4 - 1991-1993	Graybeal, James W. (ed)	A pictorial account of the deployment of the USS Theodore Roosevelt (CVN-71) from Norfolk, Virginia March 11, 1993 to the Mediterranean for 184 days and return to Homeport of Norfolk. Relates the experiences of USS Enterprise SBD dauntless dive bombers and their pilots from the attack on Pearl Harbor to the Battle of Midway and covers all dive bombers in the Battle of Midway.
2014.302.117	Black Knights Rule : A Pictorial History of VBF-718/VF-68A/VF-837/VF-154/VFA-154	Romano, Angelo	A history of the Black Knight fighter squadron from its inception in 1946. Includes deployments and air wings and carriers to which assigned.
2014.302.118	Hell-diver's Vengeance	Buchanan, Buck	Th experiences of Jim "Buck" Buchanan during World War II. He was at Pearl Harbor, he flew the J2F Grumman Duck, he was a radio operator in a Sikorsky JRS-1, he disagreed with the Secretary of Navy's assessment of the Pearl Harbor damage; he flew patrols in a PBY; talks about the Battle of Midway and Yamato targeted; he was sent to naval flight school, but never received his wings; served with Bomber Fighter Squadron Ten, VB-10; his squadron served aboard the USS Intrepid, CV-11 in 1944 with Captain F. Bolger who would later be the first CO of the Midway; bombing Okinawa; bombing Japanese fleet; bombing of the Yamato, and contains conversations with Mitsuo Fuchida.
2014.302.119	USS Independence CVL-22	Wiper, Steve	Monograph: The fourth USS Independence (CVL-22) (also CV-22) was a United States Navy light aircraft carrier, lead ship of her class and served during the Second World War.
2014.302.120	USS Shangri-La (CV-38) - Shangri-La to Bikini - 1944-46	Hines, E. G. (ed)	Pictorial account of the history of the USS Shangri-La (CV-38) in the period starting with her launching on 24 February 1944 at the Norfolk Navy Yard through 15 September 1946. In a prologue the author briefly recounts Doolittle's raid on Tokyo early in the war. Fitting, as the ship's sponsor was Mrs. James F. Doolittle. The ship was commissioned on 15

Object ID	Title	Author	Summary
			September 1944. Her workups included the first ever carrier landing and takeoffs by P-51, F-7F and B-25 aircraft. She departed Norfolk for Pacific war duties on 17 January 1945 with Air Group 85 embarked. She transited the Panama Canal and spent five days in San Diego before heading west across the Pacific. She arrived at Ulithi Lagoon on 20 April. She participated in combat operations off Okinawa, Kyushu, the Ryukus and Honshu. She entered Tokyo Bay on 16 September 1945 before returning to the U.S. west coast via Okinawa. She arrived in San Pedro on 22 October 1945, Navy Day. Christmas was spent in Bremerton, WA. After a yard period there she returned to Norfolk and F-7F Tigercat landing trials. Soon she was ordered to prepare for Operation Crossroads at Bikini Atoll. She again proceeded to San Diego via the Panama Canal and spent the months of April/May 1946 conducting trials with aerial drones. She departed San Diego with a deck load of drones on 21 May bound for Roi Island, the main base for the Bikini tests. An extensive account of the development of the atomic bomb and the Bikini tests is included. Shangri-La departed Kwajalein on 2 August 1946 for the mainland U.S. Other ports visited included Cristobal, Balboa, Seattle, and Pearl Harbor. This book was written by a professional, incorporating Navy/government photography in addition to ship's photos. It is a marvelous record of the late phases of the Pacific war and the Bikini Atoll atomic bomb tests. Great combat and atomic test photography. Includes a 4 1/2 page foldout photo of the ship and crew at North Island in 1946.
2014.302.121	USS Hoggatt Bay (CVE-75) - The Story of - 1944-46	None Stated	Pictorial account of the life of the USS Hoggatt Bay from commissioning in Astoria, WA on 11 January 1944 to being

Object ID	Title	Author	Summary
			placed in reserve in Boston in June 1946. A textual history of the ship is provided in the first few pages. The ship initially deployed to the southwest Pacific from San Diego on 1 May 1944 with Composite Squadron 14 embarked. The ship and its screen of destroyers provided protection of fleet units from submarines and harassing surface combatants. The ship supported a number of invasion forces, nearly continually under threat from suicide plane attacks. In early 1945 the ship returned to San Diego for refitting as a flagship. In April, with COMCARDIV 23 embarked, the ship got underway for Pearl Harbor and Saipan. At Saipan she embarked Composite Squadron 99 and proceeded to support of the Okinawa invasion. After Okinawa and a rest at Leyte the ship was order to Adak. While en route to Adak the Japanese surrender was effected, and the ship became part of the occupation force for Hokkaido. On completion of that mission the ship called at Tokyo Bay for liberty. The ship then sailed for San Francisco/Richmond, embarking passengers at Guam. At Richmond it was fitted out with 704 bunks on the hangar bay for Operation Magic Carpet. It made two more rounds trips to the western Pacific to bring returning servicemen back to the U.S. She sailed from San Diego to the east coast via the Panama Canal on 11 February 1946. After discharging cargo in Norfolk Haggatt Bay proceeded to Boston where it was placed in reserve.

2014.302.122	USS Essex (CVS-9) - Fighten'est Ship in the Fleet - Her Men 1960-61	Woodlief, Frank L.	Pictorial account of aircraft carrier USS Essex (CV-9)'s 1960-'61 Mediterranean cruise, starting with her conversion to a ASW Support Carrier at New York Naval Shipyard in Brooklyn, NY, then departing for her new home port at Quonset Point, RI as CVS-9. Her Fall deployment schedule was as follows: Operation

2014.302.128	USS Princeton (CVS-37) - Far East Cruise - 1958	Goertz, Jerome J. (ed)	VAW-12 Det. (WF-2) HC-2 Det. (HUP-3) Pictorial account of the deployment of the 1958 USS Princeton (CVS-37) to the Far East. She departed San Diego? or Alameda on 19 June 1958 and returned on 2 December 1958. Ports of call and items of interest: reclassified CVS in January of 1954 for the next five years she would be a Hunter Killer (HUK) ship (antisubmarine warfare); wives' cruise; lots of pictures of HUK exercises; Hawaii; Mr. Magoo cartoons throughout; Yokosuka, Japan; Kamakura, Japan; colorful pictures of Japanese stage shows; Okinawa; Philippines; mongoose fights; Hong Kong; Osaka; Kyoto; Sasebo; includes two pages of Miss Princeton and her cortege; Mrs. Princeton and her Cortege; a page of cartoons of CAT officer; a page of cartoons of LSO; Dear John letter; pinup girls; Secretary of the Navy (SecNav) visits; 8,000th landing picture; the last 20 pages give a roster of the men by department and includes their home town. Onboard: Carrier Division Fifteen (CarDiv-15) HS-4 (HSS-1) VS-23 (S2F-1, S2F-2)
2014.302.129	Afternoon of the Rising Sun : The Battle of Leyte Gulf	Friedman, Kenneth I.	From Amazon: It was the greatest battle in naval history with over 250 vessels involved. Yet its outcome depended on the heroism of a handful of sailors and the nerve of the opposing commanders: one kept his nerve while the other lost his. From dust jacket: The Battle of Leyte Gulf was the greatest battle of naval history. It marked the last chance the Imperial Japanese Navy would have during World War II to destroy a substantial portion of America's Pacific Fleet. The fate of hundreds of thousands of American soldiers and sailors hung in the balance. What resulted was the end of

Object ID	Title	Author	Summary
			Japan's formerly invincible Combined Fleet. Author Friedman has written a comprehensive account of this crucial battle.
2014.302.130	First South Pacific Campaign, The	Lundstrom, John B.	From Amazon: On May 7 and 8, 1942, fast carrier task forces from the United States and Imperial Japanese met in combat for the first time in the Battle of the Coral Sea. A strategic victory for the U.S. despite the loss of the carrier Lexington, the battle blunted the Japanese drive on Port Moresby, a valuable Allied air base on the island of New Guinea. Lundstrom offers a detailed analysis of the fundamental strategies employed by Japan and the U.S. in the South Pacific from January to June 1942, the efforts of Adm. Ernest J. King to reinforce the area in spite of Roosevelt's Europe First grand strategy and Adm. Chester Nimitz's aggressive plans to fight in the Coral Sea. Now in paperback, The First Pacific Campaign provides a superb overview of the crucial first six months of the naval war in the South Pacific.
2014.302.131	American Attack Aircraft Since 1926	Johnson, E.R.	"This book provides a concise historical survey of the various types of aircraft used by the United States Army, Air Force, Navy, and Marine Corps to accomplish aerial attack missions since 1926. The text covers four types of fixed-wing aircraft: designated attack aircraft; light, medium, and tactical bombers; fighter-bombers; and adapted attack aircraft"--Provided by publisher.
2014.302.132	Digital Preservation for Libraries, Archives and Museums	Corrado, Edward M.	From Amazon: Digital Preservation in Libraries, Archives, and Museums represents a new approach to getting started with digital preservation: that of what cultural heritage professionals need to know as they begin their work. For administrators and practitioners alike, the information in this book is

Object ID	Title	Author	Summary
			presented readably, focusing on management issues and best practices. Although this book addresses technology, it is not solely focused on technology. After all, technology changes and digital preservation is aimed for the long term. This is not a how-to book giving step-by-step processes for certain materials in a given kind of system. Instead, it addresses a broad group of resources that could be housed in any number of digital preservation systems. Finally, this book is about "things (not technology; not how-to; not theory) I wish I knew before I got started." Digital preservation is concerned with the life cycle of the digital object in a robust and all-inclusive way. Many Europeans and some North Americans may refer to digital curation to mean the same thing, taking digital preservation to be the very limited steps and processes needed to insure access over the long term. The authors take digital preservation in the broadest sense of the term: looking at all aspects of curating and preserving digital content for long term access. The book is divided into four parts based on the Digital Preservation Triad: Situating Digital Preservation, Management Aspects, Technology Aspects, and Content-Related Aspects. The book includes a foreword by Michael Lesk, eminent scholar and forerunner in digital librarianship and preservation. The book features an appendix providing additional information and resources for digital preservationists. Finally, there is a glossary to support a clear understanding of the terms presented in the book. Digital Preservation will answer questions that you might not have even known you had, leading to more successful

2014.302.133	USS Arizona	Doyle, David	digital preservation initiatives. From Amazon: With the USS Arizona, Squadron launches a new series of nautical books Squadron at Sea. Packed with rare photographs unearthed from sources throughout the country, USS Arizona follows the history of one of America s most iconic naval vessels. View her keel laying under the watchful eye of (then) Undersecretary of the Navy, Franklin D. Roosevelt in 1914, follow her construction and commissioning in 1916, her service escorting Woodrow Wilson to the Paris Peace Conference in 1918, her roles as a cruise ship for President Herbert Hoover in 1931 and as a location for filming a Hollywood movie in 1934. Glimpse the life of the crews that manned her and follow her through the maintenance and refits that dramatically changed her appearance. A shocking seldom-seen color photograph records the horrific explosion that ripped through her hull on the dark morning of 7 December 1941, and a series of unique photographs document the years of wartime salvage work aboard the sunken battleship. Chronicled too is Arizona s ongoing service as a tomb and memorial to the 1,177 men who perished with her. Like this striking volume on the USS Arizona, the new Squadron at Sea series books each focuses on a single vessel, examining it in detail from conception through various refits and on to final disposition, whether that be loss at sea, scrapping, or preservation as a memorial. Through 288 photographs, five detailed line drawings, seven color illustrations, and 120 pages, the Arizona and her men are brought to you as you have never seen them before.
2014.302.134	F4U Corsair in Action	Sullivan, Jim	From Amazon: Now updated and expanded, Squadron s just released new edition of the F4U Corsair in Action includes 53 exciting new photographs in

Object ID	Title	Author	Summary
			16 all new, additional pages. Bringing to mind the exploits of Pappy Boyington and his Blacksheep Squadron and Tommy Blackburn with the Jolly Rogers, the Corsair is among the most formidable U.S. fighters of World War II. The F4U maintained a kill ratio of 11:1 according to the United States Navy and went on to serve American forces in Korea, holding its own in the early years of the jet age. The Corsair was first conceived as a high-speed, high-altitude fighter for the Navy in 1938 when Chance Vought's design team drew up plans for a fighter with a 1,800 h.p. engine and a huge 13-foot propeller. The Corsair's famous inverted gull wing design was introduced to allow prop clearance. Handling problems delayed the aircraft's deployment aboard carriers, but Marine Corps pilots quickly took to the powerful, rugged fighter and VMF-124, the first Marine squadron to fly the Corsair in combat, also produced the first Corsair air ace, Kenneth A. Walsh, by the summer of 1943. A total of 12,571 Corsairs were built between 1940 and 1952, most of them by Vought, but hundreds by Goodyear and Brewster as those companies assembly lines had to be pressed into service to meet soaring demand for the remarkable aircraft. Jim Sullivan's exhaustive volume surveys the history of the Corsair from its first prototype to the restored warbirds that have continued to delight air show audiences down to the present day. Illustrated with 229 photographs, plus color profiles and detailed line drawings.
2014.302.135	USS Hornet (CVS-12) - Westpac Cruise - 1963-1964	Bennett, R.A. (ed).	Pictorial account of Hornet's 1963-1964 WESTPAC deployment. The ship departed Long Beach on 10 October of 1963 and returned to Long Beach on 15 April 1964. Port visits included Hawaii, Yokosuka, Iwakuni, Sasebo, Kobe and Hong Kong.

Object ID	Title	Author	Summary
			Squadrons aboard included: VS-35 (S-2D), VS-37 (S-2D), HS-2 (SH-3A), VAW-11 Det. N (EA-1E), VMA-214 Det. N (A-4B)
2014.302.136	USS Abraham Lincoln (CVN-72) - Operation Enduring & Iraqi Freedom - 2008	Irwin, Dennis (ed.)	Pictorial account of the Westpac and Indian Ocean deployment of the USS Abraham Lincoln (CVN-72) in 2008. The ship departed its homeport of Everett, WA on 13 March and returned to Everett on 12 October. Initially, the carrier proceeded to San Diego to load its airwing, and then headed west. While in the Northern Arabian Sea the ship participated in operations Enduring Freedom and Iraqi Freedom. Port visits included Pearl Harbor, Singapore, Jebel Ali and Pattaya. Highlights included a CNO visit, Crossing the Line ceremonies, a Steel Beach picnic, a Chief Pinning, and a Tiger Cruise from Hawaii to San Diego. CVW-2 was embarked, with: VFA-2 (F/A-18F); VFA-137 (F/A-18E); VFA-151 (F/A-18C); VFA-34 (F/A-18C); VAQ-131 (EA-6B); VAW-116 (E-2C 2000); HS-2 (SH/HH-60F/H); and HSL-47 Det. (SH-60B).
2014.302.137	Cruise Book Mindoro	None Stated	A pictorial account of the deployment of USS Mindoro (CVE-120) to the Mediterranean Sea in 1950. Also included is a preliminary visit to Quebec, Canada. The ship departed its homeport of Norfolk on 9 July and conducted a call at Quebec, after which the ship returned to Norfolk. It departed Norfolk on 2 September for the Med, returning to Norfolk in November. Med port calls included Villefranche, Naples, Brindisi, Augusta and Palermo. VS-22 was embarked, as was COMCARDIV-16 On the trip to the Med the ship transported 36 Army P-51 Mustangs in addition to its own SB2C Helldivers. One highlight was the visit to the ship by Errol Flynn's wedding party. A letter from Walt Disney productions is part of the book. The letter

2014.302.142	Douglas AD/A-1 Skyraider, Part One	Ginter, Steve	From Wikipedia: The Douglas A-1 Skyraider (formerly AD) was an American single-seat attack aircraft that saw service between the late 1940s and early 1980s. The Skyraider had a remarkably long and successful career; it became a piston-powered, propeller-driven anachronism in the jet age, and was nicknamed "Spad", after the French World War I fighter. It was operated by the United States Navy (USN), the United States Marine Corps (USMC) and the United States Air Force (USAF), and also saw service with the Royal Navy, the French Air Force, the Air Force of the Republic of Vietnam (VNAF), and others. In U.S.

2014.302.149	USS Kitty Hawk (CV-63) 2003-2004	Cichonowicz, Todd (ed.)	Pictorial account of the activities of the Yokosuka, Japan-homeported USS Kitty Hawk in the period from about February 2003 to about September 2004. In this period the ship delivered air strikes against Iraqi targets in conjunction with Operation Iraqi Freedom, underwent a DSRA in Drydock #6, Yokosuka, and participated in complex fleet exercises including Summer Pulse 2004. Port visits included Guam, Singapore, Hong Kong, Pusan and Perth. CVW-5 with various elements was embarked during the operational periods. Squadrons addressed in the cruise book are: VRC-30 (C-2A) ; VFA-27 (F/A-18C); VFA-192 (F/A-18C); VFA-195 (F/A-18C) ; VAQ-136 (EA-6B); VAW-115 (E-2C); VS-21 (S-3B); and HS-14 (HH/SH-60H/F). Other embarked staffs were CSG-5 and DESRON-15. Operation Iraqi Freedom, 2003-2010. RENAMED Operation New Dawn in 2010. USE Iraq War, 2003-2011.
2014.302.150	American Flying Boats and Amphibious Aircraft : An Illustrated History	Johnson, E. R.	This work is a comprehensive, heavily illustrated history of the many flying boats and amphibious aircraft designed and built in the United States. It is divided into three chronological sections: the early era (1912-1928), the golden era (1928-1945), and

Object ID	Title	Author	Summary
			the post-war era (1945-present), with historical overviews of each period. Within each section, individual aircraft types are listed in alphabetical order by manufacturer or builder, with historical background, technical specifications, drawings, and one or more photographs. Appendices cover lesser known flying boat and amphibian types as well as various design concepts that never achieved the flying stage. Contents: The early era, 1912-1928 -- The golden era, 1928-1945 -- The post-war era, 1945-present -- Lesser known flying boats and amphibians -- Flying boat and amphibian design concepts -- Three glossaries -- Aeronautical terms and abbreviations -- Military terms and abbreviations -- Military aircraft nomenclature.
2014.302.151	Torpedo : The Complete History of the World's Most Revolutionary Naval Weapon	Branfill-Cook, Roger	This is a book about the history of the torpedo. The torpedo was the greatest single game-changer in the history of naval warfare. For the first time it allowed any small, cheap torpedo-firing vessel--and by extension a small, minor navy--to threaten the largest and most powerful warships afloat. The traditional concept of seapower, based on huge fleets of expensive capital ships, required radical rethinking. Contents: Part I. The Inventors and their torpedoes, successful and imaginative. Robert Fulton and his infernal devices, 1804-1813 - - Fulton's legacy -- Der Ku"stenbrander, the inspiration for Whitehead, and others -- Whitehead and the copies -- The serious rivals, the dead ends, the hopefuls and the hopeless -- The torpedo comes of age -- Aerial torpedoes -- The modern torpedo post-Second World War --

Object ID	Title	Author	Summary
			Part II. Torpedo Launchers and Delivery Systems. Spar torpedo boats, drop collars, launch troughs and rails -- Torpedo boat carriers -- Above-water torpedo tubes -- Underwater tubes on surface ships -- Submarine torpedo launching gear -- Torpedo bombers and stand-off weapons -- Coast defence -- Part III. Anti-Torpedo Defence. Active defence -- Passive defence -- Modern developments -- Part IV. Notable Torpedo Actions and Incidents. Torpedo attack tactics -- Early torpedo actions -- The Great War -- The Second World War - the North Sea, Mediterranean and Atlantic -- The Second World War - the Pacific -- Post-Second World War -- Conclusion.
2014.302.152	Saratoga Story, The; USS Saratoga (CVA-60) 1952-56	Bryant, L. D. (ed.)	Pictorial account of the keel-laying, construction, christening, commissioning and initial shakedown cruise of the USS Saratoga. The keel was laid on 16 December 1952 at the New York Naval Shipyard. Christened/launched on 8 October 1955 and commissioned on 14 April 1956 she was the second unit of the Forrestal Class supercarrier. Sea trials commenced on 2 June. On completion of sea trial she headed to Norfolk. Shakedown commenced on 24 October. The intensive training period was interspersed with liberty at Guantanamo Bay, Cuba and Port au Prince, Haiti, returns to Norfolk and stops at Mayport to onload/offload aircraft. A change of command took place on 1 DEC in Norfolk. By Christmas Saratoga had returned to New York, the families of the crew, and a post-shakedown drydock period.
2014.302.154	Vought F4U Corsair	D'Angina, James	In this comprehensive technical study, the author explores the Corsair's design, development, and distinguished combat

Object ID	Title	Author	Summary
			history to reveal why this aircraft was one of the best of its era. This is the definitive guide to a plane that swept opposition from the skies over the Pacific, produced the US Navy's only ace of the Korean War, and fought in the last piston-engined dogfights in history during the 1969 El Salvador-Honduras "Soccer War."
2014.302.155	F-8 Crusader vs MiG-17 : Vietnam 1965-72	Mersky, Peter B.	Revered by Naval Aviators as the 'last of the gunfighters' due to its quartet of Colt-Browning Mk 12 20 mm cannon (its great naval rival, the F-4 Phantom II, was exclusively armed with missiles) , the F-8 Crusader enjoyed great success against VPAF MiG-17s during the Rolling Thunder campaign of 1966-68. The fighter was credited with 18 kills, 14 of which were MiG-17s. Things did not go all the Crusader's way, however, as North Vietnamese pilots used the MiG-17's unequalled low-speed maneuverability, small size and powerful cannon armament to take the fight to their gun- and missile-equipped foes. The VPAF pilots claimed ten F-8s and one unarmed photo-reconnaissance RF-8 shot down, although only four of these successes could be matched with known US Navy losses. Nevertheless, the duels fought between these two aircraft were some of the hardest of the war as the Crusader pilots did their level best to defend vulnerable carrier-based attack aircraft striking at targets deep in North Vietnam. This fully illustrated book, featuring photographs, maps and battlescene artwork, reveals the tactics that were developed by pilots on both sides to give themselves the edge in air-to-air dogfights.
2014.302.156	Whitey : The Story of Rear Admiral E.L. Feightner, A Navy Fighter Ace	Mersky, Peter B.	There are several references to the USS Midway on pages: 82-84 (describes carrier quals of the Cutlass on the Midway in July 1951), 91, 119, and 126. There are two pictures of Midway on page 19 of the

Object ID	Title	Author	Summary
			photo section: Lieutenant Commander "Whitey" Feightner, the only man to operate the F7U-1 Cutlass from a carrier, comes aboard Midway, and Whitey taxis past the Midway's Island. From dust jacket: Whitey is the first complete biography of one of the last surviving U.S. Navy World War II Aces. Following a typical American Midwestern boyhood, Whitey Feightner was in the vanguard of the huge group of young men thrust into World War II. Upon receiving his commission and his gold wings, he was assigned to a fighter squadron in the Pacific and soon found himself flying with the likes of Jimmy Flatley and Butch O'Hare. He flew through many of the war's most hectic and dangerous campaigns, such as Guadalcanal and the Marianas, gaining nine official kills. After the war Whitey became a member of the Regular Navy and was assigned to several of the Navy's most secret and action-filled projects at Patuxent River, Maryland.

2014.302.157	Supercarriers, The : The Forrestal and Kitty Hawk Classes	Faltum, Andrew	As the first of the "supercarriers," the USS Forrestal ushered in a new era of naval power when it was commissioned in 1955. Throughout the Cold War and into the uncertain and dangerous world that followed, the first question of senior American leadership in response to a crisis has often been, "Where are the carriers?" This book is a comprehensive historical overview with extensive photos, maps, drawings, and operational detail, including all air-wing deployments. The book covers the Forrestal-class supercarriers and the follow-on ships, which are essential of the same design. There are more than on hundred black and white illustrations and maps covering the

2014.303.001	U.S. Naval Hospital, U.S. Naval Hospitals Corps School, San Diego, California 1919-1958	George, Charlie C. (ed)	A pictorial account of the personnel and services provided by the staff of the U.S. naval Hospital, San Diego and its co-located Hospital Corpsman School. Dedicated to the period from its inception to 1958. A brief history of the facility is provided in the Forward by the Surgeon General of the Navy.
2014.303.002	Principles of Naval Weapon Systems	Payne, Craig M.	This text is intended to serve as an introduction to the underlying science and engineering of weapons used in the naval service. It is a later edition of David Frieden's book published in 1985.
2014.303.003	Guadalcanal Diary	Seiler, Lewis (director)	One of the greatest war movies of all time, combining action-packed, high-caliber battle sequences with quintessential foxhole-buddy camaraderie. Released in 1943, its authenticity and power remain undiminished. The story follows one squad of Marines through the bloody assaults on the Solomon Islands during the opening stages of the war in the South Pacific. There's the tough sergeant (Lloyd Nolan), a cab driver from Brooklyn (William Bendix), a Mexican (Anthony Quinn) and a chaplain (Preston Foster). A battle-weary narrator reads from a diary, commenting on the typical grunt's everyday life, and death. Battles and dates of engagement are named, putting the explosive action into a solid historical context.

Object ID	Title	Author	Summary
			Based on Richard Tregaski's best-selling book, the script is by renowned screenwriter Lamar Trotti, who also wrote the screenplay for the wartime classic "To the Shore of Tripoli." (from slipcase rear)
2014.303.005	Phantom over Vietnam	Trotti, John	In his two separate tours in Vietnam, US Marine Corps pilot John Trotti was uniquely placed to see and experience the war in Vietnam from the war's early and optimistic days during his first tour, to the cynicism found in his second. Remarkably, Trotti is able to bring vividly alive the experience of being strapped into the cockpit of an F-4 Phantom jet and experience every aspect of a mission, from the adrenaline rush of combat to the emotional drama of nursing a badly-damaged fighter out of enemy territory and to safety. (from Amazon.com)
2014.303.006	Macdonald Aircraft Handbook	Green, William	Comprehensive survey of all current combat aircraft serving in the world's air arms or currently under development.
2014.303.007	Sea Power of the State, The	Gorshkov, Sergei Georgievich	Admiral Gorshkov, the creator of the modern Soviet Navy, is widely acknowledged to be Russia's most brilliant naval strategist. In this book Admiral Gorshkov examines in detail the sea power of the state and its importance in the politics and defense of the USSR. Translated from Morskaya moshch gosudarstva, 2nd revised ed.
2014.303.008	Warships Inside Out	Jackson, Robert	Featuring the greatest warships ever to set sail, this book is a highly illustrated exploration of the workings of fifty of the most significant warships from 1858 to the present day. Each vessel is illustrated with detailed cutaway artwork, with labels identifying special features of the interior and exterior. Accompanying this are full-color photographs of key features of each warship. Informative text discusses

2014.305.001	Soviet Warships : The Soviet Surface Fleet from 1960 to the Present	Jordan, John	This new, in-depth study of the USSR's blue water fleet provides a detailed analysis of the new generations of Soviet surface warships - from the Kynda class guided missile carriers of the 1960s to the new nuclear—powered battle-cruiser Kirov. It provides a refreshing, alternative view to the usual over—reactive reading of Soviet naval intentions. Recent Soviet naval developments are viewed here not as an attempt to win control of the sea, but as a persistent drive to counter western sea-power as a force capable of threatening Soviet territory. Jordan argues that the essentially innovatory nature of Soviet ship construction in the post-war period is not, as some analysts have implied, a quality that is admirable in itself, but one that has been made

Object ID	Title	Author	Summary
			necessary by technological developments in the West. In some cases the rapid advances in technology have given the Soviet Navy an edge over their opponents in a particular area of weapon or sensor development; in others, they have merely compensated for years of neglect. In all cases, these advances have been seen by the Soviets as a necessary response to a real, or perceived threat, and not as an attempt to achieve superiority for its own sake. The major classes of Soviet surface ships covered are Kynda, Kashin, Kresta I, Moskva, Kresta II, Krivak, Kara, Kiev, Kirov and the new destroyers Sovremenny and Udalov, each of which has a chapter devoted to it. Complete details of each class are given including design, construction, service career, propulsion, weapons and radar. The strategic thinking behind each new concept is examined, the design shortcomings of each type discussed, and their operational capabilities assessed. In addition to over 150 superb black and white photographs, line drawings of each class are provided with details of fittings and armament. There are also over 30 tables of ship specifications, missiles, guns and aircraft carried by each class. The book is rounded off by Appendices of Soviet ship classification and NATO designations for Soviet equipment. Over 150 illustrations Front Jacket illustration: a patrol ship of the Krivak I class. Back jacket illustration: the largest warship, apart from aircraft carriers, to be built by any country for the last thirty years — the battlecruiser Kirov. ISBN 0-85368-584-3 (from dust jacket flap)

2014.305.002	Sukhoi Fitters in Action	Stapfer, Hans-Heiri	Details the design sequence from Su-7 Fitter A through to Su-22M-4 Fitter K. There is a mix of clear black and white photos with a centerspread of color artwork side profiles. There are many scale plans and scrap sketch views showing significant airframe differences between each marque. The Su-7 takes up the first eighteen pages of the book.
2014.305.003	Tu-16 Badger in action	Bock, Robert	The Tupolev Tu-16 (NATO code name: "Badger") was designed as a strategic bomber - to carry nuclear bombs. It is smaller than the B-52, could carry up to 10 tons of bombs (the B-52 could carry 35 tons). The Badger was retired in 1993 after approximately 1,500 were made. Some versions still are in operation in China. Photos are grainy because the book was published in 1992 before the West got access to color photos; the ones in this book are mostly taken by Western planes that intercepted the Tu-16 Badger, taking pictures from the cockpit during the interception. (adapted from Amazon.com reader review)
2014.305.004	How and Why Wonder Book of Boats and Ships, The	Scharff, Robert	INTRODUCTION: Picture a floating tree; perhaps this was the first boat. Picture a nuclear-powered submarine encircling the world without surfacing. Between these two kinds of water craft, literally hundreds of different types of boats have been developed through the centuries. But we must be careful not to say boat when we mean ship. Such a mistake will mark us as a "landlubber," a shore person, one among millions everywhere. To many people, the differences between a sloop, a cutter, a yawl, a schooner, or a ketch are not clear. This How and Why Wonder Book of Boats and Ships comes to the rescue of everyone as it clarifies the history, lore, uses, and kinds of ships, from the earliest times to the present. There are various ways to

Object ID	Title	Author	Summary
			study ships. What makes them go? Muscle power, wind, steam, electricity, nuclear energy? What are their uses? Commerce, fishing, travel, war, pleasure? What kinds of ships are there? Freighters, cruisers, yachts, whaling factories? What crews are needed? Sailors, captains, stewards and engineers? Whatever the approach, we shall see that the use and control of the sea has always been important to the growth and economic well being of nations. We shall see that the variety of kinds and uses of ships is almost beyond belief. In social studies classes, this How and Why Wonder Book of Boats and Ships will aid pupils in their study of exploration and will show how ships are related to the fortunes of nations in war and peace. In science classes, it will be useful in the study of floating objects and power. It will stimulate all readers to think not only about ships of the past and present, but also about those of the future. Paul E. Blackwood

2014.305.008	Armed Forces of the USSR, The	Scott, Harriet Fast	The eminent authors of this book draw on thousands of Soviet Ministry of Defense publications — only a very few of which have been translated into English — and four years of research in the USSR to portray the fundamentals of Soviet military doctrine and strategy. They fully cover the postwar development of the Soviet military, looking at the high command, each of the five services, combat formations, and supporting agencies, and give a comprehensive account of the Soviet military-industrial complex, military training of Soviet youth, military manpower, mobilization, and the Soviet officer corps. Their discussion of the relationship between the Party and the Armed Forces, based on Soviet data, includes an examination of popular Western myths about internal Soviet military debates and military-Party splits. This up-to-date reference book includes numerous footnotes, tables, figures, and a wealth of other data—all based exclusively on primary sources. Book Club Edition (from dust jacket flap)
2014.305.009	Mutiny : The True Events That Inspired The Hunt for Red October	Hagberg, David	In 1984, Tom Clancy published "The Hunt for Red October," an edge-of-your-seat thriller that skyrocketed Clancy into international fame. The inspiration for that novel came from an obscure report by a United States naval officer of a mutiny aboard a Soviet warship in the Baltic Sea. "The Hunt for Red October" actually happened, and Boris Gindin lived through every minute of it. After decades of silence

Object ID	Title	Author	Summary
			and fear, Gindin has finally come forward to tell the entire story of the mutiny aboard the FFG "Storozhevoy" the real-life Red October. The Soviet Union was deep in the trenches of the Cold War in 1967 when seventeen—year-old Boris Gindin joined the Soviet Navy Eager to serve his country; Gindin rose to the top of his class, then to the rank of senior lieutenant aboard the antisubmarine warship FFG "Storozhevoy." His service aboard that ship would change his life. In the fall of 1975, most of the crewmen of the "Storozhevoy" mutinied. They seized the ship's captain and confined the officers who refused to participate, including Gindin, below deck. Their goal was to send a message to the Soviet people that the Communist government was corrupt and major changes were needed. That message never reached a single person. Within hours, the order was given to destroy the "Storozhevoy." Ship and crew would have perished if not for the heroic acts of Gindin and a few others. Now, with the help of "USA Today" bestselling author David Hagberg, former Senior Lieutenant Boris Gindin relives every minute of that harrowing event. From the danger aboard the ship to the threats of death from the KGB to the fear that forced him to flee the Soviet Union for the United States, "Mutiny" reveals the real-life story behind "The Hunt for Red October" and offers an eye—opening look at the Soviet Union during the height of the Cold War. (from dust jacket flap)
2014.305.010	Bluewater Sailor : The Memoirs of a Destroyer Officer	Sheppard, Don	"Bluewater Sailor," a fascinating tour of the road to becoming a naval officer, chronicles the duty and adventures of a mustang

Object ID	Title	Author	Summary
			junior officer aboard a U.S. Navy destroyer. Don Sheppard is one of the few who have risen through the navy holding every rank and rate from seaman recruit to commander. A thirty-year naval career — from an eighteen-year old enlistee to destroyer commander -- gives Sheppard a valuable insight into the ways of ships, the men who sail them, and what it takes to become an effective leader. The adventure sweeps from Sheppard's enlisted days as an aircrewman, where he relives the terror of a pilot trying for the thirteenth time to land aboard a frozen-decked carrier in a North Atlantic storm, to fighting modern—day pirates off the Formosa Strait. The author describes a harrowing incident where he became the chief engineer and his struggle to wrest control of the engineering plant away from the grizzled chief machinist mate who considered it his private domain. His story ranges from chasing a Soviet submarine at 40 knots to his own brief but action-packed service aboard a submarine. Sheppard's shipboard odyssey culminates in Hong Kong Harbor in 1960 with a massive typhoon nearly leveling the city, as his ship remains on station to fight it alone. "Bluewater Sailor's" personal perspectives on strategy, combat, and leadership make this a must read for anyone interested in the navy and life at sea. (The author aboard the USS "Cambridqe.") Don Sheppard enlisted in the navy in 1948, rising to the level of executive officer and commanding officer. During his career he earned the Silver Star, Legion of Merit, three Bronze Stars, two Purple Hearts, and many other citations for

2014.305.018	Let the Sea Make a Noise... : A History of the North Pacific from Magellan to MacArthur	McDougall, Walter A.	This study is an account of the rise and fall of empires in the last vast unexplored corner of the inhabitable Earth, an area occupying one-sixth of the globe. The book chronicles 400 years of voyages of discovery, feats of pioneering heroism, engineering marvels, political plots, business chicanery, racial clashes and brutal wars. Walter McDougall lets the people who lived the events interpret them - the American-loving ambassador to Washington on the eve of Pearl Harbor, the Russian builder of the Trans-Siberian railway, a Hawaiian queen from the first period of Western competition for the Islands, the American Secretary of State infamous for his "folly" in purchasing Alaska, a Spanish missionary from the period when it looked like the whole area might have become part of the Spanish realm. From the tropical paradise of Hawaii to the island fortress of Japan, from the frozen wastes of Siberia to the California coastline and into the power centres of London, Washington, Tokyo and St Petersburg, the book offers insights into all the twists and turns of the Pacific empire. Walter McDougall is the author of "The Heavens and the Earth: A Political History of the Space Age." (from Amazon.com) There is a chapter on Pearl Harbor Attack. Also chapters on 'aha iki; Tule Lake and Midway Island 1942; Attu

2014.305.019	Knights of the Sea : The True Story of the Boxer and the Enterprise and the War of 1812	Hanna, David	On a September day in 1813, as citizens watched from the rocky shore of Pemaquid, Maine, two of the last and bravest military sailing commanders engaged in a battle that would change the course of the War of 1812... Samuel Blyth was the youthful commander of His Britannic Majesty's brig Boxer, and William Burrows, younger still, commanded the USS Enterprise. Both men valued honor above all, and on this day their commitment would be put to the ultimate test. Though it lasted less than an hour, the battle between the Boxer and the Enterprise was a brutal contest whose outcome was uncertain. When the cannon smoke cleared, good men had been lost, and the U.S. Navy's role in the war had changed. In Knights of the Sea, David Hanna brings to life a lost era, paying tribute to the young commanders who considered it the highest honor to harness the wind to meet their foes, and would be immortalized by the poet Henry Wadsworth Longfellow. The only major naval battle of the War of 1812, the battle between the Boxer and the Enterprise came to represent not only a military turning point, but a maritime era that would soon be gone forever. INCLUDES PHOTOS AND MAPS (from Amazon.com)
2014.305.029	Pearl Harbor Betrayed : The True Story of a Man and a Nation Under Attack	Gannon, Michael	At last, the full story of the Pearl Harbor attack — a groundbreaking and authoritative reappraisal of the pivotal event that thrust an isolationist nation into war. Object ID	Title	Author	Summary
			President Roosevelt so intent on drawing the nation into World War II that he was willing to sacrifice the Pacific Fleet. Another equally untrue but even more tenacious explanation — the "at dawn they slept" scenario — identifies military incompetence at Pearl Harbor as the reason behind the Japanese tactical victory. After six years of intense research, naval historian Michael Gannon has finally separated fact from fiction to re-create the dramatic events surrounding that fateful December morning when more than 2,400 Americans were killed, eighteen U.S. warships sunk or heavily damaged, and 150 aircraft destroyed. Drawing on largely untapped U.S. and Japanese primary sources — including overlooked or unknown military orders, code intercepts, aide—mémoire, eyewitness interviews, and private correspondence — the author builds a stunning narrative that penetrates a smoke screen of cover-ups, top—level military misdirections, and faulty diplomatic decisions going back to Japan's invasion of China in 1937. We come to understand the paradox that Admiral Yamamoto faced once the architect of this bold strike recognized that a tactical victory at Pearl Harbor would lead inevitably to Japan's defeat. Gannon reveals why the shifting positions of the State Department placed the Pacific Fleet — then no match for the Japanese carriers and aircraft — in harm's way. We learn who was responsible for the ambiguous and misleading warnings delivered to Pearl Harbor months earlier, and why Washington was willing to risk thousands of lives rather than the security of code intercepts when it learned that a Pacific strike was coming.

Object ID	Title	Author	Summary
			We watch in heartbreaking despair as the "warning alert" reaches Oahu after the last attacking plane has departed. Even so, Kimmel's ill-equipped and surprised forces were combat ready, his men heroic. Beyond Washington's inattention and derelictions, there is Navy Secretary Franklin Knox's bland assessment of the attack: "Pearl was not in a state of readiness." Within ten days a kangaroo court, the Roberts Commission, was convened. Instructed in secret by Washington's top brass, the verdict was inevitable — the Pacific commander in chief who was denied reconnaissance aircraft and intelligence available to Washington, would take the fall for an unprepared nation. In "Pearl Harbor Betrayed," Michael Cannon has accomplished what heretofore seemed impossible: He has set the record straight about the most exhaustively examined and debated event in our entire history. MICHAEL CANNON is Distinguished Service Professor Emeritus of History at the University of Florida and the author of "Operation Drumbeat," "Black May," and a novel, "Secret Missions." He lives in Gainesville, Florida. 2014.305.030	With All Our Might : The WWII History of the USS	Langelo, Vincent A.	The USS Boise(CL-47) has been heralded as the most

Object ID	Title	Author	Summary
	Boise (CL-47)		powerful light cruiser in the U.S. Navy during World War II. The navy was impressed enough with her performance to call the Boise a "one-ship fleet." A light cruiser of the Brooklyn class, the USS Boise participated in the invasions of Sicily, Salerno, Guadalcanal, New Guinea, Halmahera Islands, Leyte Island, and Lingayen Gulf. She fought in two night battles, at Surigao Strait and at Cape Esperance. In her shining performance at Cape Esperance she alone sunk three enemy ships and three more with the aid of other ships; at Surigao Strait she disabled the mighty Japanese battleship Yamashiro, at that time the largest in the world, slowing it down for final sinking by the Killen. During the heat of battle, Boise guns performed at an incredible rate of twelve shells per minute per gun, firing every five seconds. With such firepower, and cutting-edge radar technology, the ship couldn't be beat. At war's end, the ship had earned fourteen battle stars and was credited with shooting down seven Japanese planes. Her fame increased when Gen. Douglas MacArthur chose the Boise as his flagship. Author Vincent A. Langelo was aboard the Boise for four years, as radioman and then radio technician in charge of radar, technology was so new that it was classified "secret." Now he reveals how this advanced radar equipment turned the Boise into an unbeatable ship. Vincent A. Langelo served four years on the USS Boise (CL-47), first as a radioman and then as a radio technician. He graduated from the National Radio Institute, 1939; U.S. Naval Radio Materiel School, Naval Research Labs, 1945; Brown University (ScBEE), 1950; and University of Pennsylvania (MSEE), 1964.

Object ID	Title	Author	Summary
			For nineteen years Langelo worked in the defense industries as a design and development engineer of radar transmitters for Raytheon, Radio Corporation of America, and the U.S. Naval Electronics Systems Command. He is a life senior member of IEEE, Inc., and has had an amateur radio license (W1 GDI) since 1939. Now retired, Langelo lives in Mendon, Massachusetts. (from dust jacket flaps)
2014.305.031	Imperial Japanese Army and Navy Uniforms & Equipment	Watanabe, Tatsuo	This is the tenth year since I started collecting items from the days of World War II. My collection is getting more complete, thanks to help and support from the nations involved. I am planning to create a private museum in which to display my collection but it will take time. I made this book to show part of my collection. My original idea for this book was to review the period of World War II in Japan. The title was to be "PICTORIAL REVIEW OF WORLD WAR II". When the book was completed I found that most of the book was filled with pictures of uniforms and equipment. I then had to change the title to "IMPERIAL JAPANESE ARMY AND NAVY UNIFORMS AND EQUIPMENT". I must apologize because the content [sic] of the book differs slightly from the title. Also I apologize for some errors, for example some of the rank and insignia were reversed. My collection is not yet large enough but it is growing because of the help, support, cooperation and advice of a great number of people and I certainly wish to say thank you to those people. In World War II many good people were lost in China, in

Object ID	Title	Author	Summary
			the islands of the South Pacific and in Japan. I always think about those people and hope that my collection may help prevent another such war. I will keep working hard to complete my collection and preparing it for the museum. Please continue to advise me as you have in post [sic]. TADAO NAKATA 4—I0, 6-CHOME, UENO, TAITO—KU, TOKYO 110, JAPAN (from dust jacket flap) Japanese title: Dai Nippon Teikoku Riku-Kaigun : gunso to sobi : Meiji Taisho Showa
2014.305.032	Patriots Point : Home for Heroes	Patriots Point Naval & Maritime Museum	Patriots Point is a Naval and Maritime Museum in Charleston Harbor, SC. It is home to the USS Yorktown. Includes historical footage, computer animation and highlights from the many tours available, and a perspective on the Yorktown's participation in World War II. Other museum attractions are the USCGC Ingham, the USS Laffey, the submarine USS Clamagore, the Vietnam Support Base, the Medal of Honor Museum and the Cold War Submarine Memorial.
2014.305.033	Vietnam Story, The	Fowler, Will	After ten years the United States is still trying to come to terms with the war in Vietnam. It first became entangled in the colonial war France was fighting against Ho Chi Minh's troops in the mid -1950s when it sent military advisors and equipment. After the humiliating defeat of the French at Dien Bien Phu the US gradually stepped up their commitment until by 1963 there were some 16,263 advisors in South Vietnam. From about this time the US became deeply involved in the war and the thunder of US artillery and bombing became a part of Vietnamese life. Despite the sophisticated technology and massive materiel advantages,

Object ID	Title	Author	Summary
			the US ground forces were never able to get the better of their Viet Cong opponents. However in 1968 the Tet Offensive, which the North Vietnamese leadership hoped would spark off an armed uprising in the south, proved a setback for the North Vietnamese and the Viet Cong. Not only did they suffer major losses of men and women but they also suffered morale problems and increased desertions. Nevertheless the Viet Cong achieved one propaganda victory during Tet, through the media of television and newspapers they brought the Vietnamese War into the homes of the American people. The diet of images of destruction was horrifying and helped stimulate a forceful anti-war movement. In 1969 a new President, Richard Nixon, was committed to US withdrawal from South-East Asia and after arduous negotiations, interrupted by bombing campaigns against North Vietnam, Cambodia and Laos, agreement was reached on 23 January 1973 and US troops left South Vietnam. However Nixon's ability to support President Thieu's regime was hampered by the Watergate Scandal and US commitments to South Vietnam were whittled away in Congress. Finally in April 1975 an inevitable result of such a policy was the collapse of South Vietnam after a month-long campaign by the North Vietnamese. Vietnam will be remembered as a helicopter war but it will also be remembered as a 'media' war, where the intervention of television reportage is thought by many to have lost the war. The war demonstrated the difficulties the US policy of supporting corrupt anti—communist governments could lead to and fear of repeating that mistake inhibited US

Object ID	Title	Author	Summary
			armed intervention in world conflict for a decade. For Will Fowler "The Vietnam Story" is not just a study of military campaigns and weaponry, it is a human story as well. It is the story of the 'Lifers' and the 18-19 year—old boys who spent 365 days of their life fighting a war against an unseen enemy in a hostile environment far from home. The Vietnam War left them a bitter legacy as well as the peoples of Vietnam, Cambodia and Laos. (from dust jacket flap)
2014.305.034	Price for Peace : From Pearl Harbor to Nagasaki	Moll, James	Steven Spielberg, historian Stephen E. Ambrose and director James Moll bring us a film with firsthand accounts chronicling the unforgettable events in the Pacific Theater of World War II. From the bombing of Pearl Harbor through the American occupation of Japan in 1945, this powerful documentary depicts the strength and courage of America's youth, while examining how these brave men and women dealt with being thrust into this tremendously brutal chapter of world history.
2014.305.035	Iwo Jima : 50 Years of Memories	Henney, Dean M.	This is the story of Iwo Jima, told entirely through the voices of American servicemen who survived the hell that was "Operation Detachment." Interviewed in 1995--50 years after the last shot on Iwo was fired--many of these brave men had never before spoken to anyone about their experiences on "Sulpher Island"--a silence that haunted them for decades. Originally broadcast on PBS stations in 1996, Iwo Jima : 50 Years of memories has been digitally re-mastered with added footage and photographs, including additional maps and archival film not previously available to the public.
2014.305.036	Welcome Aboard! : USS Constellation (CV-64)	USS Constellation	This is a guide to visitors coming aboard the ship. There is a message from the

			commanding officer, a letter from President Ronald Reagan, a list of departments, a message from the Commander Carrier Air Wing Two, pictures of the following aircraft: F-14D Super Tomcat, F/A-18C Hornet, E-2C + Hawkeye, S-3B Viking, EA-6B Prowler, C-2A Greyhound, ES-3A Shadow, SH-60F/HH-60H Seahawk. There is also short paragraphs on Aircraft Launch and Recovery (Catapults, Arresting Gear), and points of interest. The inside back cover has a list of Dos and Don'ts for shipboard safety. The outside back cover has facts & figures about the ship.
2014.305.037	Cap'n Fatso	Gallery, Daniel V.	Fatso Gioninni, the salty sailor of "Now, Hear This!" is at it again! "It would take half the page to do justice to this ferociously funny novel... The imperturbable malice Admiral Gallery uses to spoof everything from the way the Navy is run to the poverty program in an exercise in risible ingenuity. This is one of the most hilarious sugar-coatings over a hard core of fact I have read and if it isn't made into a movie or serves as the nucleus for a TV series, there is no justice!" - Jefferson Parish Times, Metairie, La. "Fatso has the best of weapons - luck, a contagious sense of humor, and an ingenuity which turns sows ears into silk purses." - William J. Lederer "Walter Mitty in a sailor suit." - Admiral Arleigh Burke, U.S.N. (Ret.) "The U.S. Navy doesn't need a whole fleet in the Mediterranean. All it needs is a 70-foot motorized barge - LCU-1124 - commanded by a resourceful boatswain's Mate First Class like Fatso Gioninni." - The New York Times Book Review
2014.305.038	Korean War, The	Hastings, Max	It was the first war we could not win. At no other time since

Object ID	Title	Author	Summary
			World War II have two superpowers met in battle. Now Max Hastings, preeminent military historian, takes us back to the bloody, bitter struggle to restore South Korean independence after the Communist invasion of June 1950. Using personal accounts from interviews with more than 200 vets - including the Chinese - Hastings follows real officers and soldiers through the battles. He brilliantly captures the Cold War crisis at home-the strategies and politics of Truman, Acheson, Marshall, MacArthur, Ridgway, and Bradley-and shows what we should have learned in the war that was the prelude to Vietnam. "Rings true and will surely stand the test of time Max Hastings has no peer as a writer of battlefield history." - Stephen E. Ambrose "Must reading for any American who wants to understand one of the watershed events of the post-World War II period." - Richard M. Nixon "Fair and immensely readable ... a major contribution to more than just military history Max Hastings is among the ablest of the younger generation of British military historians He now illuminates the struggle that changed all perceptions of the post-1945 world." - Alistair Horne Max Hastings is the author of "Overlord" and "Bomber Command" and the coauthor of "Battle for the Falklands." Editor of "The Daily Telegraph," he lives in London, England. (from back cover)

Beyond Survival : Building on the Hard Times--a POW's Inspiring Story

Coffee, Gerald

When life loses its meaning, when suddenly the world is turned upside down, when there's nothing left that resembles life as we've

Object ID	Title	Author	Summary
			known it, where do we find the strength and sustenance to go on? For naval aviator Jerry Coffee and others who were held as prisoners of war in North Vietnam, there was only one choice: to go within. Beyond Survival is a journey into the invincible human spirit that unites heart and mind in a compelling and unforgettable experience. Drawing from his seven years as a POW, Captain Coffee provides timeless lessons that apply to the physical, emotional, and ethical challenges of everyday life. Proving that leadership and creativity are possible in difficult and uncertain circumstances, Captain Coffee offers a message we can draw on in any trying situation. His story demonstrates that conviction must come from within, and in telling that story he touches the place inside of us where growth begins. Beyond Survival is a positive statement about love and commitment in the midst of war and division. It contrasts the cold reality of war, degradation, and torture with the warmth of human connections, inner serenity, and kinship with all of life. It poignantly illustrates that to be stripped of everything that is familiar and by which we identify ourselves leaves us with only what unites us - our human identity. It conveys truths about relationships at every level- with ourselves, with others, with our country, and with our God. Without inflaming the wounds inflicted by America's involvement in Vietnam, "Beyond Survival" explores an issue at the heart of every free society: the willingness of ordinary individuals to maintain a passion for freedom so compelling that adversity strengthens rather than weakens personal resolve in the worst

Object ID	Title	Author	Summary
			of circumstances. Through Gerald Coffee's story you will discover the universal principles of survival and triumph that empower anyone to overcome adversity. Gerald Coffee, considered one of the nation's top speakers, addresses over 125 audiences each year, including many prestigious business and leadership groups. Born in Modesto, California, he joined the Navy in 1957 after graduating from UCLA with a major in business administration. After returning from Vietnam he received his master's degree in political science and then attended the esteemed National Defense University in Washington, D.C. Captain Coffee has earned many military awards and decorations, including the Silver Star, as well as numerous civilian awards. Retired from the Navy since 1985, he now lives in Hawaii. To engage Captain Coffee as a speaker, contact him at 98-1247 Kaahumanu Street, Aiea, HI 96701. "Beyond Survival" can be heard on audiocassettes from Nightingale-Conant Audio, available at book-stores nationwide or by calling 1-800-323-5552. 2014.308.007	So Others May Live : Coast Guard Rescue Swimmers, Saving Lives, Defying Death	LaGuardia-Kotite, Martha J.	This book tells the story of the U.S. Coast Guard's quiet but resolute rescue swimmers. From deep ocean caves on the Oregon coast to the panicked and chaotic streets of post-Katrina New Orleans, here are their stories. These stories are some of the greatest maritime rescues attempted since the program began in 1985. These feats, told through the eyes of the heroes, reveal an understanding of how and why the rescuer, with flight crew assistance, risks his or her own life to reach out to save a stranger. The book covers diverse environments: oceans, hurricanes, oil rigs, caves, sinking vessels, floods, and even Niagara Falls.
2014.308.008	War in the Gulf, Vol. 1 :	Cardin, Paul	This is volume 1 in the War

Object ID	Title	Author	Summary
	Desert Shield		in the Gulf Series. Volume 1 is titled Desert Shield and sometimes titled Weapons of Desert Shield. The other volumes are: Vol. 2 - Desert Storm : the air assault (ca.50 min.) ; Vol. 3 - Desert Storm : the ground assault (ca.50 min.) ; and Vol. 4 - Desert Storm : desert victory (ca. 50 min.). Volume 1 is based on previously classified intelligence information, and it looks at the massive arsenals of the Iraqi armed Forces and the forces based in Saudi Arabia. Specifically in this volume, one of the topics is "What advantages does naval air power offer to the United States forces?"
2014.308.009	Schwarzkopf : How the War was Won	Schwarzkopf, H. Norman	This briefing was given on 27 February 1991 by General Norman Schwarzkopf. The Persian Gulf war was five weeks of intensive air assault.
2014.308.010	Twentieth-century America : A Primary Source Collection from the Associated Press, Vol. 4 : The Cold War at Home and Abroad, 1945-1953	Associated Press	Volume 4 of a 10 volume set. This volume covers the Cold War from 1945-1953. The stories are reprinted just as they were originally transmitted by AP to its member newspapers, edited occasionally only for consistency of style or for length. Connecting these stories is material written especially for these volumes--Editor's Notes--to place the events in their time and to provide some perspective.
2014.308.011	Unexpected Journey : A Marine Corps Reserve Company in the Korean War	Mills, Randy Keith	A detailed look at one Marine Corps reserve company from Evansville, Indiana that was shipped off to the Korean War, under-prepared for the events to come. Provide a look at Post-WWII America and the Korean War as seen through the eyes of the company members and as told by themselves.
2014.309.001	On Heroic Wings : Stories of the Distinguished Flying Cross, Supplement : Distinguished Flying Cross Society's Roster of Recipients	Lanman, Barry A.	The main book gives biographies of recipients of the Distinguished Flying Cross--an honor given for heroism or extraordinary achievement while participating in aerial flight. This supplement lists the names of all recipients up to January 12, 2012.

Object ID	Title	Author	Summary
2014.310.001	F4U Corsair	Johnsen, Frederick A.	This book is a detailed description of the Corsair fighter plane. It has a large fold out of the Corsair as well as many drawings and a cutaway view. (from dust jacket flaps:) The Vought F4U Corsair was one of the first fighter planes to give the Americans the tactical edge during the war in the Pacific. At a time when the navy's [sic] aging P—40s and Wildcats were too slow and the P—38s too few in number to cope with the maneuverable Zero, the fast, powerful Corsair stemmed the tide of Japanese victories. The Corsair was designed in 1938 in response to the navy's [sic] request for a modern fighter plane that could be launched from an aircraft carrier. It was powered by the massive Pratt and Whitney R-2800 Double Wasp radial engine, generating over 2,000 horsepower, and fitted with a huge propeller more than thirteen feet in length. To ensure that this propeller would clear the ground, a distinctive inverted gull wing was designed, shaped like a V, with the landing gear attached to the low point of the V, in effect raising the aircraft higher off the ground. In addition to the large engine, a fuel tank was fitted in the fuselage forward of the cockpit. This had the effect of putting so much of the airplane ahead of the pilot that forward visibility was impaired whenever the nose was raised, as in takeoff, climb, and landing maneuvers. Though armament varied, the norm was six wing—mounted .50-caliber machine guns and racks for two 1,000-pound bombs or eight 5-inch rockets. The F4U was a hot airplane, with a top speed in excess of 400 mph and a gross weight

Object ID	Title	Author	Summary
			of over six tons, and it could climb to 19,000 feet. This kind of performance made it very effective in combat, but there were problems. Unlike the Grumman Hellcat, a rugged machine that was simple to fly, the Corsair could be a handful for the inexperienced pilot. Poor forward visibility, a landing gear with a serious bouncing tendency, and the tremendous torque of the large engine—propeller combination made certain maneuvers very treacherous, particularly on the deck of an aircraft carrier. More than half of all Corsair crashes were attributable to noncombat causes, and many Corsair squadrons were shifted to land-based operations as a result. Corsairs need no introduction to navy [sic] and marine [sic] aviators. They were widely used in the South Pacific. Their first combat mission was over Guadalcanal in 1943, and they were used in close support of marine ground operations. Corsairs were the aircraft down by the legendary VMF-214 Black Sheep squadron under Major Greg Boyington and navy [sic] squadron VF-17, the "Blackburn's Irregulars," under Lieutenant Commander John T. Blackburn. They were the only aircraft fast enough to provide some defense against kamikaze attacks. In spite of their idiosyncrasies, the fast, powerful Corsairs were not retired at the end of World War II. It took some time for jet aircraft to render them completely obsolete ——— Corsairs played a large role in the Korean War and were widely used by the French in Indochina and during the Suez intervention in 1956. Today these magnificent fighter aircraft are curiosities at air shows, but they will be remembered with respect and affection by those who flew them. About the Author

Object ID	Title	Author	Summary
			FREDERICK A. JOHNSEN began writing and photographing for aviation publications while he was a student at the University of Washington in the late 1960s and early 1970s, where he earned degrees in both history and journalism. He has written and published the well-known Bomber Books, about the B—36, B—29, PB4Y—1 and -2, B-17, P-61, and a pictorial history of the Fifth Bomb Group. He has been a reporter on a daily newspaper; the editor of "Western Flyer," an aviation newspaper; and an aviation museum consulting curator and editor. He is the Wing Historian for the 62nd Military Airlift Wing at McChord Air Force Base, Washington, and is also the curator of the McChord Air Museum.

About the Illustrator

RIKYU WATANABE, dean of aircraft illustrators, was born in 1927 in Osaka, Japan. In 1943 he volunteered for the Japanese Army Flight Cadet School. When the war ended in 1945 he was at an army air-force [sic] base in China. Returning to Japan he studied painting at Bunka Gakuin University, from which he was graduated in 1950. Since then he has become one of the world's leading illustrators. Since 1966 he has specialized in aircraft illustration, thus combining his two careers — pilot and artist — to produce some of the finest aircraft illustrations that have ever been made.

2014.312.001	Grand Scuttle, The : The Sinking of the German Fleet at Scapa Flow in 1919	Van Der Vat, Dan	The Grand Scuttle tells the story of Germany's futile fleet from its misconceived creation by Tirpitz with the Kaiser's blessing to its complete frustration in war, its disgrace by mutiny, the salvation of its morale by an unparalleled act of self-destruction and the unprecedented salvage effort which ensured. For the first time the entire story of these

Object ID	Title	Author	Summary
			wasted ships is told from start to finish in a single narrative based on mostly unused German archive material, eye-witness accounts and the recollections of survivors.
2014.312.002	Hitler's Battleships	Gray, Edwyn	From Amazon: This book looks at the German battleships of World War II. The battleships of Hitler's navy challenged the enemy in the arctic blizzards of the Barents Sea and gave battle amongst the freezing mists and ice-floes of the Denmark Strait. They prowled the convoy routes of the North Atlantic and pushed beyond the Equator on raiding sorties that took them from the inshore waters of Brazil and Uruguay to the coastline of West Africa. One, the "Admiral Scheer", even penetrated as far as the Seychelles in the Indian Ocean. They sank the battlecruiser "Hood" and the carrier "Glorious". They destroyed an impressive number of merchant ships after firstly ensuring that the passengers and crews were safe. And they humbled Britain's naval pride by breaking through the Dover Straits in broad daylight against all the odds. Churchill considered them to be a greater danger to the Empire's seaborne trade than the lurking menace of the U-boats. Yet despite their tactical victories, the strategic threat they posed to the Allies was never fully appreciated by the Nazi leadership. And it was the misfortune of their crews that they were led by a Fuehrer who once admitted: "On land I am a hero. At sea I am a coward". Indeed at one critical point in the conflict Hitler even demanded that the big ships should be demilitarized and scrapped. The "Kriegsmarine's" battleships fought a long, hard, and chivalrous war. The "Graf Spee" sailed for her combat station a full ten days before Hitler's tanks rolled into Poland. And the "Lutzow" was still firing her guns at the advancing Russian troops four days after the Nazi dictator committed

Object ID	Title	Author	Summary
			suicide in his Berlin bunker. Yet, not one of Germany's heavy ships was destined to survive the conflict. Two were sent to the bottom by the guns and torpedoes of the Royal Navy. Three fell victim to the bombs
2014.312.003	Imperial Cruise, The : A Secret History of Empire and War	Bradley, James	From Amazon: In 1905 President Teddy Roosevelt dispatched Secretary of War William Howard Taft on the largest U.S. diplomatic mission in history to Hawaii, Japan, the Philippines, China, and Korea. Roosevelt's glamorous twenty-one year old daughter Alice served as mistress of the cruise, which included senators and congressmen. On this trip, Taft concluded secret agreements in Roosevelt's name. In 2005, a century later, James Bradley traveled in the wake of Roosevelt's mission and discovered what had transpired in Honolulu, Tokyo, Manila, Beijing and Seoul. In 1905, Roosevelt was bully-confident and made secret agreements that he thought would secure America's westward push into the Pacific. Instead, he lit the long fuse on the Asian firecrackers that would singe America's hands for a century. Bradley's first books, <i>Flags of Our Fathers</i> (2000) and <i>Flyboys</i> (2003), were sensationally popular World War II combat stories. His new one, about U.S.-Japanese diplomacy in 1905, represents a departure. Asserting a causal connection between diplomatic understandings reached then and war 36 years later, Bradley dramatizes his case with a delegation Theodore Roosevelt dispatched to Japan in the summer of 1905. Led by Secretary of War William Taft and ornamented by the president's quotable daughter Alice, it sailed while TR hosted the peace conference between victorious Japan and defeated Russia. As he recounts the itinerary of Taft's cruise, Bradley discusses attitudes of social Darwinism and white

Object ID	Title	Author	Summary
			superiority that were then prevalent and expressed by TR and Taft. They modified their instincts, Bradley argues, in dealing with nonwhite Japan, and secretly conceded it possession of Korea. This is what Bradley asserts was a prerequisite to Pearl Harbor in 1941, a dubious thesis when the tensions of the 1930s stemmed from general Japanese aggressiveness, not its control of Korea per se. Bradley does fine on 1905 but falters when predicting the future. --Gilbert Taylor
2014.312.004	Battle of Leyte Gulf 23-26 October 1944, The	Cutler, Thomas J.	The Dramatic Full Story, Based on the latest Research, of the Greatest Naval Battle in History. To describe the Battle of Leyte Gulf as the "greatest of all naval battles" is no exaggeration. The American, Japanese, and Australian ships engaged in the battle numbered 282, and hundreds more were involved in related peripheral operations. Every facet of naval warfare-air, surface, submarine, and amphibious-was involved in this great struggle. The weapons used included bombs of every type, guns of every caliber, torpedoes, mines, rockets, and even a forerunner of the guided missile.
2014.312.005	On Yankee Station : The Naval Air War over Vietnam	Nichols, John B.	Authors describe what it was like to fly combat missions in Vietnam before the fall of Saigon. Included is an analysis of how the US could have ended the war in South Vietnam using conventional weapons. (from back cover of paperback edition:) Combining vivid personal narrative with historical and operational analyses, On Yankee Station takes a candid look at U.S. naval airpower in the Vietnam War. Coauthors John Nichols, a fighter pilot in the war, and Barrett Tillman, an award-winning aviation historian, make full use of their extensive knowledge of the subject to detail the ways in which airpower was

Object ID	Title	Author	Summary
			employed in the years prior to the fall of Saigon. Confronting the conventional belief that airpower failed in Vietnam, they show that when applied correctly, airpower was effective, but because it was often misunderstood and misapplied, the end results were catastrophic. Their book offers a compelling view of what it was like to fly from Yankee Station between 1964 and 1973 and provides important lessons for future conflicts. At the same time, it adds important facts to the permanent war record. Appendixes provide helpful statistical data on carrier deployments, combat sorties, and aircraft losses. "Invaluable reading for all concerned with the role of naval aviation, both during the Vietnam War and in our nation's future." - Sen. John McCain "A blistering indictment of the politicians who squandered lives and treasure on a war they lacked wisdom to win or abandon, and a long-overdue tribute to the courage and determination of the airmen who fought there." -Stephen Coonts, author of Flight of the Intruder "Reading 'On Yankee Station' is much better than having 'been there.' Readers will understand the war and our nation's future." -Robert Shaw, author of Fighter Combat "A major addition to serious literature on the war and a fine collaboration between a high-time F-8 pilot and MiG killer, and a highly respected aviation historian. . . . A must read." - Naval Aviation "A very attractive book with excellent maps and tactical diagrams, and appendixes that include a good chronology and a fine statistical summary of air-to-air results." - Hook

Object ID	Title	Author	Summary
2014.312.006	Air War in Vietnam	Chinnery, Philip	For 30 years the United States was involved in the affairs of Vietnam, from the end of World War II until the final collapse of the South in 1975. At first America simply provided advisors, then in 1961 limited air support and in 1965 committed combat troops and a vast amount of air power. The United States committed airplanes and helicopters of the US Air Force, US Navy, Marine Corps and Army units. Their losses amounted to over 8000 aircraft by the end of the war. The wars proved an essential proving ground for previously untried aircraft and technologies like the F-4 Phantom, `smart' guided bombs, Wild Weasel defence suppression aircraft and many others. Perhaps the greatest innovation was the extensive use of the helicopter by the American forces. Helicopters lifted troops into action, removed them when plans went wrong, scouted for enemy positions, and acted as gunships and air ambulances. Air War in Vietnam is a fascinating account of the whole of this most controversial struggle. Phil Chinnery's lively and authoritative text is complemented by 230 carefully-chosen illustrations in color and black and white. No aviation enthusiast will want to be without Air War in Vietnam. Front cover: Huey transports and gunships return to a field site at Tay Vinh. Back cover: F-4 Phantoms of the 432nd TRW en route to a target from Udorn in Thailand. (from dust jacket flap) (USS Midway mentioned on p. 168, 182-183)
2014.312.007	You're No Good To Me Dead : Behind Japanese Lines in the Philippines	Stahl, Bob	One of the best kept secrets of World War II is the story of the Allied Intelligence Bureau (AIB), the Pacific theater's equivalent of the OSS.

Object ID	Title	Author	Summary
			Inserted miles behind enemy lines, AIB agents established intelligence networks and guerrilla armies in advance of invasions, all the while living off the land and avoiding enemy patrols. This is one agent's extraordinary account of fifteen harrowing months fifteen hundred miles behind
2014.312.008	Trapped at Pearl Harbor : Escape from Battleship Oklahoma	Young, Stephen Bower	A seaman assigned to gunnery duty, the author and the other men of turret #4 tried to man their battle stations as the Oklahoma was hit by five torpedoes and began to sink. They were ordered to remain below in the turret, and were trapped when the ship overturned, despite last-minute efforts to abandon ship. He recounts the violence of the capsizing, which killed and injured many men, and the survivors' frantic search for an escape route.
2014.312.009	Enola Gay	Thomas, Gordon	The story of the bombing of Japan at the end of World War II.
2014.312.010	Midway : The Battle that Doomed Japan; The Japanese Navy's Story	Fuchida, Mitsuo	For the Japanese, still gloating over the easy victory at Pearl Harbor and the rapid conquest of their Pacific empire, the Midway operation had one objective; to draw out the U.S. Navy and destroy it. Midway Island was selected as the base which, by its loss, would pose the greatest threat to American naval power in the Pacific. In this book, you will see the battle for Midway as it appeared to Japanese eyes. With them you will see the weakness of the Imperial Japanese Navy. It was a plan for victory. Only afterward, stunned by their losses, did the Japanese ask themselves, What should we have done that we did not do;, and Why did it fail?.
2014.312.011	Cruise of the Lanikai : Incitement to War	Tolley, Kemp	On 5 December 1941, Lanikai was quickly commissioned as a U.S. Navy ship. Her mission, on direct instructions from President Franklin D. Roosevelt, was to put to sea on a "defensive information patrol." Admiral Tolley, then Lanikai's commanding

Object ID	Title	Author	Summary
			officer, surmised her real mission was to provoke the Japanese to sink her, thus triggering U.S. entry into World War II.
2014.312.012	In the Hands of Fate : The Story of Patrol Wing Ten, 8 December 1941-11 May 1942	Messimer, Dwight R.	This book recounts the story of Patrol Wing Ten during the early months of World War II. It provides information about the navy's air operations in the Philippines, the Netherlands East Indies, and Australia at the time U.S. forces were being overwhelmed by the Japanese. There is an impressive amount of detail about the air operations.
2014.312.014	Nightmare on Iwo	Caruso, Patrick F.	When 2d Lt. Patrick F. Caruso landed on Iwo Jima in February 1945, he was sixth in K Company's chain of command. Within an hour of their initial assault, with his senior officers and one-third of his company's 230 men dead or wounded, Caruso took command. Fourteen days later he too was wounded--one of only forty in his company to survive the campaign. Determined to record all he had observed, Caruso began writing his recollections on scraps of paper as he lay in a Guam hospital. The result is this chronicle of the only battle in Marine Corps history that the Marines suffered more casualties than they inflicted, and emerged victorious. Contents: A New Assignment -- The Preparation -- En Route -- Landing -- On the Alert -- Over the Side -- Lieutenant, You're in Charge -- Motoyama Airfield No. 2 -- Moving On -- Attack and Counterattack -- The Hill That Opened -- Lunch with a Dead Man and Other Thoughts -- Heading North -- Motoyama Village and Beyond - - Night Attack on Hill 362-C -- Know Thine Enemy -- The Last Patrol -- Wounded --

Object ID	Title	Author	Summary
			Barabbas or Jesus? -- Our New Neighbors -- Peace -- Nightmare in Hell -- Men of Uncommon Valor -- Reflections.
2014.312.015	Bridge at Dong Ha, The	Miller, John Grider	The story of "Ripley at the bridge" has become legend within the U.S. Marine Corps, a daring act of heroism that stands out as one of the most dramatic episodes of the Vietnam War. But few outside the Corps have ever head of John Ripley and that day in April 1972 when he braved intense enemy fire to destroy a strategic bridge and stall a major North Vietnamese invasion of the south.
2014.312.016	Yangtze Patrol : The U.S. Navy in China	Tolley, Kemp	YANGPAT--Yangtze Patrol--was a logical result of increasing American commerce with China after the opening of the clipper ship era. In 1854 the USS Susquehanna arrived on the Whangpoo and the history of the Yangtze Patrol began. The patrol lasted until 29 November 1941. Along with a lively presentation of the Chinese political situation over the past century, an account of the changing international pressures, which eventually gave Japan control of the land, and descriptions of the bombing of the Panay, the siege of Shanghai, the battle of Wanh sien, and the Nanking Incident, this book offers as cumshaw a liberal serving of colorful anecdotes concerning the River Rats, China, and the Chinese--the antics of the "two-side walkee" gunboat, how to make opium, the going price for "pigs" and mothers-in-law, what happens when the rice birds finally turn against men, and the fact that there was once in China a cook who could do two fried eggs for breakfast.
2014.312.017	And I was There : Pearl Harbor and Midway--Breaking the Secrets	Layton, Edwin T.	According to Admiral Layton, the Japanese succeeded at Pearl Harbor because of audacious planning plus a dramatic breakdown in our intelligence service. This failure was caused by feuding among high-level

Object ID	Title	Author	Summary
			officers for control of the intelligence and radio intercept divisions. Six months after Pearl Harbor, self-serving petty jealousy at naval headquarters almost caused us to lose the decisive battle of Midway. Layton reveals the full details of this deplorable situation and vigorously defends Admiral H.E. Kimmel, naval commander at Pearl Harbor, who was blamed for the disasters. Layton accuses instead some high-ranking naval officers in Washington who failed to pass along the latest intelligence intercepts.
2014.312.018	Vietnam : A History	Karnow, Stanley	Provides a comprehensive look at both sides of the Vietnam War through a collection of personal tales. It delves into the political and military events in the United States and elsewhere that originally caused the war and then brought it to an end. Companion book to PBS series "Vietnam: A Television History."
2014.312.019	Long Day's Journey into War : December 7, 1941	Weintraub, Stanley	"A masterly montage of what was going on around the world, hour by hour, the day the Japanese bombed Pearl Harbor."
2014.312.020	Honor and Betrayal : The Untold Story of the Navy SEALs Who Captured the "Butcher of Fallujah"--and the Shameful Ordeal They Later Endured	Robinson, Patrick	On a daring nighttime raid in September 2009, a team of navy SEALs grabbed the notorious terrorist Ahmad Hashim Abd al-Isawi, the villainous "Butch of Fallujah," mastermind behind the 2004 murder and mutilation of four American contractors. Within hours of his capture, al-Isawi, with his lip bleeding, claimed he had been beaten in his holding cell. Three Navy SEALs--members of the same team that had just captured the notorious terrorist--were charged with prisoner abuse, dereliction of duty, and lying. This book is an account of the entire story through the fate of the three men.
2014.312.021	NAM : Vietnam, 1965-75	Page, Tim (ed)	With specially commissioned chapters, written by the men who were there, NAM describes what it felt like to import billion dollar, hi-tech

			destruction to Southeast Asia. Fact boxes give invaluable background to these first-hand accounts, while authoritative information strips deal with the history of the conflict. Throughout, unrivaled period photography captures the visual fire of this unprecedented struggle. See index on page 608 for Marine and Navy involvement.
2014.312.022	Goodnight Saigon	Henderson, Charles W.	From the Cover: The True Story of the U.S. Marines ' Last Days in Vietnam. From the Book Jacket: "On January 17, 1973, the Paris Peace Accords were concluded with the hope of bringing an end to decades of bloodshed in Vietnam, and an end to years of American intervention. What took place, however, was far from peaceful - as the combined forces of the North Vietnamese Army and Viet Cong launched an all-out offensive to end the war with complete victory over the beleaguered south.". "Here, culled from extensive interviews and research, is the story of the end of the war as told from both sides of the conflict. Included are never-before revealed accounts from people of every level and involvement in the Vietnam War: NVA and Viet Cong soldiers, U.S. embassy personnel, guerrilla commanders, civilians, generals, double-agents - and leaders from both sides including former president Gerald Ford and North Vietnamese military commander General Tran Van Tra.". "From the first hints of the impending invasion from the north, to the gut-wrenching hours before the fall of Saigon, when a brave pilot defied his orders to return to base and rescue the last five Marines from the rooftop of the U.S. embassy, this is the Vietnam War as it was - raw, brutal, and tragic." The Midway is listed on

2014.312.023	Get Yamamoto	Davis, Burke	On April 13, 1943, American monitoring stations in the Pacific intercepted a top-secret message from the Japanese. Unknown to the Japanese, we had broken their code--and now we read some incredibly important information. Admiral Yamamoto, the commander in chief of the Japanese navy, would be making a unique inspection tour of advance bases, including Buin on Bougainville. Never before had Yamamoto dared venture so close to American lines. Coded cables flew between Washington and Pearl harbor--the decision was made to get Yamamoto. The closest American force was on beleaguered Guadalcanal--fighter pilots who had the new P-38 Lightning. With the auxiliary gas tanks--which would have to be flown in overnight--they could possibly reach Yamamoto while he was still in the air--and get back. But the hard-pressed men on Guadal had less than two days to ready their mission. The odds were high. To be successful, the P-38 pilots would have to fly five hundred miles over water, avoiding all land, intercept Yamamoto exactly on time, break through the Zero fighters protecting him, shoot him down, and return to their base. The navigational problems alone almost ensured failure. The climax of this engrossing book is a wild and extraordinary aerial battle, but Get Yamamoto is more than an exciting recreation of a deadly encounter that may have changed the course of the war. It tells the fascinating story of Yamamoto himself, as well as that of the aggressive American fighter pilots who met so decisively and dramatically over the jungles of Bougainville.

2014.317.002	Roger Ball! : The Odyssey of John Monroe "Hawk" Smith, Navy Fighter Pilot	Auten, Donald E.	Roger Ball! is a magnificent read about a great and distinguished life well lived. John Monroe Smith is a living legend in Naval aviation: an all-American boy living his dream, a dream of becoming the best fighter pilot and carrier aviator in the Navy. He succeeded in being the best in a way that only one with unbridled passion, fierce commitment, boundless energy, unconditional dedication and relentless resolve can experience.-Ed Allen, Rear Admiral, USN (Retired)In the wake of the hard lessons of the Vietnam War, a pantheon of committed naval aviators struggled valiantly to modernize fighter aircraft and overhaul tactics. It was a seemingly titanic task marked by political intrigue, doctrinal apoplexy, and sadly, petty politics.This is the personal story of one of those naval aviators, Captain John Monroe "Hawk" Smith. It chronicles his growth as a naval officer, his seasoning as a fighter pilot, and his hardening as a commanding officer. It tells of the raw courage of naval aviators and captures the visceral loyalty, unswerving commitment, and the unsinkable camaraderie that is the brotherhood of naval aviation.Roger Ball! is a seven-g, heart-in-the-throat story of the very unforgiving profession of naval aviation. From the Publisher "Roger Ball!" straps the reader to a high-G odyssey and catapults him into the life of John Monroe "Hawk" Smith—Navy fighter pilot. It captures the adventures and hardships of deployment, the pressures of command, and the unforgiving and very lethal nature of tactical flying.

Object ID	Title	Author	Summary
			"Roger Ball! heralds the disciples of fighter doctrine, the inauguration of TOPGUN, and articulates the monumental success it had in resurrecting the Navy's air dominance during the Vietnam War. "Roger Ball!" traces the selfless sacrifices of Hawk and other key fighter crews in developing the world's deadliest fighter—the Grumman F-14 Tomcat. Finally, it captures the spirit, the commitment, and personal sacrifices of the men and women of naval aviation. "Roger Ball!" is a highly personal story of an extraordinary fighter pilot set during one of the most tumultuous times in naval fighter aviation. All those who also have been there and all those who have a desire to understand life as a Navy fighter pilot will savor the telling of Hawk's story. --This text refers to the Hardcover edition. 			introduce the reader to the young war hero who would later become president. Covering subjects such as modern exploration, World War II, and personal heroism, Ballard weaves a tale that spans 60 years. (from Amazon.com)
2014.317.006	Military Aviation Disasters : Significant Losses Since 1908	Gero, David	The crash of a civil airliner is nearly always reported by the media, the degree of coverage depending on various factors. These include the number killed, their nationality and the location of the disaster. However, unless an aircraft in military service comes to earth in a heavily populated area and there is a high number of casualties on the ground, the incident goes largely unreported in the press. For example, the crash of a giant Antonov An-124 transport in Russia in December 1997 was widely reported as this resulted in more than 40 fatalities on the ground, including children. In contrast, the loss of transport aircraft over the sea or in jungle areas, are rarely reported outside the specialist aviation and defence press. Here, for the first time, is a detailed record of hundreds of losses involving military aircraft. Each year, a staggering number of military aircraft come to grief including trainers, fighters and communications aircraft and in many cases the crew survive, often thanks to their ejection seats. This book, however, is confined to major disasters, principally where there has been a significant loss of life, whether civilian or military personnel. All types are covered, from single-seat aircraft that have crashed into populated areas, perhaps after the pilot has made his escape, collisions between troop-carrying helicopters, the giant airships of the First World War which came down in the North Sea with almost monotonous regularity, to modern

Object ID	Title	Author	Summary
			turboprop transports downed in a war zone by surface—to-air missiles. These incidents are placed on record with full details of the aircraft involved, its operator, route, loss of life and location and, where known, the reasons for the crash. Unlike civil airline disasters, which are of international importance with their investigative reports made widely available, governments are not always so keen to release information on the loss of their military aircraft, especially if these have been on clandestine operations. The author has therefore had to undertake a considerable amount of detective work to piece together many of the accounts that appear here. David Gero has had two previous books published, "Aviation Disasters," covering the world's major civil airliner crashes since 1950, and "Flights of Terror" which details aerial hijack and sabotage since 1930. He is a television director and has been collecting reports on air disasters since the age of 13, gathering together information on more than 5,000 incidents of all kinds. He lives in San Gabriel, California. (from dust jacket flap)
2014.317.007	World War II : A Visual Encyclopedia	Keegan, John (ed)	Encyclopedias are concerned primarily with the facts, and this visual encyclopedia of World War II is faithful to the norm. It includes detailed descriptions of every major weapon and weapons system used by the combatants on both sides throughout the war: ships and ship classes, aircraft, tanks, and armored vehicles, artillery pieces, and small arms. It provides hundreds of concise biographies of the leaders and notables of the war, civilian and military. It provides in outline the major campaigns and battles on every front and relates the outcome of one to another.

Object ID	Title	Author	Summary
			But it attempts more than the provision of fact. The biographies have been so written and the campaign and battle entries so constructed as to provide a continuous and explicative narrative of the war from its outbreak to its close. It offers a reasoned analysis of the motives and expectations which underlay the grand strategy of the combatants, and a rationale of the failure or success which their strategies brought. It is, in short, a complete, many-sided history of the war as a whole, arranged in encyclopedic form and, in that respect, an entirely original undertaking. (from dust jacket flaps)
2014.317.008	Battle of Britain, The : The Myth and the Reality	Overy, Richard	The battle of Britain pitted the Hurricanes and Spitfires of the Royal Air Force against the Messerschmitts of Hitler's Luftwaffe in the skies over England in 1940. It was immortalized in Churchill's words, "Never in the field of human conflict was so much owed by so many to so few," but it has since been debunked by revisionists as an inconclusive and even strategically flawed encounter for the British. In this assessment of the battle, Richard Overy restores the historical balance. He delivers shrewd judgments on the critical elements for both sides, from strategy to leadership, command organization, communications, and training to the technology of fighters, bombers, and radar. Overy shows that even if the popular myth overshoots the mark, the significance of the battle remains undiminished in the light of realistic judgments. A necessary battle, it marked the end of Germany's string of victories, forestalled a German invasion, and kept Britain in the war. Tables and maps
2014.317.009	Yogi Beare! : Values of a Blue Angel	Majer, Kenneth	Nothing in Scott Beare's upbringing could have helped predict the heights this young man from the suburbs of Alexandria, Virginia would

Object ID	Title	Author	Summary
			someday reach. Born to few prospects and low expectations, Scott had to overcome one of the most difficult burdens a young person may be asked to face: a negative attitude among the adults in his life. Nevertheless, he overcame all that, making his way from Navy recruit fresh out of high school to college-educated officer in just eight years. Even more amazing, Scott Beare not only went from enlisted man to Navy jet pilot during that time; he became one of six "Blue Angels", a member of the most elite flying unit in the Navy. He has toured internationally with his world renowned squadron, demonstrating how the best the US Navy has to offer perform in the sky. A gifted communicator, he can motivate audiences to look around at what their environments have to offer, and then to look forward, outward and up. Scott Beare provides insight, products, and services that business leaders turn to for learning to use the power of values-driven alignment as a business strategy.
2014.317.010	Vietnam War Biographies, Vol. 1 A-K	Hillstrom, Kevin	These two volumes profile sixty important figures from the Vietnam War era. The essays cover such key government figures as Ho Chi Minh, Lyndon B. Johnson, Robert S. McNamara, Ngo Dinh diem, and Richard M. Nixon; military leaders William Westmoreland and Vo Nguyen Giap; antiwar activists Joan Baez, David Dellinger, and Abbie Hoffman; journalists Frances FitzGerald, David Halberstam, and Neil Sheehan; and prominent veterans Ron Kovic, Tim O'Brien, John McCain, and Oliver Stone. Also included are a timeline, glossary, more than seventy photos, further readings, and a subject index.

2014.328.002	Hellcats Over the Philippine Deep	Smith, John F.	This books is about a group of young men who were involved in the carrier war in the Pacific theater during World War II. These men flew F6F Hellcats in the Navy's Fighting Squadron 60 (VF-6); their average age at the time was somewhere between 21 and 23. VF-60, part of Air Group 60, served during late 1943 and all of 1944 aboard the aircraft carrier USS Suwannee. Air Group 60, with the ship's company of the USS Suwannee, was destined to be part of carrier division CarDiv-22 that converged with the newly organized Japanese kamikaze corps over the Philippine Deep in October 1944. They were the first U.S. ships to undergo such suicide attacks, which occurred in the Battle of Leyte Gulf during the invasion of the Philippines, the greatest naval battle in world history. (From the Prologue). The author is a former Navy pilot.
2014.328.003	Son of a Preacher : A Hellcat Ace's Memoirs	Hargreaves, Everett C.	A World War II pilot's story of his experiences in fighting the Japanese in the Pacific. He was a multi-ace, one of the few ace-in-a-day pilots. He flew with squadrons VF-2, VF-18 and VF-27.
2014.328.004	F-4 Phantom II, The	Gardner, Richard E.	From book intro: This book on the F-4 Phantom sets out to give the modeller and aircraft enthusiast a comprehensive chronological coverage of the history and development of this famous aircraft to date. Already in service with all arms of the US forces, the Phantom is now equipping the Royal Air Force and Royal Navy, the Imperial Iranian Air Force, the Israel Defense Force/Air Force and is to enter service with several other air forces in the near future.
2014.328.005	McDonnell Douglas F-4 Phantom II : Production and Operational Data	Peake, William R.	This book is not intended to be a detailed history of the Phantom but rather a single

Object ID	Title	Author	Summary
			accurate source for data relating to the production, service and attrition of each aircraft. It will enable the reader to determine the construction number and first flight of all aircraft and the attrition or retirement date and disposition of aircraft no longer in service. Although the first flight and attrition dates are provided, no effort has been made to include a detailed operational history. Almost 200 colored photos. Section Contents: 1) McDonnell Douglas Ship Number List 2) Mission-Design-Series (MDS) List 3) MASDC/AMARC Storage List (Military Aircraft Storage and Disposition Center/Aerospace Maintenance and Regeneration Center, Davis-Monthan AFM, Arizona) 4) Battle Damage Repair Aircraft 5) Display Aircraft 6) Attrition Lists 7) USAF/USN/USMC Combat Victory List 8) Phantom Units Glossary USS Midway Phantoms are listed on 12 pages, and 8 USS Midway Phantom victories (kills) are listed; however, Peake gives Lt. Batson and LCDR Doremus two credits while other sources give them only one credit. There are 8 Migs painted on the Midway Island and 1 is for a Mig shot down by two A-1 Skyraiders.

The book focus mostly on Army helicopters in Vietnam; however, there are several references to the US Navy and the US Marine Corps.
2014.330.004	Air War - Vietnam	Middleton, Drew (intro)	The book is a compilation of articles written by various authors. Contents include: Part 1 - The Tale of Two

Object ID	Title	Author	Summary
			Bridges by Colonel Delbert Corum et al. Part 2 - Airpower and the 1972 Spring Invasion by Colonel John A. Doglione et al. Part 3 - The Battle for the Skies Over North Vietnam by Major Paul Burbage et al. Part 4 - The Mayaguez Incident by Captain Thomas D. Des Brisay (from dust jacket flaps:) Introduction by Drew Middleton "Smart bombs"-remotely piloted munitions, operated by electro-optics and laser-guides, able to knock out heavily-defended bridges from miles away. SAM-7 or Strela missiles-aimed by infra-red homing devices, carried by one soldier, and capable of destroying helicopters and slow-moving aircraft. High altitude aircraft carrying thousands of pounds of explosive power and able to pinpoint targets far above the range of conventional anti-aircraft guns. Electronic counter defenses against surface-to-air missiles (SAMs). Sensors. Infra-red equipment. Anonymous air war planned and waged in detail through computers. Star Wars? A scenario for air battles in the 21st century? No. This was the reality of the air war in Vietnam! Air War-Vietnam presents here a long-neglected aspect of that controversial and frustrating struggle-that of the military. Generals, politicians, officials, diplomats, intelligence officers, correspondents, and academicians have surveyed the political, moral and legal aspects of the war in a surfeit of books and articles. Yet, until this publication, there has been no presentation of how the military waged the war and what the technical innovations mean for future conflicts. What this book reveals is as sobering as it is startling. The war in Vietnam may have

Object ID	Title	Author	Summary
			ended in frustration for the United States, but it permitted the American Air Force to investigate, discover, perfect and implement the kind of weaponry and military strategy that will influence the nature of warfare for many years to come. In the Arab-Israeli War of 1973, in fact, the American public became aware of SAMs, smart bombs and electronic counter measures. All of these techniques were employed in Vietnam-feverishly developed by both sides, and have become the daily preoccupation of both Soviet and American weapons experts. Because we "withdrew" from the struggle in Southeast Asia, and because the government in Hanoi was never anxious to release facts about the effects .of "futuristic" air tactics on both the civilian population and the military effort of its own armed forces, Americans will perhaps never know the full story. Air War-Vietnam does give us as accurate and as comprehensive a view of how the American Air Force fought-and to a large extent-won the battle in the skies above Vietnam. It also reveals that although the war was waged without atomic weapons, it was by no means "conventional."
2014.330.005	Aviation/Aerospace Fundamentals	Jeppesen Sanderson, Inc.	This is the 4th edition of a textbook on aviation and aerospace fundamentals. Object ID	Title	Author	Summary
			Navy model T-34C aircraft. ===== The Beechcraft T-34 Mentor is a propeller-driven, single-engined, military trainer aircraft derived from the Beechcraft Model 35 Bonanza. The earlier versions of the T-34, dating from around the late 1940s to the 1950s, were piston-engined. These were eventually succeeded by the upgraded T-34C Turbo-Mentor, powered by a turboprop engine. The T-34 remains in service more than six decades after it was first designed. (from Wikipedia)
2014.334.008	Flying Officers of USN 1917-1919	Naval Aviation War Book Committee	Provides a permanent record of the naval air service in the Great War, a pictorial muster roll of all the officers and student officers of the Naval Air Service and presents a narrative history and achievements of the Naval Aviation Corps. Includes a photograph of then assistant Secretary of the Navy Franklin D. Roosevelt and a letter from him to Naval Aviators as an introduction to the book.

2014.343.001	God Was at Midway : The Sinking of the USS Yorktown (CV-5) and the Battles of the Coral Sea and Midway	Linzey, Stanford E.	An excellent inspirational book! August 28, 1999 By A Customer God Was At Midway by Stan--my husband for nearly 60 years--tells our story of trusting God in the early years of our marriage during World War II. Filled with adventure, excitement, and romance, Stan tells the factual and personal aspects of the events leading up to the Battle of Midway. He also reveals how God changed the course of history in personal lives and in our nation through the most significant battle of this Second Great War. God Was At Midway is must reading for those searching for a deeper understanding of not only how the Holy Spirit operates in human affairs but also how the Holy Spirit impacts personal lives through these events. In short, God Was At Midway is scholarly, concise and a valuable contribution. Stan successfully appeals to an eclectic audience! "Chilling, Motivating, Outstanding!!!" August 21, 1999 By A Customer Chaplain Stanford E. Linzey's book-God Was At Midway-

Object ID	Title	Author	Summary
			has incorporated the author's love of God, wife, and call to duty. This is the ultimate war story of love and sacrifice, the Godly wife who prayed for her husband and stood with him no matter what, while he faced possible death while many of his shipmates suffer horribly. God Was At Midway is the story of God's divine intervention in people's lives at war, the author's personal life, and in the affairs of the nation as a whole. The Battle of Midway was the turning point of World War II. The complete historical accuracy of Linzey's book places this author on par with the best writers of the subject. - Vera Waisanen, Educator & Mother - This book would make a great movie; TV special; mini-series. July 28, 1999 By janice_schreuder@ci.pomona.ca.us This book, God Was At Midway, impacts many from the perspective that it is about the life of a very young enlisted man who had the courage to believe he was to make a differenct in other young men's lives on the seas, at war and far from home. He had the stamina to believe he would survive and physically rescue another life from drowning as the Yorktown went down. He had the faith and the hope that he would return to his family. And he had the strength to carry out his duties on the job, his spiritual duties with the men, while mentally remaining focused, sane, and strategically thoughtful in every aspect of his being. Not only that, he kept his sense of humor during and after the ordeal. While reading his story, one can feel the uplifting, the positiveness of what life should be about and how we should

2014.343.003	Cartoon History of the United States, The	Gonick, Larry	From the first English colonies to the Gulf War and the S&L debacle, Larry Gonick spells it all out from his unique cartoon perspective.
2014.344.001	Naval Camouflage, 1914-1945 : A Complete Visual Reference	Williams, David (David L.)	This authoritative history of camouflage is undoubtedly the most comprehensive study of the subject to date. Visual and illustrative in its approach, it concentrates on the British and US navies, but the camouflage patterns of enemy navies (and selected allies) are covered as well. Contrary to popular belief, naval camouflage at sea was not intended to 'hide' ships, and an in-depth commentary explains the theory and development of visual deception, and the different ways in which it was intended to work at sea. The core of the book is a listing of all the major patterns and schemes, with their colours, characteristics and function. Wherever possible each is illustrated with at least one photograph providing the reader with a visual reference as well as a description; where there were variations, as many as possible are depicted. This is a subject of immense importance and significance

Object ID	Title	Author	Summary
2014.344.002	Hell Divers	Forsyth, John F.	for all those with an interest in the warships of the two World Wars - this comprehensive reference book is simply the best available.
			(from dust jacket rear)
			The author flew an SB2C Helldiver for Bombing Squadron 18, the "Sunday Punchers," from the deck of the USS Intrepid. Along with the other pilots and airmen of Air Group 18, he played a part in winning some of the greatest naval air battles of World War II — Coron Bay, Formosa (Taiwan), Leyte, Luzon and many others.
			This book is a collection of the best combat stories from these battles. Stories of sinking ships, of dogfighting with Zeros, of Kamikaze attacks, of comrades shot down, of those who escaped and made it back and of those who were lost. The action was real and the recollections are vivid. "Hell Divers" brings you the naval air war in the Pacific as it really happened.
2014.344.003	Japanese Naval vessels of World War Two as seen by U.S. Naval Intelligence	Baker, A. D. (introduction)	Author John F. Forsyth flew Helldivers and Corsairs for the US Navy from 1943 to 1945. He was awarded the Navy Cross, the Silver Star, three Distinguished Flying Crosses and four Air Medals. After discharge from the Navy, he attended Harvard Law School, graduating in 1948. He has since practiced Law in the Rochester, New York, and Naples, Florida, areas.
			(from back cover)
2014.344.003	Japanese Naval vessels of World War Two as seen by U.S. Naval Intelligence	Baker, A. D. (introduction)	This is a portrait of the Imperial Japanese Navy at the height of its power during the Second World War, as seen by U.S. Naval Intelligence. Originally compiled as a guide to recognition for Allied forces, it takes the form of a concise encyclopedia of Japanese warships — from battleships and aircraft carriers to landing craft and auxiliaries — each

Object ID	Title	Author	Summary
			class or ship comprehensively illustrated and described. The naval battles of the Pacific War were titanic, with large numbers of warships in action on each side. Throughout the war, there were many fleets, squadrons and battle groups at sea at any one time; it was therefore vital that a ship spotted on the horizon or from an aircraft should be recognized at once as friend or foe. This book was prepared with that end in mind, to be carried on patrol and in action by U.S. warships. The result, however, is much more than a mere identification manual; in effect it is a pictorial encyclopedia of the Japanese Navy. With more than 2,000 illustrations, the pictorial content makes this the most comprehensive one-volume visual account of the Japanese Navy ever published. Each of the major warships and each class of the lesser vessels is shown in photographs of the real thing and/or shots of beautifully made models. For the more significant ships, there are multiple views, demonstrating the appearance of the ship when seen from various angles and from the air; and each is also depicted in a tinted set of profile and plan drawings. A data table for each class lists the vital statistics, including displacement, dimensions, armament, speed, endurance, machinery, etc., and there is also a special section detailing the tactics and organization of Japanese landing operations. This volume has been reproduced from the formerly restricted, official handbook, and accurately portrays the U.S. Navy's view of its Pacific opponent at the mid-point of the war. A new Introduction by A. D. Baker III, Editor of the English-language edition of "Combat Fleets of the World"

Object ID	Title	Author	Summary
			places the book in its correct historical perspective. Companion volumes in this format, both featuring an Introduction by A. D. Baker III: U.S. NAVAL VESSELS, 1943 A comprehensive overview of the U.S. Fleet at the period when it was beginning to expand into the vast armada that ultimately overwhelmed the enemy forces at sea. The complete range of ships and craft is illustrated with line drawings and photographs, from 800-foot battleships to quarter-ton amphibious jeeps. With basic data and recognition features and more than 900 illustrations. ALLIED LANDING CRAFT OF WORLD WAR TWO This is a reprint of the wartime U.S. Naval Intelligence manual describing the landing ships, craft, barges, vehicle, personnel and tank landing craft, support and command craft, amphibious vehicles and supply and repair craft used by the U.S. , British and Australian forces in World War Two during the 'Torch' landings in North Africa, those in Sicily and Italy, D-Day in Normandy and the U.S. island-hopping campaigns in the Pacific. With extensive data tables, detailed line drawings and more than 350 photographs. (from dust jacket flaps)
2014.344.004	Ships and Aircraft of the U. S. Fleet - War Edition	Fahey, James C.	This edition is necessarily incomplete. Information not readily available to the enemy has been excluded. All data beyond that included in the 1941 "Two-Ocean Fleet" edition is based on officially released government documents and matter appearing in the public prints.
2014.344.005	Ships and Aircraft of the U. S. Fleet - Victory Edition	Fahey, James C.	This edition describes in detail the wartime expansion of the US Navy. Considerable information which was withheld for reasons of security has been released since Germany and Japan

Object ID	Title	Author	Summary
			surrendered. A complete roster of combatant vessels and fleet auxiliaries to which names and serial numbers were assigned follows, arranged by class or type. Unnamed mine and patrol vessels, landing craft and fleet auxiliaries are grouped numerically by classes.
2014.344.006	Ships and Aircraft of the U. S. Fleet - Two-Ocean Fleet Edition	Fahey, James C.	Includes an outline of the greatest naval expansion in American history, exceeding even that of 1916-1918. Information has been released through the Congress and the Navy Dept. of expansion through 1940, including the names assigned to the combatant ships of the new "Two-Ocean Navy" program.
2014.344.007	Ships and Aircraft of the U. S. Fleet - 1939	Fahey, James C.	Much of the ship data given is unofficial and all aircraft specifications are from civilian sources. A full list of all vessels belonging to the combatant classes which are still represented on the Register is given, mentioning those now building or authorized, and the vessels that have been lost or scrapped in recent years.
2014.344.008	Franklin Comes Home, The	Hoehling, A. A. (Adolph A.)	This is the story of the most decorated warship in US naval history --- the aircraft carrier Franklin, which survived an air attack that should have proved fatal. For their bravery, the crew received more medals and commendations than any crew had from a single action.
2014.344.010	LIFE Goes to War : A Picture History of World War II	Scherman, David E. (ed)	This would be a great read for any high school student, but especially visual learners. The pictures are riveting and evoke strong emotions. You cannot help but be interested in reading the captions and information on what was happening during the time the pictures were taken. You really get a complete sense of the events during the historical period of World War II from many different perspectives. It is an engaging and captivating book that will keep readers interested while they learn about World War II. (Source: librarything.com)

2014.344.017	Battleship Fuso, The	Skulski, Janusz	One of the Conway "Anatomy" series, this is a study of the 1914 Japanese super-dreadnought battleship "Fuso", accompanied by technical details and career notes. By the author and illustrator of "Yamato" and "Takao". [From Amazon.com]
2014.344.018	Battleship Yamato, The	Skulski, Janusz	With the greatest displacement, biggest guns and heaviest armour of all time, Yamato and her sister Musashi were the ultimate battleships. Everything about them was gigantic - each main armament turret, for example, had a total revolving weight of over 2500 tons - and they proved formidable opponents to the US Pacific Fleet. Fittingly for such a spectacular ship as Yamato, this contribution to the well-established 'Anatomy' series is the biggest and most detailed, with over twice as many drawings as a standard volume.
2014.344.020	King George V Class Battleships	Tarrant, V. E.	They were some of the finest ships the Royal Navy ever built - the last of the great "floating villages" to see WWII action. Their achievements appear in dramatic photos of both battle action and close-up detail, along with exhaustive charts of technical specifications. The personality of each of the five ships comes through in sketches of many of the 1,500 officers and men, in more than six years of battle, in most sea theaters. [From Amazon.com]
2014.344.021	Lexington Class Carriers, The	Stern, Robert C.	If a weapon system can be defined as a combination of sub-systems that , working together, allow attacks against a target at a chosen time and place, then the Lexington and Saratoga carriers represented

Object ID	Title	Author	Summary
			an early example of the concept. They contained within their hulls a myriad of interacting constituents designed to move the ships within the range of an enemy, to sense his presence, to strike at his assets or to defend against his retaliation. In this studied account of a class of aircraft carrier, Rob Stern deliberately chooses to approach his subject from the viewpoint offered by this definition, by assessing the class as a weapons system. Because their careers spanned the critical early years of carrier development, and as they served as a test bed for evolving technologies, it is possible to obtain from their evaluation the story of the birth and growth of the theories and practices that made the aircraft carrier such a dominant vessel in the major
2014.344.022	Escort Carrier Gambier Bay, The	Ross, Al	Includes USS Gambier Bay (CVE-73) history, photographs and technical details of the ship. What makes the books in this series unique are the elaborate drawings of all aspects of the ship, in the case of this book, some 60 pages of drawings
2014.344.024	Japanese Cruisers of the Pacific War	Lacroix, Eric and Wells, Linton	The backbone of the Imperial Japanese Navy (IJN) in World War II, cruisers were active in all parts of the Pacific and involved in nearly every naval action. Based on both official Japanese publications and unpublished documents, this book provides a complete history of these ships, including the eighteen "heavy" and twenty-seven "light" cruisers that saw combat, two ships incorporated from the Chinese Navy, and several others that were either never completed or never left the drawing board. Authors give a detailed account of the planning, design, and construction and the numerous prewar and wartime modifications of the individual ships of each cruiser class. The buildup of the IJN's

Object ID	Title	Author	Summary
			cruiser force in the years prior to World War II is presented in the framework of the growing rivalry between Japan and the United States in the Pacific, and the resulting changes in the successive Japanese defense policies between 1907 and 1936. More than 150 photographs, many previously unpublished, enhance the book's narrative. [From dust jacket]
2014.344.025	Cruisers of the US Navy 1922-1962	Terzibaschitsch, Stefan	From dust cover: This book describes with illustrations 118 US cruiser type ships built between 1922 and 1962. These range from the Washington Treaty ships of the Omaha class to the nuclear-powered guided-missile cruiser Long Beach, the last true cruiser to be constructed for the US Navy. The first section of the book presents a thematic survey of US cruiser development, with full coverage of specific features and topics. The main section of the book, includes more than 400 photographs and line drawings, consisting of a detailed chronological examination of each of the ships and classes: Omaha class, Pensacola class, Northampton class, Portland class, New Orleans class, Brooklyn class, Wichita class, Atlanta class, Oakland class, Cleveland class, Fargo class, Baltimore class, Oregon City class, Des Moines class, Worcester class, Boston class, Galveston class, Little Rock class, Albany class and the Long Beach.
2014.344.029	Lest We Forget : Report of the Japanese Raid on Pearl Harbor	Gibson, Gary (ed)	The attack on Pearl Harbor (called Hawaii Operation or Operation AI by the Japanese Imperial General Headquarters (Operation Z in planning) and the Battle of Pearl Harbor) was a surprise military strike conducted by the Imperial Japanese Navy against the United States naval base at Pearl Harbor, Hawaii, on the

Object ID	Title	Author	Summary
			morning of December 7, 1941 (December 8 in Japan). The attack was intended as a preventive action in order to keep the U.S. Pacific Fleet from interfering with military actions the Empire of Japan was planning in Southeast Asia against overseas territories of the United Kingdom, the Netherlands, and the United States. The base was attacked by 353 Japanese fighters, bombers and torpedo planes in two waves, launched from six aircraft carriers. All eight U.S. Navy battleships were damaged, with four being sunk. Of these eight damaged, two were raised, and with four repaired, six battleships returned to service later in the war. The Japanese also sank or damaged three cruisers, three destroyers, an anti-aircraft training ship, and one minelayer. 188 U.S. aircraft were destroyed; 2,402 Americans were killed and 1,282 wounded. The power station, shipyard, maintenance, and fuel and torpedo storage facilities, as well as the submarine piers and headquarters building (also home of the intelligence section) were not attacked. Japanese losses were light: 29 aircraft and five midget submarines lost, and 65 servicemen killed or wounded. One Japanese sailor was captured. The attack came as a profound shock to the American people and led directly to the American entry into World War II in both the Pacific and European theaters. The following day (December 8), the United States declared war on Japan. Domestic support for non-interventionism, which had been strong, disappeared. Clandestine support of Britain (for example the Neutrality Patrol) was replaced by active alliance. Subsequent operations by the U.S. prompted Germany and Italy to declare war on

Object ID	Title	Author	Summary
			the U.S. on December 11, which was reciprocated by the U.S. the same day. There were numerous historical precedents for unannounced military action by Japan. However, the lack of any formal warning, particularly while negotiations were still apparently ongoing, led President Franklin D. Roosevelt to proclaim December 7, 1941, "a date which will live in infamy". (from Wikipedia)
2014.344.030	Battleships : United States Battleships in World War II	Dulin, Robert O.	This book is a definitive technical history of all battleships and battlecruisers of the U. S. Navy designed or even conceived since the early 1930s. It covers not only the design and construction of such ships, but also the operational careers of all the active ships to their very end. Although there is extensive literature about battleships and battlecruisers, data published so far on their technical characteristics have been extremely limited and often contradictory. Virtually no effort has been made to describe the ships' development and construction. Here, for the first time, is a study that presents complete plans as well as extensive technical data covering the characteristics and performance of these noteworthy ships. A chapter is devoted to each class of U. S. battleship and battlecruiser. In discussing each class, the authors explain in great detail the design concept under which they were built. They describe the structural features, armor, armament, engineering plant, stability and damage control, underwater protection, electronics installations, and habitability of each ship. This book also offers a plan view and outboard profile, armor profile, inboard profile, and the hull lines of

Object ID	Title	Author	Summary
			each class. There are many photos depicting ships of all the various classes. This, then, is the story of the ships once regarded by the powers of the world as the ultimate naval weapon, vessels so extraordinary that they were termed "capital ships." Until World War II a nation's relative naval power was judged on the number and condition of its capital ships. The number, characteristics, and availability of capital ships fundamentally influenced foreign policy and naval strategy. Today, these ships are merely symbols of a bygone age of sea power. Although there are no longer any battleships in commission in the U. S. Navy, an air of fascination still surrounds these giants, and some of them have been accorded near-legendary places in naval history. The Iowa-class ships and the South Dakota (the famed "Battleship X" of World War II communiques) fall into this category. The authors have provided an indispensable source of information for all who have an interest in naval history and sea power. Their research over a period of more than a decade has made extensive use of authoritative (and frequently official) source material, much of has never before been published. "Battleships" is a fascinating study and analysis of a kind of warship that once ruled supreme upon the seas, but will probably never be sailed again. (from dust jacket flap:)
2014.344.031	Combat WW II : Pacific Theater of Operations	Congdon, Don (ed)	This is the third edition of Combat : Pacific Theater, World War II, originally published in 1958. (2009.310.039). There is a chapter about the Battle of Midway, pages 206-242. PACIFIC THEATER 1941 to 1945

Only the Enterprise was in every carrier action, except Coral Sea, in the first year of the war. ===== (from Amazon.com:) With the war in the Pacific well into its new, offensive phase, the best carrier story of the war can now be told. It is the story of the Enterprise, one of the Navy's greatest fighting

Object ID	Title	Author	Summary
			ships, the first carrier to receive the rarely awarded Presidential Citation. Of the seven first-line U.S. carriers when war began, four were sunk in the first year of war, another saw action in non-Pacific waters during the period involved, and another was out of action at the decisive moment. Then there was one - the Enterprise. Virtually alone, it held the long, thin Pacific line against overwhelming odds Then There Was One is a story of men - like Admiral "Bill" Halsey, who rode the Big E as his flagship; Air Group Commander McClusky who helped win the Battle of Midway; Commander Turner Caldwell whose decision to take eleven Enterprise planes to Guadalcanal helped determine the fate of the Solomons; young Lieutenant "Birney" Strong who fulfilled a life's ambition and scratched one Jap flattop; Ensign Neal Scott whose dying letter to his parents is one of the most moving documents of the war - of these man and many others. It is a story of battles - from that first Sunday morning when the Enterprise was returning to Pearl Harbor as the Japs were attacking it, right down through every major carrier action, save one, with the Big E writing one of the grandest record-breaking pages in naval history: 29 Jap ships sunk and 185 Jap planes destroyed. It is a story of courage and heroism in the face of two of the heaviest air attacks ever launched against any American ship by the enemy. This is the carrier story long awaited by those who have followed our progress in the Pacific. For those who have not, it will be an exciting and inspiring eye-opener. This is it - the grand, glorious, and victorious first year of the U.S.S. Enterprise.

Object ID	Title	Author	Summary
			with him from the South Pacific staging island where the marines embarked on the long hot trip to "H-Hour" of "D-Day" off Tarawa beach, into the bouncing assault boat, to the reef and then ashore. Six days of as desperate fighting and brutal slaughter as this war probably will see.
2014.344.034	Pearl Harbor : Why, How, Fleet Salvage, and Final Appraisal	Wallin, Homer Norman	Pearl Harbor will long stand out in men's minds as an example of the results of basic unpreparedness of a peace loving nation, of highly efficient treacherous surprise attack and of the resulting unification of America into a single tidal wave of purpose to victory. Therefore, all will be interested in this unique narrative by Admiral Wallin. The Navy has long needed a succinct account of the salvage operations at Pearl Harbor that miraculously resurrected what appeared to be a forever shattered fleet. Admiral Wallin agreed to undertake the job. He was exactly the right man for it – in talent, in perception, and in experience. He had served intimately with Admiral Nimitz and with Admiral Halsey in the South Pacific, has commanded three different Navy Yards, and was a highly successful Chief of the Bureau of Ships. On 7 December 1941 the then Captain Wallin was serving at Pearl Harbor. He witnessed the events of that shattering and unifying "Day of Infamy." His mind began to race at high speeds at once on the problems and means of getting the broken fleet back into service for its giant task. Unless the United States regained control of the sea, even greater disaster loomed. Without victory at sea, tyranny soon would surely rule all Asia and Europe. In a matter of time it would surely rule the Americas. Captain Wallin salvaged most of the broken Pearl Harbor fleet that went

Object ID	Title	Author	Summary
			on to figure prominently in the United States Navy's victory. So the account he masterfully tells covers what he masterfully accomplished. The United States owes him an unpayable debt for this high service among many others in his long career. Table of contents: Introduction -- The trends toward war -- Problems and dilemmas of the United States and eventual preparedness for war -- The fleet at Pearl Harbor -- Imminence of war -- Japanese attack, strategy and tactics -- Results of Japanese surprise air raid -- Washington's response to the Japanese attack -- Observations and statements made by survivors -- Other ships' official reports -- "All hands" engaged in salvage work -- Getting the less-damaged ships ready for action -- Ships sunk at Pearl Harbor -- Conditions which prevailed or were encountered in salvage work -- Final appraisal of the Pearl Harbor attack.
2014.344.035	Guadalcanal : The Definitive Account of the Landmark Battle	Frank, Richard B.	The Battle of Guadalcanal was unique in many ways. It marked the first American offensive of the war and was fought not just on land, or at sea, or in the air, but in all three. The Navy fought seven major battles at and around Guadalcanal, and in one of them suffered the worst defeat at sea in its history; in an unremitting air battle, carrier and land-based planes wrestled for superiority at a cost of almost 1,2000 aircraft to both sides. The author draws on first-time translations of official Japanese Defense Agency accounts and recently declassified U.S. radio intelligence to recreate the struggle as never before. Contents: Strategy, Command, and the Solomons -- Plans, Preparations, and Approach

Object ID	Title	Author	Summary
			The Landing -- The Battle of Savo Island -- First Days Ashore -- The Tenaru The Battle of the Eastern Solomons -- Two Weeks of Sparring -- The Battle of Edson's Ridge Reinforcement and Reassessment -- Battles on the Matanikau -- The Battle of Cape Esperance The "High-Speed Convoy" -- The Battle for Henderson Field - - The Battle of the Santa Cruz Islands -- Retreats and Advances -- The Naval Battle of Guadalcanal, Part I: The Battle of Friday the Thirteenth -- The Naval Battle of Guadalcanal, Part II: Convoy and Capital Ship Actions The Battle of Tassafaronga -- The December Decision -- The Final Offensive Begins The Final Offensive Continues -- Operation "KE" -- Summary and Reflections
2014.344.036	Shattered Sword : The Japanese Story of the Battle of Midway	Parshall, Jonathan	Making extensive use of untapped Japanese primary sources, including Imperial Navy operational records never before used by Western authors, the authors reconstruct the actual sequence of the critical events of June 4, 1992, looking afresh at the decisions of the U.S. and Japanese Commanders, and placing them within the seldom-understood context of the Imperial Navy's doctrine and technology. This book is a substantive contribution to our understanding of the Battle of Midway.
2014.344.037	Steady Nerves and Stout Hearts : The Enterprise (CV6) Air Group and Pearl Harbor, 7 December 1941	Cressman, Robert J.	In the 48 years since Japanese planes attacked the U.S. Pacific Fleet at Pearl Harbor, many accounts of that event, written from varying viewpoints, have been published. It is not our intention to present yet another overview of what occurred on that day, as the 50th anniversary draws near, nor to debate at whose feet blame rests, but rather examine, in the form of a "small unit history," how that attack affected a certain group of men who suddenly found themselves thrust into a war.

Object ID	Title	Author	Summary
			This book began as an article recounting the trials and tribulations of the 36 men (Enterprise's air group commander, his passenger, 13 crews from Scouting Squadron SIX and four from Bombing SIX) who were Pearl-bound on the morning of 7 December 1941. As work progressed, however, we became convinced that, almost without exception, not even the accounts of Pearl Harbor which have emerged in recent years have described accurately the experiences of these men nor have detailed what other operations the carrier Enterprise (CV-6) and her air group conducted on that day. We believe that the narrative which follows is the first to identify the men from Enterprise who were in the air that morning in the skies near or over Oahu, and to detail what happened to them. While this story centers on the 36 aforementioned men assigned the a.m. search on 7 December, the Wake Island ferry mission that preceded it and the other operations that occurred on the 7th—the abortive searches for the Japanese fleet and the tragic loss of planes from Fighting Squadron SIX that night—have been included to provide a context for what went on before, and after, that momentous morning. (from back cover)
2014.344.038	Iowa Class Battleships : Their Design, Weapons & Equipment	Sumrall, Robert F.	This volume is a compilation of technical data on the four ships of the Iowa class and a study of the design changes and construction processes of the two ships that were cancelled. It also charts the careers of the "Iowa", "New Jersey", "Wisconsin" and "Missouri" from inception. (Source: Amazon.com)
2014.344.040	Air War Pacific : Fight for Supremacy in the Far East :	Campbell, Christopher	Beginning with an absorbing account of the growth of

Object ID	Title	Author	Summary
	1937 to 1945		naval air power in both the United States and Japan during the interwar years, continuing through the fierce combat over China and Manchuria between the Japanese, Chinese and toward 1937, Soviet air forces, this book covers in detail the wartime battlefield across the skies. The main focus of the narrative, however, is the struggle for supremacy between the United States and Japan in World War II, depicting in vivid detail the surprise attack on Pearl Harbor, the brilliant early successes of Japanese naval aircraft and the turning of the tide after 1942's Battle of Midway. Contents: Pacific overtures -- China and Manchuria -- The Japanese offensive in the Pacific -- Coral Sea and Midway -- The invasion of the Solomon Islands -- America on the offensive -- The reconquest of Burma -- The last battles -- The strategic bombing of Japan - - Aircraft profiles.
2014.344.041	Guadalcanal Diary	Tregaskis, Richard	The diary of a U.S. Marine. The diary encompasses the period from his initial approach to Guadalcanal through his departure from the island, including all of his observations and personal experiences.
2014.344.042	Little Giants : U.S. Escort Carriers Against Japan	Y'Blood, William T.	These ships, envisioned as hardly more than convoy escorts in the beginning, evolved into remarkably versatile vessels. Yes, they were used to escort convoys, but they also hunted submarines, provided air support for invasion forces, ferried men and planes to far-flung bases, delivered replacement aircraft and pilots to the fast carriers of Task Forces 58 and 38, and worked as troop transports. Despite the great activity of the eighty-six vessels built (some finished after the war) to serve all around the world for the United States Navy, their accomplishments, except for one glorious action in

Object ID	Title	Author	Summary
			October 1944, have never received the publicity and credit that they deserve. Contents: Learning the ropes -- The quickening pace -- Moving west -- Approach to the Philippines -- The return -- "They're shooting us in Technicolor" -- Death from the sky -- Finale at Leyte Gulf -- Divine Wind - two versions -- A covey of Kamikazes -- Visit to a vile island -- The longest battle -- Epilogue.
2014.344.043	Goodbye, Darkness : A Memoir of the Pacific War	Manchester, William	Manchester writes about himself and his years as a Marine in the World War II Pacific theater. Manchester was on Guadalcanal and later, in 1945, on Okinawa when most of his unit fell amid the war's bloodiest carnage...where he faced a duel to the death with a Japanese sniper. Contents: Blood that never dried -- The wind-grieved ghost -- From the Argonne to Pearl Harbor -- Arizona, I remember you -- Ghastly remnants of its last gaunt garrison -- The rim of darkness -- The raggedy ass marines -- The canal -- Les braves gens -- We are living very fast -- I will lay me down for to bleed a while... -- ...Then I'll rise and fight with you again.
2014.344.044	Enola Gay : Mission to Hiroshima	Thomas, Gordon	This is the second book of the same name by the same authors. This book; however, was published in 1995 and contains many more photos. This book is the story of the development of Project Manhattan and the establishment of the 509th Composite Group of the United States Army Air Force to implement the bombing of a Japanese city with the specific aim of forcing the final surrender of the Japanese.
2014.344.046	Battle for Bataan : An	Mallonee, Richard C.	From back cover:

Object ID	Title	Author	Summary
	Eyewitness Account		Colonel Mallonee's diaries, on which this book is based, are believed to be the only complete surviving eyewitness account of the Philippine campaign at the start of World War II to have survived the war intact. Mallonee incisively describes the fighting on Bataan; the valiant but losing struggle of Filipinos and Americans. The withdrawal of the Luzon army from the beaches of Bataan is an epic worthy of a place in history and the author makes it immediate and personal as well. After the dramatic moment on April 9, 1942, when the fall of Bataan came, the infamous Death March took place. Surviving that, the author became a "guest of the emperor" --a prisoner of war--for forty-two months. Liberation at the Manchurian camp at Mukden, ends this book on a note of triumph. The author's son Dr. Richard C. Mallonee II, undertook further research in Asia and the Philippines in order to document and clarify what his father had written. The result is a most readable, moving and informative tale of courage, endurance and final victory. Also published under the title Naked Flagpole
2014.344.047	Okinawa : The Last Battle	Appleman, Roy Edgar	Reprint of 1948 book From book jacket: As the LCT's plowed their way through the sea toward the island of Ikinawa, the fears of the soldiers and marines crouched behind the armoured bulwarks were exacerbated by the silence of the japanese shore batteries. For the defense of Ikinawa the japanese abandoned the tactics of fighting the marines on the beach. instead, they built a strong defensive ring of

Object ID	Title	Author	Summary
			concentric circles around Shuri Castle, hoping to contain the invasion and then counterattack and throw the invaders back into the sea. Against these defenses the American advanced would be measured in yards. The Battle for Okinawa would be the last fought in the war against Japan; it would also be the costliest in the loss of life and material. 13,000 soldiers, sailors and marines were killed and the Navy lost 36 ships sunk and 368 damaged. These losses would later make a forceful argument for the dropping of the atomic bomb on Japan.
2014.344.048	Fourth Marine Division in World War II, The	Proehl, Carl William (ed)	"Copyright 1946. First edition, December 1946." "The narrative was written by Master Technical Sergeant David Dempsey, former combat correspondent." This is a reprint of the 1946 edition. From Preface: This book has been prepared with the thought of preserving, by word and picture, the story of the Fourth marine Division for its members and their families. It is hoped that this historical record may serve as a perpetual memorial to every man who served and fought with the Division, for the story of the "Fourth" is the story of all its men. Although this is not an official U.S. marine Corps history of the Fourth Marine Division, it is nevertheless factual and accurate in the presentation of the role played by the Division in World War II. The narrative was written by Master Technical Sergeant David Dempsey, former combat correspondent with the Fourth Division and one of the five authors of The U.S. Marines on Iwo Jima. Most of the pictures appearing in this book were taken by photographers of the

Object ID	Title	Author	Summary
			Fourth Division; to them much credit is due for their outstanding photographic work, a large part of which was accomplished under extremely hazardous conditions.
2014.344.049	Marshalls : Increasing the Tempo, The	United States. Marine Corps.	From Foreword: As 1943 drew to a close, Marines had retaken Tarawa and portions of the Solomons from the Japanese invader, but the formidable enemy bases studding the vast Pacific, bases which had been built during the preceding 25 years, were as yet untouched by our amphibious forces. In early 1944 the first penetration of this prewar enemy territory was accomplished with the assault and occupation of Kwajalein and Majuro Atolls in the Marshall Islands. These were quickly followed by the seizure of Eniwetok Atoll. The major role in these over-all operations was undertaken by Marine units working in close coordination with the elements of the Army, Navy and Coast Guard. That they acquitted themselves with distinction is reflected in the rapidity with which they accomplished their missions. Operations in the Marshall Islands clearly indicated that Japanese bases in the Central Pacific could be by-passed. The way was now open for the neutralization of Truk and the assault on the Marianas, the next great step in the drive toward Japan.
2014.344.050	Japan at War : An Oral History	Cook, Haruko Taya	A work of oral history that captures the remarkable story of ordinary Japanese people during World War II. The authors take us from the Japanese attacks on China in the 1930's to the Japanese homefront during the inhuman raids on Tokyo, Hiroshima and Nagasaki, offering the first glimpses of how this century's most violent conflict affected the lives of the Japanese population.

Object ID	Title	Author	Summary
2014.344.051	Edson's Raiders : The 1st Marine Raider Battalion in World War II	Alexander, Joseph H.	This is the story of the remarkable men of 1st Marine Raider Battalion, known by the name of its founding commander, the legendary jungle fighter Merritt A. "Red Mike" Edson. Edson's Raiders provided the vanguard of a U.S. Marine corps experiment with special lightly armed, mobile commando units in the Pacific. From 1942 to 1943, these highly trained volunteers fought seven critical battles with names like Tulagi, Tasimboko, the Matanikau River, and the Dragon's Peninsula in the Solomon Islands. They were desperate, blood affairs against some of the most experienced jungle fighters in the Japanese empire. twenty-four Raiders served with such valor that the U.S. Navy named ships in their honor--all but one designated posthumously.
2014.344.052	One Sunday Morning	Sheehan, Ed	Ed Sheehan, a survivor of Pearl Harbor, recounts his experiences on the day Pearl Harbor was attacked. Includes 19 color illustrations by Robert McCall. This commemorative edition is to the memory of the 2341 American servicemen who died at Pearl Harbor, December 7, 1941. On cover there is a 30th anniversary Pearl Harbor Survivors Association label. At the end of the book, all the active members of the Pearl Harbor Survivors Assoc. are listed by ship they served on.
2014.344.053	Blossoms in the Wind	Sheftall, Modecai G.	In a last-ditch, desperate attempt to stave off the inevitable, the Japanese high command unleashed a new breed of warrior unique in the history of human conflict. They were the kamikaze--living incarnations of the legendary "Divine Wind" that had saved the home islands from invasion centuries before--idealistic young men believing there could be no greater glory than to sacrifice their lives in suicide attacks to defend the sacred soil of their homeland as a proud nation prepared to choose "the honorable death of the 100 million" over the ignominy

Object ID	Title	Author	Summary
			of surrender and occupation. Soon after the 9/11 attacks, ethnographer M. G. Sheftall was given unprecedented, intimate access to the cloistered community of Japan's last remaining kamikaze corps survivors. The result is a poignant and unforgettable glimpse into the lives and mind-sets of former kamikaze pilots, who, through chance or fate, were prevented from completing their final missions. --Dust Jacket
2014.344.054	Hell Wouldn't Stop : An Oral History of the Battle of Wake Island	Cunningham, Chet	This gritty, poignant, sometimes disturbing oral chronicle reconstructs one of the first and most devastating military engagements in World War II -- the battle for Wake Island -- in the words of the U.S. servicemen who survived it and the hellish aftermath. Among those men stood author Chet Cunningham's older brother, Kenneth, then barely eighteen and a private in the U.S. Marine Corps.--Dust Jacket
2014.344.055	We Will Stand by You : Serving in the Pawnee, 1942-1945	Mason, Theodore C.	The Pawnee belonged to a new class of fleet tugs designed for deep-sea towing, salvage and firefighting. During World War II, while on her 25-month tour of the South and Western Pacific, she rescued many crippled and stranded ships while braving enemy torpedoes, bombs, and mines. This is the story of the heroics performed by the Pawnee and her crew.
2014.344.056	Rising Sun Victorious : The Alternate History of How the Japanese Won the Pacific War	Tsouras, Peter G. (ed)	This convincing sideways look at World War II in the Pacific examines the monumental possibilities of the ways not taken: the opportunities for decisive advantages that could have been won by the arms of Imperial Japan.
2014.344.057	Attack on Yamamoto	Glines, Carroll V.	Here is the dramatic story of the American mission to shoot Japan's greatest admiral out of the sky, told by the award winning author of The Doolittle Raid.
2014.344.058	Mantle of Heroism : Tarawa and the Struggle for the Gilberts, November 1943	Graham, Michael B.	Fifty years ago, American troops came perilously close to disaster on the Pacific's remote Gilbert Islands. Just before

Object ID	Title	Author	Summary
			dawn on Sunday, November 20, 1943, Operation Galvanic was launched--the first major amphibious operation against Japanese-held islands. Over 100,000 men and the largest assembly of warships in history were in place off islands shielded by razor-sharp barrier reefs. Confidence was high as the Americans boarded their landing craft. But the Japanese had prepared well. Just a few hours later, at Tarawa Atoll, the confidence changed to horror as the amphibious vehicles were torn apart by murderous fire, and the Marines, forced to wad ashore, were cut down by enemy machine guns. The capture of Tarawa and Makin atolls was billed as a stunning victory, but the cost is questioned to this day.
2014.344.060	Build the Musashi : The Birth and Death of the World's Greatest Battleship	Yoshimura, Akira	Translation of Senkan Musashi. The authors reconstruction of the birth of the Musashi portrays a nation preparing for total war. Under these extreme conditions, courage, genius, and integrity coexisted with brutality, folly, and paranoia. During the more than four years it took to build and outfit it, shipyard engineers and their Navy mentors were faced with seemingly insurmountable technical problems and plagued by natural calamities and the constant fear of espionage. The solutions they found to each successive crisis were sometimes brilliant, sometimes absurd. Battleship Musashi is a tribute to the men who achieved this engineering marvel and a testament to the excesses of bureaucratic militarism.
2014.344.062	Action in the Pacific : As Seen by US Navy photographers During World War 2	Sowinski, Larry	While numerous books have talked extensively, and motion pictures have glamorized unrealistically, few attempts have been made to reproduce the immense pictorial record made by the United States navy's Combat Photographers. They took hundreds of thousands of pictures during World War II. Almost all of them were candid. A total of nearly 500 of these

Object ID	Title	Author	Summary
			photographs--including 16 pages in full color--have been selected for this book, with the emphasis on rarely seen or never previously published shots. Each of the US Navy's major campaigns is covered in turn, with an introduction outlining the background and a detailed caption for each picture. From Dust Jacket. Pages 42-43 have pictures of the Battle of Midway.
2014.344.063	Follow Me! : The Story of the Second Marine Divison of World War II	Johnston, Richard W.	This book is for those general readers who may wish to know how a Marine Division is created. How its traditions grow, how it fights, and the kind of men that grow out of it. This book has 11 signatures on the inside front cover.
2014.344.064	Bombers, The : The Illustrated Story of Offensive Strategy and Tactics in the Twentieth Century	Cross, Robin	This is book is a look at the men and machines who have transformed warfare and left an indelible mark on the history of the Twentieth century. Written with style and copiously illustrated with photographs, charts, maps, diagrams and unique panoramas giving "view from the cockpit," the book covers every major world conflict.
2014.344.065	Tarawa : The Aftermath	Allen, Donald K.	The battle for Tarawa was a pivotal event in the Pacific Theater at the end of 1943. The Gilbert Islands were the south easternmost outposts of the Japanese Empire and Betio Island of Tarawa Atoll had been transformed into the most heavily fortified base, yard-for-yard, of any in the Pacific. The fighting was fierce and the Marines suffered heavy casualties, with over 1,000 dead. The 4,800 Japanese defenders, however, were virtually wiped out. Only 17 Japanese remained alive on November 23 when the battle ended. Much was learned from Tarawa, and the lessons were implemented during subsequent campaigns. From Dust Jacket.
2014.344.067	Japanese Merchant Marine in World War II, The	Parillo, Mark P.	The destruction of Japanese shipping by American forces was one of the most potent causes of Japan's devastating defeat in World War II. This

2014.345.008	Ace! : A Marine Night-Fighter Pilot in World War II	Porter, R. Bruce	Bruce Porter's life as a Marine combat fighter pilot, including aerial combat over the Solomons and Okinawa during WW II. ----- From his early days as a raw cadet before the war to a rare firsthand account of aerial warfare over the Solomons and daring missions over the blood-soaked sand of Okinawa, this is one fighter pilot's story. Colonel R. Bruce Porter takes you inside the cockpit of his single-engine Hellcat night-fighter for the daring missions that earned him the title Ace. This exciting and personal story of courage under fire offers a rare look into the men who truly had "the right stuff!" With a special introduction by "Pappy" Boyington (from back cover of paperback edition)
2014.345.010	Gallery Classics, Volume I : Two Complete Novels by America's Supreme Writer of Sea Stories	Gallery, Daniel V.	Twelve stories of giant practical jokes or tricky maneuvers played by various officers of the Navy--a Blue Angel pilot, a bright young Ensign, and various competitive Admirals--on other members of their service, the Army, and gentlemen of the press ----- STAND BY-Y-Y TO START ENGINES By DANIEL V. GALLERY Ever since "Now, Hear This!" came off the presses the Navy has been laughing so hard it can't steer a straight course. And ex-, potential, and would-be Navy types have been delighting in this yarn about the monkey business that goes on down on the lower decks of a big aircraft carrier. "Stand By-y—y to Start Engines" by the same author, takes the reader up into the

Object ID	Title	Author	Summary
			more dignified atmosphere of the ward room, flight deck, and Admiral's cabin. But Lt. Comdr. Curly Cue, Ensign Willy Wigglesworth, and others see to it that life up there doesn't become routine. They do things that would scandalize the Joint Chiefs of Staff, sometimes aided and abetted by one Admiral Windy Day, sometimes to his dismay and confusion. This book is required reading for all seafaring men who like robust, salty humor. Landlubbers are allowed to read it, too. provided they have no stitches from recent operations that are likely to bust loose. The author, a retired admiral himself, says he wants it distinctly understood that no such hanky-panky as this was ever tolerated on any of the ships that he commanded. DANIEL V. GALLERY graduated from The Naval Academy in 1920 (a year ahead of his class), and retired in 1960 as a Rear Admiral. Between those years he was an Olympic wrestler, a Naval Aviator for thirty-four years, and commanded the hunter-killer task group that captured the German submarine U-505 off the African coast in 1944 — the only U-boat ever captured in battle and the Erst enemy warship captured by the U.S. Navy since 1815. Admiral Gallery holds the Distinguished Service Medal, Bronze Star, Presidential Unit Citation, Commendation Ribbon, and C.B.E. A specialist in ordnance, Admiral Gallery has invented gunnery and bombing devices. He has flown all types of planes, including jet fighters and bombers. While Commander of the Caribbean Sea Frontier, he also was Little League Baseball Commissioner for Latin America and organized the only non-West

			Indian steel band in the world. He has published three books, and dozens of short stories and articles on subjects ranging from military affairs to the reason a curve ball curves. (from dust jacket flaps)
2014.345.011	Basic Principles of Flight	Gruber, Beth (ed)	This book is part of the Balsa Gliders kit. A note on the verso of the title page says that it is not to be sold separately. The book gives a short history of flight, and then a short chapter on what makes a plane fly. There are chapters on lift, weight, thrust, and drag. The last part of the book is dedicated to flying balsa gliders.
2014.345.012	Great Santini, The	Conroy, Pat	Pat Conroy's first novel is a study of the family life of a Marine Corps fighter pilot. Made into a movie of the same name starring Robert Duvall.
2014.345.013	Hooked : Tales & Adventures of a Tailhook Warrior	Fisher, Clayton E.	Personal history of US Navy pilot CDR Clayton Fisher and his experiences flying from the USS Hornet in World War II, including the battles of Midway and Santa Cruz. There is also a chapter on the B-25 Mission to bomb Tokyo in 1942 and a chapter on the author's experience leading Corsairs and AD bombers from the USS Essex during the Korean War.
2014.345.014	Thoughts of a Philosophical Fighter Pilot	Stockdale, James B.	From August 1959 to march 1960, LCDR James B. "Jim" Stockdale was Executive Officer (XO) of fighter squadron VF-24 on the USS Midway. Vice Admiral Stockdale was on active duty in the navy for thirty-seven years. As a fighter pilot operating from an aircraft carrier, he was shot down over North Vietnam in 1965. As the senior naval officer among the prisoners of war in Hanoi for seven and a half years, he was tortured fifteen times, put in leg irons for two years, and confined in solitary for four years. This experience was the crucible for his philosophical thought on issues of character, leadership, integrity, personal

Object ID	Title	Author	Summary
			and public virtue, and ethics. Much of his philosophy is drawn from the Stoic philosophers, especially Epictetus, whom he had read before his capture. The selections in this volume converge around the central theme of how man can rise with dignity to prevail in the face of adversity - lessons just as valid for the challenges of present-day life as they were for the author's Vietnam experience. (from books.google.com)
2014.346.001	USS Tarawa Mediterranean Cruise 1951-52	Trufant, William V. (ed)	Pictorial account of the deployment of the Essex-class aircraft carrier USS Tarawa (CVA-40) on a 1951-1952 Mediterranean cruise, Captain Clifford H. Duerfeldt, USN commanding. CAG-8 embarked. Including Attack Squadron 859, Fighter Squadrons VF-671, VF-921, VC-62, VF-22, VC-12, VC-33 Ports of Call: Augusta Bay; Cannes; Palma; Oran; Palermo; La Spezia; Naples; Genoa; Suda Bay; Istanbul; Athens; Aranci Bay; Gibraltar.
2014.346.003	Traditions of the Navy : A Collection of Naval Customs, Terms and Traditions	Windas, Cedric W.	Original 1942 edition. A compilation and explanation of seafaring customs, terms and traditions from around the world.
2014.347.001	USS Midway (CV-41) - Desert Magic - 1990-1991	Guido, S. (ed.)	A pictorial account of the activities and crew of USS Midway in the period July 1990 through June 1991. It was an eventful period in the life of Midway that saw her as the flagship of the U.S. Naval Presence on the Northern Arabian Sea and Persian Gulf in the leadup to and execution of Operation Desert Storm. Midway was on station from November 1990 to March 1991. This was part of a western Pacific/I.O. deployment that took place from 2 October 1990 to 17 April 1991. Port visits during the period the cruise book covers were Subic Bay (2), Singapore, Abu Dhabi, Pattaya Beach and Hong

2014.350.016	USS America (CVA-66) - Crew's Book, Mediterranean Cruise - 1974	Donaldson, James W. (ed.)	Pictorial account of 1974 Mediterranean Sea cruise. The ship departed Norfolk on 3 January and returned to Norfolk on 3 August. Ports visits included: Toulon, France; Valencia, Spain; Barcelona, Spain; Istanbul, Turkey; Athens, Greece; Palma de Mallorca, Spain. CVW-8 was embarked with: VF-143 (F-4J) VF-142 (F-4J); VA-82 (A-7C); VA-86 (A-7C); VA-35 (A-6E and KA-6D); RVAH-1 (RA-5C) ; VAQ-133 (EA-6B); VAW-124 (E-2B); and HC-2 (SH-3G). USS America (CV-66) Kitty Hawk-class aircraft carrier.
2014.350.017	USS Enterprise (CVN-65) - WESTPAC - 1972-73	Keefer, Joel D. (ed.)	Pictorial account of the deployment of the USS Enterprise in 1972-73 to the western Pacific. The ship departed Alameda on 12 September 1972 and returned to Alameda on 12 June 1973. Significant operations included line periods in the South China Sea in support of the Vietnam War that was wound down in the middle of the deployment. Port visits included: Subic Bay, Philippines; Hong Kong; Singapore; and Pearl Harbor, Hi. CVW-14 was embarked, with: VF-143 (F-4J); VF-142 (F-4J); VA-27 (A-7E); VA-97 (A-7E); VA-196 (A-6E/B & KA-6D); VAW-113 (E-2B); VAQ-131 (EA-6B); RVAH-13 (RA-5C); and HS-2 Det 1 (SH-3G).
2014.350.018	USS Oklahoma City (CL-91) - Yearling, The, A Pictorial History of the First Year in the Life - December 1944 - December 1945	None Stated	A pictorial account of the first year in the active life of the USS Oklahoma City (CL-91) The ship was launched in FEB 1944 and Commissioned on 22 December 1944. The ship transited to the Pacific via the Panama Canal and took part in the last weeks of the war against Japan, during which it conducted but one shore bombardment against the Japanese home islands. It entered Tokyo Bay in October of 1945 and remained there

Object ID	Title	Author	Summary
			through the remainder of the period of the cruise book coverage. Contains photos of Yokosuka and Tokyo in the immediate post-war period. A log of the ship's activities during the period is provided.
2014.350.019	USS Los Angeles (CA-135) - 1958-59	Robinson, G. E. (ed.)	A pictorial account of two deployments of the USS Los Angeles to the western Pacific, one each in 1958 and 1959. Also some ancillary events in CONUS during the period such as the Portland Rose Festival. First deployment on less than a day's notice due to the Matsu & Quemoy islands flare-up. In both deployments the ship departed and returned to Long Beach. Ports calls in the period included: Portland; San Francisco; Pearl Harbor; Midway; Guam; Keelung and Kaohsiung, Formosa; Boko-ko, Pescadores; Kobe, Nagoya, Yokosuka, Yokohama, and Shimoda, Japan; Subic Bay, Philippines; and Buckner Bay, Okinawa. Oklahoma served as flagships for A Fleet Review in San Francisco 6-10 July 1958 at which the reviewing officer was Admiral Chester Nimitz. Contains color photographs of a Regulus missile launch.
2014.350.020	USS Prairie (AD-15) -1992	Walley, Matthew (ed.)	A pictorial account of the 52-year service life of the USS Prairie and of her final deployment to the western Pacific and Indian Ocean in 1992. The ship departed Long Beach on 24 January and returned to Long Beach on 24 July. Port calls included Pearl Harbor, Guam, Subic Bay, Singapore, Abu Dhabi, Jebel Ali, Bahrain and Sri Lanka [Colombo?].
2014.350.021	USS Saint Paul CA-73 - 1969	Shields, Jim (ed.)	A pictorial account of the 1969 WESTPAC cruise of the USS Saint Paul (CA-73), a Baltimore-class cruiser, in support of combat operations in Vietnam. The ship departed San Diego on 21 March and returned to San Diego on 7 October. She spent 150 days at sea, including 93 days in five periods on the gunline near the DMZ. Port visits included Pearl Harbor,

			Subic Bay, Bangkok, Hong Kong, Pusan and Sasebo.
2014.350.022	USS Saint Paul CA-73, Vietnam - 1968	Sandbote, Lou (ed.)	A pictorial account of the 1968 WESTPAC cruise of the USS Saint Paul (CA-73), a Baltimore-class cruiser, in support of combat operations in Vietnam. The ship departed San Diego on 20 March and returned to San Diego seven months later (date not specified). She spent 103 days on the gunline where she fired over 64,000 rounds, a record for one ship in a deployment. Port visits included Pearl Harbor, Subic Bay, Yokosuka, Hong Kong, and Keelung. She had her 12- and 5-inch gun barrels replaced during a yard availability in Subic Bay.
2014.350.023	U.S.S. Indiana - 1945	Webb, T. S. (ed.)	Pictorial account of USS Indiana's participation in the final year of World War II. Includes photos of life aboard ship, pictures of native life in the Pacific, actual combat scenes and immediate post-war photos of Japan. Includes a diary of significant events from commissioning in 1942 through her September 14 1945 departure from occupation duties to the U.S.
2014.350.024	USS New Jersey (BB-62) - Big Thunder Under - 1988	Nelson, Mike (ed.)	Cruise Book. Pictorial account of the Westpac/Australia deployment of USS New Jersey in 1988 (AUSSIE TREK 88). After an extensive overhaul in Long Beach from Spring 1987 to July 1988, the ship departed on her cruise. NEW JERSEY performed as part of a surface action group, a small group of the battleship and two escorts which could operate independently with air cover offered by a nearby carrier or land base. NEW JERSEY also staged off the coast of Korea prior to the Olympic games and spent two months in Australia during that nation's bicentennial as the naval centerpiece of the festivities. Port calls included Pearl Harbor, Pusan, Inchon, Subic Bay, Fremantle, Hobart, Brisbane and Sydney. The ship returned to Long Beach in November after a four-month

			cruise.
			Includes two patches from the 2024.378 accession.
2014.350.025	USS Salisbury Sound (AV-13) - Westpac Cruise - 1964-1965	Pool, Larry (ed.)	A pictorial account of the deployment of USS Salisbury Sound (AV-13) to the western Pacific in 1964-5. The ship departed Oak Harbor, WA in November 1964 and returned to Oak Harbor in June 1965. Port visits included Yokosuka, Iwakuni, Keelung, Kaohsiung, Sangley Point (Manila), Subic Bay, Hong Kong and Bangkok. A few pages are also devoted to the diaster relief provided by 'Sally' 27 March to 10 May 1964 in connection with the Good Friday Earthquake that struck the island of Kodiak, Alaska.
2014.350.026	USS Salisbury Sound (AV-13) - Westpac Cruise - 1966	Johnson, Byron L. (ed.)	A pictorial account of the deployment of USS Salisbury Sound (AV-13) to the western Pacific in 1966. The ship departed Oak Harbor, WA on 31 January. After visits to San Diego for supplies, Bangor, Washington for ammunition and Bremerton shipyards for repairs, the Salisbury Sound departed the United States from San Diego 5 February for Yokosuka, Japan. The ship left Yokosuka 23 February and made quick stops in Kobe, Japan and Buckner Bay, Okinawa before getting back to the business of tending her seaplanes in Cam Ranh Bay, South Viet Nam. She arrived there on 4 March. Capt. Clarence E. Mackey relieved Capt. Earnest R. Horrell as Commanding Officer of the Salisbury Sound 7 March. It was the first time a United States man-o-war changed Captains in Viet Nam. On March 26 the ship secured her seadrome operations and pulled out of Cam Ranh Bay for Subic Bay, P.I., arriving there two days later for a five day stay before steaming to Hong Kong. She then proceeded to Buckner Bay. From Buckner Bay she went to Keelung, Taiwan, and after three days in port there, the Salisbury Sound headed

Object ID	Title	Author	Summary
			for Kaohsiung, Taiwan, arriving 9 May. Returning to Cam Ranh Bay, South Viet Nam on 15 May, the ship set up her seadrome and tendered her planes until 3 June, when she lifted anchor and steamed for Bangkok, Thailand, for a four-day goodwill visit. She went back to Subic Bay for provisions and rest for the crew before beginning nearly three months of seaplane operations: in Buckner Bay from 17 June to 6 July, in Cam Ranh Bay from 10 July to 6 August, and again in Buckner Bay from 12 to 29 August. On the 29th, the ship headed for Sasebo, Japan for a goodwill visit and rest for the crew arriving 31 August. After a ship's party, the USS Salisbury Sound pulled out of Sasebo 9 September and headed to Buckner Bay for fueling and supplies. The ship departed Buckner Bay 27 September and headed for Subic Bay, where she moored alongside the Currituck, her sister ship, on 30 September, and transferred the Commander Patrol Force Seventh Fleet, Rear Adm. Roy M. Isaman to the Currituck before heading to Cam Rahn Bay on 5 October. During her last operations in Cam Rahn Bay, from 7 to 27 October, the ship pumped her millionth gallon of aviation fuel to her attached seaplanes, setting a record for a seaplane tender for number of gallons pumped during one cruise. On 27 October, the Salisbury Sound hoisted a 540-foot homeward bound pennant and steamed from Cam Rahn Bay for the last time. On 2 November the ship pulled out of Subic Bay and steamed for Buckner Bay for refueling before starting across the Pacific bound for the United States. The long-awaited trip back began 5 November. The Salisbury Sound pulled into Oak Harbor for the last time 21 November, [The ship was decommissioned on 31 march 1967.] (Most text from http://salisburysound.org.)

2014.354.001	Fighter Aces of the U. S. A.	Toliver, Raymond F.	"Fighter Aces of the USA"

Object ID	Title	Author	Summary
			contains the most detailed list of all known American This is a revised edition of the 1979 book. This book is the most complete, full-spectrum book ever published on American fighter aces, and includes dozens of aces' combat accounts, plus capsule biographies. Evolution of aircraft, tactics and armament is seen through the eyes of the 1400 elite Americans who earned the coveted title "Ace." Comprehensive revisions and updates to this new edition include the most complete statistics of American aces ever published, and is fully current to date of publication. Authoritative and compelling narrative also presents eyebrow-raising facts on enemy aces who fought Americans in all wars and theaters. Lists include names and scores, plus intriguing data on Soviet Air Force aces who battled USAF aces over Korea.
2014.354.002	Fighter : A History of Fighter Aircraft	Cooper, Bryan	FIGHTER is the third in a series of authoritative illustrated studies of war machines and equipment, designed to be easily comprehensible to layman and expert alike. Attractively presented and lucidly written they combine a wealth of information with striking visual clarity. The first title to be published in the series was Tank: A History of the Armoured Fighting Vehicle by Kenneth Macksey and John Batchelor; the second was Artillery by Ian Hogg and John Batchelor. Next will be Bomber. (from back cover)
2014.354.003	Lost Subs : From the Hunley to the Kursk, the Greatest Submarines Ever Lost - and Found	Dunmore, Spencer	Through gripping text and powerful images, this chronicle traces the evolution of the submarine and the history of under-the-seas warfare. Harrowing tales of a submerged death and eerie images of ghost ships are haunting, yet the daring stories of the vessels and their inhabitants invoke a nostalgic courage, allowing the reader to reflect on a sunken,

Object ID	Title	Author	Summary
			dark fate that is rarely mentioned. State-of-the-art underwater photographs, accompanied by archival images and cutaway diagrams, answer many questions about why each submarine sank and make this the definitive illustrated history. About the Author Spencer Dunmore is a historian and a novelist who specializes in military history. He is the author of Bomb Run, Final Approach, In Great Waters, and Squadron and the coauthor of Exploring the Lusitania. He lives in Burlington, Ontario. Dr. Robert D. Ballard is an explorer and leading marine geologist who helps develop new underwater exploration technology. He discovered the sunken Titanic and Bismarck ships. He is the author of several books about his discoveries, including The Discovery of the Titanic, Finding the Titanic, and Graveyards of the Pacific. He lives in Mystic, Connecticut. (from Amazon.com)
2014.354.004	Iron Coffins : A Personal Account of the German U-boat Battles of World War II	Werner, Herbert A.	The authors tells of his own personal experiences in the German U-boat force in World War II. He tells the details of the U-boat war from the beginning of hostilities to the end of the war.
2014.354.005	Broken Seal : The Story of "Operation Magic" and the Pearl Harbor Disaster	Farago, Ladislav	Was there a conspiracy in the White House to maneuver the Japanese into the war? Were the commanders in Hawaii derelict in their duty when they failed to anticipate the raid on Pearl Harbor? Exactly how much did the US know about Japanese intentions on the even of Pearl Harbor? This book not only presents definitive answers but abounds in astounding revelations, including: How the US Navy broke two of the Japanese navy's highest-security codes as early as 1926, only to "lose" both on the evenof the Pearl Harbor attack -- Why the US Navy refused to share the secret of its own

Object ID	Title	Author	Summary
			code-breaking activities with the US Army -- How the Japanese gained invaluable information about American strategy and strength from a member of President Roosevelt's own Cabinet -- How the treachery of two highly trusted American cryptologists enabled the Japanese to learn that the US was cracking their codes -- and how decoded messages which actually pinpointed Pearl Harbor as the target for attack were neglected until it was
2014.354.006	Pearl Harbor : The Verdict of History	Prange, Gordon William	Sequel to "At Dawn We Slept" This volume is the story not of Pearl Harbor but of the responsibility for Pearl Harbor. It deals not with action but with reaction. No book on this subject has ever given such complete coverage to the acts, failures to act, and the mental attitudes that made the Japanese attack on Pearl Harbor possible and successful.
2014.354.007	Remember Pearl Harbor!	Clark, Thomas Blake	Remember Pearl Harbor!, published in 1942, was the first book to be released following the Japanese attack on Oahu on December 7, 1941. The book, by long-time Hawaii resident Blake Clark, provides an overview of what happened on that fateful day, as well as stories of sailors, flyers, soldiers, doctors, nurses, and civilians affected by the attack, plus an look at the large Japanese community present on Oahu. This firsthand account is an important look at life on Hawaii at the time of the attack and shortly afterward. The 1st edition was initially printed quite soon- in early '42, and subsequently reprinted, and later revised a few times over the years. Contents: This is Honolulu -- At the Flying Fields -- At Pearl Harbor -- Some Noncombatants The Wounded -- Blood Bank -- The Dead -- The Japanese Community -- The Niihau Story Two Months After -- Remember Pearl Harbor
2014.354.008	Boat, The	Buchheim, Lothar Gunther	Novel of life and death in a

Object ID	Title	Author	Summary
			World War II German submarine. Translated from the German Das Boot by Denver and Helen Lindley.
2014.354.009	At Dawn We Slept : The Untold Story of Pearl Harbor	Prange, Gordon W.	The authentic record of how Japan planned and executed the infamous assault. The 1941 attack was a military classic, one of the greatest surprises in the history of warfare. It shattered the quiet Sunday morning on Oahu, destroying myths, illusions, cherished ideas, and assumptions, as completely as a tornado levels a Midwestern town. Pearl Harbor was a national disgrace. It remains a living symbol of America's lack of alertness, and its gross underestimation of a potential enemy. This book tells us about ourselves as a people, our political and military leaders, and the way they thought and acted.
2014.354.010	Pearl Harbor : The Day of Infamy - An Illustrated History	Van der Vat, Dan	Illustrated history re-creates for a new generation every key moment of those unforgettable hours at Pearl Harbor. Chronicles in careful detail the path that led to the raid, the destruction it wrought, and the world-changing events that followed in its wake. from the index -- Arizona - Atomic bombs - Barkley, Alben -- Battles of the Coral Sea, of Midway, of the Surigao Strait, of Tsushima -- Battleship Row - - Blue -- California -- Cassin -- Churchill, Winston -- CINCPAC -- Codebreakers -- Colorado -- Condor -- Congressional Medal of Honor -- Corrigedor -- Crossbill -- Curtiss -- Detroit -- Doolittle, James -- Downes -- Enterprise -- Ewa Marine Corps Air Base -- Finn, John -- Ford Island -- Fort Shafter -- From Here to Eternity -- Fuchida, Mitsuo -- Grayling -- Guadalcanal -- Gudgeon -- Halsey, William -- Harding, Warren -- Hawaiian Air Force -- Helena -- Hickam Field -- Hirohito, Emperor of Japan -- Hiroshima -- Hiryu -- Honolulu -- Hornet -- I-24 (midget submarine) -- I-173 (submarine) -- Kaneohe Naval Air Station -- Kimmel, Husband -- Kurile

2014.354.011	Fighters at War : The Story of Air-to-Air Combat	Spick, Mike	This fact-filled volume takes us through the evolution of one of the most potent weapons ever invented - the fighter, the warplane dedicated to air-to-air combat. The author relates how the basic tactics of air fighting were born, tactics that are as valid today as then. There is a separate chapter on Naval Air Power, 1941-1945.
2014.354.012	Aircraft of World War II : Development, Weaponry, Specifications	Jackson, Robert	This book details the development, performance, and weaponry of 75 of the most fascinating and influential fighting aircraft of World War II.
2014.354.013	Aircraft of the Aces : Legends of World War 2 : Featuring the Acclaimed Artwork of Iain Wyllie	Holmes, Tony (ed)	This book showcases the specially commissioned cover artwork of leading aviation artist Iain Wyllie, who has produced over 30 action-packed paintings for the world's most successful aviation series of recent years, Aircraft of the Aces. Combat reports by the aces themselves form the basis of the text, along with a brief pilot biography and technical specifications of the aircraft featured in the artwork. Contemporary photographs and a full-colour side-view

Object ID	Title	Author	Summary
			profile ccomplete each chpter, whilst the book's appendices include a selection of 28 1/2nd scale drawings and a concise tabular listing of the high-scoring aces of World War 2.
2014.354.014	Robert Taylor's Battle of Britain : Taylor, Robert Commemorative Collection		This is a book of the aviation art of Robert Taylor. In addition to the paintings, there are descriptions of the action of the battles. Includes short bios of some of the aviators, and personal descriptions of flying some of the planes.
2014.354.015	50 Years of Aviation Art	Wootton, Frank	This magnificent collection of aircraft to be found in this book celebrates fifty years of painting by Frank Wootton, one of the most popular aviation artists of his generation. 69 illustrations.
2014.354.016	Air Combat Paintings of Robert Taylor, The [Vol. 1]	Weston, Robert	This is the first of a series of volumes of aviation art paintings of Robert Taylor. Besides copies of the paintings, the book features in-depth visual and verbal studies of many of Taylor's most outstanding paintings, along with a wealth of colour details, pencil sketches and photographs. Much of this visual material has never been published before.
2014.354.017	Robert Taylor : Air Combat Paintings, Vol. 6	Taylor, Robert	This, his latest book, contains Robert Taylor's most recent works and several unpublished paintings. Robert Taylor is widely regarded as the premier painter of aviation subjects living today--a reputation established over the last four decades.
2014.354.018	Aviation Art of World War II	Stillwell, Paul	This book was originally published as three separate volumes: Flying Aces (vol. 1), Bomber Missions (vol. 2), and Carrier War (vol. 3). We currently have backup copies of Flying Aces and Carrier War. This book presents more than 200 paintings that capture the aerial encounters of WWII in vivid detail, featuring contributions from today's most noted aviation artists, including Robert Bailey, Stan Stokes, Robert Taylor, Jim Dietz, Keith Ferris, and Roy Grinnell.

Object ID	Title	Author	Summary
2014.354.019	Inferno : The World at War, 1939-1945	Hastings, Max	From one of our finest military historians, a monumental work that shows us at once the truly global reach of World War II and its deeply personal consequences. Contents: Poland betrayed -- No peace, little war -- Blitzkriegs in the west -- Britain alone -- The Mediterranean -- Barbarossa -- Moscow saved, Leningrad starved -- America embattled -- Japan's season of triumph -- Swings of fortune -- The British at sea -- The furnace: Russia in 1942 -- Living with war -- Out of Africa -- The bear turns: Russia in 1943 -- Divided empires -- Asian fronts -- Italy: high hopes, sour fruits -- War in the sky -- Victims -- Europe becomes a battlefield -- Japan: defying fate -- Germany besieged -- The fall of the Third Reich -- Japan prostrate -- Victors and vanquished
2014.354.020	Great American Bombers of WWII	Hess, William N.	This book is in three parts: B-17 Flying Fortress by William N. Hess, the B-24 Liberator by Frederick A. Johnsen, and the B-29 Superfortress by Chester Marshall. This book tells the detailed design, development, and combat history of the most impressive bombers of World War II : the B-17 Flying Fortress, the B-24 Liberator, and the B-29 Superfortress. From the European to the Pacific theaters, follow along as pilots and crew members recall their fascinating, hair-raising tales. Illustrating these stories are nearly 450 color and black and white photographs depicting the many different models and modifications of these planes along with the colorful nose art and markings they carried.--Back cover.
2014.354.021	Great Battles of World War II	Mann, Chris (ed)	This book offers a colorful introduction to 28 major battles from 1939-1945. Each battle includes a concise account of the action, with a broader introductory context and an analysis of the aftermath. A specially commissioned color map illustrating the dispositions and movement of forces

Object ID	Title	Author	Summary
			brings the subject to life. Includes more than 250 color and black and white photographs, artworks, and maps.--From Dust Jacket Contents: Introduction -- Early years: Westerplatte (1939) -- Narvik (1940) -- Invasion of France - Sedan (1940) -- Dunkirk (1940) -- Battle of Britain (1940) -- Battle for Crete (1941) -- Hunt for the Bismarck (1941) -- Operation Barbarossa (1941) -- Siege of Leningrad (1941-44) -- In the balance: Pearl Harbor (1941) -- Battle of Midway (1942) -- Convoy PQ-17 (1942) -- El Alamein (1942) -- Battle of Guadalcanal (1942-43) -- Stalingrad (1942-43) -- Third battle of Kharkov (1943) -- Kursk (1943) -- Battle of Imphal and Kohima (1944) -- Monte Cassino (1944) -- Allied victory: Normandy landings (1944) -- Breakout from Normandy (1944) -- Philippine Sea (1944) -- Warsaw rising (1944) -- Operation 'market garden' (1944) -- Battle of the Bulge (1944-45) -- Iwo Jima (1945) -- Battle for Berlin (1945) -- Okinawa (1945) -- Index.
2014.354.022	Pacific Legacy : Image and Memory from World War II in the Pacific	Smith, Rex Alan	This book presents something else unique among World War II histories, an unprecedented color record--spanning nearly 30 years --of dramatic wartime relics that survived for decades on most of the Pacific island battlefields. American landing craft and tanks are still there on treacherous reefs and beaches where tragically they were stopped by enemy fire so long ago; aircraft of both sides lie hidden in jungles where they crashed; battle-scarred Japanese pillboxes and artillery emplacement still stand sentinel, and packed-coral landing strips for our heavy bombers remain as good as new. These are captured by the author/photography Jerry Meehl.

Object ID	Title	Author	Summary
2014.354.023	Battle of the Atlantic, The	Williams, Andrew	Published to accompany the television series "The Battle of the Atlantic." Beginning on 3 September 1939 and lasting to VE Day in 1945, the Battle of the Atlantic was the longest, largest and most complex naval battle in history.
2014.354.024	X-Craft Raid, The	Gallagher, Thomas	The true story of a secret World War II mission unparalleled in the annals of the sea. Thomas Gallagher's account of the gallant and almost unbelievable expedition of British midget submarines to attack and disable the Germany battleship Tirpitz is one of the great stories to come out of World War II.
2014.354.025	Fighter : The World's Finest Combat Aircraft-1914 to the Present Day	Winchester, Jim	A detailed look at over 70 of the most significant and successful fighter and attack aircraft ever produced. More than 600 photographs and artworks.
2014.354.026	Spirits in the Sky : Classic Aircraft of World War II	Bowman, Martin W.	Contains over 150 full color photographs of the greatest World War II aircraft still flying today. This photographic color tribute poses 24 bombers and fighter planes built in the U.S., Britain, and Germany, evoking in the imagination their beauty aloft. Contents: Introduction (p.6) -- TBFITBM Avenger (p.12) -- F8F Bearcat (p.16) -- F4U Corsair (p.20) -- B-17 Flying Fortress (p.26) -- Focke-Uluf Fui 190 (p.40) -- Gladiator (p.44) -- F6F Hellcat (p.48) -- SB2CIA-25 Helldiver (p.52) -- Hurricane (p.56) -- A-26 Invader (p.60) -- Lancaster (p.64) -- B-24 Liberator (p.70) -- Lysander (p.78) -- B-26 Marauder (p.82) -- Messerschmitt Bf109 (p.86) -- B-25 Mitchell (p.92) -- Mosquito (p.98) -- P-51 Mustang (p.102) -- Spitfire (p.112) -- B-29 Superfortress (p.122) -- P-47 Thunderbolt (p.128) -- P-40 Warhawk (p.134) -- F4FIFM Wildcat (p.142).

2014.354.033	War Speeches of Winston S. Churchill, The	Churchill, Winston	This LP containing audio speeches of Winston Churchill is filed with the two volume box set of the Second World War. The speeches were selected by the Editors of LIFE magazine, and narrated by Norman P. Ross. Contents include: In a solemn hour -- May 19, 1940 The news from France is very bad -- June 17, 1940 Their finest hour -- June 18, 1940 This wicked man -- September 11, 1940 This whipped jackal -- April 27, 1941 This morning Hitler...invaded Russia -- June 22, 1941 What kind of a people do they think we are? -- December 26, 1941 Some chicken, some neck -- December 30, 1941 Blood, tears, toil and sweat -- November 10, 1942 The African war is over -- May 19, 1943 This is your victory -- May 8, 1945 Never in the field of human conflict -- May 13, 1945.
2014.354.034	Battle of Midway, The	Symonds, Craig L.	A thorough account of the Battle of Midway including the Battle of The Coral Sea and Doolittle's raid on Tokyo. The author concentrates on portraits of the American and Japanese admirals involed in the battle. Contents: CinCPac -- The Kido butai -- The brownshoe navy --

Object ID	Title	Author	Summary
			American counterstrike -- Seeking the decisive battle -- Pete and Jimmy -- The codebreakers -- The Battle of the Coral Sea -- The eve of battle -- Opening act -- Nagumo's dilemma (4:00 A.M. to 8:30 A.M.) -- The flight to nowhere (7:00 A.M. to 11:20 A.M.) -- Attack of the torpedo squadrons (8:30 A.M. to 10:20 A.M.) -- The tipping point (7:00 A.M. to 10:30 A.M.) -- The Japanese counterstrike (11:00 A.M. to 6:00 P.M.) -- De´nouement -- Epilogue -- Appendix A: American and Japanese aircraft carriers -- Appendix B: American and Japanese aircraft -- Appendix C: American order of battle -- Appendix D: Japanese order of battle -- Appendix E: How much did the U.S. know of Japanese plans? -- Appendix F: The flight to nowhere.
2014.359.001	Midway : Turning Point of the Pacific	Smith, William Ward	On the morning of Thursday, June 4, 1942, two great armadas began the struggle to control Midway Atoll, a pinpoint of land in the center of the Pacific Ocean. The battle which followed raged four days and ranks as one of the few truly decisive engagements in naval history. The author now tells what happened in the Pacific theater from the time of the Japanese attack on Pearl Harbor to the prelude at Coral Sea and the historic Midway encounter.
2014.362.001	USS Midway (CVA-41) Voyage 71	Rehr, W. E. (ed)	USS Midway (CV-41) aircraft carrier; lead ship of the class. Pictorial summary of the western Pacific deployment of USS Midway in 1971 including strike operations off Yankee Station in the Tonkin Gulf during the Vietnam War. Departed San Francisco Bay 16 April 1971 with Attack Carrier Air Wing Five consisting of VA-56 (A-7 Corsair IIs), VA-93 (A-7 Corsair IIs), VA-115 (A-6 Intruders), VAW-115 (E-2 Hawkeyes), VF-151 (F-4

Object ID	Title	Author	Summary
			Phantom IIs), VF-161 (F-4 Phantom IIs), VAQ-130 Det 2 (EKA-3 Skywarriors), VFP-63 Det 3 (RF-8 Crusaders), and HC-1 (SH-3 Sea Kings) Det 8 deployed aboard. Ports of call included Yokosuka & Sasebo, Japan; Subic Bay, The Philippines; Hong Kong; Hawaii. Includes encounters with Russian naval vessels and Tu-16 "Badger" and Tu-95 "Bear" aircraft.
2014.362.002	Mission : Seventy-two - USS Midway (CVA-41) - 1972-73	Doweary, M. M. (ed.)	A pictorial account of the western Pacific deployment of USS Midway in 1972/73. The ship departed Alameda 10 APR 72 and returned to Alameda 3 March 1973, 1 week short of an 11-month deployment. Not only was it a long deployment, Midway was deployed 7 weeks ahead of schedule with less than one week's notice. Significant operations included 9 periods of line operations off Vietnam in support of the Vietnam War. Port calls included Pearl Harbor, Subic Bay (multiple), Hong Kong and Singapore. Bob Hope performed on Midway with his troop on 27 December in Singapore. The show was taped and broadcast on U. S. national television on 17 January 1973 as the Bob Hope Christmas Special. CVW-5 was embarked. The airwing consisted of VF-151 (F-4B), VF-161 (F-4B), VA-56 (A-7B), VA-93 (A-7B), VA-115 (A-6A and KA-6D), VAQ-130 Det 2 (EKA-3B), VFP-63 Det 3 (RF-8G), VAW-115 (E-2B), HC-1 Det 2 (SH-3G), and HC-7 Det 110 (HH-3A).
2014.362.005	USS Midway (CVA-41) Wardroom Rules and Regulations, 1972	USS Midway (CV-41)	There is a .pdf of this booklet available in Emanuals 2016.351.002. This booklet was a welcome to new Officers in the Wardroom Mess. It gives the organization of the Mess; the Regulations which include mess bills, mess share, rebates, and guests; meal service hours with airwing embarked and without airwing embarked; etiquette, and diagrams of wardroom staterooms.

Object ID	Title	Author	Summary
2014.363.001	Adak : The Rescue of Alfa Foxtrot 586	Jampoler, Andrew C. A.	Signed by the author. In the tradition of great tales of men against the sea, this story offers a compelling look at courage and commitment in the face of certain tragedy. It is a powerful blend of human drama and real-life naval operations, but unlike most books in the genre, its heroes are airmen not seamen, and most survived their ordeal. Published on the twentieth-fifth anniversary of Alfa Foxtrot 586's fatal mission as a tribute to those lost, the account was written by a naval aviator who has flown the same aircraft on the same mission from the same air base. The aircraft is a P-3 Orion on station during a sensitive mission off the Kamchatka Peninsula in the north Pacific. The time is mid-day on 26 October 1978. Andy Jampoler takes readers into the cockpit of the turboprop as a propeller malfunction turns into an engine fire, eventually forcing Jerry Grigsby to ditch his patrol plane into the empty, mountainous seas west of the Aleutian Islands. His fourteen crewmembers, strapped in their seats, expect the worst--and get it. The aircraft goes down in just ninety seconds, taking one of the three rafts with it. A second raft, terribly overcrowded, soon begins to leak. The flight crew's desperate battle to survive is told with the authority, drama, and sensitivity that only someone with the author's background could provide. He draws on interviews with survivors, searchers, and even the master of the Soviet fishing trawler that saved the living and recovered the bodies of the dead. He also draws on recordings of radio communications, messages in the files of the state and defense departments, and the patrol squadron's own investigation of the ditching. Contents: Crew Six -- Papa Delta Two -- On station --

2014.363.002	United States Naval Aviation 1910-70	Van Wyen, Adrian O.	The edition, 1910-1995, is available online at: http://www.history.navy.mil/branches/usna1910.htm . A chronology providing a record of events of special interest and lasting significance pertaining to the growth of U.S. naval air as an element of seapower, its employment and accomplishments in war and peace, and the development of its tactics, weapons and material.
2014.363.003	Last Epic Naval Battle, The : Voices from Leyte Gulf	Sears, David	By October, 1944, Japan's once-mighty naval power was almost extinguished. But in one last desperate bid, the Japanese gathered and combined their forces to defeat the Pacific Fleet of the United States Navy. With more ships engaged than there were even in the gargantuan World War I Battle of Jutland-and 200,000 men fighting on the sea and in the air - the Battle of Leyte Gulf was a hellish cacophony of cannon fire, murderous strafing airplanes, and deadly explosions. Here, in the words of the men who were there, are the dramatic accounts of what really happened at Leyte. Though often overshadowed by other Pacific War engagements, such as Midway or Guadalcanal, the Battle of Leyte Gulf was, and remains, the largest battle in the history of naval warfare. Cutler, Thomas J. (Forward)
2014.364.001	Decommissioning of the USS Ranger (CV-61), San Diego, California, 10 July, 1993	USS Ranger	Inside the front cover is a full size decommissioning patch. The booklet includes a history of decommissioning ships, a history of the USS Ranger, CV-4 and CV-61; a picture of the sponsor with details about keel laying and launching;

It follows with information on fabric and metal and plastic repairs. Then comes maintenance of flight controls, major assemblies and disassemblies.rigging, landing gear maintenance and corrosion precautions. It concludes with a section on preflight inspections.
2014.365.004	Aircraft Metal Work	Bureau of Naval Personnel	Starts with a discussion of airplane structres, then proceeds to sheet metal processes and forming of aluminum. Then it describes aircraft riveting, sheet metal fasteners, structural repairs, repair of tanks, amd aircraft tubing. it concludes with a section on plastics.

Object ID	Title	Author	Summary
2014.365.005	Aircraft Workers Manual	Ellithorpe, Fahy I. (comp.)	An orientation for the aircraft plant worker as to the tools and methods of the aircraft construction industry.
2014.365.006	Aircraft Mechanic's Pocket Manual	Ashkouti, Joseph A.	Designed to provide the man in the shop, the man who makes the aircraft, all the information he needs each day. Explains why various methods, processes and finishes are used in aircraft construction.
2014.365.007	Principles of the Internal Combustion Engine	Vanderdoes, J.	Discusses the theory of operation of internal combustion engines, defines cycles in engines and examines two stroke and four stroke gasoline and diesel engines. Includes examination at end of text.
2014.365.008	Aviation Engines, Part 1	I. C. S. Staff	Discusses the construction and classification of aircraft engines. Includes examination at end of text.
2014.365.009	Aviation Engines, Part 2	I. C. S. Staff	Discusses types of aircraft engines, including Kinneer, Wright Whirlwind, Pratt & Whitney H Wasp. Lycoming opposed cylinder, and Franklin. Examination at end of text.
2014.365.010	Aviation Engines, Part 3	I. C. S. Staff	Continues types of aircraft engines discussion from Part 2. Includes the Aeronca Model E-113C two-cylinder opposed engine, under inverted engines the 12-cylinder V-Type, the four-cylinder in-line engine, the Continental static radial engine, the Jacobs, L-5, the Lycoming R-680-B series, the Warner Super Scarab, the Twin Wasp (2), the Continental four-cylinder opposed engine, and the Wright Cyclone engines. Examination at end of text.
2014.365.011	Aviation Engines Carburetors	I. C. S. Staff	Discusses fuels and carburation for aircraft engines. Examination at end of text.
2014.365.012	Aviation-Engine Ignition	Brimm, Daniel J., Jr.	Discusses magneto ignition and battery ignition, with a great deal more material on magneto ignition. Also addresses spark plugs. Examination at end of text.
2014.365.013	Aviation-Engine Operation and Maintenance	Brimm, Daniel J., Jr.	First discusses engine care in unpacking and operation, then maintenance including engine inspection and overhaul, removing engine parts and

Object ID	Title	Author	Summary
			putting the engine back together. Also addresses trouble-shooting and storage. Examination at end of text.
2014.365.014	Aircraft Propellers	Brimm, Daniel J., Jr.	Discusses airplane propeller types, construction and installation. Also operation and maintenance of common brands of propellers. Examination at end of text.
2014.365.015	Aircraft Accessories	Brimm, Daniel J., Jr.	Covers construction and installation of starters (many types), the auto pilot, bank and climb control, exhaust systems, fire extinguishers, engine controls, superchargers, the lighting system, aircraft anchors and safety equipment. Examination at end of text.
2014.365.016	Elementary Principles of Electricity	I. C. S. Staff	Covers electricity and magnetism. Starts out with a definition of electrical terms. Then discusses magnetism and magnets. Moves on to electromagnets, electromagnetic and other forms of induction. Then discusses electric generators and batteries. Closes with resistance measurement. Examination at end of text.
2014.365.017	Machine Shop Operations	Barritt, John Willard	This book contains a list of the jobs which are typical of hundreds of major operations which a skilled mechanic is called upon to do.
2014.366.001	Marine Engineering	Labberton, J. M.	This book is about Hull design and resistance, Propellers, Propulsion shafting, Reduction Gears, Marine fuels and Combustion, Boilers, or steam generators, Turbines, Marine Pumps, Heat exchangers, Forced draft and duct work, Marine electrical Engineering, Refrigeration, Feed systems, Heat balance, The diesel ship, layouts, Astern operation, electric drive, Naval vessels and Ship's trials.
2014.366.002	Marine Engine and Fire Room Guide	Jacobs, Robert H.	This book contains essential details of the duties of wipers, firemen, oilers, water tenders, and the information they need for advancement to the grade of licensed engineer.
2014.366.003	Naval Machinery	United States Naval Academy. Dept of Marine Engineering	This book contains theory about Naval Boilers, Naval

2014.378.002	Red Star Rogue : The Untold Story of a Soviet Submarine's Nuclear Strike Attempt on the U.S.	Sewell, Kenneth	From Amazon: One of the great secrets of the Cold War, hidden for decades, is revealed at last. Early in 1968 a nuclear-armed Soviet submarine sank in the waters off Hawaii, hundreds of miles closer to American shores than it should have been. Compelling evidence, assembled here for the first time, strongly suggests that the sub, K-129, sank while attempting to fire a nuclear missile, most likely at the naval base at Pearl Harbor. We now know that the Soviets had lost track of the sub; it had become a rogue. While the Soviets searched in vain for the boat, U.S. intelligence was able to pinpoint the site of the disaster. The new Nixon administration launched a clandestine, half-billion-dollar project to recover the sunken K-129. Contrary to years of deliberately misleading reports, the recovery operation was a great success. With the recovery of the sub, it became clear that the rogue was attempting to mimic a Chinese submarine, almost certainly with the intention of provoking a war between the U.S. and China. This was a carefully planned operation that, had it succeeded, would have had devastating consequences. During the successful recovery effort, the U.S. forged new relationships with the USSR and China. Could the information gleaned from the sunken sub have been a decisive factor shaping the new policies of détente between the Americans and the Soviets, and opening China to the West? And who in the USSR could have planned such a bold and potentially catastrophic

			operation? Red Star Rogue reads like something straight out of a Tom Clancy novel, but it is all true. Today our greatest fear is that terrorists may someday acquire a nuclear weapon and use it against us. In fact, they have already tried.
2014.378.003	Agents of Innovation : The General Board and the Design of the Fleet that Defeated the Japanese Navy	Kuehn, John T.	From Amazon: Agents of Innovation examines the influence of the General Board of the Navy as agents of innovation during the period between World Wars I and II. The General Board, a formal body established by the Secretary of the Navy to advise him on both strategic matters with respect to the fleet, served as the organizational nexus for the interaction between fleet design and the naval limitations imposed on the Navy by treaty during the period. Particularly important was the General Board's role in implementing the Washington Naval Treaty that limited naval armaments after 1922. The General Board orchestrated the efforts by the principal Naval Bureaus, the Naval War College, and the Office of the Chief of Naval Operations in ensuring that the designs adopted for the warships built and modified during the period of the Washington and London Naval Treaties both met treaty requirements while attempting to meet strategic needs. The leadership of the Navy at large, and the General Board in particular, felt themselves especially constrained by Article XIX (the fortification clause) of the Washington Naval Treaty that implemented a status quo on naval fortifications in the Western Pacific. The treaty system led the Navy to design a measurably different fleet than it might otherwise have in the absence of naval limitations. Despite these limitations, the fleet that fought the Japanese to a standstill in 1942 was predominately composed of

After returning to Norfolk she

Object ID	Title	Author	Summary
			departed as part of a task group bound for the Pacific and New Caledonia via the Panama Canal. Following a quiet time in the South Pacific she underwent an overhaul at Mare Island, returning to the Pacific War in October 1943. Operations in which she participated included Tarawa, Eniwetok, Palau, Aitape, Hollandia, Saipan, Leyte Gulf and Okinawa. At Okinawa she sustained a hit from a Japanese Kamikaze aircraft which put her out of the remainder of the war. She proceeded to return to Norfolk for repairs, arriving there on June 12, 1945.
2014.388.002	Register of Commissioned and Warrant officers of the United States Navy and Marine Corps and Reserve Officers on Active Duty - 1970	Chief of Naval Personnel	Comprehensive list of all officers in the Navy and Marine Corps. Gives pay grades off officers and enlisted on page xiv, also lists decorations of the officers and gives a short list of abbreviations.
2014.388.004	Admiral Raymond A. Spruance, USN : A Study in Command	Forrestel, Emmet P.	Spruance's rise to fame came in the Battle of Midway where his sound judgement and wise decisions won a stunning victory over greatly superior enemy forces. That victory reversed the long series of enemy successes and was truly the turning point in the war. From that time on he played an ever increasing part in our naval advance across the Pacific - a task he shared in full measure with another great American naval officer - Admiral W. F. Halsey, USN. Tarawa, the Marshall Islands, the Marianas, Iwo Jima and the Ryukyus were important stepping stones along the way that lead to the deck of the USS Missouri in Tokyo Bay where the surrender terms were signed on Sept. 2, 1945.
2014.388.006	Naval Officer's Manual, The	Cope, Harley Francis	A ready reference of helpful information and counsel for all officers of the United States Navy and the Marine Corps.
2014.388.008	Navigation and Nautical Astronomy	Dutton, Benjamin	A textbook on navigation and nautical astronomy, prepared for the instruction of midshipmen at the United States Naval Academy. Original edition (1926) by Commander Benjamin Dutton.

Object ID	Title	Author	Summary
2014.388.009	Layman's Guide to Naval Strategy, A	Brodie, Bernard	A general guide to naval strategy. Considered a classic.
2014.388.010	Dutton's Navigation & Piloting	Dutton, Benjamin	A textbook on navigation and nautical astronomy, prepared for the instruction of midshipmen at the United States Naval Academy. Original edition (1926) by Commander Benjamin Dutton. Includes Chart No. 1 : Nautical Chart Symbols and Abbreviations.
2014.388.011	American Merchant Seaman's Manual : For Seamen by Seamen	Hayler, William B.	The primary reference book for the U.S. merchant marine since 1978. Considerably updated since the previous edition in 1957. This edition based on the original edition edited by Felix M. Cornell and Allan C. Hoffman. Inscribed by Bill Hayler, the Editor-in-Chief, to Admiral Bob Erly.
2014.388.012	Amphibians Came to Conquer, The : The Story of Admiral Richmond Kelly Turner, Vol. 2	Dyer, George C. (George Carroll)	This book is a story of a fighting man -- Kelly Turner -- of the maturing US Navy, and of the people who helped develop the man into a fighting admiral. It is also a story of the seagoing part of the amphibious operations of WWII in which Kelly Turner fought. This volume moves from Pacific island to Pacific atoll to Pacific island again, as our bone crushing amphibious operations cleared the stepping stones to Tokyo.
2014.388.013	Amphibians Came to Conquer, The : The Story of Admiral Richmond Kelly Turner, Vol. 1	Dyer, George C. (George Carroll)	This book is a story of a fighting man -- Kelly Turner -- of the maturing US Navy, and of the people who helped develop the man into a fighting admiral. It is also a story of the seagoing part of the amphibious operations of WWII in which Kelly Turner fought. This volume moves from Pacific island to Pacific atoll to Pacific island again, as our bone crushing amphibious operations cleared the stepping stones to Tokyo.
2014.388.016	Directory of National War College Graduates : Final Edition of the 20th Century :	National War College (U.S.)	This directory is published by the National War College Alumni Association in the interest of maintaining the close personal and professional relationships that were established among the individuals who served

Object ID	Title	Author	Summary
			together at the National War College. The Directory is arranged in two parts. The first part consists of a chronological listing, by year, of all persons who were associated with the College as students, members of the directing staff, or members of the faculty. The rank, status and agency affiliation of each individuals as of the given year, reflecting the information on the bronze class plaques in the College. The second part of the Directory is an alphabetical listing of all of the persons named in the first part, showing the best information available to the Alumni Association as to current rank, status and address. An explanatory note about the format of the individual listing can be found at the beginning
2014.388.017	1937 : The Sixty-Three Year Fix	United States Naval Academy	2000 Update on the U.S. Naval Academy Class of 1937. 111 living classmates. 104 died since the Fifty-Year Fix. Five (5) U.S. Naval Ships named for classmates.
2014.388.018	Salvation for a Doomed Zoomie : Galvin, John A True Story		From dust jacket: April first is a day of remembrance for John Galvin. On that date four decades ago, as a young Navy fighter pilot ("Zoomie" to submariners), he became the "biggest April Fool of all." Yet fate smiled on his youthful, blundering impulse, snatched him from certain disaster and launched him on an incredible but true odyssey aboard a legendary submarine on a history-making secret mission. Capturing the high drama and tension of aerial combat and submarine warfare, this book is a story of repeated close encounters with disaster and miraculous escapes.
2014.388.019	U.S. Destroyers of the World Wars	Newcomb, Richard F.	History of Destroyers in the World Wars. Includes photos, Operations, Battles. Comprehensive list of destroyers including person named for, when and where launched, when

Object ID	Title	Author	Summary
			commissioned and by whom. Photos and bios of sailors who served aboard destroyers.
2014.389.001	On Seas Contested : The Seven Great Navies of the Second World War	O'Hara, Vincent P.	This collection of essays provides much detailed information on the French, German, British, Italian, Japanese, American and Soviet navies during World War II.
2014.389.002	Engineers of Victory : The Problem Solvers Who Turned the Tide in the Second World War	Kennedy, Paul	There are 11 indexed entries for the Battle of Midway. The author recounts the inside stories of the invention of the cavity magnetron, a miniature radar as small as a soup plate, and the Hedgehog, a multi-headed grenade launcher that allowed the Allies to overcome the threat to their convoys crossing the Atlantic; the critical decision by engineers to install a super-charged Rolls-Royce engine in the P-51 Mustang, creating a fighter plane more powerful than the Luftwaffe's; and the innovative use of pontoon bridges (made from rafts strung together) to help Russian troops cross rivers and elude the Nazi blitzkrieg. He takes readers behind the scenes, unveiling exactly how thousands of individual Allied planes and fighting ships were choreographed to collectively pull off the invasion of Normand, and illuminating how crew chiefs perfected the high-flying and inaccessible B-29 Superfortress that would drop the atomic bombs on Japan.
2014.389.003	Punk's War	Carroll, Ward	A novel about a a F-14 aviator--the book reveals the inner workings of the U.S. Navy as only an insider can.
2014.391.001	USA in World War II	Heiferman, Ronald	A chronicle of the U.S. participation in World War II. Each author addresses an individual service, Army, Navy, Army Air Force. Introduction by S. L. Mayer.
2014.391.002	US War Machine, The : An Encyclopedia of American Military Equipment and Strategy	Bonds, Ray (ed)	There cannot be any doubt that, in the technological sophistication of its weapon systems, the sheer diversity of its capabilities, and its potential for sustaining combat operations anywhere in the world, the United States

Object ID	Title	Author	Summary
			military machine is today unsurpassed. The American soldier, sailor, airman and marine could fight any aggressor confident that their weaponry, training and back-up are, in most cases, at least as good as and, in many circumstances, superior to those of their foe. But the last ten years have seen such an ominous increase in numbers of Soviet weapons, and such advances in the technological sophistication of those weapons, that the United States' military superiority is in danger of being overtaken quantitatively and, more alarmingly, qualitatively also, in almost every military dimension. For the first time, all the combined power and major weapons available to the US armed forces are described, illustrated and evaluated between the covers of one incredible volume. In 272 pages, this most superb book examines in detail all the most important tanks, combat aircraft, warships, missiles and small arms, and analyses the organization and firepower of the US armed forces individually and as a total force. Expert authors, internationally respected in military and political circles, describe in more than 150,000 words how the United States could and would defend itself and its allies, and project its immense power overseas to protect vital interests. But power is relative, and this information-packed book also objectively measures the adequacy of the United States' capacity for making war, taking into consideration the nation's political will, the nature and extent of its assumed obligations and interests, and the comparative capabilities of its potential adversaries.

Object ID	Title	Author	Summary
			Hundreds of action photographs — most in splendid full color - accurate and informative charts and tables, many enlightening maps and explicit tables, combine with fascinating text to present the full story of the formidable US war machine. In the entire history of armed combat there has never been a more powerful military machine, and never a more powerful military publication. (from dust jacket flap)
2014.391.003	History of the Vietnam War, The	Welsh, Douglas	Contents: Foreword -- The Unknown War -- American Entanglement -- The Tet Offensive -- The Test of Vietnamization -- The Fall of the South -- From Disillusion to Despair -- The Balance Sheet -- Index.
2014.392.001	Welcome Aboard : Naval Air Technical Training Command, Memphis, TN	Naval Air Station, Memphis, TN	An introduction and guide to the Naval Air Technical Training Command (known as NATECHTRACEN, NATTC AND NATTCenter), the Naval Air Station (which is actually located in Millington, TN., and to the town of Memphis.
2014.392.002	U.S. Naval Air Station Miramar	Naval Air Station, Miramar, CA	An introduction and guide to the Naval Air Station at Miramar, California, and San Diego County. The date is about 1966 as that was when Capt. W. W. Jones was the commanding officer. Known as the "Home of the Pacific Fleet Fighters," Miramar is the home-base of 23 fighter squadrons, five air wing staffs, a maintenance training detachment and has some 4,000 men and 350 aircraft assigned.
2014.393.001	Bucher : My Story	Bucher, Lloyd M.	A true account of the capture of the Pueblo November 21, 1998 By Richard E. Armstrong Commander Bucher's story will probably be debated for many years to come, as it has been in many places where military men congregate. The book reveals how the U S Government let its men down and left the crew of the Pueblo out there without any help or so-called back-up plan. It reveals just how isolated and ignorant the North Korean

Object ID	Title	Author	Summary
			Communists were, and probably still are. The book is very well written and it is hard to put down. It shows just how brutal a people can be, and how a good sense of humor can get you through it. Bucher's vivid descriptions have been verified by members of the crew. It also shows how terribly the U S Government turned its back on the crew members by not issuing the men any POW medals as we were "technically not at war with the North Koreans." (They were issued medals 20 years later.) Probably the best book on the subject, and has several humorous places which makes it fun to read as well. Highly recommended for scholars of Naval History and Psychology. The fact remains that all but one crew member came back alive, which Commander Bucher was given little or no credit, except from John H. Chaffee, then Secretary of the Navy who said "These men have suffered enough." when referring to a court martial and board of inquiry. The book makes one think twice about how big people in high places are watching out for themselves and not the commands they are supposed to be in charge of. Reading the book does not reveal any bitterness from the author or his crew, but a sincerely deep sense of terrible disappointment of its superiors all the way up the chain of command. A real eye-opener! 29 of 30 people found the review helpful 4 of 4 people found the following review helpful No way to know... January 21, 2008 By Fiddle-Faddle One of the reviewers said Ed Murphy Jr.'s account was "sour grapes" at best. I don't know if that's true; some bitterness seems to be there, of course, since Pete Bucher, at length, seems to go out of his way to paint the man a villain, as he

Object ID	Title	Author	Summary
			does to Gene Lacy. But who had command of the ship? not Murphy or Lacy, and Murphy provides alternative actions that Bucher could have made before the first SO1 could have come on the scene to intimidate Pueblo. He could have, like the USS Banner before him, broken off contact and headed farther out to sea, instead of hoisting provocative communications flags that, in essence, thumbed his nose at the PRKs. Murphy also presents compelling evidence about who "broke" the Code of Conduct first, making it tough for the rest of the crew to tow the line. It was Bucher. In fact, the PRK's used Bucher's confession on tape repeatedly to get others to open up, since it was more difficult to hold back since the captain had broken. Bucher accused Murphy of having broken first and Murphy gives good reasons in his book to prove why the accusation was not true. I believe just about any man can be broken; that is not the point. But Bucher has a bad habit of pointing fingers everywhere but in the mirror. Bucher also had more than one opportunity to stow destruct devices aboard Pueblo that could have facilitated destruction of pubs and equipment. The Navy offered Thermit on one occasion and Murphy found dynamite. They sailed without either. Bucher's actions aside, I must fault the Navy for not having fitted these men or their "tub" well enough for such a sensitive mission. They were outfitted badly, trained inadequately, crewmen poorly chosen and requests were denied that could have remedied these shortcomings. Also, why were so many unnecessary classified pubs forced on the Pueblo? Now we know that in conjunction with the Navy turncoat, Edwin Walker, who gave the USSR sensitive info, the intel pirated from the

Object ID	Title	Author	Summary
			Pueblo damaged our national security more than is commonly known. I saw this account as a self-serving attempt by the captain to find scapegoats. It's hard to find scapegoats when all underlings can do is suggest actions to be taken. It's the captain that gives orders. He has to live with them. There was no mutiny, he wasn't bound by crewmembers and thrown in the hold. He was on the bridge, giving (or not giving) commands. It's a well written book, with the expected humor of the captain, and I suggest this be read, but in conjunction with Murphy's book, "Second in Command". Trevor Armbrister has written a thick, well researched book, "A Matter of Accountability" that goes right up the chain of command, above both Bucher and Murphy, showing that the whole AGER program was ill-conceived. Schumacher also wrote a book, "Bridge of No Return", and a book was written the some members of the crew, "The Last Voyage". I found Murphy's book to be the best written, more compelling version, when I compare it to Bucher's, with lots more facts and logic. The truth, I'm sure, is somewhere between the two accounts, but after having read both and other accounts, Murphy's rings more true to this reviewer. 3 of 3 people found the following review helpful Excellent account of the Pueblo incident November 9, 2006 By Mark Erickson I found this book an excellent account of the Pueblo incident, and hard to put down. I worked for the Navy as a civilian, and various Intelligence agencies for more than twenty five years. I've always had a fascination with the U.S.S. Pueblo and what happened while the

Object ID	Title	Author	Summary
			crew was being tortured and starved in North Korea. It accurately portrays what happens when the U.S. Government hangs you out to dry during an Intel. operation that goes sideways. The X.O., Edward R. Murphy, is an interesting study and his follow up book blasting Bucher is sour grapes at best. Commander Bucher brought all the men back with the exception of Fireman Duane D. Hodges, who was destroying classified documents when he was killed. I'm sure the loved ones of the men who returned would take exception to Lt. Murphy's account. A cautionary tale for anyone aspiring to a career in the intelligence gathering
2014.394.001	USS Midway 1963-1964	Romano, Jerry (ed)	USS Midway (CVB/CVA/CV-41) aircraft carrier; lead ship of the class. 2014.395.004	Sea Breeze March 1965. Supplement. Fifty Days	Mutke, Alan R. (ed)	Newsletter of the USS Coral Sea (CVA-43) Vol. XVI, No.1 March, 1965. Supplement. "Fifty Days is the story of an aircraft carrier and her crew during moments of crisis. It is a story that tells of the events that occurred during this period of time. It describes the mission that was assigned to this ship and her crew and how they successfully completed it. Contents: Golf of Tonkin--US SEVENTH Fleet--Thirty Days--Striking Power--Rescue at Sea--Unorthodox "Landing"--From the Editor Tucked into the newsletter are a black and white picture of a Navy F-J2 Fury, yellowed article/picture from San Francisco Chronicle, Sat Jul 3, 1976 "Coral Sea Comes Home" and mimeographed copy of Coral Sea Daily News, dated 18 April 1965l Vol V, Number 80.
2014.396.001	Folklore and the Sea	Beck, Horace	Originally published for the Marine Historical Association, Mystic Seaport, by Wesleyan University Press, Middletown, Conn., 1973, as Volume 6 of the American maritime library series. Fishermen, sailors, merchantmen, navies, shipwrights, pirates and smugglers-all earned their livelihood from the seas and the shores surrounding them. Herein you will discover beliefs and superstitions about boatbuilding, weather, creatures of the deep, and the ghosts and demons that have, in all ages, risen from the sea to terrify and enchant men.
2014.396.002	Seafaring Lore & Legend : A	Jeans, Peter D.	Seafarers follow a way of life

Object ID	Title	Author	Summary
	Miscellany of Maritime Myth, Superstition, Fable, and Fact		unlike any other, and they have created and handed down through thousands of years a rich legacy of peculiar customs, bizarre beliefs, and outlandish tales of the wonders and horrors to be found beyond the edge of the known. This sourcebook leaves no superstition unturned in its quest to celebrate the most colorful and curious aspects of our nautical heritage.
2014.396.003	Six Frigates : The Epic History of the Founding of the U.S. Navy	Toll, Ian W.	In 1794, President Washington signed legislation authorizing the construction of six heavy frigates. (The frigate, smaller than a battleship and larger than a sloop, represented a unique combination of power, speed, and tactical versatility. In any navy, the frigates were sent on the most daring missions, and they fought the most dramatic single-ship actions of the Napoleonic era.) The American frigates were to be built at six major seaports: Portsmouth, Boston, New York, Philadelphia, Baltimore, and Norfolk. Entirely new domestic industries would be created, relying heavily on the extraction of natural resources--hemp, jute, flax, ore, softwoods, and hardwoods--from the backwoods of Maine to the uninhabited coastal islands of Georgia. It was the first great appropriation of federal money and the first demonstration of the power of the central government. From the complicated politics of the initial decision, through the cliffhanger campaign against Tripoli, to the war that shook the world in 1812, the author tells this grand tale with the political insight of Founding Brothers and a narrative flair worthy of Patrick O'Brian. In the words of Henry Adams, the 1812 encounter between USS Constitution and HMS Guerriere "raised the United States in one half hour to the rank of a first class power in the world."
2014.396.004	Abandon Ship!	Davis, Bill Jim	Abandon Ship is the personal narrative of Bill Jim Davis during the war in the Pacific.

Object ID	Title	Author	Summary
			His individual experiences took him from the attack on Pearl harbor to Okinawa, to the Japanese mainland, and from a new recruit to a commissioned officer by war's end. Chapters include: Pearl Harbor, Guadalcanal, Helena Goes Down in Kula Gulf, USS Hornet, LST 343. After service in World War II, Korea, and in the naval reserves, the author served 12 years in the Tennessee State Senate.
2014.396.005	When a Loose Cannon Flogs a Dead Horse There's the Devil to Pay : Seafaring Words in Everyday Speech	Isil, Olivia A.	The book is a collection of bona fide nautical metaphors and colloquialisms now in common usage in the English language. Thought-provoking, entertaining examples of these words are drawn from literature, poetry, movies, song, and television--from Shakespeare to Jane Austen to P. G. Wodehouse. Examples are: Here's the scuttlebutt; Barge right in and swallow the anchor; I'm tired of minding my P's and Q's; Hell's bells!; loose cannon, bootleg, cold enough to freeze the balls off a brass monkey; it's time to fish or cut bait; no use flogging a dead horse, and any port in a storm.

Object ID	Title	Author	Summary
			February 1973.
			Forward [sic], Dedication, Thanks, Apologies, Humorous Anecdotes, and like that
			How did "Snoopy a la Airplan" come about? I'll never forget the feeling when I presented the first airplan to the ship's Ops Officer, CDR "Al" Johnson. After a careful perusal his first question was, "Where's the Snoopy?" Being new to carrier aviation and airplans, my thoughts ran rampant with, "Let's see, we've got the Barcap, Tarcap, Migcap, Walleye, Pocket Money, and all that, but what the hell's a "Snoopy"?" Fortunately, before I could utter my smartest, "Err - umn - uhh" he clarified the situation and shot down the first airplan for a rewrite --- complete with Snoopy, and with a sigh of relief the first airplan hit the press. In order to give you a hint of my feelings the next day however, an apropos "humorous anecdote" is in order at this point. "Once upon a time there was a girl in our home town about to enter that stage of puberty which separates the girls from the women. Her mother had carefully explained what to expect and how to handle it. Sure enough the day came but the poor girl (woman) was still quite unhappy and somewhat distressed about the state of affairs anyway. Finally, several days later, things had returned to normal and breathing a sigh of relief the girl said, 'I'm sure glad I don't have to go through that again!'" Needless to say, I was relieved to have gotten "The dog" over and done with on the first airplan, but when the Ops Boss looked at airplan #2 and said, "Hey, ya forgot Snoopy again. Ya know ya gotta have one for every airplan on the cruise!", I knew what that girl felt like about 28 days later. So - thanks to the Ops Boss, here's a collection of "The Dog". Of course, while we're

Object ID	Title	Author	Summary
			passing out thanks, we have to give Mr. C. Schulz our thanks and apologies - the reason for both being obvious. AIRWING FIVE received the dirty end of the stick on most of the jokes. A lot of things happen each day on the ship that contain a humorous side, but since our Snoopy came from Air Ops, most of the topics are concerned with that area. Since it's always easier to poke fun at someone else than at yourself, AIRWING FIVE got poked. None of the jokes were meant to be malicious and in spite of appearances, we think the Wing's Sierra Hotel. Dedicationwise - we've all seen the Kudos and laudits MIDWAY, AIRWING FIVE, and COMCARDIVONE have received. Regardless of what others say there is a feeling that comes when you know you're on the "Number One" team. I personally feel that the night we picked up a sister carrier's load after twelve "plus" hours of our own air ops we had really proven we were the best. The feeling remains, so - here's to ya. Sincerely (signed) W.E. GIRARD LT USN Chopped: (signed) Air Operations Officer Approved: (signed) Snoopy Operations Officer

2015.060.007	U.S. Naval Aviation	Goodspeed, M. Hill (ed)	This is the second edition of U.S. Naval Aviation. The first edition was published in 2001. Although the chapters appear to be the same, some of the pictures have been changed. Navy wings / Admiral Leighton W. Smith, USN (Ret) -- A golden journey / M. Hill Goodspeed -- Memories and memorials / Amy Waters Yarsinske -- Sea wings / Lieutenant Commander Rick

2015.060.008	Mission : Seventy-two - USS Midway (CVA-41) - 1972-73	Doweary, M. M. (ed.)	A pictorial account of the western Pacific deployment of USS Midway in 1972/73. The ship departed Alameda 10 APR 72 and returned to Alameda 3 March 1973, 1 week short of an 11-month deployment. Not only was it a long deployment, Midway was deployed 7 weeks ahead of schedule with less than one week's notice. Significant operations included 9 periods of line operations off Vietnam in support of the Vietnam War. Port calls included Pearl Harbor, Subic Bay (multiple), Hong Kong and Singapore. Bob Hope performed on Midway with his troop on 27 December in Singapore. The show was taped and broadcast on U. S. national television on 17 January 1973 as the Bob Hope Christmas Special. CVW-5 was embarked. The airwing consisted of VF-151 (F-4B), VF-161 (F-4B), VA-56 (A-7B), VA-93 (A-7B), VA-115 (A-6A and KA-6D), VAQ-130 Det 2 (EKA-3B), VFP-63 Det 3 (RF-8G), VAW-115 (E-2B), HC-1 Det 2 (SH-3G), and HC-7 Det 110 (HH-3A).

2015.063.002	Book of Worship for United States Forces : A Collection of Hymns and Worship Resources for Military Personnel of the United States of America	Armed Forces Chaplains Board United States. Department of Defense. Armed Forces	Published under the supervision of the Armed Forces Chaplains Board. From the Preface: "Through the ages the people of God have related to their Creator through the medium of worship and song. Books of Worship record some of man's noblest expressions in his continuing search for understanding and meaning. Their pages flow in endless streams of song and Scripture, prayer and praise. They speak of the believer's faith in the daily renewal of life and love between creature and Creator. The Book of Worship for United States Forces follows in this tradition. It is a repository of selected worship resources reflecting both traditional and contemporary communities from among the respective faith groups...Hymns and worship resources have been carefully selected to provide for the spiritual needs of many diverse groups of worshipers within the military community. It was especially designed in language and style to appeal to young adults." Also includes guitar chord fingering.
2015.063.003	Armed Forces Hymnal	United States. Department of Defense. Armed Forces Chaplains Board.	From the Preface: "This hymnal has been purposefully designed to make available a practical, useful and inspirational book for all personnel of the Armed Forces. It affords an opportunity for the expression of religious faith through the medium of song, praise, and worship... Consideration has been given to the fact that the Hymnal will be utilized by chaplains representing many faiths in their administration of worship services predominantly composed of young men and women on duty with the Armed Service, families of military personnel and civilian employees of the Army, Navy and Air Force.

2015.301.001	Yamamoto Isoroku : Leadership, Strategy, Conflict	Stille, Mark	"Admiral Yamamoto Isoroku was the defining Japanese naval commander of World War II. He planned and executed the daring pre-emptive strike on Pearl Harbor that damaged the US Pacific Fleet and ushered in the Pacific War, and commanded the Japanese Combined Fleet until his death at American hands following the Guadalcanal campaign in 1943. Despite the success of the Pearl Harbor operation, Yamamoto's subsequent handling of the Combined Fleet raises a number of questions. His battles against the US Navy at the Coral Sea, Midway and, finally, Guadalcanal, all undermine his reputation as a premier naval strategist. Mark Stille examines these key campaigns to analyze Yamamoto's command style and strategies, and assess how these impacted the course of the war in the Pacific and Japan's chances for victory"--back cover. 2015.301.003	USS Midway (CVA-41) - 1979-1980	Guiam, D. (ed.)	A pictorial account of the general period June 1979 through the end of 1980 for the USS Midway, lead ship of its class. Operations included routine Westpac ops from August 20 - September 14, 1979, an Indian Ocean deployment from 30 September 1979 to 20 February 1980, and a second I.O. deployment from 14 July to 26 November 1980. The first I.O. deployment of the period coincided with the Iranian Hostage crisis and featured 91 consecutive days at sea, the longest continuous at-sea operations by the ship to date. Port visits in the overall period included Hong Kong, Subic Bay, Perth, Mombasa and Korea. Carrier Air Wing Five was embarked with: VF-161 (F-4J); VF-151 (F-4J); VA-93 (A-7E); VA-56 (A-7E); VA-115 (A-6E and KA-6D); VAW-115 (E-2B); VMFP-3 Det.1 (RF-4B); VAQ-136 (EA-6B); and HC-1 Det.2 (SH-3G).

2015.301.008	Jane's Fighting Ships - 1968-69	Blackman, Raymond V. B. (ed)	Jane's Fighting Ships is an annual reference book (also published online, on CD and microfiche) of information on all the world's warships arranged by nation, including information on ship's names, dimensions, armaments, silhouettes and photographs, etc. Its annual editions cover the warships used by the different national naval and paramilitary forces, and provide data on their characteristics. It was originally published by John F. T. Jane (usually known as "Fred T.") in 1898 as Jane's All the World's Fighting Ships. Its success launched a number of military publications carrying the name "Jane's". It is a unit of Jane's Information Group, which is now owned by IHS. From Wikipedia, the free encyclopedia
2015.301.009	Jane's All the World's Aircraft - 1971-72	Taylor, John W. R. (ed)	Jane's All the World's Aircraft is an aviation annual publication founded by Fred T. Jane in 1909. It is published by Jane's Information Group. Jane's All the World's Aircraft has chronicled a century of ever-accelerating aviation progress and recorded the particulars of an unprecedented number of flying machines, using the widest possible interpretation of that phrase, in the most minute detail. Six editors have had the privilege of commenting upon the significant aircraft and events of manned flight since the first edition appeared in November 1909 as All the World's Airships (which was then a generic term for any machine that flew). This first publication was seen as being ahead of its time but even the skeletal book showed the

Object ID	Title	Author	Summary
			strength of Fred T Jane's standardised approach to data collection. The first edition even carried a pre-addressed return proforma for aviation pioneers to supply the details of new machines. Besides listing the different types of aircraft by nationality, the first issues covered aerial societies, journals and flying grounds and cost just 21 shillings (£1.05). Jane himself had a desire to fly and he was nearly killed doing so in 1909 whilst attempting a flight on Dartmoor. His aircraft caught fire, but he merely commented that it would be one less machine to include in his forthcoming work. As with Jane's Fighting Ships, Jane received extensive help from enthusiasts worldwide, including Louis Blériot, A.V. Roe and Prince Heinrich of Prussia. Jane censored the 1914 issue, which was published just after the outbreak of the First World War, blacking out whole sections describing British equipment and organisation. He noted in it that, for all practical purposes, aircraft have no more to do with peace than submarines. The work's accuracy helped morale by dispelling alarmist rumours about imminent German air raids, showing that the Germans did not possess anything but the smallest fleet of airships. Respect for the accuracy of Jane's All the World's Aircraft transcended political enmities. Cold War notwithstanding, Soviet authorities supplied Jane's with information. Such was the technical reference book's reputation that Argentina even provided details of its aircraft during the Falkland's Conflict in 1982. Altogether, there have been only 97 editions, mainly due to disruptions during the two World Wars. 2009 was the 100th Year of

Lawson; Vietnam--All for Naught by David P. Erickson; and Contemporary Situations by Captain William E. Scarborough.
2015.301.012	Twentieth-century America : A Primary Source Collection from the Associated Press, Vol. 8 : Crisis of Confidence, 1974-1980	Associated Press	Volume 8 of 10 volume set. Includes Defeat in Indonesia, Energy Crisis, Ford Presidency, Life in the 70s, The Carter Presidency, Iran-Hostage Crisis, Election of 1980. Include 34 pages on the final days of Vietnam.
2015.301.013	What it is Like to Go to War	Marlantes, Karl	War is as old as humankind, but in the past, warriors were prepared for battle by ritual, religion and literature, which also helped bring them home. In this narrative, the author weaves accounts of his combat experiences with thoughtful analysis, self-examination, and his readings from Homer to the Mahabharata to Jung. He talks frankly about how he is haunted by the face of the young North Vietnamese soldier he killed at close quarters and how he finally finds a way to make peace with his past. He discusses the daily contradictions that warriors face in the grind of war, where each battle requires them to take life or spare life, and where they enter a state he likens to the fervor of religious ecstasy. He also underscores the need for returning veterans to be counseled properly.
2015.301.015	Target Tokyo : Jimmy Doolittle and the Raid that Avenged Pearl Harbor	Scott, James M.	From the Introduction--"The Doolittle Raid is one of the most iconic stories of World War II. Even before rescuers could pluck all the dead from

Object ID	Title	Author	Summary
			the oily Hawaiian waters following Japan's December 7, 1941, surprise attack on Pearl Harbor, American planners started work on an ambitious counterassault, a strike not against an outlying enemy base in the far-flung Pacific Islands but against the heart of the Japanese Empire: Tokyo. That April 1942 raid led by famed stunt and racing pilot Jimmy Doolittle would test American ingenuity, gamble the precious few flattops and warships left in the Pacific Fleet's battered arsenal, and jump-start Japan on the road to ruin. Sixteen Army bombers crewed by eighty volunteers specially trained in carrier takeoffs would thunder into the skies over the enemy's capital and key industrial cities, pummel factories, refineries, and dockyards and then escape to Free China. At home in the United States the mission would derail questions over the government's failure to guard against Japanese aggression in the Pacific and buoy the morale of a shell-shocked nation. The forty-five-year-old Doolittle would come to personify the raid's success, his grinning image would be plastered around the nation on war bond posters, and strangers would write him poems and songs. A Missouri own would even take his name."

2015.301.027	Martin B-26 Marauder	Johnsen, Frederick A.	The Martin B-26 Marauder occupies a controversial place on some enthusiasts and historians. The Marauder exhibited traits that were sometimes hazardous to neophyte bomber pilots. It was the first of several aircraft for which contracts were issued based on drawing board plans instead of flying prototypes. Early concepts for the Model 179 called for a twin tail. The

Object ID	Title	Author	Summary
			Martin B-26 Marauder is a World War II twin-engined medium bomber built by the Glenn L. Martin Company from 1941 to 1945. First used in the Pacific Theater in early 1942, it was also used in the Mediterranean Theater and in Western Europe. After entering service with the U.S. Army, the aircraft received the reputation of a "Widowmaker" due to the early models' high accident rate during takeoffs and landings. The Marauder had to be flown at exact airspeeds, particularly on final runway approach and when one engine was out. The 150 mph (241 km/h) speed on short final runway approach was intimidating to pilots who were used to much slower speeds, and whenever they slowed down below what the manual stated, the aircraft would stall and crash. The B-26 became a safer aircraft once crews were re-trained, and after aerodynamics modifications (an increase of wingspan and wing angle-of-incidence to give better takeoff performance, and a larger vertical stabilizer and rudder). After aerodynamic and design changes, the aircraft distinguished itself as "the chief bombardment weapon on the Western Front" according to a United States Army Air Forces dispatch from 1946. The Marauder ended World War II with the lowest loss rate of any USAAF bomber.
2015.302.001	Grumman FF	Listemann, Phil H.	The Grumman FF, even if it is not particularly well known, is important in that it was the start a long dynasty of carrier-based fighters for the USN which included the famous WW2 Hellcat, the Panther and Cougar of the Korean War and the F-14 Tomcat of the Cold War era. It was also the first USN fighter to use a retractable landing gear. The full history of this two-seat fighter, of which less than 30 examples were produced, is narrated in 40 pages. Its career as a fighter was short with only one front line USN unit operating it for just three

Object ID	Title	Author	Summary
			years. However it had a longer career as a fighter. Cover; Title Page; Copyright; Acknowledgement; Contents; Glossary of Terms; Grumman FF Introduction; The Units; The Register.
2015.302.003	Our Flying Navy	Office of the Deputy Chief of Naval Operations (Air)	A gorgeously illustrated short history of all phases of Naval Aviation in the present war. The Navy Department, through the Council on Books in Wartime, has made this material available and has checked the accuracy of text and illustrations, the latter being the work of seven patriotic American artists who lived at Naval Air Stations in every part of the country, were quartered with the men, studied the training program, and made numerous flights in all types of naval planes. Thus their paintings and drawings cover every side of Naval Aviation, from pre-flight school to combat, and the hundred-odd paintings reproduced here form a permanent tribute to the Service. The text and captions for the illustrations have been prepared with the assistance of the Office of the Deputy Chief of Naval Operations (Air), and are therefore entirely authoritative. There are as well an Introduction by James Forrestal, Secretary of the Navy, a Preface by Arthur W. Radford, Rear Admiral, U.s.N., Acting Deputy Chief of Naval Operations (Air), and a Foreword about the pictures by Thomas Craven. The result is a spirited chronicle of the Navy in the air, a chronicle which has caught the essence of Naval Aviation and the men in that branch of the Service. The striking illustrations are reproductions of paintings by Howard Baer, Adolf Dehn, Robert Benney, Don Freeman, Joseph Hirsch, Lawrence Beall Smith, and Georges Schreiber. (from dust jacket flap)

Object ID	Title	Author	Summary
2015.302.007	British Pacific Fleet, The: The Royal Navy's Most Powerful Strike Force	Hobbs, David	HS-7 (SH-3 Sea Kings)
			In August 1944 the British Pacific Fleet did not exist. Six months later it was strong enough to launch air attacks on Japanese territory. and by the end of the war it constituted the most powerful force in the history of the Royal Navy, fighting as professional equals alongside the us Navy in the thick of the action. How this was achieved by a nation nearing exhaustion after five years of conflict is a story of epic proportions in which ingenuity, diplomacy and dogged persistence all played a part. As much a political as a technical triumph, the BPF was uniquely complex in its make-up: its C-in-C was responsible to the Admiralty for the general direction of his fleet; took operational orders from the American Admiral Nimitz; answered to the Government of Australia for the construction and maintenance of a vast base infrastructure, and to other Commonwealth Governments for the ships and men that formed his fully-integrated multi-national fleet. This ground-breaking new work by David Hobbs describes the background, creation and expansion of the BPF from its first tentative strikes, through operations off the coast of Japan to its impact on the immediate post-war period, including the opinions of USN liaison officers attached to the British flagships. The book is the first to demonstrate the real scope and scale of the BPF's impressive achievement. (from dust jacket back)
2015.302.008	World Wonder'd, The : What Really Happened off Samar	Lundgren, Robert	This book is an analysis of the primary documentation from both the Japanese and the United States for the naval Battle off Samar which took place on October 25, 1944. The conclusions of the analysis differ greatly from what has been previously written; there are many revelations about

Object ID	Title	Author	Summary
			the true role of the famous vessels on each side and about the oft-questioned thinking of the contending admirals. There are hundreds of photos and drawings and several hundred footnotes within the book, each placed within the text at the moment they occurred. This allows the reader to witness the battle as it played out, literally salvo for salvo, with complete confidence in the accuracy of the narration. Essential reading for anyone interested in battleship combat, the naval history of World War II, the Battle off Samar, or the U.S. and Japanese navies.
2015.302.009	Fletcher, Task Force Commander : The Early Years of WWII	Bauer, James L.	Starting with Pearl Harbor, the Japanese rampaged throughout the Pacific where their Navy defeated five fleets of three nations in five months without losing a single ship. The book on aircraft carrier-on-carrier warfare had not yet been written when Admiral Frank Jack Fletcher made the first attack where opposing ships never saw each other. He was the man on the spot who had to invent that book. After saving Australia in the Battle of Coral Sea, he led two task forces at the crucial Battle of Midway where the overwhelming superiority of Japan's navy was reduced, and then he covered the invasions at Tulagi and Guadalcanal and saved that beachhead in the Battle of Eastern Solomons. In eight months of continuous combat, Fletcher sank six enemy carriers with the loss of only two in a near perfect balance of aggressiveness and caution. Fletcher deserves far more attention than he has been given in the public history of the Pacific War. This book helps spread the word while providing a rich reference to help understand that war. "Fletcher, Task Force Commander" is in three parts. The first is about the early life of Fletcher raised in a small town in Iowa to an entrepreneurial family. The

Object ID	Title	Author	Summary
			second part summarizes the naval battles of the first year of the war that starts with the Japanese winning and has the appropriate title "Till they met Fletcher". The third part is a reference with hard to find lists, comparisons, specifications, photos, time-lines and discussions on various topics about that first year of the war. Some myths of that period are exploded including some that are embedded in popular culture.
2015.302.010	Battle of the Coral Sea, The : Combat Narratives	Office of Naval Intelligence	U.S. Confidential - British Secret [declassified], The Battle of the Coral Sea consisting of the actions at Tulagi, May 4th, off Misima, May 7th, and in the Coral Sea on May 8th, 1942. Includes experiences of ships with the Yorktown: Astoria, Portland, Chester, Hammann, Russell, and Aylwin. Includes experiences of ships with the Lexington: Minneapolis, New Orleans, Phelps, Dewey, Morris, and Anderson. Combat Narratives have been prepared by the Publication Section of the Combat Intelligence Branch of the Office of Naval Intelligence for the information of the officers of the United States Navy. The data on which these studies are based are those official documents which are suitable for a confidential publication. This material has been collated and presented in chronological order. In perusing these narratives, the reader should bear in mind that while they recount in considerable detail the engagements in which our forces participated, certain underlying aspects of these operations must be kept in a secret category until after the end of the war. It should be remembered also that the observations of men in battle are sometimes at variance. As a result, the reports of commanding officers may differ although they participated in the same action and shared a common purpose. In general, Combat Narratives represent

Object ID	Title	Author	Summary
			a reasoned interpretation of these discrepancies. In those instances where views cannot be reconciled, extracts from the conflicting evidence are reprinted.
2015.302.011	A-3 Skywarrior Units of the Vietnam War	Morgan, Rick	The Douglas A-3 Skywarrior, though something of a cult favourite, remains a largely unremarked classic of Naval Aviation. Built for nuclear weapon delivery, the A-3 made its name in Vietnam as a conventional bomber, tanker and Electronic Warfare platform. It was the largest aircraft ever regularly operated from the decks of aircraft carriers, earning it the fleet-wide nickname 'Whale'. It excelled in every mission area assigned to it and operated in the US Navy for more than four decades, from 1956 through to 1991. Fully illustrated to depict the incredible array of paint schemes and its awesome size, this volume focuses on the type's Vietnam service, which saw the aircraft briefly used as a bomber over both North and South Vietnam from March 1965, before the Skywarrior proved far more valuable as a multi-role tanker (KA-3B) and tanker/tactical jammer (EKA-3B). The title includes details on all of these operations as well as more clandestine reconnaissance missions, and provides information about the men that flew them.
2015.302.012	Exploding Fuel Tanks : Saga of Technology that Changed the Course of the Pacific Air War	Dunn, Richard L.	Exploding Fuel Tanks tells the story of air war over the Pacific in World War Two from the perspective of aircraft vulnerability. The result is surprising history with many oft repeated but inaccurate characterizations of the combatants debunked. In addition to a story about technology this book sheds new light on combat operations and the actual losses (not just claims) each side suffered.
2015.302.013	USS Lexington : The Blue Ghost	USS Lexington Volunteer Organization	This is a pamphlet produced by the USS Lexington Museum on the Bay. There are many black and white pictures of the ship

Object ID	Title	Author	Summary
			when it was commissioned and as a museum. Contents include: pictures of the museum, history of all the ships named Lexington; awards of CV-16; battle history in WWII; Lexington aircraft and damage inflicted on the enemy by the ship; a list of cruises with the squadrons and planes that they flew; fleet assignments; vital statistics; obtaining the ship for a museum; first and last pilots to land on CV-16; pictures of many airplanes; how it was named the Blue Ghost; damage inflicted on Lexington; bibliography.
2015.302.014	USS Abraham Lincoln (CVN-72) - The Crew's Book - 2006	Frost, Jason (ed)	Pictorial account of the deployment of USS Abraham Lincoln (CVN-72) to the Western and Central Pacific between February 2006 and August 2006. The ship departed from Everett, WA on 27 February 2006 and returned to Everett, WA on 8 August 2006. Port calls included San Diego, Calif.; Hong Kong; Laem Chebang, Thailand; Singapore; Sasebo, Japan; and Pearl Harbor, HI. Significant operations were Operation Foal Eagle, PASSEX (Thailand, Japan), Exercise Valiant Shield 2006, and RIMPAC 2006. Contains a biography of Abraham Lincoln, Gettysburg Address, history of the USS Abraham Lincoln, Pattaya Beach, Crossing the Line, Tiger Cruise, Air Power Demonstration, and homecoming. On board: Commander Carrier Strike Group Nine (CCSG-9) Commander Destroyer Squadron Nine (COMDESRON-9) Carrier Air Wing Two (CVW-2) VFA-2 (F/A-18F) VFA-137 (F/A-18E) VFA-151 (F/A-18C) VFA-34 (F/A-18C) VAQ-131 (EA-6B) VAW-116 (E-2C 2000) HS-2 (SH/HH-60F/H) HSL-47 Det. (SH-60B) USS Mobile Bay (CG 53) USS Shoup (DDG 86)

2015.302.015	USS John C. Stennis (CVN-74) - Dulac, Chad (ed) Westpac Cruise - 2009		USNS Rainier (T-AOE 7) Pictorial account of the deployment of USS John C. Stennis (CVN-74) to the Western Pacific and Northern Pacific between January 2009 and July 2009. The ship departed from Bremerton, WA on 13 January 2009 and returned to Bremerton, WA on 10 July 2009. Port calls included San Diego, CA; Hong Kong; Sasebo, Japan; Busan, South Korea; Laem Chabang, Thailand; Singapore; Pearl Harbor, HI; and Everett, WA. Significant operation was Exercise Northern Edge '09. Contains information on Stennis Seal and John Stennis, and photos of Super Bowl XLIII, WOG Day, Tiger Cruise, Little Stennis, Transformers 2, and Homecoming. On board: Carrier Strike Group Three (CSG -3) Carrier Air Wing Nine (CVW-9) Fleet Logistics Support Squadron Three Zero (VRC-30) Destroyer Squadron Twenty One (DESRON-21) VFA-154 (F/A-18F) VMFA-323 (F/A-18C) VFA-146 (F/A-18C) VFA-147 (F/A-18E) VAQ-138 (EA-6B) VAW-112 (E-2C 2000 NP) HSC-8 (MH-60S) HSM-71 (MH-60R) USS Lake Champlain (CG 57) USS Antietam (CG 54) USS Preble (DDG 88) USS Milius (DDG 69) USS Kidd (DDG 100)
2015.302.016	CVG-11 : Around the World	Neilson, T. L. (ed)	Pictorial account of the deployment of Attack Carrier Air Group Eleven (CVG-11) 1947-1948 which was deployed with the USS Valley Forge (CV-45) on a world cruise. The Valley Forge departed San Diego on 9 October 1947 and returned 11 June 1948. Items of interest: In Memoriam; history of the air group; 2 page map of cruise; pictures of the USS William C. Lawe (DD-763) and the USS Lloyd Thomas (DD-764) that accompanied Valley

Object ID	Title	Author	Summary
			Forge on the world cruise; chain of command; candid photos; roster of carrier group; lengthy history of some of the squadrons; roster of enlisted and officers of squadrons; AEW Team no. 5 (AEW-5). Ports of call: Hawaii; crossing the line; Sydney, Australia; Hong Kong; Tsingtao, China; Singapore; Ceylon; RAS Tanura, Saudi Arabia; Suez Canal; Gibraltar; Tangier, Morocco; Bergen, Norway; Portsmouth and London, England; New York; Panama Canal. Squadrons: VF-11A (F8F-1) VF-12A (F8F-1) VA-11A (SB2C-5) VA-12A (TBM-3E) Cover design and drawings by Ens. R. E. Schwartz, USS Valley Forge
2015.302.017	American Military Training Aircraft : Fixed and Rotary-wing Trainers Since 1916	Johnson, E. R.	The U.S. did not become the world's foremost military air power by accident. The learning curve--World War I, World War II, the Korean War, the Vietnam War, the Gulf War, and more recently the war on terror--has been steep. While climbing this curve, the U.S. has not only produced superior military aircraft in greater numbers than its foes, but has--in due course--out-trained them, too. This book provides a comprehensive historical survey of U.S. military training aircraft, including technical specifications, drawings and photographs of each type of fixed and rotary-wing design used over a 98-year period to accomplish the first step of the learning process: the training of pilots and aircrews. (from back cover)
2015.302.019	Handbook Flight Operating Instructions USAF Series H-5F, H-5G and H-5H and Navy Model HO3S-1 Helicopters	Chief of the Bureau of Aeronautics	This is the flight handbook for the Navy Model HO3S Helicopter. This description comes from Carl Snow, Midway volunteer, and former ATO (Air Traffic Officer) on the USS Midway in the 1980s: I doubt that more than a dozen people in the entire fleet ever referred to it as "Dragonfly," so they wouldn't look for it

Object ID	Title	Author	Summary
			under that. As the first helicopter to see wide-spread use aboard ship, it was usually just called "the helicopter, the whirly-bird, or even the egg-beater," but people on deck or in the air wing would refer to it officially as the HO3S. People who only knew about it from books might look under Dragonfly, but most folks would look under Sikorsky ship-board helicopter or HO3S. If you're wondering what to list as a key-word, probably all of the above would steer someone toward it or alert a researcher that it is mentioned. Since the 1954 movie "Bridges at Toko-Ri," it is sometimes called "Mickey Rooney's helo," or "the helicopter from 'Bridges...'," but you'd never look it up under that name.
2015.302.020	USS Princeton (LPH-5) - Cruise - 1964-1965	Schneider, Burt (ed.)	Pictorial account of the 1963-64 deployment of the USS Princeton (LPH-5) to the Far East. The ship had been converted from CVS-37 to LPH-5 in 1959. She departed Long Beach in time to arrive off South Vietnam in October. En route she participated in Exercise Royal Oak off the island of Molokai. In November Princeton participated in flood relief in Vietnam for 7 days. She then returned to operations off Vietnam with the Amphibious Ready Group. She departed the coast of Vietnam in May 1965 and returned to Long Beach. Ports of call included Manila, Subic Bay and Hong Kong. Marine Corps Battalion 3/3 and HMM-162 were embarked.
2015.302.021	Fabled Fifteen : The Pacific War Saga of Carrier Air Group 15	Cleaver, Thomas McKelvey	The record of Carrier Air Group 15 in World War II is astonishing by any measure: it scored 312 enemy aircraft destroyed, 33 probably destroyed, and 65 damaged in aerial combat, plus 348 destroyed, 161 probably destroyed, and 129 damaged in ground attacks. Twenty-six Fighting 15 pilots became aces, including their leader, Commander David McCampbell, who became

Object ID	Title	Author	Summary
			the U.S. Navy's "Ace of Aces." Twenty-one squadron pilots were killed in action and one in an operational accident aboard the carrier Essex. The fighter squadron's partners, Bombing Squadron 15 and Torpedo Squadron 15, scored 174,300 tons of enemy shipping, including 37 cargo vessels sunk, 10 probably sunk, and 39 damaged. As well, Musashi, the world's largest battleship, was sunk, along with a light aircraft carrier, a destroyer, destroyer escort, two minesweepers and other craft—plus the Zuikaku, the last surviving carrier that participated in the Pearl Harbor attack. Incredibly, every pilot of Torpedo 15 was awarded the Navy Cross, the highest award for bravery after the Medal of Honor. All of this took place between May and November, 1944. No other American combat unit in any service came close to a similar score in such a short time period. Air Group 15 participated in the two greatest naval battles in history, the Philippine Sea—also known as the Marianas Turkey Shoot—and Leyte Gulf, which saw the end of Japanese naval power. On June 19, 1944, Fighting 15 shot down 68.5 attacking Japanese aircraft, a one-day record unmatched by any other U.S. fighter squadron. In documenting the saga of Air Group 15's momentous six months at war, the author provides an intimate and insightful view of the group's fabled combat tour, including details of daily life and human interactions aboard the fleet carrier USS Essex during the busiest phase of the Pacific War. "Th book does an excellent job of weaving the stories of the air men- from day to day affairs to a grueling succession of air battles - within the context of the Pacific offensive...nicely
